AGRICULTURAL SYSTEMS TECHNOLOGY

The Department of Agricultural and Biosystems Engineering offers a bachelor of science degree in agricultural systems technology (AST).

AST graduates have the ability to apply science and technology to problems related to agriculture; they manage complex agricultural systems for sustainability. They find careers within a variety of agriculturally-related industries, businesses, and organizations, including: agricultural machinery, environment, government, farm builders, grain, feed, seed, fertilizer, chemical, food, biorenewable resources, and production agriculture.

Students majoring in AST B.S. degree choose between two options: Agricultural and Biosystems Management; or Machine Systems. Required AST courses are taught under the course designator TSM (Technology Systems Management).

For more information about the AST degree: http://www.abe.iastate.edu/undergraduate-students/agricultural-systems-technology/

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:
6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library: 13 cr.
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
One of the following: 3
ENGL 302 Business Communication
ENGL 309 Proposal and Report Writing
ENGL 314 Technical Communication
AGEDS 327 Advanced Communications for Agriculture and Life Sciences
One of the following: 3
SP CM 212 Fundamentals of Public Speaking
COMST 214 Professional Communication
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
LIB 160 Information Literacy 1
Total Credits 13

Mathematical, Physical, and Life Sciences: 25 cr.
MATH 151 Calculus for Business and Social Sciences 3
STAT 104 Introduction to Statistics 3
PHYS 111 General Physics 5
CHEM 163 College Chemistry 4
CHEM 163L Laboratory in College Chemistry 1
Biol 101 Introductory Biology 3
or BIOL 211 Principles of Biology I
Plus 3 life sciences credits from approved College of Agriculture and Life Sciences list
Total Credits 25

Business, Humanities, Ethics, and Social Sciences: 18 cr.
ACCT 284 Financial Accounting 3
ECON 101 Principles of Microeconomics 3
Ethics Course 3
TSM 370 Occupational Safety 3
Humanities course from College of Agriculture and Life Sciences list 3
International Perspectives course from University list 3
U.S. Diversity course from University list 3
Total Credits 18

Technical Core: 30 cr.
TSM 110 Introduction to Technology 1
TSM 111 Experiencing Technology 1
TSM 115 Solving Technology Problems 3
TSM 116 Introduction to Design in Technology 3
TSM 201 Preparing for Workplace Seminar 1
TSM 210 Fundamentals of Technology 3
TSM 214 Managing Technology Projects 1
TSM 270 Principles of Injury Prevention 3
TSM 310 Total Quality Improvement 3
TSM 363 Electric Power and Electronics for Agriculture and Industry 4
TSM 397 Internship in Technology R
TSM 399 Work Experience in Technology 2
TSM 415 Applied Project Management in Technology 2
TSM 416 Technology Capstone 3
Total Credits 30

No more than 4 cr. of TSM 397 may count toward graduation.

Agricultural and Biosystems Management Option: 34 cr.
TSM 322 Preservation of Grain Quality 2
TSM 322L Preservation of Grain Quality Laboratory 1
TSM 324 Soil and Water Conservation Management 3
TSM 325 Biorenewable Systems 3
TSM 327 Animal Production Systems 3
TSM 330 Agricultural Machinery and Power Management 3
TSM 433 Precision Agriculture 3
ECON 230 Farm Business Management 3
13 credits of free electives 13
Total Credits 34

Machine Systems option: 34 cr.
TSM 216 Advanced Technical Graphics, Interpretation, and CAD 2
A B E 271, A B E 272, or A B E 273 1
TSM 240 Introduction to Manufacturing Processes 3
TSM 330 Agricultural Machinery and Power Management 3
TSM 335 Tractor Power 4
TSM 337 Fluid Power Systems Technology 3
TSM 433 Precision Agriculture 3
TSM 443 Statics and Strength of Materials for Technology 3
TSM 465 Automation Systems 3
9 credits of free electives 9
Total Credits 34

• At least six (6) credits of 300-level or higher TSM classes (from the classes listed above)

• At least nine (9) credits that are not used to meet any other department, college, or university requirement.

### Courses primarily for undergraduates:

**TSM 110: Introduction to Technology**

(1-0) Cr. 1. F.

*Prereq: AST or I Tec majors only or permission of instructor*

Team-oriented introduction to agricultural systems technology and industrial technology. Internships, careers, competencies, academic success strategies, transition to academic life.

**TSM 111: Experiencing Technology**

(0-2) Cr. 1. S.

*Prereq: AST or I Tec majors only or permission of instructor*

Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of technology. Internships, competencies, industry visits.
TSM 115: Solving Technology Problems
(2-2) Cr. 3. F.S.
Prereq: Credit or enrollment for credit in MATH 140 or higher
Solving technology problems and presenting solutions through data analysis and technical report writing. Problem solving cycle, unit conversion, unit factor method, SI units, significant digits, graphing, curve fitting and computer programming. Use of modern hardware and software tools for applied data-driven problem solving.

TSM 116: Introduction to Design in Technology
(2-2) Cr. 3. F.S.
Use of parametric solid modeling software to create three dimensional solid models and document parts and assemblies. Includes national and international standards for documentation, design projects, and teamwork. Rapid prototyping design creation, 3D printing, assemblies, rendering, and detailing technical drawings.

TSM 201: Preparing for Workplace Seminar
(Cross-listed with A B E). (1-0) Cr. 1. F.S.
Prereq: Prereq: Sophomore classification in AE, AST, BSE, or I TEC
8 week course. Professionalism in the context of the engineering/technical workplace. Development and demonstration of key workplace competencies: teamwork, initiative, communication, and engineering/technical knowledge. Resumes; Cover Letters; Behavioral Based Interviewing; Industry Speakers; Preparation for internships experiences.

TSM 210: Fundamentals of Technology
(3-0) Cr. 3. F.S.
Prereq: TSM 115 or equivalent; and MATH 140 or higher
Introduction to problem solving related to fundamental agricultural and/or industrial technology systems and mathematical tools needed for data analysis. Basic laws of energy, force, and mass applied to technology systems such as: mechanical power transmission; heating, ventilation and air conditioning; electrical circuits. Introduction to engineering economics: using the time value of money to make economic decisions.

TSM 214: Managing Technology Projects
(2-0) Cr. 1. F.S.
Prereq: TSM 201 or A B E 201; and sophomore classification in A E, AST, BSE, or I TEC.
8 week course. Introduction to project management principles. Use of project management in technology-based projects for academic, industry, and personal use.

TSM 216: Advanced Technical Graphics, Interpretation, and CAD
(1-2) Cr. 2. F.S.
Prereq: TSM 116
Advanced computer-aided-design topics incorporating 3D design and documentation used in manufacturing settings. Topics include: geometric dimensioning and tolerancing, weldments, sheet metal parts, advanced visualization, feature based design of parts and assemblies.

TSM 240: Introduction to Manufacturing Processes
(1-4) Cr. 3. F.S.
A study of selected materials and related processes used in manufacturing. Lecture and laboratory activities focus on materials, properties, and processes. This includes plastics and metals.

TSM 270: Principles of Injury Prevention
(3-0) Cr. 3. F.
Basic foundations of injury causation and prevention in home, motor vehicle, public, and work environments. Offered online only.

TSM 310: Total Quality Improvement
(3-0) Cr. 3. S.
Prereq: STAT 101 or STAT 104, junior classification
Introduction to the fundamental concepts of TQM - Deming style of management, statistical studies to understand the behavior of products, processes, or services, and how to define and document processes and customer focus. Introduction to continuous improvement tools and methods - emphasis on team work and problem solving skills.

TSM 322: Preservation of Grain Quality
(2-0) Cr. 2. S.
Prereq: MATH 140 or higher
Principles and management for grain quality preservation. Quality measurement. Drying and storage. Fans and airflow through grain. Handling methods.

TSM 322L: Preservation of Grain Quality Laboratory
(0-3) Cr. 1. S.
Prereq: Credit or enrollment for credit in TSM 322

TSM 324: Soil and Water Conservation Management
(2-2) Cr. 3. S.
Prereq: MATH 140 or MATH 151
Introduction to engineering and conservation principles applied to the planning of erosion control systems, water control structures, water quality management, and drainage and irrigation systems.
TSM 325: Biorenewable Systems
(Cross-listed with A B E). (3-0) Cr. 3. F.
Prereq: ECON 101; CHEM 163 or higher; and MATH 140 or higher
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

TSM 327: Animal Production Systems
(3-0) Cr. 3. F.
Prereq: TSM 210
Confined animal feeding operations. Environmental controls for animal production. Response of animals to the environment. Heat and moisture balance in animal housing. Ventilation, water, feed handling, air pollution, odor and waste management systems.

TSM 330: Agricultural Machinery and Power Management
(2-3) Cr. 3. S.
Prereq: MATH 145 or MATH 151; and TSM 210
Selection, sizing, and operational principles of tractors and machinery systems. Cost analysis and computer techniques applied to planning and management of agricultural machine systems. Principles, operation, and application of agricultural machinery.

TSM 335: Tractor Power
(3-3) Cr. 4. F.
Prereq: TSM 210, MATH 145
Theory and construction of tractor engines, mechanical power trains and hydraulic systems. Introduction to traction, chassis mechanics, and hydraulic power.

TSM 337: Fluid Power Systems Technology
(2-2) Cr. 3. S.
Prereq: TSM 210
Fundamental fluid power principles. Fluid properties. Function and performance of components such as pumps, valves, actuators, hydrostatic transmission. Analysis of fluid power circuits and systems. Introduction to electrohydraulics. Course includes lab using fluid power trainers.

TSM 340: Advanced Automated Manufacturing Processes
(2-2) Cr. 3. F.
Prereq: TSM 216, TSM 240, MATH 151
NC programming operations for CNC mills and lathes. Transfer of parts descriptions into detailed process plans, tool selection, and NC codes. Computer assisted CAD/CAM NC programming for 2D/3D machining and machining of student programmed NC code in lab.

TSM 363: Electric Power and Electronics for Agriculture and Industry
(3-3) Cr. 4. F.
Prereq: TSM 210
Basic electricity. Electrical safety, wiring, 3-phase service, controls, and motors for agricultural and industrial applications. Planning building lighting and electrical systems. Electronics to sense, monitor, and control mechanical processes.

TSM 370: Occupational Safety
(3-0) Cr. 3. S.
Prereq: TSM 270, junior standing
Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing a safe workplace for their employees. Includes the identification and remediation of workplace hazards.

TSM 371: Occupational Safety Management
(2-0) Cr. 2. S.
Introduction to occupational safety and health administration and management. Focus on development and management of safety programs and obtaining employee involvement in occupational safety programs.

TSM 372: Legal Aspects of Occupational Safety and Health
(2-0) Cr. 2. Alt. F., offered odd-numbered years.
Prereq: TSM 371
A review of the common legal issues facing safety practitioners in the workplace. Includes OSHA, EPA and DOT regulations; workers’ compensation, as well as common liability issues.

TSM 376: Fire Protection and Prevention
(3-0) Cr. 3. Alt. F., offered even-numbered years.
An overview of the current problems and technology in the fields of fire protection and fire prevention, with emphasis on industrial needs, focusing on the individual with industrial safety responsibilities.

TSM 393: Topics in Technology
Cr. 1-4. F.S.SS.
Offered as demand warrants. Web-based instruction.

TSM 393A: Topics in Technology: Agriculture and Biosystems Management
Cr. 1-4. F.S.SS.
Offered as demand warrants. Web-based instruction.

TSM 393B: Topics in Technology: Machine Systems
Cr. 1-4. F.S.SS.
Offered as demand warrants. Web-based instruction.
TSM 393C: Topics in Technology: Manufacturing  
Cr. 1-4. F.S.S.  
Offered as demand warrants. Web-based instruction.

TSM 393D: Topics in Technology: Occupational Safety  
Cr. 1-4. F.S.S.  
Offered as demand warrants. Web-based instruction.

TSM 393E: Topics in Technology: Chemical Application Systems  
Cr. 1-4. F.S.S.  
Offered as demand warrants. Web-based instruction.

TSM 393F: Topics in Technology: Agricultural Safety and Health  
Cr. 1-4. F.S.S.  
Offered as demand warrants. Web-based instruction.

TSM 393G: Topics in Technology: Electronic Integration for Agriculture and Production Systems  
Cr. 1-4. F.S.S.  
Offered as demand warrants. Web-based instruction.

TSM 393I: Topics in Technology: Irrigation Systems Management  
Cr. 1-4. F.S.S.  
Offered as demand warrants. Web-based instruction.

TSM 393J: Topics in Technology: Machinery Management Using Precision Agriculture Technology  
Cr. 1-4. F.S.S.  
Offered as demand warrants. Web-based instruction.

TSM 397: Internship in Technology  
Cr. R. Repeatable. F.S.S.  
Prereq: At least 45 credits of coursework, AST or I Tec major, and approval of internship coordinator  
A supervised work experience in an approved learning setting with application to technology practices and principles. Reporting during work experience and self and employer evaluation required. Minimum GPA requirement.

TSM 399: Work Experience in Technology  
Cr. 2. Repeatable, maximum of 4 credits. F.S.S.  
Prereq: TSM 397 in the preceding semester and approval of internship coordinator  
Written reports and reflection on work experience. A maximum of 4 credits of TSM 399 maybe be used toward the total credits required for graduation.

TSM 408: Interdisciplinary Problem Solving  
(3-0) Cr. 3.  
Prereq: Junior or senior classification  
Use of the Theory of Constraints as a way of approaching problem solving, win-win negotiation, project planning and effective delegation in the context of engineering/business systems. Team projects aimed at improving design outcomes.

TSM 409: Interdisciplinary Systems Effectiveness  
(3-0) Cr. 3.  
Prereq: Junior or senior classification  
Focus on functions that determine the effectiveness of an entire organization. Generic Theory of Constraints solutions to production, distribution, and project management are compared to traditional solutions. Strategy for improvements discovered using simulations.

TSM 415: Applied Project Management in Technology  
(2-0) Cr. 2. F.S.  
Prereq: Senior classification with less than 32 credits remaining; TSM 214; and credit or enrollment for credit in TSM 310.  
Implementation of project management principles using case studies and teamwork; problem definition in a technology context; development of charter for technology capstone project.

TSM 416: Technology Capstone  
(1-4) Cr. 3. F.S.  
Prereq: TSM 415 in previous semester  
Application of project management tools to a technology capstone project; development and evaluation of potential project solutions using tools from the technology curriculum; problem resolution emphasizing communication, critical analysis, and planning techniques; presentation of project through oral presentation and written reports with input from client, faculty, and other stakeholders.

TSM 433: Precision Agriculture  
(Dual-listed with TSM 533). (2-2) Cr. 3. F.  
Prereq: MATH 140 or higher  
TSM 440: Cellular Lean Manufacturing Systems  
(2-2) Cr. 3. F.  
Prereq: TSM 310  
Introduction to lean tools and techniques that reduce costs and improve business performance: JIT, VSM, SMED, Kaizen, Standard Work, Cycle Time Reduction, Takt Time, A3, etc. Emphasis on lean thinking and competency development through application: simulations, case studies, industry guests and mentors, teamwork and industry-related lean projects.

TSM 443: Statics and Strength of Materials for Technology  
(2-2) Cr. 3. S.  
Prereq: PHYS 111; and MATH 145 or MATH 151  
Application of standard analytic and computer based techniques of solving problems related to force and moments. The properties of materials and how to select appropriate materials for a particular design is reviewed.

TSM 444: Facility Planning  
(3-0) Cr. 3. F.  
Prereq: TSM 216; TSM 240; and STAT 101 or STAT 104  
Fundamental principles and practices in designing, evaluating, and organizing new or existing facilities. Emphasis on CAD-based facility design, production flow analysis, activity relationship analysis, materials handling, office layout, supporting services design, and facility cost analysis.

TSM 465: Automation Systems  
(2-2) Cr. 3. S.  
Prereq: TSM 363  
Theory and applications of automation systems. Emphasizes features, capabilities, design and programming skills of Programmable Logic Controller (PLC) based industrial control systems. Introduction to industrial robots and sensors.

TSM 470: Industrial Hygiene: Physical, Chemical, and Biological Hazards  
(3-0) Cr. 3. Alt. F., offered odd-numbered years.  
Prereq: MATH 151 or higher  
A qualitative and quantitative introduction to health effects of chemical, biological, and physical hazards in a workplace.

TSM 471: Safety Laboratory  
(0-2) Cr. 1. Alt. F., offered odd-numbered years.  
Prereq: Credit or enrollment for credit in TSM 470  
Introduction to equipment, methods, and strategies to measure, evaluate, control, and research hazards and risk in the workplaces.

TSM 477: Risk Analysis and Management  
(Dual-listed with TSM 577), (3-0) Cr. 3. Alt. F., offered even-numbered years.  
Prereq: MATH 151; and STAT 101 or STAT 104  
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today's complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 490: Independent Study  
Cr. 1-4. Repeatable.  
Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490H: Independent Study: Honors  
Cr. 1-4. Repeatable.  
Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490I: Independent Study: Manufacturing  
Cr. 1-4. Repeatable.  
Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490J: Independent Study: Agriculture and Biosystems Management  
Cr. 1-4. Repeatable.  
Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490M: Independent Study: Machine Systems  
Cr. 1-4. Repeatable.  
Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department  
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.
TSM 490O: Independent Study: Occupational Safety
Cr. 1-4. Repeatable.
Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department.
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 493: Workshop in Technology
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493A: Workshop in Technology: Agriculture and Biosystems Management
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493B: Workshop in Technology: Machine Systems
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493C: Workshop in Technology: Manufacturing
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493D: Workshop in Technology: Occupational Safety
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 495: Agricultural and Biosystems Engineering Department Study Abroad Preparation or Follow-up
(Cross-listed with A B E). Cr. 1-2. Repeatable. F.S.SS.
Prereq: Permission of instructor
Preparation for, or follow-up of, study abroad experience (496). For preparation, course focuses on understanding the tour destination through readings, discussions, and research on topics such as the regional industries, climate, crops, culture, economics, food, geography, government, history, natural resources, and public policies. For follow-up, course focuses on presentations by students, report writing, and reflection. Students enrolled in this course intend to register for 496 the following term or have had taken 496 the previous term.
Meets International Perspectives Requirement.

TSM 496: Agricultural and Biosystems Engineering Department Study Abroad
(Cross-listed with A B E). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
Tour and study at international sites relevant to disciplines of industrial technology, biological systems engineering, agricultural systems technology, and agricultural engineering. Location and duration of tours will vary. Trip expenses paid by students. Pre-trip preparation and/or post-trip reflection and reports arranged through 495.
Meets International Perspectives Requirement.

Courses primarily for graduate students, open to qualified undergraduates:

TSM 533: Precision Agriculture
(Dual-listed with TSM 433). (2-2) Cr. 3. F.
Prereq: MATH 140 or higher

TSM 540: Advanced Design and Manufacturing
(3-0) Cr. 3. S.
Prereq: Permission of instructor
Application of six sigma philosophy to advance product design and process control. Application of value steam mapping to the existing manufacturing system to develop future continuous improvement plans. Application of Taguchi Parameter design methodologies for optimizing the performance of manufacturing processes. Application of Taguchi Tolerance Design methodologies for product design.

TSM 575: Safety and Public Health Issues in Modern Society
(2-0) Cr. 2. Repeatable, maximum of 2 times.
Exploration and analysis of current safety and public health issues impacting society. The focus will be on topics that impact individuals in work, public, and home environments.

TSM 577: Risk Analysis and Management
(Dual-listed with TSM 477). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: MATH 151; and STAT 101 or STAT 104
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today's complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.
TSM 590: Special Topics in Technology
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590A: Special Topics in Technology: Agriculture and Biosystems Management
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590B: Special Topics in Technology: Machine Systems
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590C: Special Topics in Technology: Manufacturing
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590D: Special Topics in Technology: Occupational Safety
Cr. 1-4. Repeatable, maximum of 4 credits.
Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 593: Workshop in Technology
Cr. 1-3. Repeatable.
Prereq: Permission of instructor

TSM 598: Technical Communications for a Master’s Degree
(Cross-listed with A B E). Cr. 1. F.S.SS.
A technical paper draft based on the M.S. thesis or creative component is required of all master’s students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on M.S. thesis or creative component is required of all master’s students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

TSM 599: Creative Component
Cr. 1-3. Repeatable, maximum of 6 credits.
A discipline-related problem to be identified and completed under the direction of the program adviser. Three credits required for all nonthesis master’s degree students.

Courses for graduate students:

TSM 601: Graduate Seminar
(Cross-listed with A B E). (1-0) Cr. 1. F.
Keys to starting a good MS thesis or PhD dissertation project. Learning how to begin formulating research questions. Review of literature, research hypotheses, objectives, methods, making figures and tables, and discussing results. Discussion of appropriate outlets including peer-reviewed journals, patents and intellectual property rights, responsible conduct, plagiarism, authorship, and reproducible research. Using peer review, conducting a peer review, and responding to feedback. Other topics may include on-campus library resources, data management, and time management.

TSM 652: Program and Learner Evaluation
Prereq: STAT 401 or equivalent
Techniques for evaluating learners, facilities, programs, and staff utilizing theories for developing measurement instruments. Outcomes assessment is emphasized.

TSM 655: Academic Leadership in Technology and Engineering
Prereq: Permission of instructor
A definition of the faculty role in technology and engineering disciplines, including strategies for dealing with programs, personnel, and constituencies are presented. Leadership skills involving team formation, team operation, and conflict resolution are addressed.

TSM 657: Curriculum Development in Technology and Engineering
Prereq: Permission of instructor
Basic concepts, trends, practices, and factors influencing curriculum development, techniques, organization and procedures. Emphasis will be given to course development using the backward design process.

TSM 694: Teaching Practicum
(Cross-listed with A B E). Cr. 1-3. Repeatable. F.S.SS.
Prereq: Graduate classification and permission of instructor
Graduate student experience in the agricultural and biosystems engineering departmental teaching program.
TSM 697: Internship in Technology
Cr. R.

Prereq: permission of major professor and approval by department chair, graduate classification

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

TSM 698: Technical Communications for a Doctoral Degree
(Cross-listed with A B E). Cr. 1. F.S.S.

A technical paper draft based on the dissertation is required of all Ph.D. students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on the dissertation is required of all Ph.D. students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

TSM 699: Research
