The Iowa State University Catalog

The Iowa State University Catalog is a one-year publication which lists all academic policies, and procedures.

The catalog also includes the following: information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses developed and offered since catalog publication can be found on the Web at http://www.registrar.iastate.edu/faculty-staff/courses/explistings.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

About the Catalog

The Iowa State University Catalog is a one-year publication, which lists all academic policies, and procedures. Versions prior to 2011 were two-year publications and available in hard copy as well as online.

The catalog also includes information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses and programs take effect in the fall term. New courses developed and offered since catalog publication are called experimental courses. A list can be found on the Web at www.registrar.iastate.edu/faculty-staff/courses/explibings.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Updates to the Catalog

The curriculum process is governed by the Faculty Senate. The ad hoc committee, Faculty Senate Curriculum Committee (http://www.facsen.iastate.edu/AACouncil/curriculumcommittee.htm) considers new curricula proposals, changes and discontinuations to the catalog. Additional information may be in the college governance documents.

The curriculum approval process generally consists of a proposal from the department/program level, approved by the department/program curriculum committee (if applicable), college curriculum committee, and the dean. Additional approvals are needed from the Graduate College if the program proposal is a graduate program. The program proposal is submitted to the Faculty Senate Curriculum committee for review. The Academic Affairs Committee reviews the proposal before passing it onto the Faculty Senate. The Board of Regents, State of Iowa approves all new programs and majors. For additional information about the approval process, see the link to Faculty Senate/Faculty Handbook Curriculum Approvals – Section 10.8

http://www.provost.iastate.edu/faculty/handbook/current/section10.html#section-10.8

Catalog updates are generally processed with approvals from department, college, and Faculty Senate Curriculum Committee (http://www.facsen.iastate.edu/AACouncil/curriculumcommittee.htm) representatives. Editing begins in late February with course changes due to the Office of the Registrar by June 1. Curriculum and other general information is due to the Office of the Registrar by December 1. Publication is the following February.

See the Faculty Senate Curriculum Committee web site (http://www.registrar.iastate.edu/fssc) for details related to catalog editing.

Accreditation and Administration

Accreditation

Iowa State University is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools. 

Higher Learning Commission of the North Central Association of Colleges and Schools

230 South LaSalle St., Suite 7-500
Chicago, IL 60604-1411
(800) 621-7440; (312) 263-0456
Fax: (312) 263-7462

www.ncahigherlearningcommission.org (http://www.ncahigherlearningcommission.org)

Board of Regents, State of Iowa

www.regents.iowa.gov/ (http://www.regents.iowa.gov)

The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Urbandale.

Officers of Administration

Steven Leath, Ph.D.
President of the University
Jonathan A. Wickert, Ph.D.
Senior Vice President and Provost
Warren R. Madden, M.B.A.
Vice President for Business and Finance
Thomas L. Hill, Ph.D.
Vice President for Student Affairs
Wendy K. Wintersteen, Ph.D.
Dean of the College of Agriculture and Life Sciences
Michael R. Crum, D.B.A.
Interim Dean of the College of Business
Luis Rico-Gutierrez, M.S.
Dean of the College of Design
Mufit Akinc, Ph.D.
Interim Dean of the College of Engineering
Pamela J. White, Ph.D.
Dean of the College of Human Sciences
Beate Schmittmann, Ph.D.
Dean of the College of Liberal Arts and Sciences
Lisa Nolan, D.V.M., Ph.D.
Dean of the College of Veterinary Medicine
Cathann A. Kress, Ph.D.
Vice President for Extension and Outreach
Sharron Quisenberry, Ph.D.
Vice President for Research and Economic Development
David K. Holger, Ph.D.
Dean of the Graduate College
Olivia M. Madison, M.A.
Dean of the Library
Pamela Anthony, Ph.D.
Dean of Students
Progressing Toward a Degree

Classification

Classification (year in school) is determined by the number of credits completed and reported to the registrar, and is based on credit hours earned, not merely credit hours attempted. The grades F and NP and the marks I and X do not contribute toward credit hours earned and thus are not considered in determining year in school.

Classification in all colleges except Veterinary Medicine is as follows:

- **Sophomore**: 30 credit hours earned
- **Junior**: 60 credit hours earned
- **Senior**: 90 credit hours earned

Students who have a bachelor's degree and are working toward another undergraduate degree, licensure, or admission to a specific graduate or professional program, are typically classified as a senior.

Transfer students without a degree are classified on the basis of credits accepted by Iowa State University.

Veterinary medicine students are promoted from the first- to the second-, third-, and fourth-year classes based upon satisfactory completion of the required courses for each year. To be promoted to the second-year class, students must have a cumulative grade-point average of at least 1.67 for all courses in the first year of the veterinary medicine curriculum. To be promoted to the third- and fourth-year classes, students must have a cumulative grade point average of at least 2.00 for all courses in the professional curriculum.

A student, who is attending Iowa State and decides not work toward an undergraduate degree, will be classified as a special (nondegree) student. Admission requirements and academic standards regulations are the same as regular students. Credits taken as a special (nondegree) student are applicable for undergraduate degree purposes if the student is admitted later as a regular undergraduate. Credits obtained as an undergraduate special student may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as special (nondegree) students in the College of Liberal Arts and Sciences and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as regular students. Permission to enroll in one academic course may be granted under special circumstances.

Policies for Graduate Students

The Graduate College has specific policies approved by the Graduate College body. The Graduate College Handbook is the official source for all policies related to graduate students. See http://www.grad-college.iastate.edu/publications/ghandbook/ for the latest updated information.

Transfer of Credits

Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable for transfer credit. In addition, credits applied toward a particular degree will be determined by the student's college, based on relevance to the students' program requirements as well as the level of performance deemed necessary for successful progress in that program. For example, courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University and to new transfer students. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student's Iowa State cumulative grade point average.

A student who is admitted to ISU that has credits transferred from another college or university is required to have at least a 2.00 cumulative grade-point average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student will have a transfer quality-point deficiency.

This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any quality-point deficiency, including a transfer quality-point deficiency.

Students should consult with their academic advisers and the Office of Admissions before taking coursework at other colleges and universities to be certain the credits will transfer and will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic adviser and with the Office of Admissions. Questions concerning how transfer credits are applied toward a degree program should be referred to the academic adviser and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits before receiving a degree from Iowa State University must be completed at Iowa State University.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average, even if the credits are included in the last 32 semester credits. For information on applying to the program see Index, Regent Universities Student Exchange Program.

Degree Planning - ISU Degree Audit

In addition to being properly registered, students are responsible for knowing the requirements for their degree and planning their schedule to meet those requirements. One way to monitor progress toward a degree is with the ISU degree audit.

Students may access their ISU degree audit through AccessPlus (https://accessplus.iastate.edu/frontend/login.jsp). The degree audit shows courses that have been completed, courses in which the student is currently enrolled, and graduation requirements that need to be completed for the student's curriculum.

Students should use the degree audit information to help them review progress towards their degree(s), plan their course of study to complete degree requirements, and select courses for the next term. Graduation evaluators in the Office of the Registrar use the degree audit during the term a student will graduate to determine if the student will meet all degree requirements upon successful completion of the courses on the student's schedule that term.

In addition, through AccessPlus (https://accessplus.iastate.edu/frontend/login.jsp), students may request a degree audit for any major available at Iowa State. The audit results will show how their completed and in-progress course work applies toward other majors or options offered at the University.

For further information about how completed courses fulfill degree requirements or how other courses will apply toward their degree requirements, students should see their adviser.

Two Bachelor's Degrees

Students may receive two bachelor's degrees if the requirements for each major (curriculum) are met and the total number of semester credits earned is at least 30 more than the requirements of the curriculum requiring the greater number of credits. This rule applies whether or not the degrees are awarded at the same time. Students should have an academic adviser in each major (curriculum), with one adviser being designated as the registration adviser. Students should request approval to pursue two degrees by completing the form, Request for Double Major/Curriculum or Two Degrees. This form is available from advisers and classification offices. Each adviser will have access to the student's information after this form has been processed. The appropriate department and college must approve each degree program.

Students who have earned advanced degrees and wish to earn a second Bachelor's Degree may be eligible for a college waiver of certain basic and general education requirements. Students should contact the department offering the major for advice and appropriate planning.

Double Major/Curriculum

A double major is a program for a single degree in which all requirements for two or more majors (curricula) have been met. The majors (curricula) may be in different colleges or within the same college or department. The diploma and permanent record will designate all majors (curricula) that are completed at the same time.

To declare a double major (curriculum), students should complete the form, "Request for a Double Major/Curriculum or Two Degrees." This form, available from advisers and classification offices, should be completed at least one term prior to graduation. One major (curriculum) should be designated as primary and the other secondary for purposes of record keeping, but the student's rights and responsibilities are the same in both majors. The adviser of the primary major will serve as the student's registration adviser, but both advisers will have access to the student's information.

Degree programs must be approved for each major (curriculum) by the appropriate department and college. One of the majors may subsequently be canceled using the same form.

Students in the College of Engineering are able to earn a degree with a second major/curriculum as long as the second major/curriculum is within another college, meets all requirements of the additional programs and contains a minimum of 15
undergraduate major. Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education requirements. They must, however, meet all requirements for the major, including complementary courses. Students in the B.L.S. curriculum in the College of Liberal Arts and Sciences do not have majors.

Second Major (Curriculum) Completed after the Bachelor’s Degree

After receiving a bachelor’s degree, a person may wish to complete all requirements for another major (curriculum). Approval of the department of the second major (curriculum) is needed before study for the program is begun. At the completion of the program a notation will be made on the permanent record (transcript), but no change will be made on the diploma received at the time of graduation. A degree program must be approved for the second major/curriculum by the department and by the dean’s office.

Changing Curriculum or Major

A student’s freedom to change their major, and the procedure that should be followed, depend on the student’s academic standing and on policies of individual colleges as approved by the provost.
1. If students are not on academic probation (P) and have never been dismissed and reinstated, they may change their major by consulting first with their adviser. If, however, they have been on academic probation in the past, students are subject to regulation 4 below. Procedures for changing curriculum or major are as follows:
   A. If the change involves majors within the same college, they should check with the college office to obtain instructions as to how to make the change.
   B. If the change involves majors in different colleges, they should obtain a Change of Curriculum/Major form and their file from their adviser, present these materials to the student services office of their present college, then to the student services office of the college to which they are transferring, and finally to the office of their new major.

2. Students on academic probation (P) must first obtain permission to enter the new major. Permission comes from the dean of the college responsible for that major in consultation with the department head. If permission is granted, students should then follow the procedures described above. If they are on academic probation and want to transfer to another college in the university, they must do so before the last day to drop a course in period 2 (see Making Schedule Changes (p. 120)).

3. Students who have been reinstated may not transfer to another college within the university during the first term following reinstatement, and they may not at any time transfer back to the college that originally dismissed them without the permission of the academic standards committee of that college.

4. Students who transferred from one college to another while on academic probation, (P) may not transfer back unless they have the permission of the academic standards committee of the college from which they originally transferred.

Declaring a Minor

Many departments and programs in the university specify requirements for an undergraduate minor. A record of requirements completed appears on students’ transcripts. All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State University. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass–not pass basis. See /collegescurriculum/#minors (p. 139) for additional information regarding policies which govern minors. To declare a minor, students must submit a completed Request for a Minor form to their college office at least one term before graduation. The minor may be from the catalog under which the student is graduating or a later catalog.

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major.

An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above
4. A student may not receive both an undergraduate major and a certificate of the same name
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree
6. A certificate is not awarded if the baccalaureate requirements are not finished
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate
8. Courses taken for a certificate may not be taken on a pass–not pass basis
9. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate
10. A notation of a completed certificate will be made on a student’s transcript and a printed certificate will be awarded.

Graduation

Seniors must file a graduation application with the Graduation Office, 214 Enrollment Services Center. Students will be notified of their graduation status approximately mid semester of their graduation term. For graduation application instructions and deadlines, go to www.registrar.iastate.edu/graduation/application.html

Iowa State University commencement ceremonies are held at the end of fall and spring semesters. Undergraduate students expected to graduate at the end of summer semester are invited to participate in the spring ceremony preceding their graduation term or the fall ceremony following their graduation term. In addition to the formal University commencement ceremony, the undergraduate colleges host graduation activities take place at the end of fall and spring semesters. For more information see www.registrar.iastate.edu/graduation/

Verification of satisfactory final grades will be completed approximately two weeks after the end of the semester and diplomas will be mailed to all successful degree candidates. Students must ensure the following before they can graduate:

1. Registration for the term has been completed and the date of graduation is correct on the degree audit printout.
2. Sufficient credits, acceptable toward graduation, have been earned to meet the minimum requirements for their curriculum. (Some examples of credit not acceptable toward graduation are: elective credits beyond those allowed in a curriculum, credits earned in passing the same course more than once, more than four credits of Athletics 101, and credit in two courses for which the catalog states that only one may count toward graduation.)
3. They have achieved a set of communication competencies established by the department as appropriate for the major.
4. A cumulative grade point average of at least 2.00 was earned in all work taken at Iowa State; and student has met all special grade point average requirements established by their college, department, or program in specified courses.
5. A. Students admitted from another college or university with a quality-point deficiency, must have earned sufficient quality points above a 2.00 at Iowa State to offset their transfer grade point deficiency.
   B. Students who have taken work at another college or university prior to or after having been a student at Iowa State, must have submitted a transcript of all such college study attempted to the Office of Admissions. This work must average 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such a transcript is grounds for dismissal.

6. Incompletes in courses required for graduation have been removed by midterm of the term of graduation.
7. At least 32 credits have been earned in residence at Iowa State University, and the final 32 credits were taken at Iowa State. (Six of the last 32 credits may be transferred to Iowa State, with prior permission of their major department.) Iowa State University must receive an official transcript of all transfer work by midterm of the term of graduation.
8. Outstanding financial obligations owed the university have been paid in full. Students who owe an outstanding obligation to the university will have a hold placed on their records and they will not receive their diploma or transcript. If students have questions about this policy, they should contact the graduation area of the Office of the Registrar.
Academic Privileges and Opportunities

Credit by Examination

Academic credit may be earned by means of special examinations. The Credit by Examination (CBE) program is available to current Iowa State students as well as prospective and entering students. Students with college-level proficiency in particular areas are encouraged to investigate credit by examination early in their college careers. For more information, see Credit by Examination (https://nextcatalog.registrar.iastate.edu/admissions/#creditbyexaminationcbe).

Pass-Not Pass Grading

Students may choose to take a maximum of 9 semester credit hours on a Pass-Not Pass basis, meaning that only a P or NP will be recorded as their final grade in the course. The purpose of P-NP grading is to encourage students to broaden their education by taking courses outside the usual program of study for their major and minor disciplines. The following policies apply:

1. Undergraduate students who have earned at least 40 semester credits and who are not on academic probation (P) at the beginning of the semester are eligible. A special (nondegree) student must obtain approval from their academic advisor and college dean.

2. Only elective courses may be taken on a P-NP basis. In specific majors, some restrictions may apply, so students should consult with their academic adviser.

3. Except for restrictions on its own undergraduate majors, a department may not deny the availability of any of its course offerings on a P-NP basis.

4. Courses offered on a satisfactory-fail basis may not be taken P-NP.

5. Students should register for a P-NP course in the same manner and at the same time that they register for their other courses. Students should then change to P-NP by processing a schedule change form with their academic adviser’s signature in the P-NP approval section of the form.

6. Students who elect to change back to a graded basis should process the change using the P-NP section of the schedule change form.

7. Changes to or from a P-NP basis must be made before the last day to drop (usually the Friday of week 10 of the term). If the change from P-NP to a graded basis is made after the first 10 class days of a semester (first five days of summer session), the course will count toward the total P-NP credits allowed.

8. Registration on a P-NP basis is not indicated on the instructor’s class list. Students will receive a P if their grade is D minus or better and an NP if their grade was F.

9. Neither P (earned grade of D minus or better) nor NP (earned grade of F) is counted in calculating a student’s grade point average (GPA).

10. When students change their curriculum, any P credits that they have accumulated will be accepted by the new department if such credits are in courses normally accepted by the department.

11. Credits taken on a P-NP basis at another institution and transferred to Iowa State may be applied as electives in a student’s degree program if the credits are otherwise acceptable in that program. The number of P-NP transfer credits that can be accepted depends on the number permitted by the institution from which the student is transferring. If a student transfers more than nine semester P-NP credits, no additional Iowa State P-NP credits can be applied to the student’s degree program.

Auditing

To audit a course means to enroll in the course without receiving credit for the course. The instructor of the course approves the audit request. Students are assessed tuition and fees as though they are taking the course for credit, but the audited course does not count in determining full-time student status. However, an audited course does count towards the maximum allowable credits per semester. Audited courses do not appear toward the student’s permanent record and a schedule change fee will be assessed to the student’s university bill.

Rights and privileges: Once enrolled in an audited course, auditors have the same rights and privileges as any student taking the course for credit. Their names appear on the class list with a notation that they are auditing the course. Audited courses do not appear on the student’s permanent record except by special request from the student. A request form can be downloaded from the Office of the Registrar web site at www.registrar.iastate.edu/forms.

Audit Deadlines and Required Signatures

In addition to the deadlines provided below, note that instructors must approve all audits.

- Full semester courses:

  Adding an audit-day 10 deadline:
  - Through day 5 of classes: instructor approval required.
  - Day 6-10: instructor, adviser approval required; schedule change fee applies.
  - After day 10: only with extenuating circumstances, instructor, adviser, college approval required; schedule change fee applies.

- Changing status from audit to credit-day 10 deadline:
  - Through day 5 of classes: instructor approval required.
  - Day 6-10: instructor, adviser, college approval required; schedule change fee applies.
  - After day 10: only with extenuating circumstances, instructor, adviser, college approval required; schedule change fee applies.

- Partial semester or summer courses:

  Deadlines are determined based on the length of the course. For deadlines concerning partial term or summer courses, contact the Student Scheduling Office, 515-294-2331.

Independent Study

Most departments offer opportunities for independent study through a 490 course listing. Usually a minimum of 6 to 10 credits of coursework in the department is required before independent study is permitted. Students who are interested in this kind of experience in a particular department should check the catalog to determine the department’s prerequisites to register for 490. 490H sections are reserved for students in the University Honors Program.

Students should check with the department about procedures, in addition to meeting the prerequisites, for registering for 490. A written plan of study is prepared in advance with a faculty member who has agreed to supervise the student’s work, to evaluate progress and the final product, and to assign a grade. Initiation of the plan of study should occur prior to the semester in which enrollment is desired. Both the student and the instructor should agree on the number of credits for which the student will enroll, the amount and kind of work he or she will do for that credit, and the system by which she or he will be graded (A-F or S/F). Students should not expect to register for or add 490 credit without an instructor’s permission. Some colleges and/or departments have limits on the number of credits of 490 that may be applied toward graduation.

AccessPlus Information System

accessplus.iastate.edu

AccessPlus is a secure and confidential campus information system that is available via the World Wide Web. Students, employees, and affiliates view personalized menus from campus and home workstations. For public convenience, AccessPlus stations are available in the Memorial Union and at the Visitors Information Center. Students who use AccessPlus to register classes, obtain transcripts or enrollment certifications, submit emergency contact information, view and print current term schedules, view class meeting rooms, class instructors, academic records, final grades, financial aid status, current university bill, academic adviser assignment and projected date of graduation. University employees use the system to view personal information such as pay history and insurance. Some employees also perform business-related functions. Information about and access to AccessPlus may be found at www.registrar.iastate.edu/info/access.html or accessplus.iastate.edu.

Third Party Access on AccessPlus

Third party access is an option in AccessPlus that allows students to grant access to selected personal information to a trusted third party. For example, Third Party Access allows a student to set up a special account for a parent or family member to view their grades and/or pay their university bill. More information on creating third party accounts is available from Help after signing onto AccessPlus at https://accessplus.iastate.edu/frontend/tpa-info.jsp.
Academic Advising

Academic advising and advisers are an intentional, collaborative relationship based on trust and mutual respect that promotes the student’s development of competence, autonomy, and sound decision making skills. Adviser-student interactions are grounded in teaching and learning and are vital in promoting student growth and personal development through learning, discovery, and engagement. Academic advising supports the mission of the University.

Academic Advising Process

All undergraduate students are assigned an academic adviser based on their major/curriculum. A new adviser assignment is made when a student changes majors/curricula. Advisers serve as a primary resource for students, connecting them with the wide variety of services and academic opportunities available to them. The advising experience begins during the prospective student stage and continues through graduation. The goal of academic advising is an individualized academic experience for each student developed through a mentoring relationship.

Academic Advising Responsibilities

A successful academic advising relationship involves fulfillment of responsibilities on the part of both the student and the academic adviser. Student responsibilities include:

- Knowing Iowa State University policies and procedures
- Knowing graduation requirements for degree program
- Understanding and accepting the consequences of their academic decisions
- Seeking, evaluating, and acting upon advising assistance
- Taking responsibility for accomplishing his/her degree plan

Academic Adviser responsibilities include:

- Assisting students in achieving the learning outcomes of their academic program, their college, and the university
- Referring students to appropriate campus resources
- Empowering students to develop an academic plan appropriate to the student’s abilities, interests, academic and career goals
- Communicating university policies and procedures accurately

Evaluation of Academic Progress

Evaluation Procedures

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.

Examinations

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students’ learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.
2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:
   A. The course is multi-sectioned.
   B. A common departmentally developed examination will be administered to all students in all sections at the same time.
   C. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted.

Students who are unable to take a separately scheduled examination at the scheduled time indicated in the Schedule of Classes, because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.

3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:
   A. Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.
   B. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses that the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.
   C. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.
   D. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.
   E. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.
   F. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

Dead Week

The last week of fall and spring undergraduate classes has been designated Dead Week by the Government of the Student Body and Iowa State University. The intent is to provide students with time for review and preparation for final examinations. Therefore, no student organization registered with the Student Organization Office may hold meetings or sponsor events without the expressed permission of Program Coordinator in the Student Activities Center, Memorial Union. For academic programs, the last week of classes is considered to be a normal week in the semester except that in developing their syllabi faculty shall consider the following guidelines:

1. Mandatory final examinations in any course may not be given during Dead Week except for laboratory courses and for those classes meeting once a week only and for which there is no contact during the normal final exam week. Take-home final exams and small quizzes are generally acceptable. (For example, quizzes worth no more than 10 percent of the final grade and/or that cover no more than one-fourth of assigned reading material in the course could be given.)
2. Major course assignments should be assigned prior to Dead Week (major assignments include major research papers, projects, etc.). Any modifications to assignments should be made in a timely fashion to give students adequate time to complete the assignments.
3. Major course assignments should be due no later than the Friday prior to Dead Week. Exceptions include class presentations by students, semester-long projects such as a design project assignment in lieu of a final, and extensions of the deadline requested by individual students.

Instructors are reminded that most students are enrolled in several courses each semester, and widespread violation of these guidelines can cause student workloads to be excessive as students begin their preparation for final examinations. Students are reminded that their academic curriculum is their principal reason for being in college and they have a responsibility to study in a timely fashion throughout the entire semester.

Grading System

Grades represent the permanent official record of a student's academic performance. The grading system at Iowa State operates according to the following regulations:

1. **Student performance or status** is recorded by the grades and marks described below. A student’s grade point average is calculated on the basis of credits earned at Iowa State with the grades and quality points shown below. Credits earned with P, S, or T are not used in calculating the grade point average but may be applied toward meeting degree requirements. A cumulative grade point average of 2.00 is required for a bachelor’s degree.

2. Students who want to protest a grade submitted by an instructor should follow the procedures described in the section, Appeal of Academic Grievances.

3. **Incomplete Marks** - If the instructor and student agree that an Incomplete is appropriate, they should complete an Incomplete (I) Contract (downloadable from the Office of the Registrar forms web site) to document the reason for the Incomplete, the requirements for resolving it, and the date by which it must be resolved, not to exceed one calendar year or the student’s graduation term (whichever is earlier). If the student is not available to sign the Incomplete (I) Contract, the instructor must document the conditions for the Incomplete by communicating directly with the student by e-mail or postal mail. A copy of this communication must be retained by the instructor until after the I is resolved in case there are any questions in the future regarding the terms of the Incomplete. The instructor also needs to enter the Incomplete (I) electronically as part of the end of term final grade submission.

**Resolving an Incomplete:** When a student completes the requirements specified on the Incomplete Contract, the instructor submits the appropriate grade, which becomes part of the student’s cumulative, but not term, grade-point average. The grade does not replace the I on the record. The I remains on the record for the applicable term.

A final course grade, once submitted to the registrar, may not be changed to an Incomplete except to correct an error at the request of the instructor, and with the approval of the instructor’s department head and the dean of the instructor’s college. The Incomplete (I) Contract should be used by the instructor to document the conditions for the Incomplete as specified above.

The Grade Report to the Registrar form should be used to initiate the request to change the grade to an Incomplete. The Grade Report form should be completed and forwarded by the instructor to his/her Dean for approval. The Dean will forward the Grade Report form to the Office of the Registrar if approved.

Incompletes in all courses must be resolved by the middle of the student’s term of graduation. Repeating a course will not resolve an I mark. A mark of I will automatically change to a grade of F after one calendar year (whether or not the student was enrolled during the period).

4. To change a grade or mark already reported to the registrar, the instructor submits the Grade Report to the Registrar form. This form is used for resolving an I with a grade, for correcting an instructor error, or for the late report of a grade.

5. **Midterm Grades.** The registrar will collect C-, D, and F midterm grades and nonattendance notifications from the instructor and report this information to students and their advisers using AccessPlus. In addition to submitting the midterm grades, the instructor is responsible for informing the class of the basis on which they were calculated.

The purpose of midterm grades is to provide the student and adviser with a timely warning that the student’s academic performance to that point in the course may be lower than desirable. Students who receive midterms are encouraged to discuss their academic performance with the course instructor and their adviser.

6. **Grades in all courses attempted** remain on each student’s record. If a course is repeated, the record will show the grade obtained on the initial attempt as well as grades received on subsequent attempts.

7. **The cumulative grade point average** is calculated by dividing the total number of quality points earned by the total number of credits in all courses attempted. Grades of S, P, NP, and T are not counted in calculating the grade point average. If a course is repeated, the cumulative grade point average is calculated according to the process described in item 6(a) below.

8. **Repeating Courses.**

A. The most recent grade for a course a student repeats will be used in computing the student’s cumulative grade point average rather than the previous grade(s), up to a limit of 15 credits. (This could result in a lowered grade point average if the second grade is lower than the first, or even loss of credit if the grade is lowered to an F.) All grades will remain on the student’s record.

B. Students may repeat any course for which an F grade or any passing grade was received.

C. Beyond 15 credits of repeats, both grades will be included in computing the cumulative grade point average.

D. Courses should be repeated as soon as possible, preferably within three semesters in residence, because of changes that occur with course updating, change in course number, or revision in the number of credits.

E. Approval to repeat a course in which the course number or number of credits has changed must be noted on a Designation of Repeated Course form, which can be obtained from departmental offices. This form must be signed by the head of the department offering the course and by the student’s adviser, and then taken to the Office of the Registrar. Deadlines for filing repeated course forms for full-semester and half-semester courses are published in the university calendar.

F. **Transfer students may repeat courses at Iowa State University for which a D or F was received at another institution.** They must process a Designated Repeat Form indicating they are repeating the course to reduce a transfer deficiency. Such repeated credits will count toward the 15-credit request limit and will affect only their transfer deficiency.

G. A student who has earned an F at Iowa State University may repeat the course at another institution and the credits earned may be applied toward graduation at Iowa State, but the grade earned will not be used in computing a cumulative grade point average.

H. **Repeated courses may affect any federal financial aid.** See the Financial Aid web site (http://www.financialaid.iastate.edu) for further information.

</tr>
<tr>
<td>T</td>
<td>Satisfactory performance (equivalent to a grade of C or better in courses numbered 100-499, and a grade of B or better in courses numbered 500-699) in a special examination for academic credit.</td>
</tr>
</tbody>
</table>
The course was officially dropped by the student after the first week of the term.

No report was submitted by the instructor. This is not a recognized grade or mark; it merely indicates the instructor has not submitted a grade and that a grade report has been requested.

Incomplete. An incomplete mark may be assigned when the student is passing at the time of the request, but special circumstances beyond the student’s control prevent completion of the course. In general, failing the final exam or project or not submitting course work as a result of inadequate preparation or learning are not valid excuses.

*See Pass Not Pass Grading in the Academic Privileges tab.

**A mark of N will automatically change to a grade of F after one calendar year (whether or not the student was enrolled during the period).

***See Incomplete Marks

Sources of Help with Academic Problems

If students are having trouble in a course, the following persons and places may be able to provide help:

1. The instructor of the course should be the primary sources of assistance to enhance the student’s academic achievement in the course. Students are encouraged to visit the instructor during stated office hours and seek individual assistance from the instructor if that is not possible.
2. Another valuable source of support is the student’s academic adviser, who often can help clarify academic issues and can recommend support services or remedial strategies.
3. The Academic Success Center in the Hixson-Lied Student Success Center has a collection of services such as tutoring, supplemental instruction (SI), the academic success course, learning lab, disability resources, and workshops designed to help students reach their academic goals.
4. The office of the department that offers the course may have a list of persons qualified to provide tutoring services for the course. They also may have help rooms or other support programs. The locations of the department offices are listed in the front of the ISU Directory.
5. The Student Counseling Service provides professional counseling services for students with problems which affect academic performance.

Appeal of Academic Grievances

Students who believe a faculty member (in his or her academic capacity) has behaved unfairly or unprofessionally may have their grievance reviewed through the procedure described below. A student may not initiate an appeal more than one year following completion of the course, and may not initiate the appeal of a course grade beyond midterm of the semester following completion of the course.

Prior to initiating a formal appeal, a student may wish to discuss the situation informally with the Dean of Students or designee, who can offer advice as to the most effective way to deal with it.

Grievances arising out of classroom or other academic situations should be resolved, if at all possible, with the student and the instructor involved. If resolution cannot be reached, or if the grievance involves sexual or racial harassment and the student prefers not to deal directly with the instructor, the student should discuss the grievance with the instructor’s department chair and submit it in writing to him or her. The department chair will investigate the grievance, including discussing it with the instructor involved and/or referring it to a departmental grievance committee. The department chair should respond in writing within five class days of receipt of the written notice of the grievance.

If the student is not satisfied with the resolution of the grievance proposed by the department chair, the student may appeal in writing to the dean of the instructor’s college. (In the case of a grievance involving a Graduate College policy or procedure, an appeal of the chair’s decision should be directed to the Dean of the Graduate College rather than to the dean of the instructor’s college.)

The dean will hear the explanations of the department chair and instructor, and should respond to the student in writing within ten class days of receipt of the written notice of the appeal. If the grievance cannot be resolved with the dean, the student may forward a written appeal to the provost, who will convene a Committee to Review Student Grievances (see below) to consider the appeal within ten class days after receipt of the written notice of the appeal.

Within five class days following the convening of the committee, the provost will make a decision with regard to the grievance and will transmit this decision in writing to the grievant, the dean, the department chair, and the instructor. An appeal of the provost’s decision may be made to the president of the university. The time limit specified at each level may be extended by mutual agreement of all parties concerned.

The Committee to Review Student Grievances is composed of faculty members named by the president of the Faculty Senate and students named by the president of the Government of the Student Body. The provost may serve as a chairperson for the committee, or may designate another chairperson for a specific grievance hearing. A minimum of two faculty members, two students, and the chairperson shall constitute a quorum for the convening committee.

Scholastic Recognition

The university recognizes those students who are doing exceptionally well in several ways, including the following:

1. Dean’s List. Each semester the university issues a dean’s list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean’s list is issued for summer school. The list can be viewed at http://www.registrar.iastate.edu/info/deanslist.pdf

2. Top 2 Percent. Each spring semester, undergraduate students in the top 2% of their class (freshman, sophomore, junior, and senior) within their college, based on cumulative grade point average, are recognized. In addition to a congratulatory letter from the university president, a notation of the accomplishment is recorded on the student’s permanent record.

3. Graduation with Distinction. Undergraduates who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are eligible to graduate “with distinction” provided they have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits.

Students who graduate with a cumulative grade point average of 3.90 or higher will graduate Summa Cum Laude; those who graduate with a cumulative grade point average of 3.70 to 3.89 will graduate Magna Cum Laude; and those who graduate with a cumulative grade point average of 3.50 to 3.69 will graduate Cum Laude. This recognition appears on the student’s official transcript and diploma and in the commencement program.

Candidates for the bachelor of liberal studies degree may be graduated with distinction providing that they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.

4. Honors Program. Students who are full members of the University Honors Program prior to Fall Semester 2011 must have a cumulative grade point average of 3.35 or higher at the beginning of their final term. Students becoming full members during Fall Semester 2011 or later need a cumulative grade point average of 3.5 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student’s permanent record and diploma, and in the commencement program.

Learning Communities

Learning Communities are university-wide initiative providing students the opportunity to connect with peers who have similar academic goals. Students in learning communities typically take one to three courses together and may live together (or near each other) in the same residence hall.

Although many of the learning communities are focused on first-year students, opportunities are available for sophomores, juniors, seniors, and transfer students. In addition to developing academic and social networks, advantages of joining a learning community include: getting to know people and making friends in your major or area of interest, getting to know faculty and staff members, making a smooth transition from high school to college, making connections between in-class and out-of-class learning, applying classroom learning to real world situations through hands-on experiences, exploring career opportunities, and having fun! Most learning
communities employ an upper-division student as a peer mentor who organizes various activities for the students, ranging from study groups to social events. We have found that students in learning communities are more satisfied with their overall experience at Iowa State, are more engaged, are more likely to remain enrolled at Iowa State after one year, and are more likely to graduate.

First-year students are offered the opportunity to sign up for learning community courses during summer orientation. For learning communities that offer a residential living environment the sign up takes place online with the housing contract.

Academic Progress

Each college has an academic standards committee that is responsible for monitoring the academic progress of all undergraduate students in that college, based on policies and minimum requirements set by the Faculty Senate Committee on Academic Standards and Admissions and ratified by the Faculty Senate.

Individual college faculties may, with the approval of the Faculty Senate Committee on Academic Standards and Admissions, set additional program admission and curriculum requirements that are more stringent than those established for the university. These additional requirements must be reviewed at least every third catalog by the college academic standards committee to determine if the requirements should be continued. Requirements approved by the college academic standards committees will then be forwarded to the Faculty Senate Committee on Academic Standards and Admissions for final approval.

The college committees are responsible for actions involving individual students with respect to placing students on academic probation, dismissing students from the university for unsatisfactory academic progress, and reinstating students who have been dismissed.

For questions concerning interpretation and application of the rules governing academic progress, students should contact the chair or secretary of their college academic standards committee in their college office.

The university’s academic standards rules are presented below. In addition to taking action based on these rules, a college academic standards committee may also place a student on academic probation or dismiss a student from enrollment in the university when, in the college committee’s judgment, the student’s academic performance or progress toward a degree is exceptionally deficient. Likewise, a college committee may, under exceptional circumstances, exempt individual students from the application of these rules. Students who participate in the Regent Universities Student Exchange Program, or in a similar program where the credit taken at the other school will be considered as resident credit and the grades included in the student’s ISU cumulative grade point average, are subject to Iowa State University’s academic standards.

Academic Probation Policy

Students are placed on academic probation status as a warning that their academic progress is not satisfactory and that they should take steps to improve their academic performance to avoid dismissal from the university.

Students who are placed on academic probation should immediately seek assistance in academic improvement from such sources as academic advisers, instructors, the Student Counseling Service, and the Academic Success Center. Additionally, students on academic probation and warning are required to meet with their advisor and to complete the Academic Intervention Self Assessment form, which can be accessed here: http://www.dso.iastate.edu/asc/al/students/

Academic Warning, Probation, and Dismissal

Continued enrollment at Iowa State University depends upon an undergraduate student maintaining satisfactory academic progress toward attaining a degree. To assist students in maintaining satisfactory progress, Iowa State University has adopted academic standards designed to provide early identification of students who are experiencing academic difficulty, and to provide timely intervention through academic advising and academic support programs.

Academic standing at Iowa State University is dependent upon the total number of credits a student has attempted or earned, the student’s semester grade point average (GPA), the student’s cumulative ISU GPA, and the student’s transfer GPA (if below 2.00.)

Academic Warning

While a warning (W) is the least severe of the negative academic actions, it serves as a reminder that future academic performance below 2.00 could result in more serious consequences. In fact, a student on warning whose subsequent term GPA is below a 2.00 will be placed on probation (P) the following term.

Students who receive an academic warning are required to develop a plan for academic improvement in consultation with their academic adviser or the Academic Success Center. A student who is subject to both academic warning and academic probation will be placed on academic probation. The academic warning is not a part of the student’s permanent academic record.

Students will receive an academic warning (W) at the end of any fall or spring semester when they earn a GPA of 1.00 – 1.99 for that semester. At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic warning status:

- Students will be placed on academic probation if they earn less than a 2.00 GPA for the next fall or spring semester, or
- They will be removed from warning status if they earn at least a 2.00 semester GPA for the next fall or spring semester and they are not subject to academic probation based on cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Probation

Academic probation is an indication of very serious academic difficulty which may result in dismissal from the university. Students may be placed on academic probation as a result of either semester GPA, cumulative GPA, or both.

Students who are placed on academic probation are required to develop a plan for academic improvement in consultation with their academic adviser which may include referral to the Academic Success Center. Academic probation status is not a part of the student’s permanent academic record.

Students will be placed on academic probation (P) at the end of a semester for either of the following two reasons:

1. Semester GPA: Students who earn less than a 1.00 at the end of any fall or spring semester, or less than a 2.00 two consecutive semesters, will be placed on academic probation. Students will not be placed on academic probation at the end of the summer term due to summer term GPA only.

2. Cumulative GPA: Students with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation at the end of any fall or spring semester or summer term when their cumulative GPA is less than 2.00. Students with 75 or more credits attempted or earned who have a transfer GPA < 2.00 will be placed on academic probation at the end of any fall or spring semester or summer term when their combined transfer/ISU cumulative GPA is less than 2.00.

At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic probation status:

- Students will be academically dismissed if they fail to earn at least a 2.00 semester GPA. At the end of any spring semester, students in dismissal status may enroll for summer term. (See Summer Option for Students in Dismissal Status in the Summer Academic Standards Regulations section.)
- Students will continue on academic probation if they earn at least a 2.00 semester GPA but are subject to continued academic probation based on their cumulative GPA (over 75 credits),
- Students will be removed from probation if they earn at least a 2.00 semester GPA and are not subject to continued academic probation based on their cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Dismissal

Students who do not meet the requirements of their academic probation are academically dismissed from the university. Each College Academic Standards Committee is responsible for final decisions regarding the academic status of students in that college, and any appeals to academic dismissal actions are considered by the college committee. Once dismissed, students are not allowed to reenroll at Iowa State University until they have been academically reinstated. (See section on reinstatement.) Academic dismissal is placed on the student’s academic record as a permanent notation. The official transcript of a student who has been dismissed includes a “not in good standing” notation.

Summer Academic Standards Regulations

Students who are newly placed or continued on academic probation (P) at the end of the previous semester may enroll for the summer term without being in jeopardy of academic dismissal from the university at the end of that summer term.

Summer Combined Term GPA:

All students who attend summer session will have their academic status reassessed at the end of the summer based on the combined (not averaged) grade summaries of their previous term of attendance and summer term. Academic status (warning or probation) after summer session will be based on the resulting combined term GPA.
The academic status resulting from the summer combined term GPA supersedes the academic status at the end of the previous term.

For students who have remaining designated repeat credits, courses taken in the previous semester and repeated in summer will be calculated as designated repeats in the combined term GPA.

The combined term GPA (summer plus preceding term) will not appear on the student’s grade report or permanent record.

Summer term GPA alone cannot determine academic status. Students who initiate enrollment at Iowa State during the summer will not be placed on warning or probation regardless of their academic performance.

**Summer Cumulative GPA:**
A student who was on academic probation (P) at the beginning of summer term based only on cumulative GPA, who raises his or her cumulative GPA to over a 2.0 at the end of the summer term shall be removed from probation status at the end of the summer term.

A student with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation (P) at the end of the summer term if his or her cumulative GPA is less than 2.00.

A student with 75 or more credits attempted or earned who has a transfer GPA < 2.00 will be placed on academic probation (P) at the end of any summer term if his or her combined transfer/ISU cumulative GPA is less than 2.00.

### Summer Option for Students in Dismissal Status:
A student considered for academic dismissal at the end of spring semester will be permitted to enroll for the summer term. The combined spring/summer GPA will be used to determine whether the student should be permitted to continue his/her enrollment after the summer term. If the resulting combined term GPA is not 2.00 or greater, the student will be academically dismissed.

### Additional Academic Standards Regulations
Changing colleges: A student on academic probation (P) may transfer to another college within the university only with the permission of the department chair of the new department and the dean of the new college. For students on academic probation (P), transfer during period 3 (i.e., after the last day to drop a course) may be approved by the department chair of the new department and the dean of the new college only under exceptional circumstances.

A student who has transferred from a college while on academic probation (P) cannot transfer back unless permission is granted by the academic standards committee of the original college.

A student who is in dismissal status at the end of spring and chooses to exercise the Summer Option may not change colleges during the summer.

Withdrawal: A student on academic probation (P) who withdraws during period 3 will be academically dismissed at the end of term the student withdraws, except under extenuating circumstances as judged by the college academic standards committee.

Reinstated students: Reinstated students should also see the section on Reinstatement.

Veterinary Medicine: Additional rules for minimum satisfactory progress are in effect. Special (nondegree) students: Students matriculated in this classification category are governed by the regular academic progress regulations. Furthermore, by special action of their college academic standards committee, additional standards may be required.

### Satisfactory Academic Progress for Financial Aid Recipients
Federal regulations require the Office of Student Financial Aid to monitor the satisfactory academic progress of students (SAP), which is strictly a financial aid policy. Your academic adviser and/or college are monitoring your academic progress under the University’s Academic Probation Policy (http://catalog.iastate.edu/academiclife/#academicprobationpolicy).

The Registrar’s records are reviewed at the completion of every semester to determine compliance with the SAP policy. There are three components to the SAP policy:

#### Minimum GPA
Students must maintain a cumulative gpa of a 2.0 or higher to remain eligible for financial aid. Academic records are reviewed at the completion of every term of enrollment (Fall, Spring, Summer) to determine SAP.

#### Minimum Pace of Progression
Students must complete coursework at a cumulative rate of 67%. Completed coursework is defined as any course for which the student receives a passing grade. Academic records are reviewed at the completion of every term of enrollment (Fall, Spring, Summer) to determine SAP. Use the formula below to determine your pace. The minimum pace requirement is 67%.

### Maximum Time Frame (Duration of Eligibility)
Federal regulations limit financial aid eligibility to 150% of the published length of the education program, as measured in credit hours. Transfer credit hours are counted in the calculation of duration of eligibility. When the student has completed 125% of their education program a letter is mailed to the student and a targeted message is posted to the student’s AccessPlus account as notification that they are approaching the maximum time frame.

Transfer, Remedial, English as Second Language, IEP, and Early credit hours (taken in high school): All of these credit hours accepted by Iowa State University are counted as both attempted and completed hours in determining Minimum Pace-of-Progression and Maximum Time Frame requirements.

Repeating a course: The credit hours from a repeated course are counted as attempted hours every time the course is repeated. Once the course is passed, then the credit hours are counted as both attempted and completed credit hours.

Incomplete: Counted the same as non-passing grades.

Academic Renewals: All academic renewal credit hours are counted in the Minimum Pace-of-Progression and Maximum Time Frame requirements.

Receive a non-passing grade in ALL semester credit hours: Placed on Financial Aid Warning for the following semester. Also see policy on Unofficial Withdrawal from Classes/Last Date of Attendance.

Withdrawal from all semester courses: Placed on Financial Aid Warning for the following semester. Also see policy on Withdrawal from Classes.

### Financial Aid Warning
Students are placed on Financial Aid Warning for one semester if they do not meet the Minimum GPA and/or Minimum credit hours. A letter is mailed to the student and a targeted message is posted to the student’s AccessPlus account as notification of being placed on Financial Aid Warning.
Financial Aid Suspension

Students are placed on Financial Aid Suspension for one of the following reasons:

1. Do not meet the SAP requirements after one semester on Financial Aid Warning.
2. Do not meet the requirements of their Academic Plan.
3. Meet or exceed the Maximum Time Frame requirement to obtain a degree.
4. Withdrawal from ALL semester credit hours or receive a non-passing grade or incomplete in ALL semester credit hours in back-to-back semesters.

Students are not eligible for financial aid while on Financial Aid Suspension. A letter is mailed to the student and a targeted message is posted to the student’s AccessPlus account as notification of being placed on Financial Aid Suspension. To regain financial aid eligibility students may: 1) Meet minimum SAP requirements while not receiving financial aid, or 2) Submit SAP Appeal (See Appealing Financial Aid Suspension).

Financial Aid Probation

Students are placed on Financial Aid Probation for one semester upon approval of a SAP Appeal and will be eligible for aid. An email is sent to the student’s ISU email and to the academic advisor’s email as notification of the approval of the SAP Appeal and being placed on Financial Aid Probation. The academic record and/or the Academic Plan are reviewed again after one semester of Probation to determine continuation of financial aid eligibility.

Academic Plan

The Academic Plan is reviewed with the student’s academic advisor after one semester of Probation to determine continuation of financial aid eligibility. The maximum length of an Academic Plan cannot exceed one calendar year (e.g., Fall/ Spring/Summer, Spring/Summer/Fall, Summer/Fall/Spring) to meet the Minimum Cumulative GPA and/or the Minimum Pace-of-Progression requirements.

After the first semester on the Academic Plan, if the semester gpa is below a 2.0 and/or the 67% Pace-of-Progression requirement is not met, the student is placed back on Suspension and is not eligible for financial aid.

Graduate Students (Maximum Time Frame)

The Registrar’s records are reviewed at the completion of every semester of enrollment to determine compliance with the SAP policy.

Graduate students must review the Graduate College Handbook regarding minimum grade point average requirements. Federal financial aid eligibility for graduate students ends when the total semesters enrolled equal the limits outlined below (Graduate College Handbook, Chapter 4).

Master’s: 10 semesters
Ph.D. (Ph.D. started at ISU with Master’s earned): 10 semesters
Ph.D. (Ph.D. started at ISU without Master’s earned): 14 semesters

Approaching the Maximum Time Frame

Graduate students approaching the maximum time frame of their degree will be notified by the Office of Student Financial Aid and will remain eligible for financial aid until the limit outlined above is met.

Financial Aid Suspension

Graduate students are placed on Financial Aid Suspension when they meet or exceed the Maximum Time Frame requirement to obtain a degree.

Students are not eligible for financial aid while on Financial Aid Suspension. A targeted message is posted to the student’s AccessPlus account as notification of being placed on Financial Aid Suspension. See Appealing Financial Aid Suspension.

Appealing Financial Aid Suspension

Students on Financial Aid Suspension may submit an appeal to the Office of Student Financial Aid if extenuating circumstances prevented them from meeting the SAP requirements.

Basis for SAP Appeal: The death of a relative, an injury or illness of the student, or other special circumstances. Attach documentation to support the basis of appeal.

SAP Appeal process: Completed SAP appeals will be reviewed within 15 business days. Students will be notified by ISU e-mail if the appeal is accepted or denied. The deadline to submit an appeal for consideration of reinstatement of aid eligibility for a semester is the mid term of that semester. SAP Appeal Form.

Please note: Per Federal financial aid regulations, appeals are not automatically accepted and may be denied based on failure to maintain Satisfactory Academic Progress requirements set forth at Iowa State University.

Academic Regulations

Class Attendance

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Index, Validation of Enrollment for regulations concerning attendance to validate students’ enrollment in a class.

Each instructor sets his or her policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce his or her policy at the beginning of the course. Generally, students are expected to attend all class meetings as scheduled.

Academic Dishonesty

Academic dishonesty occurs when a student uses or attempts to use unauthorized information in the taking of an exam; or submits as his or her own work themes, reports, drawings, laboratory notes, or other products prepared by another person; or knowingly assists another student in such acts or plagiarism. Such behavior is abhorrent to the university, and students found responsible for academic dishonesty face expulsion, suspension, conduct probation, or reprimand. Instances of academic dishonesty ultimately affect all students and the entire university community by degrading the value of diplomas when some are obtained dishonestly, and by lowering the grades of students working honestly.

Examples of specific acts of academic dishonesty include but are not limited to:

1. Obtaining unauthorized information. Information is obtained dishonestly, for example, by copying graded homework assignments from another student, by working with another student on a take-home test or homework when not specifically permitted to do so by the instructor, or by looking at your notes or other written work during an examination when not specifically permitted to do so.

2. Tendering of information. Students may not give or sell their work to another person who plans to submit it as his or her own. This includes giving their work to another student to be copied, giving someone answers to exam questions during the exam, taking an exam and discussing its contents with students who will be taking the same exam, or giving or selling a term paper to another student.

3. Misrepresentation. Students misrepresent their work by handing in the work of someone else. The following are examples: purchasing a paper from a term paper service; reproducing another person’s paper (even with modifications) and submitting it as their own; having another student do their computer program or having someone else take their exam.

4. Bribery. Offering money or any item or service to a faculty member or any other person to gain academic advantage for yourself or another is dishonest.

5. Plagiarism. Unacknowledged use of the information, ideas, or phrases of other writers is an offense comparable with theft and fraud, and it is so recognized by the copyright and patent laws. Literary offenses of this kind are known as plagiarism.

Plagiarism occurs when a person does not credit the sources from which they borrow ideas, whether these ideas are reproduced exactly or summarized. The method of documentation will differ depending on whether the sources are written, oral, or visual. Ethically, communicators are responsible for providing accurate, detailed information about their sources. Practically, audiences need this information to comprehend and evaluate a message’s content. The Student Guide: English 150 and 250, available for purchase at the University Book Store, describes the process of documenting source materials as do many other reference guides.

Academic dishonesty is considered to be a violation of the behavior expected of a student in an academic setting as well as a student conduct violation. A student found responsible for academic dishonesty or academic misconduct is therefore subject to appropriate academic penalty; to be determined by the instructor of the course, as well as sanctions under the university Student Disciplinary Regulations. If an instructor believes that a student has behaved dishonestly in a course, the following steps are to be followed:

1. The instructor should confront the student with the charge of dishonesty and arrange a meeting with the student to discuss the charge and to hear the student’s explanation.

2. If the student admits responsibility for academic misconduct, the instructor shall inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade.
3. Because academic dishonesty is also a student conduct violation under Section 4.2.1 of the Student Disciplinary Regulations, the instructor must report the incident in writing to the Dean of Students. After investigating the incident and discussing it with the instructor, the Dean of Students, or his/her designee, will meet with the student and depending on the severity of the offense as well as on the student’s past conduct record, may handle the matter through an administrative hearing or schedule a hearing before the All University Judiciary (AUJ).

4. This hearing, conducted according to the procedures outlined in the Student Disciplinary Regulations, is to determine the disciplinary action to be taken. In any case, the student’s academic adviser will be informed of the incident but may not insert any record of it in the student’s academic file.

5. If the student claims to be not responsible for the alleged violation of academic misconduct, the instructor may not assign the student a grade for the work in question until the question of responsibility is resolved, unless circumstances require that an interim grade be assigned. The instructor shall consult with the student or her department chair and report the incident in writing to the Dean of Students.

6. The Dean of Students will refer the case to the Office of Judicial Affairs for investigation. After reviewing the report and completing an investigation, the Office of Judicial Affairs will file a formal complaint against the student if it is determined that there is cause to believe academic misconduct occurred. The case may be adjudicated through an administrative hearing or referred to a hearing before the All University Judiciary (AUJ) depending on the nature and severity of the violation as set forth in the Student Disciplinary Regulations.

7. If the case is referred to the AUJ both the student and instructor will be invited to attend an AUJ hearing and present pertinent information. If the Administrative Hearing Officer (in a minor case) or the AUJ (in a major case) finds the student responsible for the charge of academic misconduct, the instructor will inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade. The Administrative Hearing Officer or AUJ will determine the appropriate disciplinary action with respect to the nature of the violation.

8. If the Administrative Hearing Officer or AUJ finds the student "not responsible" for academic misconduct, the instructor will grade the student accordingly on the work in question and the student’s grade in the course will not be adversely affected. If the student is found responsible the student’s adviser will be informed of the decision but shall not insert any record of the action in the student’s academic file.

9. If a student either admits dishonest behavior or is found responsible for academic misconduct by the AUJ, the Office of Judicial Affairs (OJA) or AUJ may impose any of the following sanctions:

   A. Disciplinary Reprimand: An official written notice to the student that his/her conduct is in violation of university rules and regulations.

   B. Conduct Probation: A more severe sanction than a disciplinary reprimand, to include a period of review and observation during which the student must demonstrate the ability to comply with university rules, regulations, and other requirements stipulated for the probation period.

   C. Suspension/Deferred Suspension: The suspension is deferred subject to a definite or indefinite period of observation and review. If a student is found responsible for a further violation of the university Student Disciplinary Regulations or an order of a judiciary body, suspension will take place immediately.

      • Definite: The student is dropped from the university for a specific length of time. This suspension cannot be less than one semester or more than two years. Reinstatement may be contingent upon meeting the written requirements of the AUJ specified at the time the sanction was imposed. Normally, a student who is suspended indefinitely may not be reinstated for a minimum of two years.

      • Indefinite: The student is dropped from the university indefinitely. Reinstatement may be contingent upon meeting the written requirements of the AUJ specified at the time the sanction was imposed. Normally, a student who is suspended indefinitely may not be reinstated for a minimum of two years.

   D. Expulsion: The student is permanently deprived of the opportunity to continue at the university in any status.

In instances in which the student admits responsibility or is judged to be responsible by OJA or the AUJ, a staff member of the Dean of Students Office will counsel with the student in an effort to deter any further such incidents.

Student records concerning academic dishonesty are maintained in the Dean of Students Office for a period of seven years, after which the file records are purged. These student records are confidential; nothing from them appears on a student’s academic transcript. In the event that an instructor is uncertain how to handle an incident of suspected academic dishonesty, the Dean of Students is available at any time to provide advice and assistance to the instructor in deciding a proper course of action to be taken.

Veteran Attendance

Students who receive benefits from the Veterans Administration required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available at http://www.registrar.iastate.edu/veterans/.

Field Trips

Trips away from campus are sometimes arranged as a means of enriching the students’ learning experience in a given course. Such trips may not take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday through Friday); these regulations may be waived, only by special permission of the Dean of the college in which the course is offered. Faculty should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

In order to go on a field trip required in one of their courses, students must first obtain permission from the instructors whose classes they will miss. If permission to miss class is not granted, students cannot be required to go on the field trip nor can they be penalized for missing the trip.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes (http://classes.iastate.edu).

Ownership of Course-related Presentations

The presenter owns course-related presentations, including lectures. Individuals may take written notes or make other recordings of the presentations for educational purposes, but specific written permission to sell the notes or recordings must be obtained from the presenter. Selling notes by students without the required permission is a violation of the Conduct Code as published on the Policy Library web site at http://policy.iastate.edu/policy/SDR#4222.

Recording and Transmission of Classes

Recordings and transmission of classes may take place for a variety of legitimate reasons, including providing educational opportunities for those who cannot attend classes on campus, assisting students with disabilities that impair classroom note taking, and giving the instructor feedback on his or her classroom performance.

Because the lectures of faculty represent their intellectual labors, individuals are expected to obtain permission to make recordings of lectures and other classroom interactions. Recordings may be used for the purposes of the particular class, although in some cases the recordings may be preserved and used for other classes as well.

Credit Involving a Paid Activity

Students may obtain credit for an activity, either on- or off-campus, for which they are also paid, provided the activity is academically relevant. This policy does not apply to registrations for R credit.

In order for an activity to be defined as academically relevant, prior arrangements for receiving credit must be made with a faculty member in an appropriate department.

The arrangements must include agreement on (1) the academic objectives which the activity is expected to achieve, and (2) the procedure by which the student’s learning will be assessed.

Response to Classroom Disruption

Should any student officially enrolled for credit or audit in a class disrupt the instructor’s ability to ensure a safe environment, control the class agenda, and/or deliver the approved curriculum, the instructor has the right to ask that the disruptive action cease immediately. The instructor may find it useful to include general guidelines about disruptive behavior on the course syllabus; and in the event of a classroom disruption, the instructor may, if she or he finds it necessary, explain to the student and the class why the particular action is deemed disruptive. The instructor should also take into consideration complaints of disruptive behavior brought to their attention by students. The responsible student should cease
the disruption and utilize non-disruptive means for expressing disagreement or concern. If the disruption continues, the instructor can pursue various forms of intervention, including suspension from class, use of student disciplinary regulations, or police intervention, as discussed in more detail in the Faculty Handbook. (http://www.provost.iastate.edu/faculty/handbook/current)

Although most situations are best resolved without resorting to requests for police intervention, the Department of Public Safety should be called when the disruptive behavior prohibits the continuation of the class. The Department of Public Safety may also be called if any person enters or remains in the classroom after being asked by the instructor to leave.

Other violations related to academic misconduct may include subsection 4.1.11 Misuse of Computers and subsection 4.2.20 Unauthorized Sale of Others' Intellectual Works. These subsections are located in the Iowa State University Student Disciplinary Regulations under section 4 of the Conduct Code.

Reinstatement

The procedures delineated in this section apply to students who were dismissed from Iowa State for academic reasons. Students who left Iowa State in good academic standing and who are seeking reentry should see Index, Reentry for more information.

1. Reinstatement is not automatic. Students who have been dismissed for academic reasons should contact the dean’s office in the college they wish to enter for instructions specific to that college. The college Academic Standards Committee reviews each petition and other relevant information, and reinstatement is based upon that review. As part of the petition process, students must submit a plan for academic success that identifies the causes of their poor academic performance and demonstrates that they have taken actions to avoid or eliminate these causes.

2. Students can only be reinstated after at least one academic semester has elapsed since they were academically dismissed. The summer session is not a semester for the purpose of being out of school one semester.

3. Students who have been dismissed from enrollment two or more times are not eligible for reinstatement until at least two academic semesters have elapsed since their last academic dismissal.

4. Students who were dismissed by one college and subsequently reinstated by another college cannot transfer back to the original college unless permission is granted by the Academic Standards Committee of the original college. This procedure applies regardless of the student’s academic standing when the transfer is requested.

5. To be considered for reinstatement to the university, students must submit a petition to the Academic Standards Committee of the college in which they desire to enroll at least 45 days before the beginning of the semester. Students who have not been enrolled for a period of 12 or more months or who are international students must also file a reentry form prior to their return. For more information see the Reentry web site at http://www.registrar.iastate.edu/info/reentry.html. (Students dismissed for the second time and requesting reinstatement in the College of Liberal Arts and Sciences must submit their petition 70 days before the beginning of the semester.)

6. As a condition of reinstatement, students will reenter on academic probation and must accept whatever additional requirements are stipulated by the college Academic Standards Committee. Examples include full- or part-time status, specified credit hours, specific courses, specific GPAs, restriction on choice of major, and required counseling.

Student Appeal

Students may appeal a decision regarding their academic status if they believe that new information can be provided or extenuating circumstances exist that would alter the application of any rule in this section. The appeal should be made in writing to the Academic Standards Committee of the college in which the student is enrolled. The written appeal must include the reasons for the appeal and the evidence to substantiate these reasons.

The student should initiate the appeal process by contacting the secretary of the college Academic Standards Committee in the administrative office of her or his college immediately upon receipt of notification of the committee’s action, and at least ten calendar days before the beginning of the semester. The secretary will then inform the student of the deadline for submission of the written appeal.

If the student is dissatisfied with the committee’s action, he or she may submit an appeal in writing to the dean of her or his college within seven calendar days after they are notified of the committee’s action. The dean must respond in writing within seven calendar days of receipt of the appeal.

If the issue is not resolved within the college, further appeals may be made in writing to the provost and subsequently to the president of the university. Appeals beyond the college level will, however, be considered only if based on one or both of the following contentions: (a) appropriate procedures were not followed at the college level; (b) academic rules were not applied correctly at the college level.

Academic Renewal Policy

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations.

1. Eligibility. To be eligible for academic renewal consideration, students must meet these requirements:
   A. Students must not have enrolled at Iowa State University for five or more consecutive years.
   B. Students must not have graduated from Iowa State University.
   C. Students must currently be in good academic standing. (If the student was previously dismissed, he or she must be reinstated.)

2. Conditions. Academic renewal is based on the following conditions:
   A. All courses and credits that were taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine courses from multiple terms to comprise the semester(s) or quarter(s) dropped. Degree requirements met during the dropped terms will ordinarily have to be repeated.
   B. Renewal may be applied only to academic terms completed prior to the students’ extended absence.
   C. All courses and grades for the chosen terms will remain on the students’ academic record.
   D. Designated repeats, drops and P/NP options will be reinstated for the terms dropped.
   E. Students who have used all of their drop options will be given one extra drop.
   F. Students may be granted only one academic renewal. To be eligible for a degree after academic renewal is granted, students must complete a minimum of 24 credit hours at Iowa State University.

3. Procedures.
   A. Students should discuss their desire to pursue academic renewal with an adviser in the college they wish to enter.
   B. The student must complete the Academic Renewal Petition form available from www.registrar.iastate.edu/forms.
   C. After the form is signed by the student and academic adviser, it is submitted to the Records area in the Office of the Registrar, 214 Enrollment Services Center.
Admissions and Registrar

Office of Admissions

Interim Director
Darin Wohlgemuth, Ph.D.

Admission

When to Apply
Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted well in advance of the desired entry date.

Application deadlines are available at www.admissions.iastate.edu.

Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See College of Veterinary Medicine, Application and Admission. (https://nextcatalog.registrar.iastate.edu/collegeofveterinarymedicine)

How to Apply
Applications for admission are available online at www.admissions.iastate.edu.

Iowa State University operates on a rolling admissions basis. Admission of applicants for fall semester begins in July of the preceding year. Admission for other terms begins approximately 12 months prior to the beginning of the term. Admission offers are issued for a specific term and are valid only for the term specified.

Visits to the Campus
Visitors to Iowa State University are always welcome!

The Soults Family Visitor Center, located in the Memorial Union, is open Monday through Friday from 8 a.m. until 5 p.m., and most Saturday mornings from 9 a.m. until 1 p.m. when classes are in session. Counselors are available to speak with prospective students and their families about admission, financial aid, housing, student life, academic programs and other opportunities. Visitors are offered student-guided walking tours of campus and the residence halls along with an enrollment presentation and an academic information session.

Prospective students and parents are encouraged to visit the campus and the Soults Family Visitor Center. Arrangements for a campus visit or registration for "Experience Iowa State" or "Transfer Visit Days" open house programs can be made at www.admissions.iastate.edu or by contacting the Soults Family Visitor Center at 800-262-3810 or locally at 515-294-5836.

Undergraduate Admission Directly from High School

Admission decisions are made by admissions officers in accordance with the entrance requirements as set forth in the Iowa Administrative Code as well as the admission policies established by the Faculty Senate.

Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.

Applicants must submit an application for admission and the appropriate application fee (see www.admissions.iastate.edu for current application fee information).

In addition applicants must have their secondary school provide an official final transcript of their academic record, including cumulative grade point average, rank in class, and certification of graduation.

Applicants must also arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizen and immigrant applicants who will not graduate from an approved U.S. high school and whose primary language is not English must meet university communication proficiency requirements. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the SAT. Contact the Office of Admissions for minimum score requirements for each examination.

Applicants may be required to submit additional information or data to support their applications.

A. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve a Regents Admission Index (RAI) score of at least 245 will be offered admission. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve less than a 245 RAI score will be considered for admission on an individual basis.

The RAI score will be calculated for each applicant based on the following equation:

\[
\text{RAI Score} = \frac{1}{2} \times (2 \times \text{ACT composite score}) + (1 \times \text{percentile class rank}) + (20 \times \text{high school GPA}) + (5 \times \text{number of years of high school core courses completed})
\]

Note: For purposes of calculating the RAI, SAT scores will be converted to ACT composite equivalents; high school rank is expressed as a percentile with 99% as the top value; high school GPA is expressed on a 4-point scale; and number of high school courses completed in the core subject areas is expressed in terms of years or fractions of years of study.

Applicants from high schools that do not present all four of the factors required for calculation of the RAI score will be considered for admission on an individual basis.

B. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.

C. Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.

D. Applications may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.

E. Students with satisfactory academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

F. Exceptional students may be admitted as full-time students before completing high school. Early admission is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for college-level study.

High School Preparation

Graduation from an approved high school shall ordinarily precede entrance into Iowa State University.

Students who wish to enter Iowa State University directly from high school (or transfer from another college or university with less than 24 semester hours of graded transferable college credit) must meet the level of academic performance described above and show evidence of the following high school preparation:

English/Language Arts

Four years, emphasizing writing, speaking, and reading, as well as an understanding and appreciation of literature

Mathematics

Three years, including one year each of algebra, geometry, and advanced algebra

Science

Three years, including one year each of courses from two of the following fields: biology, chemistry, and physics

Social Studies

Two years

Additional Requirements for the College of Liberal Arts and Sciences and the College of Engineering

In addition to the high school preparation requirements described above, students applying to the College of Liberal Arts and Sciences must have completed an additional year of social studies, for a total of three years, and two years of a single foreign language. Students applying to the College of Engineering must have completed two years of a single foreign language.

Students who do not meet the high school course preparation requirements listed here, but who are otherwise well qualified, may be admitted after individual review of their applications.

Undergraduate Admission - Nondegree Undergraduate

Students who wish to attend Iowa State University to take undergraduate courses but who do not plan to seek an undergraduate degree from Iowa State University should apply as nondegree undergraduate students. Credit taken under the nondegree undergraduate classification is applicable for undergraduate degree purposes for
Admissions and Registrar

those who are later admitted as degree-seeking undergraduate students. Nondegree undergraduates who have already earned an undergraduate degree should not enroll in courses which are listed as available for minor graduate credit. To take courses listed as available for minor graduate credit, a student must enroll as a nondegree graduate and pay graduate fees. Credit obtained under the nondegree undergraduate classification may not be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree undergraduate students in the College of Liberal Arts and Sciences. Permission to enroll in one academic course in addition to full-time intensive English study may be granted under special circumstances.

Reentering Students - Undergraduate and Graduate

Reentering students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. See Index, Academic Renewal Policy; and Reentry. (https://nextcatalog.registrar.iastate.edu/azindex)

International students need to reapply after an absence of one full semester, exclusive of summer session. International reentries must also contact the International Students and Scholars office to request the necessary visa application forms.

Reentering graduate students do not need to complete a reentry form but should notify their department and the Office of the Registrar of their intent to reenter Iowa State University. See Index, Reentry for more information. (https://nextcatalog.registrar.iastate.edu/azindex)

Destination Iowa State

The Destination Iowa State program is held for all new freshman and transfer students on the Thursday, Friday, and Saturday before classes begin fall semester; and on the Friday before classes begin spring semester. The program helps new students develop academic and social strategies to ensure a successful transition to Iowa State University.

New Student Programs Office Orientation

Orientation assists new undergraduates with the transition to Iowa State University. At orientation, students plan their academic programs, register for classes, learn about university policies and procedures, and prepare for personal and social adjustments to the university. The university Orientation Committee, composed of Iowa State University faculty, and staff, is responsible for the orientation programs; the undergraduate colleges of the university, in cooperation with the Office of New Student Programs, have responsibility for the implementation of orientation programs for new students and their families.

The Orientation Committee conducts an extensive orientation program during the summer, with additional programs held prior to each term. Special orientation sessions are conducted for transfer students entering in the fall and spring semester. New students receive an invitation to attend an orientation program before their first semester at the university.

Summer Orientation

Summer orientation for freshmen is a two-day program scheduled throughout June. As early as January, new freshman students and their family members are asked to select a convenient time from among a number of orientation sessions that are scheduled during June. In addition to preparing their class schedules for fall semester, new students with their family members participate in informational activities about policies and procedures at the university, and meet formally and informally with faculty, staff, and other new students and their families. These sessions, held in a comfortable, informative atmosphere, lessen existing anxieties, assist in the development of a clearer understanding of the university environment, and make it possible for new students—with support from their family members—to begin to make the academic and social decisions that are faced by all students at the university.

Housing and meals are available at campus residence halls for a nominal fee during June freshman orientation.

Undergraduate Admission by Transfer from Other Educational Institutions

Students who seek admission must meet the following requirements and also any special requirements for the college and curriculum of their choice.

Applicants must submit an application for admission, and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). Applicants must also request that each college they have attended send an official transcript of record to the Office of Admissions. Failure to provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable college credit is completed prior to entry at Iowa State University, applicants must also request that their official high school transcript and ACT or SAT scores be sent to the Office of Admissions. Other transfer applicants are encouraged to provide high school academic information. Students who do not do so may be asked to take course placement examinations during orientation.

U.S. citizen and immigrant applicants who have not graduated from an approved U.S. high school and whose primary language is not English must meet the university’s English communication requirement. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or the SAT. Contact the Office of Admissions for minimum score requirements for each examination.

A. Transfer applicants with a minimum of 24 semester hours of graded transferable credit from regionally accredited colleges or universities, who have achieved for all college work previously attempted the grade point average required by Iowa State for specific programs, will be admitted. A 2.00 grade point average (on a 4.00 grading scale) is the minimum transfer grade point average requirement. Some programs may require a transfer grade point average higher than this minimum. Higher academic standards may be required of students who are not residents of Iowa, including international students.

Applicants who have not maintained the grade point average required by Iowa State University for specific programs or who are under academic suspension from the last college attended generally will be denied admission.

B. In addition to meeting the minimum transfer grade point average requirement described above, applicants who have completed fewer than 24 semester hours of graded transferable college credit prior to their enrollment at Iowa State must also meet the admission requirements for students entering directly from high school.

C. Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

D. Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis, taking into account all available academic information.

Transfer Credit Practices

Iowa State University endorses the Joint Statement on Transfer and Award of Academic Credit approved by the American Council on Education (ACE) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). The current issue of Transfer Credit Practices of Designated Educational Institutions, published by AACRAO is an example of a reference used in determining transfer credit.

The acceptance and use of transfer credit are subject to limitations in accordance with the educational policies of Iowa State University.

A. Students from regionally accredited colleges and universities.

Credit earned at regionally accredited colleges and universities is acceptable for transfer, except for the following, which may not be accepted, or may be accepted to a limited extent:

—credit in courses determined by Iowa State University to be of a developmental, vocational, or technical nature

—credit in courses or programs in which the institution granting the credit is not directly involved.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State University.

B. Students from colleges and universities which have candidate status.

Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor’s degree at Iowa State University.

Credit earned at the junior and senior classification from an accredited two-year college which has received approval by a regional accrediting association for change to a four-year college may be accepted by Iowa State University.

C. Students from colleges and universities not regionally accredited.

Courses completed at colleges and universities that are not regionally accredited will be evaluated according to the recommendations made by the American Association of Collegiate Registrars and Admissions Offices or the American Council on Education.
In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the Regent Committee on Educational Relations, upon request from such institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories. In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Designated Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

D. Students from foreign colleges and universities.
Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved, its recognition by the educational authorities of the foreign country, and an evaluation of the content, level, and comparability of the study to courses and programs at Iowa State University. Credit may be granted in specific courses or assigned to general areas of study. Extensive use is made of professional journals and references which describe the educational systems and programs of individual countries.

Additional Transfer Credit Policies

A. Students with credit obtained during military service.
Credit will be awarded for successful completion of technical or specialized schools attended while on active duty with the armed forces to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication A Guide to the Evaluation of Educational Experiences in the Armed Services.

B. Students with credit obtained through non-college sponsored instruction.
Credit will be awarded for successful completion of learning acquired from participation in formal courses sponsored by associations, business, government, industry, and unions to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication The National Guide to Educational Credit for Training Programs.

C. Students with credit obtained through correspondence courses.
Although Iowa State does not offer correspondence courses, college level courses taken by correspondence from accredited colleges or universities are acceptable for transfer at the undergraduate level if the courses taken are those that do not require laboratory study.

D. College Level Examination Program (CLEP).
Iowa State University will award credit for each of the following 15 examinations: Financial Accounting, Principles of Accounting, American Government, Biology, Calculus, French Language, German Language, Humanities, Principles of Macroeconomics, Principles of Microeconomics, Natural Sciences, Introductory Psychology, Social Sciences and History, Introductory Sociology, Spanish Language. Application of CLEP credit to a degree program varies with the department, so students should consult with their department before they register for CLEP examinations. Additional information is available at www.admissions.iastate.edu/cbe/cbe_clep.php.

E. Students with "test-out" credit.
Students who have earned credit at other colleges or universities through Advanced Placement (AP), College Level Examination Program (CLEP), or International Baccalaureate (IB) examinations may qualify for credit at Iowa State University. Scores from these examinations should be sent directly to the Office of Admissions; credit will be awarded provided the scores satisfy Iowa State’s requirements. Credit earned at another college through locally designed test-out examinations may transfer to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at that institution.

Articulation/Transfer Agreements

A. Iowa Regent Universities General Education Articulation Agreement.
Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa may transfer to Iowa State’s College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language and library requirements).

B. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.
Students who plan to enter the College of Liberal Arts and Sciences at the College of Business at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least 60 prescribed semester credits (90 quarter credits) acceptable for transfer and at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of that college. College of Business students will still be required to take an ethics and a global course to satisfy general education requirements unless they are taken as part of the associate of arts degree.

C. Associate of Science (A.S.) Articulation Agreement with Iowa public community colleges.
Students who plan to enter the College of Liberal Arts and Sciences at Iowa State University with an associate of science degree from an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be enrolled at junior level status upon entry to Iowa State University, College of Liberal Arts and Sciences. Transfer students with AS degrees will have their transfer credits evaluated course-by-course to determine how the courses will be applied to their intended Iowa State major/degree program requirements.

D. Career-technical credit from Iowa public community colleges.
Iowa State University will accept up to 16 semester (24 quarter) credits earned in career-technical courses where the sending Iowa public community college will accept such courses toward its associate of arts or associate in science degree. Certain career-technical courses at Iowa community colleges may be articulated to Iowa State University as academic credit. The credit hours earned in these articulated courses would transfer in addition to the 16 semester hour career-technical maximum. Please refer to the course equivalency guides on the Web (www.admissions.iastate.edu/equiv) or contact the Office of Admissions for more information.

E. AP and CLEP credit from Iowa public colleges and universities.
Iowa State University has an agreement with the Iowa public colleges and universities which allows credit earned through AP and CLEP examinations to transfer directly to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at the sending institution.

On-line Transfer Articulation System (TRANSIT)
TRANSIT is Iowa State’s online system, which displays how credits from a community college or another university may transfer to a degree program at Iowa State. In TRANSIT, prospective or current students can generate a transfer credit evaluation showing how their courses and degrees from a community college or university transfer to Iowa State University. In addition, students can request an unofficial degree audit, which will display how their transfer courses are applied within a particular Iowa State major/degree program. TRANSIT is easy to use and can be accessed by going to http://transit.iastate.edu.

Credit by Examination (CBE)
It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin. Credit is awarded primarily in the introductory level classes in mathematics, natural, physical, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.

Types of Credit By Examination Programs (CBE)
Students may earn academic credit in any of four ways and have that credit recorded on their academic record when they enroll. Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, departmental examinations, and the College Level Examination Program (CLEP). Iowa State’s policies for awarding credit for each of these programs may be found at www.admissions.iastate.edu/cbe.

Advanced Placement (AP) Program of the College Board
This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement through the Advanced Placement Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, geography, government and politics, history, mathematics, music, physics, psychology and statistics. High school counselors and teachers will assist with testing arrangements.
Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Correspondence concerning the Advanced Placement Program should be addressed to the College Board Advanced Placement Examinations, P.O. Box 977-1S, Princeton, New Jersey 08541, or visit their web site at www.collegeboard.com/student/testing/ap/about.html (http://www.collegeboard.com/student/testing/ap/about.html).

International Baccalaureate Examinations
The International Baccalaureate (IB) Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments require higher scores. Official IB examination results must be sent directly to the Office of Admissions from the International Baccalaureate Americas Office. Results listed on high school transcripts are not considered official.

Correspondence concerning the IB Program should be addressed to IB Americas Global Centre, 7501 Wisconsin Ave., Suite 200 West, Bethesda, MD 20814, iba@ibo.org, or visit their website at http://ibo.org/iba/.

Departmental Examinations
Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental (or CLEP) examinations should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested. If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. T grades are not used in computing students’ grade point averages; however, the credit does become part of their official academic record and may be applied toward their graduation requirements. For a listing of common departmental test-out exams, refer to http://counseling.iastate.edu/testing-services/test-outs. Most examinations for credit are prepared by the departments offering the courses. In some cases, the examination used is part of the College Level Examination Program (CLEP), where the content of the CLEP test has been judged to be an equivalent to the content of the course.

College Level Examination Program
CLEP is available on computer only and Iowa State University only accepts the CLEP tests listed in this section, and does not accept College Mathematics, Algebra or Precalculus, or College Composition or Literature. Up to six semester credit hours in each of these three CLEP general tests is awarded: Social Sciences and History, Humanities, and Natural Sciences. In addition, the College of Engineering does not allow credit earned from CLEP Social Sciences and History, Humanities, and Natural Sciences tests to be used in their students’ degree programs.

CLEP tests accepted at Iowa State University include American Government (Pol S 215); Financial Accounting (Acct 284; engineering majors should consult with their academic adviser before registering for this examination); Biology (Biol 101, not for biology or engineering majors); Calculus (Math 165); Introductory Sociology (Soc 134); Principles of Macroeconomics (Econ 102); and Principles of Microeconomics (Econ 101). Current Iowa State University students should not take the economics CLEP exams; they are required to take the departmental exam instead.

In addition, Iowa State University will award up to 16 semester credit hours for CLEP French Language, up to 16 semester credit hours for CLEP German Language, and up to 16 semester credit hours for CLEP Spanish Language. Please note that native or near native speakers of French, German, or Spanish may not test out of the beginning or intermediate levels in these languages. A nonrefundable fee is charged for each CLEP test requested, and all requests should be made one week prior to the test date. CLEP tests are administered by the Student Counseling Service Testing Office Monday through Friday. For information on whether to take any of the CLEP tests, contact your academic adviser. To obtain information on any of the CLEP tests, contact the SCS Testing Office, Rm. 2062 Student Services Building, Iowa State University, Ames, Iowa 50011, or send e-mail to scsclep@iastate.edu. To print a copy of the institutional CLEP registration form, go to http://www.counseling.iastate.edu/testing-services.

Policies and Procedures Governing CBE Tests
1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).
2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.
3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a retest may be taken upon approval of the department in which the course is offered.
4. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.
5. There is a nonrefundable fee for all departmental and CLEP tests. The fee is set by the Board of Regents, State of Iowa, and is subject to change.
6. Departmental examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should contact the department that offers the class. CLEP tests are given throughout the year.
7. Credit for the CLEP examinations Social Sciences and History, Humanities, and Natural Sciences is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow these CLEP credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisers to determine whether such credit is to their benefit.
8. Listed below are policies for transferring CBE from another college or university to Iowa State University:
   a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is earned at any other college or university may not be transferred directly to Iowa State. However, the scores from these examinations may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State’s AP and CLEP policies.
   b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State’s IB policies.
   c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution.
9. Credit earned from CBE will be posted to the student’s academic record at the end of the term. CBE credits will be counted toward the projected year in school classification used to establish registration start dates.
10. Some professional programs do not accept T (test-out) credit in preprofessional courses. Students who anticipate applying to such programs should inquire about the acceptability of such credit before registering for such CBE tests.
11. Credit established at Iowa State University will usually transfer to other colleges and universities; however, the final decision rests with the institution reviewing the transcript.

Confidential Information
With the exception of the information noted above, all student records are considered to be confidential and are open only to school officials. A school official is a person employed by the university in administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the university has contracted; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility. Iowa State University’s notification of rights under FERPA can be found at http://www.registrar.iastate.edu/info/ferpanotice.html.

The following policies govern access to student records:
1. Each type of student record is the responsibility of a designated school official, and only that person or the dean or director to whom that person reports has authority to release the record. The following is a list of the responsible officials:

   a. Academic records: registrar
   b. Admissions records: director of admissions
   c. Financial aid records: director of student financial aid
   d. Business records: university controller
   e. Traffic and security records: director, ISU Department of Public Safety
   f. Medical records: director, Thielens Student Health Center
   g. Counseling records and test scores: director, Student Counseling Service
   h. Actions of Academic Standards Committees: college deans
   i. Disciplinary records: dean of students
   j. Residence hall records: director of residence
   k. Placement records: college placement officers.
   l. Evaluations for admission to ISU graduate or professional programs: deans or department chairs
   m. Special academic programs: faculty member in charge of the program and the dean of the college.

2. The designated official may release records to other school officials who have a legitimate need for the information. A list of those persons who normally have access to each type of student record is available in 214 Enrollment Services Center.

3. All student records are reviewed periodically. Information concerning the frequency of review and expurgation of specific records is available in 214 Enrollment Services Center.

4. Students have the right to review upon request any records that pertain directly to them, and may obtain a copy of the record for a fee. This provision does not apply to records to which the student has waived his or her right to review, nor does it apply to medical and counseling records.

5. A student may waive the right to review a specific record by submitting in writing a statement to this effect to the official responsible for that record.

6. A file containing copies of records pertinent to advising is maintained on each student for use by the student’s adviser. This file may be maintained in hard copy or electronic format. Ordinarily this file is kept in the possession of the adviser, but for convenience it may be stored elsewhere such as in the dean’s office or department office. When the student changes majors, or changes advisers within the same major, the file is transferred to the new adviser. Under the university’s student records policy, the student is considered to have the right of access to this file.

7. Medical and counseling records shall be released at the written request of the student to medical or psychological professionals outside the university or to university officials.

8. University personnel who have access to student records in the course of carrying out their university responsibilities shall not be permitted to release the record to persons outside the university, unless authorized in writing by the student or unless one of the exceptions stated earlier is involved.

9. Confidential information may be released by students to their parents or other trusted third parties through the AccessPlus third party system. Confidential information may also be released by obtaining the student’s written consent or by having the parent establish the student’s dependency as defined by the Internal Revenue Code of 1954, section 152, by furnishing a certified copy of the parent’s most recent federal income tax return.

10. The officials responsible for custody of student records will maintain records of requests and disclosures of personally identifiable nonpublic information. The records of requests, whether granted or not, shall include the person or agency requesting the information and the purpose of the release. These records of requests and disclosures will be available to the student on request. Records of requests and disclosures are not necessary for requests made by the student, by school officials in carrying out their official responsibilities, by persons employed by agencies and offices conducting audits and accreditations of university programs, or any of the other exceptions listed previously.

Registration/Enrollment

In order to register for classes students must first accept their offer of admission by the university. Registration and the payment of assessed fees are required of all who attend classes. Enrollment is not complete until fees are paid, including room and board fees for those living in residence halls. See Registration. (https://nextcatalog.registrar.iastate.edu/registration)

Enrollment Status

Enrollment status is defined for certification purposes as either full-time or half-time.

Full-time status, fall or spring semester
Undergraduates: 12 credits
Graduates: 9 credits

Half-time status, fall or spring semester
Undergraduates: 6 credits
Graduates: 5 credits

Summer status
Summer status depends on the number of weeks a student is enrolled. Always contact the Office of the Registrar to verify a student’s status for a summer session.

Residency Classification for Admission and Tuition Purposes

These criteria are contained in the Policy Manual, Board of Regents, State of Iowa and or the Iowa Administrative Code: Board of Regents, State of Iowa.

GENERAL INFORMATION

A. A person enrolling at one of the three state universities shall be classified as a resident or nonresident for admission, tuition, and fee purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

B. In determining resident or nonresident classification, the issue is essentially one of why the person is in the state of Iowa. If the person is in the state primarily for educational purposes, that person will be considered a nonresident. For example, it may be possible that an individual could qualify as a resident of Iowa for such purposes as voting, or holding an Iowa driver’s license, and not meet the residency requirements as established by the Board of Regents, State of Iowa, for admission, tuition, and fee purposes.

C. The registrar, or designated person, is authorized to require written documents, affidavits, verifications, or other evidence deemed necessary to determine why a student is in Iowa. The burden of establishing that a student is in Iowa for other than educational purposes is upon the student. A student may be required to file any or all of the following:
   1. A statement from the student describing employment and expected source of support
   2. A statement from the student’s employer
   3. A statement from the student’s parents verifying nonsupport and the fact that the student was not listed as a dependent on tax returns for the past year and will not be so listed in future years
   4. A statement from the student’s spouse related to sources of family support, length of residence in Iowa, and reasons for being in the state of Iowa
   5. Supporting statements from persons who might be familiar with the family situation
   6. Iowa state income tax return.

D. Applications for resident classification for a given semester or session are due no later than the fifteenth class day of that semester or session. Applications received after the fifteenth class day of that semester or session will be considered for the next semester or session. Appeals of any nonresident classification decision resulting from applications for resident classifications are due no later than midterm of that semester or session. Change of classification from nonresident to resident will not be made retroactive beyond the term in which application for resident classification is made.

E. A student who gives incorrect or misleading information to evade payment of nonresident fees shall be subject to serious disciplinary action and must also pay the nonresident fees for each term previously attended.

F. Review committee. These regulations shall be administered by the registrar or someone designated by the registrar. The decision of the registrar or designated person may be appealed to a university review committee. The finding of the review committee may be appealed to the Board of Regents, State of Iowa.

GRADUATE ASSISTANTS

Students with graduate assistantships of 1/4-time or more are assessed Iowa resident tuition and fees. Nonresident students with graduate assistantships of 1/4-time or more retain their nonresident classification, but are assessed resident tuition and fees as long as the graduate assistantship is continued.
The spouse of a 1/4-time or more graduate assistant who is a nonresident is eligible for resident tuition and fees during the period of the assistantship appointment. Iowa residency is not granted, but a waiver of nonresident tuition and fees is in effect when the graduate assistantship ends, the tuition and fee waiver for the spouse is terminated. (Board of Regents, State of Iowa, Minutes March 15, 1995, p. 801).

The graduate student must request the resident tuition assessment by midterm of the term in question. The benefit will not be granted retroactively.

GUIDELINES

The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:

1. A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

2. In deciding why a person is in the state of Iowa, the person’s domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

3. A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile. A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident so long as domicile is maintained, even though circumstances may require extended absence of the person from the state. It is required that a person who claims Iowa domicile while living in another state or country will provide proof of the continual domicile as evidence that the person:

   (1). Has not acquired domicile in another state;
   (2). Has maintained a continuous voting record in Iowa; and
   (3). Has filed regular Iowa resident income tax returns during absence from the state.

4. A student who moves to Iowa may be eligible for resident classification at the next registration following 12 consecutive months in the state provided the student is not enrolled as more than a half-time student (6 credits for an undergraduate or professional student, 5 credits for a graduate student) in any academic year term, is not enrolled for more than 4 credits in a summer term for any classification, and provides sufficient evidence of the establishment of an Iowa domicile.

5. A student who has been a continuous student and whose parents move to Iowa may become a resident at the beginning of the next term provided the student is dependent upon the parents for a majority of financial assistance.

6. A person who has been certified as a refugee or granted asylum by the appropriate agency of the United States, who enrolls as a student at a university governed by the Board of Regents, State of Iowa, may be accorded immediate resident status for admission, tuition, and fee purposes where the person:

   (1). Comes directly to the state of Iowa from a refugee facility or port of debarkation, or
   (2). Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency.

7. An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

8. At the Regent institutions, American Indians who have origins in any of the original peoples of North America and who maintain a cultural identification through tribal affiliation or community recognition with one or more of the tribes or nations connected historically with the present state of Iowa, including the Iowa, Kickapoo, Menominee, Miami, Missouri, Ojibwa (Chippewa), Omaha, Otoe, Ottawa (Odawa), Potawatomi, Sac and Fox (Sauk, Meskwaki), Sioux, and Winnebago (Ho Chunk), will be assessed Iowa resident tuition and fees. (Board of Regents, State of Iowa, Minutes October 15-16, 1997, p. 299).

B. Additional guidelines are used in determining the resident classification of a veteran, qualified military person, and dependent children and spouses of a veteran or qualified military person for purposes of admission and undergraduate tuition and mandatory fees:

1. A person who is stationed on active duty at the Rock Island arsenal as a result of military orders, or the dependent child or spouse of such person, is entitled to resident status for purposes of undergraduate tuition and mandatory fees. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases for the dependent child or spouse until the beginning of the next term in which the dependent child or spouse is enrolled. If the qualified military person is transferred, deployed, or restationed while the person’s spouse or dependent child is enrolled in an institution of higher education under the control of the board of regents, the spouse or dependent child shall continue to be classified as a resident under this subparagraph until the close of the fiscal year in which the spouse or dependent child is enrolled.

2. A veteran who is domiciled or moves to the state of Iowa and who is eligible for benefits, or has exhausted benefits under the federal Post-9/11 Veterans Educational Assistance Act of 2008, is entitled to resident status for purposes of undergraduate tuition and mandatory fees. The dependent child or spouse of a veteran who meets these requirements is entitled to resident status for undergraduate tuition. However, if the arrival of the veteran in Iowa is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases for the dependent child or spouse until the beginning of the next term in which the dependent child or spouse is enrolled.

3. A person who is moved into the state as the result of military or civil orders from the government for other than educational purposes, or the dependent child or spouse of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the dependent child or spouse is enrolled. Legislation, effective July 1, 1977, requires that military personnel who claim residency in Iowa (home of record) will be required to file Iowa resident income tax returns.

FACTS

A. The following circumstances, although not necessarily conclusive, have probative value in support of a claim for resident classification:

1. Reside in Iowa for 12 consecutive months, and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.
2. Reliance upon Iowa resources for financial support.
3. Domicile in Iowa of persons legally responsible for the student.
4. Former domicile in the state and maintenance of significant connections therein while absent.
5. Acceptance of an offer of permanent employment in Iowa.
6. Military orders, if for other than educational purposes.
7. Other facts indicating the student’s domicile will be considered by the universities in classifying the student.

B. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to affect classification of a student as a resident under these regulations:

1. Voting or registration for voting.
2. Employment in any position normally filled by a student.
3. The lease of living quarters.
4. Admission to a licensed practicing profession in Iowa.
5. Automobile registration.
6. Public records; for example, birth and marriage records, Iowa driver’s license.
7. Continuous presence in Iowa during periods when not enrolled in school.
8. Ownership of property in Iowa, or the payment of Iowa taxes.

Office of the Registrar

University Registrar
Laura Doering, M.S.
Associate Registrar
Diane Rupp

Student Records

Iowa State University maintains various records concerning students, to document their academic progress as well as to record their interactions with university staff and officials. In order that their right to privacy be preserved and to conform with federal law, the university has established certain policies to govern the handling of
student records. All policies conform with FERPA, the Family Educational Rights and Privacy Act (also known as the Buckley Amendment).

**Student Addresses**

Students have the responsibility to notify the Office of the Registrar each time their information changes. Student information changes can be made in person to the Office of the Registrar, 214 Enrollment Services Center, or via AccessPlus (https://accessplus.iastate.edu/). Complete this form online using Acrobat Reader 6.0 or later, then print (remember to sign it) and submit to the Office of the Registrar, 214 Enrollment Services Center; by FAX (515)294-1088. ISU employees (graduate assistant or student worker), MUST also report an address change correction directly to the Office of Human Resource Services (http://www.hrs.iastate.edu/main/homepage.shtml), 3810 Beardshear Hall.

**Public Information**

Certain information concerning students is considered to be open to the public upon inquiry. This public information is of two types: directory information and other information not included in the ISU Directory. ISU directory information includes student name, local address, telephone number, campus e-mail address, college, curriculum, year in school, and enrollment status.

Other public information includes mailing address, date and place of birth, home town, dates of attendance at Iowa State, expected date of graduation, names of advisers, awards and academic honors, Iowa State degree(s) and date(s) awarded, previous educational institutions attended, degrees received, dates of attendance, full- or part-time status, participation in officially recognized activities and sports, and weight and height of members of athletic teams.

Public information will be released by the registrar to anyone upon inquiry, unless students have requested that their information not be released. Students can withhold public information through the Address Change link on Access Plus (https://accessplus.iastate.edu/). For the purposes of FERPA, Iowa State University defines directory information to include both ISU directory information and public information as defined above.

It is the policy of the university to respect the privacy of students; therefore, only lists and labels containing names of students with directory information will be made available to members of the public. This directory information will be provided on a time-available basis for the cost of producing the information. Directory information is available using the online phonebook (http://info.iastate.edu). For information disclosure policy is available at www.iastate.edu/~disclosure. Students and prospective students, and their parents certain information about the university. The information disclosure policy is available at www.iastate.edu/disclausre. Students without electronic access can obtain the information from the Office of the Registrar, 214 Enrollment Services Center, 515-294-5836. A paper copy of the information will be provided upon request.

**When Records May Be Withheld**

The appropriate university official may request that a student’s record not be released if that student is delinquent in an account with the university or an affiliated organization. The effect of this action is that a transcript will not be released and registration will be withheld.

The appropriate official may also request that records be withheld in instances when official disciplinary action has been taken against a student. Authorization for these actions is supported by The Iowa Code and The Iowa Administrative Code. In order for such an action to be rescinded, the Office of the Registrar must receive written authorization from the official who originally requested the action, indicating that the student has met the obligation. Further information about this policy can be obtained from the Office of the Registrar.

**Review and Challenge of Records**

A student may challenge the accuracy of handling of records maintained by the university on grounds that the records are inaccurate, misleading, or otherwise violate the privacy or other rights of the student. The university has established the following procedures to provide an opportunity for the student to correct or delete inaccurate records, or to insert into the record a written explanation of the content. Students who question their records should discuss the issue first with the individual staff person who established or maintains the records. Presumably most issues can be resolved at this level. If a satisfactory resolution cannot be reached, the student should submit the question to the head of the department in which the record is maintained.

The department head will discuss the issue with the staff person and the student challenging the record. If resolution cannot be reached after meeting with the department head, the student may submit the question to the dean or director to whom the department head is responsible. The dean or director will investigate, and will respond in writing.

If the record has not been reconciled through these measures, the student may direct a written request to the president of the university. The president will convene an Ad Hoc Hearing Panel of Access and Confidentiality of Educational Records, composed of two faculty members, two students, and one administrator, appointed by the president for a period of one year, with the president or a designee serving as nonvoting chairperson. The student shall be given an opportunity to present to the panel evidence relevant to the issues raised, and the panel will issue a written response.

**Posting Grades and Test Scores**

Instructors who wish to inform students of their performance may post grades and test scores on a secure course web site as long as individual students may only access their own grades. The test scores or course grades of students may not be posted in any public location (World Wide Web or hard copy posting) unless the instructor posts the information using a code for each student that is known only by the instructor and the student.

**Release of Grades**

Students who choose to release their grades to parents or other trusted third parties may do so using the AccessPlus third party system. Reports of a student’s grades are not routinely sent to the student’s parents. Parents of students under 18 years of age may obtain grades by writing to the Office of the Registrar. The grades of other students will be sent to their parents only with written permission of the student, or by establishing dependency as outlined in item 9 under Confidential Information.

**ISUCard and Identification Number**

Each student is assigned a random university identification number on entry to the university. This number appears on the ISUCard that is provided to each student at the time of first registration. The ISUCard, may be required for some services and/or activities. At the time the ISUCard is issued each student also selects a university password, which is required for electronic access to personal student information.

Loss of an ISUCard should be reported immediately to the ISUCard Office, where the lost card will be invalidated and replaced for a charge. Disciplinary sanctions may be imposed for improper use of the ID card or attempts to obtain, by fraudulent means, any form of identification.

**Social Security Number**

Social security numbers are collected from prospective and current students, for administrative coordination and record identification purposes only. Although procedures have been established by the registrar for assignment of an alternative number upon request, students who wish to be employed on campus, desire to claim federal educational tax benefits, or are applying to receive financial aid, are required by law to provide their social security numbers for administrative use. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

**Policy on Student Names**

Iowa Regent universities have a common policy regarding student names and name changes. The name on the student record should be the student’s complete and legal name. In evaluating and processing all name change requests, the university reserves the right to require adequate and appropriate documentation as warranted.

**Information Disclosure**

Iowa State University is required by law to make available to enrolled students, prospective students, and their parents certain information about the university. The information disclosure policy is available at www.iastate.edu/~disclosure. Students without electronic access can obtain the information from the Office of the Registrar, 214 Enrollment Services Center, 515-294-1840 or from the Office of Admissions, 100 Enrollment Services Center, 515-294-5836. A paper copy of the information will be provided upon request.
Career Preparation

Additional information is available within the college student information offices and through the Office of Admissions.

Teacher Education

http://www.teacher.hs.iastate.edu/

A student seeking admission to the Iowa State University Teacher Education Program must be accepted by a selection committee for the specific licensure area which the student seeks to enter. Factors considered in evaluating applications (in addition to the requirements listed below) may include scholarship, interest in teaching, character, interpersonal skills, and physical and mental health. Recommendations by selection committees must be confirmed by the Educator Preparation Coordinating Council (http://www.teacher.hs.iastate.edu/committee.php) before admission is granted.

See the Teacher Information (p. 27) page in this section for more detailed information.

Preprofessional Study

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor’s degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor’s degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

See the Preprofessional Study (p. 37) page in this section for more detailed information.
Opportunities in Teacher Education

Ralph Reynolds, Director of the School of Education

Teacher Education is a shared responsibility that spans three colleges. For most licensure areas, students major in a content area while taking additional education courses. All students who are recommended by Iowa State University for teacher licensure must meet the requirements of Teacher Education and be recommended by their department, college, and the ISU recommending official. Students who successfully complete the requirements for any of the endorsement areas offered at ISU must demonstrate the skills and knowledge required of beginning teachers.

Undergraduate Teacher Licensure Areas

An undergraduate student seeking a bachelor’s degree must be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and college.

Currently, there are fifteen undergraduate teacher licensure areas offered at Iowa State University. These areas and their corresponding grade levels are listed below:

- Agricultural Education (grades 5-12)
- Biology (grades 5-12)
- Chemistry (grades 5-12)
- Early Childhood Education (birth-grade 3, including special education) and Early Childhood Special Education (PK)
- Earth Science (grades 5-12)
- Elementary Education (grades K-6)
- English (grades 5-12)
- Family and Consumer Sciences (grades 5-12)
- Health Education (grades 5-12)
- History-Social Sciences (grades 5-12)
- Mathematics (grades 5-12)
- Music (grades K-12)
- Physical Education (grades K-12)
- Physics (grades 5-12)
- World Languages and Cultures (French, German, and Spanish) (grades 5-12)

Additional Endorsements

Students must fulfill the requirements for one of the licensure areas listed above to add the endorsements below.

- Art (K-8)
- Basic Science (K-8)
- Coaching Interscholastic Athletics (grades K-12)
- English and Language Arts (K-8)
- English as a Second Language (grades K-12)
- General Science (grades 5-12)
- Health (K-8)
- Instructional Strategist I: Mild/Moderate Disabilities (grades K-8 or 5-12)
- Instructional Strategist II: Behavior Disorders/Learning Disabilities (K-12)
- Mathematics (K-8)
- Physical Science (5-12)
- Reading (grades K-8 or 5-12)
- Social Sciences (K-8)
- Speech Communication (grades 5-12)
- World Languages and Cultures (Chinese, French, German, Latin, Russian, and Spanish) (grades K-8 and 5-12)

Post-Bachelor’s Teacher Licensure Areas

Students already holding an appropriate bachelor’s degree may pursue teacher licensure in any of the undergraduate licensure areas listed above. Interested students should consult with the coordinator of the area in which they plan to specialize so that an individualized program of study can be developed.

Graduate Teacher Licensure Areas

Currently, there are five graduate initial teacher licensure programs. These programs are designed for students who do not currently hold a teaching license. The programs are listed below:

- Agricultural Education (M.S.)
- Family and Consumer Sciences Education (M.Ed. or M.S.)
- Mathematics Education (M.Ed.)
- Physical Education (M.S.)
- Secondary Sciences Education (M.A.T.)

Iowa State University also offers Master’s programs for practicing teachers. The Mathematics Department offers a Masters in School Mathematics. (See Mathematics in Courses and Programs section of this catalog.) The Curriculum and Instruction Department offers a Master’s degree program and a certificate program that lead to a special education endorsement. (See Curriculum and Instruction in Courses and Programs section of this catalog.)

Graduate programs are also available for those who seek licensure in Educational Leadership and Policy Studies as PK-12 school principals or PK-12 superintendents. (See Educational Leadership and Policy Studies in Courses and Programs section of this catalog.)

Master’s Programs that Lead to Initial Teacher Licensure

Agricultural Education

The Agricultural Education and Studies Department offers a Master’s of Science program that prepares Agricultural Education teachers for grades 5-12. See coordinator for program requirements.

Mathematics

The School of Education offers a Master’s of Education program that prepares Mathematics teachers for grades 5-12. See coordinator for program requirements.

Physical Education

The Department of Kinesiology offers a Master’s of Science program that prepares Physical Education teachers for grades K-12. See coordinator for program requirements.

Secondary Sciences

The School of Education offers a Master’s of Arts in Teaching program that prepares Secondary Science teachers for grades 5-12. See coordinator for program requirements.

Iowa Teacher Intern License Pathway

The Iowa Teacher Intern License Pathway is a Regent’s collaborative designed for adult learners holding a baccalaureate degree who are seeking 5-12 licensure in a high needs area. For more information: http://www.iowateacherintern.org/

The General Education Requirement

All prospective teachers are required to meet general education requirements as a part of their preparation.

Undergraduate Students

Undergraduate students must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements. (See licensure area coordinator for more information.)

- Art (K-8)
- Basic Science (K-8)
- Coaching Interscholastic Athletics (grades K-12)
- English and Language Arts (K-8)
- English as a Second Language (grades K-12)
- General Science (grades 5-12)
- Health (K-8)
- Instructional Strategist I: Mild/Moderate Disabilities (grades K-8 or 5-12)
- Instructional Strategist II: Behavior Disorders/Learning Disabilities (K-12)
- Mathematics (K-8)
- Physical Science (5-12)
- Reading (grades K-8 or 5-12)
- Social Sciences (K-8)
- Speech Communication (grades 5-12)
- World Languages and Cultures (Chinese, French, German, Latin, Russian, and Spanish) (grades K-8 and 5-12)

33.5 Total
The above requirements must include:

1. Engl 150 and 250, or equivalent
2. One course that develops interpersonal or group presentation
3. HD FS 102 or Psysh 230
4. One course in American history or government

Post-Bachelor’s Students

Students holding an appropriate bachelor’s degree who wish to pursue teacher licensure must have at least one course in each of the following five general education groups identified for undergraduate students in the preceding section: Natural Sciences, Mathematics or Statistics, Social Sciences, Humanities, and Communication Skills. Individual departments preparing teachers may require additional credits in general education. (See licensure area coordinator for more information.)

Master’s Students

Each Master’s program will determine what, if any, general education requirements Master’s students must fulfill beyond a bachelor’s degree from a regionally accredited institution. (See licensure area coordinator for more information.)

Standards

Teacher Education has a rigorous standards-based curriculum. Two sets of standards are used in the program, one that is targeted for pre-service teachers (Teacher Education Standards which originates from the Iowa Administrative Code, Chapter 79, Standards for Practitioner Preparation Programs) and the other set that is targeted for in-service teachers (the Iowa Teaching Standards and Model Criteria adopted by the State Board of Education), the latter is emphasized during student teaching. Both are listed below in full.

Teacher Education Standards

1. Content/subject matter specialization.

   The candidate demonstrates an understanding of the central concepts, tools of inquiry, and structure of the discipline(s) the candidate teaches, and creates learning experiences that make these aspects of the subject matter meaningful for students. This is evidenced by a completion of a 30-semester-hour teaching major which, at a minimum, must include the requirements for at least one of the basic endorsement areas, special education teaching endorsements, or secondary level occupational endorsements. Each elementary candidate must also complete a field of specialization in a single discipline or a formal interdisciplinary program of at least twelve semester hours.

2. Student learning.

   The candidate demonstrates an understanding of human growth and development and of how students learn, and receives learning opportunities that support intellectual, career, social and personal development.

3. Diverse learners.

   The candidate demonstrates an understanding of how students differ in their approaches to learning and creates instructional opportunities that are equitable and adaptable to diverse learners.

4. Instructional planning.

   The candidate plans instruction based upon knowledge of subject matter, students, the community, curriculum goals, and state curriculum models.

5. Instructional strategies.

   The candidate demonstrates an understanding and use of a variety of instructional strategies to encourage student development of critical and creative thinking, problem-solving, and performance skills.

   The candidate uses an understanding of individual and group motivation and behavior; creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation; maintains effective classroom management; and is prepared to address behaviors related to substance abuse and other high-risk behaviors.

7. Communication.

   The candidate uses knowledge of effective verbal, nonverbal, and media communication techniques, and other forms of symbolic representation, to foster active inquiry, collaboration, and support interaction in the classroom.

8. Assessment.

   The candidate understands and uses formal and informal assessment strategies to evaluate the continuous intellectual, social, and physical development of the student, and effectively uses both formative and summative assessment of students, including student achievement data, to determine appropriate instruction.

   The candidate develops knowledge of the social, historical, and philosophical foundations of education. The candidate continually evaluates the effects of the candidate’s choices and actions on students, parents, and other professionals in the learning community; actively seeks out opportunities to grow professionally; and demonstrates an understanding of teachers as consumers of research and as researchers in the classroom.

10. Collaboration, ethics and relationships.

   The candidate fosters relationships with parents, school colleagues, and organizations in the larger community to support student learning and development; demonstrates an understanding of educational law and policy, ethics, and the profession of teaching, including the role of boards of education and education agencies; and demonstrates knowledge and dispositions for cooperation with other educators, especially in collaborative/co-teaching as well as in other educational team situations.

11. Technology.

   The candidate effectively integrates technology into instruction to support student learning.

12. Methods of teaching.

   Methods of teaching have an emphasis on the subject and grade level endorsement desired.

Iowa Teaching Standards and Criteria

Standard 1:

   Demonstrates ability to enhance academic performance and support for implementation of the school district student achievement goals.

   The teacher:
   a. Provides multiple forms of evidence of student learning and growth to students, families, and staff.
   b. Implements strategies supporting student, building, and district goals.
   c. Uses student performance data as a guide for decision-making.
   d. Accepts and demonstrates responsibility for creating a classroom culture that supports the learning of every student.
   e. Creates an environment of mutual respect, rapport, and fairness.
   f. Participates in and contributes to a school culture that focuses on improved student learning.
   g. Communicates with students, families, colleagues, and communities effectively and accurately.

Standard 2:

   Demonstrates competence in content knowledge appropriate to the teaching position.

   The teacher:
   a. Understands and uses key concepts, underlying themes, relationships, and different perspectives related to the content area.
   b. Uses knowledge of student development to make learning experiences in the content area meaningful and accessible for every student.
   c. Relates ideas and information within and across content areas.
   d. Understands and uses instructional strategies that are appropriate to the content area.

Standard 3:

   Demonstrates competence in planning and preparing for instruction.

   The teacher:
   a. Uses student achievement data, local standards, and the district curriculum in planning for instruction.
   b. Sets and communicates high expectations for social, behavioral, and academic success of all students.
   c. Uses student developmental needs, background, and interests in planning for instruction.
   d. Selects strategies to engage all students in learning.
   e. Uses available resources, including technologies, in the development and sequencing of instruction.

Standard 4:

   Uses strategies to deliver instruction that meet the multiple learning needs of students.
The teacher:
  a. Aligns classroom instruction with local standards and district curriculum.
  b. Uses research-based instructional strategies that address the full range of cognitive levels.
  c. Demonstrates flexibility and responsiveness in adjusting instruction to meet student needs.
  d. Engages students in varied experiences that meet diverse needs and promote social, emotional, and academic growth.
  e. Connects students’ prior knowledge, life experiences, and interests in the instructional process.
  f. Uses available resources, including technologies, in the delivery of instruction.

**Standard 5:**
Uses a variety of methods to monitor student learning.

The teacher:
  a. Aligns classroom assessment with instruction.
  b. Communicates assessment criteria and standards to all students and parents.
  c. Understands and uses the results of multiple assessments to guide planning and instruction.
  d. Guides students in goal setting and assessing their own learning.
  e. Provides substantive, timely, and constructive feedback to students and parents.
  f. Works with other staff and building and district leadership in analysis of student progress.

**Standard 6:**
Demonstrates competence in classroom management.

The teacher:
  a. Creates a learning community that encourages positive social interaction, active engagement, and self-regulation for every student.
  b. Establishes, communicates, models, and maintains standards of responsible student behavior.
  c. Develops and implements classroom procedures and routines that support high expectations for student learning.
  d. Uses instructional time effectively to maximize student achievement.
  e. Creates a safe and purposeful learning environment.

**Standard 7:**
Engages in professional growth.

The teacher:
  a. Demonstrates habits and skills of continuous inquiry and learning.
  b. Works collaboratively to improve professional practice and student learning.
  c. Applies research, knowledge, and skills from professional development opportunities to improve practice.
  d. Establishes and implements professional development plans based upon the teacher’s needs aligned to the Iowa Teaching Standards and district/building student achievement goals.
  e. Provides an analysis of student learning and growth based on teacher created tests and authentic measures as well as any standardized and district-wide tests.

**Standard 8:**
Fulfills professional responsibilities established by the school district.

The teacher:
  a. Adheres to board policies, district procedures, and contractual obligations.
  b. Demonstrates professional and ethical conduct as defined by state law and individual district policy.
  c. Contributes to efforts to achieve district and building goals.
  d. Demonstrates an understanding of and respect for all learners and staff.
  e. Collaborates with students, families, colleagues, and communities to enhance student learning.

**Electronic Portfolio**
Each teacher candidate is required to demonstrate acquisition of the knowledge, skills and dispositions designated by the standards above for an Iowa teaching license at a level appropriate for a novice teacher. The e-portfolio allows Teacher Education to demonstrate to the Iowa Department of Education that each student recommended for an initial teaching license has an understanding of these standards.

At decision point 1, before signing off on admission materials for the student, the adviser/coordinator will check to see if the student started their e-portfolio with a minimum of one graded artifact uploaded.

At decision point 2, before signing off on student teaching materials for the student, the adviser/coordinator will check to see if the student has one graded artifact uploaded for each of the 12 standards.

At decision point 3, before signing off on licensure materials for the student, the coordinator will check to see if the student has 2 graded artifacts uploaded for each of the 12 standards. All artifacts must be graded by an instructor except for the artifacts for the content standard and the artifacts from student teaching.

At decision point 3, prior to recommendation for licensure, students will be required to write a synthesis of evidence assignment which would address all twelve teacher education standards. While the writing mechanics (punctuation, word usage, etc.) will be considered, the focus on the synthesis of evidence will be on whether or not the student has convinced the evaluator that s/he has met each standard. Students will receive notification from evaluators regarding their performance on the synthesis of evidence. A ‘not proficient’ rating on the synthesis of evidence will result in a recommendation to deny licensure. Departments may have additional requirements (see licensure area coordinator for more information). See the following webpage for more information on the electronic portfolio: [http://www.teacher.hs.iastate.edu/eportfolio.php](http://www.teacher.hs.iastate.edu/eportfolio.php)

---

**The Professional Teacher Education Requirement (Professional Core)**

**Undergraduate Students**
Prospective teachers must complete certain studies related directly to the profession of teaching. All undergraduate students in teacher education must take the following courses prior to student teaching, unless the student’s licensure area has an approved content-area course deemed to be equivalent (see specific Licensure Area Requirements section below for details.)

**Early Childhood Education and Elementary Education:**

14-16 weeks: Student Teaching (Minimum 14 weeks) See Teacher Licensure Area Coordinator for more information

Students in K-12 licensure areas and secondary (grades 5-12) licensure areas must complete the courses listed above unless the student’s licensure area has an approved equivalent. Areas with approved equivalents include: Agricultural Education (for CI 426), Physical Education (for CI 333, CI 401, CI 426 ) and all Secondary Sciences (for CI 426). (See licensure area coordinator for more information).

**Post-Bachelor’s Students**
Students who hold an appropriate bachelor’s degree and seek a teaching license must complete the professional education requirements listed above through course work or examination.
Master’s Students

Prospective teachers must complete certain studies related directly to the profession of teaching. All students enrolled in Master’s programs that lead to initial licensure must take the following courses prior to student teaching, unless the student’s licensure area has an approved content area course deemed to be equivalent. (See Master’s Programs section below for details.)

SP ED 501 Teaching Secondary Students with Exceptionalities in General Education 3
C I 505 Using Technology in Learning and Teaching 3
H P C 504 Studies in the Foundations of Education in the United States 3
C I 506 Multicultural Foundations of School and Society: Advanced 3
C I 526 Principles of Secondary Education 3
C I 529 Educational Psychology and the Secondary Classroom 3

14-16 Weeks: Student Teaching (Minimum 14 Weeks) See Teacher Licensure Area Coordinator for more information.

Clinical Experiences

The Standards for Practitioner and Administrator Preparation Programs (chapter 79.13(1)) requires that “candidates admitted to a teacher preparation program participate in field experiences including both observation and participation in teaching activities in a variety of school settings and totaling at least 80 hours duration, with at least 10 hours occurring prior to acceptance into the program.” This requirement may be met through pre-student teaching courses (e.g., C I 280, C I 480, CI 486, C I 580) or, in certain endorsement areas, a course designated to provide an equivalent experience. For most licensure areas, there are four levels for clinical experiences. Level 1 involves observation in local schools. Level 2 involves actively teaching in the classroom with one lesson, at minimum. Level 3 involves actively teaching in the classroom with two lessons, at minimum. Level 4 is student teaching and involves actively teaching for a minimum of 14 weeks where the student teacher bears primary responsibility for planning and instruction within the classroom for a minimum of two weeks (10 days). Level 2, 3 and 4 involve a course fee, which range from $25.00 to $328.00 and are assessed to cover the costs of supervision and placement with a cooperating teacher. Course fees are increased when student teaching nationally or internationally. For current course fees, consult the Schedule of Classes. For level 2, 3 and 4, the student needs access to transportation because the placement may be within 60 miles of the university. The time commitment for clinical experiences ranges from 1/2 day for level 2 and 3 to the full day for level 4. Students complete a background check before initial placement in schools and other appropriate locations.

Admission to Teacher Education (Decision Point 1)

Teacher Education Services (located in 133 MacKay) monitors the progress of teacher education students. Admission to Teacher Education is the first of three decision points. At this time, the requirements listed below will be checked. Students will not be able to progress to Student Teaching (decision point 2) and Licensure (decision point 3) without full admission to Teacher Education (decision point 1). Departments may have higher eligibility requirements for each decision point (see licensure area coordinator for more information).

Students transferring from other institutions with a minimum of 2.50 GPA or above may be admitted tentatively; full admission may be granted upon completion of nine semester credits averaging 2.50 or above at Iowa State University. Students who receive tentative admission are required to address concerns and submit an email message conveying how the concern was resolved and that they now meet all admission requirements to the Teacher Licensure Analyst. A minimum of 20 semester credits averaging 2.50 or above must be earned at Iowa State University to receive institution licensure approval (nine of the required 20 semester hours must precede student teaching).

A student seeking admission to Teacher Education must be accepted by a selection committee for the specific licensure area which the student seeks to enter. Factors considered in evaluating applications (in addition to the requirements listed below) may include professional dispositions, scholarship, interest in teaching, character, interpersonal skills, results from the background check, and physical and mental health. Recommendations by selection committees must be confirmed by the Educator Preparation Coordinating Council before admission is granted.

Requirements for full admission to Teacher Education as an undergraduate:

1. A minimum 2.5 cumulative grade point average.
2. Successful completion of one of the following basic skills tests:
   A. A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics).
   B. Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu.

3. Documented completion of ISU approved 10 hours of pre-student teaching clinical experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. An acceptable Iowa criminal background check report initiated by ISU’s recommending official.
6. E-portfolio contains a minimum of one graded artifact (that received a proficient rating).

Requirements for full admission to Teacher Education as a post-bachelor’s student:

1. A bachelor’s degree from a regionally accredited institution and a minimum 2.5 cumulative grade point average from that institution.
2. Successful completion of one of the following basic skills tests:
   A. —Minimum GRE scores (400 on each of the Verbal and Quantitative sections). Some licensure areas require higher GRE scores.
   B. —A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics). Some licensure areas may require higher Praxis I scores.

Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu.
3. Documented completion of ISU approved 10 hours of pre-student teaching clinical experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. An acceptable Iowa criminal background check report initiated by ISU’s recommending official.
6. E-portfolio contains a minimum of one graded artifact (that received a proficient rating).

Requirements for full admission to University Teacher Education as a Master’s student:

1. Full admission to an appropriate Master’s degree program.
2. Successful completion of one of the following basic skills tests:
   A. —Minimum GRE scores (400 on each of the Verbal and Quantitative sections). Some licensure areas require higher GRE scores.
   B. —A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics). Some licensure areas may require higher Praxis I scores.

Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu.
3. Documented completion of ISU approved 10 hours of pre-student teaching clinical experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. An acceptable Iowa criminal background check report initiated by ISU’s recommending official.
6. E-portfolio contains a minimum of one graded artifact (that received a proficient rating).

Maintaining Program Eligibility

GPA:

At all three decision points, GPA will be checked for a minimum of a 2.5 cumulative grade point average.
Grades:
For teacher education students, all Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C-. Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C-. Note: Individual departments preparing teachers may have higher eligibility requirements (see teacher licensure area coordinator for more information). Please note, for all three decision points (admission, student teaching and licensure) incomplete grades are NOT considered acceptable passing grades.

Electronic Portfolio:
In order to be recommended for licensure, all students must have demonstrated satisfactory performance across the teacher education competencies, as defined by their specific area. (See the teacher licensure area coordinator for more information.) Students’ progress is monitored throughout the program and standards are assessed multiple times. More information is available online: www.teacher.hs.iastate.edu.

Factors considered in maintaining program eligibility may include professional dispositions, scholarship, interest in teaching, character, interpersonal skills, results from the background check, and physical and mental health. Throughout the program, a commendation/concern form may be completed by an adviser, coordinator, faculty member, cooperating teacher, or supervisor to document a teacher education student’s knowledge, skills and dispositions worthy of commendation or concern. Significant concerns will result in removal from Teacher Education.

Background Checks
Two background checks (at minimum) will be completed on each student. First, prior to any clinical experiences taking place, students are required to undergo a state of Iowa background check through the Iowa Division of Criminal Investigation. Second, prior to receiving an initial Iowa teaching license, all candidates will undergo a national criminal history background check. The state background check costs $18.00 and the national background check costs $65.00, prices are subject to change.

At the time of a background check, students will also be required to report any prior criminal convictions or pending criminal charges. Any criminal misconduct charge other than parking or speeding violations must be reported. This includes all deferred judgments. In some cases, this will include criminal activity which occurred while a minor. Failure to accurately self-disclose to the appropriate ISU personnel may prevent the student from engaging in a clinical experience or the removal of the student if already placed in a clinical experience.

Students are required to report criminal activity in order to maintain program eligibility. Any criminal misconduct charge a student receives after the first background check is completed must be reported immediately to the Teacher Licensure Analyst located in Teacher Education Services in 133 MacKay. Failure to do so may result in the discharge of the student from Teacher Education. Please note, on occasion, a more stringent background check may be conducted by a school or other appropriate location, which may lead to a denial of a placement. More information on the Student Self-Reporting of Alleged Criminal Misconduct Policy is located online: www.teacher.hs.iastate.edu.

Appeals
Students who do not meet the requirements for decision points may choose to appeal to the Educator Preparation Coordinating Council. The description of the appeals process is available online: www.teacher.hs.iastate.edu.

Student Teaching (Decision Point 2)
Student teaching is the culminating experience to the practitioner preparation program at Iowa State University. Depending on the licensure area pursued, student teaching varies in length for a minimum of 14 weeks. A supervisor will make frequent visits to the classroom to ensure success in this experience. Sites for student teachers are within driving distance of campus or at approved in-state, national, and international locations. More information can be found online: www.teacher.hs.iastate.edu. Course fees are assessed to cover the costs of supervision and placement with a cooperating teacher. To ensure that students are prepared for this experience, the following requirements must be met prior to submitting your “Request for Student Teaching Placement” form:

1. Completion of the “Request for Student Teaching Placement” by the deadline in the fall semester for spring student teaching and by the deadline in the spring semester for fall student teaching. The deadline for students is the end of the third week of the semester. Details regarding this application are available in Teacher Education Services (located in 133 MacKay).
2. A minimum 2.5 cumulative grade point average.
3. A passing grade as determined by the licensure area must have been earned in all required professional teacher education requirement courses and selected courses in the student’s licensure area. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
4. Complete (or concurrently completing) 80 hours of pre-student teaching field experience.
5. Report any criminal misconduct charge. Please note: When the student is enrolled in any field experience or anticipates commencing a field experience within 30 days, any criminal misconduct charge a student receives after the background check is completed must be reported immediately to Teacher Education Services. When the student is not enrolled in any field experience, the charge must be reported as soon as possible but no later than five working days after the incident. Failure to do so may result in the discharge of the student from Teacher Education. The faculty coordinator and the content major department chair will be notified. A committee will meet to review the self-reporting letter and make a decision on the student’s progress.
6. E-portfolio has one graded artifact (that received a proficient rating) uploaded for each of the 12 standards.

Teacher Licensure (Decision Point 3)
The Iowa Board of Educational Examiners issues teaching licenses that are valid for specific ages or grades (e.g., Birth-3 for early childhood teachers, K-6 for elementary teachers and 5-12 for secondary teachers). Endorsements on a teaching license indicate which subject areas a teacher is qualified to teach. An initial teaching license costs $85, price is subject to change. Completion of student teaching and required coursework does NOT guarantee recommendation for a teaching license. The Iowa License may be recommended for students who hold a bachelor’s degree from Iowa State University or another regionally accredited institution and who have completed the following:

1. All requirements for an approved licensure area as designated by Iowa State University and the State of Iowa, including, but not limited to, the general education requirement, the professional teacher education requirement and clinical experiences. Note: Specific courses to be used for licensure may not be taken pass/ not pass.
2. A minimum 2.5 cumulative grade point average.
3. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
4. A national background check initiated by the Iowa Board of Educational Examiners.
5. Completion of the Iowa Application for Licensure form.
6. Documentation from the student teaching supervisor that the student has successfully completed the final assessment documenting the student’s mastery of the skills and knowledge included in the Iowa Teaching Standards.
7. Department approval by TE coordinator.
8. Registrar approval (at this time, graduation is confirmed and holds on records are reviewed).
9. Passing scores on Praxis II.
10. E-portfolio has 2 graded artifacts (that received a proficient rating) uploaded for each of the 12 standards. Also, a proficient rating is earned on the synthesis of evidence.

Undergraduate and Post-Bachelor’s (non-Master’s) Teacher Licensure Area Requirements
Certain competencies are required of those who plan to teach at the early childhood, elementary or secondary level. For full-time teaching in secondary schools a major in an endorsement area or an approved subject matter concentration of at least 30 semester hours is required. Students interested in adding an additional endorsement area should consult with the coordinator or adviser of the additional area. Persons interested in teaching in one of the following endorsement areas should also consult with the appropriate adviser or coordinator. Specific requirements for each teacher licensure area are described below (these requirements are in addition to the General Education Requirements and the Professional Teacher Education Requirements that were listed earlier). For the most current list of required courses, consult with the coordinator or adviser who works with students on teacher licensure (see the following website for the contact information of these advisers or coordinators: www.teacher.hs.iastate.edu).
Agriculture
The Department of Agricultural Education and Studies is responsible for preparing Agricultural Education teachers for grades 5-12.
For specific content area requirements see Curriculum in Agricultural Education and Studies (Teacher Certification Option).
Required professional courses are:
AGEDS 110 Orientation 0.5
AGEDS 211A High School Agriculture Programs 1
AGEDS 310 Foundations of Agricultural Education Programs 3
AGEDS 401 Planning Agriculture and Life Sciences Education Programs 3
AGEDS 402 Methods of Teaching in Agriculture and Life Sciences 3
AGEDS 416 Pre-Student Teaching Experience in Agricultural Education 1
AGEDS 417 Supervised Teaching in Agriculture and Life Sciences 1-16
Required content courses:
AGEDS 315 Personal, Professional, and Entrepreneurial Leadership in Agriculture 3
AGEDS 488 Methods of Teaching Agricultural Mechanics 3
AGRON 114 Principles of Agronomy 3
AGRON 154 Fundamentals of Soil Science 3
AN S 101 Working with Animals 2
AN S 114 Survey of the Animal Industry 2
HORT 221 Principles of Horticulture Science 3
ECON 101 Principles of Microeconomics 3
ECON 230 Farm Business Management 3
ACCT 284 Financial Accounting 3
NREM 120 Introduction to Renewable Resources 3

Biology
The Biology Program and the School of Education share the responsibility of preparing Biology teachers for grades 5-12.
Required professional courses are:
C I 280M Pre-Student Teaching Experience: Secondary Science 1-2
C I 347 Nature of Science 3
C I 418 Secondary Science Methods I: A Research-Based Framework for Teaching Science 2
C I 419 Secondary Science Methods II 2
C I 468K Supervised Practicum in Teaching: Secondary Science II 2
C I 417B Student Teaching: Physical Sciences arr
† Arranged with instructor.
Required content courses are:
CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
CHEM 178L Laboratory in College Chemistry II 1
CHEM 211 Quantitative and Environmental Analysis 2
CHEM 211L Quantitative and Environmental Analysis Laboratory 2
CHEM 301 Inorganic Chemistry 2
CHEM 316 Instrumental Methods of Chemical Analysis 2
CHEM 316L Instrumental Analysis Laboratory 2
CHEM 324 Introductory Quantum Mechanics 3
CHEM 325 Chemical Thermodynamics 3
CHEM 321L Laboratory in Physical Chemistry 2
CHEM 322L Laboratory in Physical Chemistry 2
CHEM 331 Organic Chemistry I 3
CHEM 331L Laboratory in Organic Chemistry I 1
CHEM 332 Organic Chemistry II 3
CHEM 332L Laboratory in Organic Chemistry II 1
PHYS 221 Introduction to Classical Physics I 10
& PHYS 222 and Introduction to Classical Physics II or
PHYS 111 General Physics 10
& PHYS 112 and General Physics 10
MATH 165 Calculus I 4
MATH 166 Calculus II 4
Minimum of one course in BIOL is required
BIOL 211 and BIOL 211L are recommended
Students with an endorsement in a natural science who seek approval to teach chemistry as an additional subject area must earn credits in the following courses (15 minimum credits):
CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
CHEM 178L Laboratory in College Chemistry II 1
CHEM 211 Quantitative and Environmental Analysis 2
CHEM 211L Quantitative and Environmental Analysis Laboratory 2
CHEM 331 Organic Chemistry I 3
CHEM 331L Laboratory in Organic Chemistry I 1
CHEM 332 Organic Chemistry II 3
CHEM 332L Laboratory in Organic Chemistry II 1
Or
CHEM 163 College Chemistry 4
CHEM 163L Laboratory in College Chemistry 1
CHEM 211 Quantitative and Environmental Analysis 2
CHEM 231 Elementary Organic Chemistry 3
CHEM 231L Laboratory in Elementary Organic Chemistry 1
Students with no natural science endorsement who seek approval to teach chemistry as an additional subject area must complete one of the two sets of courses listed above plus sufficient additional courses to total 24 chemistry credits chosen from:
CHEM 316 Instrumental Methods of Chemical Analysis 2
CHEM 316L Instrumental Analysis Laboratory 2

Chemistry
The Department of Chemistry and the School of Education share the responsibility of preparing Chemistry teachers for grades 5-12.

Required professional courses are:
AGEDS 110 Orientation 0.5
AGEDS 211A High School Agriculture Programs 1
AGEDS 310 Foundations of Agricultural Education Programs 3
AGEDS 401 Planning Agriculture and Life Sciences Education Programs 3
AGEDS 402 Methods of Teaching in Agriculture and Life Sciences 3
AGEDS 416 Pre-Student Teaching Experience in Agricultural Education 1
AGEDS 417 Supervised Teaching in Agriculture and Life Sciences 1-16
Required content courses:
AGEDS 315 Personal, Professional, and Entrepreneurial Leadership in Agriculture 3
AGEDS 488 Methods of Teaching Agricultural Mechanics 3
AGRON 114 Principles of Agronomy 3
AGRON 154 Fundamentals of Soil Science 3
AN S 101 Working with Animals 2
AN S 114 Survey of the Animal Industry 2
HORT 221 Principles of Horticulture Science 3
ECON 101 Principles of Microeconomics 3
ECON 230 Farm Business Management 3
ACCT 284 Financial Accounting 3
NREM 120 Introduction to Renewable Resources 3

Additional courses to obtain a total of 18 credits at the 300 level or above in a basic biological science from approved program list. One semester length course in introductory/general chemistry with lab. One semester length course in introductory organic chemistry with lab. One semester length course in biochemistry. Two semester length courses in physics with labs. Six semester hours of mathematics and/or statistics.

CHEM 163 College Chemistry 4
CHEM 163L Laboratory in College Chemistry 1
CHEM 211 Quantitative and Environmental Analysis 2
CHEM 231 Elementary Organic Chemistry 3
CHEM 231L Laboratory in Elementary Organic Chemistry 1
**Early Childhood Education**

The School of Education and the Department of Human Development and Family Studies in the College of Human Sciences share the responsibility for preparing teachers to work with children from birth to age 8 (PK-3 including special education). Students receive two endorsements: Early Childhood Education (birth – grade 3, including special education) and Early Childhood Special Education (PK).

For specific course requirements, see College of Human Sciences, Curriculum in Early Childhood Education.

**Earth Science**

The Department of Geological and Atmospheric Sciences and the School of Education share the responsibility for preparing Earth Science teachers for grades 5-12.

Required professional courses are:

<table>

ENGL 397 Practice and Theory of Teaching Writing in the Secondary Schools 3
& C I 280A Pre-Student Teaching Experience: Teacher Aide 3
ENGL 494 Practice and Theory of Teaching Literature in the Secondary Schools 3
& C I 280A Pre-Student Teaching Experience: Teacher Aide 3
SP ED 401 Teaching Secondary Students with Exceptionalities in General Education 3

Students must earn grades of C or better in all of the above courses.

Family and Consumer Sciences

The Family and Consumer Sciences Program in the Department of Apparel, Educational Studies and Hospitality Management prepares Family and Consumer Sciences teachers for grades 5-12.

For specific content area course requirements, see Curriculum, Family and Consumer Sciences Education and Studies.

Required professional courses are:

FCEDS 280A Pre-Student Teaching Experience in FCS Education: Practicum in FCS Labs (24 hours) 1
FCEDS 280B Pre-Student Teaching Experience in FCS Education: Practicum in Diverse Settings (24 hours) 1
FCEDS 306 Educational Principles for Family and Consumer Sciences 4
FCEDS 206 Professional Roles in Family and Consumer Sciences 2
FCEDS 418 Occupational, Career and Technical Programs 3
FCEDS 413 Planning and Assessment for Family and Consumer Sciences and Family Life Education 4
FCEDS 417A Supervised Teaching in Family and Consumer Sciences: Vocational family and consumer sciences. 3-8
FCEDS 417B Supervised Teaching in Family and Consumer Sciences: Family and consumer sciences. 3-8

For specific content area course requirements, see Curriculum, in Family and Consumer Sciences Education and Studies.

Health Education

The Department of Kinesiology prepares Health teachers for grades 5-12.

Required professional courses are:

H S 375 Teaching-Learning Process in Health Education 3
H S 417 Supervised Teaching in Health Education in the Secondary School 12

Required content courses are:

KIN 258 Physical Fitness and Conditioning 2
H S 105 First Aid and Emergency Care 2
H S 110 Personal and Consumer Health 3
H S 215 Drug Education 3
H S 305 Instructor’s First Aid and Cardio-pulmonary Resuscitation 2
H S 310 Community and Public Health 3
H S 350 Human Diseases 3
H S 390 Administration of the School Health Program 3
FS HN 167 Introduction to Human Nutrition 3
HD FS 276 Human Sexuality 3
HD FS 375 Death as a Part of Living 3
or HD FS 377 Aging and the Family 3
BIOL 155 Human Biology 3
or BIOL 255 Fundamentals of Human Anatomy 1
BIOL 255L Fundamentals of Human Anatomy Laboratory 1
BIOL 256 Fundamentals of Human Physiology 3
BIOL 256L Fundamentals of Human Physiology Laboratory 1

Students seeking approval for health education as an additional endorsement area must earn credits in the following courses:

FS HN 167 Introduction to Human Nutrition 3
HD FS 276 Human Sexuality 3
H S 110 Personal and Consumer Health 3
H S 215 Drug Education 3
H S 305 Instructor’s First Aid and Cardio-pulmonary Resuscitation 2
H S 310 Community and Public Health 3
H S 350 Human Diseases 3
H S 375 Teaching-Learning Process in Health Education 3
H S 390 Administration of the School Health Program 3
or BIOL 255 Fundamentals of Human Anatomy 1
BIOL 155 Human Biology 3
or BIOL 255 Fundamentals of Human Anatomy Laboratory 1
BIOL 256 Fundamentals of Human Physiology 3
BIOL 256L Fundamentals of Human Physiology Laboratory 1

History-Social Sciences

The Curriculum and Instruction Department and the History Department share the responsibility for preparing History-Social Sciences teachers for grades 5-12. The department has specific class distribution requirements for the U.S. and world history endorsements.

Contact the History Department for specific information.

History-Social Sciences Education students must earn grades of B- or better in all content courses (with a minimum of a 2.75 GPA), as well as a C or better in pedagogical coursework required for teacher licensure.

Mathematics

The Mathematics Department and the School of Education share responsibility for the preparation of Mathematics teachers for grades 5-12.

For specific content area course requirements, contact the School of Education.

Required professional courses are:

C I 219 Orientation to Teacher Education: Math, Science, FCS Education, and History/Social Science Majors 1
C I 280A Pre-Student Teaching Experience: Teacher Aide 0.5-2
C I 280L Pre-Student Teaching Experience: Early Field Experience 0.5-2
C I 480C Field Experience for Secondary Teaching Preparation: Mathematics 0.5-2
C I 497 Teaching Secondary Mathematics 3
C I 417C Student Teaching: Mathematics安排†

† Arranged with instructor.

Required content courses are:

MATH 165 Calculus I 4
MATH 166 Calculus II 4
MATH 201 Introduction to Proofs 3
MATH 265 Calculus III 4
MATH 266 Elementary Differential Equations 3
or MATH 267 Elementary Differential Equations and Laplace Transforms 3
MATH 301 Abstract Algebra I 3
MATH 317 Theory of Linear Algebra 4
MATH 341 Introduction to the Theory of Probability and Statistics I 3
MATH 397 Teaching Secondary Mathematics Using University Mathematics 3
MATH 435 Geometry I 3
MATH 436 Geometry II 3
Kinesiology and Health

The Kinesiology Department prepares Physical Education teachers for grades K-12.

Physical Education

For required content courses are: see Curriculum, Kinesiology and Health

Music

The Music Department prepares Music teachers for grades K-12.

For specific content area course requirements, see Curriculum, in Music.

Required professional courses are:

Music

Musical Education in Elementary Physical Education

Directed Field Experience in Physical Education

Intermediate Laboratory in Modern Physics I

MATH 165 Calculus I

MATH 166 Calculus II

MATH 201 Introduction to Proofs

MATH 301 Abstract Algebra I

MATH 317 Theory of Linear Algebra

MATH 341 Introduction to the Theory of Probability and Statistics I

MATH 397 Teaching Secondary Mathematics Using University Mathematics

MATH 345 Geometry I

MATH 346 Geometry II

STAT 101 Principles of Statistics

C I 480C Field Experience for Secondary Teaching Preparation: Mathematics

C I 497 Teaching Secondary School Mathematics

One of the following:

COM S 107 Applied Computer Programming

COM S 207 Fundamentals of Computer Programming

COM S 227 Introduction to Object-oriented Programming

Music

MUSIC 248 Technology in Music Instruction

MUSIC 266 Introduction to Music Education

MUSIC 366 Methods of Music Education

One of the following:

MUSIC 367 Choral Literature

MUSIC 368 Marching Band and Jazz Ensemble Techniques

MUSIC 417R Student Teaching: Music-Elementary

MUSIC 417S Student Teaching: Music-Secondary

MUSIC 464 Instrumental Administration, Materials, and Methods

MUSIC 465 Choral Materials and Methods

MUSIC 490A Independent Study: Education

† Arranged with instructor.

For required content courses are see Curriculum, in Music.

Physical Education

The Kinesiology Department prepares Physical Education teachers for grades K-12.

Kinesiology and Health

Required professional courses:

KIN 280 Directed Field Experience in Elementary Physical Education

KIN 281 Directed Field Experience in Physical Education

KIN 312 Movement Education in Elementary School Physical Education

KIN 313 Secondary Physical Education Methods

KIN 395 Adapted Physical Education

KIN 418 Supervised Teaching in Physical Education in the Elementary School

KIN 417 Supervised Teaching in Physical Education in the Secondary School

† Arranged with instructor.

KIN 471 Measurement in Physical Education

KIN 475 Physical Education Curriculum Design and Program Organization

Physics

The Physics and Astronomy Department and the School of Education share the responsibility for preparing Physics teachers for grades 5-12.

Required professional courses:

PHYS 221 Introduction to Classical Physics I

PHYS 222 Introduction to Classical Physics II

PHYS 311T Intermediate Laboratory for Secondary Physics Teachers

PHYS 399 Seminar on Secondary School Physics

PHYS 321 Introduction to Modern Physics I

12 credits from the following:

PHYS 302 The Challenge of Contemporary Physics

PHYS 304 Thermal Physics

PHYS 306 Physics of Wave Motion

PHYS 310 Electronic Instrumentation for Experimental Physics

PHYS 321 Introduction to Modern Physics I

PHYS 321L Introductory Laboratory in Modern Physics I

PHYS 322 Introduction to Modern Physics II

PHYS 322L Introductory Laboratory in Modern Physics II

PHYS 361 Classical Mechanics

PHYS 362 Intermediate Mechanics

PHYS 364 Electricity and Magnetism I

PHYS 365 Electricity and Magnetism II

PHYS 496 Modern Optics

ASTRO 342 Introduction to Solar System Astronomy

ASTRO 344L Astronomy Laboratory

ASTRO 346 Introduction to Astrophysics

CHEM 324 Introduction to Quantum Mechanics

CHEM 325 Chemical Thermodynamics

E E 201 Electric Circuits

E E 230 Electronic Circuits and Systems

E M 274 Statics of Engineering

E M 345 Dynamics

E M 378 Mechanics of Fluids

E M 391 Mechanics of Solids

E M 231 Engineering Thermodynamics I

Students with an endorsement in a natural science who seek approval to teach physics as an additional endorsement area must complete one of the following sets of courses:

PHYS 221 Introduction to Classical Physics I

PHYS 222 Introduction to Classical Physics II

PHYS 311T Intermediate Laboratory for Secondary Physics Teachers

PHYS 321 Introduction to Modern Physics I

PHYS 321L Introductory Laboratory in Modern Physics I

Seminar on Secondary School Physics

or
Students seeking an additional endorsement in Art (K-8) should see an adviser in the School of Education.

### World Languages
The Department of World Languages and Cultures prepares World Language teachers for grades 5-12.

World Language teachers can earn an endorsement in French, German, or Spanish. For specific content area course requirements, see Curriculum, World Languages and Cultures.

#### Required professional courses are:

<table>
<thead>
<tr>

</tbody>
</table>

† Arranged with instructor.

Students seeking approval to teach a world language as their first endorsement must have a major in the target language. For an additional endorsement in a world language, students must earn 25 credits in that language. Nine (9) credits must be at the 300 level or above with six (6) of these credits in composition and conversation. Courses at the 100 level are not counted in the 25 required credits. For an endorsement in Latin, 10 of the 25 credits must be at the 300 or 400 level and must include Hist 430 (CI:ST 403). All students seeking to teach a world language must demonstrate their proficiency in the language by taking the ACTFL OPI (Oral Proficiency Interview). Students are responsible for the cost of the administration of the OPI and must request that their scores from the OPI be added to their transcript.

#### Requirements for Additional Endorsements
Students may elect to add additional endorsements to their teaching license by completing the necessary requirements. All “Undergraduate Teacher Licensure Areas” listed above can be pursued as an additional endorsement. Below are the additional endorsements only options that require students to pursue one of the undergraduate, post-bachelor’s or graduate teacher licensure areas listed above. Detailed requirements for any endorsement may be obtained from Teacher Education Services (located in 133 MacKay).

### Art (grades K-8)
Students seeking an additional endorsement in Art (K-8) should see an adviser in the School of Education.

### Basic Science (grades K-8)
Students seeking an additional endorsement in Basic Science (K-8) should see an adviser in the School of Education.

### Coaching Interscholastic Athletics (grades K-12)
The Department of Kinesiology offers courses that can lead to a K-12 athletic coach endorsement. Students seeking approval for the Iowa State University endorsement to coach interscholastic athletics must satisfy the requirements of an endorsement area listed above and earn credits in the following (to meet state minimum requirements).

<table>

### Chinese (grades K-8)
Students seeking an additional endorsement in Chinese (K-8) should see an adviser in the School of Education.

### Chinese (grades 5-12)
Students seeking an additional endorsement in Chinese (5-12) should see the coordinator in the Department of World Languages and Cultures.

### English and Language Arts (grades K-8)
Students seeking an additional endorsement in English and Language Arts (K-8) should see an adviser in the School of Education.

### English as a Second Language (grades K-12)
The Department of English offers courses that can lead to a K-12 ESL Teacher endorsement.

To add a K-12 teaching endorsement in English as a Second Language, students must fulfill the requirements of an endorsement area listed above and earn credits in the following courses. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites.

<table>
<thead>

The School of Education offers courses that can lead to a reading endorsement for grades K-12. This department collaborates with the English Department to offer courses that can lead to a reading endorsement for grades K-12. Students seeking an additional endorsement in History (K-8) should see an adviser in the School of Education. Students seeking an additional endorsement in Mathematics (K-8) should see an adviser in the Department of World Languages and Cultures. Students seeking an additional endorsement in Health (K-8) should see an adviser in the School of Education.

**Health (grades K-8)**

Students seeking an additional endorsement in Health (K-8) should see an adviser in the School of Education.

**History (grades K-8)**

Students seeking an additional endorsement in History (K-8) should see an adviser in the School of Education.

**Latin (grades 5-12)**

Students seeking an additional endorsement in Latin (5-12) should see the coordinator in the Department of World Languages and Cultures.

**Mathematics (grades K-8)**

Students seeking an additional endorsement in mathematics (K-8) should see an adviser in the School of Education.

**Reading (grades K-8, 5-12)**

The School of Education offers courses that can lead to a reading endorsement for grades K-8. This department collaborates with the English Department to offer the necessary coursework for a 5-12 reading endorsement. Students seeking an additional endorsement to teach elementary reading (K-8) should see a School of Education adviser. Students seeking endorsement to teach reading (5-12) as an additional endorsement must earn credits in the following courses:

- **Foundations of Reading and Reading in the Content Area**
  - C 1 395 Teaching Reading in Middle and Secondary Schools 3
  - C 1 551 Foundations of Reading and Language Arts 3
  - C 1 494 Practice and Theory of Teaching Literature in the Secondary Schools 3

- **Practicum**
  - C 1 588 Supervised Tutoring in Reading 3

- **Language Development**
  - ENGL 219 Introduction to Linguistics 3
  - ENGL 511 Introduction to Linguistic Analysis 3

- **Reading Assessment and Oral Communication**
  - C 1 452 Corrective Reading 3

- **Written Communication**
  - C 1 395 Teaching Reading in Middle and Secondary Schools 3
  - UN 397 Practice and Theory of Teaching Writing in the Secondary Schools 3

- **Adolescent Nonfiction and Fiction**
  - ENGL 396 Teaching the Reading of Young Adult Literature 3
  - C 1 554 Reading and Responding to Children’s Literature 3

- **Reading Instrumental Strategies**
  - C 1 456 Integrating Technology into the Reading and Language Arts Curriculum 3
  - C 1 553 Teaching Struggling Adolescent Readers 3

- **Russian (grades 5-12)**

Students seeking an additional endorsement in Russian (5-12) should see the coordinator in the Department of World Languages and Cultures.

**Social Sciences (grades K-8)**

Students seeking an additional endorsement in Social Sciences (K-8) should see an adviser in the School of Education.

**Special Education (grades K-8, 5-12, ages 5-21)**

The School of Education offers courses that can lead to special education endorsements (Instructional Strategist I: Mild/Moderate Disabilities (grades K-8 and grades 5-12) and Instructional Strategist II: Behavior Disorders/Learning Disabilities (ages 5-21)). Students seeking special education endorsements at the graduate level must have a current teaching license. Elementary Education students seeking an additional K-8 endorsement to teach special education should see an adviser in the School of Education.

**Speech/Theatre (grades 5-12)**

The Department of Speech Communication offers courses that can lead to 5-12 speech/theatre endorsement. Students seeking endorsement to teach speech as an additional area must earn credits in the following courses:

- SP CM 110 Listening 3
- or COMST 102 Introduction to Interpersonal Communication 3
- SP CM 212 Fundamentals of Public Speaking 3
- SP CM 313 Communication in Classrooms and Workshops 3
- SP CM 322 Argumentation, Debate, and Critical Thinking 3
- SP CM 412 Rhetorical Criticism 3
- SP CM 495 Independent Study: Directing Speech Activities 1
- SP CM 495B Independent Study: Teaching Speech 3
- THTRE 255 Introduction to Theatrical Production 4
- THTRE 358 Oral Interpretation 3
- THTRE 360 Stagecraft 4
- THTRE 455 Directing I 3
- THTRE 357 Stage Make-up 2
- JL MC 101 Mass Media and Society 3

**World Languages and Cultures (French, German, Latin, Russian, and Spanish) (grades K-8)**

Students seeking an additional endorsement World Languages and Cultures (K-8) should see an adviser in the School of Education.

**Opportunities for Preprofessional Study**

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor's degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor's degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

Students who have not declared a major upon entry should enter as preprofessional students, i.e., premedical, prelaw, PHP (preprofessional health programs), or GENPV (General Undergraduate Studies Pre Vet), until they choose a major or transfer to a professional school. All students, whether they have selected a major or not, are encouraged to identify their interest in a professional career by designating it on their application.

Information about preprofessional program admissions requirements and career opportunities in human health or law may be obtained in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities may be obtained from the coordinator of...
includes courses in biology, chemistry, physics, mathematics, English, the social sciences, arts and humanities. The degree of a premedical student can be from any college and in any curriculum or major offered by the university. The major should reflect the student’s interests and provide appropriate preparation for an alternative career.

**Law**

An attorney offers assistance, often where a third-party neutral arbiter is required to resolve conflicts. Many attorneys work in private practice, but others secure positions in the public sector, e.g., federal or state governmental agencies. A minimum of three years from an American Bar Approved (ABA) law school is required to earn a Doctor of Jurisprudence (J.D) degree. A bachelor’s degree is required for admission to all accredited law schools. A student planning to enter law school may pursue an undergraduate degree in any discipline. The choice of the bachelor’s degree should reflect a student’s passion and personal interests and not be perceived as being the best degree to help them be admitted into law school. Appropriate courses should be completed that will enhance a student’s development of critical thinking skills, including analytical written and oral skills. An understanding of business, social sciences, and humanities is necessary to comprehend the pluralistic society within and outside of the United States. These courses should include accounting, management, political science, psychology, criminal justice, economics, philosophy, English literature, and history. The selection of these courses will provide students with a knowledge base and skill sets that will assist them with their preparation for law school. Courses in mathematics and statistics are also helpful in developing analytical skills. Advanced writing courses and speech communication courses will also serve students well.

**Library and Information Science**

Librarians and information science specialists select, organize, preserve and promote information resources as well as advocate and teach information literacy skills. Professional opportunities include work for libraries in academic institutions, public education, city and county municipalities, medical facilities, government agencies, and corporate settings. They also have work opportunities in the publishing and information technology professions. Master’s degree programs in library and information science provide the professional preparation. Iowa State students may earn their bachelor’s degree before entering a professional master’s degree program. They may choose majors that reflect their interests and provide a foundation for working in the library and information science field.

**Occupational Therapy**

Occupational therapists provide purposeful activities to help those who have been disabled by physical illness or injury, birth defects, emotional disorder, aging, drug abuse, or other problems to learn to cope with everyday living. Therapists treat patients in hospitals, school systems, and rehabilitation centers. Students may complete a bachelor’s degree in any major at Iowa State University, and then enter a master’s or doctoral degree program at another university.

**Optometry**

Optometrists examine, diagnose, treat and manage diseases of the visual system, the eye and associated structures. Treatment may include corrective glasses or contacts, vision therapy and therapeutic drugs. Optometrists usually set up their own offices or work in group practice. Professional study requires 4 years in a school or college of optometry and leads to the doctor of optometry (O.D.) degree. All optometry schools require at least 90 semester credits of preprofessional courses, including biology, chemistry, physics, mathematics, and English. Certain optometry schools require a bachelor’s degree. Students wishing to earn the bachelor’s degree from Iowa State University may choose any major and take the courses required for graduation with that major as they take the courses required for admission to a professional optometry program.

**Pharmacy**

Pharmacists prepare and dispense therapeutic drugs; educate health care professionals, patients and the general public about the appropriate use of drugs; conduct pharmaceutical research and work in industrial settings which involve the manufacture, marketing, and advertising of pharmaceutical. Students may complete prepharmacy courses at Iowa State University. Many schools do not require a bachelor’s degree for admission, however most students complete at least 3 years of college before admission to pharmacy schools. Upon admission, the student will then transfer to a Pharm. D. program of study which will entail four years of study.

**Physical Therapy**

Physical therapists work with people who have been disabled by injury, illness, or birth defects. They assist in evaluating the physical problems and administer therapeutic agents such as massage and exercise, heat, baths, ultrasonics, and
electricity, they work in hospitals, clinics, nursing homes, schools, rehabilitation centers, and private practice. Usually, students earn a bachelor’s degree at ISU before entering professional school to earn a doctoral degree. The bachelor’s degree from ISU may be earned in any department, provided that the physical therapy prerequisites are completed. Courses required for admission to a professional program include biology, chemistry, physics, psychology, mathematics, and statistics.

**Physician Assistant**

A physician assistant provides medical services under the supervision of a licensed physician. PAs conduct physical examinations, order and interpret laboratory tests, make diagnostic and treatment decisions, and are allowed to prescribe medication in most states. Certification as a physician assistant requires at least 2 years in a professional program at the master’s degree level. Applicants must have had healthcare experience with direct patient contact experience. Students must have earned a bachelor’s degree before entering a PA program. The degree can be in any area but the student must complete the pre-requisite courses for the PA program. These usually include courses in biology, chemistry, psychology, and statistics.

**Podiatry**

Podiatrists diagnose, and treat diseases and disorders of the human foot and ankle. They treat patients in private and group practice, hospitals, and, increasingly, in industrial and sports-related positions. Professional training requires 4 years in a college of podiatric medicine and leads to the degree of doctor of podiatric medicine (D.P.M.). This is usually followed by 1 to 3 years in a hospital residency. All podiatric colleges require at least 3 years of preprofessional study, including courses in biology, general and organic chemistry, physics, and English. Most entrants have a bachelor’s degree, which may be in any major. A few students may complete the admission requirements and most of the bachelor’s degree requirements in 3 years. If so, a maximum of 32 semester credits may be transferred to Iowa State University from the first year in an accredited podiatric college in order to complete the requirements for the bachelor’s degree.

**Theology or Religious Studies**

The professional education of a student of religion can follow one of two paths. The path to a profession as a pastor, priest, rabbi or other leadership position in a religious tradition usually requires 3 years in a program leading to the master of divinity (M.Div.) offered at a school of divinity or in theology. The path to a profession as a teacher of religious studies at the college level requires 4-7 years in a program leading to the Ph.D. at a graduate school of Religious Studies. Both seminaries and graduate schools require a bachelor’s degree for admission. The American Association of Theological Schools recommends the following areas of study as the best preparation for theological studies: English language and literature; history, including non-Western culture; philosophy; natural sciences, social sciences, especially psychology, sociology and anthropology; the fine arts; Biblical and modern languages; and religion, both Western and Eastern. Although students in a variety of major fields may qualify for admission to a theological school, interested persons are advised to review their proposed programs with a representative of the Religious Studies Program in the Department of Philosophy and Religious Studies.

**Veterinary Medicine**

About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health, education, research, food safety, industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine).

The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.). Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Veterinary Medicine, Admission Requirements; for most recent information, consult the College of Veterinary Medicine Web site: www.vetmed.iastate.edu.)

Students may pursue the preveterinary preparation in any college at Iowa State University. A major (preveterinary medicine is not a major) should be selected that is allied to each student’s vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor’s degree; the most effective progress toward a bachelor’s degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.
Plan of Study - Soar in 4

Four Year Graduation Program

Iowa State University's Soar in 4: Four-Year Graduation Program provides the opportunity for students to take a proactive approach towards completing their undergraduate degree in four years (or eight semesters). Through careful planning with their academic advisors, students can complement their undergraduate degree with experiences such as study abroad, internship, and service learning. By graduating in four years, students can reduce their tuition costs and accelerate their entry into the job market or advanced education compared to students who take more than eight semesters to graduate. The program encourages students to work collaboratively with their academic advisor to make strategic academic decisions about which courses to take each semester.

Students participating in the Soar in 4: Four-Year Graduation Program are expected to:

- Keep in close contact with their Iowa State academic adviser, who will guide students' academic decisions and keep students up-to-date with university policies and procedures.
- Take required courses at the times they are available.
- Maintain student registration at ISU during off-campus experiences.
- Register for classes promptly and monitor academic progress on a regular basis by reviewing the degree audit and with his/her adviser.

Iowa State University will provide the academic advising services and degree-audit mechanisms to assist students in accurately monitoring progress toward graduation. ISU is also responsible for providing class space in the courses required for the student’s respective major in order to complete a bachelor’s degree within eight consecutive semesters.

Four-year (eight-semester) templates for ISU programs of study

Iowa State University offers over 100 majors in six undergraduate colleges. All but two programs, architecture and landscape architecture, may be completed in four years. ISU’s bachelor degree programs require from 120.5 to 143.5 credits; therefore, students must average between 15 and 18 credits per semester. To assist students in creating their own personal four-year academic plans, eight-semester templates are provided for all programs of studies covered by the Soar in 4 program.

To participate in the program

Students can sign up to participate in Soar in 4: Four-Year Graduation Program after consulting with their academic advisor either during orientation or their first-year at Iowa State. A student’s decision on whether to participate is often based on a variety of factors including academic preparation, academic interests, and outside of class commitments. Additional information and the Soar in 4 Four-Year Graduation Plan application form are available from:

http://www.provost.iastate.edu/what-we-do/undergrad-initiatives/soarin4

Total Credits: 131-132

* To complete degree program in 4 years students must maintain an average of 16 credits per semester.

** In scheduling coursework, students should pay attention to courses with limited offerings, (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course).

**Total Credits: 131-132**

- To complete degree program in four years students must maintain an average of 16 credits per semester.
- Initial math course is determined on the basis of high school math and placement test scores. A non-credit course (Math 10) maybe be required at additional costs.
- In scheduling coursework, students should pay attention to courses with limited offerings, (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course). It is critical that students take A ECL 371 fall semester of the junior year and A ECL 451 fall semester of the senior year.

* Students should meet with a Biology Program Adviser to determine the proper plans for chemistry, math and physics before selecting those options above. Students must have 120 credits minimum to graduate. Students are required to take 21 credits in advanced biology of which 9 credits must be from the Biology Program (BIOL), and 2 advanced BIOL courses must have a lab or field component.

Important

Note:

Free electives and specified group electives are often chosen to complement the student’s career focus. The student’s academic adviser assists with developing scheduling schemes that prepare students individually for careers in the animal industry. They are explained fully in AN S 110 and through appointments with the student’s adviser in Dairy Science. Typical career areas include Advanced Degree in Dairy Science, Business and Finance, Agriculture Promotion and Information, Dairy Food Industry, Agricultural Sales and Marketing, International Agriculture, Animal Production and General Agriculture and Pre-Veterinary Medicine.

**Total Credits: 120-125**

* Choose elective courses to total equal to or greater than 120 credits.
** Select at least 12 additional credits from: FS HN 242, 365, 367, 403, 461, 463, 464, 466, 490C, 499, 575; NUTRS 501, 503, 504, 562.
Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student’s situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

**Nutritional Science, B.S. - nutritional & wellness option (p. 239)**

Total Credits: 119.5-133

- Courses in these areas may also be used for Humanities or Social Science.
  - Students in the Business Economics major will take MATH 160 or ECON 207 instead of MATH 150 and MATH 151.
  - Students without adequate computer background may take COM S 103 instead of BUSAD 150.
- Students in MIS major will take MIS 207 in Semester 4 or 5 instead of a General Elective.
- Students in the ACCT, FIN, or BUSED majors will take STAT 326 in Semester 5 or 6 instead of a General Elective.
Core BLOCK Courses

BLOCK A
- ACCT 285
- ACCT 301
- MIS 330

BLOCK B
- FIN 301
- SCM 301

BLOCK C
- MGMT 307
- MKT 340

Students should take the Core BLOCK that contains the core course for their chosen major the first semester after entering the professional Program. ALL BLOCKS must be completed prior to taking MGMT 478 in the last semester.

Professional Program Requirements:
1. Completion of 30 credits, foundation courses, ENGL 150 credit, unmet high school requirements, and ENGL 101 courses
2. Minimum cumulative GPA of 2.5, or a minimum 2.5 GPA in the foundation courses.

Graduation Requirements:
1. Grad of “C” or higher in at least 30 credits applied to the business core and major.
2. 42 credits of 300+ level courses.
3. 50% of required Business courses must be earned at Iowa State.
4. 122 credits and a cumulative grade point average of at least 2.0.
5. Grade of “C” or higher in 2 of the 3 English courses.

Business Economics, B.S. (p. 56)

</table>

Courses in these areas may also be used for Humanities or Social Science.

- # Students in the Business Economics major will take MATH 160 or ECON 207 instead of MATH 150 and MATH 151.
- ** Students without adequate computer background may take COM S 103 instead of BUSAD 150.
- % Students in MIS major will take MIS 207 in Semester 4 or 5 instead of a General Elective.
- & Students in the ACCT, FIN, or BUSED majors will take STAT 326 in Semester 5 or 6 instead of a General Elective.

**Core BLOCK Courses**

**BLOCK A**
- ACCT 285
- ACCT 301
- MIS 330

**BLOCK B**
- FIN 301
- SCM 301

**BLOCK C**
- MGMT 307
- MKT 340

Students should take the Core BLOCK that contains the core course for their chosen major the first semester after entering the professional Program. **ALL BLOCKS** must be completed prior to taking MGMT 478 in the last semester.

Professional Program Requirements:
1. Completion of 30 credits, foundation courses, ENGL 150 credit, unmet high school requirements, and ENGL 101 courses.
2. Minimum cumulative GPA of 2.5, or a minimum 2.5 GPA in the foundation courses.

Graduation Requirements:
1. Grad of "C" or higher in at least 30 credits applied to the business core and major.
2. 42 credits of 300+ level courses.
3. 50% of required Business courses must be earned at Iowa State.
4. 122 credits and a cumulative grade point average of at least 2.0.
5. Grade of "C" or higher in 2 of the 3 English courses.

  - ENGL 150 or General Education: 3
  - First Year General Education: 16.5-17
- **Second Year**
  - **Fall**
    - ARTGR 270: 3
    - ARTGR 275: 2
    - ART H 280: 3
    - ARTGR 281: 3
    - ARTIS, ARTID, LA or ARCH: 3
  - **Spring**
    - ARTIS Studio Option: 3
    - Elective: ROME, Italian: 1
- **Third Year**
  - **Fall**
    - ARTGR 370: 3
    - ARTGR 387: 3
    - ARTGR Option: 3
    - ARTIS, ARTID, LA or ARCH: 3
    - General Education: 3
  - **Spring**
    - ARTIS Studio Option: 3
    - Elective: ROME, Italian: 1
    - General Education: 3
- **Fourth Year**
  - **Fall**
    - ARTGR 470: 3
    - ARTGR Option: 3
    - ART & Design History: 3
    - ARTIS, ARTID, LA or ARCH: 3
    - General Education: 3
  - **Spring**
    - ARTIS Studio Option: 3
    - Elective: ROME, Italian: 1
- **Total Credits:** 126.5-127

Admission into the BFA in Graphic Design Program is based on departmental resources and will be determined by overall cumulative grade point average following completion of 29.5 credits including DSN S 120, 131, ENGL 150 or 250, and other general education requirements. A portfolio review and essay will also be significant factors.

### Interior Design (p. )

**Freshman**
- **Fall**
  - DSN S 102 or DSN S 131: 4
  - DSN S 115: 0.5
  - DSN S 183 or Gen Edu: 3
  - ENGL 150: 3
  - General Education: 3
  - General Education: 3
  - Lib 160: 1
- **Second Year**
  - **Fall**
    - IND D 201: 6
    - IND D 231: 3
    - ART H 288X: 3
    - Gen Ed: 3
  - **Spring**
    - Elective: ROME, Italian: 1
- **Sophomore**
  - **Fall**
    - ARTID 250: 2
- **Total Credits:** 126.5-127

Admission to the BFA in Interior Design Program requires the completion of 30.0 credits including the following courses DSN S 120, 131, 183, 110 or 115, 6 credits in Social Science/Humanities, 6 credits in Math/Science, ENGL 150, Lib 160. A portfolio review and essay will also be significant factors.
Landscape Architecture, B.L.A. (p. 302)

First Year

Fall Credits Spring Credits Credits
DSN S 102 or DSN S 131 4 DSN S 131 or DSN S 102 4
DSN S 183 3 Soc. Sciences/ Humanities Elective 3
DSN S 115 0.5 Math/Science Elective 3
ENGL 150 or 250 3 Soc. Sciences/Humanities Elective 3
ENGL 150 or 250 3 Elective (Optional for pre-professional year; not required for program application. If not taken in first year, add 3 cr. to a subsequent semester to meet the 150.0 credit total)
Math/Science Elective 3

16 14

Second Year

Fall Credits Spring Credits Credits
L A 201 6 L A 202 6
L A 221 3 L A 274 3
L A 241 1 L A 222 3
L A 272 3 Elective 3
L A 281 3

16 15

Third Year

Fall Credits Spring Credits Credits
L A 301 6 L A 302 6
L A 381 3 L A 341 1
L A 373 3 L A 371 3
NREM 120 3 Social Science/ Humanities Electives 3
ENGL 250 3 Math/Science Elective 3

18 16

Fourth Year

Fall Credits Spring Credits
L A 402 6 One of the following:
L A 481 3 L A 444A 3
Social Science/Humanities Elective 3 L A 444B 0

53.5-55.5

Total Credits: 135.5-137.5

Additionally: Each student needs to take 3 credits of a US Diversity (usually covered by LA 272) and 3 credits of an International Perspectives course (usually covered by LA 373). Students also need to take at least 6 credits of 300 level or above in the combined areas of communication, science, math, humanities, and social science (6 total from all the areas).

CHE 357 3
CHE 310 3

Credits: 16

Total Credits: 128

* From approved list; see CBE Undergraduate Booklet
** BBMB 301 may be substituted by the following course pairs:
- BBMB 404 & BBMB 405
- Biol 313 & Biol 314

On the degree audit, the first course will replace BBMB 301 and the second course can be used as a technical elective.

*** See Technical Electives list in CBE Undergraduate Booklet

Family Finance, Housing and Policy, B.S.-
Financial Counseling Emphasis:

US Diversity and International Perspectives Requirement: Students in Family Finance, Housing and Policy fulfill the US Diversity and International Perspectives Requirement by choosing three credits of coursework from each of the university-approved lists.

This sequence is only an example. The number of credits taken each semester should be based on the individual student’s situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

Courses from accounting, architecture, art, and design, community and regional planning, economics, family and consumer sciences education, finance, gerontology, interior design, journalism, management, marketing, political science, psychology, and sociology are suggested.

**Footnotes**

* Choose elective courses to total equal to or greater than 120 credits.

** Select a minimum of 5 credits from FS HN (214 and 215), 265, 421, or 472.

Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student’s situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

---|---|---|---|---|---
9 | 17 | 0 | 0 | 0

Total Credits: 111-121

**Footnotes**

**US Diversity and International Perspectives Requirement:** Students in HRI fulfill the US Diversity and International Perspectives Requirements by choosing 3 credits of coursework from each of the University-approved lists.

*This sequence is only an example. The number of credits taken each semester should be based on the individual student’s situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

1. BIOL 101 required if student has not completed high school biology
2. When the 4-year plan indicates HRI Group or General Electives, choice depends on courses available. However, you must have a total of 13-15 credits of HRI electives and 15-17 credits of General Electives (HRI courses may be taken to meet General Electives requirements).
3. CHEM 160 required if student has not completed high school chemistry

**Graduation Requirements**

Total Credits: 124-127.5

**Footnotes**

Students must complete a 3-credit course in US diversity and a 3-credit course in international perspectives. Check ISU homepage for a list of approved courses. You must complete a minimum of 46 credits in 300/400 level courses and a total of 124 credits for graduation. Four year plans are arranged with courses in prerequisite sequence and within the term a course is usually offered. This is a SAMPLE plan – use the degree audit as “official” documentation of progress toward your degree.

### Footnotes

* KIN 400+ Course Choices (9 cr): KIN 455, 458, 462, 467, 472, 480, 495.

Students must complete a 3-credit course in US diversity and a 3-credit course in international perspectives. Check ISU homepage for a list of approved courses. You must complete a minimum of 46 credits in 300/400 level courses and a total of 124 credits for graduation. Four year plans are arranged with courses in prerequisite sequence and within the term a course is usually offered. This is a SAMPLE plan – use the degree audit as “official” documentation of progress toward your degree.

Total Credits: 122

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS foreign language requirement and any high school unmet admission requirements.

Students must pass the School administered English Usage Test (EUT) in accordance with the following guidelines:

1. Students entering the School as freshmen pre-advertising or pre-journalism and mass communications majors, whose entrance is not accompanied by a preentrance score on the ACT-E of 26 or higher, or an SAT-V score of 590 or higher, will have one calendar year from the start of their first term as a Pre-Advrt or Pre-JI MC major to meet the requirement for the English Usage Test.

2. Advrt majors need a broad-based academic background that the School seeks to ensure by requiring a Designated Area of Concentration (DAC) made up of 21 credits with at least 12 credits from the 300-level or above of coursework outside Greenlee. The DAC is a secondary area of expertise make up of courses selected and designed by the student, with adviser approval, in to complement the student’s academic and career interest. A second major outside of Advrt or JI MC may substitute for the DAC.

Total Credits: 120-121

- General Chemistry I and II (177, 177N or 177I and 178) are acceptable substitutes for CHEM 201 and 201L. Chemistry assessment required for placement into CHEM 201.
- Math assessment is required. Student not ready for calculus will be enrolled in MATH 142.
- Liberal Arts and Sciences (LAS) General Education Requirements include a minimum of:
  - 12 cr. Arts and Humanities, 9 cr. Social Sciences and 11 cr. Natural Sciences (8 cr.) and Math (3 cr.)
  - Students in all ISU majors must complete a 3-cr. course in U.S. Diversity and a 3-cr. course in International Perspectives. Discuss with your adviser how the two courses you select can be applied to address general education requirements.
- Check for a list of approved courses at: [http://www.registrar.iastate.edu/courses/div-ip-guide.html](http://www.registrar.iastate.edu/courses/div-ip-guide.html)
- Science Elective 300+ is required.
- Undergraduate study or research, BBMB 490 or 499, is recommended but not required. Credit value is variable.
- Four credits of electives in Biological Sciences is required.
- CHEM 321L + BBMB 561L may be taken as a substitute for CHEM 322L.

Total Credits: 78-79

- Advanced high school chemistry and strong algebra skills are necessary for success in CHEM 201. Math ACT of 24 or greater is strongly recommended.
- Students may substitute the following courses, if necessary:
  - CHEM 201 for 177 and 178;
  - CHEM 177L for 177N or 201L;
  - CHEM 331L and 332L for 333L and 334L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
- Completion of three years of foreign language in high school fulfills this requirement.
- Class offered Fall Semester only.
- Individuals earning a B.A. degree in Chemistry who have taken 331L, 334L and 322L can obtain American Chemical Society certification by taking an additional advanced chemistry lecture course of BBMB 301 or 404. CHEM 550 may not be used to satisfy the Advanced Chemistry requirement.

1  
Advanced high school chemistry and strong algebra skills are necessary for success in CHEM 201. Math ACT of 24 or greater is strongly recommended.  
2  
Students may substitute the following courses, if necessary:  
• CHEM 201 for 177 and 178;  
• CHEM 177I for 177N or 201L  
• CHEM 331L and 332L for 333L and 334L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.  
• CHEM 321L for 322L; however this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.  
3  
Completion of three years of foreign language in high school fulfills this requirement.  
4  
The completion of two courses (minimum of 2 credits each) are required to meet this requirement. (In addition to advanced Chemistry courses, certain courses in Biochemistry-Biophysics, Chemical Engineering, Computer Science, Mathematics and Materials Science and Engineering are acceptable.) Up to four credits in undergraduate research (CHEM 339 and/or 499) can be counted as one of the two advanced chemistry courses. CHEM 550 may not be used to satisfy the Advanced Chemistry requirement.  
5  
The program as listed above meets the standard for a certified degree of the American Chemical Society’s Committee on Professional Training if BBMB 301 or 404 is one of the Advanced Chemistry Courses.  
F  
Class offered Fall Semester only.  
S  
Class offered Spring Semester only.

To meet Upper Division Comm Requirements students select from among the following:  
• COMST 301  
• COMST 314  
• COMST 317  
• COMST 319  
• COMST 325  
• COMST 330  
• SP ECM 305  
• Semantics or SP CM 323  
Students in all majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. (COMST 310 fulfills the international perspective requirement/SP SM 323 fulfills the U.S. diversity requirement). Approved courses are listed at: http://www.registrar.iastate.edu/courses/div-ip-guide.html. Discuss with your adviser how the two courses that you select can be applied to to your graduation plan.  
LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the LAS foreign language requirement.  
The LAS College requires all students to have a 2.0 in the major to graduate. This means students need a 2.0 GPA in the 33 hours taken to fulfill the major requirements in Communication Studies.

Total Credits: 121-122

Students in all ISU majors must complete a 3 credits in U.S. diversity and a 3 credits in international perspectives. Check the Environmental Science website (http://www.ensci.iastate.edu) for a list of approved courses.

Minimum of 120 credits required, including a minimum of 45 credits at the 300/400 level.

1 Students complete at least 2-7 credits in Environmental Science including ENSCI 110, 201, 250, 381, 382 and 15 credits of approved ENSCI coursework.

2 Students complete at least 12 credits in arts and humanities and 9 credits in social science from approved lists. These credits can also be used to meet the U.S. Diversity and International Perspectives requirements.

3 Students choose one course from the following Earth Science related courses: AGRON 151, AGRON 280, BIOL 212, GEO 100, GEO 201, MTEOR 206. Students choose from one of the following Organic Chemistry options: CHEM 231 & 231L, BBMB 2221, or AGRON 259X.

Total Credits: 123-126
Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. At least 8 credits in the major from 300+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher. You must also complete the LAS foreign-language requirement.

Choose from list of approved courses available from an adviser or the departmental office.

Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. For a history major, 15 credits of history at the 300/400 -level must be taken at ISU. You must also complete the LAS foreign language requirement.

The BA in History requires the equivalent of 2 years of college-level study in the same foreign language. Six credits of electives may be replaced by 6 additional credits of foreign language.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses.

International Studies, B.A., B.S (p. 554).

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level.
1. Students must pass the School administered English Usage Test (EUT) in accordance with the following guidelines:
   - Students entering the School as freshmen pre-advertising or pre-journalism and mass communications majors, whose entrance is not accompanied by a pre-entrance score on the ACT-E of 26 or higher, or an SAT-V score of 590 or higher, will have one calendar year from the start of their first term as a Pre-Advrt or Pre-JI MC major to meet the requirement for the English Usage Test.
   - Students entering the School as transfer students, either from other institutions or from within Iowa State, must pass the School’s English Usage Test or provide evidence of having received a score on the ACT-E of 26 or higher, or SAT-V of 590 or higher, by the end of their second full academic term in the School as a pre-major.

2. JI MC majors need a broad-based academic background that the School seeks to ensure by requiring a Designated Area of Concentration (DAC) made up of 21 credits with at least 12 credits from the 300-level or above of coursework outside Greenlee. The DAC is a secondary area of expertise made up of courses selected and designed by the student, with adviser approval, to complement the student’s academic and career interest. A second major outside of Advrt or JI MC may substitute for the DAC.

Students in all ISU majors must meet the U.S. Diversity and the International Perspectives requirements. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. These courses may be courses that apply to other requirements.

The LAS General Education requirements for Mathematics majors are 12 credits Arts and Humanities, 8 credits Natural Science, and 9 credits Social Science from the approved lists: http://www.las.iastate.edu/academics/generaleducation/.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Three of the required 45 300+ level credits must be earned in a general educational group outside the group of the major. Students must also meet the LAS foreign-language requirement and complete any unmet admission requirements.

1. Or other mathematics choice at the 300+ level. But the program must include MATH 301, MATH 414, and one of the two-course sequences 301, 302; 414, 415; or 435, 436; or 373, 481.

<td>15</td>
</tr>
</tbody>
</table>

**Total Credits: 131.5-132.5**

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Three of the required 45 300+ level credits must be earned in a general education group outside the group of your major. You must also complete the LAS foreign language requirement and any high school unmet admissions requirements.

Students pursuing licensure to teach grades 5 – 12 must meet the general education and professional teacher education requirements established by the University Teacher Education Program. (Check [http://www.education.iastate.edu/te/) for the requirements.

**Total Credits: 124-122**

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the Communication Proficiency and LAS World Language Requirements. Six semesters of one foreign language in high school satisfies the World Language requirement. Students in all ISU majors must complete a 3 credit course in U.S. diversity and a 3 -credit course in international perspectives. Discuss with your adviser how the two courses that you select can be applied to address general education requirements. Check for a list of approved courses at: http://www.registrar.iastate.edu/courses/div-ip-guide.html

1. Students taking CHEM 177 should plan to take CHEM 178 as well.
2. Student must select at least 9 credits from a list of optional courses.
3. Students should select a humanities or social science course based on need. If these LAS requirements have been satisfied, students may select a meteorology elective or alternate course. Students should discuss possible alternate course options with their adviser.

Music, B.Mus. - Composition (p. 570)

Plan of Study Grid

1 A placement examination in keyboard skills determines the student’s placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano. Students not required to take four semesters of class piano will take additional music elective credits.
2 Four credits chosen from the following ensembles are required: 111, 113, 115, 141, 151, 161, 191, 321.
3 ENGL 150 requires concurrent enrollment in LIB 160.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (http://www.las.iastate.edu/academics/generaleducation/index.shtml) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. A list of U.S. approved courses can be found at: (http://www.registrar.iastate.edu/courses/div-ip-guide.html) The courses taken to meet these requirements may also be used to meet other requirements.

Scheduling of the general education requirements where specific courses are not indicated can be flexible. Music courses are best kept in the order/semesters indicated. (Most music courses are offered on semester each year.)

**Total Credits: 128-130**

**c**  
ENGL 150 requires concurrent enrollment in LIB 160.

The BM degree requires a minimum of 124.5 credits, including a minimum of 45 credits at the 300/400 level. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (http://www.las.iastate.edu/academics/generaleducation/index.shtml) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: (http://www.registrar.iastate.edu/courses/div-ip-guide.html) The courses taken to meet these requirements may also be used to meet other requirements.

### Flexibility in scheduling

Many general education courses can easily be taken in different semesters than indicated. Music courses are best kept in the order/semesters indicated. Most music courses are offered on semester each year.

* Some advanced theory and history courses (piano major requires 1 history, 2 theory) are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog at: http://www.music.iastate.edu/info/advising.

Total Credits: 123-127

1. A placement examination in keyboard skills determines the student’s placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano. Students not required to take four semesters of class piano will take additional elective credits.

2. Students take the courses from MUSIC 351-355 and MUSIC 415F/G/I that are in the area (woodwinds, brass, or percussion) of their major instrument. Because of the varied required credits in MUSIC 351-355, brass players are required to take on additional elective credit; percussionists are required to take two additional elective credits.

3. ENGL 150 requires concurrent enrollment in LIB 160.

The BM degree requires a minimum of 124.5 credits, including a minimum of 45 credits at the 300/400 level. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: [http://www.las.iastate.edu/academics/generaleducation/index.shtml](http://www.las.iastate.edu/academics/generaleducation/index.shtml). All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: [http://www.registrar.iastate.edu/courses/div-ip-guide.html](http://www.registrar.iastate.edu/courses/div-ip-guide.html). The courses taken to meet these requirements may also be used to meet other requirements.

**Flexibility in scheduling.** Many general education courses can easily be taken in different semesters than indicated. Music courses are best kept in the order/semesters indicated. (Most music courses are offered on semester each year.)

* Some advanced theory and history courses (wind or percussion major requires 1 history, 2 theory) are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog at: [http://www.music.iastate.edu/info/advising](http://www.music.iastate.edu/info/advising).

---

[\(^1\)] Art history, 2 theory) are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog at: [http://www.music.iastate.edu/info/advising](http://www.music.iastate.edu/info/advising).
1 A placement examination in keyboard skills determines the student’s placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano.

2 Lab Ensemble is required every semester offered: Fall and odd springs.

c These courses which appear in the same semester must be taken concurrently.

++ Alternate year courses: The usual semester of offering is indicated by the calendar year (odd or even) of the semester. Consult the current catalog and the department web site for up-to-date information about semesters courses are offered. Psych 230 and C I 333 are offered every semester; when they are taken is determined by the schedules of the alternate year music courses.

The LAS World Language requirements must be met. The U.S. diversity and international perspectives requirements are automatically met with courses required for this degree option (C I 406 and MUSIC 383).

* Advanced theory and history courses (music education major requires 1 history, 1 theory) are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog at: http://www.music.iastate.edu/info/advising.

Flexibility in scheduling. Many general education courses can easily be taken in different semesters than indicated. Music courses are best kept in the order/semesters indicated (Most music courses are offered on semester each year).

### Philosophy, B.A. (p. 582)

#### Freshman

**Fall**

- ENGL 150 3
- LIB 160 3
- PHIL 201 3

**Spring**

- 3 Social Science Choice
- 1 Philosophy Choice
- 3 Foreign Language/Elative
- 4 Humanities Choice
- 3 Math Choice
- 17 16

**Credits**

- 13 13

**Summer**

- 3 History of Philosophy - 17th/18th Century Choice
- 3 Elective
- 4 Natural Science Choice
- 3 Social Science Choice
- 3 PHL 207 3
- 15 15

**Fall**

- PHL 330 3

**Spring**

- 3 Philosophy Choice - 300-400 Level
- 3 Elective
- 3 Elective
- 3 Elective
- 3 Elective
- 15 15

**Senior**

**Fall**

- 3 Philosophy Choice - 400 Level
- 3 Elective
- 3 Elective
- 6 Elective
- 6 Elective
- 12 13.5

**Total Credits: 120.5**

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check [link](http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

### Physics, B.S (p. 588)

#### Freshman

**Fall**

- ENGL 150 3
- PHYS 199 4
- PHYS 241 3

**Spring**

- MATH 165 3
- Foreign Language/Elative
- Humanities Choice
- 4 Humanities Choice
- 5
- 18 15

**Sophomore**

**Fall**

- ENGL 250 3
- PHYS 321 3
- PHYS 321L 1
- MATH 265 3
- MATH 267 3

**Spring**

- MATH 317 or 307 2
- PHYS 322 3
- ENGL 302, 305, 309, or 314 3
- MATH 317 or 307 3
- Foreign Language/Elative
- Humanities Choice
- 11 15

**Junior**

**Fall**

- PHL 361 3
- PHYS 364 3
- PHYS 362 3
- MATH 317 or 307 3

**Spring**

- PHYS 364 3
- PHYS 365 3
- 4.3 MATH 389 3
- 4.3 Social Science Choice
- Foreign Language or Elective
- 17-16 17-16

**Senior**

**Fall**

- PHYS 304 3
- PHYS 310, 311, 311T, 450L, ASTRO 344L or 450L

**Spring**

- 4.3 PHYS 311 3
- 4.3 PHYS 396 3
- 4.3 PHYS 481 3
- 3 Humanities Choice
- Elective
- 13 14

**Total Credits: 125-122**

1. Students must earn a minimum of three laboratory credits from PHYS 310, 311, 311T, 450L, ASTRO 344L or 450L.
2. Recommended by not required. Highly recommended for those students planning graduate study.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check [link](http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Three of the required 45 300+ level credits must be earned in a general education group outside the group of the major. You must also complete the LAS foreign-language requirement.

### Political Science, B.A. (p. 594)

#### Freshman

**Fall**

- ENGL 150 3
- 3 POL S 251 3

**Total Credits: 120.5**
Liberal Arts and Sciences

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the LAS foreign language requirement.

2. Psych Requirement: C minimum
3. Psych Requirement: C- minimum

* Choose from list of selected courses available from an advisor.
** Meets LAS College math requirement.

Total Credits: 123-125
Information About Courses

Course Numbers

The courses in each department are numbered from 1 to 699, according to the following groups:

- 1-99 Courses not carrying credit toward a degree (zero credit).
- 100-299 Courses primarily for freshman and sophomore students.
- 300-499 Courses primarily for junior and senior students.
- 500-599 Courses primarily for graduate students, but open to qualified undergraduates.
- 600-699 Courses for graduate students.

Credits and Contact Hours

The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture or recitation per week for the entire semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes.

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture or recitation class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures and recitations. For example, COM S 227 Introduction to Object-oriented Programming is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

The term “Cr. arr.” means that the amount of credit is arranged in advance between the student and the instructor. The credit to be earned depends on the amount of work expected of the student, in accordance with the policy that some combination of teacher-student contact and outside work by the student involving at least three hours per week for the semester is required for each credit.

The term “Cr. R.” means that the course is required in a certain curriculum or as cognate to one or more other courses. It is also used for cooperative education courses and for some optional inspection trips, study tours, and professional development courses for which numerical credit is not granted. An R credit course does not carry numerical credit toward a student’s degree, but it does apply toward the degree. R credit courses are generally listed on the degree program as a requirement for a specific curriculum/major that must be completed prior to graduation. R credit courses may be graded using the A-F grading scale or the satisfactory/fail grading scale. All R credit courses are assigned a numerical value for purposes of enrollment certification. Requests by students to drop an R credit course will be processed as an administrative drop during period 2 and thus will not be counted against the student’s drop limit and will not appear on the student’s transcript. (See Index, Schedule Changes.)

Semester of Offering

Within each course description may be found one or more of the following letters: F. S. SS., indicating which term—fall, spring, summer session—of the academic year the course is offered. “Alt.” is the abbreviation for alternate. If there is sufficient demand, courses may be offered more frequently than announced. Insufficient demand or unforeseen staffing problems may result in the cancellation of announced offerings. Students are advised to refer to the Schedule of Classes or consult with departments for up-to-date course schedule information.

Course Prerequisite

A prerequisite indicates the specific academic background or general academic maturity considered necessary for the student to be ready to undertake the course. Prerequisites are usually stated in terms of specific courses, but equivalent preparation is usually acceptable. An instructor may, however, direct a student whose background does not meet the stated prerequisite, or its equivalent, to drop the course. Conversely, an instructor may waive the prerequisite for a course for which he or she is responsible. Thus, permission of the instructor is understood to be an alternate to the stated prerequisites in all courses.

It is university policy that the instructor shall inform the students at the beginning of each course if students who have not met the prerequisite requirements must drop the course. Course prerequisites are listed in the Schedule of Classes as well as in the Courses and Programs section of this publication.

Cross-listed Courses

A course, including its complete description, may be listed in two or more departments. The participating department or departments are noted in parentheses. Credit for the course may be obtained through any of the cross-listed departments.

Dual-listed Courses

Dual-listed courses permit undergraduate and graduate students to be in the same class while receiving credit for either undergraduate or graduate level work. Credit in the graduate course is not available to students who have received credit in the corresponding undergraduate course. Both graduates and undergraduates receive the same amount of credit for the course, but additional work is required of all graduate students taking the course under the graduate-level course number. This extra work may take the form of additional reading, projects, examinations, or other assignments as determined by the instructor. The instructor must be a member of the Graduate Faculty or a Graduate Lecturer. Each dual-listed course is designated in the catalog with the phrase “Dual-listed with,” although the student’s official transcript of credits, both graduate and undergraduate, does not identify dual-listed courses as such. There is a limit to the number of dual-listed course credits that may be used to meet the requirement for an advanced degree. (For information about procedures for requesting permission to offer dual-listed courses, faculty should consult the Graduate Faculty Handbook.)

Off-campus courses-Residential Credit

Iowa State University faculty teach distance learning courses online, by video conferencing, streaming media, and CD/DVD. Courses are the same as those offered on campus, carry residential credit, and are taught by Iowa State faculty. Credit earned becomes a part of the academic record at Iowa State University and may be used to meet degree requirements the same as credit earned on campus.

Priority Enrollment

High demand for courses in certain areas has necessitated enrollment management for some courses. When enrollment priority is established for a course, first consideration is given to students whose curriculum/major explicitly requires the course.

Special Course Fees

Courses for which special course fees are assessed are designated in the Schedule of Classes. Special course fees may be assessed for such extraordinary costs as materials fees (which may include consumable materials or equipment replacement), field trip expenses, developmental Math fees, and camp fees. In some cases, special course fee amounts vary from term to term. Additional information on camp fees and the developmental Math fee may be found in the fees and expenses section. See Index, Fees.

Graduate Programs

Graduate Major

A major in the Graduate College is the area of academic professional concentration, approved by the Board of Regents, in which the student chooses to qualify for the award of a graduate degree.

Graduate Area of Specialization

Areas of specialization are indicated in the graduate statements of some departments. This is a subdivision of a major in which a strong graduate-level program is available. When approved by the Graduate College, such areas of specialization are shown parenthetically after the major on official records, including transcripts and thesis/dissertation title pages.

Nonmajor Graduate Credit

All courses included on the Program of Study of a graduate student must be approved by the student’s program of study committee. Usually courses in the major are selected from 500- and 600- level courses in the major. Courses outside of the major can be selected from other 500- 600- level courses and from 300- and 400- level courses which have been approved for nonmajor graduate credit. In the catalog, the approved 300- and 400- level courses are indicated by the words “Nonmajor graduate credit” in the course description.
Distance Education

Iowa State University remains true to the land-grant tradition of extending knowledge far beyond campus borders. Faculty members provide cutting-edge information that helps people continue to learn and meet the demands of careers and society. Annually thousands of students enroll in Iowa State courses without setting foot in Ames. In addition to the traditional method of instructors traveling to classrooms off campus, Iowa State University faculty teach distance learning courses online, by video conferencing, streaming media, and CD/DVD.

Courses are the same as those offered on campus, carry residential credit, and are taught by Iowa State faculty. Credit earned becomes a part of the academic record at Iowa State University and may be used to meet degree requirements the same as credit earned on campus.

College distance education staff provides leadership in helping faculty identify the needs of Iowans and methods to reach adult learners. They also help students access services and information at the university.

For a list of courses and programs, visit www.distance.iastate.edu. Information on registering for distance education courses is available from the web site or from the Office of Registrar at 515-294-1889 (8am-4:30pm CT).

Registration Services

The mission of Registration Services is to provide access to high-quality continuing education and lifelong learning opportunities for professional development, personal enrichment, career transitions, and academic growth.

Registration Services supports Iowa State University’s outreach mission and to facilitate access to excellence in education for a diverse community of adult learners within Iowa and beyond by utilizing technologies that expand access.

Registration Services offers both Continuing Education Units (CEUs) and non-CEU courses, workshops, conferences and other educational activities sponsored by Iowa State University. While these programs do not carry academic credits, they are designed to ensure that a student’s continuing education and professional needs are met.

For a list of courses and programs, visit http://www.extension.iastate.edu/registration/, or call (515) 294-6222. Information is also available at the Iowa State University Extension offices across the state of Iowa.

Certificates, Distance Education

College of Agriculture and Life Sciences

Graduate Certificate in Food Safety and Defense

via Web-based interaction or streaming media

The Food Safety & Defense Graduate Certificate Program is an inter-institutional certificate program offered in cooperation with Kansas State University Food Science Institute, University of Nebraska-Lincoln Food Science, and University of Missouri Food Science programs. These universities have established a multi-state agricultural consortium to develop and deliver high-priority collaborative distance education programs in the food and agricultural sciences. By providing a distance education Food Safety and Defense graduate certificate program, we serve the needs of the industry and agencies that must protect the human food supply from accidental or deliberate contamination with pathogenic microbes and/or toxicants. In an era of terrorism and global food systems, effective control of foodborne hazards requires advanced education. To find out more information about the online food safety and defense graduate certificate program, please visit http://www.agde.iastate.edu/business/programs/foodsaftycert.php.

For more information contact:
Suzanne Hendrich, University Professor
220 MacKay, Iowa State University, Ames, Iowa 50011
(515) 294-4272 or e-mail: shendric@iastate.edu

Graduate Certificate in Computer Networking

via streaming media

Computer Networking Certificate Program provides students with advanced knowledge and skills in computer networking that large information technology companies desire. The program covers areas including: high-performance networks, optical networks, network performance modeling, wireless networks, wireless sensor networks, and ad hoc networks. Students can receive the certificate in as little as 9 months by taking two courses a semester. Several of the courses offer hands-on learning experience where the students will be able to perform experiments and use software systems remotely through the Internet.

For more information contact:
Joseph Zambreno, Professor
(515) 294-3312 or e-mail: zambreno@iastate.edu

Graduate Certificate in Environmental Engineering

via streaming media

Environmental engineering is a rapidly growing field. Graduate courses in the certificate program help practicing professionals update and acquire new skills. The technology-based studies prepare engineers for the challenges posed by an expanding industrial base and help ensure sustainable agricultural practices and quality municipal services.

For more information contact:
Charles Jahren, Professor
(515) 294-3829 or e-mail: cjahren@iastate.edu
The curriculum explores the theory of environmental chemistry and biotechnology, methodologies of environmental engineering, and applies conceptual and technical knowledge to real-world applications. The certificate is 12 credits including four courses and a seminar program. Seminar program can be substituted for an approved program of conference attendance and presenting a paper or seminar.

For more information contact:
Hans van Leeuwen, Professor
515-294-5251 or email: leeuwen@iastate.edu

Graduate Certificate in Environmental Systems via streaming media
Environmental professionals develop and implement regulations and policies to protect the environment, manage wastes, recover byproducts, and enhance human, animal, and plant health. This program represents an opportunity for the student to acquire essential knowledge to accomplish the following:

- understand the principles (theory) and methodologies of environmental and systems with emphasis on application,
- apply conceptual and technical knowledge to real-world problem solving by selecting courses related to each student’s area of interest,
- understand the appropriate role of the professional and the ethical standards in environmental management practice,
- be exposed to recent research in environmental systems and to practitioners in the field through seminars and the student making a contribution by presenting a seminar.

Students may join the program at the beginning of any semester and may take most graduate courses in any order and take the number of classes per semester that meets their needs. Classes are delivered online by digital video streaming. Students may choose the day, time and location to observe the class lectures allowing for maximum flexibility.

For more information contact:
Hans van Leeuwen, Professor
515-294-5251 or email: leeuwen@iastate.edu

Graduate Certificate in Information Assurance via streaming media
The program will increase your knowledge about information infrastructure security, expand and develop your engineering abilities, nurture and instil the ethics involved in technology, and help you develop and understand strategy and policy issues.

Students can receive the certificate in as little as 9 months by taking two courses a semester. Several of the courses offer hands-on learning experience where the students will be able to perform experiments and use software systems remotely through the Internet.

For more information contact:
Doug Jacobson, Professor
(515) 294-8307 or e-mail: dougj@iastate.edu

Graduate Certificate in Nondestructive Evaluation via streaming media
Through a series of courses totaling thirteen or more credit hours of graduate coursework, the certificate in Nondestructive Evaluation (NDE) teaches professionals from engineering or physical sciences backgrounds the fundamentals of three major NDE techniques; eddy-current, ultrasonic and penetrating radiation methods.

The program aims to train professionals working in numerous industrial sectors that rely on NDE for safe and efficient operation and include, but are not limited to, manufacturing, transport and power engineering. The program does not offer certification in NDE inspection methods, but focuses on the physical principles upon which these three major NDE inspection techniques are founded. Courses are taught by faculty and adjunct faculty in the College of Engineering who conduct research programs at Iowa State University’s Center for Nondestructive Evaluation.

For more information contact:
Nicola Bowler, Professor
(515) 294-3202 or email: nbowler@iastate.edu

Graduate Certificate in Power Systems Engineering via streaming media
Iowa State University has a long-standing international reputation for education and research in electric power engineering. The electrical and computer engineering department designed the 12-credit graduate certificate for power engineering specialists in government, private sector, and academia.

Upon completion of the program, power engineering specialists will be proficient in theory and modeling plus have the tools to perform engineering tasks related to planning and operating electric power generation, transmission, and distribution systems, plus knowledge of related public policy.

For more information contact:
James McCalley, Professor
515-294-4844 or jdm@iastate.edu

Graduate Certificate in Software Systems via streaming media
The certificate program is designed to meet the demand of large private companies and other employers for highly skilled software engineers. Earning the certificate will enhance your competitiveness, technical knowledge, and resulting working efficiency. The certificate also serves as a stepping-stone into our professional coursework-only Master of Engineering programs. Students can receive the certificate in as little as 9 months by taking two courses a semester. Several of the courses offer hands-on learning experience where the students will be able to perform experiments and use software systems remotely through the Internet.

For more information contact:
Tien Nguyen, Professor
(515) 294-8529 or e-mail: tien@iastate.edu

Graduate Certificate in Systems Engineering via streaming media
The systems engineering certificate program develops the management capabilities needed in today’s work environment. Engineers, regardless of undergraduate discipline, develop the analytical abilities needed to design, evaluate, and build complex systems involving many components and demanding specifications. The certificate is 13 credits consisting of two basic courses in systems engineering, a course in requirements development, a course in project management and a one-credit capstone project.

For more information contact:
Doug Gemmill, Professor
(515) 294-8731 or e-mail: ngdgdg@iastate.edu

College of Human Sciences
Graduate Certificate in Family Financial Planning online
The Family Financial Planning Graduate Certificate is an 18-credit subset of the degree program offered online.

Completing the certificate program meets the educational requirements for the Certified Financial Planner™ examination.

The program is inter-institutional; after being admitted to one of the participating universities, students take online courses from all the universities.

For more information, send an e-mail to hsde@iastate.edu or call (877) 891-5349.

Graduate Certificate in Gerontology online
The Gerontology Graduate Certificate is a 21-credit subset of the degree program offered online.

The program is inter-institutional; after being admitted to one of the participating universities, students take online courses from all the universities.

For more information, send an e-mail to hsde@iastate.edu or call (877) 891-5349.

College of Liberal Arts and Sciences
Graduate Certificate of Public Management online
The Certificate of Public Management (CPM) program is designed to enhance the performance level of mid-career public managers and administrators.
The certificate requires 15 graduate credits. These credits may be applied to the MPA program at any time.

For more information, send and email to mpa@iastate.edu or call (515) 294-3764.

Graduate Certificate of Teaching English as a Second or Foreign Language (TESL/TEFL)

This four-course certificate prepares students to teach English to speakers of other languages in public language schools or overseas. Students are introduced to classroom methods for teaching learners of English, the principles of materials design, approaches to assessment, and current applications of technology to language learning. Credits from these classes may subsequently be applied to our graduate programs: the MA in TESL/Applied Linguistics or the PhD in Applied Linguistics & Technology.

For more information contact:

Dr. David Oakey, Assistant Professor
(515) 294-7521 or
e-mail: djoakey@iastate.edu

Interdisciplinary - Multiple Colleges

Graduate Certificate in Biorenewable Resources and Technology

via streaming media

Through a series of twelve credit hours of graduate coursework, the Biorenewable Resources and Technology certificate will offer students from a wide variety of science and engineering backgrounds an exposure to advanced study in the use of plant- and crop-based resources for the production of bio-based products, including fuels, chemicals, materials, and energy. The program aims to train professionals to serve the emerging bioeconomy, and in so doing to serve state, national, and global needs in moving toward a more sustainable industrial economy.

For more information contact:

Jacquelyn Baughman, DOGE/DOCS
http://www.elo.iastate.edu/graduate-certificates/biorenewable-resources-and-technology-graduate-certificate-online/
(515) 294-9451 or
e-mail: jacquelyn@iastate.edu

Graduate Certificate in Human Computer Interaction

via streaming media

The accelerating integration of technology into every aspect of society will demand professionals trained with information technology skills that are augmented by an understanding of the human user. These skills will be necessary for any individual to remain competitive in the future information technology workforce. Only those individuals with a unique interdisciplinary perspective will be able to successfully understand, utilize, and apply new technological solutions to solve human-centered problems. Students may take up to 9 credits as non-degree seeking student, so it is possible to begin your studies before formal admittance into the programs.

Programs

Degree Programs Offered through Distance Education

College of Agriculture and Life Sciences

The College of Agriculture and Life Sciences Distance Education at Iowa State University provides the flexibility to enhance your career through online learning. Online courses and graduate programs allow you to remain at your present job and location while continuing your education and advancing in your field. You learn at a premier university from the most respected professors in their field through web-based interaction, streaming media or CD-ROM.

For more information contact College of Agriculture and Life Sciences distance education staff by email at agdehelp@iastate.edu or call (515)294-7656 or (800) 747-4478.

Master of Agriculture

via Web-based interaction and streaming media

The Master of Agriculture with a major in Professional Agriculture is the oldest online degree program in the College of Agriculture and Life Sciences. The goal of this program is to prepare individuals for proactive roles in addressing and responding to personal, professional, and societal issues and challenges in a changing food, agriculture and natural resources system through education and outreach in public and private agencies, and through training and development in business and industry. The intent of the program is to enable individuals to grow and develop as professionals, positioning themselves for emerging opportunities within or outside of their current employment.

This degree is designed primarily for the part-time, off-campus student. Most of the courses are offered via distance education, but students are allowed to take classes on campus. Specialized workshops and short courses are offered on campus during the summer months.

Students are accepted from any part of the United States and Canada. Call (800) 747-4478 to learn more.

For more information contact:

Greg Miller, Professor & Director of Graduate Education
201 Curtiss Hall, Iowa State University, Ames, Iowa 50011
(515) 294-2583 or
e-mail: gsmiller@iastate.edu

Master of Science in Agricultural Education

via Web-based interaction and streaming media

The Masters of Science in Agricultural Education (online) is a program that can be completed entirely at a distance as there are no required on-campus courses or meetings. The program is designed for agriculture teachers in secondary and post-secondary settings, extension professionals, educators in public and private settings, and agricultural communicators. The flexibility of the program makes it possible for working professionals to obtain a master's while continuing to meet personal and professional responsibilities.

The curriculum is 30 semester hours and is flexible allowing you to create a program best suited to your needs, interests, and aspirations. You may choose to earn a specialization in agricultural extension education. Fifteen credits of required courses include: Foundations of Agricultural Education (AgEdS 550), Program Development and Evaluation in Agricultural and Extension Education (AgEdS 524), Introduction to Learning Theory in Agricultural Education (AgEdS 533), Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources (AgEdS 520), and Introduction to Research in Agricultural Education (AgEdS 510). The curriculum also includes 13 credits of electives, 2 credits of creative component, and a final oral examination. Up to 8 credits may be transferred from another university. A thesis option is available if you wish to pursue a Ph.D. or a research-oriented career.

Students are accepted from any part of the United States and Canada. Call (800) 747-4478 to learn more about the program.

For more information contact:

Greg Miller, Professor & Director of Graduate Education
Department of Agricultural Education and Studies
201 Curtiss Hall, Iowa State University, Ames, Iowa 50011
(515) 294-2583 or

Master of Science in Agronomy

via Web-based interaction, streaming media or CD-ROM

Designed for professionals who are working in industry and government. The degree ensures you have an advanced knowledge of agronomic systems and superior problem-solving skills. The program emphasizes practical, professional, and technical skills involved in crop management, soil and water management, and integrated pest management.

The curriculum consists of 12 courses plus a one-credit practicum and a three-credit creative component, for a total of 40 credits. The practicum is the only course that requires attendance on campus—three or four days one summer. The course prerequisites for admission to the program are limited to fundamental agronomy courses, recognizing that many potential students will not have majored in agronomy as undergraduates.
Generally, students who have completed a degree from a College of Agriculture and Life Sciences will meet the requirements. Call (888) MSAGRON (672-4766) to learn more about the program.

For more information contact:
Dawn Miller, Department of Agronomy
2206 Agronomy, Iowa State University, Ames, Iowa 50011
(515) 294-2999 or e-mail: msagron@iastate.edu

**Master of Science in Plant Breeding**
via Web-based interaction, streaming media or CD-ROM

Professionals who would like to advance their careers now have access to the world-renowned plant breeding program at Iowa State University without becoming a resident on-campus student. The Master of Science in Plant Breeding provides the same rigorous curriculum as the resident program, including access to plant breeding faculty within the Department of Agronomy.

Students completing the program will understand not only the fundamentals of plant breeding, but also gain knowledge of advanced concepts such as genomic selection and the challenges facing plant breeders in our global society.

The curriculum consists of 12 courses plus one credit practicum and a three-credit creative component, for a total of 40 credits. The one-credit practicum is the only course that requires attendance on campus-four days during one summer. Generally, students who have completed a degree from a College of Agriculture will meet the requirements.

For more information contact:
Dawn Miller, Department of Agronomy
2206 Agronomy, Iowa State University, Ames, Iowa 50011
(515) 294-2999 or e-mail: msagron@iastate.edu

**College of Business**

**Master of Business Administration (Face-to-Face in Des Moines)**

Students progress through the core curriculum in a cohort, allowing camaraderie with colleagues from a variety of businesses and industries.

The program is 48 credits. Five semesters of core business classes provide a strong foundation of business knowledge; three semesters of electives allow students to tailor the MBA program to their academic and career goals.

Students may concentrate on a general management MBA or specialize in accounting, finance, information systems, marketing, or supply chain management. A double degree, MBA and Master of Science in Information Systems, is also offered. For more information, send an e-mail to busgrad@iastate.edu or call (515) 294-8118 or (877) 478-4622.

**College of Engineering**

The mission of Engineering Online Learning (EOL) is to promote and support outstanding online learning experiences for undergraduate students, graduate students and working professionals. Through EOL, the College of Engineering offers a number of different online courses and programs in engineering, science and technology: graduate degrees, graduate certificates, graduate courses, undergraduate courses, and professional development courses for Professional Development Hours (PDHs) or Continuing Education Units (CEUs). Content is delivered via streaming media accessible to anyone with a computer and connection to the internet.

For more information: www.eol.iastate.edu, eol@iastate.edu or call (800) 854-1675.

**Masters Degree Program in Civil Engineering with an Emphasis in Construction Engineering and Management**

via streaming media

Iowa State’s Construction Engineering and Management program has been recognized by The Associated General Contractors of America; one of only five schools in the U.S. to receive such an honor and to be promoted by the AGC. The program focuses on three components that represent the three functional areas of construction engineering and management: management techniques, construction operations, and construction methods. A thesis or non-thesis option may be selected.

For more information contact:
Charles Jahren, Professor
515-294-3829 or cjahren@iastate.edu

**Computer Engineering Master’s Degree**
via streaming media

**Master of Science**
Study topics of emerging research and interest. Areas of emphases include communications and signal processing, computing and networking systems, electronic power and energy systems, secure and reliable computing, software systems, and advanced materials and electronics. Each master's program totals 30 graduate credits; a thesis or non-thesis option may be selected.

**Master of Engineering (coursework only)**
The Master of Engineering in Computer Engineering degree is designed to assist all individuals who already have a bachelor’s degree in engineering or related areas pursue in-depth study in electrical or computer engineering. With the rapidly changing technological landscape in engineering industries, an advanced degree or continuing education seemingly is becoming increasingly necessary. Our Master of Engineering programs are based on coursework credits only (no thesis or creative component is required).

For more information contact:
Vicky Thorland-Oster, Manager Student Services
515-294-8778 or vthorl@iastate.edu

**Electrical Engineering Master’s Degree**
via streaming media

**Master of Science**
Study topics of emerging research and interest. Areas of emphases include communications and signal processing, electronic power and energy systems, electromagnetics, microwave, and nondestructive evaluation, microelectronics and photonics, systems and controls, and VLSI. Each master’s program totals 30 graduate credits; a thesis or non-thesis option may be selected.

**Master of Engineering (coursework only)**
The Master of Engineering in Electrical Engineering degree is designed to assist all individuals who already have a bachelor’s degree in engineering or related areas pursue in-depth study in electrical or computer engineering. With the rapidly changing technological landscape in engineering industries, an advanced degree or continuing education seemingly is becoming increasingly necessary. Our Master of Engineering programs are based on coursework credits only (no thesis or creative component is required).

For more information contact:
Vicky Thorland-Oster, Manager Student Services
515-294-8778 or vthorl@iastate.edu

**Industrial Engineering Master’s Degree**
via streaming media

**Master of Science**
Study topics of emerging research and interest. Areas of emphases include applied operations research, enterprise informatics, advanced manufacturing, and photonics, systems and controls, and VLSI. Each master’s program totals 30 graduate credits; a thesis or non-thesis option may be selected.

**Master of Engineering (coursework only)**
The Master of Engineering in Industrial Engineering degree is designed to assist all individuals who already have a bachelor’s degree in engineering or related areas pursue in-depth study in electrical or computer engineering. With the rapidly changing technological landscape in engineering industries, an advanced degree or continuing education seemingly is becoming increasingly necessary. Our Master of Engineering programs are based on coursework credits only (no thesis or creative component is required).

**Information Assurance Master’s Degree**
via streaming media

**Master of Science**
Work is offered for the degree Master of Science with a major in Information Assurance under a cooperative arrangement with various departments including Electrical and Computer Engineering; Computer Science; Political Science; Logistics,
Operations, and Management Information Systems; and Mathematics. Students graduating from the major will help to fill the need for well-educated system security specialists in the government, private sector, and academia. The Masters of Science in Information Assurance consists of a total of 30 credit hours, typically with 18 credits from the core set of courses, 6 credits of research for a master’s degree with thesis or 3 credits of creative component or the capstone course for a master’s degree without thesis. The remaining credits will be taken from a set of elective courses. The Masters of Science degree also requires a final oral exam on your research, creative component, or capstone experience. Students typically are allowed to transfer up to 6 credit hours of non-ISU graduate credit into their degree program.

**Master of Engineering (coursework only)**

The Masters of Engineering in Information Assurance consists of a total of 30 credit hours, typically with 18 credits from the core set of courses, 6 credits of research for a master’s degree with thesis or 3 credits of creative component or the capstone course for a master’s degree without thesis. The remaining credits will be taken from a set of elective courses. Students may choose a thesis or non-thesis (creative component) option.

**Master of Engineering**

To complete the Master of Engineering in the Mechanical Engineering program, you need a minimum of 30 credit hours of coursework and up to 15 credits can be taken outside of Mechanical Engineering.

For more information contact:
Doug Jacobson, Professor
515-294-3807 or dougi@iastate.edu

**Mechanical Engineering Master’s Degree**

via streaming media

**Master of Science**

The mechanical engineering graduate program offers internationally acclaimed research programs in biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization. A student may apply instrumentation design of experiments, and computational methods to any of these areas. The Mater of Science in Mechanical Engineering consists of 30 graduate credit hours, 8 of which may be transfer credits. Students may choose a thesis or non-thesis (creative component) option.

**Master of Engineering**

To complete the Master of Engineering in the Mechanical Engineering program, you need a minimum of 30 credit hours of coursework and up to 15 credits can be taken outside of Mechanical Engineering.

For more information contact:
Pranav Shrotriya, Associate Professor
515-294-9719 or shrotry@iastate.edu

**Systems Engineering Master’s Degree**

via streaming media

**Master of Science**

The systems engineering program develops the management capabilities needed in today’s work environment. Engineers, regardless of undergraduate discipline, develop the analytical abilities needed to design, evaluate, and build complex systems involving many components and demanding specifications. The degree is 30 credits, typically including 24 credits of engineering courses distributed among three broad groups (systems engineering core courses, elective engineering courses, and area of specialization courses), and 6 credits of elective non-engineering courses.

**Master of Engineering**

Students must take six graduate credits in the general area of systems engineering. Elective courses include fifteen graduate credits in advanced engineering. These courses are determined by the student and academic adviser to fit the needs of the individual student’s program. Elective non-engineering courses include six credits outside of the engineering fields that meet individual educational objectives. These might come from business, economics, computer science, mathematics or statistics, among other areas. One additional 3-credit course will be based on the needs of the individual student’s program with guidance from the academic adviser. There is no final oral exam.

For more information contact:
Doug Gemmill, Professor
515-294-8731 or n2ddg@iastate.edu

**College of Human Sciences**

**Master of Education or Science**

Principal licensure via a combination of methods at various sites around that state with some work online

**Preparation for Leadership (PreLEAD)**

A master’s program of 36 credits leads to licensing as a PK-12 Principal/Secondary Education Supervisor. Courses are structured to build leadership skills in organizational processes, in creating a school culture focused on student achievement, and in a variety of interpersonal dimensions. Students are paired with mentors who are practicing administrators, experiencing leadership roles firsthand. For more information, send an e-mail to edldrshp@iastate.edu or call (515) 294-1241.

**Doctor of Philosophy**

**Superintendent licensure (Certificate of Advanced Studies)**

via a combination of methods at sites in the Ames area with some work online

A post-master’s curriculum of 30 credits provides instruction for the PK-12 Superintendent/AEA Director license. The program emphasizes leadership skills for aligning the school system for student achievement, maximizing human resources, achieving results through accountability strategies, and using systems assets to create a culture of learning. Students work with two mentors to experience district leadership roles directly. For more information, send an e-mail to edldrshp@iastate.edu or call (515) 294-1241.

**Master of Education with specialization in curriculum and instructional technology**

via blend of online and on campus

Designed to meet the needs of K-12 teachers and other educational practitioners, the three-year program is 32 credits offered in a learning community environment. The program is designed for those who want to earn a master’s and are seeking leadership positions for infusing technology into teaching and learning environments. For more information, visit http://citmed.iastate.edu/citmed/ or send an e-mail to citmed@iastate.edu.

**Master of Family and Consumer Sciences**

online

The Master of Family and Consumer Sciences comprehensive degree covers a variety of family and consumer sciences subject matter. Students have the flexibility to design a program of study that best meets their professional goals. In lieu of a thesis or creative component, the students prepares a final paper and takes an oral integrative exam. The comprehensive degree requires a minimum of 18-21 credits from two or more family and consumer sciences concentration areas. With electives, the degree program totals 36 credits. For more information, send an e-mail to hsde@iastate.edu or call (877) 891-5349.

**Master of Family and Consumer Sciences with specialization in dietetics**

online

The Masters of Family and Consumer Sciences-Dietetics degree program is a 36-credit online program that prepares Registered Dietitians to practice dietetics at an advanced level and/or pursue doctoral study. The program seeks to develop research skills, stimulate independent thought, and provide up-to-date knowledge in foods, nutrition, and food service/business management. The degree program prepares individuals to integrate and apply the principles from biomedical sciences, human behavior, and management to design and lead effective food and nutrition programs in a variety of settings, including hospitals, businesses, community health and wellness areas.

The program is inter-institutional; after being admitted to one of the participating universities, students take online courses from all the universities. For more information, send an e-mail to hsde@iastate.edu or call (877) 891-5349.

**Master of Family and Consumer Sciences with specialization in family financial planning**

online

Financial planners are increasingly in demand as Americans seek help managing their income, assets, and debts. The Masters of Family and Consumer Sciences-Family Financial Planning degree is a structured 42-credit program offered online.

Courses cover financial counseling, personal taxation, insurance, retirement planning, and employee benefits. The non-thesis program is 42-credits. Completing the degree program meets the educational requirements for the Certified Financial Planner™ examination.
The program is inter-institutional; after being admitted to one of the participating universities, students take online courses from all universities. For more information, send an e-mail to hsde@iastate.edu or call (877) 891-5349.

**Master of Family and Consumer Sciences with specialization in gerontology**

The program is designed to meet needs of professionals employed in industry, education, and other hospitality-related professions who want to obtain a terminal degree for their career advancement. Students in the program must participate in the DDP program for two consecutive summer sessions on campus (3 weeks each) and enroll in courses delivered via the web during Fall and Spring semesters. Students completing requirements of the program will earn a PhD in Foodservice and Lodging Management.

The program requires 32 credits and includes a creative component. For more information, send an e-mail to msms@math.iastate.edu or call (515) 294-0393.

**Master of Science in Statistics**

The program is designed for employees of companies who sign a letter of agreement with Iowa State. The degree is the same as on campus; the program requirements are the same including the written master’s exam, creative component, and a final oral exam. For more information, send an e-mail to statistics@iastate.edu or call (515) 294-3440.

**Interdisciplinary – Multiple Colleges**

**Master of Science in Human Computer Interaction**

The accelerating integration of technology into every aspect of society will demand professionals trained with information technology skills that are augmented by an understanding of the human user. These skills will be necessary for any individual to remain competitive in the future information technology workforce. Only those individuals with a unique interdisciplinary perspective will be able to successfully understand, utilize, and apply new technological solutions to solve human-centered problems. This degree program was created from the flowing demand from businesses and industry for a masters program that provides education in the field of Human Computer Interaction. Students in this program will take a total of 30 course credits, with nine of the credits coming from three core courses and three of these credits from a capstone course. Students will be required to come to campus to present the results of their capstone course.

For more information contact:
Pam Shill at 515-294-2089 or pshill@iastate.edu

**Information Assurance Master’s Degree**

**Master of Science**

Work is offered for the degree Master of Science with a major in Information Assurance under a cooperative arrangement with various departments including Electrical and Computer Engineering; Computer Science; Political Science; Logistics, Operations, and Management Information Systems; and Mathematics. Students graduating from the major will help to fill the need for well-educated system security specialists in the government, private sector, and academia. The Masters of Science and Information Assurance consists of a total of 30 credit hours, typically with 18 credits from the core set of courses, 6 credits of research for a master’s degree with thesis or 3 credits of creative component or the capstone course for a master’s degree without thesis. The remaining credits will be taken from a set of elective courses. The Master of Science degree also requires a final oral exam on your research, creative component, or capstone experience. Students typically are allowed transfer up to 6 credit hours of non-ISU graduate credit into their degree program.

**Master of Engineering (coursework only)**

The Masters of Engineering in Information Assurance consists of a total of 30 credit hours, typically with 18 credits from the core set of courses, 6 credits of research for a master’s degree with thesis or 3 credits of creative component or the capstone course for a master’s degree without thesis. The remaining credit will be taken from a set of elective courses.

For more information contact:
Doug Jacobson, Professor
515-294-8307 or dougj@iastate.edu

**Master of Science in Interdisciplinary Studies, Community Development specialization**

The program is designed for those seeking a career in community development and practitioners who wish to augment their training.

In 2005 Iowa State joined five other universities to offer a master’s in community development. The 36-credit program has three tracks: natural resource management, working with native communities, and building economic capacity.

Coordinated by the College of Agriculture and Life Sciences.
Graduate Program in Seed Technology and Business

via Web-based interaction

The Graduate Program in Seed Technology and Business has been designed specifically to meet the needs of working seed sector professionals in industry and government. The STB program emphasizes the development of superior problem-solving and analytic skills by providing up-to-date seed science and technology instruction along with essential courses in business management in a rigorous, integrated curriculum.

The Master of Science curriculum consists of fifteen courses that are developed and delivered by full-time faculty members from Iowa State University and other U.S. universities. Courses are offered by eight departments in the Colleges of Business and Agriculture and Life Sciences: Accounting; Agronomy; Finance; Horticulture; Supply Chain and Information Systems; Management; Marketing; and Plant Pathology and Microbiology. One or two courses are offered per semester, including summer semesters.

A creative component is also required for the Master of Science degree. Students will complete the creative component under the guidance of their Program of Study Committee. In many cases, the creative component topic will be associated with the student's work. Students are able to complete the STB program in as little as ten semesters.

The program also offers graduate certificates in seed science and technology and in seed business management.

Coordinated by the College of Agriculture and Life Sciences.

For more information, please contact us at seedgrad@iastate.edu or see http://www.seedgrad.iastate.edu.

Student Financial Aid

The Office of Student Financial Aid helps families afford Iowa State University. Grants, scholarships, loans, and part-time employment opportunities are available to assist students and families in meeting their college expenses.

Eligibility for financial aid is determined by the Free Application for Federal Student Aid (FAFSA). Students can apply online at www.fafsa.gov beginning January 1 for the coming academic year. Students should submit the FAFSA before to March 1 to receive consideration for most grants and scholarships. A new application must be completed each academic year.

The priority deadline for financial aid is March 1. Students who apply after this date will be considered for the Federal Pell Grant and student loans. New students enrolling spring semester or summer session should complete the current year’s aid application to apply for any available financial aid.

To be eligible for most financial aid programs, a student must be a U.S. citizen or permanent resident, enrolled at least half-time, and making satisfactory academic progress toward a degree.

Students may use their financial aid for study in other countries if they have clearance for the transfer of credit to their degree programs and have made financial aid arrangements prior to departure. For further information, contact the Study Abroad Center, 3224 Memorial Union, or the Office of Student Financial Aid, 2021 Beardshear Hall.

There are three general types of financial aid programs: gift aid (scholarships and grants), loans, and part-time employment. Laws, regulations, and policies governing these programs are subject to change.

I. Gift Aid

A. Scholarships

1. ISU Scholarships. Scholarships are awarded on the basis of achievement, although many also require demonstrated financial need. Find out more about scholarships at www.financialaid.iastate.edu.
2. Military Officer Education (ROTC) Scholarships:
   - Army. The Military Science Department offers 2-, 3-, and 4-year Army ROTC scholarships to qualified students on a competitive basis in virtually any academic discipline. These scholarships provide monies for tuition, all required fees (except student health), books and supplies allowance, and a monthly cash subsistence allowance. For applications or additional information, contact the Military Science Department at 132 Armory or call 515-294-1852.
   - Navy. The Naval Science Department offers several scholarship programs to qualified students. The scholarships cover payment of tuition, fees, books, and a monthly stipend. Information is available from the Naval Science Department, 3 Armory, or by calling 515-294-6050.
   - Air Force. The Air Force offers Air Force ROTC scholarships for periods of 2, 3, or 4 years, with up to 1 additional year for qualified applicants in selected majors. The scholarships provide payment of tuition and fees. In addition, scholarship cadets receive between $250-$400 monthly subsistence allowance and $510 per year book allowance. Express scholarships are also available to students qualified in certain technical academic majors. Details on scholarship qualification, application procedures, and eligibility are available from the Department of Air Force Aerospace Studies, 515-294-1716.
3. Other Scholarship Sources: Students are encouraged to pursue scholarship opportunities from outside agencies and private organizations. Check the financial aid web site for current postings and additional resources.

B. Grants

1. Federal Pell Grant. This federal grant is for undergraduates working toward their first bachelor's degree. The amount of Pell Grant is based on the Estimated Family Contribution (EFC) using a federal calculation from the data supplied on the FAFSA application.
2. Federal Supplemental Educational Opportunity Grant. This federal grant is for undergraduates working toward their first bachelor’s degree and is awarded to high-need students who also qualify for the Pell Grant. Students who file their FAFSA prior to March 1 are considered for this award.
3. ISU Grant. This university grant is for undergraduate students who show financial need. The FAFSA must be filed prior to March 1 to be considered for this award.
4. Officer Education (ROTC) Financial Assistance Grants. All students enrolled in Advanced ROTC (third and fourth years) in the Army, Navy, and Air Force programs are provided a monthly stipend. For further information, contact the appropriate ROTC department in the Armory.
5. Tuition Assistance Grant for Undergraduate International Students. Undergraduate international students who have been at Iowa State University for at least a year and are faced with financial hardship resulting from unforeseen circumstances may apply for this grant. Apply via the International Students and Scholars web site (www.isso.iastate.edu).
6. International Student Financial Aid. International students raise money through cross-cultural activities toward a scholarship fund. These monies will be used to assist international students who have unforeseen financial emergencies. For further information, contact the International Student Council at www.stuorg.iastate.edu/isco.

II. Loans

A. William D. Ford Federal Direct Loan Program. These student loans are obtained through the U.S. Department of Education by filing the FAFSA.

1. Federal Direct Subsidized Loan. This federal student loan is for undergraduate students only. The interest on this need-based loan is paid by the federal government as long as the student remains in school at least half-time. Borrower repayment and interest charges begin six months after graduation or less than half-time enrollment. The interest rate will range from 3.4% to 6.8% depending on the year in which the loan was borrowed.
2. Federal Direct Unsubsidized Stafford Loan. The interest on this non-need based loan is charged to the borrower from the time the loan is disbursed until paid in full. Interest may be paid while you are in school or added to the principal balance of the loan. Borrower repayment begins six months after graduation or less than half-time enrollment. The interest rate is fixed at 6.8%.
3. Federal Perkins Loan Program. The interest on this need-based loan is paid by the federal government as long as the student remains in school at least half-time. Borrower repayment and interest charges begin nine months after graduation or less than half-time enrollment. The interest rate is fixed at 5 percent.
4. Federal Health Professions Loans. This student loan is limited to students enrolled in the College of Veterinary Medicine. The FAFSA must be filed by March 1 to be considered for this loan, and parental information must be provided, regardless of age or dependency of the student. The interest rate is fixed at 7.9 percent. Interest on this loan is charged to the borrower from the time the loan is disbursed until paid in full. Borrower repayment begins twelve months after graduation or less than half-time enrollment.
5. Federal Direct PLUS Loan for Parent (Parent Loan for Undergraduate Students). This loan is for parents of a dependent student and the loan is subject to credit analysis. A parent may borrow up to the cost of attendance less any other financial aid. The interest rate is fixed at 7.9 percent. Interest on this loan is charged to the borrower from the time the loan is disbursed until paid in full. Borrower repayment begins 60 days after the loan has been disbursed in full unless the parent requests a deferment until after the student graduates. This loan is not need-based, and requires filing the FAFSA.
6. Federal Direct PLUS Loan for Graduate & Professional Students (Vet Med). This loan is for Graduate and Professional Students (such as Vet Med students) and is subject to credit analysis. Students may borrow up to the cost of attendance less any other financial aid. The interest rate is fixed at 7.9 percent. Interest on this loan is charged to the borrower from the time the loan is disbursed until paid in full. Borrower repayment can be deferred as long as the student is enrolled at least half-time.
7. Federal Perkins Loan. The interest on this need-based loan is paid by the federal government as long as the student remains in school at least half-time. The amount of the loan is determined by the FAFSA. The interest rate is fixed at 5 percent.
8. Federal Perkins Loan Program. The interest on this need-based loan is paid by the federal government as long as the student remains in school at least half-time. Borrower repayment and interest charges begin nine months after graduation or less than half-time enrollment. The interest rate is fixed at 5 percent.
9. Federal Health Professions Loans. This student loan is limited to students enrolled in the College of Veterinary Medicine. The FAFSA must be filed by March 1 to be considered for this loan, and parental information must be provided, regardless of age or dependency of the student. The interest rate is fixed at 7.9 percent. Interest on this loan is charged to the borrower from the time the loan is disbursed until paid in full. Borrower repayment begins twelve months after graduation or less than half-time enrollment.
10. Federal Perkins Loan Program. The interest on this need-based loan is paid by the federal government as long as the student remains in school at least half-time. Borrower repayment and interest charges begin nine months after graduation or less than half-time enrollment. The interest rate is fixed at 5 percent.
11. Federal Health Professions Loans. This student loan is limited to students enrolled in the College of Veterinary Medicine. The FAFSA must be filed by March 1 to be considered for this loan, and parental information must be provided, regardless of age or dependency of the student. The interest rate is fixed at 7.9 percent. Interest on this loan is charged to the borrower from the time the loan is disbursed until paid in full. Borrower repayment begins twelve months after graduation or less than half-time enrollment.

III. Part-time Employment

There are many part-time employment opportunities available for students, both on campus and off campus. Students who secure part-time jobs gain valuable experience to aid in job placement after graduation. Part-time employment can also help reduce loan indebtedness.

A. Federal College Work-Study. Work-study positions provide hourly employment for students with financial need, as determined by filing the FAFSA. Students with work-study eligibility are able to view work-study positions on the Student Job Board on AccessPLUS.
B. Other Part-Time Employment. The Student Job Board on AccessPLUS lists positions which do not require filing the FAFSA. All students can view these listings for current job openings.

IV. Other Financial Aid

Many other forms of financial aid are available to students who qualify, including Vocational Rehabilitation, Veterans Benefits, and Department of Human Services programs. For further information on these programs, contact the appropriate government office.
Student Housing and Dining

Department of Residence (DOR)
- Pete Englin, Director
- Virginia Arthur, Associate Director for Residence Life
- TBD, Associate Director for Facilities Operations
- Lynn Larsen, Assistant Director for Business Operations
- Lisa Ludovico, Assistant Director for Administrative Services

ISU Dining
- Nancy LeVandowski, Director
- Jill Arroyo, Associate Director for Residential Dining
- Jamie Lenz, Assistant Director for Food Stores / Vending
- Kristi Patel, Assistant Director for Retail Operations
- Steve Ludovico, Business Manager
- Jeffrey Miller, Catering Manager
- TBD, Executive Chef

The university provides housing for almost 10,000 students in on-campus residence halls and apartments. Housing is available for undergraduate and graduate students, single students and families. Questions concerning on-campus housing and dining should be directed to the DOR Administrative Services Office:
- 2419 Friley Hall, Iowa State University, Ames, Iowa 50012
- E-mail: housing@iastate.edu
- Phone: (515) 294-2900
- Additional information may be obtained at http://housing.iastate.edu.

Contracts and Rates
Each student who accepts admission to the University is eligible to submit a housing contract on-line using AccessPlus. Acceptance of admission to the university is necessary before a housing contract can be submitted. Housing priority for new students is based upon the date the completed contract is received in the DOR Administrative Services Office.

All housing and dining contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. Summer contracts are also available.

Housing and dining contracts are "academically friendly." Students who leave the University as the result of graduation, withdrawal, dismissal or participation in a University approved study-abroad, internship, co-op, or student teaching program may cancel their contract without penalty. For reasons other than those listed, students who cancel their housing contract after the cancellation deadline (March 1 for current ISU students, May 1 for newly admitted ISU students) will be subject to a cancellation penalty equal to 80% of the remaining value of their entire contract, both housing and dining. For additional information concerning the residence hall contract, students should contact the Administrative Services Office.

For a complete listing of rates, please visit the following web sites:
- Housing Rates - http://housing.iastate.edu/rates/
- Dining Rates - http://dining.iastate.edu/rates/

Residence Halls
The residence halls are organized geographically into neighborhoods:
- Buchanan Hall
- Richardson Court
- Union Drive
- Wallace-Wilson

With the exception of Buchanan, Eaton and Martin halls, all residence halls are "traditional style" meaning most residents live in double occupancy rooms and share a common, hallway bathroom. A limited number of triple and single occupancy rooms are also available. In Wallace Hall, all rooms are super-singles - double-sized rooms furnished for and occupied by only one student. Buchanan, Eaton and Martin halls rooms offer a "suite-style" set-up with two rooms joined by a private bathroom.

To be eligible to live in Buchanan or Wallace, students must be at least 19 years old or in their second year of college. In Buchanan, two floors are reserved for students who are 21 years of age and older.

Students may choose to live in single-gender or coed houses. Coed houses have male and female students living at opposite ends of the house or on separate levels of the house. They have separate bathroom facilities but share lounge facilities and house activities.

All rooms are furnished with extra-long twin beds and mattresses, closet or wardrobe, clothing drawers, desks and chairs, expanded basic cable and university high-speed wired Ethernet and wireless internet. Wallace-Wilson rooms are also furnished with a micro-fridge an all Wallace rooms also have a futon. Students provide their own bedding, towels, study lamps, etc. Students are responsible for cleaning their own rooms.

In addition to the basic necessities, several special services are available for use by residents. These include house dens for informal get-togethers and relaxation; lounge areas for meeting and entertaining guests; vending areas for snacks; hall desks with recreation/entertainment items, recreational equipment, and mail delivery; laundry facilities; study areas; meeting rooms and offices for student organizations; computer labs; and parking lots assigned to the residence halls.

Residence Hall Government
The students in each neighborhood elect a group of executive officers to be responsible for coordinating neighborhood events and activities. Each neighborhood funds and maintains programs and committees that supplement the total social and educational development of the individual residents. The neighborhoods are joined in an Inter-Residence Hall Association (IRHA), with an all-residence hall parliament, which jointly sponsors Residence Hall Week, Free Friday Flicks, scholarships, leadership conferences, and more.

Each neighborhood is further organized into smaller living groups called houses. These houses of 40 to 60 residents are the foundation of ISU's residence hall program. Members of the houses elect their own officers, and the majority of programs are planned on a house participation basis. Participation in the house program is a great way for students to receive full benefit from the residence hall experience.

Residential Learning Communities (RLCs) and Theme Houses
Located throughout Richardson Court and Union Drive, RLCs and Them Houses are small groups of students who live together on designated houses or floors. Students share academic interests, classes, living spaces and develop friendships as part of an innovative program in cooperative learning. As such, most RLCs are limited to students in certain majors. These communities offer a collaborative living and learning environment, increased student/faculty interaction, social and academic networks essential to student success, and a sense of membership in the ISU community.

Currently, the following learning communities are available: Agriculture Biosystems Engineering (ABE), Agriculture Community Encourages Success (ACES), Business Learning Teams (BLT), Chemical Engineering, Common Threads, Computer Engineering Learning Teams, Computer Science, Design Exchange, Food Science and Human Nutrition (FSHN), Honors, Leadership Through Engineering Academic Diversity (LEAD), Natural Resource Ecology & Management (NREM), Women in Science and Engineering (WiSE).

Residence Hall Meal Plan Requirement
All students who live in Richardson Court or Union Drive are required to purchase one of five Semester meal plans. Each Semester plans include a number of meals (304, 275, 225, 175 or 125) allotted each semester and Dining Dollar$ a cash equivalent that can be used in all ISU Dining locations. Students can use their meals to eat in one of ISU Dining's "all-you-care-to-eat" dining centers or to purchase a meal bundle in one of ISU Dining's cafés, restaurants or dining centers.

Winter Break Housing
All Richardson Court and Union Drive residence halls, except Linden Hall, close during Winter Break. Linden Hall, along with Buchanan, Wallace and Wilson halls, remain open during Winter Break at no additional charge.

Undergraduate and Graduate Single Student Apartments
Apartments for single students are offered in two on-campus neighborhoods: Frederiksen Court and Schilletter and University Villages (SUV). To be eligible to live in these areas, students must minimally have sophomore classification or be at least 19 years of age. All Frederiksen Court and SUV contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. Both Frederiksen Court and SUV remain open during Winter Break at no additional charge. Summer contracts are also available.
in both locations. For a complete listing of rates, please visit the Department of Residence web site: http://housing.iastate.edu/rates/.

Fraternity and Sorority chapter houses provide additional living and social spaces. Many chapters have a community kitchen and a computer lab. Residents pay for their own gas, electricity, and telephone. The Frederiksen Court Community Center features meeting rooms and lounge space, a fitness center, business center and Hawthorn Market and & Cafe a retail dining facility that offers hot meals, snacks, beverages, and convenience items.

In SUV, single students typically live in University Village. All apartments contain two bedrooms, one bathroom, a living room, and a kitchen furnished with a cook top, oven, workspace, refrigerator, and sink. The majority of University Village apartments are unfurnished, but a limited number of furnished units are available.

Rent, which is billed monthly by the university, includes expanded basic cable television, high-speed Internet connectivity, water, and garbage removal service. Residents pay for their own gas, electricity, and telephone.

The Frederiksen Court Community Center features large meeting rooms and lounge space, a community kitchen and a computer lab.

### Apartments for Families

Family Housing is available in the SUV area in Schilletter Village. Students must be married/domestic partners and/or have dependent children in order to be eligible for family housing.

All Schilletter Village contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. Schilletter Village remains open during Winter Break at no additional charge. Summer contracts are also available in both locations. For a complete listing of rates, please visit the Department of Residence web site: http://housing.iastate.edu/rates/.

All apartments contain two bedrooms, one bathroom, a living room, and a kitchen furnished with a cook top, oven, workspace, refrigerator, and sink. Students provide their own furniture and window coverings. Hook-ups for personal washer and dryer are available in the basement of each unit as are private, lockable storage closets.

Rent is billed monthly by the university. Rental rates include expanded basic cable television, high-speed Internet connectivity, water, and garbage removal service. Residents pay for their own gas, electricity, and telephone.

The SUV Community Center features large meeting rooms and lounge space, a community kitchen and a computer lab. The community also boasts a bike/walking path and several playgrounds.

### Off-campus Housing for Students

Off-campus housing information may be obtained through real estate agents, local newspapers, or by contacting individual owners.

### Dining Options for On- and Off-Campus Apartments

ISU Dining offers a variety of convenient, flexible meal plans to students who live in on-campus and off-campus apartments. Plans include traditional Weekly plans, ranging from seven to an unlimited number meals allotted per week, to Semester plans with 175 or 225 meals allotted each semester. Weekly and Semester plans also include Dining Dollar$, a cash equivalent that can be used in all ISU Dining locations. Students in non-meal plan required areas can also choose to purchase Meal Blocks (small allotments of meals without Dining Dollar$) or Dining Dollar$ only.

All dining contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. Summer contracts are also available. For a complete listing of meal plans and rates, please visit the ISU Dining http://www.dining.iastate.edu/. Questions and correspondence concerning meal plans should be directed to the Department of Residence Administrative Services Office, 2419 Friley Hall, Iowa State University, Ames, Iowa 50012. E-mail: housing@iastate.edu. Phone: (800) 854-9050. Additional information may be obtained at http://housing.iastate.edu/.

### Fraternities and Sororities

Of the 50 fraternity and sorority chapters on the Iowa State University campus, 42 have chapter houses, and provide housing for about 1,800 undergraduate students. Eight multicultural Greek fraternities and sororities do not provide residential facilities for members, but are active in scholastic, service and social projects.

The chapter house facilities are similar to a private residence: living room, den, kitchen, dining room, laundry room, etc. The staff in the Office of Greek Affairs, a department in the Dean of Students Office, provide advising, programs, and services for the Greek chapters and organizations. Local alumni work with each fraternity and sorority to ensure that the chapter structure meets all the state and local building, safety, and fire codes that are required with incorporation under the State Law of Iowa.

The average cost of living in a fraternity or sorority chapter house ranges from $2,800-$3,400 per semester. The cost includes room, board, social expenses and membership dues.

Most men may move directly into a fraternity house at the beginning of an academic year if they pledge a chapter that has a house. Typically, they continue living there throughout their college years. Women pledging a sorority during formal recruitment or informally throughout the year generally live in the residence halls for the academic year. However, as space becomes available in a chapter house, sorority members often move into the house as sophomores or upper-class women.
Library

Undergraduate Study

A foundation of library instruction is the LIB 160 Information Literacy course, which is a requirement for undergraduate graduation. Library faculty also offer course-related instruction for undergraduate students in the effective use of library resources in all fields of study. Offered F.S.SS. For more information, call the Library at 294-3642.

Graduate Study

Library faculty offer course-related instruction for graduate students in the effective use of library resources. These sessions cover sources of information in all fields of study. Offered F.S.SS. For more information, call the Library at 294-3642.

Courses

Courses primarily for undergraduates:

LIB 160. Information Literacy.
(1-0) Cr. 1. F.S.SS. Prereq: For students whose native language is not English: Completion of ENGL 101 requirement.
Eight-week course required for undergraduate degree. Provides a solid understanding of information literacy and the research process with emphases on finding, evaluating, and using scholarly information; the ethical and legal framework related to information use; and utilization of library discovery tools. To be taken as early as possible in the student’s undergraduate career. See course descriptions of ENGL 150 and ENGL 250 for requirements related to LIB 160. Offered on a satisfactory-fail basis only.
Registration

Registration is a process by which students become officially enrolled in classes for a given term. The process involves consultation between the student and the student’s academic adviser. All undergraduate students are assigned an academic adviser based on their major/curriculum. A new adviser assignment is made when a student changes majors/curricula. See Index, Academic Advising.

Students who attend classes must complete registration and pay their assessed fees. Registration is not complete until all fees are paid, including board and room fees for those living in residence halls. See Index, Fees and Expenses.

Disabled students who need assistance with any phase of registration should contact Disability Resources. See Index, Disability Resources.

Dates and Deadlines

Dates for registration are published in the university calendar on the Web at www.registrar.iastate.edu/calendar/, and departmental bulletin boards.

Students are assigned a registration start date and time, which is the first day and time they can use the registration system. Registration start dates are assigned based on projected year in school classification (computed by combining total credits, current term credits, and current term test out credits). Then specific start dates within projected year in school are established by using the sum of total credits and current term test out credits.

Students may choose to delay their registration until a later date; however, courses will begin to fill on the first day of registration. Any delay in registration may reduce course selection options. A list of start dates by classification is available at www.registrar.iastate.edu/registration.

Continuing students register for the following term during the middle of the current term. For example, registration for spring term begins the middle of fall term; registration for summer session is completed during the previous spring at the same time as registration for fall semester.

A late registration fee is assessed for registration initiated on or after the first day of classes for fall and spring terms. This fee is not charged for the summer term. If registration is not completed by the end of the fifth day of classes, students must obtain written permission from their advisers, the instructors for the courses they plan to take, as well as approval from the dean of the college in which they are registered. During the summer session, these approvals must be obtained in order to register after the third day of classes.

Students may not enroll in courses with time conflicts without the approval of the instructors concerned.

Students who participate in off-campus experiences for which they receive Iowa State University credit must register for that credit during the term when the experience is taking place, whether or not they are taking courses on campus during that time.

Registration Responsibilities

The registration process includes advising, enrollment in courses, and schedule changes. In addition to the student, this process may involve the student’s adviser; the student services staff of the student’s college; and the dean of the college. Each is responsible for knowing and following the academic policies and procedures.

Student

• knowing and adhering to university policies and procedures that apply to registration and schedule changes
• checking the accuracy of his/her schedule on AccessPlus, including schedule adjustments (i.e., adds, drops, section changes)
• knowing the degree requirements of his or her major and/or curriculum
• planning course schedules to meet those requirements; and monitoring the accuracy of the degree audit.

Adviser

• consulting with advisees during the advising/registration period
• providing information about student’s major and curriculum requirements
• providing guidance in the student’s course selection
• assisting in monitoring the degree audit for accuracy
• notifying the college student services office with corrections to the degree audit.

College Student Services Staff

• assisting new and reentering students with the registration process
• resolving unusual scheduling problems
• updating the degree audit or solving problems concerning the degree audit.

Dean

• making decisions with respect to requests for deviations from university policies, deadlines, etc.

Students and staff should check with the college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Class Schedule Planner

The Class Schedule Planner is an application that allows students to plan their schedules using courses displayed in the Schedule of Classes. Students can select courses and/or sections they want to take for a particular term, as well as block out unavailable class days and times. Based on those selections, Class Schedule Planner can return all possible schedules to the student in a color-coded grid format. Though it is a Web-based application, the Class Schedule Planner does not require authentication (no user ID, PIN, or password). Therefore, it is essential that students understand this is a planner and as such, it does not register them in courses and cannot be used to complete their registration. The application requires that the user have Java on their computer. The first screen of the Planner provides information about how to use the planner and simple instructions for downloading the Java application. A useful Help link also has been provided. The Class Schedule Planner is available at http://planner.iastate.edu.

Using AccessPlus Registration

Students enter the system via AccessPlus by using university ID and password. If required by their college, they also need to enter a registration access number (RAN).

The registration system provides messages after each entry indicating whether each request has been processed. Students also may review their current schedules at any time during registration. Students are held accountable for all changes made to their schedules.

All students are encouraged to register for courses through the AccessPlus registration system. However, students who are unable to use the system may register in person by processing their signed Registration Worksheet in the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Registration System Abuse

Using the AccessPlus registration system is a privilege, which may be revoked if abuse is detected. Abuse includes, but is not limited to, creating and using an automated program to search for course openings and/or enrolling in a section with the intent of reserving space in that particular section for another student. The Office of the Registrar, college office, and/or advisers have the right to determine abuse and revoke privileges for any type of registration system abuse.

Course Information

Prerequisite. A prerequisite indicates the specific academic background or general academic maturity considered necessary by the faculty for the student to be ready for maximum success in the course. See Index, Course Prerequisites.

Permission Required courses/sections. To register for these sections, students must obtain authorization on a Request for Schedule Change or Restriction Waiver form and process the approved form in the Registrar’s Student Scheduling Office, 10 Enrollment Services Center.

Restricted courses/sections. Some courses or sections are restricted to students who meet specified criteria including curriculum/major, college, and/or year in school. In addition, some sections may be restricted to new students to ensure that sufficient spaces are available when new students register during summer orientation. A department may waive a restriction for a student who has extenuating circumstances. The student must obtain the authorization from the department on a Request for Schedule Change or Restriction Waiver form. The form is processed in the Registrar’s Student Scheduling Office, 10 Enrollment Services Center.

Classrooms are listed for each course in the Online Schedule of Classes at http://classes.iastate.edu/ and on the student’s class schedule on AccessPlus.

Cancelled courses/sections. In some cases, courses or sections may be cancelled due to low enrollment or departmental staffing considerations. Students who are registered for a cancelled course or section will be notified by the Office of the Registrar, the department, and/or on their AccessPlus schedule.

Textbook information. A link to textbook information, including the ISBN and retail price for assigned textbooks, is available from the Schedule of Classes. Textbook information for Iowa State University courses is posted as close to the start of registration as possible. Students may purchase textbooks from any source they choose.

Credit Limits

For fall and spring semesters, the credit limit is 18 credits for undergraduates and 15 credits for graduate students. For summer session, the limits are 12 credits for...
undergraduates and 10 credits for graduate students. A student may be required to drop credits before adding another course. In some cases, the college dean may approve a higher or lower credit limit for individual students. Students may request a change in their credit limit by contacting their adviser. Advisers should notify the student’s college student services office if the credit limit needs to be changed.

Registration Holds

Students with holds on their registration will not have access to registration until the initiating offices have released the holds. Those who attempt to register before the holds have been released will receive a message indicating which offices have placed holds on their registration. Prior to their registration, students may check for holds on AccessPlus.

Drop Limit

Students are limited in the number of courses they may drop during their academic career. (This refers to drops processed after the fifth day of classes of each semester.) Students who entered Iowa State University as freshmen are allowed to drop a maximum of five courses during their undergraduate career. If they entered at a level above freshman classification or in the College of Veterinary Medicine, they are allowed to drop a maximum of four courses. Courses dropped during their first term at Iowa State are not included in this limit, nor does the summer count as a first term for this purpose. Students who enroll at Iowa State University as undergraduates after receiving a bachelor’s degree are permitted four drops. Exceptions to the drop limit may be made for courses that must be dropped for reasons beyond the student’s control. These exceptions are granted only by the dean or other authorized person in the student’s college.

The number of drops students have left is indicated on their grade report (available on AccessPlus) each term. Students are responsible for not exceeding their limit. Students who attempt to drop a course beyond the limit without special permission by the dean of the student’s college will continue to be enrolled in the course and will receive a grade at the end of the term.

Validating Enrollment

To validate their enrollment in each course at the beginning of the semester, students must attend the first or second meeting (first meeting if the class meets only once a week). Students who add a course after the term begins must attend the next class meeting. The instructor has the option to offer a registered place in the course to another student when a registered student fails to attend and has not obtained prior approval of the instructor. Students who do not validate their enrollment must drop the course or they will receive an F grade.

Registration Process

To register for classes, students need the following materials and information:

- Registration Worksheet, available for download at www.registrar.iastate.edu/forms/.
- A RAN (registration access number) if required by their college.
- Course information from the Online Schedule of Classes at http://classes.iastate.edu/.
- Other departmental information applicable to their curriculum, available from their adviser.

Students are expected to do the following in the advising and registration process:

1. Meet with their adviser, who will provide the following:
   a. degree audit
   b. guidance in course selection
   c. Registration Authorization form, with RAN, if applicable.

2. Choose specific sections of each course. Students are responsible for choosing their course sections. In most cases advisers will not be involved in selecting meeting times.

3. Review their registration start date/time information and any registration hold information on AccessPlus (https://accessplus.iastate.edu/frontend/login.jsp), under Current Information. Students in those colleges which require a four-digit registration access number (RAN) should meet with their adviser in advance of their start date, to obtain their Registration Authorization Card on which the RAN is printed.

4. Register for courses using the AccessPlus (https://accessplus.iastate.edu/frontend/login.jsp) registration system.

Making Schedule Changes

Students may make schedule changes through the first five days of class using the AccessPlus (https://accessplus.iastate.edu/frontend/login.jsp) registration system. Procedures for schedule changes vary by the time period of the semester. The effective date of a schedule change is the date when the change is entered into the registration system.

Schedule change periods are as follows:

Period 1 ends on the fifth day of classes in the fall and spring semesters. Students may make schedule changes through the first five days of class using the AccessPlus registration system. Students in those colleges which require a four-digit registration access number (RAN) each term. Students are responsible for not exceeding their limit.

Period 2 ends the Friday of week 10 in the fall and spring semesters. During this period, schedule changes require signatures of adviser and instructor and are processed on a Schedule Change form. A schedule change fee is assessed for adds, drops, and section changes during this period. Course drops after period 1 count toward a student’s ISU drop limit and appear as an X on the permanent record. A section change does not require a drop.

Period 3 is anytime after period 2. Schedule changes during this period are permitted only for extenuating circumstances, may require a written statement of support from the instructor and the student, and must be approved by the dean of the student’s college.

Half-Semester and Partial Term Courses

Specific deadlines for adding and dropping half-semester courses are published in the university calendar. Prorated adjustments to add and drop deadlines are made for other partial term courses. To find out specific deadlines for partial term courses, contact the Registrar’s Student Scheduling Office, 10 Enrollment Services Center, 294-2331.

R-Credit Courses (required courses)

Processing a scheduling change for a required course is usually considered administrative. There is no fee for administrative schedule changes. Administrative drops do not count toward a student’s ISU drop limit and do not appear as an X on the permanent record. To make a Period 3 R-credit drop administrative requires approval of the college dean.

Cancellation/Withdrawal

Students who decide not to attend classes before the date class work begins must cancel their registration to avoid tuition and fees assessment. Students who decide not to attend classes before the date class work begins must withdraw from the university.

Registration Cancellation

A cancellation is processed when a student notifies the Office of the Registrar, prior to the day class work begins, of the decision not to attend classes for the current semester. All courses are removed and no tuition and fees are assessed. Students may cancel their registration by contacting the Office of the Registrar at 294-2331. Students who wish to cancel must request the name of the person taking the call and record the name as well as the time and date called.

Withdrawal

Students who decide not to attend classes beginning the first day of class or later, must process a withdrawal form. Per the student’s request, the “Request for Withdrawal” form is initiated and submitted to the Office of the Registrar. The student is withdrawn from all courses based on the withdrawal date on the form, and tuition and fees are adjusted, if appropriate according to established policies approved by the Board of Regents, State of Iowa. See www.iastate.edu/~registrar/registration/tuition-adj.shtml

Withdrawal procedures must be followed otherwise instructors of the courses involved will assign grades or marks they consider appropriate. Since these grades may be Fs, students are warned that failure to follow the prescribed withdrawal procedures may adversely affect a later application for reentry or transfer to another institution.
Students who are considering withdrawal from the university should immediately consult their academic adviser to discuss reasons for the withdrawal and alternatives. A request for withdrawal during period 3, (i.e., after the last day to drop a course without extenuating circumstances) will not be approved except for circumstances that are beyond the student’s control. The dean of the student’s college or his or her designee, must approve such requests. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Students should not expect to withdraw during or after the final examination week. In a situation beyond a student’s control, when examinations cannot be completed, arrangements should be made for incompletes rather than withdrawal during final exam week. Students who are on academic probation (P) and withdraw during period 3 will not be permitted to enroll the following term, except under extenuating circumstances.

Withdrawal Procedures
To withdraw from the university, students must do the following:

1. Complete a Request for Withdrawal form, with adviser’s signature.
2. Request the approval and obtain the signature of the college in which they are enrolled. (If the request is approved, the withdrawal form will be forwarded to the Office of the Registrar where it will be recorded; the information is then sent to the appropriate offices.)

The effective date of the withdrawal is the date on which it is approved by the college dean, or his or her designee. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

If students complete the withdrawal procedure, the courses they are taking will not be included on the permanent record nor counted as part of their drop allowance. Half semester courses completed prior to withdrawal will be included on their permanent record. Incompletes will not be accepted for any courses taken during the term the student withdraws.

Interim or Medical Withdrawal
The University may order involuntary withdrawal of a student if it is determined that the student is suffering from a mental disorder as defined by the current American Psychiatric Association Diagnostic Manual such that the disorder causes, or threatens to cause, the student to engage in behavior which poses a significant danger of causing imminent harm to the student, to others or to substantial property rights, or renders the student unable to engage in basic required activities necessary to obtain an education.

Status of Conduct Proceedings
If the student has been charged with violation of the Uniform Rules of Conduct, but it appears that medical reasons exist for the objectionable behavior, the withdrawal policy may be activated prior to issuance of a determination in the conduct process. If the student is ordered medically withdrawn from the university, such action terminates the pending disciplinary action. If the student is found not to be subject to medical withdrawal under this section, conduct proceedings may be reinstated.

Interim Action
The OJA (Office of Judicial Affairs) Administrator or the Dean of students may order interim medical suspension of a student where there appears to be an imminent threat of harm to self or others. If the student is suspended, within 48 hours of ordering interim medical suspension, the Dean of Students will schedule an interim hearing before the Medical Withdrawal Committee, consisting of the Director of Student Health (or designee), the Director of the Student Counseling Service (or designee), and the Dean of Students. The student and the OJA Administrator will have an opportunity to present information as to whether interim medical suspension should be continued or modified, and whether medical withdrawal should be considered.

The Medical Withdrawal Committee may order the student to be referred for an evaluation by a licensed mental health professional of the university’s choosing if there is adequate reason to believe that a basis for medical withdrawal exists. The order of referral must be sent to the student and notify the student of the scheduled evaluation to occur no later than seven days from the date of the referral letter. The University will cover the cost of the evaluation. If a student fails to complete the evaluation, the university may continue interim medical suspension and may order restrictions on campus access until the evaluation is completed and reviewed by the university. The decision to continue interim medical suspension and for referral may be appealed within 48 hours, in writing, to the Vice President for Student Affairs. The student may be assisted by any two individuals of his or her choice in any hearing or appeal.

Involuntary Medical Withdrawal
If the medical evaluation supports medical withdrawal, a hearing will be scheduled before the Dean of Students, the Director of Student Health and a member of the Student Counseling staff. The student will have at least 48 hours to independently review the psychological or psychiatric evaluation prior to the hearing. The student and the OJA Administrator may present arguments for or against involuntary Medical Withdrawal. A written decision shall be rendered by the Medical Withdrawal Committee stating the reasons for its determination. The decision may be appealed, in writing to the Vice President for Student Affairs. A student who has undergone involuntary medical withdrawal must reapply, and may not reenter the University without providing competent medical evidence that the medical condition no longer exists, or is sufficiently under treatment so as to remove any substantial likelihood of reoccurrence of the condition which caused medical withdrawal. The University may require the student, at the student’s cost, to undergo a medical evaluation by a licensed mental health professional of the university’s choosing. A medical withdrawal is not considered a disciplinary action, though a prior medical withdrawal may be considered in subsequent conduct hearings involving the student.

Tuition and Fees Adjustments for Withdrawals
Tuition and fees adjustments are made for withdrawals according to the schedule for full term courses (appropriate adjustments will be made when partial term courses are involved). Students may appeal a tuition and fees assessment for withdrawals. Determinations will be made for instances beyond the control of the student. The results will be sent to the student in writing.

Returning/Reentry to the University
U.S. students who have been absent from Iowa State University less than 12 months may be admitted as a returning student. If more than 12 months have elapsed since last enrolled, a U.S. student must apply for reentry to the university. All international students must apply for reentry regardless of the time away from the university.

Returning Students
U.S. undergraduate and non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months do not complete a reentry form; however, international undergraduate and non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months must complete a reentry form.

Returning U.S. students and graduate students should contact the Office of the Registrar to have their records updated and registration access created. Students should contact their advisers or major professor to select courses and begin the registration process.

Returning students who want to change their curricula should follow the same procedure as in-school students. Students who were dropped from enrollment at Iowa State University must obtain reinstatement by the Academic Standards Committee of the college that initiated the drop. (See below for policies that apply to requests for reinstatement.)

Reentry Students
Undergraduate and nondegree undergraduate (special) students who plan to attend Iowa State University after an absence of twelve months or more must complete a reentry form. Forms are available from www.iastate.edu/~registrar/info/reentry.html.

Students with a bachelor’s degree who plan to take supporting graduate level coursework prior to applying for graduate degree admission should request a nondegree graduate admission application.

Students who have previously attended Iowa State University only as nondegree (special) students and who now seek to earn an undergraduate degree should request an undergraduate application.

International students must complete a reentry form. Forms are available from www.iastate.edu/~registrar/info/reentry.html. Financial certification of ability to cover all educational and living expenses will be required.

The reentry form should be completed and returned to the Office of the Registrar, 0460 Beardshear Hall, well in advance of the term of reentry. Students who have attended another college or university since enrollment at Iowa State University must have an official transcript(s) of all course work attempted sent to the Office of Admissions, 100 Enrollment Services Center.

Reentering students must also contact their departmental office/adviser to prepare a class schedule. Reentry must be approved prior to registration.
Iowa State University requests the information on the reentry form for the purpose of making a reentry decision. The university reserves the right not to approve reentry if the student fails to provide the required information.

**Reentry Approval Process**

Generally, a request to reenter Iowa State University will be approved within the Office of the Registrar. However, the Office of the Registrar will refer the reentry form to the college to which a student plans to return if the student: (a) desires to change curriculum; (b) has a previous Iowa State University cumulative grade point average below 2.00; (c) was dropped from the university for unsatisfactory academic progress or was not otherwise in good standing; or (d) since leaving Iowa State University, has completed additional college study with less than a 2.00 grade point average. See Index, Reinstatement.

**Academic Renewal Policy**

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations. See Index, Academic Renewal Policy.
Research and Extension

Research

Research is an important activity at Iowa State University. Students play significant roles in Iowa State’s research mission. Graduate students and some undergraduates work alongside top-notch faculty and staff who are exploring new ideas and finding solutions to real problems.

Getting involved in a research activity complements your coursework and adds another dimension to your Iowa State experience. There are many opportunities for graduate and undergraduate students to get involved in research at Iowa State University. The Undergraduate Research (http://www.undergradresearch.iastate.edu) website offers a list of the latest research and presentation opportunities for undergrads. Research opportunities for prospective and current graduate students may be found within each college, at the U.S. Department of Energy’s Ames Laboratory (http://www.ameslab.gov/education/graduate-fellowship), and within the many centers and institutes (http://www.vpresearch.iastate.edu/en/centers_amps_institutes) at Iowa State.

Support for research at Iowa State University comes from state and federal appropriations as well as from contracts and grants involving the federal government and nonfederal organizations. As part of its total program, the university also operates extension services, special laboratories, and centers and institutes.

Iowa State University Extension and Outreach

Iowa State University Extension and Outreach helps carry Iowa State University’s land-grant mission beyond the borders of campus.

Extension and Outreach’s core purpose is to provide research-based educational programs by monitoring the needs of Iowans and developing educational programs and resources to address those needs, including emerging needs such as emergency response.

Our core programs are organized around four signature issues:

- **Economic Development** # Economic development programming focuses on actions to help the Iowa economy prosper and grow – enhancing the health of communities, growing businesses, and increasing the wealth and the quality of life for all Iowans.
- **Health and Well-being** # Health and well-being programming focuses on activities and projects to help Iowans live healthier lives through improved healthy behavior, physical health, and enhanced family, work, and community environments.
- **K-12 Youth Outreach** # K-12 outreach programming connects Iowa children and youth with Iowa State University’s knowledge and research base to help them reach their full potential. Education and positive youth development experiences are offered on campus, within counties, and out of state. K-12 outreach includes 4-H Youth Development programs, outreach partnerships through the Iowa State colleges, and science, technology, engineering, and math initiatives.
- **Food and the Environment** # Global food security programming focuses on local actions to produce a safe, sustainable, accessible, and affordable food supply for Iowa, the nation, and the world.

Our educators, specialists, and volunteers live and work in all 99 counties, giving Iowa State University a presence in every county and personal connection to Iowans.
Student Activities and Honor Societies

Memorial Union Activities and Services

The Memorial Union is an historic building that is regarded as the heart of campus life and the center of informal education at Iowa State University.

515-296-6848; www.mu.iastate.edu

Arts, Entertainment, Recreation:
- Underground (bowling, billiards, video arcade, Nintendo Wii)
- Maintenance Shop: live music
- Student Union Board: weekly films, comedy, hypnotists, special events, much more
- Art exhibits and art-for-rent
- Workspace (art and crafts classes for fun, studios for work in wood, photo, pottery; button maker, screen printing, die cut machine)
- Big screen TVs; pianos to play
- Lectures

Student Organizations
- Student organization offices and meeting space; recognition process.

Dining & Shopping
- Food Court & MU Market & Café
- University Book Store

Study Spots
- Browsing Library & Computer Lab; Chapel; Multicultural Center
- Lounges: Main, West, Pride, Commons & more

Services
- Hotel, meeting rooms, catering
- Parking ramp
- Copy Center
- Soults Family Visitor Center
- ATMs, Ticket Office, Lockers
- U.S. Post Office – full service
- Student Legal Service

Distinctive Feature
- Gold Star Hall, an active memorial to Iowa State service personnel lost in the nation’s conflicts

Student Activities Center
Director of Student Activities
George Micalone

Coordinator for Leadership and Service
Jennifer Garrett

Coordinator for Art Programs
Letitia Kenemer

Coordinator for Entertainment Programs
TBA

Underground Recreation Center Manager
Doug Swanson

The Student Activities Center (SAC) in the Memorial Union is committed to helping students learn inside and outside the classroom by offering countless ways to get involved at Iowa State through leadership, service, arts, entertainment and recreation activities.

The Student Activities Center includes: the Workspace (arts studio), the Maintenance Shop (entertainment venue), the Underground (recreation center/bowling alley), leadership and service programs, art galleries in the MU, Multicultural Center, and management of the recognition of over 700 campus and student organizations. For a complete list of recognized organizations visit www.stuorg.iastate.edu.

The staff provides assistance to student and campus organization leaders, members and advisers on an individual or group basis. This office produces Newsline, an online newsletter distributed twice a month to officers and advisers of recognized student and campus organizations. Available on the SAC website are resources for student and campus organizations including the event authorization process, publicity and promotion ideas, constitution writing guidelines, and officer transition information.

The Student Activities Center offers a 1-credit course called Leadership ISU where students learn leadership skills through a series of activities and seminars.

Annual SAC events include: ClubFest I & II (organization involvement fair), WelcomeFest (Ames and ISU opportunity fair), Coach Talks (hear from Men’s and Women’s head basketball coaches), Iowa State Leadership Experience (one-day leadership conference), Social Justice Summit, and Winterfest (celebration of all things winter). Student Activities Center staff advise key student organizations including: Student Union Board, Dance Marathon, Freshmen Council, Student Volunteer Services, The 10,000 Hours Show, and VEISHEA.

More information is available at the Student Activities Center, located in the East Student Office Space in the Memorial Union (across from the Food Court); online at www.sac.iastate.edu; or by calling (515) 294-8081.

Lectures
www.lectures.iastate.edu/

Throughout the academic year, the Committee on Lectures brings to the campus a number of speakers eminent in national and international affairs, the sciences, and the arts. In addition to giving formal lectures, a number of these speakers meet with students informally for discussions. Through these lectures and discussions the students are given a well-rounded presentation on subjects and areas affecting their culture, educational and economic philosophies, and scientific development. Past speakers include scholars E.O. Wilson and Stephen J. Gould; activists Gloria Steinem and Anita Hill; actor and comedian Bill Cosby; poet Maya Angelou; and astronaut Sally Ride.

The Institute on World Affairs is an annual series of speakers and on a topic of international interest held in the fall. Spring semester, the Institute on National Affairs is held with a topic of national concern as its focus. Focus, an annual fine arts festival with emphasis on student creativity in the arts, is held in the spring. The Committee on Lectures also sponsors or co-sponsors dramatic, dance, and musical events.

Students are encouraged to contact the lectures program office and become involved in the planning of these events.

Motor Vehicles and Bicycles

Students are permitted to own and operate motor vehicles - automobiles, motor scooters, and motorcycles. However, motor vehicles are in no way necessary for an Iowa State University student. Iowa State University is primarily a pedestrian campus. Those who operate a motor vehicle or bicycle on campus must abide by the rather extensive traffic and parking regulations. Fines are levied for infractions of these regulations. All motor vehicles and bicycles owned or operated by residents on university property must be registered with the Parking Division Office located in the Armony. Copies of the traffic and parking regulations also are available at this office or online at www.dps.iastate.edu/parking/.

Honor Societies

Honor societies at Iowa State University provide opportunities for students who excel in the classroom and want to network with others in their major. Below is a list of honor societies followed by a brief description.

Members of these honor societies are eligible for transcript recognition through the Office of the Registrar. More information, including the complete list of honor societies, can be found on the student organization database at www.stuorg.iastate.edu.

Alpha Epsilon—Agricultural Engineering

The purpose is to promote the high ideals of the engineering profession, to give recognition to those agricultural engineers who manifest worthy qualities of character, scholarship, and professional attainment, and to encourage and support such improvements in the agricultural engineering profession that make it an instrument of greater service to humanity. Membership is based on scholarship, leadership, and character.

Alpha Kappa Delta—Sociology

Members share interest in the field of sociology, research of social problems, and such other social and intellectual activities as will lead to improvement in the human condition.

Alpha Lambda Delta/Phi Eta Sigma — Freshmen

First-year students who achieve at least a 3.5 GPA for one or more semesters their first year may be members of these national honor societies. These societies
encourage superior scholastic attainment among students in their first year at institutions of higher education.

**Alpha Pi Mu—Industrial Engineering**
Members are chosen for character, achievement, and scholarship in industrial engineering. The group provides social and educational interaction for industrial engineering.

**Alpha Upsilon Alpha—Education**
An educational honorary, this group recognizes and encourages scholarship and leadership in the field of reading.

**Alpha Zeta—Agriculture**
Members must have completed three semesters of study in the College of Agriculture and Life Sciences or Veterinary Medicine and be in the upper two-fifths of their class. Meetings are held to foster high standards of scholarship, character, and leadership. Alpha Zeta sponsors lectures, service projects, and promotes the agricultural programs at ISU.

**Beta Alpha Psi – Accounting**
A national honorary for students in accounting, Beta Alpha Psi recognizes academic excellence and complements members' formal education by providing interaction between students, faculty, and professionals, and fosters lifelong growth, service and ethical conduct.

**Beta Beta Beta Biological Honor Society**
A national organization for students in the biological sciences with a purpose to recognize undergraduates with exceptional scholarship, leadership and character.

**Beta Gamma Sigma**
An honor society for collegiate schools of business, Beta Gamma Sigma recognizes high academic achievement.

**Cardinal Key—Senior Leadership**
The Senior Honor Society of Cardinal Key recognizes those persons who have been outstanding leaders in college life, who have rendered noteworthy service to Iowa State University, who are of high moral character, and who rank high scholastically. Members are selected by application and interview.

**Chi Epsilon—Civil Engineering**
The purpose of this honorary is to develop the profession of civil engineering through the interaction of members, fellow civil engineering students, and faculty. Scholarship, character, practicality, and sociability are the fundamental requirements for membership.

**Epsilon Pi Tau—Education in Technology**
Members are selected from the upper one-fourth of the juniors, seniors, and graduate students in industrial technology. The group strives to promote skill, social and professional efficiency, and research.

**Eta Kappa Nu—Electrical and Computer Engineering**
An International Honor Society for primarily juniors and seniors, as well as graduate students and professional engineers. The organization recognizes scholarship, personal character, useful voluntary services, and distinguished accomplishments. It assists its members throughout their lives in becoming better professionals and citizens.

**Gamma Sigma Delta—Agriculture**
The honorary encourages a high degree of excellence in the practice of agricultural pursuits and encourages high standards of scholarship in all branches of agricultural science and education. Membership includes junior and senior students, graduate students, faculty, and alumni.

**Golden Key—All University**
A national nonprofit academic honors organization, Golden Key is dedicated to recognizing and encouraging scholastic achievement in all undergraduate fields of study and to uniting collegiate faculty and administrators.

**Kappa Delta Pi—Education**
In an effort to promote excellence in and recognize outstanding contributions to education, Kappa Delta Pi maintains a high degree of professional fellowship among its members, quickens professional growth, and honors achievement in educational work. Membership invitations are extended to second semester sophomores, juniors, and seniors with a GPA of 3.25 or above.

**Kappa Omicron Nu, Gamma Chapter**
Objectives of the honor society are to promote graduate study and research, and to stimulate scholarship and leadership toward the well-being of individuals and families throughout the world. Top 10 percent of junior and top 20 percent of senior students maintaining at least a B average, and outstanding graduate students in family and consumer sciences, are eligible for selection. Research within the college is shared at monthly meetings.

**Kappa Tau Alpha—Journalism**
Kappa Tau Alpha is the national society dedicated to the recognition and promotion of scholarship in the field of journalism. Members are selected from the upper 10 percent of the senior class. Graduate students and faculty who qualify are also eligible for membership.

**Mortar Board**
Members are recognized for superior academic achievement and community service.

**National Society of Collegiate Scholars**
The purpose is to recognize and celebrate high achievement in all academic disciplines, to provide opportunities for personal growth and leadership development, and to organize and encourage learning opportunities through community service.

**Omega Chi Epsilon—Chemical Engineering**
Membership is open to chemical engineering juniors in the top 20 percent of their class, or seniors in the top 30 percent. The purpose is recognition and promotion of high scholarship, original investigation, and professional service in chemical engineering.

**Order of Omega—Fraternity and Sorority Honorary**
A national Greek honorary, the Order of Omega was founded at Iowa State in 1957. Criteria for membership include character, scholarship, leadership; service to the individual chapter, the Greek system, the university, and the Ames community. Membership is limited to junior and senior students who comprise one percent of the Greek population.

**Phi Alpha Theta—History**
Students who have a B average in at least 15 hours of history are eligible for membership. The local branch sponsors social activities, co-sponsors prizes for undergraduate essays in history, and encourages students’ participation in state wide, regional, and national Phi Alpha Theta conferences.

**Phi Beta Delta, Alpha Delta Chapter**
The honor society recognizes and encourages high professional, intellectual and personal achievements in the field of international education.

**Phi Beta Kappa—Liberal Arts and Sciences**
Phi Beta Kappa is a national honorary society, founded in 1776 "to recognize and encourage scholarship, friendship, and cultural interests." Membership is by invitation to students enrolled in the LAS curriculum. To be eligible, juniors must have at least a 3.90 cumulative grade point average and seniors, at least a 3.60 average. Other criteria for membership include requirements in the mathematical disciplines and a foreign language.

**Phi Kappa Phi—All University**
This national honor society recognizes and encourages superior scholarship in all academic disciplines. Membership is open to qualified undergraduates and graduates by invitation and occasionally to faculty and alumni.

**Phi Upsilon Omicron—Family and Consumer Sciences**
Members are selected from junior and senior family and consumer sciences students who have demonstrated academic excellence and professional leadership qualities. Membership is a means of furthering professional goals. Outstanding graduate students are also eligible for selection.

**Pi Mu Epsilon—Mathematics**
Pi Mu Epsilon is the national mathematics honorary society whose purpose is the promotion of scholarly activity in mathematics among students and staff. Members are students and faculty who have completed at least two years of college-level mathematics with honor (at least 3.33 GPA) and have maintained an overall GPA of at least 3.0.

**Pi Sigma Alpha—Political Science**
Pi Sigma Alpha is the national honor political science honor society.
Pi Tau Sigma—Mechanical Engineering
Members are juniors and seniors in the upper ranks of their classes in mechanical engineering. Meetings and social functions are held to recognize and encourage outstanding scholastic achievement.

Psi Chi—Psychology
This national honor society in psychology recognizes and honors individuals maintaining high scholarship and documented interest in psychology.

Sigma Delta Pi—Spanish
Honor society for high-achieving students of the Spanish language at Iowa State University.

Sigma Gamma Tau—Aerospace Engineering
Sigma Gamma Tau is the national honorary for aerospace-aeronautical engineering students who have displayed outstanding scholarship, leadership, and personal characteristics. Members are selected from the upper fourth of the junior class and upper third of the senior class who have maintained a 3.00 or better cumulative grade point average.

Sigma Lambda Chi—Construction Engineering
The purpose is the recognition of outstanding students in construction engineering. Upperclass students in construction engineering may be initiated into the society providing they have an overall scholastic average in the upper 20 percent of their class.

Sigma Phi Omega, chapter Alpha Omega—Gerontology
National academic honor and professional society that recognizes excellence in the study of gerontology/aging, and serves as a link between gerontology educators, alumni, and local professionals. The mission of SPO is to promote scholarship, professionalism, friendship, and services to older persons, and to recognize exemplary attainment in gerontology/aging studies and related fields.

Sigma Tau Delta—English
An international English honor society, the purpose of this honorary is to confer distinction upon outstanding students of the English language and literature in undergraduate, graduate, and professional studies.

Sigma Xi—Research
Sigma Xi, the scientific research society, is a broad-based scientific honor society with over 500 chapters and clubs at universities and nonacademic scientific institutions. Sigma Xi awards associate membership to undergraduates and graduate students who have demonstrated research potential through participation in an original scientific research activity. Full membership in Sigma Xi recognizes a significant scientific research contribution.

Tau Beta Pi—Engineering
Tau Beta Pi honors engineering undergraduates, graduate students, and outstanding alumni who have distinguished themselves in scholarship and by exemplary character. Members are selected from engineering juniors in the upper eighth and seniors and graduate students in the upper fifth of their classes.

Upsilon Pi Epsilon—Computer Science
An honor society for computer science students.

Xi Sigma Pi—Forestry
An honor society that recognizes outstanding juniors, seniors, graduate students and faculty members in forestry. The objective is to encourage high professional standards in the profession of forestry and to promote fraternal relationships among foresters.
**Student Services**

**Dean of Students Office**
www.dso.iastate.edu/

Dean of Students: Pamela Anthony, Ph.D.

The Dean of Students Office at Iowa State University supports student-centered learning through personal, community and academic development culminating in a transformative learning experience. The sixteen units that comprise the Dean of Students Office work collaboratively to accomplish this mission by:

- Promoting a campus environment which cultivates a sense of belonging.
- Respecting and incorporating human difference among our students.
- Challenging students to enhance decision-making skills, be independent learners and take responsibility for choices and actions.
- Facilitating students and families in crisis by providing on- and off-campus resources as situations arise.
- Empowering students as leaders to become civically engaged in global community issues.
- Creating opportunities for students to be academically successful through out-of-class experiences and student outreach.
- Collaborating strategically with the campus community and beyond, so that students benefit from a seamless experience.
- Advocating for all students.

The following are units within the Dean of Students Office. For more information see the individual web sites.

**Academic Success Center**
www.dso.iastate.edu/asc

Associate Dean of Students and Director: TBD

Assistant Director: Susan Rhoades, Ph.D.

1060 Hixson-Lied Student Success Center
(515) 294-6624; TTY (515) 294-6635

The Academic Success Center (ASC) encompasses several academic assistance programs. The services available at the ASC include the following: resources for students with disabilities (see Disability Resources); course-specific Tutoring Services and Supplemental Instruction; general assistance through the Learning Lab, individual consultation for those with needs related to study skills/time management; and a one-credit study skills course (Psychology 131). All programs are focused on helping students learn how to learn and achieve their academic goals.

Tutoring Services’ mission is to enhance academic growth and success. Tutoring is the process by which students can get more individualized instruction for undergraduate courses offered at ISU. Staff members recruit and screen tutors, schedule convenient times to meet, collect fees, and pay tutors.

Supplemental Instruction (SI) is a free academic assistance program for difficult selected 100 and 200 level courses. Peer SI leaders who have demonstrated competence in the course attend classes and conduct biweekly sessions to help students learn and study the course material. A complete schedule can be viewed online.

The Learning Lab is a "learning how to learn" center. A service to students, the Learning Lab helps them with tips on how to succeed in the classroom. The Learning Lab is staffed by academic consultants who work with students to pinpoint areas in their study strategies that might need improvement.

Psychology 131, a one-credit study skills course, addresses academic success strategies as well as a variety of reading and study strategies and tactics from time management to test taking. It is offered each semester. Class size is limited to allow for group interaction as well as individual attention.

**Greek Affairs**
www.greek.iastate.edu

Assistant Dean of Students and Director: TBD

Assistant Director: Katy Crain, M.Ed

B035S Memorial Union
(515) 294-1023

Greek Affairs provides advising, consultation, and educational services to the fraternities and sororities at ISU. Professional staff and graduate assistants work with student leaders, members, and chapter advisers to provide support to the chapters and to advise Collegiate Panhellenic Council, Interfraternity Council, National Pan-Hellenic Council, Multicultural Greek Council, Greek Week, Fall/Spring Blood Drives, Order of Omega, Junior Greek Council, and other student organizations and activities affiliated with the Greek Community.

Fraternities and sororities have been active at ISU since 1875. The over 50 fraternities and sororities at ISU have more than 2,000 student members and represent about 11 percent of the undergraduate student population. The Greek Affairs staff and local alumni work with each fraternity and sorority to ensure that the chapter is meeting the educational objectives of the university, their national affiliations and the developmental needs of the students.

**Hixson Opportunity Awards**

www.dso.iastate.edu/hixson

Director: Debra Sanborn, M.A.

1080 Hixson-Lied Student Success Center
(515) 294-6479

The activities and programs offered to Hixson Scholars are designed to promote the retention and success of these students. These programs and resources aim to develop a community of students and friends within the larger Iowa State community. Programs include the Hixson Seminar (University Studies 111), Hixson News (a monthly newsletter), monthly activities, community service, Hixson Mentors, and the Hixson Leadership Seminars (University Studies 311 & 312).

**Judicial Affairs**
www.dso.iastate.edu/ja

Assistant Dean of Students and Director: Michelle Boettcher, M.Ed

Assistant Director: Sara Kellogg, M.S.

Assistant Dean of Students and Director: Assistant Director: Sara Kellogg, M.S.

1010 Student Services Building
(515) 294-1021

The Office of Judicial Affairs is responsible for the university’s Centralized Judicial System. Representatives from the Office of Judicial Affairs interpret university policies and conduct student disciplinary hearings for academic and nonacademic violations of the Iowa State University Student Disciplinary Regulations (http://policy.iastate.edu/policy/SDR). As members of the ISU community, all students have certain rights and responsibilities. When an alleged violation of the Student Disciplinary Regulations occurs, a representative from the Office of Judicial Affairs investigates the complaint, interprets general university regulations and guidelines, conducts student discipline hearings which ensure the standards of due process, and consults with faculty, staff, and students regarding student conduct issues.

Student discipline hearings are conducted in accordance with the rules and regulations as set forth in university policies and procedures. Disciplinary hearings are administered by a member of the Judicial Affairs staff, the All Greek Judicial board, or by members of the All-University Judiciary (AUJ) committee. The Office of Judicial Affairs serves as a resource for anyone with questions regarding a student conduct issue.

**Lesbian, Gay, Bisexual, and Transgender Student Services**
www.dso.iastate.edu/lgbtss

Coordinator: Brad Freihoefer, B.S.

1034 Student Services Building
(515) 294-5433

lgbtss@iastate.edu

Lesbian, Gay, Bisexual, & Transgender Student Services (LGBTSS) is a resource center for all members of the university community to learn more about aspects of sexual identity and gender identity/expression. LGBTSS is committed to providing information and education that enhances the educational experience and overall quality of student life on the ISU campus. LGBTSS strives to increase the awareness of Lesbian, Gay, Bisexual, Transgender, Queer, and Ally (LGBTQA) issues on campus by providing a safe space, as well as informational and educational programming, resources, and support services. Our vision is to promote a welcoming and inclusive campus climate for LGBTQA persons and their allies and to eliminate homophobia, heterosexism, and sexism at Iowa State University.

LGBTSS services and programs include:

- Speaker’s Bureau – Panel discussion presentations where LGBTQA people and allies share their own experiences and present on a vast array of LGBTQA issues.
- Safe Zone Program – Initiative to increase the visibility of allies on our campus. Displaying a safe zone symbol sends an important message of a willingness and commitment to provide an atmosphere of acceptance, understanding, and support to the LGBTQA community at ISU.
- Library – Information center with over 1,000 resources (non-fiction & fiction books, magazines, videos, and magazines) available for confidential checkout.
• Support Groups — Ongoing, confidential, peer-facilitated groups designed to provide a safe, supportive place for talking about important issues.
• Referrals — Contact information available for various campus and community resources for personal, legal, health services.
• Celebration Events — Programs where we recognize the accomplishments of LGBTQ+ campus members. The Small Victories Celebration takes place early in the spring semester and Lavender Graduation is in May.

Margaret Sloss Women’s Center

www.dso.iastate.edu/msw
Interim Director: Chris Fowler, M.S.
Interim Assistant Director: Som Mongtin, M.Ed.
Sloss House
(515) 294-4154

The Margaret Sloss Women’s Center promotes the educational, personal, and career development of all women in the ISU/Ames community. Along with other departments, the Women’s Center shares the university’s responsibility of creating a safe and supportive environment for all individuals. The purpose of the Women’s Center is to promote and sustain women through assistance, programs, and information and referral services.

The Women’s Center provides:
• Assistance and support for women who work toward making change, on both personal and institutional levels.
• A safe space for women to meet, study, eat, network, discuss, find support, watch a video or just relax.
• A clearinghouse of information including a lending library, resource files, a calendar of events, and a variety of videos and audio tapes.
• Educational programming that focuses on helping students, staff, and faculty thrive in an academic environment by motivating them toward a greater understanding of, and involvement with, gender issues. Educational programs presented in residence halls, departments and organizations include workshops on a variety of topics.
• Coordination and co-sponsorship of special events including Women’s Week, National Coming Out Days, Sexual Assault Awareness Month, and Women’s History Month. Throughout the year, the Women’s Center also sponsors a number of speakers on current issues, hosts conferences, and coordinates support and discussion groups.
• A place to gain experience and/or credit as a journalism or design intern, practicum student, student programmer, board member, or volunteer.

Other services include an electronic breast pump, lockers to rent, free condoms, meeting space for campus and community organizations, kitchen facilities, a TV and VCR.

Multicultural Student Affairs (MSA)

www.dso.iastate.edu/msa
Assistant Dean of Students and Director: TBD
2080 Student Services Building
(515) 294-6338

The Multicultural Student Affairs office works to improve the retention of multicultural students with an emphasis on academic success and student leadership development that ultimately leads to graduation from the university. MSA partners with Iowa State University departments and related organizations in an effort to promote continuous improvements that respond to the needs of multicultural students.

Through its learning communities, academic enrichment programs, leadership opportunities, courses, workshops and community activities, MSA connects multicultural students to university and community resources that can assist in their persistence and graduation at Iowa State University. MSA provides specific programs and services that impact the retention of multicultural students and supports multicultural students as they acculturate to the university.

Working with university departments and related organizations, MSA achieves its goals through the following programs:

Academic success for first year multicultural students through early outreach programs
• Academic Program for Excellence (APEX) - an intensive eight week academic excellence summer program for entering first year multicultural students that prepares them for the collegiate environment
• Multicultural Visits- meetings and presentations scheduled with prospective students/families at high schools and community colleges

Retention of multicultural students through academic intervention and social support programs
• Academic support — access to free tutoring, study areas and computer labs
• George Washington Carver (GWC) Scholarship — a four year tuition scholarship awarded to incoming multicultural freshmen directly out of high school. Program also provides academic support, leadership development, cultural activities as well as professional development opportunities.
• Multicultural Vision Program (MVP) Scholar—ship — a four year tuition scholarship awarded to incoming multicultural freshmen directly out of high school. Program also provides academic support, leadership development, cultural activities as well as professional development opportunities.
• MLK Emergency Loan Program - an interest-free 30-day loan that addresses extenuating financial situations that may affect a student’s educational goals.

Development of leadership skills for multicultural students through structured programs
• Black Cultural Center and Multicultural Center — these facilities provide meeting locations for multicultural student organizations, community groups, ISU faculty/staff and targeted multicultural student programming
• Iowa State Conference on Race and Ethnicity (ISCORE) project—provides participants with a better understanding of race and ethnicity in higher education as well as skill development in conducting research and presentations
• Multicultural Student Programming Advisory Council (MSPAC) — serves as a funding source for registered student organizations implementing programs and events that promote cross cultural collaboration at ISU

Success of multicultural students through programs incorporating social transition and academic achievement factors
• Multicultural Family Reception—welcome event for multicultural families and their students to ISU; introduces them to key ISU staff, faculty, and administrators
• Welcome and Transition—welcome event for multicultural students; includes a keynote speaker and sessions focusing on academic success and leadership
• Multicultural Tailgate and Football Game—athletic event that promotes a student’s Cyclone identity by engaging them in the university community
• Spring Speaker Series—events for multicultural students that provides motivational speakers, workshops, and sessions focusing on academic success and leadership
• MSA Recognition Programs—events recognize multicultural students for their academic achievement, campus leadership and graduation from ISU

Parents’ Association (ISUPA)

www.dso.iastate.edu/pa
The Iowa State University Parents' Association (ISUPA) serves all Cyclone families by promoting parent programs and communicating university resources to enhance students' experiences and success at Iowa State. Informational resources and services sponsored by ISUPA are open to all parents and families of students enrolled at Iowa State. ISUPA is an auxiliary organization of the university, affiliated with the Dean of Students Office. ISUPA is governed by a volunteer Board of Directors comprised of parents of current Iowa State students.

ISUPA is funded by contributions and fundraisers, such as the annual discounted Football Ticket program for Cyclone Family Weekend. The ISUPA Board of Directors, along with members of the Dean of Students Office staff, sponsors several programs to help parents and families stay informed:

- Parents’ Advisory Line (PAL): Call 1-800-772-8546 or e-mail parents@iastate.edu for advice on how to help your student succeed or for assistance navigating university resources.
- Info for Parents and Families (http://catalog.iastate.edu/student/services/ www.parents.iastate.edu): This website for parents and families provides a clear house of resources and information, as well as links to various services for Cyclone families.
- Family Handbook: Distributed to all new students during summer orientation, the Family Handbook provides information on academic and student life.
- Relatively Speaking: this e-newsletter for families of ISU students keeps parents and families informed of timely topics and campus resources.
- ISUPA on Facebook: Share pictures and advice with other members of the Cyclone Family.

Through its fundraising efforts, the ISU Parents’ Association is proud to sponsor several programs.

- Scholarships: ISUPA provides funding for several scholarships to help students and families finance the cost of higher education.
- Cyclone Family Weekend: ISUPA is a premier sponsor of the university’s annual event for parents and families
- Involvement in ISU Orientation programs for students and families
- Provide additional funding for professional security services at VEISHEA, ISU’s spring celebration

Parents interested in volunteering on the ISUPA Board of Directors can find the application form at the ISUPA web site.

Recreation Services

www.recservices.iastate.edu
Director: Mike Giles, M.S.
Associate Director: Scott White, M.S.
Associate Director: Garry Greenlee, M.S.

2220 State Gymnasium
(515) 294-4980

Recreation Services strives to provide a holistic and diverse approach to health and wellness that encompasses physical, spiritual, intellectual, environmental, social, and emotional wellness. The department offers high-quality recreational facilities and a wide variety of programs and services to promote a healthy mind and body and enhance the overall quality of the educational experience at Iowa State University.

Recreation Services offers five indoor facilities: Lied Recreation Athletic Center, Beyer Hall, State Gym, Forker Building and the Ames/ISU Ice Arena. The Lied Recreation Athletic Center houses two premier running tracks, multiple basketball, volleyball and racquetball courts, top-of-the-line exercise and weight training equipment, and a climbing wall. Beyer Hall has basketball, volleyball, racquetball and squash courts, and features an indoor pool used for recreational swimming, competitive events and special activities, including scuba diving and kayaking. The State Gym renovation and expansion project, scheduled for completion fall 2011, provides approximately 100,000 square feet of new recreational space on the west side of campus. The addition offers three full size basketball/volleyball courts, a running track, an indoor pool, and weight and cardio equipment. Outdoor space of over 100 acres includes an 18-hole disc golf course, tennis and sand volleyball courts, an inline hockey rink, softball, flag football, and soccer fields to provide the perfect environment for friendly competition.

Participate in one of the largest intramural sports programs in the nation. With more than 40 different programs designed for individual, dual, team and co-ed competition, the Intramural program has something for everyone! Some of our unique and popular programs include broomball, curling, flag football, dodge ball, euche, volleyball and badminton. Participate for the opportunity to win one of the most coveted items on campus - an Intramural Champion T-shirt!

If you are looking for a higher level of competition, there are over 50 Sport Clubs designed to meet individual interests in a variety of sports such as rugby, soccer, water-ski, lacrosse, ultimate Frisbee, ice hockey, ski and snowboard, martial arts, kayaking, crew, mountaineering, weight lifting, and boxing. The clubs participate in regional and national tournaments, and many have coaches who supervise organized practices.

Striving to improve health and fitness, our fitness program offers activities rich in variety and intensity levels. Certified instructors teach innovative, fun and safe fitness classes, including cardio workouts, kickboxing, cycling, sculpting, Pilates and yoga classes, along with deep and shallow aqua fitness workouts. Personal training sessions can be purchased to provide one-on-one training to enhance individual wellness. To stay interested and involved in a regular exercise, sign up for the Rec Miler program. The program allows you to earn "rec miles" for exercise and healthy habits and earn a variety of progress awards along the way!

Travel, attend a workshop, rent equipment, or climb the wall! Choose your landscape as you participate in one-day, weekend or extended trips throughout Iowa and the nation. Trips cover a broad range of activities and locations such as canoeing in Iowa, sea kayaking in Alaska, snowboarding and skiing in Colorado, mountain biking, whitewater rafting, hiking and climbing in Utah and surfing in California. Instructional workshops are also offered on various outdoor recreational skills. Rent equipment for camping, canoeing, skiing, backpacking, mountain biking, kayaking and many other activities. Also available to students is a 1,400 square foot climbing and bouldering wall at the Lied Recreation Athletic Center.

Part-time jobs in Recreation Services offer students flexible hours, valuable skills and work experience and competitive hourly wages. Over five hundred students are employed as building supervisors, lifeguards, office assistants, trip leaders, climbing wall supervisors, fitness instructors, personal trainers and intramural officials. Sixty percent of Recreation Services student fees are returned to students each year in the form of wages. Undergraduate and graduate students desiring to work in this healthy and enjoyable environment should visit our website for more information and application forms.

Student Assistance and Outreach

www.dso.iastate.edu/sa
Assistant Dean of Students and Director: Keith Robinder, Ph.D.
Assistant Director: Kipp Van Dyke, M.S.
1010 Student Services Building
(515) 294-1020

Student Assistance and Outreach staff members provide guidance for students who are dealing with issues that affect their personal, academic, and family lives. They help students understand university policies and navigate processes and procedures on campus in order to enhance their academic experience at ISU.

Consultation and assistance is provided with concern for each student’s personal well being and educational objectives. Student Assistance and Outreach staff members coordinate the notification of faculty members for students who miss classes due to emergencies. They also advise students who wish to file formal academic grievances. Student Assistance and Outreach staff members work closely with ISU faculty and staff to identify the best possible options for ISU students who are seeking to help themselves. Personalized referrals to other University resources and services are used to provide proactive and comprehensive assistance to students.

Student Disability Resources (SDR)

www.dso.iastate.edu/dr
Director: Steve Moats, M.A.
Assistant Director: John Hirshman, M.A., Ed.S
1076 Student Services Building
(515) 294-7220; TTY (515) 294-6635

Staff members in the Student Disability Resources office coordinate support services that students may need in order to reach their fullest academic potential. SDR staff members coordinate accommodations and serve as a resource within the university community concerning students who have qualifying disabilities. SDR provides assistance, information, support, counseling, education, referral, and promotes disability awareness in students, faculty, staff, the Ames community, and the state of Iowa.

Student Legal Services

www.dso.iastate.edu/sls
Student Legal Adviser: Paul Johnson, J.D.
Student Legal Adviser: Michael Levine, J.D.
B0367 Memorial Union
(515) 294-0978
Funded entirely by the Government of the Student Body, Student Legal Services (SLS) is a legal aid office for students currently enrolled at Iowa State University and registered Iowa State University student groups. It is staffed by two attorneys who advise and often represent students in a variety of cases and are available for consultation with respect to most legal concerns.

The types of cases most often handled include:

• Family Law and Divorce
• Criminal Law
• Landlord - Tenant Problems
• Off-campus Employment Problems
• Consumer Issues
• Administrative Issues
• Notary Services

The services of SLS are available to students and registered Iowa State University student groups free of charge. Students must pay their own court costs and any out of pocket expenses.

SLS cannot represent students in fee generating cases, controversies involving student vs. student or student vs. ISU, ISU student judicial matters and generally does not handle felony defense or cases involving excessive time. However, consultation with an attorney regarding these matters is available.

Student Support Services Program

www.dso.iastate.edu/sssp
Director: Japannah Kellogg, M.S.
2010 Student Services Building
(515) 294-0210

Student Support Services Program (SSSP), a federally funded program, provides academic support to eligible students and is designed to increase the retention and graduation rates of low-income individuals who are first-generation college students or individuals with disabilities. The needs of the students who are accepted into SSSP are thoroughly assessed through testing and counseling. SSSP participants receive personal and career counseling, along with academic advice, tutoring, and assistance in receiving financial aid.

Participants in SSSP are encouraged to work with an SSSP student mentor to become acclimated to the ISU environment. These relationships also encourage participants to fully access ISU resources. Study skills improvement sessions and basic skills instruction are provided in the areas of math and writing. In addition, cultural enrichment (i.e. theatre, dance, and musical events) and educational activities (leadership conferences, graduate/professional, etc.) are planned. These services are provided free of charge to eligible students after they are accepted into the program.

Vocational Rehabilitation

www.dso.iastate.edu/vr
Counselor: Lynette Plander
1045 Student Services Building
(515) 294-5059

The State of Iowa Division of Vocational Rehabilitation Services Office provides services to students who based on medical documentation, have a disability and it is a substantial impediment to employment. Rehabilitation services may include the following: medical assessment; vocational evaluation; counseling and guidance; special adaptive equipment or devices; financial assistance toward training; and job placement assistance. No direct fees are charged, but there may be some costs through involvement with services.

Writing & Media Center

www.dso.iastate.edu/wmc
Director: Rachel Azima, Ph.D.
300 Carver Hall
(515) 294-5411

The Writing & Media Center helps students become stronger, more confident writers and communicators. The WMC offers tailored, one-on-one conferences for undergraduate students working on any form of written, oral, visual, or electronic communication. Students are welcome to bring work from any discipline at any stage of the process, from brainstorming to polishing a final draft. The WMC does not "fix" or proofread papers; rather, trained undergraduate peer tutors help students learn how to proofread, evaluate, and improve the effectiveness of their own work, whether it is a website, oral presentation, essay, or lab report.

Students can walk in to the WMC or sign up for 30- or 50-minute appointments in person, via phone, or online via the WMC’s website. WMC services are free.

Thielen Student Health Center

Director: Michelle Hendrickson

The mission of the Thielen Student Health Center is to promote the health of the university community by providing high quality, accessible, affordable and accountable health care that encompasses prevention, wellness and education. Thielen Student Health Center supports the academic success of Iowa State University students while building healthy habits for a lifetime.

The health center is located on the corner of Sheldon Avenue and Union Drive, just west of Beyer Hall. Clinical Services include illness and injury care, women’s health, physical exams, allergy and travel care, immunizations, mental health care, laboratory and x-ray services, physical therapy, immunizations, pharmacy, and health care referrals. Prevention Services provides campus leadership to help reduce the negative impacts of high risk alcohol use, sexual misconduct and other health issues of importance to the college population.

All students enrolled in five or more credit hours pay the mandatory health fee each semester. The health center receives no funding from the state of Iowa and relies on the health fee for approximately 50% of its operating budget. Please note that the health fee is not health insurance. All students are encouraged to maintain adequate health insurance coverage while enrolled at Iowa State University. The health center will bill your health insurance for charges that apply from your visit if you have provided us with that information. Those taking 4 or fewer credits may still access services by paying the health fee. Spouses/domestic partners of students who opt to pay the health fee also have access to services. International students are required to pay the health fee.

Clinic hours:
Monday, 8 a.m.-6 p.m.; Tuesday, Thursday and Friday, 8 a.m.-5 p.m.; Wednesday, 9 a.m.-5 p.m.; Saturday, 9 a.m.-12 noon.

Hours vary during breaks and summer session. The Thielen Student Health Center is closed during all University Holidays. Patients are seen by appointment. Please call 515-294-5801. Each patient has the option of seeing the provider he/she requests.

Providers: Robin Engstrom, M.D.; Rebecca Fritzsche, M.D.; Malhar Gore, M.D.; Scott Meyer, M.D.; Pauline Miller, M.D.; Robert Nathanson, D.O.; Carver Nebbe, M.D.; Maria Pringle, ARNP; Mary S. Raman, ARNP; Cosette Scallion, M.D.; Marc Shulman, M.D.; Lee Wilkins, M.D.

After hour service is available for urgent or emergency problems at McFarland Urgent Care Clinic or Mary Greeley Medical Center Emergency Room. The cost is the responsibility of the student and/or the student’s insurance plan. The clinic’s after hour phone message includes the option of connecting to a nurse help line called First Nurse. First Nurse provides assistance with urgent health questions, including whether or not it is advisable to seek care through the emergency room.

Student Counseling Service

Assistant Vice President and Director of Counseling: Terry W. Mason, Ph.D.

The Student Counseling Service (SCS) assists students in enhancing their academic success and personal well-being with a staff of professional psychologists and counselors. Services are available to help students sort through their feelings, strengths, and options to develop new perspectives and coping skills.

Services include:

• One-on-one counseling for any issue of personal concern, such as depression, anxiety, stress management, relationship issues, identity issues, and other forms of personal challenge. Students may also receive therapeutic services to deal with more severe mental health issues.
• Couples counseling for ISU students and their partners during times of relationship difficulty.
• Eating disorders assessment and treatment for students concerned with eating or body image issues. Students receiving treatment for eating disorders might also work with physicians, nutritionists, and personal trainers as their needs require.
• Substance abuse assessments to help students determine the nature and extent of their alcohol or other drug use and the impact of this use on their well being. Counselors offer recommendations and referrals for any concerns identified through the assessment.
• Career counseling to assist students having difficulty choosing a major or making decisions about their future after college.
• Group counseling is offered to facilitate personal growth and social skills learning. A list of the current semester's groups is available on the SCS web site.
• A variety of outreach programs are also available.
Counseling services are offered at no cost to ISU students. However, a nominal fee for testing may be required. Nominal fees are also charged for uncanceled missed appointments. Counseling is strictly confidential. SCS staff will not release any information to anyone outside of the Student Counseling Service without the written permission of the client unless an imminent harm condition exists.

In addition to providing counseling and outreach services to students, SCS provides training and consultation to faculty and staff to assist them in addressing the psychological needs of students.

SCS hours are Monday through Friday 8 a.m. - 5 p.m. The Student Counseling Service phone number is 515-294-5056.

The University Library

http://www.lib.iastate.edu/info/6000

Dean of the Library: Olivia M. A. Madson, M.L.A.
General Information—(515)-294-3642
Library Hours—(515)-294-4849

The University Library provides extensive research collections, services and information literacy instruction/information for all students. Facilities consist of the main Parks Library, the e-Library, the Veterinary Medical Library, two subject-oriented reading rooms (design and mathematics), and a remote library storage building.

The library’s extensive collections include electronic and print resources that support research and study for all undergraduate and graduate programs. Nationally recognized collections support the basic and applied fields of biological and physical sciences. Library holdings include more than 2,937,529 volumes and approximately 100,528 current serial titles.

The Parks Library includes four public service desks: the Help and Information Desk (H&I), the Circulation Desk, the Media Center (including Maps, Media, Microforms, and Course Reserve collections), and Special Collections. The library’s instruction program includes a required undergraduate information literacy course as well as a wide variety of subject-based seminars on effective use of library resources for undergraduate and graduate students.

The e-Library, accessed through the Internet, provides access to local and Web-based resources including electronic journals and books, local collections, online indexes, electronic course reserves and guides, and a broad range of subject research guides. Assistance in using this vast body of electronic resources is available at the H&I Desk in the Learning Connections Center, on the e-Library through the Ask Us! link, and through individually arranged appointments with subject librarians.

The Parks Library has a limited number of semiprivate study rooms available for faculty, graduate students, and professional and scientific staff. They are intended for research and other scholarly activities that require extensive use of library material. Normally, assignments are made for one year at a time.

Student Answer Center

http://www.registrar.iastate.edu/AnswerCenter/

Students who have questions but are not sure where to find an answer may contact the Student Answer Center located on the ground floor of Beardshear Hall. A staff member will answer campus-related questions on the spot or provide referrals to other university departments as needed. Information may include registration instruction, financial aid status, or classroom directions. Students can pick up forms, information brochures, campus maps, or use one of the computers to log on to AccessPlus or e-mail. Questions can be answered by email at answercenter@iastate.edu or by phone 515-294-4469.

Career Services Offices

Agriculture and Life Sciences: 141 Curtiss Hall
Business: 1320 Gerdin Business Building
Design: 297 College of Design
Engineering: 308 Marston Hall
Graduate Business: 1360 Gerdin Business Building
Human Sciences: 131 MacKay Hall
Liberal Arts and Sciences: 202 Catt Hall
Veterinary Medicine: 2270A Veterinary Medicine Complex

Career Services is a coordinated network of career services offices offering a broad range of programs and services for undergraduate, professional, and graduate students, faculty, staff, alumni, and employers. These services include career exploration, career development, experiential learning, and professional career search assistance programs. The goal is to provide constituents with life-long skills to assist with career development and exploration.

Programs and services are offered including online registration, position listing and interview scheduling; résumé referral; coordination of co-op and internship programs; workshops and seminars on career exploration, résumé preparation, letter writing, job search techniques, interview skills, applying to graduate and professional schools, and adjusting to the first job.

Each year career services sponsors multiple career fairs, which bring to the ISU campus hundreds of employers. The career services offices also coordinate on-campus interview opportunities. Each college career services office serves as a point of entry for students, alumni, and employers to the entire ISU network of coordinated, decentralized career services.

In addition to the college-based career services offices, the Career Exploration Service provides a variety of services to students who are unsure about their major or future career path. Students can work one-on-one with a trained career counselor, use the many books and electronic resources in the Career Exploration Center, or enroll in LAS 104, Personal Career Choice. All services are free for students and confidential.

Additional information on career services is available at www.career.iastate.edu.

Child Care

Child Care Administration, a unit of Human Resource Services, supports Iowa State University families by linking them with programs and services that can help meet their child care needs. The university child care coordinator is available to assist families in accessing services available both on the campus and in the community.

Child care programs located on campus include:

- Center for Child Care Resources: Assistance in locating campus and community child care services, 100 University Village, Suite 1010, 515-294-8833 or 1-800-437-8599
- University Community Childcare, Family Resource Center, 100 University Village, 515-294-9838
- The Comfort Zone: Childcare for kids who don’t feel so good, 100 University Village, 515-294-3333.
- Flex-Care: Part time care for children of ISU students, 100 University Village, 515-294-9838.
- University Child Care Center at Veterinary Medicine, 1700 Christensen Drive, 515-294-2273.
- ISU Child Development Laboratory School, Palmer HDFS Building, 515-294-3040.

For more information about child care options, contact the university child care coordinator at 515-294-8827.

International Students and Scholars

www.isso.iastate.edu
Director: James Dorsett

The International Students and Scholars Office (ISSO) provides a welcoming and supportive environment for international students and scholars, Iowa State University, and the Ames community. ISSO staff members orient and advise international students and scholars on university procedures, community resources, U.S. immigration regulations, and nonacademic personal concerns. ISSO intercultural programs, such as the Culture Corps, Friendships International, and activities developed with the International Student Council and dozens of international student organizations, bring international students and Americans together for mutual learning. We welcome volunteers to join these and other programs to help us maximize the international experience of students and scholars to the successful completion of their academic objectives and enhance their personal growth.

Veterans Center

Jathan A. Chicoin
Veterans Services Coordinator
3578 Memorial Union
Phone: 515-294-9801
Email: jathan@iastate.edu

The Iowa State University Veterans Center provides a comfortable space for veterans and military personnel to connect and find support for issues related to enrolling at Iowa State University, and also assists with finding resources to help these individuals with adjusting to life as a student. In addition, the center provides...
assistance to faculty or staff with questions about military protocol. For example, when a veteran deploys, the Veterans Center can provide resources to help explain the process so that faculty and staff can meet the unique needs of students who may have obligations of military service.

Students receiving military educational benefits must work with a Veterans Administration certifying official in the Office of the Registrar in order to be certified for educational benefits. The Veterans Center is not directly involved in the certification process, but works closely as a team with V.A. certifying officials in order to provide the best support possible to veterans and their families attending ISU.
Tuition, Fees and Expenses

For the most current and complete information see [http://www.registrar.iastate.edu/fees/](http://www.registrar.iastate.edu/fees/)

All tuition, fees, expenses, and policies listed in this publication are effective summer session 2013 and are subject to change without notice by Iowa State University and the Board of Regents, State of Iowa.

Tuition and fees are based on credit load at 5:00 p.m. on the 10th day of class, which is the last day for adjustments downward in tuition and fee assessment.

**Tuition**

Enrollment is not complete until fees are paid. Tuition is charged based upon the number of credits in which a student is enrolled. Maximum charges start at 12 credits for undergraduate and veterinary medicine students. Maximum charges start at 9 credits for graduate students.

Students who are not residents of Iowa pay a higher tuition rate each semester. Nondegree undergraduate students and noncollegiate students pay the same fees as undergraduates. Tuition and fees are assessed in accordance with regulations of the Board of Regents, State of Iowa. Information about these regulations are found in this catalog under Admissions and Registrar.

**Fees**

Following are the descriptions of several commonly assessed fees for Iowa State University students. The list is not inclusive. All fees are subject to change without notice.

- **Account Review Fee (per credit hour):** This fee will be assessed to those students who request account research for prior semester periods. The $10 per hour fee (with a minimum of $10) helps defray the costs of personnel time taken to perform the research, which involves gathering information from various sources when the request is made for a prior semester.

- **Activity, Services, Building and Recreation:** The activity, services & building fee is a mandatory fee that supports a variety of activities and services for all students. It is not based on whether or not a student uses an individual activity or service. This fee provides several benefits such as student admission rates to concerts and athletic events and, unlimited use of CyRide, the Ames bus system. In addition, the fee provides support for campus recreation facilities, the Memorial Union, and campus organizations and services as allocated by the Government of the Student Body. All students will be charged a minimum of $317.80 each fall and spring semester, and $159.50 per summer semester. The activity, services, building and recreation fee includes assessments of the following amounts for each fall and spring semester.

<table>
<thead>
<tr>
<th>Fee Category</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student Activities</td>
<td>35.35</td>
</tr>
<tr>

</tr>
<tr>
<td>Building</td>
<td>27.55</td>
</tr>
<tr>
<td>Recreation</td>
<td>160.80</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>317.80</strong></td>
</tr>
</tbody>
</table>

Exemptions are granted for students exclusively registered for the following: distance education courses (sections beginning with X); courses for which no tuition is assessed; continuous registration status courses, and high school students enrolled under the Post-Secondary Enrollment Options Act. Students in exemption categories named above may elect to pay this fee and will be assessed based upon their enrollment status.

For students who withdraw or change to an exempt status as defined above, the tuition adjustment schedule will also be used for the activity fee.

- **Additional Billing Statement:** A student can authorize the ISU Accounts Receivable Office to mail a billing statement to another individual. The cost of the Additional Billing Fee to mail a monthly paper statement is $8 per semester. This remains in effect as long as the student is enrolled or until discontinued by the student.

- **Application Fees (non-refundable):**
  - **Undergraduate Domestic Student and Non-Degree Student** - This $40 application fee is charged to individuals in the undergraduate domestic student and non-degree student categories applying for admission to Iowa State University. This fee is charged to cover administrative costs such as IT costs, personnel, and postage.
  - **Undergraduate International Student** - This $50 application fee is charged to non-immigrants applying for undergraduate admission to Iowa State University. This fee is charged to cover administrative costs such as IT costs, personnel, and postage. These individuals are charged a higher rate because of the additional costs associated with the evaluation of foreign academic records, the need to maintain certain resource materials and immigration forms, and increased postage for overseas mailings.
  - **Graduate Domestic Student** - This $60 application fee is charged to individuals in the graduate domestic student category applying for admission to Iowa State University. This fee is charged to cover administrative costs such as IT costs, personnel, and postage.
  - **Graduate International Student** - This $100 application fee is charged to non-immigrants applying for graduate admission to Iowa State University. This fee is charged to cover administrative costs such as IT costs, personnel, and postage. These individuals are charged a higher rate because of additional costs associated with the evaluation of foreign academic records, the need to maintain certain resource materials and immigration forms, and increased postage for overseas mailings.
  - **Veterinary Medicine Student** - This $75 application fee is charged to individuals applying for admission to the Veterinary Medicine College at Iowa State University for their first degree-seeking enrollment.
  - **Applied Music Fees (range of $100 - $290):** The music fee is charged to students receiving private music instruction and is in addition to regular tuition. The fee offsets the costs of one-on-one instruction. Revenue generated from this fee is returned to students through music scholarships.
  - **Diploma Replacement Fee:** This $25 fee is charged to individuals who have lost their diploma and have requested a replacement. The charge covers the cost of printing the diploma, personnel to process the order, postage, and other administrative costs.
  - **Departmental Exam for Credit Fee (per exam):** This fee helps defray the costs of creating or purchasing, administering, and scoring special examinations to determine whether students may receive test-out credit for a course in which they are not formally enrolled.
  - **Continuing Education (per credit hour):** A special tuition rate is assessed to students participating in these programs. The undergraduate assessment is $278 per credit and the graduate rate is $436 per credit. Summer camp programs entitled to the special rate are Anthropology and Geology. Students will be charged other fees in addition to tuition for enrolling in these programs. To obtain total fee information, students should contact the director of the individual program.
  - **Delivery:** Some distance education courses charge a delivery fee to offset additional expenses incurred in offering a course at a distance. Applicable delivery fees are listed with the specific course in the Schedule of Classes available at [http://classes.iastate.edu](http://classes.iastate.edu). Delivery fees also appear on each student’s schedule detail available on AccessPlus.
  - **Career Services:** The career services fees vary among college-based career services offices ranging from $50 - $25 per student.
  - **Departmental Fee:** This $100 fee partially covers the expenses of creating or purchasing, administering, and scoring special examinations to determine whether students may receive test-out credit for a course in which they are not formally enrolled.
  - **Developmental:** A developmental course fee is charged in addition to the tuition charged for other courses on the student’s schedule. For example: A student taking 12 credits plus a developmental course will pay full-time tuition for the 12 credits, plus the developmental course fee(s). Developmental course fees range from $160 - $530. These fees are intended to cover the direct costs of offering these developmental courses. Developmental course fees are listed with the specific course in the Schedule of Classes available at [http://classes.iastate.edu](http://classes.iastate.edu).

- **Diploma Replacement Fee:** This $25 fee is charged to individuals who have lost their diploma and have requested a replacement. The charge covers the cost of printing the diploma, personnel to process the order, postage, and other administrative costs.

- **Doctoral Post Comprehensive or Prelim:** Doctoral students who have passed the Ph.D. preliminary examination must register and pay appropriate fees. Students who are not on assistantship, and do not use the facilities, equipment, or staff time may pay this minimum fee of $70 in lieu of registration for credit. By so registering, they certify their continuing intention to complete their degree program.

- **FAX Fee (for sending official documents):** A $7 FAX fee is charged for sending official documents, such as transcripts, certifications, and statement of account, using FAX technology. The fee covers the phone charges and personnel costs associated with preparing and sending the document.

- **Graduate College Fees - Copyright Fees – Doctoral Dissertation and Master’s Thesis (Optional):** PhD and Master’s candidates may pay an optional fee of $55 for copyright services offered through ProQuest/UMI. The copyright fee covers the U.S.
Copyright fee as well as the costs to ProQuest of the copies required by the Copyright Office. The student will authorize this on-line with a credit card when submitting the electronic thesis.

Graduate College Fees - Open Access Publication Fees (Optional): Graduate students may choose Open Access Publishing PLUS from ProQuest, which ensures the widest possible exposure of the scholarship in the author’s thesis or dissertation. There is a fee of $95 for this optional service. The student authorizes this charge on line with a credit card when the electronic thesis or dissertation is submitted.

Alternatively, ProQuest offers Traditional Publishing, for which no fee is charged.

Graduation and Degree Application Fee: This $75 fee is assessed to students when they submit an application for graduation. This fee partially covers costs associated with degree audits, senior degree evaluation, and the commencement ceremony. Additional costs include IT costs, personnel, postage/mailing of diplomas, and various supplies such as diploma paper, diploma covers, and honor cords. This fee also supports commencement ceremonies (including honorariums, faculty costs, personnel, and the commencement program), and the University’s degree audit system, which provides both students and their advisers comprehensive, timely, and frequent information about progress towards degree. This fee is non-refundable.

Late Fee for Applying After Deadline (Graduate College students only) - A late fee of $20 will be assessed to Graduate College students applying for graduation after the graduation application deadline for a specific semester.

Health Facility: All students are charged an $8 Health Facility Fee each semester except for students exclusively registered for the following: distance education courses (courses with sections beginning with X); courses for which no tuition is assessed; continuous registration status courses; and high school students enrolled under the Postsecondary Enrollment Options Act. These exceptions do not apply to international students (except where noted) or graduate students on graduate assistantships. For students who withdraw or change to an exempt status as defined above, the refund schedule for tuition will be used for the health facility fee.

Students who carry the ISU sponsored student health insurance must also be assessed the health facility fee.

Health (Student Health): A $98 student health fee, which partially finances the services of the Thielten Student Health Center, is charged to all students each semester. This fee is not assessed to students enrolled for four or fewer credits or students exclusively registered for the following: distance education courses (courses with sections beginning with X); courses for which no tuition is assessed; continuous registration status courses; Lakeside Laboratory courses; and high school students enrolled under the Postsecondary Enrollment Options Act. (These exemptions do not apply to international students (except where noted) or graduate students on graduate assistantships.) Students who are exempt from the mandatory health fee may use the services of the Thielten Student Health Center on a fee for service basis, or may elect to pay the $98 Health Fee and $8 Health Facility Fee, which allows participants to receive services at the Thielten Student Health Center for the same rate as students who pay the mandatory health fees. Spouses/domestic partners of students who wish to use the Thielten Student Health Center must pay the $98 Health Fee and $8 Health Facility Fee.

Students who withdraw or change to an exempt status as defined above will receive a credit adjustment of 100 percent through the 10th day of classes, with no credit adjustment after the 10th day of classes. Students who add courses at any time during the semester will be assessed the student health fee if applicable according to the guidelines stated above. Students who carry the ISU sponsored student health insurance must also be assessed the student health fee. If spouse or domestic partner is covered under the insurance plan, the spouse (domestic partner) must also be covered under the Health Fee and Health Facility Fee.

Health Insurance: All international students and their accompanying dependents must enroll in the ISU Student and Scholar Health Insurance Program. ISU requires nonimmigrant international students and their dependents to purchase and maintain coverage through the ISU health insurance plan for the duration of their tenure at the university. Insurance plans purchased outside the university may be used for supplemental coverage, but cannot be substituted for the ISU plan. Students not assessed the mandatory Student Health Fee and spouses of students should contact the Student Health Insurance Office at 515-294-4820 for more information.

Identification Card (ISUCard) Replacement Fee: All students receive their first identification card free of charge. Those cardholders who have lost or misplaced their identification cards are assessed a $25 fee to cover the cost of replacement which includes the cost of materials, processing, and personnel associated with the replacement process.

Lakeside Lab: Iowa Lakeside Laboratory is a field station of Iowa’s state universities that provides summer classes and research opportunities for students. The mission of Lakeside Lab is twofold: 1) to provide science classes and research opportunities for university students and 2) to offer public programs and provide services through the state universities. Lakeside Lab offers students a unique educational experience through small full-immersion, field-oriented courses. This fee ($278 undergraduate; $436 graduate) helps to cover program costs. More information can be found at Iowa Lakeside Laboratory (http://catalog.iastate.edu/interdisciplinaryprograms/iowalakesidelaboratory).

Late Payment of Fees or Charges: The finance charge is a penalty charged to discourage late payment of bills, as well as to make up for the university’s lost opportunity for investment income. The up to 1% per month finance charge also helps defray the costs of extra IT costs, handling, and mailing involved with the record keeping and collection of charges over a longer period of time. This fee is assessed to students and non-students.

Late Registration: This fee is assessed to students who do not register for classes before the first day of class. This fee is an administrative charge to encourage students to register for classes in a timely manner so as to provide enrollment management data to administrative areas who can make decisions on how to best utilize university resources. The stepped up fee for graduate students is necessary because ISU provides tuition scholarships for students on assistantship appointments. Students who do not register by the end of the second week may create significant payroll, fee assessment, and scholarship problems that will take excess staff time to resolve.

Undergraduate Students - $20
Graduate Students, Day 1-5 - $30
Graduate Students, Day 6-10 - $60
Graduate Students, Day 11 onward - $100

New Student Programs/Matriculation Fees: The New Student Programs/ Matriculation fee of $195 will be assessed to all new degree seeking undergraduates. The fee covers costs associated with orientation and Destination Iowa State programming, including math assessment, publications, mailings, programming, and student assistants who provide services to students and their families during orientation and Destination Iowa State. For those students entering in the fall semester, the New Student Programs/Matriculation fee is refundable prior to May 1 (minus a $25 administrative charge).

Administrative Fee: This $25 fee is the nonrefundable portion of the New Student Programs/Matriculation Fee, and is assessed to defray administrative costs if the student chooses not to enroll prior to May 1 for fall and summer semesters and November 1 for spring semester.

Reissue Check Fee/Returned Check/Debit Fee
Reissue Check Fee: This fee will be assessed to those individuals who request the issuance of a duplicate check. This $30 charge helps defray the personnel time involved in researching the check, the cost of printing a new check, as well as the bank costs.

Returned Check - This $30 fee is a surcharge against the maker of a dishonored check. According to Section 554.3512, subsection 1, Code 2003 of the State of Iowa, a fee of $30 may be assessed against the maker of a dishonored payment instrument.

Debit Fee: This $30 fee is a surcharge against the person who authorizes a direct debit to an account that has been closed or has insufficient funds. According to Section 554.3512, subsection 1, Code 2003 of the State of Iowa, a fee of $30 may be assessed against the maker of a dishonored payment instrument.

Required Enrollment Fee - Graduate Students: Graduate students, who are in their graduate term and have no coursework left, are assessed a fee of $870. Students are charged this miscellaneous fee rather than tuition because there is no coursework involved. Graduate students on assistantship and international students, who must register and/or pay university fees to maintain their visa, are not eligible for this fee.

Schedule Change Fee (Drop/Add/Change - day six of classes and later): Students may drop or add a course through the fifth day of classes at no charge. On day six of classes and later, an administrative fee of $12 is charged for each form processed to partially cover the processing and personnel costs. This fee also encourages students to process course changes early in the term so other students may utilize course spaces.

Senior Fee (optional): This is a $3 optional fee for graduating seniors. The funds generated by the fee go to the Senior Class Council that sponsors a variety of activities for seniors. Events include the Senior Send-off, spring and fall
Veterinary Medicine who have accepted an offer for a position to enroll in that college

Special Course: Some courses have expenses above the cost of tuition that enhance the instruction. These fees may cover the cost of field trips, use of equipment, materials or supplies, or professional support. Applicable special course fees are listed with the specific course in the Schedule of Classes available at http://classes.iastate.edu/. Special course fees also appear on each student’s schedule detail available on AccessPlus.

Sponsored International Student Fee: The sponsored international student fee (5% of fees) is assessed to students participating in a group study abroad program. This fee is in addition to the program fee they must pay. It covers various administrative costs associated with these programs, such as registration and special processing, which creates additional workload.

Study Abroad Fees - Administrative Fee: This $105 fee is assessed to students participating in a group study abroad program. This fee is in addition to the program fee they must pay. It covers various administrative costs associated with these programs, such as registration and special processing, which creates additional workload.

Study Abroad Fees - Tuition: Assessment for study abroad credits up to a maximum of 12 credits is above and beyond tuition for other courses taken during the same term.

Study Abroad Fees - Program Fee – Fall Semester, Spring Semester and Summer Session: This study abroad program fee of $600 (fall and spring semesters) or $350 (summer session) will be used to partially finance the cost of administering university-wide study abroad programs. The fee will also be used for promotional efforts to increase campus awareness of these opportunities and to assist in the development of new programs. Finally, the fee will be used to assist in the cost of site visits and be of great value in the evaluation of programs and in advising Iowa State University students interested in these programs.

Summer Session: Tuition assessment is based on per credit as indicated in the fee schedule.

Technology: All students will be charged a technology fee each semester.

Full-time graduate and undergraduate students enrolled in the College of Engineering (including Systems Engineering, Agricultural Systems Technology, and Industrial Technology) are charged $223 per semester.

Full-time graduate and undergraduate students majoring in Computer Science are charged $223 per semester.

Full-time undergraduate students enrolled in the College of Business are charged $135 per semester, while full-time graduate students are charged $112 per semester.

All other full-time undergraduate students are charged the standard technology fee of $115 per semester. Full-time graduate students are charged a $92 per semester technology fee.

Students enrolled less than full-time are assessed prorated technology fees according to the number of credits for which they are enrolled.

High school students enrolled under the Postsecondary Enrollment Options Act; or students enrolled exclusively in courses for which no tuition is assessed are not assessed a technology fee.

For students who withdraw, technology fee adjustments will be made according to the tuition adjustment schedule. Adjustments for a reduction in credits below a full time load is 100 percent through the 10th day of classes, with no refunds after the 10th day of classes. Students who change their major will be charged the full technology fee for the major into which they transfer if the change occurs before the 10th day of classes. If the change occurs after the 10th day of classes, then no change in the technology fee assessment will occur.

Thesis Fee - Masters/Doctorate: This $145 nonrefundable fee is charged to any student who submits a master’s degree thesis or doctoral dissertation to the Graduate College. This fee helps defray costs associated with providing part-time support for the thesis office, electronic thesis administration, and the salary of the thesis reviewer.

Transcript Fee:
First and Additional Copies - This $16 fee is charged to anyone ordering a transcript. The fee covers IT costs, forms, mailing, and personnel costs.
Special Handling Charge (early transcript; partial transcript) - An additional $5 special handling charge will be assessed for same day transcript service or other requests that require immediate or special handling.
Veterinary Medicine Advance Payment: Student applicants to the College of Veterinary Medicine who have accepted an offer for a position to enroll in that college may subsequently change their mind and withdraw sometimes as late as the first day of classes. These non-refundable payments can result in unfilled spaces, or the need to ask an alternate candidate to make a hasty move to Ames with little time to make arrangements for financial aid, housing, or books. To reduce the incidence of late withdrawals, admitted students are assessed a non-refundable payment toward tuition of $500.

Veterinary Medicine Career Services Fee (one time): Veterinary Medicine students are charged a $15 senior career services fee to help support the development and maintenance of an on-line job board for DVM students. Funds are used to help defray staffing, maintenance, data entry, archiving and other costs associated with offering this service.

Veterinary Medicine Mobile Computing Fee: This $2,550 fee is charged to all entering first year veterinary medicine students to support the college’s mobile computing initiative. The fee covers tablet PC and required software. This initiative ensures that students 1) have the most effective and efficient learning experience possible and 2) enter the workforce prepared to use current technologies continuing education and professional practice.

Workshops: The fee for one-credit workshops, with no other course enrollments, is $278 for undergraduate students and $431 for graduate students.

Fee Payment
The Accounts Receivable Office bills students for tuition, room, meal plan, and various other university charges. A statement of new charges is available on the first of each month on Access Plus and each student will receive an email message at that time that their Iowa State e-mail address telling them that their bill is available. It is the student’s responsibility to ensure that the university has a correct e-mail address and to regularly check their Iowa State e-mail account. Students who do not receive a billing statement before the term begins or are unable to use AccessPlus to view their bill, should contact the Accounts Receivable Office to learn the amount of their account balance due. Failure to receive a billing statement or view their account on AccessPlus will not exempt students from late penalties or from having a hold placed on their registration. Payments for fall semester are due August 20. Payments for spring semester are due January 20. Payments for summer semester are due May 20.

Students may pay their university bill by direct debit through AccessPlus. They may also pay by mail by sending a check or money order (along with the bottom portion of the billing statement printed from AccessPlus) to Iowa State University, Treasurer’s Office, 1220 Beardshear Hall, Ames, IA 50011-2044. Payments may also be made in person by taking the personal check or certified funds to the drop box that is located behind the Student Answer Center on the ground floor of Beardshear Hall.

Credit Type - Audits and zero credit courses: Assessed according to contact hours; maximum charge for zero credit courses is three credit hours.

Credit Type - Partial credits: (.5) assessed on the next larger whole number of credits, e.g., 6.5 credits is assessed as 7 credits.

Credit Type - R credit: Assessed for the minimum fee only if no other credits are taken.

Deferred Billing Plan (payment over three months): This $20 administrative charge (fall, spring, and summer) is assessed to those students who do not pay their full tuition, room and board charges on or before August 20 for fall semester, January 20 for spring semester, and May 20 for summer semester. This permits students to spread payment over three installments. The administrative fee helps defray the extra IT and mailing costs involved in carrying and billing the charges over a longer period of time, as well as the extra personnel required in the Treasurer’s Office to handle the traffic involved with three tuition payments per semester instead of one.

Employer Reimbursement Payment Option: Iowa State is proud to offer a deferment option which is beneficial to employees of companies that offer tuition reimbursement plans. With a completed benefit certification form (http://www.public.iastate.edu/~u-bill/forms/Employer%20Reimbursement%20Def %20Payment%20Agreement.pdf) you may defer all allowable charges to become due 30 days after grades are presented. The benefit certification form must be renewed each academic year, beginning with the summer semester. There is a $35 per semester fee for this deferment option.

For ISU Employees, you will need only complete the "Student" portion of the form. The Accounts Receivable Office will complete the "Employer" certification provided you have submitted the Employee Tuition Grant request through AccessPlus and have had it approved through the Human Resource Services Office.

For more information contact Jaye Anderson at (515) 294-9455 or jjander@iastate.edu.

Installment Payment Plan: This administrative charge is assessed to those who elect the Iowa State University Installment Plan. This plan will allow students to pay tuition, room, board, fees, and accounts receivable costs in twelve equal monthly payments.
installments. The $50 annual application fee will defray the extra IT and mailing costs associated with carrying the charges over a longer period of time, as well as the bank fees associated with the direct debit of payments.

**Past Due Accounts:** If students have past due accounts receivable charges prior to the beginning of classes, they may be dropped from enrollment if these past due charges are not paid by the Friday before the first day of class. Students that are subject to being dropped will be notified via their Iowa State e-mail account.

**Refunds:** Refunds are available for students who cancel or withdraw their registration within the appropriate time period. To cancel their registration, students must notify the Office of the Registrar before the first day of the semester to avoid tuition assessment. Beginning on the first day of the semester, it will be necessary for students to formally withdraw from the university to terminate their registration. More information about canceling registration and withdrawing from classes can be found at [http://www.registrar.iastate.edu/registration/responsibilities.shtml](http://www.registrar.iastate.edu/registration/responsibilities.shtml).

Tuition adjustments for all students are made for withdrawals of registration according to the following schedule:

<table>
<thead>
<tr>
<th>Withdrawal Date/Student Pays</th>
<th>Student Pays</th>
</tr>
</thead>
<tbody>
<tr>
<td>Before first day of classes: 0%</td>
<td>0%</td>
</tr>
<tr>
<td>During class days 1-5: 10%</td>
<td>10%</td>
</tr>
<tr>
<td>During class days 6-10: 25%</td>
<td>25%</td>

<td>50%</td>
</tr>
<tr>
<td>After the twentieth day of classes: 100%</td>
<td>100%</td>
</tr>
</tbody>
</table>

Students who wish to appeal tuition and fee assessment for withdrawals should contact the tuition and fees area of the Office of the Registrar. Decisions of the Office of the Registrar will be based on the existence of extenuating circumstances beyond the control of the student.

Students who wish to appeal the decision of the Office of the Registrar must do so in writing within 10 calendar days after receiving the decision. Such appeals will then be reviewed by the Tuition Appeals Review Committee. Students who wish to appeal the decision of the Tuition Appeals Review Committee may make a request to do so in writing to the Office of the Provost.

**Fee refund for students with a reduction in credits below full-time:** 100 percent if change is made through the 10th day of classes. No adjustment is made after the 10th day of classes. Prorated adjustments in the tuition adjustment schedule are made for summer session courses, or any courses which are less than one semester in length (79 days).

**Workshop and Short Courses Refunds:** Students who drop workshops or short courses of one or two weeks on or before the first class meeting receive a 100% tuition adjustment for the course. No tuition adjustment will be made after the first day of classes. Students who drop three-week courses receive a 100% adjustment if they drop on or before the first day of classes, a 90% adjustment if they drop on the second day of classes, and no adjustment after the second day of classes.

**Tuition Schedule Per Semester**

In effect for Summer 2013. Subject to change without notice.

For students enrolled for less than a full course load and for the most current and complete information, see the Fee Schedule Per Credit list at [http://www.registrar.iastate.edu/fees/](http://www.registrar.iastate.edu/fees/).
Undergraduate and Professional Degree Programs

The university is organized into eight colleges, including the Graduate College. Six colleges offer undergraduate degree programs, and the College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree. For a listing of the more than 100 majors offered by the Graduate College, see the summary at the end of the Graduate College section of this publication.

Iowa State University is accredited by the Higher Learning Commission of the North Central Association.

Bachelor’s Degree Requirements

To receive a degree, a student must meet the requirements of the curriculum in which the degree is to be awarded. Verification that the student has met those requirements is made by the dean of the college, who also has the authority to waive a requirement under exceptional circumstances.

A cumulative grade point average of at least 2.00 in all work taken at Iowa State University is required for graduation.

A student admitted as a transfer from another college or university is normally required to have a 2.00 cumulative average at the time of entrance. A student may, however, be admitted with a quality-point deficiency, but will be required to earn sufficient quality-points above a 2.00 at Iowa State to offset the quality-point deficiency at the time of entrance.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. There is no limit to the number of credits that may be transferred from a four-year institution.

A student who takes work at another college or university after having been enrolled at Iowa State must submit transcripts of all work attempted to the Office of Admissions at Iowa State. This work must average a 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such transcripts will be grounds for dismissal.

In unusual circumstances, the Academic Standards Committees of the respective colleges may review and give further consideration to the records of students who, except for grade-point average, have satisfactorily completed all graduation requirements. If the appropriate college Academic Standards Committee considers that the educational and professional needs of such a student have been satisfactorily met, or can be satisfactorily met by imposing further conditions, the committee may recommend to the dean of the college that the student be graduated or that a supplemental program be accepted in place of the fully unqualified grade point average. The college Academic Standards Committee chairperson reports such exceptional actions to the Faculty Senate Committee on Academic Standards and Admissions.

To qualify for a bachelor’s degree, a student must take a minimum of 32 credits in residence at Iowa State University. Also required is that the last 32 credits be taken in residence, although under special circumstances, with prior written approval of the student’s major department, six of the last 32 credits may be transferred and applied toward a degree at Iowa State University.

A student may receive two bachelor’s degrees if he or she meets the requirements of each curriculum and earns at least 30 credits beyond the requirements of the curriculum requiring the greater number of credits. Each degree program must be approved by the appropriate department chair or head.

A student fulfilling the requirements of two separate curricula in different colleges may, in certain cases, receive a degree from one of the colleges with double majors crossing college lines. The permission of both deans must be obtained and each degree program must be approved by the appropriate department and dean.

Undergraduate Certificates

All undergraduate certificates require at least 20 credits, including at least 12 credits taken at Iowa State University. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above. The undergraduate certificate must include at least 9 credits that are not used to meet any other department, college, or university requirement except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses taken for an undergraduate certificate may not be taken on a pass-not pass basis. A cumulative grade point average of at least 2.00 is required in courses taken at Iowa State University for an undergraduate certificate. Specific requirements and/or restrictions are available from the department or program offering the undergraduate certificate (see Index or individual colleges for information).

Communication Proficiency Policy

Basic Principles: The faculty of Iowa State University believe that all educated people should be able to communicate effectively in a variety of settings and media, including electronic. Consequently, Iowa State University graduates are expected to develop competence in three interrelated areas of communication: written, oral, and visual.

This communication competence can best be achieved through the following five principles:

- Communication instruction and practice are distributed over the student’s entire undergraduate experience, both in and out of the classroom, from the first year through the senior year.
- Communication instruction and practice are distributed across the curriculum, both in communication courses and in courses in the student’s major.
- Active learning and higher-order thinking are fostered through communication.
- Faculty across the university share responsibility for the student’s progress in communication practices.
- Both faculty and students engage in ongoing assessment for continuous improvement of the student’s communication practices.

Iowa State University’s communication curriculum, based on these five principles, seeks to enrich the student’s understanding of the various subjects studied as well as prepare the student to communicate successfully in professional, civic, and private life.

Foundation Courses

To ensure that broad communication competence is addressed and developed at the beginning of a university career, all students will earn six credits in the two-course introductory sequence (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition), normally taken in the first and second years. Students will focus on writing and critical reading, with complementary instruction in visual, oral, and electronic communication; they will concentrate on civic and cultural themes; and they will enter work in a communication portfolio to document their current level of proficiency.

Upper-Level Curricula

Continuing development of communication skills will be directed by the student’s major department. Using the university’s basic principles as a guide, each department will specify a set of intended learning outcomes and design communication experiences by which students in the major can achieve the desired level of communication proficiency.

Departments may select from or combine a variety of communication options that best match their faculty, students, and curriculum:

- designated communication-intensive courses that integrate written, oral, and visual communication into a course in the major;
- a sequence of courses within the major that incorporates communication tasks of increasing complexity;
- linked courses—one in communication, one in the major—that integrate readings and assignments;
- advanced composition course(s) appropriate to the student’s major and offering instruction in written, oral, and visual communication;
- communication-intensive activities within or beyond course work, such as communication portfolios, discipline- or course- specific student tutoring, community service projects, internships, electronic presentations, informational fairs, juried competitions, entrepreneurial projects, newsletters, Web sites.

Departments will retain the authority for regularly assessing the degree to which their students achieve the specified learning outcomes and for making curricular improvements based on departmental assessment data.

Non-Native Speakers of English: Students admitted to the university who are graduates from non-U.S. high schools and whose first language is not English are required to take the English Placement Test before the beginning of their first semester of enrollment as students at Iowa State. This requirement includes freshmen as well as those who have transferred credit from other institutions. The test is administered by the English Department and is offered before the beginning of each semester. Students whose performance on this placement examination is satisfactory will follow the regular university communication proficiency requirements. Students who have deficiencies will enroll in special English classes, as determined by the test results.

Library Study

Independent study and investigation through the use of books, journals, and libraries enable students to grow intellectually and professionally in college and afterward. For this reason, all students receive instruction in the use of the University Library,
including practice in how to locate the published literature of their respective fields of study.

**U.S. Diversity and International Perspective Requirements**

One of Iowa State University’s goals is to prepare its students to meet the challenges of responsible citizenship and effective professional roles in a culturally diverse global community. To help achieve this goal, all undergraduate students must fulfill graduation requirements in two areas: U.S. Diversity and International Perspectives.

The specific standards used to certify students’ fulfillment of these requirements vary from major to major, but all require three credits of course work (or the equivalent in some alternative academic experience) for each of the requirements. In most cases, courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements of the student’s college or requirements of the student’s major. Students should consult with advisers for details of the requirements in particular majors.

The focus of the U.S. Diversity requirement is the multicultural society of the United States. Courses or alternative academic work used to meet the requirement address significant manifestations of human diversity and provide students with insights that enhance their understanding of diversity among people in the U.S.

Through completion of the U.S. Diversity requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

- articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
- analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
- analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
- analyze the perspectives of groups and individuals affected by discrimination
- analyze how cultural diversity and cooperation among social groups affect U.S. society.

The focus of the International Perspectives requirement is the global community. Its objective is to promote students’ understanding of cultural diversity and interdependence on a global scale. A period of immersion in a foreign culture is often a particularly effective way of meeting these objectives, so Iowa State University encourages the use of study-abroad experiences as a means of fulfilling the International Perspectives requirement. International students, because they are "studying abroad" from their home country’s perspective, are normally deemed to have met the International Perspectives requirement. The International Perspective requirement shall be waived for U.S. military veterans who have completed at least three months of service stationed outside of the United States.

Through completion of the International Perspectives requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

- analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
- describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
- analyze and evaluate the influence of global issues in their own lives.
- describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events.
- communicate competently in a second language.

**Curriculum Requirements**

The curriculum requirements, both in number of credit hours and specific courses, are guidelines for the student and his or her adviser in planning an academic program. The curriculum is subject to change and because of these changes, adjustments may need to be made.

**Catalog in Effect**

A student may choose to graduate under the catalog in effect at the time of graduation or a catalog for the previous five years, provided it covers a period of his or her enrollment. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed.

**Special Programs**

**Honors Program**

The Iowa State University Honors Program is designed for students who have demonstrated the ability and motivation to assume more than the usual responsibility for their undergraduate education. The goal of the program is to enable Honors students to gain the maximum benefit from their undergraduate education. Students who graduate in the Honors Program receive the Honors designation on their transcripts and diplomas.

Special educational opportunities. Students in the Honors Program determine their educational objectives and design an individualized program of study to meet them. An Honors program may include institutions for required courses, a combination of courses from several departments to form a new major or minor, Honors courses or seminars, independent study and research, and other forms of innovation. Information about Honors courses and seminars for the current academic year can be obtained from the Honors Program Office, 2130 Jischke Honors Building.

Other benefits. Members of the Honors Program have 24-hour access to the Honors building as a quiet place to study, use the computers, and visit with other Honors students. Students also have off-campus opportunities such as attending Honors seminars and conferences. Members of the Honors Program are invited to the Library, priority scheduling, and the opportunity to apply for research funds.

ISU Students who have a cumulative grade-point average of at least 3.5 become eligible to apply for admission to the Honors Program during their second semester in residence and continue to be eligible as long as they have at least 48 semester credits remaining before graduation. Transfer students with a G.P.A. of 3.5 or higher and more than 60 credits remaining are also eligible to apply.

**First-Year Honors Program**

Entering first-year students with outstanding high school records and academic ability may be eligible to participate in the First-Year Honors Program (FHP). The FHP, which introduces students to an Honors education, consists of Honors sections of English 250 and Library 160, an FHP Seminar, and advising by honors advisers. Students may also choose to participate in the Honors Mentor Program, which introduces students to scholarship and research. Participants are matched with faculty members conducting research in an area of mutual interest. Admission to the FHP is limited, and is based on past academic achievement, potential, and interest in an Honors education.

Further information concerning the University Honors Program and the First-Year Honors Program can be obtained from the Honors Program Office, 2130 Jischke Honors Building or on the Honors webpage, www.honors.iastate.edu.

**Dual-degree Programs**

Students who complete the first three years in certain curricula at Iowa State and who satisfactorily complete the first year in a recognized medical, dental, veterinary medical, or law curriculum may then be awarded a bachelor’s degree from Iowa State. (See Index, Preprofessional Study.)

**Iowa Lakeside Laboratory**

Iowa Lakeside Laboratory is an off-campus teaching and research facility situated on a 140-acre campus on West Okoboji Lake in Northwest Iowa. It is run cooperatively by Iowa State University, the University of Iowa, the University of Northern Iowa, and Drake University. Each summer Iowa State University students can take up to three undergraduate and/or graduate courses in archaeology, biology, ecology, environmental science, and/or geology for credit at Lakeside (see course listings under Iowa Lakeside Laboratory). All Lakeside courses are small, full-immersion, field-oriented courses that run for 1-4 weeks. Lakeside also offers a variety of short courses for teachers and a series of nontechnical short courses on various aspects of the natural history of Iowa. Information about Lakeside courses as well as registration and housing information can be obtained from the Biology Program Office, 103 Bessey Hall or on the Lakeside Web site, www.continueolearn.uiowa.edu/ lakesidelab (http://www.continueolearn.uiowa.edu/lakesidelab).

**Regent Universities Student Exchange Program**

Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information
and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)
Iowa State University is a member of National Student Exchange. The NSE Consortium has 200 colleges and universities throughout North America providing academic and experiential exchange opportunities. Iowa State students who are good standing with a cumulative GPA of at least 2.50 are eligible to apply. Credits earned as an NSE participant will be recorded on the students Iowa State transcript. Approval for credit in the NSE program should be sought from a student's academic adviser in advance of application. Detailed information and applications forms are available from:

National Student Exchange
1080 Hixson-Lied Student Success Center
(515) 294-6479

Study Abroad
Our planet is in a constant state of change, and occurrences in remote corners of the globe can profoundly impact our lives. It is clear from the effects of global warming, international trade, terrorism, and pandemics of one nature or the other that we cannot ignore what is happening beyond our shores and borders. Students who graduate without an understanding of other cultures, languages, business practices, and political systems are disadvantaged both educationally and professionally. Studying abroad helps prepare students to meet the challenges of an increasingly interdependent global community. Further, study abroad is an adventure that challenges the student academically and provides real opportunities to interact with other cultures, languages, and lifestyles.

As a leading international university, Iowa State has a major commitment to study abroad, and the Study Abroad Center is the central administrative office responsible for providing these opportunities. We offer advising on study abroad, international internships, work, volunteer opportunities, and service-learning, and scholarships. The Center’s library has a fine selection of travel books, information on international careers, cross-cultural orientation, social and business customs around the world, and travel bargains. The International Student Identity Card and passport photographs can also be obtained at the Center.

With over 250 study abroad programs available, from one week to an academic year in length and in nearly every major, students are able to find a program that meets their needs and interests so they can discover for themselves why study abroad is the most exciting academic adventure.

Exchange Programs offer students the opportunity to study abroad at a partner university while paying Iowa State tuition. Semester in Australia, Canada, Greece, Ireland, Italy, New Zealand, or UK offers unlimited placement opportunities for students to study at some of our most popular destinations for the fall, spring, and in some cases summer.

Intensive Language Programs offer students a total immersion experience in French, German, Russian, or Spanish by studying in Québec, Canada (French), France, Germany, Russia, Mexico, Peru, or Spain. Summer and semester programs are available.

Group Programs led by our faculty offer Iowa State courses around the world. Short-term options can take you from the Antarctic to England and to more than 40 other destinations.

Minors
Requirements for an undergraduate minor are specified by many departments and programs in the university; a record of completion of such requirements appears on a student’s transcript. Lists of undergraduate minors offered by each college appear in the college description. Credits used to meet the minor requirements may also be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Some students may have to exceed the graduation credit requirement set by their college in order to meet the requirements of both the minor and the curriculum/major.

All minors require at least 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass-not pass basis.

Specific requirements and/or restrictions are available from the department or program offering the minor.

Minors by College
This list may not be inclusive. Check the college web sites for more information.

Agriculture and Life Sciences
Agricultural Biochemistry (p. 472)
Agricultural Business (p. )

- Technical Communication, B.S. (p. 670)
- Women's Studies, B.A., B.S. (p. 630)
- World Languages and Cultures B.A. (p. 633):
  - French (p. 637)
  - German (p. 638)
  - Russian Studies (p. 641)
  - Spanish (p. 644)

College of Veterinary Medicine

Veterinary Medicine, D.V.M.

College of Agriculture and Life Sciences

Wendy Wintersteen, Dean
Joe Colletti, Senior Associate Dean
David Acker, Associate Dean

John Lawrence, Associate Dean
www.ag.iastate.edu

Departments of the College

- Agricultural Education and Studies
- Agricultural and Biosystems Engineering
- Agronomy
- Animal Science
- Biochemistry, Biophysics, and Molecular Biology
- Ecology, Evolution, and Organismal Biology
- Economics
- Entomology
- Food Science and Human Nutrition
- Genetics, Development and Cell Biology
- Horticulture
- Natural Resource Ecology and Management
- Plant Pathology and Microbiology
- Sociology

Students enrolled in the College of Agriculture and Life Sciences are provided a broad-based education that includes coursework in communications; Biological, physical, and social sciences; humanities; and technical subject matter. Upon graduation students find diverse career opportunities because of the well balanced education they have received as undergraduates. Opportunities for graduates include production agriculture, business and industry, public agencies, education, Biological and environmental sciences, value-added processing, natural resource management, rural development, animal and human health professions, and graduate studies.

High School Preparation

Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of Biology and chemistry, or Biology and physics, or Chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.

Majors in the College of Agriculture and Life Sciences

A student has many majors from which to choose. Each major is unique although many courses are common. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits. Options and areas of specialization further define the majors and required coursework within some majors. In all cases, majors are designed to help students succeed in their chosen professions. Majors in agriculture and life sciences are:

Primary Majors
- Agricultural Biochemistry (p. 146)
- Agricultural Business (p. 147)
- Agricultural and Life Sciences Education (p. 145)
- Agricultural Studies (p. 146)
- Agricultural Systems Technology (p. 145)
- Agronomy (p. 154)
- Animal Biology (p. 227)
- Animal Science (p. 163)
- Biochemistry (p. 170)
- Biology (p. 179)
- Culinary Science (p. 180)
- Dairy Science (p. 168)
- Dietetics (p. 180)
- Diet and Exercise (p. 190)
- Environmental Science (p. 195)
- Food Science (p. 230)
- Forestry (p. 230)
- Genetics (p. 208)
- Global Resource Systems (p. 211)
- Horticulture (p. 213)
- Industrial Technology (p. 623)
- Insect Science (p. 192)
- Microbiology (p. 222)
from members of the College of Agriculture and Life Sciences Honors Committee. Further details are available from an academic adviser or the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

**Secondary Majors**

Environmental Studies (p. 528)
International Agriculture (p. 222)
Seed Science (http://catalog.iastate.edu/collegeofagricultureandlifesciences/seedtechnologyandbusiness/#curriculuminseedscience)

A secondary major must be taken in conjunction with a primary major.

**Minors**

Agricultural Biochemistry
Agricultural Business
Agricultural Education and Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biology
Culinary Science
Emerging Global Diseases*
Entrepreneurial Studies*
Environmental Studies
Food Safety*
Food Science
Forestry
Genetics
Horticulture
Industrial Technology
Insect Science
International Agriculture
Meat Science
Microbiology
Nutrition
Sustainability*

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

**Certificate**

Occupational Safety

See statement on minors in the Colleges and Curricula section of this catalog.

**Special Programs**

**Agriculture Exploration**

Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the Student Services Office until they select their majors.

**Preveterinary Medicine**

Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with preveterinary medicine (see College of Veterinary Medicine section of this catalog for specific admissions requirements).

Students who are undecided about choice of major may enroll in general preveterinary studies (Gen PV). These students will also enroll in an orientation course, which describes the various college majors. A Gen PV student has up to 1.5 semesters to select a major.

Preveterinary medicine students also have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission to the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an individual major. Students also may meet degree requirements of an individual major through the College of Agriculture and Life Sciences Honors Program. Further details are available from an academic adviser or from members of the College of Agriculture and Life Sciences Honors Committee.

**Honors Program**

The College of Agriculture and Life Sciences Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

**Off-Campus Programs**

Coursework leading to a master of science degree in agricultural education, master of agriculture degree in professional agriculture and a master of science degree in agronomy are offered to students who choose to study off-campus; see Extended and Continuing Education for further information.

**Study Abroad and International Travel Opportunities**

Agriculture and life sciences are part of a highly interconnected global system; decisions made in one sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture and Life Sciences provides study abroad and international internship opportunities in more than 25 countries around the world. For additional information, contact the Office of Global Agriculture Programs in the College of Agriculture and Life Sciences.

**Internships and Cooperative Education Programs**

Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For additional information, contact a departmental adviser or internship coordinator.

**College of Agriculture and Life Sciences Core Curriculum and Electives**

All curricula in the College of Agriculture and Life Sciences lead to a bachelor of science degree. Each major has specific degree requirements for graduation based on department and college student learning outcomes. College of Agriculture and Life Sciences core curriculum requirements for the four areas listed below are established to provide the foundation for successful accomplishment of both departmental and college level learning outcomes.

Students pursuing a primary major in another college and taking a second major in the College of Agriculture and Life Sciences must fulfill the core curriculum requirements of the College of Agriculture and Life Sciences, and all the requirements of the second major. The College of Agriculture and Life Sciences core curriculum follows.

**Minimum Credits | Subject Area**

10 Interpersonal and public communication skills
6 English composition with grades of C or better
3 Speech fundamentals with grades of C or better; 1 credit in Lib 160
17 Mathematical, physical, and life sciences
3 credits of mathematics; 3 credits of statistics; 5 credits of physical science (e.g., chemistry, geological and atmospheric sciences, physics); 6 credits of life sciences including BIOL 101 Introductory Biology or BIOL 211 Principles of Biology I, or BIOL 212 Principles of Biology II and 3 credits of life sciences from a college-approved list: (http://www.ag.iastate.edu/student/student_services.php)
12 Humanities, social sciences 3 credits of humanities; 3 credits of social sciences; 3 credits of U.S. diversity from an approved list; 3 credits of international perspectives from an approved list.

3 Ethics, Requirement met in one of two ways designated by the student’s major program of study: 1) 3 credits from a college-approved list; or 2) a course in foundational elements of ethical/critical thinking offered by the Department of Philosophy specifically to meet this requirement for College of Agriculture and Life Sciences majors, and a course designated by the student’s major program designated to coordinate with this foundational course. Refer to the College of Agriculture and Life Sciences web site for details of the ethics requirement.

All students graduating with majors within the College of Agriculture and Life Sciences are expected to be proficient in the following college-level outcomes:

**Professional, Interpersonal and Cross-cultural Communications**

- Speak and write clearly and persuasively.

**Nutritional Science** (http://catalog.iastate.edu/collegeofagricultureandlifesciences/nutritionalsciences)

Public Service and Administration in Agriculture (p. 608)

**Certificate**

Occupational Safety

See statement on minors in the Colleges and Curricula section of this catalog.
• Prepare effective visual, oral, written and electronic presentations.
• Effectively read, listen, observe and reflect.

Problem-Solving/Critical Thinking
• Apply a holistic approach to solving complex issue-laden problems.
• Apply a rational and objective process to:
  • Distinguish verifiable facts from value claims,
  • Determine the accuracy of statements,
  • Identify assumptions and detect bias,
  • Distinguish relevant from irrelevant information,
  • Prioritize needs.
• Summarize, analyze, and interpret simple research data and policy issues.

Leadership
• Organize, facilitate, and participate effectively in a group, team, or organization.
• Define a problem or opportunity, implement an action planning process, work towards a goal and justify actions taken.

Entrepreneurship
• Demonstrate innovativeness and creativity regardless of context.
• Identify and pursue opportunities that produce value.
• Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

Life-long learning
• Articulate how continued learning after graduation will enrich their lives.
• Identify and participate in new areas for learning beyond the classroom and after graduation.

Ethics
• Define and assess their ethical perspective, moral responsibility, and values.
• Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

Environmental Awareness
• Explain the physical and biological interactions within ecosystems
• Explain how human activities impact the environment and how societies are affected by environmental change.

International/Multi-Cultural Awareness
• U.S. Diversity – Students should achieve two of the following outcomes. They should be able to:
  • Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
  • Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.,
  • Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.,
  • Analyze the perspectives of groups and individuals affected by discrimination,
  • Analyze how cultural diversity and cooperation among social groups affect U.S. society.
• International Perspectives – Students should achieve two of the following outcomes. They should be able to:
  • Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview,
  • Describe and analyze how cultures and societies around the world are formed, sustained, and evolve,
  • Analyze and evaluate the influence of global issues in their own lives,
  • Describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events,
  • Communicate competently in a second language.

In addition to the College level learning outcomes, each department within the college has additional discipline-specific outcomes that apply to graduates of that department.

Electives
Students use electives to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog). Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the curriculum in which they expect to graduate. Students in ROTC may apply ROTC credits toward elective requirements.

Advising
Each student in the College of Agriculture and Life Sciences works closely with an academic adviser who is associated with the major in which the student is enrolled.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture and Life Sciences. This may be accomplished through several majors; however, it is recommended that the student work closely with an academic adviser.

Each department prepares a guide to help students chart their long-term programs and to specify the exact requirements for graduation. Visit the college web site www.ag.iastate.edu.

Graduate Study
Graduate study in agriculture is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdisciplinary offerings:
- Biorenewable Resources and Technology
- Ecology and Evolutionary Biology
- Environmental Science
- Genetics
- Immunobiology
- Microbiology
- Molecular, Cellular, and Developmental Biology
- Neuroscience
- Nutritional Sciences
- Plant Biology
- Professional Agriculture (off-campus)
- Seed Technology and Business
- Sustainable Agriculture
- Technology and Social Change (interdepartmental minor)
- Toxicology

For details, consult the Graduate College section (p. 666) of this catalog.

Agricultural Business
Administered by the Department of Economics. The major in agricultural business prepares students for advanced studies and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A major in agricultural business with a minor in economics is not permitted; however, a double major in agricultural business and economics is permitted.

Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture and Life Sciences, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service.
Curriculum in Agricultural Business

The major in agricultural business requires a minimum of 120 credits and a 2.00 minimum GPA. Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits. In addition, at most 9 P-NP credits of free electives can be applied toward the degree, and a minimum of 15 credits must be earned from courses taught by the Department of Economics at ISU.

Agricultural Education and Studies

Undergraduate Study

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula. (p. 141)

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education, and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. Problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics
7. environmental awareness

Business and Agricultural Business 28.5 cr.

Nine credits of ECON courses from approved department list.

Total Credits 28.5

Electives 32-35 cr.

Agricultural business majors seeking a double major in economics must take a minimum of 42 credits in economics. These include all of the economics courses required for the economics major. To double major in economics, agricultural business majors must also earn an average grade of C or higher in ECON 101 (p. 503) Principles of Microeconomics, ECON 102 (p. 503) Principles of Macroeconomics, ECON 301 (p. 503) Intermediate Microeconomics, and ECON 302 (p. 503) Intermediate Macroeconomics, with no grade lower than a C.

The Department of Economics also offer a minor in Agricultural Business. Courses to be included in the minimum of 15 credits include the following:

<table>

</tr>
</tbody>
</table>

Three credits of ECON courses from approved department list.

Agricultural, Food, or Natural Resources Sciences: 6 cr. from approved course list.
8. U.S. diversity

More information regarding the departmental learning outcomes can be found at www.ageeds.iastate.edu/assessment/agedsindex.htm.

Minor - Agriculture and Life Sciences Education

The department offers a minor in agriculture and life sciences education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 400 level. Courses that can be taken for a minor are:

AGEDS 211 Early Field Based Experience 1
AGEDS 310 Foundations of Agricultural Education Programs 3
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3
AGEDS 412 Internship in Agricultural Education and Studies 1-3
DANCE 160 Ballroom Dance I 1
AGEDS 414 Developing Agricultural Education Programs in Non-Formal Settings 2
ECON 401 Topics in Microeconomics 3
AGEDS 450 Farm Management and Operation 3
AGEDS 490 Independent Study in Agricultural Education and Studies 1-3
AGEDS 496 Agricultural Travel Course 1-3
AGEDS 499 Undergraduate Research arr

Total Credits 20-28

† Arranged with instructor.

Visit the departmental website at www.AgEds.iastate.edu/.

Graduate Study

The department offers the degrees of master of science, and doctor of philosophy, with a major in agricultural education; master of agriculture, with a major in professional agriculture; a specialization in agricultural extension education; opportunities for emphasis in international agricultural education; and a minor for students majoring in other curricula. Graduate students who have earned a bachelor’s degree in an agricultural discipline may plan a course of study that leads to teacher certification. Candidates pursuing the master of science degree may do so by completing either a thesis or nonthesis program of study. The master of agriculture, professional agriculture degree is nonthesis only; this interdepartmental graduate program in professional agriculture is designed for off-campus students; see Off-Campus Credit Courses and Programs. (http://catalog.iastate.edu/azindex)

Students have an opportunity to develop competence in disciplinary foundations and ethics, program planning, learning theory, instructional methods, program leadership and administration, program evaluation, research methodologies, data analysis and interpretation, writing for publication, and grant proposal writing.

The department also cooperates in the international development studies option of the General Graduate Studies Program. Courses and workshops are offered, both on and off campus, for extension educators, teachers, and industry and government personnel.

Curriculum in Agricultural and Life Sciences Education

Administered by the Department of Agricultural Education and Studies. Students majoring in Agricultural Education choose between two options: Teacher Certification or Communications.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. Teacher certification requires 2.5 GPA at particular points in the program of study, and C- in selected courses.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Interpersonal and Public Communication 9.5 cr.:

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3
LIB 160 Information Literacy 1

Total Credits 10

Humanities and Social Sciences: 6 cr.

PSYCH 230 Developmental Psychology 3
3 credits from approved American history list 3

Ethics: 3 cr.

From approved list.

Math, Physical and Life Sciences: 19 cr.

CHEM 163 College Chemistry 4
CHEM 177 General Chemistry I 4
CHEM 163L Laboratory in College Chemistry 1
CHEM 177L Laboratory in General Chemistry I 1
MATH 104 Introduction to Probability and Matrices 3
MATH 150 Discrete Mathematics for Business and Social Sciences 4
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
STAT 104 Introduction to Statistics 3

Total Credits 19

Agricultural Sciences and Economics: 31 cr.

All courses minimum grade C- is required.

ACCT 284 Financial Accounting 3
AGEDS 315 Personal, Professional, and Entrepreneurial Leadership in Agriculture 3
AGEDS 488 Methods of Teaching Agricultural Mechanics 3
AGRION 114 Principles of Agronomy 3
AGRION 154 Fundamentals of Soil Science 3
AN S 101 Working with Animals 2
AN S 114 Survey of the Animal Industry 2
ECON 101 Principles of Microeconomics 3
ECON 230 Farm Business Management 3
HORT 221 Principles of Horticulture Science 3
NREM 120 Introduction to Renewable Resources 3

Total Credits 31

Electives:

No more than 4 cr. of ECON 297 Internship, ( and/or 397) may count toward graduation.

Options

Teacher Certification option: 40.5 cr.

All courses minimum grade C is required.

AGEDS 110A Agriculture and Life Sciences Education (Fall only) 0.5
AGEDS 211A High School Agriculture Programs 1
AGEDS 310 Foundations of Agricultural Education Programs 3
AGEDS 401 Planning Agriculture and Life Sciences Education Programs 3
Communications option: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Interpersonal and Public Communication 9.5 cr.:

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3
LIB 160 Information Literacy 1

Total Credits 10

Humanities and Social Sciences: 9 cr.

ECON 101 Principles of Microeconomics 3
or ECON 102 Principles of Macroeconomics 3
Psychology elective 3
Approved humanities elective 3

Ethics: 3 cr.

From approved list.

CHEM 163 College Chemistry 4
or CHEM 177 General Chemistry I 4
CHEM 163L Laboratory in College Chemistry 1
or CHEM 177L Laboratory in General Chemistry I 1
MATH 104 Introduction to Probability and Matrices 3
or MATH 150 Discrete Mathematics for Business and Social Sciences 3
BIOL 211 Principles of Biology I 3
BIOL 212 Principles of Biology II 3
STAT 101 Principles of Statistics 3
or STAT 104 Introduction to Statistics 3
Life science elective 3
BBMB 221 Structure and Reactions in Biochemical Processes 3
or PHYS 115 Physics for the Life Sciences 3

Agricultural Sciences and Economics: 32 cr.

10 credits in a selected area of agricultural sciences and economics including 6 credits at the 300-400 level; 6 credits each in two additional areas of agricultural sciences and economics; 10 credits agricultural sciences and economics electives.

Professional Communications: 32.5 cr.

AGEDS 110A Agriculture and Life Sciences Education (Fall only) 0.5
AGEDS 211 Early Field Based Experience 1
AGEDS 215 Career Seminar 1
AGEDS 315 Personal, Professional, and Entrepreneurial Leadership in Agriculture 3

Electives: 12-13 cr.

Curriculum in Agricultural Studies

Administered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr. from approved list.

U.S. Diversity: 3 cr. from approved list.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library 12.5 cr.:

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3
AGEDS 327 Advanced Communications for Agriculture and Life Sciences 3
LIB 160 Information Literacy 1

Total Credits 13

Humanities and Social Sciences: 6 cr.

ECON 101 Principles of Microeconomics 3
Plus 3 credit hours from approved humanities list 3

Total Credits 6

Ethics: 3 cr.

3 cr. from approved list.

Agricultural Sciences and Economics: 43.5 cr.

AGEDS 110B Agricultural Studies (Fall only) 0.5
AGEDS 215 Career Seminar 1
AGEDS 315 Personal, Professional, and Entrepreneurial Leadership in Agriculture 3
AGEDS 450 Farm Management and Operation 3
AGEDS 451 Agricultural Law 4
AGRON 114 Principles of Agronomy 3
AGRON 154 Fundamentals of Soil Science 3
AGRON 212 Crop Growth, Productivity and Management 3
AN S 101 Working with Animals 2
Values and attitudes in agriculture and related fields. The scientific basis of biological and social sciences in agriculture. (2-0) Cr. 2. F.
AGEDS 311. Presentation and Sales Strategies for Agricultural Audiences. (2-0) Cr. 2. F.
Utilizing instructional methods, techniques, and problem solving, presentation and sales strategies with agricultural audiences. (3-0) Cr. 3. F.S.
AGEDS 312. Science With Practice. (1-6) Cr. 3. Repeatable. F.S.S.S.
A supervised two to twelve week learning experience in an approved learning setting with application to educational, agricultural and/or environmental practices and principles. Nonmajor graduate credit. AGEDS 211C. Agricultural Industries and Agencies. (1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.S.S. Prereq: AGEDS 110
Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.
AGEDS 215. Career Seminar. (1-0) Cr. 1. F.S. Prereq: Sophomore classification
Overview of career opportunities. Evaluation of interests and accomplishments and setting career goals. Development of job search and interviewing skills. Establishing networks of job contacts. AGEDS 310. Foundations of Agricultural Education Programs. (3-0) Cr. 3. S.
Historical development of agricultural education programs. Philosophic premises, program goals and objectives. Educational and social issues impacting the implementation of agricultural education programs.
AGEDS 311. Personal, Professional, and Entrepreneurial Leadership in Agriculture. (3-0) Cr. 3. F.S.
Leadership principles and strategies to influence and motivate team members to achieve personal, professional, and entrepreneurial goals in production agriculture, agricultural education, and agricultural organizations. AGEDS 327. Advanced Communications for Agriculture and Life Sciences. (2-2) Cr. 3. F.S. Prereq: ENGL 250 or equivalent.
Development of written, oral, visual and electronic communications relevant to agriculture and life sciences. Students develop skills and perspectives consistent ethical and democratic principles applicable to agriculture, natural resource, and life science issues. Provide explanations of scientific and technical concepts to rural, industry, and urban audiences. Field trips.
AGEDS 396. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period. AGEDS 401. Planning Agriculture and Life Sciences Education Programs. (Dual-listed with AGEDS 501). (3-0) Cr. 3. F. Prereq: AGEDS 310
Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.
AGEDS 402. Methods of Teaching in Agriculture and Life Sciences. (Dual-listed with AGEDS 502). (3-0) Cr. 3. F. Prereq: Concurrent enrollment in AGEDS 401
Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.
AGEDS 412. Internship in Agricultural Education and Studies. Cr. 2-6. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: AGEDS 211, junior classification in AGEDS and permission of instructor
A supervised two to twelve week learning experience in an approved learning setting with application to educational, agricultural and/or environmental practices and principles. Nonmajor graduate credit.
AGEDS 414. Developing Agricultural Education Programs in Non-Formal Settings. (2-0) Cr. 2. S. Prereq: AGEDS 211 and permission of instructor
Basic concepts in planning, conducting, and evaluating educational programs in non-formal settings. Includes programming for youth and adults in Extension, agricultural industry, and related agencies. Nonmajor graduate credit.
AGEDS 416. Pre-Student Teaching Experience in Agricultural Education. 
Cr. 1. F.S. Prereq: AGEDS 211, AGEDS 402 and admission to teacher education program 
A forty hour field-based experience in an approved secondary agricultural education program. Concurrent enrollment in 417 is required.

AGEDS 417. Supervised Teaching in Agriculture and Life Sciences. 
Cr. 1-16. Repeatable. F.S. Prereq: AGEDS 211, AGEDS 402 and admission to teacher education program 
Supervised teaching in public schools.

AGEDS 450. Farm Management and Operation. 
(2-4) Cr. 3. Repeatable, maximum of 9 credits. F.S.SS. Prereq: Econ 235, Econ 230, junior classification 
Participation in the management and operation of a diversified Iowa farm. The class is responsible for the plans, records, and decisions for buying and selling the farm's livestock, crops, and equipment. Special speakers on current topics. May be taken for credit 3 times at different times of the year with permission of the instructor. Nonmajor graduate credit.

(3-2) Cr. 4. S. Prereq: Senior classification 
The legal framework impacting upon decision-making by firms, families, and individuals, real and personal property, contracts, secured transactions, negotiable instruments, debtor-creditor relations, bankruptcy, farm income tax organization of firms, intergenerational property transfers, trusts and farm estate planning, civil and criminal liabilities, environmental law, federal and state regulatory powers. Nonmajor graduate credit.

(Cross-listed with HORT). (1-6) Cr. 3. F. Prereq: Econ 230, 6 credits of horticulture, and jr classification 
Participation in the management and operation of fruit and vegetable enterprises for local markets. The class is responsible for the plans, records, and decision for planting, operating, harvesting, and marketing fruit and vegetables. Nonmajor graduate credit.

AGEDS 465A. Horticulture Enterprise Management - Planting. 
(Cross-listed with HORT). (1-6) Cr. 3. S. Prereq: Econ 230, 6 credits of horticulture, and jr classification 
Participation in the management and operation of fruit and vegetable enterprises for local markets. The class is responsible for the plans, records, and decision for planting, operating, harvesting, and marketing fruit and vegetables. Nonmajor graduate credit.

AGEDS 465B. Horticulture Enterprise Management: Harvesting. 
(Cross-listed with HORT). (1-6) Cr. 3. SS. Prereq: Econ 230, 6 credits of horticulture, and jr classification 
Participation in the management and operation of fruit and vegetable enterprises for local markets. The class is responsible for the plans, records, and decision for planting, operating, harvesting, and marketing fruit and vegetables. Nonmajor graduate credit.

AGEDS 465C. Horticulture Enterprise Management: Marketing. 
(Cross-listed with HORT). (1-6) Cr. 3. F. Prereq: Econ 230, 6 credits of horticulture, and jr classification 
Participation in the management and operation of fruit and vegetable enterprises for local markets. The class is responsible for the plans, records, and decision for planting, operating, harvesting, and marketing fruit and vegetables. Nonmajor graduate credit.

AGEDS 488. Methods of Teaching Agricultural Mechanics. 
(2-3) Cr. 3. F.S. 
Methods and management techniques in agricultural mechanics laboratories. Emphasis will be on safety, mechanical skills development and management of students, facilities, equipment, and materials. Nonmajor graduate credit.

AGEDS 490. Independent Study in Agricultural Education and Studies. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor 

AGEDS 490A. Philosophy, Curriculum, and Methods. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor 

AGEDS 490B. Leadership, Evaluation, and Administration. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor 

AGEDS 490C. Business, Industry, and Production Agriculture. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor 

AGEDS 490D. Extension and International Agriculture. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor 

AGEDS 490E. Instructional Technology. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor 

AGEDS 490F. Environmental Issues. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor 

AGEDS 490G. Entrepreneurship. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor 

AGEDS 490H. Independent Study in Agricultural Education and Studies, Honors. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor 

AGEDS 490I. Communications. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor 

AGEDS 496. Agricultural Travel Course. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor 
Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Nonmajor graduate credit. Meets International Perspectives Requirement.

AGEDS 496A. International. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor 
Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Nonmajor graduate credit.

AGEDS 499. Undergraduate Research. 
Cr. arr. F.S.SS. Prereq: Permission of instructor, adviser, and departmental chair 
Research experience in agricultural education and studies with application to selected problems.

Courses primarily for graduate students, open to qualified undergraduates:

AGEDS 501. Planning Agriculture and Life Sciences Education Programs. 
(Dual-listed with AGEDS 401). (3-0) Cr. 3. F. Prereq: AGEDS 310 
Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AGEDS 502. Methods of Teaching in Agriculture and Life Sciences. 
(Dual-listed with AGEDS 402). (3-0) Cr. 3. F. Prereq: Concurrent enrollment in AGEDS 501 
Topics include principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AGEDS 510. Introduction to Research in Agricultural Education. 
(3-0) Cr. 3. S. Prereq: Graduate classification 
Determining your research focus; developing research problems and objectives; reviewing the literature and establishing a theoretical framework; establishing procedures for data collection and analysis; ethical issues.

AGEDS 511. Professional Agricultural Presentation Practices. 
(3-0) Cr. 3. F.S.S. Prereq: Graduate Classification 
The identification and use of key planning, delivery and evaluation of presentations using audience engagement techniques focused on research-based principles and field-based practices of professional presenters in agriculture and the life sciences.
AGEDS 514. Organizing Agricultural Information for Professional and Scientific Meetings.
(1-2) Cr. 2. F. Prereq: Graduate classification in agriculture
Concepts and practices in planning, preparing, and presenting materials used in professional meetings and scientific papers by agriculturalists with special emphasis on computerized delivery methods.

AGEDS 520. Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources.
(3-0) Cr. 3. S. Prereq: Graduate classification
Theory and practice of adult education. Teaching and learning in formal and non-formal instructional programs for adult learners.

AGEDS 524. Program Development and Evaluation in Agricultural and Extension Education.
(3-0) Cr. 3. F. Prereq: Graduate classification
Theories and practice of program planning for nonformal education. Addresses use of program logic modeling and considers critical theories of planning to address power and interests in program development, needs assessment, and evaluation.

AGEDS 533. Introduction to Learning Theory in Agricultural Education.
(3-0) Cr. 3. S. Prereq: Graduate classification
Introduction to a variety of theoretical perspectives of learning and how they may be used within the context of agricultural education. Emphasis will be on the major domains of learning, developmental considerations, basic assumptions, concepts, and principles of various learning theories; understanding how each theoretical perspective may be used in both formal and nonformal educational settings.

AGEDS 550. Foundations of Agricultural Education.
(3-0) Cr. 3. F. Prereq: Graduate classification
Philosophical premises, ethical principles, historical development, contextual applications, and knowledge bases for agricultural education.

AGEDS 552. Data Analysis and Interpretation.
(2-0) Cr. 2. F. Prereq: AGEDS 510
Strategies for analyzing, interpreting, and reporting quantitative research data in the social and behavioral sciences.

AGEDS 561. Technology Transfer and the Role of Agricultural and Extension Education.
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: Graduate classification
The impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs. Meets International Perspectives Requirement.

AGEDS 590. Special Topics in Agricultural Education.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590A. Curriculum.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590B. Methods.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590C. Philosophy.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590D. Evaluation.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590E. Administration.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590F. Leadership.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590G. Guidance.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590I. Instructional Technology.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590J. Extension.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590K. International Agriculture.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590L. Program Planning.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593. Workshop in Agricultural Education.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593A. Curriculum.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593B. Methods.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593C. Evaluation.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593D. Administration.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593E. Leadership.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593F. Extension.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593G. Program Planning.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593H. Instructional Technology.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593M. Biotechnology Workshop.
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 599. Creative Component.
Cr. arr. Repeatable. F.S.SS.
For nonthesis masters degree programs.

Courses for graduate students:

AGEDS 615. Seminar in Agricultural Education.
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 615A. Writing for publication.
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 615B. Ethics.
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 615C. Grant writing.
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 615D. Career planning.
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 615E. Contemporary issues.
(1-0) Cr. 1. Repeatable. F.S.SS.
Offered on a satisfactory-fail basis only.

AGEDS 617. Professional Internship for Agricultural Educators.
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of instructor
Analysis of the roles and activities of professionals in agricultural education. Supervised professional field-based experience in public and private settings. Offered on a satisfactory-fail basis only.

AGEDS 625. Leadership, Administration, Supervision and Management of Agricultural Education Programs.
(3-0) Cr. 3. Alt. F., offered 2012. Prereq: Graduate classification
Principles and best practices for leading, administering, supervising, and managing agricultural education programs. Analyzing selected case studies that apply theory to practice in agricultural situations.

AGEDS 699. Research.
Cr. arr. Repeatable.

Agricultural Systems Technology
Curriculum in Agricultural Systems Technology

Administered by the Department of Agricultural and Biosystems Engineering. A minor in agricultural systems technology is available; the requirements appear under Technology Systems Management, Courses and Programs.
Minor in agricultural systems technology

The Department of Agricultural and Biosystems Engineering offers a minor in agricultural systems technology which may be earned by completing a minimum of 15 credits of technology management courses, which includes:

- **TSM 115** Solving Technology Problems 3 cr.
- **TSM 210** Fundamentals of Technology 3 cr.
- 9 credits from departmentally approved list 9 cr.

Total Credits 15 cr.

Students majoring in Agricultural Systems Technology choose between two options: Agricultural and Biosystems Management or Machine Systems.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:

- 6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

**Communication/Library:** 13 cr.

- **ENGL 150** Critical Thinking and Communication 3 cr.
- **ENGL 250** Written, Oral, Visual, and Electronic Composition 3 cr.

One of the following:

- **ENGL 302** Business Communication 3 cr.
- **ENGL 309** Report and Proposal Writing 3 cr.
- **ENGL 314** Technical Communication 3 cr.
- **AGEDS 327** Advanced Communications for Agriculture and Life Sciences 3 cr.

One of the following:

- **SP CM 212** Fundamentals of Public Speaking 3 cr.
- **COMST 214** Professional Communication 3 cr.
- **AGEDS 311** Presentation and Sales Strategies for Agricultural Audiences 3 cr.
- **LIB 160** Information Literacy 1 cr.

Total Credits 13 cr.

**Mathematical, Physical, and Life Sciences:** 26 cr.

- **MATH 142** Trigonometry and Analytic Geometry 3 cr.
- **MATH 160** Survey of Calculus 4 cr.
- **STAT 104** Introduction to Statistics 3 cr.
- **PHYS 111** General Physics 5 cr.
- **CHEM 163** College Chemistry 4 cr.
- **CHEM 163L** Laboratory in College Chemistry 1 cr.
- **BIOL 101** Introductory Biology 3 cr.
- **or BIOL 211** Principles of Biology I 3 cr.

Plus 3 credits from approved College of Agriculture and Life Science list 3 cr.

Total Credits 26 cr.

**Business, Humanities, Ethics, and Social Sciences:** 18 cr.

- **ACCT 284** Financial Accounting 3 cr.
- **ECON 101** Principles of Microeconomics 3 cr.
- **Ethics Course** 3 cr.
- **TSM 370** Occupational Safety 3 cr.

Humanities from College of Agriculture and Life Science list 3 cr.

International Perspectives from University list 3 cr.

U.S. Diversity from University list 3 cr.

Total Credits 18 cr.

**Technical Core:** 30 cr.

- **TSM 110** Introduction to Technology 1 cr.
- **TSM 111** Experiencing Technology 1 cr.
- **TSM 115** Solving Technology Problems 3 cr.

- **TSM 114** Fundamentals of Technology 3 cr.
- **TSM 210** Solving Technology Problems 3 cr.
- **TSM 215** Experiencing Technology 3 cr.
- **TSM 310** Principles of Injury Prevention 3 cr.
- **TSM 311** Total Quality Improvement 3 cr.
- **TSM 320** Principles of Design 3 cr.
- **TSM 321** Electric Power and Electronics for Agriculture and Industry 4 cr.
- **TSM 397** Internship in Technology R
- **TSM 399** Work Experience in Technology 2 cr.
- **TSM 415** Technology Capstone I 1 cr.
- **TSM 416** Technology Capstone II 5 cr.

Total Credits 30 cr.

No more than 4 cr. of TSM 397 may count toward graduation.

Agricultural and Biosystems Management Option: 33 cr.

- **TSM 322** Preservation of Grain Quality 2 cr.
- **TSM 322L** Preservation of Grain Quality Laboratory 1 cr.
- **TSM 324** Soil and Water Conservation Management 3 cr.
- **TSM 325** Biorenewable Systems 3 cr.
- **TSM 327** Animal Production Systems 3 cr.
- **TSM 330** Agricultural Machinery and Power Management 3 cr.
- **TSM 333** Precision Farming Systems 3 cr.
- **ECON 230** Farm Business Management 3 cr.
- 12 credits of supportive electives 12 cr.

Total Credits 33 cr.

Machine Systems option: 33 cr.

- **TSM 216** Advanced Technical Graphics, Interpretation, and CAD 3 cr.
- **TSM 240** Introduction to Manufacturing Processes 3 cr.
- **TSM 330** Agricultural Machinery and Power Management 3 cr.
- **TSM 333** Precision Farming Systems 3 cr.
- **TSM 335** Tractor Power 4 cr.
- **TSM 337** Fluid Power Systems Technology 3 cr.
- **TSM 443** Statics and Strength of Materials for Technology 3 cr.
- **TSM 465** Automation Systems 3 cr.
- 8 credits of supportive electives 8 cr.

Total Credits 33 cr.

Courses

Courses primarily for undergraduates:

**TSM 110. Introduction to Technology.**

(1-0) Cr. 1. F. Prereq: AST and I Tec majors only or permission of instructor

Team-oriented introduction to agricultural systems technology and industrial technology. Internships, careers, competencies, academic success strategies, industry visits, transition to academic life.

**TSM 111. Experiencing Technology.**

(0-2) Cr. 1. S. Prereq: AST or I Tec majors only or permission of instructor

Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of technology. Report writing, internships, competencies, industry visits.

**TSM 115. Solving Technology Problems.**

(2-2) Cr. 3. F.S. Prereq: MATH 140 or higher (can be taken concurrently)

Solving technology problems and presenting solutions through technical reports. Unit conversions, unit factor method, SI units, significant digits, graphing and curve fitting. Use of spreadsheet programs to solve and present technology problems. Solution of technology problems using computer programming languages.
TSM 116. Introduction to Design in Technology.
(2-2) Cr. 3. F.S.
2D projections and 3D representations of objects, national and international standards for documentation, manufacturing processes, design projects, and teamwork. Free-hand sketching techniques and parametric solid modeling will be covered.

TSM 201. Preparing for Workplace Seminar.
(Cross-listed with BSE, A E); (1-0) Cr. 1. F.S. Prereq: Sophomore classification in A E, AST, BSE or ITec

(3-0) Cr. 3. F.S. Prereq: TSM 115 or equivalent, MATH 140 or higher
Introduction to problem solving related to fundamental agricultural and/or industrial technology systems: Basic laws of energy, force, and mass, and their application in simple mechanical systems and thermal systems. Mathematical tools needed for data analysis. Introduction to modern information technology: GPS and Internet, their basic framework and implementations. Introduction to engineering economics: using the time value of money to make economic decisions.

TSM 216. Advanced Technical Graphics, Interpretation, and CAD.
(2-2) Cr. 3. F.S. Prereq: TSM 116
Advanced design systems incorporating 2D and 3D design and productivity tools for use in manufacturing settings. Topics include: Geometric Dimensioning and Tolerancing, 3D models, welding symbols, advanced visualization, design modeling of parts and assemblies, feature based design. Use of AutoCAD and parametric modeling software.

TSM 240. Introduction to Manufacturing Processes.
(1-4) Cr. 3. F.S.
A study of selected materials and related processes used in manufacturing. Lecture and laboratory activities focus on materials, properties, and processes. This includes plastics and metals.

(3-0) Cr. 3. F.
Basic foundations of injury causation and prevention in home, motor vehicle, public, and work environments.

TSM 310. Total Quality Improvement.
(3-0) Cr. 3. S. Prereq: STAT 101 or STAT 104, junior classification
Introduction to the fundamental concepts of TQM - Deming style of management, statistical studies to understand the behavior of products, processes, or services, and how to define and document processes and customer focus. Introduction to continuous improvement tools and methods - DMAIC, SPC, and Lean, Six Sigma, and JIT; emphasis on team work and problem solving skills.

TSM 322. Preservation of Grain Quality.
(2-0) Cr. 2. S. Prereq: MATH 140 or higher
Principles and management for grain quality preservation. Quality measurement. Drying and storage. Fans and airflow through grain. Handling methods.

TSM 322L. Preservation of Grain Quality Laboratory.
(0-3) Cr. 1. S. Prereq: Credit or enrollment for credit in TSM 322

TSM 324. Soil and Water Conservation Management.
(2-2) Cr. 3. S. Prereq: MATH 140 or MATH 160
Introduction to engineering and conservation principles applied to the planning of erosion control systems, water control structures, water quality management, and drainage and irrigation systems.

TSM 325. Biorenewable Systems.
(Cross-listed with A E, AGRON, AN S, BSE, BUSAD, ECON). (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

(3-0) Cr. 3. F. Prereq: TSM 210
Confined animal feeding operations. Environmental controls for animal production. Response of animals to the environment. Heat and moisture balance in animal housing. Ventilation, water, feed handling, air pollution, odor and waste management systems.

(2-3) Cr. 3. S. Prereq: TSM 210, MATH 142 or MATH 160
Selection, sizing, and operational principles of tractors and machinery systems. Cost analysis and computer techniques applied to planning and management of agricultural machine systems. Principles, operation, and application of agricultural machinery.

TSM 333. Precision Farming Systems.
(2-2) Cr. 3. F. Prereq: MATH 140 or MATH 142, junior or senior classification

TSM 335. Tractor Power.
(3-3) Cr. 4. F. Prereq: TSM 210, MATH 142
Theory and construction of tractor engines, mechanical power trains and hydraulic systems. Introduction to traction, chassis mechanics, and hydraulic power.

TSM 337. Fluid Power Systems Technology.
(2-2) Cr. 3. S. Prereq: TSM 210
Fundamental fluid power principles. Fluid properties. Function and performance of components such as pumps, valves, actuators, hydrostatic transmission. Analysis of fluid power circuits and systems. Introduction to electrohydraulics. Course includes lab using fluid power trainers.

(2-2) Cr. 3. F. Prereq: TSM 216, TSM 240, MATH 142
NC programming operations for CNC mills and lathes. Transfer of parts descriptions into detailed process plans, tool selection, and NC codes. Computer assisted CAD/CAM NC programming for 2D/3D machining.

TSM 363. Electric Power and Electronics for Agriculture and Industry.
(3-3) Cr. 4. S. Prereq: TSM 210
Basic electricity. Electrical safety, wiring, 3-phase service, controls, and motors for agricultural and industrial applications. Planning building lighting and electrical systems. Electronics to sense, monitor, and control mechanical processes. Nonmajor graduate credit.

TSM 370. Occupational Safety.
(3-0) Cr. 3. S. Prereq: TSM 270, junior standing
Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing a safe workplace for their employees. Includes the identification and remediation of workplace hazards. Nonmajor graduate credit.

(2-0) Cr. 2. S.
Introduction to occupational safety and health administration and management.

TSM 372. Legal Aspects of Occupational Safety and Health.
(2-0) Cr. 2. Alt. F., offered 2013. Prereq: TSM 371
A review of the common legal issues facing safety practitioners in the workplace. Includes OSHA, EPA and DOT regulations; workers’ compensation, as well as common liability issues.

(3-0) Cr. 3. Alt. F., offered 2012.
An overview of the current problems and technology in the fields of fire protection and fire prevention, with emphasis on industrial needs, focusing on the individual with industrial safety responsibilities.

TSM 393. Topics in Technology.
Cr. 1-4. F.S.SS.
Offered as demand warrants. Web-based instruction.

TSM 393A. Topics in Technology: Agriculture and Biosystems Management.
Cr. 1-4. F.S.SS.
Offered as demand warrants. Web-based instruction.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393C. Topics in Technology: Manufacturing.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393D. Topics in Technology: Occupational Safety.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393E. Topics in Technology: Chemical Application Systems.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393F. Topics in Technology: Agricultural Safety and Health.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393G. Topics in Technology: Electronic Integration for Agriculture and Production Systems.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393J. Topics in Technology: Machinery Management Using Precision Agriculture Technology.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 397. Internship in Technology.
Cr. R. F.S.S.S. Prereq: At least 45 credits of coursework, in AST or I Tec major, and approval of internship coordinator
A supervised work experience in an approved learning setting with application to technology practices and principles. Reporting during work experience and self and employer evaluation required. Minimum GPA requirement.

TSM 399. Work Experience in Technology.
Cr. 2. Repeatable, maximum of 4 credits. F.S.S.S. Prereq: TSM 397 the preceding semester and approval of internship coordinator
Written reports and reflection on work experience. A maximum of 4 credits of TSM 399 maybe be used toward the total credits required for graduation.

TSM 415. Technology Capstone I.
(0-2) Cr. 1. F.S. Prereq: senior classification with less than 32 credits remaining Identification and proposal development of a current technological problem in agricultural or industrial systems. Formation of project teams and selection of faculty project mentor in preparation to complete project.

TSM 416. Technology Capstone II.
(1-8) Cr. 5. F.S. Prereq: TSM 415 in previous semester
Continued team development, communications, and responsibilities. Development of alternate solutions using creativity, critical analysis, and planning techniques. Selection of promising potential solutions to technology problems identified in TSM 415 for development and analysis by student teams. Presentation of project through oral presentations, written reports, and working prototypes.

(2-2) Cr. 3. F.S. Prereq: TSM 310
Introduction to lean tools and techniques that reduce costs and improve business performance: JIT, VSM, SMED, Kaizen, Standard Work, Cycle Time Reduction, Takt Time, A3, etc. Emphasis on lean thinking and competency development through application: simulations, case studies, industry guests and mentors, teamwork and industry-related lean projects.

TSM 443. Statics and Strength of Materials for Technology.
(2-2) Cr. 3. S. Prereq: PHYS 111, MATH 142 or MATH 165
Application of standard analytic and computer based techniques of solving problems related to force and moments. The properties of materials and how to select appropriate materials for a particular design is reviewed.

TSM 444. Facility Planning.
(3-0) Cr. 3. F. Prereq: TSM 216 and TSM 240; STAT 101 or STAT 104
Principles and practices in designing, evaluating, and organizing existing facilities or creating new facilities. Emphasis on AutoCAD-based new facility design project - product design, production flow analysis, activity relationship analysis, layout deployment, materials handling, office and other service requirement design, and the necessary cost analysis for the new facility.

(2-2) Cr. 3. S. Prereq: TSM 363
Theory and applications of automation systems. Emphasizes features, capabilities, design and programming skills of Programmable Logic Controller (PLC) based industrial control systems. Introduction to industrial robots and sensors.

TSM 470. Industrial Hygiene: Physical, Chemical, and Biological Hazards.
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: MATH 160 or higher
A qualitative and quantitative introduction to health effects of chemical, biological, and physical hazards in a workplace. Nonmajor graduate credit.

TSM 471. Safety Laboratory.
(0-2) Cr. 1. Alt. S., offered 2012. Prereq: TSM 470 (can be taken concurrently)
Introduction to equipment, methods, and strategies to measure, evaluate, control, and research hazards and risk in the workplaces.

TSM 477. Risk Analysis and Management.
(Dual-listed with TSM 577). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: MATH 160, STAT 101 or STAT 104
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today’s complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 490. Independent Study.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490H. Independent Study: Honors.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490I. Independent Study: Manufacturing.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490J. Independent Study: Agriculture and Biosystems Management.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490O. Independent Study: Occupational Safety.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 493. Workshop in Technology.
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493A. Workshop in Technology: Agriculture and Biosystems Management.
Cr. 1-4. Repeatable.
Offered as demand warrants.

Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493C. Workshop in Technology: Manufacturing.
Cr. 1-4. Repeatable.
Offered as demand warrants.

Cr. 1-4. Repeatable.
Offered as demand warrants.
TSM 590B. Special Topics in Technology: Machine Systems. Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590C. Special Topics in Technology: Manufacturing. Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590D. Special Topics in Technology: Occupational Safety. Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 598. Technical Communications for a Master's Degree. (Cross-listed with A E). Cr. 1. F.S.SS.

A technical paper draft based on the M.S. thesis or creative component is required of all master’s students. This presentation must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on M.S. thesis or creative component is required of all master’s students. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

A discipline-related problem to be identified and completed under the direction of the program advisor. Three credits required for all nonthesis master’s degree students.

Courses for graduate students:

TSM 601. Graduate Seminar. (Cross-listed with A E). (1-0) Cr. 1. F.

Keys to writing a good MS thesis or PhD dissertation. How to begin formulating research problems. Discussion of research problems and broader impacts, review of literature, identifying knowledge gaps and needs, long-term goals, research hypotheses, objectives, rationale and significance, methods, procedures, data analysis, and reporting results. Presentation of research proposal in different formats. Using peer review and responding to feedback.

TSM 655. Academic Leadership in Technology and Engineering. (3-0) Cr. 3. Prereq: Permission of instructor

A definition of the faculty role in technology and engineering disciplines, including strategies for dealing with programs, personnel, and constituencies are presented. Leadership skills involving team formation, team operation, and conflict resolution are addressed.

TSM 657. Curriculum Development in Technology and Engineering. (3-0) Cr. 3. Prereq: Permission of instructor

Basic concepts, trends, practices, and factors influencing curriculum development, techniques, organization and procedures. Emphasis will be given to program and course development.

TSM 694. Teaching Practicum. (Cross-listed with A E). Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and permission of instructor

Graduate student experience in the agricultural and biosystems engineering departmental teaching program.

TSM 697. Internship in Technology. Cr. R. Prereq: permission of major professor and approval by department chair, graduate classification

One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.
The Department of Agronomy has a curriculum noted for its scientific rigor and breadth in crop science, soil science, agricultural meteorology, and plant breeding. It prepares students for science-based professional positions, graduate study, or research careers across the spectrum of Agronomy.

The curriculum provides both flexibility and direction for students by offering four in-depth options: crop management and business, agroecology, soil and environmental quality and plant breeding and biotechnology. A minimum of 15 credits of Agronomy courses must be earned at Iowa State for students transferring from other institutions. The program also has many opportunities for undergraduate students to be involved in cutting edge research and international agriculture.

Graduates have the theoretical and practical knowledge needed for efficient and sustainable production of food, feed, fuel, and fiber. Graduates are skilled in communications, critical thinking, problem solving, and working effectively with others. They understand the ethical, cultural, and environmental dimensions of issues facing professionals in agriculture and natural resources.

An Agronomy major prepares students for employment in agricultural business and industry, agricultural service organizations, crop production and soil management, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field Agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ Agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, and in regulatory agencies as plant, food, and grain inspectors. Additional areas of work open to Agronomists include integrated pest management, land appraisal, agricultural finance, turfgrass management, and the home lawn care industry.

The department offers an international scholar program leading to a credentialled title of “Agronomy International Scholar” for agronomy majors who have distinguished themselves in global understanding and international experience. Contact the department for requirements.

Students majoring in agronomy study crop, soil, and environmental sciences under one of four options: agroecology; crop management and business; plant breeding and biotechnology; or soil and environmental quality. A minimum of 15 credits in agronomy courses must be earned at Iowa State University.

The Department of Agronomy has a curriculum noted for its scientific rigor and breadth in crop science, soil science, agricultural meteorology, and plant breeding. It prepares students for science-based professional positions, graduate study, or research careers across the spectrum of Agronomy.

The curriculum provides both flexibility and direction for students by offering four in-depth options: crop management and business, agroecology, soil and environmental quality and plant breeding and biotechnology. A minimum of 15 credits of Agronomy courses must be earned at Iowa State for students transferring from other institutions. The program also has many opportunities for undergraduate students to be involved in cutting edge research and international agriculture.

Graduates have the theoretical and practical knowledge needed for efficient and sustainable production of food, feed, fuel, and fiber. Graduates are skilled in communications, critical thinking, problem solving, and working effectively with others. They understand the ethical, cultural, and environmental dimensions of issues facing professionals in agriculture and natural resources.

**Undergraduate Study**

**Graduate Study**

**Agronomy**

The department offers programs that lead to the degrees master of science in agronomy designed for the continuing education of professional Agronomists. The program is taught at a distance using computer-based instructional media. It is a nonthesis degree requiring completion of a written creative component.

The department cooperates in the interdepartmental program in professional agriculture; interdepartmental majors in ecology and evolutionary biology; genetics; MCDB (molecular, cellular, and developmental biology); plant physiology; sustainable agriculture; and environmental science.

Prerequisite to major work in this department is completion of an undergraduate degree program with emphasis on agronomic, biological, and physical sciences.

**Minor - Agronomy**

The department offers work for a minor in Agronomy. Students are required to complete an approved minor program that includes:

**Courses Required For a Minor:**

- AGRON 114 Principles of Agronomy (Courses Required for a Minor:)
- AGRON 154 Fundamentals of Soil Science
- AGRON 212 Crop Growth, Productivity and Management
- AGRON 354 Soils and Plant Growth
- Approved Elective Courses for Minor Credit (6 credits minimum, 3 credits at 300+ level)

**CROP SCIENCE**

- AGRON 212L Field Application and Problem Solving in Crop Production
- AGRON 217 Weed Identification
- AGRON 316 Crop Structure-Function Relationships
- AGRON 317 Principles of Weed Science
- AGRON 320 Genetics, Agriculture and Biotechnology
- AGRON 334 Forage Crop Management
- AGRON 338 Seed Science and Technology
- AGRON 351 Turfgrass Establishment and Management
- AGRON 421 Introduction to Plant Breeding

**SOIL SCIENCE**

- AGRON 260 Soils and Environmental Quality
- AGRON 354L Soils and Plant Growth Laboratory
- AGRON 360 Environmental Soil Science
- ENSCI 402 Watershed Hydrology
- AGRON 452 GIS for Geoscientists
- AGRON 459 Environmental Soil and Water Chemistry
- AGRON 463 Soil Formation and Landscape Relationships
- AGRON 477 Soil Physics
- AGRON 485 Soil and Environmental Microbiology

**AGRICULTURAL METEOROLOGY**

- AGRON 206 Introduction to Weather and Climate
- AGRON 404 Global Change
- AGRON 406 World Climates
- AGRON 407 Mesoscale Meteorology

**GENERAL AGRONOMY COURSES**

- AGRON 342 World Food Issues: Past and Present
- AGRON 392 Systems Analysis in Crop and Soil Management
- AGRON 446 International Issues and Challenges in Sustainable Development
- AGRON 450 Issues in Sustainable Agriculture
- AGRON 497 Agroecology Field Course

Students majoring in Agronomy can take the following courses: AGRON 331, AGRON 379, AGRON 480, AGRON 491, and AGRON 496; but only one (1) credit from these courses can be used in the minor program.

*Substitution of AGRON 155 may be allowed for students in Horticulture and AGRON 156 for students in Landscape Architecture.

**Curriculum in Agronomy**

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.
International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communications Proficiency: 6 cr.

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library:
ENGL 150  Critical Thinking and Communication 3
ENGL 250  Written, Oral, Visual, and Electronic Composition 3
SP CM 212  Fundamentals of Public Speaking 3
or AGEDS 311  Presentation and Sales Strategies for Agricultural Audiences

3 cr. from approved list - http://www.agstudent.iastate.edu/agriculturestudentservices/

Ethics: 3 cr.
ENGL 302  Business Communication 3
ENGL 309  Report and Proposal Writing 3
ENGL 314  Technical Communication 3

Humanities and Social Sciences: 6 cr.

Ethics: 3 cr.
3 cr. from approved list - http://www.agstudent.iastate.edu/agriculturestudentservices/ethicslist.html

Life Sciences: 6 cr.
AGRON 114  Principles of Agronomy 3

Mathematical Sciences: 6 cr.
STAT 104  Introduction to Statistics 3
One of the following: 3-4
MATH 140  College Algebra 3
MATH 150  Discrete Mathematics for Business and Social Sciences 3
MATH 160  Survey of Calculus 4
MATH 165  Calculus I 4
MATH 181  Calculus and Mathematical Modeling for the Life Sciences 4

Physical Sciences: 15 cr.
CHEM 163  College Chemistry 5
& 163L and Laboratory in College Chemistry or
CHEM 177  General Chemistry I 5
& 177L and Laboratory in General Chemistry I or
CHEM 231  Elementary Organic Chemistry 4
& 231L and Laboratory in Elementary Organic Chemistry or
BBMB 221  Structure and Reactions in Biochemical Processes 3
PHYS 111  General Physics 5
or PHYS 115  Physics for the Life Sciences

Geological Sciences: 3 cr.
AGRON 105  Leadership Experience R
AGRON 110  Professional Development in Agronomy: Orientation 0.5
AGRON 114  Principles of Agronomy 3

AGRON 154  Fundamentals of Soil Science 3
AGRON 206  Introduction to Weather and Climate 3
AGRON 210  Professional Development in Agronomy: Career Planning 1
AGRON 310  Professional Development in Agronomy: Work Experience R or AGRON 311  Professional Internship in Agronomy
AGRON 316  Crop Structure-Function Relationships 3
AGRON 354  Soils and Plant Growth 3
& AGRON 354L  Soils and Plant Growth Laboratory 1
AGRON 410  Professional Development in Agronomy: Senior Forum 1
1 course from agriculture issues list

Total Credits 18.5

Advising Option Choice
Complete 24 cr. including 16 cr. from 300 level courses or above from approved list; no more than 4 cr. of AGRON 490 may count toward graduation.

Electives:
27 credits, student choice
Options

Agroecology
The Agroecology option provides the scientific foundation for understanding and managing agricultural systems with ecological and environmental perspectives. Students may pursue graduate study or careers in sustainable agriculture.
AGRON 311  Professional Internship in Agronomy 1
AGRON 392  Systems Analysis in Crop and Soil Management 3
AGRON 450  Issues in Sustainable Agriculture 3
AGRON 497  Agroecology Field Course 3

Biological Science Choices (choose 2)
AGRON 417  Weed Identification 1
AGRON 317  Principles of Weed Science 3
AGRON 334  Forage Crop Management 3
AGRON 485  Soil and Environmental Microbiology 3
ENT 376  Fundamentals of Entomology and Pest Management 3
ENT 471  Insect Ecology 3
HORT 424  Sustainable and Environmental Horticulture Systems 3
HORT 484  Organic Agricultural Theory and Practice 3
PL P 408  Principles of Plant Pathology 3
Physical Science Choices: (Choose 2)
AGRON 360  Environmental Soil Science 3
AGRON 404  Global Change 3
ENSCI 402  Watershed Hydrology 4
AGRON 405  Environmental Biophysics 3
AGRON 406  World Climates 3
AGRON 407  Mesoscale Meteorology 3
AGRON 452  GIS for Geoscientists 3

Social Science Choices: (Choose 1)
AGRON 354  World Food Issues: Past and Present 3
ENSCI 484  Ecosystem Ecology 3
SOC 325  Transition in Agriculture 3

Crop Management and Business
The Crop Management and Business option is designed for those individuals who seek employment as agronomists working in agribusinesses such as cooperatives, seed companies, herbicide and fertilizer dealers, or crop consulting firms.
AGRON 212  Crop Growth, Productivity and Management 3
AGRON 212L  Field Application and Problem Solving in Crop Production 1
ENT 376  Fundamentals of Entomology and Pest Management 3
PL P 408  Principles of Plant Pathology 3
AGRON 217  Weed Identification 1
AGRON 317  Principles of Weed Science 3

Problem Solving
AGRON 392  Systems Analysis in Crop and Soil Management  3
Business Choices: Choose 3
ACCT 384  Accounting Information Systems  3
ECON 102  Principles of Macroeconomics  3
ECON 230  Farm Business Management  3
ECON 235  Introduction to Agricultural Markets  3

Agronomic Choices: (Choose 2)
AGRON 260  Soils and Environmental Quality  3
AGRON 325  Biorenewable Systems  3
AGRON 334  Forage Crop Management  3
AGRON 338  Seed Science and Technology  3
AGRON 360  Environmental Soil Science  3
AGRON 421  Introduction to Plant Breeding  3
AGRON 463  Soil Formation and Landscape Relationships  4

Plant Breeding and Biotechnology
The Plant Breeding and Biotechnology option is a science-oriented option recommended for those who would like to work in plant breeding or plant biotechnology.

MATH 181  Calculus and Mathematical Modeling for the Life Sciences I  4
or MATH 165  Calculus I  4
MATH 182  Calculus and Mathematical Modeling for the Life Sciences II  4
or MATH 166  Calculus II  4
CHEM 177  General Chemistry I  4
&
CHEM 177L  Laboratory in General Chemistry I  1
CHEM 178  General Chemistry II  3
&
CHEM 178L  Laboratory in College Chemistry II  1
BIOL 212  Principles of Biology II  3
&
BIOL 212L  Principles of Biology Laboratory II  1
BIOL 313  Principles of Genetics  3
STAT 401  Statistical Methods for Research Workers  4
AGRON 421  Introduction to Plant Breeding  3
Choose 1:
GEN 444  Introduction to Bioinformatics  4
COM S 207  Fundamentals of Computer Programming  3

Problem Solving
AGRON 392  Systems Analysis in Crop and Soil Management  3
Interest Choices: (Choose 1)
AGRON 212  Crop Growth, Productivity and Management  3
AGRON 338  Seed Science and Technology  3
Choose 1:
BBMB 404  Biochemistry I  3
BIOL 315  Biological Evolution  3
GEN 410  Analytical Genetics  3

Soil and Environmental Quality
The Soil and Environmental Quality option is designed for those individuals interested in careers in environmental science, soil science, or natural resource management.

AGRON 260  Soils and Environmental Quality  3
Problem Solving Choices: (Choose 1)
AGRON 380  Environmental Soil Science  3
AGRON 392  Systems Analysis in Crop and Soil Management  3
GIS Choices: (Choose 1)
ENSCI 345  Natural Resource Photogrammetry and Geographic Information Systems  3
C R P 451  Introduction to Geographic Information Systems  3
AGRON 452  GIS for Geoscientists  3
Interest Choices: (Choose 3)
AGRON 459  Environmental Soil and Water Chemistry  4

AGRON 463  Soil Formation and Landscape Relationships  4
AGRON 477  Soil Physics  3
AGRON 485  Soil and Environmental Microbiology  3
(Choose 2):
ENSCI 301  Natural Resource Ecology and Soils  4
ENSCI 402  Watershed Hydrology  4
AGRON 404  Global Change  3
AGRON 405  Environmental Biophysics  3
AGRON 406  World Climates  3
AGRON 407  Mesoscale Meteorology  3

Courses
Courses primarily for undergraduates:
AGRON 105. Leadership Experience.
Cr. R. F.S.S.
A participatory experience in activities or completion of a course that enhances the development of leadership and group-dynamic skills. See adviser for departmental requirements.

AGRON 110. Professional Development in Agronomy: Orientation.
(0.5-0) Cr. 0.5 F.
Orientation to college life, the profession of agronomy, and the agronomy curriculum.

(2-3) Cr. 3. F.S.
Mullen. A foundation course in agronomy applying crop, soil, and environmental sciences in understanding agricultural systems in the world. Includes introductory concepts of plant, soil, tillage, pest, environmental, and sustainable aspects of crop production. Off-campus version offered through internet by interactive computer courseware.

AGRON 120. Introduction to Renewable Resources.
(Cross-listed with NREM, ENV S). (3-0) Cr. 3. F.S.
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

(2-2) Cr. 3. F.S. Prereq: CHEM 163
Manu. Introduction to physical, chemical, and biological properties of soils, their formation, classification, and distribution. Use of soil survey and computer databank information in balancing agronomic, economic, and environmental concerns in soil management. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

AGRON 155. Soils for Horticultural Scientists.
(2-2) Cr. 3. F.S. Prereq: CHEM 163
Manu. Physical, chemical, and biological properties of natural and manufactured soils. Use of soil information when producing plants on natural and manufactured soils. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

AGRON 156. Soils for Urban Use.
(2-2) Cr. 3. F.S.
Restricted to students outside the College of Agriculture. Manu. Fundamental properties of soils and their application to urban settings. Development of a site plan for area of land using data from soil survey and computerized data bank information. Field trip. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

(Cross-listed with GEOL, ENV S, MTEOR). (3-0) Cr. 3. S.
Study of the occurrence, history, development, and management of world water resources. Basic hydrologic principles including climate, surface water, groundwater, and water quality. Historical and current perspectives on water policy, use, and the role of water in society and the environment.

AGRON 206. Introduction to Weather and Climate.
(Cross-listed with MTEOR). (3-0) Cr. 3. F.S.
Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.
AGRON 210. Professional Development in Agronomy: Career Planning.  (1-0) Cr. 1. F. Prereq: Sophomore classification
Career planning, résumé and cover letter preparation, and interviewing techniques. Career orientation through invited speakers.

AGRON 212. Crop Growth, Productivity and Management.  (3-0) Cr. 3. F.S. Prereq: AGRON 114

AGRON 212L. Field Application and Problem Solving in Crop Production.  (0-2) Cr. 1. F.S. Prereq: AGRON 154, credit or enrollment in AGRON 212
Problem solving in crop production. Integration and application of concepts introduced in Agron 212. Agronomic field skills such as crop and pest identification, integrated management strategies, staging crop growth, agricultural math and site specific management related to crop production will be emphasized.

AGRON 217. Weed Identification.  (0-3) Cr. 1. F.S. Prereq: BIOL 101 or equivalent
Identification of important weeds of agricultural, horticultural and native ecosystems. Principles of plant taxonomy and classification. Field trips.

AGRON 259. Organic Compounds in Plant and Soil Environments.  (3-0) Cr. 3. S. Prereq: Chem 163, 167, or 177; Biol 211; 6 credits in Agronomy or Environmental Sciences; Math 140 recommended.
Structure, function, and transformations of organic compounds significant in plant and soil environments.

AGRON 260. Soils and Environmental Quality.  (Cross-listed with ENV S). (3-0) Cr. 3. F.S.
Burress. Role of soils in environmental quality and natural resources management. Emphasis on soil erosion and conservation, water quality, and environmental planning. Saturday field trip.

AGRON 283. Pesticide Application Certification.  (Cross-listed with ENT, FOR, HORT). (2-0) Cr. 2. S.
Holischer. Core background and specialty topics in agricultural and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

AGRON 298. Cooperative Education.  Cr. R. F.S.SS. Prereq: Permission of department cooperative education coordinator, sophomore classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Professional work experience in agronomy. See adviser for departmental requirements. Offered on a satisfactory-fail basis only.

AGRON 311. Professional Internship in Agronomy.  (1-0) Cr. 1. Repeatable. F.S. Prereq: AGRON 110, agronomy majors only, permission of instructor before internship begins
Wiedenhoft. A supervised learning experience in a professional setting related to crop production, plant breeding, soil science or environmental science.

AGRON 316. Crop Structure-Function Relationships.  (3-0) Cr. 3. F.S. Prereq: BIOL 212 Recommended
Knapp. Basic principles concerning the growth, development, and production of crop communities in relation to their environment.

AGRON 317. Principles of Weed Science.  (2-2) Cr. 3. F.

AGRON 320. Genetics, Agriculture and Biotechnology.  (Cross-listed with GEN). (3-0) Cr. 3. F.S. Prereq: BIOL 212
Lee and Salas. Transmission genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313L.

AGRON 325. Biorenewable Systems.  (Cross-listed with A E, TSM, A S, BSE, BUSAD, ECON). (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

AGRON 330. Crop and Seed Identification Laboratory.  (0-4) Cr. 2. S. Prereq: AGRON 114
Identification, agronomic and binomial classification of crops, weeds, and diseases. Analysis of crop seed samples for contaminants of weed and other crop seeds.

AGRON 331. Intercollegiate Crops Team.  (0-6) Cr. 2. Repeatable. F.S. Prereq: Permission of instructor
Intensive training in preparation for intercollegiate competition in national crops contests.

AGRON 334. Forage Crop Management.  (3-0) Cr. 3. F.S. Prereq: AGRON 114
Barthart. Production and management of forage crops; concepts applied to yield, quality, and stand persistence; systems of forage utilization including grazing, hay, and silage. Students enrolling for graduate credit will be expected to complete an additional class project. Nonmajor graduate credit.

AGRON 338. Seed Science and Technology.  (Cross-listed with HORT). (2-3) Cr. 3. F. Prereq: AGRON 114 or HORT 221, BIOL 211
Goggi. Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

AGRON 342. World Food Issues: Past and Present.  (Cross-listed with ENV S, FS HN, T SC). (3-0) Cr. 3. F.S. Prereq: Junior classification
Zdorkowski, Ford. Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Nonmajor graduate credit. Meets International Perspectives Requirement.

AGRON 342H. World Food Issues: Past and Present, Honors.  (Cross-listed with ENV S, FS HN, T SC). (3-0) Cr. 3. F.S. Prereq: Junior classification
Zdorkowski, Ford. Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Nonmajor graduate credit. Meets International Perspectives Requirement.

AGRON 351. Turfgrass Establishment and Management.  (Cross-listed with HORT). (3-0) Cr. 3. F. Prereq: HORT 221 or AGRON 114 or BIOL 211
Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadsides, and seed and sod production. The biology and control of turfgrass pests. Nonmajor graduate credit.

AGRON 351L. Turfgrass Establishment and Management Laboratory.  (Cross-listed with HORT). (0-3) Cr. 1. F. Prereq: Credit or enrollment in HORT 351
Those enrolled in the horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor. Nonmajor graduate credit.

AGRON 354. Soils and Plant Growth.  (Cross-listed with HORT). (3-0) Cr. 3. F.S. Prereq: AGRON 154 and BIOL 101 or BIOL 211
Loynachan. Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development. Nonmajor graduate credit.

AGRON 354L. Soils and Plant Growth Laboratory.  (Cross-listed with HORT). (0-3) Cr. 1. F.S. Prereq: Agron or Hort major with credit or enrollment in AGRON 354
Laboratory exercises in soil testing that assess a soil’s ability to support nutritive requirements for plant growth.
AGRON 356. Site-Specific Crop and Soil Management. (3-3) Cr. 4. F. Prereq: AGRON 114 and AGRON 354 Polito. Development of solutions to crop and soil management problems in consultation with a producer-client. Identification of client needs, gathering technical information, and use of geographic information systems as a tool for making crop and soil management decisions. Development and presentation of solutions for crop and soil management issues confronting the client. Emphasis will be placed on identifying and solving complex problems that require integration of biological, physical, chemical, and economic components within a crop and soil management system. Nonmajor graduate credit.

AGRON 360. Environmental Soil Science. (Cross-listed with ENSCI). (2-3) Cr. 3. S. Prereq: AGRON 154 or ENSCI 250 or GEOl 201 Burras. Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

AGRON 370. Field Experience in Soil Description and Interpretation. (0-3) Cr. 1. Repeatable, maximum of 4 times. F.S. Prereq: AGRON 154 and permission of instructor. Description and interpretation of soils in the field and laboratory, emphasizing hands-on experience. Evaluation of soil information for land use. Students may participate in intercollegiate judging contests.

AGRON 392. Systems Analysis in Crop and Soil Management. (2-3) Cr. 3. F. S. Prereq: AGRON 316 and AGRON 354 Wiedenhoft. Management strategies at the level of the farm field. Emphasis will be on participatory learning activities.

AGRON 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AGRON 402. Watershed Hydrology and Surficial Processes. (Cross-listed with IA LL, ENSCI). Cr. 4. SS. Prereq: Four courses in physical or biological sciences or engineering Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.

AGRON 404. Global Change. (Dual-listed with AGRON 504). (Cross-listed with MTEOR, ENSCI, ENV S). (3-0) Cr. 3. S. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Nonmajor graduate credit.

AGRON 405. Environmental Biophysics. (Dual-listed with AGRON 505). (Cross-listed with MTEOR, ENSCI). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MATH 165 or MATH 182 or equivalent and some computer programming experience (any language). Hombuckle. A description of the physical microenvironment in which organisms live. Emphasis on the movement of energy (heat and radiation) and mass (water and carbon) among organisms, the soil, and atmosphere. Applications to humans, other animals, plants, and plant communities. Nonmajor graduate credit.

AGRON 406. World Climates. (Cross-listed with MTEOR, ENSCI). (3-0) Cr. 3. F. Prereq: AGRON 206/MTEOR 206 Arnett. Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Nonmajor graduate credit. Meets International Perspectives Requirement.

AGRON 410. Professional Development in Agronomy: Senior Forum. (1-0) Cr. 1. F. S. Prereq: Senior classification. Development of an appropriate content for professionalism. Topics include professional certification, ethics, and maintaining an active network of information sources and professional contacts in support of lifelong learning. Student interpretation, writings, presentations, and discussions.

AGRON 417. Evolutionary Ecology of Weeds. (Dual-listed with AGRON 517). (3-0) Cr. 3. Prereq: AGRON 317 Dekker. Ecology and evolution of invasive plants and weeds in habitats disturbed by humans. Life history trait evolution and adaptation to agricultural opportunities and the consequent processes of invasion, colonization, enduring occupation and population shifts. Roles played by mating systems and biodiversity, soil seed pools and community assembly, competitive interactions with neighbors and fitness.

AGRON 421. Introduction to Plant Breeding. (Cross-listed with HORT). (3-0) Cr. 3. F. Prereq: GEN 320 or BIOL 313 Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and asexually reproducing agronomic and horticultural crops. Applications of biotechnology techniques in the development of improved cultivars. Nonmajor graduate credit.

AGRON 446. International Issues and Challenges in Sustainable Development. (Cross-listed with GLOBE, INTST). Cr. 4. S. Prereq: 3-credit biology course, Sophomore or higher classification, permission of instructor Mullen. Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economical, political, and historical factors affecting sustainable development of communities and countries from art and science perspectives. International field experience with foreign language training required. A program fee is charged to students for international study abroad. Meets International Perspectives Requirement.

AGRON 452. GIS for Geoscientists. (Dual-listed with AGRON 552). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: GEOL 100, GEOL 201 or equivalent Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses. Nonmajor graduate credit.

AGRON 459. Environmental Soil and Water Chemistry. (Dual-listed with AGRON 559). (Cross-listed with ENSCI). (3-3) Cr. 4. F. Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 154 or AGRON 360; GEOL 100 and AGRON 354 recommended. Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues. Nonmajor graduate credit.

AGRON 463. Soil Formation and Landscape Relationships. (Dual-listed with AGRON 563). (Cross-listed with ENSCI). (2-4) Cr. 4. S. Prereq: AGRON 154 or AGRON 260 Burras. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Nonmajor graduate credit. Credit for one of AGRON 463 or AGRON 463L may be applied for graduation.

AGRON 477. Soil Physics. (Dual-listed with AGRON 577). (Cross-listed with ENSCI). (3-0) Cr. 3. S. Prereq: Recommended AGRON 154 MATH 166 Horton. The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.
AGRON 484. Organic Agricultural Theory and Practice. 
(Dual-listed with AGRON 584). (Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: 9 cr. in biological or physical sciences. Delaye. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

AGRON 485. Soil and Environmental Microbiology. 
(Dual-listed with AGRON 585). (Cross-listed with ENSCI, MICRO). (2-3) Cr. 3. F. Prereq: AGRON 154 or AGRON 402, MICRO 201 (MICRO 201L recommended). Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. Nonmajor graduate credit.

AGRON 488. GIS for Geoscientists II. 
(Dual-listed with AGRON 588). (Cross-listed with GEOL, ENSCI). (2-2) Cr. 3. Alt. S., offered 2013. Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent. GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project. Nonmajor graduate credit.

AGRON 490. Independent Study. 
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S. Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation. Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490E. Entrepreneurship. 
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S. Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation. Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490G. General. 
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S. Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation. Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490H. Independent Study, Honors. 
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S. Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation. Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490Z. Service Learning. 
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.S. Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation. Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 491. Seed Science Internship Experience. 
(Cross-listed with HORT). Cr. 1-2. Repeatable, maximum of 1 times. F.S.S. Prereq: Agron 338, advanced approval and participation of employer and instructor. A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

AGRON 493. Workshop in Agronomy. 
Cr. arr. Repeatable, maximum of 4 times. Prereq: Permission of instructor Staff. Workshop experience in crops, soils, or agricultural meteorology. Nonmajor graduate credit.

AGRON 495. Agricultural Travel Course Preparation. 
Cr. R. Repeatable. F.S. Prereq: Permission of instructor. Limited enrollment. Students enrolled in this course intend to register for Agron 496 the following term. Topics will include the agricultural industries, climate, crops, culture, economics, geography, history, livestock, marketing, soils, and preparation for travel to locations to be visited.

AGRON 496. Agricultural Travel Course. 
Cr. arr. Repeatable. Prereq: Permission of instructor. Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.

AGRON 496A. International Tour. 

AGRON 496B. Domestic Tour. 
Cr. arr. Repeatable. Prereq: Permission of instructor. Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.

AGRON 497. Agroecology Field Course. 
(3-0) Cr. 3. F. Prereq: Jr. or Sr. classification with at least 8 credits in Agronomy. A one-week intensive class, offered off-campus. Student will visit farms within the Midwest and analyze the sustainability of each farm.

AGRON 498. Cooperative Education. 
Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:

AGRON 500. Orientation Seminar. 
(2-0) Cr. 1. F. Prereq: International agronomy graduate students only. Loynachan. An introduction to Iowa and U.S. agriculture for international scholars in agronomic majors. Field trips when possible. Departmental role in the functioning of research, teaching, and extension in fulfilling the charge given the land-grant university.

AGRON 501. Crop Growth and Development. 
(3-0) Cr. 3. F.S. Prereq: AGRON 114, MATH 140, CHEM 163, BIOL 101. Physiological processes in crop growth, development and yield: photosynthesis, respiration, water relations, mineral nutrition, assimilate partitioning, seedling vigor, light interception and canopy growth, root growth, reproduction and yield. Required course for the Master of Science in Agronomy degree program.

AGRON 502. Chemistry, Physics, and Biology of Soils. 
(3-0) Cr. 3. F. Prereq: AGRON 114, AGRON 154, BIOL 101, CHEM 163, and MATH 140. Soil chemical, physical, and biological properties that control processes within the soil, their influence on plant-soil interactions, and soil classification. Basic concepts in soil science and their applications. Required course for the Master of Science in Agronomy degree program.

AGRON 503. Climate and Crop Growth. 
(3-0) Cr. 3. F.S.S. Prereq: AGRON 114 and MATH 140. Applied concepts in climate and agricultural meteorology with emphasis on the climate-agriculture relationship and the microclimate-agriculture interaction. Basic meteorological principles are also presented to support these applied concepts. Required course for the Master of Science in Agronomy degree program.

AGRON 504. Global Change. 
(Dual-listed with AGRON 404). (Cross-listed with METEO, ENSCI, ENV S). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior, senior, or graduate standing. Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.
AGRON 505. Environmental Biophysics.  
(Dual-listed with AGRON 405). (Cross-listed with MTEOR, ENSCI). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MATH 165 or MATH 182 or equivalent and some computer programming experience (any language) 
Hornbuckle. A description of the physical microenvironment in which organisms live. Emphasis on the movement of energy (heat and radiation) and mass (water and carbon) among organisms, the soil, and atmosphere. Applications to humans, other animals, plants, and plant communities. Nonmajor graduate credit.

AGRON 507. Mesoscale Meteorology.  
(Dual-listed with AGRON 407). (Cross-listed with MTEOR). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: Math 166 and Mteor 443 

(3-0) Cr. 3. F. Prereq: AGRON 505 

AGRON 509. Agroecosystems Analysis.  
(Cross-listed with SUSAG, SOC). (3-4) Cr. 4. F. Prereq: Senior or above classification 
Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc.), and scales of operation.

AGRON 510. Crop Improvement.  
(Cross-listed with STB). (3-0) Cr. S. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor 

AGRON 511. Crop Improvement.  
(3-0) Cr. 3. S. Prereq: AGRON 114, MATH 140, CHEM 163, BIOL 101 
Bhattacharyya. Fundamental genetic and cytogenetic concepts from plant perspective including recombination, linkage analysis, genetic and molecular mapping, male sterility, self incompatibility, apomixis, and polyploid evolution.

AGRON 512. Soil-Plant Environment.  
(3-0) Cr. 3. S. Prereq: AGRON 502. Recommended AGRON 501 
Lownachan. Soil properties and their impact on soil/plant relationships. Soil structure, aeration, moisture, and nutrients will be discussed in the context of soil fertility and environmental quality management. Required course for the Master of Science in Agronomy degree program.

AGRON 513. Quantitative Methods for Agronomy.  
(3-0) Cr. 3. F.S. Prereq: AGRON 114, MATH 140, STAT 104 
Quantitative methods for analyzing and interpreting agronomic information. Principles of experimental design, hypothesis testing, analysis of variance, regression, correlation, and graphical representation of data. Use of SAS and Excel for organization, analyzing, and presenting data. Required course for the Master of Science in Agronomy degree program.

AGRON 514. Integrated Pest Management.  
(3-0) Cr. 3. SS. Prereq: AGRON 114, 501, MATH 140, CHEM 163, BIOL 101. Recommended: AGRON 502, AGRON 503 
Principles and practices of weed science, entomology, and plant pathology applied to crop production systems. Biology, ecology and principles of integrated crop pest management. Required course for the Master of Science in Agronomy degree program.

AGRON 515. Integrated Crop and Livestock Production Systems.  
(Cross-listed with A E, SUSAG, AN S). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: SUSAG 509 
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

AGRON 516. Crop Physiology.  
(3-0) Cr. 3. S. 
Westgate. Investigation of Molecular, whole plant, and plant community processes essential to biomass production and seed formation, and analysis of molecular approaches to overcome the limitations imposed on these processes by the environment.

(Dual-listed with AGRON 417). (3-0) Cr. 3. S. Prereq: AGRON 317 Dekker. Ecology and evolution of invasive plants and weeds in habitats disturbed by humans. Life history trait evolution and adaptation to agricultural opportunities and the consequent processes of invasion, colonization, enduring occupation and population shifts. Roles played by mating systems and biodiversity, soil seed pools and community assembly, competitive interactions with neighbors and fitness.

(Cross-listed with E E, MTEOR). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: Math 265 or equivalent 
Microwave remote sensing of Earth’s surface and atmosphere using satellite-based or ground-based instruments. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, ocean salinity, and soil moisture.

AGRON 519. Herbicide Physiology and Biochemistry.  
(2-0) Cr. 2. Alt. S., offered 2012. Prereq: AGRON 317; BIOL 330 
Owen. Herbicide mechanisms of action, selectivity, uptake, and translocation. Specific sites of herbicide action as they affect plant physiology. Herbicide resistance in weeds and crops. Implications of herbicides on weed management.

AGRON 521. Principles of Cultivar Development.  
(3-0) Cr. 3. F. Prereq: AGRON 421; STAT 401 
Theoretical and practical analysis of alternative breeding methods to improve crop plants. Strategies to incorporate germplasm resources, develop populations, maximize genetic gain, and use marker-assisted selection. Relationship of breeding methods to commercial seed production.

AGRON 522. Field Methods in Plant Breeding.  
Field experience in planning and conducting plant breeding research for germplasm and cultivar development. Offered on a satisfactory-fail basis only.

AGRON 523. Molecular Plant Breeding.  
(2-2) Cr. 3. S. Prereq: AGRON 421 or AGRON 521; GDCB 542A 
Plant breeding in the era of sequenced genomes and transformation. High throughput genomic technologies will be presented in relation to various applications in plant breeding.

AGRON 526. Field Plot Technique.  
(3-0) Cr. 3. Alt. S., offered 2013. Prereq: STAT 401 
Moore. Planning experiments for agricultural research, analysis of data, and concepts in data interpretation.

AGRON 527. Plant Genetics.  
(3-0) Cr. 3. S. Prereq: GEN 410 
Bhattacharyya. Fundamental genetic and cytogenetic concepts from plant perspective including recombination, linkage analysis, genetic and molecular mapping, male sterility, self incompatibility, apomixis, and polyploid evolution.

AGRON 529. Publishing in Biological Sciences Journals.  
(Cross-listed with HORT, NREM). (3-0) Cr. 3. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data 
Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

AGRON 530. Ecologically Based Pest Management Strategies.  
(Cross-listed with SUSAG, ENT, PL P). (3-0) Cr. 3. Alt. F., offered 2014 
Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on understanding the relationships of pests to the environment.

(3-0) Cr. 3. F. Prereq: AGRON 501, AGRON 502, AGRON 503. Recommended: AGRON 512, AGRON 514 
Ecological principles underlying crop production systems. Crop production in the context of management approaches, system resources and constraints, and interactions. Emphasis on the ecology of row and forage crops common to the Midwest. Required course for the Master of Science in Agronomy degree program.
AGRON 522. Soil Management. (3-0) Cr. 3. F. Prereq: AGRON 501, AGRON 503, AGRON 512. Recommended AGRON 513
Evaluates the impact of various soil management practices on soil and water resources. Combines and applies basic information gained in Agron 502 and Agron 512. Emphasizes the agronomic, economic, and environmental effects of soil management strategies. Required course for the Master of Science in Agronomy degree program.

AGRON 533. Crop Protection. (3-0) Cr. 3. F. Prereq: AGRON 514
Integrated management systems for important crop pests. Cultural, biological and chemical management strategies applicable to major crops grown in the Midwest. Required course for the Master of Science in Agronomy degree program.

AGRON 534. Seed and Variety, Testing and Technology. (Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor
The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isozyme testing, and DNA marker testing. Procedures for evaluating varieties. The variance tests appropriate for fixed effects analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

AGRON 535. Introduction to the Seed Industry. (Cross-listed with STB). Cr. 1. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
An analysis of the defining characteristics of the seed industry and introduction to the Master in Seed Technology and Business curriculum. The tasks of crop improvement and seed production will be analytically related to basic management functions and classifications of management activities that are used in the study of business administration. Management tasks and roles will be analyzed in related to the public policy issues that shape the seed industry, including ethical and economical approaches to biotechnology, intellectual property, and corporate responsibility.

AGRON 536. Quantitative Methods for Seed. (Cross-listed with STB). (1-0) Cr. 1. F. Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor
Principles of experimental design and hypothesis testing, regression, correlation and graphical representation of data. Use of spreadsheets for manipulating, analyzing and presenting data.

AGRON 539. Seed Conditioning and Storage. (Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor
The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as a focal point within the overall operations of a seed company.

AGRON 541. Applied Agricultural Meteorology. Cr. 2-3. F.S.SS. Prereq: AGRON 206 or upper division Biological Science Taylor. Applied concepts in agricultural meteorology. Basic concepts of weather and of crop/climate relationships influencing production, protection, yield and associated production risk factors. Self study sections are available to resident and to distant education students all semesters. Credit for only one of Agron 503 or 541 may be applied toward graduation.

AGRON 547. Seed Production. (Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor
Survey of crop production; including management of soil fertility, planting dates, populations, weed control, and insect control. Analysis of the principles of seed multiplication and the key practices which are used to ensure high quality in the products. Field inspection procedures and production aspects that differ from other crop production. Foundation seed production. Analysis of the typical organization of field production tasks. Resources and capabilities required. Survey of differences in seed production strategies between crops and impact of differences on management of seed production.

AGRON 551. Growth and Development of Perennial Grasses. (Cross-listed with HORT). (2-0) Cr. 2. Alt. S., offered 2014. Prereq: Junior or senior or graduate classification or permission of instructor
Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.

AGRON 552. GIS for Geoscientists. (Dual-listed with AGRON 452). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: GEOL 100, GEOL 201 or equivalent
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI's ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

AGRON 553. Soil-Plant Relationships. (Cross-listed with ENSCI). (3-0) Cr. 3. F. Prereq: AGRON 354 Composition and properties of soils in relation to the nutrition and growth of plants.

AGRON 555L. Soil Clay Mineralogy Laboratory. (Cross-listed with GEOL). (0-3) Cr. 1. Alt. S., offered 2013. Prereq: Credit or enrollment in AGRON 555 Laid. Application of X-ray diffraction, thermal analysis, infrared spectroscopy, and chemical analyses to identification and behavior of clay minerals in soils.

AGRON 558. Laboratory Methods in Soil Chemistry. (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered 2012. Prereq: AGRON 354 and CHEM 211 Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic and molecular absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

AGRON 559. Environmental Soil and Water Chemistry. (Dual-listed with AGRON 459). (Cross-listed with ENSCI). (3-3) Cr. 4. F. Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 154 or AGRON 360; GEOL 100 and AGRON 354 recommended. Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues. Nonmajor graduate credit.

AGRON 561. Population and Quantitative Genetics for Breeding. (Cross-listed with AN S). (4-0) Cr. 4. F. Prereq: STAT 401 Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.
AGRON 563. Soil Formation and Landscape Relationships.
(Dual-listed with AGRON 463). (Cross-listed with ENSCI). (2-4) Cr. 4. S. Prereq: AGRON 154 or AGRON 260
Burress. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of Agron 563 or 563I may be applied for graduation.

AGRON 563I. Soil Formation and Landscape Relationships.
(Dual-listed with AGRON 463I). (Cross-listed with IA LL, ENSCI). Cr. 4. Alt. SS., offered 2012. Prereq: AGRON 154 or AGRON 260
Burress. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only Agron 563 or 563I may be applied for graduation.

AGRON 570. Risk Assessment for Food, Agriculture and Veterinary Medicine.
(Cross-listed with VDPAM, TOX). (3-0) Cr. 3. F. Prereq: STAT 104 or consent of instructor
Wolt, Hurd. Risk assessment principles as applied to biological systems. Exposure and effects characterization in human and animal health and ecological risk assessment. Risk analysis frameworks and regulatory decision-making. Introduction to quantitative methods for risk assessment using epidemiological and distributional analysis. Uncertainty analysis. This course is available on campus and by distance.

AGRON 575. Soil Formation and Transformation.
(Cross-listed with ENSCI). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: AGRON 463 or equivalent
Advanced study of soil formation, emphasizing relationships among soils, landscapes, environment, humans, and land use.

AGRON 577. Soil Physics.
(Dual-listed with AGRON 477). (Cross-listed with ENSCI). (3-0) Cr. 3. S. Prereq: Recommended: AGRON 154 and MATH 166
Horton. The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

AGRON 578. Laboratory Methods in Soil Physics.
(Cross-listed with ENSCI). (0-3) Cr. 1. S. Prereq: concurrent enrollment in AGRON 477 or 577
Horton. Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.

AGRON 584. Organic Agricultural Theory and Practice.
(Dual-listed with AGRON 484). (Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: 9 cr. in biological or physical sciences
Delate. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

AGRON 585. Soil and Environmental Microbiology.
(Dual-listed with AGRON 485). (Cross-listed with ENSCI, MICRO). (2-3) Cr. 3. F. Prereq: AGRON 154 or AGRON 402, MICRO 201 (MICRO 201L recommended) Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

AGRON 588. GIS for Geoscientists II.
(Dual-listed with AGRON 488). (Cross-listed with GEOI, ENSCI). (2-2) Cr. 3. Alt. S., offered 2013. Prereq: GIS course, such as GEOI 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 458 or equivalent
GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOI 588) a class project.

AGRON 590. Special Topics.
Cr. arr. Repeatable. Prereq: 15 credits in agronomy
Literature reviews and conferences on selected topics in crops, soils, or agricultural meteorology according to needs and interest of student.

AGRON 591. Agronomic Systems Analysis.
(3-0) Cr. 3. S. Prereq: AGRON 511, AGRON 513, AGRON 531, AGRON 532, AGRON 533
Analysis of cropping systems from a problem-solving perspective. Case studies will be used to develop the students’ ability to solve agronomic problems. Required course for the Master of Science in Agronomy degree program.

(3-0) Cr. 3. S. Prereq: AGRON 501, AGRON 503, AGRON 511, AGRON 512, AGRON 513, AGRON 514
Study and discussion of topics of current interest to the field of agronomy. While Agron 591 deals with agronomics at the farm and landscape level, Agron 592 seeks to address issues on a broader scale including off-farm agricultural impacts. Required course for the Master of Science in Agronomy degree program.

AGRON 593. Workshop in Agronomy.
Cr. arr. Repeatable. Prereq: Graduate classification

AGRON 593A. Crops.
Cr. arr. Repeatable. Prereq: Graduate classification

AGRON 593B. Soils.
Cr. arr. Repeatable. Prereq: Graduate classification

AGRON 593C. Agricultural Meteorology.
Cr. arr. Repeatable. Prereq: Graduate classification

AGRON 593D. Seed Science.
Cr. arr. Repeatable. Prereq: Graduate classification

AGRON 593E. Weed Science.
Cr. arr. Repeatable. Prereq: Graduate classification

AGRON 594. Agronomy MS Practicum.
(1-0) Cr. 1. SS. Prereq: AGRON 501, AGRON 502, AGRON 503, AGRON 514 (or current enrollment. Recommended: AGRON 511, AGRON 512, AGRON 513 Practical field and laboratory experiences integrating coursework in climatology, crops, and soils. Includes lectures, labs and local agri-business tours.

AGRON 595. Seed Quality, Production, and Research Management.
(Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor
Advanced survey of the organization, staff capabilities and management characteristics typical in seed production and crop improvement in seed enterprises. Analysis of the use of quality information in the management of seed operations and sales. Process management applications for seed. Production planning for existing capacity. Analysis of the manager’s tasks in the annual cycle and how the tasks of these managers relate to the general categories of business management roles. Difference in management strategies used with different situations and groups of employees.

AGRON 599. Creative Component.
Cr. arr. Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599A. Agricultural Meteorology.
Cr. arr. Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599B. Crop Production and Physiology.
Cr. arr. Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599C. Plant Breeding.
Cr. arr. Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599D. Seed Science.
Cr. arr. Repeatable. Prereq: Graduate classification

AGRON 599E. Soil Fertility.
Cr. arr. Repeatable. Prereq: Graduate classification

AGRON 599F. Soil Management.
Cr. arr. Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599G. Soil Microbiology and Biochemistry.
Cr. arr. Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.
AGRON 599H. Soil Morphology and Genesis.
Cr. arr. Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599I. Soil Physics.
Cr. arr. Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599K. Seed Science.
Cr. arr. Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599L. Weed Science.
Cr. arr. Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599M. Agronomy.
Cr. arr. Prereq: Nonthesis M.S. option only
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

Courses for graduate students:

AGRON 600. Seminar.
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.
Reports and discussion of recent literature and research.

AGRON 600A. Plant Breeding.
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.
Reports and discussion of recent literature and research.

AGRON 600B. Soils.
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.
Reports and discussion of recent literature and research.

AGRON 600C. Crop Production and Physiology.
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.
Reports and discussion of recent literature and research.

AGRON 609. Agricultural Meteorology.
(1-0) Cr. 1. Repeatable. F.S.SS. Prereq: Permission of instructor
Literature reviews and conferences with instructor on special problems relating to agricultural meteorology, beyond the scope of current courses offered.

AGRON 610. Foundations of Sustainable Agriculture.
(Cross-listed with SUSAG, A.E, ANTHR, SOC). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

AGRON 616. Advanced Topics in Plant Physiology and Biochemistry.
(4-0) Cr. 4. Alt. S., offered 2012. Prereq: Graduate classification; permission of instructor
Westgate. An in-depth treatment of physiological, biochemical and molecular processes regulating plant growth and development. Emphasis on individual study followed by in-class presentations and discussion.

AGRON 621. Advanced Plant Breeding.
(3-0) Cr. 3. F. Prereq: AGRON 521, AGRON 526, AGRON 561; GEN 410 Beavis. Estimation and interpretation of genetic effects and variances of plant breeding populations, analysis of mating designs, estimation of combining ability and heritability, best linear unbiased prediction, selection indices with and without molecular information, inbreeding and heterosis.

AGRON 625. Genetic Strategies in Plant Breeding.
(3-0) Cr. 3. Alt. S., offered 2013. Prereq: AGRON 521, GEN 510 Lee. Evaluation of genetic, molecular, and cellular approaches to crop improvement; gene transfer methods. Application and role of basic plant biology in breeding programs and processes; genome structure and function, gene isolation, expression, regulation, and modification. Integration of molecular and cellular methods in breeding strategies; analysis of alternative breeding methods, regulatory and ethical issues.

AGRON 655. Advanced Soil Fertility.

AGRON 677. Advanced Soil Physics.

AGRON 685. Advanced Soil Biochemistry.

AGRON 696. Research Seminar.
(Cross-listed with PLBIO, BBMB, GDCB, HORT, FOR). Cr. 1. Repeatable. F.S.
Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

AGRON 698. Agronomy Teaching Practicum.
Cr. 1-2. Repeatable. F.S.SS. Prereq: Graduate classification in agronomy and permission of instructor
Graduate student experience in the agronomy teaching program. Offered on a satisfactory-fail basis only.

AGRON 699. Research.
Cr. arr. Repeatable.

AGRON 699A. Agricultural Meteorology.
Cr. arr. Repeatable.

AGRON 699B. Crop Production and Physiology.
Cr. arr. Repeatable.

AGRON 699C. Plant Breeding.
Cr. arr. Repeatable.

AGRON 699D. Soil Chemistry.
Cr. arr. Repeatable.

AGRON 699E. Soil Fertility.
Cr. arr. Repeatable.

AGRON 699F. Soil Management.
Cr. arr. Repeatable.

AGRON 699G. Soil Microbiology and Biochemistry.
Cr. arr. Repeatable.

AGRON 699H. Soil Morphology and Genesis.
Cr. arr. Repeatable.

AGRON 699I. Soil Physics.
Cr. arr. Repeatable.

AGRON 699J. Plant Physiology.
Cr. arr. Repeatable.

AGRON 699K. Seed Science.
Cr. arr. Repeatable.

AGRON 699L. Weed Science.
Cr. arr. Repeatable.

Animal Science

Undergraduate Study

The Department of Animal Science Undergraduate Program intends for its graduates to be able to detail the symbiotic relationship of animals and humans, to contribute to the solution of complex problems of animal enterprise management using a sustainable model, and to apply their knowledge and skills in a technically demanding global community. To enable learners to pursue a wide array of career interests, the department offers learning experiences ranging from the basic to the applied sciences. The department’s undergraduate degree program has 10 major program goals. They are to provide a comprehensive animal science education in:

- science
- animal management
- agribusiness

In addition, our program strives to create an environment developing:

- effective communication skills
- skills enabling students to gather and integrate information to solve problems
- self learners
The department offers a minor in Meat Science. The minor requires:

- Two courses from the following:
  - AN S 270 Foods of Animal Origin
  - AN S 270L Foods of Animal Origin Laboratory
  - AN S 360 Fresh Meats
  - AN S 460 Processed Meats

One course from the following:
- AN S 216 Equine Science
- AN S 223 Poultry Science
- AN S 224 Companion Animal Science
- AN S 225 Swine Science
- AN S 226 Beef Cattle Science
- AN S 229 Sheep Science
- AN S 235 Dairy Cattle Science

Two courses from the following:
- AN S 319 Animal Nutrition
- AN S 331 Domestic Animal Reproduction
- AN S 352 Genetic Improvement of Domestic Animals
- AN S 360 Fresh Meats

Total Credits: 17

A total of 9 credits must be earned at Iowa State University in animal science coursework that meets a degree requirement for the B.S. degree in animal science. Students interested in the Animal Science minor should contact an Animal Science adviser.

**Minor - Meat Science**

The department offers a minor in Meat Science. The minor requires:

- Two courses from the following:
  - FS HN 311 Food Chemistry
  - FS HN 403 Food Laws, Regulations, and the Regulatory Process
  - FS HN 405 Food Quality Assurance
  - FS HN 406 Sensory Evaluation of Food
  - FS HN 410 Food Analysis
  - FS HN 412 Food Product Development
  - FS HN 419 Foodborne Hazards
  - FS HN 420 Food Microbiology
  - FS HN 471 Food Processing I
  - MICRO 407 Microbiological Safety of Foods of Animal Origins

**Graduate Study**

The department offers work for the degrees master of science and doctor of philosophy with majors in animal breeding and genetics; meat science; animal physiology; animal science; and an interdepartmental program in nutritional sciences which has an option in animal nutrition. Minor work is offered in these areas to students taking major work in other departments.

A strong undergraduate program is required for students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate programs in animal science include supporting work in areas such as agricultural engineering, agronomy; anatomy; biochemistry; chemistry; economics; environmental science; food science and human nutrition; genetics; microbiology; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas. Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, microbiology, MCD (molecular, cellular, and developmental biology), neuroscience, nutritional sciences, and toxicology (see Index (http://catalog.iastate.edu/azindex)).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

**Curriculum in Animal Science**

Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science from Iowa State University a minimum of 15 credits in Animal Science must be earned from courses taught in the Animal Science department at ISU. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Social Sciences requirements.

See Also: A 4-year plan of study grid showing course template by semester. ([https://nextcatalog.registrar.iastate.edu/planofstudy/agricultureandlifesciences/#animalsciencebs](https://nextcatalog.registrar.iastate.edu/planofstudy/agricultureandlifesciences/#animalsciencebs))

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective:**
- Approved International Perspectives course: 3

**U.S. Diversity:**
- Approved U. S. Diversity course: 3

**Communications Proficiency (with a C or better):**
- English composition: 6
- Speech fundamentals: 3

**Total Credits: 9**

**Communication/Library:**
- ENGL 150 Critical Thinking and Communication: 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition: 3
- LIB 160 Information Literacy: 1
- One of: 3
  - SP CM 212 Fundamentals of Public Speaking
  - AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
  - COMST 214 Professional Communication
- One of: 3
  - ENGL 302 Business Communication

**Total Credits** 13

### Humanities and Social Sciences:

- **Approved Humanities course** 3
- **Approved Social Science course** 3

**Total Credits** 6

### Ethics:

- **Approved Ethics course** 3

**Total Credits** 2

### Mathematical Sciences:

- **Note:** some options may restrict choices.
  - **One course from the following:** 3-4
    - MATH 140 College Algebra
    - MATH 150 Discrete Mathematics for Business and Social Sciences
    - MATH 160 Survey of Calculus
    - MATH 165 Calculus I
    - MATH 181 Calculus and Mathematical Modeling for the Life Sciences I

**One course from the following:** 3-4:
- STAT 101 Principles of Statistics
- STAT 104 Introduction to Statistics
- STAT 226 Introduction to Business Statistics I

**Total Credits** 6-8

### Physical Sciences:

- **Note:** some options may restrict choices
  - **One course from the following:** 3
    - CHEM 177 General Chemistry I & Laboratory in General Chemistry I

**Or**
- CHEM 163 College Chemistry & Laboratory in College Chemistry

- **One course from the following:** 3
  - BBMB 221 Structure and Reactions in Biochemical Processes
  - CHEM 331 Organic Chemistry I

**Total Credits** 8

### Biological Sciences:

- **BIOL 211** Principles of Biology I 3
- **BIOL 211L** Principles of Biology Laboratory I 1
- **BIOL 212** Principles of Biology II 3
- **BIOL 212L** Principles of Biology Laboratory II 1
- **BIOL 313** Principles of Genetics 3
- or **GEN 320** Genetics, Agriculture and Biotechnology

**One course from the following:** 2-3:
- MICRO 201 Introduction to Microbiology
- MICRO 302 Biology of Microorganisms

**One course from the following:** 1
- MICRO 201L Introductory Microbiology Laboratory
- MICRO 302L Microbiology Laboratory

**Total Credits** 14-15

### Business:

- **One course from the following:** 3
  - ACCT 284 Financial Accounting
  - ECON 101 Principles of Microeconomics
  - ECON 102 Principles of Macroeconomics

**Total Credits** 3

### Animal Science Core:

- **AN S 101** Working with Animals 2
- **AN S 110** Orientation in Animal Science and ISU 1
- **AN S 114** Survey of the Animal Industry 2
- **AN S 210** Career Preparation in Animal Science 1
- **AN S 211** Issues Facing Animal Science 1
- **AN S 214** Domestic Animal Physiology 3
- **AN S 214L** Domestic Animal Anatomy and Physiology Lab 1
- **AN S 319** Animal Nutrition 3
- **AN S 320** Animal Feeds and Feeding 3
- **AN S 331** Domestic Animal Reproduction 3
- **AN S 352** Genetic Improvement of Domestic Animals 3
- **AN S 411** Addressing Issues in Animal Science 1

**Total Credits** 24

### General Animal Science:

- **Animal Science Core** 24
  - **Three courses from the following:** 9
    - **AN S 216** Equine Science
    - **AN S 223** Poultry Science
    - **AN S 224** Companion Animal Science
    - **AN S 225** Swine Science
    - **AN S 226** Beef Cattle Science
    - **AN S 229** Sheep Science
    - **AN S 235** Dairy Cattle Science
    - **AN S 270** Foods of Animal Origin
    & **AN S 270L** Foods of Animal Origin Laboratory

**One course from the following:** 2-4:
- **AN S 336** Domestic Animal Behavior and Well-Being
- **AN S 337** Lactation
- **AN S 345** Growth and Development of Domestic Animals
- **AN S 360** Fresh Meats
- **BIOL 314** Principles of Molecular Cell Biology
- **BIOL 352** Vertebrate Histology
- **BIOL 353** Introductory Parasitology
- **ENT 372** Livestock Entomology
- **ENT 374** Insects and Our Health
- **MICRO 310** Medical Microbiology
- **VDPAM 487** Livestock Disease Prevention

**One course from the following:** 3
- **AN S 415** Equine Systems Management
- **AN S 424** Companion Animal Systems Management
- **AN S 425** Swine Systems Management
- **AN S 426** Beef Cattle Systems Management
- **AN S 429** Sheep Systems Management
- **AN S 434** Dairy Systems Management

**One course from the following:** 2-3
- **AN S 415** Equine Systems Management
- **AN S 419** Advanced Animal Nutrition
- **AN S 424** Companion Animal Systems Management
- **AN S 425** Swine Systems Management
- **AN S 426** Beef Cattle Systems Management
- **AN S 429** Sheep Systems Management
- **AN S 434** Dairy Systems Management
- **AN S 460** Processed Meats
- **FS HN 405** Food Quality Assurance
- **FS HN 410** Food Analysis
- **FS HN 420** Food Microbiology
- **MICRO 407** Microbiological Safety of Foods of Animal Origins

**Total Credits** 40-43
## Pre-Veterinary Medicine Option

**Animal Science Core**

- BBMB 301  Survey of Biochemistry  3
- CHEM 178  General Chemistry II  3
- CHEM 331  Organic Chemistry I  3
- CHEM 331L  Laboratory in Organic Chemistry I  1
- CHEM 332  Organic Chemistry II  3
- PHYS 111  General Physics  5

ENT 374  Insects and Our Health
MICRO 310  Medical Microbiology
VDPAM 487  Livestock Disease Prevention

One course from the following:  
AN S 415  Equine Systems Management
AN S 424  Companion Animal Systems Management
AN S 425  Swine Systems Management
AN S 426  Beef Cattle Systems Management
AN S 429  Sheep Systems Management
AN S 434  Dairy Systems Management
AN S 460  Processed Meats
FS HN 405  Food Quality Assurance
FS HN 410  Food Analysis
FS HN 420  Food Microbiology
MICRO 407  Microbiological Safety of Foods of Animal Origins

Three courses from the following:  
BBMB 301  Survey of Biochemistry
BBMB 404  Biochemistry I
BBMB 405  Biochemistry II
BIOL 314  Principles of Molecular Cell Biology
BIOL 351  Comparative Chordate Anatomy
BIOL 352  Vertebrate Histology
BIOL 353  Introductory Parasitology
BIOL 365  Vertebrate Biology
BIOL 423  Developmental Biology
BIOL 434  Endocrinology
CHEM 211 & 211L  Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory
CHEM 332  Organic Chemistry II
MATH 186  Calculus II

or MATH 182  Calculus and Mathematical Modeling for the Life Sciences II
MICRO 475  Immunology
PHYS 111  General Physics
PHYS 112  General Physics
STAT 401  Statistical Methods for Research Workers
STAT 402  Statistical Design and the Analysis of Experiments

Total Credits 60-67

### Companion Animal Management Option

Curriculum in Dairy Science

Students majoring in Dairy Science will complete the degree requirements listed below. If desired, a student may also include the specialized option in pre-veterinary medicine. A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

See Also: A 4-year plan of study grid showing course template by semester (p. 103).

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective:**
- Approved International Perspectives course

**U.S. Diversity:**
- Approved U.S. Diversity course

**Communications Proficiency:**
- English composition
- Speech fundamentals

**Communication/Library:**
- Critical Thinking and Communication
- Written, Oral, Visual, and Electronic Composition

One course from the following:
- Presentation and Sales Strategies for Agricultural Audiences
- Professional Communication
- Fundamentals of Public Speaking
- Information Literacy

**Humanities and Social Sciences:**
- Approved Humanities course
- Approved Social Science course

**Ethics:**
- Approved Ethics course

**Mathematics and Business Sciences:**
- Principles of Microeconomics
- Principles of Statistics
- Introduction to Statistics
- Introduction to Business Statistics I
- Discrete Mathematics for Business and Social Sciences
- College Algebra
- Survey of Calculus
- Calculus and Mathematical Modeling for the Life Sciences I

**Biological Sciences:**
- Principles of Biology I
- Principles of Biology Laboratory I
- Principles of Biology II
- Principles of Biology Laboratory II
- Principles of Genetics
- Genetics, Agriculture and Biotechnology

One course from the following:
- Introduction to Microbiology
- Biology of Microorganisms

**Chemical Sciences:**
- College Chemistry
- General Chemistry I
- Laboratory in College Chemistry
- Laboratory in General Chemistry I
- Structure and Reactions in Biochemical Processes
- Organic Chemistry I

**Dairy Sciences:**
- Orientation in Animal Science and ISU
- Survey of the Animal Industry
- Working with Animals
- Career Preparation in Animal Science
- Issues Facing Animal Science
- Domestic Animal Physiology
- Domestic Animal Anatomy and Physiology Lab
- Dairy Cattle Science
- Foods of Animal Origin
- Foods of Animal Origin Laboratory
- Food and the Consumer
- Animal Nutrition
- Animal Feeds and Feeding
- Domestic Animal Reproduction
- Lactation
- Genetic Improvement of Domestic Animals
- Addressing Issues in Animal Science
- Dairy Systems Management
- Applied Dairy Farm Evaluation

Select 2 courses from an approved list

**Pre-Veterinary Medicine Option**

**Total Credits 47-48**
Courses

Courses primarily for undergraduates:

AN S 101. Working with Animals.
(1-2) Cr. 2. F.S.
A hands-on introductory course in skills for proper care and management of domestic animals. Husbandry skills including health observation, animal movement, identification, management procedures, and environmental assessment are covered.

AN S 110. Orientation in Animal Science and ISU.
(2-0) Cr. 1. F.S.
Orientation to the university and Department of Animal Science. Challenges and opportunities available to the professional animal agriculturalist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science.

(2-0) Cr. 2. F.S.S.S.
Ways domestic animals serve the basic needs of humans for food, shelter, protection, fuel, and emotional well-being. Terminology, basic structures of the industries surrounding the production, care, and marketing of domestic animals in the U.S.

AN S 199. Marketing and Management of Livestock Events.
(0-2) Cr. 1. Repeatable. F.S. Prereq: Credit or enrollment in AN S 101 or AN S 114 Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. For section E students are expected to take the fall and spring courses consecutively. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

AN S 199A. Marketing and Management of Livestock Events: Beef.
(0-2) Cr. 1. Repeatable. F.S. Prereq: Credit or enrollment in AN S 101 or AN S 114 Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. For section E students are expected to take the fall and spring courses consecutively. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

AN S 199E. Marketing and Management of Livestock Events: Horses.
(0-2) Cr. 1. Repeatable. F.S. Prereq: Credit or enrollment in AN S 101 or AN S 114 Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. For section E students are expected to take the fall and spring courses consecutively. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

(0-2) Cr. 1. F.S. Prereq: Sophomore classification in An S Life skill development emphasized in the context of career preparation. Assist students with career goal clarification, interview skills, resume and cover letter preparation. Internship development, job shadowing, and exploration of career option. Offered on a satisfactory-fail basis only.

AN S 211. Issues Facing Animal Science.
(0-2) Cr. 1. F.S. Prereq: AN S 114, sophomore classification Overview of the factors that define contemporary ethical and scientifically based issues facing animal agriculture. Life skill development (including interactive skills, communication ability, organization, information gathering, and leadership skills) emphasized in the context of issues study. Offered on a satisfactory-fail basis only.

AN S 214. Domestic Animal Physiology.
(3-0) Cr. 3. F.S. Prereq: BIOL 212, CHEM 163 or CHEM 177 Introduction to anatomy and physiology of the muscular, renal, skeletal, neural, mammary, cardiovascular, respiratory, immune, endocrine, reproductive, and digestive systems of domestic animals.

AN S 214L. Domestic Animal Anatomy and Physiology Lab.
(0-2) Cr. 1. F.S. Prereq: Concurrent enrollment in AN S 214 Basic anatomy of domestic animals.

AN S 216. Equine Science.
(2-2) Cr. 3. F.S.SS. Prereq: AN S 101 or AN S 114; one course in biology Introduction to contemporary concepts, and basic practices and decisions necessary when managing horses through stages of their lives.
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

AN S 317B. Fundamentals of Equine Behavior and Training: Yearlings. (0-6) Cr. 3. Prereq: Permission of instructor
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

AN S 317C. Fundamentals of Equine Behavior and Training: Two-year olds and older. (0-6) Cr. 3.
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

AN S 319. Animal Nutrition. (3-0) Cr. 3. F.S. Prereq: AN S 216, course in organic chemistry or biochemistry Structure and function of organic and inorganic nutrients. Digestion, absorption, metabolism and utilization of nutrients for maintenance and productive functions. Essential nutritive requirements of domestic livestock, poultry, and companion animals. Sources of nutrients, application of energy systems and concepts, and regulation of feed intake in animals. Nonmajor graduate credit.

AN S 320. Animal Feeds and Feeding. (2-2) Cr. 3. F.S. Prereq: AN S 319
Composition, physical properties, and storage and processing of feedstuffs. Nutrient requirements of and diet formulation, and preparation systems for food and companion animal species at varying stages of age, activity or production. Manual and computer methodologies for diet formulation.

AN S 325. Biorenewable Systems. (Cross-listed with A E, AGRON, TSM, BSE, BUSAD, ECON). (3-0) Cr. 3. F.S. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

AN S 331. Domestic Animal Reproduction. (3-0) Cr. 3. F.S. Prereq: Course in physiology Comparative anatomy, physiology, and endocrinology of domestic mammalian animal reproduction. Techniques for the control and manipulation of reproductive processes. Nonmajor graduate credit.

AN S 332. Laboratory Methods in Animal Reproduction. (0-2) Cr. 1. F.S. Prereq: Credit or enrollment in AN S 331
Comparative reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction; principles of artificial insemination in farm animals; pregnancy testing; selected laboratory exercises with written report.

AN S 333. Embryo Transfer and Related Technologies. (2-0) Cr. 1. F.S. Prereq: AN S 331 or AN S 332
Application of embryo transfer and related technologies to genetic improvement of mammalian livestock. Techniques for control of female reproduction, embryo collection and transfer, embryo cryopreservation, and embryo manipulation. Gender selection. Economic and genetic aspects of embryo transfer. Nonmajor graduate credit.

AN S 334. Embryo Transfer Laboratory. (0-3) Cr. 1. F. Prereq: Credit or concurrent enrollment in AN S 333; AN S 332 or VDPM 416; permission of instructor
Selected laboratory exercises related to embryo transfer such as synchronization of estrus, superovulation, detection of estrus, artificial insemination, embryo collection, embryo evaluation, microscopy, embryo cryopreservation, in vitro fertilization, embryo sexing, rectal palpation, and ultrasonography will be demonstrated and/or performed. Nonmajor graduate credit.

AN S 335. Dairy Cattle Evaluation. (0-6) Cr. 3. S. Prereq: Sophomore classification
Evaluation of breeding animals for dairy herds. Comparative terminology, decision making, and presentation of oral reasons. Trips to dairy cattle farms. Livestock handling.

AN S 336. Domestic Animal Behavior and Well-Being. (2-2) Cr. 3. F. Prereq: One course in physiology Principles of behavior relative to animal care, management and environmental design to ensure animal well-being. Examination of basic neural-endocrine mechanisms involved in the animal’s response to its environment. Awareness of animal protection, law and legislation. Methods to objectively assess animal well-being.

AN S 337. Lactation. (3-0) Cr. 3. S. Prereq: AN S 214

AN S 345. Growth and Development of Domestic Animals. (3-0) Cr. 3. S. Prereq: AN S 214; BIOL 313 or GEN 320
Basic principles of animal growth and development covered at the tissue, cellular and molecular level. Emphasis placed on skeletal muscle, adipose, bone, and immune system growth and development. The effects of genetics, nutrition, and pharmaceuticals on growth.

AN S 352. Genetic Improvement of Domestic Animals. (2-2) Cr. 3. F.S. Prereq: One course in statistics, BIOL 211, course in genetics Principles of qualitative and quantitative genetics applied to creating change in domestic animals. Impact of selection and mating schemes in achieving breeding program goals. Applications and impacts of biotechnological advancements in genetic manipulation. Nonmajor graduate credit.

AN S 360. Fresh Meats. (2-2) Cr. 3. F. Prereq: AN S 270; a course in organic or biochemistry Impact of muscle structure, composition, rigor mortis, inspection, fabrication, handling, packaging and cooking on the palatability, nutritional value, yields, market value, and safety of fresh meat. Nonmajor graduate credit.

AN S 399. Animal Science Internship. Cr. arr. Repeatable. F.S.SS.

AN S 411. Addressing Issues in Animal Science. (0-2) Cr. 1. F.S. Prereq: Senior classification in An S Life skill development emphasized in the context of exploring one’s perspective of the most pressing moral and scientific issues facing animal agriculture. Clarification and communication of personal conclusions in small and large group settings expected.

Total ration assessment for the equine including forage management, pasture management, and concentrates. Skill development for nutritional assessment using computer programs.

AN S 415. Equine Systems Management. (2-2) Cr. 3. S. Prereq: AN S 216, AN S 319, AN S 320, AN S 331

AN S 417. Equine Reproductive Management. (2-2) Cr. 3. S. Prereq: AN S 216, AN S 331, AN S 415 or concurrent and permission of instructor Practical application of managing a breeding farm including servicing the mare, handling stallions, breeding problems, foaling mares, and marketing techniques.

AN S 419. Advanced Animal Nutrition. (2-0) Cr. 2. F. Prereq: AN S 214, AN S 319, AN S 320
Detailed consideration of digestion, metabolism, and assimilation of nutrients. Recent advances and developments in basic nutrition. Nonmajor graduate credit.

AN S 424. Companion Animal Systems Management. (2-2) Cr. 3. S. Prereq: AN S 224, AN S 319, AN S 320, AN S 331, AN S 352
Decisions facing the administrator of a companion animal enterprise. Financial and business goal identification, problem clarification, and resource allocation to manage the companion animal system. Nonmajor graduate credit.
AN S 425. Swine Systems Management. (2-2) Cr. 3. F. Prereq: AN S 225, AN S 270, AN S 270L, AN S 319, AN S 320, AN S 331, AN S 352; ECON 230 or equivalent recommended

AN S 426. Beef Cattle Systems Management. (2-2) Cr. 3. F.S. Prereq: AN S 226, AN S 270, AN S 270L, AN S 319, AN S 320, AN S 331, AN S 352; ECON 230 or equivalent recommended
Decisions facing the administrator of a beef cow-calf or feedlot enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the beef enterprise. Computer aided study. Nonmajor graduate credit.

AN S 429. Sheep Systems Management. (2-2) Cr. 3. S. Prereq: AN S 229, AN S 319, AN S 320, AN S 331, AN S 352; AGRON 334 recommended; ECON 230 or equivalent recommended

AN S 433. Intercollegiate Judging Training and Competition: Meat Animals. (3-0) Cr. 3. F. Prereq: AN S 226, AN S 319, AN S 320, AN S 331, AN S 337, AN S 352; ECON 230 or equivalent recommended

AN S 434. Dairy Systems Management. (3-0) Cr. 3. F. Prereq: AN S 235, AN S 319, AN S 331, AN S 320, AN S 337, AN S 352; ECON 230 or equivalent recommended

AN S 435. Applied Dairy Farm Evaluation. (2-2) Cr. 3. S. Prereq: AN S 434; ECON 230
Evaluate nutrition, reproduction, milk quality, breeding, and related management practices of commercial dairy herds in a case study format. Students will apply knowledge gained in the classroom to commercial dairy farm situations and develop skills in information gathering, decision making, problem solving, and interpersonal communications. Nonmajor graduate credit.

AN S 460. Processed Meats. (Dual-listed with AN S 560). (2-2) Cr. 3. S. Prereq: AN S 270 and AN S 270L
Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products. Nonmajor graduate credit.

AN S 475. Intercollegiate Judging Training and Competition. (0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor
Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475A. Intercollegiate Judging Training and Competition: Meat Animals. (0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor
Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475B. Intercollegiate Judging Training and Competition: Dairy Cattle. (0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor
Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475C. Intercollegiate Judging Training and Competition: Meats. (0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor
Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475E. Intercollegiate Judging Training and Competition: Horses. (0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor
Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 480. Intercollegiate Judging Training and Competition: Animal Industry Leadership Fellows. Cr. 1. Repeatable. F.S. Prereq: A. AN S 226; permission of instructor C. AN S 225; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480A. Animal Industry Leadership Fellows: Beef. Cr. 1. Repeatable. F.S. Prereq: AN S 226; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480C. Animal Industry Leadership Fellows: Pork. Cr. 1. Repeatable. F.S. Prereq: AN S 225; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480G. Animal Industry Leadership Fellows: Poultry. Cr. 1. Repeatable. F.S. Prereq: AN S 223; permission of instructor
Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. Central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 489. Issues in Food Safety. (Cross-listed with FS HN, HRI, VDPAM). (1-0) Cr. 1. S. Prereq: Credit or enrollment in FS HN 101 or FS HN 272 or HRI 233; FS HN 419 or FS HN 420; FS HN 403 Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

AN S 490. Independent Study. Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.
AN S 490C. Independent Study: Meat Science.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory
preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490D. Independent Study: Companion Animal Science.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory
preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490E. Independent Study: Equine Science.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory
preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490G. Independent Study: Poultry Science.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory
preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490H. Independent Study: Honors.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory
preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 490I. Independent Study: Entrepreneurship.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of the instructor
Open to juniors and seniors in animal science and dairy science showing satisfactory
preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

AN S 493. Workshop in Animal Science.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Workshop in livestock production. Includes current concepts in breeding, nutrition, reproduction, meats, and technologies that impact the animal industry. Nonmajor graduate credit.

AN S 495. Agricultural Travel Course Preparation.
Cr. R. Repeatable. F.S. Prereq: Permission of instructor
Limited enrollment. Students enrolled in this course will also register for Agron 495 and intend to register in Agron 496 and An S 496 the following term. Topics will include the agricultural industries, climate, crops, culture, history, livestock, marketing, soils, and preparation for travel to locations to be visited. Information normally available 9 months before departure.

AN S 496. Agricultural Travel Course.
Cr. arr. Repeatable. Prereq: Permission of instructor, 30 college credits
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

AN S 496A. Agricultural Travel Course: International tour.
Cr. arr. Repeatable. Prereq: Permission of instructor, 30 college credits
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students. Meets International Perspectives Requirement.

AN S 496B. Agricultural Travel Course: Domestic tour.
Cr. arr. Repeatable. Prereq: Permission of instructor, 30 college credits
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

AN S 497. Undergraduate Teaching Experiences in Animal Science.
Cr. 1-2. Repeatable, maximum of 4 times. F.S.S.S. Prereq: Permission of instructor
Development of oral and written communication skills of technical concepts in animal science. Emphasis on organizational skills, conducting activities and interpersonal communication skills. Responsibilities in a class under direct supervision of a faculty member. A maximum of 4 credits of An S 497 may be applied toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

AN S 500. Computer Techniques for Biological Research.
(2-0) Cr. 1. F.
Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

AN S 500A. Computer Techniques for Biological Research: UNIX and SAS.
(2-0) Cr. 1. F.
First half semester course. Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

AN S 500B. Computer Techniques for Biological Research: Problem solving using matrix algebra.
(2-0) Cr. 1. F.
Second half semester course. Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

(1-0) Cr. 1. F.
Required for Animal Science graduate students. Orientation to departmental and graduate school policies and procedures. Discussion of programs of research and outreach in Animal Science. Issues impacting the animal industry. Offered on a satisfactory-fail basis only.

AN S 503. Seminar in Animal Production.
(1-0) Cr. 1. Repeatable. Prereq: Permission of instructor
Discussion and evaluation of current topics in animal production and management.

AN S 515. Integrated Crop and Livestock Production Systems.
(Cross-listed with A E, AGRON, SUSAG). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.
AN S 519. Digestive Physiology and Metabolism of Non Ruminants. (Cross-listed with NUTRIS). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: AN S 419 or NUTRIS 501
Digestion and metabolism of nutrients. Nutritional requirements and current research and feeding programs for poultry and swine.

AN S 520. Digestive Physiology and Metabolism of Ruminants. (Cross-listed with NUTRIS). (2-2) Cr. 3. Alt. S., offered 2012. Prereq: AN S 419 or NUTRIS 501
Digestive physiology and nutrient metabolism in ruminant and prernaturn animals.

Development of structure and function of the reproductive system. Physiologic and endocrine aspects including puberty, gametogenesis, estrous cycle, pregnancy, maternal recognition, fertilization and early embryonic development.

AN S 536. Perinatology. (2-0) Cr. 2. S. Prereq: One course in physiology; one course in biochemistry
Regulation of metabolism and development in the mammalian fetus and neonate is explored in a comparative manner. Emphasis will be on the dynamic changes in these relationships occurring at birth.

AN S 537. Topics in Farm Animal Environmental Physiology, Behavior, Stress, and Welfare. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537A. Animal rights and philosophies. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537B. Brain mechanisms of stress. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537C. Measuring behavior and welfare. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537D. Environmental stressors. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537E. Stress and the immune system. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537F. Other related topics. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 540. Livestock Immunogenetics. (Cross-listed with MICRO, V MPM). (2-0) Cr. 2. Alt. S., offered 2013. Prereq: AN S 561 or MICRO 575 or V MPM 520
Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

AN S 549. Advanced Vertebrate Physiology I. (Cross-listed with KIN, NUTRIS). (4-0) Cr. 4. F. Prereq: Biol 335; credit or enrollment in BBMB 404 or BBMB 420
Overview of mammalian physiology. Cell biology, endocrinology, cardiovascular, respiratory, immune, digestive, skeletal muscle and reproductive systems.

AN S 552. Advanced Vertebrate Physiology II. (Cross-listed with KIN, NUTRIS). (3-0) Cr. 3. S. Prereq: BIOL 335; credit or enrollment in BBMB 404 or BBMB 420
Cardiovascular, renal, respiratory, and digestive physiology.

AN S 556. Current Topics in Genome Analysis. (3-0) Cr. 3. Alt. S., offered 2012. Prereq: BBMB 405 or GDCB 510
Introduction to principles and methodology of molecular genetics useful in analyzing and modifying large genomes.

AN S 560. Processed Meats. (Dual-listed with AN S 460). (2-2) Cr. 3. S. Prereq: AN S 270
Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

AN S 561. Population and Quantitative Genetics for Breeding. (Cross-listed with AGRON). (4-0) Cr. 4. F. Prereq: STAT 401
Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.

AN S 562. Methodologies for Population/Quantitative Genetics. (2-0) Cr. 2. S. Prereq: AN S 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 562A. Methodologies for Population/Quantitative Genetics: Linear Models and Genetic Prediction. (2-0) Cr. 2. S. Prereq: AN S 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 562B. Methodologies for Population/Quantitative Genetics: Advanced Genetic Prediction & Parameter Estimation. (2-0) Cr. 2. S. Prereq: AN S 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

AN S 570. Advanced Meat Science and Applied Muscle Biology. (2-2) Cr. 3. S. Prereq: AN S 460
Ante and postmortem factors impacting composition, structure, and chemistry of red meat and poultry muscle/meat, the conversion of muscle to meat, and the sensory and nutritional attributes of fresh meats. Oral research reports and a research proposal.
AN S 571. Advanced Meat Processing Principles and Technology.
(2-2) Cr. 3. Alt. F., offered 2012. Prereq: AN S 460 or AN S 570
Physical/chemical relationships during processing. Effects of modern technology, non-meat additives and preservation techniques on quality and safety of processed meat. Laboratory demonstration of principles and technology.

AN S 590. Special Topics.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590A. Special Topics: Animal Breeding.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590B. Special Topics: Animal Nutrition.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590C. Special Topics: Meat Animal Production.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590D. Special Topics: Dairy Production.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590E. Special Topics: Meat Science.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590F. Special Topics: Physiology of Reproduction.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590G. Special Topics: Muscle Biology.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590H. Special Topics: Poultry Nutrition.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590I. Special Topics: Poultry Products.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590J. Special Topics: Experimental Surgery.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590K. Special Topics: Professional Topics.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590L. Special Topics: Teaching.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590M. Special Topics: Molecular Biology.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590N. Special Topics: Ethology.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 599. Creative Component.
Cr. 1-8. F.S.SS. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AN S 599A. Creative Component: Animal Breeding and Genetics.
Cr. 1-8. F.S.SS. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

Cr. 1-8. F.S.SS. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AN S 599C. Creative Component: Animal Physiology.
Cr. 1-8. F.S.SS. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AN S 599D. Creative Component: Animal Science.
Cr. 1-8. F.S.SS. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AN S 599E. Creative Component: Meat Science.
Cr. 1-8. F.S.SS. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

Courses for graduate students:

(1-0) Cr. 1. Repeatable. F.S. Prereq: Permission of instructor
Discussion of current literature; preparation and submission of abstracts.

AN S 619. Advanced Nutrition and Metabolism - Protein.
(2-0) Cr. 2. F. Prereq: BBMB 405
Digestion, absorption, and intermediary metabolism of amino acids and protein. Regulation of protein synthesis and degradation. Integration of cellular biochemistry and physiology of mammalian protein metabolism.

(2-0) Cr. 2. Alt. S., offered 2012. Prereq: BBMB 405
Energy constituents of feedstuffs and energy needs of animals as related to cellular biochemistry and physiology. Interpretations of classical and current research.

(1-0) Cr. 1. Repeatable. F. Prereq: Permission of instructor
Discussion of current literature and preparation of reports on selected topics concerning physiology of reproduction.

(2-0) Cr. 2. Prereq: AN S 561
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

AN S 652A. Animal Breeding Strategies: Breeding Goals and Response to Selection.
(2-0) Cr. 2. Prereq: AN S 561
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.
(2-0) Cr. 2. Prereq: AN S 561  
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

(2-0) Cr. 2. F. Prereq: AN S 561 recommended  
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

(2-0) Cr. 2. F. Prereq: AN S 561 recommended  
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

(2-0) Cr. 2. F. Prereq: AN S 561 recommended  
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

(3-1) Cr. 2. Alt. F., offered 2011. Prereq: AN S 500, AN S 562, COM S 207  
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.

AN S 655A. Computational Strategies for Predicting Breeding Values.  
(3-1) Cr. 2. Alt. F., offered 2011. Prereq: AN S 500, AN S 562, COM S 207  
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.

AN S 655B. Computational Strategies for Genetic Parameter Estimation.  
(3-1) Cr. 2. Alt. F., offered 2011. Prereq: AN S 500, AN S 562, COM S 207  
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.

(2-0) Cr. 2. Alt. S., offered 2012. Prereq: AN S 562, STAT 447  
Statistical methods for mapping quantitative trait loci in out-bred populations. Methods based on modeling covariances between relatives. Likelihood based methods using half-sib and full-sib families and extended pedigrees. Bayesian methods applied.

AN S 658. Seminar in Animal Breeding and Genetics.  
(1-0) Cr. 1. Repeatable. F.S.  
Presentation of current research related to animal breeding and genetics.

(3-0) Cr. 3. Alt. F., offered 2012. Prereq: BBMB 405, BBMB 420, or BBMB 502  
Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development and turnover. Cytoskeletal proteins and dynamics.

AN S 684. Seminar in Meat Science.  
(1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor  
Discussion and evaluation of current topics in research publications in meat science.

AN S 685. Seminar in Muscle Biology.  
(1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor  
Reports and discussion of recent literature and current investigations.

AN S 695. Seminar in Animal Science.  
(1-0) Cr. 1. Repeatable. S.  
Reports and discussion of current issues and research in animal science. One credit is required for all M.S. degree candidates with graduate majors in the Department of Animal Science, and two credits are required for all Ph.D. candidates with graduate majors in the Department of Animal Science. Offered on a satisfactory-fail basis only.

AN S 699. Research.  
Cr. arr. Repeatable.

AN S 699A. Research: Animal Breeding.  
Cr. arr. Repeatable.

Cr. arr. Repeatable.

Cr. arr. Repeatable.

AN S 699D. Research: Dairy Production.  
Cr. arr. Repeatable.

Cr. arr. Repeatable.

AN S 699F. Research: Physiology of Reproduction.  
Cr. arr. Repeatable.

AN S 699G. Research: Muscle Biology.  
Cr. arr. Repeatable.

Cr. arr. Repeatable.

AN S 699I. Research: Poultry Products.  
Cr. arr. Repeatable.

Cr. arr. Repeatable.

Biochemistry, Biophysics, and Molecular Biology

Undergraduate Study

The department offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in agricultural biochemistry in the College of Agriculture and Life Sciences. Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches; genomic and proteomic technology; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease. Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their education to pursue advanced degrees in graduate school, medicine, pharmacy or veterinary medicine.

Graduates of biochemistry, agricultural biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biochemical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have developed the skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life. Graduates have the experience of interacting with persons of different disciplines and cultures. Students have the training in biological and physical science and mathematics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in biochemistry and biophysics and with interdepartmental majors in genetics, immunobiology, MCDB (molecular, cellular, and developmental
Agricultural Biochemistry program of study

For the undergraduate curriculum leading to the degree bachelor of science, see College of Agriculture, Curricula. Agricultural biochemistry is recommended to students interested in the areas of agriculture requiring strong preparation in chemistry, mathematics, and physics, or in preparation for the study of veterinary medicine. Employment opportunities exist in agrochemical industries, and agriculture, and plant biotechnology.

Agricultural Biochemistry Major in the College of Agriculture and Life Sciences

For the undergraduate curriculum leading to the degree bachelor of science, see College of Agriculture, Curricula. Agricultural biochemistry is recommended to students interested in the areas of agriculture requiring strong preparation in chemistry, mathematics, and physics, or in preparation for the study of veterinary medicine. Employment opportunities exist in agrochemical industries, and agriculture, and plant biotechnology.

Social Science course

Total Credits: 6

**Agricultural Sciences**

Courses from an approved list

**Curriculum in Agricultural Biochemistry**

Administered by the Department of Biochemistry, Biophysics and Molecular Biology.

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. International Perspective: 3 cr.

**U.S. Diversity: 3 cr.**

**Communications Proficiency:**

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Agricultural Sciences: 9 cr.

Complete 9 cr. from approved list.

See also the B.S./M.S. program under Graduate Study.

Courses

Courses primarily for undergraduates:

**BBMB 101. Introduction to Biochemistry.**

(1-0) Cr. 1. F. Research activities, career opportunities in biochemistry and biophysics, and an introduction to the structure of biologically important compounds. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

**BBMB 102. Introduction to Biochemistry Laboratory.**

(0-2) Cr. 1. S. Prereq: Credit or enrollment in CHEM 177 and CHEM 177L or CHEM 201 and CHEM 201L Topics in the scientific background of biochemistry, such as macromolecules, metabolism, and catalysis. Laboratory experimentation covers biochemical concepts and the study of bio-molecules including proteins, lipids and nucleic acids. A significant component is practice in scientific communication. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

**BBMB 201. Chemical Principles in Biological Systems.**

(2-0) Cr. 2. S. Prereq: Credit or enrollment in CHEM 332 Survey of chemical principles as they apply in biological systems including: water, organic chemistry of functional groups in biomolecules and biochemical cofactors, weak bonds and their contribution to biomolecular structure, oxidation-reduction reactions and redox potential, thermodynamic laws and bioenergetics, chemical equilibria and kinetics, inorganic chemistry in biological systems, data presentation. The subjects will be taught using molecules from biological systems as examples. Intended for majors in biochemistry, biophysics, or agricultural biochemistry.

**BBMB 221. Structure and Reactions in Biochemical Processes.**

(3-0) Cr. 3. F. Prereq: CHEM 163, CHEM 167, or CHEM 177 Fundamentals necessary for an understanding of biochemical processes. Primarily for students in agriculture. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry. Credit for both BBMB 221 and Chem 231 may not be applied toward graduation.

**BBMB 301. Survey of Biochemistry.**

(3-0) Cr. 3. F.S.SS. Prereq: CHEM 231 or CHEM 331 A survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymology; metabolism; biosynthesis; and selected topics. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

**BBMB 316. Principles of Biochemistry.**

(3-0) Cr. 3. F. Prereq: CHEM 231 or CHEM 331; BIOL 212. Understanding biological systems at the molecular level; chemistry of biological macromolecules, enzyme function and regulation, metabolic pathways; integration of metabolism in diverse living systems. For students in biology and related majors who do not require the more rigorous treatment of biochemistry found in BBMB 404/405. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

**BBMB 404. Biochemistry I.**

(3-0) Cr. 3. S. Prereq: CHEM 332 A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical and nutritional sciences. Chemistry of amino acids, proteins, carbohydrates, and lipids; vitamins; protein structure; enzymology; carbohydrate metabolism. Nonmajor graduate credit. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.

**BBMB 405. Biochemistry II.**

(3-0) Cr. 3. S. Prereq: BBMB 404 A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical, and nutritional sciences. Metabolism of carbohydrates, amino acids, nucleotides and lipids; formation, turnover, and molecular relationships among DNA, RNA, and proteins; genetic code; regulation of gene expression; selected topics in the molecular physiology of plants and animals. Nonmajor graduate credit. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.

**BBMB 411. Techniques in Biochemical Research.**

(2-0) Cr. 4. F. Prereq: Credit or enrollment in BBMB 404 or BBMB 501; CHEM 211 Introduction to laboratory techniques for studying biochemistry, including chromatographic methods; electrophoresis; spectrophotometry; enzyme purification; enzyme kinetics; and characterization of carbohydrates, proteins, lipids, and nucleic acids. Nonmajor graduate credit.

**BBMB 420. Physiological Chemistry.**

(3-0) Cr. 3. F. Prereq: CHEM 332, BBMB 301 or BIOL 314 Structure and function of proteins; enzymology; biological oxidation; chemistry and metabolism of carbohydrates, lipids, amino acids and nucleic acids; protein synthesis and the genetic code; relationship of biochemistry to selected animal diseases. Biochemistry of higher animals emphasized. Nonmajor graduate credit. Not acceptable for credit toward a major in agricultural biochemistry, biophysics or biophysics. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.

**BBMB 430. Prokaryotic Diversity and Ecology.**

(Dual-listed with BBMB 530). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MICRO 302, MICRO 302L Survey of the diverse groups of prokaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.
BBMB 440. Laboratory in Microbial Physiology, Diversity, and Genetics. (Cross-listed with MICRO). (2-6) Cr. 4. F. Prereq: MICRO 302, MICRO 302L, CHEM 332, BIOL 313L
Study of the fundamental techniques and theory of studying the cellular mechanisms and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments. Also included are techniques for the phylogenetic characterization, and genetic manipulation of diverse species of bacteria.

BBMB 461. Molecular Biophysics. (Dual-listed with BBMB 561). (2-0) Cr. 2. S. Prereq: Credit or enrollment in CHEM 324 and CHEM 325
Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for the graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions.

BBMB 490. Independent Study. Cr. arr. Repeatable. F.S.SS. Prereq: College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor
College of Agriculture: a maximum of 6 credits of 490 may be applied toward graduation. College of Liberal Arts and Sciences: a maximum of 9 credits may be applied toward graduation.

BBMB 490H. Independent Study, Honors. Cr. arr. Repeatable. F.S.SS. Prereq: College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor
Independent study with a faculty mentor. College of Agriculture: a maximum of 6 credits of 490 may be applied toward graduation. College of Liberal Arts and Sciences: a maximum of 9 credits of 490 may be applied toward graduation.

BBMB 499. Undergraduate Research. Cr. 1-5. Repeatable. F.S.SS. Prereq: Permission of faculty member with whom student proposes to work
Independent research under faculty guidance.

Courses primarily for graduate students, open to qualified undergraduates:

BBMB 501. Comprehensive Biochemistry I. (4-0) Cr. 4. F. Prereq: CHEM 211, CHEM 332; a previous course in biochemistry is strongly recommended
Chemical composition of living matter and the chemistry of life processes. Chemical characterization of amino acids, proteins, carbohydrates and lipids; enzymology and co-enzymes; metabolism of carbohydrates; biological oxidations.

BBMB 502. Comprehensive Biochemistry II. (4-0) Cr. 4. S. Prereq: BBMB 501
Chemical composition of living matter and the chemistry of life processes. Metabolism of lipids, amino acids, and nucleotides; membrane biophysics; biosynthesis of DNA, RNA, and proteins; gene regulation; selected topics.

BBMB 503. Bioinorganic Chemistry. (Cross-listed with CHEM). (2-0) Cr. 2. Alt. S., offered 2012. Prereq: CHEM 402 or BBMB 405
Essential elements: transport and storage of ions and of oxygen; metalloenzymes and metallocoenzymes; electron-transfer processes in respiration and photosynthesis; metabolism of nonmetals and redox processes involved in it; medicinal aspects of inorganic chemistry.

BBMB 520. Genetic Engineering. (Cross-listed with GDCB, MDCB). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: GEN 411 or BBMB 405
Strategies and rationale of recombinant DNA technologies. The methodology of genetic engineering in basic research and implications for applied research will be considered. Topics include: basic tools of molecular cloning, targeted mutagenesis, fluorescent proteins, protein expression systems, and transgenic model systems.

BBMB 530. Prokaryotic Diversity and Ecology. (Dual-listed with BBMB 430). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 542. Introduction to Molecular Biology Techniques. Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, introduction to high-performance computing, immunophenotyping, and monoclonal antibody production. Offered on a satisfactory-fail basis only.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

Includes metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

BBMB 542G. Genomic Techniques. Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

BBMB 552. Biomolecular NMR Spectroscopy. (2-0) Cr. 2. Alt. S., offered 2013. Prereq: CHEM 325 or permission of instructor
Advanced solution state Nuclear Magnetic Resonance spectroscopy as applied to biological systems. Topics include theoretical principles of NMR, practical aspects of experimental NMR, methodologies for protein structure determination, NMR relaxation, recent advances in NMR spectroscopy.

BBMB 561. Molecular Biophysics. (Dual-listed with BBMB 461). (2-0) Cr. 2. S. Prereq: Credit or enrollment in CHEM 324 and CHEM 325
Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions.

BBMB 561L. Laboratory in Molecular Biophysics. (1-3) Cr. 2. S. Prereq: Credit or enrollment in BBMB 461/BBMB 561
Practice in methods of X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy as applied to macromolecules.

BBMB 569. Bioinformatics III (Structural Genome Informatics). (Cross-listed with BCB, COM S, CPE E). (3-0) Cr. 3. F. Prereq: BCB 567, GEN 411, STAT 430

BBMB 590. Special Topics. Cr. arr.
By arrangement.
Courses for graduate students:

**BBMB 607. Plant Biochemistry.**
(2-0) Cr. 2. Alt. F., offered 2012. Prereq: BBMB 405 or BBMB 502
Description of unique aspects of plant biochemistry including lipid metabolism, cell wall structure, secondary metabolism, phytalexin biosynthesis, and plant defenses.

**BBMB 615. Molecular Immunology.**
(Cross-listed with MICRO, V MPM). (3-0) Cr. 3. Alt. F., offered 2013. Prereq: BBMB 405 or BBMB 502
Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

**BBMB 622. Carbohydrate Chemistry.**
(2-0) Cr. 2. Alt. S., offered 2013. Prereq: BBMB 404 or BBMB 501
Structure, occurrence, properties, function, and chemical and enzymatic modifications of monosaccharides, oligosaccharides, polysaccharides, and glycoproteins.

**BBMB 632. Kinetics of Enzyme Action.**
(2-0) Cr. 2. Alt. F., offered 2014. Prereq: BBMB 501
Fundamental and advanced enzyme kinetics. Topics include integrated rate equations, methods for deriving initial-rate equations, inhibition, product effects, methods for verifying kinetic mechanisms, allosterism, hysteresis, isotope effects, and complex kinetic mechanisms.

**BBMB 642. Mechanisms of Enzymatic Catalysis.**
(2-0) Cr. 2. Alt. S., offered 2013. Prereq: BBMB 404, BBMB 420, or BBMB 501
The chemical basis of enzymatic catalysis with emphasis on mechanisms of substrate recognition, general acid-base catalysis and stereo-electronic factors.

**BBMB 645. Molecular Signaling.**
(2-0) Cr. 2. Alt. S., offered 2013. Prereq: BBMB 405, BBMB 420, or BBMB 502
Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, and nuclear receptors. Discussion includes a variety of cell surface receptors and their hormone; growth factor and extracellular matrix activators; protein kinases; caspase and transcription factor downstream signals; lipids, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and research proposal writing.

**BBMB 652. Protein Chemistry - Chemical Methods.**
(2-0) Cr. 1. Alt. F., offered 2013. Prereq: BBMB 404 or BBMB 501
First 8 weeks. Chemical reactions as a means of determining protein structure and biological function.

**BBMB 653. Protein Chemistry - Physical Methods.**
(2-0) Cr. 1. Alt. F., offered 2013. Prereq: BBMB 404 or BBMB 501
Second 8 weeks. Protein structure determination as a means of understanding biological function.

**BBMB 660. Membrane Biochemistry.**
(2-0) Cr. 2. Alt. F., offered 2012. Prereq: BBMB 405 or BBMB 502
Protein and lipid constituents of biological membranes. Structure and topography of membrane proteins. Selected topics concerning the membrane proteins involved in diverse biochemical processes, such as energy transduction transport across membranes, neurotransmission and signal transduction.

**BBMB 661. Current Topics in Neurosciences.**
(Cross-listed with NEURO, GDCB). (2-0) Cr. 2-3. Repeatable. Alt. S., offered 2014. Prereq: NEURO 556 (or comparable course) or permission of instructor
Topics may include molecular and cellular neurosciences, neurodevelopment, neuropasticity, neurodegenerative diseases, cognitive neuroscience, sensory biology, neural integration, membrane biophysics, neuroethology, techniques in neurobiology and behavior.
Pre-medical and Human Health Professions—This area emphasizes preparation for further study in medical school or allied health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.

Pre-veterinary—An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But, pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

Molecular and Cellular Biology—Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

Ecology and Conservation Biology—Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth’s biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Evolution and Biodiversity—This area provides students with a sound understanding of evolutionary principles and the biological patterns that result from evolutionary change. Students have the opportunity to explore, in depth, the biodiversity found within a wide range of groups of organisms. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Other opportunities

Teacher licensure—Biology majors seeking licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Undergraduate research—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 490 Independent Study. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental, and non-governmental entities focused on environmental issues, and at industrial government laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship.

Field trip courses—The Biology Program offers two field trip courses: BIOL 393 (North American Field Trips in Biology) and BIOL 394 (International Field Trips in Biology). In recent years field trip opportunities to the Boundary Waters area of Minnesota, Honduras, and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience—Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 394 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

Courses offered at other locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major. Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory—The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement. Courses that are available each summer are listed at www.coms.usm.edu.

Summer Biological Field Stations—Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g. marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies—Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information see www.oats.duke.edu or contact the Biology Student Services Office in 103 Bessey Hall.

General requirements

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements—Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of writing in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in both ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in an advanced writing course numbered ENGL 302 through ENGL 316, or JLC 347.

Undergraduate Study

Biology majors start their studies in the biological sciences by taking a unified biology core curriculum consisting of six integrated courses, including four with labs. The first year provides a broad introduction to the nature of life.

BIOL 211 Course BIOL 211 Not Found
BIOL 211L Course BIOL 211L Not Found
BIOL 212 Course BIOL 212 Not Found
BIOL 212L Course BIOL 212L Not Found

Total Credits 8

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the Biology major BIOL 112 in place of BIOL 110.

Students then explore concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of biological science at the 300 level, or above, from an approved list of courses. Of these, at least 9 credits must be taken as BIOL courses and a minimum of two BIOL laboratory or field courses must also be included.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program’s web site has a complete listing of acceptable upper-level life science courses.
Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

Minor

A minor in Biology is offered by the Biology Program. The minor requires 15 credits in Biology and includes the completion of the specific courses listed below:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 211</td>
<td>Course BIOL 211</td>

</tr>
</tbody>
</table>

Total Credits: 8

and 7 credits in biology courses numbered 300 or above. Nine (9) credits of the required courses must apply only to the minor. For more information, see the Biology Program web site or contact the Student Services Office in 103 Bessey Hall.

Undergraduate Study

Biology majors start their studies in the biological sciences by taking a unified biology core curriculum consisting of six integrated courses, including four with labs. The first year provides a broad introduction to the nature of life.

† Arranged with instructor.

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology.

Students transferring into the Biology major BIOL 112 in place of BIOL 110. Students then explore concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of biological science at the 300 level, or above, from an approved list of courses. Of these, at least 9 credits must be taken as BIOL courses, and a minimum of two BIOL laboratory or field courses must also be included.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program’s web site has a complete listing of acceptable upper-level science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

Graduate Study

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neuroscience; Plant Biology; Toxicology; Immunobiology; and Environmental Science are also available. (See Index.)

A non-thesis master’s degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Curriculum in Biology

College of Liberal Arts and Sciences

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better)

Two Advanced BIOL courses with lab or field components (from approved list)

Biology advanced courses (from approved list) 9

Additional approved biology advanced courses 12

Total Credits 21

Courses

Courses primarily for undergraduates:

BIOL 101. Introductory Biology.
(3-0) Cr. 3. F.S.S.S.
Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Intended primarily for nonmajors; available to biology majors for elective credit.

BIOL 110. Introduction to Biology.
Cr. 1. F.
Orientation to the scope of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Offered on a satisfactory-fail basis only.

BIOL 111. Opportunities in Biology.
(1-0) Cr. 0.5. S.
Introduction to biological science disciplines and professional opportunities through faculty presentations which examine a variety of current research topics. Offered on a satisfactory-fail basis only.

BIOL 112. Transfer Student Orientation.
Cr. R. F.S.
Orientation to opportunities in Biology. Review of degree requirements and other information needed by students that have not participated in the first year Biology orientation courses. Offered on a satisfactory-fail basis only.

BIOL 155. Human Biology.
(3-0) Cr. 3. F.S.
A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science.

BIOL 173. Environmental Biology.
(Cross-listed with ENV S, ENSCI). (3-0) Cr. 3. F.S.
An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Intended primarily for non-majors; available to biology majors for elective credit.

BIOL 201. Introduction to Environmental Issues.
(Cross-listed with ENV S). (2-0) Cr. 2. F.S.
Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

BIOL 204. Biodiversity.
(Cross-listed with ENV S). (4-0) Cr. 2. S. Prereq: One course in life sciences Survey of the major groups of organisms and biological systems. Definition, measurements, and patterns of distribution of organisms. Sources of information about biodiversity. Intended primarily for non-majors; available to biology majors for elective credit. Half semester course.

BIOL 211. Principles of Biology I.
(3-0) Cr. 3. F.S. Prereq: High school biology Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors.

BIOL 211L. Principles of Biology Laboratory I.
(0-3) Cr. 1. F.S. Prereq: Credit or enrollment in BIOL 211 Laboratory to accompany 211.

BIOL 212. Principles of Biology II.
(3-0) Cr. 3. F.S. Prereq: High School Biology; high school chemistry or credit or enrollment in CHEM 163 or CHEM 177 Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors.

BIOL 212L. Principles of Biology Laboratory II.
(0-3) Cr. 1. F.S. Prereq: credit or enrollment in BIOL 212 Laboratory to accompany 212.
BIOL 255. Fundamentals of Human Anatomy.
(3-0) Cr. 3. F. PreReq: High School Biology and Chemistry, or BIOL 101
An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider BIOL 351 for their anatomy background. Not intended for major credit in biology.

BIOL 255L. Fundamentals of Human Anatomy Laboratory.
(0-3) Cr. 1. F. PreReq: Credit or enrollment in BIOL 255
Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider 351 for their anatomy background. Not intended for major credit in biology.

BIOL 256. Fundamentals of Human Physiology.
(3-0) Cr. 3. S. PreReq: High School Biology and Chemistry, or BIOL 101, or BIOL 255 (recommended)
An introduction to human physiology, studying the function of all body systems. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic and immune, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider 355 for their physiology background. Not intended for major credit in biology.

BIOL 256L. Fundamentals of Human Physiology Laboratory.
(0-3) Cr. 1. S. PreReq: Credit or enrollment in BIOL 256
Student-conducted experiments investigating concepts of human physiology with computer data acquisition and analysis. Interpretation of experimental results and preparation of lab reports. Pre-Medical students should consider 355 for their anatomy and physiology background. Not intended for major credit in biology.

(Cross-listed with W S). (3-0) Cr. 3. F. PreReq: BIOL 101, or BIOL 155, or BIOL 211 Anatomy and physiology of human reproductive systems, including fertility, pregnancy, and delivery.

BIOL 306. Metabolic Physiology of Mammals.
Cr. 3. Pre Req: BIOL 211, BIOL 212
Introduction to physiology of metabolic function in mammals and other animals. Metabolic processes and their interactions with various subsystems, approached from an organismal perspective. Integration of cellular, gastrointestinal, cardiovascular, respiratory, and renal processes, relevant to their control and integration at the nervous and endocrine system levels. Functional aspects of physiological anatomy; energy and water balances, physiology of rest exercise, and environmental stress. Students cannot receive credit for both BIOL 306 and BIOL 335.

(Cross-listed with W S) (3-0) Cr. 3. F. PreReq: a 200 level course in science, engineering or women’s studies; ENGL 250
The interrelationships of women and science and engineering examined from historical, sociological, philosophical, and biological perspectives. Factors contributing to underrepresentation; feminist critiques of science; examination of successful strategies. Meets U.S. Diversity Requirement.

BIOL 312. Ecology.
(Cross-listed with A ECL, ENSCI). (3-3) Cr. 4. F.S.S. PreReq: BIOL 211L and BIOL 212L
Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

(Cross-listed with GEN). (3-0) Cr. 3. F.S.S.S. PreReq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L
Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative and population genetics. Students may receive graduation credit for no more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.

BIOL 313L. Genetics Laboratory.
(Cross-listed with GEN). (0-3) Cr. 1. F. S. PreReq: Credit or enrollment in BIOL 313 Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.

(3-0) Cr. 3. F.S. PreReq: BIOL 211, 211L, 212, 212L
Integration of elementary principles of metabolism, bioenergetics, cell structure and function to develop a molecular view of how the cell works.

BIOL 315. Biological Evolution.
(3-0) Cr. 3. F.S. PreReq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L, Biol 313 recommended.
The mechanisms of evolution. Topics in microevolution: population genetics, natural selection, genetic variation, and adaptation. Macroevolution: speciation, extinction, phylogeny, and major evolutionary patterns.

BIOL 328. Molecular and Cellular Biology of Human Diseases.
Cr. 3. PreReq: BIOL 212
Survey of molecular, genetic and cellular aspects of human diseases. Fundamental concepts of cell biology and how they are linked to the pathologies of different classes of human diseases. Recent scientific advances with an emphasis on new methods of diagnosis and treatment.

(3-0) Cr. 3. PreReq: BIOL 313 or GEN 320; BIOL 314 or BBMB 301; CHEM 231 or CHEM 332; PHYS 106 or PHYS 111
An overview of classical and current concepts, principles and approaches regarding the basic mechanisms of plant function underlying growth, development and survival of plants. Topics covered include environmental and developmental signals, plant hormone action, signal transduction, mineral nutrition, water relations, metabolism and photosynthesis. Nonmajor graduate credit.

BIOL 330L. Principles of Plant Physiology Laboratory.
(0-3) Cr. 1. PreReq: Credit or enrollment in BIOL 330
Laboratory to accompany BIOL 330. Experiments and explorations illustrating fundamental principles of plant physiology. Nonmajor graduate credit.

BIOL 335. Principles of Human and Other Animal Physiology.
(3-3) Cr. 4. F. S. PreReq: BIOL 314
Introduction to systemic functions with emphasis on mammals. Nonmajor graduate credit.

BIOL 336. Ecological and Evolutionary Animal Physiology.
Cr. 3. PreReq: BIOL 211, BIOL 212
Study of mechanisms by which animals perform life-sustaining functions; the evolution and adaptive significance of physiology traits, the diversity of physiological mechanisms, and how physiology and ecology interact.

BIOL 350. Comprehensive Human Anatomy.
(3-0) Cr. 3. F. PreReq: Credit in BIOL 211 and BIOL 212
Comprehensive survey of human anatomy, emphasizing structural and functional relationships of major organ systems. Compartmental study of normal anatomy; practical clinical application of anatomical regions.

BIOL 351. Comparative Chordate Anatomy.
(3-4) Cr. 5. S. PreReq: BIOL 212, junior classification
The evolution of chordates as reflected in the anatomy of extinct and living forms. Lecture topics include the history and diversity of chordates; comparisons of anatomical structures among major groups, the adaptive significance of anatomical structures. Laboratory involves dissection of representative species.

BIOL 352. Vertebrate Histology.
(3-3) Cr. 4. S. PreReq: BIOL 212
Microscopic structure of vertebrate tissues and organs, with an introduction to histological techniques.

BIOL 353. Introductory Parasitology.
(Cross-listed with V PTH, MICRO). (3-0) Cr. 3. S. PreReq: BIOL 212
Biological and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

(3-0) Cr. 3. F. PreReq: BIOL 212
Ethological and sociobiological approaches to animal behavior. Genetic and developmental aspects of behavior, biological rhythms, orientation (including navigation, migration), communication, and social behavior (mating, aggression, parental care).

BIOL 354L. Laboratory in Animal Behavior.
(0-3) Cr. 1. F. PreReq: Credit or enrollment in BIOL 354
Laboratory techniques for observation, description and analysis of animal activities; methods of data collection; experimental design, approaches to behavior study.

BIOL 355. Plants and People.
(3-0) Cr. 3. S. PreReq: Credit in BIOL 211 and BIOL 211L
Uses of plants and fungi by humans and the importance of plants in the past, present and future. Discussion of fruits, vegetables, grains, herbs, spices, beverages, oils, fibers, wood, medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern societies. Emphasis on origins and worldwide diversity of culturally important plants, their characteristics, and uses.
BIOL 365. Dendrology.  
(Cross-listed with FOR). (2-4) Cr. 4. F. Prereq: BIOL 211  
Identification and ecology of North American woody plant species. Importance of  
woody plants in timber production and wildlife habitat. Natural disturbances, human  
impacts, management and restoration concerns for major North American forest  
regions will be addressed. Nonmajor graduate credit.

BIOL 364. Invertebrate Biology.  
Cr. 3-4. F. Prereq: BIOL 212  
Emphasis on diversity, development, physiology and behavior of invertebrate  
organisms- the “spineless wonders” of the world. Laboratory involves hands-on study  
and investigation of living invertebrates.

BIOL 365. Vertebrate Biology.  
(Cross-listed with A ECL). (3-2) Cr. 4. F. Prereq: BIOL 212, BIOL 212L  
Evolution, biology, and classification of fish, amphibians, reptiles, birds, and  
mammals. Emphasis on a comparative analysis of the structure and function of  
organ systems. Laboratory exercises concentrate on morphology and identification of  
orders of vertebrates.

Cr. 4. S. Prereq: BIOL 211  
Introduction to plant phylogenetic systematics, plant classification, survey of flowering  
plant families, identification and field study of local plants.

(Cross-listed with A ECL). (2-3) Cr. 3. F. Prereq: A ECL 312; STAT 101 or STAT 104  
Quantitative techniques used in management of natural resources with emphasis on  
inventory and manipulation of habitat and animal populations. Nonmajor graduate  
credit.

BIOL 381. Environmental Systems I: Introduction to Environmental Systems.  
(Dual-listed with EEOB 581). (Cross-listed with ENSCI, ENV S, MICRO). Cr. 3-4. F.  
Prereq: 12 credits of natural science including biology and chemistry  
Introduction to the structure and function of natural environmental systems. Emphasis on  
the analysis of material and energy flows in natural environmental systems and  
the primary environmental factors controlling these systems. Nonmajor graduate  
credit.

BIOL 382. Environmental Systems II: Analysis of Environmental Systems.  
(Dual-listed with EEOB 582). (Cross-listed with ENSCI). (2-2) Cr. 3. S. Prereq:  
ENSCI 381  
Continuation of EnSci 381. Systems approach to the analysis of material and energy  
flows in natural environmental systems and the primary environmental factors  
controlling these systems. Nonmajor graduate credit.

BIOL 393. North American Field Trips in Biology.  
Cr. 1-4. Repeatable. Prereq: Two courses in the biological sciences and by approval of  
application  
Extended field trips, usually during break periods, to North American locations of  
interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip  
schedule.

BIOL 393A. North American Field Trips in Biology: Pre-trip Seminar.  
(1-0) Cr. 1. Repeatable. Prereq: Two courses in the biological sciences and by approval of  
application  
Discussion of relevant biological and cultural topics during semester preceding  
extended field trip to international locations of interest to biologists.

BIOL 393B. North American Field Trips in Biology: North American Field trip.  
Cr. 1-3. Repeatable. Prereq: Two courses in the biological sciences and by approval of  
application  
Extended field trip to North American location under supervision of faculty member,  
usually during break periods, to North American locations of interest to biologists.  
Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule. Report  
required.

BIOL 394. International Field Trips in Biology.  
Cr. 1-4. Repeatable. Prereq: Two courses in the biological sciences and by approval of  
application  
Extended field trips, usually during break periods, to international locations of  
interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip  
schedule. Meets International Perspectives Requirement.

BIOL 394A. International Field Trips in Biology: Pre-trip Seminar.  
(1-0) Cr. 1. Repeatable. Prereq: Two courses in the biological sciences and by approval of  
application  
Discussion of relevant biological and cultural topics during semester preceding  
extended field trip to international locations of interest to biologists.

BIOL 394B. International Field Trips in Biology: Field Trip to International  
Location.  
Cr. 1-3. Repeatable. Prereq: Two courses in the biological sciences and by approval of  
application  
Extended field trips, under supervision of faculty member, usually during break  
periods, to international locations of interest to biologists. Inquire in the Biology  
Program Office, 103 Bessey Hall, for trip schedule. Offered on a satisfactory-fail  
basis only.

BIOL 423. Developmental Biology.  
(3-0) Cr. 3. S. Prereq: BIOL 313  
Principles of embryogenesis and animal development. Establishment of body  
axes, organ and limb development, and specification of cell fates. Emphasis on  
cell signaling and the control of gene expression within the context of a developing  
organism. Medically relevant subjects will be discussed, including stem cells, cancer  
biology, fertilization, and cloning.

BIOL 423L. Developmental Biology Laboratory.  
(0-3) Cr. 1. S. Prereq: Credit or enrollment in BIOL 423  
Experiments and explorations illustrating fundamental principles of multicellular  
development.

BIOL 428. Topics in Cell Biology.  
(3-0) Cr. 3. S. Prereq: BIOL 314  
Selected topics on cellular biology and function at the cellular level. Emphasis on  
biomembranes. Nonmajor graduate credit.

BIOL 434. Endocrinology.  
(3-0) Cr. 3. S. Prereq: BIOL 211, BIOL 212  
Dual-listed with EEOB 534. Chemical integration of vertebrate organisms. The  
structure, development, and evolution of the endocrine glands and the function and  
structure of their hormones. Nonmajor graduate credit.

BIOL 436. Neurobiology.  
(3-0) Cr. 3. F. Prereq: BIOL 212  
Basic principles of brain function and development. Signaling of nerve cells, synaptic  
transmission, structure/function of ion channels and receptors, memory and synaptic  
plasticity, movement and central control, sensation and sensory processing,  
construction of neural circuits, early brain development, complex brain functions in  
health and disease. Nonmajor graduate credit.

BIOL 439. Environmental Physiology.  
Cr. 3-4. Alt. S., offered 2012. Prereq: BIOL 355; physics recommended  
Dual-listed with EEOB 535. Physiological adaptations to the environment with an  
emphasis on vertebrates. Nonmajor graduate credit.

BIOL 444. Introduction to Bioinformatics.  
(Cross-listed with BCB, BCBIO, COM S, CPR E, GEN). (4-0) Cr. 4. F. Prereq: MATH 165 or STAT 401 or equivalent  
Broad overview of bioinformatics with a significant problem-solving component,  
including hands-on practice using computational tools to solve a variety of biological  
problems. Topics include: database searching, sequence alignment, gene prediction,  
RNA and protein structure prediction, construction of phylogenetic trees, comparative  
and functional genomics, systems biology. Nonmajor graduate credit.

(Dual-listed with BIOL 551). (Cross-listed with EEOB). (3-3) Cr. 4. F. Prereq: BIOL 315 or equivalent  
Survey of land plant evolution; phylogenetic comparison of anatomical, reproductive,  
and life history specializations. Relationships among bryophytes, lycophytes,  
pteridophytes, gymnosperms, and angiosperms emphasizing significant evolutionary  
changes documented by paleobotanical, morphological, and molecular studies.

BIOL 454. Plant Anatomy.  
(3-3) Cr. 4. F. Prereq: BIOL 212L; BIOL 366 recommended  
Characteristics of cell and tissue types in vascular plants. Anatomy of developing  
and mature stems, roots, and leaves, including secondary (woody) growth. Introduction to  
the special anatomy of flowers and seeds. Nonmajor graduate credit.

BIOL 455. Bryophyte and Lichen Biodiversity.  
(Dual-listed with BIOL 555). Cr. 3. Prereq: BIOL 211, BIOL 211L  
(Dual-listed with EEOB) Introduction to the biology and ecology of mosses, liverworts,  
and lichens. Emphasis on identification and diversity of local representatives of  
these three groups of organisms. Required field trips and service-learning. Nonmajor  
graduate credit.

(Cross-listed with MICRO). (2-3) Cr. 3. F. Prereq: 10 credits in biological sciences  
Morphology, diversity, and ecology of fungi; their relation to agriculture, industry, and  
human health. Nonmajor graduate credit.
BIOL 457. Herpetology. (Dual-listed with BIOL 357). (Cross-listed with A ECL). (2-3) Cr. 3. F. Prereq: BIOL 351 or BIOL 365
Dual listed with EEB 557. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

BIOL 458. Ornithology. (Dual-listed with EEB 558). (Cross-listed with A ECL). (2-3) Cr. 3. S. Prereq: A ECL 365 or BIOL 351
Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

BIOL 459. Mammalogy. (Dual-listed with EEB 559). (Cross-listed with A ECL). (2-3) Cr. 3. S. Prereq: BIOL 351 or A ECL 365
Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. Laboratory focus on identification, distribution, habits, and habitats of mammals.

BIOL 462. Evolutionary Genetics. (Cross-listed with GEN). (3-0) Cr. 3. S. Prereq: BIOL 315
The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change. Nonmajor graduate credit.

Dual-listed with EEB 565. A comprehensive overview of the theory and methods for the analysis of biological shape with emphasis on data acquisition, standardization, statistical analysis, and visualization of results. Methods for both landmark and outline data will be discussed. Nonmajor graduate credit.

BIOL 471. Introductory Conservation Biology. Cr. 3. Prereq: BIOL 312
Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

BIOL 472. Community Ecology. (2-2) Cr. 3. S. Prereq: BIOL 312
The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates. Nonmajor graduate credit.

BIOL 474. Plant Ecology. (3-0) Cr. 3. S. Prereq: BIOL 312
Principles of plant population and community ecology. Nonmajor graduate credit.

BIOL 476. Functional Ecology. (3-0) Cr. 3. Alt. S., offered 2013. Prereq: BIOL 312
Dual-listed with EEB 576. The nature of adaptations to physical and biotic environments. Biophysical, biomechanical, and physiological bases of the structure, form, growth, distribution, and abundance of organisms.

Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

Courses taken at summer biological field stations are transferred to Iowa State University under this number. See www.biology.iastate.edu for links to field stations located in different biomes: coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mountains.

BIOL 482. Tropical Biology. Cr. 1-4. Repeatable, maximum of 8 credits. Prereq: One year of college biology; knowledge of Spanish desirable but not required
Students registering for courses taught by the Organization for Tropical Studies will receive credit for this ISU course when requesting a transfer of credits.

BIOL 484. Ecosystem Ecology. (Cross-listed with ENSCI). (3-0) Cr. 3. S. Prereq: Combined 12 credits in biology and chemistry
Introduction of the study of ecosystems and the factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems.

BIOL 486. Aquatic Ecology. (Dual-listed with BIOL 586). (Cross-listed with ENSCI). (3-0) Cr. 3. F. Prereq: BIOL 312 or EnSci 381 or EnSci 402 or NREM 301
Dual-listed with EEB 586. Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. Nonmajor graduate credit.

BIOL 486L. Aquatic Ecology Laboratory. (Cross-listed with ENSCI, A ECL). (0-3) Cr. 1. F. Prereq: Concurrent enrollment in BIOL 486
Dual-listed with EEB 586L. Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts. Nonmajor graduate credit.

BIOL 487. Microbial Ecology. (Dual-listed with BIOL 587L). (Cross-listed with ENSCI, MICRO). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry
Dual-listed with EEB 587. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

BIOL 488. Identification of Aquatic Organisms. (0-3) Cr. 1. F.S.
On line taxonomic and identification exercises to accompany 488. Instruction and practice in the identification of algae, aquatic macrophytes, zooplankton, and benthos. Nonmajor graduate credit.

BIOL 489. Population Ecology. (2-2) Cr. 3. F. Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing
Dual-listed with EEB 589. Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

BIOL 490. Independent Study. Cr. 1-6. Repeatable, maximum of 9 credits. F.S.S. Prereq: Permission of instructor
Independent study opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and of those, only 6 credits may be applied to the major.

BIOL 490L. Iowa Lakeside Laboratory. (Cross-listed with IA LL, ANTHR, NREM). Cr. 1-6. Repeatable, maximum of 9 credits. Prereq: 8 credits in biology and permission of instructor
Research opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and of those, only 6 credits may be applied to the major.

BIOL 491. Undergraduate Teaching Experience. Cr. 1-2. Repeatable. Prereq: Permission of supervising staff
For students registering to be undergraduate teaching assistants. Satisfactory-Fail grading only. Offered on a satisfactory-fail basis only.

BIOL 492. Preparing for Graduate School in the Biological Sciences. (1-0) Cr. 1. F. Prereq: For life science majors; Minimum requirement: sophomore standing.
For students considering pursuing a graduate degree in the biological sciences. Professional development topics including the defining of academic and career areas of interest, finding and evaluating appropriate programs of graduate study, the graduate school application process, and developing a curriculum vita. Exploration of learning opportunities at field stations, research internships, and independent research activities.

BIOL 494. Biology Internship. Cr. 1-3. Repeatable. Prereq: 8 credits in biology and permission of instructor
Intended to provide credit for significant professional experiences in biological sciences. A written proposal is required prior to registration. Intended for Biology majors.
BIOL 495. Undergraduate Seminar. 
Cr. 1-3. Repeatable, F.S. Prereq: Permission of instructor. 
Content varies from year to year and may include detailed discussion of special 
topics in biology, current issues in biology, or careers in biology. 

BIOL 498. Cooperative Education. 
Cr. R. Repeatable. F.S.SS. Prereq: Permission of the Biology Program cooperative 
education coordinator. 
Required of all cooperative education students. Students must register for this course 
prior to commencing each work period. 

BIOL 499. Undergraduate Research Experience. 
Cr. 1-6. Repeatable, maximum of 9 credits. F.S.SS. Prereq: Permission of instructor. 
Research opportunities for undergraduate students in the biological sciences. No 
more than 9 credits in Biol 499 may be counted toward graduation and of those, only 
6 credits may be applied to the major.

Community Development

Interinstitutional Graduate Program

Participating Institutions: 
- Iowa State University
- Kansas State University
- University of Nebraska
- North Dakota State University
- South Dakota State University

Community Development deals with challenges faced by communities in the United States and other countries, particularly those in rural areas. Global economic restructuring and the devolution of government services have produced an 
environment in which Community Developers are called on to think and act in 
innovative ways.

Community Development is a progressive field, actively promoting positive social, 
economic, cultural and environmental change. It encourages people to see the 
“whole picture,” engaging citizens in democratic decision making and action.

Community Development is an inter-institutional distance education program offered 
through the Web. The student selects a home institution, which grants the degree. 
After admission at the home institution, the student takes courses from each of 
the six institutions: Iowa State University, Kansas State University, University of 
Nebraska, North Dakota State University, and South Dakota State University.

At Iowa State University, Community Development is an optional area of 
specialization within the Interdisciplinary Graduate Studies degree program that 
consists of 37 semester credits for completion of the program. A thesis or creative 
component is required. A computer with minimum specifications, Web access, and 
an email address are required for completing the program.

Registration

Students choosing to receive their degree from Iowa State University complete all the 
admissions, registration and fee payment processes through ISU.

Courses

Courses primarily for graduate students, open to qualified undergraduates:

(3-0) Cr. 3. 
Detailed introduction to community resource management. Theoretical frameworks, 
methodological investigation, applied practices. Enhancement of ability of community 
development professionals to work with communities to plan, develop and monitor 
conversation and development of natural resources with multiple functions.

C DEV 503. Community Development I: Principles and Strategies of Community 
Change. 
(3-0) Cr. 3. 
Analysis of principles and practices of community change and development. Use of 
case studies to relate community development approaches to conceptual models 
from diverse disciplines. Exploration of professional practice principles, and student 
construction of their personal framework for practicing community development.

(3-0) Cr. 3. 
Introduction to research methods relevant to community development. Formulate and 
begin a research effort, methods of data collection and how conceptual frameworks 
are used to develop the questions and analyze data. Emphasis on strategies 
for reporting findings and applying findings in community action and methods 
of evaluating the entire research process. Significant attention paid to issues of 
research ethics and inclusiveness.

C DEV 505. Community Development II: Organizing for Community Change. 
(3-0) Cr. 3. 
Examine role of civil society in community planning efforts. Comparative approach 
to planning theories and approaches. Focus on change within communities and 
the roles of government, planners, and citizens in reacting to or shaping change. 
Dimensions of social capital and the context of change covered.

C DEV 506. Community and Regional Economic Analysis I. 
(3-0) Cr. 3. 
Introduction to concepts of communities and regions, theories of economic growth, 
drivers of economic growth, the economic base of a community, sources of growth 
or decline in the community, roles of local government and institutions, and analytical 
tools. Strategies for local economic development will also be explored.

C DEV 507. Introduction to Native Communities. 
(3-0) Cr. 3. 
A base knowledge course. For students currently working within, in partnership with, 
or considering working with Native communities. Basic understanding within the 
context of community development of the diversity of the tribal structures and cultures 
and the unique history and jurisdictional considerations of these nations. Working 
with tribes, Federal and Indian relations, and governance and cultural issues.

C DEV 508. Ecological Economics. 
(3-0) Cr. 3. 
Approaches economy and community by looking at the inherent interdependence, 
jointness, and potential complimentarity between ecology and economy (utility) of a 
place.

C DEV 509. Building Native Community and Economic Capacity. 
(3-0) Cr. 3. 
Focus on non-western approaches to helping Native communities build their 
capacity. Students will learn to take a participatory, culture-centered, and strength-
based approach to development.

C DEV 510. Indian Country Agriculture and Natural Resources. 
(3-0) Cr. 3. 
Introduction to the historical and contemporary issues related to natural resource 
management on Native American lands. Philosophical and economic arguments 
concerning natural resource conservation, preservation and extraction will be 
explored.

C DEV 512. Sustainable Communities. 
(3-0) Cr. 3. 
Students will learn the conceptual relationships among Community and Sustainable 
Development and Sustainable Communities and examine the social, environmental, 
and economic aspects of sustainable communities. The course includes analysis of 
public policy impacts on community sustainability, practical actions for enhancing 
sustainability, and changing power dynamics and reward structures involved in 
incorporating sustainability into Community Development.

(3-0) Cr. 3. 
Course explores theories of local economic development and addresses the 
development issues faced by communities in the 21st century. Students will 
understand and apply concepts from economic development planning, economic 
analysis, business development, human resource development, community-based 
development, and high-technology development.

C DEV 520. Orientation in Community Development. 
(1-0) Cr. 1. 
Introduction to the Community Development program. Focus on on-line delivery 
methods, graduate level research and writing, technology skills.

C DEV 521. Housing and Development. 
Cr. 3. S. Prereq: None. 
Review and evaluation of historical and current housing issues, production, and 
financial systems, including consideration of racial, ethnic, income, and gender 
issues as they relate to the role of housing developments and programs in 
community development. Nonmajor graduate credit.
C DEV 522. Community Leadership and Capacity Building. (3-0) Cr. 3.
Defining leadership and applying it to the workplace. Understanding of potential link
between leadership and community capacity. Identifying strategies for leadership
development in communities.

C DEV 523. Grantwriting for Community Development Professionals. (3-0) Cr. 3.
Basic Grant Development and Management will introduce students to the grant-
getting process and provide an overview of what happens after a project is funded.
The following topics will be covered: researching funding sources, generating cutting
edge ideas, assessing needs, planning a project, establishing credibility, formulating
a sustainable budget, designing an evaluation plan, managing the funded project,
and disseminating project results.

C DEV 524. Non-Profit Management in Community Development. (3-0) Cr. 3.
Understanding of how non-profit organizations are run in order that they may
participate more fully in community development efforts. Learning skills necessary
to assist organizations to manage community development projects and programs,
such as, budgeting, planning, personnel, facilities, volunteer management, and
dependence.

C DEV 525. Role of Tribal Colleges in Economic Development. (3-0) Cr. 3.
Focus on role of tribally-chartered colleges and universities in economic development
within Native communities. Social capital analytic framework to examine and evaluate
tribal college model of economic development.

C DEV 526. Immigration and Community Inclusion. (3-0) Cr. 3.
Mechanisms for community inclusion and exclusion in relation to immigration will
be examined. Aspects of ethnicity, religion, occupation and transnationalism are
addressed in terms of community mechanism for incorporating immigrants as
community assets.

C DEV 527. Public and Non-Profit Budgeting. Cr. 3. SS.
Introduction to the fundamental theories and practices of budgeting in the public and
non-profit sectors. Topics covered include overview of budgeting and budget reform,
taxation, expenditures, budget preparation and adoption, budget implementation, and
performance budgeting. Nonmajor graduate credit.

C DEV 528. Evaluation of Organizations and Programs. (3-0) Cr. 3. Prereq: C DEV 504 with grade of C or better
Introduction to the philosophy, techniques, and methodologies of organizational
and program evaluation. Overview of program evaluation and theory, techniques
to evaluate program processes and performance, evaluation designs, assessing
program efficiency, models to diagnose organizations, and methods to assess
organizational performance.

C DEV 530. Toward Ethical Engagement. (3-0) Cr. 3.
Understanding what ethics are and identify ethical dimensions of a problem. Ability to
employ ethical analysis and engagement strategies in public problem-solving.

C DEV 532. Community and Regional Economic Analysis II. (3-0) Cr. 3. Prereq: C DEV 506
Substantive grounding in the theories and practice of measuring community
economic dynamics; build solid foundation skills for applied community economic
analysis.

C DEV 542. The Policy and Politics of Coastal Areas. (Cross-listed with POL S). (3-0) Cr. 3.
Exploration of political implications of coastal policy. Issues include: “Carrying
capacity,” zoning, regulation of human development activities, tradeoffs between
conservation and jobs, the quality of coastal lifestyle, ways in which citizens
participate in policy for coastal areas.

C DEV 590. Special Topics in Community Development. Cr. 1-3. F.S.S.S.
Special topics in Community Development. Independent Study, must get instructor
approval.

C DEV 599. Creative Component. Cr. arr.
Students work with major professor to conduct research and carry out work on their
creative component. Instructor permission required.

Courses for graduate students:
Thesis Research.

Culinary Science (AGLS)

Curriculum in Culinary Science
Administered by the Department of Food Science and Human Nutrition

Total Degree Requirement: 120 cr.
Students must fulfill International Perspectives and U.S. Diversity requirements
by selecting coursework from approved lists. These courses may also be used to
fulfill other area requirements. Only 65 cr. from a two-year institution may apply to
the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00
minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

Diet and Exercise (AGLS)

Curriculum in Diet and Exercise B.S./M.S.
Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology
This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to dietetic internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a $30 fee for the verification statement of completion of the accredited dietetics program. Courses also are included to meet the ACSM requirements for certification at the level of Health Fitness Instructor.

Total Degree Requirements: 124 cr. for bachelor’s degree and 39-40 cr. for master’s degree
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Dietetics - Undergraduate Program (AGLS)

Curriculum in Dietetics

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited/approved supervised practice programs/dietetic internships. There is a $30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.
Communications and Library: 10 cr.

ENGL 150  Course ENGL 150 Not Found  arr  †
ENGL 250  Course ENGL 250 Not Found  arr  †

**Electives: 0-13 cr.** Select from any university coursework to earn at least 120 total credits.

---

**Courses**

**Courses primarily for graduate students, open to qualified undergraduates:**

**DIET 511. Research Methods.**

(3-0) Cr. 3. S.S. Prereq: enrollment in GP-IDEA MFCS in Dietetics

An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. www only. Only one of DIET 511 or FCElDS 511 may count toward graduation.

**DIET 524. Financial Management and Cost Controls in Dietetics.**

(3-0) Cr. 3. S.S. Prereq: Enrollment in GP-IDEA MFCS in Dietetics

Overview of the fundamental knowledge of financial management, managerial accounting, and operational cost controls for dietetics professionals. Topics include a review of managerial accounting concepts for not-for-profit organizations and for-profit organizations based on the Uniform System of Accounts, value and risk analysis, budgeting, asset management, franchising and management contracts, cost-volume-profit analyses, and operational applications for financial performance.

**DIET 527. Food Writing.**

(3-0) Cr. 3. F. Prereq: Enrollment in GP-IDEA MFCS in Dietetics

Understanding and appreciating how to communicate effectively in writing about food and food-related topics. Hands-on experience in research and writing for various audiences and types of media.

**DIET 530. Nutrition in Wellness.**

(3-0) Cr. 3. S.S. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Addresses wellness promotion through nutrition. Nutritional risk and protective factors will be examined in relation to public health and individual nutrition. www only.

**DIET 532. Maternal and Child Nutrition.**

(3-0) Cr. 3. S.S. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Critical examination of behavioral, physiological, and public health issues impacting dietary and nutritional factors that support normal growth and development. Content focuses on early stages of the life cycle: gestation, lactation, infancy, preschool, school age, and adolescence. www only.

**DIET 534. Nutrition Education in the Community.**

(3-0) Cr. 3. S.S. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Principles and practices of teaching individuals and groups to translate nutrition knowledge into action. Emphasis on research in and evaluation of nutrition education. www only.

**DIET 536. Nutrition: A Focus on Life Stages.**

(3-0) Cr. 3. S.S. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Explores influence of normal physiological stresses on nutritional needs throughout the life span. Evaluates dietary intake and identification of appropriate community nutrition services in on-line discussions. Specific considerations, such as the influence of age and cultural heritage, are incorporated. www only.

**DIET 540. Nutrition and Physical Activity in Aging.**

(Cross-listed with GERON). (3-0) Cr. 3. Alt. F., offered 2012.

WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

**DIET 544. Pediatric Clinical Nutrition.**

(3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in dietetics

Examines the physiological, biochemical and nutritional aspects of disease processes relevant to infants and children up to 18 years of age. Discussion of medical nutrition therapy for a variety of medical conditions in this population including inborn errors of metabolism, food hypersensitivity, obesity, and diseases of the major organ systems. www only.

**DIET 546. Phytochemicals.**

(3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics

Overview of phytochemicals (non-nutritive biologically active compounds) from fruits, vegetables, cereals and oilseeds. Covers recent findings of chemistry, physiological functions, and potential health implications of phytochemicals. www only.

**DIET 548. Professional Development Assessment.**

(1-0) Cr. 1. F.S.SS. Prereq: Enrollment in GP-IDEA MFCS in Dietetics

Web-based course providing information and practice for student to assess and evaluate own professional development and continuing professional education needs. Completion of professional 5-year plan. Offered on a satisfactory-fail basis only.
DIET 550. Finance and Cost Controls.  
(3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Overview of the fundamental knowledge of hospitality managerial accounting, cost controls, and financial management. Important topics include: cost concepts, cost-volume-profit analysis, calculating and controlling food and beverage costs, pricing, and capital budgeting. www only.

DIET 554. Statistics.  
(3-0) Cr. 3. S.SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Tools used to make statistical decisions. Major emphasis on explanation and understanding of important concepts involved; basic theme is understanding of data and methods used to analyze such data. www only. Only one of DIET 554 or Stat 401, 495, 542 may count toward graduation by students in the GPIDEA Dietetics program.

(3-0) Cr. 3. S. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics  
Integration of the molecular, cellular and physiological aspects of vitamins and minerals in mammalian systems. Interactions among nutrients, metabolic consequences of deficiencies or excesses, relevant polymorphisms, major research methodologies, and current topics related to micronutrients and non-nutrient components. www only. Only one of DIET 556 or NUTRS 502 may count toward graduation.

(3-0) Cr. 3. F. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics  
Integration of the molecular, cellular and physiological aspects of macronutrients and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, their interactions, metabolic consequences, and major research methodologies. www only. Only one of DIET 558 or NUTRS 501 may count toward graduation.

DIET 560. Medical Nutrition and Disease.  
(3-0) Cr. 3. F.S.SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention directed to medical nutrition needs of patients in the treatment of each disease state. www only. Only two of DIET 560 or NUTRS 561, 564 may count toward graduation.

DIET 565. Malnutrition in Low-Income Countries.  
(3-0) Cr. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Identification and assessment of malnutrition in low-income countries. Social, cultural, political, economic, and geographic determinants of malnutrition. Protein-energy malnutrition, vitamin and mineral deficiencies. Intervention approaches; international efforts and local sustainability. www only.

DIET 566. Nutrition Counseling and Education Methods.  
(Dual-listed with DIET 466). (Cross-listed with NUTRS). (2-2) Cr. 3. F.S. Prereq: Graduate student status  
Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.

(3-0) Cr. 3. Alt. F., offered 2011. Prereq: DIET 360; BBMB 301, undergraduate course in physiology; enrollment in GP-IDEA MFCS in Dietetics  
Study of the current scientific literature to evaluate current trends and issues in nutrition science and dietetic practice. Emerging areas of research investigating the role of nutrients in health and disease in humans will be explored. Emphasis on the impact of emerging research on nutrition recommendations and interventions designed to promote human health. www only.

DIET 568. Entrepreneurship in Dietetics.  
(3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Definition and discussion of entrepreneurship and its importance to economic and business environment. www only.

DIET 569. Dietary and Herbal Supplements.  
(3-0) Cr. 3. SS. Prereq: Enrollment in GP-IDEA MFCS in Dietetics  
Develop skills to partner with patients in making dietary supplement decisions. Explore the safe, efficacious use of botanicals and supplements in nutritional support of aging, maternal health and wellness. Discussions on supplementation in the prevention and treatment of chronic disease include: arthritis, cancer, cardiovascular, diabetes, digestive, liver and renal disorders.

(3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Develop an understanding of nutrition based on knowledge of the biochemical and physiological process and functions of specific nutrients in meeting nutritional requirements. Emphasis on the relationship of optimal nutrition and physical efficiency and performance. www only.

DIET 572. Environmental Scanning and Analysis of Current Issues in Dietetics.  
(3-0) Cr. 3. F.S. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Overview of current topics, issues, and trends in dietetics practice. www only.

DIET 573. Administration of Health Care Organizations.  
(3-0) Cr. 3. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
A comprehensive review of today’s health care institutions and their response to the economics, social, ethical, political, legal, technological, and ecological environments. www only.

DIET 595. Proposal and Grant Writing for the Working Professional.  
(3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics  
Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Designed for the working professional. www only.

DIET 599. Creative Component.  
Cr. arr. Repeatable. F.S.SS. Prereq: Enrollment in GPIDEA MS Dietetics  
For non-thesis option only.

Entomology

Undergraduate Study

An undergraduate degree in Insect Science will no longer be offered.

Minor - Insect Science

The department offers a minor in Insect Science that may be earned by completing ENT 370 Insect Biology and 12 credits in courses selected from an approved list supplied by the department.

Minor - Emerging Global Diseases

Entomology administers the Emerging Global Diseases minor (see http://www.ent.iastate.edu/egd). Core courses address the biology of emerging disease agents (e.g., protozoa, fungi, microbes, and viruses), the clinical manifestations and epidemiology of emerging diseases, and the impact of those diseases on human interactions and socioeconomic. One course must be taken from each of three core areas:

- Pathogens and Disease
  - MICRO 310 Medical Microbiology
  - BIOL 353 Introductory Parasitology
  - & MICRO 353 and Introductory Parasitology

- Sociology and Economics
  - SOC 411 Social Change in Developing Countries
  - SOC 345 Population and Society
  - FS HN 342 World Food Issues: Past and Present

- Arthropod-borne Diseases
  - ENT 374 Insects and Our Health
  - ENT 574 Medical Entomology

The remainder of the credits (for a total of 15) may be selected from any of the above-listed courses not selected, and from other appropriate courses as approved by Emerging Global Diseases program advisers.

Graduate Study

The department offers work for the master of science and doctor of philosophy degrees with a major in entomology. Studies at the Ecosystem, Organismal, and Subcellar levels occur in the following areas: aquatic entomology, biological control, chemical ecology, ecology, host plant resistance, insecticide toxicology, medical/ veterinary entomology, pathology, pest management, physiology, population genetics, or systematics.

Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research
methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Prerequisite to the entomology major and to minor graduate work in the department is completion of at least two years of zoological courses, for part of which credit in other closely allied biological sciences may be substituted. Specific course requirements for advanced degrees depend partly upon previous training and experience in the major field of specialization.

Any student receiving the M.S. in entomology shall have at least one course in insect physiology, one course in insect systematics, two courses of ENT 590 Special Topics (selected from topics A through D, F through I, M and N inclusive), and at least 1 credit of ENT 600 Seminar.

Any student receiving the Ph.D. in entomology shall have at least one course in insect physiology, one course in insect systematics, four additional courses of ENT 590 Special Topics (selected from topics A through D and F through I, M through N inclusive), and at least 1 credit of ENT 600 Seminar. At least one 590 must be taken from each of these subgroups: Population (C, D, N); Organismal (A, B, F, M); and Suborganismal (G, H, I).

In addition, Ph.D. students majoring either in Entomology or Toxicology shall have two semesters of teaching experience, taken as ENT 590K Special Topics: Teaching Experience. Both semesters or ENT 590L Special Topics: Teaching Experience, one semester and ENT 590L Special Topics: Extension Internship, the other semester.

A student can receive a Ph.D. minor in Entomology by taking 3 Entomology courses (500 level and above) for a total of 9 credits to be determined by the student’s POS committee and approved by the Entomology Director of Graduate Education.

An option for an emphasis in molecular Entomology is available. Any student receiving the M.S. in entomology with an emphasis in molecular entomology is required to take:

- **ENT 555** Insect Physiology 4
- **ENT 590G** Special Topics: Molecular Entomology. 1-3
- Plus one other course of 590 selected from topics A-D, F, H, I, M, N
- Plus one additional course in molecular entomology
- **ENT 600** Seminar 1
- **BBMB 540** Biochemistry I 3
- **BBMB 542A** DNA Techniques. 1

And one course from the following:
- **ENT 576** Systematic Entomology
- **ENT 525** Aquatic Insects
- **ENT 568** Advanced Systematics

Any student receiving the Ph.D. in entomology with an emphasis in molecular entomology is required to take:

- **ENT 555** Insect Physiology 4
- **ENT 590G** Special Topics: Molecular Entomology. 1-3
- Plus three other courses of 590 selected from topics A-D, F, H, I, M, N 9
- One additional course in molecular entomology 3
- **ENT 600** Seminar 1
- **BBMB 542A** DNA Techniques. 1
- Plus two other workshops selected from:
  - **BBMB 542B** Introduction to Molecular Biology Techniques: Protein 3
  - **BBMB 542C** Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.) 3
  - **BBMB 542D** Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.) 3
  - **BBMB 542E** Introduction to Molecular Biology Techniques: Proteomics 3

An additional course with a molecular component 3

Plus one from each of the following:
- Systematics 3
- **ENT 576** Systematic Entomology
- **ENT 525** Aquatic Insects
- **ENT 568** Advanced Systematics
- Biochemistry 3
- **BBMB 404** Biochemistry I

**Courses**

**Courses primarily for undergraduates:**

**ENT 201. Introduction to Insects.**
(1-0) Cr. 1. F.S.SS. 5 weeks. Classroom section spring only. World Wide Web section of course offered summer and fall semesters. Biological and ecological aspects of insects.

**ENT 211. Insects and Society.**

**ENT 283. Pesticide Application Certification.**
(Cross-listed with AGRON, FOR, HORT). (2-0) Cr. 1. S. Holscher. Core background and specialty topics in agricultural and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

**ENT 370. Insect Biology.**

**ENT 371L. Introduction to Insect Ecology.**
(Cross-listed with IA LL). (3-3) Cr. 4. Alt. SS., offered 2013. Field and laboratory study of insects, their diversity, life history; emphasis on ecology and behavior.

**ENT 372. Livestock Entomology.**

**ENT 374. Insects and Our Health.**
(Cross-listed with MICRO). (3-0) Cr. 3. S. Prereq: 3 credits in biological sciences Bartholomay. Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Nonmajor graduate credit. Meets International Perspectives Requirement.

**ENT 374L. Insects and Our Health Laboratory.**
(Cross-listed with MICRO). (0-3) Cr. 1. Alt. S., offered 2014. Prereq: Credit or enrollment in ENT 374 Bartholomay. Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

**ENT 375. Plant Protection Using Natural Enemies.**
(Dual-listed with ENT 575). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: ENT 370 or ENT 376 Bonning, Harris. Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies. Nonmajor graduate credit.
(2-3) Cr. 3. S. Prereq: BIOL 101 or BIOL 211
O’Neal. Introduction to entomology and insect-pest management, including life processes, ecology, economics, tactics of population suppression, and ecological backlash. Nonmajor graduate credit. Credit for either ENT 376 or ENT 386, but not both, may be applied toward graduation.

ENT 386. Management of Insect Pests.
(2-0) Cr. 2. Alt. S., offered 2014. Prereq: BIOL 101 or BIOL 211
Introduction to insects and their lifestyles. Theory and application of pest-management practices. Examples drawn primarily from field crops. Nonmajor graduate credit. Credit for either ENT 376 or ENT 386, but not both, may be applied for graduation.

ENT 410. Insect-Virus Interactions: a Molecular Perspective.
(Dual-listed with ENT 510). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. F., offered 2013. Prereq: Permission of an instructor.
Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

ENT 425. Aquatic Insects.
(Dual-listed with ENT 525). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: BIOL 312 or equivalent
Courtney. Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

ENT 452. Integrated Management of Diseases and Insect Pests of Turfgrasses.
(Dual-listed with ENT 552). (Cross-listed with PL P, HORT). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: HORT 351
Gleason, D. Lewis. Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

ENT 466. Ecosystem Service Management.
(Dual-listed with ENT 566). (2-3) Cr. 3. Alt. F., offered 2014. Prereq: permission of instructor
Lecture and discussion of land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENT 471. Insect Ecology.
(Dual-listed with ENT 571). (2-3) Cr. 3. Alt. F., offered 2014. Prereq: 9 credits biological sciences
O’Neal. The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

ENT 478. Medical Protozoology.
(Dual-listed with ENT 578). (Cross-listed with V PTH, MICRO). (2-1) Cr. 3. F. Prereq: MICRO 302 or BIOL 314, or equivalent
Medically important protozoa: their ecology and biology and the diseases they cause in humans and animals. Emphasis is on the protozoa, with some consideration of parasitic nematodes. Topics include: infection and immunity, computational biology/bioinformatics, unique/subcellular systems (pathways and organelles), vector-parasite-host interactions, disease prevention/treatment strategies, developmental biology. Nonmajor graduate credit.

ENT 490. Independent Study.
Cr. 1-3. Repeatable, maximum of 6 credits. Prereq: 15 credits in biological sciences, junior or senior classification
A maximum of 6 credits of ENT 490 may be used toward graduation.

ENT 490E. Independent Study: Research or work experience.
Cr. 1-3. Repeatable, maximum of 6 credits. Prereq: 15 credits in biological sciences, junior or senior classification
A maximum of 6 credits of ENT 490 may be used toward graduation.

ENT 490U. Independent Study: Laboratory teaching experience.
Cr. 1-3. Repeatable, maximum of 6 credits. Prereq: 15 credits in biological sciences, junior or senior classification. For students registering to be undergraduate laboratory assistants.
A maximum of 6 credits of ENT 490 may be used toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

ENT 510. Insect-Virus Interactions: a Molecular Perspective.
(Dual-listed with ENT 410). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. F., offered 2013. Prereq: Permission of an instructor
Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

ENT 511. Integrated Management of Tropical Crops.
(Cross-listed with PL P, HORT). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: PL P 408 or PL P 416 or ENT 370 or ENT 376 or HORT 221
Gleason, Lewis. Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Meets International Perspectives Requirement.

ENT 525. Aquatic Insects.
(Dual-listed with ENT 425). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: BIOL 312 or equivalent
Courtney. Morphology, ecology, diversity and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

ENT 530. Ecologically Based Pest Management Strategies.
(Cross-listed with AGRON, SUSAG, PL P). (3-0) Cr. 3. Alt. F., offered 2014. Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

(Cross-listed with TOX). (2-0) Cr. 2. S. Prereq: 9 credits of biological sciences
Coats. Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere.

ENT 552. Integrated Management of Diseases and Insect Pests of Turfgrasses.
(Dual-listed with ENT 452). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. S., offered 2014. Prereq: HORT 351
Gleason, D. Lewis. Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

ENT 555. Insect Physiology.
(3-0) Cr. 4. S. Prereq: ENT 370
Jurenka. Life processes of the insects, including reviews of current problems in insect physiology.

ENT 556. Ecosystem Service Management.
(Dual-listed with ENT 466). (2-3) Cr. 3. Alt. F., offered 2014. Prereq: permission of instructor
Lecture and discussion of land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENT 558. Advanced Systematics.
(Cross-listed with EEOB). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: Permission of instructor
Principles and practice of systematic biology; taxonomy, nomenclature and classification of plants and animals; sources and interpretation of systematic data; speciation; fundamentals of phylogenetic systematics.

ENT 570. Plant-Insect Interaction.
(2-0) Cr. 2. Alt. F., offered 2013. Prereq: ENT 370 or ENT 376
Gassmann. Physiological, behavioral, ecological, and evolutionary factors that govern interactions between insects and plants, applications of this knowledge to agriculture, and important results from the study of natural systems. Additional topics covered during the semester include: tritrophic interactions, biological control of plants by insects, and pollination biology. Student-led discussions and draws on both the primary and secondary literature.

ENT 571. Insect Ecology.
(Dual-listed with ENT 471). (2-3) Cr. 3. Alt. F., offered 2014. Prereq: 9 credits biological sciences
O’Neal. The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.
ENT 574. Medical Entomology.
(3-3) Cr. 4. Alt. S., offered 2014. Prereq: 9 credits in biological sciences
Bartholomay. Identification, biology, and significance of insects and other arthropods
that attack people and animals, particularly those that are vectors of disease.

(Dual-listed with ENT 375). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: ENT 370 or ENT 376
Bonning, Harris. Overview of the biology, ecology, and classification of insect
pathogens, predators, and parasitoids. Discussion of the use of these organisms in
plant protection, including an emphasis on genetic alteration of natural enemies.

(3-6) Cr. 5. Alt. F., offered 2014. Prereq: ENT 370
Courtney. Classification, distribution, and natural history of insects, including
fundamentals of phylogenetic systematics, biogeography, taxonomic procedures, and
insect collection and curation.

ENT 578. Medical Protozoology.
(Dual-listed with ENT 478). (Cross-listed with V PTH, MICRO). (2-1) Cr. 3. F. Prereq:
MICRO 302 or BIOL 314, or equivalent
Medically important protozoa: their ecology and biology and the diseases they cause
in humans and animals. Emphasis is on the protozoa, with some consideration of
parasitic nematodes. Topics include: infection and immunity, computational biology/
bioinformatics, unique/special subcellular systems (pathways and organelles), vector-
parasite-host interactions, disease prevention/treatment strategies, developmental
biology. Nonmajor graduate credit.

ENT 590. Special Topics.
ENT 590A. Special Topics: Biological Control and Pathology.
Cr. 1-3. Repeatable.
ENT 590B. Special Topics: Chemical Ecology and Behavior.
Cr. 1-3. Repeatable.
ENT 590C. Special Topics: Ecology and Pest Management.
Cr. 1-3. Repeatable.
ENT 590D. Special Topics: Evolution and Systematics.
Cr. 1-3. Repeatable.
ENT 590E. Special Topics: Special Research Topics.
Cr. 1-3. Repeatable.
ENT 590F. Special Topics: Medical and Veterinary Entomology.
Cr. 1-3. Repeatable.
ENT 590G. Special Topics: Molecular Entomology.
ENT 590H. Special Topics: Physiology and Biochemistry.
Cr. 1-3. Repeatable.
ENT 590I. Special Topics: Toxicology.
Cr. 1-3. Repeatable.
ENT 590K. Special Topics: Teaching Experience.
Cr. 1-3. Repeatable.
ENT 590L. Special Topics: Extension Internship.
Cr. 1-3. Repeatable.
ENT 590M. Special Topics: Immature Insects.
Cr. 1-3. Repeatable.
ENT 590N. Special Topics: Population Genetics.
Cr. 1-3. Repeatable.

Courses for graduate students:
ENT 600. Seminar.
Cr. 1. F.S.SS.
Presentation of research results.

ENT 675. Insecticide Toxicology.
(Cross-listed with TOX). (2-3) Cr. 3. Alt. F., offered 2013. Prereq: ENT 555 or TOX 501
Coats. Principles of insecticide toxicology; classification, mode of action, metabolism,
and environmental effects of insecticides.

ENT 699. Research.
Cr. arr. Repeatable.

Environmental Science

Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary
approach to the study of environmental systems. The magnitude and complexity
of environmental problems are creating a growing need for scientists with rigorous,
interdisciplinary training in environmental science. The Environmental Science
program is designed to prepare students for positions of leadership in this rapidly
changing discipline. Environmental Science graduates have a solid foundation in
biological and physical natural sciences and the specialized training necessary for
integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College
of Agriculture and Life Sciences and the College of Liberal Arts and Sciences.
Environmental Science majors complete foundation courses in biology, chemistry,
earth science, geology, physics and mathematics, plus a major consisting of an
integrated core of Environmental Science courses and additional advanced course
work in Environmental Science. Scientific rigor is stressed throughout the program,
beginning with the foundation courses in the first two years of the curriculum. The
upper level core courses emphasize a dynamic systems approach that provides a
framework for integrating physical, chemical, and biological aspects of environmental
systems.

Students seeking an Environmental Science major complete the following:
1. A foundation of approved supporting courses in science and mathematics
   including biology, chemistry, earth science, physics, calculus, and statistics.
2. 30 credits of course work in the major, including a required core of 15 credits.
A combined average grade of C or higher is required in courses applied in the major.
A complete listing of curriculum requirements and sample 4-year plans can be found
on the Environmental Science website: http://www.ensci.iastate.edu/undergrad/
degree_info.html

Graduate Study

Environmental Science offers an interdisciplinary graduate program leading to the
M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the
colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences
cooperate to offer courses and research opportunities covering a broad array of
environmental topics.

Applicants should have completed an undergraduate or masters degree in one of
the biological, chemical, physical, or engineering sciences or should have equivalent
preparation.

The Environmental Science graduate program emphasizes fundamental concepts
and research, which at the same time address major environmental issues.
The curriculum is designed to provide the interdisciplinary approach needed in
Environmental Science education and research. In addition to work in their chosen
area of specialization, students are afforded a broad exposure to the biological,
chemical and physical aspects of environmental systems and the specialized training
necessary for integrated analysis of these systems.

Courses

Courses primarily for undergraduates:

ENSCI 110. Orientation to Environmental Science. 
(1-0) Cr. 1. F. Prereq: Freshman classification in EnSci 
Overview of Environmental Science curriculum and discussion of professional opportunities. Offered on a satisfactory-fail basis only.

ENSCI 201. Introduction to Environmental Issues. 
(Cross-listed with BIOL, ENV S). (2-0) Cr. 2. F.S. 
Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

ENSCI 250. Environmental Geography. 
(Cross-listed with ENV S). (3-0) Cr. 3. F. 
The distribution, origins and functions of the earth’s physical systems and the spatial relationships between human activity and the natural world.

ENSCI 301. Natural Resource Ecology and Soils. 
(Cross-listed with NREM). (3-3) Cr. 4. F. Prereq: BIOL 211, BIOL 211L; FOR 201 or a second course in biology 
effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes. Nonmajor graduate credit.

ENSCI 312. Ecology. 
(Cross-listed with A ECL, BIOL). (3-3) Cr. 4. F.SS. Prereq: BIOL 211L and BIOL 212L 
Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

ENSCI 312L. Ecology. 
(Cross-listed with A ECL, IA LL). Cr. 4. SS. 
An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

(Cross-listed with NREM). (2-0) Cr. 2. F.S. 
Prereq: Junior classification Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses. Nonmajor graduate credit.

ENSCI 360. Environmental Soil Science. 
(Cross-listed with AGRON). (2-3) Cr. 3. S. Prereq: AGRON 154 or ENSCI 250 or GEOL 201 
Burra. Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

ENSCI 381. Environmental Systems I: Introduction to Environmental Systems. 
(Dual-listed with ENSCI 581). (Cross-listed with BIOL, ENV S, MICRO). Cr. 3-4. F. Prereq: 12 credits of natural science including biology and chemistry 
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

ENSCI 382. Environmental Systems II: Analysis of Environmental Systems. 
(Dual-listed with ENSCI 582). (Cross-listed with BIOL). (2-2) Cr. 3. S. Prereq: ENSCI 381 
Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

ENSCI 390. Internship in Environmental Science. 
Cr. arr. Repeatable. F.S.SS. Prereq: Approval of the Environmental Science coordinator 
Supervised off-campus work experience in the field of environmental science. Offered on a satisfactory-fail basis only.

ENSCI 391. Apprenticeship. 
Cr. arr. Repeatable. F.S.SS. Prereq: Approval of the Environmental Science Coordinator 
Practical experience in an approved setting such as a research laboratory, government office, or private office. Offered on a satisfactory-fail basis only.

ENSCI 402. Watershed Hydrology. 
(Dual-listed with ENSCI 502). (Cross-listed with GEOL, MTEOR, NREM). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing 
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

ENSCI 402L. Watershed Hydrology and Surficial Processes. 
(Cross-listed with AGRON, IA LL). Cr. 4. SS. Prereq: Four courses in physical or biological sciences or engineering 
Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.

ENSCI 404. Global Change. 
(Dual-listed with ENSCI 504). (Cross-listed with AGRON, MTEOR, ENV S). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing 
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Nonmajor graduate credit.

ENSCI 405. Environmental Biophysics. 
(Dual-listed with ENSCI 505). (Cross-listed with MTEOR, AGRON). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MATH 165 or MATH 182 or equivalent and some computer programming experience (any language) 
Hornbuckle. A description of the physical microenvironment in which organisms live. Emphasis on the movement of energy (heat and radiation) and mass (water and carbon) among organisms, the soil, and atmosphere. Applications to humans, other animals, plants, and plant communities. Nonmajor graduate credit.

ENSCI 406. World Climates. 
(Cross-listed with MTEOR, AGRON). (3-0) Cr. 3. F. Prereq: AGRON 206/MTEOR 206 
Arritt. Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Nonmajor graduate credit. Meets International Perspectives Requirement.

ENSCI 407. Watershed Management. 
(Dual-listed with ENSCI 507). (Cross-listed with NREM, ENV S). (3-3) Cr. 4. S. Prereq: A course in general biology 
Prereq: A course in general biology Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

ENSCI 408. GIS and Natural Resources Management. 
(Dual-listed with ENSCI 508). (Cross-listed with GEOL, MTEOR, AGRON). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment 
Prereq: Working knowledge of computers and Windows environment Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS.

ENSCI 409. Field Methods in Hydrogeology. 
(Dual-listed with ENSCI 509). (Cross-listed with GEOL). (0-0) Cr. 3. Alt. S., offered 2012. Prereq: GEOL/ENSCI 402 or GEOL/ENSCI 411 or C E 473 
Prereq: GEOL/ENSCI 402 or GEOL/ENSCI 411 or C E 473 
Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects.
ENSCI 411. Hydrogeology.  
(Dual-listed with ENSCI 511). (Cross-listed with GEOL). (3-2) Cr. 4. F. Prereq: Four courses in biological or physical sciences  
Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations. Nonmajor graduate credit.

(Dual-listed with ENSCI 514). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered 2012. Prereq: GEOL 411 or C E 473; MATH 165 or MATH 181  
Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course. Nonmajor graduate credit.

ENSCI 415. Paleoclimatology.  
(Dual-listed with ENSCI 515). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: Four courses in biological or physical science  
Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth’s orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years). Nonmajor graduate credit.

ENSCI 416. Hydrologic Modeling and Analysis.  
(Dual-listed with ENSCI 516). (Cross-listed with MTEOR, GEOL). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: Four courses in Earth science, meteorology, or engineering; junior standing  
Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed. Nonmajor graduate credit.

(Dual-listed with ENSCI 518). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. F., offered 2011. Prereq: 486  
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 419. Environmental Geochemistry.  
(Dual-listed with ENSCI 519). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: GEOL 402 or GEOL 411 or equivalent  
Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling. Nonmajor graduate credit.

(Cross-listed with IA LL). Cr. 4. SS. Prereq: Familiarity with basic principles in biological sciences and ecology  
Basic patterns and underlying physical and biotic causes of both regional and local distributions of plants and animals of North American prairies; field and laboratory analyses and projects. Nonmajor graduate credit.

ENSCI 424. Air Pollution.  
(Dual-listed with ENSCI 524). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424A. Air Pollution: Air quality and effects of pollutants.  
(Dual-listed with ENSCI 524A). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424B. Air Pollution: Climate change and causes.  
(Dual-listed with ENSCI 524B). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424C. Air Pollution: Transportation constraints.  
(Dual-listed with ENSCI 524C). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424D. Air Pollution: Off-gas treatment technology.  
(Dual-listed with ENSCI 524D). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424E. Air Pollution: Agricultural sources of pollution.  
(Dual-listed with ENSCI 524E). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above  
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

(Dual-listed with ENSCI 526). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Four courses in biological or physical science  
Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance. Nonmajor graduate credit.

ENSCI 434. Contaminant Hydrogeology.  
(Dual-listed with ENSCI 534). (Cross-listed with GEOL). (3-0) Cr. 3. S. Prereq: GEOL 411 or equivalent  

ENSCI 446. Integrating GPS and GIS for Natural Resource Management.  
(Dual-listed with ENSCI 546). (Cross-listed with NREM). (2-3) Cr. 3. S. Prereq: 12 credits in student's major at 300 level or above, NREM 245 or equivalent experience with ArcGIS  
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct wayspots for use in GPS navigation.

(Dual-listed with ENSCI 551). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered 2012. Prereq: GEOL 100 or GEOL 201, MATH 181 or equivalent experience  
Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar. Nonmajor graduate credit.

ENSCI 452. GIS for Geoscientists.  
(2-2) Cr. 3. F. Prereq: GEOL 100, GEOL 201 or equivalent  
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI's ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses. Nonmajor graduate credit.

ENSCI 459. Environmental Soil and Water Chemistry.  
(Dual-listed with ENSCI 559). (Cross-listed with AGRON). (3-3) Cr. 4. F. Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 154 or AGRON 360; GEOL 100 and AGRON 354 recommended  
Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues. Nonmajor graduate credit.
ENSCI 461. Introduction to GIS. (Cross-listed with IA LL, ENV S, L A). Cr. 4. SS. Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management. Nonmajor graduate credit.

ENSCI 463. Soil Formation and Landscape Relationships. (Dual-listed with ENSCI 563). (Cross-listed with AGRON). (2-4) Cr. 4. S. Prereq: AGRON 154 or AGRON 260 Burras. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Nonmajor graduate credit. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

ENSCI 477. Soil Physics. (Dual-listed with ENSCI 577). (Cross-listed with AGRON). (3-0) Cr. 3. S. Prereq: Recommended: AGRON 154 MATH 166 Horton. The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

ENSCI 479. Surficial Processes. (Dual-listed with ENSCI 579). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: GEOL 100 or GEOL 201 or equivalent experience. The study of physical processes that shape Earth’s surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips. Nonmajor graduate credit.

ENSCI 480. Engineering Analysis of Biological Systems. (Cross-listed with BSE). (2-2) Cr. 3. F. Prereq: BSE 216; MATH 266; BIOL 211 or BIOL 212; M E 231 Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues. Nonmajor graduate credit.

ENSCI 484. Ecosystem Ecology. (Cross-listed with BIOL). (3-0) Cr. 3. S. Prereq: Combined 12 credits in biology and chemistry. Introduction of the study of ecosystems and the factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems.

ENSCI 485. Soil and Environmental Microbiology. (Dual-listed with ENSCI 585). (Cross-listed with AGRON, MICRO). (2-3) Cr. 3. F. Prereq: AGRON 154 or AGRON 402, MICRO 201 (MICRO 201L recommended) Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. Nonmajor graduate credit.

ENSCI 486. Aquatic Ecology. (Dual-listed with ENSCI 586). (Cross-listed with BIOL). (3-0) Cr. 3. F. Prereq: BIOL 312 or EnSci 381 or EnSci 402 or NREM 301 Dual-listed with EEOB 586. Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology. Nonmajor graduate credit.

ENSCI 486L. Aquatic Ecology Laboratory. (Cross-listed with BIOL, A ECL). (1-3) Cr. 1. F. Prereq: Concurrent enrollment in BIOL 486. Dual-listed with EEOB 586L. Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts. Nonmajor graduate credit.

ENSCI 487. Microbial Ecology. (Dual-listed with ENSCI 587). (Cross-listed with BIOL, MICRO). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry Dual-listed with EEOB 587. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

ENSCI 488. GIS for Geoscientists II. (Dual-listed with ENSCI 588). (Cross-listed with AGRON, GEOG). (2-2) Cr. 3. Alt. S., offered 2013. Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for AGRON 588) a class project. Nonmajor graduate credit.

ENSCI 490. Independent Study. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of the instructor and approval of the Environmental Science coordinator

ENSCI 496. Travel Course. Cr. arr. Repeatable. Prereq: Permission of instructor. Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings. A. International Tour B. Domestic Tour.

ENSCI 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. Prereq: Permission of Environmental Science Coordinator. Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:

ENSCI 502. Watershed Hydrology. (Dual-listed with ENSCI 402). (Cross-listed with GEOL, MTEOR, NREM). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

ENSCI 504. Global Change. (Dual-listed with ENSCI 404). (Cross-listed with AGRON, MTEOR, ENV S). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior, senior, or graduate standing. Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

ENSCI 505. Environmental Biophysics. (Dual-listed with ENSCI 405). (Cross-listed with MTEOR, AGRON). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MATH 165 or MATH 182 or equivalent and some computer programming experience (any language) Hornbuckle. A description of the physical microenvironment in which organisms live. Emphasis on the movement of energy (heat and radiation) and mass (water and carbon) among organisms, the soil, and atmosphere. Applications to humans, other animals, plants, and plant communities. Nonmajor graduate credit.

ENSCI 507. Watershed Management. (Dual-listed with ENSCI 407). (Cross-listed with NREM, ENV S). (3-3) Cr. 4. S. Prereq: A course in general biology Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

ENSCI 508. GIS and Natural Resources Management. (Dual-listed with ENSCI 408). (Cross-listed with A E). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS. In addition to other assignments, graduate students will prepare research literature reviews on topics covered in class and develop enterprise applications.
ENSCI 508I. Aquatic Ecology.
(Cross-listed with IA LL, NREM). Cr. 4. SS. Prereq: Courses in ecology, chemistry, and physics
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

ENSCI 509. Field Methods in Hydrogeology.
(Dual-listed with ENSCI 409). (Cross-listed with GEOL). (0-4) Cr. 3. Alt. SS., offered 2012. Prereq: GEOL/ENSCI 402 or GEOL/ENSCI 411 or C E 473
Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipezometers, stream gauging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects.

ENSCI 511. Hydrogeology.
(Dual-listed with ENSCI 411). (Cross-listed with GEOL). (3-2) Cr. 4. F. Prereq: Four courses in biological or physical sciences
Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.

(Dual-listed with ENSCI 414). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered 2012. Prereq: GEOL/ENSCI 411 or C E 473; MATH 165 or MATH 181
Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course.

ENSCI 515. Paleoclimatology.
(Dual-listed with ENSCI 415). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: Four courses in biological or physical science
Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth’s orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~ 1 million years).

ENSCI 516. Hydrologic Modeling and Analysis.
(Dual-listed with ENSCI 416). (Cross-listed with MTEOR, GEOL). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: Four courses in earth science, meteorology, or engineering; junior standing
Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed.

(Dual-listed with ENSCI 418). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. F., offered 2011. Prereq: A ECL 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 519. Environmental Geochemistry.
(Dual-listed with ENSCI 419). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: GEOE 511 or equivalent
Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

ENSCI 520. Environmental Engineering Chemistry.
(Dual-listed with ENSCI 420). (2-2) Cr. 3. Prereq: CHEM 177 and CHEM 178, MATH 165
Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions and mass transfer principles. Individual laboratory practicals and group projects required. Term paper and oral presentation for graduate level only.

ENSCI 521. Environmental Biotechnology.
(Dual-listed with ENSCI 421). (2-2) Cr. 3. Prereq: C E 326
Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

ENSCI 522. Water Pollution Control Processes.
(Cross-listed with C E). (2-2) Cr. 3. Prereq: C E 521
Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

ENSCI 523. Physical-Chemical Treatment Process.
(Cross-listed with C E). (2-2) Cr. 3. Prereq: C E 520
Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

ENSCI 524. Air Pollution.
(Dual-listed with ENSCI 424). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524A. Air Pollution: Air quality and effects of pollutants.
(Dual-listed with ENSCI 424A). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524B. Air Pollution: Climate change and causes.
(Dual-listed with ENSCI 424B). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524C. Air Pollution: Transportation constraints.
(Dual-listed with ENSCI 424C). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524D. Air Pollution: Off-gas treatment technology.
(Dual-listed with ENSCI 424D). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524E. Air Pollution: Agricultural sources of pollution.
(Dual-listed with ENSCI 424E). (Cross-listed with C E, A E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

(Dual-listed with ENSCI 426). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Four courses in biological or physical science
Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance.

ENSCI 527. Solid Waste Management.
(Cross-listed with C E). (3-0) Cr. 3. Prereq: C E 326
Planning and design of solid waste management systems; includes characterization and collection of domestic, commercial, and industrial solid wastes, waste minimization and recycling, energy and materials recovery, composting, incineration, and landfill design.
ENSCI 529. Hazardous Waste Management.  
(Cross-listed with C E). (3-4) Cr. 3. Prereq: C E 326  
Regulatory requirements for the classification, transport, storage and treatment of  
hazardous wastes. Analysis and design of alternatives for treatment and disposal  
technologies, including physical, chemical, and biological treatment, solidification,  
icineration, and secure landfill design. Regulatory requirements and procedures for  
hazardous waste contaminated site investigations and risk analysis. Analysis and  
design of remedial action alternatives for site restoration.

(Dual-listed with ENSCI 431). (2-3) Cr. 3. F. Prereq: E M 378 or CH E 356  
Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and  
evaluation of systems for the conservation and quality preservation of soil and water  
resources. Use and analysis of hydrologic data in engineering design; relationship  
of topography, soils, crops, climate, and cultural practices in conservation and quality  
protection of soil and water for agriculture. Small watershed hydrology, water  
movement and utilization in the soil-plant-atmosphere system, agricultural water  
management, best management practices, and agricultural water quality. Graduate  
students will prepare several research literature reviews on topics covered in the  
class in addition to the other assignments.

ENSCI 533. Erosion and Sediment Transport.  
(Cross-listed with A E). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: A E 422 or C E 372,  
MATH 266  
Soil erosion processes, modified universal soil loss equation and its application to  
conservation planning, sediment properties, initiation of sediment motion and over  
land flow, flow in alluvial channels and theory of sediment transport, channel stability,  
reserves sedimentation, wind erosion, BMPs for controlling erosion.

ENSCI 534. Contaminant Hydrogeology.  
(Dual-listed with ENSCI 434). (Cross-listed with GEO), (3-0) Cr. 3. S. Prereq: GEOL 511 or equivalent  
Theory and practical considerations of fate and transport of solutes through porous  
geologic materials. Organic and inorganic contaminants in industrial and agricultural  
settings. Subsurface microbiology and biodegradation of aromatic and chlorinated  
hydrocarbons. Investigation of coupled processes (diffusion, advection, dispersion,  
sorption, and biodegradation) using computer models. Soil and groundwater  
monitoring and remediation strategies.

(Cross-listed with NREM, EEOB). (2-3) Cr. 3. F. Prereq: BIOL 366 or BIOL 474 or  
graduate standing  
Theory and practice of restoring animal and plant diversity, structure and function of  
disturbed ecosystems. Restored freshwater wetlands, forests, prairies and  
reintroduced species populations will be used as case studies.

ENSCI 535I. Wetland Ecology.  
(Cross-listed with AEC, IA LL, EEOB). Cr. 4. Alt. SS., offered 2012. Prereq: A course in ecology  
Ecological principles for the restoration of native ecosystems; establishment (site  
preparation, selection of seed mixes, planting techniques) and management (fire,  
mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on  
the restoration of prairie and wetland vegetation.

ENSCI 546. Integrating GPS and GIS for Natural Resource Management.  
(Dual-listed with ENSCI 446). (Cross-listed with NREM). (2-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS  
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of  
GPS. Use of Global Positioning System technology for spatial data collection and  
navigation. Post-processing and real-time correction of GPS data. GPS data transfer  
to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS  
navigation.

(Dual-listed with ENSCI 451). (Cross-listed with GEO). (2-2) Cr. 3. Alt. S., offered 2012. Prereq: GEOL 100 or GEOL 201, MATH 181 or equivalent experience  
Seismic, gravity, magnetic, resistivity, electromagnetics, and ground-penetrating radar  
techniques for shallow subsurface investigations and imaging. Data interpretation  
techniques. Lab emphasizes computer interpretation packages. Field work with seismic  
and resistivity-imaging systems and radar. Nonmajor graduate credit.

ENSCI 552. GIS for Geoscientists.  
(Dual-listed with ENSCI 452). (Cross-listed with AGRON). (2-2) Cr. 3. F. Prereq: GEOL 100, GEOL 201 or equivalent  
Introduction to geographic information systems (GIS) with particular emphasis on  
geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules.  
Emphasizes typical GIS operations and analyses in the geosciences to prepare  
students for advanced GIS courses.

ENSCI 553. Soil-Plant Relationships.  
(Cross-listed with AGRON). (3-0) Cr. 3. F. Prereq: AGRON 354  
Composition and properties of soils in relation to the nutrition and growth of plants.

ENSCI 558. Laboratory Methods in Soil Chemistry.  
(Cross-listed with AGRON). (2-3) Cr. 3. Alt. F., offered 2012. Prereq: AGRON 354 and CHEM 211  
Experimental and descriptive inorganic and organic analyses. Operational theory  
and principles of applicable instruments, including spectrophotometry, atomic  
and molecular absorption and emission spectroscopy, mass spectrometry, X-ray  
diffraction and fluorescence, gas and ion chromatography, and ion-selective  
electrodes.

ENSCI 559. Environmental Soil and Water Chemistry.  
(Dual-listed with ENSCI 459). (Cross-listed with AGRON). (3-3) Cr. 4. F. Prereq:  
Two semesters of college-level chemistry, MATH 140, AGRON 154 or AGRON 360;  
GEOL 100 and AGRON 354 recommended.  
Two weekend field trips. Credit for one of Agron 563 or 563I may be applied for  
graduation.

ENSCI 563. Soil Formation and Landscape Relationships.  
(Dual-listed with ENSCI 463). (Cross-listed with AGRON). (2-4) Cr. 4. S. Prereq:  
AGRON 154 or AGRON 260  
Burras. Relationships between soil formation, geomorphology, and environment.  
Soil description, classification, geography, mapping, and interpretation for land use.  
twoc week field trips. Credit for one of Agron 563 or 563I may be applied for graduation.

ENSCI 564. Soil Formation and Landscape Relationships.  
(Dual-listed with ENSCI 463). (Cross-listed with AGRON, IA LL). Cr. 4. Alt. SS.,  
offered 2012. Prereq: AGRON 154 or AGRON 260  
Burras. Relationships between soil formation, geomorphology, and environment.  
Soil description, classification, geography, mapping, and interpretation for land use.  
Credit for only Agron 563 or 563I may be applied for graduation.

ENSCI 564. Wetland Ecology.  
(Cross-listed with EEOB). (3-0) Cr. 3. S. Prereq: 15 credits in biological sciences  
Ecology, classification, creation and restoration, and management of wetlands.  
Emphasis on North American temperate wetlands.

ENSCI 564I. Wetland Ecology.  
(Cross-listed with IA LL, EEOB). Cr. 4. SS. Prereq: La LL 312  
Ecology, classification, creation, restoration, and management of wetlands. Field  
studies will examine the composition, structure and functions of local natural  
wetlands and restored prairie pothole wetlands. Individual or group projects.

ENSCI 571. Surface Water Hydrology.  
(Cross-listed with C E). (3-0) Cr. 3. Prereq: C E 372  
Analysis of hydrologic data including precipitation, infiltration, evapotranspiration,  
direct runoff and streamflow; theory and use of frequency analysis; theory of  
streamflow and reservoir routing; use of deterministic and statistical hydrologic  
models. Fundamentals of surface water quality modeling, point and non-point  
sources of contamination. Design project.

ENSCI 572. Analysis and Modeling Aquatic Environments.  
(Cross-listed with C E). (3-0) Cr. 3. Prereq: C E 372  
Principles of surface water flows and mixing. Introduction to hydrologic transport  
and water quality simulation in natural water systems. Advection, diffusion and  
dispersion, chemical and biologic kinetics, and water quality dynamics. Applications  
to temperature, dissolved oxygen, primary productivity, and other water quality  
problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models.

(Dual-listed with ENSCI 473). (3-0) Cr. 3. Prereq: C E 372  
Principles of groundwater flow, hydraulics of wells, super-position, slug and pumping  
tests, streamlines and flownets, and regional groundwater flow. Contaminant  

ENSCI 575. Soil Formation and Transformation.  
(Cross-listed with AGRON). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: AGRON 463 or  
equivalent  
Advanced study of soil formation, emphasizing relationships among soils,  
landscapes, environment, humans, and land use.
ENSCI 577. Soil Physics.  
(Dual-listed with ENSCI 477). (Cross-listed with AGRON). (3-0) Cr. 3. S. Prereq: Recommended: AGRON 154 and MATH 166  
Horton. The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.  

ENSCI 578. Laboratory Methods in Soil Physics.  
(Cross-listed with AGRON). (0-3) Cr. 1. S. Prereq: concurrent enrollment in AGRON 477 or 577  
Horton. Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.  

ENSCI 579. Surficial Processes.  
(Dual-listed with ENSCI 479). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: GEOL 100 or GEOL 201 or equivalent experience  
The study of physical processes that shape Earth’s surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips.  

(Dual-listed with ENSCI 381). (Cross-listed with BIOL, ENV S, MICRO). Cr. 3-4. F. Prereq: 12 credits of natural science including biology and chemistry  
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.  

ENSCI 582. Environmental Systems II: Analysis of Environmental Systems.  
(Dual-listed with ENSCI 382). (Cross-listed with BIOL). (2-2) Cr. 3. S. Prereq: ENSCI 581  
Continuation of EnSci 581. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.  

ENSCI 584. Ecosystem Ecology.  
(Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: Combined 12 credits in biology and chemistry  
Introduction to the study of ecosystems and the factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems.  

ENSCI 585. Soil and Environmental Microbiology.  
(Dual-listed with ENSCI 485). (Cross-listed with AGRON, MICRO). (2-3) Cr. 3. F. Prereq: AGRON 154 or AGRON 402, MICRO 201 (MICRO 201L recommended)  
Loyanchuk. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.  

ENSCI 586. Aquatic Ecology.  
(Dual-listed with ENSCI 486). (Cross-listed with EEOB). (3-0) Cr. 3. F. Prereq: ENSCI 301 or ENSCI 312 or ENSCI 381 or ENSCI 402  
(Dual-listed with Biol 486.) Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine and wetland ecology.  

ENSCI 588. Special Topics.  
Cr. arr. Repeatable. F.S.SS. Prereq: Permission of major professor in Environmental Science faculty  
Literature reviews and conference in accordance with needs and interest of the student.  

ENSCI 599. Creative Component.  
Cr. arr. Repeatable. F.S.SS. Prereq: Permission of major professor in Environmental Science faculty  
Creative component for nonthesis master of science degree.  

Courses for graduate students:  

ENSCI 685. Advanced Soil Biochemistry.  
(Cross-listed with MICRO, AGRON). (2-0) Cr. 2. Alt. S., offered 2012. Prereq: AGRON 585  
Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.  

ENSCI 690. Seminar in Environmental Science.  
Cr. R. Repeatable. F.S.  
Reports and discussion of recent research and literature.  

ENSCI 699. Research.  
Cr. arr. Repeatable. F.S.SS.  

Food Science (AGLS)  

Food Science and Human Nutrition (AGLS)  

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These curricula include culinary science, dietetics, diet and exercise, food science, and nutritional science. Visit the department web site at: www.fshn.iastate.edu.  

Undergraduate Study  

Culinary science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internships in the food industry and culinary business are required. Culinary science graduates are qualified to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales.  

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics, and accrediting agency of the Academy of Nutrition and Dietetics. The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor’s and Master’s degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited/approved dietetics internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian (R.D.) and to practice in the field of dietetics. The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs. There is a $30 fee for a statement of qualification to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales.  

Dietetic internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian (R.D.) and to practice in the field of dietetics. The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs. There is a $30 fee for a statement of qualification to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales.
test kitchens and recipe development, product promotion and communication. Food
scientists also work in government regulatory agencies and academic institutions.
Three options are available in food science: food science and technology, food
science and industry, and consumer food science. The food science and technology
and food science and industry options are approved by the Institute of Food
Technologists, the national professional organization of food science. Students
interested in quality control/assurance; production supervision; management and
sales; or research careers in the food industry, government, or academia should
elect either the food science and technology or the food science and industry
option. Students who wish to go to graduate or professional schools or who receive
Scholarships of Excellence in Agriculture and Life Sciences should elect the
food science and technology option. Students who wish to emphasize business,
journalism, or special aspects of food science should elect food science and industry.
Students interested in food product formulation and recipe development, food
promotion and communication, and consumer services in government and industry
should elect the consumer food science option.

Students who wish to combine education in engineering with food science may
select additional courses in chemical or agricultural engineering. Double majors are
available and may require an additional year.

Nutritional science offers two options: pre-health professional & research and
nutrition & wellness. Students in the pre-health professional & research option gain
a strong basic science education along with human nutrition expertise that enables
them to attain the knowledge and skills necessary to work in research laboratories
of colleges and universities, government agencies, industries, and foundations.
The pre-health professional & research option can serve as a preprofessional
program for law, medicine, human nutrition, veterinary medicine, or for graduate study in
nutrition or other biological sciences. Students in the nutrition & wellness option
will learn about the role of nutrition and healthy eating for disease prevention and
wellness with an emphasis on communication of nutrition messages to the public
and community agencies and effective program planning and evaluation. Graduates
will be prepared for employment opportunities in community and state agencies,
nonprofit organizations and health promotion enterprises, public health and related
programs and for graduate study.

Students graduating with degrees in culinary science, dietetics, diet and exercise,
food science, or nutritional science will be able to: 1) demonstrate a high level of
technical competence in their chosen field, perform successfully in a graduate
program, supervised practice program or entry-level professional position; 2)
A combined Bachelor of Science and Master of Science (B.S./M.S.) degree in diet
and exercise is available. The program is jointly administered by the Department
of Food Science and Human Nutrition (FS HN), within the College of Agriculture and
Life Sciences and College of Human Sciences, and the Department of Kinesiology
within the College of Human Sciences. Students interested in this program enroll
as freshmen in the pre-diet and exercise program. In the fall of the junior year, students
apply for admission to the B.S./M.S. program. Students not accepted into
the program continue toward completion of a B.S. degree in dietetics or kinesiology
and health. Coursework has been designed to facilitate a 3-year progression for
those students not accepted into the program and electing to complete a single
undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in diet and exercise.
The department offers coursework for minors in culinary science, food science,
nutrition, and participate in the interdepartmental minor in food safety. See
department office or departmental website for more information about minors: http://
www.fshn.hs.iastate.edu/undergraduate-programs/minors/.

Minor - Food Safety
The interdepartmental food safety minor is designed to provide undergraduate students with exposure to the principles of food safety to complement their current
major and offer new opportunities for their future careers. Depending on the student's major, the minor enhances the student's expertise in food safety issues pertinent to
the student's major. Student learning outcomes include: awareness of food safety
issues as they appear in each step of the food chain; ability to analyze a situation,
identify food safety problems, use resources to gain additional information; develop
a procedure or solution to identified problems; examine proposed solutions for
viability and effectiveness; and to be able to speak and write about food safety
issues. Graduates with a food safety minor are better prepared for employment in
agricultural, medical, and veterinary medical agencies and with state, national and
international businesses.
The food safety minor requires 15 credits of coursework with 9 credits from 3 core
courses and elective courses to supplement the training in the minor. See approved
list for minor courses from departmental website: http://www.fshn.hs.iastate.edu/
undergraduate-programs/minors/.

Postbaccalaureate Program
The Iowa State University Dietetic Internship (DI) began as an AP4 program in 1989. It meets the performance requirements for experience programs for students
who have completed the academic requirements of the Academy of Nutrition and
Dietetics. The internship is administered through the Department of Food Science
and Human Nutrition. Interns are admitted to Iowa State University as graduate
students seeking a “Graduate Certificate in Dietetics Internship” which will be
indicated on the final transcript. Successful completion of this program will result in
the receipt of the DI Verification Statement which establishes eligibility to sit for the
national standardized exam administered by the Commission on Dietetic Registration
(CDR). Successful completion of the exam results in the Registered Dietitian (RD)
credential. For more information, refer to Special Interest Programs listed under the
College of Human Sciences or visit the website at www.dietetics.iastate.edu. There is
a nonrefundable application fee of $75.

Graduate Study
The Food Science and Human Nutrition (FS HN) Department offers coursework for the degrees master of science and doctor of philosophy with majors in food
science and technology and in nutritional sciences, and minors in food science and
nutrition. Graduate work in meat science is offered as a co-major in animal
science and food science and technology.

Prerequisite to major work is a baccalaureate degree in food science, nutrition, or
other physical or biological sciences or engineering that is substantially equivalent to
those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food
science and technology or in nutritional sciences may choose minors from other
fields including anthropology, biorenewable resources and technology, chemistry,
biochemistry, economics, education, journalism, microbiology, psychology,
physiology, statistics, toxicology, or other related fields.
The interdepartmental graduate program in nutritional sciences, administered
through the Graduate College, under the auspices of the Chairs of FSHN and Animal
Science, will provide the structure for coordinating and enhancing interdisciplinary
nutrition research and graduate education. Graduate students will be able to select
from three specializations: animal nutrition, human nutrition, or molecular/biochemical
nutrition. The two main departments are FSHN and Animal Science, whereas
other departments (such as Kinesiology; Biochemistry, Biophysics, and Molecular
Biology; Agronomy; and Statistics) may also be involved. (See Nutritional Sciences
interdepartmental graduate major.)
The department offers an online 12-credit Graduate Certificate in Food Safety
and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas
State University and the University of Missouri through the Great Plains Interactive
Distance Education Alliance. Students eligible for admission to the food science
master’s degree program may be admitted.
The department participates in an online Master of Family and Consumer Sciences/
Dietetics in conjunction with Colorado State University. Kansas State University,
North Dakota State University, Oklahoma State University, South Dakota State
University, University of Kansas Medical Center, and University of Nebraska through
the Great Plains Interactive Distance Education Alliance. Students who are registered
dietitians and are eligible for admission to the FSHN Master’s degree program may
be admitted.
The department offers work for concurrent B.S. and M.S. degree programs that allow
students to obtain both the B.S. and M.S. degrees in 5 years. The programs are
available to students majoring in nutritional science or pre-diet and exercise, and
students progress toward M.S. degrees in nutritional sciences or diet and exercise,
respectively. Students interested in these programs should contact the department
for details. Application for admission to the Graduate College should be made during
the junior year. Students begin research for the M.S. thesis or creative component
during the summer after their junior year and are eligible for research assistantships.
Students graduating with advanced degrees in nutritional sciences and in food
science and technology will demonstrate competency in their chosen discipline.
Measurable outcomes will include the ability to: 1) design, conduct, and interpret
Courses

Courses primarily for undergraduates:

FS HN 101. Food and the Consumer.
(3-0) Cr. 3. F.S. Prereq: High school biology and chemistry or 3 credits each of biology and chemistry

FS HN 104. Introduction to Professional Skills in Culinary Science.
(0-6) Cr. 1. S.
Introduction to culinary science. Students will develop fundamental culinary skills by arranged on-campus work experience (100 hours). Sessions with instructor arranged.

FS HN 110. Professional and Educational Preparation.
(1-0) Cr. 1. F.S.
Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation, enhancement of communication skills, and portfolio development. Offered on a satisfactory-fail basis only.

FS HN 111. Fundamentals of Food Preparation.
(2-0) Cr. 2. F.S. Prereq: FS HN 101 or FS HN 167; high school chemistry or CHEM 160; concurrent enrollment in FSHN 115.

FS HN 112. Orientation to Learning and Productive Team Membership.
(Cross-listed with AER E, CON E, NREM, HORT), (2-0) Cr. 2. F.
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

FS HN 114. Developing Responsible Learners and Effective Leaders.
(Cross-listed with CON E, NREM, HORT), (2-0) Cr. 2. S. Prereq: Hort 112 or NREM 112
Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

FS HN 115. Food Preparation Laboratory.
(0-3) Cr. 1. F.S. Prereq: Credit or enrollment in FS HN 111 or FS HN 214
Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety.

FS HN 167. Introduction to Human Nutrition.
(3-0) Cr. 3. F.S.SS. Prereq: High school biology or 3 credits of biology.
Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family.

FS HN 203. Contemporary Issues in Food Science and Human Nutrition.
(1-0) Cr. 1. F.S.
Introduction to published research and discussion of current issues in food science and human nutrition. Emphasis on sources of credible information, ethics, communication and portfolio development.

FS HN 214. Scientific Study of Food.
(3-0) Cr. 3. F.S. Prereq: FS HN 167 or FS HN 265; CHEM 231 or CHEM 331

FS HN 215. Advanced Food Preparation Laboratory.
(0-6) Cr. 2. F.S. Prereq: Credit or enrollment in FS HN 214
Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety. Development of culinary skills and advanced food preparation.

FS HN 242. Societal Impacts on Food Systems.
(3-0) Cr. 3. S.
Description of food systems from farming practices to global marketing. Exploration of the impacts of food system choices on personal health, the environment and global society.

FS HN 262. Special Topics in Health Professions.
(1-0) Cr. 1. F.
Careers and controversies in nutritional science. Discussion of current topics in health professions involving nutrition, such as "low-carb" diets, supplements for athletic performance, "food and mood," interviews with health professionals on how they use nutrition concepts in practice.

FS HN 264. Fundamentals of Nutritional Biochemistry and Metabolism.
(3-0) Cr. 3. F. Prereq: FS HN 167; CHEM 163, CHEM 163L; BIOL 211
Digestion, absorption, metabolism, and biochemical functions of nutrients. Biochemical aspects of nutrient deficiencies.

FS HN 265. Nutrition for Active and Healthy Lifestyles.
(3-0) Cr. 3. S. Prereq: Credit or enrollment in BBMB 301 or credit in FS HN 264

(3-0) Cr. 3. S.
Course will address milk chemistry, microbiology, handling, processing, regulations, organic production, and nutrition; dispel myths about dairy foods; improve critical thinking and communication skills. Students will participate in structured controversies and debate.

FS HN 311. Food Chemistry.
(3-0) Cr. 3. F. Prereq: TSM 115, CHEM 231 and CHEM 231L or CHEM 331 and CHEM 331L; credit or enrollment in BBMB 301
The structure, properties, and chemistry of food constituents and animal and plant commodities. Nonmajor graduate credit.

FS HN 311L. Food Chemistry Laboratory.
(0-3) Cr. 1. F. Prereq: Credit or concurrent enrollment in FSHN 311.
The laboratory practices of structure, properties, and chemistry of food constituents. Nonmajor graduate credit.

(1-0) Cr. 1. F. Prereq: FSHN 104 or concurrent enrollment in FSHN 104.
Introduction to the roles culinary scientists hold within industry including product development, research, and quality assurance. Discussions focused on professional and educational development, enhancement of communication skills, ethics and emerging issues and trends in culinary science.

(1-0) Cr. 1. F. Prereq: Junior classification
Introduction to the profession of dietetics and responsibilities associated with dietetic professional practice. Emphasis on development of a pre-professional portfolio, career options in dietetics and preparation for a dietetic internship. Leadership and professional career development for the dietitian is addressed through self reflection, creation of materials for post-baccalaureate programs and job shadowing experience. Professional issues related to dietetic practice include Code of Ethics, legal credentialing and standards of professional practice, leadership and future trends in the profession. Offered on a satisfactory-fail basis only.

(Cross-listed with ENV S, AGRON, T SCI), (3-0) Cr. 3. F.S. Prereq: Junior classification
Zdorkowski, Ford. Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Nonmajor graduate credit. Meets International Perspectives Requirement.
FS HN 342H. World Food Issues: Past and Present, Honors. (Cross-listed with ENV S, AGRON, T SC) (3-0) Cr. 3. F. Prereq: Junior classification
Zdorkowski, Ford. Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Nonmajor graduate credit. Meets International Perspectives Requirement.

FS HN 351. Introduction to Food Engineering Concepts. (3-0) Cr. 3. S. Prereq: A course in calculus and physics (PHYS 111 or PHYS 115) Methodology for solving problems in food processing and introduction to food engineering concepts including food properties, material and energy balances, sources of energy, thermodynamics, fluid flow, heat transfer, and mass transfer. Nonmajor graduate credit. Only one of 351 or A E 451 and CH E 357 allowed toward graduation. Field trip.

FS HN 360. Advanced Human Nutrition and Metabolism. (3-0) Cr. 3. F. Prereq: FS HN 265; 3 credits in biochemistry; 3 credits in physiology recommended Physiological and biochemical basis for nutrient needs; assessment of nutrient deficiency and toxicity; examination of nutrient functions and regulation of metabolism; nutrient-gene interactions. Nonmajor graduate credit.

FS HN 362. Nutrition in Growth and Development. (3-0) Cr. 3. S. Prereq: FS HN 360; credit or enrollment in a course in physiology Nutrient needs throughout the life cycle. Interrelationships of genes, gene expression and nutrients with physiological outcomes during human development and aging. Nonmajor graduate credit.

FS HN 364. Nutrition and Prevention of Chronic Disease. (3-0) Cr. 3. F. Prereq: BIOL 256, BIOL 256L or BIOL 306 Overview of nutrients, their functions, metabolism, food sources and optimal choices for the promotion of health and wellness. Nutrition strategies for the prevention of chronic disease, including cancer, diabetes and obesity, as they apply to individuals or the wider population will be discussed.

FS HN 365. Obesity and Weight Management. (3-0) Cr. 3. S. Multifactorial aspects of obesity, maintenance of healthy weight, and the relationship of weight status and chronic disease prevention. Traditional and novel nutrition and exercise theories as well as current popular diet and exercise trends will be discussed.

FS HN 366. Communicating Nutrition Messages. (3-0) Cr. 3. S. Prereq: FS HN 167 or FS HN 265 Theory and application of adult learning as it relates to the role of nutrition in health promotion and disease prevention. Discussion of nutrition education and interventions relative to the social-ecological model. Factors to consider in developing the nutrition education/intervention practicum experience using the social-ecological model. Focus on communication strategies for providing nutrition messages to diverse community audiences using various forms of media and outreach (print, radio, TV, newspaper, consumer publications, websites, community venues). Development of nutrition messages using various forms of media for a target population.

FS HN 367. Medical Terminology for Health Professionals. (1-0) Cr. 1. S. An independent course focused on medical terminology, abbreviations, and simple clinical mathematical calculations.

FS HN 403. Food Laws, Regulations, and the Regulatory Process. (2-0) Cr. 2. S.SS. Prereq: 3 credits in food science coursework at 200 level or above Review of federal legislative and regulatory processes and documents related to food and food ingredients. Discussion of federal food safety programs, food distribution programs, related programs, and key agencies. Exploration of analogous State of Iowa processes, programs, and agencies.

FS HN 405. Food Quality Assurance. (3-0) Cr. 3. S. Prereq: FS HN 214 or FS HN 471; STAT 101 or STAT 104 Basis of food quality control/assurance programs and establishment of decision-making processes using official (government and industry) instrumental, chemical, and sensory procedures. Statistical process and quality control procedures and their applications to various food systems. Development of hazard analysis procedures, specifications, grades, and standards. Nonmajor graduate credit.

FS HN 406. Sensory Evaluation of Food. (Dual-listed with FS HN 506), (2-3) Cr. 3. F. Prereq: FS HN 214 or FS HN 311 or AN S 360; 3 credits in statistics Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements of color and texture. Acceptance and preference testing.

FS HN 407. Microbiological Safety of Foods of Animal Origins. (Dual-listed with NUTRIS 507), (3-0) Cr. 3. S. Prereq: MICRO 420 Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

FS HN 410. Food Analysis. (2-3) Cr. 3. S. Prereq: FS HN 214 or FS HN 311 or CHEM 211; TSM 115 An introduction to the theory and application of physical and chemical methods for determining the constituents of food. Modern separation and instrumental analysis. Use of food composition data bases. Nonmajor graduate credit.

FS HN 411. Food Ingredient Interactions and Formulations. (Dual-listed with FS HN 512), (1-6) Cr. 3. S. Prereq: FS HN 311 or FS HN 411, FSHN 471 Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, microbiology, and processing. Some pilot plant experiences. Electronic communication from web emphasized for class reports, notes and assignments. Nonmajor graduate credit.

FS HN 419. Foodborne Hazards. (Cross-listed with MICRO, TOX) (3-0) Cr. 3. Alt. S., offered 2012. Prereq: MICRO 201 or MICRO 302, a course in biochemistry Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Nonmajor graduate credit. Only one of FS HN 419 and FS HN 519 may count toward graduation.

FS HN 420. Food Microbiology. (Cross-listed with MICRO, TOX) (3-0) Cr. 3. F. Prereq: MICRO 201 or MICRO 302 Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications. Nonmajor graduate credit.

FS HN 421. Food Microbiology Laboratory. (Cross-listed with MICRO), (0-6) Cr. 3. F. Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L Credit or enrollment in FS HN/MICRO 420 Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction. Nonmajor graduate credit.
FS HN 429. Foodborne Toxins.
(Dual-listed with FS HN 529). (Cross-listed with TOX). (2-0) Cr. 2. F, Prereq: A course in microbiology; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Mechanisms of action, metabolism, sources, remediation/detoxification, risk assessment of major foodborne toxins of current interest, design of HAACP plans for use in food industries targeting foodborne toxins, discussion of toxins from a food defense perspective. Offered online only.

FS HN 442. Issues in Food and Society.
(1-0) Cr. 1. S. Prereq: Credit or enrollment in FS HN 101, FS HN 167, FS HN 242, and FS HN 342.
Capstone seminar for Food and Society minor. Discussion and projects about current issues related to food and nutrition. Field trip.

FS HN 461. Medical Nutrition and Disease I.
(4-0) Cr. 4. F. Prereq: FS HN 360, FS HN 361, FS HN 367, 3 credits in physiology at 300 level or above
(Dual-listed with NutrS 561) Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state. Recitation section (1 cr) will focus on refinement of assessment skills, diagnosis of nutritional problem, nutrition care, and documentation.

FS HN 463. Community Nutrition.
(3-0) Cr. 3. F. Pre req: FS HN 265 or FS HN 360; FS HN 366 recommended
Dual-listed with NutrS 563. Survey of current public health nutrition problems among nutritionally vulnerable individuals and groups. Discussion of the multidimensional nature of those problems and of community programs addressing them. Grant writing as a means for funding community nutrition program development. Significant emphasis on written and oral communication at the lay and professional level. Field trip. Nonmajor graduate credit.

Meets U.S. Diversity Requirement

FS HN 464. Medical Nutrition and Disease II.
(3-0) Cr. 3. S. Pre req: FS HN 360, FS HN 461, 3 credits in physiology at 300 level or above
(Dual-listed with NutrS 564) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

FS HN 466. Nutrition Counseling and Education Methods.
(Dual-listed with FS HN 566). (Cross-listed with DIET). (2-2) Cr. 3. F.S. Pre req: Graduate student status
Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.

(3-0) Cr. 3. F. Pre req: FS HN 360 or equivalent
Understanding the molecular basis for the role of diet in the development and prevention of common diseases such as diabetes, cancer, and vascular diseases. Translating this understanding into practical approaches for improving the health of individuals and populations.

FS HN 471. Food Processing I.
(Dual-listed with FS HN 571). (2-3) Cr. 3. F. Pre req: FS HN 351 or A E 451 or CH E 357; MICRO 201 or MICRO 302; CHEM 163 or CHEM 177.
Principles and applications of food processing by application of heat (blanching, pasteurization, canning, extrusion, evaporation and distillation, extrusion and dehydration) and by removal of heat (refrigeration and freezing). Emphasis on solving problems in laboratory and recitation sessions.

FS HN 472. Food Processing II.
(Dual-listed with FS HN 572). (2-3) Cr. 3. S. Pre req: FS HN 351 or A E 451 or CH E 357.
Principles and applications of food processing by biological (fermentation, enzymes) and nontraditional (high pressure, irradiation, pulsed electric field) preservation methods. Includes packaging, waste water treatment, and sanitation. Emphasis on solving problems in laboratory and recitation sessions.

FS HN 480. Professional Communication in Food Science and Human Nutrition.
(1-0) Cr. 1. F.S. Pre req: FS HN 203, senior classification in the department
Presentation of current topics using written and oral communication to a lay audience. Emphasis on communication skills for the profession.

FS HN 489. Issues in Food Safety.
(Cross-listed with AN S, HRI, VDPAM). (1-0) Cr. 1. S. Pre req: Credit or enrollment in FS HN 101 or FS HN 272 or HRI 233; FS HN 419 or FS HN 420; FS HN 403
Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

FS HN 490. Independent Study.
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Pre req: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490A. Independent Study: Dietetics.
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Pre req: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490B. Independent Study: Food Science.
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Pre req: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490C. Independent Study: Nutrition.
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Pre req: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490D. Independent Study: International Experience.
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Pre req: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490E. Independent Study: Entrepreneurship.
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Pre req: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490H. Independent Study: Honors.
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Pre req: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 491. Supervised Work Experience.
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.S. Pre req: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491A. Supervised Work Experience: Dietetics.
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.S. Pre req: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491B. Supervised Work Experience: Food Science.
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.S. Pre req: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.S. Pre req: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491D. Supervised Work Experience: Culinary Science.
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.S. Pre req: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.
(1-3) Cr. 2. F. Prereq: senior classification or permission of instructor; FS HN 360 Students will develop and implement research projects with faculty supervision, based on knowledge gained from nutrition, biology and chemistry courses. Students will prepare a research proposal, conduct research and report results. Students will gain appreciation for independent research and experience creative and innovative aspects of nutrition research.

FS HN 493. Food Preparation Workshop.
(1-3) Cr. 1-3. Selected topics in food preparation including scientific principles, culture and culinary techniques. Variable format may include laboratory, recitation, and lecture. Offered on a satisfactory-fail basis only.

FS HN 494. Service Learning for Human Nutrition.
(1-0) Cr. 1. Repeatable. F.S.SS. Prereq: FS HN 360 Community education programs developed and presented by students around themes of health promotion through diet and exercise. Offered on a satisfactory-fail basis only.

FS HN 495. Practicum.
(1-3) Cr. 2. F.S. Prereq: Senior classification in Nutritional Science-Nutrition and Wellness option or permission of instructor; FS HN 366; credit or enrollment in FS HN 463. Service-learning in community activities. Students will develop, implement and assess a project that engages groups in learning and practicing concepts related to nutrition and wellness.

FS HN 496. Food Science and Human Nutrition Travel Course.
(Dual-listed with FS HN 596B). Cr. 1-4. Repeatable. F.S.SS. Prereq: Permission of instructor (One credit per week traveled and 1 credit for pre-departure class, if offered.) Limited enrollment. Tour and study of food industry, culinary science, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 496A. Food Science and Human Nutrition Travel Course: International travel.
(Dual-listed with FS HN 596). Cr. 1-4. Repeatable. F.S.SS. Prereq: Permission of instructor (One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement.

FS HN 496B. Domestic travel.
(Dual-listed with FS HN 596). Cr. 1-4. Repeatable. F.S.SS. Prereq: Permission of instructor (One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 498. Cooperative Education.
Cr. R. Repeatable, maximum of 2 times. F.S.SS. Prereq: Permission of department chair. Required for students completing professional work periods in a cooperative education program. Students must register prior to commencing each work period. Offered on a satisfactory-fail basis only.

FS HN 499. Undergraduate Research.
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of staff member with whom student proposes to work Research under staff guidance. A maximum of 6 credits of FS HN 499 may be used toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

FS HN 503. Advanced Food Science-Processing.
(1-0) Cr. 1. Alt. S., offered 2012.SS. Prereq: 3 credits each in physics and mathematics Key principles and applications in the processing of food.

FS HN 505. Short Course in Food Science.
Cr. arr. F.S.SS. Prereq: Permission of instructor

(Dual-listed with FS HN 407). (Cross-listed with MICRO). (3-0) Cr. 3. S. Prereq: MICRO 420 Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

FS HN 511. Principles of Food Science-Chemistry.
(2-0) Cr. 2. S. Prereq: 3 credits in organic chemistry Key principles and applications in the chemistry of food. This course is designed for graduate students with no previous food chemistry background.

FS HN 513. Principles of Food Science-Processing.
(2-0) Cr. 2. S. Prereq: 3 credits each in physics and mathematics Key principles and applications in the processing of food. This course is designed for graduate students with no previous food processing background.

FS HN 514. Principles of Food Science-Microbiology.
(2-0) Cr. 2-1. S. Prereq: 3 credits each in microbiology and organic chemistry Key principles and applications in the microbiology of food. This course is designed for graduate students with no previous food microbiology background.

FS HN 515. Regulatory Toxicology.
(Cross-listed with TOX); (1-0) Cr. 1. Alt. F., offered 2012. Prereq: BBMB 404 or FS/HH 403 Survey of approaches used by toxicologists in government and industry for generating, enforcing and complying with laws and regulations. Examine policies from multiple regulatory agencies and how risk-based decisions are made. Perform simple risk assessments and suggest ways of dealing with data gaps. Explore new types of data used in risk assessments. Taught online only.

FS HN 519. Food Toxicology.
(Cross-listed with TOX, NUTRS), (3-0) Cr. 3. Alt. F., offered 2012. Prereq: A course in biochemistry Basic principles of toxicology. Toxicants in the food supply: modes of action, toxicant defense systems, toxicant and nutrient interactions, risk assessment. Only one of FS HN 419 and FS HN 519 may count toward graduation.

FS HN 521. Microbiology of Food.
(2-0) Cr. 2. F.S.SS. Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor. This course deals with the identification, enumeration, and characterization of bacteria, yeasts, and mold associated with foods and food processing. Effects of physical and chemical agents on micro-organisms will be studied. Microbiological problems in food spoilage, food preservation, food fermentation, and food-borne disease will be discussed. Offered online only.

FS HN 522. Advanced Food Microbiology and Biotechnology.
(2-0) Cr. 2. Alt. SS., offered 2013. Prereq: Food microbiology, a course in biochemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor. This course will cover basic principles in biotechnology and applied food microbiology, including current topics of interest in food biotechnology. Students will be introduced to recombinant DNA techniques and how they are applied to genetically modify microorganisms, the use of nucleic acids as tools of rapid detection of microorganisms in foods, basic enzyme immobilization and down-stream processing techniques, and regulatory aspects of food biotechnology. Offered online only.

(2-0) Cr. 2. F.S.SS. Prereq: A course in biology or chemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor. Multidisciplinary food safety and security perspectives provided by numerous subject matter experts. Topics include food safety policy, ag bioterrorism, border security, animal ID, food defense and site security, risk analysis, crisis communication, epidemiology, HACCP, and more. Offered online only.

FS HN 524. Food Microbiology.
(3-0) Cr. 3. F. Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor. Food Microbiology looks at the nature, physiology, and interactions of microorganisms in foods. The course is an introduction to food-borne diseases, the effect of food processing systems on the microflora of foods, principles of food preservation, food spoilage, and foods produced by microorganisms. Additionally, the course looks at food plant sanitation and criteria for establishing microbial standards for food products. Offered online only.
FS HN 525. Principles of HACCP.  
(2-0) Cr. 2. F.S. Prereq: Undergraduate biology and chemistry courses; enrollment in GP-IDEA Food Safety and Defense Certificate or permission of instructor. A comprehensive study of the Hazard Analysis and Critical Control Point System and its application in the food industry. Offered online only.

(2-0) Cr. 2. SS. Prereq: Graduate standing; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor. Understanding of the various factors that impact safety of ethnic and imported ethnic foods; knowledge about the handling, preparation, processing and storage of ethnic and imported foods and food products; science-based characterization of representative ethnic foods. Offered online only.

FS HN 527. Microbiology of Fermented Foods.  
(2-0) Cr. 2. SS. Prereq: Food microbiology; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor. Microbiology of fermented foods covers the physiology, biochemistry, and genetics of microorganisms important in food fermentations. The course looks at how microorganisms are used in fermentations and the effects of processing and manufacturing conditions on production of fermented foods. Offered online only.

(2-0) Cr. 2. F.S.SS. Prereq: Enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor. This course will provide students with an understanding of the principles required in a food defense program for a food manufacturing, warehousing or distribution center. The topics covered include: defining threats and aggressors; the Bioterrorism Act; food defense teams; vulnerability assessments; security programs; recall and traceability basics; security inspections; crisis management; emergency preparedness; and workplace violence. Offered online only.

FS HN 542. Introduction to Molecular Biology Techniques.  

FS HN 542A. Introduction to Molecular Biology Techniques: DNA.  
(Cross-listed with B M S, EEOB, GDCB, GDCB, HORT, NREM, NUTRS, V MPU, VDPAM). Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification. Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

FS HN 542B. Introduction to Molecular Biology Techniques: Protein.  

FS HN 542C. Introduction to Molecular Biology Techniques: Cell.  
(Cross-listed with B M S, EEOB, GDCB, GDCB, HORT, NREM, NUTRS, V MPU, VDPAM). Cr. 1. Repeatable. F.S. Prereq: Graduate classification Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

(Cross-listed with B M S, EEOB, GDCB, GDCB, HORT, NREM, NUTRS, V MPU, VDPAM). Cr. 1. Repeatable. S. Prereq: Graduate classification Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transplants. Offered on a satisfactory-fail basis only.

FS HN 542E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)  

FS HN 542F. Techniques in Metabolomics. metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects.  

FS HN 542G. Introduction to Molecular Biology Techniques: Genomic.  
(Cross-listed with B M S, EEOB, GDCB, GDCB, HORT, NREM, NUTRS, V MPU, VDPAM). Cr. 1. Repeatable. S. Prereq: Graduate classification. Offered on a satisfactory-fail basis only.

FS HN 554. Dietetic Internship I.  
(0-22) Cr. 5. S.SS. For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Experiences and activities designed to meet accreditation standards.

FS HN 555. Dietetic Internship II.  
(0-18) Cr. 4. F.S. Prereq: Concurrent enrollment or successful completion of FS HN 554. For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Experiences and activities designed to meet accreditation standards.

FS HN 556. Dietetic Internship III.  
(0-22) Cr. 5. F.SS. Prereq: Concurrent enrollment or successful completion of FS HN 554 and FS HN 555. For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Experiences and activities designed to meet accreditation standards.

FS HN 575. Processed Foods.  
(3-0) Cr. 3. Alt. F., offered 2012. Prereq: FS HN 214 or FS HN 311; a course in nutrition. This course will examine effect of industrial and domestic food processing on the nutrient content of food and risk of developing chronic disease.

FS HN 580. Orientation to Food Science and Nutrition Research.  
(1-0) Cr. 1. F. Prereq: Graduate classification. Orientation to and discussion of research interests in food science and nutrition. Discussion of policy and ethical issues in the conduct of research. Intended for entering students in FS HN and related disciplines. Offered on a satisfactory-fail basis only.

FS HN 581. Seminar.  
(1-0) Cr. 1. S. Prereq: Graduate classification. Discussion and practice of oral presentation of scientific data in a professional setting. Discussion of issues related to data presentation. Offered on a satisfactory-fail basis only.

FS HN 590. Special Topics.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590A. Special Topics: Nutrition.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590B. Special Topics: Food Science.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590C. Special Topics: Teaching.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 599. Creative Component.  
Cr. arr. Nonthesis option only.

Courses for graduate students:

FS HN 606. Instrumental Measurement of Food Quality.  
(2-3) Cr. 3. Alt. F., offered 2012. Prereq: FS HN 311 or FS HN 411 or FS HN 502 or BBMB 404. Principles of instrumental measurements of color, aroma, flavor, texture, and rheology. Techniques and instrumentation for measuring the quality of foods; relationship of these methods to food color, taste, flavor, texture, and rheological quality. Application of methods to various foods and biorenewable materials.
undergraduate study in genetics is jointly administered by three departments: the Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, business, and genetic counseling.

The respective communications and communication proficiency requirements of both colleges are met by an average of C or better in:

- ENGL 150 - Critical Thinking and Communication 3
- ENGL 250 - Written, Oral, Visual, and Electronic Composition 3
- ENGL 250H - Written, Oral, Visual, and Electronic Composition: Honors and one additional English writing course 3

A grade of C– or better is required in all biological science courses within the major and a cumulative GPA of at least 2.0 is required for graduation.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, nursing, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements. (See Preprofessional Study (http://catalog.iastate.edu/graduatecollege/preprofessionalstudy).)

Graduate Study

Graduate Study in genetics leading to the Master of Science and Doctor of Philosophy degrees is offered at ISU. Graduate study is organized as a separate interdepartmental graduate major from the undergraduate program. For more information on graduate study in genetics see: Genetics - Interdisciplinary.

Curriculum in Genetics - Requirements

In addition to basic degree requirements listed in the Curricula in Agriculture and Life Sciences, genetics majors must satisfy the following requirements:

1. BIOL 211 - Principles of Biology I 3
2. BIOL 211L - Principles of Biology Laboratory I 1
3. BIOL 212 - Principles of Biology II 3
4. BIOL 212L - Principles of Biology Laboratory II 1
5. BIOL 312 - Ecology 4
6. BIOL 313 - Principles of Genetics 3
7. BIOL 313L - Genetics Laboratory 1
8. BIOL 314 - Principles of Molecular Cell Biology 3

C- grade minimum; Minimum 2.0 GPA
### Courses primarily for undergraduates:

**GEN 110. Genetics Orientation.**
(1-0) Cr. 1. F.
Orientation to the area of genetics. For students considering a major in genetics. Specializations and career opportunities. Offered on a satisfactory-fail basis only.

**GEN 260. Human Heredity and Society.**
(3-0) Cr. 3. Alt. S., offered 2013. Prereq: One semester of college biology or ANTHR 202
A survey course in genetics for non-biology majors interested in heredity and its importance, and implications to self and society. Not recommended for those intending to take advanced courses in genetics. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320, Biol 313 and 313L and Agron 320.

**GEN 298. Cooperative Education.**
Cr. R. F.S.SS. Prereq: Permission of department cooperative education coordinator; sophomore classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

**GEN 308. Biotechnology in Agriculture, Food, and Human Health.**
(3-0) Cr. 3. F.S.SS. Prereq: BIOL 211 and BIOL 212

**GEN 313. Principles of Genetics.**
(Cross-listed with BIOL). (3-0) Cr. 3. F.S.SS. Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L
Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative and population genetics. Students may receive graduation credit for no more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.

**GEN 313L. Genetics Laboratory.**
(Cross-listed with BIOL). (0-3) Cr. 1. F.S. Prereq: Credit or enrollment in BIOL 313 Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.

**GEN 320. Genetics, Agriculture and Biotechnology.**
(Cross-listed with AGRON). (3-0) Cr. 3. F.S. Prereq: BIOL 212
Lee and Salas. Transmission genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313L.

**GEN 340. Human Genetics.**
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: BIOL 313 or GEN 313
Fundamental concepts and current issues of human genetics. Human chromosome analysis, pedigree analysis, gene mapping, the human genome project, sex determination, genetics of the immune system, genetics of cancer, gene therapy, the genetic basis of human diversity, eugenics.

**GEN 398. Cooperative Education.**
Cr. R. F.S.SS. Prereq: Permission of department cooperative education coordinator; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

**GEN 409. Molecular Genetics.**
(3-0) Cr. 3. F. Prereq: BIOL 313
The principles of molecular genetics: gene structure and function at the molecular level, including regulation of gene expression, genetic rearrangement, and the organization of genetic information in prokaryotes and eukaryotes. Nonmajor graduate credit.

**GEN 410. Analytical Genetics.**
(3-0) Cr. 3. S. Prereq: GEN 409

**GEN 444. Introduction to Bioinformatics.**
(Cross-listed with BCB, BCBIO, COM S, CPR E, BIOL). (4-0) Cr. 4. F. Prereq: MATH 165 or STAT 401 or equivalent
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics, systems biology. Nonmajor graduate credit.

**GEN 462. Evolutionary Genetics.**
(Cross-listed with BIOL). (3-0) Cr. 3. S. Prereq: BIOL 315
The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change. Nonmajor graduate credit.

**GEN 490. Independent Study.**
Cr. arr. Repeatable, maximum of 9 credits. Prereq: GEN 313, junior or senior classification, permission of instructor
Students in the College of Agriculture may use no more than 6 credits of Gen 490 toward the total of 128 credits required for graduation; students in the College of Liberal Arts and Sciences may use no more than 9 credits of Gen 490 toward graduation.

**GEN 490R. Independent Study: Genetics research.**
Cr. 1-5. Repeatable, maximum of 9 credits. Prereq: GEN 313, junior or senior classification, permission of instructor
Students in the College of Agriculture may use no more than 6 credits of Gen 490 toward the total of 128 credits required for graduation; students in the College of Liberal Arts and Sciences may use no more than 9 credits of Gen 490 toward graduation.

**GEN 490S. Independent Study: Attendance and Critique of Genetics Seminars.**
Cr. 1. Repeatable, maximum of 9 credits. F.S.SS. Prereq: GEN 313, junior or senior classification, permission of instructor
Offered on a satisfactory-fail basis only. Students in the College of Agriculture may use no more than 6 credits of Gen 490 toward the total of 128 credits required for graduation; students in the College of Liberal Arts and Sciences may use no more than 9 credits of Gen 490 toward graduation.

**GEN 490U. Independent Study: Laboratory teaching experience.**
Cr. 1-2. Repeatable, maximum of 9 credits. F.S.SS. Prereq: GEN 313, junior or senior classification, permission of instructor
For students registering to be undergraduate laboratory assistants. Offered on a satisfactory-fail basis only. Students in the College of Agriculture may use no more than 6 credits of Gen 490 toward the total of 128 credits required for graduation; students in the College of Liberal Arts and Sciences may use no more than 9 credits of Gen 490 toward graduation.

**GEN 491. Undergraduate Seminar.**
(1-0) Cr. 1. F. Prereq: Junior classification
The investigation of current issues in genetics. Graduate school and employment opportunities discussed. Practice in resume writing and interview techniques. Required for majors in genetics.

---

### Advanced Sciences Electives: 6 cr.

C- minimum grade; 6 cr. of advanced science electives from approved department list.

Courses primarily for undergraduates:
Global Resource Systems

Global Resource Systems major prepares students to make a difference in the world. The major emphasizes global engagement while equipping students with strong technical competency in a resource area of their choice. The interdisciplinary program prepares students to work on complex global resource issues through leadership positions in global businesses, governmental agencies engaged in international trade and development, non-governmental organizations and globally engaged foundations, educational institutions, and volunteer organizations. It produces systemic thinkers and problem solvers with a global perspective who are trained in resource issues and able to lead teams representing high levels of cultural diversity. Students interested in this major are encouraged to contact the Faculty Coordinator at globe@iastate.edu.

Undergraduate Study

The Global Resource Systems undergraduate major employs a truly interdisciplinary and systemic approach to understanding complex global resource issues. Students develop a core set of technical competencies in a resource area selected from among the majors, minors and certificates offered by the College of Agriculture and Life Sciences. Students choose a world region in which to specialize, develop competency in a relevant world language, and participate in a significant cross-cultural immersion experience. They carry out a senior project related to their resource specialization within the context of the world region.

Multidisciplinary themes are developed in the context of the physical, biological and sociological factors affecting global resource systems. In this context, resource systems include agricultural (including crops, livestock and aquaculture), food, fuel, natural, environmental, biological, financial, governmental, institutional, human, knowledge, and other resources. Graduates of this program have transnational leadership skills and are successful integrators of various specializations on a team.

They are skilled in applying a systemic perspective and developing solutions to complex global resource systems problems using innovativeness and creativity. Future professionals communicate effectively and demonstrate environmental awareness, exhibit an ethical perspective, and display clear analysis of how cultural diversity impacts work both here and abroad. They also recognize opportunities for learning after graduation.

A degree in Global Resource Systems opens the door to employment opportunities in the many businesses and organizations that require globally competent employees.

Curriculum in Global Resource Systems

Administered by a supervisory committee in the College of Agriculture and Life Sciences, the major prepares students to work on complex global resource issues through leadership positions in global businesses, governmental agencies engaged in international trade and development, non-governmental organizations and globally engaged foundations, educational institutions, and volunteer organizations. It produces systemic thinkers and problem solvers with a global perspective who are trained in resource issues and able to lead teams representing high levels of cultural diversity. Students interested in this major are encouraged to contact the Faculty Coordinator at globe@iastate.edu.

Total Degree Requirement: 129 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency:

Technical Concentration: 15-18 cr.

Satisfied by any of the College of Agriculture and Life Sciences minors or a certificate offered in the College of Agriculture and Life Sciences.
Courses

Courses primarily for undergraduates:

GLOBE 110. Orientation.
(1-0) Cr. 1. F. An introduction to Global Resource Systems (GRS) program. University and career acclimation, development of educational and professional skills, participation in GRS Learning Community.

(3-0) Cr. 3. F.S. A comparative analysis of global resources and the various natural and human systems affecting those resources.

(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S. Prereq: credit or enrollment in GLOBE 201 Discussion of topics of current importance in global resource systems. Offered on a satisfactory-fail basis only. A maximum of 3 credits of 211 may be used towards degree requirements.

GLOBE 220. Globalization and Sustainability.
(Cross-listed with ANTHR, ENV S, T SC, MAT E, M E, SOC). (3-0) Cr. 3. F.S. An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department. Meets International Perspectives Requirement.

GLOBE 221. Apprenticeship.
Cr. R. Repeatable. F.S.S.S. Prereq: Approval by the Global Resource Systems Faculty Coordinator Practical work experience in approved domestic or international settings such as with a company, research laboratory, governmental agency or non-governmental organization. Offered on a satisfactory-fail basis only.

GLOBE 290. Independent Study.
Cr. 1-2. Repeatable. F.S.S.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for freshmen and sophomores.

GLOBE 290H. Independent Study, Honors.
Cr. 1-2. Repeatable. F.S.S.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for freshmen and sophomores.

(2-2) Cr. 3. S. Prereq: GLOBE 201, ECON 101 or ECON 102 In-depth analysis of the opportunities, constraints and consequences of the resource systems common in industrialized nations. Topics integrate natural resources with land tenure, societal structure, food security, agriculture, shelter, energy and wealth dynamics.

(2-2) Cr. 3. F. Prereq: GLOBE 201, ECON 101 or ECON 102 In depth appraisal of resource systems common throughout the developing world. Topics integrate natural resources with land tenure, societal structure including gender issues, food security, agriculture, shelter, energy and wealth dynamics and effectiveness of global programs aimed at sustainable development.

GLOBE 321. Internship - Global.
Cr. 3-6. Repeatable. F.S.S.S. Prereq: Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator A supervised learning experience including an analysis of an international location’s resource system via immersion in a foreign culture lasting at least five weeks. The experience should focus on the region consistent with the student’s degree track. A maximum of 12 credits of 321 and 322 may be used for degree requirements.

GLOBE 322. Internship - United States.
Cr. 3-6. Repeatable. F.S.S.S. Prereq: Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator A supervised learning experience including an analysis of a domestic location’s resource system via immersion in a different culture within the United States lasting at least five weeks. Designed for international students and for students who are not in a position to leave the United States. A maximum of 12 credits of 321 and 322 may be used for degree requirements.

GLOBE 385. Economic Development.
(Cross-listed with ECON). (3-0) Cr. 3. Prereq: ECON 101, ECON 102 Current problems of developing countries, theories of economic development, agriculture, and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required for satisfying basic needs of Third World countries, interrelationships between industrialized countries and the developing countries, including foreign aid. Nonmajor graduate credit. Meets International Perspectives Requirement.

GLOBE 401. Senior Project.
Cr. 3. F.S. Prereq: Senior classification in Global Resource Systems Research project in collaboration with faculty that complements and furthers a student’s experiences from Globe 321 and 322 while simultaneously bringing into focus entire four-year experience. Student will write a research report and make either an oral or poster presentation.

GLOBE 401H. Senior Project, Honors.
Cr. 3. F.S. Prereq: Senior classification in Global Resource Systems Research project in collaboration with faculty that complements and furthers a student’s experiences from Globe 321 and 322 while simultaneously bringing into focus entire four-year experience. Student will write a research report and make either an oral or poster presentation.

GLOBE 402. Responses to Global Resource System Challenges.
(1-4) Cr. 3. S. Capstone analysis of critical challenges facing global resources and, especially, identification of alternative solutions.

GLOBE 446. International Issues and Challenges in Sustainable Development.
(Cross-listed with AGRON, INTST). Cr. 4. S. Prereq: 3-credit biology course. Sophomore or higher classification, permission of instructor Mullen. Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economical, political, and historical factors affecting sustainable development of communities and countries from art and science perspectives. International field experience with foreign language training required. A program fee is charged to students for international study abroad. Meets International Perspectives Requirement.

GLOBE 490. Independent Study.
Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 4 credits may be used for degree requirements.

GLOBE 490A. Independent Study: General.
Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 4 credits may be used for degree requirements.

GLOBE 490E. Independent Study: Entrepreneurship.
Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 4 credits may be used for degree requirements.

GLOBE 490H. Independent Study: Honors.
Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 4 credits may be used for degree requirements.
Horticulture

Undergraduate Study

To meet the educational needs of a student population with interests ranging from landscape design/installation to fruit and vegetable production to golf course construction and management, considerable flexibility is built into the horticulture curriculum. The diversity of interests and need for flexibility are reflected in the impressive array of horticulture courses.

The Department of Horticulture offers six options within the horticulture major:

1. Landscape Design, Installation, and Management
2. Horticulture Food Crop Production and Management
3. Ornamental Plant Production and Garden Center Management
4. Public Horticulture
5. Science
6. Turfgrass Management

Graduates possess the technical knowledge and skills to become professional horticulturists. They understand principles of life science, plant growth and development, and are familiar with cultural and management principles for a wide assortment of horticultural crops. They are able to work and communicate effectively with fellow horticultural professionals and other citizens who share an interest in horticulture. Graduates also understand the ethical and environmental dimensions of problems and issues facing horticultural professionals.

A degree in horticulture opens the door to employment opportunities with production nurseries, seed companies, interior landscaping firms, greenhouses, garden centers, conservatories, landscape design/installation firms, public gardens and arboretas, orchards and vineyards, food processing companies, vegetable farms, golf courses, sports fields, sod production companies, and lawn care businesses. Several allied plant science industries also provide employment opportunities in the areas of sales, management, and communication. Opportunities exist for careers in research, teaching, extension, and business after obtaining advanced training in graduate school.

Minor

The Department of Horticulture offers a minor in horticulture that is earned by taking HORT 221 Principles of Horticulture Science plus 12 additional credits with a maximum of 3 credits at the 200-level and a minimum of 9 credits at the 300-level or above.

Visit our departmental website at www.hort.iastate.edu.

Graduate Study

The graduate major in horticulture leads to the M.S. (thesis required) and Ph.D. A nonthesis master’s degree is offered through the master of agriculture program. Some faculty members of the department serve as major professors for students in interdepartmental graduate majors in plant biology; genetics; molecular, cellular, and developmental biology; ecology and evolutionary biology; sustainable agriculture; and environmental science.

Graduates possess a broad understanding of horticulture and the allied plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and other interested citizens. They are experienced in conducting research and communicating the results from that research. They are capable of addressing and solving complex problems that confront the many horticultural, agricultural, and plant science professions. They also understand the ethical, legal, social, and environmental issues associated with modern agricultural/horticultural practices.

Curriculum in Horticulture

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Specialization Options.

A horticulture minor is available. The requirements appear under Horticulture, Courses and Programs.

Total Degree Requirement: 129 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

3 cr. from approved list

U.S. Diversity: 3 cr.

3 cr. from approved list

Communications Proficiency (with a C or better): 9 cr.

English composition 6
Speech fundamentals 3
Total Credits 9

Communication/Library: 13 cr.

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
SP CM 212 Fundamentals of Public Speaking 3
or AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
ENGL 302 Business Communication 3
or ENGL 314 Technical Communication
LIB 180 Information Literacy 1

Total Credits 13
Humanities and Social Sciences: 6 cr.
Approved Humanities course 3
Approved Social Science course 3
Total Credits 6

Ethics: 3 cr.
3 cr. from approved list.

Life Sciences: 6 cr.
BIOL 211 Principles of Biology I 3
Approved Life Sciences course 3
Total Credits 6

Mathematical Sciences: 6 cr.
Select one course from the following: 3
MATH 140 College Algebra
MATH 150 Discrete Mathematics for Business and Social Sciences
MATH 165 Calculus I
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I

AND select one of the following: 3
STAT 101 Principles of Statistics
STAT 104 Introduction to Statistics
STAT 226 Introduction to Business Statistics I
STAT 401 Statistical Methods for Research Workers
Total Credits 6

Physical Sciences: Minimum of 10 cr.
Select one complete course from the following: 3-5
CHEM 163 College Chemistry & 163L and Laboratory in College Chemistry
CHEM 177 General Chemistry I & 177L and Laboratory in General Chemistry I

AND one complete course from the following: 3-5
CHEM 178 General Chemistry II & 178L and Laboratory in College Chemistry II
Agron 259X - Organic Compounds in Plant and Soil Environments 3
PHYS 111 General Physics 5
PHYS 115 Physics for the Life Sciences 3-4
PHYS 101 Physics for the Nonscientist

And ONE complete course from the following group: 4
CHEM 231 Elementary Organic Chemistry & 231L and Laboratory in Elementary Organic Chemistry
CHEM 331 Organic Chemistry I & 331L and Laboratory in Organic Chemistry I
BBMB 221 Structure and Reactions in Biochemical Processes
Total Credits 10-14

Biological Sciences: 18 cr.
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3

Select eleven credit hours from the following: 11
AGRON 260 Soils and Environmental Quality
AGRON 316 Crop Structure-Function Relationships
AGRON 317 Principles of Weed Science
AGRON 354 Soils and Plant Growth
AGRON 354L Soils and Plant Growth Laboratory
BIOL 312 Ecology
BIOL 313 Principles of Genetics & 313L and Genetics Laboratory
or GEN 320 Genetics, Agriculture and Biotechnology
BIOL 314 Principles of Molecular Cell Biology
BIOL 330 Principles of Plant Physiology

Other recommended courses:
HORT 351 Turfgrass Establishment and Management
HORT 351L Turfgrass Establishment and Management Laboratory
HORT 380 Principles of Garden Composition
HORT 381 Beginning Garden Composition Studio

And select 12 credit hours from the following: 12
ACCT 215 Legal Environment of Business
ACCT 284 Financial Accounting
ACCT 285 Managerial Accounting
ACCT 316 Business Law
AGEDS 310 Foundations of Agricultural Education Programs
AGEDS 401 Planning Agriculture and Life Sciences Education Programs
COMST 102 Introduction to Interpersonal Communication
COMST 214 Professional Communication
COMST 317 Small Group Communication
ECON 334 Entrepreneurship in Agriculture
ENGL 220 Descriptive English Grammar
ENGL 303 Free-Lance Writing for Popular Magazines
Horticultural Food Crop Production and Management Option

The following courses are required to meet the Horticulture requirement:

- HORT 422 Postharvest Technology 4
- HORT 461 Fruit Crop Production and Management 3
- HORT 471 Vegetable Production and Management 3

Required for option:

- ACCT 284 Financial Accounting 3
- ACCT 215 Legal Environment of Business
- ACCT 285 Managerial Accounting

Additional required Greenhouse Specialization courses:

- HORT 422 Postharvest Technology
- HORT 434 Greenhouse Crop Production I
- HORT 435 Greenhouse Crop Production II

Additional Nursery and Garden Center Specialization courses:

- HORT 240 Trees, Shrubs, and Woody Vines for Landscaping
- HORT 341 Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs
- HORT 342 Landscape Plant Installation, Establishment, and Maintenance

Required for option:

- ACCT 284 Financial Accounting 3

And select nine credits hours from the following:

- ACCT 215 Legal Environment of Business
- ACCT 285 Managerial Accounting
- AGRON 206 Introduction to Weather and Climate
- ACCT 316 Business Law
- COM S 103 Computer Applications
The following courses are required to meet the Horticulture requirement:

**Turfgrass Management option**

HORT 240  Trees, Shrubs, and Woody Vines for Landscaping  3
HORT 351  Turfgrass Establishment and Management  3
HORT 351L  Turfgrass Establishment and Management Laboratory  1
HORT 451  Professional Turfgrass Management  2
HORT 452  Integrated Management of Diseases and Insect Pests of Turfgrasses  3
HORT 453  Sports Turf Management  3
HORT 454  Turf & Landscape Irrigation  3
HORT 551  Growth and Development of Perennial Grasses  2

Other recommended course is:

HORT 330  Herbaceous Ornamental Plants

Required for option:

ACCT 284  Financial Accounting  3

And select nine credit hours from the following:

ACCT 285  Managerial Accounting  3
ACCT 316  Business Law  3
AGRON 206  Introduction to Weather and Climate  3
AGRON 260  Soils and Environmental Quality  3
AGRON 317  Principles of Weed Science  3
AGRON 338  Seed Science and Technology  3
AGRON 356  Site-Specific Crop and Soil Management  3
AGRON 360  Environmental Soil Science  3

HRI 289  Contemporary Club Operations  3
MGMT 370  Management of Organizations  3
MGMT 371  Organizational Behavior  3
PL 391  Practical Plant Health  3
TSM 270  Principles of Injury Prevention  3
TSM 324  Soil and Water Conservation Management  3

**Courses**

**Courses primarily for undergraduates:**

HORT 110. Orientation in Horticulture.
(1-0) Cr. 1. F.
Introduction to the field of horticulture.

HORT 112. Orientation to Learning and Productive Team Membership.
(Cross-listed with AER E, CON E, FS HN, NREM). (2-0) Cr. 2. F.
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

HORT 114. Developing Responsible Learners and Effective Leaders.
(Cross-listed with CON E, FS HN, NREM). (2-0) Cr. 2. S. Prereq: Hort 112 or NREM 112
Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

HORT 121. Home Horticulture.
(2-0) Cr. 2. F.S.
Growing plants in and around the home including requirements for growing house plants; plant propagation; designing and maintaining flower, fruit, and vegetable gardens; lawn, tree, and shrub maintenance.

(1-0) Cr. 1. F.S.
Demonstration and activities that illustrate principles of growing plants for the home garden. Topics include plant identification, propagation, selection, and management for indoor and outdoor gardens.
HORT 193. Topics in Horticulture.
Cr. arr. Repeatable. F.S.SS.
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193A. Topics in Horticulture: Greenhouse Crops.
Cr. arr. Repeatable. F.S.SS.
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193B. Topics in Horticulture: Nursery Crops.
Cr. arr. Repeatable. F.S.SS.
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193C. Topics in Horticulture: Turfgrass.
Cr. arr. Repeatable. F.S.SS.
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193D. Topics in Horticulture: Fruit Crops.
Cr. arr. Repeatable. F.S.SS.
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193E. Topics in Horticulture: Vegetable Crops.
Cr. arr. Repeatable. F.S.SS.
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193F. Topics in Horticulture: Cross-Commodity.
Cr. arr. Repeatable. F.S.SS.
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

HORT 193G. Topics in Horticulture: Landscape Horticulture.
Cr. arr. Repeatable. F.S.SS.
Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

(2-2) Cr. 3. F.S. Prereq: Biol 211 or concurrent enrollment
Biological principles of growing horticultural crops including anatomy, reproduction, light, temperature, water, nutrition, and growth and development. Laboratory exercises emphasize environmental factors and permit detailed observation of plant growth.

HORT 225. Spanish for Horticulture.
(3-0) Cr. 3. S.
This course provides an introduction to basic conversation and communication skills in Spanish, and cross-cultural skills for working with Spanish speakers in the Horticulture industry, emphasizing the use of vocabulary and expressions common in the workplace.

(3-0) Cr. 3. F.
Students will learn to identify trees, shrubs, and woody vines. Factors influencing the horticultural use of woody plants also will be taught.

HORT 276. Understanding Grape and Wine Science.
(3-0) Cr. 3. S. Prereq: High school biology and chemistry.
A scientific introduction to viticulture (grape-growing) and enology (wine-making). Topics include grape species and varieties, viticulture practices, fruit quality, geography, history, principles of fermentation and aging, wine classification, appreciation, evaluation, storage and service, regulations, wine as food. No wine tasting.

HORT 281. Landscape Graphics.
(0-4) Cr. 2. F.
Introduction to computer and hand rendering techniques of landscape graphics. Students will gain proficiency in plan view, section and elevation graphics. Intensive studio and computer based instruction.

(2-3) Cr. 3. Alt. S., offered 2012.
Planning, developing, and implementing science-based educational programs in a garden setting. Through hands-on experiences students will learn about horticulture, learning theory, and the application of science principles as they pertain to educating youth.

HORT 283. Pesticide Application Certification.
(Cross-listed with AGRON FOR ENT). (2-0) Cr. 2. S.
Holscher. Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the conclusion of the course. Commercial pesticide applicator certification is emphasized.

HORT 321. Horticulture Physiology.
(3-0) Cr. 3. F. Prereq: HORT 221 or BIOL 211
Principles of plant physiology relating to growth and development of horticultural plants including plant water relations, membrane transport, photosynthesis, photomorphogenesis, respiration, and phytohormones. Emphasis on plant’s responses to environmental factors (temperature, water, and light) including cellular and whole-plant physiology under stressful environments.

(2-2) Cr. 3. S. Prereq: HORT 221 or BIOL 211
Fundamental principles underlying sexual and asexual propagation of plants; practice in reproducing plants by use of seeds, leaves, stems, and roots.

HORT 330. Herbaceous Ornamental Plants.
(2-2) Cr. 3. F. Prereq: HORT 221 or by permission of instructor
Identification, botanical characteristics, origins, propagation, uses and general culture of herbaceous annual and perennial plants for Midwestern gardens and landscapes.

HORT 332. Greenhouse Operation and Management.
(3-3) Cr. 4. S. Prereq: HORT 221
Operation and management of greenhouses and other controlled environment agriculture structures. Methods of monitoring and manipulating environmental, cultural, and management factors such as light, temperature, fertility, substrate, etc., to maximize production efficiency. Emphasis placed on the production of ornamental and food crops. Greenhouse design and specification project required. Field trips outside scheduled class time required. Nonmajor graduate credit.

HORT 338. Seed Science and Technology.
(Cross-listed with AGRON). (2-3) Cr. 3. F. Prereq: AGRON 114 or HORT 221, BIOL 211
Goggi. Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

(2-0) Cr. 2. S. Prereq: HORT 240 or L A 221 or L A 222
Cultivars of the most prevalent and economically important woody landscape plants will be taught. The importance of cultivars to the nursery and landscaping professions and suggestions for their proper usage will be discussed.

HORT 342. Landscape Plant Installation, Establishment, and Maintenance.
(2-3) Cr. 3. F. Prereq: HORT 240 or L A 221 or L A 222
Principles and practices involved with establishment and maintenance of managed landscapes. Laboratory work involves site evaluation, installation techniques, postplant care, and maintenance of established landscape plants.

HORT 351. Turfgrass Establishment and Management.
(Cross-listed with AGRON). (3-0) Cr. 3. F. Prereq: HORT 221 or AGRON 114 or BIOL 211
Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadides, and seed and sod production. The biology and control of turfgrass pests. Nonmajor graduate credit.

HORT 351L. Turfgrass Establishment and Management Laboratory.
(Cross-listed with AGRON). (0-3) Cr. 1. F. Prereq: Credit or enrollment in HORT 351 Those enrolled in the horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor. Nonmajor graduate credit.

HORT 354. Soils and Plant Growth.
(Cross-listed with AGRON). (3-0) Cr. 3. F.S. Prereq: AGRON 154 and BIOL 101 or BIOL 211
Loynachan. Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutrient elements, pH, organic matter maintenance, and rooting development. Nonmajor graduate credit.

HORT 354L. Soils and Plant Growth Laboratory.
(Cross-listed with AGRON). (0-3) Cr. 1. F.S. Prereq: Agron or Hort major with credit or enrollment in AGRON 354 Laboratory exercises in soil testing that assess a soil’s ability to support nutritive requirements for plant growth.
(2-0) Cr. 2. S. Prereq: HORT 240  
Functional and aesthetic aspects of landscape planning as a basis for design decisions; emphasis on plant selection. Includes site analysis, development process, and design principles.

HORT 381. Beginning Garden Composition Studio.  
(0-4) Cr. 2. S. Prereq: HORT 240, HORT 281, HORT 330  
To be taken concurrently with 380. Development of landscape graphic techniques. Studio-based projects implementing principles of landscape design. Not available as credit for I. A. majors.

HORT 391. Horticultural Management Experience.  
Cr. 1. Repeatable. F.S.S.S. Prereq: HORT 221 or permission of instructor  
A structured work experience for the student to gain insight into management operations associated with production and management of horticultural crops. A report of 10 or more pages describing the student's experience is required. One credit is given for each term the student is enrolled in the course. A maximum of two credits may be used toward the horticultural sciences course requirements, and two additional credits may be used toward the 128 credits required for graduation.

HORT 398. Cooperative Education.  
Cr. R. Repeatable. F.S.S.S. Prereq: Permission of department resource and career center coordinator  
Students must register for this course before commencing each work period.

HORT 421. Introduction to Plant Breeding.  
(Cross-listed with AGRON). (3-0) Cr. 3. F. Prereq: GEN 320 or BIOL 313  
Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and asexually reproducing agronomic and horticultural crops. Applications of biotechnology techniques in the development of improved cultivars. Nonmajor graduate credit.

HORT 422. Postharvest Technology.  
(3-3) Cr. 4. Alt. F., offered 2013. Prereq: HORT 221 and junior or senior classification  
Principles, methods, and techniques related to postharvest maintenance of quality of horticultural commodities. Emphasis on the effects of handling, storage facilities and techniques, and quality evaluation. Field trips outside scheduled class time required. Nonmajor graduate credit.

HORT 424. Sustainable and Environmental Horticulture Systems.  
(Dual-listed with HORT 524). (Cross-listed with ENV S). (3-0) Cr. 3. Alt. S., offered 2013  
Inquiry into ethical issues and environmental consequences of horticultural cropping systems, production practices and managed landscapes. Emphasis on systems that are resource efficient, environmentally sound, socially acceptable, and profitable.

HORT 434. Greenhouse Crop Production I.  
(3-3) Cr. 4. Alt. F., offered 2013. Prereq: HORT 221 and junior or senior classification  
Principles and practices of greenhouse floricultural and food crop production. Emphasis is placed on production of foliage, containerized flowering species, and food crops produced in greenhouses and other controlled environments. Field trips outside scheduled class time required. Greenhouse scheduling and costs of production projects are required. Nonmajor graduate credit.

HORT 435. Greenhouse Crop Production II.  
(3-3) Cr. 4. Alt. S., offered 2014. Prereq: HORT 330 and HORT 332  
Principles and practices of greenhouse production of ornamental and food crops for the spring garden market. Emphasis placed on the production of several ornamental and food crops, along with the complete palate of spring garden crops. Greenhouse scheduling and costs of production projects are required. Field trips outside scheduled class time required. Nonmajor graduate credit.

HORT 442. Nursery Production and Garden Center Management.  
(2-0) Cr. 2. Alt. F., offered 2013. Prereq: HORT 221  
Nursery layout, design, and cultural practices important for growing and shipping field and container-grown nursery crops. Overview of garden center design and retailing and marketing strategies. Field trip(s) outside scheduled class time may be required. Nonmajor graduate credit.

HORT 444. Landscape Construction Management.  
(2-3) Cr. 3. F.  
Principles and practices of residential landscape construction. Encompasses business and project management, and landscape estimating and contracting including estimating procedures. Laboratory work involves construction project management and installation.

(2-0) Cr. 2. F. Prereq: HORT 221 and junior or senior classification  
In-depth presentation and discussion of skills and strategies needed to manage a horticultural enterprise. Topics include motivating employees, managing meetings, conducting performance appraisals, dealing with conflict, and managing an increasingly diverse work force.

(2-0) Cr. 2. Alt. S., offered 2013. Prereq: HORT 351  
Turfgrass science including the study of (1) specific information on soil chemistry and soil modification as they relate to the development and maintenance of turfgrass areas, (2) specialized management practices used in athletic field care, professional lawn care, and golf course industries, and (3) construction methods for golf courses and sports fields. Nonmajor graduate credit.

HORT 452. Integrated Management of Diseases and Insect Pests of Turfgrasses.  
(Dual-listed with HORT 552). (Cross-listed with ENT, PL P). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: HORT 351  
Gleason, D. Lewis. Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

(3-0) Cr. 3. Alt. F., offered 2012. Prereq: HORT 351  
Management techniques for today's specialized athletic fields. The horticultural and budgetary aspects of football, soccer, baseball, and softball fields will be presented. Field trips and laboratory exercises will develop a practical understanding of actual principles in field development, construction, and management. Nonmajor graduate credit.

HORT 454. Turf & Landscape Irrigation.  
(3-0) Cr. 3. Alt. F., offered 2013  
Irrigation systems and principles for turf and landscape environments. Topics include design, installation, equipment, management, and trouble shooting of irrigation systems for golf, athletic fields, residential lawns and landscapes. Participation in practical exercises and local field trips to irrigation sites is required.

HORT 461. Fruit Crop Production and Management.  
(2-2) Cr. 3. Alt. S., offered 2013. Prereq: HORT 221  
Principles and practices of small fruit, tree fruit, and nut culture and production. Morphology, physiology of growth and development, plant establishment, pest management, pruning, training, harvesting, storage, and marketing of commercial temperate fruit and nut crops. Emphasis on sustainable practices. Participation in practical exercises and local field trips is required. Nonmajor graduate credit.

(Cross-listed with AGEDS). (1-6) Cr. 3. F. Prereq: Econ 230, 6 credits of horticulture, and jr classification  
Participation in the management and operation of fruit and vegetable enterprises for local markets. The class is responsible for the plans, records, and decision for planting, operating, harvesting, and marketing fruit and vegetables. Nonmajor graduate credit.

HORT 465A. Horticulture Enterprise Management - Planting.  
(Cross-listed with AGEDS). (1-6) Cr. 3. S. Prereq: Econ 230, 6 credits of horticulture, and jr classification  
Participation in the management and operation of fruit and vegetable enterprises for local markets. The class is responsible for the plans, records, and decision for planting, operating, harvesting, and marketing fruit and vegetables. Nonmajor graduate credit.

HORT 465B. Horticulture Enterprise Management: Harvesting.  
(Cross-listed with AGEDS). (1-6) Cr. 3. SS. Prereq: Econ 230, 6 credits of horticulture, and jr classification  
Participation in the management and operation of fruit and vegetable enterprises for local markets. The class is responsible for the plans, records, and decision for planting, operating, harvesting, and marketing fruit and vegetables. Nonmajor graduate credit.
Principles of vegetable production with emphasis on sustainable production practices, market outlets, business aspects, and risk management. Topics will include crop classification and rotation; planting methods; crop climatic conditions, physiological growth & development; soil, water, and pest management; cover cropping; season extension strategies; harvest and postharvest management and marketing. Course involves visits to growers' fields to observe/experience their production enterprise. Laboratory portion of the class will provide an opportunity to grow a variety of vegetables in a heated greenhouse; conduct experiments; observe and/or operate equipment for field production. Nonmajor graduate credit.

HORT 475. Urban Forestry. (Cross-listed with FOR). (2-3) Cr. 3. F. Prereq: Junior or senior classification, 3 credits in biology
Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management). Nonmajor graduate credit.

HORT 481. Advanced Garden Composition. (0-4) Cr. 2. F. Prereq: HORT 240 and HORT 330 and HORT 380 and HORT 381 Limited to Landscape Design Installation and Management option students. Development of residential landscapes using design principles and the design process. Projects encompass site analysis, concept development, preliminary design, final design, and graphic presentation techniques. Techniques will include hand and computer rendering.

HORT 484. Organic Agricultural Theory and Practice. (Dual-listed with HORT 584). (Cross-listed with AGRON). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: 9 cr. in biological or physical sciences
Delate. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

HORT 490. Independent Study. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490A. Independent Study: Greenhouse Crops. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490B. Independent Study: Nursery Crops. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490C. Independent Study: Turfgrass. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490D. Independent Study: Fruit Crops. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490E. Independent Study: Vegetable Crops. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490F. Independent Study: Cross-Commodity. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490G. Independent Study: Landscape Horticulture. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490H. Independent Study: Honors. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490I. Independent Study: International Study. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor
Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 494. Service Learning. (Cross-listed with AGRON). Cr. 1-2. Repeatable, maximum of 1 times. F.S.S.S.
Prereq: Agron 338, advanced approval and participation of employer and instructor
A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

HORT 494B. Service Learning: Domestic. Cr. arr. Repeatable, maximum of 12 credits. F.S.S.S. Prereq: Permission of instructor
Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. A maximum of 4 credits of 494 may be used toward the Horticulture credits required for graduation.

HORT 494G. Service Learning: International. Cr. arr. Repeatable, maximum of 12 credits. F.S.S.S. Prereq: Permission of instructor
Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. A maximum of 4 credits of 494 may be used toward the Horticulture credits required for graduation.
HORT 495. Horticulture Travel Course Preparation. 
Cr. R. Repeatable. F.S.SS. Prereq: Permission of instructor
Limited enrollment. Students enrolled in this course also intend to register for Hort 496 the following term. Topics include preparation for safe international travel, the horticultural/agricultural industries, climate, crops, economics, geography, history, marketing, soils, culture, traditions, and horticultural/agricultural development of the country to be visited. Students enroll in this course the term immediately before travel to the foreign country.

HORT 496. Horticulture Travel Course. 
Cr. 1-4. Repeatable. F.S.SS. Prereq: Permission of instructor
Limited enrollment. Study and tour of production methods in major horticultural regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, cultures, and history of horticultural crops. Location and duration of tours will vary. Tour expenses paid by students.
Meets International Perspectives Requirement.

Courses primarily for graduate students, open to qualified undergraduates:

HORT 511. Integrated Management of Tropical Crops. 
(Cross-listed with ENT, PL P). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: PL P 408 or PL P 416 or ENT 370 or ENT 376 or HORT 221
Gleason, Lewis. Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems.

HORT 512. Sustainable and Environmental Horticulture Systems. 
(Dual-listed with HORT 424). (Cross-listed with ENV S). (3-0) Cr. 3. Alt. S., offered 2013.
Inquiry into ethical issues and environmental consequences of horticultural cropping systems, production practices and managed landscapes. Emphasis on systems that are resource efficient, environmentally sound, socially acceptable, and profitable.

HORT 529. Publishing in Biological Sciences Journals. 
(Cross-listed with AGRON, NREM). (3-0) Cr. 3. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data
Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

HORT 530. Research Orientation. 
(1-3) Cr. 2. F
Instruction in scientific methods and communication skills.

HORT 542. Introduction to Molecular Biology Techniques. 
(Cross-listed with B M S, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

HORT 542A. Introduction to Molecular Biology Techniques: DNA. 
(Cross-listed with B M S, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

HORT 542B. Introduction to Molecular Biology Techniques: Protein. 
(Cross-listed with B M S, GDCB, EEOB, FS HN, GDCB, NREM, NUTRS). Cr. 1. Repeatable. S.SS. Prereq: Graduate classification
Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, Immunophenotyping, and monoclonal antibody production. Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

HORT 542C. Introduction to Molecular Biology Techniques: Cell. 
(Cross-listed with B M S, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S. Prereq: Graduate classification
Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

(Cross-listed with B M S, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S. Prereq: Graduate classification
Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

HORT 542F. Techniques in Metabolomics. metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. 
(Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

HORT 542G. Introduction to Molecular Biology Techniques: Genomic. 
(Cross-listed with AGRON, SUSAG). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: SUSAG 509
Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.

HORT 543. Seed Physiology. 
(Cross-listed with STB). (2-0) Cr. 2. Alt. F., offered 2012. Prereq: Admission to the Graduate Seed Technology and Business Program or approval of the instructor
Brief introduction to plant physiology. Physiological aspects of seed development, maturation, longevity, dormancy and germination. Links between physiology and seed quality.

HORT 546. Strategies for Diversified Food and Farming Systems. 
(Cross-listed with AGRON, SUSAG). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: SUSAG 509
Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.

HORT 551. Growth and Development of Perennial Grasses. 
(Cross-listed with AGRON). (2-0) Cr. 2. Alt. S., offered 2014. Prereq: Junior or senior or graduate classification or permission of instructor
Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.

HORT 552. Integrated Management of Diseases and Insect Pests of Turfgrass. 
(Dual-listed with HORT 452). (Cross-listed with ENT, PL P). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: HORT 351
Gleason, D. Lewis. Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

HORT 584. Organic Agricultural Theory and Practice. 
(Dual-listed with HORT 484). (Cross-listed with AGRON). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: 9 cr. in biological or physical sciences
Debate. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

HORT 590. Special Topics. 
Cr. arr. Repeatable. Prereq: a major or minor in horticulture

HORT 593. Workshop in Horticulture. 
Cr. arr. Repeatable.
Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593A. Workshop in Horticulture: Greenhouse Crops. 
Cr. arr. Repeatable.
Workshops in horticulture, with emphasis on off-campus instruction.
**Courses for graduate students:**

**HORT 610. Graduate Seminar.**
Cr. 1. Repeatable. F.S.
Offered on a satisfactory-fail basis only.

**HORT 690. Advanced Topics.**
Cr. arr. Repeatable.

**HORT 696. Research Seminar.**
(Cross-listed with AGRON, BBMB, GDCB, PLBIO, FOR). Cr. 1. Repeatable. F.S.
Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

**HORT 698. Horticulture Teaching Practicum.**
(1-0) Cr. 1. S. Prereq: Graduate student classification
Discussions are intended to foster the development of graduate students as teaching assistants and future horticulture/plant science teachers. Topics include establishing a classroom presence, improving lectures, motivating students, dealing with difficult or disruptive students, and developing a teaching philosophy. Offered on a satisfactory-fail basis only.

**HORT 699. Thesis and Dissertation Research.**
Cr. arr. Repeatable.

**HORT 699A. Thesis and Dissertation Research: Greenhouse Crops.**
Cr. arr. Repeatable.

**HORT 699B. Thesis and Dissertation Research: Nursery Crops.**
Cr. arr. Repeatable.

**HORT 699C. Thesis and Dissertation Research: Turfgrass.**
Cr. arr. Repeatable.

**HORT 699D. Thesis and Dissertation Research: Fruit Crops.**
Cr. arr. Repeatable.

**HORT 699E. Thesis and Dissertation Research: Vegetable Crops.**
Cr. arr. Repeatable.

**HORT 699F. Thesis and Dissertation Research: Cross-Commodity.**
Cr. arr. Repeatable.

**HORT 699G. Thesis and Dissertation Research: Landscape Horticulture.**
Cr. arr. Repeatable.

**HORT 699H. Thesis and Dissertation Research: Biotechnology.**
Cr. arr. Repeatable.

---

### Industrial Technology

**Minor - Industrial Technology**

The Department of Agricultural and Biosystems Engineering also offers a minor in industrial technology which may be earned by completing a minimum of 18 credits of technology systems management courses, which includes:

- **HORT 699I. Thesis and Dissertation Research: Biotechnology.**
Cr. arr. Repeatable.

- **HORT 699G. Thesis and Dissertation Research: Landscape Horticulture.**
Cr. arr. Repeatable.

- **HORT 699F. Thesis and Dissertation Research: Cross-Commodity.**
Cr. arr. Repeatable.

- **HORT 699E. Thesis and Dissertation Research: Vegetable Crops.**
Cr. arr. Repeatable.

- **HORT 699D. Thesis and Dissertation Research: Fruit Crops.**
Cr. arr. Repeatable.

- **HORT 699C. Thesis and Dissertation Research: Turfgrass.**
Cr. arr. Repeatable.

- **HORT 699B. Thesis and Dissertation Research: Nursery Crops.**
Cr. arr. Repeatable.

- **HORT 699A. Thesis and Dissertation Research: Greenhouse Crops.**
Cr. arr. Repeatable.

### Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

### Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

### Mathematical, Physical, and Life Sciences: 26 cr.

- **MATH 142**  Trigonometry and Analytic Geometry  3
- **MATH 160**  Survey of Calculus  4
- **STAT 104**  Introduction to Statistics  3
- **PHYS 111**  General Physics  5
- **CHEM 163**  College Chemistry  4
- **CHEM 163L**  Laboratory in College Chemistry  1
- **BIOL 101**  Introductory Biology  3
- **or BIOL 211**  Principles of Biology I  3

**Second Biology course requirement by Option:**

- **Manufacturing option**
  - 3 credits from approved College of Agriculture and Life Science list
- **Occupational Safety option**
  - **BIOL 255**  Fundamentals of Human Anatomy  3

**Total Credits**  26

### Business, Humanities, Ethics, and Social Sciences: 18 cr.

- **ACCT 284**  Financial Accounting  3
- **ECON 101**  Principles of Microeconomics  3
- **Ethics**  3
Outcomes from participation in this program include developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

**Secondary Major**

International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in an agriculture and life sciences curriculum. Students choosing international agriculture will strengthen their career placement with a business or agency involved in international activities. Technical knowledge of a primary major discipline will be strengthened by a global awareness of agriculture and life sciences. A secondary major in international agriculture will give students practical insight into the role of agriculture in a world of increasing food and fiber needs. It is ideal for those who wish to broaden their international perspective or prepare for international work in agriculture. The secondary major includes an emphasis on international internship or study abroad and/or foreign languages, and selection of appropriate courses (from an approved list) to meet the needs and interests of the student.

Courses for the secondary major include AGRON 342 World Food Issues: Past and Present; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Fifteen credits of the secondary major cannot be used to meet requirements of the major or any other college or university requirement.

Students interested in earning a secondary major in international agriculture must contact a program adviser. The early indication of an interest in international agriculture allows for effective integration of the secondary major course requirements with those of the primary major.

**Minor**

A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and life sciences. A minor is available to interested students regardless of their major.

Courses for the minor include AGRON 342 World Food Issues: Past and Present; 3 to 6 credits of study abroad and/or foreign language and 3 to 6 credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Nine credits of the 15 credit total for the minor can not be used for meeting requirements for the major.

For more information about a secondary major or minor in international agriculture, see descriptions in the designated departments or the supervisory committee.

For more information about courses for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

**Curriculum in International Agriculture**

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture and Life Sciences. A minor is available to interested students regardless of their major.

15 cr. of this major cannot be used to meet requirements of the primary major or any other college or university requirement.

6 cr. from Internship in International Agriculture or Study Abroad or World Languages and Cultures; AGRON 342 World Food Issues: Past and Present; credits from approved International Agriculture Courses to total 15 cr.

**Microbiology**

Interdepartmental Undergraduate Major

**Undergraduate Study**

Undergraduate study for the bachelor of science degree with a major in microbiology.

In the Microbiology curriculum, principal emphasis is placed on understanding microorganisms and their interrelationships with other organisms in nature, the application of microbiology in medicine, agriculture and industry, and the study of fundamental life processes as exemplified by microorganisms. Some fields of microbiology, especially advanced research, may require further training.

Undergraduate work in the program is designed to provide sound preparation for graduate study, training for bachelor's-level employment, and admission to professional programs such as medicine, veterinary medicine and dentistry.

Graduates of the Interdepartmental Undergraduate Microbiology Program will learn about the diversity and complexity of microbial life represented by procaryotes,
Curriculum in Microbiology

www.micro.iastate.edu

Administered by an interdepartmental committee.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Electives: 7-12

Communications Proficiency:

English composition - with a C or better 6
Speech fundamentals - with a C or better 3

Communication/Library:

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
SP CM 212 Fundamentals of Public Speaking 3

One course from the following:

ENGL 302 Business Communication 3
ENGL 309 Report and Proposal Writing 3
ENGL 312 Biological Communication 3
ENGL 314 Technical Communication 3

Iowa State University - DRAFT COPY 223

Graduate Study

The program offers work for the degrees master of science and doctor of philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology. Faculty coordinate graduate education and research in a wide range of topics fundamental to the discipline of microbiology. Specific information about individual faculty and their research areas is available at www.micro.iastate.edu.

Prerequisites to graduate study include a sound undergraduate background in chemistry, mathematics and biology, including microbiology and genetics.

Graduates in the Microbiology Graduate program have a broad-based knowledge in the fundamentals of microbiology as well as advanced knowledge in specific areas as determined by their areas of research focus. Students completing the thesis have the technical, research, critical-thinking, problem-solving, and computer skills to design, implement, and conduct research using a variety of current techniques and equipment. They are also able to communicate research results effectively with scientific peer groups in both oral and written formats.

Minor

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses.

Communications Proficiency:

Technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Only 65 cr. from a two-year institution may apply which may include up to 16 cr. from approved list. The program (see College of Veterinary Medicine, Admission Requirements (p. 647)).

Courses

Courses primarily for undergraduates:

**Micro 101. Microbial World.**
(3-0) Cr. 3. F. Prereq: High school biology or equivalent
Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology and microbial impact on the biosphere.

**Micro 110. Orientation in Microbiology.**
(1-0) Cr. 0.5. Fall
Orientation to the discipline of microbiology, the curriculum in microbiology, and educational research opportunities within the department. Offered on a satisfactory-fail basis only.

**Micro 201. Introduction to Microbiology.**
(2-0) Cr. 2. F.S. Prereq: One semester of college-level biology
Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisory committee, students who obtain a grade of B or better may substitute 201 for 302 in advanced courses.

**Micro 201L. Introductory Microbiology Laboratory.**
(0-2) Cr. 1. F.S. Prereq: Credit or enrollment in Micro 201 or Micro 302
Basic microbiology laboratory techniques for non-microbiology majors. Credit for either Micro 201L or 302L but not both, may be applied toward graduation.

**Micro 302. Biology of Microorganisms.**
(3-0) Cr. 3. F.S. Prereq: BIOL 211; credit or enrollment in BIOL 212; 1 semester of chemistry
Basic cell biology, physiology, metabolism, genetics and ecology of microorganisms, with an emphasis on procaryotes and viruses, as well as the roles of microorganisms in the environment, disease, agriculture, and industry.

**Micro 302L. Microbiology Laboratory.**
(0-3) Cr. 1. F.S. Prereq: Credit or enrollment in Micro 302
Basic microbiology laboratory techniques for majors in microbiology, biological sciences and related fields. Credit for either Micro 301L or 302L but not both, may be applied toward graduation.

**Micro 310. Medical Microbiology.**
(3-0) Cr. 3. F. Prereq: Micro 302 (or Micro 201 if a B or better was obtained)
Study of infection and immunity by bacterial and viral pathogenic agents of humans. Nonmajor graduate credit.

**Micro 310L. Medical Microbiology Laboratory.**
(0-3) Cr. 1. F. Prereq: Micro 201 or Micro 302; Micro 201L or Micro 302L; credit or enrollment in Micro 310
Isolation and identification of human bacterial pathogens using basic staining techniques and biochemical tests. Brief introduction to techniques in cell culture and virology.

**Micro 307. Molecular and Cellular Bacteriology.**
(4-0) Cr. 4.5. S. Prereq: Micro 302, BIOL 313, credit or enrollment in Chem 332
Introductory course integrating physiological and genetic principles influencing bacterial growth, survival, and cellular differentiation. Emphasis is on prokaryotes although unicellular eukaryotes are also discussed. Topics include the structure, function, and assembly of cell components, bioenergetics and metabolism, regulation of gene expression, genetic adaptation, stress tolerance, biofilms, and cell-cell interactions and communication.

**Micro 335. Introductory Parasitology.**
(Cross-listed with BIOL, V PTH). (3-0) Cr. 3. S. Prereq: BIOL 212
Study of infection and immunity by bacterial and viral pathogenic agents of humans, and techniques of diagnosing and studying parasites.

**Micro 374. Insects and Our Health.**
(Cross-listed with ENT). (3-0) Cr. 3. S. Prereq: 3 credits in biological sciences
Bartholomay. Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Nonmajor graduate credit.

**Micro 374L. Insects and Our Health Laboratory.**
(Cross-listed with ENT). (0-3) Cr. 1. Alt. S., offered 2014. Prereq: Credit or enrollment in ENT 374
Bartholomay. Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

**Micro 381. Environmental Systems I: Introduction to Environmental Systems.**
(Dual-listed with Micro 581). (Cross-listed with BIOL, ENV S, ENSCI). Cr. 3-4. F. Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

**Micro 402. Microbial Genetics and Genomics.**
(Dual-listed with Micro 502). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: Micro 302, Biol 313
The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.

**Micro 407. Microbiological Safety of Foods of Animal Origins.**
(Dual-listed with Micro 507). (Cross-listed with FS HN). (3-0) Cr. 3. S. Prereq: Micro 420
Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

**Micro 408. Virology.**
(Dual-listed with Micro 508). (3-0) Cr. 3. F. Prereq: BIOL 313 or BBMB 301, BIOL 314 recommended
The molecular virology and epidemiology of human, animal, plant and insect viruses.

**Micro 410. Insect-Virus Interactions: a Molecular Perspective.**
(Dual-listed with Micro 510). (Cross-listed with ENT). (3-0) Cr. 3. Alt. F., offered 2013. Prereq: Permission of an instructor.
Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

**Micro 419. Foodborne Hazards.**
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: Micro 201 or Micro 302, a course in biochemistry
Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Nonmajor graduate credit. Only one of FS HN 419 and FS HN 519 may count toward graduation.
MICRO 420. Food Microbiology. (Cross-listed with FS HN, TOXI). (3-0) Cr. 3. F. Prereq: MICRO 201 or MICRO 302. Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications. Nonmajor graduate credit.

MICRO 421. Food Microbiology Laboratory. (Cross-listed with FS HN). (0-6) Cr. 3. F. Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L. Credit or enrollment in FS HN/MICRO 420. Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction. Nonmajor graduate credit.

MICRO 430. Prokaryotic Diversity and Ecology. (Dual-listed with MICRO 530). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MICRO 302, MICRO 302L. Survey of the diverse groups of prokaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 440. Laboratory in Microbial Physiology, Diversity, and Genetics. (Cross-listed with BBMB). (2-6) Cr. 4. F. Prereq: MICRO 302, MICRO 302L, CHEM 332, BIOL 313L. Study of the fundamental techniques and theory of studying the cellular mechanisms and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments. Also included are techniques for the phylogenetic characterization, and genetic manipulation of diverse species of bacteria.

MICRO 450. Undergraduate Seminar. (2-0) Cr. 2. S. Prereq: SP CM 212 and senior standing in Microbiology. Required of all undergraduate majors in microbiology. Discussion of current papers in microbiology and immunology, issues in scientific conduct, and bioethics in microbiology. Students present current papers in a journal club format and gain experience in writing grant proposals.

MICRO 451. Senior Survey in Microbiology. Cr. R. F. Prereq: Junior or Senior standing in Microbiology. Preparations for graduation. Topics include job search strategies, career information, mock interviews, graduate and professional school application processes and guidelines as well as outcomes assessment activities.

MICRO 456. Principles of Mycology. (Cross-listed with BIOL). (2-3) Cr. 3. F. Prereq: 10 credits in biological sciences Morphology, diversity, and ecology of fungi; their relation to agriculture, industry, and human health. Nonmajor graduate credit.

MICRO 475. Immunology. (Cross-listed with V MPM). (3-0) Cr. 3. S. Prereq: MICRO 310. An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Micro 475L optional. Credit for either Micro 475 or V MPM 520, but not both, may be applied to graduation.

MICRO 475L. Immunology Laboratory. (1-4) Cr. 1. S. Prereq: Credit or enrollment in MICRO 475 or MICRO 575. Techniques in primary culture and tumor cell growth, measures of lymphocyte function, and flow cytometry. Half semester course.

MICRO 477. Bacterial-Plant Interactions. (Dual-listed with MICRO 533). (Cross-listed with PL P). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: 3 credits in microbiology or plant pathology. Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth promotion, and biological control.

MICRO 478. Medical Protozoology. (Dual-listed with MICRO 578). (Cross-listed with ENT, V PTH). (2-1) Cr. 3. F. Prereq: MICRO 302 or BIOL 314, or equivalent. Medically important protozoa: their ecology and biology and the diseases they cause in humans and animals. Emphasis is on the protozoa, with some consideration of parasitic nematodes. Topics include: infection and immunity, computational biology/ bioinformatics, unique/special subcellular systems (pathways and organelles), vector-parasite-host interactions, disease prevention/treatment strategies, developmental biology. Nonmajor graduate credit.

MICRO 485. Soil and Environmental Microbiology. (Dual-listed with MICRO 585). (Cross-listed with ENSCI, AGRON). (2-3) Cr. 3. F. Prereq: AGRON 154 or AGRON 402. MICRO 201 (MICRO 201L recommended) Loyanchan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. Nonmajor graduate credit.

MICRO 487. Microbial Ecology. (Dual-listed with MICRO 587). (Cross-listed with ENSCI, BIOL). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry. Dual-listed with EEOB 587. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

MICRO 490. Independent Study. Cr. 1-5. Repeatable, maximum of 6 credits. F.S.SS. Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor. A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 490H. Independent Study, Honors. Cr. 1-5. Repeatable, maximum of 6 credits. F.S.SS. Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor. A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 495. Internship. Cr. 1-2. F. Prereq: At least 6 credits of 300-level or above coursework in microbiology, approval of academic adviser. Participation in the Cooperative Extension Intern Program or an equivalent work experience. Written report of activities required. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

MICRO 502. Microbial Genetics and Genomics. (Dual-listed with MICRO 402). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: MICRO 302, BIOL 313. The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.

MICRO 507. Microbiological Safety of Foods of Animal Origins. (Dual-listed with MICRO 407). (Cross-listed with FS HN). (3-0) Cr. 3. S. Prereq: MICRO 420. Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

MICRO 508. Virology. (Dual-listed with MICRO 408). (3-0) Cr. 3. F. Prereq: BIOL 313 or BBMB 301, BIOL 314 recommended. The molecular virology and epidemiology of human, animal, plant, and insect viruses.

MICRO 510. Insect-Virus Interactions: a Molecular Perspective. (Dual-listed with MICRO 410). (Cross-listed with ENT). (3-0) Cr. 3. Alt. F., offered 2013. Prereq: Permission of an instructor Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.
MICRO 530. Prokaryotic Diversity and Ecology. (Dual-listed with MICRO 430). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MICRO 302, MICRO 302L. Survey of the diverse groups of prokaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 551. Microbial Diversity and Phylogeny. (1-0) Cr. 1. F. Prereq: MICRO 302, BIOL 313. Comparisons among the three kingdoms of life (Bacteria, Archaia, and Eukarya). Topics will include metabolism, adaptation, methods of phylogenetic analysis, and comparative genomics.

MICRO 552. Bacterial Molecular Genetics and Physiology. (1-0) Cr. 1. F. Prereq: MICRO 302, BIOL 313. Review of the molecular genetics and physiology of model organisms.

MICRO 553. Pathogenic Microorganisms. (1-0) Cr. 1. F. Prereq: MICRO 302, BIOL 313. Review and contrast/comparison of common bacterial pathogens of plants and animals and their mechanisms of virulence, including toxins, protein secretion, host invasion and iron acquisition strategies. An overview of eukaryotic cell biology that is relevant to pathogenesis will also be included.

MICRO 554. Virology. (1-0) Cr. 1. S. Prereq: MICRO 302, BIOL 313. Introduction to virus life cycles including entry, gene expression strategies, replication, and mechanisms to modify and overcome host defenses. The roles of specific viruses and sub-viral agents in animal and plant disease will also be included.

MICRO 555. Fungal Biology. (1-0) Cr. 1. S. Prereq: MICRO 302, BIOL 313. Ecology, genetics, physiology and diversity of fungi, from yeasts to mushrooms, and their importance in human affairs.

MICRO 556. Microbial Ecology and Environmental Monitoring. (1-0) Cr. 1. S. Prereq: MICRO 302, BIOL 313. Examination of microorganisms in their natural habitats, including aquatic, terrestrial and extreme environments, community and biofilm development, microbe-microbe interactions, and current and traditional methods of microbial analysis in natural environments.

MICRO 575. Immunology. (3-0) Cr. 3. S. Prereq: MICRO 310. An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Micro 475L optional. Credit for either Micro 575 or V MPM 520, but not both, may be applied toward graduation.

MICRO 577. Bacterial-Plant Interactions. (Dual-listed with MICRO 477). (Cross-listed with PL P). (3-1) Cr. 3. Alt. S., offered 2014. Prereq: 3 credits in microbiology or plant pathology. Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth and biological control.

MICRO 578. Medical Protozoology. (Dual-listed with MICRO 478). (Cross-listed with ENT, V PTH). (2-1) Cr. 3. F. Prereq: MICRO 302 or BIOL 314, or equivalent. Medically important protozoa: their ecology and biology and the diseases they cause in humans and animals. Emphasis is on the protozoa, with some consideration of parasitic nematodes. Topics include: infection and immunity, computational biology/ bioinformatics, unique/special subcellular systems (pathways and organelles), vector-parasite-host interactions, disease prevention/treatment strategies, developmental biology. Nonmajor graduate credit.

MICRO 581. Environmental Systems I: Introduction to Environmental Systems. (Dual-listed with MICRO 381). (Cross-listed with BIOL, ENV S, ENSCI). Cr. 5-4. F. Prereq: 12 credits of natural science including biology and chemistry. Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

MICRO 586. Medical Bacteriology. (Cross-listed with V MPM). (4-0) Cr. 4. F. Prereq: Permission of instructor. Bacteria associated with diseases of vertebrates, including virulence factors and interaction of host responses.

MICRO 587. Microbial Ecology. (Dual-listed with MICRO 487). (Cross-listed with ENSCI, EEOB). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry. (Dual-listed with Biol 487.) Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

MICRO 590. Special Topics. Cr. 1-5. Repeatable. F.S.SS. Prereq: Permission of instructor

Courses for graduate students:

MICRO 604. Seminar. (1-0) Cr. 1. Repeatable. F.S.

MICRO 615. Molecular Immunology. (Dual-listed with BBMB, V MPM). (3-0) Cr. 3. Alt. F., offered 2013. Prereq: BBMB 405 or BBMB 502. Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

MICRO 625. Mechanisms of Bacterial Pathogenesis. (Cross-listed with V MPM). (4-0) Cr. 4. Alt. S., offered 2013. Prereq: Credit in Biochemistry and Microbiology. Review of current concepts in specific areas of microbial pathogenesis including the genetic basis for bacterial disease, genetic regulation and control of virulence factors and their mechanisms of action, and host-pathogen interactions at the cellular and molecular levels. The application of microbial genetics to understanding pathogenesis will be included.

MICRO 626. Advanced Food Microbiology. (Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: FS HN 420 or FS HN 421 or FS HN 504. Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

MICRO 627. Rapid Methods in Food Microbiology. (Cross-listed with FS HN, TOX). (2-0) Cr. 2. Alt. S., offered 2012. Prereq: FS HN 420 or FS HN 421 or FS HN 504. Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.); existing commercial test formats and kits, automation in testing, sample preparation and "next generation" testing formats in development.

MICRO 679. Light Microscopy. (Cross-listed with GDCB, EEOB). (2-9) Cr. 5. Prereq: Permission of instructor. Current theories encompassing light optics and their applications for specimen examination. Includes historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.); existing commercial test formats and kits, automation in testing, sample preparation and "next generation" testing formats in development.

MICRO 679. Light Microscopy. (Cross-listed with GDCB, EEOB). (2-9) Cr. 5. Prereq: Permission of instructor. Current theories encompassing light optics and their applications for specimen examination. Includes historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.); existing commercial test formats and kits, automation in testing, sample preparation and "next generation" testing formats in development.
(Cross-listed with GDCB, EEOB), (2-9) Cr. 5. Prereq: Permission of instructor.
Current theories encompassing scanning electron optics and their applications for high and low vacuum microscopy, specimen chemical and cryopreservation methods, x-ray microanalysis, backscattered and topographic imaging, image digitization, processing and presentation. Limit of 10 students.

(Cross-listed with GDCB, EEOB), (2-9) Cr. 5. Prereq: GDCB 679 and permission of instructor.
Current theories encompassing electron optics and their applications for chemical and physical specimen preservation, ultramicrotomy, general staining and cytochemistry, immunocytochemistry, autoradiography, negative staining and shadowing, x-ray microanalysis, image digitization, processing and presentation.

### Micro 685. Advanced Soil Biochemistry.
(Cross-listed with AGRON, ENSCI), (2-0) Cr. 2. Alt. S., offered 2012. Prereq: AGRON 585.
Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

### Micro 690. Current Topics.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: Permission of instructor.
Colloquia or advanced study of specific topics in a specialized field.

### Micro 690A. Current Topics: Microbiology.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: Permission of instructor.
Colloquia or advanced study of specific topics in a specialized field.

### Micro 690B. Current Topics: Immunology.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: Permission of instructor.
Colloquia or advanced study of specific topics in a specialized field.

### Micro 690C. Current Topics: Infectious Diseases.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: Permission of instructor.
Colloquia or advanced study of specific topics in a specialized field.

### Micro 692. Molecular Biology of Plant-Pathogen Interactions.
(Cross-listed with PL P), (3-0) Cr. 3. Alt. F., offered 2012. Prereq: PL P 506 or BBMB 405 or GEN 411 or MICRO 402 or strong background in molecular biology.
Bogdanove, Whitham. Seminal and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete an interinstitutional research proposal writing and peer review exercise.

### Micro 697. Graduate Research Rotation.
Cr. arr. Repeatable. F.S.
Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Microbiology major.

### Micro 698. Seminar in Molecular, Cellular, and Developmental Biology.
(Cross-listed with BBMB, GDCB, MCDB, V MPM), (2-0) Cr. 1-2. Repeatable. F.S.
Student and faculty presentations.

### Micro 699. Research.
Cr. arr. Repeatable.

### Natural Resource Ecology and Management

The department addresses a broad spectrum of natural resource and environmental issues in a holistic approach to learning, discovery and engagement. Our vision of natural resources is that informed protection and management of natural resources involves an integration of biological, economic, and social considerations. Such an integrated and comprehensive approach to the education of future generations of natural resource managers and scientists is needed in order to sustain viable landscapes, facilitate strong communities, and produce desired goods, services, and functions from our natural resources.

Our educational mission for the undergraduate and graduate programs is to provide those learning experiences and opportunities that will ensure students can learn to function effectively in their chosen fields.

Central to that effective functioning are the abilities to:

- Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.
- Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.

- Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.
- Assess, analyze, synthesize, and evaluate information fairly and objectively.
- Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem solving approaches.
- Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.
- Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.
- Recognize and interpret resource problems and opportunities across spatial scales from local to global.
- Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.
- Exercise leadership skills as professionals and engaged citizens.
- Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.
- Exercise life-long learning skills developed before graduation.

### Undergraduate Study

The Department of Natural Resource Ecology and Management offers work for the Bachelor of Science degree with majors in animal ecology or forestry. The department participates in interdisciplinary programs in biology, environmental studies, international studies, and pest management. By proper selection of free and restricted elective courses, students can obtain a minor or a second major in these programs or other disciplines.

The Department provides numerous scholarships; application information is available in the departmental Student Services Center.

### Animal Ecology (A Ecl)

The animal ecology curriculum provides its majors with an understanding of ecological principles and processes and their applications to natural resource management. It is oriented toward students desiring a general and flexible program in environmental biology and for those planning graduate study. Students may select from four options: Fisheries and Aquatic Sciences, Interpretation of Natural Resources, Preveterinary and Wildlife Care, or Wildlife. Graduates find employment as aquaculturists, aquatic ecologists, wildlife biologists, fisheries biologists, resource managers, and ecologists for industry, environmental consulting firms, natural resource and environmental agencies and organizations, zoos, and as educators.

Graduates of the Animal Ecology major understand the basic principles of animal biology, ecology and management, and relevant aspects of scientific communication, basic mathematics and sciences, computing applications, and personal and professional development. Four specific options prepare students for careers in interpretation of natural resources, fisheries and aquatic sciences, pre-veterinary and wildlife care, and wildlife. Each option has specific outcomes expectations that include (1) the scope of the specialization and its relationships to broader aspects of animal ecology, biotic resource management, and other allied scientific disciplines and professions, (2) career opportunities and requirements, and (3) knowledge and skills appropriate for employment at technical and practitioner levels in each discipline. Graduates are able to communicate and work effectively in the multidisciplinary arena of ecology and natural resource management.

All options require three months (400 hours) of relevant work experience or study at a biological station prior to graduation. The latter may be accomplished at the university’s affiliate field stations: Iowa Lakeside Laboratory at West Lake Okoboji, and Gulf Coast Research Laboratory at Ocean Springs, Mississippi. Information on these laboratories is available from the department’s Student Services Center.

Preveterinary medicine preparation may be achieved while satisfying degree requirements in animal ecology. Additional education and training can lead to other opportunities in such areas as research and management, natural resources planning and administration, teaching, and environmental consulting, among others. Graduate training is necessary for many specialized positions within the fields of animal ecology. Students preparing for graduate study should consult with their academic adviser concerning appropriate coursework.

Students wishing to be certified by the American Fisheries Society or The Wildlife Society need to consult with their advisors in selecting required courses in their respective programs. The formal application then needs to be completed and submitted for review by their professional societies. Certification in either society has many professional benefits and may be required or recommended for employment by federal and state agencies and private industry.
Students seeking certification to teach biology in secondary schools must meet requirements of the College of Human Sciences as well as those of the Animal Ecology curriculum. In addition, they must apply formally for admission to the teacher education program (see Index, Teacher Education Program (http://catalog.iastate.edu/collegeoffliberalarts/teachereducation)). Students with an interest in careers in outdoor writing are encouraged to obtain a minor or a second major in journalism (see Index, Journalism and Communication, Courses and Programs (p. 544)). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Index, Criminal Justice Studies (p. 496)).

**Minor - Animal Ecology**

The department offers a minor in animal ecology that may be earned by taking 15 credits in the department including:

- A ECL 312 Ecology 4
- A ECL 365 Vertebrate Biology 4
- NREM 120 Introduction to Renewable Resources 3

Plus four additional credits of Animal Ecology or NREM courses at the 300 level or above.

**Forestry (For)**

The forestry curriculum offers courses dealing with the management of forest ecosystems for multiple benefits including wood and fiber products, biodiversity, recreation, water, wildlife, and wildlife conservation and preservation of natural resources are emphasized. The department offers work for the Bachelor of Science degree with a major in forestry and options in forest ecosystem management, interpretation of natural resources, urban and community forestry, natural resource conservation and restoration, or sustainable materials science and technology. All options lead to a professional degree in forestry (Bachelor of Science). The forestry major has been accredited by the Society of American Foresters (SAF) since 1935. The Council for Higher Education Accreditation recognizes SAF as the specialized accrediting body for forestry education in the United States. The primary goal of the undergraduate curriculum in forestry is to educate foresters to be capable of scientifically managing the nation’s forest lands and related ecosystems - private and public.

Graduates understand and can apply scientific principles associated with forests, forest ecosystem management, and wood and non-wood products. Graduates are able to communicate effectively and work well in teams. They are capable of preparing and delivering effective oral and written communication of scientific and technical decisions to professional and lay audiences. They are proficient in technical skills such as measurements, computer usage, inventory, economic analysis, data and situation analysis, and ecosystem assessment. They recognize the importance of ethics in forestry and are sensitive to cultural diversity and broad environmental concerns.

Graduates of the forest ecosystem management option are skilled at understanding how forests function and how forests can be managed to produce desired goods (wood, fiber, recreation, wildlife habitat) and services (clean water, carbon sequestration, wilderness) in the long-run. They are skilled at interpretation of interactions and effects of abiotic and biotic factors in forests and quantification of bio-physical, social, and economic outputs from forest ecosystems. They are skilled at complex decision-making involving private and public forest resources where ethical, legal, social, economic, and ecological dimensions are explicitly considered. Graduates of the interpretation of natural resources option are skilled at communicating with the public about the values associated with forest ecosystems and providing educational programs for all ages. Graduates of the urban and community forestry option are able to combine biological, social, legal, and economic expertise to effectively manage trees or forests in an urban setting. They are skilled at decision-making related to site assessment, and long-term management of urban trees and forests to achieve multiple goals.

Graduates of the natural resource conservation and restoration option are skilled at assessing the natural functions of the environment and human impacts. They are skilled at interpretation of forest and other natural environments and making decisions relating to their conservation and preservation. Graduates of the sustainable materials science and technology option understand the anatomical, physical, and chemical properties of wood and other bio-renewable materials and know wood processing operations involved in drying, composite materials manufacturing, and chemical treatment.

In consultation with their adviser, students can select elective courses related to elective courses in the forest ecosystem management option to emphasize forest ecology; wildlife, wilderness, and recreation management; water quality and erosion protection; quantitative-analytical techniques; business and marketing; and other areas related to natural resource management. Elective courses in the urban and community forestry option can be selected to emphasize plant health, policy and planning, ecology, hydrology, sociology, business administration, or horticulture design. Elective courses related to the natural resource conservation and restoration option can be selected to emphasize ecology, wildlife, recreation, nature interpretation, landscape design, sociology and ethics of conservation and preservation. Similarly, elective courses in the sustainable materials science and technology option can be selected to emphasize wood production, bio-renewable materials, wood fiber, business and marketing, and quality assurance. Elective courses in the interpretation of natural resources option can be selected to emphasize natural history, animal ecology, and environmental education.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resources for commodity and non-commodity multiple benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agroforestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in production, product development, quality control, and marketing.

With advanced graduate study, the range of professional job opportunities for a person with a B.S. in forestry is expanded. Opportunities include research and education as well as more specialized managerial and administrative positions with private firms and public agencies.

During fall semester of the second year of study (sophomore year, typically), forestry students are required to enroll in the department’s integrated forestry modules consisting of:

- FOR 201 Forest Biology 2
- FOR 202 Wood Utilization 2
- FOR 203 Resource Measurements/Evaluation 2
- FOR 204 Forest Ecosystem Decision-Making 2
- FOR 205 Integrated Forestry Laboratory 3
- FOR 206 Fall Forestry Camp 4

That semester, consisting entirely of forestry coursework, is designed to give students an early understanding of the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week off-campus fall camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer students should check with the department for counsel on timing their completion of the integrated forestry modules.

**Minor - Forestry**

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses:

- FOR 302 Silviculture 3
- FOR 356 Dendrology 4
- FOR 451 Forest Resource Economics and Quantitative Methods 4
- FOR 452 Ecosystem Management 3
- FOR 475 Urban Forestry 3
- NREM 120 Introduction to Renewable Resources 3
- NREM 301 Natural Resource Ecology and Soils 4
- NREM 345 Natural Resource Photogrammetry and Geographic Information Systems 3
- NREM 390 Fire Ecology and Management 3
- NREM 407 Watershed Management 4

Students wishing to emphasize sustainable materials science and technology must complete 280 and an additional 12 credits from the following courses:

- FOR 480 Wood Anatomy and Fiber Analysis 3
- FOR 481 Conversion of Lignocellulosic Materials 3
- FOR 483 Wood Deterioration and Preservation 3
- FOR 485 Wood and Natural Fiber Composites 3
- FOR 486 Drying Processes for Wood and Other Lignocellulosic Materials 3
- FOR 487 Physical Properties of Wood 4
- NREM 490B Independent Study: Forestry 1-4
Graduate Study
The Department of Natural Resource Ecology and Management offers work for the degrees Master of Science and Doctor of Philosophy with majors in fisheries biology, forestry, and wildlife ecology. A non-thesis masters degree is available for students desiring a general degree program without thesis research. Students may also major in interdepartmental graduate majors in biorenewable resources technology, ecology and evolutionary biology, environmental science, genetics, plant physiology, sustainable agriculture, or toxicology (see Index [http://catalog.iastate.edu/azindexx]). All students are required to teach and conduct research as part of their training for the Ph.D. degree.

Fisheries Biology and Wildlife Ecology
Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings.

Personnel of the U.S. Geological Survey’s Iowa Cooperative Fish and Wildlife Research Unit contribute significantly to the graduate program of the department through teaching and research. Governmental agencies such as the U.S. Fish and Wildlife Service, Natural Resources Conservation Service and the Iowa Department of Natural Resources, and non-governmental agencies such as The Nature Conservancy and the Iowa Natural Heritage Foundation also contribute to the graduate program by funding research, providing in-kind support, and providing numerous formal and informal mentoring relationships.

No more than two dual-listed animal ecology courses may be applied for major work credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.

Forestry
The department offers programs leading to the degrees Master of Science and Doctor of Philosophy with a major in forestry and minor work to students taking major work in other departments.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled at communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to, and suitable for, students who have majored in forestry or related natural resource fields. A non-thesis master’s option is available.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry.

Curriculum in Animal Ecology
Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better):

English composition 6
Speech fundamentals 3

Communication/Library 16 cr.

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
SP CM 212 Fundamentals of Public Speaking 3

Plus 6 credits of the following: 6

ENGL 207 Introduction to Creative Writing
ENGL 302 Business Communication

ENGL 303 Free-Lance Writing for Popular Magazines
ENGL 304 Creative Writing—Fiction
ENGL 305 Creative Writing—Nonfiction
ENGL 306 Creative Writing—Poetry
ENGL 309 Report and Proposal Writing
ENGL 310 Rhetorical Analysis
ENGL 312 Biological Communication
ENGL 314 Technical Communication

AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
JL MC 201 Reporting and Writing for the Mass Media
JL MC 305 Publicity Methods
SP CM 312 Business and Professional Speaking
SP CM 313 Communication in Classrooms and Workshops

LIB 160 Information Literacy 1

Total Credits 16

Humanities and Social Sciences: 6 cr.
Approved Humanities course 3
Approved Social Science course 3

Total Credits 6

Ethics: 3 cr.
3 cr. from approved ethics list.

Life Sciences: 6 cr.

BIOL 211 Principles of Biology I 3
Approved Life Sciences course 3

Total Credits 6

Mathematical Sciences: 9 cr.

MATH 140 College Algebra 3
MATH 142 Trigonometry and Analytic Geometry 3
STAT 101 Principles of Statistics 3-4 or STAT 104 Introduction to Statistics

Total Credits 9-10

Physical Sciences: 13-14 cr.

CHEM 163 College Chemistry 4
CHEM 163L Laboratory in College Chemistry 1 or CHEM 177 and CHEM 177L
CHEM 231 Elementary Organic Chemistry 3
CHEM 231L Laboratory in Elementary Organic Chemistry 1 or CHEM 331, CHEM 331L, CHEM 332

PHYS 115 Physics for the Life Sciences 4
PHYS 115L Laboratory in Physics for the Life Sciences 1 or PHYS 111

Total Credits 14

Biological Sciences: 20 cr.

NREM 110 Orientation in Natural Resource Ecology and Management 1
NREM 120 Introduction to Renewable Resources 3
NREM 211 Careers in Natural Resources 1
A ECL 312 Ecology 4
A ECL 365 Vertebrate Biology 4
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1

Total Credits 21

Practical Experience:

NREM 104 Practical Work Experience

### Curriculum in Forestry

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.
International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Communications Proficiency (with a C or better):

One course from:

- FOR 453
- NREM 385
- NREM 460
- Controversies in Natural Resource Management
Animal Ecology Courses

Courses primarily for undergraduates:

A ECL 312. Ecology.
(Cross-listed with BIOL, ENSCI). (3-3) Cr. 4. F. SS. Prereq: BIOL 211L and BIOL 212L

Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

A ECL 312L. Ecology.
(Cross-listed with IA LL, ENSCI). Cr. 4. SS.

An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

A ECL 321. Fish Biology.
(2-3) Cr. 3. S. Prereq: A ECL 365

Biological, ecology, and evolution of fishes. Emphasis on structure, physiology, and behavior, including a focus on the conservation and management of fishes and their habitats. Laboratory focus on fish morphology, survey methods, identification, distribution, habits, and habitats of fishes.

A ECL 326. Ornithology.
(Cross-listed with IA LL). Cr. 4. SS.

The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress techniques of population analysis and methodology for population studies.

(Cross-listed with BIOL). (3-2) Cr. 4. F. Prereq: BIOL 212, BIOL 212L

Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

A ECL 366. Natural History of Iowa Vertebrates.
(2-3) Cr. 3. S. Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L

Vertebrate fauna of Iowa, including fish, amphibians, reptiles, birds, and mammals. Species identification, habitat requirements, community structure and assessment, conservation issues that include historical population changes and value of wild animals to the region's ecological and economic health.

(Cross-listed with BIOL). (2-3) Cr. 3. F. Prereq: A ECL 312; STAT 101 or STAT 104

Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. Nonmajor graduate credit.

A ECL 401. Intro to Aquatic Animal Medicine.
(Cross-listed with B M S). (1-2) Cr. 1. SS.

8 week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, and current research. Field trip to aquaculture facility.

A ECL 404I. Behavioral Ecology.
(Cross-listed with IA LL). Cr. 4. Alt. SS., offered 2012. Prereq: Two semesters of biology

Animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior.

A ECL 415. Ecology of Freshwater Invertebrates, Plants, and Algae.
(Dual-listed with A ECL 515). (2-3) Cr. 3. Alt. F., offered 2012. Prereq: A ECL 312

Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphasis on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

(Dual-listed with A ECL 518). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered 2011. Prereq: A ECL 415

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 419L. Vertebrate Ecology and Evolution.
(Cross-listed with IA LL). Cr. 4. SS.

Field and laboratory study of representative vertebrates of northwestern Iowa. Observations and experimentation emphasize ecological histories by integrating concepts of functional morphology, behavioral ecology, and evolutionary biology. Nonmajor graduate credit.

A ECL 420L. Amphibians and Reptiles.
(Cross-listed with IA LL). Cr. 4. Alt. SS., offered 2012. Prereq: Two semesters of biology

Ecology, behavior, and conservation biology of amphibians and reptiles with emphasis on their anatomy and morphology; temperature and water regulation; locomotion; life history; reproduction; population and community ecology; and conservation.

A ECL 425. Aquatic Insects.
(Dual-listed with A ECL 525). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: BIOL 312 or equivalent

Courtney. Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 440. Fishery Management.
(Dual-listed with A ECL 540). (2-3) Cr. 3. F. Prereq: A ECL 312, A ECL 321, STAT 101 or STAT 104; credit or enrollment in A ECL 486

Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.
A ECL 442. Aquaculture.  
(Dual-listed with A ECL 542). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: credit or enrollment in A ECL 321  
Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.

(2-3) Cr. 3. F. Prereq: A ECL 371  
Ecological theory and practice of wildlife management, including, population ecology, habitat management, and current issues in the field. Course involves a series of case studies addressing actual wildlife issues using field and quantitative methods. Nonmajor graduate credit.

(Dual-listed with A ECL 554). (3-0) Cr. 3. S. Prereq: Junior standing and at least 10 credits in biological sciences at the 300+ level  
Eccological and epidemiological aspects of diseases as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationships among wildlife, domestic animal, and human health.

(3-0) Cr. 3. Alt. F., offered 2012. Prereq: A ECL 365, A ECL 312 or graduate standing; NREM 120  
Biological, political, social, and economic factors affecting the management of international wildlife resources. Nonmajor graduate credit. Meets International Perspectives Requirement.

A ECL 457. Herpetology.  
(Dual-listed with A ECL 557). (Cross-listed with BIOL). (2-3) Cr. 3. F. Prereq: BIOL 351 or BIOL 365  
Dual listed with EEOB 557. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatars, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 458. Ornithology.  
(Dual-listed with A ECL 558). (Cross-listed with BIOL). (2-3) Cr. 3. S. Prereq: A ECL 365 or BIOL 351  
Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

A ECL 459. Mammalogy.  
(Dual-listed with A ECL 559). (Cross-listed with BIOL). (2-3) Cr. 3. S. Prereq: A ECL 365 or A ECL 365  
Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. Laboratory focus on identification, distribution, habits, and habitats of mammals.

Cr. 1-8. Repeatable. SS.  
Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

A ECL 486. Aquatic Ecology.  
(Dual-listed with A ECL 586). (Cross-listed with ENSCI). (3-0) Cr. 3. F. Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 301  
Dual-listed with EEOB 586. Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacsustrine, riverine, and wetland ecology. Nonmajor graduate credit.

A ECL 486L. Aquatic Ecology Laboratory.  
(Cross-listed with ENSCI, BIOL). (0-3) Cr. 1. F. Prereq: Concurrent enrollment in BIOL 486  
Dual-listed with EEOB 586L. Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduates:

A ECL 515. Ecology of Freshwater Invertebrates, Plants, and Algae.  
(Dual-listed with A ECL 415). (2-3) Cr. 3. Alt. F., offered 2012. Prereq: A ECL 312  
Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

A ECL 516. Avian Ecology.  
(3-0) Cr. 3. Alt. S., offered 2012. Prereq: A ECL 365, A ECL 312 or graduate standing  
Current topics and theories including avian breeding and foraging ecology, population biology, community structure, habitat selection, field methodologies, and data interpretation.

(Dual-listed with A ECL 418), (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered 2011. Prereq: A ECL 486  
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 520. Fisheries Science.  
(3-0) Cr. 3. Alt. S., offered 2013. Prereq: A ECL 365, A ECL 312  
Concepts, approaches, and techniques for assessment of recreational and commercial fisheries. Scope will range from individual fish to entire ecosystems, both freshwater and marine.

A ECL 523L. Fish Ecology.  
(Cross-listed with IA LL). Cr. 4. Alt. SS., offered 2012.  
Basic principles of fish interaction with the biotic and abiotic environment. Field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa.

A ECL 525. Aquatic Insects.  
(Dual-listed with A ECL 425). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: BIOL 312 or equivalent  
Courtney. Morphology, ecology, diversity and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 526L. Advanced Field Ornithology.  
(Cross-listed with IA LL). Cr. 2. SS. Prereq: Concurrent registration in IA LL 326I  
Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project.

A ECL 531. Conservation Biology.  
(Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: BIOL 312; BIOL 313 or graduate standing  
Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

A ECL 531L. Conservation Biology.  
(Cross-listed with EEOB, IA LL). Cr. 4. Alt. SS., offered 2012. Prereq: IA LL 312I  
Population and community-level examination of factors influencing the viability of plant and animal populations from both demographic and genetic perspectives; assessment of biodiversity; design and management of preserves.

A ECL 535I. Restoration Ecology.  
(Cross-listed with IA LL, ENSCI, EEOB). Cr. 4. Alt. SS., offered 2012. Prereq: A course in ecology  
Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

A ECL 540. Fishery Management.  
(Dual-listed with A ECL 440). (2-3) Cr. 3. F. Prereq: A ECL 312, A ECL 321, STAT 101 or STAT 104; credit or enrollment in A ECL 486  
Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A ECL 542. Aquaculture.  
(Dual-listed with A ECL 442). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: credit or enrollment in A ECL 321  
Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.
A ECL 551. Behavioral Ecology.  (2-2) Cr. 3. Alt. S., offered 2012. Prereq: a course in ecology or animal behavior. The study of how an animal’s behavior affects its ability to survive and reproduce in its environment. Course topics, such as foraging behavior, sexual selection, parental care, etc., represent the interface of ecology, evolution, and behavior.

A ECL 554. Principles of Wildlife Disease.  (Dual-listed with A ECL 454). (3-0) Cr. 3. S. Prereq: Graduate classification. Ecological and epidemiological aspects of disease as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationship among wildlife, domestic animal, and human health.

A ECL 557. Herpetology.  (Dual-listed with A ECL 457). (Cross-listed with A ECL). (2-3) Cr. 3. F. Prereq: A ECL 365 or BIOL 351. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 558. Ornithology.  (Dual-listed with A ECL 458). (Cross-listed with EEOB). (2-3) Cr. 3. S. Prereq: A ECL 365 or BIOL 351. Dual-listed with BIOL 458. Biology, ecology, evolution, and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

A ECL 559. Mammalogy.  (Dual-listed with A ECL 459). (Cross-listed with BIOL). (2-3) Cr. 3. S. Prereq: BIOL 351 or A ECL 365. Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation. Laboratory focus on identification, distribution, habits, and habitats of mammals.

A ECL 570. Landscape Ecology.  (Cross-listed with EEOB). (2-3) Cr. 3. Alt. F., offered 2012. Prereq: Permission of instructor; EEOB 588; a course in calculus. The study of ecological and evolutionary processes within a spatial context with emphasis on behavior, population, and community dynamics.

A ECL 573. Techniques for Biology Teaching.  (Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS. The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573A. Techniques for Biology Teaching: Animal Biology.  (Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS. The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573G. Techniques for Biology Teaching: Limnology.  (Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS. The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573H. Animal Behavior (Same as la LL 573H).  (Cross-listed with IA LL, EEOB). Cr. 1-2. Repeatable. SS. The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573I. Techniques for Biology Teaching: Insect Ecology.  (Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS. The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573W. Techniques for Biology Teaching: Project WET.  (Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS. The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 589. Population Ecology.  (Cross-listed with EEOB). (2-2) Cr. 3. F. Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing. Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on statistical inference and computing.

A ECL 590. Graduate Independent Study.  (Cross-listed with IA LL, ANTHR, EEOB). Cr. 1-4. Repeatable. SS. Prereq: Graduate classification and permission of instructor

A ECL 590I. Special Topics: Graduate Independent Study.  (Cross-listed with IA LL, ANTHR, EEOB). Cr. 1-4. Repeatable. SS. Prereq: Graduate classification and permission of instructor

A ECL 599. Creative Component.  Cr. arr. Prereq: Nonthesis M.S. option only

Courses for graduate students:

A ECL 611. Analysis of Populations.  (Cross-listed with EEOB). (2-2) Cr. 3. Alt. F., offered 2011. Prereq: BIOL 312; STAT 401; a course in calculus. Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on statistical inference and computing.

Forestry Courses

Courses primarily for undergraduates:

FOR 201. Forest Biology.  (2-0) Cr. 2. F. Prereq: Concurrent enrollment in FOR 202, FOR 203, FOR 204, FOR 205, and FOR 206. Discussion of ecological concepts, individual tree structure and growth, variation and diversity in tree populations. Physical environment of trees and forests, ecological processes in forest communities, and introduction to different regional forest communities.

FOR 202. Wood Utilization.  (2-0) Cr. 2. F. Prereq: Concurrent enrollment in FOR 201, FOR 203, FOR 204, FOR 205, and FOR 206. Processing of sustainable materials including wood into products and general properties and proper use of these products.

FOR 203. Resource Measurements/Evaluation.  (2-0) Cr. 2. F. Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 204, FOR 205, and FOR 206; MATH 140. Survey techniques involved in quantification, valuation, and evaluation of tree and stand growth and other variables in the forest environment (e.g., recreational use, wildlife habitat value, biomass, and solid wood).

FOR 204. Forest Ecosystem Decision-Making.  (2-0) Cr. 2. F. Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 205, and FOR 206. Methods of decision-making related to forest ecosystems including communications, teams and conflict resolution. Current issues relating to public, private, and urban forests; quantification of processes, services, and goods produced by the forest and expected by the public such as wildlife, water, range, recreation, wilderness, biodiversity, as well as wood and fiber products.
FOR 205. Integrated Forestry Laboratory. (0-8) Cr. 3. F. Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 204, and FOR 206
Field and laboratory exercises integrating the evaluation and management of forest goods, services, and the processing of wood products.

FOR 206. Fall Forestry Camp. Cr. 4. F. Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 204, and FOR 205
Three-week field camp to address topics and issues covered in 201, 202, 203, 204, and 205.

FOR 280. Wood Properties and Identification. (3-3) Cr. 4. S.
Properties of wood and how they relate to its successful use. Comparative anatomical characteristics, scientific nomenclature, and hand lens identification of commercially important North American woods.

FOR 283. Pesticide Application Certification. (Cross-listed with AGRON, ENT, HORT). (2-0) Cr. 2. S.
Holscher. Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

FOR 290. Special Problems. Cr. 1-4. Repeatable. Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290A. Special Problems: Leadership in Forestry Teams (LIFT) Learning Community. Cr. 1-4. Repeatable. Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290B. Special Problems: Forest Ecosystem Management. Cr. 1-4. Repeatable. Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290D. Special Problems: Urban and Community Forestry. Cr. 1-4. Repeatable. Prereq: Freshman or Sophomore classification, permission of instructor

FOR 290E. Special Problems: Wood Science and Technology. Cr. 1-4. Repeatable. Prereq: Freshman or Sophomore classification, permission of instructor

FOR 302. Silviculture. (2-3) Cr. 3. S. Prereq: FOR 201
Manipulation of forest vegetation based on ecological principles for the production of goods and services. Nonmajor graduate credit.

FOR 342. Dynamics of Forest Stands. (2-3) Cr. 3. Alt. F., offered 2012. Prereq: FOR 203, STAT 101
Change in forest species composition and structure at the stand and landscape scales resulting from site quality, tree growth, competition, succession, and disturbance. Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management. Nonmajor graduate credit.

FOR 356. Dendrology. (Cross-listed with BIOL). (2-4) Cr. 4. F. Prereq: BIOL 211
Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Natural disturbances, human impacts, management and restoration concerns for major North American forest regions will be addressed. Nonmajor graduate credit.

FOR 416. Forest Insect and Disease Ecology. (Cross-listed with PL P). (3-3) Cr. 4. F. Prereq: 8 credits in biological sciences, including BIOL 211
T. Harrington, M. Harris. Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests. Nonmajor graduate credit.

FOR 451. Forest Resource Economics and Quantitative Methods. (3-3) Cr. 4. S. Prereq: FOR 203, MATH 150
Application of economic principles to forest resource management considering both market and non-market goods and services. Methods of identifying and specifying problems in the management and use of forest resources. Application of mathematical and statistical models to the solution of managerial problems. Nonmajor graduate credit.

FOR 452. Ecosystem Management. (Cross-listed with NREM). (2-3) Cr. 3. F. Prereq: Junior classification, and NREM 301 or A ECL 312
Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. Nonmajor graduate credit.

FOR 453. Forest Resource Policy and Administration. (3-0) Cr. 3. S. Prereq: Junior or senior classification
Forest and related natural resource policies and contemporary policy issues. Integration of elements of policy development processes, various participants in these processes, and resulting programs. Ethics in professional forestry and natural resource conservation. Participation in the policy process involving communication with policy makers and natural resource professionals, study of current issues, promotion of issues with students as issue educators. Participation in policy meetings to identify/determine various elements and applications of strategies associated with the policy development process. Nonmajor graduate credit.

FOR 454. Forestry Practicum. (1-4) Cr. 3. S. Prereq: 20 credits in student's major at 300 level or above
Integrated decision-making related to the conservation, management, and preservation of private and public forests, wildlands, urban/community forests, and/or the production and utilization of wood products. Student teams work with a client and develop management plans that incorporate ecological, social, economic, ethical, and institutional/political factors. Effective teamwork, written/oral/visual communication, and problem-solving stressed. Multiple trips to project site and client. Nonmajor graduate credit.

FOR 475. Urban Forestry. (Cross-listed with HORT). (2-3) Cr. 3. F. Prereq: Junior or senior classification, 3 credits in biology
Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management). Nonmajor graduate credit.

FOR 480. Wood Anatomy and Fiber Analysis. (2-3) Cr. 3. Alt. F., offered 2011. Prereq: FOR 280 or permission of instructor
Microscopic anatomy and ultrastructure of wood and other industrial lignocellulosic materials. Microscopy techniques for fiber analysis. Comparison of fiber properties. Nonmajor graduate credit.

FOR 481. Conversion of Lignocellulosic Materials. (2-3) Cr. 3. F. Prereq: FOR 280 or equivalent

Deterioration of wood in use by biological and physical agents. Wood preservation and fire retardant treatments. Environmental impact of wood treating. Nonmajor graduate credit.

FOR 485. Wood and Natural Fiber Composites. (2-3) Cr. 3. Alt. F., offered 2012. Prereq: FOR 280 or TSM 240
Consolidation behavior of wood and other lignocellulosic materials. Principles of adhesion. Manufacturing processes for wood and lignocellulose composites such as plywood, oriented strand products, laminated lumber, particleboard, medium density fiberboard, and bast fiber products. Extrusion processing of natural fiber/plastic composites. Nonmajor graduate credit.

FOR 486. Drying Processes for Wood and Other Lignocellulosic Materials. (2-3) Cr. 3. Alt. S., offered 2012. Prereq: FOR 280 or TSM 240
Principles of moisture relations in hygroscopic materials; adsorption, desorption, equilibrium moisture content. Transport processes in natural materials such as wood. Drying processes for wood and other lignocellulosic materials. Influence of moisture on dimensional stability and durability of wood and lignocellulosic composites. Nonmajor graduate credit.
Mechanical, thermal, electrical, and acoustical properties of wood. Lumber grading
and stress rating, nondestructive evaluation of wood and wood composite products.
Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduates:

FOR 599. Creative Component. 
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599A. Creative Component: Forest Biology. 
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599B. Creative Component: Forest Biometry. 
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599C. Creative Component: Forest and Recreation Economics. 
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599D. Creative Component: Forest Management and Administration. 
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 599E. Creative Component: Wood Science. 
Cr. 1-12. Repeatable, maximum of 12 credits.

Courses for graduate students:

FOR 699. Research Seminar. 
(Cross-listed with AGRON, BBMB, GDCB, HORT, PLBIO). Cr. 1. Repeatable. F.S.
Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

FOR 699. Research. 
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699A. Research: Forest Biology - Wood Science. 
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699B. Research: Forest Biometry. 
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699C. Research: Forest Economics. 
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699D. Research: Forest Management and Administration. 
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699E. Research: Wood Science. 
Cr. 1-12. Repeatable, maximum of 12 credits.

FOR 699F. Research: Plant Physiology. 
Cr. 1-12. Repeatable, maximum of 12 credits.

Natural Resource Ecology and Management Courses

Courses primarily for undergraduates:

NREM 104. Practical Work Experience. 
Cr. R.
Three months of relevant work experience in natural resources, animal ecology, or forestry. Study at a summer biological station may be applicable. See adviser for specific requirements and approval process.

Cr. 1. F.
Orientation to the University and to the Department of Natural Resource Ecology and Management. Discussion of departmental learning outcomes, strategies for academic success and academic planning. Offered on a satisfactory-fail basis only.

NREM 111. NREM Transitions Learning Community Seminar. 
(1-0) Cr. 1. Repeatable. F.S.
Enrollment limited to members of the NREM Transitions Learning Community. Designed to assist new transfer students and continuing sophomore students with their transition to the academic expectations and professional development aspects of the natural resource program. Offered on a satisfactory-fail basis only.

NREM 112. Orientation to Learning and Productive Team Membership. 
(Cross-listed with AER E, CON E, FS HN, HORT). (2-0) Cr. 2. F.
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

NREM 114. Developing Responsible Learners and Effective Leaders. 
(Cross-listed with CON E, FS HN, HORT). (2-0) Cr. 2. S. Prereq: Hort 112 or NREM 112
Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

NREM 120. Introduction to Renewable Resources. 
(Cross-listed with AGRON, ENV S). (3-0) Cr. 3. F.S.
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

NREM 130. Natural Resources and Agriculture. 
(Cross-listed with ENV S). (3-0) Cr. 3. S.
Survey of the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on Iowa. Conservation and management practices for private agricultural lands. Designed for nonmajors.

NREM 211. Careers in Natural Resources. 
Cr. 1. F.S. Prereq: Sophomore classification
Career planning exploration in natural resources. Discussion of the job application process, including techniques for successful interviewing and development of an effective resume. Offered on a satisfactory-fail basis only.

NREM 256. Midwestern Prairie Plants. 
(1-2) Cr. 1. F.
Offered 1st half semester only. Survey of the major plant families, genera, and representative species of Midwestern prairies with emphasis on plant identification and use of keys. Prairie restoration, conservation, and management issues will also be considered.

(Cross-listed with LA, ENV S). (3-0) Cr. 3. Alt. S., offered 2014.
The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state agencies. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands.

(Cross-listed with ENSCI). (3-3) Cr. 4. F. Prereq: BIOL 211, BIOL 211L; FOR 201 or a second course in biology
Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes. Nonmajor graduate credit.

NREM 303. Internship. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of department mentor and sophomore standing
Placement with county conservation boards, camps, zoos, parks, etc., for experience as interpreters, rangers, and technicians.

NREM 303L. Undergraduate Internships. 
(Cross-listed with IA LL). Cr. 1-5. SS. Prereq: Permission of instructor and sophomore standing
Placement with county conservation boards, camps, parks, etc. for experience as interpreters, rangers, and technicians.

NREM 305. Seminar. 
(2-0) Cr. 1-3. Repeatable. F.S. Prereq: Permission of instructor
Current topics in natural resources or related issues.
NREM 315. Genetics for Natural Resource Managers...
(3-0) Cr. 3. F. Prereq: Prereq: Biol 211 and 212.
Introduction into how genetic techniques and technologies can aid the management of the earth’s biotic resources. Topics include an overview of DNA structure, function and inheritance; tools and techniques for measuring genetic diversity; genetic management of wild and captive populations; DNA forensics as management tool. The goal of this course is to prepare managers/biologists to interpret genetic data as they relate to natural resource conservation.

(2-3) Cr. 3. S. Prereq: 6 credits in biological sciences
History, objectives, forms, and techniques of interpretation in the settings of county, state, national parks, and zoos. Principles of effective communication as they apply to natural resource fields including wildlife management, forestry, and wildlife rehabilitation. Planning and use of effective communications and outreach campaigns to manage and conserve natural resources.

(Cross-listed with ENSCI). (2-3) Cr. 3. F. Prereq: Junior classification
Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses. Nonmajor graduate credit.

NREM 385. Natural Resource Policy.
(Dual-listed with NREM 585). (3-0) Cr. 3. S. Prereq: Junior classification
Development, theory and practice of natural resource policy. Integrative approach with topical policy studies in North American wildlife, forestry, and water. Policy formation, the role of science, introduction to federal law compliance. Readings, lectures, projects.

(3-0) Cr. 3. F.
Characteristics and role of fire in forest ecosystems. Major topics covered include fuels, fire weather, fire behavior, fire danger rating systems, fire control, prescribed burning, and fire dynamics in major ecosystem types. Nonmajor graduate credit.

NREM 402. Watershed Hydrology.
(Dual-listed with NREM 502). (Cross-listed with ENSCI, MTEOR, GEOL). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

NREM 407. Watershed Management.
(Dual-listed with NREM 507). (Cross-listed with ENSCI, ENV S). (3-3) Cr. 4. S. Prereq: A course in general biology
Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

NREM 446. Integrating GPS and GIS for Natural Resource Management.
(Dual-listed with NREM 546). (Cross-listed with ENSCI). (2-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 452. Ecosystem Management.
(Cross-listed with FOR). (2-3) Cr. 3. F. Prereq: Junior classification, and NREM 301 or A ECL 312
Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. Nonmajor graduate credit.

(Cross-listed with ENV S). (3-0) Cr. 3. S. F. Prereq: NREM 120, and A ECL 312 or NREM 301, and Junior classification
Analysis of controversial natural resource issues using a case approach that considers uncertainty and adequacy of information and scientific understanding. Ecological, social, political, economic, and ethical implications of issues will be analyzed. Nonmajor graduate credit.

NREM 465. Landscape Change and Conservation.
(Dual-listed with NREM 566). (3-0) Cr. 3. Prereq: LA 202
Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

NREM 471. Agroforestry Systems; Local and Global Perspectives.
(Dual-listed with NREM 571). (2-3) Cr. 3. Alt. S., offered 2012. Prereq: 6 credits in biological science at 300 level or above

NREM 490. Independent Study.
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification, permission of instructor

Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification, permission of instructor

NREM 490B. Independent Study: Forestry.
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification, permission of instructor

NREM 490E. Independent Study: Entrepreneurship.
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification, permission of instructor

NREM 490H. Independent Study: Honors Program.
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification, permission of instructor

NREM 490I. Independent Study: Undergraduate Independent Study.
(Cross-listed with ANTHR, IA LL). Cr. 1-4. Repeatable. SS. Prereq: Junior or senior classification and permission of instructor

NREM 496. Travel Course.
(Dual-listed with NREM 596B). Cr. 1-5. Repeatable, maximum of 3 times. Prereq: Permission of instructor
Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Meets International Perspectives Requirement.

NREM 496A. Travel Course: International.
(Dual-listed with NREM 596). Cr. 1-5. Repeatable, maximum of 3 times. Prereq: Permission of instructor
Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Meets International Perspectives Requirement.

NREM 496B. Travel Course: Domestic.
(Dual-listed with NREM 596). Cr. 1-5. Repeatable, maximum of 3 times. Prereq: Permission of instructor
Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

NREM 498. Cooperative Education.
Cr. 1-3. Prereq: Permission of departmental chair
Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:

NREM 501. Geneecology.
(3-0) Cr. 3. Alt. F., offered 2011. Prereq: GEN 320 or BIOL 313
Geneecology principles as they apply to natural and improved populations of plants and animals. Genetic systems as they interact with long-term natural selection to produce clinal or ecotypic variation. The impact of current environments and genetic modifications of domesticated organisms on short-term selection pressures. Special coverage of species of interest to students enrolled in the course.
NREM 502. Watershed Hydrology.  
(Dual-listed with NREM 407). (Cross-listed with ENSCI, ENV S). (3-3) Cr. 4. F. Prereq: A course in general biology. Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

NREM 507. Watershed Management.  
(Dual-listed with NREM 407). (Cross-listed with ENSCI, ENV S). (3-3) Cr. 4. S. Prereq: A course in general biology. Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

NREM 508. Aquatic Ecology.  
(Cross-listed with ENSCI, IA LL). Cr. 4. SS. Prereq: Courses in ecology, chemistry, and physics. Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

NREM 529. Publishing in Biological Sciences Journals.  
(Cross-listed with AGRON, HORT). (3-0) Cr. 3. S. Prereq: Permission of instructor; evidence of a publishable unit of the student's research data. Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

(Cross-listed with ENSCI, EEOB). (2-3) Cr. 3. F. Prereq: BIOL 386 or BIOL 474 or graduate standing. Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

NREM 542. Introduction to Molecular Biology Techniques.  

NREM 542A. Introduction to Molecular Biology Techniques: DNA.  

NREM 542B. Introduction to Molecular Biology Techniques: Protein.  
(Cross-listed with B M S, GDCB, EEOB, FS HN, HORT, GDCB, NUTRS). Cr. 1. Repeatable. Includes immunoenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

NREM 542C. Introduction to Molecular Biology Techniques: Cell.  

NREM 542F. Techniques in Metabolomics. metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects.  

NREM 542G. Introduction to Molecular Biology Techniques: Genomic.  
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, GDCB, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S. Prereq: Graduate classification. Offered on a satisfactory-fail basis only.

NREM 546. Integrating GPS and GIS for Natural Resource Management.  
(Dual-listed with NREM 446). (Cross-listed with ENSCI). (2-3) Cr. 3. S. Prereq: 12 credits in student's major at 300 level or above, NREM 345 or equivalent experience with ArcGIS. Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 556. Landscape Change and Conservation.  
(Dual-listed with NREM 465). (3-0) Cr. 3. F. Prereq: LA 202. Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

NREM 570. Advanced Decision-making in Natural Resource Allocation.  
(2-2) Cr. 3. Alt. S., offered 2012. Prereq: FOR 451 or two courses in economics. Analytical approach to economic aspects of forest resource management problems. Theory and application of economic decision-making criteria to traditional and modern forest resource management issues. Current problems in the allocation of forest resources.

NREM 571. Agroforestry Systems.  

NREM 580. Research Orientation.  
(2-0) Cr. 2. F. Prereq: 20 credits in biological sciences and a course in statistics. Research design, proposal preparation, and technical writing.

NREM 585. Natural Resource Policy.  
(Dual-listed with NREM 385). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: Graduate classification or permission of instructor. Development, theory and practice of natural resource policy. Integrative approach with topical policy studies in North American wildlife, forestry, and water. Policy formation, the role of science, introduction to federal law compliance.

NREM 590. Special Topics.  
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Permission of instructor.

NREM 590A. Special Topics: Animal Ecology.  
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Permission of instructor.

NREM 590B. Special Topics: Forestry.  
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Permission of instructor.

NREM 593. Workshop.  
Cr. 1-3. Repeatable. Prereq: Graduate classification.
NREM 596. Travel Course. (Dual-listed with NREM 496B). Cr. 1-5. Repeatable, maximum of 3 times. Prereq: Permission of instructor. Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Meets International Perspectives Requirement.

NREM 596A. Travel Course: International. (Dual-listed with NREM 496). Cr. 1-5. Repeatable, maximum of 3 times. Prereq: Permission of instructor. Limited enrollment. Extended field trips to study ecological topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

NREM 596B. Travel Course: Domestic. (Dual-listed with NREM 496). Cr. 1-5. Repeatable, maximum of 3 times. Prereq: Permission of instructor. Limited enrollment. Extended field trips to study ecological topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

NREM 598. Natural Resource Ecology and Management Teaching Practicum. Cr. 1. F.S.SS. Prereq: Graduate classification as M.S. candidate in a NREM major and permission of instructor. Graduate student experience in teaching. Student must plan and present at least one unit of subject matter in a course or extension workshop. Teaching practicum must be documented by the student and approved by the student’s POS committee. Offered on a satisfactory-fail-basis only.

NREM 599. Creative Component. Cr. arr.

Courses for graduate students:

NREM 600. Seminar. Cr. 1. Repeatable, F.S. Current topics in natural resources research and management.

NREM 698. Natural Resource Ecology and Management Teaching Practicum. Cr. 1. F.S.SS. Prereq: Graduate classification as a Ph.D. candidate in a NREM major and permission of instructor. Graduate student experience in teaching. Student must plan and present substantive subject matter for a minimum of three weeks in lecture and/or laboratory formats, or a series of extension seminars/workshops. Teaching practicum must be documented by the student and approved by the student’s POS committee. Offered on a satisfactory-fail-basis only.

Nutritional Science Undergraduate Program (AGLS)

Curriculum in Nutritional Science

Administered by the Department of Food Science and Human Nutrition

Pre-Health Professional and Research Option

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 13 cr.

Electives: 0-12 cr. Select from any university coursework to earn at least 120 total credits.

Students planning to apply to health professional programs should review entrance requirements and select appropriate courses as electives. Many health professional programs also require physics.

Concurrent B.S. and M.S. Program: Well-qualified students in Nutritional Science, pre-health professional and research option, who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a Bachelor of Science (B.S.) degree in Nutritional Science and a Master of Science (M.S.) degree in Nutritional Sciences. For more information, refer to www.fshn.hs.iastate.edu

Plant Pathology and Microbiology

Undergraduate Study
The department participates in the interdepartmental undergraduate Microbiology major.

Graduate Study
The department offers studies for the degrees master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science nonthesis option is available. The department also participates in the interdepartmental majors in microbiology; toxicology; genetics; plant biology; molecular, cellular, and developmental biology; ecology and evolutionary biology; and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They are skilled in research procedures, communicating research results, and writing concise and persuasive grant proposals.

Courses
Courses primarily for undergraduates:

PL P 391, Practical Plant Health.  
(0-4) Cr. 2. F. Prereq: 6 credits in biological sciences.  
Diagnosis of all types of plant health problems caused by diseases, insects, weeds, nutrient deficiencies and toxicities, herbicide injury, and environmental stress. Emphasis is on acquiring practical skills. Students will gain experience in written and oral communication.

PL P 408, Principles of Plant Pathology.  
(Dual-listed with PL P 508). (2-3) Cr. 3. F.S. Prereq: 8 credits in life sciences, including BIOL 211.  
Braun. Principles underlying the nature, diagnosis, and management of plant diseases. Laboratory complements lecture topics and provides experience in plant disease diagnosis.

PL P 416, Forest Insect and Disease Ecology.  
(Cross-listed with FOR). (3-3) Cr. 4. F. Prereq: 8 credits in biological sciences, including BIOL 211.  
T. Harrington, M. Harris. Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests. Nonmajor graduate credit.

(Dual-listed with PL P 552). (Cross-listed with ENT, HORT). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: HORT 351.  
Gleason, D. Lewis. Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

PL P 477, Bacterial-Plant Interactions.  
(Dual-listed with PL P 577). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: 3 credits in microbiology or plant pathology.  
Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth promotion, and biological control.

PL P 483, Wood Deterioration and Preservation.  
Deterioration of wood in use by biological and physical agents. Wood preservation and fire retardant treatments. Environmental impact of wood treating. Nonmajor graduate credit.

PL P 490, Independent Study.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Junior or senior classification, 7 credits in biological sciences, permission of instructor.  
A maximum of 6 credits of PL P 490 may be used toward the total of 128 credits required for graduation.

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Junior or senior classification, 7 credits in biological sciences, permission of instructor.  
A maximum of 6 credits of PL P 490 may be used toward the total of 128 credits required for graduation.

PL P 490H, Independent Study: Honors.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Junior or senior classification, 7 credits in biological sciences, permission of instructor.  
A maximum of 6 credits of PL P 490 may be used toward the total of 128 credits required for graduation.

PL P 494, Seed Pathology.  
(Dual-listed with PL P 594). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: PL P 408. Munkvold. Significance of diseases on the major phases of seed production; growing, harvesting, conditioning, storing, and planting seed. Pathogens considered include fungi, bacteria, viruses, nematodes, and abiotic agents. Emphasis on epidemiology, management, host-pathogen relationships, seed transmission, and seed health testing. Credit may not be obtained for both PL P 494 and STB/PI P 592.

Courses primarily for graduate students, open to qualified undergraduates:

PL P 506, Plant-Pathogen Interactions.  
(2-0) Cr. 2. S. Prereq: PL P 408 or PL P 416, BIOL 313.  
Baum, Whitham. Introduction to mechanisms of plant-parasite interaction. Genetics and molecular genetics of plant disease resistance and pathogenicity.

PL P 508, Principles of Plant Pathology.  
(Dual-listed with PL P 408). (2-3) Cr. 3. F.S. Prereq: 8 credits in life sciences, including BIOL 211.  
Braun. Principles underlying the nature, diagnosis, and management of plant diseases. Laboratory complements lecture topics and provides experience in plant disease diagnosis.

PL P 509, Plant Virology.  
(Cross-listed with MICRO). (2-6) Cr. 4. Alt. S., offered 2013. Prereq: PL P 408, BIOL 454, BBMB 405, CHEM 211.  
Hill. Plant viruses and the diseases they cause. Emphasis on epidemiology and control. Structure, function, and biochemical-biophysical properties of plant viruses.

PL P 511, Integrated Management of Tropical Crops.  
(Cross-listed with ENT, HORT). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: PL P 408 or PL P 416 or ENT 370 or ENT 376 or HORT 221.  
Gleason, Lewis. Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Meets International Perspectives Requirement.

PL P 530, Ecologically Based Pest Management Strategies.  
(Cross-listed with AGRON, ENT, SUSAG). (3-0) Cr. 3. Alt. F., offered 2014. Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

PL P 543, Ecology and Epidemiology of Plant Diseases.  
Nutter. Theory and practice related to the ecology and epidemiology of plant disease epidemics. Interactions among host and pathogen populations as affected by the environment are quantified with respect to time and space. Analysis of ecological and host and pathogen genetic factors that alter the course of plant disease epidemics. Risk assessment theory, disease forecasting, and modeling the impact of biotic plant stresses on yield and quality are also emphasized.

(Dual-listed with PL P 452). (Cross-listed with ENT, HORT). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: HORT 351.  
Gleason, D. Lewis. Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

PL P 574, Plant Nematology.  
Baum. Morphology, anatomy, identification, control, and life cycles of common plant-parasitic nematodes; host-parasite interactions; Caenorhabditis elegans.

PL P 577, Bacterial-Plant Interactions.  
(Dual-listed with PL P 477). (Cross-listed with MICRO). (3-1) Cr. 3. Alt. S., offered 2014. Prereq: 3 credits in microbiology or plant pathology.  
Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth and biological control.

PL P 590, Special Topics.  
Cr. 1-3. Repeatable. F.S.S.S. Prereq: 10 credits in biological sciences, permission of instructor.

PL P 592, Seed Health Management.  
Munkvold. Occurrence and management of diseases during seed production, harvest, conditioning, storage, and planting. Emphasis on epidemiology, disease management in the field, seed treatment, effects of conditioning on seed health, and seed health testing. Credit may not be obtained for both PL P 592 and PI P 594.

PL P 594, Seed Pathology.  
(Dual-listed with PL P 494). (2-3) Cr. 3. Alt. S., offered 2013. Prereq: PL P 408. Munkvold. Significance of diseases on the major phases of seed production; growing, harvesting, conditioning, storing, and planting seed. Pathogens considered include fungi, bacteria, viruses, nematodes, and abiotic agents. Emphasis on epidemiology, management, host-pathogen relationships, seed transmission, and seed health testing. Credit may not be obtained for both PI P 494 and STB/PI P 592.
The curriculum has a broad base of general education subjects including credits in communications, mathematics, physical and biological sciences, social sciences, and humanities. The technical subjects represent a combination of sociology, economics, public administration and agriculture, with emphases on social and economic change, history of public services, complex organizations, interagency relationships, community leadership, community action, adoption and diffusion, group dynamics, and political and legal behavior as they relate to agriculture and rural areas. For the Interdisciplinary Studies major in Criminology and Criminal Justice, see Liberal Arts and Sciences, Curriculum.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in sociology and rural sociology and minor work for students majoring in other departments. For M.S. and Ph.D. departmental requirements, see Program of Graduate Study for Degrees in Sociology and Rural Sociology, available from the department office. The department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; methodology; social change and development; criminology; the economy, organizations and work; and social psychology. The Department of Sociology does not offer a nonthesis master’s program.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the department stipulates no language requirement for either the degree master of science or the degree doctor of philosophy, specifying competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in interdisciplinary majors in sustainable agriculture, transportation and water resources, and interdepartmental minors in gerontology (see Index).

Curriculum in Public Service and Administration in Agriculture

Administered by the Department of Sociology

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (C or better):

### Agricultural Sciences: 9 cs.

Complete 9 cr. from MTEOR 206 (p. 607) Introduction to Weather and Climate or Agron, An S, AST, Ent, FS HN, Hort, or NREM.

### Area of Concentration: 15 cr.

Complete 15 cr. from approved specialization area.

---

### Sustainable Agriculture (Interdepartmental Graduate Major)

The graduate program in sustainable agriculture is an interdepartmental major offered through faculty in nineteen participating departments: Agricultural & Biosystems Engineering; Agricultural Education & Studies; Agronomy; Animal Science; Anthropology; Civil, Construction & Environmental Engineering; Community & Regional Planning; Ecology, Evolution & Organismal Biology; Economics; Entomology; Food Science & Human Nutrition; Horticulture; Industrial & Manufacturing Systems Engineering; Natural Resource Ecology & Management; Philosophy & Religious Studies; Plant Pathology; Political Science; Sociology; and Veterinary Diagnostic & Production Animal Medicine.

Master’s students must have a bachelor’s degree in one of the life, social, or engineering sciences, or a bachelor’s degree plus equivalent experience in these areas. Doctoral students must have a master’s degree and either an undergraduate or master’s degree in one of the majors in the College of Agriculture and Life Sciences or its equivalent. Graduates of the program will be able to design and manage agricultural systems that increase food security, enhance human communities, and protect environmental quality. To acquire these abilities, students learn agroecological principles, study social relations underlying sustainable farming and food systems, and gain experience with practical techniques of sustainable agriculture. The program seeks to balance depth in disciplinary knowledge and perspectives with broader, systems-level thinking. It integrates technical and social sciences through a sequence of team-taught interdisciplinary core courses emphasizing higher-order critical thinking skills and active, collaborative approaches to learning.

Graduates of the program are qualified to work in a variety of settings, including university research, education, extension, agribusiness, governmental and non-governmental organizations, and farming.

Information on applications procedures, research interests of the faculty, and specific requirements of the major may be obtained at http://www.sust.ag.iastate.edu/gpsa/ or by contacting gpsa@iastate.edu.

### Courses

Courses primarily for graduate students, open to qualified undergraduates:

**SUSAG 509. Agroecosystems Analysis.**

(Cross-listed with AGRON, SOC). (3-4) Cr. 4. F. Prereq: Senior or above classification

Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc), and scales of operation.

**SUSAG 515. Integrated Crop and Livestock Production Systems.**

(Cross-listed with A E, AGRON, AN S). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: SUSAG 509

Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

**SUSAG 530. Ecologically Based Pest Management Strategies.**

(Cross-listed with AGRON, ENT, PL P). (3-0) Cr. 3. Alt. F., offered 2014. Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

**SUSAG 546. Strategies for Diversified Food and Farming Systems.**

(Cross-listed with AGRON, HORT). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: SUSAG 509

Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.
SUSAG 571. Agroforestry Systems.
(Dual-listed with SUSAG 471). (2-3) Cr. 3. Alt. S., offered 2012. Prereq: 6 credits in biological science at 300 level or above

SUSAG 584. Organic Agricultural Theory and Practice.
(Dual-listed with SUSAG 484). (Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: 9 cr. in biological or physical sciences
Delve. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

SUSAG 590. Special Topics.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification, permission of instructor
For students wishing to conduct in-depth study of a particular topic in sustainable agriculture.

SUSAG 599. Creative Component.
Cr. arr. F.S.SS.
Pre-enrollment contract required. For MS students pursuing the non-thesis degree option. Final product is a creative component.

Courses for graduate students:
SUSAG 600. Sustainable Agriculture Colloquium.
(1-0) Cr. 1. Repeatable. F-S.
Weekly seminar for graduate students in the Sustainable Agriculture program.

SUSAG 610. Foundations of Sustainable Agriculture.
(Cross-listed with AGRON, A. E. ANTHR, SOC). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

SUSAG 699. Research.
Cr. arr. Repeatable. F.S.SS.
MS and PhD thesis and dissertation research.

College of Business
Michael R. Crum, Interim Dean
Qing Hu, Associate Dean
Danny J. Johnson, Associate Dean
www.bus.iastate.edu

Departments of the College
- Accounting
- Finance
- Management
- Marketing
- Supply Chain and Information Systems

Objectives of the Curriculum in Business
The instructional objective of the College of Business is to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the affect of diversity in the work place; (4) an opportunity for advanced study.
A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.
The curriculum in business is accredited by AACSB International, the Association to Advance Collegiate Schools of Business, the national business accrediting agency.

Organization of Curriculum
The undergraduate curriculum in business is divided into three areas: a general education program, a pre-professional business program, and a professional business program. The general education program provides a broad spectrum of liberal arts and social science coursework. The pre-professional business requirements provide a foundation in pre-business coursework. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The seven majors offered for the degree bachelor of science (B.S.) are accounting; finance; management; management information systems; marketing; supply chain management; and business economics. The college also offers a secondary major in international business. Elective courses are part of the curriculum.

Bachelor of Science
The bachelor of science (B.S.) degree offers a high quality professional education in business. It prepares students for professional careers in specialized functions of business and government. Candidates for this degree must satisfy the requirements established by the College of Business and also the requirements for individual majors specified by the departments of the College. All candidates for the B.S. degree are required to complete one of the following majors: accounting; finance; management; management information systems; marketing; supply chain management; or business economics.

Required High School Preparation
Students entering the pre-business curriculum must present evidence of the following high school preparation:
a. Four (4) years of English/Language Arts, emphasizing writing, speaking, and reading as well as an understanding and appreciation of literature.
b. Three (3) years of mathematics, including one year each of algebra, geometry, and advanced algebra.
c. Three (3) years of science, including one year each of courses from two of the following fields: biology, chemistry, and physics;
d. Two (2) years of social studies.

Majors
Accounting (p. 248)
Business Economics (p. 247)
Finance (p. 254)
International Business (p. 256) (second major only)
Management (p. 256)
Management Information Systems (p. 258)
Marketing (p. 260)
Supply Chain Management (p. 262)

Admission Standards to Professional Programs
All new entering students are enrolled in the pre-business curriculum. To enter the professional program in the College of Business, students must complete any ENGL 101 English for Native Speakers of Other Languages courses, ENGL 150 Critical Thinking and Communication, and the following foundation courses or their approved substitutions:

<table>

In addition, all students must achieve an Iowa State University cumulative grade point of 2.5 or a grade-point average of 2.5 in the foundation courses listed above. Admission into the professional program is a prerequisite for pre-business students to gain admission into upper-level business classes.

Students who meet the following requirements qualify for early admission to the professional program. First Semester Freshman: ACT score of 30 or higher, or ranked in the top 5% of high school class, or National Merit/Achievement Finalist, or member of the Freshman Honors Program. All other Students: minimum ISU cumulative GPA of 3.50 in at least 12 credits, or full member of the University Honors Program.
If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If foundation courses initially taken at Iowa State University need to be repeated, they must be repeated at Iowa State University. With the exception of ACCT 285 Managerial Accounting and MIS 330 Management Information Systems, pre-business students do not have access to business core classes. To facilitate registration, qualified students may be conditionally admitted during the semester in which they complete the admission requirements.

Admission requirements are subject to change. Applications and the current requirements for admission to the College of Business are available on the Web at https://apps.bus.iastate.edu/ProfessionalProgram/ or from the Undergraduate Programs Office in the College of Business.

Academic Standards and Graduation Requirements

Policies for students enrolled in the College of Business may be obtained on the Web at http://www.business.iastate.edu/undergraduate/ or from the Undergraduate Programs Office in the College of Business.

Students are responsible for knowing and adhering to these College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2011-2012 catalog:

1. A minimum of 122 semester credits are required.
2. At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year college.
3. At least 50% of the 122 credits required for graduation must consist of general education (non-business credits).
4. A minimum of 12 credits of the last 32 credits earned in residence must be applied to the business core and/or the major.
5. The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.
6. Students must achieve communication proficiency by earning a grade of C or better in two of the three required English courses.
7. A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.
8. A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution.
10. General education courses may not be taken P/NP.
11. No more than 9 elective credits may be taken P/NP.
12. The last 32 credits applied for graduation must be taken at ISU. A waiver for Study Abroad and Internship/Co-ops may be granted.

Advising System

The Undergraduate Programs staff, under the leadership of the Director for Undergraduate Programs, facilitates student progress toward graduation while supporting the academic standards of the College of Business and Iowa State University. To accomplish this, the Undergraduate Programs staff provides services for all College of Business students, including academic advising, learning opportunities, and teaching and developmental activities.

Students in the College of Business have advisers located in the Undergraduate Programs Office. The adviser assists students with developing an academic program; accessing pertinent university resources; and meeting their educational objectives.

The college offers an orientation program for entering students. All entering students and family members are encouraged to attend orientation. During orientation the adviser and the student prepare an appropriate schedule and the student registers for courses. Placement assessments may be required in Mathematics and English to assist in placing students in the appropriate level of courses if this cannot be determined by ACT/SAT scores, high school preparation classes or transfer courses.

Honors

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30, or ranked in the top 5% of their high school classes; or selected as a National Merit or National Achievement finalist.

Enrolled students who have completed 12 graded credits at Iowa State University and earned a 3.50 can be admitted as a full member of the Honors Program. To qualify for full membership, students must have declared a major, developed a program of study, and have a minimum of 48 credits remaining before graduation.

Special advisers will assist honors students in developing an appropriate program of study.

Internships

Credit and non-credit internships in business may be approved for College of Business students in all majors including pre-business. Credit hours and requirements vary. Arrangements must be made in the college prior to the beginning of the internship. An internship adviser from the Career Services Center will assist students in making these arrangements.

Multiple Majors

Undergraduates pursuing a degree in the College of Business may complete additional majors in the College of Business. Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and agricultural business or economics is not permitted. A major in business economics with a minor in economics is not permitted.

Undergraduates with a primary major outside the College of Business who want a second major in business must meet the admission requirements for the professional program as well as complete the following requirements: Foundation, Supporting Courses, Business Core, and major requirements. (Refer to the current Curriculum Guide).

All students pursuing multiple majors or multiple degrees within the College of Business are required to have a minimum of 15 credits of coursework in each major that is not used in the other majors.

Students are limited to three business majors/ degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/ degrees/minors only, and does not apply to multiple majors/ degrees/minors taken outside the College of Business.

Curriculum Changes

Iowa State University students who want to change their curriculum to the College of Business must attend a curriculum change meeting. See Changing Curriculum or Major (p. 8) for more details on this process. Students on Academic Probation (p. 14) will not be allowed to change curriculum to the College of Business during enrollment period three. See Making Schedule Changes.

International Business Secondary Major

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor for Business Students

Students with a major in the College of Business may qualify for a minor specialization in one of the college’s departments by taking at least 15 credit hours in the minor specialization, nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students are limited to three business majors/ degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/ degrees/minors only, and does not apply to multiple majors/ degrees/minors taken outside the College of Business.

Minor for Non-Business Students

The College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are:

The College of Business participates in a cross-disciplinary minor in Entrepreneurial Studies. This minor is available to any undergraduate student. Requirements for the minor include MGMT 310 Entrepreneurship and Innovation, MGMT 313 Feasibility Analysis and Business Planning (6 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available in the Undergraduate Programs Office in the College of Business and on the web at http://www.business.iastate.edu/undergraduate/minors/entrepreneurship.

**Entrepreneurial Studies Cross-Disciplinary Minor**

The College of Business participates in cross-disciplinary minors in Entrepreneurial Studies. This minor is available to any undergraduate student. Requirements for the minor include MGMT 310 Entrepreneurship and Innovation, MGMT 313 Feasibility Analysis and Business Planning (6 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available in the Undergraduate Programs Office in the College of Business and on the web at http://www.business.iastate.edu/undergraduate/minors/entrepreneurship.

### Non-degree Seeking Students

Students who wish to take courses in the College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible to take up to 9 credits in 300-level and above business courses without meeting the college’s admission requirements.

### Upper Division Courses for Students Outside the College

Students from outside the College of Business are eligible to take up to 9 credits of 300-level and above business courses without meeting the college's admission requirements to the professional program, as long as they meet course prerequisites.

### Graduate Study

Three programs are offered at the master’s level: a master of business administration (M.B.A.) program, a master of accounting (M.Acc.), and a master of science in information systems (M.S.I.S.). These programs are intended to meet distinct sets of educational objectives.

The master of business administration (M.B.A.) is the professional management education program for those pursuing careers in business. The goal of the M.B.A. program is to educate future business leaders preparing them for the challenges of tomorrow by giving them the vision, knowledge, skills, and confidence to make the best decisions for all involved stakeholders. The M.B.A. program consists of a 48-credit curriculum leading to a non-thesis, non-creative component master of business administration. Students may pursue a specialization in accounting, finance, marketing, technology and innovation management, or supply chain management. The College of Business also offers a business administration minor to students with majors outside the college.

A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in aerospace, agricultural, civil, computer, electrical, industrial, or mechanical engineering. A concurrent B.S. or B.A./M.B.A is available to eligible Chemistry undergraduate students. A concurrent D.V.M./M.B.A. degree is available to eligible Veterinary Medicine students.

Double degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P.), information systems (M.B.A./M.S.I.S.), and statistics (M.B.A./M.S.-Statistics).

The master of accounting (M.Acc.) is designed to meet the needs of accountants in public or private accounting, focusing on interpreting and analyzing accounting information for decision-making. Additionally, the M.Acc. program is designed to help interested candidates meet the 150-hour education requirement for CPA certification in Iowa. The 30-hour program requires 15 hours of graduate accounting courses and 15 hours of non-accounting graduate electives including a communications course and an international topics course.

The master of science in information systems (M.S.I.S.) is designed to provide students with strong technical skills and a broad background in business needed to effectively develop and manage information systems projects. Using the latest software, students will apply information systems theory and concepts to modern information systems development. Program requirements range from 30-42 credits depending upon the student’s background. The M.S.I.S. curriculum includes business foundation courses, information systems core courses and electives, and a research requirement (creative component).

The College of Business participates in the following graduate level interdepartmental programs: Information Assurance, Human Computer Interaction, Seed Technology and Business, and Transportation.

### Ph.D in Business and Technology

The College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of three specializations—customer management (CM), supply chain management (SCM), or management information technology (MIT). Many departments in the college (Supply Chain and Information Systems, Marketing and Management), and the departments of Statistics, Economics, Psychology, and Sociology cooperate in providing coursework toward this degree. The program will prepare individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by 12 credit thesis or dissertation. Students do not need to have an undergraduate degree or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 credit hours of business foundation courses. For more details or application information see the Business Administration Department listing in this catalog.

### Curriculum in Business

The college offers programs of study leading to the degree bachelor of science with a major in accounting; finance; management information systems; marketing; supply chain management; or business economics. The college also offers a secondary major in international business. Total credits required: 122

See also: A 4-year (8 semester) plan of study for each business degree. ([https://nextcatalog.registrar.iastate.edu/planofstudy/business](https://nextcatalog.registrar.iastate.edu/planofstudy/business))

### Business Curriculum

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

#### International Perspective: 3 cr.

#### U.S. Diversity: 3 cr.

#### Communication:

Proficiency met with grade of C or better in 2 of 3 English courses

Total Credits: 21

All above core courses must be completed before MGMT 478 Strategic Management.

### Electives:

61 cr. must be non-business courses.

1. Acct, Fin, and Bus Econ majors will also take STAT 326 Introduction to Business Statistics II as part of the supporting courses. Bus Econ majors will take MATH 160 Survey of Calculus instead of 150, and ECON 207 Applied Economic Optimization instead of MATH 151 Calculus for Business and Social Sciences. See the Undergraduate Programs Office in the College of Business. Acct majors will take ACCT 301 The Accounting Cycle concurrent with ACCT 285 Managerial Accounting as part of the Supporting Courses. MIS majors will take MIS 207 Fundamentals of Computer Programming as part of the Supporting Courses.

2. Students not adequately prepared in mathematics may have to take remedial courses in addition to courses listed above. Remedial mathematics courses may not be used to satisfy credit requirements for graduation in the business curriculum.

3. Students without adequate computer background may take COM S 103 Computer Applications to satisfy the computer literacy requirement.

4. Students may satisfy the Global Perspectives requirement either by taking six credit hours from the University International Perspectives list, or three credit hours from the International Perspectives list and three credit hours from the College of Business Global Perspectives list. Approved list of courses is available on the web at http://www.business.iastate.edu/undergraduate/majors or from the Undergraduate Programs Office in the College of Business.

5. Courses used for the International Perspectives and U.S. Diversity requirements may also be used to fulfill other curriculum requirements or electives and therefore credits are not included in the sum needed.

### Professional Programs

The curriculum in accounting is accredited by AACSB International, the Association to Advance Collegiate Schools of Business, the international business accrediting agency.

One additional course from department approved list. 3

Total Credits: 18

#### Accounting
Undergraduate Study

For undergraduate curriculum in business, major in accounting.

The curriculum in accounting is accredited by AACSB International, the Association to Advance Collegiate Schools of Business, the international business accrediting agency.

The primary purpose of accounting is to provide relevant information to both internal users (management) and external users such as investors, creditors, government, and the general public. Accounting is an integral part of the management of business and public organizations. Accountants, therefore, participate in planning, evaluating, controlling, and reporting the activities of the firm. Accounting is needed by external users in order to make investment decisions, grant or withhold credit, and, in the case of government, to collect revenue and gather statistical information. In order to provide useful information, accountants collect, analyze, synthesize, and report data in an understandable manner.

The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with:

1. a mastery of basic accounting concepts
2. an ability to think critically and creatively about accounting problems
3. an ability to communicate effectively and work with others as a member of a team
4. an awareness and sensitivity for dealing with ethical concerns.

The major in accounting is designed to give students a conceptual foundation as well as to provide a wide range of basic skills and analytical tools for use in reporting for both public and private concerns. Students who complete the accounting major are well prepared to accept positions in industry, government, and the public accounting profession.

Graduate Study

The department offers a graduate degree, the masters of accounting (M.Acc). This is a 30-hour program requiring 15 hours of graduate coursework, ENGL 507 Writing and Analyzing Professional Documents or its equivalent, at least 9 hours of non-accounting graduate electives, and an international course from an approved list. Included in the 15 required hours of graduate accounting courses are two 3-credit required courses, ACCT 583 Advanced Managerial Accounting, and ACCT 598 Financial Accounting: Theory and Contemporary Issues.

The M.Acc. is appropriate for accounting undergraduate students wanting to pursue a variety of accounting careers. The M.Acc. program is an efficient way for qualified candidates to meet the 150-hour education requirement for CPA certification in Iowa. Students without an accounting degree will be required to complete a substantial amount of accounting coursework prior to being considered for admission to the M.Acc. Contact the coordinator of the M.Acc. program for details.

The department participates in the full-time and part-time Master of Business Administration (M.B.A.) program. The M.B.A. is a 48-credit non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in accounting. The specialization is designed to help meet the education requirement for CPA certification in Iowa.

The requirements for the accounting major are met by successful completion of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 383</td>

<td>International Accounting</td>
<td>3</td>
</tr>
</tbody>
</table>

See the CPA note below for the 150-hour education requirement for CPA certification in Iowa.

In addition, it is highly recommended that an accounting major include ACCT 316 Business Law. The Department of Accounting should be consulted for information on specific alternative plans of study.

The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, of which 9 credits need to stand alone.

CPA Note: The accounting major requires 22 credits of accounting beyond principles. Candidates for the CPA exam must complete at least two additional credit hours for a total of 24 hours of accounting beyond principles. Students may use the electives shown above or petition to take graduate courses to fulfill the additional two hours. ACCT 316 Business Law is also highly recommended; please note this class does not count towards the aforementioned 24 hours required to sit for the exam. While students may sit for the CPA exam in Iowa after completing the required accounting course work and earning a bachelors degree, in order to be certified or licensed to practice in Iowa, students must complete a total of 150 credits. Qualified students should consider taking the Masters of Accounting to satisfy the 150-credit requirement. Juniors and seniors in accounting who are interested in graduate study should contact the Coordinator of the M.Acc. Program as early as possible to complete their graduate degree in an efficient manner. Students planning certification outside Iowa should check local rules, as each state determines its own exam qualification and licensing requirements.

Courses

Courses primarily for undergraduates:

ACCT 215. Legal Environment of Business. (3-0) Cr. 3. F.S.SS. Prereq: Sophomore classification General history, structure, and principles of law. The legal system, as an agency of social control; good business practices, and tool for change. The court systems, Constitution, torts, contracts, administrative agencies, and agency law.

ACCT 284. Financial Accounting. (3-0) Cr. 3. F.S.SS. Prereq: not open to first term freshmen Introduction to the basic concepts and procedures of financial accounting from a user perspective. The course examines the accounting cycle, business terminology, basic control procedures, and the preparation and evaluation of financial reports, with an emphasis on financial statement analysis.

ACCT 285. Managerial Accounting. (3-0) Cr. 3. F.S.SS. Prereq: ACCT 284 Understanding of fixed and variable costs and their role in planning, control and performance evaluation. Examination of alternative costing methods. Making decisions by identifying and developing relevant information. Development of spreadsheet skills.

ACCT 301. The Accounting Cycle. (1-0) Cr. 1. F.S.SS. Prereq: ACCT 284 Interactive computer-based analysis of the accounting cycle including transactions and financial statements. Preparation of journal entries and adjusting entries and completion of the closing process. Nonmajor graduate credit.

ACCT 316. Business Law. (3-0) Cr. 3. F.S. Prereq: ACCT 215 Continuation of 215. Sales under the Uniform Commercial Code, negotiable instruments, secured transactions, property transactions, partnerships, and wills and estates.

ACCT 383. Intermediate Managerial Accounting. (3-0) Cr. 3. F.S. Prereq: ACCT 285 or ACCT 501 and ACCT 301 Generation, communication and use of information to assist management with planning, control, and decision making in manufacturing and service organizations. Includes cost concepts and relevance to decision situations, operational and capital budgeting, and performance evaluation. Emphasis on developing effective teamwork skills as well as spreadsheet capabilities.

ACCT 384. Accounting Information Systems. (3-0) Cr. 3. Prereq: ACCT 285 or ACCT 501; and ACCT 301 Analysis of concepts and procedures underlying the automated accumulation and processing of accounting data. EDP internal control and audit techniques. Trends in accounting information systems.
ACCT 386. Intermediate Accounting I. (3-0) Cr. 3. F.S. Prereq: ACCT 285 or ACCT 501 and ACCT 301

ACCT 387. Intermediate Accounting II. (3-0) Cr. 3. F.S. Prereq: ACCT 386

ACCT 483. Advanced Managerial Accounting. (Dual-listed with ACCT 583). Cr. 3. Prereq: ACCT 383 or ACCT 581
Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills. Nonmajor graduate credit.

ACCT 484. Advanced Accounting Information Systems. (Dual-listed with ACCT 584). (3-0) Cr. 3. Prereq: ACCT 384
Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in electronic environment. Nonmajor graduate credit.

ACCT 485. Principles of Federal Income Tax. (3-0) Cr. 3. F.S. Prereq: ACCT 386 or ACCT 501
Introduction to the fundamentals of federal income taxation and concepts applicable to all tax entities. Addresses issues related to the measurement and recognition of income, deductions, gains, and losses, taxation of property transactions, and basis cost recovery concepts. Includes coverage of tax law policy objectives, tax implications of business and investment decisions, tax versus financial reporting treatment of common business transactions, and ethical issues related to tax compliance and planning. Nonmajor graduate credit.

ACCT 487. Volunteer Income Tax Assistance. (Dual-listed with ACCT 587). (0-2) Cr. 1. Repeatable, maximum of 3 credits. S. Prereq: ACCT 285 or ACCT 501
Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 488. Governmental and Non-profit Institution Accounting. (Dual-listed with ACCT 588). (3-0) Cr. 3. Prereq: ACCT 387
Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored. Nonmajor graduate credit.

ACCT 495. Advanced Accounting Problems. (Dual-listed with ACCT 595). (3-0) Cr. 3. Prereq: ACCT 387
Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting. Nonmajor graduate credit.

ACCT 496. International Accounting. (Dual-listed with ACCT 596). (3-0) Cr. 3. Prereq: ACCT 386 or ACCT 501
Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed. Nonmajor graduate credit.

ACCT 497. Introduction to Auditing. (3-0) Cr. 3. F.S. Prereq: ACCT 384, ACCT 387 and STAT 326
The conceptual framework of auditing. Professional ethics, External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of statistical sampling in auditing. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduates:

ACCT 501. Financial Accounting. (3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission
A general introduction to financial accounting information. Topics covered include the use and analysis of financial information, the regulatory environment, the role of International Financial Reporting Standards (IFRS), and the use of the internet and electronic spreadsheets as a means of accessing and analyzing financial data.

ACCT 581. Accounting for Decision Making. (3-0) Cr. 3. Prereq: ACCT 501 or equivalent

ACCT 582. Corporate Governance and Top Management. (Cross-listed with MGMT). (3-0) Cr. 3. Prereq: MGMT 503 or permission
Duties, structure, and functioning of top management teams and corporate boards of directors. CEO/board tenure and succession planning, top management compensation, board committee composition, assessment of CEO and board performance, theories of corporate governance, management of the corporate strategic agenda, governance codes, international governance, and chairman/CEO duality. Case studies and contemporary issues discussed.

ACCT 583. Advanced Managerial Accounting. (Dual-listed with ACCT 483). Cr. 3. Prereq: ACCT 383 or ACCT 581
Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills. Nonmajor graduate credit.

ACCT 584. Advanced Accounting Information Systems. (Dual-listed with ACCT 484). (3-0) Cr. 3. Prereq: ACCT 384
Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in electronic environment. Nonmajor graduate credit.

ACCT 585. Taxes and Business Strategy. (3-0) Cr. 3. Prereq: ACCT 485
Integration of concepts from accounting, finance, and economics to determine how taxes affect business decisions. Provides students with a conceptual framework for thinking about business tax planning and applies it to various common business decisions.

ACCT 586. Advanced Federal Taxation. (3-0) Cr. 3. Prereq: ACCT 485
Advanced coverage of federal taxation including issues related to the taxation of corporations, partnerships, estates and trusts, and their owners. Includes coverage of rules, concepts, background, and planning opportunities related to a number of common transactions involving these entities.

ACCT 587. Volunteer Income Tax Assistance. (Dual-listed with ACCT 487). (0-2) Cr. 1. Repeatable, maximum of 3 credits. S. Prereq: ACCT 285 or ACCT 501
Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 588. Governmental and Non-profit Institution Accounting. (Dual-listed with ACCT 488). (3-0) Cr. 3. Prereq: ACCT 387
Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored. Nonmajor graduate credit.

ACCT 590. Special Topics. Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
For students wishing to do individual research in a particular area of accounting.

ACCT 591. Fraud Examination and Prevention. (3-0) Cr. 3. Prereq: ACCT 497 or ACCT 501
Principles and methodology of fraud detection and deterrence. Addresses the following: Causes and elements of fraud, costs to society, asset theft, financial statement representation, internal controls for fraud prevention, evidence gathering, and legal aspects of fraud.

ACCT 592. Financial Statement Analysis.
(3-0) Cr. 3. Prereq: ACCT 284 or ACCT 501
The presentation and analysis of financial statement information from the point of view of the primary users of such data: owners and creditors. Topics covered will include the financial reporting system, the primary financial statements, and effects of accounting method choice on reported financial data, and firm valuation.

(3-0) Cr. 3. Prereq: ACCT 387 or ACCT 592
Using financial statement analysis to value the firm. Topics covered include assessing how well a firm’s financial statements reflect the economic effects of its resource management strategies and constructing proforma financial information that will serve as inputs to valuation models.

ACCT 595. Advanced Accounting Problems.
(Dual-listed with ACCT 495). (3-0) Cr. 3. Prereq: ACCT 387
Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 596. International Accounting.
(Dual-listed with ACCT 496). (3-0) Cr. 3. Prereq: ACCT 386 or ACCT 501
Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 597. Advanced Auditing and Assurance Services.
(3-0) Cr. 3. Prereq: ACCT 497
A study of advanced auditing and assurance issues. Topics include risk analysis, internal control, fraud detection, analytical procedures, evaluating operational and strategic objectives, and reporting and implementing audit findings.

(3-0) Cr. 3. F. Prereq: ACCT 386 or ACCT 501

ACCT 599. Creative Component.
Cr. 2. Prereq: Admission to the Master of Accounting Program
This course prepares students to complete their creative component project option in the Master of Accounting degree.

Business Administration

Undergraduate Study
For undergraduate curriculum leading to the degree bachelor of science, majors in accounting, business economics, finance, management, management information systems, marketing, supply chain management and a secondary major in international business.

The department of Business Administration supports the undergraduate programs in the departments of Accounting, Finance, Management, Marketing, and Supply Chain and Information Systems, by providing specialized coursework in orientation to business, and cooperative education opportunities.

Graduate Study
The College of Business offers a professional graduate degree program in business administration, the master of business administration (MBA), which is described below. The college also has two specialized master degree programs: the master of accounting (M.Acc.), which is described under the Department of Accounting and the master of science in information systems (M.S.I.S.) which is described under Management Information Systems. The college also offers a Ph.D. in business and technology, with specialization in customer management (CM), supply chain management (SCM), or management of information technology (MIT). Many departments in the college (Supply Chain and Information Systems, Marketing and Management), and the departments of Statistics, Economics, Psychology and Sociology cooperate in providing coursework toward this degree. The program will prepare individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by a 12-credit thesis or dissertation.

Students do not need to have an undergraduate or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 hours of business foundation requirements. These include:

- Financial and managerial accounting (min. 2 Cr)
- Corporate finance (min. 2 Cr)
- Strategic management (min. 2 Cr)
- Management information systems (min. 2 Cr)
- Marketing (min. 2 Cr)
- Supply chain management (min. 2 Cr)
- Economics – micro and macro (min. 6 Cr)

Students can choose one of three areas of specialization—CM, SCM or MIT.

The master of business administration (M.B.A.) area will focus on identification and delivery of solutions that help improve the ways in which businesses attract, capture, service and maintain customers. To do these activities well, organizations will need to integrate process goals and activities across different functional areas and across multiple organizational partners. This area of study will examine issues relating to technology and innovation management, marketing, or supply chain management. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The M.B.A. is the professional management education program for those pursuing careers in business.

Students may enroll in the M.B.A. on either a full-time or part-time basis. The part-time M.B.A. is designed for employed professionals. Part-time MBA classes are held in the evenings in downtown Des Moines.

Students working toward the M.B.A. are required to complete a series of core courses in the basic functional areas of business (accounting, economics, quantitative analysis, finance, supply chain management, organizational behavior, management information systems, marketing, ethical and social corporate responsibilities, strategic management, and advanced elective coursework. Two courses on professional skills development are also required for full-time M.B.A. students.

Courses for the M.B.A. are provided by the departments of Accounting, Economics, Finance, Management, Marketing, and Supply Chain and Information Systems. Courses from other departments may also be chosen to meet specific student interests.

A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in aerospace, agricultural, civil, computer, electrical, industrial, or mechanical engineering. The College of Business and the College of Veterinary Medicine offer a concurrent M.B.A./D.V.M. degree.

Double master’s degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P.), information systems (M.B.A./M.S.I.S.) and Statistics (M.B.A./M.S.-Statistics).

The College of Business also offers a business administration minor to students with majors outside the college.

The M.B.A. program is open to all individuals with a baccalaureate degree. Undergraduates from arts and humanities, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit official transcripts of previous academic work, Graduate Management Admission Test (GMAT) scores, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores. Applicants are considered for fall semester entry only into the full-time M.B.A. Although applications will be considered after this date, candidates are encouraged to submit their application materials by June 1 (March 1 for international students). Part-time M.B.A. applications are considered for fall, spring, or summer entry.

Ph.D. in Business and Technology
The College of Business offers graduate work leading to the doctor of philosophy degree in business and technology, with one of three specializations—customer management (CM), supply chain management (SCM), or management of information technology (MIT). Many departments in the college (Supply Chain and Information Systems, Marketing and Management), and the departments of Statistics, Economics, Psychology and Sociology cooperate in providing coursework toward this degree. The program will prepare individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by a 12-credit thesis or dissertation.
inter-functional and inter-organizational relationships and their management in pursuit of maximizing the lifetime value of a business’s customer base.

The supply chain management (SCM) specialization will focus on the design, development, and control of business processes for conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems included as well. However, in today’s world, where competition is across supply chain networks, SCM, just like CM, will involve integrating business processes across firms.

The management of information technology (MIT) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the MIT specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

Programs of study for the doctoral study are designed for each student in consultation with the major professor and the student’s PhD committee. Each student must complete advanced courses in their area of specialization, a minor area that supports the major area, and research methods. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

Application deadline for the Ph.D. program is February 1 for fall admission. Applicants must submit official transcripts of previous educational coursework and degrees, the Graduate Management Admission Test (GMAT) scores, personal essays, resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

Courses

Courses primarily for undergraduates:

**BUSD 101. Orientation.**

(1-0) Cr. 0.5. F.S.

First 8 weeks. A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Offered on a satisfactory-fail basis only. Either BusAd 101 or 102 may be counted towards graduation.

**BUSD 101H. Orientation.**

(1-0) Cr. 0.5. F. Prereq: Membership in the Freshman Honors Program

Designed to supplement the Freshman Honors orientation (Hon 121) with college specific information, to facilitate the development of Honors programs of study in business, and to acquaint students with university policies and procedures. Offered on a satisfactory-fail basis only. Either BusAd 101 or 102 may be counted towards graduation.

**BUSD 102. Expanded Orientation.**

(1-0) Cr. 1. F.S.

A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. Offered on a satisfactory-fail basis only. Either BusAd 101 or 102 may be counted towards graduation.

**BUSD 150. Computer Competencies for Business.**

Cr. R.

Students will demonstrate proficiency in MS Word, Excel, and PowerPoint, as well as the ability to conduct research using the Internet, use WebCT, and communicate via e-mail. Self-paced instruction available for students who are unable to demonstrate appropriate proficiency. Offered on a satisfactory-fail basis only.

**BUSD 201. Career Issues in Business.**

(1-0) Cr. 0.5. F.S. Prereq: BUSAD 101

Eight-week course designed to provide students with knowledge of careers in business and issues relevant to any workplace. Presentations by business professionals, current students who have previously interned, and faculty and staff with knowledge of careers in the various majors. Includes coverage of diversity and ethics issues in the workplace. Offered on a satisfactory-fail basis only.

**BUSD 202. Professional Employment Preparation.**

(1-0) Cr. 0.5. Prereq: BUSAD 201

Eight-week course designed to provide students with the skills to develop and implement a professional job search and to function professionally in a workplace setting. Topics include resume and professional correspondence, interviewing, working a career fair, the comprehensive job search, evaluating offers, business etiquette, networking, and transitioning to employee. Offered on a satisfactory-fail basis only.

**BUSD 250. Introduction to Business.**

(3-0) Cr. 3. Prereq: BUSAD 150 or COM S 103

Introduction to the functional areas of business and how the functional areas are integrated for the purpose of implementing business strategy. Introduces students to decision making tools (spreadsheets and databases) that are integral to business decision making. Includes application exercises to all functional areas of business.

**BUSD 291. Experiential Learning.**

Cr. 1-3. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience

Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.

**BUSD 291A. Domestic Internship.**

Cr. 1-3. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience

Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.

**BUSD 291B. International Internship.**

Cr. 1-3. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience

Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.

**BUSD 291C. Domestic Travel and Study.**

Cr. 1-3. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience

Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.

**BUSD 291D. International Travel and Study.**

Cr. 1-3. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience

Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.

**BUSD 292. Entrepreneurship & Innovation Learning Community (EILC) Seminar.**

(1-0) Cr. 1. Prereq: Current member of or have applied to be a member of Entrepreneurship and Innovation Learning Community (see www.isuptcenter.org/ELC for more information)

Topics related to entrepreneurship and entrepreneurial thinking. Presentations by entrepreneurs and faculty, field trips, business concept development.

**BUSD 325. Biorenewable Systems.**

(Cross-listed with A E, AGRON, AN S, BSE, TSM, ECON). (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher

Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

**BUSD 398. Cooperative Education.**

Cr. R. Repeatable, maximum of 3 times. Prereq: Permission of department

Required of all cooperative students. Students must register for this course prior to commencing each work period. No more than three credits may be taken in addition to BusAd 398 during any given semester. Offered on a satisfactory-fail basis only.

**BUSD 490. Independent Study.**

Cr. 1-3. Repeatable. Prereq: BUSAD 490A: MGMT 414, MKT 448, LSCM 466 or FIN 380; senior classification, permission of instructor; for 490H: Admission to the Business Honors Program
BUSAD 480A. Independent Study: International Business.
Cr. 1-3. Repeatable. Prereq: MGMT 414, MKT 449, LSCM 466 or FIN 380; senior classification, permission of instructor

BUSAD 490E. Independent Study: Entrepreneurship.
Cr. 1-3. Repeatable. Prereq: senior classification, permission of instructor

BUSAD 490H. Independent Study: Honors.
Cr. 1-3. Repeatable. Prereq: Admission to the Business Honors Program

BUSAD 491. Professional Experiential Learning.
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience
Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 491A. Professional Experiential Learning: Domestic Internship.
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience
Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 491B. Professional Experiential Learning: International Internship.
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience
Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 491C. Professional Experiential Learning: Domestic Travel and Study.
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience
Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 491D. Professional Experiential Learning: International Travel and Study.
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience
Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 491E. Professional Experiential Learning: Other Experiential Learning Experience.
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience
Supervised travel and/or work experiences in a business related discipline.

BUSAD 492. The Washington Center Experience.
Cr. 6-12. Prereq: Professional program, written approval of supervising instructor and department chair on required form prior to the learning experience
Participation in The Washington Center seminar/internship program. Includes seminars/forums, work experience, and a portfolio of experiences.

Courses primarily for graduate students, open to qualified undergraduates:

(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Critical analysis of current practice and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission
Introduction to the sources and statistical analysis of data as well as optimization models for use in making business decisions. Data collection, descriptive and inferential statistics including hypothesis testing, analysis of variance, multiple regression, linear programming and simulation.

BUSAD 503. Information Systems.
(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Introduction to a broad variety of information systems (IS) topics, including current and emerging developments in information technology (IT), IT strategy in the context of corporate strategy, and IS planning and development of enterprise architectures. Cases and discussions highlight the techniques and tactics used by managers to cope with strategic issues within an increasingly technical competitive environment.

BUSAD 504. Marketing and Logistics.
(Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

BUSAD 507. Organizational Behavior.
(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

BUSAD 508. Accounting and Finance.
(Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

BUSAD 509. Seed Trade, Policy and Regulation.
(Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

BUSAD 533. Economic and Business Decision Tools.
(Cross-listed with ECON). (3-0) Cr. 3. Prereq: ECON 501 or ECON 532
Team taught by faculty in the Department of Economics and the College of Business, this course focuses on applied economic and business tools for decision making. The topics include: Monte Carlo analysis with applications to option pricing and insurance mechanism design, portfolio analysis using existing standard spreadsheet software and add-ons, dynamic programming tools for inventory management and sequential decisions, discrete choice modeling and statistical bootstrapping, and financial performance evaluation using commercially available software.

BUSAD 591. Professional Experiential Learning.
Cr. 1-3. Repeatable. Prereq: Graduate standing; written approval of supervising instructor and department chair on required form prior to the learning experience
Academically supervised travel and/or work experiences in a business related discipline.

BUSAD 592. MBA Professional Skills Development.
Cr. R. Prereq: Admission to Full-time MBA Program
Provides first-year MBA students with tools necessary to develop and implement a successful internship and career search, and to develop professional skills critical for success in the competitive business environment. Topics include career search strategy, resume and cover letter development, interviewing, strategic networking, salary negotiation, impression management, team skills development, presentation skills development, and business etiquette. Required for all full-time MBA students. Offered on a satisfactory-fail basis only.

BUSAD 594. MBA Professional Skills Development II.
Cr. R. Prereq: BUSAD 592
A second course designed to improve the professional skills of first-year MBA students. Emphasis on building effective communications and networking skills. Students will participate in professional workshops, company visits, executive speaker seminars, service learning projects, business case competitions, and related activities. Offered on a satisfactory-fail basis only.
In addition to the basic business requirements, finance majors must also complete:

BUSD 598. Cooperative Education.
Cr. R. Prereq: Permission of instructor. Professional work experience. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

BUSD 599. Creative Component.
Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair Preparation and writing of creative component.

BUSD 599A. Creative Component: Accounting.
Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair Preparation and writing of creative component.

BUSD 599C. Creative Component: Finance.
Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair Preparation and writing of creative component.

BUSD 599E. Creative Component: Management.
Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair Preparation and writing of creative component.

BUSD 599F. Creative Component: Marketing.
Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair Preparation and writing of creative component.

BUSD 599G. Creative Component: Agribusiness.
Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair Preparation and writing of creative component.

BUSD 599J. Creative Component: General Business.
Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair Preparation and writing of creative component.

Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair Preparation and writing of creative component.

BUSD 599M. Creative Component: Supply Chain Management.
Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair Preparation and writing of creative component.

Courses for graduate students:

BUSD 699. Research.
Cr. 3-6. Repeatable. F.S.SS. Prereq: Graduate classification, permission of major professor Research.

Finance

Undergraduate Study
For undergraduate curriculum in business, major in finance.
In addition to the basic business requirements, finance majors must also complete:

FIN 310 Corporate Finance 3
FIN 320 Investments 3
Select four from the following (two must be 400-level):
FIN 327 Fixed Income Securities
FIN 330 Financial Markets and Institutions
FIN 361 Personal Risk Management and Insurance
FIN 371 Real Estate Principles
FIN 415 Business Financing Decisions
FIN 424 Financial Futures and Options
FIN 425 Security Analysis and Portfolio Management
FIN 428 Advanced Fixed Income Analysis and Portfolio Management
FIN 435 Venture Capital, Private Equity, and Mergers and Acquisitions
FIN 445 Bank Management Decisions
FIN 462 Corporate Risk Management and Insurance
FIN 472 Real Estate Finance
FIN 480 International Finance

Select one from the following:
ACCT 383 Intermediate Managerial Accounting
ACCT 386 Intermediate Accounting I
ACCT 387 Intermediate Accounting II

or any 400 level course listed above.

* STAT 326 Introduction to Business Statistics II is highly recommended to be taken as a prerequisite

The courses in finance constitute a broad program of study designed to provide a descriptive, behavioral, and analytical background of financial management to enable students to qualify for opportunities in financial services, insurance, brokerage, government, real estate, and financial management of business enterprises. Finance is also an excellent area for those who wish to become more knowledgeable as consumers, particularly in the fields of investments, insurance, and real estate. Areas of study in the field of finance include corporate financial management, investments, portfolio management, insurance, real estate, bank, and risk management. Upper-level courses include a review of contemporary literature in the field, case studies, and financial problem analysis integrating finance courses previously taken.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such an education should provide the student with:
1. a mastery of basic financial concepts and methods of analysis
2. an understanding of financial operations in a global setting and of the role of financial institutions in the economy
3. an ability to effectively communicate and work with others as the finance member of a team
4. an ability to demonstrate leadership capabilities in financial analysis and portfolio management.

The department also offers a minor for non-finance majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand-alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study
The department participates in the full-time and part-time Master of Business Administration (M.B.A.) program. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in finance.

Courses

Courses primarily for undergraduates:

FIN 301. Principles of Finance.
(3-0) Cr. 3. F.S.SS. Prereq: ACCT 284, ECON 101, STAT 226
Introduction to financial management with emphasis on corporate financing and investment decision making, time value of money, asset valuation, capital budgeting decision methods, cash budgeting, and financial markets.

FIN 301. Corporate Finance.
(3-0) Cr. 3. F.S.SS. Prereq: FIN 301
Theory used in a firm’s investment and financing decisions. Analysis of environment in which financial decisions are made; applications of analytical techniques to financial management problems.

FIN 320. Investments.
(3-0) Cr. 3. F.S.SS. Prereq: FIN 301
Introduction to securities and markets from the viewpoint of the individual investor. Emphasis on mechanics of trading, measurement of return and risk, behavior of security prices, valuation of stocks and bonds, mutual funds, portfolio selection techniques, and performance evaluation.

FIN 327. Fixed Income Securities.
(3-0) Cr. 3. Prereq: FIN 301
Valuation of fixed income securities, including pricing conventions, term structure of interest rates, default, duration, and hedging of interest rate risk with derivatives. Analysis of bond market sectors, including treasury, agency, corporate, sovereign, municipal, and residential mortgage bonds. Nonmajor graduate credit.
(3-0) Cr. 3. F.S. Prereq: FIN 301
Introduction to the structure and operations of the United States financial system and its markets and institutions. Emphasis on developing an integrated understanding of markets and financial service providers including global linkages.

FIN 361. Personal Risk Management and Insurance.
(3-0) Cr. 3. F.S. Prereq: ECON 101
Risk concepts and the use of insurance by individuals and families. Emphasis on the insurance mechanism and methods of dealing with income, property, and liability risks.

FIN 371. Real Estate Principles.
(3-0) Cr. 3. SS. Prereq: ECON 101
Legal, economic, social and financial aspects of real estate, including property rights, contracts, mortgage instruments, tax factors, brokerage, valuation, risk and return analysis, financing techniques, and investments.

(3-0) Cr. 3. Prereq: FIN 301 and STAT 326
In depth study of the firm's external financing decision. Emphasis on the development of cash flow statements, projected financing needs and the selection of the appropriate financing instrument. Focus on case studies and application of developed techniques on actual field project. Nonmajor graduate credit.

FIN 424. Financial Futures and Options.
(3-0) Cr. 3. Prereq: FIN 320 and STAT 326
Advanced study of the pricing and use of derivative market instruments, current topics and issues. Nonmajor graduate credit.

(3-0) Cr. 3. F.S. Prereq: FIN 320, STAT 326 and permission of instructor
Advanced study of security analysis, security selection techniques and portfolio management. Emphasis on the applications of methods learned via the selection and evaluation of a portfolio of actual securities purchased in securities markets in the U.S. or abroad. Tracking and periodic reporting of the portfolio's performance relative to standard benchmarks is also required. Nonmajor graduate credit.

(3-0) Cr. 3. Prereq: FIN 327, FIN 320, STAT 326 and permission of the instructor
Advanced analysis of fixed income markets and securities, including valuation and trading of treasury securities, corporate bonds, mortgage backed securities. Analysis of structured financial securities, including CDO, CMBS, and ABS. Analysis of active and passive investment strategies for managing fixed income portfolios. Students are required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active bets taken on market direction, duration, yield curve, and credit spreads. Nonmajor graduate credit.

FIN 435. Venture Capital, Private Equity, and Mergers and Acquisitions.
(3-0) Cr. 3. S. Prereq: FIN 310, FIN 320, STAT 326, and permission of instructor
Analysis of active and passive investment strategies for managing fixed income portfolios. Students are required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active bets taken on market direction, duration, yield curve, and credit spreads. Nonmajor graduate credit.

(3-0) Cr. 3. F.S. Prereq: STAT 326 and FIN 330
Analysis of operations of depository financial institutions from management viewpoint. Emphasis on evaluating performance, policy formation, asset and liability management, the role of capital, and the operating environment. Nonmajor graduate credit.

FIN 462. Corporate Risk Management and Insurance.
(3-0) Cr. 3. F. Prereq: FIN 301 and STAT 326
Analysis of an organization's approaches to the management of price, credit, and pure risk. Emphasis on the consideration and selection of risk control and financing treatments and the decision making framework underlying the alternatives selected. Covers commercial insurance, self-insurance, and alternative financing arrangements. Nonmajor graduate credit.

FIN 472. Real Estate Finance.
(3-0) Cr. 3. Prereq: FIN 301 and STAT 326
Introduction to the techniques of assessing the value of real estate and real estate financing instruments. Nonmajor graduate credit.

FIN 480. International Finance.
(3-0) Cr. 3. F.S. Prereq: FIN 301 and STAT 326
Advanced study of currency market equilibrium, use and analysis of currency derivatives, hedging currency risk, and additional topics, which could include multinational capital budgeting, taxation, raising capital internationally, international portfolio diversification, international capital market equilibrium, political and country risk, financing international trade, multinational corporate treasury management, and current issues. Nonmajor graduate credit.

FIN 490. Independent Study.
Cr. 1-3. Repeatable. Prereq: FIN 301, STAT 326 and permission of instructor

FIN 499. Finance Internship.
(3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; STAT 326; FIN 499A; FIN 301; FIN 499B; FIN 361; FIN 499C; FIN 301 plus 3 additional credits in finance; FIN 499D; FIN 320; FIN 499E; FIN 310
Supervised experience in a private sector banking, insurance, real estate, investments or corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499A. Finance Internship: Banking.
(3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; STAT 326.
Supervised experience in a private sector banking, insurance, real estate, investments or corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499B. Insurance.
(3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; FIN 361 and STAT 326
Supervised experience in a private sector insurance organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499C. Real Estate.
(3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; FIN 301 plus 3 additional credits in finance and STAT 326; Supervised experience in a private sector real estate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499D. Investments.
(3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; FIN 320 and STAT 326
Supervised experience in a private sector investment organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499E. Corporate.
(3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; FIN 310 and STAT 326
Supervised experience in a private sector corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission.
Shareholder wealth maximization as the goal of the firm within a social responsibility context, financial Math, valuation of securities, the global financial market place as the test of value, estimation of cost of capital, global capital investment decisions, capital structure policy, working capital management.

FIN 510. Advanced Corporate Finance.
(3-0) Cr. 3. Prereq: FIN 501
Examines corporate financial decisions, including theory and associated empirical evidence. Topics include agency conflicts, corporate governance, executive compensation, becoming publicly traded, raising capital through public and private offerings, capital structure, financial distress and bankruptcy, leasing, dividend policy, corporate control, restructuring, and risk management.

(3-0) Cr. 3. Prereq: FIN 501
This course focuses on case studies to develop an integrated set of financial decisions. Topic areas include fixed asset, working capital, capital structure, dividend and merger/acquisition decisions. The objective of the course is to examine different firm settings and establish a framework within which to apply financial tools.
FIN 520. Investments.
(3-0) Cr. 3. Prereq: FIN 501
Analysis of risk and return for individual securities and portfolios of securities. Topics include the market environment, mechanics of trading, measurement of return and risk, valuation of stocks and bonds, mutual funds, optimal asset allocation, market efficiency, portfolio performance evaluation, and risk management.

FIN 534. Financial Derivatives.
(3-0) Cr. 3. F. Prereq: Graduate classification
An applied course in derivative markets. Topics covered include futures and options markets, option pricing, swaps, use and rating of insurance products, and alternative forms of reinsurance. Emphasis will be placed on agricultural commodity markets, but energy, interest, currency and stock index contracts will also be covered.

FIN 535. Venture Capital, Private Equity, and Mergers and Acquisitions.
(3-0) Cr. 3. Prereq: FIN 501
Advanced investments class focusing on alternative investments. Topics include the nature and scope of investment banking, techniques for valuing public and private firms, venture capital finance, private equity finance, leveraged buyouts, hedge funds, the structure and financing of mergers and acquisitions, and divestitures.

FIN 572. Real Estate Finance.
(3-0) Cr. 3. Prereq: MBA Core
Survey of techniques for assessing the value of real estate assets. Introduction to real estate financing instruments, their use and appropriateness.

FIN 590. Special Topics.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
For students wishing to do individual research in a particular area of finance.

International Business

Interdepartmental Undergraduate Secondary Major
The international business program is designed to provide students with an understanding of the international business environment. Students are expected to develop an understanding of issues associated with international business, as applied to the different functional areas of business. They will also develop skills to prepare themselves for business positions with international responsibilities.

International Business is an undergraduate secondary major that may be taken only in conjunction with a primary major in business. Technical knowledge of international business will strengthen the expertise acquired with the primary major. Business students pursuing this program should strengthen their placement opportunities with companies that are engaged in international business and trade.

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum of 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major must not be used for the primary major.

Management

Undergraduate Study
For undergraduate curriculum in business, major in management.

The Department of Management offers a major in management. Students will complete the general education requirements (including business foundation courses), and business core requirements for the bachelor of science (B.S.) degree and 18 credits in the major. The instructional objective of the Department of Management is to provide students with knowledge of organizations and management functions within organizations. Management majors will demonstrate an understanding of (1) employee work-related attitudes and behaviors, (2) competitive strategy and advantage, (3) challenges and strategies in international business, and (4) human resource management practices in firms. Students will demonstrate an awareness of the role of diversity, ethics, and technology in business decisions, the impact of external forces and global issues on organizations, and an ability to think critically, to communicate effectively, and to work effectively as a member of a team. Management is a broadly defined discipline and activity, which is neither industry nor function specific. Management concepts, theories, techniques, and skills are applicable to all business functional areas and are essential components for successful organizations. Management requires sound conceptual, technical, and human skills for the effective utilization of organizational resources. In addition to the basic foundation requirements, core courses, management majors are required to complete 18 credits of management or department approved courses. Included in these 18 credits are four required courses:

- MGMT 371 Organizational Behavior 3
- MGMT 377 Competitive Strategy 3
- MGMT 414 International Management 3
- MGMT 471 Personnel and Human Resource Management 3

Graduate Study

The Department of Management participates in the full-time and part-time Master of Business Administration (M.B.A.) and in the Ph.D. in Business and Technology. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. The Ph.D. program is a 56-credit curriculum (minimum) that culminates in a dissertation.

Courses

Courses primarily for undergraduates:

- MGMT 310. Entrepreneurship and Innovation.
  (3-0) Cr. 3. F.S. Prereq: Sophomore classification
  Review of the entrepreneurial process with emphasis on starting a new business. How to analyze opportunities, develop an innovative product, organize, finance, market, launch, and manage a new venture. Deals with the role of the entrepreneur and the importance of a business plan. Speakers and field project.

- MGMT 313. Feasibility Analysis and Business Planning.
  (3-0) Cr. 3. F.S. Prereq: MGMT 310
  Developing an idea for a new business venture, conducting a feasibility study, researching the potential market, analyzing the competition, and writing a formal business plan. Basic business functions are discussed in terms of their application to conducting feasibility analysis and writing a business plan for an entrepreneurial venture.

  (3-0) Cr. 3. Prereq: junior standing
  The essentials of operating an entrepreneurial firm in an international environment. Topics include understanding the role of entrepreneurship in economic development, starting and developing a business in an international market, financing international ventures, international management issues and exchange rates. Meets International Perspectives Requirement.

  (3-0) Cr. 3. F.S.SS. Prereq: ECON 101 or ECON 102 or equivalent
  A management functions approach is used to explain what managers do in organizations; how they deal with external constituents, how they structure their companies, and how they deal with employees. A contingency approach is used as a framework for understanding how to increase the effectiveness and efficiency of organizations in today’s dynamic, highly competitive business environment.
MGMT 371. Organizational Behavior.  
(3-0) Cr. 3. F.S. Prereq: MGMT 370  
The study of individual attributes, interpersonal relations, and employee attitudes in organizations. Instructional emphasis is placed on how management concepts such as reward systems, job design, leadership, teams, etc., can be used to manage employee attitudes and behavior.

(3-0) Cr. 3. F. Prereq: MGMT 370  
Developing competitive strategy and achieving competitive advantage in firms, including: industry analysis, generic strategies, hypercompetition, competing against time, and building distinctive capabilities.

MGMT 410. Social Entrepreneurship.  
(3-0) Cr. 3. F.S. Prereq: Sophomore classification  
This course will introduce students to issues related to the role of social entrepreneurship in helping to solve social problems, including innovation, opportunity recognition, planning and the launch of new non-profit organizations.

MGMT 414. International Management.  
(3-0) Cr. 3. F.S.  
The nature and economic role of the multinational firm and entrepreneurial ventures, including the impact of legal, political, and cultural variables upon firm performance and managerial activity; case studies illustrate interdependent nature of functional areas of business projected across national boundaries. Nonmajor graduate credit.

(3-0) Cr. 3. F.S. Prereq: MGMT 370; MKT 340; FIN 301; SCM 301  
Examination of business problems and issues in new and growing firms. Emphasis is on analyzing existing businesses. Includes a field project. Nonmajor graduate credit.

MGMT 419. Social Responsibility of Business.  
(3-0) Cr. 3. S.  
A consideration of the role of business in society. Critical analysis of ethical, managerial, and public issues as they affect the corporation.

(3-0) Cr. 3. F.S. Prereq: Junior standing  
Recruitment and selection, utilization, and development of people in organizations. Examination of each personnel function; interrelationships among the functions.

(3-0) Cr. 3. F.S. Prereq: Junior classification  
One of the most crucial problems in organizations today is the management of diversity. Attempts to define the difference between equal employment opportunity/affirmative action, which has a legal basis, and diversity which has an educational basis. Organized around the concepts of: (1) cultural diversity and cultural unity; (2) development of skills and tools to manage diversity; and (3) structure of diversity development programs in organizations. Nonmajor graduate credit. Meets U.S. Diversity Requirement.

MGMT 478. Strategic Management.  
(3-0) Cr. 3. F.S.SS. Prereq: MGMT 370; ACCT 285; FIN 301; MKT 340; SCM 301; graduating senior  
Strategy formulation, implementation, and evaluation and control in today’s organizations. Emphasis is on strategic planning and decision making using the case method and/or projects.

MGMT 490. Independent Study.  
Cr. 1-3. Repeatable. Prereq: MGMT 370, senior classification, permission of instructor

Courses primarily for graduate students, open to qualified undergraduates:

MGMT 502. Organizational Behavior.  
(3-0) Cr. 3. F. Prereq: Enrollment in MBA program or departmental permission  
Understanding human behavior in organizations and the nature of sustainable organizations from a managerial perspective. Special emphasis is placed on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

MGMT 503. Professional Responsibility in Business and Society.  
(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission, ACCT 501, FIN 501, MGMT 502, MKT 501  
Ethical and social responsibilities of top managers in corporations. Topics include stakeholder management, corporate social responsibilities, strategies for sustainable development, pursuit of societal and corporate goals, board and chief executive leadership roles, governance, reform, and ethics, and executive leadership style and values. The presentation of course concepts is facilitated by the use of cases, discussion scenarios, and ethical dilemmas.

MGMT 504. Strategic Management.  
(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission, ACCT 501, FIN 501, MGMT 502, MKT 501  
Critical analysis of case studies in strategic management with an emphasis on integrative decision making. Strategy implementation in light of the global, legal, economic, cultural, and political contexts of business.

MGMT 556. Early Stage Entrepreneurship - Mind to Market.  
(3-0) Cr. 3. Prereq: Graduate classification  
Commercialization of new technology. Topics covered include market analysis, intellectual property, product development, feasibility analysis, and new business evaluation.

MGMT 566. Entrepreneurship and New Business Creation.  
(3-0) Cr. 3. Prereq: Graduate classification or permission of instructor  
The essentials of starting and operating a new business. Topics include current research on entrepreneurial perspective, starting and developing a new business, financing the venture, managing the growing firm, and special issues.

(3-0) Cr. 3.  
Essentials of operating an entrepreneurial firm in an international environment. Topics include international entrepreneurship, starting and developing a business in an international market, financing international ventures, international management issues, exchange rates, and culture.

MGMT 569. Technology Entrepreneurship.  
(3-0) Cr. 3. Prereq: Graduate standing or instructor’s permission  
Identification of high-potential, technology-intensive commercial opportunities, resources? gathering, and risk management under environmental uncertainty. Focus on technology ventures and firms that use technology strategically across several industries. Topics include key success factors and forecasting analysis across main value-chain activities.

MGMT 570. Managing Employee Attitudes and Behaviors.  
(3-0) Cr. 3. F.S. Prereq: MGMT 371 or MGMT 502 or PSYCH 450  
Advanced topics germane to the management of individuals and groups over their work lives; sustained work commitment, motivation and job/career satisfaction, absenteeism, turnover, stress, leadership and career development (e.g., career ladders, mentoring).

MGMT 571. Seminar in Personnel and Human Resources Management.  
(3-0) Cr. 3. S. Prereq: MGMT 371 or MGMT 502 or SOC 420  
Topics and issues in personnel management with a focus on the management of human resources in organizations. Current personnel practices, philosophies, and behavioral science research.

MGMT 572. Personality and Management.  
(3-0) Cr. 3. Prereq: Graduate standing or permission of instructor  
Personality and individual differences have significant implications for human resource management, organizational behavior and strategic management. Research has shown that these characteristics affect many core management topics including motivation, leadership, and decision making. Surveys the literature relating personality and individual differences to management and organizations. Students will complete a wide variety of personality assessments and get their results, and reflect on how personality and individual differences can be practically relevant in the modern work environment.

(3-0) Cr. 3. F. Prereq: MGMT 504 or permission of instructor  
Discussion of concepts and techniques used in long range strategic planning. Examination of planning practices in business and not-for-profit organizations. Topics include environmental scanning, industry analysis, forecasting, corporate and competitive strategies, and tactics.
MGMT 502. Corporate Governance and Top Management. 
(Cross-listed with ACCT, (3-0) Cr. 3. Prereq: MGMT 503 or permission 
Duties, structure, and functioning of top management teams and corporate 
boards of directors. CEO/board tenure and succession planning, top management 
compensation, board committee composition, assessment of CEO and board 
performance, theories of corporate governance, management of the corporate 
strategic agenda, governance codes, international governance, and chairman/CEO 
duality. Case studies and contemporary issues discussed.

MGMT 583. Strategic Management of Innovation. 
(3-0) Cr. 3. Prereq: MGMT 504 or permission of instructor 
Critical analysis and discussion of cases focused on strategic management of 
innovation. Assessment of a firm’s innovative capabilities and competitive dynamics 
to manage innovative processes. Practical applications through emphasis on 
implementation including internal corporate venturing, management of the corporate 
R&D function, and institutionalization of innovation.

MGMT 584. Management Consulting. 
(3-0) Cr. 3. Prereq: MGMT 504 or permission of instructor 
Provides the opportunity for students to understand the role of the professional 
consultant, the issues facing the management consulting industry, the competencies 
of various management consultants, the nature and form of strategic consulting 
engagement, and the nature and scope of strategic change in business firms. 
Students will learn about management consulting functions and will practice the 
consultant role though cases and field studies.

MGMT 590. Special Topics. 
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor 
For students wishing to do individual research in a particular area of management.

Courses for graduate students:

MGMT 601. Philosophy of Science. 
(3-0) Cr. 3. Prereq: enrollment in the PhD program 
This course provides a philosophical introduction to the theoretical and empirical 
development of scientific knowledge. It focuses on a variety of basic problems 
common to the social sciences: the nature of explanation, the structure of theories, 
forms of knowledge, scientific laws, nature of theory and ethics. The purpose of the 
course is to help doctoral students define a research context by addressing the 
purposes, assumptions and primary components of scientific inquiry.

MGMT 602. Organizational Theory. 
(3-0) Cr. 3. Prereq: enrollment in the PhD program 
This seminar involves the examination of the core theories and perspectives in 
organizational theory, as well as their applications and extensions. This material 
addresses the fundamental rationale for organizations in modern society, basic 
processes of organizing and organizational structure, a consideration of inter-
organizational relationships and the external environment, and a variety of factors 
that help determine organizational effectiveness.

MGMT 603. Strategic Management of Technology and Innovation. 
(3-0) Cr. 3. Prereq: MGMT 601 
This course will offer a critical review of organizational decision making with respect 
to technology and innovation. Students will learn how technological change can alter 
the basis of competition; how competitive strategy drives technology investment 
decisions; how market-orientation should be the other backbone of technological 
innovation; and best practices of organizing and managing the new product 
development process to achieve strategic goals.

MGMT 604. Seminar in Organizational Behavior. 
(3-0) Cr. 3. Prereq: enrollment in the PhD program 
The purpose of this seminar is to introduce behavioral science literature relevant 
to the study of behavior in organizational settings. The course will focus on the 
individual’s role within organizations and cover topics such as individual differences, 
motivation, leadership, decision-making. Learning, risk taking, interpersonal relations, 
etc. Both theoretical and empirical contributions will be examined, with emphasis on 
integration of diverse theoretical perspectives.

MGMT 630. Research Practicum I. 
(1-0) Cr. 1. Prereq: enrollment in the PhD program 
Preparation of a research manuscript to be submitted to a peer-reviewed academic 
journal. Students will work with a faculty mentor on a research project.

MGMT 651. Research Practicum. 
(1-0) Cr. 1. Prereq: enrollment in the PhD program 
Preparation of a second research manuscript to be submitted to a peer-reviewed 
academic journal. Although students work under the supervision of a faculty mentor, 
the students will take independent responsibility for the research project.

Cr. 1-12. Prereq: Graduate classification, permission of dissertation supervisor 
Research.

Management Information Systems

Administered by the Department of Supply Chain and Information Systems

Undergraduate Study

For undergraduate curriculum in business, major in management information systems (MIS).

The MIS Program is designed to provide students with a strong educational foundation that prepares them as information system (IS) or information technology (IT) professionals. The academic program consists of a specialized curriculum that emphasizes technical, conceptual, analytical, interpersonal, and managerial skills necessary for envisioning, designing, implementing, and supporting information systems for organizations in the globally networked environment. The program offers students comprehensive technical and managerial training on developing, using, and managing information systems and information technology to provide effective information services to organizations of various sizes and types. The program will: impart knowledge of existing and emerging information technologies and their impact on information systems functions; train to critically analyze business processes, identify inefficiencies and problems, assess information requirements, create business solutions and technical specifications; provide expertise in the latest networking and Internet-based technologies; develop interpersonal and communication skills to effectively interact with various business and technical clients; and provide managerial skills to manage information systems related projects.

The MIS major requires students to take 18 credit hours in the management information systems area, including 12 credit hours of required core courses and 6 credit hours of electives. The required core courses are:

MIS 331 Intermediate Business Programming 3
MIS 432 Information Systems Analysis 3
MIS 433 Database Management Systems 3
MIS 437 Project Management 3

The remaining 6 credits can be taken from the department approved electives, preferably with the specified clusters that focus on specific IT job related knowledge and skills (application development, IT infrastructure and security, business analytics, and supply chain technology). Students are encouraged to take electives that cover multiple clusters to enhance marketability and career flexibility.

The department also offers a minor for non-Management information Systems majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. The 15 credits must include MIS 330 Management Information Systems. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Department of Supply Chain and Information Systems participates in the M.S. in Information Systems (M.S.I.S), the full-time and part-time Master of Business Administration (M.B.A.) and the Ph.D. in Business and Technology programs. The department also participates in an interdepartmental M.S. in Information Assurance as well as in a master’s and Ph.D. program in Human Computer Interaction.

The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core business courses and the remaining 18 credits are graduate electives. Students may obtain a specialization in technology and innovation management within the M.B.A. program.

The M.S.I.S. is a 30-credit (minimum) curriculum designed around three interrelated areas – business foundation, IS core, and electives. All students are expected to be familiar with basic computing skills before entering the program. The M.S.I.S. program will educate students on applying IS theory and concepts to modern IS development through classes that enable them to learn and use the latest software in application projects. Students graduating from the program will have advanced technical and managerial skills to develop and manage information systems projects.

The Ph.D. in Business and Technology is a 56-credit curriculum (minimum) which includes a 12-credit dissertation designed around four interrelated areas—core, specialization, minor, and research methods—and the dissertation. The Management of Information Technology (MIT) specialization examines issues related to the development, building, management, and use of information and knowledge-based
Courses

Courses primarily for undergraduates:

MIS 207. Fundamentals of Computer Programming. (Cross-listed with COM S). (3-1) Cr. 3. F.S. Prereq: MATH 150 or placement into MATH 140/MATH 141/MATH 142 or higher
An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. Exceptions/error-handling. This course is not designed for computer science, software engineering, and computer engineering majors. Credit may not be applied toward graduation for both Com S 207/MIS 207 and Com S 227.

MIS 330. Management Information Systems. (3-0) Cr. 3. Prereq: COM S 103 or BUSAD 150
The role of information technology in organizations. Overview of methodologies for design and development of systems including decision support systems, expert systems, data bases, end-user computing, etc. Computer applications relate concepts to practice. Lecture and laboratory work emphasizes the enabling role of IT in contemporary organizations.

MIS 331. Intermediate Business Programming. (3-0) Cr. 3. Prereq: MIS 207/COM S 207 or Com S 227
Introduction to the concepts and use of data structures, file accesses and object oriented programming methodologies in contemporary business environments. Application development environments will be covered.

MIS 341. Advanced Business Programming. (3-0) Cr. 3. Prereq: MIS 331
Advanced software development and topics in contemporary programming languages. Topics include basic syntax, advanced programming techniques, file structures and management, database access, algorithm design, web forms and graphical user interfaces.

MIS 432. Information Systems Analysis. (3-0) Cr. 3. Prereq: MIS 330
Critical analysis of business processes, data and process modeling, feasibility studies, CASE tools, and developing system design specifications. Nonmajor graduate credit.

MIS 433. Database Management Systems. (3-0) Cr. 3. Prereq: Credit or enrollment in MIS 331
Database design, development, and implementation. Focus on data models, both classical and object oriented. Uses relational and/or object oriented database management systems. Nonmajor graduate credit.

MIS 434. Electronic Commerce Strategy. (3-0) Cr. 3. Prereq: MIS 330, MKT 340, SCM 301
Overview of business strategies and technologies used for electronic commerce. Emphasis is on the strategic, operational, and technical issues associated with global electronic commerce using class lecture/discussion and case studies. Nonmajor graduate credit.

MIS 435. Information Systems Infrastructure. (3-0) Cr. 3. Prereq: MIS 330
Overview of Internet and telecommunications technology used in business applications. Understand Internet and network protocols, network and application architectures, design, and implementation. Nonmajor graduate credit.

MIS 436. Introduction to Business Analytics. (3-0) Cr. 3. Prereq: STAT 226 and MIS 433 or permission of the instructor
Introduction to the field of business analytics (BA). Students will examine BA processes and techniques used in transforming data to knowledge and creating value for organizations. Business cases, presentations by business professionals, class lectures and discussions on data analysis, design and modeling, and extensive hands-on analytical exercises. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduates:

MIS 437. Project Management. (Cross-listed with SCM). (3-0) Cr. 3.
Equips students to support team activities in the general project management environment and better manage their careers. Practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods. Nonmajor graduate credit.

MIS 438. Information Systems Development. (3-0) Cr. 3. Prereq: MIS 432, MIS 433, credit or enrollment in MIS 435
Design of business systems using contemporary tools and methods such as SQL, CASE tools, OOD tools, etc. Focuses on synthesizing concepts from earlier MIS courses. Nonmajor graduate credit.

MIS 439. Topics in Management of Information Systems. (3-0) Cr. 3. Repeatable. Prereq: MIS 330, permission of instructor
A variety of topics will be covered and topics may vary between semesters. Some of the topics are information resources management, electronic commerce, decision support systems, and expert systems.

MIS 440. Supply Chain Information Systems. (Cross-listed with SCM). (3-0) Cr. 3. Prereq: MIS 330, SCM 301
Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include: design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

MIS 445. Enterprise Systems and Architecture. (3-0) Cr. 3. Prereq: MIS 435
Contemporary theories, concepts, and practices in network infrastructure, network design, and information security. Design, install, and administer a complex network infrastructure. Study security threats and attacks and countermeasures. Investigate exposure to attacks, firewalls, and development of intrusion detection systems. Other security topics such as risk management, IT audit, and security regulations will also be addressed.

MIS 446. Advanced Business Analytics. (3-0) Cr. 3. Prereq: MIS 436
Projects-based course which provides an in-depth understanding of BA methods of visualization, data mining, text mining, web-mining, and predictions through the use of specific BA tools. For students who are interested in understanding advanced techniques and applications of data analytics and acquiring hands-on skills for making intelligent business decisions in data-rich organizations. Nonmajor graduate credit.

MIS 450. Enterprise Resource Planning Systems in Supply Chain. (Cross-listed with SCM). (3-0) Cr. 3. Prereq: SCM 301, MIS 330 or I E 148; I E 341
Examination of the role of enterprise resource planning systems (ERP) in the supply chain. Hands-on experience with a major software application in use by many corporations to manage and improve the efficiency of their supply chains and operations. Students will develop a more process-centric perspective about how a supply chain operates and how ERP enables and supports such operations. Nonmajor graduate credit.

MIS 501. Management Information Systems. (3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission
This course exposes the student to current theories and practices appropriate for understanding the role and application of information systems for individuals, organizations, and society within a globally competitive context. The course focuses on information technology and its uses in improving work practices, products, and tools for individuals and organizations. The course also addresses issues pertaining to current and emerging topics in the development and use of technology, the role of technology in and its alignment with organizational strategy and sustainable business practices, information system planning and the development of enterprise architectures, and human interface and personal characteristics in the design and use of technology.
(3-0) Cr. 3. Prereq: MIS 531 or equivalent
A survey of business-oriented programming languages with emphasis on state-of-the-art development techniques for business software. Topics include object-oriented and Internet programming issues and methods.

MIS 533. Data Management for Decision Makers.
(3-0) Cr. 3. Prereq: MIS 501
Addresses data needs of functions such as marketing, finance, and production. Advanced skills needed to design, develop and use database, data warehousing and data mining systems for effective decision support. Emphasis on importance of contemporary technologies.

MIS 534. Electronic Commerce.
(3-0) Cr. 3. Prereq: MIS 501
Overview of how modern communication technologies including the internet and world wide web have revolutionized the way we do business. Provides an understanding of various internet technologies and how companies are using the internet for commercial purposes. Explores future scenarios on the use of these technologies and their impact on various industries and the society.

MIS 535. Telecommunications Management.
(3-0) Cr. 3. Prereq: MIS 501
Issues involved in the management of telecommunications function. Overview of communications technology used in various business applications, local area network, wide area network, broad band network, wireless and voice networks. Internet technologies and protocols. Analyzing the strategic impact of these technologies on organizations. Strategic planning for telecommunications, including network planning and analysis.

MIS 537. Project Management.
(3-0) Cr. 3. Prereq: MIS 501
Prepares students to support team activities in the general project management environment and provides them with a working understanding of the full scope of project management activities. Students will also have practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods. The course follows the recommended content areas of the Project Management Institute, and provides students with a recognized foundational training in project management.

(3-0) Cr. 3. Prereq: MIS 501
Examine current and historical perspectives on business process management. Topics include process identification, mapping, and improvement. Additional topics will address business process automation and integration, business process outsourcing. Investigate current and potential tools and methods for business process management. Include process management projects.

MIS 539. Topics in Management of Information Systems.
(3-0) Cr. 3. Repeatable. Prereq: MIS 501
A variety of topics may be offered in different semesters. Topics may include electronic commerce, information resources management, decision support systems, and expert systems.

MIS 590. Special Topics.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
For students wishing to do individual research in a particular area of MIS.

MIS 598. Research Seminar in Management Information Systems.
(3-0) Cr. 3. Prereq: Graduate classification
Examines issues such as the nature and content of information systems research; aspects of starting and pursuing research topics in information systems; exploring and understanding relevant research methods and tools. Develop preliminary research proposals.

MIS 599. Creative Component.
Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair
Preparation and writing of creative component.

Courses for graduate students:

(3-0) Cr. 3. Prereq: MIS 501 or equivalent, enrollment in PhD program
The state of behavioral research in the IS function. MIS activities in an organization span the following three major areas: design and implementation of the MIS, use of the MIS, and management of the MIS function. Each of these processes is carried out at several levels: individual, group, organizational and inter-organizational. Identify behavioral issues of relevance for the cells defined by the process and level dimensions. Reading and discussion of the research literature surrounding the development, use, and implications of information technology.

(3-0) Cr. 3. Prereq: MIS 501 or equivalent, enrollment in PhD program
Three fundamental areas of Information Systems, namely, infrastructure, management, and processes. Infrastructure studies examine the IT architecture including computing, communication, data, and application. Management focuses on addressing the value added notion of IT. Finally processing addresses topics related to enabling role of IT in myriad of areas.

MIS 603. Seminar on IT Strategy and Structure.
(3-0) Cr. 3. Prereq: MIS 601
Strategic issues in IT management. Address issues such as aligning IT strategy with corporate strategy and functional strategies, IT structure, valuation, governance and control, and related topics. Provide students with research skills related to the boundary between IT and the firm’s external environment.

MIS 604. Collaboration, Knowledge, and Intelligence in Organizations.
(3-0) Cr. 3. Prereq: MIS 601
Research issues in the emerging areas of collaboration, knowledge management, and enterprise intelligence. Topics will include emerging and contemporary technologies of Data Mining, Knowledge Discovery from Databases, Web Mining, organizational memory, and knowledge management.

MIS 650. Research Practicum I.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MIS 651. Research Practicum II.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

(Cross-listed with HCI). (3-0) Cr. 3. Prereq: Graduate classification
Examine opportunities and implications of information technologies and human computer interaction on social and organizational systems. Explore ethical and social issues appurtenant to human computer interaction, both from a prescriptive and descriptive perspective. Develop informed perspective on human computer interaction. Implications on research and development programs.

MIS 699. Research.
Cr. 3-6. Repeatable. Prereq: Graduate classification, permission of dissertation supervisor
Research.

Marketing

Undergraduate Study

For undergraduate curriculum in business, major in marketing. The Department of Marketing offers a major in marketing. Students will complete the general education requirements (including business foundation courses), and business core requirements for the bachelor of science (B.S.) degree and 18 credits in the major.

Marketing is concerned with management decisions that deal with the satisfaction of customer needs and wants in the purchase and use of goods and services. The primary decision areas in marketing involve the identification of market segments and decisions dealing with product design, pricing, promotion (including personal selling and marketing communications), and distribution. A major in marketing prepares the student for careers in selling and sales management, marketing research, marketing management, retail management, marketing communications, promotion management, and/or international marketing. Each area of study may be applied.
to consumer, business-to-business, and/or services marketing environments in business and nonprofit organizations.

The instructional objective of the Marketing department is to provide knowledge of the marketing process and an understanding of its functions. The students are expected to develop decision-making skills, computational skills, and communication skills with appreciation for global marketplace and ethical concerns. In addition to the basic business foundation and core courses, marketing majors are required to complete 18 credits of marketing or department approved courses. Included in these 18 credits are three required courses:

- **MKT 443** Strategic Marketing Management (3)
- **MKT 444** Marketing Research (3)
- **MKT 447** Consumer Behavior (3)

The department also offers a minor for non-Marketing majors in the College of Business. The minor required 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

### Graduate Study

The Department of Marketing participates in the full-time and part-time Master of Business Administration (M.B.A.) and the Ph.D. in Business and Technology. The M.B.A. program is a 48-credit, nonthesis, noncreative-component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in marketing.

The Ph.D. in Business and Technology with a Customer Management (CM) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas—core, specialization, minor, and research methods—and dissertation. The focus of the CM specialization is on customer management issues—selection of target customers, design of individualized customer programs, maximizing satisfaction, loyalty and retention and getting the maximum ROI out of customer investments.

### Courses

#### Courses primarily for undergraduates:

- **MKT 340. Principles of Marketing.**
  
  (3-0) Cr. 3. F.S.SS. Prereq: credit or current enrollment in ECON 101
  
  The role of marketing in society. Markets, marketing institutions, and marketing functions with emphases on product, price, marketing communication, and marketing channel decisions.

- **MKT 343. Personal Sales.**
  
  (3-0) Cr. 3. Prereq: MKT 340
  
  Analysis of the theory and practice of personal selling with the context of relationship marketing and salesforce automation. Topics include: goal setting, prospecting, time/territory management, questioning, presentations, objections, commitment and customer service; simulations of selling situations.

- **MKT 410. Promotional Strategy.**
  
  (3-0) Cr. 3. F.S. Prereq: Credit or enrollment in MKT 447
  
  Principles, concepts, and problems involved in the development and implementation of promotional strategies. Coordination of a variety of promotional elements: advertising, sales promotion, direct marketing, public relations and publicity of web communications, and personal selling. Nonmajor graduate credit.

- **MKT 442. Sales Management.**
  
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  
  Functional aspects of sales force management; personal selling methods; procedures for recruiting, selecting, and training new salespeople; compensation and expense control systems; problems of sales force motivation and supervision; methods of territorial and quota assignment; sales department budgets; distributor-dealer relations; other selected topics. Nonmajor graduate credit.

- **MKT 443. Strategic Marketing Management.**
  
  (3-0) Cr. 3. F.S.SS. Prereq: MKT 444, MKT 447
  
  Analysis of major elements of strategic marketing management. May include case studies or business simulations involving decision making using marketing tools from previous courses. (For marketing majors only).

- **MKT 444. Marketing Research.**
  
  (3-0) Cr. 3. F.S. Prereq: MKT 340, STAT 226
  
  Marketing research techniques: problem formulation, research design, questionnaire construction, sampling, data collection procedures, and analysis and interpretation of data related to marketing decisions. Nonmajor graduate credit.

- **MKT 445. Customer Relationship Management.**
  
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  
  Examines how customer data can be used to enhance decisions relating to acquisition, development and retention. Topics include customer lifetime value, customer as assets, customer loyalty programs and customization.

- **MKT 446. Retailing.**
  
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  
  Basic areas of retail management: buying, merchandising, retail promotion, store location, store layout, credit management, and inventory control. Emphasis on practical application of retail management principles.

- **MKT 447. Consumer Behavior.**
  
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  
  Study of how consumers select, purchase, use, and dispose of goods and services. Includes analyses of how markets and others influence these processes. Application of concepts and methods of the behavioral sciences to marketing management decision making. Nonmajor graduate credit.

- **MKT 448. Global Marketing.**
  
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  
  Introduction to terms used in international marketing and sources of information on international markets. Development of sensitivity toward foreign business environment and familiarity with operations of multinational corporations. Nonmajor graduate credit.

- **MKT 449. Marketing Seminar.**
  
  (3-0) Cr. 3. Prereq: MKT 340
  
  Analysis of current issues and problems in marketing with emphasis on new theoretical and methodological developments. Additional seminars may be offered. Nonmajor graduate credit.

- **MKT 451. Marketing Channels.**
  
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  
  Focuses on marketing channels, the downstream part of a value chain, companies that come together to bring products and services from their point of origin to the point of consumption. Topics include channel institutions, channel design, channel coordination and implementation. Highlights international and technological aspects of marketing channels so that students can successfully develop and manage marketing channels in a contemporary business environment.

- **MKT 452. Independent Study.**
  
  Cr. 1-3. Repeatable. Prereq: MKT 340, senior classification; permission of instructor

- **MKT 453. Brand Management.**
  
  (3-0) Cr. 3. F.S. Prereq: MKT 447
  
  Examines the role of brands and branding in market environments characterized by intense competition and consumer power. Covers issues relating to why branding is important to firms, what brands represent to consumers, and what should be done to manage them effectively.

- **MKT 490. Comparative Marketing.**
  
  (3-0) Cr. 3. SS. Prereq: MKT 340
  
  Provides experience to students in culture, social, economic, and political environment of marketing in a foreign country. Students complete a term project (e.g., a marketing plan) based on information collected in the foreign country. Students attend briefings by experts/officials of private and public organizations. Nonmajor graduate credit.

#### Courses primarily for graduate students, open to qualified undergraduates:

- **MKT 501. Marketing.**
  
  (3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission
  
  An analytical approach to the study of marketing issues and challenges of business firms and nonprofit organizations. Emphasis on the influence of the global marketplace and the marketing environment on marketing decision making; the determination of the organization’s products, prices, channels and communication strategies; an orientation that ensures sustainability of marketing operations; and the organization’s system for planning and controlling its marketing effort.
Courses for graduate students:

**MKT 601. Seminar in Consumer Behavior.**
(3-0) Cr. 3. Prereq: MKT 501
A rigorous foundation of the major conceptual and methodological paradigms in the consumer-behavior literature. Seeks to aid students in understanding the psychological, sociological, and anthropological roots of consumer behavior research. Read the latest research in the area reported in leading consumer behavior/psychology journals.

**MKT 602. Marketing Strategy.**
(3-0) Cr. 3. Prereq: MKT 601
Review major contributions and recent developments in marketing strategy research and practice. Review commonly used modeling approaches and research methods to study strategic interaction between firms seeking to build competitive advantages. Provide an overview of empirical research regarding measurement, level and persistence of business success and implications of findings for theory and strategy development.

**MKT 603. Customer Management Strategy and Implementation.**
(3-0) Cr. 3. Prereq: MKT 601
Addresses key strategy and implementation issues behind customer management. Topics such as typology of CM strategies, antecedents and outcomes; environmental and managerial influences on strategy formation; technology and impact on CM strategy; and value of CM strategy. Examine theories and concepts behind important CM issues such as customer satisfaction, customer loyalty and customer profitability.

**MKT 644. Research Methods.**
(3-0) Cr. 3. Prereq: Knowledge of introductory statistics, Stat 401, enrollment in the PhD program
Introduction to methodological issues that arise when addressing a wide variety of research questions in organizational and consumer studies. Address measurement issues (scales, reliability and construct validity), design (for experiments, surveys, or qualitative studies), sampling, and analysis (univariate and multivariate statistical procedures). Measurement issues in cross-cultural and international research will also be covered. It is assumed that students entering the course have knowledge of introductory statistics.

**MKT 650. Research Practicum I.**
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

**MKT 651. Research Practicum II.**
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

**MKT 699. Dissertation.**
Cr. 12. Prereq: Graduate classification, permission of dissertation supervisor Research.

Supply Chain Management
(Administered by the Department of Supply Chain and Information Systems)

Undergraduate Study

For undergraduate curriculum in business, major in Supply Chain Management. Supply Chain Management is an integrated program of study concerned with the efficient flow of materials, products, and information within and among organizations. Supply chain management involves the integration of business processes across organizations, from material sources and suppliers through manufacturing and processing to the final customer. The program provides students with the core knowledge related to a wide variety of supply chain activities, including demand planning, purchasing, transportation management, warehouse management, inventory control, material handling, product and service support, information technology, and strategic supply chain management. The program offers two concentrations: logistics and operations. The logistics concentration focuses on skills related to transportation, distribution, warehousing, facility location analysis, and packaging. The operations concentration focuses on the analysis, design,
implementation, planning, control, and improvement of manufacturing and service processes.

The study of Supply Chain Management prepares students for professional careers with manufacturers, retail distributors, logistics service providers, including carriers and non-asset based 3PLs, and consulting firms. The curriculum provides the required theoretical and conceptual base and analytical methods for making sound operational and strategic business decisions related to all activities in a supply chain.

The Supply Chain Management major requires students to take 18 credit hours in the supply chain management area. This requirement is met by completion of the following common core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SCM 485</td>
<td>Demand Planning and Management</td>
<td>3</td>
</tr>
<tr>
<td>SCM 486</td>
<td>Principles of Purchasing and Supply Management</td>
<td>3</td>
</tr>
<tr>
<td>SCM 487</td>
<td>Strategic Supply Chain Management</td>
<td>3</td>
</tr>
<tr>
<td>Two core courses in the concentration area</td>
<td></td>
<td>6</td>
</tr>
<tr>
<td>SCM 460</td>
<td>Decision Tools for Logistics and Operations Management and Principles of Transportation</td>
<td>3</td>
</tr>
<tr>
<td>SCM 422 &amp; SCM 424</td>
<td>Manufacturing Planning and Control and Process Management, Analysis, and Improvement</td>
<td>3</td>
</tr>
<tr>
<td>One course from an approved list of electives</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>18</td>
</tr>
</tbody>
</table>

Students are encouraged to consider meeting the requirement for both concentrations to establish a broader foundation for a successful career in supply chain management.

The department also offers a minor for non- Supply Chain Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Department of Supply Chain and Information Systems participates in the full-time and part-time Master of Business Administration (M.B.A.) and in the Ph.D. in Business and Technology programs. The department also participates in the interdepartmental M.S. in Transportation program.

The M.B.A. program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Students can obtain a specialization in Supply Chain Management within the M.B.A. program.

The Ph.D. in Business and Technology is a 56-credit curriculum (minimum) that culminates in a dissertation. Students may select Supply Chain Management as their major area of specialization.

Courses

Courses primarily for undergraduates:

**SCM 301. Supply Chain Management.**
(3-0) Cr. 3. Prereq: ECON 101 and STAT 226
Various supply chain activities and integration of supply chain management with supply and demand, both within and between firms. Exposure to a wide range of supply chain management terminology, analytical tools, and theories related to four key elements of supply chain management: purchasing, operations, distribution, and integration. Specific topics include strategic sourcing, supply management, demand forecasting, resource planning, inventory management, process management, logistics, location analysis, process integration, and performance measurement.

**SCM 422. Manufacturing Planning and Control.**
(3-0) Cr. 3. Prereq: SCM 301
Advanced treatment of manufacturing planning and control procedures. Master production scheduling, material requirements planning, enterprise resource planning, capacity planning, shop floor control, just-in-time, and competitive analyses of modern manufacturing systems. Nonmajor graduate credit.

**SCM 424. Process Management, Analysis, and Improvement.**
(3-0) Cr. 3. Prereq: SCM 301
The design, analysis, and management of production processes to improve performance. Performance measures and their relationships; process design and evaluation; and managerial levers for improving and controlling process performance. Nonmajor graduate credit.

**SCM 428. Special Topics in Operations Management.**
(3-0) Cr. 3. Prereq: SCM 301
In-depth analysis of current issues, problems, and systems in operations management with emphasis on new theoretical and methodological developments. Topics may include in different semesters, supply chain management, productivity and quality improvement, management of technology and innovation, information technology in operations management, quick response manufacturing, and service operations management. Nonmajor graduate credit.

**SCM 437. Project Management.**
(Cross-listed with MIS). (3-0) Cr. 3.
Equips students to support team activities in the general project management environment and better manage their careers. Practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods. Nonmajor graduate credit.

**SCM 440. Supply Chain Information Systems.**
(Cross-listed with MIS). (3-0) Cr. 3. Prereq: MIS 330, SCM 301
Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include: design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

**SCM 450. Enterprise Resource Planning Systems in Supply Chain.**
(Cross-listed with MIS). (3-0) Cr. 3. Prereq: MIS 330, I E 148, I E 341
Examination of the role of enterprise resource planning systems (ERP) in the supply chain. Hands-on experience with a major software application in use by many corporations to manage and improve the efficiency of their supply chains and operations. Students will develop a more process-centric perspective about how a supply chain operates and how ERP enables and supports such operations. Nonmajor graduate credit.

**SCM 460. Decision Tools for Logistics and Operations Management.**
(3-0) Cr. 3. Prereq: SCM 301
Technical tools and skills required for problem solving and decision making in logistics and operations management. Transportation and network planning, inventory decision making, facility location planning, vehicle routing, scheduling, and production planning. Quantitative tools include linear and integer programming, non-linear programming, and simulation. Emphasis on the use of PC-based spreadsheet programs. Nonmajor graduate credit.

**SCM 461. Principles of Transportation.**
(3-0) Cr. 3. Prereq: SCM 301
Economic, operating, and service characteristics of the various modes of transportation, with a special emphasis on freight transportation. Factors that influence transport demand, costs, market structures, carrier pricing, and carrier operating and service characteristics and their influence on other supply chain costs and supply chain performance. Nonmajor graduate credit.

**SCM 462. Transportation Carrier Management.**
(3-0) Cr. 3. Prereq: Credit or enrollment in SCM 461
Analysis of transport users’ requirements. Carrier management problems involving ownership and mergers, routes, competition, labor, and other decision areas. Nonmajor graduate credit.

**SCM 466. International Transportation and Logistics.**
(3-0) Cr. 3. Prereq: SCM 301
Logistics systems and legal framework for the international movement of goods. Operational characteristics of providers of exporting and importing services. The effects of government trade policies on global logistics. Nonmajor graduate credit.
SCM 485. Demand Planning and Management.
(3-0) Cr. 3. Prereq: SCM 301
Demand planning process which synchronizes demand with manufacturing and distribution. Addresses linking business plans and demand forecasts both horizontally and vertically within the organization and collaboratively among supply chain partners. Forecasting, customer relationship management, sales and operations planning, customer service, distribution channels, e-fulfillment, and information systems requirements. Nonmajor graduate credit.

(3-0) Cr. 3. Prereq: SCM 301
Sourcing strategies, concepts, tools and dynamics in the context of the integrated supply chain. Make or buy decision, supplier evaluation and selection, global sourcing, the total cost of ownership, contracts and legal terms, negotiation, purchasing ethics, and information systems requirements. Nonmajor graduate credit.

SCM 487. Strategic Supply Chain Management.
(3-0) Cr. 3. Prereq: SCM 460 or SCM 422 or SCM 424; SCM 485 or SCM 486
Capstone course in supply chain management. Integrating and applying the theories, concepts, and methods covered in the prerequisite courses through the use of readings, case studies, projects, and industry speakers. Nonmajor graduate credit.

SCM 490. Independent Study.
Cr. 1-3. Repeatable. Prereq: SCM 301, senior classification, permission of instructor

Courses primarily for graduate students, open to qualified undergraduates:

SCM 501. Supply Chain Management.
(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission
Introduction to supply chain management including aspects of operations, logistics and global supply chain strategy development. Topic areas include lean manufacturing and value stream mapping; supplier development and measurement; sustainable supply chain operations; process measurement, management and improvement; supply chain risk and uncertainty; visibility and integration in the supply chain; and inventory control.

SCM 520. Decision Models for Supply Chain Management.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
The application of decision models for supply chain management. Topics include business applications of decision theory, inventory theory, business forecasting, optimization models, transportation and network models, routing problems, and project management.

SCM 522. Supply Chain Planning and Control Systems.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
An integrated analysis of planning and control systems for supply chains. Master production scheduling, material requirements planning, enterprise resource planning, capacity planning, shop floor control, competitive analyses of modern supply chain systems, and implementation of information technologies related to these topics.

SCM 524. Strategic Process Analysis and Improvement.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
Analysis, management, and improvement of the business processes used to produce and deliver products and services that satisfy customer needs. Process attributes that managers can control to influence the key operational performance measures of throughout time, inventory, cost, quality, and flexibility are discussed. Topics such as theory of constraints, lean production, and six sigma are included.

SCM 560. Strategic Logistics Management.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
Positions logistics vis-a-vis supply chain management (SCM). Presents different perspectives on SCM vs. logistics. Describes primary logistics functions: transportation, warehousing, facility location, customer service, order processing, inventory management and packaging. Benefits of and obstacles to the integration of these functions.

SCM 561. Transportation Management and Policy.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
Analysis of contemporary issues and strategies in transportation management and policy. Emphasis on evaluation of the impacts of transportation policies, new technologies, and strategic carrier and shipper management practices on the freight transportation industry and logistics systems.

SCM 563. Purchasing and Supply Management.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
Mechanics, procedures and tools used in purchasing. Recruiting, selecting, developing and managing supply chain partners in order to achieve competitive advantage via superior supply chain management. Factors and information needs for making supply management decisions.

SCM 585. Strategic Demand Planning.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
Synchronizes demand with manufacturing and distribution. Emphasis on the strategic advantages of linking business plans and demand forecasts, both vertically within the organization and collaboratively among supply chain partners.

SCM 590. Special Topics.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
For students who wish to do individual research in a particular area of supply chain management.

Courses for graduate students:

SCM 601. Theoretical Foundations of Supply Chain Management.
(3-0) Cr. 3. Prereq: MGM 601 or permission of instructor
An overview of the development of supply chain management (SCM) theory, including review of seminal articles in logistics, operations, and purchasing management and theories from allied disciplines (e.g., economics, marketing, sociology, strategic management). Analysis of trends in SCM research topics and methodologies. Identification of emerging and future areas for research and theory development.

(3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment
Review of research literature on supply chain strategy, including the impact of technology, global economic and social factors, and intra- and inter-organizational integration on supply chain strategy formation. The role of SCM in overall corporate strategy and the impact of SCM on firm performance will also be addressed.

SCM 603. Seminar in Purchasing.
(3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment
Review of classic purchasing theories. Discussion of contemporary supply management strategy; the role of supply management and its relationship with other functional areas; its impact on logistics and transportation issues; management of supply uncertainties.

SCM 604. Seminar in Logistics Management.
(3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment
Integration of network, economic, and systems theory in the design, management, and control of logistics systems in the context of integrated supply chain management. Functional areas addressed include transportation, inventory order fulfillment, distribution, and warehousing. Facility location analysis will also be covered.

SCM 605. Seminar in Operations Management.
(3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment
Review of the research literature on methods of organizing, planning, controlling, and improving manufacturing systems to achieve the desired performance objectives related to cost, quality, speed, and flexibility. The relationship between the performance of the manufacturing system and the performance of the supply chain system will also be discussed.

SCM 650. Research Practicum I.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

SCM 651. Research Practicum II.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

SCM 689. Dissertation.
Cr. 12. Prereq: Graduate classification, permission of dissertation supervisor
Research.

College of Design
Luis Rico-Gutierrez-Dean
Tim Borich-Associate Dean for Outreach
Marwan Ghandour-Associate Dean for Academic Programs
Associate Dean for Research and Graduate Education
www.design.iastate.edu/

Departments of the College

• Architecture
The College of Design offers graduate study in the areas shown below. Graduate study is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Graduate Curricula
The College of Design offers graduate study in the areas shown below. Graduate study is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Objectives of the Curricula in Design
The College of Design is among a small number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education. The College of Design strives to provide each student with a broad educational background and preparation in a specific design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college's programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, industrial designers, interior designers, studio artists, arts administrators and environmental designers.

Majors
• Architecture (p. 267)
• Community and Regional Planning (p. 274)
• Graphic Design (p. 284)
• Industrial Design (p. 288)
• Integrated Visual Arts (http://catalog.iastate.edu/collegeofdesign/integratedvisualarts)
• Interior Design (p. 298)
• Landscape Architecture (p. 303)
• Sustainable Environments (http://www.design.iastate.edu/sustainableenvironments.php)
• Transportation* (p. 693)
• Urban Design (http://www.design.iastate.edu/urbandesign.php)

Double Degree Programs
• Architecture / Business
• Architecture / Community and Regional Planning
• Community and Regional Planning / Landscape Architecture
• Community and Regional Planning / Public Administration
• Community and Regional Planning / Sustainable Agriculture
• Community and Regional Planning / Business

Minor
• Gerontology*

*The College of Design participates in this interdepartmental graduate program.

High School Preparation
Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended though not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements:

• 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability
• 3 years of mathematics to develop problem solving skills, including 1 year each of algebra, geometry, and advanced algebra
• 3 years of science, including at least two of the following:
  • 1 year of biology, 1 year of chemistry, or 1 year of physics
• 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government.

Admission Standards to Enrollment Managed Professional Programs
Admission into the enrollment managed professional programs of Architecture, Community and Regional Planning, Graphic Design, Industrial Design, Integrated Studio Arts, Interior Design, and Landscape Architecture requires a separate application after completing the Core Design Program. Applications are reviewed on the basis of a portfolio of original work, academic performance, and a written essay. Students from a two-year institution may also apply as transfer students to the following programs: B.S. in Community and Regional Planning, B.A. in Art and Design, and Bachelor of Design.
Advising
Each student receives personal assistance from an academic advisor within the student's curriculum area. Students enrolled in the college's Core Design Program are advised by professional advisors. Once admitted to professional programs, students are assigned to faculty advisors within the student's curriculum area. Advisors help students develop a program of study, access pertinent university resources and provide information on career choice.

The college’s career services office works with students to develop their career goals as well as prepare and search for employment.

Honors Program
The College of Design participates in the Honors Program which provides opportunities for outstanding students to individualize their programs of study. See Index, Honors Program (http://catalog.iastate.edu/azindex).

Requirements in the College of Design
All students in the College of Design are expected to meet the following requirements.

Communications

** General education credits in the Core Design Program may count toward the minimum credits.

*** Students who intend to apply to the Architecture program are strongly advised to take MATH 142 Trigonometry and Analytic Geometry and PHYS 111 General Physics during their Core year. While these specific courses are not required to apply to the program, they are required to advance in the B.Arch. program beyond the first semester.

Students who intend to apply to the Industrial Design program are advised to take PHYS 101 (http://catalog.iastate.edu/collegeofdesign/PHYS%20101) Physics for the Nonscientist, ECON 101 (http://catalog.iastate.edu/collegeofdesign/ECON%20101) Principles of Microeconomics and a math course during their Core year.

General Education

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 7 cr.

ENGL 150  Critical Thinking and Communication  3
ENGL 250  Written, Oral, Visual, and Electronic Composition  3
LIB 160  Information Literacy  1

Total Credits  7

(C- or better grade). Includes courses in the fields of English (composition) and speech communication (interpersonal and rhetorical).

Mathematics, physical sciences, and biological sciences 6 cr.

Includes courses in the fields of agronomy, astronomy and astrophysics, biology, botany, chemistry, civil engineering, computer science, geology, mathematics, physics, statistics, and zoology.

Humanities: 6 cr.

Includes courses in the fields of classical studies, English (literature), foreign languages, history, philosophy, religious studies, as well as history/theory/literature courses in dance, music, theater, journalism, African American studies, American Indian studies, environmental studies, Latino/a studies, women's studies, and university studies.

Social Sciences: 6 cr.

Includes courses in the fields of African American studies, American Indian studies, anthropology, economics, environmental studies, geography, human development and family studies, Latino/a studies, psychology and sociology, women's studies, and university studies.

General Education Electives: 9 cr.

9 cr. from any of the above areas, 6 cr. of course level 300-400.

Minor in Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, media and technology, design in everyday life, and models of professional practice. The minor is open to undergraduates in all university majors.

Total minor requirements: 15 cr.

ART H 292  Introduction to Visual Culture Studies  3
DSN S 183  Design Cultures  3
or another 100-200 level History/theory course offered in the College of Design
Nine credit hours from approved list.  9

Total Credits  15

At least six of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the 15 credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Minor in Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of course work: three credits selected from College of Design history/theory course offerings and twelve additional credits selected from any College of Design course offerings.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the fifteen credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses required in their major degree programs or in the Core Design Program to satisfy this minor.

Minor in Digital Media

Manipulation of digital media has emerged as an essential skill for design inquiry alongside traditional methods of building models and drawing sketches. To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of coursework from an approved list. At least nine of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above and may not be used to meet the requirements of the major.

Minor in Entrepreneurial Studies

The College of Design is an active participant in the Entrepreneurial Studies Minor for undergraduate students.

For more information see: www.isupjcenter.org/education/minor (http://catalog.iastate.edu/collegeofdesign/www.isupjcenter.org/education/minor)

Architecture

http://www.arch.iastate.edu

Undergraduate Study

The undergraduate program in architecture is an accredited five-year curriculum leading to the Bachelor of Architecture degree. The program provides opportunities for general education as well as preparation for professional practice and/or graduate...
study. An optional one-semester foreign study program is offered to fourth year students.

The undergraduate curriculum includes one year of the college’s Core Design Program followed by a four year professional program. Admission to the professional degree program is based on the applicant’s performance in the completed pre-professional curriculum; previous high school record (or transfer record where applicable); portfolio and essay evaluations; and on available departmental resources.

Objectives of the Bachelor of Architecture program:

The department is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effect are enfolded with the subject matter of building design - construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment, and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

It is our intent: that our students develop the skills with which to critically assess and research architectural questions and to invent architectural designs that address those questions; that they develop a working method for designing and that they have the communication, graphic, modeling and computational skills to support design exploration and to represent their design ideas to others; that they gain knowledge of architectural technologies through which buildings are given form, of which they are constructed and by which they are environmentally tuned and made sustainable; that they understand architectural history, that they understand the theoretical and diverse cultural underpinnings of the discipline of architecture, that they are able to reference architectural precedents and know how to utilize all of these in the development of their ideas; and that they have grounding in the ethical and practical aspects of the architectural profession in society.

For students entering the professional program, the department highly recommends purchase or lease of a laptop/notebook computer and appropriate software.

Graduate Study

The Department of Architecture offers two graduate degrees in architecture: a three-year accredited professional degree (M.Arch.) and a two-semester to three-semester research degree (M.S. in Arch.). Both degrees encourage interdisciplinary work within the College of Design and across related fields within the university. Double-degree programs are currently offered with the Department of Community and Regional Planning (M.Arch./M.C.R.P.) and the College of Business (M.Arch./M.B.A.). Financial support in the form of teaching and research assistantships is available competitively.

Master in Architecture

M.Arch. is an accredited professional degree in architecture. It is designed for students with undergraduate degrees in disciplines other than architecture as well as for students who hold four-year pre-professional degree in architecture.

The M.Arch. program demands engagement with contemporary issues and a commitment to lifelong learning. We encourage students to examine the relationships between local, regional and global contexts addressing environmental, social and technological issues. We believe that even though the scale of the architect’s action might be limited, the range of information needed to make creative, intelligent and responsible design decisions is vast. We expect our graduates to value the necessity of research, interdisciplinary learning, and teamwork.

M.Arch. is accredited by the National Architectural Accreditation Board (NAAB) and leads to a professional Master of Architecture degree over three years including the first summer term. The curriculum starts with an intensive three-semester course sequence that places equal emphasis on three study areas: architectural design and media, science and technology, and theory and history seminars on the built environment. While this learning framework shapes the whole curriculum, the remaining four semesters have a more open structure that allows students to explore architecture within an interdisciplinary context. These four semesters include a number of options, including study abroad, specialized studios with a variety of faculty, and the opportunity to do an independent project.

Students with undergraduate degrees in architecture or other related design fields may be given advanced standing in the program: advanced standing students may waive up to the whole first year. Students admitted to the program hold undergraduate degrees in a broad range of fields such as art history, history, literature, interior design, economics, mathematics, computer science, anthropology, and medicine. These students must complete the full three years of the curriculum.

Master of Science in Architecture

M.S. in Arch. is a 30-credit research degree with a required graduate thesis. As a research degree, this program is not subject to NAAB accreditation.

M.S. in Arch. is open for applicants who hold a professional degree in architecture or other related design fields. Applicants are required to submit a research proposal that lies within one of the listed study areas. These study areas are: Sustainability and Green Design, Rural and Urban Studies, Representation and Digital Media, Design Inquiry, Advanced Building Design, Architectural and Construction History, and Building Science and Construction. The degree is also open for applicants with non-professional degrees in various fields depending on the study area proposed by the applicant.

Financial support in the form of teaching and research assistantships is available. Contact the department office for specific curricula.

Curriculum in Architecture

The Department offers undergraduate and graduate degree programs:

A 167.5-credit undergraduate professional program, including the 30-credit Core Design Program, leading to the Bachelor of Architecture degree. (B. Arch.)

A 100-credit graduate professional program leading to the Master of Architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in this program. (M.Arch.)

A 30-credit interdisciplinary graduate program leading to the Master of Science in Architecture. (M.S. Arch.)

For more complete graduate program descriptions see Graduate Study under Architecture in the Courses and Programs section.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Total B. Arch. Requirement: 167.5 cr.

Only 65 cr from a two-year institution may apply which may include up to 16 technical credits; 9 P-NP cr of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 10 cr.

(C- or better grade)

Courses

Courses primarily for undergraduates:

ARCH 201. Architectural Design I.
(1-15) Cr. 6. F. Prereq: Completion of the pre-professional program and admission into the professional program in Architecture
Introduction to architectural design. Introduction to architectural design, including precedent research, drawing conventions, model making, and diagramming. Studio projects focus on investigating the impact of specific site conditions on design, threshold conditions, and small-scale domestic space. Students will learn skills in problem solving, visualization, and written, oral, and graphic communication. Field trips to relevant architectural sites.

ARCH 201H. Architectural Design I, Honors.
(1-15) Cr. 6-7. F. Prereq: Completion of the pre-professional program and admission into the professional program in Architecture
Introduction to architectural design. Introduction to architectural design, including precedent research, drawing conventions, model making, and diagramming. Studio projects focus on investigating the impact of specific site conditions on design, threshold conditions, and small-scale domestic space. Students will learn skills in problem solving, visualization, and written, oral, and graphic communication. Field trips to relevant architectural sites.

ARCH 202. Architectural Design II.
(1-15) Cr. 6. S. Prereq: ARCH 201; MATH 142; PHYS 111
Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Fieldtrips to relevant architectural sites.

(1-15) Cr. 6-7. S. Prereq: ARCH 201, MATH 142 and PHYS 111
Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Fieldtrips to relevant architectural sites.

ARCH 221. History of Architecture I.
(Cross-listed with DSN S). (3-0) Cr. 3. F.
Survey of western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. Ancient through 1750. Meets International Perspectives Requirement.

ARCH 222. History of Architecture II.
(Cross-listed with DSN S). (3-0) Cr. 3. S.
Survey of western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. 1750 to present. Meets International Perspectives Requirement.

ARCH 230. Design Communications I.
(2-2) Cr. 3. F.
Meets International Perspectives Requirement.

ARCH 245. Building Science and Technology I.
(2-2) Cr. 3. F.
Building Science and Technology I.

(3-0) Cr. 3. F.
Human Behavior and Environmental Theory.

ARCH 271H. Human Behavior and Environmental Theory, Honors.
(1-15) Cr. 6-7. F. Prereq: ARCH 201; MATH 142; PHYS 111
Exploration of theories that describe social structure and order and the manner in which individuals and societies organize themselves and structure their environment.

ARCH 301. Architectural Design III.
(1-15) Cr. 6. F. Prereq: ARCH 202
Consideration of landscape as a constructed, cultural artifact. Projects address the perceptual aspects and strategies of situation and location; examination of environmental phenomena and patterns of use and settlement as revealed and affected by the architectural artifact. Development of a critical design process is stressed.

ARCH 301H. Architectural Design III, Honors.
(1-15) Cr. 6-7. F. Prereq: ARCH 202
Consideration of landscape as a constructed, cultural artifact. Projects address the perceptual aspects and strategies of situation and location; examination of environmental phenomena and patterns of use and settlement as revealed and affected by the architectural artifact. Development of a critical design process is stressed.

Electives: 21 cr.
6 cr. 300-500 level from department list.; 15 cr. from approved list. 2 cr. Kin or Ath allowed; 4 cr. AFAS, M S, or N S allowed; 9 cr. Arch allowed (no P/NP).
See also: A 5-year plan of study grid showing course template by semester. (https://nextcatalog.registrar.iastate.edu/plandofstudy/design/#architectureba)
ARCH 302. Architectural Design IV.  
(1-15) Cr. 6. S. Prereq: ARCH 301 and minimum 2.0 GPA in previous studio courses. Continuation of ARCH 301, examining housing in the urban situation; diverse scales of use and occupation within the city as shaped by cultural tendencies. Projects examine collective and individual identities related by the condition of adjacency, the ability to consider varieties of scale within a project, and a further development of critical and technical methods.

ARCH 302H. Architectural Design IV, Honors.  
(1-15) Cr. 6-7. S. Prereq: ARCH 301 and minimum 2.0 GPA in previous studio courses. Continuation of ARCH 301, examining housing in the urban situation; diverse scales of use and occupation within the city as shaped by cultural tendencies. Projects examine collective and individual identities related by the condition of adjacency, the ability to consider varieties of scale within a project, and a further development of critical and technical methods.

ARCH 310. Practical Experience.  
Cr. R. Prereq: Permission of department chair. Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less.

ARCH 321. History of the American City.  
(Cross-listed with DSN S). (3-5) Cr. 3. Prereq: Sophomore classification. Study of the development of the built environment and urban condition in the United States from the colonial period to today. Through the theme of infrastructure, primary attention is given to urban spatial organization, built form, technological change, regulatory and funding patterns, and social categories such as class, race, and gender. Nonmajor graduate credit.

Meets U.S. Diversity Requirement.

(2-2) Cr. 3. Current and potential applications of digital computers in architecture. Projects employing computer graphics and modeling methods. Awareness of programming languages related to applications.

ARCH 335. Three-Dimensional Studio.  
(Cross-listed with ARTIS). (1-4) Cr. 3. Repeatable, maximum of 6 credits. This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means for three dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructive techniques.

ARCH 341. Building Science and Technology II.  
(3-4) Cr. S. S. Prereq: ARCH 245, MATH 142 and PHYS 111. Continued exploration of integrated architectural technology fundamentals in three modules: environmental, material, and structural technologies. Topics include environmental systems (building envelope systems and heat transfer, passive heating and cooling, daylighting, thermal comfort, analytical guidelines and calculation methods), materials & assemblies (composite building materials and framing systems) and structural systems (exploration relationship between applied forces and structural forms).

ARCH 342. Building Science and Technology III.  
(3-4) Cr. S. F. Prereq: ARCH 341. In-depth explorations of integrated architectural technology fundamental topics in three modules: environmental, material, and structural technologies with a focus on sustainable concepts and formal/material explorations. Examination of a design process that incorporates climate into the control of thermal, luminous, and acoustic environments. Introduction to plumbing systems. Complex construction assemblies and large scale construction will be studied. Structural components (beams, columns, slabs) will be designed, computed, and analyzed.

ARCH 343. Building Science and Technology IV.  
(3-4) Cr. S. S. Prereq: ARCH 342. In-depth explorations of fundamental integrated architectural technology topics in three modules: environmental, material, and structural technologies with a focus on sustainable concepts and formal/material explorations. An overview of active environmental control systems in response to occupant comfort, patterns of use, health, and safety regulations. Use and design of mechanical, electrical, plumbing, fire safety, transportation, and conveying systems and subsystems. Structural module investigates complex structural systems and behaviors with a focus on documentation and integration with other building technologies.

ARCH 351. Whole Building Energy Performance Modeling.  
(Cross-listed with DSN S). (3-0) Cr. S. Prereq: ARCH 202, 245, 341. Open to non-majors by permission of instructor. Architectural design, design evaluation and technical analysis using energy performance modeling tools. Emphasis will be given to whole building energy efficiency including passive and active systems integration.

ARCH 401. Architectural Design V.  
(1-15) Cr. 6. F. Prereq: ARCH 302. A rigorous examination of how buildings participate sustainably in socio-political and environmental systems. Student projects consider in a comprehensive proposal how issues of physical site, socio-economic context, programming, structure, form, materiality, and building systems are interconnected through the design process and within the built environment. Projects typically focus on a smaller scale urban public building that is closely connected to its physical, environmental, and social context.

(1-15) Cr. 6-7. F. Prereq: ARCH 302. A rigorous examination of how buildings participate sustainably in socio-political and environmental systems. Student projects consider in a comprehensive proposal how issues of physical site, socio-economic context, programming, structure, form, materiality, and building systems are interconnected through the design process and within the built environment. Projects typically focus on a smaller scale urban public building that is closely connected to its physical, environmental, and social context.

ARCH 402. Architectural Design VI.  
(1-15) Cr. 6. S. Prereq: ARCH 401 and minimum 2.0 GPA in previous studio courses. An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option. Meets International Perspectives Requirement.

ARCH 402H. Honors (6-7 cr.).  
(1-15) Cr. 6. S. Prereq: ARCH 401 and minimum 2.0 GPA in previous studio courses. An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option. Meets International Perspectives Requirement.

ARCH 403. Architectural Design VII.  
(1-15) Cr. 6. F. Prereq: ARCH 402. A rigorous examination of architecture’s relationship with culture and technology. Studio projects stress the interpretation and integration of contextual and historical considerations, as well as structural, environmental, and communication systems, in a comprehensive design proposal.

(1-15) Cr. 6-7. F. Prereq: ARCH 402. A rigorous examination of architecture’s relationship with culture and technology. Studio projects stress the interpretation and integration of contextual and historical considerations, as well as structural, environmental, and communication systems, in a comprehensive design proposal.

ARCH 404. Architectural Design VIII.  
(1-15) Cr. 6. S. Prereq: ARCH 403. Advanced forum for architectural research and/or design. Choice of thematic studies or student initiated research and design. Experimentation and innovation are encouraged. DSN S 446 or DSN S 546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

ARCH 404H. Architectural Design VIII, Honors.  
(1-15) Cr. 6-7. S. Prereq: ARCH 403. Advanced forum for architectural research and/or design. Choice of thematic studies or student initiated research and design. Experimentation and innovation are encouraged. DSN S 446 or DSN S 546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

ARCH 420. Topics in American Architecture.  
(3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: Junior classification. History, theory, and principles of American architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. Nonmajor graduate credit. A maximum of 6 credits of ARCH 420 may be applied to degree program. Meets U.S. Diversity Requirement.
ARCH 422. Topics in Medieval Architecture.
(3-0) Cr. 3. Repeatable, maximum of 6 credits. S. Prereq: Junior classification
History, theory, and principles of medieval architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. Nonmajor graduate credit. A maximum of 6 credits of ARCH 422 may be applied to degree program. Meets International Perspectives Requirement.

ARCH 423. Topics in Renaissance to Mid-Eighteenth Century Architecture.
(3-0) Cr. 3. Repeatable, maximum of 6 credits. S. Prereq: Junior classification
History, theory, and principles of renaissance to mid-eighteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. Nonmajor graduate credit. A maximum of 6 credits of ARCH 423 may be applied to degree program.

ARCH 424. Topics in Nineteenth Century Architecture.
(3-0) Cr. 3. Repeatable, maximum of 6 credits. F. Prereq: Junior classification
History, theory, and principles of nineteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. Nonmajor graduate credit. A maximum of 6 credits of ARCH 425 may be applied to degree program.

(3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: Junior classification
History, theory, and principles of twentieth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. Nonmajor graduate credit. A maximum of 6 credits of ARCH 426 may be applied to degree program.

ARCH 426. Topics in Native American Architecture.
(Cross-listed with AM IN, DSN S). (3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: Junior classification
History, theory, and principles of Native American/Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. Nonmajor graduate credit. A maximum of 6 credits of ARCH 427 may be applied to degree program. Meets U.S. Diversity Requirement

(Dual-listed with ARCH 527). (3-0) Cr. 3. F. Prereq: Junior classification
The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment of Studies in Architecture and Culture. Nonmajor graduate credit. Meets International Perspectives Requirement.

ARCH 428. Topics in Italian Architecture and Urbanism.
(3-0) Cr. 3. S. Prereq: Junior classification
History, theory and principles of Italian architecture and urban design considering relationships to the culture, visual arts, site, and surroundings.

ARCH 431. Analytical Drawing.
(1-6) Cr. 3. Repeatable, maximum of 12 credits. F.S. Prereq: ARCH 230 and ARCH 302
Exploration of 2- and 3-dimensional representations. Emphasis on on-site freehand sketching, perspective and orthographic drawing, rendering of shadows and textures, and use of diverse media.

ARCH 432. Advanced Computer Lighting and Rendering.
(3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: ARCH 230 and ARCH 301
Exploration of the computer as a design and communication tool. Emphasis on lighting and rendering techniques.

ARCH 433. File to Fabrication.
(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S. Prereq: ARCH 230 and ARCH 301
Exploration of the computer as a design and manufacturing tool. Emphasis on fabrication techniques and rapid prototyping including laser-cutting, 3-D printing and CNC routing.

(1-4) Cr. 3. Prereq: ARCH 334
Emphasis on application of the computer as a design tool, topological applications and computer graphic methods, development of computer software for architectural and environmental problem solving. Nonmajor graduate credit.

ARCH 435. Advanced Design Media.
(2-2) Cr. 3. Repeatable, F.S.S. Prereq: ARCH 230
Special topics in design media applications.

ARCH 436. Architectural Photography.
(3-0) Cr. 3. Prereq: ARCH 202
Emphasis on use of the camera and lighting in photographing drawings and interior and exterior building environments. Nonmajor graduate credit.

ARCH 445. Building Science and Technology V.
(2-2) Cr. 3. F. Prereq: ARCH 343
Technical topics which ground architectural design decisions and concepts in the physical world and the human perception thereof and have environmental sustainability as an emphasis. Synthesis of material, environmental, structural and systems design and related design modeling and simulation.

ARCH 482. Professional Practice.
(Dual-listed with ARCH 582). (3-0) Cr. 3. F. Prereq: ARCH 202
Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

ARCH 486. Design: Made in Italy.
(Cross-listed with DSN S). (3-0) Cr. 3. S.
An investigation of the history of Italian design in its contemporary form as part of International study abroad program in Rome.

ARCH 490. Independent Study.
Cr. 1-9. Repeatable. F.S.S.S. Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490A. Design Communications.
Cr. 1-9. Repeatable. F.S.S.S. Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490B. Design.
Cr. 1-9. Repeatable. F.S.S.S. Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490C. Technical Systems.
Cr. 1-9. Repeatable. F.S.S.S. Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490D. Architectural History.
Cr. 1-9. Repeatable. F.S.S.S. Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490E. Behavioral Studies.
Cr. 1-9. Repeatable. F.S.S.S. Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490F. Practice.
Cr. 1-9. Repeatable. F.S.S.S. Prereq: Written approval of instructor and department chair on required form
Independent investigation.

ARCH 490H. Independent Study, Honors.
Cr. 1-9. Repeatable. F.S.S.S. Prereq: Written approval of instructor and department chair on required form
Independent investigation.

Courses primarily for graduate students, open to qualified undergraduates:

(0-10) Cr. 5. F. Prereq: Admission to the M Arch program. Concurrent enrollment in ARCH 541 and ARCH 592
An introduction to comprehensive architectural design projects that focuses on three interrelated design skills: mapping, programming and building. Projects establish a framework for designing buildings that considers multiple factors such as environmental forces, construction methods, building codes, urban regulations, social relationships, and cultural values.
ARCH 506. Architectural Design and Media II: Materiality and Representation. (0-10) Cr. 5. S. Prereq: ARCH 505, ARCH 541, ARCH 595 and concurrent enrollment in ARCH 542 and ARCH 596
Small-scale architectural design projects that investigate design representation through analogue and digital means. The projects explore different representation strategies to help students develop an understanding of the particular modes of architectural representation that advance the designer’s knowledge of space as a complex interaction between materials with inherent physical characteristics, mobile socializing bodies, and changing environmental cycles.

ARCH 507. Architectural Design and Media III: Design in Detail. (0-10) Cr. 5. SS. Prereq: ARCH 506, ARCH 542, ARCH 596 and concurrent enrollment in ARCH 581
Design projects that emphasize the multi-faceted role of the architectural detail in the design process through first, understanding the historical specificity of building construction and detailing; second, utilizing working drawing as a mode of communication; and third, designing with details. The term-long project will consider a set of working drawings of past buildings as a site for design intervention.

ARCH 510. Practical Experience. Cr. R. Repeatable. F.S.S.S. Prereq: Graduate and permission of department DOGE
Students must register for this course prior to commencing each period. Available only to students taking course loads of 8 credits or less.

ARCH 519. Middle Eastern Cities. (Cross-listed with CRP) (3-0) Cr. 3. Prereq: Graduate or Senior classification
Introduction to basic academic writings on Middle Eastern cities in addition to other contemporary cultural productions of the region. Study of various aspects of Middle Eastern life and the built environments that this life produces. Meets International Perspectives Requirement.

ARCH 527. History, Theory, and Criticism of Chinese Architecture. (Dual-listed with ARCH 427) (3-0) Cr. 3. Prereq: Graduate or Senior classification
The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. Meets International Perspectives Requirement.

ARCH 528. Topical Studies in Architecture. (Cross-listed with DSN S) (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

ARCH 528A. Studies in Architecture: Culture. (Cross-listed with DSN S) (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

ARCH 528B. Studies in Architecture: Technology. (Cross-listed with DSN S) (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

ARCH 528C. Studies in Architecture: Communications. (Cross-listed with DSN S) (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

ARCH 528D. Studies in Architecture: Design. (Cross-listed with DSN S) (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

ARCH 528E. Studies in Architecture: Practice. (Cross-listed with DSN S) (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

ARCH 529. Spatial Dialectics in the American Midwest. (3-0) Cr. 3. Prereq: Graduate or Senior classification
The American Midwest has witnessed dramatic transformation during the last two centuries which impacted its physical, environmental, economic and social characteristics. This course is an interdisciplinary study of the evolution and sustainability of Midwestern space in relationship to forces of flow shaped by the mobility of bodies, products, meanings, and symbols that are enforced, incorporated, reproduced or destroyed. Meets U.S. Diversity Requirement

ARCH 534. Advanced Computer-aided Architectural Design. (1-4) Cr. 3. Repeatable, maximum of 6 credits. F. Prereq: ARCH 434 and permission of instructor
Emphasis on concepts, algorithms, data structures, advanced modeling, rendering, animation, and virtual reality applications in architectural design.

ARCH 535. Advanced Three-Dimensional Studio. (1-4) Cr. 3. Repeatable, maximum of 6 credits. Prereq: ARCH 335 or Graduate classification
Advanced investigation of sculptural expression with emphasis on individual projects.

ARCH 541. Science and Technology for Architects I. (4-2) Cr. S. F. Prereq: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and 595
Introduction to Human Factors, Descriptive Geometry, Basic Building Materials, and Small-Scale Building Envelopes. Theory and case studies, stressing the connectivity of technical issues to broader formal, social, and cultural spheres.

ARCH 542. Science and Technology for Architects II. (4-2) Cr. S. S. Prereq: ARCH 505, ARCH 541, ARCH 595 and concurrent enrollment in ARCH 506 and ARCH 596
Elementary Statics and Beam Theory, Basic Construction Materials, and Site and Building Circulation. Theory and case studies stressing the connectivity of technical issues to broader formal, social, and cultural spheres.

ARCH 558. Sustainability and Green Architecture. (Cross-listed with DSN S) (3-0) Cr. 3. F. Prereq: Graduate classification
Issues of Sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment; Issues of Green Architecture as it relates to building material selection, systems of building materials, the environment of the United States and the World, architects and examples of buildings with green or sustainable designations.

ARCH 557. Preservation, Restoration, and Rehabiliation. (Cross-listed with DSN S) (3-0) Cr. 3. S. Prereq: Senior classification
Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

ARCH 571. Design for All People. (Cross-listed with DSN S, GERON) (3-0) Cr. 3. S. Prereq: Graduate or Senior classification
Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. Meets U.S. Diversity Requirement

ARCH 575. Contemporary Urban Design Theory. (Cross-listed with DSN S) (3-0) Cr. 3. S. Prereq: Graduate or Senior classification
Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

ARCH 576. Study Abroad Options. Cr. 1-12. Repeatable, maximum of 12 credits. SS. Special topics in environmental design, architectural history and contemporary practice. Travel to relevant countries. General cultural and historical studies, topical projects and individual inquiry. Courses may be taught by departmental faculty or faculty from approved Iowa State Study Abroad programs. See current offerings for detailed syllabus. Meets International Perspectives Requirement.

ARCH 581. Service Learning. (1-12) Cr. 5. SS. Prereq: ARCH 506, 542 and ARCH 596
Planning and execution of a project serving a community need. Learning occurs through both theory and active involvement in on-site work. Projects connect previous coursework to practical applications and community involvement.

ARCH 582. Professional Practice. (Dual-listed with ARCH 482) (3-0) Cr. 3. F. Prereq: Graduate classification
Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

ARCH 583. Research in Practice. (3-0) Cr. 3. S. Prereq: Graduate or Senior classification
Foundational course in the methods and conceptual tools of design research in the context of practice. Through team and individual guided projects, students generate, analyze and represent knowledge in design-related communications and contexts. Alternative models of practice, client groups and communities are addressed within projects that precede, feed, follow, or overlap with architectural contracts.
**ARCH 590. Special Topics.**
Cr. 1-5. Repeatable. F.S.S. Prereq: Written approval of instructor and department chair on approved form.
Investigation of architectural issues having a specialized nature.

**ARCH 595. Seminar on the Built Environment I: History.**
(5-0) Cr. 5. F. Prereq: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and ARCH 541.
Introduction to historical canons and traditions of architecture and urbanism. Discussion of the relationship between historical inquiry and contemporary practice. Students learn skills in critical thinking, visual analysis, and research methods. Course sessions develop thematically with interdisciplinary readings, group discussions, student presentations, and research projects.

**ARCH 596. Seminar on the Built Environment II: Landscape and Society.**
(5-0) Cr. 5. S. Prereq: ARCH 505, ARCH 541, ARCH 595 and concurrent enrollment in ARCH 506 and ARCH 542.
Introduction to landscape as artifact and multi-disciplinary knowledge-base for design thinking. Literatures and methods of environmental psychology, cultural geography, landscape and architectural history and theory, site and circulation design as intersection of built infrastructural, natural, and social systems. Emphasis on sensory perception, and human movement; investigations of climate, environmental conditions, and values toward consumption and sustainability in everyday experience of the built environment.

**ARCH 597. Seminar on the Built Environment III: Theory.**
(3-0) Cr. 3. F. Prereq: Graduate or Senior classification.
Multidisciplinary overview of contemporary theories concerned with the production of the built environment. Particular attention to urbanism as a discourse that relates social interactions and power structures to material space. Meets International Perspectives Requirement.

**ARCH 598. Seminar on the Built Environment IV: Topical Study.**
(3-0) Cr. 3. S. Prereq: Graduate or Senior classification.
A research seminar which considers a topic within contemporary discourses on the built environment outside of Europe and North America. The topic will be studied from multiple perspectives highlighting the historical and theoretical relationships between architecture, global cultures, geography, landscape, and urban planning. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

**Courses for graduate students:**

**ARCH 601. Sustainable Building Design.**
(0-12) Cr. 6. F. Prereq: ARCH 507, ARCH 542, ARCH 596 and concurrent enrollment in ARCH 643.
Design projects that are developed through integrative design strategies that explore the relationship between buildings and environmental forces to maximize non-wasteful, efficient use of resources such as energy, water and building materials. Projects will include investigations of the impact of solar energy, airflow, building materials, passive and active systems and wall sections on quality of life and form making. Design decisions will be quantitatively validated through energy modeling and performance simulation.

**ARCH 602. Community, Building and the Environment.**
(0-12) Cr. 6. S. Prereq: ARCH 601, ARCH 643, ARCH 597 and concurrent enrollment in ARCH 644.
Design projects that explore the relationships between architectural, cultural, and environmental landscapes. Emphasis on regional sites, socio-economic conditions, and sustainable design and planning practices at multiple scales. Projects stress engagement with local circumstances and stakeholders; systemic interconnections and strategies; and the application of interdisciplinary research.

**ARCH 603. Comprehensive Design.**
(0-12) Cr. 6. F. Prereq: ARCH 601
Rigorous examination of architecture’s relationship with culture and technology. Studio projects stress the interpretation of contextual and historical considerations, as well as structural, environmental, mechanical, electrical and plumbing systems, in a comprehensive design proposal. This course fulfills the Graduate College Creative Component Requirement.

**ARCH 604. Design Studio Options.**
(0-12) Cr. 6. Repeatable, maximum of 12 credits. S. Prereq: ARCH 602
Design studio selected by the students, which may include but is not limited to: independent design study, interdisciplinary design studio, study abroad, and design build. DSN S 546 for 6 cr. may be substituted for this course.

**ARCH 643. Science and Technology for Architects III.**
(2-2) Cr. 3. F. Prereq: ARCH 507, ARCH 542, ARCH 596, ARCH 581 and concurrent enrollment in ARCH 601 or Graduate classification and concurrent enrollment in ARCH 601.
Third in a four-course series in building science and technologies. Structural Elements and Systems, and Building Services. Theory and case studies stressing the connectivity of technical issues to broader formal, social and cultural spheres.

**ARCH 644. Science and Technology for Architects IV.**
(2-2) Cr. 3. S. Prereq: ARCH 643 or Graduate classification.
Fourth of a four-course series in building science and technologies. Building Enclosures, Interior Construction and Sensory Qualities, Fabrication and Construction. Theory and case studies stressing the connectivity of technical issues to broader formal, social and cultural spheres. Summative Student Project.

**ARCH 690. Independent Design Study.**
(1-15) Cr. 6. Repeatable. F.S.S. Prereq: Admission to the M. S. in Arch. program.
Independent architectural design projects commensurate with student interests requiring approval of Architecture Graduate Committee.

**ARCH 698. Graduate Seminar.**
Cr. R. Repeatable. F.S. Prereq: Admission to the M. Arch. or M. S. in Arch. programs.
Special topics and guest speakers.

**ARCH 699. Research.**
(1-18) Cr. 3-9. Repeatable. F.S.S.

**Art Education**

**Courses**

**Courses primarily for undergraduates:**

**ARTED 211. Introduction to Art Education.**
(0-6) Cr. 3. F.S.
Design experiences for the K-12 classroom. Hands-on discipline-specific and integrated art activities; emphasis on creativity, artistic and human diversity, and thinking skills development.

**Art History**

**Courses**

**Courses primarily for undergraduates:**

**ART H 181. Origins and Evolution of Modern Design.**
(Cross-listed with DSN S). (3-0) Cr. 3. F.S.
History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

**ART H 280. History of Art I.**
(Cross-listed with DSN S). (3-0) Cr. 3. F.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. Meets International Perspectives Requirement.

**ART H 280H. History of Art I: Honors.**
(Cross-listed with DSN S). (3-0) Cr. 4. F.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. Meets International Perspectives Requirement.

**ART H 281. History of Art II.**
(Cross-listed with DSN S). (3-0) Cr. 3. S.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. Meets International Perspectives Requirement.
ART H 291H. History of Art II: Honors.
(Cross-listed with DSN S). (3-0) Cr. 3.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century.
Meets International Perspectives Requirement.

ART H 292. Introduction to Visual Culture Studies.
(Cross-listed with DSN S). (3-0) Cr. 3.
An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields.
Meets U.S. Diversity Requirement

(3-0) Cr. 3. Prereq: Permission of instructor
Survey of Italian art and architecture from the Etruscans to Bernini, including lectures and tours of museums and historical sites. Study abroad course taught in Rome, with travel to other Italian cities.

(Cross-listed with DSN S). (3-0) Cr. 3.
Introduction to the history of art and architecture in Asia. Cultures may include China, Korea, Japan, and India before the modern-era. Visual materials selected based on important themes that are critical in understanding Asian culture and art tradition. Nonmajor graduate credit.
Meets International Perspectives Requirement.

ART H 383. Greek and Roman Art.
(Dual-listed with ART H 583). (Cross-listed with DSN S, CL ST). (3-0) Cr. 3.
Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

ART H 383H. Greek and Roman Art: Honors.
(Cross-listed with DSN S, CL ST). (3-0) Cr. 3.
Prereq: Permission of instructor
Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

ART H 384. Art of Islam.
(3-0) Cr. 3.
Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world.
Meets International Perspectives Requirement.

ART H 384H. Art of Islam, Honors.
(3-0) Cr. 3.
Prereq: Permission of instructor
Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world.
Meets International Perspectives Requirement.

ART H 385. Renaissance Art.
(Dual-listed with ART H 585). (Cross-listed with DSN S). (3-0) Cr. 3.
European art including painting, sculpture, architecture, and crafts; from the Renaissance to the 19th century. Nonmajor graduate credit.

ART H 385H. Renaissance Art, Honors.
(Cross-listed with DSN S). (3-0) Cr. 3.
Prereq: Permission of instructor
European art including painting, sculpture, architecture, and crafts; from the Renaissance to the 19th century. Nonmajor graduate credit.

ART H 388. Modern Art and Theory.
(Cross-listed with DSN S). (3-0) Cr. 3.
Visual arts and critical theory of the early 20th century, including Expressions, Cubism, Futurism, Suprematism, Dada, and Surrealism. Nonmajor graduate credit.

(Cross-listed with DSN S). (3-0) Cr. 3.
Visual arts and critical theory from Abstract Expressionism to the present. Nonmajor graduate credit. Meets U.S. Diversity Requirement
Meets U.S. Diversity Requirement

ART H 396. History of Photography.
(Cross-listed with DSN S). (3-0) Cr. 3.
Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools. Nonmajor graduate credit.

ART H 401. Art and Architecture of India.
(Dual-listed with ART H 581). (Cross-listed with DSN S). (3-0) Cr. 3.
Survey of Indian-style art and architecture through history. Examine how art and architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically. Nonmajor graduate credit.
Meets International Perspectives Requirement.

ART H 408. Nineteenth Century Art.
(Dual-listed with ART H 587). (Cross-listed with DSN S). (3-0) Cr. 3.
European and American art and architecture from 1780 to 1900 focusing on the major movements of Western Europe, including Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism. Nonmajor graduate credit.

ART H 409. History of Comics.
(Dual-listed with ART H 588). (Cross-listed with DSN S). Cr. 3.
An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present. Nonmajor graduate credit.

ART H 489H. History of Comics: Honors.
(Cross-listed with DSN S). Cr. 3.
An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present. Nonmajor graduate credit.

ART H 490. Independent Study.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form before the semester of enrollment
Student must have completed art history coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ART H 490H. Independent Study, Honors.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form before the semester of enrollment
Student must have completed art history coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ART H 494. Women/Gender in Art.
(Dual-listed with ART H 594). (Cross-listed with DSN S, W S). (3-0) Cr. 3.
Prereq: Graduate classification and permission of instructor
Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.
Meets U.S. Diversity Requirement

ART H 498. Selected Topics in Art History.
(Dual-listed with ART H 598). (Cross-listed with DSN S). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Courses primarily for graduate students, open to qualified undergraduates:

ART H 581. Art and Architecture of India.
(Dual-listed with ART H 481). (Cross-listed with DSN S). (3-0) Cr. 3.
Prereq: Graduate classification and permission of instructor
Survey of Indian-style art and architecture through history. Examine how art and architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically.
Meets International Perspectives Requirement.

ART H 583. Greek and Roman Art.
(Dual-listed with ART H 385). (Cross-listed with DSN S, CL ST). (3-0) Cr. 3.
Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

ART H 585. Renaissance Art.
(Dual-listed with ART H 385). (Cross-listed with DSN S). (3-0) Cr. 3.
Prereq: Graduate classification and permission of instructor
European art including painting, sculpture, architecture, and crafts; from the Renaissance to the 19th century. Nonmajor graduate credit.

(Dual-listed with ART H 487). (Cross-listed with DSN S). (3-0) Cr. 3.
Prereq: Graduate classification and permission of instructor
European and American art and architecture from 1780 to 1900, focusing on the major movements of Western Europe, including Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism.
ART H 599. History of Comics.  
(Dual-listed with ART H 498). (Cross-listed with DSN S). Cr. 3.  
An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present. Nonmajor graduate credit.

ART H 590. Special Topics.  
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ART H 594. Women/Gender in Art.  
(Dual-listed with ART H 494). (Cross-listed with DSN S, W S). (3-0) Cr. 3.  
Prereq: Graduate classification and permission of instructor  
Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.  
Meets U.S. Diversity Requirement

(Cross-listed with DSN S). (3-0) Cr. 3.  
Prereq: Graduate classification and permission of instructor  
Visual arts and critical theory from Abstract Expressionism to the present.  
Meets U.S. Diversity Requirement

ART H 596. History of Photography.  
(Dual-listed with ART H 496). (Cross-listed with DSN S). (3-0) Cr. 3.  
Prereq: Graduate classification and permission of instructor  
Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

ART H 598. Selected Topics in Art History.  
(Dual-listed with ART H 498). (Cross-listed with DSN S). (3-0) Cr. 3. Repeatable, maximum of 9 credits.  
Prereq: Graduate classification and permission of instructor  
Specialized study in the history or criticism of art and/or design.

Community and Regional Planning

Community and regional planning is a field of study aimed at understanding the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to solve problems. Planners work at multiple levels, and they are concerned with issues that affect every corner of the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunity; and the management of growth and change of all kinds.

Undergraduate Study

www.design.iastate.edu/communityplanning

Graduates of the Community and Regional Planning department are able to integrate planning knowledge and skills in a variety of practical applications, and can communicate effectively in written and oral form. Graduates will be qualified for a variety of entry-level positions. They will also be well prepared for graduate study in a variety of fields, including law, public policy, public health, environmental science, geography, sociology, urban design, and architecture.

Graduates of the Community and Regional Planning Department are expected to understand the structure and functions of urban settlements, including the history of planning and urban development and the processes for plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written/oral and graphic communications, collaboration, and in synthesizing and applying knowledge to practice. Graduates are expected to be able to assess the impact of plans and alternatives based on equity and social justice, economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning. Our students gain an education that, when combined with experience, supports eligibility for membership in the American Institute of Certified Planners.

The department cooperates in the undergraduate minors in Design Studies, Digital Media, Critical Studies in Design, Environmental Studies, and Sustainability.

Graduate Study

The Department offers the Master of Community and Regional Planning degree with areas of concentration in land use and transportation, community design and development, and rural and environmental planning. Students may design their own area of concentration with the assistance of their major professor. The primary focus of the M.C.R.P. degree is to prepare students with the education and practical skills to be leaders in the practice of planning. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Degree requirements include completion of a 2-year, 48-credit program, including a required core (21 credits), electives (21-23 credits) and one of the following: capstone studio (4 credits), professional report (4 credits), or thesis (6 credits). The required core consists of C R P 532, 561, 563, 564, 566, 568 and 592. Students select electives in consultation with their Program of Study (POS) committee.

C R P 532 Community Planning Studio 3  
C R P 561 Planning Theory for Practice 3  
C R P 563 Planning the American Metropolis 3  
C R P 564 Introduction to Analytical Methods for Planning 3  
C R P 566 Values and Decision Making 3  
C R P 568 Planning and Development 3  
C R P 592 Land Use and Development Regulation Law 3

Admission to the M.C.R.P. program is by application to the department and to the Graduate College. Students with a Bachelors degree in planning or students who have taken highly relevant coursework may be able to waive up to 9 credits of course requirements. Students must petition the department’s Director of Graduate Education (DOGE) in writing prior to the first day of class of the student’s first semester in the program to have credits waived. Students are encouraged to complete an internship in a planning office. No foreign language is required for the degree master of community and regional planning.

Double degree programs are offered with architecture (M.C.R.P./M.Arch.), business (M.C.R.P./M.B.A.), public administration (M.C.R.P./M.P.A.), landscape architecture (M.C.R.P./M.L.A.) and sustainable agriculture (M.C.R.P./M.S.). The department also participates in the interdepartmental major in transportation (see Transportation). Information about our programs and how to apply can be obtained from the department’s web page at: www.design.iastate.edu/communityplanning, or send an email to crp@iastate.edu.

The department also offers a 13-credit graduate certificate in Geographical Information Systems (GIS) in spatial analysis, GIS applications and program management. The program is open to graduate students in all disciplines of the University. Information about the graduate certificate may be obtained from the department office and from the department’s web page at: www.design.iastate.edu/GIS/CertificateProgram.php.

CRP currently offers several courses via distance learning to graduates and planning professionals interested in expanding their knowledge of planning. Further details of current distance course offerings may be found on the CRP website and on the ISU Continuing Education website. For more information, send an e-mail to crp@iastate.edu

Curriculum in Community and Regional Planning

The Department of Community and Regional Planning administers the 128 hour credit undergraduate program leading to the Bachelor of Science. Students have the opportunity to work with their faculty advisers to define their own areas of interest, which may include a minor.

The Community and Regional Planning Program can be completed in two to four years. Students may apply for admission to the program at any time during their enrollment at Iowa State University. If applying by transfer from another program or institution, admission is based on the student’s cumulative GPA and a departmental review of course work. Transfer applications from students in programs in sociology, political science, history, geography, engineering, and other related disciplines are encouraged. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average; Completion of all requirements listed below.
International Perspective: 3 cr.  
U.S. Diversity: 3 cr.  
Communication: 13 cr.

General Electives: 24 cr.  
Twenty-four credits of general electives from program curriculum sheet  

Courses  
Courses primarily for undergraduates:  

**C R P 201. The American Metropolis.**  
(3-0) Cr. 3. F.S.  
Examination of the evolution of American urban centers from the colonial era to the present and with it, the process of change in urban America. It asks why and how American cities have grown, where city and dwellers have come from, how they have lived, and how they have governed themselves. Considers the demographic changes and social movements underway in urban America and explores how an understanding of the history of cities provides us with knowledge that we can use to improve our cities today.  

**C R P 291. World Cities and Globalization.**  
(Cross-listed with DSN S). (3-0) Cr. 3. F.  
World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity. Meets International Perspectives Requirement.  

**C R P 293. Environmental Planning.**  
(Cross-listed with DSN S, ENV S). (3-0) Cr. 3. F.  
Comprehensive overview of the field of environmental planning and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.  

**C R P 301. Planning Methods Studio.**  
(3-2) Cr. 4. S. Prereq: STAT 101 or STAT 104  
An introduction to the methods and analytical techniques used by planners to study community change. Course includes identification of key sources of planning information and data. Students learn to use quantitative methods for analysis of population, land use, economic and transportation data. Students learn to apply basic analytic methods to community problems and learn the art of effective written, graphic, and oral presentation of data.  

**C R P 320. Urban Form.**  
(Cross-listed with C R P 420). (3-0) Cr. 3. Alt. S. offered 2013. Prereq: C R P 253 or C R P 270, or permission of instructor  
Examines how urban form is shaped, what constitutes good urban form, and what are the trends in emerging urban forms. Descriptive, explanatory and normative theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.  

**C R P 330. Practicum.**  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Major in community and regional planning  
Structured work experience under close supervision of a professional planner. Practical planning experience; relationships between theory and practice, professional responsibilities, and the scope of various planning roles.  

**C R P 331. Professional Practice Seminar.**  
(Dual-listed with C R P 531). (1-0) Cr. 1. S. Prereq: Major in community and regional planning  
Preparation for working in a planning office; discussion of expectation of employer; presentations from planning professionals, and discussion of differences/similarities between public and private planning offices. Offered on a satisfactory-fail basis only.  

**C R P 376. Rural, Urban and Regional Economics.**  
(Cross-listed with ECON). (3-0) Cr. 3. Prereq: ECON 101  
Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime. Nonmajor graduate credit.  

**C R P 383. Theory of the Planning Process.**  
(3-0) Cr. 3. S. Prereq: C R P 253 and Junior classification  
The nature of planning and its relation to social and economic planning; levels of planning, place of planning in decision making; steps in the planning process, uses and limitation of knowledge in planning, relation of facts and values.  

**C R P 416. Urban Design and Practice.**  
24 cr. from:

C R P 391. Field Travel. 
Cr. 1-2. Repeatable. F.S. Prereq: CRP major and permission of instructor
Observation of professional practice and community or regional problems and issues. Offered on a satisfactory-fail basis only.

C R P 410. Professional Work Experience. 
Cr. R. F.S.SS. Prereq: Permission of department chair
Approved professional work experience.

C R P 416. Urban Design and Practice. 
(Dual-listed with C R P 516). (3-6) Cr. 6. S. Prereq: C R P 253 or C R P 270
Principles of urban design and their application to residential and commercial development in studio projects.

C R P 417. Urban Revitalization. 
(Dual-listed with C R P 517). (Cross-listed with DSN S). (3-0) Cr. 3. S.
Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 425. Growth Management. 
(Dual-listed with C R P 525). (Cross-listed with DSN S). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Junior classification
Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

(Dual-listed with C R P 529). (Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: Junior classification
Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C R P 432. Community Planning Studio II. 
(1-6) Cr. 6. F.S. Prereq: C R P 201, 301

(Dual-listed with C R P 535). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: C R P 253, C R P 270, or Junior classification
Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today’s society.

(Dual-listed with C R P 536). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Sophomore classification
The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

(3-0) Cr. 3. Alt. F., offered 2011. Prereq: Sophomore classification
The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

C R P 442. Site Development. 
(Dual-listed with C R P 542). (Cross-listed with DSN S). (3-0) Cr. 3. S.
Introduction to site development including site review. Studio project integrating concept, finance, selection, analysis, and design.

(Dual-listed with C R P 545). (3-6) Cr. 3. F. Prereq: C E 350 or equivalent
Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

(2-2) Cr. 3. F.S.SS.
Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data conversion, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 452. Geographic Data Management and Planning Analysis. 
(Dual-listed with C R P 552). (2-2) Cr. 3. F.S. Prereq: C R P 451 or equivalent
Extensive coverage of geo-relational database concept and design. GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 475. Grant Writing. 
(Dual-listed with C R P 575). (1-0) Cr. 1. F.
A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 481. Regional and State Planning. 
(Dual-listed with C R P 581). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: C R P 253 or C R P 270
Analysis of theories, policies, and functions at the metropolitan, regional, and state levels with emphasis on area-wide governance structures and strategies for guiding development.

C R P 484. Sustainable Communities. 
(Dual-listed with C R P 584). (Cross-listed with DSN S, ENV S). (3-0) Cr. 3. S. Prereq: Junior classification

C R P 490. Independent Study. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: Written approval of instructor and department chair on required form
Investigation of an approved topic commensurate with student’s interest and ability. Offered on a satisfactory-fail basis only.

C R P 490H. Independent Study: Honors. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: Written approval of instructor and department chair on required form
Investigation of an approved topic commensurate with student’s interest and ability. Offered on a satisfactory-fail basis only.

(Dual-listed with C R P 591). (Cross-listed with DSN S, ENV S, L A). (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences
Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 492. Planning Law, Administration and Implementation. 
(3-0) Cr. 3. F. Prereq: C R P 383
The basis in constitutional, common, and statutory law for the powers of plan implementation. Problems of balancing public and private interests as revealed in the study of leading court cases. Administration of planning agencies and programs.

C R P 494. Senior Seminar in Planning. 
Cr. 1-3. Repeatable, maximum of 2 times. F.S. Prereq: Senior classification; C R P 332 should be taken prior to or concurrently.
An advanced forum for seniors that focuses upon recent trends and important issues affecting planning today. Topics addressed will vary. A demonstration of understanding of current issues and their effects upon planning applications is expected.

C R P 498. Portfolio Development and Review. 
(1-0) Cr. 1. F.S.
Should be taken in the final semester of the planning program. Preparation of a portfolio of student work that represents student learning throughout the entire planning program.

Courses primarily for graduate students, open to qualified undergraduates:

C R P 510. Professional Work Experience. 
Cr. R. F.S.SS. Prereq: Permission of department chair
Approved professional work experience.

C R P 516. Urban Design Practice. 
(Dual-listed with C R P 416). (3-6) Cr. 6. S. Prereq: Graduate classification
Principles of urban design and their application to residential and commercial development in studio project.
C.R.P 517. Urban Revitalization.
(Dual-listed with C.R.P 417). (Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: Graduate classification
Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C.R.P 519. Middle Eastern Cities.
(Cross-listed with ARCH). (3-0) Cr. 3. Prereq: Graduate or Senior classification
Introduction to basic academic writings on Middle Eastern cities in addition to other contemporary cultural productions of the region. Study of various aspects of Middle Eastern life and the built environments that this life produces. Meets International Perspectives Requirement.

(Dual-listed with C.R.P 425). (Cross-listed with DSN S). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Graduate classification
Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban, rural relationships; and land preservation.

(Dual-listed with C.R.P 429). (Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: Graduate classification
Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C.R.P 530. Practicum.
Cr. 1-3. Repeatable. F.S.S. Prereq: Graduate classification in Community and Regional Planning
Practical planning experience. Structured work in range of tasks under close supervision of a professional planner. Relationships between theory and practice, exposure to variety of roles in functioning specialties. Offered on a satisfactory-fail basis only.

C.R.P 531. Professional Practice Seminar.
(Dual-listed with C.R.P 331). (1-0) Cr. 1. S. Prereq: Graduate classification
Preparation for working in a planning office; discussion of expectations of employer; presentations from planning professionals, and discussion of differences and similarities between public and private planning offices. Offered on a satisfactory-fail basis only.

(Cross-listed with DSN S). (1-4) Cr. 3. F. Prereq: C.R.P 564 or equivalent
Comprehension and analysis of various geographic contexts pertinent to community planning and the use of planning theory, tools and techniques in an applied setting. Process of making a community plan: historical patterns, current conditions and strategies for planning.

(Dual-listed with C.R.P 435). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: Graduate classification
Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today's society.

(Dual-listed with C.R.P 436). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Graduate classification
The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

C.R.P 542. Site Development.
(Dual-listed with C.R.P 442). (Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: Graduate classification
Introduction to site development, including site review. Studio project integrating concept, finance, selection, analysis, and design.

C.R.P 545. Transportation Policy Planning.
(Dual-listed with C.R.P 445). (3-0) Cr. 3. F. Prereq: Graduate classification
Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Tools like policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

(2-2) Cr. F.S.S.S. Prereq: Graduate classification
Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data conversion, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

(Dual-listed with C.R.P 452). (2-2) Cr. 3. S. Prereq: C.R.P 551
Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C.R.P 553. Analytical Planning/GIS.
(2-2) Cr. 3. F. Prereq: C.R.P 451/C.R.P 551
Integration of exploratory, participatory and predictive spatial analyses and 3D visualization into the planning process. GIS tools and techniques are used to automate decision analysis and facilitate future planning in analyzing and visualizing planning actions. Laboratory emphasizes practical uses of GIS tools and techniques.

(3-0) Cr. 3. S.
Use and development of theory/action relationship in planning practice. Competing normative theories of planning and their evolution, key components and fundamental critiques. Exploration of planning frameworks and approaches, including comprehensive planning; incrementalism; advocacy; communicative rationality; and others.

C.R.P 563. Planning the American Metropolis.
(Cross-listed with DSN S). (3-0) Cr. 3. F.
Focus on the historical role of planning in the shaping of American cities and regions, from the beginning of the Republic to the present. Examine the legacy of planning by exploring the intersection of design, politics and policy. Investigate the factors and the processes that produce the built environment.

C.R.P 564. Introduction to Analytical Methods for Planning.
(3-0) Cr. 3. F.
Applications of analytical methods in planning with emphasis on the collection, description, analysis, presentation, and interpretation of planning data. Introduction to descriptive statistics. Sources of planning information and data including primary and secondary data types and sources. Demographic analysis, population projection techniques for planning at local and regional levels.

(Cross-listed with DSN S). (3-0) Cr. 3. F.
Principles and methods for analyzing communities and regions as social political, economic, and ecological systems. Exploration of relationships between individuals and institutions, the economy and governance. Examination of social values and their manifestation in decision making methods used in planning. Application of decision making tools for planning problems involving economic analysis, power relations, environmental impacts and social impacts. Project evaluation methods.

C.R.P 568. Planning and Development.
(3-0) Cr. 3. S. Prereq: C.R.P 564 or equivalent
Exploration and evaluation of the techniques, processes, and professional skills required to effectively manage land use change at various scales. Land classification systems; land supply and needs inventory for residential uses and commercial and employment centers; capacity and needs analysis for public infrastructure. Includes land use planning project(s) designed to apply the methods explored in this and other courses.

C.R.P 575. Grant Writing.
(Dual-listed with C.R.P 475). (1-0) Cr. 1. F. Prereq: Graduate classification
A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C.R.P 581. Regional and State Planning.
(Dual-listed with C.R.P 481). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: Graduate classification
Analysis of theories, policies, and functions at the metropolitan, regional, and state levels with emphasis on area-wide governance structures and strategies for guiding development.

C.R.P 584. Sustainable Communities.
(Dual-listed with C.R.P 484). (Cross-listed with DSN S, ENV S). (3-0) Cr. 3. S.
Prereq: Graduate classification
Courses for graduate students:

C R P 590. Special Topics.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590A. Special Topics: Planning Law, Administration and Implementation.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590B. Special Topics: Economic Development.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590C. Special Topics: Urban Design.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590D. Special Topics: Housing and Urban Revitalization.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590H. Special Topics: Environmental Planning.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590I. Special Topics: Land Use and Transportation Planning.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590N. Special Topics: International Planning.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590O. Special Topics: Spatial Analytical Methods.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590P. Special Topics: Planning in Small Towns.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590Q. Special Topics: Diversity and Equity in Planning.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590R. Special Topics: Geographic Information Systems.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

(Dual-listed with C R P 491). (Cross-listed with DSN S, ENV S, L A). (3-0) Cr. 3. S. Prereq: Graduate classification

Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 592. Land Use and Development Regulation Law.
(3-0) Cr. 3. F.

An in-depth analysis of the legal constructs that shape the practice of planning and plan implementation in the United States. An exploration of how land use regulations are applied to reconcile the competing needs and diverse uses of land. The positive and negative consequences of developing and implementing regulatory controls will be addressed.

C R P 595. Seminar in GIS Applications/Research.
(1-0) Cr. 1. F.S. Prereq: 9 credits in GIS Certificate program

Discussion and demonstration of current GIS applications and research in multiple disciplines. Offered on a satisfactory-fail basis only.

Cr. arr. Repeatable.

Independent planning project with practical application, including research element.

Design Studies

Interdepartmental Undergraduate Program
http://www.design.iastate.edu

The Design Studies program brings together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design fields.

Core Design Program

Three Design Studies courses -- Design Studio 1 (DSN 102), Design Representation (DSN 131), and Design Cultures (DSN 183) are part of the Core Design Program, which is required for all undergraduate students in the College of Design.

Minor—Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, the built environment, media and technology, design in everyday life, and models of professional practice. The minor is open to all undergraduates at Iowa State University.

Minor—Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for multi-disciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

Minor—Digital Media

The undergraduate minor in Digital Media covers the knowledge and techniques for applying digital representations to generate designs and art. The body of knowledge specializes in the fields of art, design, and planning. This minor is open to all undergraduate students at Iowa State University.

Additional information about minors is available in the Student Programs and Services Office, 297 College of Design.

Bachelor of Design

The Bachelor of Design is a 122.5 credit undergraduate degree program focused on the interdisciplinary nature of design and the power of the design studio as a place and method for generating ideas and solving problems. The core of the degree program is a series of forums and studios intended to connect history, theory and practice, and give students hands-on experience grappling with design challenges that vary in complexity and scale.

The Bachelor of Design offers opportunities for students to engage design thinking in a collaborative environment focused on addressing contemporary real-world problems and opportunities. Thematic course modules taught by faculty in multiple design disciplines will incorporate methods that artists, designers, and planners use to creatively address contemporary issues such as sustainable living environments, energy efficiency, water and food systems, transportation networks, climate change, and social entrepreneurship. Graduate of this degree are not design professionals but the curriculum prepares students to work as part of a team in a variety of disciplinary settings from design professions to journalism, business, law, engineering, arts, and public service. To that end, the curriculum allows students to pursue double majors to couple design thinking with other discipline of interest. Upon completion, students may also choose to enter graduate programs in the design professions or other fields in which design thinking and critical analysis are valued.

Graduate Study

Major - Master of Urban Design

The Master of Urban Design (M.U.D.) is an advanced, interdisciplinary program of study that focuses on contemporary challenges of urbanism at local, regional and global scales. The workshop-based program is geared toward students with previous professional degrees in architecture (BArch, MArch), landscape architecture (BLA, MLA) or planning (BCSCP, MCRP, MUP), and relevant professional experience. The program draws faculty from these and other related disciplines within the college and university.

In this three-semester (summer, spring, fall), 36-credit degree program, students integrate design into the understanding and framing of urbanized environments by
engaging directly in a community of inquiry and practice—learning to create more adaptable, flexible and resilient cities and regions within the context of a changing world.

Through this program, students will:
• gain knowledge of new practices, technologies, and methods of urban design.
• learn advanced thinking skills and integrate concepts, ideas and approaches in a team-based, interdisciplinary design process, and
• acquire knowledge and skills that support professional leadership in research and design work focused on local, regional and global issues in the contemporary built environment.

The MUD program also offers special opportunities to participate in the ISU College of Design’s design-based outreach and international programs, and to engage in collaborative studio projects with universities and practitioners from around the world.

Application information is available at
http://www.design.iastate.edu/urbanデザイン.php

Major - Master of Design in Sustainable Environments

The Master of Design in Sustainable Environments (M.D.S.E.) is a post-professional degree that focuses on sustainable design strategies, systems and materials for environmental and product design. The program addresses ways to envision, make and remake landscapes, communities, buildings, objects and images that conserve resources, ameliorate ecological problems and promote social, political and economic justice.

This three-semester, 35-credit graduate course of study offers opportunities to work on a variety of faculty-directed projects that may include funded research, community-based design work and theoretical investigations. The program addresses sustainable design at multiple scales, engaging both systems and artifacts.

Through this degree program, students will:
• gain awareness of individual professional roles and responsibilities for practices, technologies and methods of design for sustainability.
• learn to collaborate in a team-based, interdisciplinary design process, and
• acquire new knowledge, tools and strategies for sustainable design practices in the development of opportunities and markets for engineers, artists and designers.

The interdisciplinary MDesSE is geared toward students who hold professional degrees in art, architecture, landscape architecture, interior design, graphic design, industrial design, planning and/or engineering.

Application information is available at
http://www.design.iastate.edu/sustainableenvironments.php

Courses

Courses primarily for undergraduates:

DSN S 102. Design Studio I. (1-6) Cr. 4.
A core design studio course exploring the interaction of two-and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Investigation of creative process, visual order and materials, and development of critical thinking through studio projects and lectures. Includes study of precedents, contemporary design practices and disciplines in their cultural contexts.

DSN S 110. Design Exchange Seminar I. (0-2) Cr. 1. F. Prereq: Member of Design Exchange Learning Community
Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.

DSN S 111. Design Exchange Seminar II. (0-2) Cr. 1. S. Prereq: Member of Design Exchange Learning Community
Development and clarification of career and academic plans. Offered on a satisfactory-fail basis only.

DSN S 115. Design Collaborative Seminar. (1-0) Cr. 0.5. Prereq: Member of Design Collaborative Learning Community
Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.

DSN S 131. Design Representation. (1-6) Cr. 4.
An introduction to drawing through lecture and studio experiences. Focus on creative problem solving and communication in order to give visual form to ideas. Emphasis on perceptual, conceptual, and evaluative abilities through experiences that build eye, brain, and hand coordination. Explorations include drawing from observation and memory, working at various scales and duration, and using a variety of media and processes.

DSN S 181. Origins and Evolution of Modern Design. (Cross-listed with ART H). (3-0) Cr. 3. F.S.
History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

DSN S 183. Design Cultures. (3-0) Cr. 3.
A broad-based exploration of the dynamic relationship between design and culture, employing case study method to investigate particular examples of cultural production in contemporary society. Design processes and design works are presented as culturally, economically, environmentally, historically, ideologically, politically, and socially grounded events and artifacts.

DSN S 221. History of Architecture I. (Cross-listed with ARCH). (3-0) Cr. 3. F.
Survey of western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. Ancient through 1750. Meets International Perspectives Requirement.

DSN S 222. History of Architecture II. (Cross-listed with ARCH). (3-0) Cr. 3. S.
Survey of western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. 1750 to present. Meets International Perspectives Requirement.

DSN S 232. Digital Design Communications. (3-0) Cr. 3.
Introductory investigations of various digital design media to develop multi-dimensional problem solving, digital communication skills and perceptual sensitivity. Open to all university majors.

DSN S 274. The Social and Behavioral Landscape. (Cross-listed with L.A). (3-0) Cr. 3. S.
Exploration of social and behavioral factors pertinent to design of the domestic, civic, and commercial landscape. Focus on working familiarity with design principles as they relate to the behavior and activities of people across a broad demographic and cultural spectrum; application of these principles to design of outdoor environments. Lectures and discussions, including group exercises and field trips. Meets U.S. Diversity Requirement
DSN S 280. History of Art I. (Cross-listed with ART H) (3-0) Cr. 3. F.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. Meets International Perspectives Requirement.

DSN S 280H. History of Art I: Honors. (Cross-listed with ART H) (3-0) Cr. 4. F.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. Meets International Perspectives Requirement.

DSN S 281. History of Art II. (Cross-listed with ART H) (3-0) Cr. 3. S.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. Meets International Perspectives Requirement.

DSN S 281H. History of Art II: Honors. (Cross-listed with ART H) (3-0) Cr. 3. S.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. Meets International Perspectives Requirement.

DSN S 291. World Cities and Globalization. (Cross-listed with C R P) (3-0) Cr. 3. F.
World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity. Meets International Perspectives Requirement.

DSN S 292. Introduction to Visual Culture Studies. (Cross-listed with ART H) (3-0) Cr. 3. F.S.
An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields. Meets U.S. Diversity Requirement

DSN S 293. Environmental Planning. (Cross-listed with C R P, ENV S) (3-0) Cr. 3. F.
Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

DSN S 301. Study Abroad Preparation Seminar. (1-0) Cr. 1. Repeatable.
Cultural introduction to host country, introduction to faculty sponsor and program of study, the particulars of traveling and living abroad, and financial and logistical preparations. Guest lectures. Required of all students planning to participate in a College of Design study abroad program for 9 or more credits. Offered on a satisfactory-fail basis only.

DSN S 302. Design Leadership Seminar. (1-2) Cr. 2. Repeatable, maximum of 4 credits. Prereq: Selection as a peer mentor for the Core Design program.
For students serving as peer mentors for the Core Design Program, under faculty supervision. Development of teaching and leadership skills within the context of design education experiences. Offered on a satisfactory-fail basis only.

DSN S 303. Design Ambassadors. (1-2) Cr. 1-2. Repeatable, maximum of 4 credits. Prereq: Admittance into one of the professional programs in the College of Design.
Opportunity to strengthen leadership, communication and presentation skills. Introduction to student development theory. Students participate in collaborative projects focused on prospective design students. Offered on a satisfactory-fail basis only.

DSN S 310. Practical Experience. Cr. R. Prereq: Permission of adviser or Coordinator of Design Studies
Independent educational enrichment through practical experience. Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less.

DSN S 320. Urban Form. (Cross-listed with C R P) (3-0) Cr. 3. Alt. S., offered 2013. Prereq: C R P 253 or C R P 270, or permission of instructor.
Examines how urban form is shaped, what constitutes good urban form, and what are the trends in emerging urban forms. Descriptive, explanatory and normative theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.

DSN S 321. History of the American City. (Cross-listed with ARCH) (3-0) Cr. 3. Prereq: Sophomore classification
Study of the development of the built environment and urban condition in the United States from the colonial period to today. Through the theme of infrastructure, primary attention is given to urban spatial organization, built form, technological change, regulatory and funding patterns, and social categories such as class, race, and gender. Nonmajor graduate credit. Meets U.S. Diversity Requirement

DSN S 351. Whole Building Energy Performance Modeling. (Cross-listed with ARCH) (3-0) Cr. 3. S. Prereq: ARCH 202, 245, 341. Open to non-majors by permission of instructor.
Architectural design, design evaluation and technical analysis using energy performance modeling tools. Emphasis will be given to whole building energy efficiency including passive and active systems integration.

DSN S 371. History of Modern Landscapes, 1750 to Present. (Cross-listed with L A) (3-0) Cr. 3. S.
Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

DSN S 372. Gardens and Landscapes from Antiquity to 1750. (Cross-listed with L A) (3-0) Cr. 3. F.
Investigation of international landscape design concepts and trends as observed over time, from pre-history to the mid 18th century. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers. Meets International Perspectives Requirement.

DSN S 396. History of Photography. (Cross-listed with ART H). (3-0) Cr. 3. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools. Nonmajor graduate credit.

DSN S 397. Internship Search Seminar. (1-0) Cr. 1. F. Prereq: Sophomore classification or above in one of the College of Design degree programs A structured environment to set realistic learning goals, research potential sites, develop a strategy, develop essential job search materials and skills for finding an internship. Successfully obtaining an internship either for credit or non-credit is encouraged but not required. Offered on a satisfactory-fail basis only.

DSN S 417. Urban Revitalization. (Dual-listed with DSN S 517). (Cross-listed with C R P). (3-0) Cr. 3. S. Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

DSN S 425. Growth Management. (Dual-listed with DSN S 525). (Cross-listed with C R P). (3-0) Cr. 3. F. Prereq: 2011. Prereq: Junior classification Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

DSN S 426. Topics in Native American Architecture. (Cross-listed with AM IN, ARCH). (3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: Junior classification History, theory, and principles of Native American/Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture. Nonmajor graduate credit. A maximum of 6 credits of ARCH 426 may be applied to degree program. Meets U.S. Diversity Requirement

DSN S 429. International Planning. (Dual-listed with DSN S 529). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Junior classification Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

DSN S 442. Site Development. (Dual-listed with DSN S 542). (Cross-listed with C R P). (3-0) Cr. 3. S. Introduction to site development including site review. Studio project integrating concept, finance, selection, analysis, and design.

DSN S 445. Public Art/Public Space. (3-0) Cr. 3. Prereq: Junior Standing. DSN S 102, DSN S 131, DSN S 183 Exploration of the history, precedents, and practice of public art and public space with a focus on developments since 1970 in the United States and abroad. Course includes development of a proposal for a site specific work of art. Meets U.S. Diversity Requirement

DSN S 446. Interdisciplinary Design Studio. (0-12) Cr. 4-6. Repeatable, maximum of 18 credits. Prereq: Junior classification in a curriculum in the College of Design and permission of instructor Advanced interdisciplinary design projects.

DSN S 446H. Interdisciplinary Design Studio: Honors. (0-12) Cr. 5-7. Repeatable, maximum of 18 credits. Prereq: Junior classification in a curriculum in the College of Design and permission of instructor Advanced interdisciplinary design projects.

DSN S 478. Landscape Architecture. (Dual-listed with DSN S 578N). (Cross-listed with L A). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478A. Landscape Architecture: Landscape Design. (Dual-listed with DSN S 578A). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478B. Landscape Architecture: Planting Design. (Dual-listed with DSN S 578B). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478C. Landscape Architecture: Construction. (Dual-listed with DSN S 578C). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478D. Landscape Architecture: History/Theory/Criticism. (Dual-listed with DSN S 578D). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478E. Landscape Architecture: Landscape Planning. (Dual-listed with DSN S 578E). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478F. Landscape Architecture: Urban Design. (Dual-listed with DSN S 578F). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478G. Landscape Architecture: Graphics. (Dual-listed with DSN S 578G). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478H. Landscape Architecture: Honors. (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478I. Landscape Architecture: Interdisciplinary Studies. (Dual-listed with DSN S 578I). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478J. Landscape Architecture: International Studies. (Dual-listed with DSN S 578J). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478K. Landscape Architecture: Computer Applications. (Dual-listed with DSN S 578K). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 371 or senior classification or graduate standing Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.
DSN S 478L. Landscape Architecture: Ecological Design.  
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478M. Landscape Architecture: Social/Behavioral.  
(Dual-listed with DSN S 578M). (Cross-listed with L.A.). Cr. 2-3. Repeatable, maximum of 3 times. F.S.S.S. Prereq: L.A. 371 or senior classification or graduate standing. 
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478N. Landscape Architecture: Natural Resources.  
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 481. Art and Architecture of India.  
(Dual-listed with DSN S 581). (Cross-listed with ART H). (3-0) Cr. 3. Survey of Indian-style art and architecture through history. Examine how art and architecture developed in the Indian world has come to define the Indian identity religiously, socially, culturally, and politically. Nonmajor graduate credit. 
Meets International Perspectives Requirement.

DSN S 484. Sustainable Communities.  
(Dual-listed with DSN S 584). (Cross-listed with C R P, ENV S). (3-0) Cr. 3. S. Prereq: Junior classification. 

DSN S 486. Design: Made in Italy.  
(Cross-listed with ARCH). (3-0) Cr. 3. S. An investigation of the history of Italian design in its contemporary form as part of International study abroad program in Rome.

DSN S 487. Nineteenth Century Art.  
(Dual-listed with DSN S 587). (Cross-listed with ART H). (3-0) Cr. 3. European and American art and architecture from 1780 to 1900 focusing on the major movements of western Europe, including: Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism. Nonmajor graduate credit. 

DSN S 489. History of Comics.  
(Dual-listed with DSN S 589). (Cross-listed with ART H). Cr. 3. An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present. Nonmajor graduate credit.

DSN S 489H. History of Comics: Honors.  
(Cross-listed with ART H). Cr. 3-4. An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present. Nonmajor graduate credit.

DSN S 490. Independent Study.  
Cr. 1-4. Repeatable, maximum of 9 credits. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

DSN S 490A. Independent Study: History.  
Cr. 1-4. Repeatable, maximum of 9 credits. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

DSN S 490B. Independent Study: Technology.  
Cr. 1-4. Repeatable, maximum of 9 credits. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

DSN S 490C. Independent Study: Communications.  
Cr. 1-4. Repeatable, maximum of 9 credits. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

DSN S 490D. Independent Study: Design.  
Cr. 1-4. Repeatable, maximum of 9 credits. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

DSN S 490E. Independent Study: Entrepreneurship.  
Cr. 1-4. Repeatable, maximum of 9 credits. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

DSN S 490F. Independent Study: Social/Behavioral.  
Cr. 1-4. Repeatable, maximum of 9 credits. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

DSN S 490G. Independent Study: Outreach.  
Cr. 1-4. Repeatable, maximum of 9 credits. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

DSN S 490H. Independent Study: Honors.  
Cr. 1-4. Repeatable, maximum of 9 credits. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

DSN S 490I. Independent Study: Sustainability.  
Cr. 1-4. Repeatable, maximum of 9 credits. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student. Offered on a satisfactory-fail basis only. Nonmajor graduate credit.

(Dual-listed with DSN S 591). (Cross-listed with C R P, ENV S, L A). (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences. Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

DSN S 492. Introduction to Italian Culture.  
(1-0) Cr. 1. Repeatable, maximum of 3 credits. Prereq: Enrollment in the College of Design Rome Study Abroad Program. Introduction to Italian contemporary culture for design students, including food, religion, fashion, politics, media, and social mores.

DSN S 494. Women/Gender in Art.  
(Dual-listed with DSN S 594). (Cross-listed with ART H, W S). (3-0) Cr. 3. Prereq: Graduate classification and permission of instructor. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture. 
Meets U.S. Diversity Requirement.

DSN S 498. Selected Topics in Art History.  
(Dual-listed with DSN S 598). (Cross-listed with ART H). (3-0) Cr. 3. Repeatable, maximum of 9 credits. 
Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Courses primarily for graduate students, open to qualified undergraduates:

DSN S 517. Urban Revitalization.  
(Dual-listed with DSN S 417). (Cross-listed with C R P). (3-0) Cr. 3-5. S. Prereq: Graduate classification. Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between urban form and urban development; public policy implications.

DSN S 525. Growth Management.  
(Dual-listed with DSN S 425). (Cross-listed with C R P). (3-0) Cr. 3. Alt. F., offered 2011. Prereq: Graduate classification. Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban, rural relationships; and land preservation.

(Cross-listed with ARCH). (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing.

DSN S 528A. Studies in Architecture.  
(Cross-listed with ARCH). (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing.
DSN S 529B. Studies in Architecture: Technology. (Cross-listed with ARCH). (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

DSN S 529C. Studies in Architecture: Communications. (Cross-listed with ARCH). (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

DSN S 529D. Studies in Architecture: Design. (Cross-listed with ARCH). (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

DSN S 529E. Studies in Architecture: Practice. (Cross-listed with ARCH). (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

DSN S 529. International Planning. (Dual-listed with DSN S 429). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Graduate classification

Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

DSN S 532. Community Planning Studio. (Cross-listed with C R P). (1-4) Cr. 3. F. Prereq: C R P 564 or equivalent

Comprehension and analysis of various geographic contexts pertinent to community planning and the use of planning theory, tools and techniques in an applied setting. Process of making a community plan: historical patterns, current conditions and strategies for planning.

DSN S 542. Site Development. (Dual-listed with DSN S 442). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Graduate classification

Introduction to site development, including site review. Studio project integrating concept, finance, selection, analysis, and design.

DSN S 546. Interdisciplinary Design Studio. (Cross-listed with C R P). (0-12) Cr. 4-6. Repeatable, maximum of 18 credits. Prereq: Graduate or senior standing in the College of Design and permission of instructor

Advanced interdisciplinary design projects.

DSN S 558. Sustainability and Green Architecture. (Cross-listed with ARCH). (3-0) Cr. 3. F. Prereq: Graduate classification

Issues of Sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment; Issues of Green Architecture as it relates to building material selection, systems of building materials, the environment of the United States and the World, architects and examples of buildings with green or sustainable designations.

DSN S 563. Planning the American Metropolis. (Cross-listed with C R P). (3-0) Cr. 3. F.

Focus on the historical role of planning in the shaping of American cities and regions, from the beginning of the Republic to the present. Examine the legacy of planning by exploring the intersection of design, politics and policy. Investigate the factors and the processes that produce the built environment.

DSN S 566. Values and Decision Making. (Cross-listed with C R P). (3-0) Cr. 3. F.

Principles and methods for analyzing communities and regions as social political, economic, and ecological systems. Exploration of relationships between individuals and institutions, the economy and governance. Examination of social values and their manifestation in decision making methods used in planning. Application of decision making tools for planning problems involving economic analysis, power relations, environmental impacts and social impacts. Project evaluation methods.

DSN S 567. Preservation, Restoration, and Rehabilitation. (Cross-listed with ARCH). (3-0) Cr. 3. S. Prereq: Senior classification

Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

DSN S 571. Design for All People. (Cross-listed with ARCH, GERON). (3-0) Cr. 3. S. Prereq: Graduate or Senior classification

Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Meets U.S. Diversity Requirement

DSN S 575. Contemporary Urban Design Theory. (Cross-listed with ARCH). (3-0) Cr. 3. S. Prereq: Graduate or Senior classification

Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

DSN S 578A. Landscape Architecture: Landscape Design. (Dual-listed with DSN S 478A). (Cross-listed with L A). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing

Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578B. Landscape Architecture. (Dual-listed with DSN S 478B). (Cross-listed with L A). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing

Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578C. Landscape Architecture: Landscape Planning. (Dual-listed with DSN S 478C). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification

Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578D. Landscape Architecture: History/Theory/Criticism. (Dual-listed with DSN S 478D). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification

Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578E. Landscape Architecture: Construction. (Dual-listed with DSN S 478E). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification

Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578F. Landscape Architecture: Urban Design. (Dual-listed with DSN S 478F). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification

Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578G. Landscape Architecture: Graphics. (Dual-listed with DSN S 478G). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification

Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578H. Landscape Architecture: Interdisciplinary Studies. (Dual-listed with DSN S 478H). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification

Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.
Graduate Study

The department offers the degrees of Master of Fine Arts (M.F.A.) in Graphic Design, Master of Arts (M.A.) in Graphic Design, and Master of Arts (M.A.) in Graphic Design with a specialization in environmental graphic design.

M.F.A. graduates in Graphic Design are skilled in communication design, problem solving, and are adept in the use of visual language, symbology, and interaction. Graduates are proficient in the design of communications and the use of technologies that incorporate human interaction with environments, objects, and electronic and traditional publications. The M.F.A. is recognized as the terminal degree in the graphic design field. The degree requires completion of a written thesis integrating theory, research, and design problem solving.

The M.A. in Art and Design with a specialization in graphic design requires a minimum of 36 credits including seminar courses in art and design, a studio concentration, a history course, a business practice course, and a capstone course in graphic design. Graduate students selecting the M.A. in graphic design will focus on a first professional degree.

The M.A. in Art and Design with a specialization in environmental graphic design requires a minimum of 34 credits including a seminar course in art and graphic design, a studio concentration, and the completion of a capstone course in environmental graphic design. Graduate students selecting the M.A. in environmental graphic design will focus on a first professional degree.

Undergraduate Study

The department offers the degree Bachelor of Fine Arts (B.F.A.) in Graphic design.

B.F.A. Graphic Design. Emphasis is on creative problem solving, design process, visual organization and communication media, and interaction design. Graphic design graduates effectively integrate abstract thinking skills such as communication design theory, history, methodology, and technology. Components of visual communication including typography, symbolism, time-based media, information design, branding, image creation, and other communication systems are integrated with an understanding of professional practice.
Curriculum in Graphic Design

The Curriculum in Graphic Design leads to a 123.5 credit undergraduate Bachelor of Fine Arts in Graphic Design including the 30 credit core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes.

Arrangements for this process must be made with department advisors.

A 34 graduate credit program is offered leading to the Master of Arts specialized in Environmental Graphic Design for students planning to undertake professional degree. (NOTE: Students without a degree in background in environmental graphic design may be required to complete up to 15 additional credits of coursework).

A 30 graduate credit program is offered leading to the Master of Arts specialized in Graphic Design for students planning to undertake professional degree. (NOTE: Applicants without a degree in background in graphic design may be required to complete up to 16 additional credits of coursework).

A 60 graduate credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

For more complete graduate program descriptions see Graduate Study under the degree Master of Fine Arts.

Total Degree Requirement: 123.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 10 cr.

Admission to the graphic design program through department review

Basic design concepts and color principles used for visual communication.

Principles of typographic composition, structure and hierarchy. Formal and conceptual principles of symbology.

Principles of typographic composition, structure and hierarchy. Formal and conceptual principles of symbology.
ARTGR 272. Digital Photography for Graphic Design. (0-6) Cr. 3. F.S. Prereq: Concurrent enrollment in ARTGR 270 OR ARTGR 271
This course will address the development of "seeing" as a medium design, expression, and visual communication including compositional dynamics, advanced digital image manipulation, software usage and support, digital camera operations along with scanning and other digital input devices, color management, digital format for presentation and printing with digital ready formats.

ARTGR 275. Graphic Technology I. (0-4) Cr. 2. F. Prereq: concurrent enrollment in ARTGR 270
Basic 2-dimensional computer skills for graphic design.

ARTGR 276. Graphic Technology II. (1-2) Cr. 2. S. Prereq: ARTGR 275 and concurrent enrollment in ARTGR 271
Basic 3-dimensional computer skills for graphic design.

ARTGR 281. Visual Communication and Branding. (3-0) Cr. 3. F.
Introduction to basic principles of visual communication that contribute to the successful comprehension of intended visual messages; these include promotional messages, such as corporate branding and marketing campaigns, as well as informational messages, such as those used in computer interface design or in the clear presentation of diagrammatic data. Emphasis is placed on sensitivity to the diversity of the intended American or global audience, and to the cross-cultural differences that may affect the ways that visual messages are interpreted. Methods for creating brand experiences are explored as they apply to both small and large enterprises, ranging from personal brand to corporate brand identities.

ARTGR 370. Graphic Design Studio III. (0-6) Cr. 3. F. Prereq: ARTGR 271, ARTGR 276, and credit or concurrent enrollment in ARTGR 387
Creation and design of images and symbols for communication. Application and integration of typography with images and symbols.

ARTGR 371. Graphic Design Studio IV. (0-6) Cr. 3. S. Prereq: ARTGR 370 and ARTGR 387
Development and preparation of design concepts for application to the printing and electronic publishing process. Creative problem-solving skills, introduction to systems design.

ARTGR 372. Graphic Design Materials and Processes. (3-0) Cr. 3. S. Prereq: Credit or concurrent enrollment in ARTGR 371
Lecture about the processes and materials involved in graphic design arts reproduction. Course covers pre-press, paper selection and specification, ink systems, type systems and fonts, output technology, printing presses and bindery operations.

ARTGR 377. Graphic Design Internship Seminar. (1-0) Cr. 1. F. Prereq: Credit or concurrent enrollment in ARTGR 370 or ARTGR 371
Procedural and ethical concerns related to the graphic design internship. Personal goals, preparation of resume and plans for internship. Study and tours of areas of interest within the graphic design profession.

ARTGR 378. Critical Issues in Graphic Design. (2-0) Cr. 2. Prereq: Credit or concurrent enrollment in ARTGR 370
Lecture, discussion and writing about the critical issues facing the communications field today and in the future.

ARTGR 387. Graphic Design History/Theory/ Criticism I. (Dual-listed with ARTGR 587). (3-0) Cr. 3. F. Prereq: ART H 280, ART H 281 and DSN S 183
Late nineteenth century to the 1990s. This course will explore the cultural, social, political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics. Nonmajor graduate credit.

ARTGR 388. Graphic Design History/Theory/ Criticism II. (Dual-listed with ARTGR 588). (3-0) Cr. 3. S. Prereq: ARTGR 387 or ART H 281 and DSN S 183
Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice. Nonmajor graduate credit.

Meets U.S. Diversity Requirement

ARTGR 391. Graphic Design Field Study. (0-1) Cr. 1. Repeatable, maximum of 2 credits. Prereq: Concurrent enrollment in 300 or 400 level graphic design studio course
Travel, study, and tours of areas of interest within the graphic design profession such as print production companies, design studios, and museums. Offered on a satisfactory-fail basis only.

ARTGR 470. Graphic Design Studio V. (0-6) Cr. 3. F. Prereq: ARTGR 371
Advanced design systems as applied to corporate identity and environmental graphic design. Symiology as an integrated component of communication systems.

ARTGR 471. Graphic Design Capstone. (0-10) Cr. 5. S. Prereq: ARTGR 470 or permission of instructor
Experience design and innovation in a multi-disciplinary design studio. Class will use unique research, design, evaluation, creativity, and innovation methodologies to solve human problems on special topics. Designed solutions will be in the form of products, artifacts, interfaces, information, and human environments.

ARTGR 472. Photography and Narrative Message. (Dual-listed with ARTGR 572). (0-6) Cr. 3. Prereq: Enrollment in ARTGR 370, ARTGR 371, ARTGR 470, or ARTGR 471
Photography as a tool for creating conceptually-driven images and metaphors. Emphasis is on photography as an evocative storytelling device for a range of audiences and design applications. Compositional and technical aspects are explored to ensure successful interpretation of the photograph’s intended message.

ARTGR 473. Multimedia Design. (Dual-listed with ARTGR 573). (0-6) Cr. 3. F.S. Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371, ARTGR 470, or ARTGR 482
The design of visual, aural and textual communication for electronic media.

ARTGR 474. Exhibition Design. (Dual-listed with ARTGR 574). (0-6) Cr. 3. F.S. Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371, ARTGR 470, or ARTGR 482
Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ARTGR 475. Advanced Typography. (Dual-listed with ARTGR 575). (0-6) Cr. 3. F.S. Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371, ARTGR 470 or ARTGR 482
Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ARTGR 476. Graphic Design Methodology. (Dual-listed with ARTGR 576). (0-6) Cr. 3. F.S. Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371, ARTGR 470 or ARTGR 482
Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ARTGR 477. Graphic Design Practicum. (0-6) Cr. 3. S. Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371, ARTGR 470 or ARTGR 482
Graphic design outreach and problem solving. Individual and group projects for non-profit clients selected by the instructor.

ARTGR 478. Web Design for E-Commerce/Graphic Applications. (Dual-listed with ARTGR 578). (0-6) Cr. 3. F.S. Prereq: Concurrent enrollment in ARTGR 370 or ARTGR 371 or ARTGR 470 or ARTGR 482
The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ARTGR 479. Wayfinding Design. (Dual-listed with ARTGR 579). (0-6) Cr. 3. S. Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371, ARTGR 470 or ARTGR 482
Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ARTGR 480. Graphic Design Internship. (3-0) Cr. 3. S.S. Prereq: ARTGR 377, 12 credits in graphic design; permission of instructor, registration in advance of enrollment
Graphic design experience in an off-campus professional environment.

ARTGR 481. Graphic Design Professional Practices. (3-0) Cr. 3. S. Prereq: Credit or concurrent enrollment in ARTGR 470
Professional design management: ethics, setting up a new business, client/designer relationships, contractual options, billing practices, and effective operating procedures.
ARTGR 482. Professional Presentation. 
(0-6) Cr. 3. S. Prereq: ARTGR 470 and concurrent enrollment in ARTGR 471 
Exploration and development of the graphic design portfolio and resume in electronic, 
print, and photographic form.

ARTGR 484. Selected Studies in Graphic Design. 
(Dual-listed with ARTGR 584). Cr. 1-3. Repeatable, maximum of 9 credits. Prereq: 
Permission of instructor 
Special issues related to graphic design. Topics vary each time offered.

ARTGR 490. Independent Study. 
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on 
required form in advance of semester of enrollment 
Student must have completed related graphic design coursework appropriate to 
planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490A. Independent Study: Theory, Criticism, and Methodology. 
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on 
required form in advance of semester of enrollment 
Student must have completed related graphic design coursework appropriate to 
planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490B. Independent Study: Two-Dimensional Design. 
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on 
required form in advance of semester of enrollment 
Student must have completed related graphic design coursework appropriate to 
planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490C. Independent Study: Three-Dimensional Design. 
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on 
required form in advance of semester of enrollment 
Student must have completed related graphic design coursework appropriate to 
planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490H. Independent Study: Honors. 
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on 
required form in advance of semester of enrollment 
Student must have completed related graphic design coursework appropriate to 
planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 491. Publication Design: Magazines. 
(Dual-listed with ARTGR 591). (0-6) Cr. 3. F. Prereq: Credit or concurrent enrollment 
in ARTGR 370 
The philosophy, concepts and structures of magazine design.

(Dual-listed with ARTGR 592). (0-6) Cr. 3. S. Prereq: Credit or concurrent enrollment 
in ARTGR 370 or ARTGR 371 
The philosophy, concepts and structures of book design.

ARTGR 493. Workshop. 
Cr. 1-3. Repeatable. Prereq: Evidence of satisfactory experience in area of 
specialization 
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

Courses primarily for graduate students, open to qualified undergraduates:

(0-6) Cr. 3. F. Prereq: Graduate classification in College of Design 
Theory and investigation of systems, structures, principles of visual organization, and 
typography for communication. Studio problems will be influenced by social, cultural, 
environmental, or technological factors.

ARTGR 571. Signs, Symbols, Images. 
(0-6) Cr. 3. S. Prereq: Graduate Classification in College of Design 
Investigation and application of signs, symbols and semiotic theory for 
communication. Studio problems influenced by social, cultural, environmental, or 
technological factors.

ARTGR 572. Photography and Narrative Message. 
(Dual-listed with ARTGR 472). (0-6) Cr. 3. Prereq: Graduate enrollment in College of 
Design 
Photography as a tool for creating conceptually-driven images and metaphors. 
Emphasis is on photography as an evocative storytelling device for a range of 
audiences and design applications. Compositional and technical aspects are 
explored to ensure successful interpretation of the photograph’s intended message.

ARTGR 573. Multimedia Design. 
(Dual-listed with ARTGR 473). (0-6) Cr. 3. Prereq: Graduate enrollment in College of 
Design 
The design of visual, aural and textual communication for electronic media.

ARTGR 574. Exhibition Design. 
(Dual-listed with ARTGR 474). (0-6) Cr. 3. Prereq: Graduate enrollment in College of 
Design 
Visual communication applied to exhibition design focusing on educational or 
interactive museum exhibitions, trade show booth design, and modular unit design 
for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ARTGR 575. Advanced Typography. 
(Dual-listed with ARTGR 475). (0-6) Cr. 3. Prereq: Graduate classification in College of 
Design 
Typographic theory exploring traditional and non-traditional forms, both historical and 
contemporary typographic achievements.

ARTGR 576. Graphic Design Methodology. 
(Dual-listed with ARTGR 476). (0-6) Cr. 3. Prereq: Graduate enrollment in College of 
Design 
Analysis and application of scientific, systematic, and non-traditional problem-solving 
and problem-seeking techniques.

ARTGR 578. Design for E-Commerce/Graphic Applications. 
(Dual-listed with ARTGR 478). (0-6) Cr. 3. Prereq: Graduate enrollment in College of 
Design 
The development of advanced and experimental web design for the applications of e-
commerce, education and the communication of visual information.

ARTGR 579. Wayfinding Design. 
(Dual-listed with ARTGR 479). (0-6) Cr. 3. Prereq: Graduate enrollment in College of 
Design 
Study of the navigational challenges of built environments and outdoor spaces, 
including site analysis, development of navigational plans, and design of wayfinding 
sign systems. Issues of function, accessibility, legibility, and fabrication are 
considered.

ARTGR 584. Selected Studies in Graphic Design. 
(Dual-listed with ARTGR 484). Cr. arr. Repeatable. Prereq: Graduate classification in the 
College of Design 
Special issues related to graphic design. Topics vary each time offered.

ARTGR 587. Graphic Design History/Theory/ Criticism I. 
(Dual-listed with ARTGR 387). (3-0) Cr. 3. F. Prereq: Graduate classification 
Late nineteenth century to the 1990’s, this course will explore the cultural social, 
political, industrial, and technological forces that have influenced the practice of 
graphic design in Britain, Europe, and the United States. Students will study the 
historical issues and problems facing designers, their clients, and their publics.

ARTGR 588. Graphic Design History/Theory/ Criticism II. 
(Dual-listed with ARTGR 388). (3-0) Cr. 3. S. Prereq: Graduate classification 
Critical issues that affect the contemporary practice of graphic design as it relates 
to the United States. Students will study a variety of issues that include, but are not 
exclusive to, new media, gender, class, design and the public sphere, design as 
social action, postmodern design theory, sustainability, and ethical practice.

ARTGR 589. Design and Ethics. 
(Cross-listed with HCI). (3-0) Cr. 3. Prereq: Graduate classification or permission of 
instructor. 
Issues in ethics and decision-making as they relate to technology, design, design 
research, HCI, and the design industry.

ARTGR 590. Special Topics. 
Cr. arr. Prereq: Bachelor’s degree in graphic design, or evidence of satisfactory 
equivalency in specialized area 
Written approval of instructor and department chair on required form in advance of 
semester of enrollment.

ARTGR 590A. Special Topics: Theory, Criticism, and Methodology. 
Cr. arr. Prereq: Bachelor’s degree in graphic design, or evidence of satisfactory 
equivalency in specialized area 
Written approval of instructor and department chair on required form in advance of 
semester of enrollment.
ARTGR 598B. Special Topics: Two-Dimensional Design.  
Cr. arr. Prereq: Bachelor’s degree in graphic design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTGR 590C. Special Topics: Three-Dimensional Design.  
Cr. arr. Prereq: Bachelor’s degree in graphic design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTGR 591. Publication Design: Magazines.  
(Dual-listed with ARTGR 491). (0-6) Cr. 3. F. Prereq: Graduate enrollment in College of Design.  
The philosophy, concepts and structures of magazine design.  
(Dual-listed with ARTGR 492). (0-6) Cr. 3. S. Prereq: Graduate enrollment in College of Design.  
The philosophy, concepts and structures of book design.

ARTGR 593. Workshop.  
Cr. 1-3. Repeatable. Prereq: Graduate classification; evidence of satisfactory experience in area of specialization  
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ARTGR 599. Creative Component.  
Cr. arr. Repeatable.

Courses for graduate students:

ARTGR 611. Teaching in Higher Education and Design Practice.  
(3-0) Cr. 3. Prereq: Graduate classification  
Introduction to teaching methods, curriculum design, project development, and business strategies for Design Education and Professional Practice.

ARTGR 672. Graphic Design and Human Interaction.  
(0-6) Cr. 3. F.S. Prereq: ARTGR 570, ARTGR 571, and graduate enrollment in College of Design or permission of instructor  
The theory and investigation of experience design as it applies to human interactions in contemporary society and culture. Studio problems may involve such areas as: exhibition design, electronic interface design, wayfinding, package design, and publication design.

ARTGR 672A. Usability.  
(0-6) Cr. 3. F.S. Prereq: ARTGR 570, ARTGR 571, and graduate enrollment in College of Design or permission of instructor  
The exploration and design of interface/interaction with products, systems, and technologies.

ARTGR 672B. Design for Behavioral Change.  
(0-6) Cr. 3. F.S. Prereq: ARTGR 570, ARTGR 571, and graduate enrollment in College of Design or permission of instructor  
The exploration and design of educational experiences and artifacts as they relate to the social, emotional, and behavioral aspects of society.

ARTGR 672C. Consumer Experience Design and Branding.  
(0-6) Cr. 3. F.S. Prereq: ARTGR 570, ARTGR 571, and graduate enrollment in College of Design or permission of instructor  
The theory and investigation of experience design as it applies to human interactions in contemporary society and culture. Studio problems may involve such areas as: exhibition design, electronic interface design, wayfinding, package design, and publication design.

ARTGR 690. Advanced Topics.  
Cr. arr. Repeatable.

ARTGR 698. Current Issues in Graphic Design.  
Cr. 1-3. Repeatable, maximum of 9 credits. Prereq: Graduate enrollment in College of Design or permission of instructor  
Selected issues in contemporary graphic design. Topics and readings vary each time offered.

Cr. arr. Repeatable.

Industrial Design

http://www.design.iastate.edu/industrialdesign/index.php

Undergraduate Study

B.I.D. Bachelor of Industrial Design  Students in this program take a carefully defined sequence of courses developed to give them exposure and practice in the areas of theory and skill required by industrial design. These include drawing, form development, history, creative thinking, engineering principles, research, design methodology, human factors, computer-aided design, manufacturing and commercial factors. In their third year, students will select electives from concentration tracks arranged around specialty areas and current issues in the profession. The upper level studio classes are reserved for study abroad, internships, and sponsored projects with students from other departments and colleges.

Graduate Study

The Master of Industrial Design (M.I.D.) program emphasizes strategy and innovation and consists of two tracks: research and practice. The research track focus on the creation and application of new knowledge through research and culminates in a thesis. The practice track specializes in commercial issues of management and product realization and culminates in a final project. The M.I.D. requires a minimum of 45 credits. Applicants without industrial design degree or background may be required to take up to 18 additional credits for successful completion.

Curriculum in Industrial Design

The Curriculum in Industrial Design leads to a 132.5 credit undergraduate Bachelor of Industrial Design including the 30.5 credit core Design Program. Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 45 graduate credit post-professional graduate program is also offered leading to the degree Master of Industrial Design. (NOTE: Applicants without a degree or background in industrial design may be required to complete up to 18 additional credits of coursework.)

Total Degree Requirements: 132.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-ΝP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 10 cr.

Total Credits 10

* with a C- or better

Humanities: 6 cr.

6 cr. from program curriculum sheet

Social Sciences: 6 cr.

6 cr. from program curriculum sheet

Math/Physics/Biol.Sciences: 6 cr.

6 cr. from program curriculum sheet
General Education Courses: 9 cr.
6 cr. of course level 300-400 from program curriculum sheet; complete 3 cr. from department curriculum sheet.

College of Design Core: 11.5 cr.
DSN S 102 Design Studio I 4
DSN S 115 Design Collaborative Seminar 0.5
or DSN S 110 Design Exchange Seminar I
DSN S 131 Design Representation 4
DSN S 183 Design Cultures 3
Total Credits 11.5

Art and Design History: 9 cr.
IND D 388 History of Industrial Design 3
Two courses from the approved course list; must include one 300 level or higher. 6

Industrial Design: 60 cr.
IND D 201 Industrial Design Studio I 6
IND D 202 Industrial Design Studio II 6
IND D 231 Introduction to Industrial Design 3
IND D 232 Creative Thinking for Industrial Design 3
ARTID 251 Human Factors in Design 3
ENGR 260 Engineering: Getting from Thought to Thing 3
ENGR 270 Survey of How Things Work 3
IND D 301 Industrial Design Studio III 6
IND D 332 Design Research Methods 3
IND D 341 Computer Aided Industrial Design I 3
IND D 499 Senior Project 6
IND D 543 Portfolio and Professional Practice 3
Two of the following: 12
IND D 397 Industrial Design Internship
IND D 495 Study Abroad Option
IND D 507 Industrial Design Practicum
Total Credits 60

Concentration track electives: 9 cr.
Sequence of electives assembled to create a focused area of study.

Electives: 6 cr.
See also: a 4-year plan of study grid showing course template by semester.

Courses

Courses primarily for undergraduates:
IND D 201. Industrial Design Studio I.
(0-12) Cr. 6. F. Prereq: Admission to the industrial design program, enrollment in IND D 231.
Product scale form development and visual communication.

IND D 202. Industrial Design Studio II.
(0-12) Cr. 6. S. Prereq: IND D 201
Principles of structure and function in products.

IND D 231. Introduction to Industrial Design.
(3-0) Cr. 3. F. Prereq: Admission to the industrial design program, enrollment in IND D 201.
The history, definition, scope, and basic principles of industrial design. Overview of technical, artistic, and sociological context of the profession.

IND D 232. Creative Thinking for Industrial Design.
(3-0) Cr. 3. S. Prereq: IND D 231
Exploration of strategies, methods, and processes associated with creative thinking skills and problem solving. Discussion of the nature of creativity and its implications in different contexts that cross content boundaries.

IND D 301. Industrial Design Studio III.
(0-12) Cr. 6. F. Prereq: IND D 231
Systematic design methodology and integration of creative thinking techniques.

IND D 302. Industrial Design Studio IV.
(0-12) Cr. 6. S. Prereq: IND D 301
Exploration of commercial factors in industrial design.

(3-0) Cr. 3. F. Prereq: IND D 232
Survey of qualitative and quantitative methods, including ethnography and interviews, focused on contextual user-centered research. Emphasis on user data collection, visualization, and synthesis as a source for design.

IND D 334. Materials and Processes.
(3-0) Cr. 3. F. Prereq: IND D 202 and IND D 331
Introduction to materials and manufacturing methods for mass production and distribution of products.

IND D 341. Computer Aided Industrial Design I.
(0-6) Cr. 3. S. Prereq: IND D 301
Emphasis on the computer as an industrial design and visualization tool.

IND D 342. Computer Aided Industrial Design II.
(0-6) Cr. 3. S. Prereq: IND D 341
Advanced concepts in computer to machine interface for manufacture.

IND D 351. Applied Human Factors Lab.
(0-1) Cr. 1. F. Prereq: IND D 231 and enrollment in ARTID 251
Theory and application of human factors issues in the industrial design field, specifically their impact on the relationship of the user, the product, and the product systems.

IND D 397. Industrial Design Internship.
(0-12) Cr. 6. F.S.SS. Prereq: IND D 202, 18 credits in industrial design, permission of instructor.
Professional industrial design, off-campus experience.

IND D 401. Industrial Design Studio.
(0-12) Cr. 6. S. Prereq: IND D 301
Advanced topics focused on industrial design applications. Topics vary each time offered.

IND D 495. Study Abroad Option.
(0-12) Cr. 6. S.S. Prereq: IND D 301 and permission of instructor.
International study abroad program. Visits to design studios, showrooms, museums and manufacturing facilities.

IND D 499. Senior Project.
(0-12) Cr. 6. S. Prereq: IND D 302, IND D 401 or IND D 507 and senior standing.
Advanced practice in specialized area of industrial design. Topics vary.

Courses primarily for graduate students, open to qualified undergraduates:
IND D 501. Industrial Design Studio Intensive I.
(0-12) Cr. 6. F. Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program.
Basic concepts and techniques for industrial design. Emphasis on form development, structure, function and communication.

IND D 502. Industrial Design Studio Intensive II.
(0-12) Cr. 6. S. Prereq: Admission into the Graduate Intensive Track of graduate standing in the industrial design program.
Advanced concepts and techniques for industrial design. Emphasis on systematic design methodology and commercial factors.

IND D 503. Industrial Design Studio I.
(0-12) Cr. 6. F. Prereq: Admission to the industrial design graduate program or completion of Graduate Intensive Track.
Advanced, project-based application of industrial design concepts and techniques.

IND D 504. Industrial Design Studio II.
(0-12) Cr. 6. S. Prereq: IND D 502
Advanced, project based application of industrial design concepts and techniques.

IND D 507. Industrial Design Practicum.
(0-12) Cr. 6. S. Prereq: Evidence of satisfactory experience in area of specialization; admitted by application and written permission of instructor only.
Studio project focused on topics generated with external partners. Topics vary.
IND D 511. Colloquium. (1-0) Cr. 1. F.S. Prereq: Admission into the Graduate Intensive Track of graduate standing in the industrial design program. Presentation and discussion of creative activity carried out in various design disciplines and their relationship to industrial design. Seminar sessions focusing on exemplary pieces of design research undertaken by faculty and graduate students in the design field.

IND D 532. Design Thinking. (3-0) Cr. 3. F. Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program. Exploration of problem-solving methods for systems, products, and processes across all contexts. Strategies and tactics for problem identification are covered, along with creative thinking focusing on contemporary real-world problems and opportunities.

IND D 534. Materials and Applications. (3-0) Cr. 3. S. Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program. Introduction to materials and manufacturing methods for products. Exploration of emerging materials and new applications.

IND D 540. Visual Communication for Industrial Design. (0-6) Cr. 3. F. Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program. Exploration of multiple visual communication techniques used in industrial design and product development.

IND D 541. Computer Aided Industrial Design. (0-6) Cr. 3. F.S. Prereq: Completion of industrial design studio or permission of instructor. Exploration of the computer as an industrial design and visualization tool. Advanced concepts in computer to machine interface for manufacture.

IND D 543. Portfolio and Professional Practice. (1-4) Cr. 3. F.S. Prereq: Senior or Graduate standing in the industrial design program. Discussion of industrial design practice. Development and preparation of personal promotional materials for a range of media.

IND D 551. Human Factors. (3-0) Cr. 3. S. Prereq: IND D 532. Human factors issues and the study of relationships between the user, the product, and the human body and its physical functions. Investigations of bio-mechanics, anthropometry, instrumental displays and control, and their measurement as they relate to the design process.

IND D 590. Special Topics. (1-0) Cr. 3. Repeatable. F.S.S.S. Prereq: Completion of industrial design studio or permission of instructor. Advanced topics focused on industrial design applications. Topics include theory, criticism, methodology, experimental techniques, three dimensional design, distributed collaboration.

IND D 592. Special Projects. Cr. arr. Repeatable. F.S.S.S. Prereq: Completion of industrial design studio or permission of instructor. Planned projects in topics related to theory, criticism, methodology, experimental techniques, three dimensional design, distributed collaboration.

IND D 595. Study Abroad Option. (0-12) Cr. 6. F.S.S.S. Prereq: Completion of industrial design studio or permission of instructor. International study abroad program. Visits to design studios, showrooms, museums and manufacturing facilities.

IND D 597. Internship. (0-12) Cr. 6. F.S.S.S. Prereq: Completion of Industrial design studio or permission of instructor. Professional industrial design, off-campus experience.

Courses for graduate students:

IND D 602. Graduate Project II. (0-12) Cr. 6. S. Prereq: IND D 601. Advanced creative component in specialized area of focus within industrial design. Culminates in a physical or digital artifact and supporting documentation.

IND D 631. Design Research Methods. (3-0) Cr. 3. S. Prereq: IND D 532. Introduction to a number of qualitative and quantitative research methods applied in the field of industrial design. Research strategies and application of selected methods to different contextual issues are covered.

Integrated Studio Arts

The department offers degree programs focused on visual art and visual culture and offers courses in art history, studio arts and art education. Degree offerings include the Bachelor of Arts in Art and Design, Bachelor of Fine Arts in Integrated Studio Arts and the Master of Fine Arts in Integrated Visual Arts.

Undergraduate Study

B.A. in Art and Design

This curriculum offers two concentrations: Art and Culture, and Visual Culture Studies. Art and Culture has a greater emphasis on studio components and Visual Culture Studies on humanities and liberal arts components. Both concentrations are combined with an applied career minor or an approved program of study.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

The department offers no minor but participates in the undergraduate minors in Classical Studies in Design, Design Studies and Digital Media.

B.F.A. Integrated Studio Arts

Students select from studio options in order to develop a portfolio and to prepare for a professional practice in the visual arts. This concentration engages aesthetics, visual problem solving, critical thinking, and skill development in a range of media that draw upon contemporary, historical and cultural theory, and practice.

Graduate Study

The department offers the Master of Fine Arts (M.F.A.) in Integrated Visual Arts. The M.F.A. curriculum in Integrated Visual Arts requires a minimum of 60 credits. The program of study includes seminar classes, a studio concentration, history and criticism courses, elective courses outside the department or area of study and the completion of a thesis-exhibition or thesis.

M.F.A. graduates in Integrated Visual Arts link traditional studio disciplines with interdisciplinary studies. Graduates are prepared as visual artists to enter studio research, business, higher education or new interdisciplinary fields. The M.F.A. is recognized as the terminal degree. A required thesis-exhibition is composed of two parts - a substantial exhibition and a written statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A thesis may be an appropriate alternative, but some portion of the work should entail an element of design problem-solving in the form of a visual product.

Curriculum in Art and Design - B.A.

The curriculum in Art and Design leads to a 120.5 credit undergraduate Bachelor of Arts degree including the 30 credit Core Design Program.

This curriculum offers two concentrations: Art and Culture and Visual Culture Studies. Both concentrations are combined with an applied career minor or approved program.

Consideration for admission into the B.A. curriculum is based upon department resources and GPA earned in the Core Design Program.

Transfer student with studio credits from other programs, colleges and universities must present for department review a portfolio of work done in those courses in order to have the credits applied toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.
Total Degree Requirements: 120.5 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr; 9 P-NP cr. of free electives; 2.00 minimum GPA

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communication: 10 cr.
(C- or better grade)

Art and Culture Track requires 57 credits distributed as follows:

Art and Design Options: 12 cr.
12 credits from 200 level or above in College of Design courses.

Program of Study: 30 cr.
30 cr. from an approved program of study.

Electives: 15 cr.

Visual Culture Studies Track required 57 credits distributed as follows:

Art and Design Concentration: 12 cr.
12 cr. in Art H at 300-400 level and Art 498 (Museum/Gallery Internship).

Program of Study: 30 cr.
30 cr. from an approved program of study.

Electives: 15 cr.

Curriculum in Integrated Studio Arts -- B.F.A.
The Curriculum in Integrated Studio Arts leads to a 126.5 credit undergraduate Bachelor of Fine Arts in Integrated Studio Arts including a 30 credit Core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for department review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes.

Arrangements for this process must be made with department advisers.

Total Degree Requirement: 126.5 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication: 10 cr.

Courses

Courses primarily for undergraduates:

ARTIS 201. Creative Visual Thinking. (0-6) Cr. 3. F.S.
Exploration of the nature of visual perception in relation to issues of visual communication, problem solving, envisioning information, and visual thinking. Studio assignments to be digitized and sent to instructor electronically for evaluation and critique.

ARTIS 202. Studio Fundamentals: Wood. (0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors
Half-semester course. Introduction to wood's physical properties, its potential as an expressive medium, and basic hand tools and techniques used for working with wood.

ARTIS 203. Studio Fundamentals: Jewelry/Metalsmithing. (0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors
Half-semester course. Introduction to basic jewelry/metals design and fabrication. Forming, texturing, and joining techniques will be explored. Additional work required outside of class.

Half-semester course which provides an introduction to ceramics including techniques (hand-building, high fire and low fire glaze applications) and conceptual approaches. The emphasis is on creative expression and communication through ceramics. Course is open to all students and required for all Integrated Studio Arts BFA majors.

Introduction to relief, monoprint, lithographic and intaglio printing as methods for visual communication and expression. Course is open to all students and required for all Integrated Studio Arts BFA majors.

ARTIS 208. Color. (0-6) Cr. 3. F.S. Prereq: DSN S 102, DSN S 131, and DSN S 183. Required for all ISA BFA students.
The impact of changing visual relationships emphasizing physical and psychological and cultural color concepts. Additive and subtractive mixing and color interaction exercises and assignments using various color media. Required for all Integrated Studio Arts BFA majors.

Introduction to camera operation and traditional black and white darkroom methods as means of visual communication and creative expression. Course is open to all students and required for all Integrated Studio Arts BFA majors.

Half-semester course. Introduction to image acquisition, Adobe Photoshop and Illustrator. Course is open to all students and required for all Integrated Studio Arts BFA majors.

Half-semester course. Introduction to color and traditional black and white darkroom methods as means of visual communication and creative expression. Course is open to all students and required for all Integrated Studio Arts BFA majors.

Half-semester course. Introduction to preparation of painting grounds, color mixing, manipulation of paint and pictorial space as methods for visual communication and expression. Course is open to all students and required for all Integrated Studio Arts BFA majors.

ARTIS 222. Introduction to Creative Digital Photography. (0-6) Cr. 3. Prereq: DSN S 102, DSN S 131 and DSN S 183
This course will include the functions and operations of the digital camera, scanning and other image input devices, digital image manipulation, software usage and support, color management and printing, presentation of images, compositional dynamics and the development of "seeing" as a medium of expression, and communication. Students should have access to a good or high quality digital camera and the ability to separately adjust shutter speed, f/stop and exposure, a laptop with updated Adobe Photoshop software, and enough digital storage for all class assignments.

ARTIS 227H. Introduction to Creative Digital Photography: Honors. (0-6) Cr. 3-4. Prereq: DSN S 102, DSN S 131 and DSN S 183
This course will include the functions and operations of the digital camera, scanning and other image input devices, digital image manipulation, software usage and support, color management and printing, presentation of images, compositional dynamics and the development of "seeing" as a medium of design, expression, and communication. Students should have access to a good or high quality digital camera and the ability to separately adjust shutter speed, f/stop and exposure, a laptop with updated Adobe Photoshop software, and enough digital storage for all class assignments.

ARTIS 229. Introduction to Darkroom Photography. (0-6) Cr. 3. Prereq: DSN S 102, DSN S 131 and DSN S 183 or permission of instructor
Photography as a creative medium of art, design, expression and communication. Camera techniques and black and white wet lab processing taught. Alternative processes explored as time permits. 35 mm camera with manual exposure controls is required.

ARTIS 229H. Introduction to Darkroom Photography, Honors. (0-6) Cr. 3-4. Prereq: DSN S 102, DSN S 131 and DSN S 183 or permission of instructor
Photography as a creative medium of art, design, expression and communication. Camera techniques and black and white wet lab processing taught. Alternative processes explored as time permits. 35 mm camera with manual exposure controls is required.

ARTIS 230. Drawing II. (0-6) Cr. 3. F.S. Prereq: DSN S 102, DSN S 131 and DSN S 131
A continuation of DSN S 131 (Design Representation). Further development of perceptual drawing skills from a variety of subject matter. Continued practice with drawing materials and techniques with emphasis on tonal and color media.

ARTIS 233. Watercolor Painting. (0-6) Cr. 3. Prereq: ARTIS 230
Fundamentals of painting using water-based media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.

ARTIS 233H. Watercolor Painting: Honors. (0-6) Cr. 3-4. Prereq: ARTIS 230
Fundamentals of painting using water-based media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.

ARTIS 238. Painting I. (0-6) Cr. 3. F.S. Prereq: ARTIS 230
Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form.
ARTIS 230H. Painting I: Honors.
(0-6) Cr. 3-4. F.S. Prereq: ARTIS 230
Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form.

ARTIS 305. Integrated Media.
(Dual-listed with ARTIS 505). (0-6) Cr. 3. Repeatable. Prereq: 6 credits of 200 level studio
Integration and exploration of materials and methods that combine traditional and innovative approaches. Emphasis on conceptual development.

(0-6) Cr. 3. Prereq: ARTIS 230 or permission of instructor
Introduction to 3D modeling using computer and available software. Modeling, texturing, lighting, and rendering with respect to 3D object and still scene creation.

(0-6) Cr. 3-4. Prereq: ARTIS 230 or permission of instructor
Introduction to 3D modeling using computer and available software. Modeling, texturing, lighting, and rendering with respect to 3D object and still scene creation.

ARTIS 310. Sources and Methods of Visual Design.
(1-4) Cr. 3. Repeatable, maximum of 6 credits.
Study and application of methods used by contemporary artists for the purpose of generating ideas for new work. Field trip.

Cr. 3.
Exploration of issues and directions in current art. Readings, discussions, and studio research projects to build an experimental and applied knowledge base for understanding each student’s place in the contemporary art world.

ARTIS 319. Studio Furniture.
(3-0) Cr. 3. F.
Overview of American studio furniture since 1940 including noted makers, important examples, and diverse approaches. Discussion of workmanship and the principles of furniture design. Field trip.

ARTIS 320. Introduction to Furniture Design.
(0-6) Cr. 3. Prereq: ARTIS 202
Design and creation of basic furniture forms in wood. Introduction to power tools. Develop an individual design process including an understanding of scale and proportion. Develop sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

ARTIS 320H. Introduction to Furniture Design: Honors.
(0-6) Cr. 3-4. Prereq: ARTIS 202
Design and creation of basic furniture forms in wood. Introduction to power tools. Develop an individual design process including an understanding of scale and proportion. Develop sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

ARTIS 322. Intermediate Ceramics Studio.
(0-6) Cr. 3. Prereq: ARTIS 204
Further investigation of concepts and techniques in ceramics; introduction to throwing on the wheel, to exploration of utilitarian and sculptural approaches in the medium, and to glaze research and electric kiln firing.

ARTIS 322H. Intermediate Ceramics Studio: Honors.
(0-6) Cr. 3-4. Prereq: ARTIS 204
Further investigation of concepts and techniques in ceramics; introduction to throwing on the wheel, to exploration of utilitarian and sculptural approaches in the medium, and to glaze research and electric kiln firing.

ARTIS 323. Scientific Illustration Principles and Techniques.
(Cross-listed with BPM I). (0-6) Cr. 3. Repeatable. Prereq: 6 credits in art and design and 3 credits in biological sciences
Studio basics and professional techniques in black & white, continuous tone, and color. Emphasis on tools, materials, and rendering.

ARTIS 324. Jewelry/Metalsmithing II.
(0-6) Cr. 3. Prereq: ARTIS 203 or permission of instructor
Continued study of traditional and contemporary metal fabrication techniques applicable to jewelry and object construction, including container forms. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 324H. Jewelry/Metalsmithing II: Honors.
(0-6) Cr. 3-4. Prereq: ARTIS 203 or permission of instructor
Continued study of traditional and contemporary metal fabrication techniques applicable to jewelry and object construction, including container forms. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 325. Integrated Studio Arts Seminar.
(2-0) Cr. 2. Repeatable, maximum of 6 credits. Prereq: Open to ISA BFA majors
Contemporary issues in studio arts explored through lectures, presentations and critiques.

ARTIS 326. Illustration and Illustration Software.
(Cross-listed with BPM I). (0-6) Cr. 3. Repeatable. Prereq: ARTIS 323
Application of painting, drawing, and image making techniques to communication. Development of technical abilities using illustration software. Digital and print production techniques.

ARTIS 327. Illustration as Communication.
(Cross-listed with BPM I). (0-6) Cr. 3. Prereq: ARTIS 326
Studio problems in illustration emphasizing composition and communication. Problem solving methodologies.

ARTIS 329. Creative Photography.
(0-6) Cr. 3. Repeatable, maximum of 6 credits. Prereq: ARTIS 210 or ARTIS 229 or permission of instructor
Continuation and expansion of concepts and processes from introductory photography. Individual thematic work is enriched by connection to photographic history and pluralist perspectives.

(0-6) Cr. 3-4. Repeatable, maximum of 6 credits. Prereq: ARTIS 210 or ARTIS 229 or permission of instructor
Continuation and expansion of concepts and processes from introductory photography. Individual thematic work is enriched by connection to photographic history and pluralist perspectives.

(0-6) Cr. 3. Repeatable. Prereq: ARTIS 230
Drawing from the human figure.

(0-6) Cr. 3-4. Repeatable. Prereq: ARTIS 230
Drawing from the human figure.

ARTIS 335. Three-Dimensional Studio.
(Cross-listed with ARCH). (1-4) Cr. 3. Repeatable, maximum of 6 credits.
Continuation and expansion of concepts and processes from introductory photography. Individual thematic work is enriched by connection to photographic history and pluralist perspectives.

(Cross-listed with BPM I). (0-6) Cr. 3. Repeatable, maximum of 6 credits. S. Prereq: ARTIS 327
Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

ARTIS 338. Painting II.
(0-6) Cr. 3. Repeatable. Prereq: ARTIS 238 or ARTIS 213 and ARTIS 230
Painting using acrylic and oil media; composition and expression.

ARTIS 338H. Painting II: Honors.
(0-6) Cr. 3-4. Repeatable. Prereq: ARTIS 238 or ARTIS 213 and ARTIS 230
Painting using acrylic and oil media; composition and expression.

(0-6) Cr. 3. Repeatable. Prereq: ARTIS 214 or permission of instructor
Introduction to woven textile construction using commercial and hand-dyed yarns. Emphasis on technical development of weaving as a means for personal expression as well as an understanding of its role within the applied arts.

ARTIS 345H. Woven Textile Structures: Honors.
(0-6) Cr. 3-4. Repeatable. Prereq: ARTIS 214 or permission of instructor
Introduction to woven textile construction using commercial and hand-dyed yarns. Emphasis on technical development of weaving as a means for personal expression as well as an understanding of its role within the applied arts.
ARTIS 346. Textile Surface Design. (0-6) Cr. 3. Repeatable. F.S. Prereq: ARTIS 214 or permission of instructor
Textile hand-dyeing and discharge methods on fabric to create complex surfaces. Other surface embellishment techniques, such as hand and machine stitching and application of textile pigments, will be introduced. Emphasis is on technical skill development and research, as well as creative use of textile surface design techniques for artistic expression.

ARTIS 346H. Textile Surface Design, Honors. (0-6) Cr. 3. Repeatable. Prereq: ARTIS 214
Textile hand-dyeing and discharge methods on fabric to create complex surfaces. Other surface embellishment techniques, such as hand and machine stitching and application of textile pigments, will be introduced. Emphasis is on technical skill development and research, as well as creative use of textile surface design techniques for artistic expression.

ARTIS 347. Printed Textile Design I. (0-6) Cr. 3. Repeatable. F.S. Prereq: ARTIS 214 or permission of instructor
Textile hand-printing methods on fabric including block, stencil and screen-printing using dyes, discharging agents and pigments. Digital printing on fabric will be introduced. Experimental printing methods will also be explored. Emphasis on research and development of surface design techniques as a means for personal expression.

ARTIS 347H. Printed Textile Design I, Honors. (0-6) Cr. 3-4. Repeatable. F.S. Prereq: ARTIS 214 or permission of instructor
Textile hand-printing methods on fabric including block, stencil and screen-printing using dyes, discharging agents and pigments. Digital printing on fabric will be introduced. Experimental printing methods will also be explored. Emphasis on research and development of surface design techniques as a means for personal expression.

ARTIS 356. Relief Printmaking. (Dual-listed with ARTIS 556). (0-6) Cr. 3. Repeatable, maximum of 6 credits. F.S. Prereq: ARTIS 206 and ARTIS 230
Examine the techniques and aesthetic qualities of black and white and color relief printmaking primarily through woodcuts and photopolymer plates. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 356H. Relief Printmaking: Honors. (0-6) Cr. 3-4. Repeatable, maximum of 6 credits. F.S. Prereq: ARTIS 206 and ARTIS 230
Examine the techniques and aesthetic qualities of black and white and color relief printmaking primarily through woodcuts and photopolymer plates. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 357. Intaglio and Monotype Printmaking: Digital / Traditional. (Dual-listed with ARTIS 557). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S. Prereq: ARTIS 206 and 230
Examine the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, photographic intaglio and collagraph processes. Students may generate imagery through traditional drawing, collage or digital processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 357H. Intaglio and Monotype Printmaking: Digital / Traditional, Honors. (0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S. Prereq: ARTIS 206 and ARTIS 230
Examine the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, photographic intaglio and collagraph processes. Students may generate imagery through traditional drawing, collage or digital processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 358. Lithography: Digital / Traditional. (Dual-listed with ARTIS 558). (0-6) Cr. 3. Repeatable. F.S. Prereq: ARTIS 206 and credit or enrollment in ARTIS 230
Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Students may generate imagery through traditional drawing, collage or digital processes. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color.

ARTIS 358H. Lithography: Digital / Traditional, Honors. (0-6) Cr. 3-4. Repeatable. F.S. Prereq: ARTIS 206 and credit or enrollment in ARTIS 230
Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Students may generate imagery through traditional drawing, collage or digital processes. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color.

ARTIS 360. Sustainable Design and Fabrication of Furniture. (0-6) Cr. 3. F.S.
An introduction to issues of design and fabrication of furniture focusing on sustainability. Exploration of the effect of consumers on design and how this affects our environment and our global society.

ARTIS 399. BFA Professional Practice. (2-0) Cr. 2. S. Prereq: Junior classification in Art and Design BFA curriculum.
Introduction to professional practices including development of portfolio (visual and written components). Lecture and presentation topics include applying to graduate school, grants/funding opportunities, professional networking, exhibition opportunities, and best practices for studio artists. Half-semester course. Required of all ISA majors.

ARTIS 407. Principles of 3D Character Animation. (Dual-listed with ARTIS 507). (0-6) Cr. 3. Repeatable, maximum of 9 credits. Prereq: ARTIS 308
Animation techniques using the computer and available software. Principles of character animation. Prior knowledge of modeling, lighting, texturing and rendering with available software is assumed. Nonmajor graduate credit.

ARTIS 407H. Principles of 3D Character Animation: Honors. (0-6) Cr. 3-4. Repeatable, maximum of 9 credits. Prereq: ARTIS 308
Animation techniques using the computer and available software. Principles of character animation. Prior knowledge of modeling, lighting, texturing and rendering with computer and available software is assumed. Nonmajor graduate credit.

ARTIS 408. Principles of 3D Animation. (0-6) Cr. 3. Repeatable. Prereq: ARTIS 308
Animation techniques using the computer and available software. Principles of animation. Prior knowledge of modeling, lighting, texturing, animation and rendering with computer and available software is assumed. Nonmajor graduate credit.

ARTIS 408H. Principles of 3D Animation: Honors. (0-6) Cr. 3-4. Repeatable. Prereq: ARTIS 308
Animation techniques using the computer and available software. Principles of animation. Prior knowledge of modeling, lighting, texturing, animation and rendering with computer and available software is assumed. Nonmajor graduate credit.

ARTIS 409. Computer/Video Game Design and Development. (Dual-listed with ARTIS 508). (0-6) Cr. 3. Repeatable, maximum of 12 credits. Prereq: Permission of instructor. Programming emphasis: COM S 227, COM S 228, COM S 229 or equivalent in engineering; art or graphics emphasis: ARTIS 230 and ARTIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: Junior classification
Independent project based creation and development of “frivolous and non-frivolous” computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed. Nonmajor graduate credit.

ARTIS 409H. Computer/Video Game Design and Development: Honors. (0-6) Cr. 3-4. Repeatable, maximum of 12 credits. Prereq: Permission of instructor. Programming emphasis: COM S 227, COM S 228, COM S 229 or equivalent in engineering; art or graphics emphasis: ARTIS 230 and ARTIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: Junior classification
Independent project based creation and development of “frivolous and non-frivolous” computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed. Nonmajor graduate credit.

ARTIS 420. Advanced Furniture Design. (Dual-listed with ARTIS 520). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 320
Design and creation of advanced furniture forms in wood with consideration of precedents and innovative approaches. Develop a unique personal approach to the design and making of furniture. Refine sensitivity to wood and the social and environmental implications of materials used for furniture design and production. Nonmajor graduate credit.
ARTIS 420H. Advanced Furniture Design: Honors. (0-6) Cr. 3-4. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 320 Design and creation of advanced furniture forms in wood with consideration of precedents and innovative approaches. Develop a unique personal approach to the design and making of furniture. Refine sensitivity to wood and the social and environmental implications of materials used for furniture design and production. Nonmajor graduate credit.

ARTIS 422. Ceramics Studio. (Dual-listed with ARTIS 522). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 322 In-depth investigation of ceramic forms and surfaces with an emphasis on personal art expression. Gas kiln firings, research into contemporary ceramic artists and development of increasingly skilled work are emphasized. Nonmajor graduate credit.

ARTIS 422H. Ceramics Studio: Honors. (0-6) Cr. 3-4. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 322 In-depth investigation of ceramic forms and surfaces with an emphasis on personal art expression. Gas kiln firings, research into contemporary ceramic artists and development of increasingly skilled work are emphasized. Nonmajor graduate credit.

ARTIS 424. Jewelry/Metalsmithing III. (Dual-listed with ARTIS 524). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 324 or permission of instructor Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development. Nonmajor graduate credit.

ARTIS 424H. Jewelry/Metalsmithing III: Honors. (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 324 or permission of instructor Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development. Nonmajor graduate credit.

ARTIS 429. Advanced Photography. (Dual-listed with ARTIS 529). (0-6) Cr. 3. Repeatable, F.S. Prereq: ARTIS 329 Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concern. Nonmajor graduate credit.

ARTIS 429H. Advanced Photography: Honors. (0-6) Cr. 3-4. Repeatable, F.S. Prereq: ARTIS 329 Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concern. Nonmajor graduate credit.

ARTIS 430. Drawing IV. (Dual-listed with ARTIS 530). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S. Prereq: ARTIS 330 Figurative and/or non-figurative drawing with advanced work in media, composition, and theory. Nonmajor graduate credit.

ARTIS 430H. Drawing IV: Honors. (0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S. Prereq: ARTIS 330 Figurative and/or non-figurative drawing with advanced work in media, composition, and theory. Nonmajor graduate credit.

ARTIS 438. Painting III. (Dual-listed with ARTIS 538). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S. Prereq: ARTIS 338 Figurative and non-figurative painting with advanced work in media, composition, and theory. Nonmajor graduate credit.

ARTIS 438H. Painting III: Honors. (0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S. Prereq: ARTIS 338 Figurative and non-figurative painting with advanced work in media, composition, and theory. Nonmajor graduate credit.

ARTIS 448. Digital Textile Design. (Dual-listed with ARTIS 548). (0-6) Cr. 3. Repeatable, F.S. Prereq: Junior classification in either College of Design or Apparel, Merchandising, Design This hands-on studio course will allow students to explore digital printing technology and its application to textile design for those working within industry as well as independent studio practitioners. Digital design development includes pattern repeats and photo manipulation to create unique textile designs for fashion, interior and fine art applications.

ARTIS 458. Advanced Printmaking. (0-6) Cr. 3. Repeatable, F.S. Prereq: ARTIS 356, ARTIS 357, or ARTIS 358, and permission of instructor Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists.

ARTIS 458H. Advanced Printmaking: Honors. (0-6) Cr. 3-4. Repeatable, F.S. Prereq: ARTIS 356, ARTIS 357, or ARTIS 358, and permission of instructor Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists.

ARTIS 482. Selected Topics in Studio Art. (Dual-listed with ARTIS 582). Cr. 1-3. Repeatable, F.S. Prereq: Permission of instructor Special issues related to studio art. Topics vary each time offered.

ARTIS 490. Independent Study. Cr. 1-6. Repeatable. F.S.SS. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490B. Independent Study: Ceramics. Cr. 1-6. Repeatable, F.S. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490C. Independent Study: Computer Art and Design. Cr. 1-6. Repeatable, F.S. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490D. Independent Study: Drawing. Cr. 1-6. Repeatable, F.S. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490E. Independent Study: Textiles. Cr. 1-6. Repeatable, F.S. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490F. Independent Study: Illustration. Cr. 1-6. Repeatable, F.S. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490G. Independent Study: Metals. Cr. 1-6. Repeatable, F.S. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490H. Independent Study: Honors. Cr. 1-6. Repeatable, F.S. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.
ARTIS 493L. Independent Study: Painting.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 493J. Independent Study: Photography.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490K. Independent Study: Printmaking.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490L. Independent Study: Furniture.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 493. Workshop.
Cr. 1-3. Repeatable. SS. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493B. Workshop: Ceramics.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493C. Workshop: Computer Art and Design.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493D. Workshop: Drawing.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493E. Workshop: Textiles.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493F. Workshop: Illustration.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493G. Workshop: Metals.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493H. Workshop: Honors.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493I. Workshop: Painting.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493J. Workshop: Photography.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493K. Workshop: Printmaking.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493L. Workshop: Furniture.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 499. BFA Exhibition.
(1-0) Cr. 1. S. Prereq: ARTIS 399 and senior classification in the Art and Design BFA Curriculum.
Capstone experience for the BFA degree, including the refinement of a final portfolio (visual and written components). Guest lecturers cover range of topics relevant to the professional practice of art and design. Course culminates in the planning, design and installation of the BFA group exhibition in a formal gallery setting. Half-semester course. Required of all ISA majors.

Courses primarily for graduate students, open to qualified undergraduates:

ARTIS 505. Integrated Media.
(Dual-listed with ARTIS 305). (0-6) Cr. 3. Repeatable. F.S. Prereq: Graduate classification
Integration and exploration of materials and methods that combine traditional and innovative approaches. Emphasis on conceptual development.

(Dual-listed with ARTIS 407). (0-6) Cr. 3. Repeatable, maximum of 9 credits. Prereq: ARTIS 308
Animation techniques using the computer and available software. Principles of character animation. Prior knowledge of modeling, lighting, texturing and rendering with available software is assumed. Nonmajor graduate credit.

ARTIS 508. Computer Aided Animation and Visualization.
(0-6) Cr. 3. Repeatable, maximum of 6 credits. Prereq: ARTIS 408 or graduate classification and permission of instructor
Further investigations begun in ARTIS 408. Attention given to the workflow and management of creating animation and visualizations.

ARTIS 509. Computer/Video Game Design and Development.
(Dual-listed with ARTIS 409). (0-6) Cr. 3. Repeatable, maximum of 12 credits. Prereq: Permission of instructor. Programming emphasis: COM S 227, COM S 228, COM S 229 or equivalent in engineering; art or graphics emphasis: ARTIS 230 and ARTIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: Junior classification
Independent project based creation and development of “frivolous and non-frivolous” computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed. Nonmajor graduate credit.

ARTIS 520. Advanced Furniture Design: Honors.
(Dual-listed with ARTIS 420). (0-6) Cr. 3-4. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 320
Design and creation of advanced furniture forms in wood with consideration of precedents and innovative approaches. Develop a unique personal approach to the design and making of furniture. Refine sensitivity to wood and the social and environmental implications of materials used for furniture design and production. Nonmajor graduate credit.

ARTIS 522. Ceramics Studio: Honors.
(Dual-listed with ARTIS 422). (0-6) Cr. 3-4. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 322
In-depth investigation of ceramic forms and surfaces with an emphasis on personal art expression. Gas kiln firings, research into contemporary ceramic artists and development of increasingly skilled work are emphasized. Nonmajor graduate credit.
ARTIS 524. Jewelry/Metalsmithing III: Honors.  (Dual-listed with ARTIS 424). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.  Prereq: ARTIS 324 or permission of instructor
Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development. Nonmajor graduate credit.

ARTIS 529. Advanced Photography: Honors.  (Dual-listed with ARTIS 429). (0-6) Cr. 3-4. Repeatable. F.S.  Prereq: ARTIS 329
Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concern. Nonmajor graduate credit.

ARTIS 530. Drawing IV: Honors.  (Dual-listed with ARTIS 430). (0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S.  Prereq: ARTIS 330
Figurative and/or non-figurative drawing with advanced work in media, composition, and theory. Nonmajor graduate credit.

ARTIS 538. Painting III: Honors.  (Dual-listed with ARTIS 438). (0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S.  Prereq: ARTIS 338
Figurative and non-figurative painting with advanced work in media, composition, and theory. Nonmajor graduate credit.

ARTIS 547. Printed Textiles.  (Dual-listed with ARTIS 447). (0-6) Cr. 3. Repeatable. F.S.  Prereq: ARTIS 347
Exploration of hand-printing methods on fabric including block, stencil, and screen-printing using dyes, discharging agents, and pigments. Individualized research and development of surface design techniques as means for personal expression.

ARTIS 548. Digital Textile Design.  (Dual-listed with ARTIS 448). (0-6) Cr. 3. Repeatable. F.S.  Prereq: Graduate classification and permission of instructor
This hands-on studio course will allow students to explore digital technology and its application to textile design for those working within industry as well as independent studio practitioners. Digital design development includes pattern repeats and photo manipulation to create unique textile designs for fashion, interior and fine art applications. Graduate research presentation and studio projects required.

ARTIS 556. Relief Printmaking: Honors.  (Dual-listed with ARTIS 356). (0-6) Cr. 3-4. Repeatable, maximum of 6 credits. F.S.  Prereq: ARTIS 206 and ARTIS 230
Examine the techniques and aesthetic qualities of black and white and color relief printmaking primarily through woodcuts and photopolymer plates. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 557. Intaglio and Monotype Printmaking: Digital / Traditional.  (Dual-listed with ARTIS 357). (0-6) Cr. 3. Repeatable. F.S.  Prereq: Graduate classification and permission of instructor
Examine the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, photographic intaglio and collagraph processes. Students may generate imagery through traditional drawing, collage or digital processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on the experimental and creative use of intaglio and mono-printing for artistic expression supported with study of contemporary trends.

ARTIS 558. Lithography: Digital / Traditional.  (Dual-listed with ARTIS 358). (0-6) Cr. 3. Repeatable. F.S.  Prereq: Graduate classification and permission of instructor
Examine the techniques and aesthetic qualities of lithography. Students may generate imagery through traditional drawing, collage or digital processes. Emphasis is on the experimental and creative use of lithography for artistic expression with study of contemporary trends.

ARTIS 582. Selected Topics in Studio Art.  (Dual-listed with ARTIS 482). Cr. 1-3. Repeatable, maximum of 9 credits. F.S.  Prereq: Permission of instructor
Special issues related to studio art. Topics vary each time offered.

ARTIS 590. Special Topics.  Cr. arr. F.S.SS.  Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590B. Special Topics: Ceramics.  Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590C. Special Topics: Computer Art and Design.  Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590D. Special Topics: Drawing.  Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590E. Special Topics: Textiles.  Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590F. Special Topics: Illustration.  Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590G. Special Topics: Metals.  Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590I. Special Topics: Painting.  Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590J. Workshop: Computer Art and Design.  Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Topics vary each time offered and may have prerequisites.

ARTIS 590K. Workshop: Ceramics.  Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Topics vary each time offered and may have prerequisites.

ARTIS 590L. Workshop: Computer Art and Design.  Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Topics vary each time offered and may have prerequisites.
ARTIS 593D. Workshop: Drawing.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have
prerequisites.

ARTIS 593E. Workshop: Textiles.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have
prerequisites.

ARTIS 593F. Workshop: Illustration.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have
prerequisites.

ARTIS 593G. Workshop: Metals.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have
prerequisites.

ARTIS 593I. Workshop: Painting.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have
prerequisites.

ARTIS 593J. Workshop: Photography.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have
prerequisites.

ARTIS 593K. Workshop: Printmaking.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have
prerequisites.

ARTIS 593L. Workshop: Furniture.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have
prerequisites.

ARTIS 593M. Workshop: Mixed Media.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have
prerequisites.

Courses for graduate students:

ARTIS 607. Intermedia.
(0-6) Cr. 3. F.S. Prereq: Graduate classification and permission of instructor
Exploration and application of media with various materials, methods and ideas.

Cr. 1-3. Repeatable, maximum of 9 credits. F.S. Prereq: Graduate classification and
permission of instructor.
Selected issues in contemporary studio arts. Topics and readings vary each time offered.

Interior Design

http://www.design.iastate.edu/interiordesign/index.php

Undergraduate Study

The department offers the degree Bachelor of Fine Arts (B.F.A.) in Interior Design, www.design.iastate.edu/interiordesign

B.F.A. Interior Design. Emphasis is on the student’s application of design processes to
creatively solve problems of the interior environment based on knowledge of
human safety, functional utility, physical, psychological, and contextual fit. Graduates
in interior design are competent in visual communication (sketching, drafting and
computer aided design), design problem solving, space planning, lighting and color
specification for interiors, finish and furniture selection, detailing interior construction and
application of human factors. The curriculum is accredited by the Council for
Interior Design Accreditation (CIDA) as providing professional level education

Transfer students with studio credits from other colleges and universities must
present a portfolio of work done in those courses to determine if these credits can be
applied toward specific studio requirements. Students are required to present their
portfolio upon admission and prior to registration for classes. Arrangements for this
process must be made with department advisers.

The department offers no minor but participates in the undergraduate minors in

Graduate Study

The department offers the degrees of Master of Fine Arts (M.F.A.) in Interior Design, and
Master of Arts (M.A.) in Art and Design, with degree specialization in interior
design.

The M.A. in Art and Design with specialization in interior design requires a minimum of
34 credits including a studio concentration and work in research methods and
human factors. Candidates focus on research in an area of specialization culminating in a written thesis comprised of original research. Graduates have a broad understanding of current interior design issues and design research, preparing them for special analytical aspects of design practice and further studies leading to the PhD. Applicants without a degree in interior design may be required to complete
up to 40 additional credits of course work.

M.F.A. graduates in Interior Design are proficient in visual communication skills, design
theory, human factors, and space planning. The M.F.A. degree is considered a
terminal degree in the interior design field. The degree requires completion of a
written thesis comprised of original research.

Credit earned at Iowa State University or other institution for the Master of Arts
degree may be applied toward the Master of Fine Arts degree at the discretion of the
program of study committee.

Applicants to the graduate program should have an undergraduate major in an art
or design area and demonstrate the ability to do technically competent and original
work through the presentation of a slide or digital portfolio for faculty review. Past
academic performance and the quality of studio work are critical in the admission
process. A minimum 3.0 GPA in the student’s undergraduate major is the standard for
full admission to the graduate program. Admission is also determined by studio
space available within the program area, which changes yearly due to graduate
students’ progress in their programs of study.

Graduate students who have not completed an undergraduate program of study
substantially equivalent to that required of undergraduates in the department can
expect that additional supporting coursework, determined by the graduate faculty, will
be required.

Prospective students are advised to contact the graduate coordinator with specific
questions about admission procedures and portfolio review. Application and
additional program information may be obtained from the Department of Interior
Design, College of Design, Iowa State University, Ames, Iowa, 50011-3092

Curriculum in Interior Design

The Curriculum in Interior Design leads to a 129.5 credit undergraduate Bachelor of Fine
Arts in Interior Design including a 30.5 credit Core Design Program.

Admission into the professional program depends upon available resources and is
subject to the approval of a faculty committee at the completion of the Core Design
Program. Applicants are reviewed on the basis of academic performance and a
portfolio of original work.

A 34 graduate credit program is offered leading to the master of arts, for students
planning to undertake professional or design research-orientated pursuits. (NOTE:
Applicants without a previous undergraduate degree in interior design may be
required to complete up to 40 additional credits of deficiency work).

A 60 graduate credit post-professional graduate program is also offered leading to
the degree master of fine arts.

For more complete graduate program descriptions see Graduate Study under Interior
Design in the Courses and Programs section.

Consideration for admission into the undergraduate Interior Design curriculum requires
completion of the 30.5 credit Core Design Program, including the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>DSN S 102</td>
<td>Design Studio I</td>
<td>4</td>
</tr>
<tr>

</tbody>
</table>
Admission is based on department resources and will be determined by a formal review at the end of the Core Design Program. Transfer students with studio credits from other programs, colleges, and universities must present a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are advised to present portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Total Degree Requirement: 129.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average; Completion of all requirements listed below.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication: 10 cr.

(C- or better grade)

A survey of variables influencing the nature and function of "interior" environments. Review of professional, geo-political, utilitarian, social-cultural, economic, humanistic, historical, technological, and other factors as generators of form and space.

ARTID 259. Sophomore Field Study. Cr. R. Prereq: Enrollment in interior design studio course

Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Offered on a satisfactory-fail basis only.

ARTID 251. Human Factors in Design. (3-0) Cr. 3. F.

ARTID 255. Forces That Shape Interior Space. (3-0) Cr. 3. F.S.

A survey of variables influencing the nature and function of "interior" environments. Review of professional, geo-political, utilitarian, social-cultural, economic, humanistic, historical, technological, and other factors as generators of form and space.

ARTID 259. Sophomore Field Study. Cr. R. Prereq: Enrollment in interior design studio course

Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Offered on a satisfactory-fail basis only.

ARTID 251. Graphic Communication for Interior Design I. (2-2) Cr. 3. F. Prereq: Admission to the interior design program through program review and enrollment in ARTID 265

Perspective drawing, design sketching, and presentation drawings. Introduction to technical drawing conventions, and design drawings. Emphasis on design layout, line quality, and lettering. Use of various rendering media and techniques on 2D and 3D drawings. Overview of presentation techniques, both visual and verbal.

ARTID 265. Interior Design Studio I. (1-6) Cr. 4. F. Prereq: Credit or enrollment in ARTID 250 and ARTID 261; admission to the interior design program through program review. Enhanced creative interior design problem solving. Emphasis on research, spatial composition theories and graphic ideation and communication as applied to the interior design of small scale environments. Modeling and manual visualization techniques.

ARTID 267. Interior Design Studio II. (1-6) Cr. 4. S. Prereq: ARTID 265. Human factors issues including ergonomics, human behavior and the requirements of special groups. Color theories related to interior spaces. Residential interior design and medium scale projects. Detail drawings, and expansion of visualization techniques.

ARTID 350. Interior Finish Materials and Systems. (3-0) Cr. 3. F. Prereq: Completion of the College of Design Core. Exploration of concepts, materials, and assemblies associated with development of planar interior elements including floors, walls, ceiling, windows, and finishes. Fiber, plastic, sheet metal, and other surfacing materials. Attention to related human factors, testing, detailing, specifications, writing and end-use application.

ARTID 351. Interior Health and Safety Systems. (3-0) Cr. 3. S. Prereq: Completion of the College of Design Core. Exploration of interior design concepts, materials, and assemblies as they contribute to the user, health, safety and general well-being. Emphasis on human factors, testing, codes, detailing, specifications, and other issues related to design and end use. Wood, steel, masonry, and glass assemblies. Attention to related human factors, testing, codes, detailing, specifications writing and end-use application.

ARTID 352. Interior Environmental Control Systems. (3-0) Cr. 3. S. Prereq: Completion of the College of Design Core. Exploration of building construction concepts, materials, and assemblies and their influence on interior design. Attention to human factors, codes, detailing, and other interior design issues related to buildings.

ARTID 353. Interior Building Systems and Details. (3-0) Cr. 3. F. Prereq: Completion of the College of Design Core. Exploration of building construction concepts, materials, assemblies associated with building service systems. Overview of electrical, lighting, acoustical, HVAC, plumbing and other non-structural building features. Attention to related human factors, testing, codes, detailing, specifications writing and end-use application.

ARTID 355. Interior Design History/Theory/Criticism I. (3-0) Cr. 3. S. Prereq: Completion of the College of Design Core. Theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture, from a critical, historical and multicultural perspective. Focus on pre-1850. Nonmajor graduate credit.

ARTID 356. Interior Design History/Theory/Criticism II. (3-0) Cr. 3. F. Prereq: Credit or enrollment in ARTID 355 or permission of instructor. Advanced theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture from a critical, historical, and multicultural perspective. Focus on mid-nineteenth and twentieth century. Nonmajor graduate credit.

ARTID 357. Made in Italy. (2-0) Cr. 2. F. Prereq: Participation in Study Abroad Rome program. An investigation of the 20th century roots of modern Italian design and its contemporary form. Lectures and seminar presentations highlight major Italian designers and internationally significant design in the 20th century. Focus is on innovative design that exhibits a synthesis of formal and social functions. Meets International Perspectives Requirement.

ARTID 359. Junior Field Study. Cr. R. F. Prereq: Enrollment in third year interior design studio course. Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms, and museums. Offered on a satisfactory-fail basis only.

ARTID 360. Interior Design Internship Seminar. (0-1) Cr. 0.5. Repeatable, maximum of 1 credits. Prereq: Enrollment in interior design program. Procedural and ethical concerns relating to interior design internship. Preparation of placement credentials and formulation of personal goals. Internship plans and agreements. Offered on a satisfactory-fail basis only.

ARTID 367H. Interior Design Studio IV, Honors Cr. 4-5. (1-6) Cr. 4. S. Prereq: ARTID 365. Emphasis on three-dimensional spatial development in large scale, multiple scale unit institutional projects. Inclusion of extensive design documentation. Expansion of alternative manual and computer-based visualization methods. Teamwork.

ARTID 459. Senior Field Study. Cr. R. Prereq: Enrollment in fourth year interior design studio course. Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Offered on a satisfactory-fail basis only.

ARTID 461H. Interior Design Professional Practices, Honors Cr. 3-4. (3-0) Cr. 3. S. Prereq: ARTID 460. Organization and general management of the interior design office: agreements, business procedures, and professional ethics. Professional interior design issues and concerns.

ARTID 463. Environments for the Aging. (Dual-listed with ARTID 563). (Cross-listed with HD FS, GERON). (3-0) Cr. 3. S. Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies. Emphasis on independent living within residential settings including specialized shelter, supportive services, and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. Meets U.S. Diversity Requirement.

ARTID 465. Interior Design Studio V. (Dual-listed with ARTID 565). (1-6) Cr. 4. F. Prereq: ARTID 460, or permission of instructor, and enrollment in ARTID 459. Design research and refined problem solving methods including functional analysis, programming and detailing. Nonmajor graduate credit.

ARTID 468. Interior Design in an Urban Setting. (1-4) Cr. 3. S. Prereq: Enrollment or credit in third year studio courses. Study of selected interior design projects and designers practicing in an urban setting. Studio project examining issues related to interior design in an urban context.

ARTID 468H. Interior Design in an Urban Setting: Honors. (1-4) Cr. 3-4. S. Prereq: Enrollment or credit in third year studio courses. Study of selected interior design projects and designers practicing in an urban setting. Studio project examining issues related to interior design in an urban context.
(Dual-listed with ARTID 569D). Cr. 3. Repeatable, maximum of 6 credits. Prereq: Graduate classification or permission of instructor
Examination of special issues with emphasis on their translation into design application.

ARTID 469A. Design Theory.
(Dual-listed with ARTID 569). Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor
Examination of special issues with emphasis on their translation into design application. Nonmajor graduate credit.

ARTID 469B. Advanced Color.
(Dual-listed with ARTID 569). Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor
Examination of special issues with emphasis on their translation into design application. Nonmajor graduate credit.

ARTID 469C. Sustainable Design.
(Dual-listed with ARTID 569). Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor
Examination of special issues with emphasis on their translation into design application. Nonmajor graduate credit.

ARTID 469D. Variable Topics.
(Dual-listed with ARTID 569). Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor
Examination of special issues with emphasis on their translation into design application. Nonmajor graduate credit.

ARTID 490. Independent Study.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTID 490H. Independent Study, Honors.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTID 493. Workshop.
Cr. 1-3. Repeatable, maximum of 3 credits. F.S.SS. Prereq: Evidence of satisfactory experience in area of specialization
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

Courses primarily for graduate students, open to qualified undergraduates:

ARTID 551. Design Humanics.
(3-0) Cr. 3. Repeatable, maximum of 3 credits. F.S. Prereq: Instructor permission
An exploration of human nature as broadly defined and as applied to design of the built environment. Consideration of human characteristics, responses and performance, at varying scales, as sources of design insight. Topics vary each time offered.

ARTID 551A. Design Humanics: Micro-Scale Humanics.
(3-0) Cr. 3. Repeatable. F.S. Prereq: Instructor permission
Issues related to the nature, performance and accommodation of the individual organism, including sensation and perception, physical requirement, individual anthropometrics, personal safety and other issues connecting human needs and built environmental responses.

ARTID 551B. Design Humanics: Meso-Scale Humanics.
(3-0) Cr. 3. Repeatable, F.S. Prereq: Instructor permission
Issues related to human performance in small to moderate scale settings, including psychological and behavioral dimensions, social factors, interpersonal safety, etc.

ARTID 551C. Design Humanics: Macro-Scale Humanics.
(3-0) Cr. 3. Repeatable. F.S. Prereq: Instructor permission
Cultural and societal influences on human performance and well being in the moderate to large scale built environment, including the impact of political, economic, cultural, geographic, design cultural and other societal factors.

ARTID 552. Design Methods: Design Methods.
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S. Prereq: Permission of instructor
Survey of methodologies and methodological tools for varied end uses and drawn from wide ranging sources. Emphasis on their organization and application to design of the human environment. Topics vary each time offered.

ARTID 552A. Design Methods: Investigation Analysis.
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S. Prereq: Permission of instructor
Methods of design research, analysis, programming and theory formulation.

ARTID 552B. Design Methods: Synthesis.
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S. Prereq: Permission of instructor
Methods of synthesizing design concepts and solutions.

ARTID 552C. Design Methods: Communication.
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S. Prereq: Permission of instructor
Methods of managing, translating, communicating and otherwise utilizing text, image, abstract and other forms of information.

ARTID 552D. Design Methods: Procedural Alternatives.
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S. Prereq: Permission of instructor
New and specialized methodological trends, including subject or setting-specific methods.

ARTID 554. Interior Design Teaching Practicum.
Cr. 1-3. Repeatable. F.S.SS. Prereq: ARTID 668 and permission of instructor
Supervised practical application of interior design theory, materials, and practice to the educational process.

ARTID 559. Graduate Interior Design Field Study.
Cr. R. Repeatable. Prereq: Graduate enrollment or permission of instructor
Study and tours of places of interior design-related interest such as manufacturers, design studios, related professional offices, showrooms, museums, and historical sites.

ARTID 563. Environments for the Aging.
(Dual-listed with ARTID 463). (Cross-listed with HD FS, GERON). (3-0) Cr. 3. S.
Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies
Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.
Meets U.S. Diversity Requirement

ARTID 565. Interior Design Studio V.
(Dual-listed with ARTID 465). (1-6) Cr. 4. F. Prereq: Graduate classification and permission of instructor
Design research and refined problem-solving methods including functional analysis, programming and detailing.

ARTID 567. Interior Design Studio VI.
(Dual-listed with ARTID 467). (1-6) Cr. 4. S. Prereq: Graduate classification and permission of instructor
Refinement of technical, analytical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design. Open to non-majors. Nonmajor graduate credit.

ARTID 568. Experimental Interior Design.
(0-8) Cr. 4. Repeatable, maximum of 16 credits. F.S. Prereq: Graduate classification and permission of instructor
Application of alternative design methods and sources of insight to the solution of human environmental design problems. Focus on the identification, formulation, refinement and application of theory to the design process. Emphasis on the pursuit of new discovery and innovative problem solving. Approaches, settings and scales vary each time offered.

ARTID 569. Advanced Studies in Interior Design.
(Dual-listed with ARTID 469D). Cr. 3. Repeatable, maximum of 6 credits. Prereq: Graduate classification or permission of instructor
Examination of special issues with emphasis on their translation into design application.

ARTID 569A. Advanced Studies in Interior Design: Design Theory.
(Dual-listed with ARTID 469), Cr. 3. Repeatable, maximum of 6 credits. Prereq: Graduate classification or permission of instructor
Examination of special issues with emphasis on their translation into design application.

(Dual-listed with ARTID 469), Cr. 3. Repeatable, maximum of 6 credits. Prereq: Graduate classification or permission of instructor
Examination of special issues with emphasis on their translation into design application.
ARTID 569C. Advanced Studies in Interior Design: Sustainable Design. (Dual-listed with ARTID 469). Cr. 3. Repeatable, maximum of 6 credits. Prereq: Graduate classification or permission of instructor
Examination of special issues with emphasis on their translation into design application.

ARTID 569D. Advanced Studies in Interior Design: Variable Topics. (Dual-listed with ARTID 469). Cr. 3. Repeatable, maximum of 6 credits. Prereq: Graduate classification or permission of instructor
Examination of special issues with emphasis on their translation into design application.

ARTID 590. Special Topics. Cr. arr. Prereq: Bachelor's degree in interior design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment

ARTID 593. Workshop. Cr. 1-3. Repeatable. F.S.S. Prereq: Graduate classification; evidence of satisfactory experience in area of specialization
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ARTID 598. Research Forum. (1-0) Cr. 1-3. Repeatable, maximum of 9 times. F.S. Prereq: Concurrent enrollment in ARTID 565, ARTID 567, ARTID 568, ARTID ARTID 665, or ARTID 668, and permission of instructor
Presentation and discussion of cross-disciplinary design research theory, methods, and application. Focus on the investigation, application, and communication of types of design research.

ARTID 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students:

ARTID 660. Research Methods. (3-0) Cr. 3. S. Prereq: Permission of instructor
Research strategies related to design. Application of selected methods to specific issues. Open to non-majors. Nonmajor graduate credit.

ARTID 668. Advanced Experimental Interior Design. (0-8) Cr. 4. Repeatable, maximum of 16 credits. F.S. Prereq: Graduate classification and permission of instructor.
Application of alternative design methods and sources of insight to the solution of human environmental design problems. Focus on the identification, formulation, refinement and application of theory to the design process. Emphasis on the pursuit of new discovery and innovative problem solving. Approaches, settings and scales vary each time offered.

ARTID 690. Advanced Topics. Cr. arr. Repeatable. Prereq: M.F.A classification, permission of instructor

Applied, off campus, professional interior design-related experience.

Landscape Architecture

Undergraduate Study

Landscape Architecture is an environmental design discipline. Landscape architects actively shape the human environment; they map, interpret, imagine, draw, build, conceptualize, synthesize, and project ideas that transform landscapes. The design process involves creative expression that derives from an understanding of the context of site (or landscape) ecosystems, cultural frameworks, functional systems, and social dynamics. Students in our program learn to change the world around them by re-imagining and re-shaping the landscape to enhance its aesthetic and functional dimensions, ecological health, cultural significance, and social relevance. The profession addresses a broad range of landscapes in urban, suburban, rural, and wilderness settings. The scale of landscape architecture projects varies from broad, regional landscape analysis and planning to detailed, individual site-scale designs. The curriculum at Iowa State prepares students for this challenge as they develop their abilities to design and communicate ideas through a sequence of foundational courses and studios. The program seeks to produce graduates who understand the ethical, social, and environmental/ecological dimensions of issues involving changes in the landscape.

Graduates are active in a broad range of careers, such as sustainable site design, land development, park management, environmental advocacy, community planning, urban design, and others. In their professional lives, graduates apply their creative and technical skills in the planned arrangement of natural and constructed elements on the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments serve useful, aesthetic, safe, and enjoyable purposes. Graduates are able to communicate effectively with colleagues in the sciences and humanities as well as in the allied professions, and are prepared to work individually and in multidisciplinary teams to address complex problems dealing with the cultural/ecological environment.

The undergraduate curriculum includes one year of the college’s Core Design Program followed by a four-year professional program. Admission to the professional program is subject to the approval of a faculty committee at the completion of the Core Design Program. The department also cooperates in the undergraduate minor in Design Studies, Critical Studies in Design, and Digital Media.

Following admission to the professional program, students embark on the traveling studio during the fall semester of their second year. This studio is a full semester’s credit of integrated departmental courses and involves extensive travel within and beyond the great Midwest region of North America, to study regional natural systems and the cultural responses to those systems.

To enhance the study of landscape architecture in off-campus settings, the department recommends that each student participate in optional college or department-led international study opportunities such as the Rome summer offering. In addition, the department requires students to choose from among the following three options during the spring and summer of their fourth year: a professional internship, an independent study abroad experience, or National Student Exchange.

The department assists students with placement, and additional information is provided through the department and the College of Design’s Career Services Office. Personal laptop/notebook computers and appropriate software are regularly used in classes starting with the second year.

The undergraduate curriculum is fully accredited by the Landscape Architecture Accreditation Board (LAAB) and provides the education which, combined with experience, is necessary for professional licensure.

Graduate Study

The department offers two primary opportunities for professional and post-professional study: the M.L.A. degree, which provides the skills and knowledge for professional practice and the M.S.L.A. degree, which focuses on graduate-level research on the built environment. Minor work is offered to students taking major work in other departments.

The M.L.A. degree is a first professional degree in landscape architecture, for students with undergraduate degrees other than landscape architecture. Students enroll in a six-semester full-time program of coursework, some of which overlaps with the bachelor’s degree curriculum. However, graduate-level work is accomplished by a minimum of 30 credits of advanced courses, both required and elective, completed at the 500-level. This coursework also provides a chance to concentrate study in a topical area of practice, through elective courses and/or an optional thesis. Students’ concentrations—in areas such as history-theory; design-art; ecological design; or community design, etcetera—are determined by the student in conjunction with his/her major professor and will be designated in a program of study, to be completed by the end of his/her first year. Electives may be selected from within the department and college as well as from other departments across campus.

The M.L.A. program has recently been granted candidacy status by LAAB and is undergoing a required 3-year review for initial accreditation. Full accreditation status is expected in 2013. Students who graduate before 2013 will be considered by LAAB to have graduated from an accredited program.

The M.S.L.A. is an unaccredited, research degree addressing landscape architecture as a scholarly endeavor. The degree is primarily intended as an advanced professional degree targeted at students already possessing an accredited first professional degree (B.L.A., B.Arch, M.Arch, etc.) and wishing to pursue in-depth, independent research. The M.S.L.A. is granted upon completion of 36 credits (at least 30 of which are completed at the 500-level) and the acceptance of a thesis or creative component. Periodically, students without accredited, first professional design degrees wish to complete an unaccredited master’s degree in landscape architecture. Such students may, in special cases, be allowed to pursue an M.S.L.A.
providing they take an additional 12 credits of coursework, at least 6 of which must be an approved design studio, for a total of 48 hours of coursework.

Students may also enter a special program to earn both the M.L.A. and the master of community and regional planning (M.C.R.P.) degrees. Students interested in the double degree M.L.A/M.C.R.P. program should contact the departments to receive a detailed description of requirements. The department also teaches in the Graduate Certificate Program in Geographic Information Systems (GIS), administered by the Department of Community and Regional Planning.

Curriculum in Landscape Architecture

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five-year curriculum, requiring 149.5 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Program of 30 credits and a four-year professional program of 119.5 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

The BLA from Iowa State University is an LAAB (Landscape Architectural Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional licensure. The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first professional degree programs in landscape architecture at the Bachelor’s and Master’s levels.

The department also offers a graduate program leading to the degrees of Master of Landscape Architecture or Master of Science in Landscape Architecture. For more complete graduate program descriptions, contact the department or go to the nextcatalog.registrar.iastate.edu/planofstudy/design/#landscapearchitecturebla)

Total Degree Requirement: 149.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 10 cr.

(C- or better grade)

Courses

Courses primarily for undergraduates:

L A 201. Studio: Landscape Interpretation and Representation.
(1-15) Cr. 6. F. Prereq: Enrollment in the professional program
Reading and representing varied landscapes; development of aesthetic sensitivity to the geomorphology, vegetation, and cultural influences on these landscapes. Small-scale interventions and exploration of landscape phenomena and change. Emphasis on a variety of documentation and drawing techniques.

L A 202. Studio: Site Design I.
(1-15) Cr. 6. S. Prereq: L A 201
Fundamental issues of landscape planning and design at a site scale. Projects introduce a variety of (objective and subjective) site inquiry methods, space and place making, and sensitive integration of architecture and landscape for specific land uses. User needs, precedent study, programming, site engineering, planting design, and outdoor space design expressed through a variety of three-dimensional modeling, graphic, and written media.

L A 221. Native Plants of the Savanna Ecotone.
(2-3) Cr. 3. F. Prereq: Enrollment in the professional program
Observation and study of the wetland, prairie, and woodland vegetation native to the savanna ecotone. Emphasis on plant communities, their distribution, structure, habitat and aesthetics. Plant identification and use in landscape design. Precedent and case studies of vegetation preservation, restoration and use in built works.
LA 222. Introduced Plants of the Midwest. 
(2-3) Cr. 3. S. Prereq: L A 221
Identification, observation, and study of plants introduced to cultivation in the Midwest region. Plant cultural requirements, including adaptations to climate changes, solar exposure, and soil conditions. Investigation of history of plant introduction and use in designed landscape, including consequent impacts of plant introduction such as plant invasion. Introduction to planting design at the site scale, including matching plant cultural requirements to site conditions, functional uses of plants and expressive composition using plant form, texture and color.

(1-0) Cr. 1. F. Prereq: Enrollment in the professional program
Development of life skills for conflict resolution, effective interpersonal communication, and CPR/First Aid. Examination of personal values as they relate to the backgrounds, abilities, attitudes, and values of others; exploration of how these influence personal decision-making and group interaction. Reading, discussion, class activities, journal-keeping, writing. Offered on a satisfactory-fail basis only.

(Cross-listed with NREM, ENV S). (3-0) Cr. 3. Alt. S., offered 2014.
The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state agencies. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands.

LA 272. Cultural Landscape Studies. 
(3-0) Cr. 3. F. Prereq: Enrollment in the professional program
Exploration of cultural landscapes, from broad settlement patterns to individual sites, with an emphasis on the origins and evolution of landscapes. Investigation of relationships between vernacular and designed landscapes. Landscapes considered as modes of cultural production that shape and are shaped by social, political, and economic processes. Exploration of landscapes as persistent (yet ephemeral) repositories of culture. Lectures, reading, field studies, and writing. Meet U.S. Diversity Requirement

LA 274. The Social and Behavioral Landscape. 
(Cross-listed with DSN S). (3-0) Cr. 3. S.
Exploration of social and behavioral factors pertinent to design of the domestic, civic, and commercial landscape. Focus on working familiarity with design principles as they relate to the behavior and activities of people across a broad demographic and cultural spectrum; application of these principles to design of outdoor environments. Lectures and discussions, including group exercises and field trips. Meet U.S. Diversity Requirement

LA 281. Investigating Landscape Form, Process, and Detail. 
(1-6) Cr. 3. F. Prereq: Enrollment in professional program
Exploration of the poetics and principles of landscape construction. Investigation and interpretation of landform and geomorphic processes such as the hydrologic cycle, erosion, and sedimentation. Close observation and representation of detail design, with an emphasis on material types, their connections, and weathering. Readings, field studies, and drawings in analog and digital media.

LA 282. Landscape Dynamics. 
(2-2) Cr. 3. S. Prereq: Sophomore standing
Understand design implications presented by geotechnical and ecological processes in the landscape including ecology, vegetation, soils and water. Understand the influence of landforms, geology, plants, soils, and water on the creation of landscape designs. Course relates current issues including water quality impairment, erosion, and invasive species with design strategies such as stormwater management, soil quality management, and plant community restoration. Field trips.

LA 301. Site Design II. 
(1-15) Cr. 6. F. Prereq: L A 202
Development of half-acre to hundred-acre landscape design and planning proposals, potentially in collaboration with students in other programs. Apply critical methodological frameworks to shape site systems while providing appropriate support for diverse user groups and creating culturally meaningful places. Assess and interpret a program of use, organize subjective and objective site inventory and analysis, develop functional and poetic design strategies for infrastructure and natural systems, and craft artistically and functionally explicit landscape architectural proposals. Development of appropriate technique and high level of craft in representations to support design thinking process and final scheme presentation.

LA 302. Ecological Design at the Regional Scale. 
(1-15) Cr. 6. S. Prereq: L A 282, L A 301, L A 381 and NREM 120
Application of ecological theories and processes in design and planning at the hundred plus-acre scale specifically focusing on urban and urban fringe landscapes. Apply advanced landscape analysis of soil, water, and vegetation utilizing geographic information systems. Focus on particular stream and wetland restoration, mitigation, and regulations and developing design representations for public use.

LA 309. Field Travel. 
Cr. 1. Repeatable, maximum of 2 times. F.S.SS. Prereq: Enrollment in the professional program and permission of instructor
Observation of and reflection on professional practice and landscapes in urban, rural, and wilderness areas. Offered on a satisfactory-fail basis only.

LA 322. Fundamentals of Planting Design. 
(2-3) Cr. 3. Alt. F., offered 2012. Prereq: L A 221
The art and techniques of creating plant compositions in the landscape that respond to cultural and biophysical contexts. Investigation of soil properties and plant/solid relationships relevant to the built environment. Methods of site inventory and analysis, developing plant palettes and composing plant assemblages that address expressive and functional needs. Introduction to the techniques of preparing planting plans, including standards for plant selection, plant lists and plant specification.

LA 341. Contemporary Landscape Architecture. 
(1-0) Cr. 1. S. Prereq: L A 301
Exploration of contemporary landscape architectural practice through individualized research into practicing firms. Preparation of paper and presentation outlining broad framework and specific parameters of a selected area of contemporary practice using specific projects as examples. Work may result in invitation of current practitioner(s) as a lecture series event or research. Resume and portfolio preparation in advance of required off-campus semester (L A 444 A, B or C).

(Cross-listed with DSN S). (3-0) Cr. 3. S.
Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

LA 373. Gardens and Landscapes from Antiquity to 1750. 
(Cross-listed with DSN S). (3-0) Cr. 3. F.
Investigation of international landscape design concepts and trends as observed over time, from pre-history to the mid 18th century. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers. Meet International Perspectives Requirement.

LA 381. Shaping the Land. 
(3-0) Cr. 3. F. Prereq: L A 282 and MATH 141
Design of landforms to achieve aesthetic, functional, and safety goals. Landform changes to accommodate human uses and activities. Impacts and implications of landform transformation on the surrounding environment. Surface and subsurface drainage design, storm water runoff best management practices, contour manipulation to incorporate slopes, swales, culverts, pads, retaining walls, walks, steps, terraces, buildings, and other structures in the landscape. Road layout and alignment, parking lot design, and earthwork volume estimates. Design communication using CAD, perspectives, cross-sections, contour maps, landform models, and narratives. Class exercises, case study precedents, and preliminary construction documents.

LA 401. Community Design. 
(1-15) Cr. 6. F. Prereq: L A 402
Physical planning and design of places utilizing community-based methods. Projects address social and cultural dimensions of placemaking such as reuse of abandoned sites, in-fill development, and community visioning. Emphasis on development of user-client relationship skills and design research. Integrated seminar component.

LA 401H. Community Design: Honors. 
(1-15) Cr. 7. F. Prereq: L A 402
Physical planning and design of places utilizing community-based methods. Projects address social and cultural dimensions of placemaking such as reuse of abandoned sites, in-fill development, and community visioning. Emphasis on development of user-client relationship skills and design research. Integrated seminar component.
L A 402. Urban Design. (1-15) Cr. 6. F. Prereq: L A 302 Comprehensive planning and design for urban sites or for sites within urban contexts. Projects typically include planning for a variety of integrated land uses, and cover the full range of design scales from master planning to proposals for site details. Emphasis on written and verbal as well as graphic communications. Integrated seminar component.

L A 402H. Urban Design: Honors. (1-15) Cr. 7. F. Prereq: L A 302 Comprehensive planning and design for urban sites or for sites within urban contexts. Projects typically include planning for a variety of integrated land uses, and cover the full range of design scales from master planning to proposals for site details. Emphasis on written and verbal as well as graphic communications. Integrated seminar component.

L A 405H. Senior Thesis. (0-15) Cr. 6. S. Prereq: L A 401, L A 402, L A 403, enrollment in Honors program and permission of adviser, chair and thesis adviser Individual advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are expected.

L A 417. Urban and Peri-urban Watershed Assessment. (Dual-listed with L A 517). (Cross-listed with ENV S). (2-3) Cr. 3. F. Prereq: Junior classification and 6 credits of natural science Assessment and reduction of impacts in urban and peri-urban watershed areas. Course prepares students to work with various analysis methods for vegetation, topography, stormwater and stream condition as well as work with data from other disciplines. Emphasis on communicating with the public. Introductory GIS and GPS technologies are utilized. Learning is largely field-based.

L A 421. Advanced Planting Design. (Dual-listed with L A 521). (2-3) Cr. 3. S. Prereq: L A 322 or permission of instructor Theory and practice of planting design, with emphasis on the ecological, cultural, and aesthetic factors affecting planting design and vegetation management in the built environment. Three venues for collaborative learning form the basis of the course: topical research inquiry, case history investigation, and completion of one comprehensive project design.

L A 441. Professional Practice. (2-0) Cr. 2. S. Prereq: L A 481 Studies of conventional and developing forms of public and private practice. Explore relationships between professional life and the culture of the professional design firm; investigate firm identities and structures; understand design projects, their delivery process, and contractual agreements. Lecture and class discussion.

L A 444. Landscape Architecture Independent Educational Enrichment. Cr. R. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 341 or permission of adviser and chair Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

L A 444A. Landscape Architecture Independent Educational Enrichment: Professional Internship. Cr. R. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 341 or permission of adviser and chair Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

L A 444B. Landscape Architecture Independent Educational Enrichment: Study Abroad. Cr. R. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 341 or permission of adviser and chair Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

L A 444C. Landscape Architecture Independent Educational Enrichment: National Student Exchange. Cr. R. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 341 or permission of adviser and chair Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

L A 461. Introduction to GIS. (Cross-listed with ENSCI, ENV S, IA LL). Cr. 4. SS. Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management. Nonmajor graduate credit.

L A 478. Landscape Architecture. (Dual-listed with L A 578). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478A. Landscape Architecture: Landscape Design. (Dual-listed with L A 578A). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478B. Landscape Architecture: Planting Design. (Dual-listed with L A 578B). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478C. Landscape Architecture: Construction. (Dual-listed with L A 578C). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478D. Landscape Architecture: History/Theory/Criticism. (Dual-listed with L A 578D). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478E. Landscape Architecture: Landscape Planning. (Dual-listed with L A 578E). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478F. Landscape Architecture: Urban Design. (Dual-listed with L A 578F). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478G. Landscape Architecture: Graphics. (Dual-listed with L A 578G). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478H. Landscape Architecture: Honors. (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478I. Landscape Architecture: Interdisciplinary Studies. (Dual-listed with L A 578I). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.
LA 478J. Landscape Architecture: International Studies. (Dual-listed with LA 578J). (Cross-listed with DSN S). Cr. 2-3. Repealtable, maximum of 3 times. F.S.SS. Prereq: LA 202 or senior or graduate classification. Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

LA 478K. Landscape Architecture: Computer Applications. (Dual-listed with LA 578K). (Cross-listed with DSN S). Cr. 2-3. Repealtable, maximum of 3 times. F.S.SS. Prereq: LA 202 or senior or graduate classification. Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

LA 478L. Landscape Architecture: Ecological Design. (Dual-listed with LA 578L). (Cross-listed with DSN S). Cr. 2-3. Repealtable, maximum of 3 times. F.S.SS. Prereq: LA 202 or senior or graduate classification. Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

LA 478M. Landscape Architecture: Social/Behavioral. (Dual-listed with LA 578M). (Cross-listed with DSN S). Cr. 2-3. Repealtable, maximum of 3 times. F.S.SS. Prereq: LA 202 or senior or graduate classification. Offers vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

LA 482. Advanced Landscape Construction. (1-4) Cr. 3. S. Prereq: LA 481 Advanced site construction issues, with emphasis on water and irrigation systems, mechanical and electrical systems, site lighting, proposal preparation, project scheduling, project costing and estimating, and master specification editing.

LA 490N. Independent Study: Natural Resources. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form. Investigation of a topic of special interest to the student.

LA 491. Environmental Law and Planning. (Dual-listed with LA 591). (Cross-listed with DSN S, ENV S, C R P). (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Courses primarily for graduate students, open to qualified undergraduates:

LA 504. Landworks: Advanced Landscape Architecture. (1-15) Cr. 6. Prereq: Graduate classification Graduate studio in landscape architectural design working on complex sites involving multiple scales of design. Course emphasizes advanced skills in design research and representation and application of theory, as well as technical competency and teamwork. Development of original ideas, experimentation, and innovation.

LA 517. Urban and Peri-urban Watershed Assessment. (Dual-listed with LA 417). (Cross-listed with ENV S). (2-3) Cr. 3. F. Prereq: Junior classification and 6 credits of natural science Assessment and reduction of impacts in urban and peri-urban watershed areas. Course prepares students to work with various analysis methods for vegetation, topography, stormwater and stream condition as well as work with data from other disciplines. Emphasis on communicating with the public. Introductory GIS and GPS technologies are utilized. Learning is largely field-based.

LA 521. Advanced Planting Design. (Dual-listed with LA 421). (2-3) Cr. 3. S. Prereq: LA 322 or permission of instructor Theory and practice of planting design, with emphasis on the ecological, cultural, and aesthetic factors affecting planting design and vegetation management in the built environment. Three venues for collaborative learning form the basis of the course: topical research inquiry, case history investigation, and completion of one comprehensive project design.

LA 541. Principles of Research for Landscape Architects. (3-0) Cr. 3. F. Prereq: Graduate standing Examination of design inquiry and research methods appropriate to landscape architectural projects, including bibliographical, historical, numerical, statistical, survey, and geographical methods. Readings, discussions, and application problems. Preparation of a research proposal.
L A 567. Advanced GIS Landscape Modeling.
(0-6) Cr. 3. Prereq: L A 302 or C R P 451/C R P 551
Application of Geographic Information Systems (GIS) modeling techniques to landscape planning and management issues. Selection, acquisition, and conversion of digital landscape data. Modeling applications for studio projects, outreach projects, and research projects.

L A 571. Landscape Architectural Theory I.
(3-0) Cr. 3. F. Prereq: graduate classification or permission of instructor
Examination of the development of ideas in landscape architecture in their historical context of social practices and knowledge systems. Emphasis on exposure to key modern and contemporary texts and projects in landscape architecture, architecture, art, and related fields. Readings, discussions, and writings.

L A 573. Landscape Architectural Theory II.
(3-0) Cr. 3. S. Prereq: Graduate standing or permission of instructor
Exploration of major theories and emerging practices of landscape architectural design and their relationships to broader, cultural and theoretical perspectives. Emphasis on developing critical ways of analyzing ideas. Lectures, readings, discussion, and writings.

L A 578. Landscape Architecture.
(Dual-listed with L A 478). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS.
Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578A. Landscape Architecture: Landscape Design.
(Dual-listed with L A 478B). (Cross-listed with DSN S). Cr. 2-3. Repeatable. maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578B. Landscape Architecture.
(Dual-listed with L A 478B). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS.
Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578C. Landscape Architecture: Construction.
(Dual-listed with L A 478C). (Cross-listed with DSN S). Cr. 2-3. Repeatable. maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578D. Landscape Architecture: History/Theory/Criticism.
(Dual-listed with L A 478D). (Cross-listed with DSN S). Cr. 2-3. Repeatable. maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578E. Landscape Architecture: Landscape Planning.
(Dual-listed with L A 478E). (Cross-listed with DSN S). Cr. 2-3. Repeatable. maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578F. Landscape Architecture: Urban Design.
(Dual-listed with L A 478F). (Cross-listed with DSN S). Cr. 2-3. Repeatable. maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578G. Landscape Architecture: Graphics.
(Dual-listed with L A 478G). (Cross-listed with DSN S). Cr. 2-3. Repeatable. maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578H. Landscape Architecture: Honors.
(Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578I. Landscape Architecture: Interdisciplinary Studies.
(Dual-listed with L A 478I). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

(Dual-listed with L A 478J). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578K. Landscape Architecture: Computer Applications.
(Dual-listed with L A 478K). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 371 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578L. Landscape Architecture: Ecological Design.
(Dual-listed with L A 478L). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 371 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578M. Landscape Architecture: Social/Behavioral.
(Dual-listed with L A 478M). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS.
Prereq: L A 371 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

Cr. 1-4. Repeatable, maximum of 4 credits. F.S.SS.
Prereq: Permission of major professor
Hands-on participation in a creative or research activity in the student's area of specialization. Development of a detailed prospectus that defines the thesis or creative component.

L A 590. Special Topics.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590A. Special Topics: Landscape Design.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590B. Special Topics: Planting Design.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590C. Special Topics: Construction.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590D. Special Topics: History/Theory/Criticism.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590E. Special Topics: Landscape Planning.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590F. Special Topics: Urban Design.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590G. Special Topics: Graphics.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590H. Special Topics: Interdisciplinary Studies.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590K. Special Topics: Computer Applications.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590L. Special Topics: Ecological Design.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590M. Special Topics: Social/Behavioral.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.

L A 590N. Special Topics: Natural Resources.
Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS.
Prereq: graduate standing.
L A 591. Environmental Law and Planning. (Dual-listed with L A 491). (Cross-listed with DSN S, ENV S, C R P). (3-0) Cr. 3. S. Prereq: Graduate classification
Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.
L A 599. Creative Component.
Cr. 1-8. Repeatable, maximum of 6 credits. F. S. S. S. Prereq: Permission of major professor
Comprehensive study and original development of a project selected by the student and approved by the major professor. Completed project must be submitted to and approved by a graduate faculty committee as evidence of mastery of the principles of landscape architecture.

Courses for graduate students:
Cr. 1-8. Repeatable, maximum of 8 credits. F. S. S. S. Prereq: Permission of major professor

College of Engineering
Sarah Rajala, Dean for College of Engineering
Balaji Narasimhan, Associate Dean for Research
Ron Cox, Associate Dean for Extension
Gary Mirka, Associate Dean for Undergraduate and Graduate Education

Aligning Education in Engineering with the University Mission
The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students’ critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Concurrent Graduate/Undergraduate Programs
Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are: agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, construction engineering, electrical engineering, industrial engineering, materials engineering, and mechanical engineering.

Programs offering concurrent bachelor of science/master of business administration degrees are: aerospace engineering, agricultural engineering, civil engineering, computer engineering, electrical engineering, industrial engineering and mechanical engineering. For more information, refer to the graduate study sections for each engineering program. Advanced work in engineering is offered in the post-graduate programs. See the Graduate College (p. 666) section of this catalog.

Joint Undergraduate Programs
A bachelor of science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences. This program is jointly administered by the Department of Electrical and Computer Engineering and the Department of Computer Science.

Accreditation
Ten engineering programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. These ten programs are: aerospace, agricultural, chemical, civil, computer, construction, electrical, industrial, materials, and mechanical engineering. Accreditation status is indicated in the Courses and Programs section for each engineering program.

Organization of Curricula
All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students should complete the requirements of the basic program before proceeding to a professional program.
Preparation for the Engineering Curricula

In addition to the standard university admission requirements, the college also requires 2 years of a foreign language. Other high school credits particularly important to students wishing to study engineering include:

- 2 years of algebra,
- 1 year of geometry
- 1/2 year of trigonometry
- 1/2 year of pre-calculus
- 1 year each of chemistry, biology, and physics
- 3 years of social science
- 4 years of English

See Index (http://catalog.iastate.edu/azindex) for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Basic Program for Professional Engineering Curricula

The first year program is much the same for all professional curricula in the College of Engineering. Students normally enroll in the majority of the basic program courses during their first year. The basic program is a set of courses common to all engineering curricula. Since students may also begin curriculum designated requirements during their first year, they will want to select a curriculum as soon as possible. This will enable them to receive the bachelor’s degree in a minimum time.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing either MATH 141 Trigonometry or MATH 142 Trigonometry and Analytic Geometry before enrolling in MATH 166 Calculus II or C E 160 Engineering Problems with Computational Laboratory.

The Department of English may recommend placement in one or more sections of ENGL 101 English for Native Speakers of Other Languages if the placement test indicates a deficiency.

ENGL 101 English for Native Speakers of Other Languages if the placement test indicates a deficiency.

The following courses are generally required:

- MATH 165 Calculus I
- MATH 166 Calculus II
- ENGL 101 English for Native Speakers of Other Languages
- CHEM 167 General Chemistry for Engineering Students
- ENGR 160 Engineering Problems with Computer Applications Laboratory

Or one of the following in place of ENGR 160**

- AER E 160 Aerospace Engineering Problems With Computer Applications Laboratory
- C E 160 Engineering Problems with Computational Laboratory
- CH E 160 Chemical Engineering Problems with Computer Applications Laboratory
- CPR E 185 Introduction to Computer Engineering and Problem Solving I
- E E 185 Introduction to Electrical Engineering and Problem-Solving I
- I E 148 Information Engineering
- M E 160 Mechanical Engineering Problem Solving with Computer Applications
- S E 185 Problem Solving in Software Engineering
- PHYS 221 Introduction to Classical Physics I
- ENGR 101 Engineering Orientation
- LIB 160 Information Literacy

Total Credits: 27

*All students intending to study in the College of Engineering must complete 1 year of each engineering curricula are listed below.

**Information Literacy

**Engineering Orientation

**Cornerstone Learning Community: Orientation to Academic Life

**Cornerstone Learning Community: Orientation to Professional Life

**One of the following

**Psychology

**Developmental Psychology

**Social Psychology

**Aerospace Seminar

**Introduction to Object-oriented Programming

**Professional Programs Orientation

**Professional Life

Curriculum Designated Requirements

Aerospace Engineering

AER E 161 Numerical, Graphical and Laboratory Techniques for Aerospace Engineering 4
AER E 192 Aerospace Seminar R
GenEd Electives 3

Agricultural Engineering

CHEM 167L Laboratory in General Chemistry for Engineering 1
A E 110 Experiencing Agricultural and Biosystems Engineering 1
A E 170 Engineering Graphics and Introductory Design 3
SSH Elective 3

Biological Systems Engineering

CHEM 167L Laboratory in General Chemistry for Engineering 1
BSE 110 Experiencing Biological Systems Engineering 1
BSE 170 Engineering Graphics and Introductory Design 3
SSH Elective 3

Chemical Engineering

CHEM 167 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
CHEM 178L Laboratory in College Chemistry II 1
SSH Elective 3

Civil Engineering

CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1
C E 105 Introduction to the Civil Engineering Profession 1
C E 170 Graphics for Civil Engineering 2
C E 111 Fundamentals of Surveying I 3
SSH Elective 3

Computer Engineering

COM S 227 Introduction to Object-oriented Programming 4
CPR E 166 Professional Programs Orientation R
Gen Ed Elective 3

Construction Engineering

CON E 121 Cornerstone Learning Community: Orientation to Academic Life 1
CON E 122 Cornerstone Learning Community: Orientation to Professional Life 1

One of the following

- PSYCH 101 Introduction to Psychology
- PSYCH 230 Developmental Psychology
- PSYCH 280 Social Psychology
- C E 170 Graphics for Civil Engineering 2
SSH Elective 3

Electrical Engineering

E E 285 Problem Solving Methods and Tools for Electrical Engineering 4
E E 166 Professional Programs Orientation R
Gen Ed Elective 3
### Industrial Engineering

| I E 101 | Industrial Engineering Profession | R
| SSH Elective | 6 |

### Materials Engineering

| CHEM 177 | General Chemistry I | 4
| CHEM 177L | Laboratory in General Chemistry I | 1
| CHEM 178 | General Chemistry II | 3
| CHEM 178L | Laboratory in College Chemistry II | 1
| Gen Ed Elective | 3 |
| PHYS 221 | Introduction to Classical Physics I (scheduled in sophomore year) | 5 |

### Mechanical Engineering

| CHEM 167L | Laboratory in General Chemistry for Engineering | 1
| M E 170 | Engineering Graphics and Introductory Design | 3
| Gen Ed Elective | 3 |

### Software Engineering

| S E 166 | Careers in Software Engineering | R
| COM S 227 | Introduction to Object-oriented Programming | 4
| COM S 228 | Introduction to Data Structures | 3 |

The student's advisor may require or recommend courses in addition to those specified above if the preparation and progress of the student are such that additional courses are necessary or desirable.

*Students planning to enroll in C E, Ch E, or Mat E will find CHEM 177 General Chemistry I to be a better preparation for CHEM 178 General Chemistry II. However, CHEM 167 General Chemistry for Engineering Students is accepted as a substitute for CHEM 177 General Chemistry I for those students declaring one of these curricula after having completed CHEM 167 General Chemistry for Engineering Students.*

**Recommended choices by program:**

**Aerospace Engineering**
