The Iowa State University Catalog

The Iowa State University Catalog is a two-year publication which lists all academic policies, and procedures. In addition, it includes information for fees, curriculum requirements and first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses developed and offered since catalog publication can be found on the Web at www.iastate.edu/~catalog/exp/.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Approved by the Board of Regents,
State of Iowa
Iowa State University is one of the most respected land-grant universities in the nation. Established by the Iowa General Assembly in 1858, the Iowa Agricultural College and Model Farm was designated the first land-grant college in 1858 and became the first to accept the terms of the federal Morrill Act in 1864.

The act allowed Iowa to sell federal land to finance a new college open to all, regardless of wealth, race or gender; offering a practical education in engineering, agriculture and military science as well as classical studies; and sharing research knowledge with all Iowans. Iowa State University officially opened in 1869 and was the first coeducational land-grant school.

In 1903, the nation's first cooperative agricultural extension program was launched when Iowa State professors worked with farmers and county governments to establish demonstration farms and institutes.

It is our institutional commitment to the founding principles of Iowa State University that has produced alumni who are leaders in their professions, research that has forever changed our society and knowledge-based information that has assisted the citizens of our state, nation and world community.

Iowa State’s Points of Pride

*The world’s first electronic digital computer was developed at Iowa State by math and physics professor John V. Atanasoff and graduate student Clifford Berry, in the late 1930s. Their invention, the ABO computer, has been called the most important technological innovation of the 20th century.

*The university is a leader in virtual reality research and its most advanced virtual reality theater, the C6, is the nation’s first six-sided theater that totally immerses the user in images and sound.

*Iowa State’s faculty members are recognized for their scholarly efforts. They serve as editors and on editorial and advisory boards of national and international academic professional journals.

*Iowa State is one of the top three U.S. universities in the development of patentable biotechnology.

*Iowa State’s faculty includes two professors who have been recognized among the top 100 young technology innovators in the world.

*Iowa State’s faculty includes members of the National Academy of Engineering and the National Academy of Sciences.

*Iowa State is a member of the prestigious Association of American Universities that has a membership of only 62 major research universities in the United States and Canada.

*Iowa State’s learning communities program for undergraduate students is rated among the nation’s best.

*Every state and more than 100 countries are represented in Iowa State’s student body.

*Iowa State students have a reputation for winning national and international awards. They win contests for apparel design, NASA food technology, news writing for print and broadcast, computer software, vocal music, and music composition.

*Iowa State is nationally ranked for its beautiful campus and its central campus has been honored by the Association of Landscape Architects as one of only three university Centennial Medallion sites in the nation.

*Iowa State’s 600 works of art on campus make its public art collection the largest of any university in the nation.

*Iowa State’s Reiman Gardens has been recognized for having the nation’s most outstanding public rose garden.

*Iowa State holds two world records certified by the Guinness Book of World Records: one for making the world’s largest Rice Krispies Treat to celebrate that Mildred Day, an Iowa State alumna, helped create the recipe for the popular snack food; and one for growing the tallest amaranth plant in the world.

*Iowa State’s wrestling program boasts 5 Olympic gold medalists – the latest being graduate Cael Sanderson at the 2004 Olympic Games in Athens, Greece. Sanderson’s perfect collegiate wrestling record of 159 wins has been recognized by Sports Illustrated as the second most impressive feat in college sports history.

*Washington Monthly magazine ranks Iowa State among the top 20 public universities that do the best at serving the United States through educating economically challenged students, undertaking vital research that drives the U.S. economy and promoting the ethic of service to country.

*Iowa State’s undergraduate programs for future entrepreneurs are ranked among the top 25 in the country.

*Iowa State’s interior design, architecture and landscape architecture programs are ranked among the best in the nation.

*With more than 100 majors, 1700 faculty and 600 clubs and organizations, Iowa State has built a reputation for almost unlimited academic and social opportunities in a personal and welcoming environment.

2005-2010 Strategic Plan

Mission

Create, share, and apply knowledge to make Iowa and the world a better place.

• Create knowledge through world-class scholarship in teaching, research, and creative endeavors.

• Share knowledge through outstanding undergraduate, graduate, professional, and outreach programs.

• Apply knowledge to improve the quality of life for current and future generations.

In carrying out its mission, Iowa State will increase and support diversity in the university community. Diversity enlivens the exchange of ideas, broadens scholarship, and prepares students for lifelong, productive participation in society. See Nondiscrimination and Affirmative Action Policy in this section.

Culture

We accomplish our mission:

• through innovation, collaboration, and continuous improvement,

• with honesty, integrity, and professional ethics, and

• with sensitivity and responsiveness to the needs of our state, nation, and the world.

Core Values

We value:

• land-grant ideals,

• a diversity of ideas, peoples, and cultures,

• intellectual freedom,

• leadership, and

• excellence in all we do.

Vision

Iowa State University will be the best at advancing the land-grant ideals and putting science and technology to work.

Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. Faculty and staff will share a passion for creating, sharing, and applying knowledge to improve lives worldwide. Collaborations among partners both inside and outside the university community will flourish. The spirit of Iowa State University will be evident in the integration of the sciences and humanities and in the energy and creativity of its people.
Priorities for 2005-2010

Iowa State is a leading international, comprehensive university with a wide range of dynamic and diverse programs and initiatives. The university commits to continuously evaluating, improving, and evolving these programs as well as exploring and innovating new areas of inquiry and application.

Five priority areas and accompanying goals for 2005-2010 have been identified to reinforce existing strengths and pursue our vision.

Priority: Education

Strengthen undergraduate, graduate, and professional education to enhance student success at Iowa State University and beyond.

Goals
- Improve the rigor, challenge, and international reputation of academic programs.
- Strengthen students’ critical thinking, creative abilities, and communication skills.
- Enhance students’ understanding of global, cultural, ethical, and diversity issues.
- Create an environment that welcomes students to explore a variety of disciplines and career paths.
- Increase interdisciplinary and experiential learning opportunities, such as learning communities, service learning, internships, research experiences, and international exchanges.
- Enhance programs for high-ability students.
- Partner with K-12 schools and community colleges to facilitate transfer to and student success at Iowa State University.
- Enhance services to enable students to find rewarding careers.
- Develop, recognize, and reward excellent teaching.

Priority: Programs

Increase the number of graduate, professional, and research programs that are among the very best — especially in areas that build on university strengths and address local and global critical needs.

Goals
- Recruit and retain outstanding faculty who are or will be leaders in their fields.
- Increase the number and elevate the overall quality of graduate and professional students.
- Leverage strengths in science and technology to enhance research and scholarly excellence with emphasis on interdisciplinary initiatives involving biological, materials, and information sciences.
- Enhance areas of excellence in the arts, humanities, and social sciences that build on and complement the university’s unique strengths.
- Improve facilities and support services for research.
- Enhance the visibility of outstanding faculty members and staff, research accomplishments, and graduate and research programs.

Priority: Economic Impact

Translate discoveries into viable technologies, products, and services to strengthen the economies of Iowa and the world.

Goals
- Expand the use of intellectual property developed at Iowa State University.
- Strengthen educational and outreach programs aimed at Iowa’s economic, workforce, and technology development.
- Foster an environment that encourages faculty, staff, and students to engage in transfer of technology and entrepreneurial activities.

Priority: University Life

Ensure that the university is a great place to learn and work.

Goals
- Recruit and retain faculty, staff, and students who are dedicated to individual and organizational excellence and achievement.
- Expand the diversity of people, ideas, and cultures, and nurture an environment in which diversity can thrive.
- Achieve a sustainable balance between responsibilities and resources that will allow the university to efficiently and effectively realize its vision.
- Foster an environment in which all members of the university community can contribute their fullest while pursuing satisfying personal lives.
- Provide a rich array of extracurricular opportunities to learn, lead, and enjoy life.
- Promote a university that conserves resources and enhances environmental quality.
- Maintain the attractiveness of campus and improve the quality of its facilities.
- Advance the excellence of the university through enhanced connections between ISU and its family of alumni and friends.
- Ensure that intercollegiate athletics programs are models of academic success, integrity, and competitiveness.
Nondiscrimination and Affirmative Action Statement
(July 28, 2008 Reaffirmation)

Iowa State University is committed to developing and implementing a program of nondiscrimination and affirmative action, a responsibility the university accepts willingly because it is the right and just thing to do. Because an educational institution exposes the youth of Iowa and of the nation to a multitude of ideas that strongly influence their future development, it is an area of our society where removing barriers is critical. We insist on promoting the concept of inclusion and participation.

This commitment is part of a larger commitment to developing a safe and supportive climate for all members of the ISU community in classrooms and laboratories, in offices, in the residence hall system, and throughout the campus. Iowa State University recognizes that a non-discriminatory environment complements a commitment to academic inquiry and intellectual and personal growth.

The goal is to provide a non-discriminatory work environment, a non-discriminatory living and learning environment and a non-discriminatory environment for visitors to the campus. Iowa State University herein commits itself to comply with all federal and state laws, regulations, and orders, including the policies of the Iowa Board of Regents, which pertain to nondiscrimination and affirmative action.

All administrators and personnel providing input into administrative decisions are directed to ensure that all decisions relative to employment, conditions of employment and access to programs and services will be made without regard to race, color, age, religion, national origin, sexual orientation, gender identity, sex, marital status, disability, or status as a U.S. veteran. Exceptions to this directive may be made in matters involving bona fide occupational qualifications, business necessity, actions designed to eliminate workforce underutilization, and/or where this policy conflicts with federal and state laws, rules, regulations, or orders.

Iowa State University herein recommits itself to comply with all federal and state laws, including the policies of the Iowa Board of Regents, which pertain to nondiscrimination and affirmative action.

Further, all supervisory personnel will be responsible for maintaining an environment that is free of discrimination and harassment. Acts by anyone that adversely affect another person's employment, conditions of employment, academic standing, receipt of services, and/or participation in, or enjoyment of, any other activity, will be regarded as a violation of university policy and thereby subject to appropriate disciplinary action. Retaliation against persons filing complaints, for bringing the violation of this policy forward for review, or for assisting in a review, pursuant to a filed complaint or grievance, is prohibited.

Iowa State University's commitment to nondiscrimination and affirmative action is of the highest priority and is to be adhered to as such. It applies to all university-sponsored programs and activities as well as those that are conducted in cooperation with the university.

Iowa State University has designated Carla R. Espinoza as the affirmative action officer and assigns overall program responsibility to her as the Director of Equal Opportunity and Diversity. Questions regarding complaints and/or compliance with affirmative action or equal opportunity should be directed to her at 3210 Beardshear Hall, Iowa State University, Ames, IA 50011-2024, (515) 294-7612.
**Iowa State University Accreditation and Administration**

**Accreditation**
Iowa State University is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools.

**Higher Learning Commission of the North Central Association of Colleges and Schools**
30 N. LaSalle Street, Suite 2400
Chicago, IL 60602-2504

**Board of Regents, State of Iowa**
http://www2.state.ia.us/regents/
The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Urbandale.

**Officers of Administration**
Gregory L. Geoffroy, Ph.D.
President of the University
Elizabeth Hoffman, Ph.D.
Executive Vice President and Provost
Warren R. Madden, M.B.A.
Vice President for Business and Finance
Thomas L. Hill, Ph.D.
Vice President for Student Affairs
Wendy K. Wintersteen, Ph.D.
Dean of the College of Agriculture and Life Sciences
Labh Hira, Ph.D.
Dean of the College of Business

Interim Dean of the College of Human Sciences
Michael B. Whiteford, Ph.D.
Dean of the College of Liberal Arts and Sciences
John U. Thomson, DVM
Dean of the College of Veterinary Medicine
Jack M. Payne, Ph.D.
Vice President for Extension and Outreach
Sharon Quisenberry, Ph.D.
Vice President for Research and Economic Development
David K. Holger, Ph.D.
Dean of the Graduate College
Olivia M. Madison, M.A.,
Dean of the Library
Dione D. Somerville, Ed.D.
Dean of Students
Office of Admissions
Director: Marc Harding, M.Ed.
Senior Associate Directors: Phil Caffrey, M.S.; Stephanie Salasek, M.S.
Office of the Registrar
Assistant Vice President for Enrollment and Registrar: Kathleen M. Jones, M.S.
Senior Associate Registrar and Director for Transfer Relations: Laura Doering, M.S.
Associate Registrar: Larry Dau, B.S.

Admission
When to Apply
Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted well in advance of the desired entry date.
Application deadlines are available at www.admissions.iastate.edu.
Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See Index, College of Veterinary Medicine, Application and Admission.

How to Apply
Applications for admission are available on the Web at www.admissions.iastate.edu.
Iowa State University operates on a rolling admissions basis. Admission of applicants for fall semester begins in July of the preceding year. Admission for other terms begins approximately 12 months prior to the beginning of the term. Admission offers are issued for a specific term and are valid only for the term specified.

Visits to the Campus
Visitors to Iowa State University are always welcome!
The Souls Family Visitor Center, located in the Memorial Union, is open Monday through Friday from 8 a.m. until 5 p.m., and most Saturday mornings from 9 a.m. until 1 p.m. when classes are in session. Counselors are available to speak with prospective students and their families about admission, financial aid, housing, student life, academic programs, and other opportunities. Visitors are offered student-guided walking tours of campus and the residence halls along with an enrollment presentation and an academic information session.
Prospective students and parents are encouraged to visit the campus and the Souls Family Visitor Center. Arrangements for a campus visit or registration for “Experience Iowa State” or “Transfer Visit Days” open house programs can be made at www.admissions.iastate.edu or by contacting the Souls Family Visitor Center at 800-262-3810 or locally at 515-294-5836.

Admissions requirements are stated in the Iowa Administrative Code. Admission policies are established by the Faculty Senate. Any Admission decisions are made by the admission officers in accordance with the entrance requirements as set forth in the Iowa Administrative Code as well as the admission policies established by the Faculty Senate.

Undergraduate Admission into Degree Programs Directly from High School
Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.
Applicants must submit an application for admission and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). In addition, applicants must provide their secondary school provide an official transcript of their academic record, including cumulative grade point average, rank in class, and certification of graduation.
Applicants must also arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizen and immigrant applicants who will not graduate from an approved Iowa high school and whose primary language is not English must meet university communication proficiency requirements. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), the ACT or SAT. Contact the Office of Admissions for minimum score requirements for each examination.
Applicants may be required to submit additional information or data to support their applications.
A. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve a Regent Admission Index (RAI) score of at least 245 will be offered admission.
Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve less than a 245 RAI score will be considered for admission on an individual basis.
Those applicants who are not offered unconditional admission will either be given the opportunity to enroll for a trial period during the preceding summer session or be denied admission.
B. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.
C. Applicants who are graduates of non-approved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.
D. Applications may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.
E. Students with satisfactory academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.
F. Exceptional students may be admitted as full-time students before completing high school. Early admission is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for college-level study.

High School Preparation Required for Admission
Graduation from an approved high school shall ordinarily precede entrance into Iowa State University.
Students who wish to enter Iowa State University directly from high school (or transfer from another college or university with less than 24 semester hours of graded transferable college credit) must meet the level of academic performance described above and show evidence of the following high school preparation:
English/Language Arts
Four years, emphasizing writing, speaking, and reading, as well as an understanding and appreciation of literature
Mathematics
Three years, including one year each of algebra, geometry, and advanced algebra

Science
Three years, including one year each of courses from two of the following fields: biology, chemistry, and physics.

Social Studies
Two years

Additional Entrance Requirements for the College of Liberal Arts and Sciences and the College of Engineering

In addition to the high school preparation requirements described above, students applying to the College of Liberal Arts and Sciences must have completed an additional year of social studies, for a total of three years, and two years of a single foreign language. Students applying to the College of Engineering must have completed two years of a single foreign language.

Students who do not meet the high school course preparation requirements listed here, but who are otherwise well qualified, may be admitted after individual review of their applications.

Undergraduate Admission into Degree Programs by Transfer from Other Educational Institutions

Students who seek admission must meet the following requirements and also any special requirements for the college and curriculum of their choice.

Applicants must submit an application for admission, and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). Applicants must also request that each college they have attended send an official transcript of record to the Office of Admissions. Failure to provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable college credit is completed prior to their enrollment at Iowa State, they must also meet the admission requirements for students entering directly from high school.

Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

D. Transfer applicants from colleges and universities not regionally accredited

When students are admitted from colleges and universities not regionally accredited, they may validate portions or all of their transfer credit by satisfactory academic study at Iowa State, or by examination. The amount of transfer credit and the terms of the validation process will be specified at the time of admission.

In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the Regent Committee on Educational Relations, upon request from such institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories.

In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Designated Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

D. Students from foreign colleges and universities

Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved, its recognition by the educational authorities of the foreign country, and an evaluation of the content, level, and comparability of the study to courses and programs at Iowa State University. Credit may be granted in specific courses or assigned to general areas of study. Extensive use is made of professional journals and references which describe the educational systems and programs of individual countries.

A. Students from regionally accredited colleges and universities

Credit earned at regionally accredited colleges and universities is acceptable for transfer, except for the following, which may not be accepted, or may be accepted to a limited extent:

—credit in courses determined by Iowa State University to be of a developmental, vocational, or technical nature

—credit in courses or programs in which the institution granting the credit is not directly involved.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State University.

B. Students from colleges and universities which have candidate status

Credit earned at colleges and universities which have become candidates for regional accreditation in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor’s degree at Iowa State University.

C. Students from colleges and universities not regionally accredited

When students are admitted from colleges and universities not regionally accredited, they may validate portions or all of their transfer credit by satisfactory academic study at Iowa State, or by examination. The amount of transfer credit and the terms of the validation process will be specified at the time of admission.
Additional Transfer Credit Policies

A. Students with credit obtained during military service.

Credit will be awarded for successful completion of technical or specialized schools attended while on active duty with the armed forces to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication *A Guide to the Evaluation of Educational Experiences in the Armed Services.*

B. Students with credit obtained through non-college sponsored instruction.

Credit will be awarded for successful completion of learning acquired from participation in formal courses sponsored by associations, business, government, industry, and unions to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication *The National Guide to Educational Credit for Training Programs.*

C. Students with credit obtained through correspondence courses.

Although Iowa State does not offer correspondence courses, college level courses taken by correspondence from accredited colleges or universities are acceptable for transfer at the undergraduate level if the courses taken are those that do not require laboratory study.

D. College Level Examination Program (CLEP).

Iowa State University will award credit for each of the following 14 examinations: Financial Accounting, Principles of Accounting, American Government, Biology, Calculus, French Language, Humanities, Principles of Macroeconomics, Principles of Microeconomics, Natural Sciences, Introductory Psychology, Social Sciences and History, Introductory Sociology, Spanish Language.

Application of CLEP credit to a degree program varies with the department, so students should consult with their department before they register for CLEP examinations. Additional information is available at www.admissions.iastate.edu/cbe/cbe_clep.php.

E. Students with "test-out" credit.

Students who have earned credit at other colleges or universities through Advanced Placement (AP), College Level Examination Program (CLEP), or International Baccalaureate (IB) examinations may qualify for credit at Iowa State University. Scores from these examinations should be sent directly to the Office of Admissions; credit will be awarded provided the scores satisfy Iowa State's requirements.

Credit earned at another college through locally designed test-out examinations may transfer to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at that institution.

Articulation/Transfer Agreements

A. Iowa Regent Universities General Education Articulation Agreement.

Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa may transfer to Iowa State's College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language and library requirements).

B. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences or the College of Business at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least 60 prescribed semester (90 quarter) credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of that college. College of Business students will still be required to take an ethics and a global course to satisfy general education requirements unless they are taken as part of the associate of arts degree.

C. Associate of Science (A.S.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences at Iowa State University with an associate of science degree from an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be enrolled at junior level status upon entry to Iowa State University, College of Liberal Arts and Sciences. Transfer students with AS degrees will have their transfer credits evaluated course-by-course to determine how the courses will be applied to their intended Iowa State major/degree program requirements.

D. Career-technical credit from Iowa public community colleges.

Iowa State University will accept up to 16 community college credits toward a degree in career-technical education. Students may be denied credit for equivalency if the course content is not adequate for career technical preparation. Other exceptions to the above policy may be made by specific departments.

Students seeking credit for dual enrollment in secondary schools must be enrolled in an approved program. Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree students in the College of Liberal Arts and Sciences, and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as degree-seeking undergraduate students. Credit obtained under the nondegree undergraduate classification may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree students in the College of Liberal Arts and Sciences, and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as degree-seeking undergraduate students. Credit obtained under the nondegree undergraduate classification may not, however, be applied toward a graduate degree.

On-line Transfer Articulation System (TRANSIT)

TRANSIT is Iowa State's online system, which displays how credits from a community college or another university may transfer to a degree program at Iowa State. In TRANSIT, prospective or current students can generate a transfer credit evaluation showing how their courses and degrees from a community college or university transfer to Iowa State University. In addition, students can request an unofficial degree audit, which will display how their transfer courses are applied within a particular Iowa State major/degree program. TRANSIT is easy to use and can be accessed by going to http://transit.iastate.edu.

Nondegree Undergraduate

Students who wish to attend Iowa State University to take undergraduate courses but who do not plan to seek an undergraduate degree from Iowa State University should apply as nondegree undergraduate students. Credit taken under the nondegree undergraduate classification is applicable for undergraduate degree purposes for those who are later admitted as degree-seeking undergraduate students. Credit obtained under the nondegree undergraduate classification may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree students in the College of Liberal Arts and Sciences, and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as degree-seeking undergraduate students. Permission to enroll in one academic course in addition to full-time intensive English study may be granted under special circumstances.

Reentering Students

Reentering students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. A degree-seeking student may apply for reentry by submitting a Petition for Reentry to the Office of Admissions. Additional information is available at www.admissions.iastate.edu/registrars/.
complete a reentry form but should notify their department and the Office of the Registrar of their intent to reenter Iowa State University. See Index, Reentry for more information.

**Residency**

**Classification of Residents and Nonresidents for Admission and Tuition Purposes**

These criteria are contained in the Policy Manual, Board of Regents, State of Iowa and the Iowa Administrative Code: Board of Regents, State of Iowa.

**Graduate Assistants**

Students with graduate assistantships of 1/4-time or more are assessed Iowa resident tuition and fees. Nonresident students with graduate assistantships of 1/4-time or more retain their nonresidency classification, but are assessed resident tuition and fees as long as the graduate assistantship is continued.

The spouse of a 1/4-time or more graduate assistant who is a nonresident is eligible for residency purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

The graduate student must request the resident tuition assessment by midterm of the term in question. The benefit will not be granted retroactively.

**Guidelines**

The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:

A. A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

B. In deciding why a person is in the state of Iowa, the person’s domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

C. A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile. A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident so long as domicile is maintained, even though circumstances may require extended absence of the person from the state. It is required that a person who claims Iowa domicile while living in another state or country will provide proof of the continual domicile as evidence that the person:

1. Has not acquired domicile in another state;
2. Has maintained a continuous voting record in Iowa; and
3. Has filed regular Iowa resident income tax returns during absence from the state.

D. A student who moves to Iowa may be eligible for resident classification at the next registration following 12 consecutive months in the state provided the student is not enrolled as more than a half-time student (6 credits for an undergraduate or professional student, 5 credits for a graduate student) in any academic year term, is not enrolled for more than 4 credits in a summer term for any classification, and provides sufficient evidence of the establishment of an Iowa domicile.

E. A student who has been a continuous student and whose parents move to Iowa may become a resident at the beginning of the next term provided the student is dependent upon the parents for a majority of financial assistance.

F. A person who is moved into the state as the result of military or civil orders from
the government for other than educational purposes, or the dependent of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the student is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the student is enrolled. Legislation, effective July 1, 1977, requires that military personnel who claim residency in Iowa (home of record) will be required to file Iowa resident income tax returns.

G. A person who has been certified as a refugee or granted asylum by the appropriate agency of the United States, who enrolls as a student at a university governed by the Board of Regents, State of Iowa, may be accorded immediate resident status for admission, tuition, and fee purposes where the person:
1. Comes directly to the state of Iowa from a refugee facility or port of debarkation, or
2. Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency.

H. An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

I. At the Regent institutions, American Indians who have origins in any of the original people of North America and who maintain a cultural identification through tribal affiliation or community recognition with one or more of the tribes or nations connected historically with the present state of Iowa, including the Iowa, Kickapoo, Menominee, Miami, Missouri, Ojibwa (Chippewa), Omaha, Otoe, Ottawa (Odawa), Potawatomi, Sac and Fox (Sauk, Meskwaki), Sioux, and Winnebago (Hochunk), will be assessed Iowa resident tuition and fees. (Board of Regents, State of Iowa, Minutes October 15-16, 1997, p. 299)

**Facts**

A. The following circumstances, although not necessarily conclusive, have probative value in support of a claim for resident classification:
1. Reside in Iowa for 12 consecutive months, and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.
2. Reliance upon Iowa resources for financial support.
3. Domicile in Iowa of persons legally responsible for the student.
4. Former domicile in the state and maintenance of significant connections therein while absent.

B. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to affect classification of a student as a resident under these regulations:
1. Voting or registration for voting.
2. Employment in any position normally filled by a student.
3. The lease of living quarters.
4. Admission to a licensed practicing profession in Iowa.
5. Automobile registration.
6. Public records; for example, birth and marriage records, Iowa driver’s license.
7. Continuous presence in Iowa during periods when not enrolled in school.
8. Ownership of property in Iowa, or the payment of Iowa taxes.

**Registration/Enrollment**

In order to register for classes students must first accept their offer of admission by the university. Registration and the payment of assessed fees are required of all who attend classes. Enrollment is not complete until fees are paid, including room and board fees for those living in residence halls. See Index, Registration.

**Enrollment Status**

Enrollment status is defined for certification purposes as either full-time or half-time. Full-time status, fall or spring semester
Undergraduates: 12 credits
Graduates: 9 credits
Half-time status, fall or spring semester
Undergraduates: 6 credits
Graduates: 5 credits
Summer status
Summer status depends on the number of weeks a student is enrolled. Always contact the Office of the Registrar to verify a student’s status for a summer session.

With the exception of enrollment certification for veterans’ benefits, credit hours are rounded up to the next whole number. For example, credit load of 11.5 credits is rounded up to 12 credits. Contact the Office of the Registrar for more information.

**Credit by Examination (CBE)**

It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin. Credit is awarded primarily in the introductory level classes in mathematics, natural, physical, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.

**Types of CBE Programs**

Students may earn academic credit in any of four ways and have that credit recorded on their academic record when they enroll.

Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, departmental examinations, and the College Level Examination Program (CLEP). Iowa State's policies for awarding credit for each of these programs may be found at www.admissions.iastate.edu/cbe.

**Advanced Placement (AP) Program of the College Board**

This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement through the Advanced Placement Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, geography, government and politics, history, mathematics, music, physics, psychology and statistics. High school counselors and teachers will assist with testing arrangements.

Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Correspondence concerning the Advanced Placement Program should be addressed to the College Board Advanced Placement Examinations, P.O. Box 977-IS, Princeton, New Jersey 08541, or visit their web site at www.collegeboard.com/student/testing/ap/about.html.

**International Baccalaureate Examinations**

The International Baccalaureate (IB) Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments require higher scores. Official IB examination results must be sent directly to the Office of Admissions from the International Baccalaureate North America Office. Results listed on high school transcripts are not considered official.

Correspondence concerning the IB Program should be addressed to IB North America, 475 Riverside Drive, Suite 240, New York, NY 10115, ibna@ibo.org, or visit their web site at www.ibo.org.

**Departmental Examinations**

Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally
administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental or CLEP examinations should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested. If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. T grades are not used in computing students’ grade point averages; however, the credit does become part of their official academic record and may be applied toward their graduation requirements. For a listing of common departmental test-out exams, refer to www.public.iastate.edu/~stdtcouns/TestOuts2.html. Most examinations for credit are prepared by the departments offering the courses. In some cases, the examination used is part of the College Level Examination Program (CLEP), where the content of the CLEP test has been judged to be an equivalent to the content of the course.

**College Level Examination Program**

CLEP is available on computer only and Iowa State University only accepts the CLEP tests listed in this section, and does not accept College Mathematics or English Composition. Up to six semester credit hours in each of these three CLEP general tests is awarded: Social Sciences and History, Humanities, and Natural Sciences. In addition, the College of Engineering does not allow credit earned from CLEP Social Sciences and History, Humanities, and Natural Sciences tests to be used in their students’ degree programs.

CLEP tests accepted at Iowa State University include American Government (Pol S 215); Financial Accounting (Acc 284; engineering majors should consult with their academic adviser before registering for this examination); Biology (Biol 101, not for biology or engineering majors); Introductory Psychology (Psych 101); Introductory Sociology (Soc 134); Principles of Macroeconomics (Econ 102); Principles of Microeconomics (Econ 101); and Calculus (Math 165).

In addition, Iowa State University will award up to 16 semester credit hours for CLEP French Language and up to 16 semester credit hours for CLEP Spanish Language. Please note that native or near native speakers of French or Spanish may not test out of the beginning or intermediate levels in these languages. A nonrefundable fee is charged for each CLEP test requested, and all requests should be made one week prior to the test date. CLEP tests are administered by the Student Counseling Service Testing Office Monday through Friday. For information on whether to take any of the CLEP tests, contact your academic adviser. To obtain information on any of the CLEP tests, contact the SCS Testing Office, Rm. 2030 Student Services Building, Iowa State University, Ames, Iowa 50011, or send e-mail to scsclep@iastate.edu. To print a copy of the institutional CLEP registration form, go to www.public.iastate.edu/~stdtcouns/ and select Testing Services.

**Policies and Procedures Governing CBE Tests**

1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).

2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.

3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a retest may be taken upon approval of the department in which the course is offered.

4. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.

5. There is a nonrefundable fee for all departmental and CLEP tests. The fee is set by the Board of Regents, State of Iowa, and is subject to change.

6. Departmental examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should contact the department that offers the class. CLEP tests are given throughout the year.

7. Credit for the CLEP examinations Social Sciences and History, Humanities, and Natural Sciences is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow these CLEP credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisers to determine whether such credit is to their benefit.

8. Listed below are policies for transferring CBE from another college or university to Iowa State University:
   a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is earned at any other college or university may not be transferred directly to Iowa State. However, the scores from these examinations may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State’s AP and CLEP policies.
   b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State’s IB policies.
   c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution.

9. Credit earned from CBE will be posted to the student’s academic record at the end of the term. CBE credits will be counted toward the projected year in school classification used to establish registration start dates.

10. Some professional programs do not accept test (test-out) credit in preprofessional courses. Students who anticipate applying to such programs should inquire about the acceptability of such credit before registering for such CBE tests.

11. Credit established at Iowa State University will usually transfer to other colleges and universities; however, the final decision rests with the institution reviewing the transcript.

**Office of New Student Programs**

**Orientation**

Orientation assists new undergraduates with the transition to Iowa State University. At orientation, students plan their academic programs, register for classes, learn about university policies and procedures, and prepare for personal and social adjustments to the university. The university Orientation Committee, composed of Iowa State University faculty, and staff, is responsible for the orientation programs; the undergraduate colleges of the university, in cooperation with the Office of New Student Programs, have responsibility for the implementation of orientation programs for new students and their families.

The Orientation Committee conducts an extensive orientation program during the summer, with additional programs held prior to each term. Special orientation sessions are conducted for transfer students during the spring. New students receive an invitation to attend an orientation program before their first semester at the university.

**Summer Orientation**

Summer orientation for freshmen is a two-day program scheduled in June. As early as January, new freshman students and their family members are asked to select a convenient time from among a number of orientation sessions that are scheduled during June. In addition to preparing their class schedules for fall semester, new students with their family members participate in informational activities about policies and procedures at the university, and meet formally and informally with
faculty, staff, and other new students and their families. These sessions, held in a comfortable, informative atmosphere, lessen existing anxieties, assist in the development of a clearer understanding of the university environment, and make it possible for new students—with support from their family members—to begin to make the academic and social decisions that are faced by all students at the university.

Housing and meals are available at campus residence halls for a nominal fee during June freshman orientation.

**Destination Iowa State**

The Destination Iowa State program is held for all new freshman and transfer students on the Thursday, Friday, and Saturday before classes begin fall semester; and on the Saturday before classes begin spring semester. The program helps new students develop academic and social strategies to ensure a successful transition to Iowa State University.

**WelcomeFest**

WelcomeFest activities are scheduled during the first week of fall semester to welcome students to campus. All students, including transfer students, are invited to participate in WelcomeFest.

**Information Disclosure**

Iowa State University is required by law to make available to enrolled students, prospective students, and their parents certain information about the university. The information disclosure policy is available at www.iastate.edu/~Disclosure. Students without electronic access can obtain the information from the Office of the Registrar, 214 Enrollment Services Center, 515-294-1840 or from the Office of Admissions, 100 Enrollment Services Center, 515-294-5836. A paper copy of the information will be provided upon request.

**Student Records**

Iowa State University maintains various records concerning students, to document their academic progress as well as to record their interactions with university staff and officials. In order that their right to privacy be preserved and to conform with federal law, the university has established certain policies to govern the handling of student records. All policies conform with FERPA, the Family Educational Rights and Privacy Act (also known as the Buckley Amendment).

**Public Information**

Certain information concerning students is considered to be open to the public upon inquiry. This public information is of two types: directory information and other information not included in the ISU Directory. ISU directory information includes local address, telephone number, campus e-mail address, home town, college, curriculum, year in school, and enrollment status. Other public information includes mailing address, date and place of birth, dates of attendance at Iowa State, expected date of graduation, names of advisers, awards and academic honors, Iowa State degree(s) and date(s) awarded, previous educational institutions attended, degrees received, dates of attendance, full- or part-time status, participation in officially recognized activities and sports, and weight and height of members of athletic teams.

Public information will be released by the registrar to anyone upon inquiry, unless students have requested that their information not be released. A request to have public information withheld should be made at the Office of the Registrar, 214 Enrollment Services Center. Once the request is processed, the registrar will notify the appropriate university offices.

For the purposes of FERPA, Iowa State University defines directory information to include both ISU directory information and public information as defined above.

It is the policy of the university to respect the privacy of students; therefore, only lists and labels containing names of students with directory information will be made available to members of the public. This directory information will be provided on a time-available basis for the cost of producing the information.

Directories are also available in the bookstores for those persons needing directory information. Directory information is available on the World Wide Web using the online phonebook; and from printed directories, which may be purchased at the bookstores.

**Confidential Information**

With the exception of the information noted above, all student records are considered to be confidential and are open only to school officials. A school official is a person employed by the university in administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the university has contracted; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility. Iowa State University’s notification of rights under FERPA can be found at www.public.iastate.edu/~registration/info/ferpanotice.html.

The following policies govern access to student records:

1. Each type of student record is the responsibility of a designated school official, and only that person or the dean or director to whom that person reports has authority to release the record. The following is a list of the responsible officials:
   a. Academic records: registrar
   b. Admissions records: director of admissions
   c. Financial aid records: director of student financial aid
   d. Business records: university controller

2. The designated official may release records to other school officials who have a legitimate need for the information. A list of those persons who normally have access to each type of student record is available in 214 Enrollment Services Center.

3. All student records are reviewed periodically. Information concerning the frequency of review and expurgation of specific records is available in 214 Enrollment Services Center.

4. Students have the right to review upon request any records that pertain directly to them, and may obtain a copy of the record for a fee. This provision does not apply to records to which the student has waived his or her right to review, nor does it apply to medical and counseling records.

5. A student may waive the right to review a specific record by submitting in writing a statement to this effect to the official responsible for that record.

6. A file containing copies of records pertinent to advising is maintained on each student for use by the student's adviser. This file may be maintained in hard copy or electronic format. Ordinarily this file is kept in the possession of the adviser, but for convenience it may be stored elsewhere such as in the dean's office or department office. When the student changes majors, or changes advisers within the same major, the file is transferred to the new adviser. Under the university's student records policy, the student is considered to have the right of access to this file.

7. Medical and counseling records shall be released at the written request of the student to medical or psychological professionals outside the university or to university officials.

8. University personnel who have access to student records in the course of carrying out their university responsibilities shall not be permitted to release the record to persons outside the university, unless authorized in writing by the student or unless one of the exceptions stated earlier is involved.
9. Confidential information may be released by students to their parents or other trusted third parties through the AccessPlus third party system. Confidential information may also be released by obtaining the student’s written consent or by having the parent establish the student’s dependency as defined by the Internal Revenue Code of 1954, section 152, by furnishing a certified copy of the parent’s most recent federal income tax return.

10. The officials responsible for custody of student records will maintain records of requests and disclosures of personally identifiable nonpublic information. The records of requests, whether granted or not, shall include the person or agency requesting the information and the purpose of the release. These records of requests and disclosures will be available to the student on request. Records of requests and disclosures are not necessary for requests made by the student, by school officials in carrying out their official responsibilities, by persons employed by agencies and offices conducting audits and accreditations of university programs, or any of the other exceptions listed previously.

Posting Grades and Test Scores

Instructors who wish to inform students of their performance may post grades and test scores on a secure course web site as long as individual students may only access their own grades. The test scores or course grades of students may not be posted in any public location (World Wide Web or hard copy posting) unless the instructor posts the information using a code for each student that is known only by the instructor and the student.

Release of Grades

Students who choose to release their grades to parents or other trusted third parties may do so using the AccessPlus third party system. Reports of a student’s grades are not routinely sent to the student’s parents. Parents of students under 18 years of age may obtain grades by writing to the Office of the Registrar. The grades of other students will be sent to their parents only with written permission of the student, or by establishing dependency as outlined in item 9 under Confidential Information.

When Records May Be Withheld

The appropriate university official may request that a student’s record not be released if that student is delinquent in an account with the university or an affiliated organization. The effect of this action is that a transcript will not be released and registration will be withheld. The appropriate official may also request that records be withheld in instances when official disciplinary action has been taken against a student. Authorization for these actions is supported by The Iowa Code and The Iowa Administrative Code.

In order for such an action to be rescinded, the Office of the Registrar must receive written authorization from the official who originally requested the action, indicating that the student has met the obligation. Further information about this policy can be obtained from the Office of the Registrar.

Review and Challenge of Records

A student may challenge the accuracy of handling of records maintained by the university on grounds that the records are inaccurate, misleading, or otherwise violate the privacy or other rights of the student. The university has established the following procedures to provide an opportunity for the student to correct or delete inaccurate records, or to insert into the record a written explanation of the content. Students who question their records should discuss the issue first with the individual staff person who established or maintains the records. Presumably most issues can be resolved at this level. If a satisfactory resolution cannot be reached, the student should submit the question to the head of the department in which the record is maintained.

The department head will discuss the issue with the staff person and the student challenging the record. If resolution cannot be reached after meeting with the department head, the student may submit the question to the dean or director to whom the department head is responsible. The dean or director will investigate, and will respond in writing.

If the record has not been reconciled through these measures, the student may direct a written request to the president of the university. The president will convene an Ad Hoc Hearing Panel of Access and Confidentiality of Educational Records, composed of two faculty members, two students, and one administrator, appointed by the president for a period of one year, with the president or a designee serving as nonvoting chairperson. The student shall be given an opportunity to present to the panel evidence relevant to the issues raised, and the panel will issue a written response.

ISUCard and Identification Number

Each student is assigned a random university identification number on entry to the university. This number appears on the ISUCard that is provided to each student at the time of first registration. The ISUCard, may be required for some services and/or activities. At the time the ISUCard is issued each student also selects a university password, which is required for electronic access to personal student information.

Loss of an ISUCard should be reported immediately to the ISUCard Office, where the lost card will be invalidated and replaced for a charge. Disciplinary sanctions may be imposed for improper use of the ID card or attempts to obtain, by fraudulent means, any form of identification.

Social Security Number

Social security numbers are collected from prospective and current students, for administrative coordination and record identification purposes only. Although procedures have been established by the registrar for assignment of an alternative number upon request, students who wish to be employed on campus, desire to claim federal educational tax benefits, or are applying to receive financial aid, are required by law to provide their social security numbers for administrative use. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

Policy on Student Names

Iowa Regent universities have a common policy regarding student names and name changes. The name on the student record should be the student’s complete and legal name. In evaluating and processing all name change requests, the university reserves the right to require adequate and appropriate documentation as warranted.
Tuition, Fees and Expenses

For the most current and complete information see www.iastate.edu/~registrar/fees

All tuition, fees, and expenses, and policies listed in this publication are effective summer session 2009 and are subject to change without notice by Iowa State University and the Board of Regents, State of Iowa. Tuition and fees are based on credit load at 5:00 p.m. on the 10th day of class, which is the last day for adjustments downward in tuition and fee assessment.

Tuition

Enrollment is not complete until fees are paid. Tuition is charged based upon the number of credits in which a student is enrolled. Maximum charges start at 12 credits for undergraduate and veterinary medicine students. Maximum charges start at 9 credits for graduate students.

Students who are not residents of Iowa pay a higher tuition rate each semester. Nondegree undergraduate students and noncollegiate students pay the same fees as undergraduates. Tuition and fees are assessed in accordance with regulations of the Board of Regents, State of Iowa. Information about these regulations are found in this catalog under Admissions and Registrar.

Fees

Following are the descriptions of several commonly assessed fees for Iowa State University students. The list is not inclusive. All fees are subject to change without notice.

Activity, Services, Building and Recreation: The activity, services & building fee is a mandatory fee that supports a variety of activities and services for all students. It is not based on whether or not a student uses an individual activity or service. This fee provides several benefits such as student admission rates to concerts and athletic events and, unlimited use of CyRide, the Ames bus system. In addition, the fee provides support for campus recreation facilities, the Memorial Union, and campus organizations and services as allocated by the Government of the Student Body. All students will be charged a maximum of $226.35 each fall and spring semester, and $113.75 per summer semester. Exemptions are granted for students exclusively registered for the following: distance education courses (sections beginning with X); courses for which no tuition is assessed; continuous registration status courses, and high school students enrolled under the Post-Secondary Enrollment Options Act. Students in exemption categories named above may elect to pay this fee and will be assessed based upon their enrollment status.

For students who withdraw or change to an exempt status as defined above, the tuition adjustment schedule will also be used for the activity fee.

For students enrolled for less than a full course load and for the most current and complete information, see the Fee Schedule Per Credit list at www.iastate.edu/~registrar/fees.

Additional information:

Audits and zero credit courses: assessed according to contact hours; maximum charge for zero credit courses is three credit hours

R credits: assessed for the minimum fee only if no other credits are taken.

Continuous registration fee for graduate students: $70.

Partial credits (.5): assessed on the next larger whole number of credits, e.g., 6.5 credits is assessed as 7 credits.

Saturday MBA/Des Moines MBA classes: MBA students are assessed the graduate rate plus $113 per credit supplemental tuition fee (supplemental tuition fee subject to change without notice).

Summer session: based on per credit as indicated in the fee schedule.

Tuition assessment for study abroad credits: up to a maximum of 12 credits, is above and beyond tuition for other courses taken during the same term.

Application: The application fee for domestic undergraduates and graduate students is $40, the fee for international undergraduate students is $50, while the fee for international graduate students is $90. All applicants for Veterinary Medicine pay an application fee of $60. This is a nonrefundable fee and must accompany the application for admission. This fee does not apply to special students or workshop applicants, and is subject to change without notice.

Applied Music (Private Instruction): The music fee is charged to students receiving private music instruction and is in addition to regular tuition. The fee offsets the costs of one-on-one instruction. One credit of instruction is $190; the fee for two credits is $190.

Camp: A special tuition rate is assessed to students participating in camp programs. The undergraduate assessment is $240 per credit and the graduate rate is $374 per credit. Summer camp programs entitled to the special rate are Anthropology and Geology. Students will be charged other fees in addition to tuition for enrolling in these programs. To obtain total fee information, students should contact the director of the individual program.

Career Services: The career services fees vary among college-based career services offices ranging from $0 - $25 per student.

Catalog: First semester students (transfer or incoming freshmen) receive complimentary copies of the catalog. Catalog information is also available on the Web at http://www.iastate.edu/~catalog/ or provided to high school guidance offices or community college student service areas. Individuals and organizations may purchase a catalog from the University Bookstore for a cost of $5 plus shipping.

Computer: All students will be charged a computer fee each semester.

Full-time graduate and undergraduate students enrolled in the College of Engineering (including Systems Engineering) are charged $223 per semester.

Full-time graduate and undergraduate students majoring in Computer Science are charged $223 per semester.

Full-time undergraduate students enrolled in the College of Business are charged $135 per semester, while full-time graduate students are charged $112 per semester.

All other full-time undergraduate students are charged the standard computer fee of $115 per semester. Full-time graduate students are charged $92 per semester computer fee.

Students enrolled less than full-time are assessed prorated computer fees according to the number of credits for which they are enrolled.
High school students enrolled under the Postsecondary Enrollment Options Act; or students enrolled exclusively in courses for which no tuition is assessed are not assessed a computer fee.

For students who withdraw, computer fee adjustments will be made according to the tuition adjustment schedule. Adjustments for a reduction in credits below a full time load is 100 percent through the second week, with no refunds after the second week. Students who change their major will be charged the full computer fee for the major into which they transfer if the change occurs before the end of the second week. If the change occurs after the second week, then no change in the computer fee assessment will occur.

Delivery: Some distance education courses charge a delivery fee to offset additional expenses incurred in offering a course at a distance. Applicable delivery fees are listed with the specific course in the Schedule of Classes available at http://classes.iastate.edu. Delivery fees also appear on each student's schedule detail available on AccessPlus.

Developmental: A developmental course fee is charged in addition to the tuition charged for other courses on the student's schedule. For example: A student taking 12 credits plus a developmental course will pay full-time tuition for the 12 credits, plus the developmental course fee(s). These fees are intended to cover the direct costs of offering these developmental courses. Developmental course fees are listed with the specific course in the Schedule of Classes available at http://classes.iastate.edu/

Diploma Replacement: Individuals who have lost their diploma may request a replacement for $25.

Graduation: Undergraduate and graduate students are charged a $50 nonrefundable graduation fee the term they receive their degree.

Health Facility Fee Each semester except for students exclusively registered for the following: distance education courses (courses with sections beginning with X); courses for which no tuition is assessed; continuous registration status courses; weekend MBA courses; Lakeside Laboratory courses; and high school students enrolled under the Postsecondary Enrollment Options Act. These exemptions do not apply to international students or to graduate students on graduate assistantships. Students who are exempt from the mandatory health fee may use the services of the Thielern Student Health Center on a fee for service basis, or may elect to pay the $98 Health Fee and $8 Health Facility Fee, which allows participants to receive services at the Thielern Student Health Center for the same rate as students who pay the mandatory health fees. Spouses/domestic partners of students who wish to use the Thielern Student Health Center must pay the $98 Health Fee and $8 Health Facility Fee.

Students who withdraw or change to an exempt status as defined above will receive a credit adjustment of 100 percent during the first two weeks, with no credit adjustment after the second week. Students who add courses at any time during the semester will be assessed the student health fee if applicable according to the guidelines stated above. Students who carry the ISU sponsored insurance must also be assessed the student health fee. If spouse or domestic partner is covered under the insurance plan, the spouse (domestic partner) must also be covered under the Health Fee and Health Facility Fee.

Health Insurance: All international students and their accompanying dependents must enroll in the ISU Student and Scholar Health Insurance Program. ISU requires nonimmigrant international students and their dependents to purchase and maintain coverage through the ISU health insurance plan for the duration of their tenure at the university. Insurance plans purchased outside the university may be used for supplemental coverage, but cannot be substituted for the ISU plan. Students not assessed the mandatory Student Health Fee and spouses of students should contact the Student Health Insurance Office at 515-294-4820 for more information.

Identification Card (ISUCard) Replacement: All students receive their first identification card free of charge. Those cardholders who have lost or misplaced their identification cards are assessed a $25 fee to cover the cost of replacement.

Late Fee Payment: If payment of the minimum due is not made by the deadline printed on the billing statement, all fees become due immediately. A one-percent finance charge will be assessed on the total amount due at that time. These students will also have a hold placed on their registration until payment of the total amount due has been made.

Late Registration: Undergraduate students who do not complete their registration before the first day of classes are charged a $20 late registration fee. Graduate students who do not complete their registration before the first day of classes are charged a late registration fee of $20 during the first week of classes, $50 the second week of classes, and $100 the third week of classes or anytime later.

New Student Programs: A nonrefundable fee of $190 is assessed to all new degree-seeking undergraduates (including new direct from high school and new transfer students). The fee covers full costs associated with orientation and Destination Iowa State programming, including publications, mailings, programming, and student assistants who provide services to students and their families during orientation and Destination Iowa State.

Returned Check/Direct Debit Charge: This $30 fee is a charge against the person who writes a dishonored check or authorizes a direct debit to an account that has been closed or has insufficient funds.

Schedule Change: Starting the sixth day of classes a $10 fee is charged for course drops, additions, and section changes. One fee is assessed for multiple changes processed at the same time for the same term.

Senior: A $2 fee covers the cost of special senior activities. This fee is optional and is assessed spring term only.

Special Course: Some courses have expenses above the cost of tuition that enhance the instruction. These fees may cover the cost of field trips, use of equipment, materials or supplies, or professional support. Applicable special course fees are listed with the specific course in the Schedule of Classes available at http://classes.iastate.edu. Special course fees also appear on each student's schedule detail available on AccessPlus.

Sponsored International Student: This fee is assessed to the sponsor of international students as a way to compensate for the special record keeping, billing requirements, correspondence, and the deferred payment option extended to sponsoring agencies. The current fee will be 5 percent of the total tuition charge billed the sponsor. In succeeding years, the fee may be raised after 90 days advance notice to the sponsoring agency.

Study Abroad: Tuition assessment for study abroad credits, up to a maximum of 12 credits, is above and beyond tuition for other courses taken during the same term.

Thesis Fee: This $100 nonrefundable fee is charged to any student who submits a master’s degree thesis or doctoral dissertation to the Graduate College.

Transcript: Students may obtain an official transcript of their student academic record for $15. An additional $5 service charge for each transcript is assessed for same day service.

Workshops: The fee for one-credit workshops, with no other course enrollments, is $240 for undergraduate students and $374 for graduate students.
Fee Payment

The Accounts Receivable Office bills students for tuition, room, meal plan, and various other university charges. A statement of new charges is available on the first of each month on AccessPlus and each student will receive an email message at that time at their Iowa State e-mail address telling them that their bill is available. It is the student’s responsibility to ensure that the university has a correct e-mail address and to regularly check their Iowa State e-mail account. Students who do not receive a billing statement before the term begins or are unable to use AccessPlus to view their bill, should contact the Accounts Receivable Office to learn the amount of their account balance due. Failure to receive a billing statement or view their account on AccessPlus will not exempt students from late penalties or from having a hold placed on their registration. Payments for fall semester are due August 20. Payments for spring semester are due January 20. Payments for summer semester are due May 20.

Deferred Payment

Each term, students who do not pay their first installment in full by the due date will automatically select the deferred option, and will be charged a $20 administrative fee. University fees may be paid in three installments each academic term. Payments for fall semester will be due August 20, September 20, and October 20. Payments for spring semester will be due January 20, February 20, and March 20. Summer fees will be due May 20, June 20 and July 20.

Monthly Payment Plan

Under the Monthly Payment Plan, students pay the academic costs for fall and spring semesters in 12 installments beginning April 20 and ending the following March 20. A $50 enrollment fee is due with the first monthly payment. All payments are deducted from a designated bank account. For more information about the Monthly Payment Plan, contact the Accounts Receivable Office.

Past Due Accounts

If students have past due accounts receivable charges prior to the beginning of classes, they may be dropped from enrollment if these past due charges are not paid by the Friday before the first day of class. Students that are subject to being dropped will be notified via their Iowa State e-mail account.

Refunds

Refunds are available for students who cancel or withdraw their registration within the appropriate time period. To cancel their registration, students must notify the Office of the Registrar before the first day of the semester to avoid tuition assessment. Beginning on the first day of the semester, it will be necessary for students to formally withdraw from the university to terminate their registration. More information about canceling registration and withdrawing from classes can be found at www.iastate.edu/~registrar/registration/

Tuition adjustments for all students are made for withdrawals of registration according to the following schedule:

<table>

Students who wish to appeal tuition and fee assessment for withdrawals should contact the fees section of the Office of the Registrar. Decisions of the Office of the Registrar will be based on the existence of extenuating circumstances beyond the control of the student. Students who wish to appeal the decision of the Office of the Registrar must do so in writing within 10 calendar days after receiving the decision. Such appeals will then be reviewed by the Tuition Appeals Review Committee. Students who wish to appeal the decision of the Tuition Appeals Review Committee may make a request to do so in writing to the Office of the Provost.

Fee refund for students with a reduction in credits below full-time:

- 100 percent if change is made during first two weeks.
- No adjustment is made after the second week. Prorated adjustments in the tuition adjustment schedule are made for summer session courses, or any courses which are less than one semester in length (79 days).

Workshop and Short Courses Refunds

Students who drop workshops or short courses of one or two weeks on or before the first class meeting receive a 100% tuition adjustment for the course. No tuition adjustment will be made after the first day of classes. Students who drop three-week courses receive a 100% adjustment if they drop on or before the first day of classes, a 90% adjustment if they drop on or before the second day of classes, and no adjustment after the second day of classes.
The Office of Student Financial Aid helps families afford Iowa State University. Grants, scholarships, loans, and part-time employment opportunities are available to assist students and families in meeting their college expenses.

Eligibility for financial aid is determined by the Free Application for Federal Student Aid (FAFSA). Students can apply online at www.fafsa.ed.gov beginning January 1 for the coming academic year. Students should submit the FAFSA before to March 1 to receive consideration for most grants and scholarships. A new application must be completed each academic year.

The priority deadline for financial aid is March 1. Priority financial aid is awarded to eligible students who complete the FAFSA prior to March 1 each year. Students who apply after this date will be considered for the Federal Pell Grant and student loans. New students enrolling spring semester or summer session should complete the current year’s aid application to apply for any available financial aid.

To be eligible for most financial aid programs, a student must be a U.S. citizen or permanent resident, enrolled at least half-time, and making satisfactory academic progress toward a degree.

Students may use their financial aid for study in other countries if they have clearance for the transfer of credit to their degree programs and are facing financial hardship resulting from unforeseen circumstances.

Students are encouraged to pursue scholarship opportunities from outside agencies and private organizations. Check the financial aid Web site for current postings and additional resources.

I. Gift Aid

A. Scholarships

1. ISU Scholarships. Scholarships are awarded on the basis of achievement, although many also require demonstrated financial need. Find out more about scholarships at www.financialaid.iastate.edu.

2. Military Officer Education (ROTC) Scholarships:

   Army. The Military Science Department offers 2-, 3-, and 4-year Army ROTC scholarships to qualified students on a competitive basis in virtually any academic discipline. These scholarships provide monies for tuition, all required fees (except student health), books and supplies allowance, and a monthly cash subsistence allowance. For applications or additional information, contact the Military Science Department at 132 Armory or call 515-294-1852.

   Navy. The Naval Science Department offers several scholarship programs to qualified students. The scholarships cover payment of tuition, fees, books, and a monthly stipend. Information is available from the Naval Science Department, 3 Armory, or by calling 515-294-6050.

   Air Force. The Air Force offers Air Force ROTC scholarships for periods of 2, 3, or 4 years, with up to 1 additional year for qualified applicants in selected majors. The scholarships provide payment of tuition and fees. In addition, scholarship cadets receive between $250-$400 monthly subsistence allowance and $510 per year book allowance. Express scholarships are also available to students qualified in certain technical academic majors. Details on scholarship qualification, application procedures, and eligibility are available from the Department of Air Force Aerospace Studies, 515-294-1716.

3. Other Scholarship Sources: Students are encouraged to pursue scholarship opportunities from outside agencies and private organizations. Check the financial aid Web site for current postings and additional resources.

B. Grants

1. Federal Pell Grant. This federal grant is for undergraduates working toward their first bachelor’s degree. The amount of Pell Grant is based on the Estimated Family Contribution (EFC) as calculated using a federal formula.

2. Federal Supplemental Educational Opportunity Grant. This federal grant is awarded to high-need students who also qualify for the Pell Grant. Students who file their FAFSA prior to March 1 are considered for this award.

3. ISU Grant. This university grant is for undergraduate students who show financial need. The FAFSA must be filed prior to March 1 to be considered for this award.

4. Academic Competitiveness Grant. This federal grant will provide up to $750 for the first year and up to $1300 for the second year of undergraduate study to students who are U.S. citizens, eligible for the Pell Grant, and have completed a rigorous high school program as determined by the student’s state of residence.

5. SMART Grant: The National SMART Grant will provide up to $4000 for the third and fourth years of undergraduate study to students who are U.S. citizens, eligible for the Pell Grant, have a cumulative GPA of at least 3.00, and are enrolled in an eligible major.

6. Officer Education (ROTC) Financial Assistance Grants. All students enrolled in Advanced ROTC (third and fourth years) in the Army, Navy, and Air Force programs are provided a monthly stipend. For further information, contact the appropriate ROTC department in the Armory.

7. Tuition Assistance Grant for Undergraduate International Students. Undergraduate international students who have been at Iowa State University for at least a year and are faced with financial hardship resulting from unforeseen circumstances may apply for this grant. Apply via the International Students and Scholars Web site (www.iastate.edu/~internat_info).

8. International Student Financial Aid. International students raise money through cross-cultural activities toward a scholarship fund. These monies will be used to assist international students who have unforeseen financial emergencies. For further information, contact the International Student Council at www.stuorg.iastate.edu/isic.
II. Loans

A. William D. Ford Federal Direct Loan Program. These student loans are obtained through the U.S. Department of Education by filing the FAFSA.

1. Federal Direct Subsidized Loan. The interest on this need-based loan is paid by the federal government as long as the student remains in school at least half-time. Borrower repayment and interest charges begin six months after graduation or less than half-time enrollment. The interest rate will range from 3.4% to 6.8% depending on the year in which the loan was borrowed.

2. Federal Direct Unsubsidized Stafford Loan. The interest on this non-need based loan is charged to the borrower from the time the loan is disbursed until paid in full. Interest may be paid while you are in school or added to the principal balance of the loan. Borrower repayment begins six months after graduation or less than half-time enrollment. The interest rate is fixed at 6.8%.

B. Federal Perkins Loan Program. The interest on this need-based loan is paid by the federal government as long as the student remains in school at least half-time. Borrower repayment and interest charges begin nine months after graduation or less than half-time enrollment. The interest rate is fixed at 5 percent.

C. Federal Health Professions Loans. This student loan is limited to students enrolled in the College of Veterinary Medicine. The FAFSA is required, and parental information must be provided, regardless of age or dependency of the student. The interest rate is fixed at 5 percent, and interest does not accrue while the student is enrolled full-time. Borrower repayment begins twelve months after graduation or less than half-time enrollment.

D. Federal Direct PLUS (Parent Loan for Undergraduate Students). This loan is for parents of a dependent student and the loan is subject to credit analysis. A parent may borrow up to the cost of attendance less any other financial aid. The interest rate is fixed at 7.9 percent. Interest on this loan is charged to the borrower from the time the loan is disbursed until paid in full. Borrower repayment begins 60 days after the loan has been disbursed in full unless the parent requests a deferment until after the student graduates. This loan is not need-based, and does not require filing the FAFSA.

E. Federal Direct PLUS Loan for Graduate & Professional Students (Vet Med). This loan is for Graduate and Professional Students (such as Vet Med students) and is subject to credit analysis. Students may borrow up to the cost of attendance less any other financial aid. The interest rate is fixed at 7.9 percent. Interest on this loan is charged to the borrower from the time the loan is disbursed until paid in full. Borrower repayment can be deferred as long as the student is enrolled at least half-time.

F. Private Loan Options. Private loans supplement the federal loan programs and are subject to credit analysis. These loan programs do not require filing the FAFSA.

III. Part-time Employment

There are many part-time employment opportunities available for students, both on campus and off campus. Students who secure part-time jobs gain valuable experience to aid in job placement after graduation. Part-time employment can also help reduce loan indebtedness.

A. Federal College Work-Study. Work-study positions provide hourly employment for students with financial need, as determined by filing the FAFSA. Students with work-study eligibility are able to view work-study positions on the Student Job Board on AccessPLUS.

B. Other Part-Time Employment. The Student Job Board on AccessPLUS lists positions which do not require filing the FAFSA. All students can view these listings for current job openings.

IV. Other Financial Aid

Many other forms of financial aid are available to students who qualify, including Vocational Rehabilitation, Veterans Benefits, and Department of Human Services programs. For further information on these programs, contact the appropriate government office.
Student Housing and Dining

Director of Residence: Pete Englin
Director of ISU Dining: Nancy Levandowski
Associate Directors:
Virginia Arthur (Residence Life)
Darryl Knight (Facilities Operations)
Jill Arroyo (Residential Dining)
Assistant Directors:
Karen Larson (Catering)
Kristi Patel (Retail Operations)
Lisa Ludovico (Residence)
Jamie Lenz (Food Stores / Vending)

The university provides housing for more than 8,000 students in on-campus residence halls and apartments. Housing is available for undergraduate and graduate students; single students and families.

Each student who accepts admission to the University is eligible to submit a housing contract. Acceptance of admission to the university is necessary before a housing contract will be accepted. Contracts can be submitted on-line using AccessPlus. Housing priority for new students is based upon the date the completed contract is received in the Department of Residence Administrative Services Office.

Questions and correspondence concerning on-campus housing and dining should be directed to the Department of Residence Administrative Services Office, 2419 Friley Hall, Iowa State University, Ames, Iowa 50012. E-mail: housing@iastate.edu. Phone: (800) 854-9050. Additional information may be obtained at http://housing.iastate.edu/.

Undergraduate Residence Halls

Most residence hall rooms are double occupancy; however, a limited number of triple and single occupancy rooms are also available. All rooms are furnished with extra-long twin beds and mattresses, closet or wardrobe, clothing drawers, desks and chairs, expanded basic cable and high-speed university Ethernet. Students provide their own bedding, towels, study lamps, etc. Students are responsible for cleaning their own rooms.

All students who live in an undergraduate residence hall are required to purchase one of seven convenient, flexible Weekly or Semester meal plans. Weekly plans range from seven to an unlimited number of meals allotted per week, while Semester plans include 175 or 225 meals allotted each semester. Weekly and Semester plans also include Dining Dollar$, a cash equivalent that can be used in all ISU Dining locations. Students can use their meals to eat in one of ISU Dining’s “all-you-care-to-eat” dining centers or to purchase a meal bundle in one of ISU Dining’s cafes, restaurants or dining centers.

All housing and dining contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. With the exception of Linden Hall, all undergraduate Residence Halls close during Winter Break. For a complete listing of rates, please visit the Department of Residence web site: http://housing.iastate.edu/rates/.

Housing and dining contracts are “academically friendly.” Students who leave the University as the result of graduation, withdraw, dismissal or participation in a University approved study-abroad, internship, co-op, or student teaching program are eligible to cancel their contract without penalty. For reasons other than those listed, students who cancel their housing contract after the cancellation deadline (March 1 for current ISU students, May 1 for newly admitted ISU students) may be responsible for paying for 80 percent of the remaining value of their entire contract, both housing and dining. For additional information concerning the residence hall contract, students should contact the Administrative Services Office.

In addition to the basic necessities, several special services are available for use by residents. These include house dens for informal get-togethers and relaxation; lounge areas for meeting and entertaining guests; vending areas for snacks; hall desks with recreation/entertainment items, recreational equipment, and mail delivery; laundry facilities; study areas; meeting rooms and offices for student organizations; computer labs; and parking lots assigned to the residence halls.

The residence halls are organized geographically into two neighborhoods: Richardson Court and Union Drive. The students in each of these neighborhoods elect a group of executive officers to be responsible for coordinating neighborhood events and activities. Each neighborhood funds and maintains a social program, an intramural program, and numerous committees that supplement the total social and educational development of the individual residents. The neighborhoods are joined in an Inter-Residence Hall Association (IRHA), with an all-residence hall parliament, which jointly sponsors Residence Hall Week, Free Friday Flicks, scholarships, leadership conferences, and more.

Each neighborhood is further organized into smaller living groups called houses. These houses of 40 to 60 residents are the foundation of Iowa State University’s residence hall program. Members of the houses elect their own officers, and the majority of programs are planned on a house participation basis. Participation in the house program is a great way for students to receive full benefit from the residence hall experience.

Students may choose to live in single-gender or coed houses. Coed houses have male and female students living at opposite ends of the house or on separate levels of the house. They have separate bathroom facilities but share lounge facilities and house activities.

Residential Learning Communities, which bring together students with similar academic focus, are also available in the residence halls. These communities offer a collaborative living and learning environment, increased student/faculty interaction, social and academic networks essential to student success, and a sense of membership in the ISU community.

Currently, the following learning communities are available: ACES (Agriculture Community Encourages Success); ABE (Agricultural and Biosystems Engineering); BEST (Biological Education Success Team); BLT (Business Learning Teams); Chemical Engineering; Common Threads (Textiles and Clothing); CLUE (Community Learning for Undeclared Engineers); Computer Science; Design Exchange; Entrepreneurship and Innovation; FSH-N (Food Science and Human Nutrition); Honors; LEAD (Leadership through Engineering Academic Diversity); NREM (Natural Resource Ecology and Management); and WiSE (Women in Science and Engineering). Theme houses are also available, including cross-cultural, Army ROTC, and Air Force ROTC. For the most up-to-date information on learning community opportunities at Iowa State, visit http://www.lc.iastate.edu/.

Upper-Division Residence Hall

Two residence halls, Buchanan Hall and Wallace Hall, offer the convenience of residence hall living with a more mature environment for older students. To be eligible to live in Buchanan or Wallace, students must minimally have sophomore classification or be at least 19 years of age. In Buchanan, two floors are reserved for students who are 21 years of age and older. There is no age requirement for students living in the Entrepreneurship and Innovation Learning Community floor in Buchanan.

Buchanan rooms offer a suite-style set-up with two rooms joined by a private bathroom. Double suites have a sink in each room and share a bathroom with the adjacent room that includes a toilet and shower. Single suites share a bathroom with the adjacent room that includes sink, toilet, and shower. Each room is furnished with a lofted bed, desk with bookcase and file, desk chair, wardrobe/dresser unit, expanded basic cable and high-speed university Ethernet. Student lounges and kitchenettes are available on most floors. Residents living in Buchanan must purchase a meal plan.

All Wallace rooms are super-singles. That is, a double-sized room furnished for and occupied by only one student. Each room is furnished...
with a bed, desk, desk chair, futon, dresser, wardrobe, micro-fridge, expanded basic cable, and high-speed university Ethernet. Student lounges are available on each floor. Residents living in Wallace are not required to purchase a meal plan.

Both Buchanan and Wallace halls remain open during Winter Break at no additional charge. All Buchanan and Wallace hall contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. In Buchanan, summer contracts are also available. For a complete listing of rates, please visit the Department of Residence web site: http://housing.iastate.edu/rates/.

Undergraduate and Graduate Single Student Apartments

Apartments for single students are offered in two on-campus neighborhoods: Frederiksen Court and Schilletter and University Villages (SUV). To be eligible to live in these areas, students must minimally have sophomore classification or be at least 19 years of age. All Frederiksen Court and SUV contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. Both Frederiksen Court and SUV remain open during Winter Break at no additional charge. Summer contracts are also available in both locations. For a complete listing of rates, please visit the Department of Residence web site: http://housing.iastate.edu/rates/.

Frederiksen Court apartments accommodate four persons of the same gender in either two or four bedrooms. Each apartment is furnished with living room and bedroom furniture and the kitchen has a full-size refrigerator, stove, microwave, dishwasher and garbage disposal. A washer and dryer are also included in each apartment.

Rent, which is billed on a semester-basis, includes all utilities: electricity, water, garbage pickup, basic phone service, expanded basic cable, and high-speed university Ethernet.

The Frederiksen Court Community Center features meeting rooms and lounge space, a fitness center, business center and Hawthorn Market and & Café a retail dining facility that offers hot meals, snacks, beverages, and convenience items.

In SUV, single students typically live in University Village. All apartments contain two bedrooms, one bathroom, a living room, and a kitchen furnished with a cook top, oven, workspace, refrigerator, and sink. The majority of University Village apartments are unfurnished, but a limited number of furnished units are available.

Rent, which is billed monthly by the university, includes include expanded basic cable television, high-speed Internet connectivity, water, and garbage removal service. Residents pay for their own gas, electricity, and telephone.

The SUV Community Center features large meeting rooms and lounge space, a community kitchen and a computer lab.

Apartments for Families

Family Housing is available in the SUV area in Schilletter Village. Students must be married/domestic partners and/or have dependent children in order to be eligible for family housing.

All Schilletter Village contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. Schilletter Village remains open during Winter Break at no additional charge. Summer contracts are also available in both locations. For a complete listing of rates, please visit the Department of Residence web site: http://housing.iastate.edu/rates/.

All apartments contain two bedrooms, one bathroom, a living room, and a kitchen furnished with a cook top, oven, workspace, refrigerator, and sink. Students provide their own furniture and window coverings. Hook-ups for personal washer and dryer are available in the basement of each unit as are private, lockable storage closets.

Rent is billed monthly by the university. Rental rates include expanded basic cable television, high-speed Internet connectivity, water, and garbage removal service. Residents pay for their own gas, electricity, and telephone.

The SUV Community Center features large meeting rooms and lounge space, a community kitchen and a computer lab. The community also boasts a bike/walking path and several playgrounds.

Off-campus Housing for Students

Off-campus housing information may be obtained through real estate agents, local newspapers, or by contacting individual owners.

Dining Options for On- and Off-Campus Apartments

ISU Dining offers a variety of convenient, flexible meal plans to students who live in on-campus and off-campus apartments. Plans include traditional Weekly plans, ranging from seven to an unlimited number meals allotted per week, to Semester plans with 175 or 225 meals allotted each semester. Weekly and Semester plans also include Dining Dollars, a cash equivalent that can be used in all ISU Dining locations. Students in non-meal plan required areas can also choose to purchase Meal Blocks (small allotments of meals without Dining Dollars) or Dining Dollars only.

All dining contracts are for the full academic year, both fall and spring semesters, or the remainder thereof, if the contract is signed after fall semester begins. Summer contracts are also available. For a complete listing of meal plans and rates, please visit the ISU Dining http://www.dining.iastate.edu/. Questions and correspondence concerning meal plans should be directed to the Department of Residence Administrative Services Office, 2419 Friley Hall, Iowa State University, Ames, Iowa 50012.

E-mail: housing@iastate.edu. Phone: (800) 854-9050. Additional information may be obtained at http://housing.iastate.edu/.

Fraternities and Sororities

Of the 50 fraternity and sorority chapters on the Iowa State University campus, 42 have chapter houses, and provide housing for about 1,800 undergraduate students. Eight multicultural Greek fraternities and sororities do not provide residential facilities for members, but are active in scholastic, service and social projects.

The chapter house facilities are similar to a private residence: living room, den, kitchen, dining room, laundry room, etc. The staff in the Office of Greek Affairs, a department in the Dean of Students Office, provide advising, programs, and services for the Greek chapters and organizations. Local alumni work with each fraternity and sorority to ensure that the chapter structure meets all the state and local building, safety, and fire codes that are required with incorporation under the State Law of Iowa.

The average cost of living in a fraternity or sorority chapter house ranges from $2,800-$3,400 per semester. The cost includes room, board, social expenses and membership dues.

Most men may move directly into a fraternity house at the beginning of an academic year if they pledge a chapter that has a house. Typically, they continue living there throughout their college years. Women pledging a sorority during formal recruitment or informally throughout the year generally live in the residence halls for the academic year. However, as space becomes available in a chapter house, sorority members often move into the house as sophomores or upper-class women.
The University Library
Dean of the Library:
Olivia M. A. Madison, M.L.A.
General Information–(515)-294-3642
Library Hours–(515)-294-4849
The University Library provides a wide array of print, non-print, and electronic information resources, which are housed in the main Parks Library, the e-Library, the Veterinary Medical Library, and three subject-oriented reading rooms (design, mathematics, and physical sciences). The library’s extensive collections support research and study for all ISU graduate programs, with the strongest support at the Ph.D. level. These collections are nationally recognized for their strengths in basic and applied fields of biological and physical sciences. Library holdings include more than 2,529,920 volumes and approximately 66,195 current serial titles.

The library encourages use of its collections and many services, and assistance is provided at five public service desks. These desks include the Learning Connections Center, Inter-library Loan/Document Delivery, the Circulation Desk, the Media Center (incl. Maps, Media, Microforms, and Course Reserve collections), and Special Collections. In addition, instruction in the use of library resources is offered to graduate and undergraduate students.

The library’s e-Library, accessed through the Internet, provides access to the local online catalog; online indexes; electronic journals and books; and selected Internet sites. Assistance in using this vast body of electronic resources is available at the Learning Connections Center, digital reference services, and through individually arranged appointments with reference librarians.

The Parks Library has a limited number of semiprivate study rooms available for faculty, graduate students, and professional and scientific staff. They are intended for research and other scholarly activities that require extensive use of library material. Normally, assignments are made for a semester at a time.

Student Answer Center

www.public.iastate.edu/~registrar/Answer-Center/homepage.html

In addition to providing counseling and outreach services to students, SCS provides training and consultation to faculty and staff to assist them in addressing the psychological needs of students.

SCS hours are Monday through Friday 8 a.m. - 5 p.m. The Student Counseling Service phone number is 515-294-5056.

Thielen Student Health Center

Interim Director: Penni McKinley, R.N., B.A.
Providers: Robin Engstrom, M.D.; Rebecca Fritzsch, M.D.; Malhar Gore, M.D.; Scott Meyer, M.D.; Pauline Miller, M.D.; Robert Nathanson, M.D.; Carver Nebbe, M.D.; Maria Pringle, ARNP; Mary S. Raman, ARNP; Cosette Scallion, M.D.; Marc Shulman, M.D.; Lee Wilkins, M.D.

The Thielen Student Health Center is located on the corner of Sheldon Avenue and Union Drive, just west of Beyer Hall. Services include physician, nurse practitioner and nurse consultations, physical exams, laboratory and x-ray services, sports medicine and physical therapy, immunizations, pharmacy, diet and nutrition consultation, fitness consultation, stress management, smoking cessation, workshops, free and confidential HIV testing, and referral services.

The student health fee partially finances the services of the Thielen Student Health Center and is charged to all students taking 5 or more credits each semester. Those taking 4 or fewer credits may access services by paying the health fee. Spouses/domestic partners of students who opt to pay the health fee also have access to services. Students with less than 5 credits who elect not to pay the health fee may still be seen at the Thielen Student Health Center, but will be charged for the services provided.

International students are required to pay the health fee. The health fee is not a substitute for health insurance.

Clinic hours:
Monday, 8 a.m.-6 p.m.
Tuesday and Thursday, 8 a.m.-5 p.m.
Wednesday, 9 a.m.-5 p.m.
Saturday, 9 a.m.-12 noon.

Hours vary during breaks and summer session. The Thielen Student Health Center is closed during all University Holidays. Patients are seen by appointment. Please call 515-294-5801. Each patient has the option of seeing the provider he/she requests.

Thielen Student Health Center phones are automatically switched to the First Nurse at Mary Greeley Medical Center so urgent health questions can be answered during the hours the Thielen Student Health Center is closed.

Service is available for urgent or emergency problems after regular clinic hours at McFarland Urgent Care Clinic or Mary Greeley Medical Center Emergency Room. The cost is the responsibility of the student and/or the student’s insurance plan.
Career Services Offices

Agriculture and Life Sciences:
141 Curtiss Hall

Business: 1320 Gerdin Business Building
Design: 297 College of Design
Engineering: 308 Marston Hall
Graduate Business/MBA:
1360 Gerdin Business Building

Human Sciences: E106 Lagomarcino Hall
Liberal Arts and Sciences: 351 Catt Hall
Veterinary Medicine: 2270A Veterinary Medicine Complex

Career Services is a coordinated network of career services offices offering a broad range of programs and services for undergraduate, professional, and graduate students, faculty, staff, alumni, and employers. These services include career exploration, career development, experiential learning, and professional career search assistance programs. The goal is to provide constituents with life-long skills to assist with career development and exploration.

A broad range of programs and services are offered including online registration, position listing and interview scheduling; résumé referral; coordination of co-op and internship programs; workshops and seminars on career exploration, résumé preparation, letter writing, job search techniques, interview skills, applying to graduate and professional schools, and adjusting to the first job.

Each year career services sponsors multiple career fairs, which bring to the ISU campus hundreds of employers. The career services offices also coordinate on-campus interview opportunities. Each college career services office serves as a point of entry for students, alumni, and employers to the entire ISU network of coordinated, decentralized career services.

In addition to the college-based career services offices, the Career Exploration Service provides a variety of services to students who are unsure about their major or future career path. Students can work one-on-one with a trained career counselor, use the many books and electronic resources in the Career Exploration Center, or enroll in LAS 104, Personal Career Choice. All services are free for students and confidential.

Additional information on career services is available at www.career.iastate.edu.

Child Care

Child Care Administration, a unit of Human Resource Services, supports Iowa State University families by linking them with programs and services that can help meet their child care needs. The university child care coordinator is available to assist families in accessing services available both on the campus and in the community.

Child care programs located on campus include:
- Center for Child Care Resources: Assistance in locating campus and community child care services, 100 University Village, Suite 1010, 515-294-8833 or 1-800-437-8599
- University Community Childcare, Family Resource Center, 100 University Village, 515-294-9838
- The Comfort Zone: Childcare for kids who don’t feel so good, 100 University Village, 515-294-3333.
- FlexCare: Part time care for children of ISU students, 100 University Village, 515-294-9838.
- University Child Care Center at Veterinary Medicine, 1700 Christensen Drive, 515-294-2273.
- ISU Child Development Laboratory School, Palmer HDFS Building, 515-294-3040.

For more information about child care options, contact the university child care coordinator at 515-294-8827.

International Students and Scholars

http://www.isso.iastate.edu

Director: James Dorsett
Coordinator of Administration: Deborah Vance
Program Coordinators: Virginia McCallum, Dilok Phanchantraurai, Ali Soltanashahi, Becky Zama
Program Assistant: Arlis Penner
Systems Analyst: David Morgan
Administrative Specialist: Lana Seiler

International Students and Scholars Office (ISSO) is committed to providing courteous, accurate, timely service and informative programs for international students, visiting scholars, faculty, staff, and citizens of Iowa interested in international education and exchange. ISSO staff members orient and advise international students and scholars on university procedures, community resources, U.S. visa issues, and nonacademic personal concerns. ISSO intercultural programs, such as the Culture Corps, Friendships International, Conversational English Program and activities developed with the International Student Council and dozens of international student organizations, bring international students and Americans together for mutual learning. We welcome volunteers to join these and other programs.

The Dean of Students Office (DSO) provides a wide array of services and programs that enhance each student’s education at Iowa State University. DSO departments are located in numerous locations on the ISU campus. The mission of the Dean of Students Office is to enhance the quality of life of ISU students by supporting the university’s commitment to the academic success and holistic development of each individual student.

The DSO coordinates a variety of services that are each distinct and different, but nonetheless similar in their orientation toward maximizing students’ educational opportunities and challenging students intellectually, physically, and socially.
Academic Success Center
www.dso.iastate.edu/asc
1060 Hixson-Lied Student Success Center
(515) 294-6624; TTY (515) 294-6635
The Academic Success Center (ASC) encompasses several academic assistance programs. The services available at the ASC include the following: resources for students with disabilities (see Disability Resources); course-specific Tutoring Services and Supplemental Instruction; general assistance through the Learning Lab, individual consultation for those with needs related to study skills/time management; and a one-credit study skills class (Psychology 131). All programs are focused on helping students learn how to learn and achieve their academic goals.

Tutoring Services’ mission is to enhance academic growth and success. Tutoring is the process by which students can get more individualized instruction or course-specific tutoring for undergraduate courses offered at ISU. Staff members recruit and screen tutors, schedule convenient times to meet, collect fees, and pay tutors.

Supplemental Instruction (SI) is a free academic assistance program for difficult selected 100 and 200 level courses. Peer SI leaders who have demonstrated competence in the course attend classes and conduct biweekly sessions to help students learn and study the course material. A complete schedule can be viewed online.

The Learning Lab is a “learning how to learn” center. A service to students, the Learning Lab helps them with tips on how to succeed in the classroom. The Learning Lab is staffed by academic consultants who work with students to pinpoint areas in their study strategies that might need improvement.

Psychology 131, a one-credit study skills course, addresses academic success strategies as well as a variety of reading and study strategies and tactics from time management to test taking. It is offered each semester. Class size is limited to allow for group interaction as well as individual attention.

Greek Affairs
www.greek.iastate.edu
B0355 Memorial Union
(515) 294-1023
Greek Affairs provides advising, consultation, and educational services to the fraternities and sororities at ISU. Professional staff and graduate assistants work with student leaders, members, and chapter advisers to provide support to the chapters and to advise Collegiate Panhellenic Council, Interfraternity Council, National Pan-Hellenic Council, Multicultural Greek Council, Greek Week, Fall/Spring Blood Drives, Order of Omega, Junior Greek Council, and other student organizations and activities affiliated with the Greek Community.

Fraternities and sororities have been active at ISU since 1875. The over 50 fraternities and sororities at ISU have more than 2,000 student members and represent about 11 percent of the undergraduate student population. The Greek Affairs staff and local alumni work with each fraternity and sorority to ensure that the chapter is meeting the educational objectives of the university, their national affiliations and the developmental needs of the students.

Hixson Opportunity Awards
www.dso.iastate.edu/hixon
1080 Hixson-Lied Student Success Center (515) 294-6479
The activities and programs offered to Hixon Scholars are designed to promote the retention and success of these students. These programs and resources aim to develop a community of students and friends within the larger Iowa State community. Programs include the Hixon Seminar (University Studies 111), Hixon News (a monthly newsletter), monthly activities, community service, Hixon Mentors, and the Hixon Leadership Seminars (University Studies 311 & 312).

Judicial Affairs
www.dso.iastate.edu/ja
1010 Student Services Building
(515) 294-1021
The Office of Judicial Affairs is responsible for the university’s Centralized Judicial System. Representatives from the Office of Judicial Affairs interpret university policies and conduct student disciplinary hearings for academic and nonacademic violations of the Iowa State University Student Disciplinary Regulations. As members of the ISU community, all students have certain rights and responsibilities. When an alleged violation of the Student Disciplinary Regulations occurs, a representative from the Office of Judicial Affairs investigates the complaint, interprets general university regulations and guidelines, conducts student discipline hearings which ensure the standards of due process, and consults with faculty, staff, and students regarding student conduct issues.

Student discipline hearings are conducted in accordance with the rules and regulations as set forth in university policies and procedures. Disciplinary hearings are administered by a member of the Judicial Affairs staff, the All Greek Judicial Board, or by members of the All-University Judiciary (AUJ) committee. The Office of Judicial Affairs serves as a resource for anyone with questions regarding a student conduct issue.

Lesbian, Gay, Bisexual and Transgender Student Services
www.dso.iastate.edu/lgbtss
1034 Student Services Building
(515) 294-5433
lgbtss@iastate.edu
Lesbian, Gay, Bisexual, & Transgender Student Services (LGBTSS) is a resource center for all members of the university community to learn more about aspects of sexual identity and gender identity/expression. LGBTSS is committed to providing information and education to enhance the educational experience and overall quality of student life on the ISU campus. LGBTSS strives to increase the awareness of Lesbian, Gay, Bisexual, Transgender, Queer, and Ally (LGBTQA) issues on campus by providing a safe space, as well as informational and educational programming, resources, and support services. Our vision is to promote a welcoming and inclusive campus climate for LGBTQA persons and their allies and to eliminate homophobia, heterosexism, and sexism at Iowa State University.

LGBTSS services and programs include:
• Speaker’s Bureau – Panel discussion presentations where LGBTQA people and allies share their own experiences and present on a vast array of LGBTQA issues.
• Safe Zone Program – Initiative to increase the visibility of allies on our campus. Displaying a safe zone symbol sends an important message of a willingness and commitment to provide an atmosphere of acceptance, understanding, and support to the LGBTQA community at ISU.
• Library – Information center with over 1,000 resources (non-fiction & fiction books, magazines, videos, and magazines) available for confidential checkout.
• Support Groups – Ongoing, confidential, peer-facilitated groups designed to provide a safe, supportive place for talking about important issues.
• Referrals – Contact information available for various campus and community resources for personal, legal, health services.
• Celebration Events – Programs where we recognize the accomplishments of LGBTQA campus members. The Small Victories Celebration takes place early in the spring semester and Lavender Graduation is in May.

Margaret Sloss Women’s Center
www.dso.iastate.edu/mswc
Sloss House
(515) 294-4154
The Margaret Sloss Women’s Center promotes the educational, personal, and career development of all women in the ISU/Ames community. Along with other departments, the Women’s Center shares the university’s responsibility of creating a safe and supportive environment for all individuals. The purpose of the Women’s Center is to promote and sustain women through assistance, programs, and information and referral services.

The Women’s Center provides:
• Assistance and support for women who work toward making change, on both personal and institutional levels.
• A safe space for women to meet, study, eat, network, discuss, find support, watch a video or just relax.
• A clearinghouse of information including a lending library, resource files, a calendar of events, and a variety of videos and audio tapes.
• Educational programming that focuses on helping students, staff, and faculty thrive in an academic environment by motivating them toward a greater understanding of, and involvement with, gender issues. Educational programs presented in residence halls, departments and organizations include workshops on a variety of topics.
• Coordination and co-sponsorship of special events including Women’s Week, National Coming Out Days, Sexual Assault Awareness
Month, and Women's History Month. Throughout the year, the Women's Center also sponsors a number of speakers on current issues, hosts conferences, and coordinates support and discussion groups.

- A place to gain experience and/or credit as a journalism or design intern, practicum student, student programmer, board member, or volunteer.

Other services include an electronic breast pump, lockers to rent, free condoms, meeting space for campus and community organizations, kitchen facilities, a TV and VCR.

**Multicultural Student Affairs (MSA)**

www.dso.iastate.edu/msa
2080 Student Services Building
(515) 294-6338

Multicultural Student Affairs was established to assist the university in keeping its commitment to equal educational opportunity. The mission of MSA is to provide and share leadership in the holistic development of African American, Latino/a-Hispanic, Asian American/Pacific Islander, and American Indian/Alaskan Native students. In supporting university spirit and commitment to a high quality of life, academic success and graduation of all Iowa State University students, MSA is dedicated to collaboration with all university departments, offices, and related organizations in the delivery of programs and services that respond to the ever changing needs of all students.

MSA staff work closely with all units of the university to achieve the following objectives:

- Increase the number of students of color entering and graduating from ISU.
- Ensure access, choice, and persistence with all departments and organizations interested in the growth and development of students of color.
- Maintain liaison and coordinate programs with all departments and organizations interested in the growth and development of students of color.
- Develop students for a future beyond their undergraduate college experience – professionally, intellectually and culturally.
- Provide leadership for diversity awareness education regarding race and ethnicity.

These objectives assist in the achievement of the Office of Multicultural Student Affairs’ mission. This is accomplished through the following services and programs:

- Academic Program for Excellence (APEX)
- Carver Academy Program
- George Washington Carver Scholarship
- Multicultural Vision Program (MVP) Scholarship
- MSA Emergency Loan Program
- MSA Tutoring
- First Year Student of Color Experience programming
- Race Relations programming

**National Student Exchange (NSE)**

www.dso.iastate.edu/nse
1080 Hixson-Lied Student Success Center
(515) 294-6479

Since 1968, National Student Exchange has offered students a domestic alternative to study abroad. What began with three campuses exchanging seven students is now 190 universities placing 4000 students a year. Iowa State University is pleased to offer exchanges in this program.

Since its founding, more than 80,000 students have participated in NSE. The National Student Exchange was founded as a counterpart to study abroad programs, recognizing that not every student is seeking a study opportunity outside the United States. NSE offers low-cost options for ISU students to study out-of-state, at culturally diverse campuses, with program compatibility to our campus.

Features of the National Student Exchange include:

- Access to additional courses and programs
- Exchange among university honors programs
- Multicultural opportunities
- Resident assistant exchange options
- Credits applied toward degree
- Tuition reciprocity across the United States

Exchange features and requirements:

- NSE campuses in 48 states, three U.S. territories, and six Canadian provinces
- Duration of exchange can range from one semester to one calendar year
- Exchanges can occur in different academic and calendar years
- Students must be full-time during application and exchange
- GPA of 2.5 on a 4.0 scale required

**Parents Association (ISUPA)**

www.dso.iastate.edu/apa
1010 Student Services Building
(515) 294-6054

All parents of Iowa State University undergraduate students are automatically considered members of the ISU Parents’ Association. The ISUPA serves as a link between the university and parents and families. Its mission is to serve and inform parents and to enhance the quality of student life at ISU.

There are no membership fees collected by the ISUPA. It is funded exclusively by contributions and fundraisers, such as the annual tuition raffle. The ISUPA Board of Directors, along with members of the Dean of Students Office staff, sponsors programs which include:

- Family Handbook, which is distributed to parents of all new ISU students at June orientation
- Parents’ Advisory Line (PAL), 1-800-772-8546, a toll free assistance line for families
- Parent Calling Project, a phone-a-thon to parents of new ISU students each fall
- Cyclone Family Weekend, the university’s premiere event for families largely funded by the ISUPA
- Involvement in ISU Admissions events

Parents interested in volunteering on the ISUPA Board of Directors can find the application form at the ISUPA web site.

**Recreation Services**

www.recservices.iastate.edu
2220 State Gymnasium
(515) 294-4980

Recreation Services is dedicated to the provision of quality recreational opportunities for the campus community. Programs include intramural sports, sport clubs, informal recreation, outdoor recreation, special events, fitness programs, and recreation facility management. Assistance for other recreational services is provided.

The Informal Recreation program includes the opportunity for recreational sports activity in Beyer Hall, State Gymnasium, Forker Building (east campus), Lied Recreation/Athletic Center, outdoor tennis courts near the Forker Building, recreation fields east of the Towers and Maple-Willow-Larch Residence Halls, and the Southeast Field Complex east of the football stadium. Two regulation golf holes north of the Armory are open for ISU recreation golf use at no charge. The Ames/ISU Ice Arena is also available for drop in open skating or organized events.

The Group Fitness program provides nearly 60 classes per week for staying fit. The types of aerobics classes available include: high/low impact, step, toning and aqua. We also offer personal trainers for those that would like to have one-on-one assistance with their workout. The Rec Miler's Program is designed to help students stay interested and involved in a regular exercise program. Participants have the flexibility to choose their own activities and can exercise at their own pace and convenience. Participants keep track of their recreational mileage for each month. To get mileage credit, progress slips must be deposited in the Rec Miler’s boxes at the Recreation Services Office, 2220 State Gym, or at the Lied Recreation/Athletic Facility. Monthly totals for each participant are posted at State Gym. Participants may earn awards for specific milestones. Aerobic activities for Rec Miler credit include: bike, walk, basketball, handball, cross country skiing, stationary bike, fitness class, jump rope, soccer, jog/run, swim, racquetball and tennis.

The Outdoor Recreation program is composed of four basic elements: the camping-outdoor equipment checkout program; the organized trip program; basic instruction activity workshops; the Resource Center and Library. All of these programs and activities are designed to provide opportunities for natural environment experiences.

The Sports Club program is designed to serve individual interests in different sports club activities and is student-oriented in every aspect. Sports clubs offer team or individual recreational opportunities. Following are the sports clubs: archery, badminton, ballet, dance, baseball, bowling, boxing, canoe and kayak, cycling, equestrian, fencing, flying, hapkido, hockey, judo, karate, kum do, lacrosse, motorcycling, mountaineering/rock climbing, paintball, pool, racquetball, rifle and pistol, rodeo, roller hockey, rugby, running, sailing, scuba, shotokan karate, ski and snowboard, skydivers, soccer, table tennis, tae-kwon-do, tennis, trap and skeet, triathlon, ultimate frisbee, unicycle, volleyball, water polo, water ski and weightlifting.
These clubs offer instruction and competition at the local and intercollegiate levels. The club members set dues, and most clubs receive financial subsidy from the Government of the Student Body to enable students to participate regardless of their financial situation.

The Intramural Sports program involves competition among participants who enter as teams or individuals and play according to specific schedules. There are more than 50 intramural sport activities ranging from football to inner tube water basketball and curling. Activities include men's, women's, and co-rec divisions. Numerous special events add spice to the recreation program. These activities are of an endless variety and usually take place in a short time span. In general, they encompass demonstrations, performances, special contests, mass group participation, social occasions, excursions, displays, or special instruction.

Other physical, cultural, and social recreation programs are sponsored in coordination with various departments, organizations, and groups on and off campus. Contact us for more information.

**Student Assistance and Outreach Services**

www.dso.iastate.edu/sa  
1010 Student Services Building  
(515) 294-1020

Student Assistance Services (SAS) staff members provide guidance for students who are dealing with issues that affect their personal, academic, and family lives. They help students understand university policies and navigate processes and procedures on campus in order to enhance their academic experience at ISU.

Consultation and assistance is provided with concern for each student's personal well being and educational objectives. SAS staff members coordinate the notification of faculty members for students who miss classes due to emergencies. They also advise students who wish to file formal academic grievances. SAS staff members work closely with ISU faculty and staff to identify the best possible options for ISU students who are seeking to help themselves. Personalized referrals to other University resources and services are used to provide proactive and comprehensive assistance to students.

**Student Disability Resources (SDR)**

www.dso.iastate.edu/dr  
1076 Student Services Building  
(515) 294-7220; TTY (515) 294-6635

Staff members in the Student Disability Resources office coordinate support services that students may need in order to reach their fullest academic potential. SDR staff members coordinate accommodations and serve as a resource within the university community concerning students who have qualifying disabilities. SDR provides assistance, information, support, counseling, education, referral, and promotes disability awareness in students, faculty, staff, the Ames community, and the state of Iowa.

**Student Legal Services**

www.dso.iastate.edu/sls  
B0367 Memorial Union  
(515) 294-0978

Funded entirely by the Government of the Student Body, Student Legal Services (SLS) is a legal aid office for students currently enrolled at Iowa State University and registered Iowa State University student groups. It is staffed by two attorneys who advise and often represent students in a variety of cases and are available for consultation with respect to most legal concerns.

The types of cases most often handled include:

- Family Law and Divorce
- Criminal Law
- Landlord - Tenant Problems
- Off-campus Employment Problems
- Consumer Issues
- Administrative Issues
- Notary Services

The services of SLS are available to students and registered Iowa State University student groups free of charge. Students must pay their own court costs and any out of pocket expenses.

SLS cannot represent students in fee generating cases, controversies involving student vs. student or student vs. ISU, ISU student judicial matters and generally does not handle felony defense or cases involving excessive time. However, consultation with an attorney regarding these matters is available.

**Student Support Services Program**

www.dso.iastate.edu/sssp  
2010 Student Services Building  
(515) 294-0210

Student Support Services Program (SSSP), a federally funded program, provides academic support to eligible students and is designed to increase the retention and graduation rates of low-income individuals who are first-generation college students or individuals with disabilities. The needs of the students who are accepted into SSSP are thoroughly assessed through testing and counseling. SSSP participants receive personal and career counseling, along with academic advice, tutoring, and assistance in receiving financial aid.

Participants in SSSP are encouraged to work with an SSSP student mentor to become acclimated to the ISU environment. These relationships also encourage participants to fully access ISU resources. Study skills improvement sessions and basic skills instruction are provided in the areas of math and writing. In addition, cultural enrichment (i.e. theatre, dance, and musical events) and educational activities (leadership conferences, graduate/professional, etc.) are planned. These services are provided free of charge to eligible students after they are accepted into the program.

**Vocational Rehabilitation**

www.dso.iastate.edu/vr  
1045 Student Services Building  
(515) 294-5059

The State of Iowa Division of Vocational Rehabilitation Services Office provides services to students who based on medical documentation, have a disability and it is a substantial impediment to employment. Rehabilitation services may include the following: medical assessment; vocational evaluation; counseling and guidance; special adaptive equipment or devices; financial assistance toward training; and job placement assistance. No direct fees are charged, but there may be some costs through involvement with services.
Memorial Union Activities and Services

The Memorial Union is an historic building that is regarded as the heart of campus life and the center of informal education at Iowa State University.

515-296-6848; www.mu.iastate.edu

Arts, Entertainment, Recreation:
• Underground (bowling, billiards, video arcade, Nintendo Wii)
• Maintenance Shop: live music
• Student Union Board: weekly films, comedy, hypnotists, special events, much more
• Art exhibits and art-for-rent
• Workspace (art and crafts classes for fun, studios for work in wood, photo, pottery; button maker, screen printing, die cut machine)
• Big screen TVs; pianos to play
• Lectures

Student Organizations
• Student organization offices and meeting space; recognition process.

Dining & Shopping
• Food Court & MU Market & Café
• University Book Store

Study Spots
• Browsing Library & Computer Lab; Chapel; Multicultural Center
• Lounges: Main, West, Pride, Commons & more

Services
• Hotel, meeting rooms, catering
• Parking ramp
• Copy Center
• Soults Family Visitor Center
• ATMs, Ticket Office, Lockers
• U.S. Post Office – full service
• Student Legal Service

Distinctive Feature
• Gold Star Hall, an active memorial to Iowa State service personnel lost in the nation's conflicts

Student Activities and Honor Societies

Student Activities Center
Director of Student Activities

Coordinator for Leadership and Service
Jennifer Garrett
Coordinator for Art Programs
Letitia Kenemer
Coordinator for Entertainment Programs
Steven Satterlee

Underground Recreation Center Manager
Doug Swanson

The Student Activities Center (SAC) in the Memorial Union is committed to helping students learn inside and outside the classroom by offering countless ways to get involved at Iowa State through leadership, service, arts, entertainment and recreation activities.

The Student Activities Center includes: the Workspace (arts studio), the Maintenance Shop (entertainment venue), the Underground (recreation center/bowling alley), leadership and service programs, art galleries in the MU, and management of the recognition of over 700 campus and student organizations. For a complete list of recognized organizations visit www.stuorg.iastate.edu.

The staff provides assistance to student and campus organization leaders, members and advisers on an individual or group basis. This office produces Newsline, an online newsletter distributed twice a month to officers and advisers of recognized student and campus organizations. Available on the SAC website are resources for student and campus organizations including the event authorization process, publicity and promotion ideas, constitution writing guidelines, and officer transition information. The Student Activities Center offers a 1-credit course called Leadership ISU where students learn leadership skills through a series of activities and seminars.

Annual SAC events include: ClubFest I & II (organization involvement fair), WelcomeFest (Ames and ISU opportunity fair), Coach Talks (hear from Men's and Women's head basketball coaches), Iowa State Leadership Experience (one-day leadership conference), Social Justice Summit, and Winterfest (celebration of all things winter). Student Activities Center staff advise key student organizations including: Student Union Board, Dance Marathon, Freshmen Council, Student Volunteer Services, The 10,000 Hours Show, and VEISHEA.

More information is available at the Student Activities Center, located in the East Student Office Space in the Memorial Union (across from the Food Court); online at www.sac.iastate.edu; or by calling (515) 294-8081.

Lectures
http://www.lectures.iastate.edu/
Throughout the academic year, the Committee on Lectures brings to the campus a number of speakers eminent in national and international affairs, the sciences, and the arts. In addition to giving formal lectures, a number of these speakers meet with students informally for discussions. Through these lectures and discussions the students are given a well-rounded presentation on subjects and areas affecting their culture, educational and economic philosophy, and scientific development. Past speakers include scholars E.O. Wilson and Stephen J. Gould; activists Gloria Steinem and Anita Hill; actor and comedian Bill Cosby; poet Maya Angelou; and astronaut Sally Ride.

The Institute on World Affairs is an annual series of speakers and on a topic of international interest held in the fall. Spring semester, the Institute on National Affairs is held with a topic of national concern as its focus. Focus, an annual fine arts festival with emphasis on student creativity in the arts, is held in the spring. The Committee on Lectures also sponsors or co-sponsors dramatic, dance, and musical events.

Students are encouraged to contact the lectures program office and become involved in the planning of these events.

Motor Vehicles and Bicycles

Students are permitted to own and operate motor vehicles - automobiles, motor scooters, and motorcycles. However, motor vehicles are in no way necessary for an Iowa State University student. Iowa State University is primarily a pedestrian campus. Those who operate a motor vehicle or bicycle on campus must abide by the rather extensive traffic and parking regulations. Fines are levied for infractions of these regulations. All motor vehicles and bicycles owned or operated by students on university property must be registered with the Parking Division Office located in the Armory. Copies of the traffic and parking regulations also are available at this office or online at http://www.dps.iastate.edu/parking/.
Honor Societies

Honor societies at Iowa State University provide opportunities for students who excel in the classroom and want to network with others in their major. Below is a list of honor societies followed by a brief description.

Members of these honor societies are eligible for transcript recognition through the Office of the Registrar. More information, including the complete list of honor societies, can be found on the student organization database at www.stuorg.iastate.edu.

**Alpha Epsilon—Agricultural Engineering**
The purpose is to promote the high ideals of the engineering profession, to give recognition to those agricultural engineers who manifest worthy qualities of character, scholarship, and professional attainment, and to encourage and support such improvements in the agricultural engineering profession that make it an instrument of greater service to humanity. Membership is based on scholarship, leadership, and character.

**Alpha Lambda Delta/Phi Eta Sigma—Freshmen**
First-year students who achieve at least a 3.5 GPA for one or more semesters their first year may be members of these national honor societies. These societies encourage superior scholastic attainment among students in their first year at institutions of higher education.

**Alpha Pi Mu—Industrial Engineering**
Members are chosen for character, achievement, and scholarship in industrial engineering. The group provides social and educational interaction for industrial engineering.

**Alpha Upsilon Alpha—Education**
Members share interest in the field of educational efforts for students who excel in the classroom and want to network with others in their major. Below is a list of honor societies followed by a brief description.

**Beta Alpha Psi—Accounting**
A national honorary for students in accounting, Beta Alpha Psi recognizes academic excellence and complements members’ formal education by providing interaction between students, faculty, and professionals, and fosters lifelong growth, service and ethical conduct.

**Beta Beta Beta Biological Honor Society**
A national organization for students in the biological sciences with a purpose to recognize undergraduates with exceptional scholarship, leadership and character.

**Beta Gamma Sigma**
An honor society for collegiate schools of business, Beta Gamma Sigma recognizes high academic achievement.

**Cardinal Key—Senior Leadership**
The Senior Honor Society of Cardinal Key recognizes those persons who have been outstanding leaders in college life, who have rendered noteworthy service to Iowa State University, who are of high moral character, and who rank high scholastically. Members are selected by application and interview.

**Chi Epsilon—Civil Engineering**
The purpose of this honorary is to develop the profession of civil engineering through the interaction of members, fellow civil engineering students, and faculty. Scholarship, character, practicality, and sociability are the fundamental requirements for membership.

**Epsilon Pi Tau—Education in Technology**
Members are selected from the upper one-fourth of the juniors, seniors, and graduate students in industrial technology. The group strives to promote skill, social and professional efficiency, and research.

**Eta Kappa Nu—Electrical and Computer Engineering**
An International Honor Society for primarily juniors and seniors, as well as graduate students and professional engineers. The organization recognizes scholarship, personal character, useful voluntary services, and distinguished accomplishments. It assists its members throughout their lives in becoming better professionals and citizens.

**Gamma Sigma Delta—Agriculture**
The honorary encourages a high degree of excellence in the practice of agricultural pursuits and encourages high standards of scholarship in all branches of agricultural science and education. Membership includes junior and senior students, graduate students, faculty, and alumni.

**Golden Key—All University**
A national nonprofit academic honors organization, Golden Key is dedicated to recognizing and encouraging scholastic achievement in all undergraduate fields of study and to uniting collegiate faculty and administrators.

**Kappa Delta Pi—Education**
In an effort to promote excellence in and recognize outstanding contributions to education, Kappa Delta Pi maintains a high degree of professional fellowship among its members, quickens professional growth, and honors achievement in educational work. Membership invitations are extended to second semester sophomores, juniors, and seniors with a GPA of 3.25 or above.

**Kappa Kappa Delta—Sociology**
Members share interest in the field of sociology, research of social problems, and such other social and intellectual activities as will lead to improvement in the human condition.

**Alpha Delta—Sociology**
First-year students who achieve at least a 3.5 GPA for one or more semesters their first year may be members of these national honor societies. These societies encourage superior scholastic attainment among students in their first year at institutions of higher education.

**Alpha Zeta—Agriculture**
Meetings are held to foster high standards of scholarship, character, and leadership.

**Omega Chi Epsilon—Chemical Engineering**
Membership is open to chemical engineering students in chemical engineering.

**National Society of Collegiate Scholars**
The purpose is to recognize and celebrate high achievement in all academic disciplines, to provide opportunities for personal growth and leadership development, and to organize and encourage learning opportunities through community service.

**Omega Chi Epsilon—Chemical Engineering**
Membership is open to chemical engineering students in chemical engineering.

**Order of Omega—Fraternity and Sorority Honorary**
A national Greek honorary, the Order of Omega was founded at Iowa State in 1957. Criteria for membership include character; scholarship; leadership; and community service. Membership is limited to junior and senior students who comprise one percent of the Greek population.
Phi Alpha Theta—History
Students who have a B average in at least 15 hours of history are eligible for membership. The local branch sponsors social activities, co-sponsors prizes for undergraduate essays in history, and encourages students’ participation in state wide, regional, and national Phi Alpha Theta conferences.

Phi Beta Delta, Alpha Delta Chapter
The honor society recognizes and encourages high professional, intellectual and personal achievements in the field of international education.

Phi Beta Kappa—Liberal Arts and Sciences
Phi Beta Kappa is a national honorary society, founded in 1776 “to recognize and encourage scholarship, friendship, and cultural interests.” Membership is by invitation to students enrolled in the LAS curriculum. To be eligible, juniors must have at least a 3.80 cumulative grade point average and seniors, at least a 3.60 average. Other criteria for membership include requirements in the mathematical disciplines and a foreign language.

Phi Kappa Phi—All University
This national honor society recognizes and encourages superior scholarship in all academic disciplines. Membership is open to qualified undergraduates and graduates by invitation and occasionally to faculty and alumni.

Phi Upsilon Omicron—Family and Consumer Sciences
Members are selected from junior and senior family and consumer sciences students who have demonstrated academic excellence and professional leadership qualities. Membership is a means of furthering professional goals. Outstanding graduate students are also eligible for selection.

Pi Mu Epsilon—Mathematics
Pi Mu Epsilon is the national mathematics honorary society whose purpose is the promotion of scholarly activity in mathematics among students and staff. Members are students and faculty who have completed at least two years of college-level mathematics with honor (at least 3.33 GPA) and have maintained an overall GPA of at least 3.0.

Pi Sigma Alpha—Political Science
Pi Sigma Alpha is the national honor political science honor society.

Pi Tau Sigma—Mechanical Engineering
Members are juniors and seniors in the upper ranks of their classes in mechanical engineering. Meetings and social functions are held to recognize and encourage outstanding scholastic achievement.

Psi Chi—Psychology
This national honor society in psychology recognizes and honors individuals maintaining high scholarship and documented interest in psychology.

Sigma Delta Pi—Spanish
Honor society for high-achieving students of the Spanish language at Iowa State University.

Sigma Gamma Tau—Aerospace Engineering
Sigma Gamma Tau is the national honorary for aerospace-aeronautical engineering students who have displayed outstanding scholarship, leadership, and personal characteristics. Members are selected from the upper fourth of the junior class and upper third of the senior class who have maintained a 3.00 or better cumulative grade point average.

Sigma Lambda Chi—Construction Engineering
The purpose is the recognition of outstanding students in construction engineering. Upper-class students in construction engineering may be initiated into the society providing they have an overall scholastic average in the upper 20 percent of their class.

Sigma Phi Omega, chapter Alpha Omega—Gerontology
National academic honor and professional society that recognizes excellence in the study of gerontology/aging, and serves as a link between gerontology educators, alumni, and local professionals. The mission of SPO is to promote scholarship, professionalism, friendship, and services to older persons, and to recognize exemplary attainment in gerontology/aging studies and related fields.

Sigma Tau Delta—English
An international English honor society, the purpose of this honorary is to confer distinction upon outstanding students of the English language and literature in undergraduate, graduate, and professional studies.

Sigma Xi—Research
Sigma Xi, the scientific research society, is a broad-based scientific honor society with over 500 chapters and clubs at universities and nonacademic scientific institutions. Sigma Xi awards associate membership to undergraduates and graduate students who have demonstrated research potential through participation in an original scientific research activity. Full membership in Sigma Xi recognizes a significant scientific research contribution.

Tau Beta Pi—Engineering
Tau Beta Pi honors engineering undergraduates, graduate students, and outstanding alumni who have distinguished themselves in scholarship and by exemplary character. Members are selected from engineering juniors in the upper eighth and seniors and graduate students in the upper fifth of their classes.

Upsilon Pi Epsilon—Computer Science
An honor society for computer science students.

Xi Sigma Pi—Forestry
An honor society that recognizes outstanding juniors, seniors, graduate students and faculty members in forestry. The objective is to encourage high professional standards in the profession of forestry and to promote fraternal relationships among foresters.
Distance Education

Iowa State University remains true to the land-grant tradition of extending knowledge far beyond campus borders. Faculty members provide cutting-edge information that helps people continue to learn and meet the demands of careers and society. Annually thousands of students enroll in Iowa State courses without setting foot in Ames. In addition to the traditional method of instructors traveling to classrooms off campus, Iowa State University faculty teach distance learning courses online, by video conferencing, streaming media, CD, and on the Iowa Communications Network (ICN).

Courses are the same as those offered on campus, carry residential credit, and are taught by Iowa State faculty. Credit earned becomes a part of the academic record at Iowa State University and may be used to meet degree requirements the same as credit earned on campus.

College distance education staff provides leadership in helping faculty identify the needs of Iowans and methods to reach adult learners. They also help students access services and information at the university.

For a list of courses and programs, visit www.distance.iastate.edu. Information on registering for distance education courses is available from the web site or from the Office of Registrar at 515-294-1889 (8am-4pm CT).

Certificate and Degree Programs Offered through Distance Education

College of Agriculture and Life Sciences

The College of Agriculture and Life Sciences Distance Education at Iowa State University provides the flexibility to enhance your career through online learning. Online courses and graduate programs allow you to remain at your present job and location while continuing your education and advancing in your field. You learn at a premier university from the most respected professors in their field through web-based interaction, streaming media or CD-ROM.

For more information contact College of Agriculture and Life Sciences distance education staff by email at agdecontact@iastate.edu or call (515) 294-7656 or (800) 747-4478.

Master of Agriculture
via Web-based interaction, streaming media or CD-ROM

This program is the oldest on-line degree program in the College of Agriculture and Life Sciences. The goal of this program is to prepare individuals for proactive roles in addressing and responding to personal, professional, and societal issues and challenges in a changing food, agriculture and natural resources system through education and outreach in public and private agencies, and through training and development in business and industry. The intent of the program is to enable individuals to grow and develop as professionals, positioning themselves for emerging opportunities within or outside of their current employment.

This is a broad-based agricultural degree which includes courses in animal sciences, plant sciences, agricultural economics, agricultural education, research design or statistics, and sociology. Up to 10 credits may be transferred into the program. The degree is 32 credits including a creative component project.

Students are accepted from any part of the United States and Canada. Call (800) 747-4478 to learn more.

For more information contact:
Wade Miller, Professor & Coordinator of PROAG Program
Department of Agricultural Education and Studies
217 Curtiss Hall, Iowa State University, Ames, Iowa 50011
(515) 294-0895 or e-mail: wmmiller@iastate.edu

Master of Science in Agricultural Education
via Web-based interaction, streaming media or CD-ROM

The program can be completed completely at a distance as there are no required on-campus courses or meetings. The program is designed for agriculture teachers in secondary and post-secondary settings, extension professionals, educators in public and private settings, and agricultural communicators. The flexibility of the program makes it possible for working professionals to obtain a master’s while continuing to meet personal and professional responsibilities.

The curriculum is 30 semester hours and is flexible allowing you to create a program best suited to your needs, interests, and aspirations. You may choose to earn a specialization in agricultural extension education. Fifteen credits of required courses include: Foundations of Agricultural Education (AgEdS 550), Program Development and Evaluation in Agricultural and Extension Education (AgEdS 524), Introduction to Learning Theory in Agricultural Education (AgEdS 533), Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources (AgEdS 520), and Introduction to Research in Agricultural Education (AgEdS 510). The curriculum also includes 13 credits of electives, 2 credits of creative component, and a final oral examination. Up to 8 credits may be transferred from another university. A thesis option is available if you wish to pursue a Ph.D. or a research-oriented career.

Students are accepted from any part of the United States and Canada. Call (800) 747-4478 to learn more about the program.

For more information contact:
Greg Miller, Professor & Director of Graduate Education
Department of Agricultural Education and Studies
217 Curtiss Hall, Iowa State University, Ames, Iowa 50011
(515) 294-2583 or e-mail: gsmiller@iastate.edu

Master of Science in Agronomy
via Web-based interaction, streaming media or CD-ROM

Designed for professionals who are working in industry and government. The degree ensures you have an advanced knowledge of agronomic systems and superior problem-solving skills. The program emphasizes practical, professional, and technical skills involved in crop management, soil and water management, and integrated pest management.

The curriculum consists of 12 courses plus a one-credit workshop and a three-credit creative component, for a total of 40 credits. The workshop is the only course that requires attendance on campus—three or four days one summer. The course prerequisites for admission to the program are limited to fundamental agriculture courses, recognizing that many potential students will not have majored in agronomy as undergraduates.

Generally, students who have completed a degree from a College of Agriculture and Life Sciences will meet the requirements. Call (866) MSAGRON to learn more about the program.

For more information contact:
Jesse Drew, Department of Agronomy
2206 Agronomy, Iowa State University, Ames, Iowa 50011
(515) 294-2999 or e-mail: jd250@iastate.edu

Graduate Certificate in Food Safety and Defense
via Web-based interaction, streaming media or CD/DVD-ROM

The Food Safety & Defense Graduate Certificate Program is an inter-institutional certificate program offered in cooperation with Kansas State University Food Science Institute, University of Nebraska-Lincoln Food Science, and University of Missouri Food Science programs. These universities have established a multi-state agricultural consortium to develop and deliver high-priority collaborative distance education programs in the food and agricultural sciences. To find out more information about the online community development master’s degree program, please visit www.fshn.hs.iastate.edu/grad/foodsafetycert.php.

For more information contact:
Suzanne Hendrich, Professor
220 MacKay, Iowa State University, Ames, Iowa 50011
(515) 294-4272 or e-mail: shendric@iastate.edu
College of Engineering

Engineering Distance Education (EDE) and the College of Engineering have provided distance education since 1968. In 1969, Iowa State University received the National Extension Program Award for pioneering video based continuing education to working engineers. EDE offers streaming media based educational content accessible to anyone with a computer and connection to the Internet. For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Master of Science in Mechanical Engineering via streaming media

The mechanical engineering graduate program offers internationally acclaimed research programs in biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization. A student may apply instrumentation design of experiments, and computational methods to any of these areas. The program is 30 credits and has a thesis and non-thesis option.

Our research and graduate programs are built upon a strong foundation comprising the core of mechanical engineering—thermal-fluid sciences, design and manufacturing, materials and mechanics, dynamic systems, and control. Our faculty members are experienced researchers and educators who are grounded in these fundamental disciplines and focused on solving timely problems that address important national and global societal needs.

Graduate Certificate in Power Systems Engineering via streaming media

Iowa State University has a long-standing international reputation for education and research in electric power engineering. The electrical and computer engineering department designed the 12-credit graduate certificate for power engineering specialists in government, private sector, and academia.

Upon completion of the program, power engineering specialists will be proficient in theory and modeling plus have the tools to perform engineering tasks related to planning and operating electric power generation, transmission, and distribution systems, plus knowledge of related public policy.

Master of Engineering in Systems Engineering via streaming media

The systems engineering program develops the management capabilities needed in today’s work environment. Engineers, regardless of undergraduate discipline, develop the analytical abilities needed to design, evaluate, and build complex systems involving many components and demanding specifications. The degree is 30 credits, typically including 24 credits of engineering courses distributed among three broad groups (systems engineering core courses, elective engineering courses, and area of specialization courses), and 6 credits of elective non-engineering courses.

Graduate Certificate in Systems Engineering via streaming media

Certificate in Systems Engineering: The systems engineering certificate program develops the management capabilities needed in today’s work environment. Engineers, regardless of undergraduate discipline, develop the analytical abilities needed to design, evaluate, and build complex systems involving many components and demanding specifications. The certificate is 13 credits consisting of two basic courses in systems engineering, a course in requirements development, a course in project management and a one-credit capstone project.

Master of Science in Civil Engineering specializing in Construction Engineering and Management via streaming media

Construction Engineering and Management specialty provides a unique blend of technical and management education that will help you solve problems and compete in the ever-changing construction environment. The program focuses on the three functional areas of construction engineering and management: management techniques, construction operations, and construction methods.

The degree requires thirty credits. Fifteen credits are selected from the construction engineering and management specialty. With the remaining credits, students may explore related engineering, business, architecture and planning topics. Students will execute a two to four credit creative component related to their professional interest. Up to nine credits may be transferred with approval of the students plan of study committee.

College of Human Sciences

Master of Education or Science Principal licensure

Preparation for Leadership (PreLEAD) via a combination of methods at various sites around the state with some work online and via the Iowa Communications Network (ICN)

A master's program of 36 credits leads to licensing as a school administrator. Courses are structured to build leadership skills in organizational processes, scope and framework of schools, and interpersonal dimensions. Students are paired with practicing administrators, experiencing leadership roles firsthand. For more information, send an e-mail to educadmin@iastate.edu or call (515) 294-9734.

Doctor of Philosophy Superintendent licensure (Certificate of Advanced Studies) via a combination including online, the Iowa Communications Network (ICN) and video conferencing

A post master’s curriculum of 30 credits provides training for the school superintendent license. The program emphasizes leadership skills, child and adolescent development, curriculum and instruction, school law and ethics, resource management, community relationships, and data-driven decision making. For more information, send an e-mail to educadmin@iastate.edu or call (515) 294-9734.
Master of Education with specialization in curriculum and instructional technology
via blend of online and on campus

Designed to meet the needs of K-12 teachers and other educational practitioners, the three-year program is 32 credits offered in a learning community environment. The program is designed for those who want to earn a master’s and are seeking leadership positions for infusing technology into teaching and learning environments. For more information, send an e-mail to citmed@iastate.edu or call (515) 294-5296.

Master of Family and Consumer Sciences
online

Delivered off-campus since 1994, the non-thesis master’s is designed for working professionals to enhance skills in a current position and increase chances for promotion. The comprehensive degree requires a minimum of 18-21 credits from two or more family and consumer sciences departments. With electives, the degree program totals 36 credits. For more information, send an e-mail to mfcsinfo@iastate.edu or call (515) 294-0211 or (877) 891-5349.

Master of Family and Consumer Sciences with specialization in Dietetics
online

Dietetics is the study of nutrition and how food impacts our health and well-being. Dietitians work in a variety of settings including hospitals, businesses, community health and wellness areas.

The program is inter-institutional and is designed for the Registered Dietitian. Topics include nutrition across the lifespan, nutrigenomics, medical nutrition therapy, business and management, and professional leadership. The 36-credit master’s program includes 15 elective credits to tailor the program. For more information, send an e-mail to mfcsinfo@iastate.edu or call (515) 294-5186 or (877) 891-5349.

Leadership Academies
via blend of online and several intensive summer weeks on campus

Master of Science or Master of Education or Doctor of Philosophy in Family and Consumer Sciences Education
The leadership academy for a longstanding, prestigious graduate program was begun in 2002. Visiting professors from across North America teach. Either master’s degree is 30 credits. The doctorate is 72 credits. For more information, send an e-mail to jsneed@iastate.edu or call (515) 294-5307 or (877) 891-5349.

Doctor of Philosophy in Foodservice and Lodging Management
The Child Nutrition Program Leadership Academy is a new delivery format for the long-standing and prestigious graduate program in Foodservice and Lodging Management (formerly Hotel, Restaurant, and Institution Management). The Leadership Academy is designed to meet the needs of professionals employed in the school foodservice industry. The doctorate is 78 credits; up to 30 credits may be accepted from a master’s degree.

For more information, send an e-mail to jsneed@iastate.edu or call (515) 294-5474.

College of Business
Master of Business Administration in Des Moines
Students progress through the core curriculum in a cohort, allowing camaraderie with colleagues from a variety of businesses and industries.

The program is 48 credits. The first four semesters help build a strong foundation of core business knowledge; the final four semesters are tailored to academic and career goals. Students may concentrate on a general management MBA or specialize in finance, information systems, or marketing. A double degree, MBA and Master of Science in Information Systems, is also offered. For more information, send an e-mail to busgrad@iastate.edu or call (515) 294-8118 or (877) 478-4622.

College of Education
Graduate Certificate in Gerontology
Graduate Certificate in Gerontology online

Gerontology is the multidisciplinary study of the aging processes and individuals as they grow from middle age through later life. People enter gerontology from many areas such as social work, nursing, counseling, recreation, public policy, long-term care administration, medicine, architecture, psychology, adult education, and rehabilitation therapy.

The program is inter-institutional. Topics include adult development, family relations, economics and public policy, environmental considerations, and health and nutrition. The 36-credit master’s program includes 12 elective credits to tailor the program. The certificate is 21 credits. For more information, send an e-mail to mfcsinfo@iastate.edu or call (515) 294-5186 or (877) 891-5349.

Master of Public Administration
Graduate Certificate of Public Management
via distance learning

Prepare for public service leadership in public administration, whether with government, nonprofit agencies, or private organizations working with governments. The public administration programs are designed to prepare or improve the performance level of mid-career public managers and administrators.

Iowa State’s Master of Public Administration is accredited by the National Association of Schools of Public Affairs and Administration. This degree program requires 37 credits. Select an area of concentration from e-Government and management of information technology, public management, and policy analysis. The certificate requires 15 graduate credits. For more information, send an e-mail to mpa@iastate.edu or call (515) 294-3764.

Master of School Mathematics
via distance learning

This program, administered by the Department of Mathematics, is designed for secondary mathematics teachers. The degree is built on three objectives: enhanced knowledge of algebra, geometry, calculus, statistics, and discrete mathematics; effective strategies for creating a student-centered classroom emphasizing problem solving; and computing technology in learning and teaching mathematics.

The program requires 33 credits and includes a creative component. For more information, send an e-mail to msm@math.iastate.edu or call (515) 294-0393.

Master of Science in Statistics
via distance learning

The Department of Statistics offers courses and the degree to employees of companies who sign a letter of agreement with Iowa State. The degree is the same as on campus; the program requirements are the same including the written master’s exam, creative component, and a final oral exam. For more information, send an e-mail to statistics@iastate.edu or call (515) 294-3440.
Interdisciplinary – Multiple Colleges

Graduate Certificate in Biorenewable Resources
via streaming media

Through a series of twelve credit hours of graduate coursework, the Biorenewable Resources and Technology certificate will offer students from a wide variety of science and engineering backgrounds an exposure to advanced study in the use of plant- and crop-based resources for the production of biobased products, including fuels, chemicals, materials, and energy. The program aims to train professionals to serve the emerging bioeconomy, and in so doing to serve state, national, and global needs in moving toward a more sustainable industrial economy.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Master of Science in Biorenewable Resources
via streaming media

Iowa State University recently established the first graduate program in biorenewable resources and technology in the United States; and is happy to announce that the Masters Program is now 100% online! The Biorenewable Resources and Technology program offers students from a wide variety of science and engineering backgrounds advanced study in the use of plant- and crop-based resources for the production of biobased products, including fuels, chemicals, materials, and energy.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Graduate Certificate in Human Computer Interaction
via streaming media

Human computer interaction is the interdisciplinary study of the relationship between humans and increasingly powerful, yet portable computers. The accelerating integration of technology into every aspect of society demands professionals who employ novel solutions needed to integrate usefulness and usability while minimizing intrusiveness.

The curriculum in human computer interaction provides an understanding of emerging interface technologies; explores human cognition, behavioral methods, and usability techniques; and highlights the latest research. The interdisciplinary program draws courses from industrial, computer, and mechanical engineering; psychology; computer science; and management information systems among other disciplines. The certificate program is 12 credits, which includes four graduate courses.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Master of Science in Human Computer Interaction
via streaming media

The accelerating integration of technology into every aspect of society will demand professionals trained with information technology skills that are augmented by an understanding of the human user. This interdisciplinary degree program was created from the growing demand from business and industry for a masters program that provides education in the field of Human Computer Interaction. The curriculum in human computer interaction is very flexible. Students are required to take three core courses and elective courses from disciplines of their interest. The program consists of 27 credits of coursework plus 3 credit Capstone Course. The Capstone Course project will use the knowledge gained from the course work to demonstrate that the student has mastered important HCI related skills.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Master of Science in Information Assurance
Graduate Certificate in Information Assurance
via streaming media

Faculty members from six academic departments contribute to securing information in application areas ranging from software to networks to electronic democracy. Computer engineering is the home department for the distance learning graduate programs which meet the needs of information system security specialists in government, the private sector, and educational institutions. The master’s program is 30 credits. The certificate is four computer engineering courses.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Master of Science in Interdisciplinary Studies, Community Development specialization
via Web-based interaction, streaming media or CD/DVD-ROM

Global economic restructuring and the devolution of government services have created significant challenges for communities, particularly those in rural areas. This specialization in community development provides the skills, information, and networks to facilitate sustainable and prosperous community change. The program is designed for those seeking a career in community development and practitioners who wish to augment their training.

In 2005 Iowa State joined five other universities to offer a master’s in community development. The 36-credit program has three tracks: natural resource management, working with native communities, and building economic capacity.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Continuing Education and Professional Development

The mission of Continuing Education and Professional Development (CEPD) is to provide high-quality continuing education and lifelong learning opportunities for professional development, personal enrichment, career transitions, and academic growth.

CEPD supports Iowa State University’s outreach mission and to facilitate access to excellence in education for a diverse community of adult learners within Iowa and beyond by utilizing technologies that expand access.

CEPD offers both Continuing Education Units (CEUs) and non-CEU courses, workshops, conferences and other educational activities sponsored by Iowa State University. While these programs do not carry academic credits, they are designed to ensure that a student’s continuing education and professional needs are met.

For a list of courses and programs, or to request specific courses and programs, visit cepd.iastate.edu, or call (515) 294-6222. Information also is available at the Iowa State University Extension offices across the state.

Distance Education

Coordinated by the College of Agriculture and Life Sciences.

For more information contact:
Cornelia Flora, Professor
102a Seed Science Building
Iowa State University
Ames, Iowa 50011
(515) 294-1329 or e-mail: cflora@iastate.edu

Master of Science in Seed Technology and Business
via Web-based interaction, streaming media or CD-ROM

The program is specifically oriented to prepare students for management roles. Designed for professionals working in industry and government, the degree ensures an advanced knowledge of seed science, technology and basic business and problem-solving skills. It emphasizes decision making for application to practical and technical issues in all aspects of the seed business.

The curriculum consists of 15 courses and a three or four-credit creative component. The program is a non-thesis degree. The admission requirements are a four year degree in either agriculture or business; graduation in the top quarter of your class; and GRE (V) 500 or better, GRE (Q) 570 or better, GRE (V) 500 or better or GMAT 570 or better. Appropriate four year degrees in biological sciences or related fields may also be accepted.

Coordinated by the College of Agriculture and Life Sciences.

For more information:
Paul Christensen, Manager Seed Technology and Business Program
102a Seed Science Building
Iowa State University
Ames, Iowa 50011-3228
(515) 294-8745 or e-mail: seedsci@iastate.edu

The mission of Continuing Education and Professional Development (CEPD) is to provide high-quality continuing education and lifelong learning opportunities for professional development, personal enrichment, career transitions, and academic growth.

The program aims to train professionals to serve the emerging bioeconomy, and in so doing to serve state, national, and global needs in moving toward a more sustainable industrial economy.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

The curriculum in human computer interaction provides an understanding of emerging interface technologies; explores human cognition, behavioral methods, and usability techniques; and highlights the latest research. The interdisciplinary program draws courses from industrial, computer, and mechanical engineering; psychology; computer science; and management information systems among other disciplines. The certificate program is 12 credits, which includes four graduate courses.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

The accelerating integration of technology into every aspect of society will demand professionals trained with information technology skills that are augmented by an understanding of the human user. This interdisciplinary degree program was created from the growing demand from business and industry for a masters program that provides education in the field of Human Computer Interaction. The curriculum in human computer interaction is very flexible. Students are required to take three core courses and elective courses from disciplines of their interest. The program consists of 27 credits of coursework plus 3 credit Capstone Course. The Capstone Course project will use the knowledge gained from the course work to demonstrate that the student has mastered important HCI related skills.

Coordinated by College of Engineering; For more information, send an e-mail to ede@iastate.edu or call (515) 294-7470 or (800) 854-1675.

Research and Extension

Research
Research is an important activity at Iowa State University. Faculty members engage in research pursuits as well as teaching. Graduate students, and in some cases undergraduates, play an active part in this search for new knowledge.

Support for research at Iowa State University comes from state and federal appropriations as well as from contracts and grants involving the federal government and nonfederal organizations. As part of its total program, the university also operates extension services, special laboratories, centers, and institutes.

Official Research, Outreach, and/or Instructional Centers and Institutes at ISU as Recognized by the Board of Regents, State of Iowa, are listed at http://www.vpresearch.iastate.edu/docs/centers.pdf. Additional information concerning any of these organizations and student research opportunities they support may be obtained from their administrative offices.

Iowa State University Extension
Iowa State University Extension builds partnerships and provides research-based learning opportunities to improve quality of life in Iowa. ISU Extension continues to lead the university-wide effort to engage Iowans with education and information about their issues and priorities for healthy people, healthy environments, and healthy economies.

Iowa State University is the state's land-grant institution with the mission of creating, sharing, and applying knowledge. Historically, ISU Extension has led the university in its formal engagement mission to Iowans. With an active partnership and presence in every county, ISU Extension engages the people of Iowa with education and information in the following areas:

Agriculture and Natural Resources. ISU Extension provides unbiased, research-based information and education to agricultural professionals to grow the economic base of Iowa agriculture.

Business and Industry. Extension's Center for Industrial Research and Service (CIRAS) enhances the performance of Iowa business and industry through research, education, and technical assistance.

Community and Economic Development. ISU Extension helps organizations and local governments make Iowa communities better places to live and work, with programs and services in community leadership, management, and policy and design development.

Families. ISU Extension reaches out to families across the lifespan, providing research-based information and education to help families make decisions that improve and transform their lives.

4-H Youth Development. ISU Extension helps kids and teens develop communication skills, give back to their communities, and learn to be leaders for Iowa’s future.

Continuing and Distance Education. Through Continuing Education and Professional Development (CEPD), ISU Extension provides high-quality continuing education and lifelong learning opportunities for professional development, personal enrichment, career transitions, and academic growth.
Academic Advising
Academic advising is an intentional, collaborative relationship based on trust and mutual respect that promotes the student’s development of competence, autonomy, and sound decision making skills. Adviser-student interactions are grounded in teaching and learning and are vital in promoting student growth and personal development through learning, discovery, and engagement. Academic advising supports the mission of the University.

Academic Advising Process
All undergraduate students are assigned an academic adviser based on their major/curriculum. A new adviser assignment is made when a student changes majors/curricula. Advisers serve as a primary resource for students, connecting them with the wide variety of services and academic opportunities available to them. The advising experience begins during the prospective student stage and continues through graduation. The goal of academic advising is an individualized academic experience for each student developed through a mentoring relationship.

Academic Advising Responsibilities
A successful academic advising relationship involves fulfillment of responsibilities on the part of both the student and the academic adviser.

Student responsibilities include:
- knowing Iowa State University policies and procedures
- knowing graduation requirements for degree program
- understanding and accepting the consequences of their academic decisions
- seeking, evaluating, and acting upon advising assistance
- taking responsibility for accomplishing his/her degree plan

Academic Adviser responsibilities include:
- assisting students in achieving the learning outcomes of their academic program, their college, and the university
- referring students to appropriate campus resources
- empowering students to develop an academic plan appropriate to the student’s abilities, interests, academic and career goals
- communicating university policies and procedures accurately

Learning Communities
www.lc.iastate.edu
Learning communities are a university-wide initiative providing students the opportunity to connect with peers who have similar academic goals. Students in learning communities typically take one to three courses together and may live together (or near each other) in the same residence hall. Although many of the learning communities are focused on first-year students, opportunities are available for sophomores, juniors, and transfer students.

In addition to developing academic and social networks, advantages of joining a learning community include: getting to know people and making friends in your major or area of interest, getting to know faculty and staff members, making a smooth transition from high school to college, making connections between in-class and out-of-class learning, applying classroom learning to real world situations through hands-on experiences, exploring career opportunities, and having fun! Most learning communities employ an upper-division student as a peer mentor who organizes various activities for the students, ranging from study groups to social events. We have found that students in learning communities are more satisfied with their overall experience at Iowa State, earn higher first-term grades, are more likely to remain enrolled at Iowa State after one year, and are more likely to graduate.

First-year students are offered the opportunity to sign up for learning community courses during summer orientation. For learning communities that offer a residential living environment the sign up takes place online with the housing contract.

Any student interested in joining a learning community should contact the learning community coordinator for more information. A list of coordinators, along with current opportunities, can be found at www.lc.iastate.edu.

AccessPlus Information System
accessplus.iastate.edu
AccessPlus is a secure and confidential campus information system that is available via the World Wide Web. Students, employees, and affiliates view personalized menus from campus and home workstations. For public convenience, AccessPlus stations are available in the Memorial Union and at the Visitor Information Center. Students can use AccessPlus to register for classes, view and print current term schedules, view class meeting rooms, class instructors, academic records, final grades, financial aid status, current university bill, academic adviser assignment and projected date of graduation. University employees use the system to view personal information such as pay history and insurance. Some employees also perform business-related functions. Information about and access to AccessPlus may be found at www.iastate.edu/~registrar/info/access.html or accessplus.iastate.edu.

Third Party Access on AccessPlus
Third party access is an option in AccessPlus that allows students to grant access to selected personal information to a trusted third party. For example, Third Party Access allows a student to set up a special account for a parent or family member to view their grades and/or pay their university bill. More information on creating third party accounts is available from Help after signing onto AccessPlus at https://accessplus.iastate.edu/frontdoor/tpa-info.jsp

Policies for Graduate Students
The Graduate College has specific policies approved by the Graduate College body. The Graduate College Handbook is the official source for all policies related to graduate students. See http://www.grad-college.iastate.edu/publications/gchandbook/ for the latest updated information.

Scholastic Recognition
The university recognizes those students who are doing exceptionally well in several ways, including the following.

1. Dean’s List. Each semester the university issues a dean’s list made up of those students who have carried at least 12 hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-hour requirement. No dean’s list is issued for summer school. The list can be viewed at http://www.iastate.edu/~registrar/info/deanslist.pdf

2. Annual Scholars and Leaders Ceremony. In the spring the university sponsors a ceremony at which exemplary student leaders and high scholarship students in all classes are recognized.

3. Graduation with Distinction. Undergraduate students who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are eligible to graduate “with distinction” provided they have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits. Students who graduate with a cumulative grade point average of 3.90 or higher will graduate Summa Cum Laude; those who graduate with a cumulative grade point average of 3.70 to 3.89 will graduate Magna Cum Laude; and those who graduate with a cumulative grade point average of 3.50 to 3.69 will graduate Cum Laude. This recognition appears on the student’s official transcript and diploma and in the commencement program.

Candidates for the bachelor of liberal studies degree may be graduated with distinction providing that they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.
Academic Life

4. Honors Program. Students who are full members of the University Honors Program have a cumulative grade point average of 3.35 or higher at the beginning of their final term. In addition, they will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student’s permanent record and diploma, and in the commencement program.

Academic Privileges and Opportunities

Credit by Examination

Academic credit may be earned by means of special examinations. The Credit by Examination (CBE) program is available to current Iowa State students as well as prospective and entering students. Students with college-level proficiency in particular areas are encouraged to investigate credit by examination early in their college careers. For more information, see Index, Credit by Examination.

Pass-Not Pass Grading

Students may choose to take a maximum of 9 semester credit hours on a Pass-Not Pass basis, meaning that only a P or NP will be recorded as their final grade in the course. The purpose of P-NP grading is to encourage students to broaden their education by taking courses outside the usual program of study for their major and minor disciplines. The following policies apply:

1. Undergraduate students who have earned at least 40 semester credits and who are not on academic probation (P) at the beginning of the semester are eligible. A special student must obtain approval from their academic adviser and college dean.

2. Only elective courses may be taken on a P-NP basis. In specific majors, some restrictions may apply, so students should consult with their academic adviser.

3. Except for restrictions on its own undergraduate majors, a department may not deny the availability of any of its course offerings on a P-NP basis.

4. Courses offered on a satisfactory-fail basis may not be taken P-NP.

5. Students should register for a P-NP course in the same manner and at the same time that they register for their other courses. Students should then change to P-NP by processing a schedule change form with their academic adviser’s signature in the P-NP approval section of the form.

6. Students who elect to change back to a graded basis should process the change using the P-NP section of the schedule change form.

7. Changes to or from a P-NP basis must be made before the last day to drop (usually the Friday of week 10 of the term). If the change from P-NP to a graded basis is made after the first 10 class days of a semester (first five days of summer session), the course will count toward the total P-NP credits allowed.

8. Registration on a P-NP basis is not indicated on the instructor’s class list. Students will receive a P if their grade is D minus or better and an NP if their grade was F.

9. Neither P (earned grade of D minus or better) nor NP (earned grade of F) is counted in calculating a student’s grade point average (GPA).

10. Students who pass a course taken under the P-NP system may not repeat the course. When students have taken a course and received a grade, they may not repeat it for P-NP credit.

11. When students change their curriculum, any P credits that they have accumulated will be accepted by the new department if such credits are in courses normally accepted by the department.

12. Credits taken on a P-NP basis at another institution and transferred to Iowa State may be applied as electives in a student’s degree program if the credits are otherwise acceptable in that program. The number of P-NP transfer credits that can be accepted depends on the number permitted by the institution from which the student is transferring. If a student transfers more than nine semester P-NP credits, no additional Iowa State P-NP credits can be applied to the student’s degree program.

Auditing

To audit a course means to enroll in the course without receiving credit for the course. The instructor of the course approves the audit request.

Students are assessed fees as though they are taking the course for credit, but the audited course does not count in determining full-time student status. However, an audited course does count towards the maximum allowable credits per semester. Audited courses do not apply toward VA benefits.

Graduate students: An audited course counts as one credit in the graduate student’s allowable course load; however, fees will be assessed for the full number of credits for the course. See Index, Graduate College.

Changing status to audit: Changing a course from credit to audit requires dropping the course for credit and adding it as an audit on a schedule change request form. After day 5 of the semester, the drop will count toward the total allowable ISU drops. The drop appears on the student’s permanent record except by special request from the student. The request form can be downloaded from the Office of the Registrar web site at www.iastate.edu/~registrar/forms.

Undergraduate students need approval from the instructor as well as their advisor, and college; graduate students need approval from the instructor as well as their major professor and the Graduate College.

Audit Deadlines

In addition to the deadlines provided below, note that instructors must approve all audits.

• Full semester courses:
  Adding an audit—day 10 deadline:
  − Through day 5 of classes: instructor approval required.
  − Day 6-10: instructor, adviser approval required; schedule change fee applies.
  − After day 10: only with extenuating circumstances; instructor, adviser, college approval required; schedule change fee applies.

  Changing status, from credit to audit—day 10 deadline:
  − Through day 5 of classes: instructor approval required.
  − Day 6-10: instructor, adviser, college approval required; schedule change fee applies.
  − After day 10: only with extenuating circumstances; instructor, adviser, college approval required; schedule change fee applies.

• Partial semester or summer courses:
  Deadlines are determined based on the length of the course. For deadlines concerning partial term or summer courses, contact the Student Scheduling Office, 515-294-2331.

Independent Study

Most departments offer opportunities for independent study through a 490 course listing. Usually a minimum of 8 to 10 credits of coursework in the department is required before independent study is permitted. Students who are interested in this kind of experience in a particular department should check the catalog to determine the department’s prerequisites to register for 490. 490H sections are reserved for students in the University Honors Program.

Students should check with the department about procedures, in addition to meeting the prerequisites, for registering for 490. A written plan of study is prepared in advance with a faculty member who has agreed to supervise the student’s work, to evaluate progress and the final product, and to assign a grade. Initiation of the plan of study should occur prior to the semester in which enrollment is desired. Both the student and the instructor should agree on the number of credits for which the student will enroll, the amount and kind of work he or she will do for that credit, and the system by which she or he will be graded (A-F or S/F). Students should not expect to register for or add 490 credit without an instructor’s permission. Some colleges and/or departments have limits on the number of credits of 490 that may be applied toward graduation.
Progressing Toward a Degree

Classification

Classification (year in school) is determined by the number of credits completed and reported to the registrar, and is based on credit hours earned, not merely hours attempted. The grades F and NP and the marks I and X do not contribute toward credit hours earned and thus are not considered in determining year in school.

Classification in all colleges except Veterinary Medicine is as follows:

Sophomore: 30 credit hours earned
Junior: 60 credit hours earned
Senior: 90 credit hours earned

Students who have a bachelor’s degree and are working toward another undergraduate degree, licensure, or admission to a specific graduate or professional program, are typically classified as a senior.

Transfer students without a degree are classified on the basis of credits accepted by Iowa State University.

Veterinary medicine students are promoted from the first- to the second-, third-, and fourth-year classes based upon satisfactory completion of the required courses for each year. To be promoted to the second-year class, students must have a cumulative grade-point average of at least 1.67 for all courses in the first year of the veterinary medicine curriculum. To be promoted to the third- and fourth-year classes, students must have a cumulative grade point average of at least 2.00 for all courses in the professional curriculum.

A student who is attending Iowa State and decides not to work toward an undergraduate degree, will be classified as a special student. Admission requirements and academic standards regulations are the same as for regular students. Credits taken as a special student are applicable for undergraduate degree purposes if the student is admitted later as a regular undergraduate. Credits obtained as a special student may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as special students in the College of Liberal Arts and Sciences and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as regular students. Permission to enroll in one academic course may be granted under special circumstances.

Transfer of Credits

Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable for transfer credit. In addition, credits applied toward a particular degree will be determined by the student’s college, based on relevance to the students’ program requirements as well as the level of performance deemed necessary for successful progress in that program. For example, courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University and to new transfer students. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student’s Iowa State cumulative grade point average.

A student who is admitted as a transfer from another college or university is required to have at least a 2.00 cumulative grade-point average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student has a transfer quality-point deficiency. This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any quality-point deficiency, including a transfer quality-point deficiency.

Students should consult with their academic advisers and the Office of Admissions before taking coursework at other colleges and universities to be certain the credits will transfer and will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic adviser and with the Office of Admissions. Questions concerning how transfer credits are applied toward a degree program should be referred to the academic adviser and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits before receiving a degree from Iowa State University must be completed at Iowa State University.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average, even if the credits are included in the last 32 semester credits. For information on applying to the program see Index, Regent Universities Student Exchange Program.

Degree Planning - ISU Degree Audit

In addition to being properly registered, students are responsible for knowing the requirements for their degree and planning their schedule to meet those requirements. One way to monitor progress toward a degree is with the ISU degree audit.

Students may access their ISU degree audit through AccessPlus. The degree audit shows courses that have been completed, courses in which the student is currently enrolled, and graduation requirements that need to be completed for the student’s curriculum.

Academic Life

Students should use the degree audit information to help them review progress towards their degree(s), plan their course of study to complete degree requirements, and select courses for the next term. Graduation evaluators in the Office of the Registrar use the degree audit during the term a student will graduate to determine if the student will have completed all degree requirements upon successful completion of the courses on the student’s schedule that term.

In addition, through AccessPlus, students may request a “What If” degree audit for any major available at Iowa State. The audit results will show how their completed and in-progress courses apply toward other majors or options offered at the University.

For further information about how completed courses fulfill degree requirements or how other courses will apply toward their degree requirements, students should see their adviser.

Two Bachelor’s Degrees

Students may receive two bachelor’s degrees if the requirements for each major (curriculum) are met and the total number of semester credits earned is at least 30 more than the requirements of the curriculum requiring the greater number of credits. This rule applies whether or not the degrees are awarded at the same time. Students should have an academic adviser in each major (curriculum), with one adviser being designated as the registration adviser. Students should request approval to pursue two degrees by completing the form, Request for Double Major/Curriculum or Two Degrees. This form is available from advisers and classification offices. Each adviser will have access to the student’s information after this form has been processed. The appropriate department and college must approve each degree program.

Students who have earned advanced degrees and wish to earn a second Bachelor’s Degree may be eligible for a college waiver of certain basic and general education requirements. Students should contact the department offering the major for advice and appropriate planning.

Double Major/Curriculum

A double major is a program for a single degree in which all requirements for two or more majors (curricula) have been met. The majors (curricula) may be in different colleges or within the same college or department. The diploma and permanent record will designate all majors (curricula) that are completed at the same time.

To declare a double major (curriculum), students should complete the form, “Request for a Double Major/Curriculum or Two Degrees.” This form, available from advisers and classification offices, should be completed at least one term prior to graduation. One major (curriculum) should be designated as primary and the other secondary for purposes of record keeping, but the student’s rights and responsibilities are the same in both majors. The adviser of the primary major will serve as the student’s registration adviser, but both advisers will have
access to the student’s information. Degree programs must be approved for each major (curriculum) by the appropriate department and college. One of the majors may subsequently be canceled using the same form.

Students in the College of Engineering are able to earn a degree with a second major/curriculum as long as the second major/curriculum is within another college, meets all requirements of the additional programs and contains a minimum of 15 additional credits beyond the requirements for a B.S. degree in engineering for each additional area of study. A student with multiple curricula within the College of Engineering is permitted to earn only multiple degrees. All requirements for each curricula must be met plus an additional 30 credits for each curricula being pursued beyond the curriculum which requires the most credits.

Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education requirements. They must, however, meet all requirements for the major, including complementary courses. Students in the B.L.S. Curriculum in the College of Liberal Arts and Sciences do not have majors.

**Second Major (Curriculum) Completed after the Bachelor’s Degree**

After receiving a bachelor’s degree, a person may wish to complete all requirements for another major (curriculum). Approval of the department of the second major (curriculum) is needed before study for the program is begun. At the completion of the program a notation will be made on the permanent record (transcript), but no change will be made on the diploma received at the time of graduation. A degree program must be approved for the second major/curriculum by the department and by the dean’s office.

**Changing Curriculum or Major**

A student’s freedom to change their major, and the procedure that should be followed, depend on the student’s academic standing and on policies of individual colleges as approved by the provost.

1. If students are not on academic probation (P) and have never been dismissed and reinstated, they may change their major by consulting first with their adviser. If, however, they have been on academic probation in the past, they may also be subject to regulation 4, below. Beyond that, they should follow these procedures:
   a. If the change involves majors within the same college, they should check with the college office to obtain instructions as to how to make the change.
   b. If the change involves majors in different colleges, they should obtain a Change of Curriculum/Major form and their file from their adviser, present these materials to the student services office of their present college, then to the student services office of the college to which they are transferring, and finally to the office of their new major.

2. Students on academic probation (P) must first obtain permission to enter the new major. Permission comes from the dean of the college responsible for that major in consultation with the department head. If permission is granted, students should then follow the procedures described above. If they are on academic probation and want to transfer to another college in the university, they must do so before the last day to drop a course in period 2 (see Index, Making Schedule Changes).

3. Students who have been reinstated may not transfer to another college during the first term following reinstatement, and they may not at any time transfer back to the college that originally dismissed them without the permission of the academic standards committee of that college.

4. Students who transferred from one college to another while on academic probation, (P) may not transfer back unless they have the permission of the academic standards committee of the college from which they originally transferred.

**Declaring a Minor**

Many departments and programs in the university specify requirements for an undergraduate minor. A record of requirements completed appears on students’ transcripts. All minors require at least 15 credits, including at least 6 credits in courses numbered 300 or above taken at Iowa State. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass-not pass basis. For additional information regarding policies which govern minors, see Index, Minor. To declare a minor, students must submit a completed Request for a Minor form to their college office at least one term before graduation. The minor may be from the catalog under which the student is graduating or a later catalog.

**Undergraduate Certificates**

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major.

An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above
4. A student may not receive both an undergraduate major and a certificate of the same name
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree
6. A certificate is not awarded if the baccalaureate requirements are not finished
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate
8. Courses taken for a certificate may not be taken on a pass-not pass basis
9. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate
10. A notation of a completed certificate will be made on a student’s transcript

**Graduation**

Seniors must file a graduation application with the Graduation Office, 214 Enrollment Services Center, by the Friday of the first week of classes for students who plan to graduate in fall and spring semesters, and the last day of spring semester for students who plan to graduate in summer. Applications may be obtained from the adviser; college office; www.iastate.edu/~registrar/forms; the Student Answer Center, or the Graduation Office, 214 Enrollment Services Center. Students will be notified of their graduation status by mail approximately four weeks after the semester begins.

Individual college graduation activities take place at the end of fall and spring semesters. The formal commencement ceremonies are held at the end of the semester. For more information see www.iastate.edu/~registrar/graduation

Verification of satisfactory final grades will be completed approximately two weeks after the end of the semester and diplomas will be mailed to all successful degree candidates. Students must ensure the following before they can graduate:

1. Registration for the term has been completed and the date of graduation is correct on the degree audit printout.
2. Sufficient credits, acceptable toward graduation, have been earned to meet the minimum requirements for their curriculum. (Some examples of credit not acceptable toward graduation are: elective credits beyond those allowed in a curriculum, credits earned in passing the same course more than once, more than four credits of Athletics 101, and credit in two courses for which the catalog states that only one may count toward graduation.)
3. They have achieved a set of communication competencies established by the department as appropriate for the major.
4. A cumulative grade point average of at least 2.00 was earned in all work taken at Iowa State and have also met any special grade point averages required by their college, department, or program in specified groups of courses.
   a. Students admitted from another college or university with a quality-point deficiency, must have earned sufficient quality points above a 2.00 at Iowa State to offset their transfer grade point deficiency.
b. Students who have taken work at another college or university prior to or after having been a student at Iowa State, must have submitted a transcript of all such college study attempted to the Office of Admissions. This work must average 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such a transcript is grounds for dismissal.

5. Incompletes in courses required for graduation have been removed by midterm of the term of graduation.

6. At least 32 credits have been earned in residence at Iowa State University, and the final 32 credits were taken at Iowa State. (Six of the last 22 credits may be transferred to Iowa State, with prior permission of their major department.) Iowa State University must receive an official transcript of all transfer work by midterm of the term of graduation.

7. Outstanding financial obligations owed the university have been paid in full. Students who owe an outstanding obligation to the university will have a hold placed on their records and they will not receive their diploma or transcript. If students have questions about this policy, they should contact the graduation area of the Office of the Registrar.

Evaluation of Academic Progress

Evaluation Procedures

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later. Instructors leaving the university must file records of all graded work with their department office before departure.

Examinations

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students’ learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.

2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:

   a. The course is multi-sectioned.

   b. A common departmentally developed examination will be administered to all students in all sections at the same time.

   c. The test scores will be used as a basis for a uniform grading procedure for all sections of the course.

   d. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted.

   Students who are unable to take a separately scheduled examination at the scheduled time indicated in the Schedule of Classes, because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.

3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:

   a. Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.

   b. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.

4. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.

5. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.

6. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up examination times are available in one of the other courses.

7. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

Dead Week

The last week of fall and spring undergraduate classes has been designated Dead Week by the Government of the Student Body and Iowa State University. The intent is to provide students with time for review and preparation for final examinations. Therefore, no student organization registered with the Student Organization Office may hold meetings or sponsor events without the expressed permission of Program Coordinator in the Student Activities Center. Any academic programs, the last week of classes is considered to be a normal week in the semester except that in developing their syllabi faculty shall consider the following guidelines:

1. Mandatory final examinations in any course may not be given during Dead Week except for laboratory courses and for those classes meeting once a week only and for which there is no contact during the normal final exam week. Take-home final exams and small quizzes are generally acceptable. (For example, quizzes worth no more than 10 percent of the final grade and/or that cover no more than one-fourth of assigned reading material in the course could be given.)

2. Major course assignments should be assigned prior to Dead Week (major assignments include major research papers, projects, etc.). Any modifications to assignments should be made in a timely fashion to give students adequate time to complete the assignments.
3. Major course assignments should be due no later than the Friday prior to Dead Week. Exceptions include class presentations by students, semester-long projects such as a design project assignment in lieu of a final, and extensions of the deadline requested by individual students.

Instructors are reminded that most students are enrolled in several courses each semester, and widespread violation of these guidelines can cause student workloads to be excessive as students begin their preparation for final examinations. Students are reminded that their academic curriculum is their principal reason for being in college and they have a responsibility to study in a timely fashion throughout the entire semester.

**Grading System**

Grades represent the permanent official record of a student’s academic performance. The grading system at Iowa State operates according to the following regulations:

1. Student performance or status is recorded by the grades and marks described below. A student’s grade point average is calculated on the basis of credits earned at Iowa State with the grades and quality points shown below. Credits earned with P, S, or T are not used in calculating the grade point average but may be applied toward meeting degree requirements. A cumulative grade point average of 2.00 is required for a bachelor’s degree.

</table>

P—Passing mark obtained under the Pass-Not Pass system. See Index, Pass-Not Pass.

NP—Non-passing mark obtained under the Pass-Not Pass system. See Index, Pass-Not Pass.

I—Incomplete. An incomplete mark may be assigned when the student is passing at the time of the request, but special circumstances beyond the student’s control prevent completion of the course. In general, failing the final exam or project or not submitting course work as a result of inadequate preparation or learning are not valid excuses.

The student and instructor must complete and sign an incomplete contract (Incomplete Mark Report form) that states the reason for the I, the requirements for resolving it, and the date by which it must be resolved, not to exceed one calendar year. The instructor then submits an I for the final grade and sends the form to the Office of the Registrar. If the student is not available at the end of the term to sign the Incomplete Mark Report form because of ill health or other reasons, the instructor may assign an incomplete mark and submit the form without the student’s signature. The Office of the Registrar will record the incomplete mark and mail a copy of the form to the student.

If the student chooses not to accept the incomplete, the student has until midterm of the following semester to contact his or her instructor and request a grade be submitted to the registrar. If the student has not contacted the instructor by midterm, the student must resolve the incomplete according to the conditions set forth in the Incomplete Mark Report form.

When a student completes the requirements specified on the Incomplete Mark Report form, the instructor submits the appropriate grade, which becomes part of the student’s cumulative, but not term, grade-point average. The grade does not replace the I on the record. The I remains on the record for the applicable term.

A final course grade, once submitted to the registrar, may not be changed to an incomplete except to correct an error at the request of the instructor and with the approval of the instructor’s department head and the dean of the instructor’s college. The instructor should send a card (Grade Report to the Registrar) reporting the change, and an Incomplete Mark Report form to the appropriate dean who will forward them to the registrar if the change is approved.

Incompletes in all courses must be resolved by the middle of the student’s term of graduation. Repeating a course will not resolve an I mark. A mark of I will automatically change to a grade of F after one calendar year (whether or not the student was enrolled during the period).

2. To change a grade or mark already reported to the registrar, the instructor submits a change card (Grade Report to the Registrar). This card is used for resolving an I with a grade, for correcting an instructor error, or for the late report of a grade.

3. Midterm Grades. The registrar will collect C-, D, and F midterm grades and nonattendance notifications from the instructor and report this information to students and their advisors using AccessPlus. In addition to submitting the midterm grades, the instructor is responsible for informing the class of the basis on which they were calculated.

The purpose of midterm grades is to provide the student and adviser with a timely warning that the student’s academic performance to that point in the course may be lower than desirable. Students who receive midterms are encouraged to discuss their academic performance with the course instructor and their adviser.

4. Grades in all courses attempted remain on each student’s record. If a course is repeated, the record will show the grade obtained on the initial attempt as well as grades received on subsequent attempts. The cumulative grade point average is calculated by dividing the total number of quality points earned by the total number of credits in all courses attempted. Grades of S, P, NP, and T are not counted in calculating the grade point average. If a course is repeated, the cumulative grade point average is calculated according to the process described in item 6a below.

6. Repeating Courses.

a. The most recent grade for a course a student repeats will be used in computing the student’s cumulative grade point average rather than the previous grade(s), up to a limit of 15 credits. (This could result in a lowered grade point average if the second grade is lower than the first, or even loss of credit if the grade is lowered to an F.) All grades will remain on the student’s record.

b. Students may repeat any course for which an F grade or any passing grade except P or S was received, but they may not elect to repeat the course under the Pass-Not Pass system.

c. Beyond 15 credits of repeats, both grades will be included in computing the cumulative grade point average.

d. Courses should be repeated as soon as possible, preferably within three semesters in residence, because of changes that occur with course updating, change in course number, or revision in the number of credits.

e. Approval to repeat a course in which the course number or number of credits has changed must be noted on a Designation of Repeated Course form, which can be obtained from departmental offices. This form must be signed by the head of the department offering the course and by the student’s adviser, and then taken to the Office of the Registrar. Deadlines for filing repeated course forms for full-semester and half-semester courses are published in the university calendar.

f. Transfer students may repeat courses at Iowa State University for which a D or F was received at another institution. They must process a Designated Repeat Form indicating they are repeating the course to reduce a transfer deficiency. Such repeated credits will count toward the 15-credit request limit and will affect only their transfer deficiency.
Academic Progress

Each college has an academic standards committee that is responsible for monitoring the academic progress of all undergraduate students in that college, based on policies and minimum requirements set by the Faculty Senate Committee on Academic Standards and Admissions and ratified by the Faculty Senate. Individual college faculties, with the approval of the Faculty Senate Committee on Academic Standards and Admissions, set additional program admission and curriculum requirements that are more stringent than those established for the university. These additional requirements must be reviewed at least every third catalog by the college academic standards committee to determine if the requirements should be continued. Requirements approved by the college academic standards committees will then be forwarded to the Faculty Senate Committee on Academic Standards and Admissions for final approval.

The college committees are responsible for actions involving individual students with respect to placing students on academic probation, dismissing students from the university for unsatisfactory academic progress, and reinstating students who have been dismissed.

For questions concerning interpretation and application of the rules governing academic progress, students should contact the chair or secretary of their college academic standards committee in their college office.

The university’s academic standards rules are presented below. In addition to taking action based on these rules, a college academic standards committee may also place a student on academic probation or dismiss a student from enrollment in the university when, in the college committee’s judgment, the student’s academic performance or progress toward a degree is exceptionally deficient. Likewise, a college committee may, under exceptional circumstances, exempt individual students from the application of these rules. Students who participate in the Regent Universities Student Exchange Program, or in a similar program where the credit taken at the other school will be considered as resident credit and the grades included in the student’s ISU cumulative grade point average, are subject to Iowa State University’s academic standards.

Academic Probation Policy

Students are placed on academic probation status as a warning that their academic progress is not satisfactory and that they should take steps to improve their academic performance to avoid dismissal from the university. Students who are placed on academic probation should immediately seek assistance in academic improvement from such sources as academic advisors, instructors, the Student Counseling Service, and the Academic Success Center.

Academic Warning, Probation, and Dismissal

Continued enrollment at Iowa State University depends upon an undergraduate student maintaining satisfactory academic progress toward attaining a degree. To assist students in maintaining satisfactory progress, Iowa State University has adopted academic standards designed to provide early identification of students who are experiencing academic difficulty, and to provide timely intervention through academic advising and academic support programs.

Academic standing at Iowa State University is dependent upon the total number of credits a student has attempted or earned, the student’s semester grade point average (GPA), the student’s cumulative ISU GPA, and the student’s transfer GPA (if below 2.00.)

Academic Warning

While a warning (W) is the least severe of the negative academic actions, it serves as a reminder that future academic performance below 2.00 could result in more serious consequences. In fact, a student on warning whose subsequent term GPA is below a 2.00 will be placed on probation (P) the following term.

Students who receive an academic warning are required to develop a plan for academic improvement in consultation with their academic adviser or the Academic Success Center. A student who is subject to both academic warning and academic probation will be placed on academic probation. The academic warning is not a part of the student’s permanent academic record.

Students will receive an academic warning (W) at the end of any fall or spring semester when they earn a GPA of 1.00 – 1.99 for that semester. At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic warning status:

• Students will be placed on academic probation if they earn less than a 2.00 GPA for the next fall or spring semester, or

• They will be removed from warning status if they earn at least a 2.00 semester GPA for the next fall or spring semester and they are not subject to academic probation based on cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Probation

Academic probation is an indication of very serious academic difficulty which may result in dismissal from the university. Students may be placed on academic probation as a result of either semester GPA, cumulative GPA, or both.

Students who are placed on academic probation are required to develop a plan for academic improvement in consultation with their academic adviser which may include referral to the Academic Success Center. Academic probation status is not a part of the student’s permanent academic record.

Students will be placed on academic probation (P) at the end of a semester/term for either of the following two reasons:

1. Semester GPA: Students who earn less than a 1.00 at the end of any fall or spring semester, or less than a 2.00 two consecutive semesters, will be placed on academic probation. Students will not be placed on academic probation at the end of the summer term due to summer term GPA only.

2. Cumulative GPA: Students with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation at the end of any fall or spring semester or summer term when their cumulative GPA is less than 2.00. Students with 75 or more credits attempted or earned who have a transfer GPA < 2.00 will be placed on academic probation at the end of any fall or spring semester or summer term when their combined transfer/ISU cumulative GPA is less than 2.00.

At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic probation status:

• Students will be academically dismissed if they fail to earn at least a 2.00 semester GPA. At the end of any spring semester, students in dismissal status may enroll for summer term. (See Summer Option for Students in Dismissal Status in the Summer Academic Standards Regulations section.)

• Students will continue on academic probation if they earn at least a 2.00 semester GPA but are subject to continued academic probation based on their cumulative GPA (over 75 credits).

• Students will be removed from probation if they earn at least a 2.00 semester GPA and are not subject to continued academic probation based on their cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.
Academic Dismissal
Students who do not meet the requirements of their academic probation are academically dismissed from the university. Each College Academic Standards Committee is responsible for final decisions regarding the academic status of students in that college, and any appeals to academic dismissal actions are considered by the college committee. Once dismissed, students are not allowed to reenroll at Iowa State University until they have been academically reinstated. (See section on reinstatement.) Academic dismissal is placed on the student’s academic record as a permanent notation. The official transcript of a student who has been dismissed includes a “not in good standing” notation.

Summer Academic Standards Regulations
Students who are newly placed or continued on academic probation (P) at the end of the previous semester may enroll for the summer term without being in jeopardy of academic dismissal from the university at the end of that summer term.

Summer Combined Term GPA:
All students who attend summer session will have their academic status reassessed at the end of the summer based on the combined (not averaged) grade summaries of their previous term of attendance and summer term. Academic status (warning or probation) after summer session will be based on the resulting combined term GPA. The academic status resulting from the combined summer term GPA supersedes the academic status at the end of the previous term.

For students who have remaining designated repeat credits, courses taken in the previous semester and repeated in summer will be calculated as designated repeats in the combined term GPA.

The combined term GPA (summer plus preceding term) will not appear on the student’s grade report or permanent record.

Summer term GPA alone cannot determine academic status. Students who initiate enrollment at Iowa State during the summer will not be placed on warning or probation regardless of their academic performance.

Summer Cumulative GPA:
A student who was on academic probation (P) at the beginning of summer term based only on cumulative GPA, who raises his or her cumulative GPA to over a 2.0 at the end of the summer term shall be removed from probation status at the end of the summer term.

A student with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation (P) at the end of the summer term if his or her cumulative GPA is less than 2.00.

A student with 75 or more credits attempted or earned who has a transfer GPA < 2.00 will be placed on academic probation (P) at the end of any summer term if his or her combined transfer/ISU cumulative GPA is less than 2.00.

Summer Option for Students in Dismissal Status:
A student considered for academic dismissal at the end of spring semester will be permitted to enroll for the summer term. The combined spring/summer GPA will be used to determine whether the student should be permitted to continue his/her enrollment after the summer term. If the resulting combined term GPA is not 2.00 or greater, the student will be academically dismissed.

Additional Academic Standards Regulations
Changing colleges: A student on academic probation (P) may transfer to another college within the university only with the permission of the department chair of the new department and the dean of the new college. For students on academic probation (P), transfer during period 3 (i.e., after the last day to drop a course) may be approved by the department chair of the new department and the dean of the new college only under exceptional circumstances. A student who has transferred from a college while on academic probation (P) cannot transfer back unless permission is granted by the academic standards committee of the original college.

A student who is in dismissal status at the end of spring and chooses to exercise the Summer Option may not change colleges during the summer.

Withdrawal: A student on academic probation (P) who withdraws during period 3 will be academically dismissed at the end of term the student withdraws, except under extenuating circumstances as judged by the college academic standards committee.

Reinstated students: Reinstated students should also see the section on Reinstatement.

Veterinary Medicine: Additional rules for minimum satisfactory progress are in effect.

Special students: Students matriculated in this classification category are governed by the regular academic progress regulations. Furthermore, by special action of their college academic standards committee, additional standards may be required.

Reinstatement
The procedures delineated in this section apply to students who were dismissed from Iowa State for academic reasons. Students who left Iowa State in good academic standing and who are seeking reentry should see Index, Reentry for more information.

1. Reinstatement is not automatic. Students who have been dismissed for academic reasons should contact the dean’s office in the college they wish to enter for instructions specific to that college.

The college Academic Standards Committee reviews each petition and other relevant information, and reinstatement is based upon that review. As part of the petition process, students must submit a plan for academic success that identifies the causes of their poor academic performance and demonstrates that they have taken actions to avoid or eliminate these causes.

2. Students can only be reinstated after at least one academic semester has elapsed since they were academically dismissed. The summer session is not a semester for the purpose of being out of school one semester.

3. Students who have been dismissed from enrollment two or more times are not eligible for reinstatement until at least two academic semesters have elapsed since their last academic dismissal.

4. Students who were dismissed by one college and subsequently reinstated by another college cannot transfer back to the original college unless permission is granted by the Academic Standards Committee of the original college. This procedure applies regardless of the student’s academic standing when the transfer is requested.

5. To be considered for reinstatement to the university, students must submit a petition to the Academic Standards Committee of the college in which they desire to enroll at least 45 days before the beginning of the semester. Students who have not been enrolled for a period of 12 or more months or who are international students must also file a reentry form prior to their return. http://www.public.iastate.edu/~registrar/info/ug-reentry.html (Students dismissed for the second time and requesting reinstatement in the College of Liberal Arts and Sciences must submit their petition 70 days before the beginning of the semester.)

6. As a condition of reinstatement, students will reenter on academic probation and must accept whatever additional requirements are stipulated by the college Academic Standards Committee. Examples include full- or part-time status, specified credit hours, specific courses, specific GPAs, restriction on choice of major, and required counseling.

Student Appeal
Students may appeal a decision regarding their academic status if they believe that new information can be provided or extenuating circumstances exist that would alter the application of any rule in this section. The appeal should be made in writing to the Academic Standards Committee of the college in which the student is enrolled. The written appeal must include the reasons for the appeal and the evidence to substantiate these reasons.

The student should initiate the appeal process by contacting the secretary of the college Academic Standards Committee in the administrative office of her or his college immediately upon receipt of notification of the committee’s action, and at least ten calendar days before the beginning of the semester. The secretary will then inform the student of the deadline for submission of the written appeal.

If the student is dissatisfied with the committee’s action, he or she may submit an appeal in writing to the dean of her or his college within seven calendar days after they are notified of the committee’s action. The dean must respond in writing within seven calendar days of receipt of the appeal.
Satisfactory Academic Progress for Financial Aid Recipients

In order to remain eligible to receive financial aid from the student aid programs listed below, a student must meet both quantitative and qualitative academic standards as described within this policy. These standards are minimum expectations; specific aid programs may require a higher level of progress. A student not in compliance will be unable to receive aid from these programs until the deficiency has been corrected. Progress toward a degree will be reviewed each term and enforced at intervals no longer than one year. The programs affected by this policy are:

1. Federal, state, and institutional grants
2. Federal student and parent loans
3. Some private student loans

1. The qualitative academic standard for undergraduate students is to maintain a cumulative grade point average of 2.0 or higher.
2. The quantitative academic standard for full-time undergraduate students is described below:
   a. Duration of eligibility. Students may receive federal, state, and institutional aid for a maximum of six academic years or twelve semesters. Students who have not accumulated sufficient credit hours at the end of this time period to complete their course of study will not be eligible to continue to receive financial aid.
   b. Annual credit hours to be earned. An undergraduate student who receives financial aid from one or more of the programs cited above must complete credit at a rate at least equal to the scale below, where the numbers in the top row indicate academic years completed, and those in the bottom row indicate credit hours required:

<table>
<thead>
<tr>
<th>Years</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours</td>
<td>15</td>
<td>30</td>
<td>51</td>
<td>72</td>
<td>96</td>
<td>120</td>
</tr>
</tbody>
</table>

3. The quantitative academic standard for all part-time students is as follows:
   a. The duration of eligibility for part-time students is the same as above, but adjusted by the rate of attendance. For example, a student with a maximum duration of six years who is attending school half-time would have the duration of eligibility adjusted to twelve years.
   b. Part-time students who are otherwise eligible for financial aid must maintain the academic standards or rate of completion as stated above, adjusted by the number of hours attempted at the time the financial aid was disbursed.

9 to 11 credit hours = 2/4 time
6 to 8 credit hours = 1/2 time

4. Regaining eligibility. If a student is denied financial aid because of failure to comply with the above standards, the additionally required credit must be earned at the student's own expense at Iowa State University, or the student must transfer sufficient hours taken at another institution to make up the deficiency.
These academic progress criteria are defined in minimal terms. If the student earns only the minimum credit hours for financial aid eligibility, the student's total eligibility for particular programs may be exhausted prior to degree completion. (See the Duration of Eligibility and credit hour earning scale.) In addition, the student's college or department may require more credit hours than required by this policy.

**Sources of Help with Academic Problems**

If students are having trouble in a course, the following persons and places may be able to provide help:

1. The instructor of the course should be the primary sources of assistance to enhance the student's academic achievement in the course. Students are encouraged to visit the instructor during stated office hours and seek individual assistance from the instructor if that is not possible.

2. Another valuable source of support is the student's academic adviser, who often can help clarify academic issues and can recommend support services or remedial strategies.

3. The Academic Success Center in the Hixson-Lied Student Success Center has a collection of services such as tutoring, supplemental instruction (SI), the academic success course, learning lab, disability resources, and workshops designed to help students reach their academic goals.

4. The office of the department that offers the course may have a list of persons qualified to provide tutoring services for the course. They also may have help rooms or other support programs. The locations of the department offices are listed in the front of the ISU Directory.

5. The Student Counseling Service provides professional counseling services for students with problems which affect academic performance.

**Appeal of Academic Grievances**

Students who believe a faculty member (in his or her academic capacity) has behaved unfairly or unprofessionally may have their grievance reviewed through the procedure described below. A student may not initiate an appeal more than one year following completion of the course, and may not initiate the appeal of a course grade beyond midterm of the semester following completion of the course.

Prior to initiating a formal appeal, a student may wish to discuss the situation informally with the Dean of Students or designee, who can offer advice as to the most effective way to deal with it.

Grievances arising out of classroom or other academic situations should be resolved, if at all possible, with the student and the instructor involved. If resolution cannot be reached, or if the grievance involves sexual or racial harassment and the student prefers not to deal directly with the instructor, the student should discuss the grievance with the instructor's department chair and submit it in writing to him or her. The department chair will investigate the grievance, including discussing it with the instructor involved and/or referring it to a departmental grievance committee. The department chair should respond in writing within five class days of receipt of the written notice of the grievance.

If the student is not satisfied with the resolution of the grievance proposed by the department chair, the student may appeal in writing to the dean of the instructor's college. (In the case of a grievance involving a Graduate College policy or procedure, an appeal of the chair's decision should be directed to the Dean of the Graduate College rather than to the dean of the instructor's college.)

The dean will hear the explanations of the department chair and instructor, and should respond to the student in writing within ten class days of receipt of the written notice of the appeal. If the grievance cannot be resolved with the dean, the student may forward a written appeal to the provost, who will convene a Committee to Review Student Grievances (see below) to consider the appeal within ten class days of receipt of the written notice of the appeal.

Within five class days following the convening of the committee, the provost will make a decision with regard to the grievance and will transmit this decision in writing to the grievant, the dean, the department chair, and the instructor. An appeal of the provost's decision may be made to the president of the university. The time limit specified at each level may be extended by mutual agreement of all parties concerned.

The Committee to Review Student Grievances is composed of faculty members named by the president of the Faculty Senate and students named by the president of the Government of the Student Body. The provost may serve as a chairperson for the committee, or may designate another chairperson for a specific grievance hearing. A minimum of two faculty members, two students, and the chairperson shall constitute a quorum for the convening committee.

**Academic Regulations**

**Class Attendance**

In order to attend a given class, a student must be registered for that class for credit or audit. Exceptions to this policy are at the discretion of the instructor of the course. See Index, Validation of Enrollment for regulations concerning attendance to validate students' enrollment in a class.

Each instructor sets his or her policy with respect to class attendance, and excuses for absence from class are handled between the student and instructor. The instructor is expected to announce his or her policy at the beginning of the course. Generally, students are expected to attend all class meetings as scheduled.

**Veteran Attendance**

Students who receive benefits from the Veterans Administration required by the V.A. to attend class regularly to maintain their V.A. eligibility. If the instructor knows that a student receiving V.A. benefits is not attending class, the instructor is obligated to notify the Office of the Registrar and a notification will be forwarded to the Veterans Administration. More information about veteran benefits is available on the Web, www.iastate.edu/~registrar/info/vabenef.shtml

**Field Trips**

Trips away from campus are sometimes arranged as a means of enriching the students' learning experience in a given course. Such trips may not take place during the first or last week of the semester, nor may they extend over more than two consecutive class days (Monday through Friday); these regulations may be waived only by special permission of the dean of the college in which the course is offered. Faculty should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

In order to go on a field trip required in one of their courses, students must first obtain permission from the instructors whose classes they will miss. If permission to miss class is not granted, students cannot be required to go on the field trip nor can they be penalized for missing the trip.

Special fees are often charged to cover the costs of field trips. Field trip fees are noted in the Schedule of Classes.

**Ownership of Course-related Presentations**

The presenter owns course-related presentations, including lectures. Individuals may take written notes or make other recordings of the presentations for educational purposes, but specific written permission to sell the notes or recordings must be obtained from the presenter. Selling notes by students without the required permission is a violation of the Conduct Code as published in the Student Disciplinary Regulations at www.dso.iastate.edu/regulations/homepage.htm.

**Recording and Transmission of Classes**

Recordings and transmission of classes may take place for a variety of legitimate reasons, including providing educational opportunities for those who cannot attend classes on campus, assisting students with disabilities that impair classroom note taking, and giving the instructor feedback on his or her classroom performance.

Because the lectures of faculty represent their intellectual labors, individuals are expected to obtain permission to make recordings of lectures and other classroom interactions. Recordings may be used for the purposes of the particular class, although in some cases the recordings may be preserved and used for other classes as well.
Credit Involving a Paid Activity

Students may obtain credit for an activity, either on- or off-campus, for which they are also paid, provided the activity is academically relevant. This policy does not apply to registrations for R credit.

In order for an activity to be defined as academically relevant, prior arrangements for receiving credit must be made with a faculty member in an appropriate department.

The arrangements must include agreement on (1) the academic objectives which the activity is expected to achieve, and (2) the procedure by which the student's learning will be assessed.

Academic Dishonesty

Academic dishonesty occurs when a student uses or attempts to use unauthorized information in the taking of an exam; or submits as his or her own work themes, reports, drawings, laboratory notes, or other products prepared by another person; or knowingly assists another student in such acts or plagiarism. Such behavior is abhorrent to the university, and students found responsible for academic dishonesty face expulsion, suspension, conduct probation, or reprimand. Instances of academic dishonesty ultimately affect all students and the entire university community by degrading the value of diplomas when some are obtained dishonestly, and by lowering the grades of students working honestly.

Examples of specific acts of academic dishonesty include but are not limited to:

1. Obtaining unauthorized information. Information is obtained dishonestly, for example, by copying graded homework assignments from another student, by working with another student on a take-home test or homework when not specifically permitted to do so by the instructor, or by looking at your notes or other written work during an examination when not specifically permitted to do so.

2. Tendering of information. Students may not give or sell their work to another person who plans to submit it as his or her own. This includes giving their work to another student to be copied, giving someone answers to exam questions during the exam, taking an exam and discussing its contents with students who will be taking the same exam, or giving or selling a term paper to another student.

3. Misrepresentation. Students misrepresent their work by handing in the work of someone else. The following are examples: purchasing a paper from a term paper service; reproducing another person's paper (even with modifications) and submitting it as their own; having another student do their computer program or having someone else take their exam.

4. Bribery. Offering money or any item or service to a faculty member or any other person to gain academic advantage for yourself or another is dishonest.

5. Plagiarism. Unacknowledged use of the information, ideas, or phrasing of other writers is an offense comparable with theft and fraud, and it is so recognized by the copyright and patent laws. Literary offenses of this kind are known as plagiarism. Plagiarism occurs when they do not credit the sources from which they borrow ideas, whether these ideas are reproduced exactly or summarized. The method of documentation will differ depending on whether the sources are written, oral, or visual. Ethically, communicators are responsible for providing accurate, detailed information about their sources. Practically, audiences need this information to comprehend and evaluate a message's content. The Student Guide: English 150 and 250, available for purchase at the University Book Store, describes the process of documenting source materials as do many other reference guides.

Academic dishonesty is considered to be a violation of the behavior expected of a student in an academic setting as well as a student conduct violation. A student found responsible for academic dishonesty or academic misconduct is therefore subject to appropriate academic penalty; to be determined by the instructor of the course, as well as sanctions under the university Student Disciplinary Regulations. If an instructor believes that a student has behaved dishonestly in a course, the following steps are to be followed:

1. The instructor should confront the student with the charge of dishonesty and arrange a meeting with the student to discuss the charge and to hear the student's explanation.

2. If the student admits responsibility for academic misconduct, the instructor shall inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade.

Because academic dishonesty is also a student conduct violation under Section 4.2.1 of the Student Disciplinary Regulations, the instructor must report the incident in writing to the Dean of Students. After investigating the incident and discussing it with the instructor, the Dean of Students, or his/her designee, will meet with the student and depending on the severity of the offense as well as on the student's past conduct record, may handle the matter through an administrative hearing or schedule a hearing before the All University Judiciary (AUJ). This hearing, conducted according to the procedures outlined in the Student Disciplinary Regulations, is to determine the disciplinary action to be taken. In any case, the student's academic adviser will be informed of the incident but may not insert any record of it in the student's academic file.

3. If the student claims to be not responsible for the alleged violation of academic misconduct, the instructor may not assign the student a grade for the work in question until the question of responsibility is resolved, unless circumstances require that an interim grade be assigned. The instructor shall consult with his or her department chair and report the incident in writing to the Dean of Students.

The Dean of Students will refer the case to the Office of Judicial Affairs for investigation. After reviewing the report and completing an investigation, the Office of Judicial Affairs will file a formal complaint against the student if it is determined that there is cause to believe academic misconduct occurred. The case may be adjudicated through an administrative hearing or referred to a hearing before the All University Judiciary (AUJ) depending on the nature and severity of the violation as set forth in the Student Disciplinary Regulations.

If the case is referred to the AUJ both the student and instructor will be invited to attend an AUJ hearing and present pertinent information. If the Administrative Hearing Officer (in a minor case) or the AUJ (in a major case) finds the student responsible for the charge of academic misconduct, the instructor will inform the student (a) of the grade on the work in which the dishonesty occurred, and (b) how this incident will affect subsequent evaluation and the final grade. The Administrative Hearing Officer or AUJ will determine the appropriate disciplinary action with respect to the nature of the violation.

If the Administrative Hearing Officer or AUJ finds the student "not responsible" for academic misconduct, the instructor will grade the student accordingly on the work in question and the student's grade in the course will not be adversely affected. If the student is found responsible the student’s adviser will be informed of the decision but shall not insert any record of the action in the student's academic file.

4. If a student either admits dishonest behavior or is found responsible for academic misconduct by the AUJ, the Office of Judicial Affairs (OJA) or AUJ may impose any of the following sanctions:

a) Disciplinary Reprimand: An official written notice to the student that his/her conduct is in violation of university rules and regulations.

b) Conduct Probation: A more severe sanction than a disciplinary reprimand, to include a period of review and observation during which the student must demonstrate the ability to comply with university rules, regulations, and other requirements stipulated for the probation period.
c) Suspension/Deferred Suspension: The suspension is deferred subject to a definite or indefinite period of observation and review. If a student is found responsible for a further violation of the university Student Disciplinary Regulations or an order of a judiciary body, suspension will take place immediately.

- **Definite**: The student is dropped from the university for a specific length of time. This suspension cannot be for less than one semester or more than two years.
- **Indefinite**: The student is dropped from the university indefinitely. Reinstate-ment may be contingent upon meeting the written requirements of the AUJ specified at the time the sanction was imposed. Normally, a student who is suspended indefinitely may not be reinstated for a minimum of two years.

d) Expulsion: The student is permanently deprived of the opportunity to continue at the university in any status.

5. A student accused of academic misconduct has the option to stay in the class or to drop the class if the drop is made within the approved time periods and according to the regulations established by the university. If the student chooses to drop the class, the student will be required to sign a statement of understanding that if the student is later found responsible for academic misconduct, then the student will receive an "F" for the course.

6. Procedures for appeal of either the All University Judiciary’s conduct decision or the instructor’s grade are available from the Dean of Students Office.

7. In instances in which the student admits responsibility or is judged to be responsible by OJA or the AUJ, a staff member of the Dean of Students Office will counsel with the student in an effort to deter any further such incidents.

8 Student records concerning academic dishonesty are maintained in the Dean of Students Office for a period of seven years, after which the file records are purged. These student records are confidential; nothing from them appears on a student’s academic transcript. In the event that an instructor is uncertain how to handle an incident of suspected academic dishonesty, the Dean of Students is available at any time to provide advice and assistance to the instructor in deciding a proper course of action to be taken.

9. Students enrolled in the College of Veterinary Medicine are bound by an honor code. A charge of academic dishonesty may be made by a student or instructor to the Interclass Honor Board chairperson according to the procedures outlined in the Honor Code, or the instructor may follow procedures outlined above. The Interclass Honor Board functions as the judiciary of the College of Veterinary Medicine for the allegations presented to it.

**Response to Classroom Disruption**

Should any student officially enrolled for credit or audit in a class disrupt the instructor’s ability to ensure a safe environment, control the class agenda, and/or deliver the approved curriculum, the instructor has the right to ask that the disruptive action cease immediately. The instructor may find it useful to include general guidelines about disruptive behavior on the course syllabus, and in the event of a classroom disruption, the instructor may, if she or he finds it necessary, explain to the student and the class why the particular action is deemed disruptive. The instructor should also take into consideration complaints of disruptive behavior brought to their attention by students. The responsible student should cease the disruption and utilize non-disruptive means for expressing disagreement or concern. If the disruption continues, the instructor can pursue various forms of intervention, including suspension from class, use of student disciplinary regulations, or police intervention, as discussed in more detail in the Faculty Handbook. (See www.iastate.edu/, choose Index, Faculty Handbook.)

Although most situations are best resolved without resorting to requests for police intervention, the Department of Public Safety should be called when the disruptive behavior prohibits the continuation of the class. The Department of Public Safety may also be called if any person enters or remains in the classroom after being asked by the instructor to leave.

Other violations related to academic misconduct may include subsection 4.1.11 Misuse of Computers and subsection 4.2.20 Unauthorized Sale of Others’ Intellectual Works. These subsections are located in the Iowa State University Student Disciplinary Regulations under section 4 of the Conduct Code.
Registration is a process by which students become officially enrolled in classes for a given term. The process involves consultation between the student and the student’s academic adviser. All undergraduate students are assigned an academic adviser based on their major/curriculum. A new adviser assignment is made when a student changes majors/curricula. See Index, Academic Advising.

Students who attend classes must complete registration and pay their assessed fees. Registration is not complete until all fees are paid, including board and room fees for those living in residence halls. See Index, Fees and Expenses.

Disabled students who need assistance with any phase of registration should contact Disability Resources. See Index, Disability Resources.

**Dates and Deadlines**

Dates for registration are published in the university calendar on the Web at www.iastate.edu/~registrar/forms/, the ISU Directory, and departmental bulletin boards.

Students are assigned a registration start date and time, which is the first day and time they can use the registration system. Registration start dates are assigned based on projected year in school classification (computed by combining total credits, current term credits, and current term test out credits). Then specific start dates within projected year in school are established by using the sum of total credits and current term test out credits.

Students may choose to delay their registration until a later date; however, courses will begin to fill on the first day of registration. Any delay in registration may reduce course selection options. A list of start dates by classification is available at www.iastate.edu/~registrar/registration.

Continuing students register for the following term during the middle of the current term. For example, registration for spring term begins the middle of fall term; registration for summer session is completed during the previous spring at the same time as registration for fall semester.

A late registration fee is assessed for registration initiated on or after the first day of classes for fall and spring terms. This fee is not charged for the summer term. If registration is not completed by the end of the fifth day of classes, students must obtain written permission from their advisers, the instructors for the courses they plan to take, as well as approval from the dean of the college in which they are registered. During the summer session, these approvals must be obtained in order to register after the third day of classes.

Students may not enroll in courses with time conflicts without the approval of the instructors concerned.

Students who participate in off-campus experiences for which they receive Iowa State University credit must register for that credit during the term when the experience is taking place, whether or not they are taking courses on campus during that time.

**Registration Responsibilities**

The registration process includes advising, enrollment in courses, and schedule changes. In addition to the student, this process may involve the student’s adviser; the student services staff of the student’s college; and the dean of the college. Each is responsible for knowing and following the academic policies and procedures.

The student is responsible for knowing and adhering to university policies and procedures that apply to registration and schedule changes; checking the accuracy of his/her schedule on AccessPlus, including schedule adjustments (i.e., adds, drops, section changes); knowing the degree requirements of his or her major and/or curriculum; planning course schedules to meet those requirements; and monitoring the accuracy of the degree audit.

The adviser is responsible for consulting with advisees during the advising/registration period; providing information about student’s major and curriculum requirements; providing guidance in the student’s course selection; assisting in monitoring the degree audit for accuracy; and for notifying the college student services office with corrections to the degree audit.

The college student services staff is responsible for assisting new and reentering students with the registration process; resolving unusual scheduling problems; and updating the degree audit or solving problems concerning the degree audit.

The dean is responsible for making decisions with respect to requests for deviations from university policies, deadlines, etc. Students and staff should check with the college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

**Class Schedule Planner**

The Class Schedule Planner is an application that allows students to plan their schedules using courses displayed in the Schedule of Classes. Students can select courses and/or sections they want to take for a particular term, as well as block out unavailable class days and times. Based on those selections, Class Schedule Planner can return all possible schedules to the student in a color coded grid format.

Though it is a Web-based application, the Class Schedule Planner does not require authentication (no user ID, PIN, or password). Therefore, it is essential that students understand this is a planner and as such, it does not register them in courses and cannot be used to complete their registration. The application requires that the user have Java on their computer. The first screen of the Planner provides information about how to use the planner and simple instructions for downloading the Java application. A useful Help link also has been provided. The Class Schedule Planner is available at http://planner.iastate.

**Using AccessPlus Registration**

Students enter the system via AccessPlus by using university ID and password. If required by their college, they also need to enter a registration access number (RAN). The registration system provides messages after each entry indicating whether each request has been processed. Students also may review their current schedules at any time during registration. Students are held accountable for all changes made to their schedules.

All students are encouraged to register for courses through the AccessPlus registration system. However, students who are unable to use the system may register in person by processing their signed Registration Worksheet in the Registrar’s Student Scheduling Office, 10 Enrollment Services Center.

**Registration System Abuse**

Using the AccessPlus registration system is a privilege, which may be revoked if abuse is detected. Abuse includes, but is not limited to, creating and using an automated program to search for course openings and/or enrolling in a section with the intent of reserving space in that particular section for another student. The Office of the Registrar, college office, and/or advisers have the right to determine abuse and revoke privileges for any type of registration system abuse.
Course Information

Prerequisite. A prerequisite indicates the specific academic background or general academic maturity considered necessary by the faculty for the student to be ready for maximum success in the course. See Index, Course Prerequisites.

Permission Required courses/sections. To register for these sections, students must obtain authorization on a Schedule Change/Restriction Waiver form and process the approved form in the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Restricted courses/sections. Some courses or sections are restricted to students who meet specified criteria including curriculum/major, college, and/or year in school. In addition, some sections may be restricted to new students to ensure that sufficient spaces are available when new students register during the summer orientation. A department may waive a restriction for a student who has extenuating circumstances. The student must obtain the authorization from the department on a Schedule Change/Restriction Waiver form. The form is processed in the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Classrooms are listed for each course in the Online Schedule of Classes at http://classes.iastate.edu/ and on the student's class schedule on AccessPlus.

Cancelled courses/sections. In some cases, courses or sections may be cancelled due to low enrollment or departmental staffing considerations. Students who are registered for a cancelled course or section will be notified by the Office of the Registrar, the department, and/or on their AccessPlus schedule.

Textbook information. A link to textbook information, including the ISBN and retail price for assigned textbooks, is available from the Schedule of Classes. Textbook information for Iowa State University courses is posted as close to the start of registration as possible. Students may purchase textbooks from any source they choose.

Registration Process

To register for classes, students need the following materials and information:

- Registration Worksheet, available for download at www.iastate.edu/~registrar/forms/.
- A RAN (registration access number) if required by their college.
- Course information from the Online Schedule of Classes at http://classes.iastate.edu/.
- Other departmental information applicable to their curriculum, available from their adviser.

Students are expected to do the following in the advising and registration process:

1. Meet with their adviser, who will provide the following:
   a. degree audit
   b. guidance in course selection
   c. Registration Authorization form, with RAN, if applicable.
2. Choose specific sections of each course.

Students are responsible for choosing their course sections. In most cases advisers will not be involved in selecting meeting times.

3. Review their registration start date/time information and any registration hold information on AccessPlus, under Current Information. Students in those colleges which require a four-digit registration access number (RAN) should meet with their adviser in advance of their start date, to obtain their Registration Authorization Card on which the RAN is printed.

4. Register for courses using the AccessPlus registration system.

Credit Limits

For fall and spring semesters, the credit limit is 18 credits for undergraduates and 15 credits for graduate students. For summer sessions, the limits are 12 credits for undergraduates and 10 credits for graduate students. A student may be required to drop credits before adding another course. In some cases, the college dean may approve a higher or lower credit limit for individual students. Students may request a change in their credit limit by contacting their adviser. Advisers should notify the student's college student services office if the credit limit needs to be changed.

Registration Holds

Students with holds on their registration will not have access to registration until the initiating offices have released the holds. Those who attempt to register before the holds have been released will receive a message indicating which offices have placed holds on their registration. Prior to their registration, students may check for holds on AccessPlus.

Drop Limit

Students are limited in the number of courses they may drop during their academic career. (This refers to drops processed after the fifth day of classes of each semester.) Students who entered Iowa State University as freshmen are allowed to drop a maximum of five courses during their undergraduate career. If they entered at a level above freshman classification or in the College of Veterinary Medicine, they are allowed to drop a maximum of four courses. Courses dropped during their first term at Iowa State are not included in this limit, nor does the summer count as a first term for this purpose. Students who enroll at Iowa State University as undergraduates after receiving a bachelor's degree are permitted two drops.

Exceptions to the drop limit may be made for courses that must be dropped for reasons beyond the student's control. These exceptions are granted only by the dean of the other authorized person in the student's college.

The number of drops students have left is indicated on their grade report (available on AccessPlus) each term. Students are responsible for not exceeding their limit. Students who attempt to drop a course beyond the limit without special permission by the dean of the student's college will continue to be enrolled in the course and will receive a grade at the end of the term.

Making Schedule Changes

Schedule Changes. Students may make schedule changes through the first five days of class using the AccessPlus registration system.

Procedures for schedule changes vary by the time period of the semester. The effective date of a schedule change is the date when the change is entered into the registration system.

Schedule change periods are as follows:

Period 1 ends on the fifth day of classes in the fall and spring semesters. Schedule changes during period 1 are free and do not require adviser signatures. Instructor or departmental approval may be required for adds or section changes for some courses during period 1. Course drops during this period do not count toward a student's ISU drop limit, and will not appear on a student's permanent record. Schedule changes during period 1 may be processed through the AccessPlus registration system or by presenting a Schedule Change form to the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Period 2 ends the Friday of week 10 in the fall and spring semesters. During this period, schedule changes require signatures of adviser and instructor and are processed on a Schedule Change form. A fee is assessed for adds, drops, and section changes during this period. Course drops after period 1 count toward a student's ISU drop limit and appear as an X on the permanent record. A section change does not require a drop. Drops and other schedule changes that are judged to be beyond the student's control may be processed as administrative actions if approved by the college dean. There is no fee for administrative schedule changes. Administrative drops do not count toward a student's ISU drop limit and do not appear as an X on the permanent record. The effective date of an administrative action is the date it is approved by the college dean.

Period 3 is anytime after period 2. Schedule changes during this period are permitted only for extenuating circumstances, may require a written statement of support from the instructor and the student, and must be approved by the dean of the student's college.

Half-Semester and Partial Term Courses

Specific deadlines for adding and dropping half-semester courses are published in the university calendar. Prorated adjustments to add and drop deadlines are made for other partial term courses. To find out specific deadlines for partial term courses, contact the Registrar's Student Scheduling Office, 10 Enrollment Services Center, 294-2331.

R-Credit Courses (required courses)

Processing a scheduling change for a required course is usually considered administrative. There is no fee for administrative schedule changes. Administrative drops do not count toward a student's ISU drop limit and do not appear as an X on the permanent record. To make a Period 3 R-credit drop administrative requires approval of the college dean.
Validating Enrollment
To validate their enrollment in each course at the beginning of the semester, students must attend the first or second meeting (first meeting if the class meets only once a week). Students who add a course after the term begins must attend the next class meeting. The instructor has the option to offer a registered place in the course to another student when a registered student fails to attend and has not obtained prior approval of the instructor. Students who do not validate their enrollment must drop the course or they will receive an F grade.

Cancellation/Withdrawal
Students who decide not to attend classes before the date class work begins must cancel their registration to avoid tuition and fees assessment. Students who decide not to attend classes beginning the first day of class or later must withdraw from the university.

Registration Cancellation
A cancellation is processed when a student notifies the Office of the Registrar, prior to the day class work begins, of the decision not to attend classes for the current semester. All courses are removed and no tuition and fees are assessed. Students may cancel their registration by contacting the Office of the Registrar at 0460 Beardshear Hall, 515-294-1889. Students who call should request the name of the person taking the call and record the name as well as the time and date called.

Withdrawal
Students who decide not to attend classes beginning the first day of class or later, must process a withdrawal form. Per the student's request, the "Request for Withdrawal" form is initiated and submitted by the College to the Office of the Registrar. The student is withdrawn from all courses based on the withdrawal date on the form, and tuition and fees are adjusted, if appropriate according to established policies approved by the Board of Regents, State of Iowa. See www.iastate.edu/~registrar/registration/tuition-adj.shtml

Withdrawal procedures must be followed otherwise instructors of the courses involved will assign grades or marks they consider appropriate. Since these grades may be Fs, students are warned that failure to follow the prescribed withdrawal procedures may adversely affect a later application for reentry or transfer to another institution.

Students who are considering withdrawal from the university should immediately consult their academic adviser to discuss reasons for the withdrawal and alternatives.

A request for withdrawal during period 3, (i.e., after the last day to drop a course without extending circumstances) will not be approved except for circumstances that are beyond the student's control. The dean of the student's college or his or her designee, must approve such requests. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Students should not expect to withdraw during or after the final examination week. In a situation beyond a student's control, when examinations cannot be completed, arrangements should be made for incompletes rather than withdrawal during final exam week. Students who are on academic probation (P) and withdrawal during period 3 will not be permitted to enroll the following term, except under extenuating circumstances.

Withdrawal Procedures
To withdraw from the university, students must do the following:

1. Complete a Request for Withdrawal form, with adviser's signature.
2. Request the approval and obtain the signature of the college in which they are enrolled. (If the request is approved, the withdrawal form will be forwarded to the Office of the Registrar where it will be recorded; the information is then sent to the appropriate offices.)

The effective date of the withdrawal is the date on which it is approved by the college dean, or his or her designee. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

If students complete the withdrawal procedure, the courses they are taking will not be included on their permanent record. Incomplete will not be accepted for any courses taken during the term the student withdraws.

Interim or Medical Withdrawal
The University may order involuntary withdrawal of a student if it is determined that the student is suffering from a mental disorder as defined by the current American Psychiatric Association Diagnostic Manual such that the disorder causes, or threatens to cause, the student to engage in behavior which poses a significant danger of causing imminent harm to the student, to others or to substantial property rights, or renders the student unable to engage in basic required activities necessary to obtain an education.

Status of Conduct Proceedings
If the student has been charged with violation of the Uniform Rules of Conduct, but it appears that medical reasons exist for the objectionable behavior, the withdrawal policy may be activated prior to issuance of a determination in the conduct process. If the student is ordered medically withdrawn from the university, such action terminates the pending disciplinary action. If the student is found not to be subject to medical withdrawal under this section, conduct proceedings may be reinstated.

Interim Action
The OJA (Office of Judicial Affairs) Administrator or the Dean of students may order interim medical suspension of a student where there appears to be an imminent threat of harm to self or others. If the student is suspended, within 48 hours of ordering interim medical suspension, the Dean of students will schedule an interim hearing before the Medical Withdrawal Committee, consisting of the Director of Student Health (or designee), the Director of the Student Counseling Service (or designee), and the Dean of Students. The student and the OJA Administrator will have an opportunity to present information as to whether interim medical suspension should be continued or modified, and whether medical withdrawal should be considered.

The Medical Withdrawal Committee may order the student to be referred for an evaluation by a licensed mental health professional of the university's choosing if there is adequate reason to believe that a basis for medical withdrawal exists. The order of referral must be sent to the student and notify the student of the scheduled evaluation to occur no later than seven days from the date of the referral letter. The university will cover the cost of the evaluation. If a student fails to complete the evaluation, the university may continue interim medical suspension and may order restrictions on campus access until the evaluation is completed and reviewed by the university. The decision to continue interim medical suspension and for referral may be appealed within 48 hours, in writing, to the Vice President for Student Affairs. The student may be assisted by any two individuals of his or her choice in any hearing or appeal.

Involuntary Medical Withdrawal
If the medical evaluation supports medical withdrawal, a hearing will be scheduled before the Dean of Students, the Director of Student Health and a member of the Student Counseling staff. The student will have at least 48 hours to independently review the psychological or psychiatric evaluation prior to the hearing. The student and the OJA Administrator may present arguments for or against involuntary Medical Withdrawal. A written decision shall be rendered by the Medical Withdrawal Committee stating the reasons for its determination. The decision may be appealed, in writing to the Vice President for Student Affairs. A student who has undergone involuntary medical withdrawal must reapply, and may not reenter the university without providing competent medical evidence that the medical condition no longer exists, or is sufficiently under treatment so as to remove any substantial likelihood of reoccurrence of the condition which caused medical withdrawal. The University may require the student, at the student's cost, to undergo a medical evaluation by a licensed mental health professional of the university's choosing. A medical withdrawal is not considered a disciplinary action, though a prior medical withdrawal may be considered in subsequent conduct hearings involving the student.
Tuition and Fees Adjustments for Withdrawals

Tuition and fees adjustments are made for withdrawals according to the schedule for full term courses (appropriate adjustments will be made when partial term courses are involved). Students may appeal a tuition and fees assessment for withdrawals. Determinations will be made for instances beyond the control of the student. The results will be sent to the student in writing.

Returning/Reentry to the University

U.S. students who have been absent from Iowa State University less than 12 months may be admitted as a returning student. If more than 12 months have elapsed since last enrolled, a U.S. student must apply for reentry to the university. All international students must apply for reentry regardless of the time away from the university.

Returning Students

U.S. undergraduate and non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months do not complete a reentry form; however, international undergraduate and non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months must complete a reentry form.

Reentry Students

Undergraduate and nondegree undergraduate (special) students who plan to attend Iowa State University after an absence of twelve months or more must complete a reentry form. Forms are available from www.iastate.edu/~registrar/info/reentry.html.

Students with a bachelor’s degree who plan to take supporting graduate level coursework prior to applying for graduate degree admission should request a nondegree graduate admission application.

Students who have previously attended Iowa State University only as nondegree (special) students and who now seek to earn an undergraduate degree should request an undergraduate application.

International students must complete a reentry form. Forms are available from www.iastate.edu/~registrar/info/reentry.html. Financial certification of ability to cover all educational and living expenses will be required.

The reentry form should be completed and returned to the Office of the Registrar, 0460 Beardshear Hall, well in advance of the term of reentry. Students who have attended another college or university since enrollment at Iowa State University must have an official transcript(s) of all course work attempted sent to the Office of Admissions, 100 Enrollment Services Center.

Reentering students must also contact their departmental office/adviser to prepare a class schedule. Reentry must be approved prior to registration.

Iowa State University requests the information on the reentry form for the purpose of making a reentry decision. The university reserves the right not to approve reentry if the student fails to provide the required information.

Reentry Approval Process

Generally, a request to reenter Iowa State University will be approved within the Office of the Registrar. However, the Office of the Registrar will refer the reentry form to the college to which a student plans to return if the student: (a) desires to change curriculum; (b) has a previous Iowa State University cumulative grade point average below 2.00; (c) was dropped from the university for unsatisfactory academic progress or was not otherwise in good standing; or (d) since leaving Iowa State University, has completed additional college study with less than a 2.00 grade point average. See Index, Reinstatement.

Academic Renewal Policy

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations. See Index, Academic Renewal Policy.
Undergraduate and Professional Degree Programs

The university is organized into eight colleges, including the Graduate College. Six colleges offer undergraduate degree programs, and the College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree. For a listing of the more than 100 majors offered by the Graduate College, see the summary at the end of the Graduate College section of this publication.

Iowa State University is accredited by the Higher Learning Commission of the North Central Association.

The main undergraduate academic programs of each college are listed below, together with the degrees awarded upon completion. In many cases certain majors, minors, options, or electives allow for increased specialization within the programs. Programs which are administered jointly by two colleges are listed within both colleges.

College of Agriculture and Life Sciences

Agricultural Biochemistry, B.S.
Agricultural Business, B.S.
Agricultural and Life Sciences Education, B.S.
Agricultural Studies, B.S.
Agricultural Systems Technology, B.S.
Agronomy, B.S.
Animal Ecology, B.S.
Animal Science, B.S.
Biology, B.S.
Culinary Science, B.S.
Dairy Science, B.S.
Diet and Exercise, B.S./M.S.
Dietetics, B.S.
Environmental Science, B.S.
Food Science, B.S.
Forestry, B.S.
Genetics, B.S.
Global Resource Systems, B.S.
Horticulture, B.S.
Industrial Technology, B.S.
Insect Science, B.S.
International Agriculture, B.S.
Microbiology, B.S.
Nutritional Science, B.S.
Public Service and Administration in Agriculture, B.S.
Seed Science, B.S.

College of Business

Accounting, B.S.
Finance, B.S.
Business Economics, B.S.
Logistics and Supply Chain Management, B.S.
Management, B.S.
Management Information Systems, B.S.
Marketing, B.S.
Operations and Supply Chain Management, B.S.

College of Design

Architecture, B.Arch.
Art and Design, B.A., B.F.A.
Community and Regional Planning, B.S.
Graphic Design, B.F.A.
Integrated Studio Arts, B.F.A.
Interior Design, B.F.A.
Landscape Architecture, B.L.A.

College of Engineering

Aerospace Engineering, B.S.
Agricultural Engineering, B.S.
Biological Systems Engineering, B.S.
Chemical Engineering, B.S.
Civil Engineering, B.S.
Computer Engineering, B.S.
Construction Engineering, B.S.
Electrical Engineering, B.S.
Industrial Engineering, B.S.
Materials Engineering, B.S.
Mechanical Engineering, B.S.
Software Engineering, B.S.

College of Human Sciences

Apparel Merchandising, Design, and Production, B.S.
Child, Adult, and Family Services, B.S.
Culinary Science, B.S.
Diet and Exercise, B.S./M.S.
Dietetics, B.S.
Early Childhood Education, B.S.
Elementary Education, B.S.
Family and Consumer Sciences Education and Studies, B.S.
Family Finance, Housing, and Policy, B.S.
Food Science, B.S.
Hotel, Restaurant, and Institution Management, B.S.
Kinesiology and Health, B.S.
Nutritional Science, B.S.

College of Veterinary Medicine

Veterinary Medicine, D.V.M.
Bachelor's Degree Requirements
To receive a degree, a student must meet the requirements of the curriculum in which the degree is to be awarded. Verification that the student has met those requirements is made by the dean of the college, who also has the authority to waive a requirement under exceptional circumstances.

A cumulative grade point average of at least 2.00 in all work taken at Iowa State University is required for graduation.

A student admitted as a transfer from another college or university is normally required to have a 2.00 cumulative average at the time of entrance. A student may, however, be admitted with a quality-point deficiency, but will be required to earn sufficient quality-points above a 2.00 at Iowa State to offset the quality-point deficiency at the time of entrance.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. There is no limit to the number of credits that may be transferred from a four-year institution.

A student who takes work at another college or university after having been enrolled at Iowa State must submit transcripts of all work attempted to the Office of Admissions at Iowa State. This work must average a 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such transcripts will be grounds for dismissal.

In unusual circumstances, the Academic Standards Committees of the respective colleges may review and give further consideration to the records of students who, except for grade-point average, have satisfactorily completed all graduation requirements. If the appropriate college Academic Standards Committee considers that the educational and professional needs of such a student have been satisfactorily met, or can be satisfactorily met by imposing further conditions, the committee may recommend to the dean of the college that the student be graduated or that a supplemental program be accepted in place of the fully unqualified grade point average. The college Academic Standards Committee chairperson reports such exceptional actions to the Faculty Senate Committee on Academic Standards and Admissions.

To qualify for a bachelor's degree, a student must take a minimum of 32 credits in residence at Iowa State University. Also required is that the last 32 credits must be taken in residence, although under special circumstances, with prior written approval of the student's major department, six of the last 32 credits may be transferred and applied toward a degree at Iowa State University.

A student may receive two bachelor's degrees if he or she meets the requirements of each curriculum and earns at least 30 credits beyond the requirements of the curriculum requiring the greater number of credits. Each degree program must be approved by the appropriate department chair or head.

A student fulfilling the requirements of two separate curricula in different colleges may, in certain cases, receive a degree from one of the colleges with double majors crossing college lines. The permission of both deans must be obtained and each degree program must be approved by the appropriate department and dean.

Minors
Requirements for an undergraduate minor are specified by many departments and programs in the university; a record of completion of such requirements appears on a student's transcript. Lists of undergraduate minors offered by each college appear in the college description. Credits used to meet the minor requirements may also be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Some students may have to exceed the graduation credit requirement set by their college in order to meet the requirements of both the minor and the curriculum/major.

All minors require at least 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass-not pass basis. Specific requirements and/or restrictions are available from the department or program offering the minor.

Undergraduate Certificates
All undergraduate certificates require at least 20 credits, including at least 12 credits taken at Iowa State University. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above. The undergraduate certificate must include at least 9 credits that are not used to meet any other department, college, or university requirement except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses taken for an undergraduate certificate may not be taken on a pass-not-pass basis. A cumulative grade point average of at least 2.00 is required in courses taken at Iowa State University for an undergraduate certificate. Specific requirements and/or restrictions are available from the department or program offering the undergraduate certificate (see Index).

Communication Proficiency Policy
Basic Principles: The faculty of Iowa State University believe that all educated people should be able to communicate effectively in a variety of settings and media, including electronic. Consequently, Iowa State University graduates are expected to develop competence in three interrelated areas of communication: written, oral, and visual.

This communication competence can best be achieved through the following five principles:

- Communication instruction and practice are distributed over the student's entire undergraduate experience, both in and out of the classroom, from the first year through the senior year.
- Communication instruction and practice are distributed across the curriculum, both in communication courses and in courses in the student's major.
- Active learning and higher-order thinking are fostered through communication.
- Faculty across the university share responsibility for the student's progress in communication practices.
- Both faculty and students engage in ongoing assessment for continuous improvement of the student's communication practices.

Iowa State University's communication curriculum, based on these five principles, seeks to enrich the student's understanding of the various subjects studied as well as prepare the student to communicate successfully in professional, civic, and private life.

Foundation Courses: To ensure that broad communication competence is addressed and developed at the beginning of a university career, all students will earn six credits in the two-course introductory sequence (English 150 and 250), normally taken in the first and second years. Students will focus on writing and critical reading, with complementary instruction in visual, oral, and electronic communication; they will concentrate on civic and cultural themes; and they will enter work in a communication portfolio to document their current level of proficiency.

Upper-Level Curriculum: Continuing development of communication skills will be directed by the student's major department. Using the university's basic principles as a guide, each department will specify a set of intended learning outcomes and design communication experiences by which students in the major can achieve the desired level of communication proficiency.

Departments may select from or combine a variety of communication options that best match their faculty, students, and curriculum:

- designated communication-intensive courses that integrate written, oral, and visual communication into a course in the major;
- a sequence of courses within the major that incorporates communication tasks of increasing complexity;
- linked courses—one in communication, one in the major—that integrate readings and assignments;
- advanced composition course(s) appropriate to the student's major and offering instruction in written, oral, and visual communication;
- communication-intensive activities within or beyond course work, such as communication portfolios, discipline- or course-specific student tutoring, community service projects, internships, electronic presentations, informational fairs, juried competitions, entrepreneurial projects, newsletters, Web sites.
Departments will retain the authority for regularly assessing the degree to which their students achieve the specified learning outcomes and for making curricular improvements based on departmental assessment data.

Non-Native Speakers of English: Students admitted to the university whose first language is not English are required to take the English Placement Test before the beginning of their first semester of enrollment as students at Iowa State. This requirement includes freshmen as well as those who have transferred credit from other institutions. The test is administered by the English Department and is offered before the beginning of each semester. Students whose performance on this placement examination is satisfactory will follow the regular university communication proficiency requirements. Students who have deficiencies will enroll in special English classes, as determined by the test results.

Library Study
Independent study and investigation through the use of books, journals, and libraries enable students to grow intellectually and professionally in college and afterward. For this reason, all students receive instruction in the use of the University Library, including practice in how to locate the published literature of their respective fields of study.

U.S. Diversity and International Perspective Requirements
One of Iowa State University’s goals is to prepare its students to meet the challenges of responsible citizenship and effective professional roles in a culturally diverse global community. To help achieve this goal, all undergraduate students must fulfill graduation requirements in two areas: U.S. Diversity and International Perspectives. The specific standards used to certify students’ fulfillment of these requirements vary from major to major, but all require three credits of course work (or the equivalent in some alternative academic experience) for each of the requirements. In most cases, courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements of the student’s college or requirements of the student’s major. Students should consult with advisers for details of the requirements in particular majors.

The focus of the U.S. Diversity requirement is the multicultural society of the United States. Courses or alternative academic work used to meet the requirement address significant manifestations of human diversity and provide students with insights that enhance their understanding of diversity among people in the U.S.

Through completion of the U.S. Diversity requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:
- articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
- analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
- analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
- analyze the perspectives of groups and individuals affected by discrimination
- analyze how cultural diversity and cooperation among social groups affect U.S. society.

The focus of the International Perspectives requirement is the global community. Its objective is to promote students’ understanding of cultural diversity and interdependence on a global scale. A period of immersion in a foreign culture is often a particularly effective way of meeting these objectives, so Iowa State University encourages the use of study-abroad experiences as a means of fulfilling the International Perspectives requirement. International students, because they are “studying abroad” from their home country’s perspective, are normally deemed to have met the International Perspectives requirement.

Through completion of the International Perspectives requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:
- analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
- describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
- analyze and evaluate the influence of global issues in their own lives.
- describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events.
- communicate competently in a second language.

Curriculum Requirements
The curriculum requirements, both in number of credit hours and specific courses, are guidelines for the student and his or her adviser in planning an academic program. The curriculum is subject to change and because of these changes, adjustments may need to be made.

Catalog in Effect
A student may choose to graduate under the catalog in effect at the time of graduation, or one of the two immediately preceding catalogs, provided it covers a period of his or her enrollment. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed.

Special Programs
Honors Program
The Iowa State University Honors Program is designed for students who have demonstrated the ability and motivation to assume more than the usual responsibility for their undergraduate education. The goal of the program is to enable Honors students to gain maximum benefit from their undergraduate education. Students who graduate in the Honors Program receive the Honors designation on their transcripts and on their baccalaureate diplomas.

Special educational opportunities. Students in the Honors Program determine their educational objectives and devise an individualized program of study to meet those objectives. An honors program may include substitutions for required courses, combinations of courses from several departments to form a new major or minor, Honors courses or seminars, independent study and research, and other forms of innovation. Information about Honors courses and seminars for the current academic year can be obtained from the Honors Program Office, 2130 Jischke Honors Building.

Other benefits. Members of the Honors Program have 24-hour access to the Honors building as a quiet place to study, use the computers, and visit with other Honors students. Students also have off-campus opportunities such as attending Honors seminars and Wingspread conferences. Members receive extended loan privileges at the Library, priority scheduling, and the opportunity to apply for research funds.

ISU Students who have a cumulative grade-point average of at least 3.35 become eligible to apply for admission to the Honors Program during their second semester in residence and continue to be eligible for admission as long as they have at least 48 semester credits remaining before graduation. Transfer students with a transfer G.P.A of 3.5 or higher and more than 60 credits remaining are eligible to apply.
Departments of the College
Agricultural Education and Studies
Agricultural and Biosystems Engineering
Agronomy
Animal Science
Biochemistry, Biophysics, and Molecular Biology
Ecology, Evolution, and Organismal Biology
Economics
Entomology
Food Science and Human Nutrition
Genetics, Development and Cell Biology
Horticulture
Natural Resource Ecology and Management
Plant Pathology
Sociology

Students enrolled in the College of Agriculture and Life Sciences are provided a broad-based education that includes coursework in communications; biological, physical, and social sciences; humanities; and technical subject matter.

Upon graduation students find diverse career opportunities because of the well balanced education they have received as undergraduates. Opportunities for graduates include production agriculture, business and industry, public agencies, education, biological and environmental sciences, value-added processing, natural resource management, rural development, animal and human health professions, and graduate studies.

High School Preparation
Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra and geometry, and advanced algebra; three years of science which must include one year each of biology and chemistry, or biology and physics, or chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.

Majors in the College of Agriculture and Life Sciences

A student has many majors from which to choose. Each major is unique although many courses are common. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits. Options and areas of specialization further define the majors and required coursework within some majors. In all cases, majors are designed to help students succeed in their chosen professions. Majors in agriculture and life sciences are:

Primary Majors
Agricultural Biochemistry
Agricultural Business
Agricultural and Life Sciences Education
Agricultural Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biochemistry
Biometry
Culinary Science
Dairy Science
Dietetics
Diet and Exercise
Environmental Science
Food Science
Forestry
Genetics
Global Resource Systems
Horticulture
Industrial Technology
Insect Science
Microbiology
Nutritional Science
Public Service and Administration in Agriculture

Secondary Majors
Environmental Studies
International Agriculture
Seed Science

A secondary major must be taken in conjunction with a primary major.

Minors
Agricultural Biochemistry
Agricultural Education and Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biometry
Emerging Global Diseases*
Entrepreneurial Studies*
Environmental Science
Environmental Studies
Food Safety*
Food Science
Forestry
Genetics
Horticulture
Industrial Technology
Insect Science
International Agriculture
Meat Science
Microbiology
Nutrition

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

Certificate
Occupational Safety
See statement on minors in the Colleges and Curricula section of this catalog.

Special Programs

Agriculture Exploration
Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the Student Services Office until they select their majors.

Preventive Medicine

Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with preventive medicine (see College of Veterinary Medicine section of this catalog for specific admissions requirements). Students who are undecided about choice of major may enroll in general preventive studies (Gen PV). These students will also enroll in an orientation course, which describes the various college majors. A Gen PV student has up to 1.5 semesters to select a major.

Preventive medicine students also have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission to the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an individual major. Students also may meet degree requirements of an individual major through the College of Agriculture and Life Sciences Honors Program. Further details are available from an academic adviser or from members of the College of Agriculture and Life Sciences Honors Committee.

Honors Program

The College of Agriculture and Life Sciences Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

Off-Campus Programs

Coursework leading to a master of science degree in agricultural education, master of agriculture degree in professional agriculture and a master of science degree in agronomy are offered to students who choose to study off-campus; see Extended and Continuing Education for further information.
**Study Abroad and International Travel Opportunities**

Agriculture and life sciences are part of a highly interconnected global system; decisions made in one sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture and Life Sciences provides study abroad and international internship opportunities in more than 25 countries around the world. For additional information, contact the Office of Global Agriculture Programs in the College of Agriculture and Life Sciences.

**Internships and Cooperative Education Programs**

Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For more information, contact a departmental adviser or internship coordinator.

**College of Agriculture and Life Sciences Core Curriculum and Electives**

All curricula in the College of Agriculture and Life Sciences lead to a bachelor of science degree. Each major has specific degree requirements for graduation based on department and college student learning outcomes. College of Agriculture and Life Sciences core curriculum requirements for the four areas listed below are established to provide the foundation for successful accomplishment of both departmental and college level learning outcomes.

Students pursuing a primary major in another college and taking a second major in the College of Agriculture and Life Sciences must fulfill the core curriculum requirements of the College of Agriculture and Life Sciences, and all the requirements of the second major. The College of Agriculture and Life Sciences core curriculum follows.

All students graduating with majors within the College of Agriculture and Life Sciences are expected to be proficient in the following college-level outcomes:

**Professional, Interpersonal and Cross-cultural Communications**

- Speak and write clearly and persuasively.
- Prepare effective visual, oral, written and electronic presentations.
- Effectively read, listen, observe and reflect.

**Problem-Solving/Critical Thinking**

- Apply a holistic approach to solving complex issue laden problems.
- Apply a rational and objective process to: -Distinguish verifiable facts from value claims, -Determine the accuracy of statements, -Identify assumptions and detect bias, -Distinguish relevant from irrelevant information, -Prioritize needs.

- Summarize, analyze, and interpret simple research data and policy issues.

**Leadership**

- Organize, facilitate, and participate effectively in a group, team, or organization.
- Define a problem or opportunity, implement an action planning process, work towards a goal and justify actions taken.

**Entrepreneurship**

- Demonstrate innovativeness and creativity regardless of context.
- Identify and pursue opportunities that produce value.
- Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

**Life-long learning**

- Articulate how continued learning after graduation will enrich their lives.
- Identify and participate in new areas for learning beyond the classroom and after graduation.

**Ethics**

- Define and assess their ethical perspective, moral responsibility, and values.
- Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

**Environmental Awareness**

- Explain the physical and biological interactions within ecosystems.
- Explain how human activities impact the environment and how societies are affected by environmental change.

**International/Multi-Cultural Awareness**

- U.S. Diversity – Students should achieve two of the following outcomes. They should be able to:
  - Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues,
  - Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.,
  - Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.,
  - Analyze the perspectives of groups and individuals affected by discrimination,
  - Analyze how cultural diversity and cooperation among social groups affect U.S. society.
- International Perspectives – Students should achieve two of the following outcomes. They should be able to:
  - Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview,
  - Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve,
  - Analyze and evaluate the influence of global issues in their own lives,
  - Describe the values and perspectives of cultures other than their own and discuss how they influence individuals' perceptions of global issues and/or events,
  - Communicate competently in a second language.

In addition to the College level learning outcomes, each department within the college has additional discipline-specific outcomes that apply to graduates of that department.
**Electives**

Students use electives to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog). Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the curriculum in which they expect to graduate. Students in ROTC may apply ROTC credits toward elective requirements.

**Advising**

Each student in the College of Agriculture and Life Sciences works closely with an academic adviser who is associated with the major in which the student is enrolled.

All entering students are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisers in planning their first semester schedule of classes.

The advisers also assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information on career choices. Advisers make a special effort to adjust course schedules in accordance with students’ interests and capabilities.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture and Life Sciences. This may be accomplished through several majors; however, it is recommended that the student work closely with an academic adviser.

Each department prepares a guide to help students chart their long-term programs and to specify the exact requirements for graduation. Visit the college web site www.ag.iastate.edu.

**Graduate Study**

Graduate study in agriculture is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdepartmental offerings:

- Biorenewable Resources and Technology
- Ecology and Evolutionary Biology
- Environmental Science
- Genetics
- Immunobiology
- Microbiology
- Molecular, Cellular, and Developmental Biology
- Neuroscience
- Nutritional Sciences
- Plant Biology
- Professional Agriculture (off-campus)
- Seed Technology and Business
- Sustainable Agriculture
- Technology and Social Change (interdepartmental minor)
- Toxicology

For details, consult the Graduate College section of this catalog.

### Curriculum in Agricultural Business

Administered by the Department of Economics. Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture and Life Sciences, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service.

13 Mathematics

- Math 160, Econ 207 or Math 165, Econ 207, or Math 165, 166 |
|     | Stat 226, 326 |

4-5 Physical Sciences

- Chem 163-163L or Phys 111 |

6 Life and Environmental Sciences

- Biol 101 or 211 |

NREM 120 or Biol 173 or other credits that meet the environmental intensive requirement

15 Social science, humanities, and ethics

Courses in individual areas below may overlap but the total credits taken must equal 12 or more

Ethics

International Perspectives

U.S. diversity

Humanities (if the student has taken a humanities course among the ethics, international perspectives, or U.S. diversity requirements, the humanities requirement may be fulfilled by taking a course in a social science other than economics)

12 Business

- Acct 284, 285 |
|     | Fin 301 |

One of the following: Mgmt 310, 370, Mkt 340, MIS 330, OSCM 320, or LSCM 360

6 Electives in agricultural, food, or natural resources sciences

26.5 Economics

- Econ 101, 101L, 110, 235, 301,302 or 353 |

Twelve credits in economics courses selected from an approved departmental list

32-33 Free electives

128 Total credits
**Typical Program for the First Year**

**Cr.** Fall
- 4 Microeconomics—Econ 101, 101L
- 0.5 Orientation in Agricultural Business—Econ 110
- 4 Mathematics I—Math 160 or 165
- 3 Elective in agricultural, food, or natural resource science.
- 3 Critical Thinking and Communication—Engl 150

**Cr.** Spring
- 3 Intro. to Agricultural Markets—Econ 235
- 3-4 Mathematics II—Econ 207 or Econ 235
- 3 Macroeconomics—Econ 102
- 3 Environmental Biology—Biol 173
- 3 Agricultural, Food, or Natural Resources Science Course

**Communications Option**

**Cr.** Degree Requirements
9.5 Interpersonal and public communication skills—Engl 150, 250, Lib 160, AgEds 311

23-24 Mathematical, physical, and life sciences—Chem 163, 163L or 177, 177L; Biol 211, 212; BMBB 221 or Phys 106; life science elective (3 cr.); 6 credits at the 300-400 level.

18 Humanities, ethics, and social sciences—Econ 101 or 102; psychology elective (3 cr.); ethics elective (3 cr.); and life sciences—humanities elective (3 cr.).

32 Agricultural sciences and economics—10 credits in a selected area of agricultural sciences and economics including 6 credits at the 300-400 level; 6 cr. each in two additional areas of agricultural sciences and economics electives (10 cr.)

32.5 Professional communications—AgEds 110A, 211, 215, 315, 412

18 Electives

**Typical Program for the First Year**

**Cr.** Fall
- 0.5 Orientation—AgEds 110A
- 3 Critical Thinking and Communication—Engl 150
- 3 Probability and Matrices—Math 104 or Discrete Mathematics for Business and Social Sciences—Math 150
- 3 Principles of Micro Economics—Econ 101
- 3 Principles of Biology I—Biol 211
- 1 Principles of Biology Laboratory—Biol 211L
- 2 Survey of the Animal Industry—An S 114
- 2 Working with Animals—An S 114
- 0.5 Library Instruction—Lib 160

**Cr.** Spring
- 3 Statistics—Stat 104
- 3 Principles of Agronomy—Agron 114
- 3 Introduction to Instructional Technology—C I 201
- 3 Introduction to Agricultural Markets—Econ 235
- 3 Principles of Biology II—Biol 212
- 1 Principles of Biology Laboratory—Biol 212L

**Curriculum in Agricultural Education**

Administered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.

**Teacher Certification Option**

**Cr.** Degree Requirements
12.5 Interpersonal and public communication skills—Engl 150, 250; written communications elective (3 cr.); speech elective (3 cr.);

20 Mathematical, physical, and life sciences—Chem 163, 163L or 177, 177L; Math 104 or 150; Stat 104; Biol 101 or 211; life science elective (6 cr.)

18 Humanities, ethics, and social sciences—Econ 101; AgEds 315; from approved lists: 3 cr. in ethics; 3 cr. in interpersonal perspectives; 3 cr. in U.S. diversity; humanities electives (3 cr.)

43.5 Agricultural sciences and economics—AgEds 110B, 215, 450; Agron 114, 154, 212; An S 114 and 110, electives (6 cr.); Econ 235, 330; Ent electives (2 cr.); 300-400 level agricultural sciences and economics electives (9 cr.); electives from the College of Agriculture (2cr.).

**Other required courses**
- 3 Acct 284
- 31 Electives
- 128 Total credits

**Typical Program for the First Year**

**Cr.** Fall
- 0.5 Orientation—AgEds 110B
- 2 Survey of the Animal Industry—An S 114
- 2 Working with Animals—An S 101
- 3 Introduction to Probability and Matrices—Math 104 or Discrete Mathematics—Math 150
- 3 Critical Thinking and Communication—Engl 150
- 3 Social science elective
- 3 Introductory Biology—Biol 101
- 0.5 Library Instruction—Lib 160

**Cr.** Spring
- 3 Principles of Agronomy—Agron 114
- 3 Principles of Microeconomics—Econ 101
- 3 Life science elective
- 3 Humanities elective
- 3 Statistics—Stat 104

**Preveterinary Studies**

Preparation for admission to veterinary medicine may be accomplished through the agricultural studies curriculum.
Curriculum in Agricultural Systems Technology

Administered by the Department of Agricultural and Biosystems Engineering. A minor in agricultural systems technology is available; the requirements appear under Technology Systems Management, Courses and Programs.

Students majoring in Agricultural Systems Technology choose between two options: Agricultural and Biosystems Management or Machine Systems.

Agricultural and Biosystems Management Option

5. Survey of Calculus—Math 160

Curriculum in Agronomy

Students majoring in agronomy study crop, soil, and environmental sciences under one of five options: agroecology; agronomy management and business; plant breeding; research and development; or soil and environmental science. A minimum of 15 credits in agronomy courses must be earned at Iowa State.

**R Practical experience requirement (NREM 104)**

Students majoring in Animal Ecology are required to choose one of the following options by the end of their sophomore year: Aquatic Sciences, Fisheries, Interpretation of Natural Resources, Prevetinary and Wildlife Care, or Wildlife.

### Options

**Cr.**

34 Aquatic Sciences

A Ecl 418, 486, 486L; Math 160 or 165, or 181; NREM 407; remaining credits to complete 34 total from approved list.

34 Fisheries

A Ecl 321, 440, 441, 486, 486L; Math 160, 165, or 181; remaining credits to complete 34 total from approved list.

33 Interpretation of Natural Resources

A Ecl 366, Biol 366, Ent 370, NREM 303, 330, 430; one course from For 356 or Biol 474; one course from Agron 154, 206, Astro 120, Geol 100, 101, or Geol 108/Env S 108; remaining credits from approved list to equal 33 total.

33 Prevetinary and Wildlife Care

An S 214, NREM 330; one course from An S 336 or Biol 364; one course from Anth 438, BMS 329, 415 and 416; Biol 155, 235, 351, 352, 434; one course from An S 331, Biol 313, 423, or Gen 320; one course from A Ecl 366, 458, 459 (one of the 400-level courses preferred for prevet students); three or more credits from A Ecl 401, 442, 454

An S 319, 493, Micro 201 and 201L, or Biol 353; 3 credits of A Ecl or NREM coursework at 300-level or above; remaining credits to complete 33 total from approved lists.

### Prevetinary Studies

Preparation for admission to veterinary medicine may be accomplished through the animal ecology curriculum. The Prevetinary and Wildlife Care option has been designed for this purpose.

### Curriculum in Animal Science

Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science (AnS) from Iowa State University (ISU) a minimum of 15 credits in AnS must be earned from courses taught in the AnS department at ISU. Students desiring to complete a minor in AnS must complete 17 credits in AnS courses from a list maintained in the department, and a minimum of 9 credits in AnS must be earned from courses taught in the AnS department at ISU.

**Cr.**

**Degree Requirements**

12.5 Interpersonal and public communication skills

Engl 150, 250, 302 or 309 or 314; Sp Cm 212 or AgEdS 311 or ComSt 214; Lib 160; and communications-intensive requirement*
Typical Program for the First Year

Cr. Fall
1 Orientation in Animal Science—An S 110
2 Working with Animals—An S 101
3 Principles of Biology—Biol 211L
4 Critical Thinking and Communication—Engl 150

1 General Chemistry Lab—Chem 177L or 183L
3 Communications—Sp Cm 212 or AgEdS 311 or ComS 214
3 Statistics—Stat 101 or 104 or 226
3 Humanities elective

Pre-veterinary Studies
Preparation for admission to veterinary medicine may be accomplished through the animal science curriculum.

Curriculum in Biology
Administered by the Department of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology.

Cr. Degree Requirements*
9.5 Interpersonal and public communication skills
Engl 150, 250; oral communication
Sp Cm 212; Lib 160
7 Mathematics
7 credits of Math or Statistics, to include one semester each of Calculus and Statistics.
25 Physical sciences
25 credits selected from an approved list of chemistry, biochemistry and physics. List available on Biology Program web site.

24 Biological sciences core
Biol 110, 111, 211; 211L; 212, 212L, 312, 313, 313L, 314, 314L, 315
20 Advanced biology courses
20 credits in approved biology courses numbered 300 and above from department-approved list; 8 credits must be taken from biology designator; minimum of two laboratory or field courses must be included.
15 Humanities and social science
3 cr. in humanities, social sciences, ethics, international perspectives and U.S. diversity chosen from an approved list. The environmental intensive requirement is met by the core requirement of Biol 312.
17-20 Free electives
120 Total credits

Typical Program for the First Year

Cr. Fall
0.5 Orientation in Biology—Biol 110
3 Critical Thinking and Communication—Engl 150
5 General Chemistry—Chem 163, 163L or 183L

41 Food science and human nutrition
FS HN 101, 110, 167, 203, 214, 265, 311, 403, 405, 406, 411, 412, 420, 471, 480

6 Business
Mkt 340 and 447

0-3 Electives
120.5 Total credits

*Additional degree requirements: Students must fulfill international perspectives and U.S. diversity requirements by selecting coursework from approved lists.

Concurrent B.S. and M.S. Program:
Well qualified students in Food Science who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a bachelor of science in Food Science and a master of science degree in Food Science and Technology. For more information, refer to www.fshn.hs.iastate.edu

Curriculum in Forestry

Cr. Degree Requirements

12.5 Interpersonal and public communication skills
Engl 150, 250, 314, or 302 or 309; Lib 160, Sp Cm 312

22 Mathematical, physical, and life sciences
Math 140, 150; Stat 101 or 104; Chem 163, 163L; Biol 211, 211L; Agron 154

15 Humanities, ethics, and social science
3 cr. in humanities; 3 cr. in ethics from approved list; Soc 130 or 134 and 3 cr. in U.S. diversity and 3 cr. in international perspectives

29 Forestry courses
For 201, 202, 203, 204, 205, 206, 302, 451, 454; NREM 110, 120, 211

R Practical experience requirement
NREM 104

Students majoring in forestry are required to choose one of the following options at the end of their sophomore year: forest ecosystem management; sustainable material science and technology; urban and community forestry; natural resource conservation and restoration; or interpretation of natural resources.

Options

Cr.

40 Sustainable Materials Science and Technology
Chem 231, 231L, Econ 101, For 280, 480, 481, 483, 485, 486, 487; Math 151; Mkt 340, Stat 401

35 Forest Ecosystem Management
Biol 212, 212L, For 280, 342, 356, 452; one course from NREM 385, 460; For 453; Math 151 or 181; NREM 301, 345; PI P 416

37 Urban and Community Forestry
Biol 212, 212L; For 280, 356, 452, 475; Hort 342 or 344; one course from NREM 385, 460 or For 453; Math 151 or 181; PI P 416; Soc 310 or 382; C R P 253 or 270

44 Natural Resource Conservation and Restoration
A Ecl 312; Biol 212, 212L, 204; For 356, 452; one course from NREM 385, 460 or For 453; Math 151 or 181; NREM 301, 330, 390, 407; PI P 416; 3 credits from approved departmental list

34 Interpretation of Natural Resources
A Ecl 365 and 366; Biol 212, 212L, 236, Ent 370, NREM 303, 330, 430; For 452, one course from (For 453 or NREM 460 or 385); one course from Agron 206; Astro 120, Geol 100, 101, 108; select remaining credits to complete 34 credits from approved departmental list.

5.5-15.5 Free electives
128 Total credits

Typical Program for the First Year

Cr. Fall
3 Critical Thinking and Communication—Engl 150
R Orientation in Natural Resource Ecology and Management—NREM 110
3 College Algebra—Math 140
3 Principles of Biology I—Biol 211
1 Principles of Biology Laboratory I—Biol 211L
3 Introduction to Renewable Resources—NREM 120
3 Social Science—Soc 130 or 134

16 Cr. Spring
3 Foundations of Soil Science—Agron 154
0.5 Library—Lib 160
3 or 4 Statistics—Stat 101 or 104
4 General Chemistry I—I-Chem 163
1 General Chemistry Lab I—Chem 163L
3 or 4 Wood Properties and Identification—For 280 or U.S. Diversity/International Perspectives

14.5 or 16.5

Curriculum in Genetics

Undergraduate study in genetics is jointly administered by the Department of Biochemistry, Biophysics, and Molecular Biology, the Department of Genetics, Development, and Cell Biology, and the Department of Ecology, Evolution, and Organismal Biology.

Cr. Degree Requirements

12.5 Communications
Engl 150, 250; an advanced English writing course (Engl 302-316); oral communication (AgEdS 311, Sp Cm 212; Lib 160

11 Math
Must include at least one course from both calculus and statistics chosen from Math 160, 165, 176, 181, 182; Stat 101 or 104, 401, 402, 403

3 Computer Studies
Three credits in computer science or computer applications chosen from an approved list. See department for list.

31 Physical sciences
Chem 172, 177L, 178, 178L (or 211), 331, 331L, 332, 332L; BBMB 404 or 420; Chem 211 or 321 or BBMB 405 or 411; Physics 111, 112 or 221, 222

23 Biological sciences
Biol 211, 211L, 212, 212L, 313, 313L, 314L, Micro 302; Biol 315

15 Humanities, ethics, and social sciences
15 credits including at least 3 cr. each in the humanities, social sciences, ethics, international perspectives and U.S. diversity chosen from an approved list. The environment-intensive and problem solving-intensive college requirements can be satisfied by selection of appropriate courses. See department for lists.
### Curriculum in Horticulture

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Specialization Options.

A horticulture minor is available. The requirements appear under Horticulture, Courses and Programs.

#### Cr. Degree Requirements

12.5 Interpersonal and Public Communication Skills  
Engl 150, 250, 302 or 314; Lib 160; Sp Cm 212 or AgEdS 311; and a communications-intensive requirement (see department for procedure)

6-9 Mathematical sciences  
Math 140 or 150 or 165 or 181; and Stat 101 or 104 or 226 or 401

13 Physical sciences  
Chem 163, 163L or 177, 177L; and 231, 231L, or 331, 331L; and one complete course from: Chem 164, 164L, 178, 178L; or Phys 106 or 111. A student must take either (1) Chem 163/163L and 164/164L series and Chem 231/231L series or (2) Chem 177/177L and 178/178L series and Chem 331/331L. A student may take Phys 106 or 111 instead of Chem 164/164L or 178/178L.

18 Biological sciences  
Biol 211, 211L, 212, 212L select 10 credits from the following group: Agron 260, 316, 317, 354, 354L, Biol 312, 314, 314L, 330, 355, 366, 454, 474; Ent 370, 375, 376; For 416; Pl P 391, 408; Gen 320 or Biol 313, 313L.

15 Humanities, ethics, and social sciences  
One 3-credit course from an approved list in each of the following areas: humanities, ethics, social science, U. S. diversity, and international perspectives; see department for procedure for meeting problem-solving, environmental-intensive, and communication-intensive requirements.

3 Soil science  
Agron 154 or 155

30 Horticulture  

Specialization Options  
(A minor in an approved area of study may be substituted for the Specialization Option with permission of student's adviser)

12 Environmental horticulture option:  
Hort 424 must be among the courses that fulfill the horticulture requirement. Other recommended course is Hort 484. The student must
take Biol 312 and 9 or more credits from the following group: Agron 260, Biol 355, Econ 334, Ent 375, Env S 293, 324, 382, 450, 460, 491; TSM 324, 424.

12 Fruit and vegetable production and management option: Hort 422, 445, 461, 471 and 471L must be among the courses that fulfill the horticulture requirement. Act 284; and 9 or more credits from the following group: Act 215, 285, 316; Com S 103; Econ 230, 334; FS HN 272, 403, 405, 471, 472; Mgmt 310, 313, 370, 371; Mkt 340, 442, 446, 447; TSM 270.

12 Greenhouse production and management option: Hort 233, 322, 330, 332, 422, 434, 435 and 445 must be among the courses that fulfill the horticulture requirement. Act 284; and 9 or more credits from the following group: Act 215, 285, 316; Com S 103; Econ 334; Ent 375; Mgmt 310, 313, 370, 371; Mkt 340, 442, 446, 447.

15 Horticultural communications and public education: Students in this option must take Engl 314 under Interpersonal and Public Communications Skills and a minimum of 12 credits from the following group: ComSt 102, 214, 317; Engl 220, 303, 305, 313; JI MC 201, 220, 310, 341, Sp Cm 312, 313.

12 Landscape Design, Installation and Management option: Hort 240, 280, 350, 341, 342, 351, 380, 381, 444, 446, 480 and 481 must be among the courses that fulfill the horticulture requirement. Up to 3 credits can be used in the biological sciences area. Another recommended course is Hort 445. Act 284; and 9 or more credits from the following group: Act 215, 285, 316; Mgmt 310, 313, 370, 371; Mkt 340, 343, 442, 447; TSM 324.

12 Nursery crops production and garden center management option: Hort 240, 322, 330, 341, 342, 351, 442, and 445 must be among the courses that fulfill the horticulture requirement. Act 284; and 9 or more credits from the following group: Act 215, 285, 316; Agron 208; Com S 103; Econ 230, 334; EnSci 446 or 4611; Mgmt 310, 313, 370, 371; Mkt 340, 442, 446, 447; TSM 270.

12 Public garden management and administration option: Hort 233, 240, 262, 322, 330 and 445 must be among the courses that fulfill the horticulture requirement. Other recommended courses are Hort 280, 332, 341, 342, 351, 351L, 380 and 381. The student must select a minimum of 12 credits from the following: Act 284, 285, 316; Econ 334; Engl 303, 309, 313, 415; EnSci 446 or 4611; Fin 301; JLMC 220; Mgmt 310, 313, 370, 371 471; Sp Cm 312, 313.

12 Science option: Those who choose the Science Option must take: Biol 330 for part of the biological sciences requirement; Math 165 or 181 for the mathematical sciences requirement; Chem 177, 177L, 178, 178L, 331, 331L, 332, 332L, Phys 111 and 112 for the physical sciences requirement. BBMB 301 or 404, Math 166 or 182; and 5 or more credits from the following group: BBMB 311, 404, 405, 411; Biol 313, 313L, 314, 314L, 315; Chem 211, 211L, 316, 316L, 321L, 322L, 324; Com S 107, 207; Gen 409, 410.

12 Turfgrass management option: Hort 240, 351, 351L, 445, 451, 452, 453 and 551 must be among the courses that fulfill the horticulture requirement. Other recommended course: Hort 330. Act 284 and 9 or more credits from the following group: Act 285, 316; Agron 206, 260, 317, 338, 356, 360, 459; Com S 103, Econ 334; Ent 375; Env S 201, 324; EnSci 446 or 416I; HRI 289; Mgmt 370, 371; PI P 393; TSM 270, 324, 424; additional business courses may be used with permission of adviser.

Curriculum in Industrial Technology

Administered by the Department of Agricultural and Biosystems Engineering.

An undergraduate certificate in occupational safety is available; the requirements appear under Technology Systems Management courses and programs. A minor in Industrial Technology is available; the requirements appear under Technology Systems Management courses and programs.

Students majoring in Industrial Technology choose between two options: Manufacturing or Occupational Safety.
Typical Program for the First Year

Cr. Fall
1 Introduction to Technology—TSM 110
3 Trigonometry and Analytic Geometry—Math 142
3 Critical Thinking and Communication—Engl 150
5 General Chemistry—Chem 163, 163L
3 Life science elective
0.5 Library Instruction—Lib 160

Cr. Spring
1 Experiencing Technology—TSM 111
3 Solving Technology Problems—TSM 115
3 Principles of Microeconomics—Econ 101
4 General Physics—Phys 111
4 Survey of Calculus—Math 160

Curriculum in International Agriculture

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture and Life Sciences. A minor is available to interested students regardless of their major.

Cr. Degree Requirements (Additional prerequisites may be required for some courses.)

12.5 Interpersonal and public communication skills
Engl 150, 250; Sp Cm 212 or AgEdS 311; Lib 160; electives (3 cr.) select from Engl 302 or 314, or BI MC 205

19 Mathematics, physical, and life sciences
Math 150, Chem 163, 163L, or Chem 177, 177L; math or physical science electives select from BBMB, Chem, Com S, Math, Phys, or Stat (5 cr.); biological sciences electives select from Biol, Gen, Micro, or PI P (6 cr.) and demonstration of computer proficiency (See primary major department.)

15 Humanities, ethics, and social sciences
Soc 130 or 134, or Econ 101; 3 cr. in ethics; 3 cr. in U.S. diversity; 3 cr. in international perspectives

15 International Agriculture
Internship in International Agriculture or Study Abroad Program or Foreign Language (6cr.)
3 Agron 342
Select courses with international agriculture focus in any major in the College of Agriculture and Life Sciences (6 cr.) (See Supervisory Committee list)

66.5 Primary major requirements and free electives
128 Total credits

Program for the First Year

Because international agriculture is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).

Curriculum in Insect Science

Cr. Degree Requirements

12.5 Interpersonal and public communication skills
Engl 150, 250, 314; Sp Cm 212; Lib 160
3 Mathematical and physical sciences
Chem 163, 163L

14 Life sciences
Biol 211, 211L, 212, 212L, 312; Micro 201, 201L
15 Humanities, ethics, and social science
Econ 101; 3 cr. in humanities; from approved lists: 3 cr. in ethics; 3 cr. in international perspectives; 3 cr. in U.S. diversity requirement

19 Entomology
Ent 110, 201, 211, 211L, 370, 374, 376; 490E; Ent electives; for students entering entomology with one year or more of college-level biological sciences courses, Ent 201 and 211 are waived, and the group requirement reduced to 16 cr.

Students majoring in Entomology are required to choose one of the following options by the end of their sophomore year; Agricultural and Horticultural Insect Management, or Insect Biology.

Agricultural and Horticultural Insect Management Option

Cr. Degree Requirements

5 Mathematics
Math 140, 141
13 Physical Sciences
Chem 163, 163L, 231, 231L; Phys 106
6 Biological Sciences
BBMB 301; Biol 330
12 Agricultural Sciences
Agron 114 or Hort 221; Agron 154 or 155, 317; PI P 408
5 Entomology
Ent 283, 375
6 Social Sciences
Acct 215; Econ 235
17.5 Free electives

Insect Biology Option

Cr. Degree Requirements

4 Mathematics
Math 181
28 Physical Sciences
Chem 177, 177L, 178, 178L, 211, 211L, 331, 331L, 332; Phys 111, 112

Management
Marketing

Objectives of the Curriculum in Business

The instructional objective of the College of Business is to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the affect of diversity in the work place; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

The curriculum in business is accredited by the International Association for Management Education (AACSB), the national business accrediting agency.

Organization of Curriculum

The undergraduate curriculum in business is divided into two phases: a general education (pre-business) program and a professional program. The pre-business requirements provide a broad foundation in the liberal arts. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The eight majors offered for the degree bachelor of science (B.S.) are accounting; finance; management; management information systems; marketing; logistics and supply chain management; operations and supply chain management; or business economics.

Required High School Preparation

Students entering the pre-business curriculum must present evidence of the following high school preparation:

a. Four (4) years of English/Language Arts, emphasizing writing, speaking, and reading as well as an understanding and appreciation of literature.

b. Three (3) years of mathematics, including one year each of algebra, geometry, and advanced algebra.

c. Three (3) years of science, including one year each of courses from two of the following fields: biology, chemistry, and physics.

d. Two (2) years of social studies.

Admission Standards to Professional Programs

All new entering students are enrolled in the pre-business curriculum. To enter the professional program in the College of Business, students must complete any Engl 101 courses, Engl 150, and the following foundation courses or their approved substitutions: Math 150, Econ 101, Econ 102, Stat 226, Acct 284, and BusAd 101. See Curriculum in Business.

In addition, all students must achieve an Iowa State University cumulative grade point of 2.5 or a grade-point average of 2.5 in the foundation courses. Admission into the professional program is a prerequisite for pre-business students to gain admission into upper-level business classes.

Students who meet the following requirements qualify for early admission to the professional program. First Semester Freshman: ACT score of 30 or higher, or ranked in the top 5% of high school class, or National Merit/Achievement Finalist, or member of the Freshman Honors Program. All other Students: minimum ISU cumulative GPA of 3.35 in at least 12 credits, or full member of the University Honors Program.

If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If foundation courses initially taken at Iowa State University need to be repeated, they must be repeated at Iowa State University. With the exception of Acct 285 and MIS 330, pre-business students do not have access to business core classes. To facilitate registration, qualified students may be conditionally admitted during the semester in which they complete the admission requirements.

Admission requirements are subject to change. Applications and the current requirements for admission to the College of Business are available on the Web at https://apps.bus.iastate.edu/ProfessionalProgram/ or from the Undergraduate Programs Office in the College of Business.

Academic Standards and Graduation Requirements

Policies for students enrolled in the College of Business may be obtained on the Web at http://www.business.iastate.edu/undergraduate/ or from the Undergraduate Programs Office in the College of Business.

Students are responsible for knowing and adhering to these College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2009-2011 catalog:

(1) A minimum of 122 semester credits are required.

(2) At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year college.

(3) At least 50% of the 122 credits required for graduation must consist of general education (non-business credits).

(4) A minimum of 12 credits of the last 32 credits earned in residence must be applied to the business core and/or the major.

(5) The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.

(6) Students must achieve Communication proficiency by earning a grade of C or better in two of the three required English courses.

(7) A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.

(8) A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution.

(9) Business majors may not take business courses Pass-Not Pass (P/NP).

(10) General education courses may not be taken P/NP.

(11) No more than 9 elective credits may be taken P/NP.
Curriculum in Business

The college offers programs of study leading to the degree bachelor of science with a major in accounting; finance; management; management information systems; marketing; logistics and supply chain management; operations and supply chain management; or business economics. The college also offers a secondary major in international business. Total credits required: 122

Advising System

The Undergraduate Programs staff, under the leadership of the Director for Undergraduate Programs, facilitates student progress toward graduation while supporting the academic standards of the College of Business and Iowa State University. To accomplish this, the Undergraduate Programs staff provides services for all College of Business students, including academic advising, learning opportunities, and teaching and developmental activities.

Students in the College of Business have advisors located in the Undergraduate Programs Office. The advisor assists students with developing an academic program; accessing pertinent university resources; and meeting their educational objectives.

The college offers an orientation program for entering students. All entering students and family members are encouraged to attend orientation. During orientation the adviser and the student prepare an appropriate schedule and the student registers for courses. Placement assessments may be required in Mathematics and English to assist in placing students in the appropriate level of courses if this cannot be determined by ACT/SAT scores, high school preparation classes or transfer courses.

Honors

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30, or ranked in the top 5% of their high school classes; or selected as a National Merit or National Achievement finalistic.

Enrolled students who have completed 12 graded credits at Iowa State University and earned a 3.35 can be admitted as a full member of the Honors Program. To qualify for full membership, students must have declared a major, developed a program of study, and have a minimum of 48 credits remaining before graduation. Special advisers will assist honors students in developing an appropriate program of study.

Internships

Credit and non-credit internships in business may be approved for College of Business students in all majors including pre-business. Credit hours and requirements vary. Arrangements must be made in the college prior to the beginning of the internship. An internship adviser from the Career Services Center will assist students in making these arrangements.

Multiple Majors

Undergraduates pursuing a degree in the College of Business may complete additional majors in the College of Business. Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and agricultural business or economics is not permitted. A major in business economics with a minor in economics is not permitted.

Undergraduates with a primary major outside the College of Business who want a second major in business must meet the admission requirements for the professional program as well as complete the following requirements: the business core courses; the major specialization; computer proficiency; Acct 215, and Math 151.

All students pursuing multiple majors or multiple degrees within the College of Business are required to have a minimum of 15 credits of coursework in each additional major that is not used in the other majors.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors with the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Curriculum Changes

Iowa State University students who want to change their curriculum to the College of Business must attend a curriculum change meeting. See Changing Curriculum or Major for more details on this process. Students on Academic Probation will not be allowed to change curriculum to the College of Business during enrollment period three. See Making Schedule Changes.

International Business Secondary Major

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum 6 credits) and an approved international experience (minimum 3 months).

Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor

The College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are ACCT 284, Acct 285 or ACCT 215 or BUSAD 250 (6 credits), three courses selected from Fin 301, Mgmt 370, MIS 330, Mkt 340, LSCM 360, or OSMC 320 (9 credits). The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University. A “C” average or higher is required in all courses used to satisfy the minor requirements. All requirements for the minor must be taken for a grade.

Students with a major in the College of Business may qualify for a minor specialization in one of the college’s departments by taking at least 15 credit hours in the minor specialization, nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students with a major outside the College of Business are eligible for a general business minor only—not a specialization in a business department.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Entrepreneurial Studies Cross-Disciplinary Minor

The College of Business participates in a cross-disciplinary minor in Entrepreneurial Studies. This minor is available to any undergraduate student. Requirements for the minor include Mgmt 310, Mgmt 313 (6 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available in the Undergraduate Programs Office in the College of Business and on the web at http://www.business.iastate.edu/undergraduate/minors/entrepreneurship.

Non-degree Seeking Students

Students who wish to take courses in the College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible to take up to 9 credits in 300-level and above business courses without meeting the college’s admission requirements.
Upper Division Courses for Students Outside the College

Students from outside the College of Business are eligible to take up to 9 credits of 300-level and above business courses without meeting the college’s admission requirements, as long as they meet course prerequisites.

Graduate Study

Four programs are offered at the graduate level: a master of business administration (M.B.A.) program, a master of accounting (M.Acc.), a master of science (M.S.) in business, and a master of science in information systems (M.S.I.S.). These programs are intended to meet distinct sets of educational objectives.

The M.B.A. is the professional management education program for those pursuing careers in business. The purpose of this professional program is to provide professional business education by preparing students to understand the impact of technology on business organizations in a global environment. The M.B.A. program consists of a 48-credit curriculum leading to a non-thesis, non-creative component master of business administration. Students may pursue a specialization in accounting, agribusiness, family financial planning, finance, information systems, international business, supply chain management or marketing.

The master of accounting (M.Acc.) is a 32-hour degree. The program requires 15 hours of graduate accounting courses, at least 9 hours of non-accounting graduate electives, a communications course, and an international course from an approved list. The M.Acc. is appropriate for any student wanting to pursue a variety of accounting careers. Additionally, the program is designed to help interested candidates meet the 150-hour education requirement for CPA certification in Iowa.

The master of science in information systems (M.S.I.S.) is designed to provide students with strong technical skills and a broad background in business needed to effectively develop and manage information systems projects. Using the latest software, students will apply information systems theory and concepts to modern information systems development. Program requirements range from 30-40 credits depending upon the student’s background. The M.S.I.S. curriculum includes business foundation courses, information systems core courses and electives, and a research requirement (creative component).

The M.S. program, consisting of 30 minimum credits, is oriented toward further business specialization at the master’s level for students with undergraduate degrees or academic backgrounds in business. The program is intended to serve those students who desire specialized study of an area within business. Students in the program must complete a thesis. This program is also a suitable vehicle for students planning to pursue a Ph.D. in business.

Double degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P.), information systems (M.B.A./M.S.I.S.), and statistics (M.B.A./M.S.-Statistics). The Department of Logistics, Operations, and Management Information Systems in the College of Business participates in the following graduate level interdepartmental programs: Information Assurance, Human Computer Interaction, Seed Science and Business, and Transportation. The College of Business also offers a business administration minor to students with majors outside the college. A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in civil engineering, computer engineering, electrical engineering, industrial engineering, and mechanical engineering.

Ph.D in Business and Technology

The College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of three specializations—customer management (CM), supply chain management (SCM), or management information technology (MIT). Many departments in the college (Logistics, Operations, Management Information Systems, Marketing and Management), and the departments of Statistics, Economics, Psychology, and Sociology cooperate in providing coursework toward this degree. The program will prepare individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44 credit course curriculum followed by 12 credit thesis or dissertation. Students do not have to have an undergraduate degree or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 credit hours of business foundation courses. For more details or application information see the Business Administration Department listing in this catalog.
Departments of the College

Landscape Architecture

Objectives of the Curricula in Design
The College of Design is among a small, elite number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific environmental design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college’s programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, interior designers, studio artists, arts administrators and environmental designers.

Organization of Curricula
The undergraduate curricula in design are divided into two phases: a pre-professional Core Design Program and a professional program. The Core Design Program grounds the undergraduate degree programs, provides a rich, rigorous inclusive base for the curricula. It creates shared language, experience, and community for programs, faculty and students and exposes students to all design disciplines, allowing them to make more informed degree choices, apply to multiple programs, and experiment with interdisciplinary work.

For students entering the Core Design Program, the college highly recommends purchase of a digital camera.

The intense, discipline-specific professional curricula that follow the Core focus on developing students’ ability and knowledge in their major. Within the major area, students advance creative and professional skills through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

General education, contained in both the Core and the professional programs, is composed to insure that students receive a well-rounded undergraduate education.

High School Preparation
Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended through not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements: 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability; 3 years of mathematics to develop problem solving skills, including 1 year each of algebra, geometry, and advanced algebra; 3 years of science, including at least two of the following: 1 year of biology, 1 year of chemistry, or 1 year of physics; 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government.

Admission Standards to Enrollment
Managed Professional Programs
Admission into the enrollment managed professional programs of Architecture, Community and Regional Planning, Graphic Design, Interior Design, and Landscape Architecture requires separate application after completing the Core Design Program. Students are advised through not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements: 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability; 3 years of mathematics to develop problem solving skills, including 1 year each of algebra, geometry, and advanced algebra; 3 years of science, including at least two of the following: 1 year of biology, 1 year of chemistry, or 1 year of physics; 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government.

Advising
Each student receives personal assistance from an academic advisor within the student’s curriculum area. Students enrolled in the college’s Core Design Program are advised by professional advisers. Once admitted to professional programs, students are assigned to faculty advisers. Advisers help students develop a program of study, access pertinent university resources as well as provide information on career choice.

The college’s career services office works with students to develop their career goals as well as prepare and search for employment.

Honors Program
The College of Design participates in the Honors Program which provides opportunities for outstanding students to individualize their programs of study. See Index, Honors Program.
**Requirements in the College of Design**

All students in the College of Design are expected to meet the following requirements of the college.

**Core Design Program**

*To meet requirements for graduation, a minimum grade of C– must be received.

**Minor in Design Studies**

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University. This minor requires fifteen credits of course work: three credits of history selected from College of Design course offerings and twelve additional credits selected from College of Design course offerings.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the fifteen credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses in their major or in the Core Design Program to satisfy this minor.

**Minor in Digital Media**

Manipulation of digital media has emerged as an essential skill for design inquiry alongside traditional methods of building models and drawing sketches. To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open to all undergraduate students at Iowa State University.

This minor requires 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement; and at least 3 credits from the listed courses numbered 200. Courses taken for this minor may not be taken on a pass-not pass basis.

Students enrolled in the College of Design may not use courses in their major or in the Core Design Program to satisfy this minor.

**Curriculum in Architecture**

The Department offers undergraduate and graduate degree programs:

A 138-credit undergraduate professional program, preceded by a 28-credit preprofessional program, leading to the bachelor of architecture degree.

A 100-credit graduate professional program leading to the Master of Architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in this program. (M.Arch.)

A 30-credit post-professional graduate program leading to the Master of Architecture. (M.Arch. II)

A 30-credit interdisciplinary graduate research program leading to the Master of Science in Architectural Studies. (M.S.A.S.)

For more complete graduate program descriptions see Graduate Study under Architecture in the Courses and Programs section.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master’s degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

### Curriculum in Art and Design—B.A.

Administered by the Department of Art and Design and leading to a 120.5 credit undergraduate Bachelor of Arts degree including a 29.5 credit pre-professional program (college core).

This curriculum offers two concentrations: Art and Culture, and Art and Design History and Theory. Both concentrations are combined with an applied career minor or approved program.

Consideration for admission into the B.A. curriculum is based upon department resources, GPA earned in the college Core Courses and the freshman year.

Transfer students with studio credits from other programs, colleges and universities must present for department review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

*Second major or minor must be approved by the department offering the program of study. See university guidelines for structuring and declaring a second major and/or minor. Credit hours not applied toward a formal second major or minor must be used in a coherent program approved by the Department of Art and Design. Approval for these 30 credits must be documented in writing following completion of 75 credits and before completion of 100 credits toward the B.A. degree.

### Curriculum in Community and Regional Planning

The Department of Community and Regional Planning administers the 129 credit undergraduate program leading to the Bachelor of Science. The curriculum is designed to prepare students to enter the profession of planning ready to work in a variety of professional settings. Students have the opportunity to work with their faculty advisers to define their own areas of interest, which may include a minor.

Consideration for admission into the Community and Regional Planning professional program takes place either through review of the performance in the College of Design’s first year CORE design program, or through transfer from another curricula or accredited institution. If applying through the CORE program, admission is based upon a student’s cumulative GPA for all courses earned during the first year, portfolio work submitted upon completion of the CORE courses, and an essay submission. In either case, predictors of success in the program include the quality of prior work and interest in the field. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking. Students entering the CRP professional program from outside the College of Design should provide a similar portfolio of their work for evaluation.
Curriculum in Graphic Design

Administered by the Department of Art and Design and leading to a 123.5 credit undergraduate Bachelor of Fine Arts in Graphic Design including a 29.5 credit pre-professional program (the college core).

Consideration for admission into the graphic design is based on department resources; GPA earned in the College Core courses and the freshman year, as well as portfolio, all of which are submitted at the end of the freshman year.

On admission to the program, the faculty strongly recommend the purchase of a laptop computer and software. Specifications for the laptop computer and software are available at www.design.iastate.edu under the “Students” link.

Transfer students with studio credits from other programs, colleges, and universities must present for department review a portfolio of work done in those courses in order to have the credits apply toward studio requirements.

Transfer students with studio credits from other programs, colleges, and universities must present for department review a portfolio of work done in those courses in order to have the credits apply toward studio requirements.

On admission to the program, the faculty wishes to pursue studies in digital media and publishing, the faculty strongly recommend the purchase of a laptop computer and software. Specifications for the laptop computer and software are available at www.design.iastate.edu under the “Students” link.

Curriculum in Integrated Studio Arts—B.F.A.

Administered by the Department of Art and Design and leading to a 120.5 credit undergraduate Bachelor of Fine Arts in Integrated Studio Arts including a 29.5 credit pre-professional program (the college core).

Consideration for admission into the Integrated Studio Arts program is based upon departmental resources; GPA earned in the College Core courses and in the freshman year; as well as a portfolio, all of which are submitted at the end of the freshman year.

Transfer students with studio credits from other programs, colleges, and universities must present for department review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

On admission to the program, if the student wishes to pursue studies in digital media and or photography, the faculty strongly recommend the purchase of a laptop computer and software. Specifications for the laptop computer and software are available at www.design.iastate.edu under the “Students” link.

123.5 Total credits
Curriculum in Interior Design

Administered by the Department of Art and Design and leading to a 1275 credit undergraduate Bachelor of Fine Arts in Interior Design including a 29.5 credit pre-professional program (the college core).

Consideration for admission in the Interior Design program is based upon departmental resources; GPA earned in the College Core and the freshman year, as well as a portfolio, all of which are submitted at the end of the freshman year.

A 34 graduate credit program leading to the master of arts, for students planning to undertake professional or design research-orientated pursuits (NOTE: Applicants without a previous undergraduate degree in interior design may be required to complete up to 40 additional credits of deficiency work).

A 60 graduate credit post-professional graduate program leading to the degree master of fine arts.

For more complete graduate program descriptions see Graduate Study under Interior Design in the Courses and Programs section.

Consideration for admission into the undergraduate Interior Design curriculum requires completion of 29.5 credit freshman design core program, including the following courses: DsS 102, DsS 131, DsS 183, 6 credits of Social Science/Humanities, 6 credits of Math/Science, English 150 or 250 and Library 160. Admission is based on department resources and will be determined by a formal review at the end of the freshman foundation year.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are advised to present portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Curriculum in Landscape Architecture

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five-year curriculum, requiring 149.5 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year pre-professional program of 29.5 credits and a four-year professional program of 120 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the pre-professional program. Applicants are reviewed on the basis of scholastic performance, a portfolio of original work, and a written essay.

The BLA from Iowa State University is an LAAB (Landscape Architectural Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional licensure. The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first professional degree programs in landscape architecture at the Bachelor’s and Master’s levels.

The department also offers a 36 credit graduate program leading to the degree Master of Landscape Architecture. For more complete graduate program descriptions, see Graduate Study under Landscape Architecture in the Courses and Programs section.

Mechanical Engineering

Aligning Education in Engineering with the University Mission
The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students' critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Each program is guided by the criteria developed by ABET, a non-governmental organization of peer reviewers which assures the quality of post secondary engineering education. The outcomes and objectives of the accredited engineering programs can be found in the Courses and Programs section of the catalog.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Concurrent Graduate/Undergraduate Programs
Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are: agricultural engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, and materials engineering.

Programs offering concurrent bachelor of science/master of business administration degrees are: civil engineering, computer engineering, electrical engineering, industrial engineering, and mechanical engineering.

For more information, refer to the graduate study sections for each engineering program. Advanced work in engineering is offered in the post-graduate programs. See the Graduate College section of this catalog.

Joint Undergraduate Programs
A bachelor of science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences. This program is jointly administered by the Department of Electrical and Computer Engineering and the Department of Computer Science.

Accreditation
Ten curricula in the College of Engineering are accredited by ABET. Two newer curricula will pursue accreditation. Accreditation status is indicated in the Courses and Programs section for each engineering curriculum. For more information on accreditation practices contact:

Engineering Accreditation Commission
ABET
111 Market Place, Suite 1050
Baltimore, MD 21202-4012
Phone: 410-347-7700
http://www.abet.org

Organization of Curricula
All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students should complete the requirements of the basic program before proceeding to a professional program.

Preparation for the Engineering Curricula
In addition to the standard university admission requirements, the college also requires 2 years of a foreign language. Other high school credits particularly important to students wishing to study engineering include: 2 years of algebra, 1 year of geometry, and 1/2 year of trigonometry and 1/2 year of pre-calculus; 1 year each of chemistry, biology, and physics; 3 years of social science, and 4 years of English. See Index for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Basic Program for Professional Engineering Curricula
The first year program is much the same for all professional curricula in the College of Engineering. Students normally enroll in the majority of the basic program courses during their first year. The basic program is a set of courses common to all engineering curricula. Since students may also begin curriculum designated requirements during their first year, they will want to select a curriculum as soon as possible. This will enable them to receive the bachelor’s degree in a minimum time.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing either Math 141 or 142 before enrolling in Math 166 or C E 160.
The Department of English may recommend placement in one or more sections of Engl 101 if the placement test administered to students whose first language is not English indicates a deficiency in reading or writing. Satisfactory completion of the recommended course(s) will be required of students in the College of Engineering.

**Basic Program**

Students without a strong high school chemistry background may opt to take a two course sequence of Chem 155 (3 cr.) and Chem 165 (4 cr.) to meet the Chem 167 (4 cr.) requirement.

English 250 is normally taken in the second year. However, students who advance into this course may be able to enroll during their first year. Credit for English 150 is earned upon successful completion of English 250. In addition to the basic program courses listed above, curriculum designated courses normally taken the first year of each engineering curriculum are listed below.

**Curriculum Designated Requirements**

- **Aerospace Engineering**—Aer E 160**, Aer E 161 (4 cr.), Aer E 192 (R), GenEd Electives (3 cr)
- **Agricultural Engineering**—Chem 167L (1 cr.), A E 110 (1 cr.), Engr 170 (3 cr.), SSH Elective (3 cr)
- **Biological Systems Engineering**—Chem 167L (1 cr.), BSE 110 (1 cr.), Engr 170 (3 cr.), SSH Elective (3 cr)
- **Chemical Engineering**—Chem 177*, 177L (1 cr.), 178 (3 cr.), 178L (1 cr.), SSH Elective (3 cr)
- **Civil Engineering**—Chem 167L (1 cr.) or Chem 177L (1 cr.), or C E 105 (1 cr.), C E 160**, C E 170 (2 cr.), C E 111 (3 cr.), SSH Elective (3 cr)
- **Computer Engineering**—Cpr E 185** (3 cr), Com S 227 (4 cr.), Cpr E 166 (R cr.), Gen Ed Elective (3 cr)
- **Construction Engineering**—Con E 121 (1 cr.), 122 (1 cr.), Psychology Elective – Psych 101, 230, or 280 (3 cr.), Engr 170 (3 cr.), SSH Elective (3 cr)
- **Electrical Engineering**—E E 185** (3 cr.), Com S 207 (3 cr.) or 227 (4 cr.), E E 166 (R cr.), Gen Ed Elective (3 cr)
- **Industrial Engineering**—I E 101 (R cr.), I E 148** (3 cr.), SSH Elective (3 cr)
- **Materials Engineering**—Chem 177*, 177L (1 cr.), 178 (3 cr.), 178L (1 cr.), Engr 170 (3 cr.), Gen Ed Elective (3 cr.), (Physics 221 scheduled in sophomore year)
- **Mechanical Engineering**—Chem 167L (1 cr.), Engr 170 (3 cr.), M E 102 (R cr.), Gen Ed Elective (3 cr)
- **Software Engineering**—S E 185** (3 cr.), 166 (R cr.), Com S 227 (4 cr.), 228 (3 cr)

The student’s advisor may require or recommend courses in addition to those specified above if the preparation and progress of the student are such that additional courses are necessary or desirable. Students planning to enroll in C E 1, Ch E, or Mat E will find Chem 177 to be a better preparation for Chem 178. However, Chem 167 is accepted as a substitute for 177 for those students declaring one of these curricula after having completed 167. The Chem 155-165 sequence is an acceptable substitute for Chem 167.

**Recommended choices by program:**

- Aer E: Aer E 160 (3 cr.)
- C E: C E 160 (3 cr.)
- Cpr E: Cpr E 185 (3 cr.)
- E E: E E 185 (3 cr.)
- I E: I E 148 (3 cr.)
- S E: S E 185 (3 cr.)

Credit hours for graduation will be given for any one of Aer E 160, C E 160, Engr 160, I E 148, Cpr E 185, E E 185, or S E 185 without increasing a curriculum’s minimum number of credits required for graduation.

**Students enrolled in the joint software engineering degree program will take S E 101.**

Students in the general emphasis in C E have two chemistry/physics sequence options. The environmental emphasis requires Option 1.

**Option 1—Chem 177, 177L, 178, 178L, and Phys 221.**

**Option 2—Chem 167, 167L, or Chem 177, 177L, and Phys 221 and 222.** Students who opt for Phys 222 rather than Chem 178, 178L will increase the total number of credits required by 1.

**Requirement for Entry into Professional Program**

Students enrolled in the College of Engineering must satisfy both of the following requirements before enrolling in the professional courses (200-level and above) offered by departments in the Engineering College:

1. Completion of the basic program with a grade point average of 2.00 or better in the basic program courses.
2. A cumulative grade point average of 2.00 or better for all courses taken at Iowa State University.

The following are the only exceptions to this rule:

- **a. Students who have completed all of their coursework while enrolled in the College of Engineering, but have not met the basic program requirements, may enroll for not more than two semesters in 200-level or above courses offered by departments in the College of Engineering. However, they may be granted an additional semester upon review by the college.**
- **b. Iowa State students not pursuing an engineering degree may generally take engineering courses without restrictions provided they meet the prerequisites and space is available.**
- **c. Only the first two semesters of 200-level and above engineering courses, taken at ISU while a student is not enrolled in the College of Engineering, can be applied toward an engineering degree.**

**Requirement for Graduation**

In order to graduate in a professional engineering curriculum, students must have a minimum GPA of 2.00 in a department-designated group of 200-level and above courses known as the Core. These courses will total no fewer than 24 nor more than 48 semester credits.

**Engineering Minors**

The College of Engineering offers three undergraduate minors which are open only to students in the College of Engineering. These are minors in bioengineering, nondestructive evaluation, and nuclear engineering. These minors must include at least nine credits which are beyond the total used to meet curriculum requirements.

The bioengineering minor is a 15 credit interdisciplinary program that complements a student’s major discipline by providing additional insight into the interactions between various engineering disciplines and biological systems. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Bioengineering in Courses and Programs.

The nondestructive evaluation minor is a 16 credit minor open only to engineering students who have met the basic program requirements and are not on academic warning or probation. The minor is supervised by an interdisciplinary faculty committee. For minor course requirements, refer to Aerospace Engineering in Courses and Programs for minor course requirements.

The nuclear engineering minor is a 15 credit minor which enables engineering students to acquire a basic and fundamental knowledge of nuclear sciences and engineering. Courses are provided at Iowa State University and also through an inter-institutional distance education program offered through the Web by four of the Big 12 Engineering Consortium Schools. For minor course requirements, refer to Nuclear Engineering in Courses and Programs.

**Minor for Non-Engineers**

The College of Engineering also offers an undergraduate minor in engineering studies which is open only to students outside of the College of Engineering.

The engineering studies minor is a 21 credit interdisciplinary minor. A student’s minor program in engineering studies must include at least nine credits which are beyond the total used to meet minimum degree requirements. The minor is supervised by an interdepartmental faculty committee. For minor course requirements, refer to Engineering Studies in Courses and Programs for minor course requirements.
Undergraduate Majors and Minors Outside the College of Engineering

In addition to the engineering degree program, students may earn majors or minors in other colleges of the university. A major or minor program must meet all requirements of the offering department or program and its college; and contain credits beyond the requirements for a B.S. degree in engineering. A minimum of 15 additional credits is required for each major area of study and an additional 9 credits for each minor.

Advising System

The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic programs and to maintain close contact with students during their college careers. The college offers an orientation program during the spring and summer for students planning to enter in the fall, and during the fall for students planning to enter in the spring. All entering students are encouraged to attend an orientation session. Placement assessments given during the orientation program help determine the student’s level of achievement and enable the adviser to prepare an appropriate program for the student.

Special Programs

All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will enrich the standard academic experience. Engineering students are also encouraged to take advantage of study abroad opportunities available through the College of Engineering’s International Programs Office.

a. Cooperative Education Program. The College of Engineering offers, through its curricula, a cooperative education program. Enrollment in the program allows students to gain practical experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional year to complete curriculum requirements. These programs are arranged so that the student alternates academic work with employment periods. The student has the opportunity to assess career paths within her/his chosen curriculum and the employer evaluates the student’s potential as a future full-time employee. Both domestic and international co-op programs are available. Cooperative education students pay no fees to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (298, 398, or 498) for each work period and are considered full time students while enrolled in these courses. For additional information contact your academic adviser and the Office of Engineering Career Services.

b. Internship Program. Internships are a mechanism by which a student may work full-time for one semester per academic year while maintaining her/his status as a full-time student. Internship students pay no fees to the university during their work periods and do not receive credit hours for their work experience. Students who register for the internship course (397) for a fall or spring semester work period or (396) for the summer term are considered to be full time students. For additional information contact your academic adviser and the Office of Engineering Career Services.

c. Honors Program. The College of Engineering participates in the University Honors Program (see Index). The honors program is designed for students with above average ability who wish to individualize their programs of study. For further details consult the chair of the Engineering College Honors Program Committee or your departmental honors program adviser.

d. Engineering International Programs. In a world where the sun never sets, engineers must be prepared to understand other cultures and other ways of doing business. Engineers must expand their exportable skills, language and cross-cultural skills. Engineering International Programs (EIP) has formed worldwide partnerships to create opportunities for students to work and study with leading universities in other countries and multinational corporations. With careful planning, students may earn credit in courses that fulfill their degree requirements. To learn more about work and study with leading universities in other countries and multinational corporations, visit the EIP home page at www.eng.iastate.edu/intprogs/.

e. Engineering Leadership Program. Started in the Fall Semester of 2006, the Engineering Leadership Program (ELP) was developed to address the growing need for leaders trained in technology. Initial funding for the program was provided by 3M Company with additional funding from other corporate and private sources. Students selected into the ELP have opportunities to interface with engineers and company leadership of the donating companies. Mentored by a faculty and a peer mentor, each student receives individual direction and insight on academics, leadership opportunities, career paths and life skills. They are encouraged to develop their individual leadership styles and leadership competencies, while interacting with industry, government, faculty and student leaders. Incoming freshmen may apply to be upper-level scholars each spring. Visit the ELP website at: http://www.eng.iastate.edu/leadership/.

Curriculum in Aerospace Engineering

Leading to the degree bachelor of science.
Total credits required: 126.5. See also Basic Program and Special Programs.

International Perspectives 3 cr.
U.S. Diversity 3 cr.

Communication Proficiency and Library requirements: Engl 150 and Engl 250 with minimum grade of C; Lib 160. Department approval. (See Basic Program for credit requirements.)

General Education Electives: 15.0 cr
Complete 15 cr. including a series. A series of at least two courses must be taken to fulfill this requirement.

Basic Program: 26.5 cr.
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements), Engr 101, R cr.; Aer E 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.

Math and Physical Science: 13 cr.
Math 265, 4 cr.; Math 267, 4 cr.; Phys 222, 5 cr.

Aerospace Engineering Core: 48 cr.
Aer E 243, 3 cr. and Aer E 243L, 0.5 cr.; Aer E 261, 4 cr.; Aer E 311, 3 cr. and Aer E 311L, 0.5 cr.; Aer E 321, 3 cr.; Aer E 331, 3 cr.; Aer E 343, 3 cr. and Aer E 343L, 1 cr.; Aer E 351, 3 cr.; Aer E 355, 3 cr.; Aer E 411, 3 cr.; Aer E 421, 3 cr.; Aer E 461, 3 cr.; Aer E 461, 3 cr.; Aer E 462, 3 cr.; E M 324, 3 cr.; M E 330, 3 cr.

Other Remaining Courses: 24 cr.
E M 274, 3 cr.; E M 345, 3 cr.; Math 272, 2 cr.; Aer E 161, 4 cr. Complete 3 cr., from Aer E 412, 3 cr.; Aer E 422, 3 cr.; Aer E 423, 3 cr.; Aer E 426, 3 cr.; Aer E 432, 3 cr.; Aer E 442, 3 cr.; Aer E 446, 3 cr.; Aer E 451, 3 cr. or Aer E 464.

Technical Electives, 3 cr. and Career Electives, 6 cr. selected from preceding Aer E list or departmental-approved 300-level or above courses relevant to technical and career areas.

Seminar/Co-op/Internships:
Aer E 192, R cr.; Aer E 291, R cr.; Aer E 292, R cr.; Aer E 391, R cr.; Aer E 392, R cr.; Aer E 491, R cr. and Aer E 492, R cr.

1 These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2 Choose from department approved list.
3 See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

2.00 required including transfer courses.
Curriculum in Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required: 127.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:
Engr 150 and Engl 250 with a minimum grade of C; Lib 160. (See Basic Program for credits.) Complete one course from AgEds 311, Engl 309, Engl 314 or Sp Cm 212.

Social Sciences and Humanities: 12 cr.²

Complete 3 cr. from international perspectives and 3 cr. from U.S. diversity university-approved list. Complete additional 6 cr. Social Sciences and Humanities courses.

Basic Program: 26.5 cr.⁴

Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Matth and Physical Science: 9 cr.
Chem 167L, 1 cr. or Chem 177L, 1 cr.; Phys 222, 5 cr.; and Stat 305, 3 cr.

Ag Engineering Core: 24 cr.³
A E 216, 3 cr.; A E 316, 3 cr.; A E 363, 4 cr.; A E 415, 2 cr.; A E 416, 2 cr.; E M 274, 3 cr.; E M 324, 3 cr.; E M 327, 1 cr.; Math 266, 3 cr.

Other Remaining Courses: 16 cr.
A E 110, 1 cr.; A E 201, 1 cr.; A E 301, 1 cr.; A E 401, 1 cr.; A E 404, 3 cr.; Engr 170, 3 cr.; M E 330, 3 cr. Complete one course (3 cr.) from AgEds 311, Engl 309, Engl 314 or Sp Cm 212.

Select remaining courses from one of the following options:

Agricultural and Environmental Systems Engineering Option: 40 cr.
A E 271, 1 cr. or A E 272, 1 cr.; A E 431, 3 cr.; A E 431, 3 cr.; A E 472, 3 cr.; Biol 211, 3 cr.; C E 332, 3 cr.; C E 372, 4 cr.; E M 378, 3 cr. Complete one course (3 cr.) from A E 340, A E 478, or BSE 480. Complete 3 cr. from Biological and Natural Resource Sciences list.⁷

Power and Machinery Engineering Option: 40 cr.
A E 271, 1 cr. or A E 272, 1 cr.; A E 340, 3 cr.; A E 342, 3 cr.; A E 413, 3 cr.; Agron 154, 3 cr.; Biol 211, 3 cr.; E M 345, 3 cr.; E M 378, 3 cr.; M E 324, 4 cr.; M E 325, 3 cr.; Mat E 272, 2 cr. Complete one course (3 cr.) from A E 431, A E 469, A E 472 or 478, or A E 480. Complete six credits of electives.²

Co-op/Internships (Optional)
² These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
³ Choose from department approved list.
⁴ See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
⁵ 2.00 required including transfer courses.

Curriculum in Chemical Engineering

Administered by the Department of Chemical and Biological Engineering.

Leading to the degree bachelor of science.

Total credits required: 125.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:
Engr 150 and Engl 250 with a minimum grade of C; Lib 160. (See Basic Program for credits.) Complete one course from AgEds 311, C E 203, Engl 309, or Sp Cm 212.

Social Sciences and Humanities: 12 cr.²

Complete 3 cr. from international perspectives and 3 cr. from U.S. diversity university-approved list. Complete additional 6 cr. Social Sciences and Humanities courses.

Basic Program: 26.5 cr.⁴

Complete with 2.00 GPA including transfer courses: Chem 167, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Biological, Math and Physical Science: 20 cr.

Biological Systems Engineering Core: 26 cr.
A E 316, 3 cr.; A E 433, 4 cr.; A E 404, 3 cr.; BSE 201, 1 cr.; BSE 216, 3 cr.; BSE 301, 1 cr.; BSE 380, 3 cr.; BSE 401, 1 cr.; BSE 415, 2 cr.; BSE 416, 2 cr.; BSE 480, 3 cr.

Other Remaining Courses: 23 cr.
BSE 110, 1 cr.; Ch E 356, 3 cr.; Ch E 357, 3 cr.; Engr 170, 3 cr.; E M 274, 3 cr.; E M 324, 3 cr.; E M 327, 1 cr.; M E 301, 1 cr.; M E 303, 3 cr. Complete one course (3 cr.) from AgEds 311, C E 203, Engl 309, or Sp Cm 212.

Complete remaining courses from one of the following options:

Biorenewable Resources Engineering Option: 20 cr.
A E 388, 3 cr.; BSE 403, 3 cr.; Chem 331, 3 cr.; Chem 331L, 2 cr.; Chem 332, 3 cr. Complete 6 credits for option electives.²

Bioenvironmental Engineering Option: 20 cr.
A E 431, 3 cr.; C E 326, 3 cr.; Chem 211, 2 cr.; Chem 211L, 2 cr.; Chem 231, 3 cr.; Chem 231L, 1 cr. Complete 3 cr. from A E 436, C E 421, C E 428, or EnSci 381. Complete 3 credits for remaining option elective.²

Food Engineering Option: 20 cr.
AE 451, 3 cr.; BSE 469, 3 cr.; Chem 231, 3 cr.;
Electives list. Complete 3 cr. from any 300+ level course in engineering. Complete 6 cr. from Professional Electives list.

Biological Engineering Option
The standard Chemical Engineering program may be modified to meet the option requirements for Biological Engineering:

Math and Physical Science - BBMB 404 or Biol 313, 3 cr., may be substituted for BBMB 301 from list above.

Chemical Engineering Core - Replace Ch E 426, 2 cr. with Ch E 427, 2 cr. in required Core.

Other Remaining Courses:
Chemistry Electives, 3 cr. - BBMB 405 (prerequisite 404), BBMB 420 (prerequisite 301), or Biol 314.
Chemical Engineering Electives, 3 cr. – Ch E 415, Ch E 440, Ch E 542 or Ch E 562.
Engineering Electives, 3 cr. – A E 373, A E 480, BRT 501, C E 421, or MSE 580.
Professional Electives, 6 cr. – Ch E 415, Ch E 440, Ch E 542, Ch E 562, or Ch E 490; and one course from 300-level, or above, life sciences (not BBMB 301), 300- or above level course in Chem, FS HN or BBMB.

Co-op/Internships: Optional
1These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2Choose from department approved list.
3See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
42.00 required including transfer courses.

Curriculum in Civil Engineering (General)
Administered by the Department of Civil, Construction and Environmental Engineering.

Total credits required: 131.5* See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹
U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.)

Social Sciences and Humanities: 12 cr.²
Complete 12 cr. with 6 cr. at 200-level or above.

Basic Program: 26.5 cr.⁴
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; C E 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 17 cr. (18 cr.*)¹

C E Engineering Core: 30 cr.⁴
E M 274, 3 cr.; E M 324, 3 cr.; E M 345, 3 cr.; E M 378, 3 cr.; C E 305, 3 cr.; C E 326, 3 cr.; C E 332, 3 cr.; C E 355, 2 cr.; C E 360, 3 cr.; and C E 372, 4 cr.

C E ENV Engineering Core: 27 cr.⁴
E M 274, 3 cr.; E M 324, 3 cr.; E M 378, 3 cr.; C E 305, 3 cr.; C E 326, 3 cr.; C E 332, 3 cr.; C E 355, 2 cr.; C E 360, 3 cr.; and C E 372, 4 cr.

Other Remaining Courses:
45 cr.
C E 105, 1 cr.; C E 111, 3 cr.; C E 170, 2 cr.; C E 205, 3 cr.; C E 306, 3 cr.; C E 333, 3 cr.; C E 334, 3 cr.; C E 382, 3 cr.; C E 453, 4 cr.; C E 485, 2 cr.; C E 486, 3 cr.; E M 327, 1 cr.; Sp Cm 212, 3 cr. Complete 11 cr. Engineering Topics Electives.²

Seminar/Co-op/Internships: R cr.
C E 403, R. cr.

Co-op/Internship optional.

These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

choose from department approved list.

See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

2.00 required including transfer courses.

* Note: Students who opt for Phys 222 rather than Chem 178, 178L will complete 18 cr. here which will increase the total number of credits required by 1.

Curriculum in Civil Engineering with Environmental Option
Administered by the Department of Civil, Construction and Environmental Engineering.

Total credits required: 126.5 See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹
U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.)

Social Sciences and Humanities: 12 cr.²
Complete 12 cr. with 6 cr. at 200-level or above.

Basic Program: 26.5 cr.⁴
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Cpr E 185, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 26 cr.

C E ENV Engineering Core: 27 cr.⁴
E M 274, 3 cr.; E M 324, 3 cr.; E M 378, 3 cr.; C E 305, 3 cr.; C E 326, 3 cr.; C E 332, 3 cr.; C E 355, 2 cr.; C E 360, 3 cr.; and C E 372, 4 cr.

Other Remaining Courses:
39 cr.
C E 105, 1 cr.; C E 111, 3 cr.; C E 170, 2 cr.; C E 205, 3 cr.; C E 306, 3 cr.; C E 334, 3 cr.; C E 382, 3 cr.; C E 420, 3 cr.; C E 421, 3 cr.; C E 428, 3 cr.; C E 485, 2 cr.; C E 486, 3 cr.; E M 327, 1 cr.; Sp Cm 212, 3 cr. Complete 3 cr. Engineering Topics Electives.²

Seminar/Co-op/Internships: R cr.
C E 403, R. cr.

Co-op/Internship optional.

These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

Choose from department approved list.

See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

2.00 required including transfer courses.

Curriculum in Computer Engineering
Administered by the Department of Electrical and Computer Engineering.

Leading to the degree bachelor of science.

Total credits required: 126.5  See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹
U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.) Engl 314 or Engl 309 with a minimum grade of C.

General Education Electives: 15 cr.²
Complete minimum of 6 cr. from Approved General Education Component at 300 or higher level. Complete additional 9 cr. from Approved General Education Component.

Basic Program: 26.5 cr.⁴
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Cpr E 185, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. (minimum grade of C-) and Math 166, 4 cr. (minimum grade of C-) and Phys 221, 5 cr. (See Basic Program rule.)
Math and Physical Science: 20 cr.
Com S 227, 4 cr. (minimum grade of C) and
Com S 228, 3 cr. (minimum grade of C); Math 265, 4 cr.; Math 267, 4 cr.; and Phys 222, 5 cr.

Computer Engineering Core: 33 cr.
Cpr E 281, 4 cr.; Cpr E 288, 4 cr.; Cpr E 308, 4 cr.; Cpr E 310, 3 cr.; Cpr E 381, 4 cr.; Com S 309, 3 cr.; Com S 311, 3 cr.; E E 201, 4 cr.; and E E 230, 4 cr.

Other Remaining Courses: 32 cr.
Cpr E 491, 3 cr. and Cpr E 492, 2 cr. Engl 314, 3 cr. or Engl 309, 3 cr. with a minimum grade of C.
Complete 3 cr. of Computer Science courses, 6 cr. of Computer Engineering, 9 cr. of Technical Electives, and 3 cr. of Electrical Engineering courses.

Seminar/Co-op/Internships:
Cpr E 166, R cr. Cpr E 294, R cr., Cpr E 394, R cr. and Cpr E 494, R cr.

Co-op or internship is optional.
Outcomes Assessment - Students are required to prepare and maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include Cpr E 491, Senior Design Project I and Professionalism, Cpr E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives may not be taken Pass/Not Pass, but are used to meet the general education electives.

2Choose from department approved lists.

3See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

42.00 required including transfer courses.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Curriculum in Construction Engineering
Administered by the Department of Civil, Construction, and Environmental Engineering.

Leading to the degree bachelor of science.
Total credits required: Building Option -123.5, Heavy Option - 123.5, Electrical - 126.5, Mechanical - 125.5 cr.
See also Basic Program and Special Programs.

International Perspectives: 3 cr.

Communication Proficiency/Library requirements: Engl 150 and Engl 250 with minimum grade of C, Lib 160. (See Basic Program for credit requirements.) Business Communication Elective: one course from Engl 302, Engl 309 or Engl 314 with a minimum grade of C.

Social Sciences and Humanities: 12 cr.
Complete one of Psych 101, Psych 230, Psych 250, or Psych 280. Complete either Econ 101 or Econ 102. Complete 3 cr. from international perspectives and 3 cr. from U.S. diversity approved list.

Basic Program: 26.5 cr.
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; C E 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 11 cr. (B, H); 12 cr. (E, M).
Stat 105, 3 cr.; Math 266, 3 cr. (B, H); Math 267, 4 cr. (E, M); Phys 222, 5 cr.

E M 274, 3 cr.; E M 324, 3 cr.; Con E 421, 3 cr.; E M 378, 3 cr.; C E 332, 3 cr.; (See options for remaining option Core courses.)

Additional Required Courses: 35 cr. (B, H), 36 cr. (E, M)
Con E 121, 1 cr.; Con E 122, 1 cr.; C E 170., 2 cr.; C E 111, 3 cr.; Acct. 284, 3 cr.; Con E 221, 4 cr.; Con E 241, 3 cr.; Con E 251, 1 cr. Complete one 3 cr. Law Elective.2.; Con E 441, 3 cr.; Con E 487, 2 cr. and Con E 488, 3 cr.; Complete one 3 cr. Business Communication Elective from Engl 302, 309, or 314. Complete one course from Math or Stat Elective, 3 cr. (B, H); 4 cr. (E, M)
Select remaining courses from one of the following options:

Building Option:
Remaining Core courses (9 cr.)
C E 360, 3 cr.; Con E 322, 3 cr.; Con E 340, 3 cr.
Remaining option courses – 15 cr.
C E 335, 3 cr.; C E 334, 3 cr.; C E 383, 3 cr.; Con E 352, 3 cr.; Con E 353, 2 cr.; E M 327, 1 cr.; Complete 2 cr. from Engineering Topics Electives.

Heavy Option:
Remaining Core courses (9 cr.)
C E 360, 3 cr.; Con E 322, 3 cr.; and Con E 340, 3 cr.
Remaining option courses – 15 cr.
C E 333, 3 cr.; C E 334, 3 cr.; C E 382, 3 cr.; E M 327, 1 cr. Complete 5 cr. of Engineering Topics Electives

Electrical Option:
Remaining Core courses (9 cr.)
M E 231, 3 cr.; C E 303, 3 cr. and E E 456, 3 cr.
Remaining option courses – 16 cr.
Con E 352, 3 cr.; Con E 353, 2 cr.; E E 201, 4 cr. E E 230, 4 cr. and E E 457, 3 cr.

Mechanical Option:
Remaining Core courses (10 cr.)
M E 331, 3 cr., M E 436, 4 cr., and M E 441, 3 cr.
Remaining option courses – 14 cr.
Con E 352, 3 cr.; Con E 353, 2 cr.; E E 442, 2 cr. and E E 448, 2 cr.; M E 442, 3 cr.
Complete 2 cr. of Engineering Topics Electives.

Curriculum in Electrical Engineering
Administered by the Department of Electrical and Computer Engineering.

Leading to the degree bachelor of science.
Total credits required: 126.5 See also Basic Program and Special Programs.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communication Proficiency/Library requirements: Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.) Business Communication Elective: one course from Engl 302, Engl 309 or Engl 314 with a minimum grade of C.

General Education Electives: 15 cr.
Complete minimum of 6 cr. from Approved General Education Component at 300 or higher level. Complete additional 9 cr. from Approved General Education Component.

Basic Program: 26.5 cr.
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; E E 185, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. (minimum grade of C) and Math 166, 4 cr. (minimum grade of C); and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 16 cr.
Com S 207, 3 cr. or Com S 227, 4 cr. (minimum grade of C); Math 265, 4 cr.; Math 267, 4 cr.; and Phys 222, 5 cr.
Curriculum in Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering.

Leading to the degree bachelor of science.

Total credits required: 120.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirements:
Engl 150 and Engl 250 with minimum grade of C; Lib 160.

Remaining Communication courses: 6 cr.
Engl 314, 3 cr.; Sp Cm 212, 3 cr.

Social Sciences and Humanities: 12 cr.²
Six of twelve credits must be from 200-level or above courses. Six credits must be sequential or related courses.

Basic Program: 26.5 cr.⁴
Chem 167, 4 cr.;³ Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements), Engl 101, R cr.;¹ I E 148, 3 cr.;³ Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 17 cr.
Math 265, 4 cr.; Math 267, 4 cr.; Phys 222, 5 cr.; Stat 231, 4 cr.

Industrial Engineering Core: 31 cr.
I E 248, 3 cr.; I E 271, 3 cr.; E E 305, 3 cr.; I E 312, 3 cr.; I E 413, 4 cr.; I E 341, 3 cr.;¹ I E 348, 3 cr.;¹ I E 361, 3 cr.;¹ I E 441, 3 cr.;¹ I E 448, 3 cr.

Other Remaining Courses: 28 cr.
Mat E 272, 2 cr.; E M 274, 3 cr.; E E 442, 2 cr.; M E 330, 3 cr.; Focus Electives, 6 cr.;² Management Electives, 6 cr.;² and Engineering Topic Electives, 6 cr.²

Seminar/Co-op/Internships:
I E 101, R cr. Optional co-op/internship courses.¹ These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

Choose from department approved lists.

See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

² 2.00 required including transfer courses.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Curriculum in Materials Engineering

Administered by the Department of Materials Science and Engineering.

Leading to the degree bachelor of science.

Total credits required: 1275 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.) Complete one course from Engl 302, 309, 314 or JL MC 347 with a minimum grade of C.

General Education Electives: 15 cr.
Complete 12 cr. from approved list with a minimum of 6 cr. but no more than 9 cr. from one designator, and a maximum of 9 cr. of 100-level courses.² Complete one course from Engl 302, 309, 314 or JL MC 347.²

Basic Program: 26.5 cr.⁴
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science 18 cr.
Complete Chem 177L, 1 cr.; Chem 178, 3 cr. and Chem 178L, 1 cr.; Math 265, 4 cr.; Math 267, 4 cr.; and Phys 222, 5 cr.

Materials Engineering Core: 32 cr.⁴
Mat E 201, R cr.; Mat E 214, 3 cr.; Mat E 215, 3 cr.; Mat E 215L, 1 cr.; Mat E 216, 4 cr.; Mat E 311, 3 cr.; Mat E 314, 3 cr.; Mat E 316, 3 cr.; Mat E 317, 3 cr.; Mat E 413, 3 cr.; Mat E 414, 3 cr.; Mat E 418, 3 cr.

Other Courses: 12 cr.
Engr 170, 3 cr.; E M 274, 3 cr.; E M 324, 3 cr.; Complete 3 cr. from non-remedial courses.

Seminar/Co-op/Internships
Co-op and internships are optional.

Option Requirements: 18 cr.
Students must choose two from the four areas of specialization: ceramic, electronic, metallic and polymeric materials. In lieu of the second specialty from the four listed, a student may propose an individually designed, materials related technical specialty to meet specific career goals. Students must have a 3.00 gpa and a B+ in Mat E 215. Students may learn other requirements and procedures for applying in the Undergraduate Handbook or by speaking with their adviser. The options below meet that expectation by using the following specialization courses:

Ceramic Materials: 321, 322, 425
Electronic Materials: 334, 332, 433
Metallic Materials: 342, 443, 444
Polymeric Materials: 351, 453, 454

Technical Electives: 6 cr.
Complete 6 cr. technical electives from approved departments.²

¹ These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
² Choose from department approved lists.
³ See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
⁴ 2.00 required including transfer courses.

Engineering

2009-2011
Curriculum in Mechanical Engineering

Leading to the degree bachelor of science.

Total credits required: 128.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.)

Remaining Communication Courses: 3 cr.
Engl 314, 3 cr.

General Education Electives: 15 cr.
Econ 101, 3 cr. or Econ 102, 3 cr.
Complete 3 additional credits of Social Science Electives.²
Complete 6 cr. of Humanities Electives.²
Complete 3 additional General Education credits.²

Basic Program: 26.5 cr.⁴
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule)

Math and Physical Science: 20 cr.
Engr 170, 3 cr.; Chem 167L, 1 cr. or Chem 177L, 1 cr.; Math 265, 4 cr.; Math 267, 4 cr. or Math 266, 3 cr. with Math 268, 1 cr.; Phys 222, 5 cr.; Stat 305, 3 cr.

Mechanical Engineering Core: 46 cr.⁴
E M 274, 3 cr.; E M 324, 3 cr.; E M 345, 3 cr.; E E 442, 2 cr.; E E 448, 2 cr.; M E 270, 3 cr.; M E 231, 3 cr.; M E 324, 4 cr.; M E 326, 3 cr.; M E 332, 3 cr.; M E 335, 4 cr.; M E 370, 3 cr.; M E 421, 3 cr.; M E 436, 4 cr.; Mat E 272, 2 cr.

Other Remaining Courses: 18 cr.
Complete one course from M E 415, 3 cr.; M E 442, 3 cr. or M E 488, 3 cr. Complete 15 cr. Technical Electives.²

Seminar/Co-op/Internships:
M E 102, R cr.; M E 202, R cr. Co-op/Internship Optional

Math and Physical Science: 11 cr.
Com S 227, 4 cr. (minimum grade of C-) and Com S 228, 3 cr. (minimum grade of C-).

Software Engineering Core: 31 cr.⁴
Cpr E 281, 4 cr.; Cpr E 288, 4 cr. or Com S 229, 3 cr.; Cpr E 308, 4 cr. or Com S 352, 3 cr.; Com S 309, 3 cr.; Com S 311, 3 cr.; Com S 330, 3 cr. or Cpr E 310, 3 cr.; Com S 363, 3 cr. or Cpr E 319, 3 cr.; S E 329, 3 cr. and S E 339, 3 cr.

Other Remaining Courses: 41 cr.
S E 491, 3 cr. and S E 492, 2 cr. Engl 314, 3 cr. with a minimum grade of C. Complete either Econ 101, 3 cr., Econ 102, 3 cr. or I E 305, 3 cr. Sp Cm 212, 3 cr. Stat 330, 3 cr.
Complete 3 cr. from Math Electives list.²
Complete 6 cr. from Software Engineering course list.²
Complete 3 cr. from Technical Electives list.²
Complete 12 cr. from list of Supplementary Electives.²
Note: Excess credits from Cpr E 288 and/or Cpr E 308 may be applied to meet Supplementary Elective credit requirement.

Seminar/Co-op/Internships
S E 166 or Com S 203. Co-op or internship is optional.

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in software engineering. These 30 credits must include S E 491 Senior Design Project I and Professionalism, S E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The software engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

¹ These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
² Choose from department approved list.
³ See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
⁴ 2.00 required including transfer courses.

Note: A Mat E student may take up to 9 credit hours from General Education and free electives on a P/NP basis, except for courses used to meet the diversity and international perspectives requirement. S/F courses (different from P/NP) will be considered for these requirements on a course-by-course basis.

Curriculum in Software Engineering

Administered by the Department of Electrical and Computer Engineering and the Department of Computer Science in the College of Liberal Arts and Sciences.

Leading to the degree bachelor of science.

Total credits required: 124.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.)

Remaining Communication Courses: 3 cr.
Engl 314, 3 cr.

General Education Electives: 15 cr.
Econ 101, 3 cr. or Econ 102, 3 cr.
Complete 3 additional credits of Social Science Electives.²
Complete 6 cr. of Humanities Electives.²
Complete 3 additional General Education credits.²

Basic Program: 26.5 cr.⁴
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule)

Math and Physical Science: 20 cr.
Engr 170, 3 cr.; Chem 167L, 1 cr. or Chem 177L, 1 cr.; Math 265, 4 cr.; Math 267, 4 cr. or Math 266, 3 cr. with Math 268, 1 cr.; Phys 222, 5 cr.; Stat 305, 3 cr.

Mechanical Engineering Core: 46 cr.⁴
E M 274, 3 cr.; E M 324, 3 cr.; E M 345, 3 cr.; E E 442, 2 cr.; E E 448, 2 cr.; M E 270, 3 cr.; M E 231, 3 cr.; M E 324, 4 cr.; M E 326, 3 cr.; M E 332, 3 cr.; M E 335, 4 cr.; M E 370, 3 cr.; M E 421, 3 cr.; M E 436, 4 cr.; Mat E 272, 2 cr.

Other Remaining Courses: 18 cr.
Complete one course from M E 415, 3 cr.; M E 442, 3 cr. or M E 488, 3 cr. Complete 15 cr. Technical Electives.²

Seminar/Co-op/Internships:
M E 102, R cr.; M E 202, R cr. Co-op/Internship Optional

Math and Physical Science: 11 cr.
Com S 227, 4 cr. (minimum grade of C-) and Com S 228, 3 cr. (minimum grade of C-).

Software Engineering Core: 31 cr.⁴
Cpr E 281, 4 cr.; Cpr E 288, 4 cr. or Com S 229, 3 cr.; Cpr E 308, 4 cr. or Com S 352, 3 cr.; Com S 309, 3 cr.; Com S 311, 3 cr.; Com S 330, 3 cr. or Cpr E 310, 3 cr.; Com S 363, 3 cr. or Cpr E 319, 3 cr.; S E 329, 3 cr. and S E 339, 3 cr.

Other Remaining Courses: 41 cr.
S E 491, 3 cr. and S E 492, 2 cr. Engl 314, 3 cr. with a minimum grade of C. Complete either Econ 101, 3 cr., Econ 102, 3 cr. or I E 305, 3 cr. Sp Cm 212, 3 cr. Stat 330, 3 cr.
Complete 3 cr. from Math Electives list.²
Complete 6 cr. from Software Engineering course list.²
Complete 3 cr. from Technical Electives list.²
Complete 12 cr. from list of Supplementary Electives.²
Note: Excess credits from Cpr E 288 and/or Cpr E 308 may be applied to meet Supplementary Elective credit requirement.

Seminar/Co-op/Internships
S E 166 or Com S 203. Co-op or internship is optional.

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in software engineering. These 30 credits must include S E 491 Senior Design Project I and Professionalism, S E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The software engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

¹ These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
² Choose from department approved lists.
³ See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
⁴ 2.00 required including transfer courses.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

2009-2011
College of Human Sciences

Pamela White, Interim Dean
Carla Peterson, Associate Dean
www.hs.iastate.edu/

Departments of the College
Apparel, Educational Studies, and Hospitality Management
Curriculum and Instruction
Educational Leadership and Policy Studies
Food Science and Human Nutrition
Kinesiology
Human Development and Family Studies

The College of Human Sciences provides an integrative approach to improving the quality of life for individuals, families, schools and communities by linking discovery, science, creativity, and practice; applying the knowledge of learning in all endeavors; and developing leaders for roles in research, education, business and industry, and health and human services.

The College of Human Sciences (CHS) was founded in 2005 and is the newest college on the ISU campus. The college fosters innovative synergies in teaching and research, and in many ways is reinventing how human potential can be enhanced. Members of the College of Human Sciences community strive to improve the quality of people’s lives - helping them learn better, live longer, and lead lives that are more productive and fulfilling.

Recommended High School Preparation
Recommended preparation for students entering most departments of the College of Human Sciences should include 4 years of English (including speech) with emphasis in composition and communication skills; 3 years each of mathematics and natural sciences, and at least 2 years of social science and/or humanities. In addition, students interested in Elementary Education or Early Childhood Education are advised to complete three or more years of high school study in one foreign language.

Information for Prospective Students
Each student in the College of Human Sciences works closely with an academic adviser who is associated with the curriculum in which the student is majoring. In some majors, freshmen are advised by a general college adviser. After the freshmen year, these students are assigned an adviser in the department of the chosen curriculum. Advisers assist students in developing academic programs and in adjusting to university life. They also provide information and guidance about career choices. Advisers attempt to adjust each student’s schedule of course work in accordance with the student’s interests and capabilities.

The college offers a number of orientation sessions during the summer for students planning to enter in the fall. Incoming students are encouraged to attend an orientation session so that academic assessments can be made and appropriate classes may be scheduled for the following term.

Open Option Status
The College of Human Sciences offers an open option for entering students who have not selected a specific area of study. An orientation course helps students explore the opportunities available. Program planning information can be obtained from general college advisers.

Planned Transfer Programs
By careful planning, students may begin their education at another college, then transfer their courses to a curriculum within the College of Human Sciences with maximum efficiency in meeting the degree requirements. The college works closely with community colleges in Iowa and surrounding states to facilitate a transfer to Iowa State University. For more information, call 1-800-522-0683 or visit the College of Human Sciences Student Services.

Families Extension
Students may prepare for a career in the Cooperative Extension Service by enrolling in a curriculum in the College of Human Sciences that provides them with a broad subject matter base for conducting educational programs for families. Advice on choice of courses should be sought from the Family and Consumer Sciences Education and Studies program, the associate dean and director of Iowa State University Extension to Families programs, the director of Iowa State University Extension to Youth and 4-H programs, or the Extension Human Resources office.

Undergraduate Core Curriculum
Graduates of the College of Human Sciences will demonstrate professional and personal competencies in concepts fundamental to the College’s mission. These core concepts serve as a unifying focus for students in the College. Competencies will be assessed by designated outcomes in courses within each major in the College. For information on the specific core competencies for particular majors contact the departmental office administering the program.

General Education
Students in the College of Human Sciences are required to complete a program in general education which is integrated with their professional training and extends through the undergraduate curriculum.

The general education program emphasizes intellectual growth and personal development as contrasted with specific career preparation. The program aims to stimulate a desire for learning and intellectual endeavor, develop understanding and appreciation for the physical and cultural world, encourage independent thinking and analysis, increase competence in all aspects of communication, and create an understanding of individuals as social, psychological, and physical beings.

The student is expected to complete studies in three groups in general education. Areas represented below are not departmental titles. In some cases, courses relating to a given area may be found in several different departments. Credits listed are minimum requirements.

Minimum Group Requirements in the College of Human Sciences

9.5 cr.
I. Communication Skills: English 150, 250; Library 160; and 3 credits in oral communication

9 cr.
II. Biological and physical sciences and mathematical disciplines: at least 3 credits in mathematical disciplines

15 cr.
III. Social sciences and humanities: at least 6 credits in social sciences and at least 6 credits in humanities

Accreditation and Licensure
The following program-specific accreditation/licensure/registrations have been attained by departments within the college:

Department of Apparel, Educational Studies, and Hospitality Management:
Family and Consumer Sciences Education
Teacher Licensure Program is licensed by the Iowa Department of Education and the Iowa Board of Educational Examiners.

Hotel, Restaurant, and Institution Management:
- is accredited by the Accreditation Commission for Programs in Hospitality Administration, the accrediting agency of the International Council on Hotel, Restaurant, and Institutional Education.
- Production focus of the Apparel Merchandising, Design, and Production major is endorsed by the American Apparel and Footwear Association.

Department of Food Science and Human Nutrition:
- Food Science and Industry and Food Science and Technology curricula are approved by the Institute of Food Technologists. The Dietetics Internship Program and the Didactic Program in Dietetics are accredited by the Commission on Accreditation/Approval for Dietetics Education of The American Dietetic Association, 216 W. Jackson Blvd., Chicago, IL 60606-6995, 312/999-4876.

Department of Kinesiology:
- The Athletic Training Option is accredited by the Commission on Accreditation of Athletic Training Education.

Department of Human Development and Family Studies:
- The Child Development Laboratory School is accredited by the National Association for the Education of Young Children (NAEYC) Academy for Early Childhood Programs and licensed by the Iowa Department of Human Services.
Teacher Education and Licensure
All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the University Teacher Education Program and be recommended by the CHS Associate Dean for Teacher Education.
Each student will be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and the college in which it is located.
For details concerning the professional teacher education requirements and the areas of specialization requirements, see Teacher Education, Courses and Programs.

Majors
For more information about a major, see: 1) the curriculum descriptions in this section of the catalog; 2) the department catalog section under Courses and Programs; and 3) department websites.

Apparel Merchandising, Design, and Production—Options: Merchandising; Design; Production—Administered by the Department of Apparel, Educational Studies and Hospitality Management

Child, Adult, and Family Services—Options: Child Programs; Youth Programs; and Adult/Family Programs — Administered by the Department of Human Development and Family Studies

Culinary Science—Administered by the Department of Food Science and Human Nutrition

Dietetics—Administered by the Department of Food Science and Human Nutrition

Early Childhood Education—Administered jointly by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies

Elementary Education—Administered by the Department of Curriculum and Instruction

Family and Consumer Sciences Education and Studies—Options: Communications; Professional Studies; Teacher Licensure—Administered by the Department of Apparel, Educational Studies and Hospitality Management

Family Finance, Housing, and Policy—Administered by the Department of Human Development and Family Studies

Food Science—Options: Consumer Food Science; Food Science and Industry; Food Science and Technology—Administered by the Department of Food Science and Human Nutrition

Kinesiology—Options: Athletic Training; Community and Public Health; Exercise Science; General Studies; Health/Fitness Management; and Physical Education Licensure—Administered by the Department of Kinesiology

Hotel, Restaurant, and Institution Management—Administered by the Department of Apparel, Educational Studies and Hospitality Management

Nutritional Science—Administered by the Department of Food Science and Human Nutrition

Secondary Education—The College of Human Sciences provides secondary education licensure programs in conjunction with subject matter areas, or majors, offered by various departments across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, foreign languages, general sciences, health, family and consumer sciences education, mathematics, music, physical science, physics, and social studies. See Index, Teacher Education.

Minors
Minors are available to all Iowa State students. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above. A student may not apply the same course to two different minors. The minor must include 9 credits that are not used to meet any other department, college or university requirement. Minors are available in the following areas:

Apparel Merchandising, Design, and Production
Athletic Coaching
Child, Adult, and Family Services
Dance
Educational Services in Family and Consumer Sciences
Family Finance, Housing, and Policy
Food Safety (interdepartmental minor)
Gerontology (interdisciplinary minor)
Hotel, Restaurant, and Institution Management
Nutrition (two minors: one for non FSHN majors and one for department majors)
See Index for minor requirements for specific departments and programs.

International Studies (secondary major only)

Sport and Culture

The International Studies Program is an interdisciplinary program which may be taken only as a second major. Students pursuing a second major in international studies must complete the International Studies Program as described in this catalog (see Index, International Studies).

Double Majors
Students may elect a second major from the departments and program areas listed above, or from a major field offered for the bachelor's degree in another college of the university. Double majors may be prohibited between majors as determined by the appropriate curriculum committees.

The major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In this case, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major.

Students with a primary major in another college who wish to take a second major in the College of Human Sciences are required to meet all requirements for the major, including the CHS core, and prerequisite and supporting courses.

Two Bachelor’s Degrees
Any degree offered by the College of Human Sciences may be earned together with a degree in this or any other college of the university. For the requirements for two degrees, see Index, Two Bachelor's Degrees.

International and Cross Cultural Programs
International experience opportunities are available and encouraged through the College of Human Sciences to broaden international and cross-cultural perspectives. Scholarships and other forms of financial assistance are available which provide partial support for students studying abroad. The College has established programs with a variety of colleges and universities around the world including Glasgow Caledonian University, Glasgow, Scotland; University of Otago, Dunedin, New Zealand; the International College of Hospitality Administration, Brig, Switzerland; the London College of Fashion, London, England; and Paris American Academy, Paris, France. Students also have an opportunity to participate in group study abroad programs to Europe, Africa, Central and South America, and Asia.

Other opportunities may be developed through consultation with the college director of international experiences and the student’s adviser; for example, students have acquired internships and studied in such countries as Kenya, Rwanda, Spain, Puerto Rico, Ireland, Guatemala, Switzerland, England, Australia, Germany, and France. Faculty members bring diversity and global perspectives to instruction and research through their work in India, South Korea, Central and South America, Pakistan, Africa, and Europe.

Honors Program
High achieving students, with a grade point average of above 3.35, are invited to apply to the Honors Program. Honors students are encouraged to develop a creative program of study expanding their interests while meeting individual educational objectives. Students in the Honors Program also participate in University Honors Seminars, Honors Courses and complete an honors project. For further information, contact the College Honors Committee or academic adviser. Also see Index, Honors Program.
### Dietetics Internship (DI)

This post-baccalaureate program, administered by the Department of Food Science and Human Nutrition, is accredited by the American Dietetic Association (ADA). The purpose of the program is to enable those who meet the academic requirements of the ADA to obtain at least 900 hours of practice supervised by registered dietitians in medical nutrition therapy, community nutrition, and foodservice management to meet ADA performance requirements for entry level dietitians.

Students who satisfactorily complete the DI will be eligible to take the national registration examination administered by the Commission on Dietetic Registration.

### Preparation for Graduate Study

Students considering graduate studies should gain background knowledge in basic subjects related to their area of interest. Undergraduate mathematics, statistics, and research methods courses are useful as preparation for advanced study in graduate school. Upon completion of graduate programs, students are qualified for leadership positions in public and private institutions and for teaching, research, and extension positions in colleges and universities.

### Graduate Curricula

The College of Human Sciences offers programs leading to the degrees of master of science, master of education, and doctor of philosophy. Graduate study in the College of Human Sciences is conducted through the Graduate College. Details are found in the Graduate College section of this catalog, (www.grad-college.austate.edu) and on department websites.

#### Curriculum in Apparel Merchandising, Design, and Production

Administered by the Textiles and Clothing Program. Leading to the degree bachelor of science. **Total credits required:** 123 including a minimum of 18 credits in AMDP at Iowa State University for the degree. The major in apparel merchandising, design, and production provides a broad based program of study with flexibility in creating program options. Courses are required in general education, and textiles and clothing core. To complete the program, a student combines structured clusters of courses to form primary and secondary program options.

A minor in apparel merchandising, design, and production is available; the requirements appear under Textiles and Clothing, Courses and Programs.

### Additional Requirements for a Primary Option

#### 24 Technical Design

R T C 301

3 Select two courses from T C 354, 362, 415, 431

Select two courses from: T C 257, 305, 340, 362, 377, 404, 415, 421

AESHM 471, 474; Thtr 255; Any Art History, Art Integrated Studio or Design Studies

#### 24 Product Development

T C 305, 431, 467, 496; Acct 284

3 Select one: Mkt 340, T C 340

6 Select two: T C 376, 377, 404, 415, 475; AESHM 474; I E 408

#### 14-16 Merchandising Option

8-10 Select three: AESHM 271, 287, 340, 471, 474, 477; T C 467, 496; Advrt 230; Mgmt 370, 371; Mkt 340*, 410, 446, 448

3 Select one: T C 354, 356, 362, 467

12 Select one: T C 221, 305, 313, 404

#### Secondary options

For Merchandising and Production/Apparel Engineering select a second cluster from the secondary option areas.

#### Electives

Select courses to broaden or complement the options (see adviser).

### 123 Total credits

* If Merchandising primary option, may need to select another course from approved list.

#### Curriculum in Child, Adult, and Family Services

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science. **Total credits required:** 125.

The child, adult, and family services curriculum, with options in child programs, youth programs, adult/family programs, leads to employment opportunities in the helping professions working with children, adults, and families in a variety of public and private human service agencies and organizations.

A minor in child, adult, and family services is available; the requirements appear under Human Development and Family Studies, Courses and Programs.

**Curriculum in Diet and Exercise B.S./M.S.**

Administered by the Department of Food Science and Human Nutrition.

The student is prepared for admission to dietetic internship programs and other professional experience programs approved/accredited by The American Dietetic Association. Courses included have been approved as meeting the academic requirements of The American Dietetic Association. There is a $30 fee for a statement of verification of completion of the approved program.

- **24 Adult/Family Programs:** HD FS 270, 276, 349, 377, 479, and 360 or 463
  - Select 6 credits from: HD FS 239, 283, 341, 373, and 380

*Additional requirement: Students must fulfill international perspectives, U.S. diversity, and ethics requirements by selecting coursework from approved lists. These courses may be used to fulfill other area requirements.*
Curriculum in Early Childhood Education

The curriculum in early childhood education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms and home-based programs, with emphasis on inclusive services; graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets the requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is administered jointly by the Departments of Human Development and Family Studies and Curriculum and Instruction.

Students in early childhood education must make application to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandate for a performance-based system of teacher training. Following this same type of system, the state of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the eleven Teacher Education Standards along with other information about the University Teacher Education Program, can be found at www.teacher.hs.iastate.edu/, the teacher education website.

Foreign Language Requirement

Early childhood education majors must satisfy a graduation requirement equivalent to the first year of university-level study in one foreign language (normally, completion of a two-semester sequence in any one foreign language). The requirement may be met by completion of three or more years of high school study in one foreign language.

Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for 101-102 in those languages; test-out credit (T credit) may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. If these students choose to take 101-102 on a remedial basis, they will be graded S-F. Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for 101-102 in those languages; test-out credit (T credit) may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. If these students choose to take 101-102 on a remedial basis, they will be graded S-F. Certification in American Sign Language is recognized by the University and satisfies the foreign language requirement for the curriculum in Elementary Education.

Total credits required: 128.5.

21 Required methods
**Curriculum in Family and Consumer Sciences**

**Education and Studies**

Administered by Apparel, Educational Studies and Hospitality Management. Leading to the degree bachelor of science. Total credits required: 125.5

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core. Students select one program option.

There are three choices for this curriculum.

- **Option 1,** teacher licensure, **Option 2,** communications, or **Option 3,** professional studies. In all options, students are prepared with a broad-based understanding of family and consumer sciences.

Option 1, teacher licensure, is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior, and senior high schools. With additional credits students may also be approved to teach in specific occupational areas: child care, financial merchandising, and foodservice. Further information about licensure programs appears under Teacher Education.

Option 2, communications, is designed for students seeking careers emphasizing communication with diverse populations in extension, business, community agencies, community colleges, and youth and adult education programs in a global community.

Option 3, professional studies, is designed to provide students with the opportunity to pursue an individualized program which is planned with their academic advisers. Opportunities to participate in study abroad, internships, and field study build a solid base for work in a global community. Careers include working with diverse population in extension, business, community agencies, community colleges, and youth and adult education programs.

The program offers a minor in family and consumer sciences education; the requirements appear under Family and Consumer Sciences Education and Studies, Courses and Programs.

**Curriculum in Family Finance, Housing, and Policy**

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

Total credits required: 121.5

The family finance, housing, and policy curriculum prepares students for professional work related to financial and housing resource management and policy analysis. The program focuses on financial resource management, housing services and administration, and family policy issues pertinent to children, adults, and families. Graduates of the program are prepared for employment within the public and private sector as financial counselors and planners, insurance agents, loan officers, mortgage originators, government housing authority administrators, housing advocates, housing planners, real-estate agents, non-profit agency administrators, policy analysts and lobbyists, property managers, and consumer credit and financial aid counselors. Family finance, housing, and policy majors also are prepared to enter graduate programs in family policy and family financial planning.

Learning outcomes are identified for graduates with a degree in family finance, housing, and policy. Students are able to: demonstrate competency in consumer science and their chosen field of emphasis; demonstrate proficiency in interpersonal communication and in working with diverse groups to solve multidisciplinary problems; effectively prepare and deliver information to family finance, housing, and policy professionals as well as to the general public; critically evaluate information and accurately interpret and use research; understand the complexity of issues facing professionals in the field, including ethical, cultural and environmental elements.
Human Sciences

A minor in family finance, housing and policy is available; the requirements appear under Human Development and Family Studies, Courses and Programs.

0-5 Electives

120.5 Total credits

*Additional degree requirements: Students must fulfill international perspectives and U.S. diversity requirements by selecting coursework from approved lists. These courses may be used to fulfill other area requirements.

Concurrent B.S. and M.S. Program:
Well qualified students in Food Science who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a bachelor of science in Food Science and a master of science degree in Food Science and Technology. For more information, refer to www.fshn.hs.iastate.edu

Curriculum in Kinesiology and Health

The curriculum in Kinesiology and Health is designed for students preparing to enter professional areas related to the health, exercise or sport science fields. Students majoring in Kinesiology & Health may select one of six options: 1) Athletic Training, 2) Community and Public Health, 3) Exercise Science, 4) General Studies, 5) Health/Fitness Management, and 6) Physical Education Licensure.

Minors in dance, athletic coaching, and sport and culture are available; the requirements appear under Kinesiology, Courses and Programs.

A major in Performing Arts with a dance emphasis is available; the requirements appear under Curriculum in Performing Arts in Theatre.

Communication Proficiency
In order to meet graduation requirements, all students must earn an average of C (2.0) or better in Engl 150 and 250, with neither grade being lower than a C-. Students not meeting this condition must earn a C or better in an advanced writing course (select from Engl 220, 302, 309, or 314).

U.S. Diversity and International Perspectives
In order to meet graduation requirements, all students must complete 3 credits of course work in U.S. Diversity and 3 credits in International Perspectives. See university approved list.

Total credits required: 124 (46 credits in courses numbered 300 or above).

Cr.
42 General Education
9 Physical and Life Sciences
Basic Human Physiology and Anatomy
8 Biol 255, 255L, 256, and 256L
3 Introduction to Human Nutrition—FS HN 167

- 3 Fields and Disciplines in Kinesiology—Kin 252, 253, 254 (required of fresh men only)
- 2 Concepts of Physical Fitness—Ex Sp 258

**Advanced Core**
(H S 110, Kin 252, 253, and 258 should be completed prior to enrollment in the advanced core courses; students must have completed three of these courses with at least one from each sub-discipline; some courses have unique prerequisites which can be taken as part of General Education coursework)

**Biological Basis of Physical Activity and Health Promotion**
- 3 Biomechanics - Kin 355
- 3 Physiology of Exercise—Kin 358
- 3 Human Diseases—H S 350

**Behavioral Basis of Physical Activity and Health Promotion**
- 3 Sociology of Sport and Physical Activity—Kin 360
- 3 Sport Psychology—Kin 365
- OR Exercise Psychology—Kin 366
- 3 Motor Control and Learning Across the Lifespan—Kin 372
- 3 Consumer and Public Health—H S 310

**Option 1. Athletic Training**
The CAATE accredited athletic training option prepares students for the NATABOC certification examination or for graduate work in athletic training. Admission to the athletic training option is competitive and based on available department resources and will be determined on the basis of grades and other performance factors. Technical standards can be found on the athletic training website. Details are available from the Kinesiology Advising Office or the Athletic Training Education Program.

- 3 Basic Athletic Training for Athletic Trainers—Kin 222
- 1 Athletic Training Clinical Practicum—Kin 221, Kin 223
- 1 Introduction to Taping, Bracing, and Equipment Fitting—Kin 240
- 3 Evaluation of Athletic Injuries I—Kin 224
- 1 Athletic Training Clinical Practicum—Kin 225
- 3 Evaluation of Athletic Injuries II—Kin 226
- 1 Athletic Training Clinical Practicum—Kin 227
- 3 Therapeutic Modalities for Athletic Trainers—Kin 323
- 1 Athletic Training Clinical Practicum—Kin 324
- 3 Rehabilitation of Athletic Injuries—Kin 326
- 1 Athletic Training Practicum—Kin 327
- 3 Organization and Administration of Athletic Training—Kin 425
- 3 Medical Concerns for the Athletic Trainer—Kin 450
- 3 Legal Aspects of Sport—Kin 445
- 4 Principles of Fitness Assessment and Exercise Prescription—Kin 458
- R Review of Athletic Training Competencies—Kin 489
- 2 Instructor’s First Aid and CPR—H S 305
- 1 Laboratory in General Chemistry—Chem 163L
- 1 Laboratory in Physics—Phys 106 or 111
- 3 Drug Education—H S 215

Elective to equal 124 total credits

The following courses are required; they can be taken as part of the General Education requirements:

3-5 Statistics—Stat 101, 104, 226
2-3 Mathematics—select from Math 140, 141, 142, 150, 165

The following six courses must also be taken;

three can fulfill the Advanced Core requirement: Kin 355, 358, 360, 365, 372 and H S 350.

**Option 2. Community and Public Health**
This option emphasizes health promotion and disease prevention and prepares students for professional involvement in community health agencies which incorporate health services and the educational process. Students will be prepared for employment in state and public health agencies, volunteer health agencies, hospitals (patient education), and industry (health and wellness programs). Graduates are eligible to take the National Certified Health Education Specialist (CHES) exam which recognizes qualified specialists in the diversified field of health education.

- 2 First Aid and Emergency Care—H S 105
- 3 Drug Education—H S 215
- 3 Worksite Health Promotion—H S 380
- R Search Strategies for Field Experiences and Employment—H S 385
- 3 Administration of School Health—H S 390
- 3 Community Health Program Development—H S 430
- 2 General Microbiology—Micro 201
- 1 Intro Micro Lab—Micro 201L
- 3 Human Sexuality—HD FS 276
- 3 Aging and the Family—HD FS 377
- 3 Principles of Accident Prevention—TSM 272
- 5 General Chemistry with lab—Chem 163 and 163L
- 4 Principles of Biology with lab—Biol 211 and 211L
- 3 Principles of Marketing—Mkt 340
- 3 Principles of Public Relations—Jl MC 220 or Publicity Methods—Jl MC 205
- 3 Principles of Microeconomics—Econ 101
- 3-4 Select from Engl 309, Engl 313, HD FS 395, HD FS 449 or Jl MC 342/342L

10-16 Directed Field Experience—H S 485
Elettes to equal 124 total credits

The following courses must also be taken. They can fulfill either General Education or Core requirements for the Kinesiology & Health major:

- 3 Statistics—Stat 101, 104, 226
- 3 Psych 230 or HD FS 102 (under Social Science choice)

The following three courses must also be taken; they will fulfill the Advanced Core requirement; H S 310, 350 and Kin 366.

**Option 3. Exercise Science**
The Exercise Science option is designed for students interested in an interdisciplinary approach to the science of human movement. By combining exercise science with another area of study to support an individualized program, this option is suitable for students interested in graduate study or who are preparing for advanced study leading to careers in medicine, physical therapy, or other allied health programs.

- R Search Strategies for Field Experience and Employment—Ex Sp 385
- 6 Two 300-400 level Ex Sp courses
- 26 Meet the requirements of a specialization area in a related field

Electives to equal 124 total credits

A statistics course and one of Math 140, 141, 142, or 165 must be selected in the General Education requirements.

The following six courses must also be taken; three can fulfill the Advanced Core requirement: Kin 355, 358, 360, 365, 372 and H S 350.

**Option 4. General Studies**
The general studies option is provided for students interested in an interdisciplinary approach to the study of human movement. In this option kinesiology is combined with a concentration in another area of study to support an individualized program, such as community sport and recreation, dance, and other sport, exercise, or health related fields. Programs of study must be approved by the undergraduate program coordinator.

- R Kin 385
- 6 Additional credits in 300-400 level courses
- 26 Credits in related areas of study (must be approved by Curriculum Coordinator)

8-12 Internship in Sport and Exercise Science—Kin 486
Electives to equal 124 credits

2009-2011

Human Sciences
The following courses must also be taken. They can fulfill the General Education requirements:

2-3 Mathematics—Select from Math 140, 141, 142, 150, 165
3-5 Statistics—select from Stat 101, 104, 226
4 Physics—Physics 106 or 111

The following five courses must also be taken: three can fulfill the Advanced Core requirement: Kin 355, 358, 360, 365, 372.

**Option 5. Health/Fitness Management**
This option prepares students for careers in the physical fitness/health field. It is designed for those who wish to prepare for professional roles as exercise specialists or program directors in corporate fitness programs, health clubs, cardiac rehabilitation programs, or other public and private agencies providing physical fitness activities.

2 Basic Athletic Training—Kin 220
2 Leadership Techniques for Fitness Programs—Kin 259
3 Management of Health-Fitness Programs and Facilities—Kin 345
3 Worksite Health Promotion—H S 380
R Search Strategies for Field Experiences and Employment—Kin 385
4 Principles of Fitness Assessment and Exercise Prescription—Kin 458
1 Internship in Exercise Leadership—Kin 459
3 Medical Aspects of Exercise—Kin 462
8-16 Internship in Sport and Exercise Science—Kin 485A
3 Principles of Organization and Management—Mgmt 370
3 Principles of Macroeconomics—Econ 101
4 Phys 106 or 111

Electives to equal 124 total credits The following courses are required: they can be taken as part of the General Education requirements:

2-3 Mathematics - select from Math 140, 141, 142, 150, 165
3-5 Statistics - select from Stat 101, 104, 226

The following five courses must also be taken: three can fulfill the Advanced Core requirement: Kin 355, 358, 360, 365 or 366, and 372.

**Curriculum in Hotel, Restaurant, and Institution Management**
Administered by the Hotel, Restaurant, and Institution Management Program. Leading to the degree bachelor of science. Total credits required: 123.5

The curriculum in Hotel, Restaurant and Institution Management develops students as leaders for the hospitality professions.

**Curriculum in Nutritional Science**
Administered by the Department of Food Science and Human Nutrition.

*Additional degree requirements: Students must fulfill international perspectives and U.S. diversity requirements by selecting coursework from approved lists. These courses may be used to fulfill other area requirements.

**Concurrent B.S. and M.S. Program:** Well qualified students in Nutritional Science who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a bachelor of science in Nutritional Science and a master of science degree in Nutritional Sciences. For more information, refer to www.fshn.hs.iastate.edu
The Curriculum
A baccalaureate degree in liberal arts and sciences is the end result of a curriculum that connects and integrates study in a major with general education. Requirements for a degree are deliberately flexible. Students select programs of study suited to a variety of interests and goals. Students having academic interests not fully met by a departmental major may also pursue a major offered by one of the college’s interdepartmental programs or may apply for an undergraduate major in interdisciplinary studies (See Index, Cross-Disciplinary Studies, Courses and Programs). The college participates in the University Honors Program; thus, students with exceptional academic promise can develop unique and challenging programs of study.

The college has three curricula: a curriculum in Liberal Arts and Sciences, leading to the bachelor of arts or the bachelor of science degree; a curriculum in music, leading to the bachelor of music degree; and a curriculum in liberal studies, leading to the bachelor of liberal studies degree.

High School Preparation/Admission Requirements
Students entering the college are required to present evidence of the following high school preparation:

4 years of English
Typically this preparation includes courses in British, American, and world literature in which critical reading and writing skills are emphasized and courses in speech and composition, including at least one senior-level writing course.

3 years of social studies
Typically such preparation includes two semesters of world history, two semesters of American history, and a semester of American government. Electives can be chosen from areas such as economics, sociology, or psychology.

2 years of a single world language
Three years or more of a single world language are strongly recommended for students who wish to continue their work in that language. A minimum of three years of a single world language is required to fulfill the world language graduation requirement in the College of Liberal Arts and Sciences.

3 years of mathematics
Such preparation shall include two semesters of beginning algebra, two semesters of geometry, and two semesters of intermediate algebra. A fourth year of study involving analytic geometry, trigonometry, linear algebra, and/or calculus is strongly recommended for students who will major in mathematical or scientific disciplines.

3 years of science
At least two years of such preparation shall be chosen from biology, chemistry, and physics.

Recommended but not required as a condition of admission to the College of Liberal Arts and Sciences is one semester of computer experience. (Such a course should stress problem-solving with computers and should not substitute for courses in mathematics. In schools where computer use is an integral part of most courses, separate instruction in computers is not necessary.)

Students who transfer from another college or university with at least 24 credits of satisfactory coursework may be exempt from most of these requirements. Students who do not meet the requirements listed here may be admitted with a limited number of deficiencies. Contact the college office for further information about resolving these deficiencies.

Transfer Students
To graduate from the College of Liberal Arts and Sciences, a transfer student must complete the general requirements of the college as well as those of the university. Students planning to transfer to Iowa State University for the purpose of enrolling in the College of Liberal Arts and Sciences are advised to contact the college office for information concerning degree program requirements. Prospective transfer students are urged to learn about the academic programs that are of interest to them well before arriving on campus so that pre-transfer courses are appropriate to the planned major and transferable toward graduation from ISU. Additional information concerning transfer credit evaluation may be obtained through the Office of Admissions as well as the department in which a student is interested.

A transfer student in the College of Liberal Arts and Sciences may choose to graduate under the catalog in effect at the time of his or her graduation or under one of the two immediately preceding catalogs, provided that it covers the period of his or her enrollment either at Iowa State or any other accredited school. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed. A transfer student is responsible for reviewing his/her transfer credit evaluation with the academic adviser during the first semester of enrollment.

University Requirements
The university requirements for the bachelor’s degree, including statements of academic standards, learning goals, the university residence requirement, the Communication proficiency requirement, U.S. diversity and international perspectives requirement, and the library requirement, appear in the Colleges and Curricula portion at the beginning of this catalog.
Curriculum in Liberal Arts and Sciences

To obtain a bachelor’s degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, an undergraduate student must earn a minimum of 120 semester credits including a minimum of 32 semester credits earned in residence at Iowa State University. In addition, the student must meet general education, communication proficiency, library proficiency, world language, and advanced credit requirements, as well as the requirements of a major. Courses taken on a pass/no pass basis may be counted toward the required total of 120 credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement. No more than 8 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation.

General Education
Requirements and Learning Goals

The central importance of a general education is reflected in the learning goals of each of four disciplinary areas. Whereas the courses in a major are designed to develop mastery of a specific field or discipline, courses in general education are designed to establish a strong, intellectual foundation for all specializations. Students earn the minimum credits listed in each of the four general education areas in courses not required by the department of the first major listed on the degree program. Interdisciplinary courses may be used to satisfy requirements in any area for which they have been approved, but a student may not apply the same course to more than one area.

Credit by Examination Program

Individual departments may use CLEP Subject Tests for testout of specific courses. Students in the College of Liberal Arts and Sciences may use CLEP General Test credits as free electives but not toward any of the general education area requirements.

World Language Requirement

The faculty of the College of Liberal Arts and Sciences believes that undergraduate students should acquire elementary practical experience in a second language, should be introduced to the theoretical study of language structure, and should begin to develop an understanding of a second culture through study of that culture’s language.

As a means of achieving this objective, a student must satisfy a graduation requirement equivalent to the first year of university-level study in one world language (normally, completion of a two-semester sequence in any one world language). Students who have completed three or more years of high-school world language study are deemed to have completed the LAS World Language Requirement. These students may not enroll in or receive credit for 101 or 102 in those languages; test-out credit may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. 101 or 102 may not be taken on a remedial basis.

Students who have completed more than one year but less than three years of high-school world language study may not enroll in 101 in the same language. These students may enroll in either a 102 course in that language, or in the case of Spanish, Span 97. Before enrolling in either Span 97 or a 102 language course, students are advised to take the on-line placement test available at www.language.iastate.edu. Span 97 is designed for students who need additional remedial work in the language at the first-year level (101-102) and are not planning to continue their language study at the second-year 201-202 level. Students who complete Span 97 with a passing grade will have fulfilled the LAS World Language Requirement. Students who have completed Span 97 and wish to pursue further study in Spanish at the 201-202 level may enroll in 102.

Students who have completed more than one year but less than three years of high-school world language study may satisfy the World Language Requirement by (a) passing the exam for credit at the 102 level, (b) receiving a passing grade in a 102 world language course, or (c) receiving a passing grade in a world language course at the 200-level or higher. For more information see Department of World Languages and Cultures. (Courses taught in English do not satisfy the World Language Requirement). Iowa State University accepts a record of academic performance in American Sign Language or certification of proficiency in American Sign Language as fulfillment of entrance or graduation requirements in world language for a baccalaureate degree.

Questions about the World Language Requirement and how to meet it should be directed to the Department of World Languages and Cultures. Credits applied toward the World Language Requirement cannot be used to satisfy the general education requirements, but students who have fulfilled the World Language Requirement may apply additional courses in world languages toward the appropriate general education areas. Majors in any world language are deemed to have fulfilled the college World Language Requirement. International students for whom English is a second language may satisfy the World Language Requirement by completion of Engl 150 and 250 at ISU with an average grade of C- or better. See World Languages and Cultures for additional information on international students.

Advanced Communication Skills

The continued development of communication skills following the sophomore year is the responsibility of the student’s major department. The department promotes this development by adopting measures to certify the writing proficiency of its own majors. Certification occurs upon satisfactory completion of a designated course in which writing is evaluated and is a significant component. This designated course may be either a course required in the student’s program or an advanced writing course offered by the Department of English (e.g., Engl 302, 305, or 314).

General Education Areas

The central importance of a general education is reflected in the learning goals of each of three disciplinary areas. Whereas the courses in a major are designed to develop mastery of a specific field or discipline, courses in general education are designed to establish a strong, intellectual foundation for all specializations. The general education areas with their minimum credit requirements for the College of Liberal Arts and Sciences are:

Arts and Humanities—(Minimum 12 credits). The student should develop an understanding of human cultural heritage and history, and an appreciation of reasoning and the aesthetic value of human creativity.

Natural Sciences and Mathematical Disciplines—(Minimum 11 credits, including 3 in the mathematical disciplines and 8 in the natural sciences). The student should experience science as a rational search for understanding the structure and behavior of the natural world, and should appreciate mathematics as a valuable tool of the sciences and as an intrinsically important way of thinking.

Social Sciences—(Minimum 9 credits). The student should develop an appreciation of the principal methods of studying human behavior and an understanding of the structure and functioning of institutions.

Because students fulfill, in part, the learning goals of the area of their first major by taking courses in their programs of study, the minimum number of general education credits required in the area of the first major is reduced from that listed above by 3 credits. Students in Liberal Studies or Interdisciplinary Studies majors must complete the minimum requirements in all three areas. The list of majors falling within each area is available from the Office of the Dean, College of Liberal Arts and Sciences, and is posted on the web site of the College of Liberal Arts and Sciences.

Courses from the department of the first major may not be applied to general education requirements. Courses cross-listed with a course in the student’s first major may be used to satisfy either major requirements or general education requirements, but may not be used more than once. Interdisciplinary courses may be used to satisfy requirements in any area for which they have been approved, but a student may not apply the same course more than once.

Lists of approved courses are available on the web, from academic advisers or from the Office of the Dean, College of Liberal Arts and Sciences.

Advanced Credit Requirements

To obtain a baccalaureate degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 200 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.
The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student's grade is C or higher. In addition, the average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher. Courses from the department of the first major listed on the degree program may not be counted in the general education areas.

**The Major**

Students must show they have achieved depth in a specialized area by completing successfully the requirements and learning goals of a major. A major is comprised of 24 to 48 credits in a specific discipline as determined by the faculty. Tracks within a major must have a common 24 credit core. Some courses outside the major discipline may also be required as supporting work for the major. (See Index for page reference to individual department and program requirements.)

The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student's grade is C or higher. In addition, the average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher. Courses in the first major listed on the degree program may not be counted in the general education groups.

Courses meeting the requirement of additional majors may be counted in the general education groups. When choosing an additional major, students must confirm that the additional major is allowable (see list under "Double Majors").

The major is chosen from the following list, which also indicates the degree(s) offered in the respective majors.

**Advertising, B.A.**

**Anthropology, B.A., B.S.**

**Biochemistry, B.S.**

**Bioinformatics and Computational Biology, B.S.**

**Biological/Pre-Medical Illustration, B.A.**

**Biology, B.S.**

**Biophysics, B.S.**

**Chemistry, B.A., B.S.**

**Communication Studies, B.A.**

**Computer Science, B.S.**

**Earth Science, B.A., B.S.**

**Economics, B.S.**

**English, B.A., B.S.**

**Environmental Science, B.S.**

**Environmental Studies (may be taken as a second major with the degree to be determined by the first major)**

**Genetics, B.S.**

**Geology, B.S.**

**History, B.A., B.S.**

**Interdisciplinary Studies, B.A., B.S.**

**International Studies (may be taken as a second major with the degree to be determined by the first major)**

**Journalism and Mass Communication, B.A., B.S.**

**Linguistics, B.A.**

**Mathematics, B.S.**

**Meteorology, B.S.**

**Music, B.A., B.Mus.**

**Performing Arts, B.A.**

**Philosophy, B.A.**

**Physics, B.S.**

**Political Science, B.A.**

**Psychology, B.A., B.S.**

**Religious Studies, B.A.**

**Sociology, B.A., B.S.**

**Software Engineering, B.S.**

**Speech Communication, B.A.**

**Statistics, B.S.**

**Technical Communication, B.S.**

**Women's Studies, B.A., B.S.**

**World Languages and Cultures, B.A.**

The major in interdisciplinary studies (B.A., B.S.) is available for undergraduate students who have unique interdisciplinary educational goals. Such a major is designed by the faculty and the student and is approved only when the educational goals cannot be met by a reasonable combination of existing majors, minors, and electives. (See Index, Interdisciplinary Studies.)

A curriculum in liberal studies leading to a bachelor of liberal studies degree (B.L.S.) is also available. (See Index, Liberal Studies.)

The LAS College offers certificate programs available for students seeking documentation of additional study in specialized academic topics. At present, certificates are available in Latin American Studies and in Community Leadership and Public Service. Information about the specific course requirements in these certificate programs may be found in their respective entries in the Courses and Programs section of this catalog.

**Double Majors**

Students may elect a second major from the departments and program areas listed above, or from a major field offered for the bachelor's degree in another college of the university. Double majors between the following are not allowed: Chemistry with Biochemistry and Agricultural Biochemistry; Biology with Animal Ecology, Agricultural Biochemistry, Biochemistry, Genetics, and Microbiology.

The major departments must then approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major.

If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In all cases, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major. Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education and World Language Requirements.

A student may earn two degrees in the Liberal Arts and Sciences curriculum with two appropriate majors and at least 30 additional credits. Either the B.A. or the B.S. in this curriculum may be earned with the Bachelor of Music. A major in Liberal Arts and Sciences may not be added to a Bachelor of Liberal Studies or a Bachelor of Music degree. Any degree offered by this college may be earned together with a degree with a major in any other college of the university. For the requirements for two degrees, see Index, Bachelor's Degree Requirements.

**Minor**

A minor, which is optional, must consist of at least 15 credits, with at least 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. (See Index, Minors.)

The following minors are offered by the college of Liberal Arts and Sciences:

Advertising

African American Studies

American Indian Studies

Anthropology

Astronomy

Biochemistry

Biological Illustration

Biology

Chemistry

Chinese Studies

Classical Studies

Communication Studies

Computer Science

Criminal Justice Studies

Economics

Emerging Global Disease

English

Entrepreneurial Studies

Environmental Science

Environmental Studies

French

Genetics

Geology

German

Gerontology

History

International Studies

Journalism and Mass Communication

Latin

Linguistics

Mathematics

Meteorology

Military Studies (Army Reserve Officers' Training Corps)

Music

Music Technology

Performing Arts

Philosophy

Physics

Political Science

Psychology

Religious Studies

Russian Studies

Sociology

Spanish

Speech Communication

Statistics

Technical Communication

Technology and Social Change

Women's Studies
Courses applied toward the general education groups may be used to meet the requirements of a minor. (For restrictions, see Index, Minors.) If a student declares a minor and completes the requirements specified by the offering department/program, the minor will be recorded on the transcript.

**Electives**

Students will take additional courses, freely elected, sufficient to accumulate a total of 120 credits. These additional courses together with the general education courses may be used to meet the requirements of a minor or of another major, provided that they are taken on a graded basis.

**Planning the Program of Study**

Careful, comprehensive planning is important for meeting graduation requirements and taking advantage of the resources offered by the university. Each student is encouraged to work with his or her academic adviser in developing a four year plan as soon as possible after declaration of the major. A degree audit listing all completed courses and those remaining to be taken for fulfillment of the degree requirements in the student’s chosen major is provided to the student and the adviser each semester. The student should review the audit each semester and consult with the adviser when changes are required. Any changes to the audit must be approved by the academic adviser and by the dean’s office. It is essential that the audit be reviewed and updated in a timely fashion in order to avoid delay in the student’s graduation.

During the first year, students should meet proficiency requirements in English and in library. They should also make progress toward meeting the general education requirements, a large part of which should be completed by the end of the second year. The third and fourth years should emphasize completion of the major (and minor, if elected) and of general education requirements, and should give the student an opportunity to take electives.

**Academic Advising**

**Learning Outcomes**

Through their experience with academic advising, students will:

- Develop an understanding of the structure, application, and goals of a liberal arts education in relation to their academic development.
- Be able to formulate appropriate questions, seek information, and evaluate and apply academic advice.
- Know the requirements, policies and protocol of the university, college, and department as they relate to their educational experience.
- Understand how degree programs can be enhanced by study and experiences tailored to their intellectual and personal goals.
- Be able to identify and utilize university resources effectively to:
  - Satisfy degree requirements
  - Plan programs of study, including selection of appropriate courses and registration
  - Discover how interests, skills and goals connect to fields of study and careers
  - Link curricular and co-curricular activities
  - Research and prepare for advanced study and/or careers
- Share responsibility for a mentor-mentee relationship between advisee and adviser.

**The Open Option**

Many students entering Iowa State University are not ready to declare a major. They want time to become familiar with the academic opportunities that the university offers and to determine the best match between their academic interests and abilities. These students enter Iowa State University as Open Option majors.

The Open Option experience is designed to help students explore majors and careers, become acquainted with the entire university, and make successful adjustments to the academic expectations of Iowa State. Open Option students are assigned academic advisers in the Liberal Arts and Sciences Student Academic Services Office. These advisers help students with academic and career development.

During the first year, an orientation class introduces them to all of the colleges and majors on campus. A career development class in the second semester guides students in selecting a major and career that match their academic and personal goals. Open Option majors also have the opportunity to be members of a learning community with other Open Option students.

Aided by their adviser, Open Option students select courses that allow them to sample their academic interests before committing to a specific university major. Open Option students are encouraged to declare this major by the end of the first year. In addition, students who may have started in a specific field and have discovered it is not meeting their needs may transfer into Open Option for a semester or two while they decide on a new major.

**Honors Program**

For information on the Honors Program in the College of Liberal Arts and Sciences, see Index, Liberal Arts and Sciences, Cross-Disciplinary Programs, Honors Program.

**Reserve Officers’ Training Corps Programs (ROTC)**

The College of Liberal Arts and Sciences also offers students the opportunity to combine their academic programs with ROTC programs in the Military Science (Army), Naval Science, and Air Force Aerospace Studies).
Teacher Licensure

Teaching licenses are issued by the Iowa Board of Educational Examiners. The Recommending Officer for the ISU University Teacher Education Program submits each candidate file after that candidate is determined to be eligible for licensure. Teaching licenses are issued for a specific teaching level, e.g., K-6 or 7-12. A subject area endorsement is listed on the candidate's license. The license may have multiple subject area endorsements listed.

Students in the College of Liberal Arts and Sciences may participate in preprofessional programs in music education (BM degree with Vocal K-12 option or Instrumental K-12 option) and may apply for a teaching license that allows them to teach music in grades K-12. Students who plan to teach in secondary schools (grades 7-12) may qualify for a license by completing an approved licensure program in one of the following LAS majors:

- Biology
- Chemistry
- Earth Science
- English
- French
- German
- History
- Spanish (Latin & Russian endorsements)
- Mathematics
- Physics
- Music
- Social Studies
- Speech Communication
- Physical Science

Students may also add these additional endorsements to their primary license:

- English as a Second Language
- General Science
- Music Education
- Physical Science
- Social Studies
- Speech Communication

For more information, see Index, Teacher Education.

Preprofessional Programs

Students in the College of Liberal Arts and Sciences may participate in preprofessional programs in human health-related fields, law, and theology by taking the courses required for admission to professional schools. Students may enter the college with the designation Premed, Prelaw, or Preprofessional Health Programs. Most will earn a bachelor's degree by choosing a major and meeting the requirements for the major while taking the preprofessional courses.

Others will spend one to three years as students in the college before transferring to a professional school to which they have applied and been accepted. For further information, see Index, Preprofessional Study.

Experiential Learning (Internship/Co-op Program)

The Experiential Learning (Internship/Co-op) Program assists students in gaining career-related experience while going to school. Internships/Co-ops provide students with the opportunity to gain specific skills, apply academic knowledge in practical situations, pretest their career choice, earn a salary, and establish a network of professional contacts.

Most internships are full-time and last for a semester or a summer, but a part-time experience is possible. Students wishing to receive academic credit for their internship must make arrangements with a faculty member in their major department. In contrast, co-op students work full-time on an extended basis (work two semesters) or on an alternating basis (work, school, work, etc.) during any semester (fall, spring, summer).

It may take students participating in the Experiential Learning (Internship/Co-op) Program an additional semester or more to complete their academic curriculum requirements. For additional information, contact Business/Liberal Arts and Sciences Career Services.

Curriculum for Bachelor of Music

The Department of Music offers a Bachelor of Music degree (B.Mus.) as well as a Bachelor of Arts degree in music. For information about both degrees, see Music, Courses and Programs.

In order to receive teacher certification in music, students must earn the bachelor of music degree.

Candidates for the bachelor of music will complete the following requirements.

<table>
<thead>
<tr>
<th>Cr.</th>
<th>General education</th>
</tr>
</thead>
<tbody>
<tr>
<td>38.5-46.5</td>
<td>Music core</td>
</tr>
<tr>
<td>47</td>
<td>Music option</td>
</tr>
</tbody>
</table>

(Students must select one of the following options: music education [vocal or instrumental], performance [voice, piano, organ, string instruments, wind or percussion instrument], or composition.)

For specific degree requirements, see Music, Courses and Programs.

Curriculum for Bachelor of Liberal Studies

The LAS College administers a bachelors degree program in Liberal Studies. This degree, the bachelor of liberal studies (B.L.S.), was established by the three Iowa Regent universities to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals.

For specific degree requirements, see Liberal Studies, Courses and Programs.

Curriculum for Software Engineering

A bachelor of science degree in software engineering is jointly administered by the Department of Electrical and Computer Engineering (College of Engineering) and the Department of Computer Science (College of Liberal Arts and Sciences). The program is aimed at creating high-quality software in a systematic, controlled, and efficient manner. The specific objective of the program is to educate students on principles, processes, techniques, and tools for producing, analyzing, specifying, designing and evolving software. A broader objective is to cultivate among students intellectual curiosity, problem solving skills, good learning habits, effective communication skills, leadership, and teamwork.

This interdepartmental program enables students to take a range of Software Engineering courses, as well as elective courses from both Computer Science and Computer Engineering as part of their degree program. For specific degree requirements, see Software Engineering, Courses and Programs.
College of Veterinary Medicine

John U. Thomson, Dean
Donald D. Draper, Associate Dean for Academic and Student Affairs
Donald L. Reynolds, Associate Dean for Research and Graduate Studies
Eldon Uhlenhopp, Interim Associate Dean for Outreach and Operations
vetmed.iastate.edu/

Departments of the College
Biomedical Sciences
Veterinary Clinical Sciences
Veterinary Diagnostic and Production Animal Medicine
Veterinary Microbiology and Preventive Medicine
Veterinary Pathology

Other units of the college include the Veterinary Teaching Hospital, Veterinary Diagnostic Laboratory, Veterinary Medical Research Institute, Veterinary Education and Technology Services and Office of Curricular and Student Assessment. The college participates in interdisciplinary graduate programs in genetics; molecular, cellular and developmental biology; toxicology; immunobiology; and neuroscience.

Objectives of the Curriculum
The instructional objective of the College of Veterinary Medicine is to enable students to assume vital roles in society as productive health care providers and biomedical scientists. Such an education provides students with general learning, communication, and problem solving abilities; veterinary medical practice and research skills; and professional and ethical values.

The curriculum incorporates basic biomedical and clinical principles, clinical decision making skills, and exceptional clinical experience in small animal medicine and surgery, equine medicine and surgery, food animal medicine and surgery, and production animal medicine. Companion animal medicine and surgery are provided within the regionally recognized referral hospital through the community practice unit and equine field services. The college is located in one of the most intensive livestock producing areas in the United States. Because of this, students engage in extensive food supply veterinary medicine experiences and numerous diagnostic cases.

The professional curriculum is a four-year course of study leading to the doctor of veterinary medicine degree. Each of the first three years of the curriculum consists of two semesters while the fourth year has three semesters. Students are admitted into the professional curriculum after completing a minimum of 60 semester credits of required undergraduate coursework.

Fourth year students may choose to enhance their education by earning clinical elective credits at approved government agencies, research laboratories, veterinary practices and other university hospitals. Outstanding research programs in infectious diseases, food safety, neuroscience, immunoparasitology, evidence-based medicine, and many other areas provide opportunities for qualified students to participate in research.

Concurrent D.V.M./M.S., D.V.M./Ph.D., D.V.M./M.P.H. programs are available for qualified students who wish to obtain both veterinary and graduate degrees. Students must have a bachelor’s degree or a minimum of 128 semester credits in undergraduate and professional curricula in order to participate in the concurrent DVM/graduate degree program. Admission to the concurrent degree program is subject to the approval of the deans of the College of Veterinary Medicine and the Graduate College.

The college is an important recruiting center for employers seeking veterinarians for private practice; industry; educational institutions; international agencies; federal, state and local governments; the armed forces; departments of public health; zoological gardens; and other related fields of professional activity. Graduates are highly sought after and typically have multiple employment offers upon graduation. Career services and an online job board are available for students.

Pre-veterinary Medicine Preparation

Admission Requirements
The College of Veterinary Medicine seeks students with diverse backgrounds and encourages students to enroll in baccalaureate programs in the college of their choice.

Undergraduate students are strongly encouraged to complete a bachelor’s degree before applying to the College of Veterinary Medicine. Because veterinarians have varied career options, when deciding on an undergraduate major, the student should consider the area of veterinary medicine which interests them. For example, those who desire a career in clinical practice may wish to pursue a degree in biological science, animal science, agricultural economics, business, social science or humanities. Students with an interest in zoo or wildlife veterinary medicine may want to look at animal ecology, environmental studies or zoology. Future researchers may wish to consider genetics, molecular biology, microbiology, or biochemistry. Students who desire a career in public health (USDA, FDA, etc) or government (legislative/policy) may find benefits in any of the biological sciences or in political science. A degree in education may be valuable to those who envision themselves as educators in a College of Veterinary Medicine. These examples are only suggestions and are but a few of the many possibilities.

For the most current information regarding applications and admission to the College of Veterinary Medicine, please refer to the College web site at www.vetmed.iastate.edu/.

Applications for admission to the College of Veterinary Medicine must have attended an accredited college or university, have completed 40 semester credits prior to the deadline for filing an application for admission, and have completed 80 semester credits prior to the end of the spring term of the year in which the applicant seeks to be admitted to the College of Veterinary Medicine.

All science requirements should be fulfilled by the time of application or scheduled for completion by the end of the fall term in which the applicant applies. However, if necessary, the applicant may complete up to two required science courses during the spring term prior to matriculation.

Any required science courses taken the spring term prior to matriculation requires a grade of B (3.00) or better to fulfill the requirement. Remaining non-science required courses must be completed by the end of spring term prior to matriculation with a grade of C (2.00) or better. Required courses may not be taken during the summer prior to entering the program.

Credits earned must include the following Iowa State semester course offerings or their equivalents:

English Composition One year of composition or writing emphasis courses. May include business or technical writing.
Engl 150, 250, 302, 309, or 314 6 cr.

Oral Communications May include public speaking, interpersonal communication, group or organizational communication or speaking emphasis courses.
Sp Cm 212, 223, or 312 or ComSt 214 or Ag Ed 311 3 cr.

General Chemistry with Laboratory*
One year series for biological science majors with one semester lab.
Chem 177-177L, 178 7 cr.

Organic Chemistry with Laboratory*
One year series with one semester lab.
Chem 331, 331L, 332 7 cr.

Biochemistry*
One semester (no lab required)
BBMB 301 3 cr.

General Physics with Laboratory*
First semester of a two-semester series with lab. Must include mechanics, fluids, heat and thermodynamics, vibrations, waves and sound.
Phys 111 4 cr.

General Biology with Laboratory*
Two semester series with lab each semester.
A Bachelor’s degree in Biology fulfills this requirement.
Biol 211, 211L, 212, 212L 8 cr.
Genetics *
Must include Mendelian and molecular genetics.
Biol 313 or Gen 320 3 cr.

Mammalian Anatomy or Physiology*
Human anatomy or physiology will also fulfill this requirement (no lab required).
An S 214, BMS 329, Biol 155, or Biol 255 or Biol 335) 3 cr.

Humanities or Social Sciences
8 cr.

Electives
8 cr.
Total Credits Required 60 cr.

* science requirement

Credits in the previously specified courses will normally be earned on the traditional four- letter grading system with A as the highest grade D as the lowest passing grade. All required courses must be completed with a grade of C (2.0) or better. It is generally expected that required courses have been completed within the past eight (8) years. AP or CLEP credits must be documented by original scores submitted to the University and MUST meet the University’s minimum requirement in the appropriate subject area. CLEP credits may be accepted only for arts, humanities and social sciences. Credits in the preceding specified courses will not be accepted if earned under the pass-not pass grading system or similar options.

Application and Admission
Applicants must apply using the Veterinary Medical College Application Service (VMCAS). The VMCAS application may be found online at the VMCAS website (www.aavmc.org under VMCAS). Those applying through VMCAS also need to complete the ISU Supplementary Application found at the College of Veterinary Medicine website. The deadline for filing the VMCAS application, evaluations and transcripts is October 1. The supplemental application, and processing fee are due to the College of Veterinary Medicine postmarked by October 15.

Any student wishing to use international coursework (including study abroad) to fulfill a preveterinary requirement must provide a transcript from the foreign institution.

A list of courses in progress at the time of submission and/or scheduled for completion by the end of spring term should accompany the supplemental application. Undergraduate college credits must average at least 2.50 on a 4.00 marking system for the application to be accepted. The preceding scholastic requirements are minimum and do not assure admission even though these requirements have been fulfilled.

Admission to the College of Veterinary Medicine is on a competitive and selective basis. Undergraduate GPA, Graduate Record Exam (GRE) general test score (The GRE must be taken prior to October 15 of the year the applicant applies and the scores must be received by October 31), animal and veterinary experience, essays, recommendations and personal development (leadership, citizenship, etc.) are given consideration in the selection of candidates. An interview will be required for those applying to enter Fall 2008 and later.

Approximately one-half of the positions available are reserved for residents of Iowa. The College of Veterinary Medicine has implemented a Cooperative Program in Veterinary Medicine with the University of Nebraska-Lincoln for Nebraska residents and contracts with the states of North Dakota, South Dakota and New Jersey. A number of positions are also available to residents of other states. A few highly qualified international students may be accepted and are considered in the non-resident/non-contract applicant pool. Consideration is given equally to all applicants without regard to race, color, national origin, gender, religion, disability, or age, political beliefs, or marital or familial status.

For further information on these programs and contracts, please visit the College of Veterinary Medicine at www.vetmed.iastate.edu and click on Admissions.

Curriculum in Veterinary Medicine
Graduation Requirements
To be awarded the degree doctor of veterinary medicine, candidates must have passed all required courses in the curriculum in veterinary medicine, have earned at least 4 elective credits on a graded basis of A, B, C, D when enrolled in the College of Veterinary Medicine, and have at least a 2.0 grade-point average in the veterinary medicine curriculum.

Required Courses in the Professional Program
BBMB 420—Physiological Chemistry
BMS 330—Principles of Morphology I
BMS 331—Principles of Morphology II
BMS 333—Biomedical Sciences I
BMS 334—Biomedical Sciences II
BMS 337—Neurobiology
BMS/VCS 339—Clinical Foundations I
BMS 345—Case Study I
BMS 346—Case Study II
BMS 354—General Pharmacology
BMS 443—Pharmacology and Therapeutics
VCS 311—Veterinarian in Society I
VCS 312—Veterinarian in Society II
VCS 313—Veterinarian in Society III
VCS 314—Veterinarian in Society IV
VCS 315—Veterinarian in Society V
VCS 385—Seminar
VCS 391—Clinical Imaging
VCS 393—Principles of Surgery
VCS 394—Principles of Surgery Lab
VCS 395—Small Animal Surgery
VCS 396—Anesthesiology
VCS 399—Ophthalmology
VCS 436—Small Animal Internal Medicine
VCS/VDPAM 440—Introduction to Clinics
VCS 444—Small Animal Medicine
VCS 445—Equine Medicine
VCS 448—Diagnostic Imaging and Radiobiology
VCS 449—Junior Surgery Laboratory
VCS/VDPAM 450—Disturbances of Reproduction
VDPAM/V PTH 426—Veterinary Toxicology
VDPAM 445—Clinical Medicine
V MPM 378—Case Study IV
V MPM 380—Veterinary Immunology
V MPM 386—Veterinary Microbiology

Approximately one-half of the positions available are reserved for residents of Iowa. The College of Veterinary Medicine has implemented a Cooperative Program in Veterinary Medicine with the University of Nebraska-Lincoln for Nebraska residents and contracts with the states of North Dakota, South Dakota and New Jersey. A number of positions are also available to residents of other states. A few highly qualified international students may be accepted and are considered in the non-resident/non-contract applicant pool. Consideration is given equally to all applicants without regard to race, color, national origin, gender, religion, disability, or age, political beliefs, or marital or familial status.

For further information on these programs and contracts, please visit the College of Veterinary Medicine at www.vetmed.iastate.edu and click on Admissions.

Curriculum in Veterinary Medicine
Graduation Requirements
To be awarded the degree doctor of veterinary medicine, candidates must have passed all required courses in the curriculum in veterinary medicine, have earned at least 4 elective credits on a graded basis of A, B, C, D when enrolled in the College of Veterinary Medicine, and have at least a 2.0 grade-point average in the veterinary medicine curriculum.

V PTH 425—Clinical Pathology

Fourth Year
The fourth year of the veterinary medical curriculum is designed to be flexible yet provide a broad based clinical education involving all domestic species of animals. All students participate in rotations that are considered fundamental to any species orientation that the student might choose. In addition, students can participate in rotations focused on small animals, horses, or food animals. Students may obtain clinical elective credits by repeating on-campus rotations or participating in approved off-campus preceptorships at government, private or public agencies; other universities; or private veterinary practices.

Students may choose from the following list of clinical rotations.

Anesthesiology

Bovine Production Medicine
Cardiology

CDC Epidemiology

Clinical Microbiology

Clinical Pathology

Community Practice

Dairy Production Medicine

Dermatology

Diagnotic Laboratory

Equine Field Services

Equine Medicine

Equine Surgery

Farrier

Food Animal Medicine and Surgery

Food Supply Field Services

Intensive Care/Emergency Medicine

Necropsy

Neurology

Oncology

Ophthalmology

Orthopedic Surgery

Public Health Laboratory

Radiology

Small Animal Medicine

Small Ruminant Production Medicine

Soft Tissue Surgery

Swine Production Medicine

Theriogenology

Reinstatement
Any student who voluntarily withdraws from the College of Veterinary Medicine or who is dismissed from the College of Veterinary Medicine, after having successfully completed one or more semesters forfeits his/her standing and must make written application for reinstatement to this college a minimum of 60 days prior to the opening of the semester for which they seek to re-enter. Any student who voluntarily withdraws from the College of Veterinary Medicine prior to completion of one semester must re-apply for admission to the college in the general applicant pool.
Graduate College

www.grad-college.iastate.edu/
David K. Holger, Dean
George A. Jackson, Assistant Dean
Carolyn Payne, Assistant Dean

The Graduate College and graduate faculty at Iowa State University are responsible for the quality of graduate education, for administering students’ graduate programs, and for promoting research support from various governmental, industrial, and private agencies.

The graduate faculty in various programs handle admission and classification of graduate students, establish requirements for advanced degrees, and have charge of instruction and research at the graduate level. Graduate faculty members also teach graduate courses, serve on program of study (POS) committees, and direct work of master’s and doctoral students. All graduate courses offered for major or nonmajor credit are taught by graduate faculty members or graduate lecturers.

Graduate study was offered soon after the university was founded, and the first graduate degree was conferred in 1877. Experimentation and research also started early, first in agriculture and shortly thereafter in home economics, engineering, science, and veterinary medicine. In 1913, the graduate faculty was organized formally and an executive graduate committee was appointed. In 1915, the graduate faculty held its first meeting, and in 1916, it granted the first doctor of philosophy degree.

Graduate education is vital to the quality of university teaching. The creative efforts of graduate faculty members and graduate students result in knowledge necessary to help society solve problems in educational, scientific, technological, and socioeconomic areas. The Graduate College encourages educational exchange and contact with undergraduate areas of the university to promote improved teaching on both the undergraduate and graduate levels. A part of this exchange is accomplished by the publication of books and technical articles which are made possible by graduate research.

The degrees master of arts, master of science, master of engineering, master of business administration, master of accounting, master of agriculture, master of fine arts, and master of public administration, and the master of school mathematics.

The Graduate College Handbook lists policies and procedures of the Graduate College. It is available at the Graduate College’s Web site: www.grad-college.iastate.edu/.

Admission

All degree-seeking graduate students must have graduated with a bachelor’s or master’s degree from a regionally accredited U.S. institution or from a recognized foreign institution where the requirements for the bachelor’s degree or its equivalent are similar to those at ISU. Additionally, each applicant must be accepted at ISU by the major program, the Office of Admissions, and the Graduate College. For information concerning graduate study in a particular academic discipline, prospective students should correspond with the chair of the major program in which they wish to study.

Iowa State University has a shared application process, which means certain items are sent electronically or in print form to the Office of Admissions and other items are sent to the graduate program to which the prospective student is applying. Detailed instructions are available at https://www.applyweb.com/app/ply/isu/. Students are also encouraged to check the Program Requirements Web page on the Graduate College Web site at http://www.grad-college.iastate.edu/programs/APprograms.php for mailing instructions and deadlines for each program.

The nonrefundable application fee is $30 ($70 for international applicants). An electronic application is required to apply to ISU’s graduate programs; the form and necessary instructions are available at https://www.applyweb.com/app/ply/isu/. The application fee is required of all applicants except those who have attended Iowa State or an undergraduate institution in the United States who do not satisfy the formal university requirements for full admission status. Provisional admission status may be granted to an applicant who does not satisfy the formal university requirements for full admission status and/or lacks undergraduate preparation in a field related to the graduate field of study.

Restricted admission may also be granted to graduates of non-English-speaking foreign institutions, even if the student meets the university requirements for full admission status. Advancement from restricted to full admission status requires completion of 9 semester credits of graduate level coursework as a graduate student with a cumulative grade average of B or better and the written recommendation of the major professor and approval by the Dean of the Graduate College.

Restricted admission status may be granted to an applicant who does not satisfy the formal university requirements for full admission status and/or lacks undergraduate preparation in a field related to the graduate field of study.

Without a Declared Major

Admission without a declared major is a category for graduates of regionally accredited institutions in the United States who do not intend to seek an advanced degree from Iowa State University. Such students usually include:

1. Those who intend to transfer graduate credit earned at Iowa State University to other institutions.
2. Those who intend to use graduate credits earned for professional certification.
3. Those who enroll for personal satisfaction.
4. Those who enroll occasionally in off-campus graduate courses. Students who wish to apply to Iowa State University without a declared major need to contact the Office of Admissions, 100 Enrollment Services Center (1-800-262-3810) for the nondegree application form for students in this category. The application form is also available at the web site at www.admissions.iastate.edu/nondegree/
Applications and schedules for students with an undeclared major are processed directly by the Office of Admissions and the Graduate College office; no program approvals are generally required. (Applications and schedules for students declaring a major require program evaluation and approval.)

A student without a declared major who subsequently seeks full, provisional, or restricted admission must apply to and be accepted by a graduate program and by the Graduate College for degree study. A new application, the application fee (unless the student attended Iowa State University as an undergraduate), and transcripts from all colleges attended are required.

For those students originally admitted to the Graduate College on a nondegree basis, no more than 9 semester hours of graduate credit earned under the nondegree option may be applied if the student later chooses to undertake a graduate degree program. The student's program of study committee will recommend to the Graduate College which courses (if any) taken on a nondegree basis may be included in the degree program.

**Graduate Admission of International Students**

An applicant who is a graduate of a recognized foreign institution is subject to the same criteria for admission as a graduate from an institution in the United States and may be recommended for the same admission categories described above except that of the nondegree option. International applicants for nondegree status may be considered for admission at the discretion of the Graduate College dean. Application and admission deadlines for international students can be obtained from the Admissions website at www.admissions.iastate.edu/apply.

International students are required to show evidence of financial support and to carry adequate health and accident insurance while in residence.

**Admission Examinations**

Graduate Record Examination. The Graduate Record Examination (GRE) is not a university-wide requirement for all applicants. However, many programs require or recommend submission of GRE scores; individual program statements at www.grad-college.iastate.edu/programs/AIPrograms.php should be consulted for this information.

**English Requirements for Non-native Speakers**

Applicants whose native language is not English and who have not earned a bachelor's or master's in a country where the only official language is English are required to submit Test of English as a Foreign Language (TOEFL) scores as part of the admission process. A minimum score of at least 79 on the TOEFL internet-based test or 550 on the paper-based test is required by the Graduate College. International students may also submit IELTS (International English Language Testing System) scores in lieu of the TOEFL. The ISU Graduate College minimum is 6.5. Because many programs require higher TOEFL and/or IELTS scores, applicants should check directly with the program to which they desire admission or browse the Graduate College Web site at www.grad-college.iastate.edu/programs/APPrograms.php.

Graduate students whose native language is not English and who did not graduate from a U.S. institution must take an English Placement Test at the beginning of their first semester of enrollment. This test is administered by the Department of English. A student who does not pass this examination is assigned to one or more courses in the English 99 and 101 series. This course work must be completed during the first year of study. (There is a development course fee for the English 99 course.) Non-native English speaking ISU graduate students who meet or exceed the TOEFL scores (640 or above on the paper-based test or 105 on the internet-based test) are exempted from taking the Enlish Placement Test. (Self-enrollment in English 099 or 101 courses remains possible. A graduate student whose native language is not English but did graduate from a U.S. institution, may bring to the Graduate College the “Request for the Graduate College to Approve the Graduate English Requirements for a Student Whose Native Language is NOT English” form, available from the Graduate College or on the Graduate College’s Web site at www.grad-college.iastate.edu/forms/forms.html. Two conditions must be met: the student must have received a bachelor’s, master’s, or Ph.D. degree from a U.S. college or university and the language of instruction at that college or university must have been in English. New teaching assistants whose native language is not English are evaluated for their ability to communicate effectively in English before their assistantship assignments are made. Tests of oral proficiency and teaching skills (SPEAK and TEACH) are given before the beginning of each semester. Department offices have a schedule of SPEAK/TEACH testing dates, or browse the SPEAK/TEACH Web site. Registration for the test is held in 1116 Pearson Hall the day before the test is administered. TAs and faculty with questions about SPEAK/TEACH testing should call 515-294-1958 or 515-294-7996. A prospective teaching assistant who does not pass these tests is required to successfully complete course work and be retested. University Studies 180 is a series of communication courses designed to help new teaching assistants. Students focus upon pronunciation, listening, question-handling, teaching and lecturing skills, and analyze the culture of U.S. university life. Because enrollment is restricted, TAs cannot register for the courses online through AccessPlus. TAs must go to the SPEAK/TEACH Office, 1116 Pearson by the first or second day of classes to obtain permission to enter the course by completing a course add slip.

**Graduate Appointments**

Graduate assistantships, fellowships, and research grants have been established at Iowa State University to encourage graduate work and to promote research. Such appointments and research opportunities are available through the various departments of instruction and the research centers on campus.

Graduate assistantships, the most common form of graduate student support, are available in three categories: the research assistantship, the teaching assistantship, or the administrative assistantship. A half-time graduate assistantship (20 hours per week) permits the holder to enroll for a maximum of 12 semester credits. Recipients of these assistantships are assessed fees at full Iowa resident rates regardless of the number of credits for which they register. These students may also be eligible for tuition scholarship awards (50% of in-state tuition for most master’s students and 100% of in-state tuition for most Ph.D. students and certain terminal masters students). Students who are graduates of a regionally accredited college or university in the United States or of a recognized institution in another country whose requirements for the bachelor’s degree are substantially equivalent to those of Iowa State University, who are admitted in the full or provisional admissions status, and who present the requisite undergraduate or graduate preparation, may apply for these appointments.

Students registered on a restricted basis or those placed on academic probation are eligible for assistantship appointment only on a term by term basis but are not normally eligible for a graduate tuition scholarship. Students admitted without a declared major are not eligible for assistantship appointments. Further information may be obtained by writing to the appropriate graduate program. The satisfactory completion of one appointment, plus satisfactory academic performance, will ordinarily make a student eligible for reappointment. After a period of three years of full-time study for the master’s degree or five years for the doctorate, the student will not normally be continued on assistantship support (shorter periods may be stipulated by the student’s program or department).

**Postdoctoral Study**

Opportunities are provided for postdoctoral study through the extensive research programs of the university. Inquiries should be directed to the appropriate program, institute, or to the Dean of the Graduate College.

**Graduate Study by Staff Members**

Any full-time member of the research, instructional, or extension staff at the rank of instructor, research associate, or assistant scientist may carry up to six course credits per semester and three credits per summer session, subject to the approval of the head of the program or section, and provided it does not interfere with other duties. This privilege may be extended to members of the research, instructional, or extension staffs at the rank of assistant professor with approval of the college dean and the Dean of the Graduate College. Staff members at the rank of professor or associate professor cannot become candidates for graduate degrees from ISU.

**Registration**

Graduate students are encouraged to register for courses on the ISU web site (www.iastate.edu) via AccessPlus. Students who are unable or who choose not to register through this system may use a walk-through registration procedure. Students who do not register by the published deadline for initiation of a schedule through the AccessPlus systems must use the walk-through procedure. For complete information on registration, see the ISU Schedule of Classes or the Registration Web site at www.iastate.edu/~registrar/registration/.

**Credit Limits**

Registration is limited to a maximum of 15 credits per semester. Schedules for graduate assistants on one-half time appointments are limited to a maximum of 12 credits. For full-time staff members, the limit is 6 credits. (Different credit limits apply during the summer session; see the Graduate College Handbook at www.grad-college.iastate.edu/publications/homepage.html for more details.)

**Interim Registration**

Registration for special work between semesters and during certain vacation periods cannot exceed one credit for each week that the student is in residence. For more information, consult the Graduate College Handbook.

**Distance Education**

Iowa State offers many graduate degree and certificate programs off-campus. For a listing of the degree programs, registrations for courses, and more information about distance education, consult the Iowa State University Web site at http://www.distance.iastate.edu/programs/homepage.php.

Other information about graduate requirements is available in the Graduate College Handbook at http://www.grad-college.iastate.edu/publications/gchandbook/homepage.html.

**Doctoral Post Prelim (formerly Continuous Registration)**

Even when Ph.D. graduate students have completed course work and residency requirements, they are required to register and pay tuition and fees, whether or not university facilities and equipment are used or staff is consulted—either in person or in absentia.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are used, the Ph.D. candidate must register for the appropriate number of credits in the major department or program and pay the appropriate graduate tuition and fees.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are not used, the Ph.D. candidate may register for Gr St 680 (Doctoral Post Prelim Registration) and pay the Doctoral Post Prelim Registration fee.

The Ph.D. candidate must be aware that registration for Gr St 680 is allowed only after the Ph.D. candidate passes the preliminary oral examination; is required only in the fall and spring semesters, and not during the summer term; is not allowed after the completion of the final oral examination; and is not sufficient registration for the term the preliminary or final oral examination is taken; and does not defer student loans.

If students take the final examination during either term before or after the examination is held.

**Auditing**

Audit registration means taking courses without receiving formal credit. Audit provisions are as follows: Instructors must approve ALL audits; students must register for audits by day 10 of the semester; changes to or from an audit must be made in the first 10 days of the semester; students are assessed tuition and fees as though they were taking the course for credit; and the course DOES NOT count in determining full-time student status.

Audited courses do not appear on the student’s permanent record unless the “Request for Audit(s) to Appear on Transcript” form is completed and signed by the student, course instructor, and major professor. Copies of this form, which are available from the Graduate College or from the Graduate College’s web site at www.grad-college.iastate.edu/forms/forms.html, must be filed with the Graduate College, 1137 Pearson Hall.

After the fifth class day, if a student changes a regular course to an audit, that course will appear on the student’s permanent record as a drop. Audits are not acceptable as registration for loan deferments.

**Graduate Courses Taken by Undergraduates**

Certain graduate level courses listed in the ISU Catalog may be used in the program of study even though they were taken for graduate credit by the student as an undergraduate at Iowa State University.

The following conditions must be met:

1. The POS committee can request approval from the Dean of the Graduate College that up to nine hours of such credit be applied toward meeting advanced degree requirements (these courses must be clearly marked on the POS).
2. Credits earned in these courses must be in addition to those used to meet requirements for the bachelor’s degree and must have grades of B or better.
3. The student must be classified as an undergraduate and not a nondegree undergraduate (credits taken as a nondegree undergraduate student are not allowed).
4. The Graduation Office (10A Enrollment Services Center) should be contacted to determine that the courses were not taken as Graduation Office (10A Enrollment Services Center) indicating that the courses were not taken as a nondegree undergraduate student and were not used toward fulfillment of the undergraduate degree program and were graded B or better.

**Undergraduate Admission to Concurrent Graduate Degree Programs**

Several programs provide opportunities for well qualified ISU juniors and seniors majoring in those curricula to apply for admission to both a bachelor’s and master’s degree.

The graduate degree will be awarded only at the same time as, or after, the undergraduate degree is conferred. For a complete listing of the concurrent degree programs, consult the table, “Concurrent Bachelor and Master Programs” in this section.

Students interested in a research career may apply for graduate research assistantships during their last two years of study. Students should contact the programs listed below about applying early in their undergraduate careers. Undergraduate students seeking admission to concurrent graduate degree programs in field other than these, plus any student with an interdepartmental major, must submit a written proposal for an individualized program, co-signed by their advisers, to the Graduate College for review and approval. For more information about the application process and transferring credits, consult the Graduate College Handbook.

**Veterinary Medicine Students in Concurrent Graduate Degree Programs**

Students may be concurrently enrolled in the professional curriculum leading to the D.V.M. degree and in a graduate program leading to the M.S. or Ph.D. degree after completion of 90 semester credits. The graduate program may be in the College of Veterinary Medicine or in another college.

Interested students must complete a graduate application, complete a “Concurrent Enrollment Request” form available in the Graduate College office or on the web site at www.grad-college.iastate.edu/forms/forms.html, submit both forms with appropriate transcripts and letters of recommendation to the Office of Admissions (100 Enrollment Services Center). (Copies of the application forms may be obtained at www.admissions.iastate.edu/apply/index.php.) State on the application that the application is for a concurrent degree program.

Signed approvals on the Graduate Admissions Evaluation form are required from the graduate program, the Dean of the College of Veterinary Medicine, and the Dean of the Graduate College. On admittance, the student receives an admission notification from the Office of Admissions. For more information see the Graduate College Handbook.

**Graduate Students in Concurrent Undergraduate Programs**

Graduate students interested in enrolling in a concurrent undergraduate program should contact the Office of Admissions (100 Enrollment Services Center) to obtain admission information (even if the student has been previously...
admitted as an undergraduate. A “Concurrent Enrollment Request” form should be obtained from the Graduate College Web site at www.grad-college.iastate.edu/forms/forms.html and circulated for the appropriate approvals. The student must be formally admitted both as a graduate student and as an undergraduate student. Official enrollment and fee payment will be as a graduate student. Credits transferred from the graduate permanent record to the undergraduate permanent record are no longer available for use on a graduate program of study.

Courses Taken as a Nondegree Undergraduate Student
A person classified as a “nondegree undergraduate” student may not use courses taken under that status in a graduate degree program. A student who has received the baccalaureate degree must register as a graduate student if he/she is to receive graduate credit for courses.

Grading
Grades are the permanent official record of a student’s academic performance. Iowa State uses A through F grading for most courses. S, P, and NP grades are given in some courses. The standard four-point scale is used to calculate a grade point average.

Grade Point Average (GPA)
All courses (even if they are undergraduate courses) taken as a graduate student will be calculated into the graduate GPA. The GPA is determined by dividing the number of grade points earned by the total number of ISU cumulative hours. The grade given when an incomplete (I) is resolved is figured into the cumulative grade point average, but not into a particular semester’s average. Marks of I, S, P, NP, T, and X are not counted in the grade point average; a mark of F (even if taken S/F) is counted in the grade point average. Creative Component/Research (599 and 699) credits are not used in the calculation of the GPA. In the case of repeated courses, only the grade achieved the last time the course is taken is used in computing the grade point average. (However, grades in courses that are noted as repeatable courses in the catalog, such as certain repeatable seminars, will all be used in calculating the grade point average.)

Grading Research and Creative Component Credits
Creative Component/Research credits may be graded as A, B, C, D, I, S, or F. Plus and minus grades are optional. These credits are not calculated in a student’s GPA.

Pass (P)/Not Pass (NP) Course Credit
Pass/Not Pass courses are those that a student, with the approval of the major professor, may take for personal enrichment, but not for satisfying prerequisites or deficiencies in the undergraduate background. P/NP marks may not be used in a POS, nor do P/NP marks contribute to the student’s GPA. Full credit for P/NP courses is used in calculating tuition assessment and credit load limitations. For more information, see the Graduate College Handbook.

Satisfactory/Fail (S/F) Grading
S/F grading is not the same as P/NP grading. S/F grading is by instructor option; all students in a particular course receive S/F grading. P/NP grading is generally a student option. A P mark is equivalent to at least a D- grade whereas an S mark is equivalent to at least a B grade at the graduate level. No special registration procedures are required for S/F grading. An S mark in a course taken S/F is not counted in the grade point average, but an F mark in a course taken S/F is counted in the grade point average and is equivalent to an F in a regularly graded (A-F) course. No more than 20 percent of the total credits (excluding creative component, thesis or dissertation research) in the program of study may be earned on an S/F basis. S/F grading may be used only for approved courses offered as seminars, symposia, workshops, special topics, and research. Programs must submit requests for S/F grading to the Dean of the Graduate College. The Graduate College Curriculum and Catalog Committee reviews and approves or rejects all S/F courses.

Grievances about Grades
A graduate student who feels that a course grade has been unjustly assigned, and whose attempts to resolve the matter with the instructor have failed, may appeal through the grievance procedures described in the Graduate College Handbook.
Probation
If a graduate student does not maintain a cumulative 3.0 grade point average on all course work taken, exclusive of research credit, he or she may be placed on academic probation by the Dean of the Graduate College. Grades earned by graduate students in undergraduate courses are included in the calculation of the grade point average. Academic probation judgments are made on the basis of grades in course work only. New, first-term graduate students who fall below a 3.0 GPA at the end of their first semester will be given a one term grace period to bring their grades back to a 3.0 GPA. These students will receive a warning letter from the Graduate College.

While on academic probation a student will not be admitted to candidacy for a degree and if appointed to a graduate assistantship, the student will not receive a Graduate tuition scholarship unless approval is given by the student’s academic college. If a student is to qualify for a tuition scholarship, he/she must be removed from probation by the tenth class day of the term.

To insure that registration does not take place without a review by the program, the Graduate College places a hold on future registrations by a student on probation. Before the student registers for each term, the program must review his or her record and recommend in writing if the Graduate College should permit further registration. Before graduation is approved, the student must complete all courses listed on the program of study with a minimum grade of C and have achieved a 3.0 GPA or greater.

Master's Degrees
General requirements for all master's degrees are as follows:

General Requirements
The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master’s programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student’s program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student's Program of Study (POS) Committee
New graduate students at ISU may be assigned a temporary academic adviser by the major program in the first semester of the student's residence. This faculty member guides the student in selection of a field of study and in development of a graduate program of study until the major professor and POS committee are selected. After the POS committee has been selected, it guides and evaluates the student during the remainder of graduate study.

A master’s POS committee consists of at least three members of the graduate faculty. It must include two members, including the major professor, from the major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student’s master’s research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for the direction of a program of study. For more information on duties and makeup of the committee as well as changes to the committee makeup, see the Graduate College Handbook.

Program of Study
The student and major professor develop the program of study with the consultation and approval of the POS committee. This agreement between the student and the Graduate College should be submitted as early as possible for approval. It is recommended that the committee be formed and the POS form submitted as early as the second semester of graduate study. In no case can the committee be formed later than the term before the final oral examination.

Residency
There is no on-campus residency requirement for the master’s degree.

Credits
Unless otherwise noted, at least 30 credits of acceptable graduate work must be completed in all master’s programs. At least 22 graduate credits must be earned from Iowa State University unless noted in the descriptions under “Specific Master’s Degrees” in this catalog.

Transfer Credits
At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at the institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is the student’s responsibility to provide verification by letter from that institution that these graduate courses were not used to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better. Audits may be listed on the program of study, but do not carry credit.

Major
A major is an approved area of study leading to a graduate degree. The exact number of credits in a major is not prescribed.

Minor
Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. A student may not minor and major in the same field. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student’s POS committee.

The minor subject area must be tested at the final oral examination and cannot be placed on the transcript after graduation unless it was approved on the program of study, listed on all examination reports, and recorded on the “Application for Graduation” form (diploma slip). A minor cannot be added to a degree that has already been received.

Department/Program Change
Transferring from One Major/Program/Department to Another
Students who have been admitted to a graduate program and to the Graduate College may request to transfer at a later date to another department or program. Because graduate students are admitted to particular programs, transfers require the approval of both the receiving program and the Graduate College.

Students seeking transfer to another program or department should first discuss their wishes with the new program DOGE (Director of Graduate Education) to determine requirements and interest by the new program. When a student receives a favorable preliminary response from the new program, he or she should fill out the student portion of the form entitled “Request to Transfer from One/Major/Program/Department to Another” and submit this form to his or her current DOGE. The current DOGE will fill out the Current Program Information adding any comments he or she believes the new program should consider and forward the form to the proposed new program. This form is available from the department, the Graduate College, or the Graduate College web page.

The receiving program will generally give the student the same consideration and employ the same admissions standards that are used for original applications for admission and will expect the same application materials (transcripts, letters of recommendation, test scores, etc). During the process, the new and old programs and the Graduate College are authorized and encouraged to seek and disclose information related to the student’s overall fitness for studies in the receiving program. Programs are authorized to inquire into the student’s prior conduct at the university, both with the prior department and with the Dean of Students.

Upon departmental action (acceptance or denial), the request to transfer form must be sent to the Graduate College for approval. All parties
will receive a copy of the completed form from the Graduate College.

Students desiring to transfer from a degree-seeking status to a nondegree-seeking status need to fill out the “Request to Transfer from One Major/Program/Department to Nondegree” form and bring it to the Graduate College.

Students desiring to transfer from nondegree-seeking status to a degree-seeking status must be admitted by a program through the regular graduate admission process.

Curriculum Change from Active Graduate to Active Undergraduate Status

Individuals who are in good standing in the Graduate College and who wish to transfer to an undergraduate curriculum must contact the graduate classification officer (1137 Pearson Hall). The classification officer will consult with the student and determine the proper course of action.

Curriculum Change from Inactive Graduate to Active Undergraduate Status

Individuals who were admitted to the Graduate College more than one year previous and who do not have active graduate status but who wish to change their status from inactive graduate to active undergraduate, must follow the same procedures required of reentering undergraduate students and must begin the process by filing a completed “Undergraduate Reentry” form with the Office of the Registrar. When considering reinstatement, the undergraduate college may consider the student’s overall fitness for continued studies including information about the student’s conduct, employment and education since the student’s last enrollment.

Individuals who do not have active graduate status and who first enrolled less than one year previous should first see the classification officer in the Graduate College.

Time Limits. It is expected that work for the master’s degree shall be completed within five years. In special circumstances the student’s POS committee may recommend that the Dean of the Graduate College extend these degree time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student’s POS committee and the Graduate College. The inclusion in the student’s program of study of course work that is beyond the time limits (“over-age” courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Application for Graduation. Students planning to graduate must submit an “Application for Graduation” form (diploma slip) to the Graduate Office by the end of the first week of the semester (fall or spring) in which he/she expects to receive the degree, or by the last day of spring semester when wishing to graduate during summer.

Before submitting this form, a student must have submitted and had approved by the Graduate College a “Recommendation for Committee Appointment” form and a “Program of Study” form. Also the student must have been fully admitted to a program and have met the Graduate English requirement if he/she is a non-native English speaker. Graduation may be delayed if the “Application for Graduation” form filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she should call the Graduate College (515-294-4531) and cancel the previously submitted “Application for Graduation” form. The student must then file a new form for the next planned term of graduation.

Thesis. A master’s thesis is a scholarly composition that demonstrates the ability of the author to do independent and creative work. A thesis is required in all fields in which a master’s degree is awarded, except where specific provision is made for a nonthesis degree program. A minimum of three research credits is required on every program of study for a thesis master’s degree.

Responsibility for writing and editing of the thesis rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of theses. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the thesis to assure the highest level of quality when the student presents the thesis to the committee for final approval.

Copies of the thesis must be submitted to the members of the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please browse the Graduate College’s web site (http://www.grad-college.iastate.edu/thesis/homepage.html) for requirements, revised fees, and other pertinent information.

Shortly after the submission of the “Application for Graduation” form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar’s Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College’s cancellation deadline.

Creative Component. Most nonthesis students must present substantial evidence of individual accomplishment (e.g., a special report, capstone course, integrated field experience, annotated bibliography, research project, design, or other creative endeavor). A minimum of two credits of such independent work is required on those programs of study for a nonthesis master’s degree. Some programs require more credits. (For more information, contact the individual program or consult the Specific Master’s Degrees section in this catalog.) The element of creative independent study must be explicitly identified on the program of study. The format of the creative component is determined in cooperation with the POS committee. As with a thesis, a creative component should be submitted to members of the POS committee two weeks before the final oral examination. However, no final submission of a creative component is turned in to the Graduate College for review and approval.

Final Oral Examination. Most master’s candidates must pass final oral examinations. The final oral examination must be held by the final examination deadline date for the semester in which the degree is granted. All coursework in the program of study must either be completed or in progress before the final examination can be scheduled. This examination is oral; it may also include a written component if specified by the student’s (POS) committee.

Graduate students must register at Iowa State for the equivalent of two credits, or for the R-credit course GR ST 600 (Examination Only) if no course work is needed, during the semester in which the final examination is taken. (Graduate students who are not required to take a final oral examination should complete all required coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.) Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not acceptable for the term of the final oral examination. If the examination is taken during the interim between terms (including the first day of classes), registration can be for either the term before or the term after the examination is held.

The candidate is responsible for initiating the “Request for Final Oral Examination” form, which must be submitted to the Graduate College at least three weeks before the examination. This form can be obtained only from the student’s program/department. The entire POS committee must be convened for the final oral examination. For more information on the final oral examination, see the Graduate College Handbook.

Graduate Student Approval Slip for Graduation. Every candidate for an advanced degree is required to complete a “Graduate Student Approval Slip for Graduation” form. It is sent to the major professor or program to give to the student after the “Request for Final Examination” form is received and approved by the Graduate College. Signatures are required by the major program, the Graduate College Thesis specialist (for those completing a thesis), and the Graduate College. Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompleted from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. An incomplete or non-report grade that a student receives for the term of graduation will result in removal from that term’s graduation list. The student will need to complete a new Application for Graduation and Graduate Student Approval Slip for the new term of graduation. If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.
Specific Master’s Degrees

The number of credits in a major for a master’s degree will vary according to the degrees listed below. General credit requirements for all master’s degrees include: a minimum of 30 graduate credits is required for all master’s programs at ISU; at least 22 graduate credits must be earned at ISU unless noted in descriptions; any transfer of graduate credits from another institution must be recommended in the program of study by the POS committee; and graduate credit earned as a graduate student will be approved for transfer only if a B grade or better was earned. A transcript must accompany the POS form.

Master of Arts or Master of Science—Thesis

At least 30 credits of acceptable graduate work must be completed, not less than 22 of which must be earned from ISU. Students are expected to research and write a thesis that demonstrates independent and creative work. A minimum of 3 semester credits is required for thesis research.

Master of Arts or Master of Science—Nonthesis

In certain programs a nonthesis degree program is offered. (For more information on requirements, contact the individual program or department.) This option requires the satisfactory completion of at least 30 graduate credit hours of acceptable work (not including research credit), not less than 22 credits of which must be earned from ISU. Students are interested in conducting graduate-level research on the built environment. At least 22 graduate credits must be earned at ISU. Research on the built environment and four credits of creative component experience, resulting in a total of 32 graduate credits of coursework. At least 22 graduate credits must be earned at ISU. Courses are delivered via video-tapes, interactive video, world-wide web, on- and off-campus classes and workshops. Specific courses offered in the program and the location of the off-campus classes may be obtained from the departmental course listings, off-campus course catalog, or by contacting the Professional Agriculture Coordinator, 201 Curtiss Hall.

Master of Architecture. The Department of Architecture offers three master programs: M Arch I, M Arch II and M S A S. M Arch I (100 credits) is a non-thesis accredited professional degree in architecture. Students with an undergraduate degree other than architecture enroll in a 100-credit, seven semester program. Students with a B.A. or B.S. in architecture or other affiliated design fields are considered for advanced standing based on a review of their academic record. Students with advanced standing typically enroll for four semesters. Since no final oral examination is required in the M Arch I program, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

T he M Arch II (30 credits) is a post-professional degree in architecture with a required graduate thesis. Students with a B Arch, M Arch I or equivalent professional degree in architecture or other affiliated design fields may apply for this degree.

The M S A S (30 credits) is an interdisciplinary research degree in architecture with a required graduate thesis. This degree is for students with bachelor degrees in various fields that are interested in conducting graduate-level research on the built environment. At least 22 graduate credits must be earned at ISU for all the above programs.

Since no final oral examination is required in the above professional program and its options, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Arts in Teaching. This is a degree leading to teacher licensure. A range of graduate credits are required depending on the program offered degree. The student must also demonstrate an ability to perform independent study through the completion of a creative component or thesis. At least 22 graduate credit hours must be earned at ISU.

Master of Business Administration. The College of Business offers a 48 graduate credit-hour program leading to a nonthesis master of business administration degree. At least 22 graduate credits must be earned at ISU. Students may select courses in the traditional business disciplines or choose areas of specialization in accounting, agribusiness, family financial planning, information systems, international business, marketing, and supply chain management. Since no final oral examination is required, M.B.A. students should complete all required coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Community and Regional Planning. The master of community and regional planning degree requires a minimum of 48 graduate semester credit hours. At least 22 graduate credits must be earned at ISU. This degree is available as a thesis or nonthesis option.

Master of Education. For the master of education degree, a range of 30 to 40 graduate credits are required. At least 22 graduate credits must be earned at ISU. The student demonstrates an ability to perform independent study through the completion of a creative component or a field-based activity.

Master of Engineering. The academic standards and the general level of attainment are the same for the master of engineering and master of science degrees. Master of engineering programs are offered to meet the needs for professionally oriented programs on campus and for off-campus professionally oriented programs at locations with adequate library and laboratory facilities. An appropriate number of credit hours in design, laboratory work, computation, or independent study is required as evidence of individual accomplishment. Of the minimum 30 graduate credits required, 22 graduate credit hours must be earned at ISU. For those Master of Engineering programs that do not require a final oral examination, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Family and Consumer Sciences. The College of Human Sciences offers two nonthesis options leading to the degree master of family and consumer sciences. Both options are designed to enhance the skills of those holding the bachelor’s degree so that they may meet the requirements of their present jobs or progress in their careers. The comprehensive option can be followed on- or off-campus and requires 36 graduate credits covering a variety of family and consumer sciences subject matter. The specialization option requires 36 credits and is offered on-campus from the following departments and programs: Dietetics, Family Financial Planning, Foodservice and Lodging Management, Gerontology, Human Development and Family Studies, Nutritional Sciences, and Textiles and Clothing. At least 22 graduate
credits must be earned at ISU. Both options require a written and oral integrative final exam.

Master of Fine Arts. For this degree a minimum of 54-61 graduate credits is required, including the completion of a thesis-exhibition or a thesis. At least 22 graduate credits must be earned at ISU.

Master of Landscape Architecture. The master of landscape architecture degree requires a minimum of 36 graduate credits and the satisfactory completion of a thesis or a creative component. At least 22 graduate credits must be earned at ISU.

Master of Public Administration. This is a professional degree program designed to provide training necessary for an administrator in a public or quasi-public bureaucracy. The MPA degree requires 37 graduate credit hours, which includes (a) 12 credit hours in Core Competency, (b) 12 credit hours in one of the Concentration areas, (c) 4 credit hours in other required courses, (d) up to 7 credit hours of electives, (e) 3 credit hours of Creative Component (a Capstone Project) or a minimum of 3 credit hours of research (thesis). Pre-service students are encouraged to obtain an internship for 3 credit hours. At least 22 graduate credits must be earned at ISU.

Master of School Mathematics. This degree is designed primarily for in-service secondary mathematics teachers. Its prescribed program of study requires 33 graduate credits, two of which come from the writing of an approved creative component, 15 from courses offered for graduate credit, and 13 from courses offered for nonmajor graduate credit. At least 22 credit hours must be earned at ISU.

Master’s Double Degree Programs

A double degree requires fulfillment of the requirements for two graduate majors for which two differently named master’s degrees and two diplomas are granted at the same time. For double degrees the final project (thesis or creative component) must integrate subject areas from both departments. One final oral examination must be held covering the combined thesis or creative component. Students planning to pursue double degrees must complete a double degree request form and submit it to the Dean of Graduate College for approval. Just one “Recommendation for Committee Appointment” form and one “Program of Study (POS)” form need to be submitted for the two degrees. However, two “Application for Graduation” forms, one for each degree, will need to be submitted. All forms should show clearly that the student is enrolled in a double-degree program.

Like other master’s programs, three graduate faculty members can constitute a POS committee; however, POS committees for double degrees must include co-major professors from each of the majors. Although specific degree programs may require more, the program of study must include at least 44 hours of non-overlapping credit (22 for each major) in the two degrees.

Several such combinations are currently available: (1) Master of Architecture/Master of Business Administration; (2) Master of Architecture/Master of Community and Regional Planning; (3) Master of Community and Regional Planning/Master of Business Administration; (4) Master of Landscape Architecture/Master of Community and Regional Planning; (5) Master of Public Administration/Master of Science in Information Assurance; (7) Master of Science in Statistics/Master of Business Administration; and (8) Master of Science in Information Systems/ Master of Business Administration.

If a student outside one of the named areas is interested in an individually-developed double degree program, a written proposal for a double degree to serve those interests and needs must be submitted to the Dean of the Graduate College for review. See the Graduate College Handbook for more information.

Duke University Law School/ Iowa State University Combined Degree

To provide training in the complementary fields of law, political science, and economics with a minimum amount of academic duplication, special arrangements for combined degree programs have been approved with the Drake University Law School. ISU and Drake offer a combined J.D.-M.A. in political science and J.D.-Ph.D. in economics. Drake Law School students are permitted to transfer the equivalent of nine semester credits of specified law courses to ISU for nonmajor graduate credit. Because of the difference in grading systems, the Law School grades are transferred as pass, provided the student has achieved a grade of C or better in those courses at Drake for the political science program or a grade of B or better for the economics program.

Applicants for either of the combined programs must meet the regular entrance requirements of, and be admitted to, both the Drake Law School and the ISU Graduate College.

Doctor of Philosophy

General Requirements

The degree doctor of philosophy is strongly research oriented. The primary requirements for the degree are: (1) high attainment and proficiency of the candidate in his or her chosen field, (2) development of a dissertation which is a significant contribution to knowledge and which shows independent and creative thought and work, and (3) successful passing of detailed examinations over the field of the candidate’s major work, with a satisfactory showing of preparation in related courses. General requirements for Ph.D. candidates follow.

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master’s or Ph.D. programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student’s program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals for the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student’s Program of Study (POS) Committee. The POS committee for a doctoral program consists of at least five members of the graduate faculty. It must include at least three members, including the major professor, from within the student’s major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student’s dissertation research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for direction of the dissertation.

Changes to POS committee. Recommendations for changes in the POS committee must have the approval of the student, major professor, DOGE, and all committee members involved in the change (committee members who are on Faculty Professional Development Assignments, retired, or resigned do not have to sign) before seeking approval of the Graduate College. A form to seek approval is available in program offices or on the web at www.grad-college.iastate.edu/forms/forms.html. These changes must be approved by the Dean of the Graduate College before the preliminary or final oral examination is held. For more information on changes to the committee and to the Program of Study, see the Graduate College Handbook.

Program of Study. The student and the major professor develop the program of study with the consultation and approval of the POS committee. Early selection of a major professor, appointment of a POS committee, and development of a program of study are very important. It is recommended that the committee be formed as early as the second semester of graduate study. In no case can the committee be formed later than the term before the preliminary oral examination.

Credits. A minimum of 72 graduate credits must be earned for a Ph.D. degree. At least 36 graduate credits, including all dissertation research credits, must be earned at Iowa State University. At least 24 of these credits must be earned during two consecutive semesters or during a continuous period including two semesters and a summer session while in residence at the university. This requirement does not apply to doctoral students who are employed more than half time at ISU. There is no specific university requirement regarding the number of credits to be taken inside or outside the major/program.
Transfer Credits. At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at that institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is that student’s responsibility to provide verification by letter from that institution that those graduate courses were not taken to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better.

Residency. At least 24 semester credits must be earned during two consecutive semesters or during a continuous period including two semesters and a summer session. This requirement does not apply to doctoral students who are employed at least half-time by Iowa State University and government laboratories located in Ames. Of the 72 graduate credits required for a Ph.D. at least 36 credits, including all dissertation research credits, must be earned under the supervision of the student’s POS committee.

Major. A major is the area of study or academic concentration in which a student chooses to qualify for the award of a graduate degree. Majors are listed at the end of this section of the bulletin. Opportunities also exist for majoring in more than one area of study (co-major or joint major programs).

Minor. Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student’s POS committee. The minor subject area must be tested at the preliminary oral and final oral examinations. A minor cannot be added to a program of study after the preliminary oral examination has been taken, nor can a minor be placed on the transcript after graduation, unless it was approved on the program of study, listed on all examination reports, and recorded on the "Application for Graduation." A student may not minor and major in the same field. A minor cannot be added to a degree that has already been awarded.

Time Limits. A student beginning a Ph.D. degree program at Iowa State with a master’s degree from another institution is expected to complete the Ph.D. within five years, while a student beginning a Ph.D. degree program without the master’s degree is expected to complete the program within seven years. If warranted, the Program of Study (POS) Committee may request by letter that the Dean of the Graduate College extend these time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student’s program of study committee and the Graduate College. The inclusion in the program of study of coursework that is beyond the time limits ("over-age" courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Preliminary Examination. The Graduate College requires a preliminary oral examination of Ph.D. degree students; most programs add a written portion to the preliminary oral examination. The Ph.D. degree preliminary oral examination rigorously tests a graduate student’s knowledge of major, minor, and supporting subject areas as well as the student’s ability to analyze, organize, and present subject matter relevant to the field. A “Request for Preliminary Examination” form must be submitted to the Graduate College by the major professor at least two weeks before the proposed date of the examination.

The following conditions should be met before the "Request for Preliminary Examination" form is submitted to the Graduate College: admitted to full admission status in a Ph.D. granting program, approved “Recommendation for Committee Appointment” form, approved POS form, English requirement met, not on probation, time limit not exceeded, qualifying examination (if required by program) passed, and registration for at least the equivalent of 2 credits, or for the R-credit course GR ST 600 (Examination Only) if no course work is needed, during the term in which the preliminary oral examination is taken. (Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not acceptable for the term of the preliminary oral examination.)

A preliminary oral examination will not be scheduled for a student on provisional or restricted admission or on academic probation. Upon successful completion of the preliminary oral examination, the student is admitted to candidacy for the Ph.D. degree. If the graduate student fails all or part of the preliminary oral examination, the committee provides two options: gives a not pass and allows the student to retake the examination after six months or gives a not pass and does not allow the student to retake the examination. Six months must elapse between the first attempt and the next. The entire POS committee must be convened for the preliminary oral examination. The preliminary oral examination must be passed at least six months prior to the final oral examination. An exception to the rule is allowed if a request signed by the major professor(s) and the program’s DOG is approved by the Dean of the Graduate College.

Application for Graduation. Application for graduation should be made by the end of the first week of the semester (fall or spring) in which the student expects to receive the degree, or by the last day of the spring semester if graduation is planned during summer session. To apply for graduation, the student is required to submit to the Graduate College a signed “Application for Graduation” form, available in the program office or on the web at www.grad-college.iastate.edu/forms/forms.html. Before submitting this form, a student must have submitted and had approved by the Graduate College a “Recommendation for Committee Appointment” form and a “Program of Study” form. Also the student must have been fully admitted to a program and have met the Graduate English requirement. Graduation may be delayed if the “Application for Graduation” form filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she should call the Graduate College (515-294-4531) and cancel the previously submitted “Application for Graduation” form. The student must then file a new form for the next planned term of graduation.

Dissertation. A doctoral dissertation must demonstrate conclusively the ability of the author to conceive, design, conduct, and interpret independent, original, and creative research. It must attempt to describe significant original contributions to the advancement of knowledge and must demonstrate the ability to organize, analyze, and interpret data. In most instances, a dissertation includes a statement of purpose, a review of pertinent literature, a presentation of methodology and results obtained, and a critical interpretation of conclusions in relation to the findings of others. When appropriate, it involves a defense of objectives, design, and analytical procedures. Dissertation research should be worthy of publication and should appear in appropriate professional journals or in book form.

Responsibility for writing and editing of the dissertation rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of dissertations. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the dissertation, so as to assure the highest level of quality when the student presents the dissertation to the committee for final approval. Copies of the dissertation must be submitted to the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please browse the Graduate College’s web site (http://www.grad-college.iastate.edu/thesis/homepage.html) for new requirements, revised fees, and other pertinent information.

Shortly after the submission of the “Application for Graduation” form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar’s Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College’s cancellation deadline.
Final Oral Examination. The Ph.D. final oral examination, conducted after the dissertation is finished, is oral and often limited to a defense of the dissertation. To receive the degree at the end of a given semester, the student must hold the final oral examination before the final oral examination deadline for the semester.

The candidate is responsible for initiating the “Request for Final Oral Examination” form, which must be submitted to the Graduate College at least three weeks before the examination. This form can be obtained only from the student’s program/department. The entire POS committee must be convened for the final oral examination. For more information on the final oral examination, see the Graduate College Handbook.

Graduate Student Approval Slip for Graduation. Every candidate for an advanced degree is required to complete a “Graduate Student Approval Slip for Graduation” form. It is sent to the major professor or program to give to the student after the “Request for Final Examination” form is received and approved by the Graduate College. Signatures are required by the major program, the Graduate College Thesis specialist, and the Graduate College. Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. An incomplete or non-report grade that a student receives for the term of graduation will result in removal from that term’s graduation list. The student will need to complete a new Application for Graduation and Graduate Student Approval Slip for the new term of graduation. If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.

Graduate Majors
More information on each major can be found in the Courses and Programs section of this catalog under the department or program listed in parentheses after the degree information.

Accounting: M.Acc. (see Accounting)
Aerospace Engineering: M.Engr., M.S., Ph.D. (see Aerospace Engineering)
Agricultural Economics: M.S., Ph.D. (see Economics)
Agricultural Education: M.S., Ph.D. (see Agricultural Education and Studies)

Russian (see World Languages and Cultures)

Spanish (see World Languages and Cultures)

Speech Communication (see Speech Communication)

Technology and Social Change (see Technology and Social Change)

Women's Studies (see Women's Studies)

**Graduate Certificate Programs**

A graduate certificate provides a mechanism for bestowing formal recognition of focused graduate study in a specialized area that is less comprehensive than required for a master’s degree. At Iowa State University, a graduate certificate may be earned either before, after, or concurrently with the master’s or doctoral degree. For more detailed information on certificate programs, browse the Graduate College website at: [www.grad-college.iastate.edu/publications/graduate-grad.html](http://www.grad-college.iastate.edu/publications/graduate-grad.html).
Colleges and Curricula

First-Year Honors Program. Entering first-year students with outstanding high school records and academic ability may be eligible to participate in the First-Year Honors Program (FHP). The FHP, which is designed to introduce students to an honors education, consists of special honors sections of English 250 and Library 180, a FHP Seminar, and advising by honors advisers. Students may also choose to participate in the Honors Mentor Program, designed to introduce students to scholarship. Participants select an area of interest and are matched with faculty members conducting research in that area. Admission to the FHP is limited, and is based on past academic achievement, potential, and interest in an honors education.

Further information. Further information concerning the University Honors Program and the First-Year Honors Program can be obtained from the Honors Program Office in Jischke Honors Building or on the Honors webpage, www.honors.iastate.edu.

Dual-degree Programs

Students who complete the first three years in certain curricula at Iowa State and who satisfactorily complete the first year in a recognized medical, dental, veterinary medical, or law curriculum may then be awarded a bachelor’s degree from Iowa State. (See Index, Preprofessional Study.)

Iowa Lakeside Laboratory

Iowa Lakeside Laboratory is an off-campus teaching and research facility situated on a 140-acre campus on West Okoboji Lake in Northwest Iowa. It is run cooperatively by Iowa State University, the University of Iowa, the University of Northern Iowa, and Drake University. Each summer Iowa State University students can take up to three undergraduate and/or graduate courses in archaeology, biology, ecology, environmental science, and/or geology for credit at Lakeside (see course listings under Iowa Lakeside Laboratory). All Lakeside courses are small, full-immersion, field-oriented courses that run for 1-4 weeks. Lakeside also offers a variety of short courses for teachers and a series of nontechnical short courses on various aspects of the natural history of Iowa. Information about Lakeside courses as well as registration and housing information can be obtained from the Biology Program Office, 103 Bessey Hall or on the Lakeside Web site, www.lakesidelab.org.

Regent Universities Student Exchange Program

Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)

Iowa State University is a member of National Student Exchange. The NSE Consortium has 200 colleges and universities throughout North America providing academic and experiential exchange opportunities. Iowa State students with a cumulative GPA of at least 2.50 are eligible to apply. Credits earned as an NSE participant will be recorded on the students Iowa State transcript. Approval for credit in the NSE program should be sought from a student’s academic adviser in advance of application. Detailed information and applications forms are available from:

Study Abroad

Our planet is in a constant state of change, and occurrences in remote corners of the globe can profoundly impact our lives. It is clear from the effects of global warming, international trade, terrorism, and pandemics of one nature or the other that we cannot ignore what is happening beyond our shores and borders. Students who graduate without an understanding of other cultures, languages, business practices, and political systems are disadvantaged both educationally and professionally. Studying abroad helps prepare students to meet the challenges of an increasingly interdependent global community. Further, study abroad is an adventure that challenges the student academically and provides real opportunities to interact with other cultures, languages, and lifestyles.

As a leading international university, Iowa State has a major commitment to study abroad, and the Study Abroad Center is the central administrative office responsible for providing these opportunities. We offer advising on study abroad, international internships, work, volunteer opportunities, and service-learning, and scholarships. The Center’s library has a fine selection of travel books, information on international careers, cross-cultural orientation, social and business customs around the world, and travel bargains. The International Student Identity Card and passport photographs can also be obtained at the Center.

With over 250 study abroad programs available, from one week to an academic year in length and in nearly every major, students are able to find a program that meets their needs and interests so they can discover for themselves why study abroad is the most exciting academic adventure. Exchange Programs offer students the opportunity to study abroad at a partner university while paying Iowa State tuition. Semester in Australia, Canada, Greece, Ireland, Italy, New Zealand, or UK offers unlimited placement opportunities for students to study at some of our most popular destinations for the fall, spring, and in some cases summer.

Intensive Language Programs offer students a total immersion experience in French, German, Russian, or Spanish by studying in Québec, Canada (French), France, Germany, Russia, Mexico, Peru, or Spain. Summer and semester programs are available.

Group Programs led by our faculty offer Iowa State courses around the world. Short-term options can take you from the Antarctic to England and to more than 40 other destinations.

Courses and Programs

Information About Courses

Course Numbers
The courses in each department are numbered from 1 to 699, according to the following groups:

<table>
<thead>
<tr>
<th>Course Range</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-99</td>
<td>Courses not carrying credit toward a degree (zero credit).</td>
</tr>
<tr>
<td>100-299</td>
<td>Courses primarily for freshman and sophomore students.</td>
</tr>
<tr>
<td>300-499</td>
<td>Courses primarily for junior and senior students.</td>
</tr>
<tr>
<td>500-599</td>
<td>Courses primarily for graduate students, but open to qualified undergraduates.</td>
</tr>
<tr>
<td>600-699</td>
<td>Courses for graduate students.</td>
</tr>
</tbody>
</table>

Credits and Contact Hours
The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture or recitation per week for the entire semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes.

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture or recitation class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures and recitations. For example, Com S 103 is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

The term “Cr. art.” means that the amount of credit is arranged in advance between the student and the instructor. The credit to be earned depends on the amount of work expected of the student, in accordance with the policy that some combination of teacher-student contact and outside work by the student involving at least three hours per week for the semester is required for each credit.

The term “Cr. R.” means that the course is required in a certain curriculum or as cognate to one or more other courses. It is also used for cooperative education courses and for some optional inspection trips, study tours, and professional development courses for which numerical credit is not granted. An R credit course does not carry numerical credit toward a student’s degree, but it does apply toward the degree. The R credit course is generally listed on the degree program as a requirement for a specific curriculum/major that must be completed prior to graduation. R credit courses may be graded using the A-F grading scale or the satisfactory/fail grading scale. All R credit courses are assigned a numerical value for purposes of enrollment certification. Requests by students to drop an R credit course will be processed as an administrative drop during period 2 and thus will not be counted against the student’s drop limit and will not appear on the student’s transcript. (See Index, Schedule Changes.)

Semester of Offering
Within each course description may be found one or more of the following letters: F, S, SS, indicating which term—fall, spring, summer session—of the academic year the course is offered. “Alt.” is the abbreviation for alternate. If there is sufficient demand, courses may be offered more frequently than announced. Insufficient demand or unforeseen staffing problems may result in the cancellation of announced offerings. Students are advised to refer to the Schedule of Classes or consult with departments for up-to-date course schedule information.

Course Prerequisite
A prerequisite indicates the specific academic background or general academic maturity considered necessary for the student to be ready to undertake the course. Prerequisites are usually stated in terms of specific courses, but equivalent preparation is usually acceptable. An instructor may, however, direct a student whose background does not meet the stated prerequisite, or its equivalent, to drop the course. Conversely, an instructor may waive the prerequisite for a course for which he or she is responsible. Thus, permission of the instructor is understood to be an alternate to the stated prerequisites in all courses.

It is university policy that the instructor shall inform the students at the beginning of each course if students who have not met the prerequisite requirements must drop the course. Course prerequisites are listed in the Schedule of Classes as well as in the Courses and Programs section of this publication.

Cross-listed Courses
A course, including its complete description, may be listed in two or more departments. The participating department or departments are noted in parentheses. Credit for the course may be obtained through any of the cross-listed departments.

Designators/Course Abbreviations
For abbreviations designating departments and programs See Index, Designators.

Dual-listed Courses
Dual-listed courses permit undergraduate and graduate students to be in the same class but to receive credit under two different course numbers. Credit in the graduate course is not available to students who have received credit in the corresponding undergraduate course. Both graduates and undergraduates receive the same amount of credit for the course, but additional work is required of all graduate students taking the course under the graduate-level course number. This extra work may take the form of additional reading, projects, examinations, or other assignments as determined by the instructor. The instructor must be a member of the Graduate Faculty or a Graduate Lecturer. Each dual-listed course is designated in the catalog with the phrase “Dual-listed with,” although the student’s official transcript of credits, both graduate and undergraduate, does not identify dual-listed courses as such. There is a limit to the number of dual-listed course credits that may be used to meet the requirement for an advanced degree. (For information about procedures for requesting permission to offer dual-listed courses, faculty should consult the Graduate Faculty Handbook.)

Off-campus courses—Residential Credit
Iowa State University offers distance education courses over the Iowa Communications Network (ICN), by videotape and on the World Wide Web. These courses are the same as those offered on campus, carry residential credit, and are taught by ISU faculty members. Credit earned in off-campus courses becomes a part of the student’s academic record at Iowa State University and may be used to meet degree requirements in the same manner as credit earned on campus.

Priority Enrollment
High demand for courses in certain areas has necessitated enrollment management for some courses. When enrollment priority is established for a course, first consideration is given to students whose curriculum/major explicitly requires the course.

Special Course Fees
Courses for which special course fees are assessed are designated in the Schedule of Classes. Special course fees may be assessed for such extraordinary costs as materials fees (which may include consumable materials or equipment replacement), field trip expenses, developmental Math fees, and camp fees. In some cases, special course fee amounts vary from term to term. Additional information on camp fees and the developmental Math fee may be found in the fees and expenses section. See Index, Fees.

Graduate Programs
Graduate Major
A major in the Graduate College is the area of academic professional concentration, approved by the Board of Regents, in which the student chooses to qualify for the award of a graduate degree.

Graduate Area of Specialization
Areas of specialization are indicated in the graduate statements of some departments. This is a subdivision of a major in which a strong graduate-level program is available. When approved by the Graduate College, such areas of specialization are shown parenthetically after the major on official records, including transcripts and thesis/dissertation title pages.

Interdepartmental Programs
Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.

Nonmajor Graduate Credit
All courses included on the Program of Study of a graduate student must be approved by the student’s program of study committee. Usually courses in the major are selected from 500- and 600-level courses in the major. Courses outside of the major can be selected from special interest graduate courses outside of the major. These courses are available to graduate students for approval by the Program of Study Committee of the graduate program. See Index, Program of Study.
Accounting

Marvin L. Bouillon, Chair of Department

Professors: Hira, Ravenscroft

Professors (Emeritus): Brown, Elvik, Handy

Associate Professors: Bouillon, Dilla, Doran, Jeffrey, Kurtenbach

Associate Professors (Emeritus): Murphy

Assistant Professors: Denison, Gary, Janvin, No, Torando

Assistant Professors [Adjunct]: Curtis

Instructors (Adjunct): Duffy, Mazzitelli

Senior Lecturer: Clem

Lecturer: Christensen, Hashmi, Whittle

Undergraduate Study

For undergraduate curriculum in business, major in accounting, see College of Business, Curricula.

The primary purpose of accounting is to provide relevant information to both internal users (management) and external users such as investors, creditors, government, and the general public. Accounting serves an integral part of the management of business and public organizations. Accountants, therefore, participate in planning, evaluating, and controlling the activities of the firm. Accounting is needed by external users in order to make investment decisions, grant or withhold credit, and, in the case of government, to collect revenue and gather statistical information. In order to provide useful information, accountants collect, analyze, synthesize, and report data in an understandable manner.

The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with: (1) a mastery of basic accounting concepts; (2) an ability to think critically and creatively about accounting problems; (3) an ability to communicate effectively and work with others as a member of a team; (4) an awareness and sensitivity for dealing with ethical concerns.

The major in accounting is designed to give students a conceptual foundation as well as to provide a wide range of basic skills and analytical tools for use in reporting for both public and private concerns. Students who complete the accounting major are well prepared to accept positions in industry, government, and the public accounting profession. The requirements for the accounting major are met by successful completion of the following courses: Acct 383, 384, 386, 387, 485, and 497. See the CPA note below for the 150-hour education requirement for CPA certification in Iowa.

The department participates in the M.B.A. full-time and part-time programs. The M.B.A. program is a 48-credit, nonthesis, noncreative component curriculum. Twenty four of the 48 credits are core courses and the remaining 24 are graduate electives.

The specialization in accounting is designed to help meet the 150 hour education requirement for CPA certification in Iowa.

Courses primarily for undergraduate students

Acct 215. Legal Environment of Business. (3-0) Cr. 3. F.S.S.S. Prereq: Sophomore classification. General history, structure, and principles of law. The legal system, as an agency of social control; good business practices, and tool for change. The court systems, Constitution, torts, contracts, administrative agencies, and agency law.

Acct 284. Financial Accounting. (3-0) Cr. 3. F.S.S.S. Prereq: 15 hours of credit at ISU or sophomore standing. Introduction to the basic concepts and procedures of financial accounting from a user perspective. The course examines the accounting cycle, business terminology, basic control procedures, and the preparation and evaluation of financial reports, with an emphasis on financial statement analysis.

Acct 383. Intermediate Managerial Accounting. (3-0) Cr. 3. F.S. Prereq: 285 or 582. Generation, communication and use of information to assist management with planning, control, and decision making in manufacturing and service organizations.

Includes traditional and contemporary models of cost estimation, assignment, and control, responsibility accounting, and nonrecurring decisions. Emphasis on developing written and oral communication skills, as well as spreadsheet capabilities.

Acct 483. Advanced Managerial Accounting. (Dual-listed with 583). (3-0) Cr. 3. Prereq: 283 or 581. Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills.

Acct 486. Volunteer Income Tax Assistance. (0-2) Cr. 1. Repeatable. S. Prereq: 284. Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency Status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

Acct 488. Governmental and Non-profit Institution Accounting. (3-0) Cr. 3. F.S. Prereq: 387. Budgeting, accounting, auditing, and financial reporting principles associated with private, governmental, and non-profit organizations. Includes survey of state, local, municipal, and federal government accounting, as well as accounting for colleges, universities, public schools, health care facilities, voluntary health and welfare organizations and other not for profit enterprises. Nonmajor graduate credit.

Acct 495. Advanced Accounting Problems. (Dual-listed with 595). (3-0) Cr. 3. F.S. Prereq: 387 Partnerships, branch operations, accounting for business combinations and affiliated companies. Consolidated financial statements; reporting for multinational operations. Nonmajor graduate credit.

Acct 497. Introduction to Auditing. (3-0) Cr. 3. F.S. Prereq: 384, 387 and Stat 326. The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of Statistical sampling in auditing. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

topics covered include the use and analysis of financial information, the regulatory environment, and the use of the internet and electronic spreadsheets as a means of accessing and analyzing financial data.

Acct 533. Data Management for Decision Makers. (Cross-listed with MIS). (3-0) Cr. 3. Prereq: MIS 502. Addresses data needs of functions such as marketing, finance, and production. Advanced skills needed to design, develop and use database, data warehousing and data mining systems for effective decision support. Emphasis on importance of contemporary technologies.

Acct 582. Corporate Governance and Leadership. (Cross-listed with Mgmt). (3-0) Cr. 3. Prereq: Mgmt 502 or permission. Examination of top managers and corporate boards of directors in terms of roles, responsibilities, and tasks. Examination of corporate governance structure and functioning. Topics include CEO tenure and compensation, board monitoring and composition, board responsibility and accountability, board structure and performance, CEO and board roles in strategic management, shareholder and stakeholder representation, corporate social responsibility, ethics and corporate governance, international governance, and executive leadership style.

Acct 583. Advanced Managerial Accounting. (Dual-listed with 483). (3-0) Cr. 3. Prereq: 382 or 581. Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills.

Acct 588. Governmental and Non-profit Institution Accounting. (3-0) Cr. 3. Prereq: 387 or 592. Budgeting, accounting, auditing, and financial reporting principles associated with private and public nonprofit organizations. Includes survey of state, local, municipal and federal government accounting, as well as accounting for colleges, universities, public schools, health care facilities, voluntary health and welfare organizations and other not for profit entities.

Acct 590. Special Topics. Cr. arr. Repeatable. F.S.S. Prereq: Permission of instructor: For students wishing to do individual research in a particular area of accounting.

Acct 591. Fraud Examination and Prevention. (3-0) Cr. 3. Prereq: 497 or 508. Principles and methodology of fraud detection and deterrence. Addresses the following: Causes and elements of fraud, costs to society, asset theft, financial statement representation, internal controls for fraud prevention, evidence gathering, and legal aspects of fraud.

Acct 592. Financial Statement Analysis. (3-0) Cr. 3. Prereq: 284 or 508. The presentation and analysis of financial statement information from the point of view of the primary users of such data: owners and creditors. Topics covered will include the financial reporting system, the primary financial statements, and effects of accounting method choice on reported financial data, and firm valuation.

Acct 594. Business Valuation. (3-0) Cr. 3. Prereq: 387 or 592. Using financial statement analysis to value the firm. Topics covered will include assessing how well a firm’s financial statements reflect the economic effects of its resource management strategies and constructing proforma financial information that will serve as inputs to valuation models.

Acct 595. Advanced Accounting Problems. (Dual-listed with 495). (3-0) Cr. 3. Prereq: 387 Partnerships, branch operations, accounting for business combinations and affiliated companies, consolidated financial statements, reporting for multinational operations.

Acct 596. International Accounting. (3-0) Cr. 3. Prereq: 386 or 508. Accounting and reporting requirements and managerial issues faced by multinational corporations. The international environment of standard setting will be examined. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

Acct 597. Advanced Auditing and Assurance Services. (3-0) Cr. 3. Prereq: 497 A study of advanced auditing and assurance issues. Topics include risk analysis, internal control, fraud detection, analytical procedures, evaluating operational and strategic objectives, and reporting and implementing audit findings.

Acct 598. Financial Accounting: Theory and Contemporary Issues. (3-0) Cr. 3. F. Prereq: 387 or 592. Theoretical discussion of the financial accounting and reporting environment. The usefulness of financial accounting information for decision making will be examined. A number of current financial accounting issues and the financial accounting standard setting process will be discussed and examined. MAcc students should take this course during their last semester.

Acct 599. Creative Component. Cr. 2. Prereq: Admission to the Master of Accounting Program. This course prepares students to complete their creative component project option in the Master of Accounting degree.

Aerospace Engineering

Thomas Shih, Chair of Department

Distinguished Professors:
Soukoulis, R. B. Thompson

Distinguished Professors (Emeritus):
D. Thompson, Young

Professors:
Chandra, Chimenti, Durbin, Hoog, Kelkar, Levitas, Lu, Oliver, Rajagopalan, Rothery, Rudolph, Sarkan, Schrm, Shih, Takeda, Wang, Wie, Zachary

Professors (Emeritus):
Akers, Greer, Inger, Iversen, Jenison, McConnell, McDaniel, Munson, Piersson, Rizzo, Rogge, Rohach, Tannheil, Tsai, Weiss, Wilson

Professors (Adjunct):
Hsu, Nagakawa

Associate Professors:
Bastawros, Bryden, Dayal, Hilliard, Hindman, Mitra, Sherman, Sturgies

Associate Professors (Emeritus):
Hermann, Seversisks, Trulin, Vogel

Associate Professors (Adjunct):
Biner, Cox, Roberts

Associate Professors (Collaborators): Flatau

Assistant Professors:
Chung, Holland, Hong, Hu, Jacobson

Assistant Professors (Adjunct):
Byrd, Gray

Assistant Professors (Collaborators): Chavez

Senior Lecturers: Deam, Haugli, Schaefer

Lecturers: Boylan

Undergraduate Study

For undergraduate curriculum in aerospace engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

The aerospace engineer is primarily concerned with the design, analysis, testing, and overall operation of vehicles which operate in air, water, and space. The curriculum is designed to provide the student with an education in the fundamental principles of aerodynamics, flight dynamics, propulsion, structural mechanics, flight controls, design, testing, and space technologies. A wide variety of opportunities awaits the aerospace engineering graduate in research, development, design, production, sales, and management in the aerospace industry, and in many related industries in which fluid flow, control, and transportation problems play major roles.

A cooperative education program in aerospace engineering is available in cooperation with government agencies and industry. The usual four-year curriculum is extended over a five-year span to permit alternating industrial experience periods and academic periods. This arrangement offers valuable practical experience and financial assistance during the college years. See College of Engineering, Cooperative Programs.

Undergraduate Mission and Educational Objectives

The Department of Aerospace Engineering maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of continuous academic improvement to provide the best possible education for our students.

Mission statement: The mission of the aerospace engineering program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.

Program Educational Objectives:

Graduates should be actively contributing, valued members in their chosen profession showing continued professional growth.

Graduates should use their strong foundation in science, mathematics, and engineering to create innovative practices and/or technologies.

Graduates should demonstrate teamwork, leadership, planning, and initiative in advancing organizational goals.

Graduates should act with integrity, based on an awareness of the impact of their work –economic, environmental, and societal impact – and work to maintain high levels of cultural adaptability.

Graduates should demonstrate critical thinking and effective, multi-modal communication skills.

Graduates should strive to learn continuously through professional improvement opportunities and self study.

Graduates should work to ensure superior quality, customer satisfaction, and safety outcomes in their work.
Aer E 291. Aerospace Seminar. Cr. R. F. (1-0) Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, departmental symposium participation. H. Honors

Aer E 292. Aerospace Seminar. Cr. R. S. (1-0) Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, departmental symposium participation. Satisfactory-fail only. H. Honors

Aer E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course prior to commencing work. Satisfactory-fail only.

Aer E 301. Flight Experience. Cr. R. F. Prereq: Credit or enrollment in 355. Two hours of in-flight training and necessary ground instruction. Course content prescribed by the Aerospace Engineering Department. Six hours of flight training certified in a pilot log book can be considered by the course instructor as evidence of satisfactory performance in the course. Satisfactory-fail only.

Aer E 311. Gas Dynamics. (3-0) Cr. 3. S. Prereq: 243, M E 330, enrollment in 311L. Properties of liquids and gases, review of thermodynamic processes and relations between pressure, volume, temperature, and other thermodynamic variables. Shock and expansion waves, isentropic flow, Fanno and Rayleigh flow. Nonmajor graduate credit.

Aer E 311L. Gas Dynamics Laboratory. (0-0) Cr. 0.5. S. Prereq: 243, 243L, enrollment in 311L. Introduction to experimental compressible flow and propulsion principles, techniques and procedures through laboratory studies and experiments. Report writing.

Aer E 321. Flight Structures Analysis and Laboratory. (2.5-1) Cr. 3. F. Prereq: E M 324. 3 hours of lecture weekly and laboratory alternating weeks. Determination of flight loads. Materials selection for flight applications. Analysis of flight structures including trusses, beams, frames, and shear panels employing classical and finite element methods. Laboratory experiments on flight structures. Nonmajor graduate credit.

Aer E 343. Aerodynamics II. (3-0) Cr. 3. S. Prereq: Credit or enrollment in 311 and enrollment in 343L. Incompressible, subsonic, transonic, supersonic, hypersonic flow over airfoils and wings. Viscous flow theory. Laminar boundary layers. Transition and turbulent flow. Nonmajor graduate credit.

Aer E 391. Aerospace Seminar. Cr. R. F (1-0) Professional skills development activities including: interviewing, program of study specialization considerations, post baccalaureate study options, career planning.

Aer E 392. Aerospace Seminar. Cr. R. S. (1-0) Professional skills development activities including: program of study specialization considerations, post baccalaureate study options, career planning. Preliminary senior design project planning and mentor selection. SATISFACTORY-FAIL only.

Aer E 396. Summer Internship. Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services. Summer professional work period. Students must register for this course prior to commencing work. SATISFACTORY-FAIL only.

Aer E 397. Engineering Internship. Cr. R. Repeatable. F S. Prereq: Permission of department and Engineering Career Services. Professional work period, one semester maximum per academic year. Students must register for this course prior to commencing work. SATISFACTORY-FAIL only.

Aer E 398. Cooperative Education. Cr. R. F S. Prereq: 298, permission of department and Engineering Career Services. Second professional work period in the cooperative education program. Students must register for this course prior to commencing work. SATISFACTORY-FAIL only.

Aer E 442. VSTOL Aerodynamics and Performance. (3-0) Cr. 3. Prereq. 356. Introduction to the aerodynamics, performance, stability, control and critical maneuvering of VSTOL vehicles. Topics include hovercrafts, jet flaps, ducted fans and thrust vectored engines. Nonmajor graduate credit.

Aer E 448. Fluid Dynamics of Turbomachinery. (Cross-listed with M E). (3-0) Cr. 3. S. Prereq. M E 335 or equivalent. Applications of principles of fluid mechanics and thermodynamics and analysis design of turbomachines and related fluid system components. Nonmajor graduate credit.

Aer E 461. Modern Design Methodology with Aerospace Applications. (2-2) Cr. 3. Prereq: 361, 311, 321, 351, 355. Introduction to modern engineering design methodology. Computational constrained optimal design approach including selection of objective function, characterization of constraint system, materials and strength considerations, and sensitivity analyses. Nonmajor graduate credit.

Aer E 464. Spacecraft Systems. (3-0) Cr. 3. Prereq. 351. An examination of spacecraft systems including attitude determination and control, power, thermal control, communications, propulsion, guidance, navigation, command and data handling, and mechanisms. Explanation of space and operational environments as they impact spacecraft design. Includes discussions of safety, reliability, quality, maintainability, testing, cost, legal, and logistics issues. Nonmajor graduate credit.

Aer E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Cpr E, E E, Engr E, I E, Mat E, M E). (1-4) Cr. 3. Repeatable. F S. Prereq: Student must be within two semesters of graduation and receive permission of department. Design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

Aer E 491. Aerospace Seminar. Cr. R. F S. (1-0) Professional skills development activities. Courses are designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Engineering ethics case studies and discussions. Academic program planning, departmental symposium participation.

Aer E 492. Aerospace Seminar. Cr. R. F S. (1-0) Professional skills development activities. Writing and presentation of a technical paper at the department’s Aerospace Symposium or at a recognized student or professional meeting of the American Institute of Aeronautics and Astronautics (AIAA). SATISFACTORY-FAIL only.

Aer E 498. Cooperative Education. Cr. R. Repeatable. F S. Prereq: 398, permission of department and Engineering Career Services. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work. SATISFACTORY-FAIL only.

Aer E 499. Senior Project. Cr. R. Repeatable. F S. Prereq: Senior classification, credit or enrollment in 491. Development of aerospace principles and concepts through individual research and projects. Written report.

Courses primarily for graduate students, open to qualified undergraduate students

Aer E 521. Airframe Analysis. (3-0) Cr. 3. F. Prereq: 421 or EM 424. Analysis of Static stresses and deformation in continuous aircraft structures. Various analytical and approximate methods of analysis of isotropic and anisotropic plates and shells.

Aer E 545. Advance Experimental Technique for Thermal-Fluid Studies. (3-0) Cr. 3. S. Prereq: 343 or M E 335 or M E 378. Introduction of various experimental techniques widely used for fluid mechanics, aerodynamics, heat transfer, and combustion studies. Pressure gauges, Pitot tubes, hot wire anemometry; shadowgraph and Schlieren Photography; laser Doppler velocimetry; particle image velocimetry (PIV); advanced PIV techniques (stereo PIV, 3-D PIV, holographic PIV, microscopic PIV); laser induced fluorescence; pressure sensitive painting, temperature sensitive painting; molecular tagging velocimetry; molecular tagging thermometry. Extensive application and demonstration laboratory experiments will be included.

Aer E 546. Computational Fluid Mechanics and Heat Transfer I. (Cross-listed with M E). (3-0) Cr. 3. S. Prereq: Credit or enrollment in 541 or M E 538. Introduction to finite difference and finite volume methods used in modern engineering. Basic concepts of discretization, consistency, and stability. Applications of numerical methods to selected model partial differential equations.

Aer E 547. Computational Fluid Mechanics and Heat Transfer II. (Cross-listed with M E). (3-0) Cr. 3. S. Prereq: M E 546. Application of computational methods to current problems in fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulence modeling.

Aer E 565. Systems Engineering and Analysis. (Cross-listed with E E, I E). (3-0) Cr. 3. Prereq: Coursework in basic Statistics. Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

Aer E 570. Wind Engineering. (Cross-listed with E M). (3-0) Cr. 3. F. Prereq: E M 378, 345. Atmospheric circulation, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

African and African American Studies

Undergraduate Study

African and American Studies, a cross-disciplinary program in the College of Liberal Arts and Sciences, offers students the opportunity to explore the African Americans' experience and African American contributions to American culture. Students in the program should learn about African American experiences through the study of history, literature, art, religion, and society. They gain knowledge and develop skills and sensitivities to help them function effectively in today's diverse society.

African and American Studies at Iowa State University is an expanding program. Most of the courses in the program satisfy general education requirements in the College of Liberal Arts and Sciences, the human relations requirement for teachers, and the university's diversity requirement. Students can minor or even design their own interdisciplinary studies major with an emphasis in African American Studies. Relevant courses are offered through other departments.

A minor in African and American Studies requires six courses in the program with a minimum of 18 credits, including Introduction to African American Studies (AF Am 201) and Seminar in African American Culture (AF Am 460). The remaining credits must come from at least two departments, with at least two courses taken at the junior level or above. Independent study and internship opportunities are available for credit, but do not count in the minimum requirements for the minor.

Graduate Study

Several courses are open for nonmajor graduate credit. See individual listings for more information.

Courses primarily for undergraduate students

AF Am 201. Introduction to African American Studies. (3-0) Cr. 3.5. F.S. An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience.

AF Am 325. Peoples and Cultures of Africa. (Cross-listed with Anthr) (3-0) Cr. 3. S. Prereq: Anthr 201 or 308 recommended. Origins and distribution of peoples of Africa; geographical characteristics as related to culture types, including early civilizations; a comparative examination of economic, subsistence, language, social and political organization, and religious systems throughout the continent; change processes, the impact of colonialism, and the nature of contemporary African Societies.

AF Am 330. Ethnic and Race Relations. (Cross-listed with Soci) (3-0) Cr. 3. F.S.SS. Prereq. Soci 130 or 134. Analysis of ethnic and race relations, particularly in America; emphasis on the Sociology and psychology of race and ethnic relations.

AF Am 334. African American Religious Experience. (Cross-listed with Relig) (3-0) Cr. 3. F. Prereq: Prior course work in Religious Studies or African American Studies required. Examination of the African American experience from the perspective of black religion and the black church, with attention to political, economic, and social, as well as spiritual, concerns. Nonmajor graduate credit.

AF Am 347. African American Literature to 1960. (Cross-listed with Engl) (3-0) Cr. 3. Prereq: Engl 250. Intensive study of African American writing, possibly including slave narratives, Harlem Renaissance works, literature of social protest, and Forerunners of contemporary works that reveal key thematic, stylistic, and historical range of the literature. Nonmajor graduate credit.

AF Am 350. African American Women. (Cross-listed with W St) (3-0) Cr. 3. S. Prereq: 3 credits in Womens' Studies or African American Studies. Economic, social, political and cultural roles of African American women in the U.S. Includes literary, philosophical, and artistic expressions. Myths and realities explored. Nonmajor graduate credit.

AF Am 353. History of African Americans I. (Cross-listed with Hist) (3-0) Cr. 3. S. Prereq: Sophomore classification. Examines African roots of black culture and the African American experience in the United States from the colonial period through the Civil War. Topics include Atlantic Slave Trade, slavery and American identity, abolition, the emergence of Black Nationalism, and black participation in the Civil War.

AF Am 354. History of African Americans II. (Cross-listed with Hist) (3-0) Cr. 3. S. Prereq: Sophomore classification. Explores African American political thought and political action from Reconstruction to the present. Topics include rise of Jim Crow segregation, urban migration, Garvey movement, Harlem Renaissance, Depression and world wars, Pan-Africanism, civil rights, Black Power, and black feminism.

AF Am 460. Seminar in African American Culture. (3-0) Cr. 3. S. Intensive study of a selected topic in African-American Studies in one or more disciplines. Selected readings of various authors, movements, eras, or genres. Primary and secondary source materials. Nonmajor graduate credit.

Courses offered by other departments

Engl 349. Topics in Multicultural Literatures of the United States. (3-0) Cr. 3. See English.

Relig 475. Seminar: Issues in the Study of Religion. (3-0) Cr. 3. See Philosophy and Religious Studies

Agricultural Education and Studies

Robert Martin, Chair of Department

University Professors (Emeritus): Williams

Professors: Acker, Honeymam, Martin, G. Miller, W. Miller

Professors (Emeritus): Carter, Crawford, Gurnon, Gauger, Hoerner, Lawrence, Parsons, Tred

Associate Professors: Grudens-Schuck, McEowen

Associate Professors (Emeritus): Bruce, Jones

Assistant Professors: Dollison, Estes, Morris, Polito, Retallick, Steiner

Lecturers: Brown, Paulsen

Undergraduate Study

For undergraduate curricula in agricultural education and agricultural studies leading to the degree bachelor of science, see College of Agriculture, Curricula.

The department offers two curricula for students desiring center careers in agriculture-related fields. These curricula prepare for agricultural education and agricultural studies. The agricultural education curriculum prepares persons for careers as agricultural education instructors and educational specialists for industry and governmental agencies. The agricultural education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs will meet the university, college, and departmental outcomes in the following nine areas: 1) professional, interpersonal, and cross-cultural communications; 2) Problem-solving/critical thinking; 3) leadership; 4) entrepreneurship; 5) life-long learning; 6) ethics; 7) environmental awareness; 8) U.S. diversity; and 9) international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/assessment/agedsisindex.htm.

The department offers a minor in agricultural education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 400 level. Courses that can be taken for a minor are 211, 310, 311, 318, 412 or 418, 414, 450, 490, 496, and 499.

Visit the departmental website at www.AgEds.iastate.edu/.

Graduate Study

The department offers the degrees of master of science and doctor of philosophy with a major in agricultural education, a specialization in agricultural extension education, opportunities for emphasis in international agricultural education, and a minor for students majoring in other curricula. Graduates students who have earned a bachelor’s degree in an agricultural discipline may plan a course of study that leads to teacher certification. Candidates pursuing the master of science degree may do so by completing either a thesis or nonthesis-program of study.

Students have an opportunity to develop competence in disciplinary foundations and ethics, program planning, learning theory, instructional methods, program leadership and administration, program evaluation, research methodologies, data analysis and interpretation, writing for publication, and grantmanship.

The department administers the interdepartmental graduate program in professional agriculture designed for off-campus students pursuing a master of agriculture degree; see Off-Campus Credit Courses and Programs.

The department also cooperates in the international development studies option of the General Graduate Studies Program.
Courses and workshops are offered, both on and off campus, for extension educators, teachers, and industry personnel.

Courses primarily for undergraduate students

AgEds 110. Orientation. (1-0) Cr. 0.5. F. Orientation to the department. Careers in agriculture.

A. Agricultural Education

B. Agricultural Studies

C. General Agriculture

AgEds 111. Orientation for Agricultural Excellence Scholars. (1-0) Cr. Repeatable. F. Prereq: Enrollment as an agricultural excellence scholar. The roles of professionals in agriculture, academic preparation for assuming the role of a professional in agriculture, and meeting the demands of the scholar’s curriculum.

AgEds 112. Agriculture Biotechnology Colloquium. (1-0) Cr. T. S. Prereq: Enrollment as an agricultural excellence scholar. The scientific basis of biological and social sciences in agriculture.

AgEds 211. Early Field Based Experience. (1-0) Cr. 1. Repeatable. F.S.SS. Prereq: 110. Five days on-site in an agricultural setting observing competencies and issues in problem solving, decision-making, initiative taking, teamwork, leadership, written and oral communications, critical thinking and creativity. When students register it is their responsibility to make an appointment with the departmental coordinator early in the semester to plan their experience. A High School Agriculture Program

B. Extension

C. Agricultural Industries and Agencies

AgEds 290. Special Problems in Agricultural Education and Studies. Cr. arr. Repeatable. F.S.SS.

AgEds 298. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AgEds 310. Foundations of Agricultural Education Programs. (2-0) Cr. 2. S. Historical development of agricultural education programs. Philosophic premises, program goals and objectives. Educational and social issues impacting the implementation of agricultural education programs.

AgEds 311. Presentation and Sales Strategies for Agricultural Audiences. (3-0) Cr. 3. F. Utilizing instructional methods, techniques, and problem solving, presentation and sales strategies with agricultural audiences.

AgEds 312. Science With Practice. (1-3) Cr. 2. F. Prereq: College of Agriculture and Life Sciences majors only. A planned learning experience wherein each student and faculty mentor develops a learning agreement that encompasses specific activities and expectations. Students are engaged in reflective activities that include micro-reflections, formal presentations, and a comprehensive portfolio. Students will be able to recognize and articulate what is learned through the experience and transfer what is learned to future experiences.

AgEds 315. Personal and Professional Leadership in Agriculture. (3-0) Cr. 3. F.S. Learn leadership theories and group facilitation skills for personal and professional applications in agricultural education, industry, and communities.

AgEds 398. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AgEds 401. Planning Agriculture and Life Sciences Education Programs. (Dual-listed with 501). (3-0) Cr. 3. F. Prereq: 310. Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AgEds 402. Methods of Teaching in Agriculture and Life Sciences. (Dual-listed with 502). (3) Cr. 3. F. Prereq: Concurrent enrollment in 401. Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AgEds 412. Internship in Agricultural Education and Studies. Cr. arr. Repeatable. F.S.SS. Prereq: 211, junior classification in AgEds and permission of instructor. A supervised two to twelve week learning experience in an approved learning setting with application to educational, agricultural and/or environmental practices and principles. Nonmajor graduate credit.

AgEds 414. Developing Agricultural Education Programs in Non-formal Settings. (2-0) Cr. 2. S. Prereq: 211 and permission of instructor. Basic concepts in planning, conducting, and evaluating educational programs in non-formal settings. Includes programming for youth and adults in Extension, agricultural industry, and related agencies. Nonmajor graduate credit.

AgEds 416. Pre-Student Teaching Experience in Agricultural Education. Cr. 1. F. Prereq: 211, 402 and admission to teacher education program. A one-week field-based experience in an approved secondary agricultural education program. Concurrent enrollment in 417 is required.

AgEds 418. Supervised Extension Experience. Cr. arr. Repeatable. F.S.SS. Prereq: 211, junior classification, permission of instructor. Supervised professional experience in an approved county, area or State Cooperative Extension Service office. Nonmajor graduate credit.

AgEds 450. Farm Management and Operation. (1-6) Cr. 3. F.S. Prereq: Econ 235, 236. Emphasis will be on the major domains of learning, operation of a diversified Iowa farm. The class is responsible for the plans, records, and decisions for buying and selling the farm’s livestock, crops, and equipment. Special speakers on current topics. May be taken for credit 3 times at different times of the year upon permission of the instructor. Nonmajor graduate credit.

AgEds 451. Agricultural Law. (3-2) Cr. 4. S. Prereq: Senior classification. The legal framework imparing upon decision-making by firms, families, and individuals, and personal property, contracts, secured transactions, negotiable instruments, debtor-creditor relations, bankruptcy, farm income tax organization of firms, intergenerational property transfers, trusts and farm estate planning, civil and criminal liabilities, environmental law, federal and state regulatory powers. Nonmajor graduate credit.

AgEds 488. Methods of Teaching Agricultural Mechanics. (2-0) Cr. 3. F.S. Methods and management techniques in agricultural mechanics laboratories. Emphasis will be on safety, mechanical skills development and management of students, facilities, equipment, and materials.

AgEds 490. Independent Study in Agricultural Education and Studies. Cr. arr. Repeatable. F.S.SS. Prereq: Junior or senior classification, permission of instructor. A. Philosophy, Curriculum, and Methods

B. Leadership, Evaluation, and Administration

C. Business, Industry, and Production Agriculture

D. Extension and International Agriculture

E. Instructional Technology

F. Environmental Issues

G. Entrepreneurship

H. Honors

I. Communications

AgEds 496. Agricultural Travel Course. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of instructor. Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Nonmajor graduate credit.

A. International

B. Domestic

AgEds 498. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

AgEds 501. Planning Agriculture and Life Sciences Education Programs. (Dual-listed with 401). (3-0) Cr. 3. F. Prereq: 310. Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AgEds 502. Methods of Teaching in Agriculture and Life Sciences. (Dual-listed with 402). (3-0) Cr. 3. F. Prereq: Concurrent enrollment in 501. Topics include principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AgEds 510. Introduction to Research in Agricultural Education. (3-0) Cr. 3. F. Prereq: Graduate classification. Determining your research focus; developing research problems and objectives; reviewing the literature and establishing a theoretical framework; establishing procedures for data collection and analysis; ethical issues.

AgEds 514. Organizing Agricultural Information for Professional and Scientific Meetings. (1-2) Cr. 2. F. Prereq: Graduate classification in agriculture. Concepts and practices in planning, preparing, and presenting materials used in professional meetings and scientific papers by agriculturalists with special emphasis on computerized delivery methods.

AgEds 520. Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources. (3-0) Cr. 3. F. Prereq: Graduate classification. Theory and practice of adult education. Teaching and learning in formal and non-formal instructional programs for adult learners.

AgEds 524. Program Development and Evaluation in Agricultural and Extension Education. (3-0) Cr. 3. F. Prereq: Graduate classification. Theories and practice of program planning for nonformal education. Addresses use of program logic modeling and considers critical theories of planning to address power and interests in program development, needs assessment, and evaluation.

AgEds 533. Introduction to Learning Theory in Agricultural Education. (3-0) Cr. 3. S. Prereq: Graduate classification. Introduction to a variety of theoretical perspectives of learning and how they may be used within the field of agricultural education. Emphasis will be on the major domains of learning, developmental considerations, basic assumptions, concepts, and principles of various learning theories; understanding how each theoretical perspective may be used in both formal and non-formal educational settings.

AgEds 550. Foundations of Agricultural Education. (3-0) Cr. 3. F. Prereq: Graduate classification. Philosophical premises, ethical principles, historical development, contextual applications, and knowledge bases for agricultural education.
AgEds 552. Data Analysis and Interpretation. (2-0) Cr. 2. F. Prereq: 510. Strategies for analyzing, interpreting, and reporting quantitative research data in the social and behavioral sciences.

AgEds 561. Technology Transfer and the Role of Agricultural and Extension Education. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Graduate classification. The impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs.

AgEds 590. Special Topics in Agricultural Education. Cr. arr. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education.

Agricultural Engineering

(Administered by the Department of Agricultural and Biosystems Engineering)

Rameshwar Kanwar, Chair of Department

Distinguished Professor: Brown

Distinguished Professors (Emeritus): H. Johnson

University Professors: Bern

University Professors (Emeritus): Baker

Professors: Chen, Downing, Glavine, Harmon, Hoff, Hurburgh, L. Johnson, Kanwar, Misra, Schwab, Van Leeuwen, Xin

Professors (Collaborators): Lafren

Associate Professors: Anex, Bhandari, Birrell, Bundy, Hazen, Hoerner, Keeney, Lovely, Maney, Mangold, Marley, Melvin, Miller, Pedersen, Riley, R. Smith

Associate Professors (Collaborators): Ban

Assistant Professors: Darr, Grewel, Helmers, Kaleita-Forbes, Keren, Kim, Soupir, Tang, Yu

Assistant Professors (Emeritus): Boyd, Bradshaw

Assistant Professors (Adjunct): Inyang, Shaham, Tong

Assistant Professors (Collaborators): Dunn, Malone

Lecturer: Snell

Undergraduate Study

For the undergraduate curriculum in agricultural engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

Agricultural Engineering Curriculum Educational Goal, Objectives, and Learning Outcomes:

The goal of the curriculum in agricultural engineering is to train students to integrate basic physical and biological sciences with engineering design principles to solve problems related to production, processing, storage, handling, distribution, and use of food, feed, fiber and other biomaterials, and the management of related natural resources worldwide.

The agricultural engineering bachelor of science degree program has the following educational objectives for its graduates. Two to five years after graduation, through the professional practice of engineering, graduates should:

1. Have demonstrated competence in methods of analysis involving use of Mathematics, fundamental physical and biological sciences, engineering sciences, and computation needed for the practice of biological systems engineering in food, fiber, energy and environmental companies and agencies.

2. Have developed skills necessary to the design process; including the abilities to think creatively, to formulate problem statements, to communicate effectively, to synthesize information, and to evaluate and implement problem solutions.

3. Be capable of addressing issues of ethics, safety, professionalism, cultural diversity, globalization, environmental impact, and social and economic impact in engineering practice.

4. Demonstrate continuous professional and technical growth, with practical experience, so as to be licensed as a professional engineer or achieve that level of expertise

5. Demonstrated the ability to:

a. Be a successful leader of multi-disciplinary teams,

b. Efficiently manage multiple simultaneous projects,

c. Work collaboratively,

d. Implement multi-disciplinary systems-based solutions,

e. Apply innovative solutions to problems through the use of new methods or technologies,

f. Contribute to the business success of their employer,

g. Build community

The agricultural engineering degree program outcomes are statements that describe what our students are expected to know and be able to do by the time of graduation. To meet the established agricultural engineering program educational objectives, the expected outcomes for agricultural engineering bachelor of science graduates are:

a) An ability to apply knowledge of mathematics, science, and engineering

b) An ability to design and conduct experiments, as well as to analyze and interpret data

c) An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability

d) An ability to function on multi-disciplinary teams

e) An ability to identify, formulate, and solve engineering problems

f) An understanding of professional and ethical responsibility

g) An ability to communicate effectively

h) Achievement of the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context

i) A recognition of the need for, and an ability to engage in lifelong learning

j) A knowledge of contemporary issues

k) An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

l) Proficiency in mathematics through differential equations

m) Proficiency in biological and engineering sciences

n) Competence in the application of engineering to agriculture, aquaculture, food, Forestry, human, natural resource, or other biological systems.

Graduates find employment in diverse ag- and bio-related industries and government agencies dealing with agricultural machines and buildings, animal and environmental control, grain processing and handling, soil and water resources, food, and biotechnology. Their work involves engineering design, development, testing, research, manufacturing, consulting, sales, and service. The department has cooperative programs established for interested and qualified students. The four-year curriculum is extended over a five-year period and interspersed with work periods at cooperating organizations. This plan offers valuable practical experience and financial assistance during the years in college.

The department also offers a bachelor of science curriculum in biological systems engineering. See College of Engineering, Curricula. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology. See College of Agriculture and Life Sciences, Curricula.
Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. Refer to Graduate Study for more information.

Graduate Study
The department offers work for the degrees of master of science, master of engineering, and doctor of philosophy with a major in agricultural engineering, and offers minor work for students in other majors. Within the agricultural engineering major the student may specialize in:
- advanced machinery engineering (agricultural safety and health, sensors and artificial intelligence, controls and automation, precision agriculture, and biorenewables)
- animal and plant production engineering (air emissions measurement and abatement, animal welfare, environmental control in animal housing, manure treatment, crop modeling, plant stress physiology, precision agriculture, and decision support systems)
- environmental stewardship engineering (erosion control, drainage/water management, pollutant fate and transport, nutrients management, wetlands, vegetated filter/buffer strips, hydrological/water quality/crop modeling, geographic information science (GIS))
- remote sensing, water quality, and watershed management, or
- process engineering for food safety and value addition (processing technologies and systems for adding value, quality management systems, agricultural product, marketing practices and standards, instrumentation for grain, seed, and food quality enhancement).

A prerequisite to graduate work is the completion of an undergraduate curriculum substantially equivalent to that required of agricultural engineering undergraduate students at this institution. However, because of the diversity of interests within the graduate programs in agricultural engineering, a student may qualify for graduate study even though the undergraduate training has been in a discipline other than agricultural engineering. Supporting work will be required depending on the student’s background and area of interest with requirements defined by departmental graduate student guidelines: www.iastate.edu/grad_students.asp

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; course work credits for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology (see Graduate Majors).

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human and computer interaction, and toxicology (see Index).

Courses primarily for undergraduate students
A E 110. Experiencing Agricultural and Biosystems Engineering. (0-2) Cr. 1. S. Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of agricultural and biosystems engineering. Report writing, co-ops, internships, careers, registration planning.
A E 216. Fundamentals of Agricultural and Biosystems Engineering. (Cross-listed with BSE). (2-2) Cr. 3. S. Prereq: 110. 160 credits or enrollment in Math 169. Application of Mathematics and engineering sciences to mass and energy balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of heat and mass transfer, air and water vapor systems; animal production systems, grain systems; food systems, hydrologic systems, and bioprocessing.
A E 271. Engineering Applications of Parametric Solid Modeling. (1-2) Cr. 1. F. Prereq: E 170 or TSM 116 or equivalent. 8 week-course. Creating, editing, and documenting part and assembly models using Solidworks.
A E 272. Parametric Solid Models, Drawings, and Assemblies Using Pro/ENGINEER. (1-2) Cr. 1. F. Prereq: Engr 170 or TSM 116 or equivalent. 8 week-course. Applications of Pro/ENGINEER software. Create solid models of parts and assemblies. Utilize the solid models to create design documentation: standard drawing views, dimensions, and notes.
A E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work.
A E 301. Leadership and Ethics Seminar. (Cross-listed with BSE, TSM). (1-0) Cr. 1. F. Prereq: 207. 8 week course. Leadership and ethics experiences through case studies and seminar presentations by practitioners. Relationship of workplace competencies to leadership and ethics; professional licensure. Transition to professional careers.
A E 304. Instrumentation for Agricultural and Biosystems Engineering. (Cross-listed with 304). (2-2) Cr. 3. S. Prereq: 363 or C Pr 281. Interfacing techniques for computer control and monitoring of agricultural and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems.
A E 342. Agricultural Tractor Power. (2-3) Cr. 3. S. Prereq: M E 330 or Ch 381 or M E 231. Thermodynamic principles and construction of tractor engines. Fuels, combustion, and lubrication. Kinematics and dynamics of tractor power applications; drawbar, power take-off and traction mechanisms. Nonmajor graduate credit.
A E 388. Sustainable Engineering and International Development. (Cross-listed with C E, E E, M E, Mat Et). (2-2) Cr. 3. F. Prereq: Junior classification in engineering. Multi-disciplinary approach to sustainable engineering and international development, sustainable agricultural and industrial design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as non-government organizations (NGOs). Course readings, final project/design report.
A E 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work.
A E 404. Instrumentation for Agricultural and Biosystems Engineering. (Cross-listed with 304). (2-2) Cr. 3. S. Prereq: 363 or C Pr 281. Interfacing techniques for computer control and monitoring of agricultural and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems.
A E 406. Applied Computational Intelligence for Agricultural and Biological Systems. (Dual-listed with 588). (2-2) Cr. 3. Alt. S. Prereq: 216 or equivalent, Math 166, Stat 305. Applications of biologically inspired computational intelligence tools to solve problems in agricultural and biological systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree Learning. Fundamental machine vision techniques will be introduced in the first part of course and integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation.
A E 408. GIS and Natural Resources Management. (Dual-listed with 508B). (Cross-listed with EnSci). (2-2) Cr. 3. F. Prepara. Working knowledge of computers and Windows environment. Introduction to fundamental concepts and applications of GIS in natural resources management and decision making for management and planning on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS.

A E 411. Bioprocessing and Bioproducts. (Dual-listed with 511). (Cross-listed with BioE, BSE, C E). (3-0) Cr. 3. F. Prepara. A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainable development. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation, membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

A E 416. Agricultural Engineering Design II. (Cross-listed with BSE). (1-2) Cr. 2. F. S. Prepara. 415. Selection of potential solution problems identified in 415 for development by design teams. Presentation of designs through oral and written reports and prototypes. Nonmajor graduate credit.

A E 424. Air Pollution. (Dual-listed with 524). (Cross-listed with C E, EnSci). (1-0) Cr. 1. F. Prepara. Either Phys 221 or Chem 176 and either Math 168 or 3 credits in statistics. Senior classification or above. 1 cr. per module. Module A prereq for all modules; Module B prereq for D and E.
A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology
E. Agricultural sources of pollution

A E 469. Grain Processing and Handling. (Dual-listed with 569). (2-2) Cr. 3. S. Prepara. 216. Cereal grain and oilseed properties, quality measurement, processing, and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soybean oil extraction. Grain handling systems.

Courses primarily for graduate students, open to qualified undergraduate students

A E 504. Instrumentation for Agricultural and Biosystems Engineering. (Dual-listed with 404). (2-2) Cr. 3. F. Prepara. 363 or Cpr E 281. Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A E 506. Applied Computational Intelligence for Agricultural and Biological Systems. (Dual-listed with 408). (2-2) Cr. 3. Alt. F., offered 2010. Prepara. 216 or equivalent, Math 166, Stat 305. Applications of bio-inspired computational intelligence tools to solve problems in agricultural and biological systems. Introduction to Artificial Intelligence Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree Learning. Fundamental machine vision techniques will be introduced in the first part of course and integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation. Individual and/or group projects required for graduate credit.

A E 508. GIS and Natural Resources Management. (Dual-listed with 408). (Cross-listed with EnSci). (2-2) Cr. 3. S. Prepara. Working knowledge of computers and Windows environment. Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling, visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS. In addition to other assignments, graduate students will prepare research literature reviews on topics covered in class and develop enterprise applications.

A E 511. Bioprocessing and Bioproducts. (Dual-listed with 411). (Cross-listed with BSE, BRT, C E). (3-0) Cr. 3. F. Prepara. A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation, membrane reactors, bioelectrolysis, Saccharification, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

A E 515. Integrated Crop and Livestock Production Systems. (Cross-listed with Agron, An S, SusAg). (3-0) Cr. 3. Alt. F., offered 2009. Prepara. SusAg 509. Methods to maintain prairie ecosystems. Evaluation of the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

A E 524. Air Pollution. (Dual-listed with 424). (Cross-listed with C E, EnSci). (1-0) Cr. 1. F. Prepara. Either Phys 221 or Chem 176 and either Math 168 or 3 credits in statistics. Senior classification or above. 1 cr. per module. Module A prereq for all modules; Module B prereq for D and E.
A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology
E. Agricultural sources of pollution

relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

A E 536. Design and Evaluation of Soil and Water Monitoring Systems. (Dual-listed with 436.) (2-3) Cr. 3. Alt. S., offered 2011. Prereq: A E 437/531. Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil, water, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, detection, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

A E 581. Food and Bioprocess Engineering. (Dual-listed with 451). (3-0) Cr. 3. F. Prereq: 216 and M E 438 or CH E 267 or FS HN 361 and Math 266 or 267. Application of engineering principles and Mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and bioprocessing systems, flow processes, thermal processes and separation processes. Term paper required for graduate credit.

A E 590. Special Topics. Cr. arr. Repeatable.
B. Biosystems Engineering
F. Food Engineering
O. Occupational Safety
P. Power and Machinery Engineering
Q. Structures and Environment
R. Process Engineering
S. Environment and Natural Resources
U. Waste Management

Kendall Lamkey, Chair of Department

Distinguished Professors: Fehr, Horton

Distinguished Professors (Emeritus): Frey, Hallauer, Peake, Russell, Shaw

Professors (Emeritus): M. Anderson, Atkins, Benson, Burris, Campbell, I. Carlson, R. Carlson, Fenton, Green, Hodges, Imsande, Keeney, Larson, Pearce, Schafer, Schiller, A. Scott, Shibles, Shradar, Skrda, Stritzel, H. Thompson, L. Thompson, Troeh, Voss, Wedin, Whigham, Woolley, Yarger

Professors (Collaborators): Hatfield, Jaynes, Karlen, Kaspar, Laird, Logsdon, Masters, Palmer, Shoemaker

Associate Professors: Al-Kaisi, Bercraft, Bhattacharya, Dekker, Delate, Knapp, Lubberstedt, Manu, Wiedenhof

Associate Professors (Collaborators): Cambardella, Grant, Kowar, Moorman, Pollak, Sauer, M. Scott

Assistant Professors: Goggi, Heaton, Henning, Hornbuckle, Pedersen, Politio, Salas-Fernandez

Assistant Professor (Adjunct): Fu

Assistant Professors (Collaborators): Blanco, Cannon, Edwards, Gardner, Graham, Guan, Singer, Widlreicher

Lecturers: Christensen, Ciha, Dobill, McAndrews, Sleugh, Zdorkowski

Undergraduate Study

For undergraduate curriculum in Agronomy, see College of Agriculture, Curricula.

The Department of Agronomy has a curriculum noted for its scientific rigor and breadth in crop science, soil science, agricultural meteorology, and plant breeding. It prepares students for science-based professional positions, graduate study, or research careers across the spectrum of Agronomy.

The curriculum provides both flexibility and direction for students by offering four in-depth options: crop management and business, agroecology, soil and environmental science, and plant breeding and biotechnology. A minimum of 15 credits of Agronomy courses must be earned at Iowa State for students transferring from other institutions. The program also has many opportunities for undergraduate students to be involved in cutting-edge research and international agriculture.

Graduates have the theoretical and practical knowledge needed for efficient and sustainable production of food, feed, fuel, and fiber. Graduates are skilled in communications, critical thinking, problem solving, and working effectively with others.

They understand the ethical, cultural, and environmental dimensions of issues facing professionals in agriculture and natural resources.

An Agronomy major prepares students for employment in agricultural business and industry, agricultural service organizations, crop production and soil management, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field Agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ Agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, and in regulatory agencies as plant, food, and grain inspectors. Additional areas of work open to Agronomists include integrated pest management, land appraisal, agricultural finance, turfgrass management, and the home lawn care industry.

The department offers an international scholar program leading to a credentialed title of “Agronomy International Scholar” for agronomy majors who have distinguished themselves in global understanding and international experience. Contact the department for requirements.
The department offers work for a minor in Agronomy. Students are required to complete an approved minor program that includes Agron 114, 154, 212, 354, and 6 additional credits, of which a minimum of 3 credits must be at the 300+ level. Nine credits for the Agronomy minor must be earned at Iowa State.

Graduate Study

The department offers programs that lead to the degrees master of science and doctor of philosophy, with majors in agricultural meteorology; crop production and physiology with optional specializations in seed science and weed science; plant breeding; and soil science with specialization in soil chemistry, soil fertility, soil management, soil microbiology and biochemistry, soil morphology and genesis, or soil physics. Minor work is offered for students with majors in other departments. A M.S. nongrants option is available for students desiring a general degree program with additional coursework and a written creative component substituting for thesis research.

Graduates have a broad knowledge base germane to their area of study. They are trained to integrate and apply knowledge to different situations. Students develop skills in scientific reasoning, organization, and logical presentation of ideas.

The department offers a Master of Science degree in Agronomy designed for the continuing education of professional Agronomists. The Program is taught at a distance using computer-based instruction. It is a nonthesis degree requiring completion of a written creative component.

The department cooperates in the interdepartmental program in professional agriculture; interdepartmental majors in ecology and evolutionary biology; genetics; MCDB (molecular, cellular, and developmental biology); plant physiology; sustainable agriculture; and environmental science.

Prerequisite to major work in this department is completion of an undergraduate degree program with emphasis on Agronomic, biological, and physical sciences.

Courses primarily for undergraduate students

Agron 105. Leadership Experience. Cr. R. F.S.S. A participatory experience in activities or completion of a course that enhances the development of leadership and group-dynamic skills. See adviser for departmental requirements.

Agron 110. Professional Development in Agronomy: Orientation. (0.5-0) Cr. 0.5. F. Orientation to college life, the profession of Agronomy, and the Agronomy curriculum.

Agron 120. Introduction to Renewable Resources. (Cross-listed with Env S, NREM). (3-0) Cr. 3. F. Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

Agron 154. Fundamentals of Soil Science. (2-2) Cr. 3. F.S. Prereq: Chem 162. Manu. Introduction to physical, chemical, and biological properties of soils, their formation, classification, and distribution. Use of soil survey and computer database information in balancing Agronomic, economic, and environmental concerns in soil management. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

Agron 155. Soils for Horticultural Scientists. (2-2) Cr. 3. F.S. Prereq: Chem 163. Restricted to students in Horticulture. Manu. Physical, chemical and biological properties of natural and manufactured soils. Use of soil information when producing plants on natural and manufactured soil. Only one of Agron 154, 155, or 156 may be applied toward graduation.

Agron 156. Soils for Urban Use. (2-2) Cr. 3. F.S. Restricted to students outside the College of Agriculture. Manu. Fundamental properties of soils and their application to urban Settings. Development of a site plan for area of lawn survey 137. Identification and computerized data bank information. Field trip. Credit for only one of Agron 154, 155 or 156 may be applied toward graduation.

Agron 206. Introduction to Meteorology. (Cross-listed with Mteor). (3-0) Cr. 3. F.S. Basic concepts in meteorology, including atmospheric measurements, radiation, stability, precipitation, winds, frontal, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety. Self-study laboratory assignments utilize interactive computerized exercises, worksheets and computerized real-time forecasting. Self-study section may be available to distant education students.

Agron 283. Pesticide Application Certification. (Cross-listed with Ent, For, Hort). (2-0) Cr. 2. S. Holscher. Core background and specialty topics in agricultural, and Horticultural pesticide applicator certification. Students can Select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

Agron 311. Professional Internship in Agronomy. (1-0) Cr. F.S. Repeatable. F.S. Prereq: Agron 110. Agronomy majors only; permission of instructor before internship begins. A supervised learning experience in a professional setting related to crop production, plant breeding, soil science or environmental science.

Agron 320. Genetics, Agriculture and Biotechnology. (Cross-listed with Gen). (3-0) Cr. 3. F.S. Prereq: Biol 212. Transmission genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313

Agron 325. Biorenewable Systems. (Cross-listed with AE, An S, BusAd, Econ, TSM). (3-0) Cr. 3. F.S. Prereq: Econ 101, Chem 155 or higher, Math 140 or higher. Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing.

Agron 331. Intercollegiate Crops Team. (0-6) Cr. 2. F.S. Prereq: Permission of instructor. Intensive training in preparation for intercollegiate competition in national crops contests.

Agron 334. Forage Crop Management. (3-0) Cr. 3. F.S. Prereq: 114. Barnhart. Production and management of forage crops; concepts applied to yield, quality, and stand persistence; systems of forage utilization including grazing, hay, and silage. Students enrolling for graduate credit will be expected to complete an additional class project. Nonmajor graduate credit.

Agron 338. Seed Science and Technology. (Cross-listed with Hort). (2-3) Cr. 3. F.S. Prereq: 114 or Hort 221, Biol 211. Goggi. Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

Agron 351. Turfgrass Establishment and Management. (Cross-listed with Hort). (3-0) Cr. 3. F. Prereq: Hort 221 or Agron 114 or Biol 211. Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadways, and seed and soil production. The biology and control of turfgrass pests. Nonmajor graduate credit.
Agronomy

Agron 351L. Turfgrass Establishment and Management Laboratory. (Cross-listed with Hort.) (0-3) Cr. 1. F. Prereq: Credit or enrollment in 351. Those enrolled in the Horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor. Nonmajor graduate credit.

Agron 354. Soils and Plant Growth. (Cross-listed with Hort.) (3-0) Cr. 3. F. Prereq: Agron 164 and Biol 101 or 211. Killion or Loynachan. Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutrient elements, pH, organic matter maintenance, and rooting development. Nonmajor graduate credit.

Agron 354L. Soils and Plant Growth Laboratory. (Cross-listed with Hort.) (0-3) Cr. 1. F. S. Prereq: Credit or enrollment in 354. Henning. Laboratory exercises in soil testing that assess a soil’s ability to support nutritive requirements for plant growth.

Agron 356. Site-Specific Crop and Soil Management. (3-0) Cr. 4. F. Prereq: 114 and 354. Polito. Development of solutions to crop and soil management problems in consultation with a producer-client. Identification of client needs, gathering technical information, and use of geographic information systems as a tool for making crop and soil management decisions. Development and presentation of solutions for crop and soil management issues confronting the client. Emphasis will be placed on identifying and solving complex problems that require integration of biological, physical, chemical, and economic components within a crop and soil management system. Nonmajor graduate credit.

Agron 360. Environmental Soil Science. (Cross-listed with EnSci.) (2-3) Cr. 3. S. Prereq: Agron 260 or Geol 100 or 201. Burras and Killorn. Application of soil science to environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

Agron 370. Field Experience in Soil Description and Interpretation. (0-3) Cr. 1. Repeatable. F. S. Prereq: 154 and permission of instructor. Sandor. Description and interpretation of soils in the field and laboratory, emphasizing hands-on experience. Evaluation of soil information for land use. Students may participate in intercollegiate judging contests.

Agron 392. Systems Analysis in Crop and Soil Management. (3-0) Cr. 3. F. S. Prereq: 316, 354. Widenhoef. Management strategies at the level of the farm field. Emphasis will be on participatory learning activities.

Agron 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Agron 402. Watershed Hydrology. (Cross-listed with EnSci, Geol, Mteor, NREM). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

Agron 402L. Watershed Hydrology and Surficial Processes. (Cross-listed with la LL, EnSci). Cr. 4. SS. Prereq: Four courses in physical or biological sciences or engineering. Effects of geomorphology, soils, and land use on water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.

Agron 404. Global Change. (Dual-listed with 504). (Cross-listed with EnSci, Env S, Mteor). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Nonmajor graduate credit.

Agron 405. Environmental Biophysics. (Dual-listed with 505). (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Math 166 or equivalent. Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water and carbon) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind. Heat, mass, and radiative transport. Applications to animals, plants, and plant communities. Nonmajor graduate credit.

Agron 406. World Climates. (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. S. Prereq: Agron/Mteor 206. Arritt. Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including Society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Nonmajor graduate credit.

Agron 410. Professional Development in Agronomy: Senior Forum. (1-0) Cr. 1. F. S. Prereq: Senior classification. Development of an appropriate content for professionalism. Topics include professional certification, ethics, and maintaining an active network of information sources and professional contacts in support of lifelong learning. Student interpretation, writings, presentations, and discussions.

Agron 421. Introduction to Plant Breeding. (Cross-listed with Hort). (3-0) Cr. 3. F. Prereq: Gen 320 or Biol 313. Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and asexually reproducing Agronomic and Horticultural crops. Applications of biotechnology techniques in the development of improved cultivars. Nonmajor graduate credit.

Agron 446. International Issues and Challenges in Sustainable Development. (Cross-listed with Globe, IntSt). Cr. 4. S. Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor: Mullen. Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economic, political, and historical factors affecting sustainable development of communities and countries from art and science perspectives. International field experience with foreign language training required. A program fee is charged to students for international study abroad.

Agron 452. GIS for Geoscientists. (Dual-listed with 552). (Cross-listed with Geol, EnSci). (2-0) Cr. 3. F. Prereq: Geol 100, Geol 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses. Nonmajor graduate credit.

Agron 459. Environmental Soil and Water Chemistry. (Dual-listed with 559). (Cross-listed with EnSci). (3-0) Cr. 3. F. Prereq: Agron 354 or EnSci 360; Chem 164, 165, or 178; Math 140. Chem 211 or 231 recommended. Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues. Nonmajor graduate credit.

Agron 463. Soil formation and Landscape Relationships. (Dual-listed with 563). (Cross-listed with EnSci). (2-4) Cr. 4. S. Prereq: Agron 164 or 260. Sandor. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of Agron 463 or 463L may be applied for graduation. Nonmajor graduate credit.

Agron 490. Independent Study. Cr. 1-3. Repeatable maximum of 4 credits. F.S.S. Prereq: Junior or senior classification with at least 8 credits in Agronomy; permission of instructor in specialty area after consultation. Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student. E. Entertainment G. General H. Honors Z. Service Learning

Agron 491. Seed Science Internship Experience. (Cross-listed with TSM, AgEcol). Cr. art. Repeatable. F.S.SS. Prereq: Agron 338, advanced approval and participation of employer and instructor. A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

Agron 495. Agricultural Travel Course Preparation. Cr. R. Repeatable. FS. Prereq: Permission of instructor. Limited enrollment. Students enrolled in this course intend to register for Agron 496 the following term. Topics will include the agricultural industries, climate, crops, culture, economics, geography, history, livestock, marketing, soils, and preparation for travel to locations to be visited.

Agron 497. Agroecology Field Course. (3-0) Cr. 3. F. Prereq: Jnr. or Sr. classification with at least 8 credits in Agronomy. A one-week intensive class, offered off-campus. Student will visit farms within the Midwest and analyze the sustainability of each farm.

Agron 498. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

Agron 500. Orientation Seminar. (2-0) Cr. 1. F. Prereq: International Agronomy graduate students only. Loynachan. An introduction to Iowa and U.S. agriculture for international scholars in Agronomic majors. Farm trips to illustrate points. Departmental role in the functioning of research, teaching, and extension in fulfilling the charge given the land-grant university.

Agron 502. Chemistry, Physics, and Biology of Soils. (3-0) Cr. 3. F. Prereq: 114, 154, Biol 101, Chem 163, and Math 140. Soil chemical, physical, and biological properties that control processes within the soil, their influence on plant-soil interactions, and soil classification. Basic concepts in soil science and their applications. Required course for the Master of Science in Agronomy degree program.

Agron 503. Climate and Crop Growth. (3-0) Cr. 3. F. Prereq: 114 and Math 140. Applied concepts in climate and agricultural meteorology with emphasis on the climate-agriculture relationship and the microclimate-agriculture interaction. Basic meteorological principles are also presented to support these applied concepts. Required course for the Master of Science in Agronomy degree program.

Agron 504. Global Change. (Dual-listed with 404). (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior, senior, or graduate standing. Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

Agron 505. Environmental Biophysics. (Dual-listed with 486). (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Math 166 or equivalent. Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water and carbon) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind. Heat, mass, and radiative transport. Applications to animals, plants, and plant communities. Semester project required.

Agron 509. Agroecosystem Analysis. (Cross-listed with Anthr, Soc, SusAg). (3-4) Cr. 3. F. Prereq: Senior or above classification. Experimental, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc), and scales of operation.

Agron 510. Crop Improvement. (Cross-listed with STB). (3-0) Cr. 3. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. A study of the basic principles and methods in the genetic improvement of crop plants. Methods used in manipulating genomes through the use of biotechnology. Methods of cultivar development. Questions for describing response to selection. Analysis of the relationship of reproductive characters and growth characteristics to response to selection.

Agron 512. Soil-Plant Environment. (3-0) Cr. 3. S. Prereq: 502. Recommended 507. Loynachan. Soil properties and their impact on soil/plant relationships. Soil structure, aeration, and nutrient will be discussed in the context of soil fertility and environmental quality management. Required course for the Master of Science in Agronomy degree program.

Agron 513. Quantitative Methods for Agronomy. (3-0) Cr. 3. S. Prereq: 114, Math 140, Stat 104. Quantitative methods for analyzing and interpreting Agronomic information. Focus on experiment design, hypothesis testing, analysis of variance, regression, correlation, and graphical representation of data. Use of JMP for organization, analyzing, and presenting data. Required course for the Master of Science in Agronomy degree program.

Agron 515. Integrated Crop and Livestock Production Systems. (Cross-listed with A E, SusAg, An Sj). (3-0) Cr. 3. F. Prereq: 509. Methods to maintain productivity and protect the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

Agron 516. Crop Physiology. (3-0) Cr. 3. S. Westgate. Investigation of Molecular, whole plant, and plant community processes essential to biomass production and seed formation, and analysis of molecular approaches to overcome diseases imposed on these processes by the environment.

Agron 517. Evolutionary Ecology of Weeds. (Duel-listed with 417). (3-0) Cr. 3. S. Prereq: 317 Dekker. Ecology and evolution of invasive plants and weeds in habitats disturbed by humans. Life history trait evolution and adaptive radiation and applications to control species and the consequent processes of invasion, colonization, enduring occupation and population shifts. Roles played by mating systems and biodiversity, soil seed pools and community assembly, competitive interactions with neighbors and fitness.

Agron 521. Principles of Cultivar Development. (3-0) Cr. 3. F. Prereq: 421; Stat 401. Theoretical and practical analysis of alternative breeding methods to improve crop plants. Strategies to incorporate germplasm resources, develop populations, maximize genetic gain, and use marker-assisted selection. Relationship of breeding methods to commercial seed production.

Agron 522. Field Methods in Plant Breeding. (6-0) Cr. 2. SS. Prereq: 521. Field experience in planning and conducting plant breeding research for germplasm and cultivar development. Satisfactory-fail only.

Agron 529. Publishing in Plant Science Journals. (Cross-listed with Hort, NRREM). (2-0) Cr. 2. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data. Process of prepar ing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publish ing self-generated data from thesis or dissertation research.

Agron 530. Ecologically Based Pest Management Strategies. (Cross-listed with SusAg, Ent, PI Pl). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: SusAg 509. Durst. Biological, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

Agron 531. Crop Ecology and Management. (3-0) Cr. 3. F. Prereq: 501, 502, 503. Recommended: 512, 514. Ecological principles underlying crop production systems. Crop production in the context of manage ment approaches, system resources and constraints,
Agron 532. Soil Management. (3-0) Cr. 3. F. Prereq: Agron 501, 503, 512. Recommended 513. Evaluates the impact of various soil management practices on soil and water resources. Combines and applies basic information gained in Agron 502 and Agron 512. Emphasizes the Agromonic, economic, and environmental effects of soil management strategies. Required course for the Master of Science in Agronomy degree program.

Agron 533. Crop Protection. (3-0) Cr. 3. F. Prereq: Agron 514. Integrated management systems for important crop pests. Cultural, biological and chemical management strategies applicable to major crops grown in the Midwest. Required course for the Master of Science in Agronomy degree program.

Agron 534. Seed and Variety, Testing and Technology. (Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor. The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isozyme testing, and DNA marker testing. Procedures for evaluating varieties. The variances appropriate for fixed effects, data analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

Agron 535. Introduction to the Seed Industry. (Cross-listed with STB). Cr. 1. Prereq: Agron 354. Curriculum requires undergraduate specialization in a business or biological science. An analysis of the defining characteristics of the seed industry and introduction to the Master of Science in Technology and Business curriculum. The tasks of crop improvement and seed production will be analytically related to basic management functions and classifications of management activities that are used in the study of business administration. Management tasks and roles will be analyzed in relation to the public policy issues that shape the seed industry, including ethical and economical approaches to biotechnology, intellectual property, and corporate responsibility.

Agron 536. Quantitative Methods for Seed. (Cross-listed with STB). (1-0) Cr. 1. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. Quantitative Methods for Analyzing Agromonic and business information for the seed industry. Principles of experimental design and hypothesis testing, regression, correlation and graphical representation of data. Use of spreadsheets for manipulating, analyzing and presenting data.

Agron 539. Seed Conditioning and Storage. (Cross-listed with STB). (2-0) Cr. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as focal point within the overall operations of a seed company.

Agron 547. Seed Production. (Cross-listed with STB). (2-0) Cr. 2. Alt. F. offered 2010. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of instructor. Survey of the production requirements of crops for seed production. Emphasis on the role of horticulture and agriculture. Course includes a significant field component focused on an Iowa farm.

Agron 546. Organizational Strategies for Diversified Farming Systems. (Cross-listed with Soil, Hort, SusAg). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Sus-Ag 500. Examination of the organization and operation of complex, diversified farming systems using tools and perspectives drawn from ecology, Agromony, and Sociology. The course includes a significant field component focused on an Iowa farm.

Agron 551. Growth and Development of Perennial Grasses. (Cross-listed with Hort). (2-0) Cr. Alt. S., offered 2010. Prereq: Junior or senior or graduate classification or permission of instructor. The grass plant. Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.

Agron 552. GIS for Geoscientists. (Dual-listed with Geo). (4-2) Cr. 2. F. Prereq: Agron 100, Geo 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Use of ESRI's ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

Agron 556. Soil and Water Management. (Cross-listed with EnSci). (3-0) Cr. 3. Alt. S. offered 2010. Prereq: 164, 165, or 178; Math 140, Chem 211 or 231 recommend. Thomson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, chemical-equilibrium speciation programs, and applications to contemporary environmental issues.

Agron 561. Population and Quantitative Genetics for Breeding. (Cross-listed with An S). (4-0) Cr. F. Prereq: Agron 354 and Agron 355 or EnSci 260. Burras. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for only Agron 5631 or 5632 may be applied for graduation.

Agron 578. Laboratory Methods in Soil Physics. (Cross-listed with EnSci. (3-0) Cr. 1. S. Prereq. 577 concurrent). Horton. Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.

Agron 584. Organic Agricultural Theory and Practice. (Dual-listed with 484). (Cross-listed with Hort, SusAgl. (3-0) Cr. 3. Alt. S., offered 2010. Prereq. 9 cr in biological or physical sciences. Delate & DeWitt. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

Agron 590. Special Topics. Cr. arr. Repeatable. Prereq: 15 credits. Literature reviews and conferences on selected topics in crops, soils, or agricultural meteorology according to needs and interest of student.

Agron 591. Agronomic Systems Analysis. (3-0) Cr. 3. S. Prereq: 511, 513, 531, 532, 533. Analysis of cropping systems from a problem-solving perspective. Case studies to develop the students' ability to solve agronomic problems. Required course for the Master of Science in Agronomy degree program.

Agron 592. Current Issues in Agronomy. (3-0) Cr. 3. S. Prereq: 601, 503, 511, 512, 513, 514. Study and discussion of topics of current interest to the field of Agronomy. While Agron 591 deals with Agronomics at the farm and landscape level, Agron 592 seeks to address issues on a broader scale including off-farm agricultural impacts. Required course for the Master of Science in Agronomy degree program.

Agron 595. Seed Quality, Production, and Research Management. (Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. Advanced survey of the organization, staff capabilities and management characteristics typical in seed production and crop improvement in seed enterprises. Analysis of the use of quality information in the management of seed operations and sales. Process management applications for seed. Production planning for existing capacity. Analysis of the manager’s tasks in the annual cycle and how the tasks of these managers relate to the general categories of business management roles. Difference in management strategies used with different situations and function, gene isolation, expression, regulation, and modification. Integration of molecular and cellular methods in breeding strategies; analysis of alternative breeding methods, regulatory and ethical issues.

Entry into the program is not dependent on departmental major or year in the University. The AFROTC program is open to both male and female students.

The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credits must be in courses numbered 300 or above.

Courses primarily for undergraduate students:

AFAS 101. Leadership Laboratory I. (0-2) Cr. 1. F. Instructions on Air Force customs and courtesies; drill and ceremonies; issuing military commands, physical training, studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 102. Leadership Laboratory II. (0-2) Cr. 1. S. Continuation of AFAS 101. Air Force customs and courtesies; drill and ceremonies; issuing military commands, physical training, directing and evaluating the preceding skills, studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 141. Foundations of the United States Air Force. (1-0) Cr. 1. F. Basic introduction to the United States Air Force and Air Force Reserve Officer Training Corps. Mission and organization of the Air Force, officer professionalism, military customs and courtesies, Air Force officer opportunities, and communication skills. Leadership Laboratory is mandatory for AFROTC cadets complements this course by providing cadets with followership experiences.

AFAS 142. Foundations of the United States Air Force. (1-0) Cr. 1. S. A continuation of 141. Topics include Air Force installations, Air Force core values, leadership and team building, further study of interpersonal communication, the Oath of Office and Commissioning. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 151. Air Force Physical Training. (0-2) Cr. 1. Re-peatable. S. F. Prereq: Enrollment as a cadet in an Air Force Aerospace Studies Class. Use of basic military training skills and instruction to develop confidence, leadership, communication skills and physical fitness. The team approach is utilized in the instruction and application of Air Force physical fitness requirements. Students will learn various Air Force physical fitness techniques as well as how to conduct physical fitness sessions. Full participation in all events will be determined based on student’s physical and medical eligibility. Satisfactory-fail only.

AFAS 201. Leadership Laboratory I. (0-2) Cr. 1. F. Instruction for junior cadets on Air Force customs and courtesies, drill and ceremonies, issuing military commands, physical training, directing, and evaluating the preceding skills, the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Continued drill and training to improve the uniform, engaging in military customs and courtesies, and participating in military ceremonies. This laboratory is required if applying for the POC. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 202. Leadership Laboratory II. (0-2) Cr. 1. S. A continuation of AFAS 201, instructing junior cadets on Air Force customs and courtesies, drill and ceremonies, issuing military commands, instructing, physical training, directing, and evaluating the preceding skills, the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Continued military training related to wearing the proper uniform, drill and ceremonies and courtesies, and participating in military ceremonies. This laboratory is required if applying for the POC. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 241. The Evolution of USAF Air & Space Power I. (1-0) Cr. 1. F. Examines the general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the Korean War. Historical examples are provided to illustrate the development of Air Force capabilities (competencies), and missions (functions) to demonstrate the evolution of what has become today’s USAF air and space power. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 242. The Evolution of USAF Air & Space Power II. (1-0) Cr. 1. S. Examines the general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the Korean War. Historical examples are provided to illustrate the development of Air Force capabilities (competencies), and missions (functions) to demonstrate the evolution of what has become today’s USAF air and space power. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 301. Leadership Laboratory I. (0-3) Cr. 1. F. Mid-level management of leadership experiences involving the planning and controlling of the military activities of the AFROTC cadre corps, physical training, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This lab is required if taking AFAS 341 and pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 302. Leadership Laboratory II. (0-3) Cr. 1. S. Continuation of AFAS 301, mid-level management of leadership experiences involving the planning and controlling of the military activities of the AFROTC cadre corps, physical training, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This lab is required if pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 341. Air Force Leadership Studies I. (3-0) Cr. 3. F. Prereq: AFAS 141, 142, 241, and 242. Continuation of the study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and applying practical application of the concepts being studied. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 342. Air Force Leadership Studies II. (3-0) Cr. 3. S. Prereq: AFAS 341. A continuation of the study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and applying practical application of the concepts being studied. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.
Society. They analyze the tropes and techniques common to American Indian oral and written literatures; comparison/contrast of American Indian cultures to mainstream and other world cultures; and, articulation of the role American Indians are playing in approaches to modern social and environmental issues.

The courses in the American Indian Studies Program provide added background for students whose career interests may include multicultural education, human Services, legal services, or public administration.

Within the College of Liberal Arts and Sciences, courses in American Indian Studies can be used as electives, in a minor, or in an interdisciplinary studies major (for details, see Index, Interdisciplinary Studies). Students majoring in another college who wish to use these courses should consult with their advisers.

A minor in the College of Liberal Arts and Sciences must include at least 15 credits of courses in the field. A minor in American Indian Studies must include 210, two courses chosen from among the following: 310, 322, 332 and 346, and two additional courses chosen from the program courses listed below. The American Indian Studies Program Committee will, upon application by the student and review of the program, certify that the student has completed a minor in American Indian Studies.

Because course offerings vary from year to year, any student interested in a minor in American Indian Studies should contact the American Indian Studies office for advising. (See Index, LAS Cross-Disciplinary Programs.)

Courses primarily for undergraduate students

Am In 210. Introduction to American Indian Studies. (3-0) Cr. 3. F.S.S.S. Introduction to the multidisciplinary aspects of American Indian Studies. Topics include literature, the arts, history, anthropology, sociology, education, and contemporary Indian politics. Guest lectures, media presentations, and discussion of assigned readings.

Am In 240. Introduction to American Indian Literature. (Cross-listed with Engl.) (3-0) Cr. 3. F. Prereq: Engl 150. Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works.

Am In 310. Topics in American Indian Studies. (3-0) Cr. 3. Repeatable. F.S. Issues within specific topical areas of American Indian Society and culture, such as social work with Indian families, tribal government, and environmental policy.

Am In 315. Archaeology of North America. (Cross-listed with Anthr.) (3-0) Cr. 3. S. Prereq: Anthr 202 or 308. Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnographically known Native American groups.

Am In 322. Peoples and Cultures of Native North America. (Cross-listed with Anthr.) (3-0) Cr. 3. F.S.S. Prereq: Anthr 201 or Am In 210. Origin, distribution, and traditional life of native peoples of North America. Survey of culture areas; ecology and subsistence, language, kinship, life cycle, political, economic, and religious systems, impact of European contact.

Am In 323. Topics in Latin American Anthropology. (Cross-listed with Anthr.) (3-0) Cr. 3. Repeatable. Prereq: Anthr 201 or 306 recommended. Exploration of contemporary Latin American social dynamics within specific historical, political and economic contexts; discussion of current ethnographic approaches to studying key Sociocultural issues in Latin America. Topics vary each time offered. A. Violence and Memory B. Social movements and Democracy C. Race, Class and Gender D. Regional Focus

Am In 328. American Indian Religions. (Cross-listed with Relig.) (3-0) Cr. 3. An introduction to the beliefs and rituals of Native American religious traditions, with attention to cultural and historical contexts and implications. Nonmajor graduate credit.

Am In 342. American Indian Women Writers. (Cross-listed with W.S.) (3-0) Cr. Prereq: Engl 250. Literature of American Indian women writers which examines their social, political, and cultural roles in the United States. Exploration of American Indian women's literary, philosophical, and artistic works aimed at recovering elements of identity, redescribing stereotypes, resisting colonization, and constructing femininity. Nonmajor graduate credit.

Am In 346. American Indian Literature. (Cross-listed with Engl.) (3-0) Cr. 3. S. Prereq: Engl 250. Survey of literature by Native Americans from pre-Columbian tales and songs to contemporary novels and poetry. Nonmajor graduate credit.

Am In 420. Cultural Continuity and Change on the Prairie-Plains. (Cross-listed with Anthr.) (3-0) Prereq: F. Prereq: Anthr 315 or 322. Ecological adaptations, sociocultural changes, and continuities of traditions among Prairie and Plains Indian groups through time; impacts of Euro-American Society and technology on Indians of the Great Plains; perspectives from ecology, archaeology, ethnology, history, and contemporary literary sources.

Am In 426. Topics in Native American Architecture. (Cross-listed with Dsn S, Arch.) (3-0) Cr. Repeatable. F. Prereq: Junior classification. History, theory, and principles of Native American/Indian American architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 426 may be applied to degree program. Nonmajor graduate credit.

Am In 432. Current Issues in Native North America. (Cross-listed with Anthr.) (3-0) Cr. 3. S. Prereq: Anthr 201 or 306, 322 or Am In 210 recommended. Conditions and issues in contemporary Native American historical background of eighteenth and nineteenth century Indian-White relationships; examination of legal Status, the reservation system, treaty violations, Indian military, education and urbanization, self-determination, social and economic impact of resource development, and other current concerns.

Am In 490. Independent Study. Cr. arr. Repeatable. Prereq: 6 credits in American Indian Studies; permission of instructor. Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits in Am In 490 may be counted toward graduation.

Courses offered by other departments

Anthr 428. Topics in Archaeological Laboratory Methods and Techniques. See Anthropology.

Anthr 429. Archaeological Field School. See Anthropology.

C 1280C. Pre-Student Teaching Experience: Native American Tutoring. See Curriculum Instruction.

Hist 370. History of Iowa. See History.

Pol S 312. Minicourse in American Government and Politics. See Political Science. Acceptable only when offered as a course in American Indian tribal government and political theory.

earned at Iowa State University. A combined bachelor of science and master of science in animal science is also offered.

The department offers a minor in Animal Science. The minor requires: 101, 114, 214, 214L, one course from: 216, 223, 224, 225, 226, 229, 235, 270, two courses from: 319, 331, 352, 360. A total of 9 credits must be earned at Iowa State University in animal science coursework that meets a degree requirement for the B.S. degree in animal science. Students interested in the Animal Science minor should contact an Animal Science advisor.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in animal breeding and genetics; animal nutrition; meat physiology; and animal science. Minor work is offered in these areas to students taking major work in other departments.

A strong undergraduate program is required for students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate programs in animal science include supporting work in areas such as agronomy; anatomy; microbiology; biochemistry; chemistry; economics; food science and human nutrition; genetics; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas. Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, MCDB (molecular, cellular, and development biology), nutritional sciences, and toxicology (see Index).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

Courses primarily for undergraduate students

An S 101. Working with Animals. (1-3) Cr. 2. FS. A hands-on introduction to courses in skills for proper care and management of domestic animals. Husbandry skills including health observation, animal movement, identification, management procedures, and environmental assessment are covered.

An S 110. Orientation in Animal Science and ISU. Cr. R. FS. Orientation to the university and Department of Animal Science. Challenges and opportunities available to the professional animal agriculturalist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science.

An S 114. Survey of the Animal Industry. (2-0) Cr. 2. F.S.SS. Wildlife and domestic animals serve the basic needs of humans for food, shelter, protection, fuel, and emotional well-being. Terminology, basic structures of the industries surrounding the production, care, and marketing of domestic animals in the U.S.

An S 115. Horsemanship and Equitation. (0-4) Cr. 1. Repeatable. FS. An S 115 can be taken for a maximum of three times for credit. Satisfactory-fail only.

A. Beginner Hunt Seat Equitation.
B. Beginner Jumping. Prereq: 115C, or able to walk, trot, and canter.
C. Intermediate Hunt Seat Equitation. Prereq: 115A or able to walk, trot, and canter.
D. Intermediate Jumping. Prereq: 115C or jumped a course up to 18".
E. Beginner Western Horsemanship. F. Intermediate Western Horsemanship. Prereq: 115 E or able to walk, jog and lope.

An S 211. Issues Facing Animal Science. (0-2) Cr. 1. F.S. Prereq: 114, sophomore classification. Overview of the factors that determine ethical and scientifically based issues facing animal agriculture. Life skill development (including interactive skills, communication ability, organization, information gathering, and leadership skills) emphasized in the context of issues study. Satisfactory-fail only.

An S 214. Domestic Animal Physiology. (3-0) Cr. 3. F.S. Prereq: Biol 212, Chem 163 or 177 Introduction to anatomy and physiology of the neural, circulatory, respiratory, immune, endocrine, reproductive, and digestive systems of domestic animals.

An S 216. Equine Science. (2-2) Cr. 3. F.S. Prereq: 101 or 114, one course in biology. Introduction to contemporary concepts, and basic practices and decisions necessary when managing horses through stages of their lives.

An S 217. Equine Farm Practicum. (2-2) Cr. 2. F. S. Prereq: Student majoring in Animal Science, An S 115 or riding experience, An S 216 or concurrent. Intensified management of the equine farm. Provide students with experiential learning in all phases of horse production and management. Students assist with general farm management, preparing horses for sale, marketing techniques and web design.

An S 223. Poultry Science. (2-2) Cr. 3. F.S. Prereq: 101, 114. Introduction to principles, practices and decisions necessary when raising poultry through their production cycle.

An S 224. Companion Animal Science. (2-2) Cr. 3. S. Prereq: Course in biology. Introduction of students to contemporary concepts, and basic principles and decisions necessary when caring for the companion animal through different stages of its life.

An S 225. Swine Science. (2-2) Cr. 3. F.S. Prereq: 101, 114. Introduction to principles, practices and decisions necessary when raising swine through the vertically integrated production cycle.

An S 226. Beef Cattle Science. (2-2) Cr. 3. F.S. Prereq: 101, 114. Introduction to principles, practices and decisions necessary when raising beef cattle through the vertically integrated production cycle.

An S 229. Sheep Science. (2-2) Cr. 3. F.S. Prereq: 101, 114. Introduction to principles, practices and decisions necessary when raising sheep through the vertically integrated production cycle.

An S 305. Livestock Evaluation. (0-6) Cr. 3. F.S. Prereq: Junior classification; An S 270 recommended. Fall semester leads to 475A or D. Breeding animal and market animal evaluation of beef, swine and sheep using contemporary techniques and tools. Communication and decision-making skills are practiced in the context of making selection decisions.

An S 306. Equine Evaluation. (0-6) Cr. 3. S. Prereq: sophomore classification or permission of instructor. Detailed visual evaluation of conformation and performance of the equine athlete. Decision-making skills are practiced in the context of making selection choices. Development of written and oral communication skills as students defend their judgments. Industry trends will be addressed.

An S 316. Training the Horse. (0-6) Cr. 3. F. Prereq: 116, or ability to walk, trot and canter. Modifying the behavior of the horse for performance objectives through bitting, longeing, saddling, and riding.

An S 325. Biorenewable Systems. (Cross-listed with A E, Agron, BusAd, Econ, TSM). (3-0) Cr. 3. F.S. Prereq: Econ 101, Chem 165 or higher, Math 140 or higher. Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing.

An S 332. Laboratory Methods in Animal Reproduction. (0-4) Cr. 2. F.S. Prereq: Credit or enrollment in An S 331. Comparative reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and manipulate reproductive; principles of artificial insemination in farm animals; and selected laboratory exercises with written report.

An S 334. Embryo Transfer Laboratory. (0-3) Cr. 1. F. Prereq: Credit or concurrent enrollment in An S 333. An S 332 or DPWM 4146. Directed laboratory. Selected laboratory exercises related to embryo transfer such as synchronization of estrus, superovulation, detection of estrus, artificial insemination, embryo collection, embryo evaluation, microscopy, embryo cryopreservation, in vitro fertilization, and embryo sexing will be demonstrated and/or performed. Nonmajor graduate credit.

An S 345. Growth and Development of Domestic Animals. (3-0) Cr. 3. S. Prereq: An S 214; Biol 313 or Gen 320. Basic principles of animal growth and development covered at the tissue, cellular and molecular level. Emphasis placed on skeletal muscle, adipose, bone, and immune system growth and development. The effects of genetics, nutrition, and pharmaceuticals on growth.

An S 352. Genetic Improvement of Domestic Animals. (2-2) Cr. 3. F. Prereq: One course in genetics, Biol 211, course in genetics. Principles of qualitative and quantitative genetics applied to creating change in domestic animals. Impact of selection and mating schemes in achieving breeding program goals. Applications and impacts of biotechnological advancements in genetic manipulation. Nonmajor graduate credit.

An S 353. Animal Breeding Programs Design. (0-4) Cr. 2. S. Prereq: 352. Evaluation of alternate breeding programs and genetic improvement techniques in the context of case study. Experiential and cooperative learning techniques employed. Nonmajor graduate credit.

An S 360. Fresh Meats. (2-2) Cr. 3. S. Prereq: 270; a course in organic or biochemistry. Impact of muscle structure, composition, rigor mortis, inspection, fabrication, handling, packaging and cooking on the palatability, nutritional value, yields, market value, and safety of fresh meat. Nonmajor graduate credit.

An S 435. Applied Dairy Farm Evaluation. (2-2) Cr. 3. S. Prereq: An S 434; Econ 330. Evaluate nutrition, reproduction, milk quality, breeding, and related management practices of commercial dairy herds in a case study format and apply known study gained in the classroom to commercial dairy farm situations and develop skills in information gathering, decision making, problem solving, and interpersonal communications. Nonmajor graduate credit.

An S 460. Processed Meats. (Dual-listed with 560). (2-2) Cr. 3. S. Prereq: 270. Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausages products. Nonmajor graduate credit.

An S 475. Intercollegiate Judging Training and Competition. (4) Cr. 1. F. Prereq: Permission of instructor. Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation. A. Meat Animals

A. Beef Cattle

B. Dairying Cattle

C. Meats

E. Horses

F. Livestock Management Systems

An S 480. Animal Industry Leadership Fellows. Cr. 1. Repeatable. F.S. Prereq: A. An S 226; permission of instructor C. An S 226; permission of instructor. Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and co-operative experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Satisfactory-fail only. A. Beef

C. Pork

An S 489. Issues in Food Safety. (Cross-listed with FS HN, HRI, VDPAM). (1-0) Cr. 1. A. S. offered 2010. Prereq: Credit or enrollment in FS HN 101 or 272 or HRI 233; FS HN 419 or 420; FS HN 403. Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

An S 490. Independent Study. Cr. arr. Repeatable. F.S.S. Prereq: Permission of the instructor. Open to qualified undergraduate and graduate students. Study is species specific, and enrollment is limited. Satisfactory-fail only. A. Animal Science

B. Dairy Science

C. Meat Science

D. Companion Animal Science

E. Equine Science

G. Poultry Science

H. Honors

I. Entrepreneurship

An S 493. Workshop in Animal Science. Cr. arr. Repeatable. F.S. Prereq: Permission of instructor. Workshop in livestock production. Includes current concepts in breeding, nutrition, reproduction, meats, and technologies that impact the animal industry. Nonmajor graduate credit.

An S 495. Agricultural Travel Course Preparation. Cr. F. Prereq: Permission of instructor. Limited enrollment. Students enrolled in this course will also register for Agron 496 and intend to register in Agron 496 and An S 496 the following term. Topics will include the agricultural industries, climate, crops, culture, history, livestock, marketing, soils, and preparation for travel to locations to be visited. Information normally available 9 months before departure.

An S 496. Agricultural Travel Course. Cr. arr. Repeatable. F.S. Prereq: Permission of instructor, 30 college credits. Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

A. International tour

B. Domestic tour

An S 497. Undergraduate Teaching Experiences in Animal Science. Cr. arr. Repeatable. F.S.S. Prereq: Permission of instructor. Development of oral and written communication skills of technical concepts in animal science. Emphasis on organizational skills, conducting activities and interpersonal communication skills. Responsibilities in a class under direct supervision of a faculty member. A maximum of 4 credits of An S 497 may be applied toward graduation.

Courses primarily for graduate students, open to qualified undergraduate students

An S 500. Computer Techniques for Biological Research. (2-0) Cr. 1. F. Prereq: Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

A. (1st half of semester) UNIX and SAS

B. (2nd half of semester) Problem solving using matrix algebra
An S 501. Survey of Animal Disciplines. (1-0) Cr. 1. F. Required for Animal Science graduate students. Orientation to departmental and graduate school policies and procedures. Discussion of programs of research and outreach in Animal Science. Issues impacting the animal industry. Satisfactory-fail only.

An S 503. Seminar in Animal Production. (1-0) Cr. 1. Repeatable. F. Prereq: Permission of instructor. Discussion and evaluation of current topics in animal production and management.

An S 515. Integrated Crop and Livestock Production Systems. (Cross-listed with A E, Agron, SusAg). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: SusAg 509. Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

An S 536. Perinatology. (2-0) Cr. 2. S. Prereq: One course in physiology; one course in biochemistry. Regulation of metabolism and development in the mammalian fetus and neonate is explored in a comparative manner. Emphasis will be on the dynamic changes in these relationships occurring at birth.

An S 537. Topics in Farm Animal Environmental Physiology, Behavior, and Welfare. (3-0) Cr. 3. Repeatable. F.S. Prereq: permission of instructor; M.S. or Ph.D. student. Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.
   A. Animal rights and Philosophies
   B. Brain mechanisms of stress
   C. Measuring behavior and welfare
   D. Environmental stressors
   E. Stress and the immune system
   F. Other related topics

An S 549. Advanced Vertebrate Physiology I. (Cross-listed with B M S, Kinl. (3-0) Cr. 3. F. Prereq: Biol 335; credit or enrollment in BBMB 404 or 420. Neurophysiology, sensory systems, muscle, neuroendocrinology, endocrinology.

An S 552. Advanced Vertebrate Physiology II. (Cross-listed with B M S, Kinl, NutrS). (3-0) Cr. 3. S. Prereq: Biol 335; credit or enrollment in BBMB 404 or 420. Cardiovascular, renal, respiratory, and digestive physiology.

An S 552L. Advanced Vertebrate Physiology Laboratory. (Cross-listed with BMS). (3-0) Cr. 1. F. Prereq: credit or enrollment in B M S 552. Laboratory for cardiovascular, renal, respiratory, and digestive physiology.

An S 556. Current Topics in Genotype Analysis. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: BBMB 405 or GDBC 510. Introduction to principles and methodology of molecular methods for modifying and analyzing large genomes. Survey of Statistical methods and computer programs for biominformatics, linkage mapping, radiation hybrid mapping, and mapping quantitative trait loci.

An S 560. Processed Meats. (Dual-listed with 460). (2-2) Cr. 3. S. Prereq: 270. Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

An S 561. Population and Quantitative Genetics for Breeding. (Cross-listed with Aggen). (4-4) Cr. 4. F. Prereq: Stat 401. Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, the impact of inbreeding, heterosis, and genotype-by-environment interaction.

   A. Linear Models and Genetic Prediction
   B. Advanced Genetic Prediction and Paramater Estimation

   A. Linear Models and Genetic Prediction
   B. Advanced Genetic Prediction and Paramater Estimation

An S 566. Professional Practice in the Life Sciences. (Cross-listed with Pl P, Agron, BCB, Hort, Micro, V PMP). Cr. arr. Repeatable. F.S.S. Prereq: permission of instructor; M.S. or Ph.D. student. Strategies for handling large sets and for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Strategies for handling large sets and for design and evaluation of genetic improvement programs for livestock. Topic B. (2nd half semester) Best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.
   A. Linear Models and Genetic Prediction
   B. Advanced Genetic Prediction and Paramater Estimation

An S 570. Advanced Meat Science and Applied Muscle Biology. (2-2) Cr. 3. S. Prereq: 470. Ante and postmortem factors impacting composition, structure, and chemistry of red meat and poultry muscle/meat, the conversion of muscle to meat, and the sensory and nutritional attributes of fresh meats. Oral research reports and a research proposal.

An S 590. Special Topics. Cr. arr. Repeatable. F.S.S. Prereq: Permission of instructor. Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

Courses for graduate students

An S 619. Advanced Nutrition and Metabolism - Protein. (Cross-listed with NutrS). (2-0) Cr. 2. F. Prereq: BBMB 405. Digestion, absorption, and intermediary metabolism of amino acids and protein; Regulation of protein synthesis and degradation; Integration of cellular biochemistry and physiology of mammalian protein metabolism.

An S 652. Animal Breeding Strategies. (2-0) Cr. 2. Prereq: An S 561. Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection; Selection index theory, multiple trait selection, inbreeding, cross-breeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.
   A. Breeding Goals and Response to Selection (S.)
   B. Design and Evaluation of Animal Breeding Programs (Alt. S., offered 2011)

An S 653. Applied Animal Breeding Strategies. (2-0) Cr. 2. F. Prereq: An S 561 recommended. Industrial applications of breeding systems, selection methods, and genetic technologies. One or more field trips to an industry breeding company to define a class project.
   A. Swine and Poultry (Alt. F., offered 2010)
   B. Beef and Dairy (Alt. F., offered 2009)

An S 655. Advanced Computational Methods in Animal Breeding and Genetics. (3-1) Cr. 2. F. Prereq: An S 561, 565. Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) emphasis on using large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd
half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.
A. Computational Strategies for Predicting Breeding Values.
B. Computational Strategies for Genetic Parameter Estimation.

An S 658. Seminar in Animal Breeding and Genetics. (1-0) Cr. 1. Repeatable. F. Presentation of current research related to animal breeding and genetics.

An S 684. Seminar in Meat Science. (1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor. Discussion and evaluation of current topics in research publications in meat science.

An S 685. Seminar in Muscle Biology. (1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor. Reports and discussion of recent literature and current investigations.

An S 695. Seminar in Animal Science. (1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor. Discussion and discussion of current issues and research in animal science. One credit is required for all M.S. degree candidates with graduate majors in the Department of Animal Science, and two credits are required for all Ph.D. candidates with graduate majors in the Department of Animal Science. Satisfactory-fail only.

Anthropology

R. Paul Lasley, Chair of Department
Professors: Lasley, Whiteford
Professors (Emeritus): Bower, Butler, Gradwohl, Huang
Associate Professors: Coiman, Iliiane, Pruetz
Associate Professors (Emeritus): Wolff
Assistant Professors: Arndt, Dusselier, Hill, Moutatsos, Viatori
Lecturers: Folinsbee, Johnsen

Undergraduate Study
An undergraduate major in Anthropology can Serve as the nucleus for a general liberal education, or as the prerequisite for graduate training qualifying a person for positions in (1) college and university teaching, (2) research, and (3) administrative and applied positions in government, development organizations, museums, and private businesses or corporations.

Anthropology graduates develop a well-rounded professional education in four fields of anthropology: cultural anthropology, linguistic anthropology, archaeology, and biological anthropology. They learn what it means to be human through the study of culture and social relations, human biology and evolution, languages, music, art, architecture, and through the study of past human communities. Graduates learn the important historical and contemporary issues of our subdisciplines, and they learn what it means to be a “modern” Anthropologist and a citizen in an international and global community. Graduates develop an appreciation of the value of cultural diversity at the local, national and international level. They acquire a particular holistic vision that requires using expertise to methods in order for a deeper understanding of cultural contexts, both past and present. Undergraduate students may obtain experience in archaeological, ethnological and biological research.

Anthropology majors may choose either a bachelor of arts or a bachelor of science degree, both of which require 33 credits in anthropology. A bachelor of arts degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Groups I, II, and/or IV. A bachelor of science degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Group III.

Undergraduate students with majors in anthropology are required to take the following anthropological core courses: 306, 307, 308, 309 and 450. One course in statistics is required.

Undergraduates majoring in anthropology are required to have a minor or a second major. A minor usually consists of 15 credits minimum. A minor in anthropology consists of at least 15 credits and must include 306 and 307 or 308, and at least 3 other credits in courses numbered 300 or above.

Communication Proficiency requirement: The department requires that a student earn a grade of a or better in Engg 250 and either English 302 or 309 or 314.

The principal subdisciplines of anthropology are represented by the following:
3. Linguistic Anthropology: 309, 451D, 490D.

Graduate Study
The department offers work for the degree master of arts with a major in anthropology. Graduate courses are offered in the areas of biological anthropology, archaeology, cultural anthropology, linguistic anthropology, history and theory, and methodology. Competence in one foreign language and in statistics must be demonstrated. A thesis, generally based on original fieldwork, is required.

Courses primarily for undergraduate students
Anthrop 201. Introduction to Cultural Anthropology. (3-0) Cr. 3. F,S,S. Comparative study of culture as a key to understanding human behaviors in different Societies. Using a global, cross-cultural perspective, patterns of family life, economic and political activities, religious beliefs, and the ways in which cultures change are examined.
Anth 322. Peoples and Cultures of Native North America. (Dual-listed with 522). (Cross-listed with Am Ind). (3-0) Cr. 3. F.S. Prereq: 201 or Am In 210. Origins, distribution, and traditional life of native peoples of North America. Survey of culture areas; ecology and subsistence, language, kinship, life cycle, political, economic, and religious systems; impact of European contact.

Anth 323. Topics in Latin American Anthropology. (Dual-listed with 523). (Cross-listed with Am Ind). (3-0) Cr. 3. Repeatable. S. Prereq: Anthr 201 or 306 recommended. Exploration of contemporary Latin American social dynamics within specific historical, political and economic contexts; discussion of current ethnographic approaches to studying key Sociocultural issues in Latin America. Topics vary each time offered. A. Violence and Memory B. Social movements and Democracy C. Race, Class and Gender D. Regional Focus

Anth 325. Peoples and Cultures of Africa. (Dual-listed with 525). (Cross-listed with Af Am). (3-0) Cr. 3. S. Prereq: 201 or 306 recommended. Origins and distribution of peoples of Africa; geographical characteristics as related to culture types, including early civilizations; a comparative examination of economic, subsistence, language, social and political organization, and religious systems throughout the continent; change processes, the impact of colonialism, and the nature of contemporary African societies.

Anth 335. Peoples and Cultures of the Middle East. (Dual-listed with 535). (3-0) Cr. 3. F. Prereq: 201 or 306 recommended. Anthropological approaches to the study of Middle East cultures. Survey of major culture areas, discussion of economic, political, and social and religious issues and systems. Examination of contemporary social movements.

Anth 337. Andean Archaeology. (Dual-listed with 537). (3-0) Cr. 3. F. Prereq: 202 or 321 recommended. Survey of the prehistoric cultures of Peru, Bolivia and Ecuador; the archaeology of the Incas and their ancestors. Emphasis on prehistoric economic, religious, and political organization, the rich material culture recovered through archaeological records; and the use of ethnographic texts and modern ethnographies to reconstruct the prehistory of Andean Societies.

Anth 340. Magic, Witchcraft, and Religion. (Dual-listed with 540). (Cross-listed with Relig). (3-0) Cr. 3. S. Prereq: 201 or 306. Origin and development of indigenous magico-religious systems; myth and ritual; therapeutic aspects; symbols and meanings; religion and Sociocultural change, including acculturation, nativistic, and revitalization movements.

Anth 350. Primate Behavior. (Dual-listed with 550). (2-2) Cr. 3. F.S.S. Prereq: Anthr 202 and/or basic biology course recommended. An introduction to the Order Primates with a focus on their behavior. Biological and social adaptations of monkeys, apes, and prosimians; basic evolutionary concepts, current trends and theories in the field of Primatology and issues related to primate conservation.

Anth 411. Culture Change and Applied Anthropology. (Dual-listed with 511). (3-0) Cr. 3. F. Prereq: 201 or 306. Theoretical and practical considerations of human cultural development. Examination of theories of cultural change, culture contact and acculturation. Dynamics of directed change in contemporary world cultures. Principles, theories, and ethics of international development projects from a sociocultural perspective.

Anth 412. Psychological Anthropology. (Dual-listed with 512). (3-0) Cr. 3. F. Prereq: 201 or 306. Relationship of cultural, social and personality factors in human behavior. Cross-cultural comparisons of child rearing practices, cognitive development, mental health, deviancy, ethno-psychiatry, altered states of consciousness, and psychological dimensions of culture change.

Anth 414. Southwestern Archaeology. (Dual-listed with 514). (3-0) Cr. 3. F. Prereq: 308 or 315 or 321. Prehistoric archaeology of the American Southwest, including the Paleo-Indian and Anasazi periods; the adoption of agriculture; the emergence of pueblo Societies; relationships with contemporary Southwest cultures.

Anth 418. Global Culture, Consumption and Modernity. (Dual-listed with 518). (3-0) Cr. 3. F. Prereq: Anthr 201 or 306 recommended. Cross-cultural study of the impact of globalization, with an emphasis on the importance of culture and consumption in the movement of goods, ideas, and peoples across cultural and national boundaries.

Anth 420. Cultural Continuity and Change in the Prairie-Plains. (Dual-listed with 520). (Cross-listed with Am Ind). (3-0) Cr. 3. F. Prereq: 315 or 322. Ecological adaptations, sociocultural changes, and continuities of traditions among Prairie and Plains Indians through time; impacts of Euro-American Society and technology on Indians of the Great Plains; perspectives from ecology, archaeology, ethnology, history, and contemporary literary sources.

Anth 424. Forensic Anthropology. (Dual-listed with 524). (2-2) Cr. 3. S. Prereq: 319. Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, cremated, burned and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, ethnology, archaeology, pathobiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

Anth 427I. Archaeology. (Cross-listed with La LL). Cr. 4. SS. Nature of cultural and environmental evidence in archaeology and how they are used to model past human behavior and land use; emphasis on intra- and interregional scale; basic reconnaissance surveying and excavation techniques. Nonmajor graduate credit.

Anth 428. Topics in Archaeological Laboratory Methods and Techniques. (Dual-listed with 528). (2-2) Cr. 3. Repeatable. S. Prereq: 308. Laboratory processing, analysis, and interpretation of archaeo logical materials such as lichens, ceramics, and faunal remains. Laboratory sessions emphasize analytical techniques including classification, data acquisition and organization, and computer applications A. Lichens B. Ceramics C. Faunal remains D. General.

Anth 429. Archaeological Field School. (Dual-listed with 529). Cr. arr. SS. Prereq: 202 or 308. Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

Anth 431. Ethnographic Field School. (Dual-listed with 531). Cr. SS. 4 or 6 weeks. Summer field school for training in ethnographic field methods; students will carry out research projects in social anthropology, learning a variety of investigative research techniques commonly used in social sciences.

Anth 432. Current Issues in Native North America. (Dual-listed with 532). (Cross-listed with Am Ind). (3-0) Cr. 3. S. Prereq: 201 or 306; 322 or Am In 210 recommended. Conditions and issues of contemporary Native Americans; historical background of eighteenth and nineteenth century Indian-White relationships; evaluation of federal status; the reservation system, treaty violations, Indian military, education and urbanization, self-determination, social impact of resource development, and other current concerns.

Anth 434. Internship. Cr. arr. Repeatable. F.S.S.S. Prereq: Junior or senior standing. Supervised practice in government agencies, museums, and business organizations. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy anthropology core courses for majors or for the anthropology minor. Satisfactory-fail only.

Anth 435. Development Anthropology. (Dual-listed with 538). (3-0) Cr. 3. S. Prereq: Anthr 201 or 306. Historical and theoretical basis of the practices of development, applied and economic anthropology. Covers a wide range of topics such as the role of aid, institutions of development, indigenous knowledge, rural development projects, organization of production, migration, health and environment.

Anth 438. Primate Evolutionary Ecology and Behavior. (Dual-listed with 538). Cr. 3. S. Prereq: 201 or 307. Primate behavior and ecology in evolutionary perspective: biological and social adaptations of primates to their environments. Introduction to the Order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primatology, including applied conservation biology.

Anth 439. Medical Anthropology. (Dual-listed with 539). Cr. 3. S. Prereq: 201 or 302 or 306. Study of human health in cultural and environmental context; comparison of health and disease patterns of western and non-western populations; healing systems; use of epidemiological models in understanding illness and disease etiologies across culturally; interrelationship between diet and culture.

Anth 444. Sex and Gender in Cross-cultural Perspective. (Dual-listed with 544). (Cross-listed with W S IS). (3-0) Cr. 3. S. Prereq: Anthr 201; Anthr 306 recommended. Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western Societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.

Anth 450. Historical and Theoretical Approaches in Anthropology. (3-0) Cr. 3. S. Prereq: 306. Survey of the historical foundations of anthropology and its interrelated four sub-fields; key figures in 19th and 20th century anthropology with a focus on major theoretical contributions.

Anth 451. Practicum in Anthropology. Cr. arr. Repeatable. F.S.S.S. Prereq: 201 or 202 or 308. Application of methods used in actual laboratory and field conditions, including basic data management, synthesis, and analysis. A. Archaeology B. Cultural Anthropology C. Biological Anthropology D. Linguistic Anthropology

Anth 482. Topics in Biological Anthropology. (Dual-listed with 582). (3-0) Cr. 3. Repeatable. F. Prereq: Anthr 307 In-depth study of current topics in biological Anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of apes or the modern human species, and the dynamic field of population genetics as it relates to the Order Primates. A. Paleoanthropology B. Primate Cognition C. Population Conservation D. Population Genetics and Human Evolution

Anth 490. Independent Study. Cr. arr. Repeatable. Prereq: 9 credits in anthropology. No more than 9 credits of Anthr 490 may be counted toward graduation. A. Archaeology B. Cultural Anthropology C. Biological Anthropology D. Linguistic Anthropology (Same as Ling 490D)
of the impact of globalization, with an emphasis on economic consumption and the movement of goods, ideas, and peoples across cultural and national boundaries.

Anthr 519. Skeletal Biology. (Dual-listed with 319). (2-2) Cr. 3. F. Prereq: 307 or college level biology recommended. Comprehensive study of the skeletal anatomy, genetics, growth, development and population variation of the human Skeleton. Applications to forensic anthropology, paleopathology, and bioarchaeology are introduced.

Anthr 520. Cultural Continuity and Change in the Prairie-Plains. (Dual-listed with 420). (3-0) Cr. 3. F. Prereq: 315 or 322. Ecological adaptations, sociocultural changes, and continuities of traditions among Prairie and Plains Indian groups through time; impacts of Euro-American Society and technology on Indians of the Great Plains; perspectives from ecology, archaeology, ethnology, history, and contemporary literary sources.

Anthr 521. World Prehistory. (Dual-listed with 321). (3-0) Cr. 3. S. Prereq: 202 recommended. An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South American prehistory. Includes an interpretation of material cultural remains in reconstructing past societies.

Anthr 522. Peoples and Cultures of Native North America. (Dual-listed with 322). (3-0) Cr. 3. F. Prereq: 201 or Am In 210 recommended. An introduction to Native American traditions and lifeways. Focus on the cultural and physical remains of North America including the prehistory of the American Midwest and Plains.

Anthr 523. Topics in Latin American Anthropology. (Dual-listed with 323). (3-0) Cr. 3. Repeatable. S. Prereq: 6 credits in anthropology or 306 recommended. Exploration of Latin American social dynamics within specific historical, political and economic contexts; discussion of current ethnographic approaches to studying key sociocultural issues in Latin America. Topics vary each time offered. A. Violence and Memory B. Social Movements and Democracy C. Race, Class and Gender D. Regional Focus

Anthr 524. Forensic Anthropology. (Dual-listed with 424). (3-0) Cr. 3. S. Prereq: 319. Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, commingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to analyzing human variation, taphonomy, entomology archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

Anthr 525. Peoples and Cultures of Africa. (Dual-listed with 325). (3-0) Cr. 3. S. Prereq: 201 or 306 recommended. Origins and distribution of peoples of Africa; geographical characteristics as related to culture types, including early civilizations; a comparative examination of social, subsistence, language, social and political organization, and religious systems throughout the continent; change processes, the impact of colonialism, and the nature of contemporary African Societies.

Anthr 528. Topics in Archaeological Laboratory Methods and Techniques. (Dual-listed with 428). (2-2) Cr. 3. Prereq: 308. Laboratory approaches to data processing, analysis, and interpretation of archaeological materials such as lithics, ceramics, and faunal remains. Laboratory sessions emphasize analytical techniques including classification, data acquisition organization, and computer applications A. Lithics B. Ceramics C. Faunal remains D. General.

Anthr 529. Archaeological Field School. (Dual-listed with 429). Cr. 3. Prereq: 202 or 308. Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

Anthr 530. Ethnographic Field Methods. Cr. 3. F. Prereq: 6 credits in anthropology, permission of instructor. Field training in current ethnographic field methods. Problems emphasizing field studies in the contemporary Societies of the world. Focus on techniques of data gathering and analysis.

Anthr 531. Ethnographic Field School. (Dual-listed with 431). Cr. 3. 4 or 6 weeks. Summer field school for training in ethnographic field methods; students will carry out research projects in social anthropology, learning a variety of investigative research techniques commonly used in social sciences.

Anthr 532. Current Issues in Native North America. (Dual-listed with 432). (3-0) Cr. S. Prereq: 6 credits in anthropology. 201 or 306; 322 or Am In 210 recommended. Conditions and issues of contemporary Native Americans; historical background of eighteenth and nineteenth century Indian-White relationships; examination of legal Status, the reservation system, treaty violations, Indian agency, reservation policy, urbanization, self-determination, social impact of resource development, and other current concerns.

Anthr 535. Peoples and Cultures of the Middle East. (Dual-listed with 335). (3-0) Cr. S. Prereq: 201 or 306 recommended. Anthropological approaches to the study of Middle East cultures. Survey of major cultural areas. Discussion of economic, political, and social and religious issues and systems. Examination of contemporary social movements.

Anthr 536. Development Anthropology. (Dual-listed with 436). (3-0) Cr. S. Prereq: Anthr 201 or 306. Historical and theoretical basis of the practiced of development; applied economic and political anthropology. Covers a wide range of topics such as the role of aid, institutions of development, indigenous knowledge, rural development projects, organization of production, migration, health and environment.

Anthr 537. Andean Archaeology. (Dual-listed with 337). (3-0) Cr. S. Prereq: 202 or 321 recommended. Survey of prehistoric Andean cultures of Peru, Bolivia and Ecuador; the archaeology of the Incas and their ancestors. Emphasis on prehistoric economics, religious, and political organization, the rich material culture recovered through archaeological records, and the use of ethnohistoric texts and modern ethnographies to reconstruct the prehistory of Andean societies.

Anthr 538. Primate Evolutionary Ecology and Behavior. (Dual-listed with 438). (3-0) Cr. S. Prereq: Anthr 201 or 306. Primate behavior and ecology in evolutionary perspective; biological and social adaptations of primates, monkeys, and apes. Introduction to the Order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primatology, including applied conservation biology.

Anthr 539. Medical Anthropology. (Dual-listed with 439). (3-0) Cr. S. Prereq: 6 credits in anthropology. 201 or 202 or 306 recommended. Study of human health in cultural and environmental context; comparison of health and disease patterns of western and non-western populations; healing systems; use of epidemiological models in understanding illness and disease etiologies cross-culturally; interrelationship between diet and culture.

Anthr 540. Magic, Witchcraft, and Religion. (Dual-listed with 340). (3-0) Cr. S. Prereq: 6 credits in anthropology. 201 or 306 recommended. Origin and development of indigenous magical-occult systems; myth and ritual; therapeutic aspects; symbols and meanings; religion and Socio-cultural change, including acculturation, nativistic, and revitalization movements.
Anth 544. Sex and Gender in Cross-cultural Perspective. (Dual-listed with 444). (Cross-listed with W S). (3-0) Cr. 3. S. Prereq: 201, 306 recommended. Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western Societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.

Anth 545. Biological Field School. (Dual-listed with 445). Cr. arr. SS. Prereq: Anth 202 or Biol 101 and permission of instructor. Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology.

Anth 550. Primate Behavior. (Dual-listed with 350). (2-2) Cr. 3. S.F.S.S. Prereq: Anth 202 and/or basic biology course recommended. An introduction to the Order Primates with a focus on their behavior. Biological and social adaptations of monkeys, apes, and prosimians; basic evolutionary concepts, current trends and theories in the field of Primatology and issues related to primate conservation.

Anth 555. Seminar in Archaeology. (3-0) Cr. 3. S. Prereq: 308 or 429. Examination of the history of Anthropological archaeology and current issues and debates concerning methods, theories and the ethics of modern archaeology.

Anth 582. Topics in Biological Anthropology. (Dual-listed with 482). (3-0) Cr. 3. Repeatable. F. Prereq: Anth 307 In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates. A. Paleoanthropology B. Primate Cognition C. Population Conservation D. Population Genetics and Human Evolution

Anth 590. Graduate Independent Study. (Dual-listed with la LL, A Ec, EEOB). Cr. arr. Repeatable. SS. Prereq. Graduate classification and permission of instructor. I. Iowa Lakeside Laboratory (Same as la LL 590)

Anth 591. Orientation to Anthropology. (1-0) Cr. 1. F. Prereq: Admission to the Anthropology Graduate Program. Introduction to the Anthropology program, including the requirements for successful degree completion, administrative procedures, ethics in anthropology and current trends in the four subfields of anthropology. Required of graduate students. Satisfactory-fail only.

Courses for graduate students

Anth 610. Foundations of Sustainable Agriculture. (Cross-listed with Agron, SusAg, Soc, A E). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging systems of agriculture in terms of core concepts of sustainability and their theoretical contexts.

Anth 699. Research. Cr. arr. Repeatable. I. Iowa Lakeside Laboratory (Same as la LL 699.)

Apparel, Educational Studies, and Hospitality Management

www.aeshm.hs.iastate.edu/

Robert Bosselman, Chair of Department

Distinguished Professors (Emeritus): Fanslow, Moyer, Winakor

University Professors (Emeritus): Farrell-Beck

Professors (Emeritus): Anderson, Beavers, Brun, Burnet, Cowan, Crabtree, Gilmore, Smith, Stone, Williams

Associate Professors: Baltzer, Hausafus, Niehm, Parsons

Associate Professors (Emeritus): Amos, Brackelsberg, Brown, Ebert, Huss, Kundel, Kunz, Walsh

Associate Professors (Adjunct): Strobbehn

Assistant Professors: Barker, Hurst, Karpova, Keino, Y. Lee, Marchetti, Rajagopal, Wohldorf-Arendt, Zheng

Assistant Professors (Adjunct): Glock

Instructors (Adjunct): Fratzie

Lecturers: Ackerman, Burger, Christensen, Fihri, Fitzpatrick, Kramer, M. Lee, Sanger, Trost, Wirth, Wise

AESHM 379. Community Leadership: Examination of social issues. (3-0) Cr. 3. F. Study of family and community social issues from diverse perspectives. Application of critical thinking and reflection to issues with a focus on leadership within the community.

AESHM 421. Developing Global Leadership: Maximizing Human Potential. (3-0) Cr. 3. S. Development of leadership in a global context. Focus on the contributions of women in enhancing the well-being of others. Strategies for working with individuals, families and communities in other countries and cultures. Taking social action on global issues. Student participation in cultural activities.

AESHM 424. International Study Abroad Seminar. Cr. arr. Repeatable. F.S.S. Orientation to study abroad program considering topics related to country and location; travel arrangements and preparation for study abroad; on-site fieldwork and academic experiences in an international setting.

AESHM 471. Public Relations and Event Management II. (2-2) Cr. arr. Repeatable. S. Prereq: Permission of instructor. Advanced application of public relations and event management in the apparel and hospitality industries. Provide leadership and communicate direction for production of an event including developing budgets, publicity, advertising, fund raising, choreography, staging, lighting, and food. Course must be taken for 3 credits first time, can be repeated for 1 credit.

AESHM 474. Entrepreneurship in Human Sciences. (Dual-listed with 574). (3-0) Cr. 3. S. Prereq: junior or senior Status. Entrepreneurship concepts of innovation, creativity, opportunity assessment, business planning. Focus on human Sciences-related businesses: retail, service, hospitality, family, home-based, rural, women and minority-owned businesses. Project applications include market research, feasibility analysis, and new business proposals.

AESHM 477. Multi-channel Retailing. (3-0) Cr. 3. F. Prereq: 3 credits in marketing or AESHM 275 or 287 Strategies used by retailers to market products through store formats, e-commerce, catalog, TV, mobile, direct sales. Emphasis on integration of e-commerce with other channels.

Courses primarily for graduate students, open to qualified undergraduate students

AESHM 545. Consumer Aesthetics and Retail Branding. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: One course in design elements and principles, psychology, consumer behavior, or marketing. Examination of hedonic nature of consumer experience and its application to experiential design and branding of retail/hospitality establishments. Emphasis on consumer behavior, design, environmental psychology, and marketing literature.

AESHM 547. Entrepreneurship in Human Sciences. (Dual-listed with 478). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: One course in marketing or permission of instructor. Entrepreneurship concepts of innovation, creativity, opportunity assessment, business planning. Focus on human Sciences-related businesses: retail, service, hospitality, family, home-based, rural, women and minority-owned businesses. Project applications include market research, feasibility analysis, and business proposals.

AESHM 577. E-Commerce for Apparel and Hospitality Companies. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Course in marketing or permission of instructor. Technology and consumer trends, industry practices, and marketing strategies for e-commerce. Evaluation and development of apparel or hospitality environments. Influence of individual differences and cultural patterns on aesthetic preferences.
The department highly recommends purchase or use of a laptop/notebook computer and appropriate software. See the Undergraduate Academic Advising Handbook in the departmental office or the departmental web pages for hardware and software specifications.

For a more complete undergraduate program description, see College of Design, Curricula.

Graduate Study
The Department of Architecture offers professional, post-professional and research-oriented degrees for graduate students. The M.Arch. I and M. Arch. II emphasize the relationship between professional education and research. The M.S.A.S. is for students with non-professional degrees who want to pursue graduate-level research on the built environment. All the programs encourage interdisciplinary work within the College of Design and across related fields within the university.

Objectives:
The graduate program assumes the following: the built environment is an active agent in a global ecosystem and the setting for most forms of cultural exchange; the built environment can make positive and negative contributions to the vitality of local and global communities; understanding the dynamics of social production, material consumption and culture is a prerequisite to meaningful architectural design. For the most part, the built environment is designed by people who do not consider the consequences of their actions broadly. Therefore, our program demands engagement with contemporary issues and a commitment to lifelong learning. We encourage students to examine the relationships between local, regional and global contexts with a particular emphasis on the dynamics of the contemporary American Midwest. The domain of the architect’s action is limited, but the range of information needed to make intelligent and responsible design decisions is vast. We expect our graduates to value the necessity of research, interdisciplinary collaboration and teamwork.

The M.Arch. I is an accredited first professional degree in architecture. Students with an undergraduate degree other than architecture enroll in a 100-credit, seven semester program. The curriculum starts with an intensive three-semesters course sequence equal emphasis on architectural design, science and technology, and social and historical seminars on the built environment. The remaining four semesters have an open structure that allows students to explore architecture within an interdisciplinary context. These four semesters include a series of thematic and option studios, as well as various elective offerings. Students with a B.A. or B.S. in architecture or other affiliated design fields are considered for advanced standing based on a review of their academic record.

The M.Arch. II is a 30-credit post-professional degree in architecture for students with a B.Arch. or equivalent professional degree in architecture. The program is not subject to NAAB accreditation. The M.Arch. II program offers designers with a professional degree an opportunity to pursue advanced research in design. The program of study is expected to explore architectural design within interdisciplinary fields and requires completion of a thesis project. As a precondition for acceptance, applicants are required to submit a statement of purpose that defines the research they want to pursue in architectural design. Upon admission, students partner with a faculty member to select courses from across the university to determine their program of study. A minimum of two semesters should be devoted to the program; due to teaching assistantship and research needs, students often take longer to finish. The M.S.A.S. is a 30-credit interdisciplinary research degree in architectural studies. This degree is for students with bachelor degrees in various fields and interests in graduate-level research on the built environment. The M.S.A.S program is not subject to NAAB accreditation and is not intended, on its own, to lead to a career as a licensed architect. The program of study is expected to explore architecture within interdisciplinary fields and requires completion of a thesis project. As a precondition for acceptance, applicants are required to submit a thesis proposal. Upon admission, students partner with a faculty member to serve as a thesis adviser and to determine their program of study. A minimum of two semesters should be devoted to the program; due to teaching assistantship and research needs, students often take longer to finish. Areas of specialization include, but are not limited to: accessibility, architectural education, architectural history, building technology, energy and sustainability, environmental and social change, globalization and the built environment, historic preservation, housing, light and sound, politics and architecture and professional ethics.

Double-degree programs are currently offered with the Department of Community and Regional Planning (M.Arch./M.C.R.P) and the College of Business (M.Arch./M.B.A.).

Financial support in the form of teaching and research assistantships is available. Contact the department office for specific curricula.

Courses primarily for undergraduate students

Arch 102. Pre-Architecture Design. (1-8) Cr. 4. F.S. Three-dimensional design and drawing, with emphasis on creative conceptualization, exploration of materials, and analytical thinking. Includes study of architectural precedents and exercises to develop ability to communicate about form and space.

Arch 132. Two-Dimensional Studio. (0-4) Cr. 2. F.S. Prereq: Enrollment in the preprofessional program. Introduction to free-hand drawing concepts and practices. Exploration of the sketch as a means of inquiry, conceptualization and representation of form and space. Exercises focus on acquiring proficiency in the perceptual and experiential aspects of drawing. Various media, subjects and environmental contexts.

Arch 182. An Introduction to Architecture. (3-0) Cr. 3. S. Prereq: Open to non-majors. Through the study of architects, buildings, and theories, an introduction to the discipline of architecture, presenting architectural process and architectural works as culturally grounded events and artefacts.

Arch 201. Architectural Design I. (1-15) Cr. 6. F. Prereq: Completion of the preprofessional program and admission into the professional program. Introduction to architectural design. Introduction to architectural design, including precedent research, drawing conventions, model making, and diagramming. Studio projects focus on investigating the impact of specific site conditions on design, threshold conditions, and small-scale domestic space. Students will learn skills in problem solving, visualization, and written, oral, and graphic communication. Field trips to relevant architectural sites.

Arch 202. Architectural Design II. (1-15) Cr. 6. S. Prereq: 201; Math 142; Phys 117. Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban Spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in...
Arch 221. History of Western Architecture I. (Cross-listed with Dun S). (3-0) Cr. 3. F. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Ancient through Renaissance.

Arch 222. History of Western Architecture II. (Cross-listed with Dun S). (3-0) Cr. 3. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Renaissance to present.

Arch 230. Design Communications I. (2-2) Cr. 3. F. Prereq: Admission to the professional program. Investigations of various design media—including computer graphics and freehand drawing—and their applications to design, specifically to the course work in 201. Exercises to develop manual skill and perceptual sensitivity.

Arch 240. Materials and Assemblies I. (3-0) Cr. 3. F. Prereq: Completion of the preprofessional program and admission into the professional program. Introduction to common architectural materials, their physical properties, and integration into light construction subsystems. Model building codes, gravitational and climatic forces, and simplified methods of analysis for the preliminary design of building systems.

Arch 242. Architectural Structures I. (3-1) Cr. 3. S. Prereq: Math 142; Phys 111. Structural performance and design of residential scale wood frame members and systems; principles of equilibrium and material behavior.

Arch 271. Human Behavior and Environmental Theory. (3-0) Cr. 3. F. Prereq: Completion of the preprofessional program and admission into the professional program. Exploration of the theories that describe social structure and order and the manner in which individuals and societies organize themselves and structure their environment.

Arch 301. Architectural Design III. (1-15) Cr. 6. F. Prereq: 202. Consideration of landscape as a constructed, cultural artifact. Projects address the perceptual aspects and strategies of situation and location; examination of environmental phenomena and patterns of use and settlement as revealed and affected by the architectural artifact. Development of a critical design process is stressed.

Arch 302. Architectural Design IV. (1-15) Cr. 6. S. Prereq: 301. Exploration of the theoretical and practical components of design. Emphasis on the analytical rules of thumb and the hands-on design process. Emphasis on the design development of specific typologies. Projects are developed in support of a coherent design concept.

Arch 344. Architectural Structures II. (3-0) Cr. 3. F. Prereq: 242. Structural performance and preliminary design of low to medium rise steel frame members and systems, long span steel systems, and masonry walls and systems. Principles of equilibrium and material behavior.

Arch 346. Architectural Structures III. (3-0) Cr. 3. S. Prereq: 344. Structural performance and preliminary design of low- to medium-rise reinforced concrete and prestressed concrete members and systems. Wind and seismic lateral forces and the principles of equilibrium and material behavior.

Arch 357. Environmental Forces in Architecture. (3-0) Cr. 3. S. Prereq: Completion of the preprofessional program and admission into the professional program; Math 142; Phys 111. Introduction to environmental forces that describe the function of buildings in terms of human comfort and patterns of occupancy. Emphasis on analytical rules of thumb and calculation methods that contribute to design synthesis. A design process is developed utilizing building climatology, control of thermal, luminous, and acoustic environments.

Arch 402. Architectural Design VI. (1-15) Cr. 6. S. Prereq: 401 and minimum 2.0 GPA in previous studio courses. An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option.

Arch 403. Architectural Design VII. (1-15) Cr. 6. F. Prereq: 402. Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation are encouraged. Dun S 544/546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

Arch 404. Architectural Design VIII. (1-15) Cr. 6. S. Prereq: 403. Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation are encouraged. Dun S 544/546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

Arch 420. Topics in American Architecture. (3-0) Cr. 3. Repeatable. F. S. Prereq: Junior classification. History, theory, and principles of American architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 420 may be applied to degree program. Nonmajor graduate credit.

Arch 424. Topics in Nineteenth Century Architecture. (3-0) Cr. 3. Repeatable. F. Prereq: Junior classification. History, theory, and principles of nineteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 424 may be applied to degree program. Nonmajor graduate credit.

Arch 425. Topics in Twentieth Century Architecture. (3-0) Cr. 3. Repeatable. F.S. Prereq: Junior classification. History, theory, and principles of twentieth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 425 may be applied to degree program. Nonmajor graduate credit.

Arch 426. Topics in Native American Architecture. (Cross-listed with Am In, Dsn S). (3-0) Cr. 3. Repeatable. F. S. Prereq: Junior classification. History, theory, and principles of Native American/American Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 426 may be applied to degree program. Nonmajor graduate credit.

Arch 427. History, Theory, and Criticism of Chinese Architecture. (Dual-listed with 527). (3-0) Cr. 3. F. Prereq: Junior classification. Survey of the history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relation to art, landscape design, and urban structure. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. Nonmajor graduate credit.

Arch 433. File to Fabrication. (3-0) Cr. 3. Repeatable. F. S. Prereq: 230, 301. Exploration of the computer as a design and manufacturing tool. Emphasis on fabrication techniques and rapid prototyping including laser-cutting, 3-D printing and CNC routing.

Arch 448. Materials and Assemblies II. (3-0) Cr. 3. S. Prereq: 348. Investigation of the materials and integrated systems used in complex construction assemblies. Emphasis on determination and utilization of appropriate forms of material assemblies and structural systems for large scale construction.

Arch 458. Environmental Control Systems. (3-0) Cr. 3. F. Prereq: 357. Overview of architectural environmental control systems and their response to occupancy comfort, patterns of use, health, and safety regulations. Emphasis on the analytical rules of thumb and calculation methods necessary to provide integrated
design synthesis of technical systems within architecture. Understanding the use and design of mechanical, electrical, plumbing, fire safety, transportation, and conveying systems and subsystems.

Arch 482. Professional Practice. (Dual-listed with 582). (3-0) Cr. 3. F. Prereq: 202. Emphasis on the circumstances and opportunities of the professional practice of architecture, professional process, organization, business, and evolving models of practice.

A. Design Communications
B. Design
C. Technical Systems.
D. Architectural History
E. Behavioral Studies
F. Practice
H. Honors

Courses primarily for graduate students, open to qualified undergraduate students

Arch 505. Architectural Design I. (0-10) Cr. 5. F. Prereq: Admission to the MArch program. Concurrent enrollment in 506; 541. An introduction to comprehensive architectural design projects (individual and collaborative) with coordinated studies in design media, history, theory, culture, science, and technology. Projects establish a framework for designing buildings as aspects of dynamic circumstances such as environmental forces, construction methods, economic and political regulations, social relationships, and cultural values. Course content and assignments coordinated with 506 and 596.

Arch 506. Architectural Design II. (0-10) Cr. 5. S. Prereq: 505; 583; 541. Coreq: 596; 542. Continuation of 505. More challenging comprehensive architectural design projects (individual and collaborative) with coordinated studies in design media, history, theory, culture, science and technology. Projects establish a framework for designing buildings as aspects of dynamic circumstances such as environmental forces, construction methods, economic and political regulations, social relationships, and cultural values.

Arch 507. Architectural Design and Media III. (0-10) Cr. 5. S. Prereq: 506; 596; 542. Coreq: Arch 542. Design projects that examine the relationship between architectural concepts and the reality of built form. Emphasis is placed on the multi-faceted role of the architectural detail in the design process. Assignments involve the study of contemporary and historic construction documentation, research into architectural materials and the use of representational media appropriate to the varying purposes of the design. Projects also demand engagement with the cultural and technological issues explored in previous and concurrent courses.

Arch 510. Practical Experience. Cr. R. Repeatable. F.S.S. Prereq: Graduate standing and permission of department DOGE. Students must register for this course prior to completing each period. Available only to students taking course loads of 8 credits or less.

Arch 519. Middle Eastern Cities. (3-0) Cr. 3. F. Prereq: Graduate or senior standing. Middle Eastern cities introduce a particular continuity between history and contemporary life where in some cases the latter is about re-defining the former. Introduction to basic academic writings on Middle Eastern cities in addition to current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Arch 528. Topical Studies in Architecture. (Cross-listed with Den S). (3-0) Cr. arr. Repeatable. F.S.S. Prereq: Arch 221, 222 or senior classification or graduate standing.
A. Studies in Architecture and Culture
B. Technology
C. Communications
D. Design
E. Practice

Arch 529. Spatial Diacritics in the American Midwest. (3-0) Cr. 3. S. Prereq: Graduate or senior standing. The American Midwest has experienced a rapid and dramatic transformation during the last two centuries which impacted its physical, environmental, economic and social characteristics. This course is an interdisciplinary study of the evolution and sustainability of Midwestern space relationships to forces of flow shaped by the mobility of bodies, products, meanings, and symbols that are enforced, incorporated, reproduced or destroyed.

Arch 535. Advanced Three-Dimensional Studio. (0-5) Cr. 2. Repeatable. F.S. Prereq: 335 or graduate standing. Advanced investigation of sculptural expression with emphasis on individual projects.

Arch 541. Science and Technology for Architects I. (4-2) Cr. 5. F. Prereq: 505; 596. First of a four-course series in building science and technologies. Introduction to Human Factors, Descriptive Geometry, Basic Building Materials, and Small-Scale Building Envelope. Theory and case studies stressing the connectivity of technical issues to broader formal, social, and cultural spheres. Course content and assignments coordinated with 505 and 596.

Arch 542. Science and Technology for Architects II. (4-2) Cr. 5. S. Prereq: 505; 541; 596. Second of a four-course series in building science and technologies. Elementary Statics and Beam Theory, Basic Construction Materials, and Site and Building Circulation. Theory and case studies stressing the connectivity of technical issues to broader formal, social, and cultural spheres. Course content and assignments coordinated with 506 and 596.

Arch 558. Sustainability and Green Architecture. (Cross-listed with Den S). (3-0) Cr. 3. F. Prereq: Graduate standing. Issues of Sustainability as related to living patterns and city design, population, pollution and availability of natural resources. Taught in parallel with Arch 1 program. Coreq: 505. First of a four-course series in building science and technologies. Introduction to Human Factors, Descriptive Geometry, Basic Building Materials, and Small-Scale Building Envelope. Theory and case studies stressing the connectivity of technical issues to broader formal, social, and cultural spheres.

Arch 567. Preservation, Restoration, and Rehabilitation. (Cross-listed with Den S). (3-0) Cr. 3. S. Prereq: Senior classification. Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Arch 571. Design for All People. (Cross-listed with Den S). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Issues of Sustainability as related to living patterns and city design, population, pollution and availability of natural resources. Taught in parallel with Arch 1 program. Coreq: 505. First of a four-course series in building science and technologies. Introduction to Human Factors, Descriptive Geometry, Basic Building Materials, and Small-Scale Building Envelope. Theory and case studies stressing the connectivity of technical issues to broader formal, social, and cultural spheres.

Arch 575. Contemporary Urban Design Theory. (Cross-listed with Den S). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Arch 576. Study Abroad Options. (3-0) Cr. 3. Repeatable. SS. Special topics in environmental design, architectural history and contemporary practice. Travel to relevant countries. General cultural and historical studies, topical projects and individual inquiry. Courses may be taught by departmental faculty. Course may be taken as part of approved Iowa State Study Abroad programs. See current offerings for detailed syllabus.

Arch 581. Service Learning. (1-12) Cr. SS. Prereq: 506, 596; 542. Planning and construction of a full-scale project serving a community need. Learning occurs through both theory and active involvement in construction work. Projects connect previous coursework to practical applications and community involvement.

Arch 582. Professional Practice. (Dual-listed with 482). (3-0) Cr. 3. F. Prereq: Graduate standing. Emphasis on the circumstances and opportunities of the professional practice of architecture; practice as profession, process, organization, business, and evolving models of practice.

Arch 583. Research in Practice. (3-0) Cr. 3. S. Prereq: Senior or graduate standing. Foundational course in the methods and conceptual tools of design research in the context of practice. Through team and individual guided projects, students explore how theoretical and pedagogical practices represent knowledge in design-related communications and contexts. Alternative models of practice, client groups and communities are addressed within projects that probe, engage, feed, follow, and overlap with architectural contracts.

Arch 590. Special Topics. Cr. arr. Repeatable. F.S.S. Prereq: Written approval of instructor and department chair on approved form. Investigation of architectural issues having a specialized nature.

Arch 595. Seminar on the Built Environment I: History. (5-0) Cr. 5. F. Prereq: Admission to the MArch I program. Coreq: 505. Introduction to architectural history and its role in shaping the contemporary practice of architecture. Students learn skills in critical thinking, visual analysis, and research methods. Course sessions develop thematically with interdisciplinary readings, group discussions, student presentations, and research projects. Course content and assignments coordinated with 505 and 541.

Arch 596. Seminar on the Built Environment II: Landscape and Society. (5-0) Cr. 5. S. Prereq: 505; 541; 595. Introduction to landscape as artifact and multi-disciplinary knowledge-base for design thinking. Literatures and methods of environmental psychology, cultural geography, landscape and architectural history and theory, site and circulation design as intersection of built infrastructural, natural, and social systems. Emphasis on sensory perception, and human movement; investigations of climate, environmental conditions, and values toward consumption and sustainability in everyday experience of the built environment. Course content and assignments coordinated with 506 and 542.

Arch 597. Seminar on the Built Environment III: Topical Study. (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Multidisciplinary overview of contemporary theories concerned with the production of the built environment. Particular attention to urbanism as a discourse that relates social interactions and power structures to the minimal space. Coursework includes readings, seminar discussion and a research paper.

Arch 598. Seminar in the Built Environment IV: Topical Study. (3-0) Cr. 3. S. Prereq: Senior or graduate standing. A research seminar that takes an in-depth look at a topic within contemporary discourses on architecture and urbanism. The topic will be considered from multiple points of view including its historical, theoretical, behavioral and cultural aspects.
Courses for graduate students

Arch 601. Architecture and Landscape Design. (0-12) Cr. 6. F. Prereq: 507; 542; Coreq: 643. Design projects that explore the relationships among architecture, cultural landscapes, and biological issues. Emphasis on regional sites and Socio-economic conditions. Projects stress engagement with local circumstances and stakeholders, and the application of interdisciplinary research, new materials and systems. Course content and assignments coordinated with 643.

Arch 602. Design Studio Options. (0-12) Cr. 6. Repeatable. S. Prereq: 601. Design studio electives include, but are not limited to: independent and interdisciplinary projects, study abroad, and design-build. DNS S 449/546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

Arch 603. Comprehensive Design. (0-12) Cr. 6. F. Prereq: 601. Rigorous examination of architecture's relationship with culture and technology. Studio projects stress the interpretation of contextual and historical considerations, as well as structural, environmental, mechanical, electrical and plumbing systems, in a comprehensive design proposal. This course fulfills the Graduate College Creative Component Requirement.

Arch 644. Science and Technology for Architects IV. (2-2) Cr. 3. S. Prereq: 643 or graduate standing. Fourth of a four-course series in building science and technologies. Building Enclosures, Interior Construction and Sensory Qualities, Fabrication and Construction. Theory and case studies stressing the connectivity of technical issues to broader formal, social and cultural spheres. Summative Student Project.

Arch 690. Independent Design Study. (1-15) Cr. 6. Repeatable. F.S.S. Prereq: Admission to MSAS or M Arch 30 credit program. Independent architectural design projects commensurate with student interests requiring approval of Architecture Graduate Advisory Committee.

Arch 698. Graduate Seminar. Cr. R. Repeatable. F.S. Prereq: Graduate standing. Special topics and guest speakers.

Art and Design

Roger Baer, Chair of Department

Distinguished Professors (Emeritus): Heggen, Miller

Professors: Baer, Herrnstadt, Lilligren

Professors (Emeritus): Allen, Bro, Dake, Evans, Fowlies, Held, Pickett, Singer, Smith, Sontag, Steiglitz, Tartakov

Associate Professors: Akkurt, Caldwell, Chidister, Croyle, Cunnally, Crum, Fontaine, Gibbs, Gould, Jones, Kang, Katz, Malven, Martin, Mickelson, Muench, Paschke, Richards, Satterfield, Stout, Walton, Warme

Associate Professors (Emeritus): Bruene, Lehner, Mclrath, Polster, Sage, Sreenivasam

Associate Professors (Adjunct): Demartino, Potkranz

Associate Professor (Collaborator): Sandor

Assistant Professors: Brunner, Bruski, Call, Campbell, Eisman, Faber, Godbole, Golec, Holland, Iasevoli, Sobiech-Munson, Song

Assistant Professor (Collaborator); Schneider

Senior Lecturers: Boehner, Harris, Mikovec, Pappenheimer, Ure

Lecturers: Biechler, Morgan

Undergraduate Study

The department offers the degree Bachelor of Fine Arts (B.F.A.) in three curricular areas: Graphic Design, Integrated Studio Arts, and Interior Design. The department also offers the degree Bachelor of Arts (B.A.) in Art and Design. Each of these curricula affords excellent preparation for a variety of career opportunities or as a foundation for graduate study.

B.F.A. Graphic Design. Emphasis is on creative problem solving, design process, and the visual organization of communication media. Graphic design graduates effectively integrate abstract thinking; skills; communication design theory, history, and methodology; and technology. Components of visual communication including typography, symbolism, and image creation are integrated with an understanding of professional practice.

B.F.A. Integrated Studio Arts. Students select from a variety of studio options in order to build a portfolio and prepare for a professional practice in the visual arts. This concentration emphasizes aesthetics, visual problem solving, critical thinking, and skill development in a variety of media employing contemporary, historical, and cultural theory and practices.

B.F.A. Interior Design. Emphasis is on the student’s application of design processes to creatively solve problems of the interior environment based on knowledge of human Safety, functional utility, physical, psychological, and contextual fit. Graduates in interior design are competent in visual communication (sketching, drafting and computer aided design), design problem solving, space planning, lighting and color specification for interiors, finish and furniture selection, detailing interior construction and application of human factors. The curriculum is accredited by the Foundation for Interior Design Education Research (FIDER) as providing professional level education. Students entering the Graphic Design, Interior Design, or Integrated Studio Arts programs involving computer aided design or animation are strongly encouraged to purchase or lease of a laptop or desktop computer and appropriate software. Contact the department or see the College of Design web site for hardware and software specification.

B.A. Art and Design. This curriculum offers two concentrations: Art and Culture, and Visual Cultural Studies. Art and Culture has a greater emphasis on studio components, and Visual Cultural Studies on humanities and liberal arts components.

Both concentrations are combined with an applied career minor or approved program.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors. The department offers no minor but participates in the undergraduate minor in design studies.
design, a studio concentration, a history courses, courses in design methods, and the completion of a capstone course in environmental graphic design.

Graduate students selecting the M.A. in environmental graphic design will focus on a first professional degree. Applicants without a degree in background in environmental graphic design may be required to complete up to 15 additional credits of coursework.

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the master of fine arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a slide or digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student’s undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students’ progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Art and Design, College of Design, Iowa State University, Ames, Iowa 50011-3092.

Art (Art)

Courses primarily for undergraduate students

Art 110. Orientation to Artand Design. Cr. R. F.S. Overview of the department and university with special emphasis on curricula, program planning, and study skills. Advising, policy and procedures, student services.

Art 130. Drawing I. (1-6) Cr. 3. F.S.S. The introductory course in drawing, focusing on the fundamentals of drawing from observation. Subject matter may include working from the still life, architectural settings, landscape and the human figure. Line, shape, perspective and value studies are explored through a variety of drawing media.

Art 230. Drawing II. (0-6) Cr. 3. F.S. Prereq. Art 108 or Dan S 102, 183, and 131. A continuation of Dsn S 131 (Design Representation). Further development of perceptual drawing skills from a variety of subject matter. Continued practice with drawing materials and techniques with emphasis on tonal and color media.

Art 292. Introduction to Visual Culture Studies. (Cross-listed with Dan S). (3-0) Cr. 3. F.S. Prereq: Open to all majors. An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related issues of diversity.

Art 494. Art and Design in Europe Seminar. (1-0) Cr. 1. Prereq. Permission of instructor and planned enrollment in 494. Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Satisfactory-fail only.

A. Fine Arts
G. Graphic Design
I. Interior Design
N. Art History

Art 495. Art and Design in Europe. (Dual-listed with 595) Cr. 3. F.S.S. Prereq. 494, permission of instructor. International study abroad program in Western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Travel and tour expenses to be paid by the student.

A. Fine Arts
G. Graphic Design
I. Interior Design
N. Art History

Art 496. Art and Design Field Study. Cr. R. Repeatable. Prereq. Enrollment in an art and design studio or art history course, permission of instructor. Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art and design. Satisfactory-fail only.

Art 501. Issues in Visual and Material Culture Seminar. (3-0) Cr. 3. Prereq. Permission of instructor. Issues and debates that pertain to the study of visual objects and material artifacts in their cultural context. Examination of the role of visual and material culture studies as both relate to allied disciplines including, but not limited to: anthropology, art history, design history, design studies, and new media studies.

Art 595. Art and Design in Europe. (Dual-listed with 495) Cr. 3. Prereq. Graduate classification, 494 or equivalent, permission of instructor. International study abroad program in Western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Tour and travel expenses to be paid by the student.

A. Fine Arts
G. Graphic Design
I. Interior Design
N. Art History

Art 598. Museum/Gallery Internship. Cr. arr. Repeatable. F.S.S. Prereq. Graduate classification and permission of instructor. Written approval in advance of semester of enrollment. Supervised experience with a cooperating museum or gallery or art center. Satisfactory-fail only.

Courses for graduate students

Art 697. Studio Internship. Cr. arr. F.S.S. Prereq. Graduate classification and approval of POS committee. Supervised off-campus learning experience with a prominent artist, designer, or firm.

B. Thesis-exhibition museum or gallery or art center. Satisfactory-fail only.

Art Education (ArtEd)

Courses primarily for undergraduate students

ArtEd 211. Introduction to Art Education. (0-6) Cr. 3. F.S. Design experiences for the K-12 classroom. Hands-on discipline-specific and integrated art activities; emphasis on creativity and thinking skills.

Graphic Design (ArtGr)

Courses primarily for undergraduate students

ArtGr 270. Graphic Design Studio I. (0-6) Cr. 3. F. Prereq. Dan S 102 and Dan S 131, enrollment in 278; admission to the graphic design program through department review. Basic design concepts and color principles used for visual communication.

ArtGr 275. GraphicTechnology I. (0-4) Cr. 2. F. Prereq. enrollment in 270. Basic computer skills for graphic design.

ArtGr 276. GraphicTechnology II. (1-2) Cr. 2. S. Prereq. 275, enrollment in 271. Color management, color theory and applications skills for graphic design.

ArtGr 370. Graphic Design Studio III. (0-6) Cr. 3. F. Prereq. 271, 278, enrollment in a 2-credit option; credit or enrollment in 387. Creation and design of images and symbols for communication. Application and integration of typography with images and symbols.

ArtGr 371. Graphic Design Studio IV. (0-6) Cr. 3. S. Prereq. 370, 397, enrollment in a 2-credit option. Development and preparation of design concepts for application to the printing and electronic publishing process. Creative problem-solving skills, introduction to systems design.

ArtGr 372. Graphic Design Materials and Processes. (2-0) Cr. 2. S. Prereq. Credit or enrollment in 370. Lecture about the processes and materials involved in graphic design arts reproduction. Course covers press, paper selection and specification, ink systems, type systems and fonts, output technology, printing presses and bindery operations.

ArtGr 379. Graphic Design Internship Seminar. (1-0) Cr. 1. F. Prereq: Credit or enrollment in 370 or 371. Professional goals, preparation of resume and plans for internship. Study and tours of areas of interest within the graphic design profession.

ArtGr 378. Critical Issues in Graphic Design. (2-0) Cr. 2. Prereq. Credit or enrollment in 370. Lecture, discussion and writing about the critical issues facing the communications field today and in the future.

ArtGr 387. Graphic Design History/Theory/ Criticism I. (Dual-listed with 587) (3-0) Cr. 3. F. Prereq. Art H 280, 281, Dan S 183. Late nineteenth century to the 1990s. This course will explore the cultural, social,
Art and Design

2009-2011

political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics. Nonmajor graduate credit.

ArtGr 391. Graphic Design Field Study. (0-1) Cr. 1. Repeatable. Prereq: Enrollment in 300 or 400 level graphic design studio course. Travel, study, and tours of areas of interest within the graphic design profession such as print production companies, design studios, and museums. Satisfactory-fail only.

ArtGr 470. Graphic Design Studio V. (0-6) Cr. 3. F. Prereq: 371, enrollment in a 2-credit option. Advanced design systems as applied to corporate identity and environmental graphic design. Symbolism as an integrated component of communication systems.

ArtGr 472. Photographic Art Direction. (Dual-listed with 572). (0-6) Cr. 3. F. Prereq: 471, 482, enrollment in 370 or 470, or 471. Photography as a graphic design component. Compositional and conceptual elements in photographic images. Must have a camera with adjustable shutter speeds and lens openings.

ArtGr 473. Time Based Multi-Media. (Dual-listed with 573). (0-6) Cr. 3. F. Prereq: Enrollment in 370 or 470, or 472. The design of visual, aural and written communication for electronic media.

ArtGr 474. Exhibition Design. (Dual-listed with 574). (0-6) Cr. 3. S. Prereq: Enrollment in 370 or 470 or 472. Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ArtGr 475. Advanced Typography. (Dual-listed with 575). (0-6) Cr. 3. S. Prereq: Enrollment in 370 or 371 or 470 or 482. Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ArtGr 476. Graphic Design Methodology. (Dual-listed with 576). (0-6) Cr. 3. S. Prereq: Enrollment in 370 or 470 or 482. Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-solving techniques.

ArtGr 477. Graphic Design Practicum. (0-6) Cr. 3. S. Prereq: Enrollment in 370 or 371 or 470 or 482, portfolio review and permission of instructor. Graphic design outreach and problem solving. Individual and group projects for nonprofit clients selected by the instructor.

ArtGr 478. Web Design for E-Commerce/Graphic Applications. (Dual-listed with 578). (0-6) Cr. 3. S. Prereq: Enrollment in 370 or 371 or 470 or 482. The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ArtGr 479. Wayfinding Design. (Dual-listed with 579). (0-6) Cr. 3. F. Prereq: Enrollment in 370 or 371 or 470 or 482. Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ArtGr 480. Graphic Design Internship. (3-0) Cr. 3. SS. Prereq: 377, 12 credits in graphic design; permission of instructor, registration in advance of enrollment. Graphic design experience in an off-campus professional environment.

ArtGr 481. Graphic Design Professional Practices. (3-0) Cr. 3. S. Prereq: Credit or enrollment in 470. Professional design management: ethics, setting up a new business, client/designer relationships, contractual options, billing practices, and effective operating procedures.

ArtGr 482. Professional Presentation. (0-6) Cr. 3. F. Prereq: 470, enrollment in a 2-credit option. Exploration and development of the graphic design portfolio and resume in electronic, print, and photographic form.

ArtGr 484. Selected Studies in Graphic Design. (Dual-listed with 584). Cr. arr. Repeatable. Prereq: Permission of instructor. Issues related to graphic design topics. Topics vary each time offered.

ArtGr 490. Independent Study. Cr. arr. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed related graphic design coursework appropriate to planned independent study. Cr. on a graded basis or a satisfactory-fail basis.

A. Theory, Criticism, and Methodology
B. Two-Dimensional Design
C. Three-Dimensional Design
H. Honors
I. Internship/Cooperative (in-depth experience other than ArtGr 480)

ArtGr 491. Publication Design: Magazines. (Dual-listed with 591). (0-6) Cr. 3. F. Prereq: Credit or enrollment in 370. The Philosophy, concepts and structures of magazine design.

ArtGr 492. Publication Design: Books. (Dual-listed with 592). (0-6) Cr. 3. S. Prereq: Credit or enrollment in 370 or 371. The Philosophy, concepts and structures of book design.

Courses primarily for graduate students, open to qualified undergraduate students

ArtGr 570. Advanced Studies in Visual Communication. (0-6) Cr. 3. F. Prereq: Graduate classification in College of Design. Theory and investigation of systems, structures, principles of visual organization, and typography for communication. Studio problems will be influenced by social, cultural, environmental, or technological factors.

ArtGr 571. Signs, Symbols, Images. (0-6) Cr. 3. S. Prereq: Graduate Classification in College of Design. Investigation and application of signs, symbols and semiotic theory for communication. Studio problems influenced by social, cultural, environmental, or technological factors.

ArtGr 572. Photographic Art Direction. (Dual-listed with 472). (0-6) Cr. 3. F. Prereq: Graduate enrollment in College of Design. Photography as a graphic design component. Compositional and conceptual elements in photographic images. Must have a camera with adjustable shutter speeds and lens openings.

ArtGr 573. Time Based Multi-Media. (Dual-listed with 473). (0-6) Cr. 3. F. Prereq: Graduate enrollment in College of Design. Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ArtGr 574. Exhibition Design. (Dual-listed with 474). (0-6) Cr. 3. F. Prereq: Graduate enrollment in College of Design. Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ArtGr 575. Advanced Typography. (Dual-listed with 475). (0-6) Cr. 3. F. Prereq: Graduate classification in College of Design. Typographic theory exploring traditional and non-traditional forms.

ArtGr 576. Graphic Design Methodology. (Dual-listed with 476). (0-6) Cr. 3. F. Prereq: Graduate enrollment in College of Design. Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ArtGr 578. Design for E-Commerce/Graphic Applications. (Dual-listed with 478). (0-6) Cr. 3. F. Prereq: Graduate enrollment in College of Design. The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ArtGr 579. Wayfinding Design. (Dual-listed with 479). (0-6) Cr. 3. F. Prereq: Graduate enrollment in College of Design. Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ArtGr 584. Selected Studies in Graphic Design. (Dual-listed with 484). Cr. arr. Repeatable. Prereq: Graduate classification in the College of Design. Special issues related to graphic design. Topics vary each time offered.

ArtGr 582. Graphic Design History/Theory/ Criticism I. (Dual-listed with 387). (3-0) Cr. 3. F. Prereq: Graduate classification. Late nineteenth century to the 1990’s, this course will explore the cultural, political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics.

ArtGr 588. Graphic Design History/Theory/ Criticism II. (Dual-listed with 388). (3-0) Cr. 3. S. Prereq: Graduate classification. Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice.

ArtGr 590. Special Topics. Cr. arr. Prereq: Bachelor’s degree in graphic design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment.

A. Theory, Criticism, and Methodology
B. Two-Dimensional Design
C. Three-Dimensional Design

ArtGr 591. Publication Design: Magazines. (Dual-listed with 491). (0-6) Cr. 3. F. Prereq: Graduate enrollment in College of Design. The Philosophy, concepts and structures of magazine design.

ArtGr 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students

ArtGr 672. Graphic Design and Human Interaction. (0-6) Cr. 3. S. Prereq: 570, 571, and graduate enrollment in College of Design or permission of instructor. The theory and investigation of experience design as it applies to human interactions in contemporary society and culture. Studio problems may involve such areas as: exhibition design, electronic interface design, wayfinding, package design, and publication design.

A) Usability. The exploration and design of interface/interaction with products, systems, and technologies
B) Design for Behavioral Change. The exploration and design of educational experiences and artifacts as they relate to the social, emotional, and behavioral aspects of society.
C) Consumer Experience Design and Branding. The exploration and design of identity systems and consumer brand experiences...
Art H 181. Origins and Evolution of Modern Design. (Cross-listed with Dsn S). (3-0) Cr. 3. S. History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

Art H 280. History of Art I. (Cross-listed with Dsn S). (3-0) Cr. 3. F. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. H. Honors. Cr. 4.

Art H 281. History of Art II. (Cross-listed with Dsn S). (3-0) Cr. 3. S. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. H. Honors. Cr. 4.

Art H 378. Papes and Caesars: 2000 Years of Art History in Rome. (3-0) Cr. 3. S. Prereq: Permission of instructor. Survey of Italian art and architecture from the Etruscans to Bernini, including lectures and tours of museums and historical sites. Study abroad course taught in Rome, with travel to other Italian cities. Tour and travel expenses to be paid by student.

Art H 382. Art and Architecture of Asia. (Dual-listed with 582). (Cross-listed with Dsn S). (3-0) Cr. 3. Introduction to the history of art and architecture in China, Korea, and Japan before the modern era. Visual materials selected based on important themes that are critical in understanding Asian culture and art tradition. Museum field trip expenses to be paid by students. Nonmajor graduate credit.

Art H 383. Greek and Roman Art. (Dual-listed with 583). (Cross-listed with Dsn S, Cl St). (3-0) Cr. 3. Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

Art H 384. Art of Islam. (3-0) Cr. 3. Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world.

Art H 385. Renaissance Art. (Dual-listed with 585). (Cross-listed with Dsn S, Cl St). (3-0) Cr. 3. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries. Nonmajor graduate credit.

Art H 394. Women/Gender in Art. (Dual-listed with 594). (Cross-listed with Dsn S). (3-0) Cr. 3. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture. Nonmajor graduate credit.

Art H 489. Sequential Art. (Dual-listed with 589). (Cross-listed with Dsn S). Cr. 3. An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present. Nonmajor graduate credit.

Art H 490. Independent Study. Cr. arr. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Study abroad courses appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis. H. Honors

Art H 495. Modern and Contemporary Art and Theory II. (Dual-listed with 595). (Cross-listed with Dsn S). (3-0) Cr. 3. Visual arts and critical theory from Abstract Expressionism to the present. Nonmajor graduate credit.

Art H 496. History of Photography. (Cross-listed with 596). (Cross-listed with Dsn S). (3-0) Cr. 3. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an Art Historical perspective, emphasizing causative factors, cultural influences, and major masters and schools. Nonmajor graduate credit.

Art H 498. Selected Topics in Art History. (Dual-listed with 598). (Cross-listed with Dsn S). (3-0) Cr. 3. Repeatable. Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Courses primarily for graduate students, open to qualified undergraduate students

Art H 581. Art and Architecture of India. (Dual-listed with 481). (Cross-listed with Dsn S). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor: Survey of Indian-style art and architecture through history. Examine the architecture developed in the Indian subcontinent to a modern society. Nonmajor graduate credit.

Art H 582. Art and Architecture of Asia. (Dual-listed with 382). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Survey of Indian-style art and architecture through history. Examine the architecture developed in the Indian subcontinent to a modern society. Nonmajor graduate credit.

Art H 583. Greek and Roman Art. (Dual-listed with 383). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

Art H 585. Renaissance Art. (Dual-listed with 385). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

Art H 587. Nineteenth Century Art. (Dual-listed with 487). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

Art H 589. Nineteenth Century Art and Theory I. (Dual-listed with 488). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

Art H 590. Special Topics. Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment.

Art H 594. Women/Gender in Art. (Dual-listed with 394). (Cross-listed with Dsn S, W S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

Art H 595. Modern and Contemporary Art and Theory II. (Dual-listed with 495). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Visual arts and critical theory from Abstract Expressionism to the present.

Art H 596. History of Photography. (Dual-listed with 496). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Study of the evolution and photojournalism from the 1830s to the present, seen from an Art Historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

Art H 598. Selected Topics in Art History. (Dual-listed with 498). (Cross-listed with Dsn S). (3-0) Cr. 3. Repeatable. Prereq: Graduate classification, permission of instructor. Specialized study in the history or criticism of art and/or design.

Interior Design (ArtID)

Courses primarily for graduate students

ArtID 250. Fundamentals of Interior Design. (2-0) Cr. 2. F. The profession, issues, and role of interior design.

ArtID 251. Human Factors in Interior Design. (2-0) Cr. 2. S. Overview of issues related to health and safety, ergonomics, Anthropometry, Perception, psycho-behavioral response, physiology, physical ability and universal design. Emphasis on application of human factors to analysis and solution of interior design problems.

ArtID 255. Forces That Shape Interior Space. (3-0) Cr. 3. F. Prereq: Open to non-majors. A survey of variables influencing the form and function of interior environments. Review of professional, geo-political, utilitarian, social-cultural, economic, humanistic, historical, technological, and other factors as generators of form.

ArtID 259. Sophomore Field Study. Cr. R. Prereq: Enrollment in interior design studio course. Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Satisfactory-fail only.

ArtID 261. Graphic Communication for Interior Design I. (4-0) Cr. 2. F. Prereq: Admission to the interior design program through program review and enrollment in 265. Proficiency in the development of technical conventions, and design drawing with drafting instruments. Emphasis on drawing layout, line quality, and lettering. Site and structure measurements, dimensioning, single and multi-view drawings, sections and axonometrics.

ArtID 262. Graphic Communication for Interior Design II. (4-0) Cr. 2. F. Prereq: Admission to the interior design program through program review and enrollment in 265. Perspective drawing, design sketching, presentation drawings, shades, shadows, and reflections. Use of various rendering media and techniques.

ArtID 263. Graphic Communication for Interior Design III. (4-0) Cr. 2. S. Prereq: 261, enrollment in 267. Computer visualization techniques and applications; projects employing computer graphic methods.
ArtID 265. Interior Design Studio I. (1-6) Cr. 4. F. Prereq: Credit or enrollment in 250, 261, 262, and 350; admission to the interior design program through program review. Exploration of fundamental design concepts and their application to the interior design of small scale environments. Modeling and manual visualization techniques.

ArtID 350. Interior Materials Systems and Details I. (2-2) Cr. 3. F. Prereq: Admission to the interior design program through program review. Exploration of concepts, materials, and assemblies associated with development of planar interior elements including floors, walls, ceiling, windows, and finishes. Fiber, plastic, sheet metal, and other materials. Emphasis on human factors, testing, codes, detailing, specifications, and other issues related to design and end use.

ArtID 351. Interior Materials Systems and Details II. (2-2) Cr. 3. S. Prereq: 265, 350 and enrollment in 267. Exploration of concepts, materials, and assemblies associated with development of furnishings, furniture, and other building systems. Emphasis on human factors, testing, codes, detailing, specifications and other issues related to design and end use.

ArtID 355. Interior Design History/Theory/Criticism I. (3-0) Cr. 3. F. Theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture, from a critical, historical and multicultural perspective. Focus on pre-1850. Nonmajor graduate credit.

ArtID 356. Interior Design History/Theory/Criticism II. (3-0) Cr. 3. S. Prereq: Credit or enrollment in 355 or permission of instructor. Advanced theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture from a critical, historical, and multicultural perspective. Focus on mid-nineteenth and twentieth century. Nonmajor graduate credit.

ArtID 357. Made in Italy. (2-0) Cr. 2. F. Prereq: Participation in Study Abroad Rome program. An investigation of the 20th century roots of modern Italian design and its contemporary form. Lectures and seminar presentations highlight major Italian designers and interior design projects in the 20th century. Focus is on innovative design that exhibits a synthesis of formal and social functions.

ArtID 359. Junior Field Study. Cr. R. F. Prereq: Enrollment in third year interior design studio course. Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms, and museums. Satisfactory-fail only.

ArtID 368. International Study Orientation Seminar. (1-0) Cr. 1. F. Prereq: Permission of instructor and planned enrollment in Rome study option. Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Satisfactory-fail only.

ArtID 400. Interior Design Internship Seminar. (0-1) Cr. S. O.S. Repeatable. F.S. Prereq: Enrollment in third year interior design studio course. Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms, and museums. Satisfactory-fail only.

ArtID 461. Interior Design Professional Practices. (3-0) Cr. 3. S. Prereq and placement credentials and formulation of personal specialization. Emphasis on research, spatial problem solving. Emphasis on professional human factors issues including physical, personal safety and other issues connecting human needs and built environmental responses.

ArtID 465. Environments for the Aging. (Cross-listed with HD FS, Geront). (3-0) Cr. 3. S. Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies. Emphasis on independent living within residential settings including specialized shelter, supportive services, and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.

ArtID 467. Interior Design Studio VI. (Dual-listed with 567). (1-4) Cr. 4. S. Prereq: 465, credit in 469 and all required interior systems and history/theory/criticism courses or permission of instructor. Refined methods of interpersonal problem-solving, methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design. Nonmajor graduate credit.

ArtID 468. Interior Design in an Urban Setting. (1-4) Cr. 3. S. Prereq: Enrollment or credit in third year studio course. Study design projects and designers practicing in an urban Setting. Studio project examining issues related to interior design in an urban context.

ArtID 469. Advanced Studies in Interior Design. (Dual-listed with 569). Cr. 3. Repeatable. Prereq: 12 credits in interior design, professional design internship approval, specific specialties in focus. Examination of internship projects and design opportunities. Emphasis on translation into design application. Topics vary each time offered. Nonmajor graduate credit.
Art IS 567. Interior Design Studio VI. ([Dual-listed with 467]) Cr. 4. S. Prereq: Graduate classification and concurrent enrollment in 598 or permission of instructor. Examination of special issues with emphasis on their translation into design application. Topics vary each time offered.

Art IS 569. Advanced Studies in Interior Design. ([Dual-listed with 469]) Cr. 3. Repeatable. Prereq: Graduate classification, permission of instructor. Examination of special issues with emphasis on their translation into design application. Topics vary each time offered.

Art IS 590. Special Topics. Cr. arr. Prereq: Bachelor's degree in interior design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment.

Art IS 598. Research Forum. ([1-0] Cr. 1. Repeatable. F.S. Prereq: Concurrent enrollment in 565, 567, 665, or 672 or permission of instructor. Presentation and discussion of cross-disciplinary design research theory, methods, and application. Focus on the investigation, application, and communication of types of design research.

Courses for graduate students

Art IS 660. Research Methods. (3-0) Cr. 3. S. Prereq: Permission of instructor. Research strategies related to design. Application of selected methods to specific issues.

Art IS 665. Advanced Interior Design Studio. (0-6) Cr. 3. Repeatable. F.S. Prereq: Graduate classification, concurrent enrollment in 598. Interior design problem-solving with emphasis on special issues. Project types will include but not be restricted to hospitality, healthcare, institutional, industrial, residential, historic preservation and commercial environments.

Art IS 667. Experimental Interior Design. (0-6) Cr. 3. Repeatable. F.S. Prereq: Concurrent enrollment in 598, permission of instructor. Application of alternative design methods and sources of insight to the solution of human environmental design problems. Focus on the identification, formulation, refinement and discussion of theory to the design process. Emphasis on the pursuit of new discovery and innovative problem solving. Approaches, settings and scales vary each time offered.

Art IS 690. Advanced Topics. Cr. arr. Repeatable. Prereq: M.F.A classification, permission of instructor.

Art IS 697. Design Practicum. Cr. arr. Repeatable. F.S. Prereq: Approval of POS committee. Supervised off-campus learning experience with a prominent designer or firm. (Credit not to be applied to MA degree program of study).

Integrated Studio Arts (Art IS)

Courses primarily for undergraduate students

Art IS 201. Foundations of Visual Literacy. (0-6) Cr. 3. F.S. Prereq: Dan S 102 and 121. Exploration through the World Wide Web of the nature of visual perception in relation to issues of visual communication and problem solving, envisioning information, scientific visualization and visual thinking. Studio assignments to be digitized and sent to instructor electronically for evaluation and critique.

Art IS 205. Studio Fundamentals I. (0-6) Cr. 3. F.S. Prereq: Acceptance into the BFA ISA program. Introduction to studio fundamentals and crossover between media. Emphasis on ceramics and fibers as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

Art IS 207. Studio Fundamentals II. (0-6) Cr. 3. F.S. Prereq: Acceptance into the BFA ISA program. Introduction to studio fundamentals and crossover between media. Emphasis on metals and wet darkroom photography as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

Art IS 208. Color. (0-6) Cr. 3. F.S. Prereq: Dan S 102, 131, and 183. Required of all ISA BFA students. The impact of changing visual relationships emphasizing physical and psychological color concepts. Additive and subtractive mixing and color interaction exercises using various color media.

Art IS 209. Studio Fundamentals III. (0-6) Cr. 3. F.S. Prereq: Acceptance into the BFA ISA program. Introduction to studio fundamentals and crossover between media. Emphasis on printmaking and wood as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

Art IS 211. Studio Fundamentals IV. (0-6) Cr. 3. F.S. Prereq: Acceptance into the BFA ISA program. Introduction to studio fundamentals and crossover between media. Emphasis on computers and painting as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

Art IS 222. Introduction to Creative Digital Photography. (0-6) Cr. 3. F.S. Prereq: Dan S 102, 131, and 183. The course will include camera operation, scanning, image manipulation, color management and printing. Must have access to 35 mm camera or 4 megapixel (minimum resolution) digital camera. Cameras must have manual override. Digital photography as a medium of design, expression and communication.

Art IS 229. Introduction to Darkroom Photography. (0-6) Cr. 3. F.S. Prereq: Dan S 102, 131 and 183. Photography as a creative medium of design, expression and communication. Camera techniques and black and white wet lab processing taught. Alternative processes explored as time permits. 35 mm camera with manual exposure controls is required.

Art IS 233. Watercolor Painting. (0-6) Cr. 3. F.S. Prereq: Art 230. Fundamentals of painting using water-based media applied to surface-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.

Art IS 238. Painting II. (0-6) Cr. 3. F.S. Prereq: Art 230. Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form.

Art IS 305. Integrative Media. ([Dual-listed with 505]) (0-6) Cr. 3. Repeatable. F.S. Prereq: Dan S 102, 131 and 183 and 8 credits of additional ISA studio at 200+ level. Exploration and application of materials and methods that combine and integrate traditional approaches, alternative/new materials and alternative approaches, and new media.

Art IS 308. Computer Modeling, Rendering and Virtual Photography. (0-6) Cr. 3. F.S. Prereq: Art 230 or permission of instructor. Introduction to 3D modeling using current software. Modeling, texturing, lighting, and rendering with respect to 3D object and still scene creation.

Art IS 310. Sources of Visual Design. (0-6) Cr. 3. F.S. Prereq: Art 230. Required of all ISA BFA students. Studio exercises to develop awareness of external and internal sources for design.

Art IS 311. Contemporary Issues in Studio Art. (0-6) Cr. 3. F.S. Prereq: 310. Studio based exploration of issues and directions in current art. Readings, discussions, and studio research projects to build an understanding of the contemporary art world.

Art IS 320. Introduction to Furniture Design. (0-6) Cr. 3. F.S. Prereq: Art IS 209 or permission of instructor. Design and creation of basic furniture forms in wood. Introduction to power tools. Develop an individual design process including an understanding of scale and proportion. Develop sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

Art IS 322. Ceramics II. (0-6) Cr. 3. F.S. Prereq: 222 or 205. Further investigation of concepts and techniques in ceramics; introduction to glaze research and kiln firing.

Art IS 323. Scientific Illustration Principles and Techniques. (Cross-listed with BIPM II) (0-6) Cr. 3. Repeatable. F. Prereq: 6 credits in art and design and 3 credits in biological sciences. Studio basics and professional techniques in black & white, continuous tone, and color. Emphasis on tools, materials, and rendering.

Art IS 324. Jewelry/Metalsmithing II. (0-6) Cr. 3. F.S. Prereq: 207 or permission of instructor. Continued study of traditional and contemporary metal fabrications and techniques applied to the design and construction, including container forms. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

Art IS 325. Integrated Studio Arts Seminar. (2-0) Cr. 2. Repeatable. Prereq: Any 3-0 studio. Contemporary issues in studio arts explored through lectures and presentations.

Art IS 326. Illustration and Illustration Software. (Cross-listed with BIPM I) (0-6) Cr. 3. Repeatable. S. Prereq: 323. Application of painting, drawing, and image making techniques to communication. Development of technical ability in digital photography, and digital print production techniques.

Art IS 327. Illustration as Communication. (Cross-listed with BIPM I) (0-6) Cr. 3. F. Prereq: 326. Studio problems in illustration emphasizing composition and communication. Problem solving methodologies.

Art IS 329. Creative Photography. (0-6) Cr. 3. Repeatable. F.S. Prereq: 207 or 229. Continuation and expansion of concepts and processes covered in Art IS 207 and Art IS 229. Individual thematic expression further enhanced through photographic history and criticism.

Art IS 335. Three-Dimensional Studio. (Cross-listed with Arch) (0-5) Cr. 2. Repeatable. F.S. This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means for three dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructive techniques.

Art IS 337. Application of Scientific Illustration Techniques. (Cross-listed with BIPM II) (0-6) Cr. 3. S. Prereq: 323. Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

Art IS 338. Painting III. (0-6) Cr. 3. Repeatable. F.S. Prereq: 238. Painting using acrylic and oil media; composition and expression.

Art IS 345. Woven Structures. (0-6) Cr. 3. Repeatable. Prereq: Dan S 102, 131, 183, and Art IS 205 or equivalent. Introduction to a variety of textile techniques including on-loom and off-loom woven construction using both traditional and non-traditional materials and approaches. Techniques may include basketry, tapestry weaving, papermaking, and 4-harness
weaving. Emphasis placed on technical development, exploration and experimentation with a variety of fiber media, development of problem solving and critical thinking skills.

ArtIS 346. Textile Surface Design. (0-6) Cr. 3. Repeatable. Prereq: Dan S 102, 131, 183 and Art IS 205, or equivalent. Introduction to surface design using dyes and discharging agents, as well as mechanical and liquid resists to create complex surfaces. Other surface embellishment techniques, such as direct application of pigments and stitching, will be explored. Emphasis on technical development and research, as well as conceptual exploration and visual problem solving.

ArtIS 347. Printed Textile Design. (0-6) Cr. 3. Repeatable. Prereq: Dan S 102, 131, 183, and Art IS 205 or equivalent, or permission of instructor. Textile printing methods; block, stencil, screen-printing using dyes, discharging agents, and pigments. Digital printing on fabric will be introduced. Experimental printing methods will also be explored. Research and development of surface design techniques as a means for personal expression.

ArtIS 356. Relief Printmaking. (Dual-listed with 556). (0-6) Cr. 3. Repeatable. F. Prereq: Art 230. Examine the techniques and aesthetic qualities of black and white relief printmaking primarily through woodcuts and polymer plate prints. Emphasis is on experimental and creative use of printmaking for artistic expression.

ArtIS 357. Intaglio and Monotype Printmaking. (Dual-listed with 557). (0-6) Cr. 3. Repeatable. F. Prereq: Art 230. Examine the techniques and aesthetic qualities of black and white color relief printmaking primarily through etching, aquatint, photographic intaglio and collagraph processes. Unique, one-of-a-kind black and white color prints from Picwixas will be also introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.

ArtIS 358. Lithography. (Dual-listed with 558). (0-6) Cr. 3. Repeatable. S. Prereq: Credit or enrollment in Art 230. Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color.

ArtIS 399. BFA Professional Practice. (2-0) Cr. 2. S. Prereq: Junior classification in Art and Design BFA Program. Required of all IS A BFA students. Introduction to professional practices including development of portfolio (visual and written components). Lecture and presentation topics include applying to graduate school, business ethics, creative industry, professional networking, exhibition opportunities, and best practices for studio artists. Half semester course.

ArtIS 408. Principles of 3D Animation. (0-6) Cr. 3. Repeatable. FS. Prereq: 308. Animation techniques using the computer and available software. Principles of animation. Prior knowledge of modeling, lighting, texturing, animation and rendering with computer and available software is assumed. Nonmajor graduate credit.

ArtIS 409. Computer/Video Game Design and Development. (Dual-listed with 509). (Cross-listed with HCI). (0-6) Cr. 3. Repeatable. FS. Prereq: Permission of instructor. Programming emphasis: 

ArtIS 420. Advanced Furniture Design. (Dual-listed with 520). (0-6) Cr. 3. Repeatable. FS. Prereq: 320. Design and creation of advanced furniture forms in wood with consideration of precedent and innovative approaches. Attention given to a unique personal approach to the design and making of furniture. Refine sensitivity to wood and the social and environmental implications of materials used for furniture design and production. Nonmajor graduate credit.

ArtIS 422. Ceramics Studio. (Dual-listed with 522). (0-6) Cr. 3. Repeatable. FS. Prereq: 322. In-depth investigation of ceramic forms and surfaces with an emphasis on personal art expression in the medium of ceramics. Kiln firings, research into contemporary artists and development of a body of work are emphasized. Nonmajor graduate credit.

ArtIS 424. Jewelry/Metalsmithing III. (Dual-listed with 524). (0-6) Cr. 3. Repeatable. FS. Prereq: 324 or permission of instructor. Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. Focus is placed on independent research, professional engagement and portfolio development. Nonmajor graduate credit.

ArtIS 429. Advanced Photography. (Dual-listed with 529). (0-6) Cr. 3. Repeatable. FS. Prereq: 329. Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concerns. Nonmajor graduate credit.

ArtIS 430. Drawing III. (Dual-listed with 530). (0-6) Cr. 3. Repeatable. FS. Prereq: Art 320. Figurative and/or non-figurative drawing with advanced work in media, composition, and theory. Nonmajor graduate credit.

ArtIS 438. Painting III. (Dual-listed with 538). (0-6) Cr. 3. Repeatable. FS. Prereq: 338. Figurative and non-figurative painting with advanced work in media, composition, and theory. Nonmajor graduate credit.

ArtIS 447. Advanced Printed Textile Design. (Dual-listed with 547). (0-6) Cr. 3. Repeatable. Prereq: 348 or 374. Advanced techniques that include screen-printing with dyes, discharging agents, and pigments, and digital printing on fabric. Experimental printing methods will also be explored. Emphasis is on research and development of surface design techniques as a means for personal expression. Nonmajor graduate credit.

ArtIS 458. Advanced Printmaking. (0-6) Cr. 3. Repeatable. FS. Prereq: 358, 357 or 358, and permission of instructor. Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists.

ArtIS 482. Selected Topics in Studio Art. (Dual-listed with 582). Cr. Arr. Repeatable. FS. Prereq: Permission of instructor. Special issues related to studio art. Topics vary each time offered.

ArtIS 490. Independent Study. Cr. arr. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

B. Ceramics
C. Computer Art and Design
D. Drawing
E. Textiles
F. Illustration
G. Metals
H. Honors
I. Painting
J. Photography
K. Printmaking
L. Furniture
M. Mixed Media

ArtIS 499. BFA Exhibition. (1-0) Cr. 1. S. Prereq: 399 and senior classification in the Art and Design BFA Curriculum. Capstone experience for the BFA degree; includes the creation and refinement of a final portfolio of both visual and written components. Students give a portfolio presentation to the ISA faculty. Course culminates in the planning and installation of the BFA group exhibition in a formal gallery setting. Required of all IS A BFA students. Half semester course.

Courses primarily for graduate students, open to qualified undergraduate students

ArtIS 505. Integrative Media. (Dual-listed with 305). (0-6) Cr. 3. Repeatable. FS. Prereq: Graduate classification and permission of instructor. Exploration and application of materials and methods that combine and integrate traditional approaches, alternative/new materials, alternative approaches and new media.

ArtIS 508. Computer Aided Animation and Visualization. (0-6) Cr. 3. Repeatable. S. Prereq: 408 or graduate Status and permission of instructor. Further investigations begun in ArtIS 408. Attention given to the workflow and management of creating animation and visualizations.

ArtIS 509. Computer/Video Game Design and Development. (Dual-listed with 409). (Cross-listed with HIC). (0-6) Cr. 3. Repeatable. FS. Prereq: Permission of instructor. Independent project based creation and development of “frivolous and non-frivolous” computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed. Nonmajor graduate credit.

ArtIS 520. Advanced Furniture Design. (Dual-listed with 420). (0-6) Cr. 3. Repeatable. FS. Prereq: Graduate classification and permission of instructor. Design and creation of advanced furniture forms in wood with consideration of precedent and innovative approaches. Develop a unique personal approach to the design and making of furniture. Refine sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

ArtIS 522. Ceramics Studio. (Dual-listed with 422). (0-6) Cr. 3. Repeatable. FS. Prereq: Graduate classification and permission of instructor. In-depth investigation of ceramic forms and surfaces with an emphasis on personal art expression in the medium of ceramics, kiln firings, research into contemporary artists and development of a body of work are emphasized. Nonmajor graduate credit.

ArtIS 524. Jewelry and Decorative Metalsmithing III. (Dual-listed with 424). (0-6) Cr. 3. Repeatable. FS. Prereq: Graduate classification and permission of instructor. Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including
raising, forming, and anticlastic shell forming tech-
niques. Introduction to mechanisms and tool making. 
Advanced students are encouraged to integrate these 
topics with alternative materials and technologies. A 
focus is placed on independent research, professional 
engagement and portfolio development.
ArtIS 529. Advanced Photography. (Dual-listed with 
429). (0-6) Cr. 3. Repeatable. F. Prereq: Graduate clas-
sification and permission of instructor. Independent 
advancement in traditional and alternative digital 
photographic processes. Emphasis is on develop-
mance of a unified body of work and research into 
contemporary photographers and aesthetic concerns.
ArtIS 530. Drawing. (Dual-listed with 430). (0-6) 
Cr. 3. Repeatable. F. Prereq: Graduate classification 
and permission of instructor: Figurative and non-
figurative drawing with advanced work in media, 
composition, and theory.
ArtIS 538. Advanced Painting. (Dual-listed with 438). 
(0-6) Cr. 3. Repeatable. F. Prereq: Graduate clas-
sification and permission of instructor. Figurative and 
non-figurative painting with advanced work in media, 
composition, and theory.
ArtIS 547. Advanced Printed Textile Design. (Dual-
listed with 447). (0-6) Cr. 3. Repeatable. Prereq: 
Graduate classification. Advanced textile printing 
techniques that include screen-printing with dyes, 
discharging agents, and pigments, and digital printing 
on fabric. Experimental printing methods will also be 
examined. Emphasis is on research and development 
of surface design techniques as a means for personal 
expression.
ArtIS 555. Relief Printing. (Dual-listed with 358). (0-6) 
Cr. 3. Repeatable. F. Prereq: Graduate classification 
and permission of instructor: Examine the techniques 
and aesthetic qualities of black and white relief printmaking primarily through woodcuts and photopolymer plates. Emphasis is on 
experimental and creative use of printmaking for 
artistic expression.
ArtIS 557. Intaglio and Monotype Printmaking. 
(Dual-listed with 357). (0-6) Cr. 3. Repeatable. F. Prereq: 
Graduate classification and permission of instructor: Examine the techniques and aesthetic qualities of intaglio printmaking primarily 
through etching, aquatint, photographic intaglio 
and collagraph processes. Unique, one-of-a-kind work 
and color prints from Plexiglas will also be 
introduced. Emphasis is on experimental and creative 
use of printmaking for artistic expression.
ArtIS 558. Lithography. (Dual-listed with 358). (0-6) 
Cr. 3. Repeatable. F. Prereq: Graduate classification 
and permission of instructor. Examine the techniques 
and aesthetic qualities of lithography primarily through 
hand-drawn and photographic plates. Emphasis is on 
experimental and creative use of printmaking for 
artistic expression. Experienced lithography students 
may focus on stone lithography and increased work 
with color.
ArtIS 582. Selected Topics in Studio Art. (Dual-listed 
with 482). Cr. arr. Repeatable. F. Prereq: Permission 
of Instructor. Special issues related to studio art. Top-
courses vary each time offered.
ArtIS 590. Special Topics. Cr. arr. Prereq: Bachelor 
degree in art and/or design, or evidence of satisfac-
tory equivalency in specialized area. Written approval 
of instructor and department chair on required form in 
advance of semester of enrollment.
B. Ceramics
C. Computer Art and Design
D. Drawing
E. Textiles
F. Illustration
G. Metals
H. Painting
J. Photography
K. Printmaking
L. Furniture
M. Mixed Media

Courses for graduate students
ArtIS 607. Intermedia. (0-6) Cr. 3. Exploration and 
application of media with various materials, methods 
and ideas.
Repeatable. Prereq. Graduate classification. Selected 
issues in contemporary studio arts. Topics and read-
ings vary each time offered.

Astronomy and Astrophysics

Aragula Gururaj Rao, Chair of Department

Distinguished Professors: Beitz, Fromm

Distinguished Professors (Emeritus): Graves, Metzler

University Professor: Girton

University Professors (Emeritus): Hammond, Horowitz, White

Professors (Emeritus): Applegast, Atherly, Buss, Stromer, Thomas, Tipton

Professor (Collaborator): Meyer, Tabatabai

Associate Professors: Ambrosio, Bobik, Disprito, Hargrove, Huiatt, Peters

Associate Professors (Adjunct): James

Assistant Professors: Amarasinghe, Macintosh, Shogren-Knaak, Yu, Zabotina

Lecturer: Fulton, Girton

Undergraduate Study

The department offers majors in biochemistry or biophysics in the College of Liberal Arts and Sci-
ences and a major in agricultural biochemistry in 
the College of Agriculture.

Biochemists and biophysicists seek to understand 
life processes in terms of chemical and physical 
principles. They conduct research in the frontiers 
of biology such as metabolic networking; structure 
and function of enzymes, membranes, and 
hormones; computational approaches; genomic 
and proteomic technology; protein engineering; 
plant biotechnology; muscle structure and func-
tion; and the design and evaluation of drugs for 
the treatment of disease. Biochemistry, biophys-
ics and molecular biology provide the basis for 
much of modern biotechnology. Graduates have 
opportunities in industry, biotechnology sector, 
in universities, veterinary medical, and 
medical schools, and government laboratories. 
Students who meet the necessary high scholastic 
standards have the opportunity to continue their 
studies in graduate school, medical school, or 
Veterinary medical school.

Graduates of biochemistry, agricultural biochem-
istry and biophysics understand the chemical prin-
ciples of biological systems including molecular 
biology. They have developed laboratory expertise 
in modern biochemical techniques, including 
the ability to analyze data and prepare scientific 
reports. Most have participated in undergraduate 
research and have developed the skills neces-
sary for both written and oral presentations at a 
level that will serve the student both within 
the university and in postgraduate professional life. 
Graduates have the experience of interacting 
with persons of different disciplines and cultures. 
Students have the training in mathematics and 
physics to solve problems of broad scope in 
biological, biomedical and environmental sciences 
and to provide leadership in diverse scientific and 
technological arenas.

Agricultural Biochemistry Major in the 
College of Agriculture

For the undergraduate curriculum leading to the 
degree bachelor of science, see College of 
Agriculture, Curricula. Agricultural biochemistry is recommended to students interested in the 
areas of agriculture requiring strong preparation in 
biochemistry, chemistry, physics, and mathemat-
ics, or in preparation for the study of veterinary 
medicine. Employment opportunities exist in 
agrochemical industries, and animal and plant 
bioengineering.

Biochemistry or Biophysics Majors in the 
College of Liberal Arts and Sciences

For the undergraduate curriculum leading to the 
degree bachelor of science, see Liberal Arts 
and Sciences, Curriculum. Biochemistry and biophysicists are recommended to students whose 
career interests involve advanced study or employ-
ment in biochemistry or biophysics, or in related 
areas of the biological or medical sciences.

Undergraduate majors in the College of Liberal 
Arts and Sciences in biochemistry usually have 
the following basic courses or their equivalents 
in their programs: BBMB 101, 102, 201, 404 (or 
501), 405 (or 502), 411, 461 (or 551); Chem 201 
(or 177, 178), 201L (or 177L), 211, 211L, 
322L, 324, 325, 331, 332, 333L (or 331L), 334L (or 
332L); Math 165, 166, 265 (or 266 or 267); Phys 
221, 222; Biol 211, 211L (or 212L or 313L or 314), 
212, 313, 314, and a minimum of 4 additional cred-
its of biological science courses from biology, ge-
etics, and microbiology. Undergraduate research, 
BBMB 499, is strongly recommended.

Undergraduate majors in biochemistry usually 
include the following basic courses in their 
programs: BBMB 101, 102, 404, 411, 461 (or 551); 
Chem 201 or (or 177, 178), 177N, 211L, 322L, 324, 
325, 331, 332; Math 165, 166, 266, 265, 307 (or 
317), 471; Phys 221, 222, Com S 207; Stat S 255 or 
231; Biol 211, 211L (or 212L), 212; Chem 211 
and 212L; and 9 additional credits in 300 or higher 
level courses in biochemistry, biophysics, biologi-
cal sciences, chemistry, or physics.

These lists of courses should not be regarded as statements of fixed requirements or as complete 
outlines of the work necessary for the major. They 
are given solely for the convenience of students 
or advisers who wish to estimate the amount of 
basic study that may be needed.

Biochemistry and biophysics majors are advised 
to meet the College of Liberal Arts and Sciences 
foreign language requirement with courses in 
French, German, or Russian.

See also the B.S./M.S. program under Graduate Study.
The department offers minors in biochemistry in both the College of Agriculture and the College of Liberal Arts and Sciences, which may be earned by credit in BBMB 404, 405, 311 (or 411), and 451 (or Chem 325), plus additional supporting 300 level courses in chemistry or biochemistry for a total of 15 credits.

Communication Proficiency requirement: Majors in agricultural biochemistry must complete Engl 150 and 250 and one course in speech fundamentals with a grade of C or better in each of these courses. Majors in the College of Liberal Arts and Sciences must complete Engl 150 and 250 and one of the following with a grade of C- or better: (a) Engl 305, 309, or 314; (b) a written report in BBMB 411, or 499.

Interdepartmental Majors

The department participates along with other biological science departments including GDCB and EEOB in offering interdepartmental majors in Biology and Genetics. Biology courses that are staffed in part by department faculty members include Biol 101, 313, 314, and 313L (See Biology).

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in biochemistry and biophysics and with interdepartmental majors in genetics, immunobiology, MCDP (molecular, cellular, and development biology), plant physiology, and toxicology. Minor work is offered to students taking major work in other departments.

Prerequisite to graduate work is a sound undergraduate background in biology, chemistry, mathematics, and physics.

All graduate students are required by the department to teach as part of their training for an advanced degree.

The department offers a B.S./M.S. program in biochemistry that allows students to obtain both the advanced degree. All graduate students are required by the department to teach as part of their training for an advanced degree.

Courses primarily for undergraduate students

BBMB 101. Introduction to Biochemistry. (1-0) Cr. 1. F. Research activities, career opportunities in biochemistry and biophysics, and an introduction to the structure of biologically important compounds. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BBMB 102. Introduction to Biochemistry Laboratory. (0-2) Cr. 1. S. Prereq: BBMB 101. Biological processes, bioenergetics, chemical equilibria and kinetics, selected biochemical reactions and redox potential, classical and modern biochemical techniques, data analysis. The students will be taught using molecules from biological systems as examples. Intended for majors in biochemistry, biophysics, or agricultural biochemistry.

BBMB 221. Structure and Reactions in Biochemical Processes (2-0) Cr. 4. F. Prereq: Chem 163, 167. Fundamentals necessary for an understanding of biochemical processes. Primarily for students in agriculture. Not acceptable for credit toward a major in biochemistry or biophysics. Credit for both BBMB 221 and Chem 231 may not be applied toward graduation.

BBMB 301. Survey of Biochemistry. (3-0) Cr. 3. Prereq: Chem 231 or 331. A survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymology; metabolism; biosynthesis; and selected topics. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 311. Biochemistry Laboratory. (1-3) Cr. 2. S. Prereq: Credit or enrollment in 301 or Biol 314. Emphasis on isolation, characterization, and quantification of biochemical substances. Only one of BBMB 311 or Biol 314L can be counted toward graduation. Not acceptable for credit toward any major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 403. Microbial Biochemistry and Biotechnology. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Chem 332, BBMB 301. Fundamental principles of microbial biochemistry, physiology, and genetics, and their application to microbial biotechnology. Topics will include biorenewable resources, metabolic pathway engineering, enzyme engineering, bioremediation, microbial diversity, metagenomics. Nonmajor graduate credit.

BBMB 404. Biochemistry I. (3-0) Cr. 3. F. Prereq: Chem 332. A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical and nutritional sciences. Chemistry of amino acids, proteins, carbohydrates, and lipids, vitamins, proteins; structure; enzymology; carbohydrate metabolism. Credit for both BBMB 420 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.

BBMB 405. Biochemistry II. (3-0) Cr. 3. S. Prereq: Chem 404. A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical, and nutritional sciences. Metabolism of lipids, amino acids, carbohydrates, and nucleic acids; formation, turnover, and molecular relationships among DNA, RNA, and proteins; genetic code; regulation of gene expression; selected topics in the molecular physiology of plants and animals. Credit for both BBMB 420 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.

BBMB 411. Techniques in Biochemical Research. (1-1) Cr. 3. F. Prereq: Credit or enrollment in Chem 177 and 177L. Topics in the scientific background of biochemistry, such as macromolecules, metabolism, and catalysis. May include laboratory experiments as well as literature readings and discussion. A significant component is practice in scientific communication. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BBMB 420. Physiological Biochemistry. (3-0) Cr. 3. S. Prereq: Chem 322, BBMB 301 or Biol 314. Structure and function of proteins under physiological conditions, physiology of carbohydrate, lipid, and protein metabolism; development of the genetic code, relationship of biochemistry to selected animal diseases. Biochemistry of higher animals emphasized. Not acceptable for credit toward a major in agricultural biochemistry, biochemistry or biophysics. Credit for both BBMB 420 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.

BBMB 440. Laboratory in Microbial Physiology, Diversity, and Genetics. (Cross-listed with Micro). (3-0) Cr. 3. F. Prereq: Micro 302, 302L, Chem 332, Biol 313L. Study of the fundamental techniques and theory of studying the diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments. Also included are techniques for the phylogenetic characterization, and genetic manipulation of diverse species of bacteria.

BBMB 451. Physical Biochemistry. (2-0) Cr. 2. F. Prereq: Chem 321, Phys 122 or 222. A previous course in calculus is helpful but not required. Selected topics in physical chemistry in the context of applications to problems in biochemistry, biophysics and food sciences. Not acceptable for credit toward a major in biochemistry or biophysics. Nonmajor graduate credit.

BBMB 461. Topics in Biophysics. (2-0) Cr. 2. S. Prereq: 451 or Chem 321 or Phys 304. Biological phenomena viewed as problems in physics, with a focus on structure determinations and macromolecular characterization. Nonmajor graduate credit.

BBMB 490. Independent Study. Cr. arr. F.S.S. Prereq: College of Agriculture: Junior or senior classification and permission of instructor. College of Liberal Arts and Sciences: permission of instructor. College of Agriculture: a maximum of 9 credits of 490 may be applied toward graduation. H. Honors

BBMB 499. Undergraduate Research. Cr. arr. Repeatable. F.S.S. Prereq: Permission of staff member with whom student proposes to work. Research under senior staff guidance.

Courses primarily for graduate students, open to qualified undergraduate students

BBMB 501. Comprehensive Biochemistry I. (4-0) Cr. 4. F. Prereq: Chem 210 or 211, 322, and 332; a previous course in biochemistry is strongly recommended. Chemical composition of living matter and the chemistry of life processes: carbon metabolism of amino acids, proteins, carbohydrates and lipids; enzyme and co-enzymes; metabolism of carbohydrates; biological oxidations.

BBMB 502. Comprehensive Biochemistry II. (4-0) Cr. 4. S. Prereq: 501. Chemical composition of living matter and the chemistry of life processes: carbon metabolism of lipids, amino acids, carbohydrates; membrane biochemistry; biosynthesis of DNA, RNA, and proteins; gene regulation; selected topics.

BBMB 520. Genetic Engineering. (Cross-listed with GDCB, MCDP). (3-0) Cr. 3. Alt. F. Prereq: Gen 411 or BBMB 405. Strategies and methods of gene cloning, restriction endonuclease mapping, Southern hybridization, isolation and manipulation of plasmid DNA, and detection of specific genes in bacteria.

BBMB 541. Computational Biochemistry. (1-0) Cr. 1. F. Prereq: A previous course in biochemistry is recommended. Computer applications in biochemical research.

A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.S.)
B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microscopy, immunodiffusion, immunophenotyping, and monoclonal antibodyproduction. (S.)
C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)
D. Plant Transformation. Includes Agrobacterium and particle gun transformation of tobacco, arabidopsis, and maize, and analysis of transformants. (S.)
E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)

BBMB 551. Molecular Biophysics. (3-0) Cr. 3. F. Prereq: Chem 322. An examination of physical methods for the study of molecular structure and organization of biological materials, with emphasis on applications. Spectroscopy, hydrodynamic methods, nuclear magnetic resonance, and X-ray diffraction.

BBMB 552. Biomolecular NMR Spectroscopy. (2-0) Cr. 2. Alt. S., offered 2011. Prereq: Chem 325 or permission of instructor. Advanced solution state Nuclear Magnetic Resonance spectroscopy as applied to biological systems. Topics include theoretical principles of NMR, practical aspects of experimental NMR, methodologies for protein structure determination, NMR relaxation, recent advances in NMR spectroscopy.

BBMB 581. Seminar. (1-0) Cr. 1. F. Prereq: Permission of instructor. Short presentations by students and discussion on assigned topics. For entering graduate students.

BBMB 590. Special Topics. Cr. arr.

BBMB 593. Workshop in Biochemistry and Biophysics. Cr. 1. Repeatable. Prereq: Permission of instructor. Graduate workshops in selected topics in biochemistry and biophysics. Credit in this course does not meet the requirement for advanced graduate electives in Biochemistry.

Courses for graduate students

BBMB 615. Molecular Immunology. (Cross-listed with Micro, V MPM). (3-0) Cr. 3. Alt. F. offered 2009. Prereq: BBMB 405 or 502. Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

BBMB 645. Molecular Signaling. (2-0) Cr. 2. Alt. S., offered 2011. Prereq: 404, 420, or 502. Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, and nuclear receptors. Discussion includes a variety of cell surface receptors and their hormone: growth factor and extracellular matrix activators; protein kinases, caspase and transcription factor downstream signals; lipids, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and research proposal writing.

BBMB 660. Membrane Biochemistry. (2-0) Cr. 2. Alt. F. offered 2010. Prereq: 405 or 502. Protein and lipid constituents of biological membranes. Structure and topography of membranes are probed. Recent topics concerning the membrane proteins involved in diverse biochemical processes, such as energy transduction transport across membranes, neurotransmission and signal transduction.

BBMB 661. Current Topics in Neurobiology. (Cross-listed with Neuro, GDCB). Cr. 1. Repeatable. Prereq: Permission of instructor. Topics may include communication, nutrition and behavior, neural integration, membrane biophysics, molecular and cellular neuroscience, developmental neurobiology, neuroanatomy and ultrastructure, sensory biology, social behavior, techniques in neurobiology and behavior.

BBMB 675. Nucleic Acid Structure and Function. (2-0) Cr. 2. F. Prereq: 405 or 502. In-depth discussion of nucleic acid properties, structures and structure/function relationships. Interactions between nucleic acids and proteins will be emphasized.

BBMB 682. Departmental Seminar. Cr. R. F.S. Prereq: Permission of instructor. Staff and visitor research.

BBMB 698. Seminar in Molecular, Cellular, and Developmental Biology. (Cross-listed with MCD, GDCB, Micro, V MPM). (2-0) Cr. arr. Repeatable. F.S. Student and faculty presentations.

Bioengineering

http://www.eng.iastate.edu/bioengineering/

Minor administered by the College of Engineering

Supervisory Committee: P. Reilly (Chair), A. Bastavros, T. Kim, H. van Leeuwen, S. Pandey, G. Mirka, L. Genalo, P. Shrotriya

The bioengineering minor at Iowa State University is an interdisciplinary program that complements a student’s major discipline by providing additional insight into the interactions between various engineering disciplines and biological systems, emphasizing new ways of solving biological problems. The program provides students with unique educational experiences to apply engineering skills and create new biobased products and devices.

Undergraduate Study

The program is open to all undergraduate engineering students at Iowa State University. This minor will provide students with a foundation of core Bioengineering knowledge, on which tracks will be superimposed to provide in-depth exposure to targeted areas of specialization. In addition to the core courses—BioE 201 and 202—students will complete coursework identified in the following tracks:

Bioinformatics and Systems Biology: BioE 325, BCB 211, 401, 402, and 442.

Biomaterials and Biomechanics: BioE 352, Ch E 440, Ex Sp 355, and Mat E 456.

Courses primary for undergraduate students

Undergraduate engineering students can satisfy the minor in bioengineering by completing a total of 15 credits: 6 from the core curriculum and 9 from the specialized tracks. Students can either choose to specialize in a particular track shown above or use courses from all tracks from which to draw their set of courses. The minor must include at least one credit from each of the total used to meet curriculum requirements for the bachelors of science degree in engineering.
BioE 201. Introduction to Bioengineering I. (3-0) Cr. 3. Prereq: Chem 167 An exploration of cell structure and function, cellular metabolism, types of life forms, energy transport and use, biomolecular structure and function, and kinematics, with strong Mathematical emphasis.

BioE 352. Molecular, Cellular and Tissue Biomechanics. (3-0) Cr. 3. Prereq: 201, E M 324, Mat E 272. Introduction to the anatomy of the musculoskeletal system and connective tissue. Range of movement, joint dislocation, bone deformity and fracture. Application of continuum mechanics to both living and nonliving systems. Use of free-body diagrams and simple force analyses of musculoskeletal system, biomechanical response of soft and hard tissues with emphasis on microstructure and mechanical properties. Applications to bioengineering design.

BioE 411. Bioprocessing and Bioproducts. (Cross-listed with A E, BSE, C E, C E-3) (3-0) Cr. 3. F. Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Bioi 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production. Taxonomy, kinetics, metabolic, aerobic and anaerobic fermentation. Biofuels, Biorenergy and coproducts. Mass, energy balances, process integration, pretreatment, separation. Membrane reactors, Bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

BioE 450. Biosensing. (3-0) Cr. 3. Prereq: 202. Overview of biosensors and biophysical properties; design for performance including various analytical problems, ion-selective membranes, characteristics of enzymes and basics of bioaffinity sensing; fundamentals of bioelectrodes including depositing films and membranes, surfaces for immobilization and bioselective agents; survey of different biosensing technologies including electroanalytical, biomembrane, optical, and acoustic-wave based sensors.

Bioinformatics and Computational Biology - Undergraduate

Chair: S. Willson

Undergraduate study

Undergraduate study in BCBio is jointly administered by the Department of Computer Science, the Department of Genetics, Development, and Cell Biology, and the Department of Mathematics. The undergraduate degree is offered through the College of Liberal Arts and Sciences.

Bioinformatics and Computational Biology is an interdisciplinary science at the interfaces of the biological, informational and computational sciences. The science focuses on a variety of topics. These include gene identification, expression, and evolution; RNA, protein, and genome structure; and molecular and cellular systems and networks. The large group of participating faculty provides students with a multidimensional perspective on bioinformatics and computational biology and presents them with broad range of possibilities to get involved in research.

This major will prepare students for careers at the interfaces of biological, informational and computational sciences. BCBio graduates with a B.S. seeking direct employment will find ready markets for their talents in agricultural and medical biotechnology industries, as well as in academia, national laboratories, and clinics. Although some students find employment directly after their baccalaureate training, many students will continue their education in one of the many excellent graduate programs in bioinformatics and computational biology.

Participation in this field requires that students achieve a high level of competence not only in biology, but also in mathematics, computer science, and statistics. As a result, the program includes required courses from many different disciplines. Graduates demonstrate an above-average ability to synthesize methods from these different disciplines to solve problems.

In addition to basic degree requirements listed in the Curriculum in Liberal Arts and Sciences (www.iastate.edu/academics/generaleducation), BCBio majors must satisfy the following requirements:

A. Complementary Courses for the BCBio Major (37 cr)

1. Chem 177, 177L, 178 or (201, 201L), 331.
2. Phys 221.

B. Core Courses Within the BCBio Major (48 cr)

1. Gen 313, 313L, and 411.
2. Com S 227, 228, 363, and 330 (or Cpr E 310).
3. Math 165, 166, 265 and (307 or 317).
4. BCBio 110, 211, 401, 402.
5. BCBio 490 or 491 (3 cr)

C. Support Electives

3-9 credits to be chosen from the following list:

BCB 495, 539, 542, 543, 548, 550, 551, 593, 594, 596, 597; Phys 227; BMBB 405, 405; Biol 315, 423, 462, 465, 472; Gen 340, 410; Stat 342, 402, 416, 432; Com S and Cpr E courses at the 300 level and above; Math 266 (or 267), 304, 314, 385, 471, 481.

The communications and English proficiency requirements of the LAS college are met by Engl 150, 250 or 250H, and an additional English writing course chosen from Engl 309 or Engl 314. The lowest grade acceptable in Engl 150, 250 or 250H is C.

Courses primarily for undergraduate students

BCBio 110. BCBio Orientation. (1-0) Cr. 0.5. F. First 8 weeks. Orientation to the area of bioinformatics and computational biology. For students considering a major in BCBio. Specializations and career opportunities. Satisfactory-fail only.

BCBio 211. Introduction to Bioinformatics and Computational Biology. (3-0) Cr. 3. S. Overview of bioinformatics and computational biology. Database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

BCBio 490. Independent Study. Cr. arr. Repeatable. F.S.S. Prereq: BCBio 211, junior or senior classification, permission of instructor. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBio 490 and 491 toward graduation.

BCBio 491. Team Research Projects. Cr. arr. Repeatable. Prereq: BCBio 211, junior or senior classification, permission of instructor. Research projects in bioinformatics and computational biology done by teams of students. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBio 490 and 491 toward graduation.

Bioinformatics and Computational Biology

www.iastate.edu/bcb/

bcb@iastate.edu

Interdepartmental Graduate Major

Chair: C. Tuggle

Associate Chair: V. Brendel

Supervisory Committee: C. Tuggle, V. Brendel, J. Dickerson, D. Dobbs, X. Huang, Z. Wu, R. Jerinage (ex-officio), S. Aluru (former chair)

Undergraduate Study

Undergraduates seeking a B.S. in Bioinformatics and Computational Biology should enroll in the undergraduate major BCBio, which is described in a separate section of this catalog. See Index: BCBio.

Undergraduates wishing to prepare for graduate study in Bioinformatics and Computational Biology should consider the undergraduate major in BCBio. They should obtain solid undergraduate training in at least one of the foundation disciplines: molecular biology, computer science, mathematics, statistics, and physics. They should also elect courses in basic biology, basic transmission and molecular genetics, chemistry, physics, mathematics at least through calculus, statistics, and computer programming.

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Bioinformatics and Computational Biology (BCBio). Faculty are drawn from several departments:

- Agronomy and Plant Genetics
- Astronomy and Physics
- Biochemistry, Biophysics and Molecular Biology
- Biomedical Sciences; Chemical and Biological Engineering
- Chemistry; Computer Science; Ecology, Evolution, and Organismal Biology; Electrical and Computer Engineering; Genetics, Development, and Cell Biology; Industrial Manufacturing and Systems Engineering; Materials Science and Engineering; Mathematics; Plant Pathology; Statistics; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The BCB program emphasizes interdisciplinary training in nine related areas of focus: Bioinformatics, Computational Molecular Biology, Structural and Functional Genomics, Macromolecular Structure and Function, Metabolic and Developmental Networks, Integrative Systems Biology, Information Integration and Data Mining, Biological Statistics, and Mathematical Biology. Additional information about research areas and individual faculty members is available at: www.bcb.iastate.edu.

BCB students are trained to develop an independent and creative approach to science through an integrative curriculum and thesis research projects that include both computational and biological components. First year students are appointed as research assistants and participate in BCB 697 (Graduate Research Rotation), working with three or more different research groups to gain experience in both “wet” (biological) and “dry” (computer) laboratory environments. In the second year, students initiate a thesis research project under the joint mentorship of two BCB faculty mentors, one from the biological sciences and one from the quantitative/computational sciences. The M.S. and Ph.D. degrees are usually completed in two and three years, respectively.

During the first year, BCB students are required to address any background deficiencies in calculus, molecular genetics, computer science, statistics and discrete structures, with specific courses determined by prior training. Among the total course requirements for Ph.D. students are four core courses in Bioinformatics: BCB 550, 551, 552, and 557, one core course in Molecular Genetics (GDCB 511), and background courses in statistics and computer science. Students make research presentations (BCB 690), attend faculty research seminars (BCB 691), and participate in workshops/symposia (BCB 593). M.S. students take three advanced coursework courses, each with at least 12 credits of advanced coursework, and may elect to participate in fewer seminars and workshops. Additional coursework may be selected to satisfy individual interests or recommendations of the Program of Study Committee. All graduate students are encouraged to teach as part of their training for an advanced degree. (For curriculum details and sample programs of study, see: www.bcb.iastate.edu.)

Courses primarily for undergraduate students

BCB 444. Introduction to Bioinformatics. (Dual-listed with 544). (Cross-listed with Com S, Cpr E, Gen, Biol). (4-0) F. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics. Nonmajor graduate credit.

BCB 495. Molecular Biology for Computational Scientists. (Cross-listed with Gen). (3-0) F. Prereq: Survey of molecular cell biology and molecular genetics for nonbiologists, especially those interested in bioinformatics. Basic cell structure and function; principles of molecular genetics; biosynthesis, structure, and function of DNA, RNA, and proteins; regulation of gene expression; selected topics. Provides biological background for BCB 594. Credit for graduation will not be allowed for more than one of Gen 411 and Gen/BCB 495. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students.

BCB 538. Computational Genomics and Evolution. (Crosslisted with GDCB). (3-0) F. Prereq: Bio 313. Introduction to evolutionary sequence analysis at the nucleotide and protein levels. Topics include sequence alignment, phylogenetic inference, molecular clock analysis, ancestral state inference, sequence/structure relation, functional divergence and prediction, evolutionary development, genome duplication, and comparative genomics. Focus will be on data analysis and biological interpretation.

BCB 539. Statistical Methods for Computational Biology. (Cross-listed with GDCB). (2-0) F. Prereq: Stat 311. Credit or enrollment in Stat 314, credit or enrollment in Stat 315, Stat 410, and Math 421. Credit for graduation will not be allowed for more than one of Gen 411 and Gen/BCB 495. Nonmajor graduate credit.

B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. (S.S.S.)

C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)

D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)

E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)

BCB 544. Introduction to Bioinformatics. (Dual-listed with Gen). (Cross-listed with Com S, Cpr E, GDCB). (4-0) F. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

BCB 549. Advanced Algorithms in Computational Biology. (Cross-listed with Com S, Cpr E). (3-0) F. Prereq: Com S 311 and either 208 or 228. Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semine-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

BCB 550. Evolutionary Problems for Computational Biologists. (Cross-listed with Com S). (3-0) F. Prereq: Math 165 or Stat 401 or equivalent. Credit for graduation will not be allowed for more than one of Gen 411 and Gen/BCB 495. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students.

BCB 583. Computational Genomics and Evolution. (Crosslisted with GDCB). (3-0) F. Prereq: Bio 313. Introduction to evolutionary sequence analysis at the nucleotide and protein levels. Topics include sequence alignment, phylogenetic inference, molecular clock analysis, ancestral state inference, sequence/structure relation, functional divergence and prediction, evolutionary development, genome duplication, and comparative genomics. Focus will be on data analysis and biological interpretation.

BCB 539. Statistical Methods for Computational Biology. (Cross-listed with GDCB). (2-0) F. Prereq: Stat 311. Credit or enrollment in Stat 314, credit or enrollment in Stat 315, Stat 410, and Math 421. Credit for graduation will not be allowed for more than one of Gen 411 and Gen/BCB 495. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students.

BCB 583. Computational Genomics and Evolution. (Crosslisted with GDCB). (3-0) F. Prereq: Bio 313. Introduction to evolutionary sequence analysis at the nucleotide and protein levels. Topics include sequence alignment, phylogenetic inference, molecular clock analysis, ancestral state inference, sequence/structure relation, functional divergence and prediction, evolutionary development, genome duplication, and comparative genomics. Focus will be on data analysis and biological interpretation.

BCB 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor.

BCB 593. Workshop in Bioinformatics and Computational Biology. (1-0) Cr. 1. Repeatable. F.S. Current topics in bioinformatics and computational biology research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.

BCB 596. Genomic Data Processing. (Cross-listed with Com S, GDCB). (3-0) Cr. 3. S. Prereq: BCB 587. Some knowledge of programming. Study the practical aspects of genomic data processing with an emphasis on hands-on projects. Students will carry out major data processing steps using bioinformatics tools. Topics include base-calling, raw sequence cleaning and contamination removal, shotgun assembly processes and EST clustering methods, genome closure strategies and practices; sequence homology search and function prediction; annotation and submission of GenBank reports; and data collection and dissemination through the Internet. Useful post-genomic topics include base-calling, raw sequence cleaning and contamination removal, shotgun assembly procedures and data processing steps using bioinformatics tools. Topological analysis, module discovery, and comparative analysis of gene and protein networks. Modeling, analysis, simulation and inference of transcriptional regulatory modules and networks, protein-protein interaction networks, metabolic networks, cells and systems; Dynamic systems, Boolean, and probabilistic models. Ontology-driven, network based, and probabilistic approaches to information integration.

BCB 597. Introductory Computational Structural Biology. (Cross-listed with Math). (3-0) Cr. 3. S. Prereq: Math 561 and 562. Mathematical and computational approaches to protein structure prediction and determination. Topics include molecular distance geometry, potential energy minimization, and molecular dynamics simulation.

BCB 599. Creative Component. Cr. arr.

Courses for graduate students

BCB 690. Student Seminar in Bioinformatics and Computational Biology. Cr. 1. Repeatable. S. Student research presentations.

BCB 691H. Faculty Seminar in Bioinformatics and Computational Biology. (Cross-listed with GDCB). (1-0) Cr. 1. Repeatable. Faculty research series. H. Bioinformatics and Computational Biology. (Same as GDCB 691H).

BCB 697. Graduate Research Rotation. Cr. arr. F.S.S. Graduate research projects performed under the supervision of selected faculty members in the Bioinformatics and Computational Biology major.

Biological/Premedical Illustration

www.bpmi.iastate.edu

(Interdepartmental Undergraduate Program)

Program Committee: Lynn G. Clark, Chair; Dean Biechler, John Dorn, Stanley W. Harpole, Steven M. Herrnstadt, Harry Horner, Don Sakaguchi.

Undergraduate Study

The interdepartmental undergraduate BPI major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of “communicating science through art,” the major prepares students for careers in biological illustration or for graduate education in medical illustration elsewhere. Graduates enter fields such as biocommunications, environmental display design, free-lance illustration, museum display design, and various careers in the publishing industry.

Entrance into the BPI program is by application to the BPI Advisory Committee. Eligibility is based on an academic standard of at least 2.00 CGPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or other art work. Freshman and transfer students usually declare pre-BPI as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

To earn the B.A. degree offered by the College of Liberal Arts and Sciences, students must complete the general education requirements in that college and take at least 41 credits in design and 32 credits in the biological sciences. Design courses include: Den S 131 and Art 230, Art/S 233, 308, and 330, BPI 123, 326, 327, 337, and 497 plus 12 credits chosen from a list of approved upper level courses in art and design. Biological science courses include: LAS 101, Biol 211, 211L, 212, 212L, 255, 256, 351. Biol 356 or 366 or 456, and at least 9 credits chosen from a list of approved biological sciences courses. Chemistry and Mathematics are also required as supporting courses. Students must earn a grade of C+ or better in all art and science courses included in the major and must earn a cumulative GPA of 2.00 in both categories. A brochure is available in 102 Catt Hall that gives a detailed listing of the requirements.

Communication Proficiency Requirement. Students must earn a minimum of C in both English 150 and 250 or equivalent composition courses and in one advanced writing course numbered Engl 302 through 316.

Students in BPI must complete a senior project or an internship experience (BPI 497) in which they design and produce artwork that is suitable for publication or public display.

A minor in biological illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological science courses and 9 credits in art and design courses. The biological sciences must include Biol 211, 211L, 212, and 212L. The art and design courses must include BPI 123 and 337, and an advanced drawing, illustration, electronic media, or painting course. For more information, contact the BPI advisor in 102 Catt Hall or view the website listed above.

Courses primarily for undergraduate students

BPM 132. Scientific Illustration Principles and Techniques. (Cross-listed with ArtIS). (0-4) Cr. 3. Repeatable. F. Prereq: 6 credits in art and design and 3 credits in biological sciences. Studio basics and professional techniques in black & white, continuous tone, and color. Emphasis on tools, materials, and rendering.

BPM 137. Illustration as Communication. (Cross-listed with ArtIS). (0-6) Cr. 3. S. Prereq: 326. Studio problems in illustration emphasizing composition and communication. Problem solving methodologies.

BPM 137. Application of Scientific Illustration Techniques. (Cross-listed with ArtIS). (0-6) Cr. 3. Repeatable. S. Prereq: 327 Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

BPM 139. Field Illustration. Cr. arr. Repeatable. S.S. Prereq: Permission of instructor. A combination seminar and field trip course emphasizing nature interpretation, field sketching techniques and preparation of a final illustration based on field experience.

BPM 139. Cooperative Education. Cr. R.F.S.S. Prereq: Permission of the program cooperative education coordinator, junior classification. Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

BPM 143L. Illustrating Nature I Sketching. (Cross-listed with la LL). Cr. 2. SS. Sketching plants, animals and terrain. Visual communication, development of a personal style, and integration of typographic and visual elements on a page will be emphasized.

BPM 143L. Illustrating Nature II Photography. (Cross-listed with la LL). Cr. 2. SS. Beginning to intermediate technical and compositional aspects of color photography of natural areas and their plants and animals.

BPM 140. Independent Study. Cr. arr. Repeatable. Prereq: Written approval of instructor and advisory committee chair on required form in advance of semester of enrollment.

BPM 140. Special Topics in Illustration. Cr. arr. Repeatable. Intensive exploration of illustration techniques in a studio or field setting.

BPM 140. Illustration Internship. Cr. arr. Repeatable. Prereq: Junior or senior classification in BPM I, written approval of supervising instructor and advisory committee chair on required form in advance of semester of enrollment. Satisfactory-fail only.

Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering

Rameshwar Kanwar, Chair of Department

Distinguished Professor: Brown

Distinguished Professor (Emeritus): H. Johnson

University Professor: Bern

University Professor (Emeritus): Baker

Professors: Chen, Downing, Glanville, Harmon, Hoff, Hurburgh, L. Johnson, Kanwar, Misra, Schwab, Van Leeuwen, Xin

Professors (Emeritus): Beer, Bekkum, Buchele, Bundy, Hazen, Hoerner, Kenney, Lovely, Maney, Mangold, Marley, Melvin, Miller, Pederssen, Riley, R. Smith
Courses primarily for undergraduate students

BSE 110. Experiencing Biological Systems Engineering. (0-2) Cr. 1. S. Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of biological systems engineering. Report writing, co-op internships, careers, registration planning.

BSE 201. Entrepreneurship and Internship Seminar. (Cross-listed with A E, TSM). (1-0) Cr. 1 F. Prereq: Sophomore classification in AE, A E, BSE, or I Tec; 8 week course. Overview of the entrepreneurial process and its interaction with the economy and the engineering/technical workplace. Preparation for internship experiences. Relationships of workplace competencies to entrepreneurship, intrapreneurship, and internships; portfolios.

BSE 216. Fundamentals of Agricultural and Biosystems Engineering. (Cross-listed with A E). (2-2) Cr. 3. S. Prereq: A E 110, Engr 160, credit or enrollment in Math 168. Application of mathematics and engineering sciences to mass and energy balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of heat and mass transfer, air and water vapor systems; animal production systems, grain systems; food systems; hydrologic systems, and bioprocessing.

BSE 301. Leadership and Ethics Seminar. (Cross-listed with A E, TSM). (1-0) Cr. 1 F. S. Prereq: 201; 8 week course. Leadership and ethics experiences through case studies and seminar presentations by practitioners. Relationship of workplace competencies to leadership and ethics; portfolios.

BSE 380. Principles of Biological Systems Engineering. (3-0) Cr. 3. S. Prereq: 216, Ch 357 or M E 336. Unit-operation analysis of biological systems, through the study of mass, energy, and information transport in biosource production and conversion systems. Quantification and modeling of biomass production, ecological interactions, and bioreactor operations.

BSE 411. Bioprocessing and Bioproducts. (Dual-listed with 511). (Cross-listed with A E, BioE, C E). (3-0) Cr. 3. S. Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation.

BSE 416. Agricultural Engineering Design II. (Cross-listed with A E). (2-1) Cr. 2. F. S. Prereq: 415. Selection of promising solutions to design problems identified in 415 for development by design teams. Presentation of designs through oral and written reports and prototypes. Nonmajor graduate credit.

BSE 480. Engineering Analysis of Biological Systems. (Dual-listed with 580). (Cross-listed with EnSci). (2-2) Cr. 3. F. S. Prereq: 216; Math 266; Biol 211 or 212; M E 330. Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of biosource production and conversion systems.

Global energy and resource issues and the role of biologically derived materials in addressing these issues.

BSE 511. Bioprocessing and Bioproducts. (Dual-listed with 411). (Cross-listed with A E, BRT, C E). (3-0) Cr. 3. F. S. Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass-energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

BSE 580. Engineering Analysis of Biological Systems. (Dual-listed with 480). (Cross-listed with EnSci). (2-2) Cr. 3. F. S. Prereq: 216; Math 266; Biol 211 or 212; M E 330. Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of biosource production and conversion systems.

Global energy and resource issues and the role of biologically derived materials in addressing these issues. Students enrolled in A E 580 will be required to answer additional exam questions and report on two journal articles.

Biology

www.biology.iastate.edu

(Interdepartmental Undergraduate Program)
James T. Colbert, Program Coordinator

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation's leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State's Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution and Organismal Biology and the Department of Genetics, Development and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career choices reflecting advantage of the university's strengths in science and technology. A bachelor's degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Undergraduate Study

Biology majors, start their studies in the biological sciences by taking a unified biology core curriculum consisting of six integrated courses, five with labs. The first year (Biol 211, 211L, 212, 212L) provides a broad introduction to the nature of life. During the first year, students also take Biol 110 and 111, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. The second year explores concepts in ecology in Biol 312 and the principles of genetics in Biol 313 and 313L. The third year includes courses in cell and molecular biology (Biol 314, 314L) and evolutionary biology (Biol 315). Biology majors must take 20 credits of biological science at the 300 level or above from an approved list of courses. Of these, at least 8 credits must be taken as biology courses, and a minimum of two laboratory or field courses must also be included. Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Contact the Biology Program Office for details regarding differences in general education and course requirements which are specific to these colleges.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one or more of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. The Biology Program has identified areas of special interest for many disciplines within Biology, with supporting 300-, 400-, and 500-level courses, enabling majors to gain substantial experience in these areas prior to graduation. Faculty advisers with experience in these subject areas work with students to provide advice about preparing for future training in a range of Biology-related professions. Consult the Biology Program advising staff for more information.

Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major; advanced students should consider including 500 level courses in their programs. Check the Biology Program's World Wide Web site for a complete listing of acceptable upper-level science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

Courses offered at other locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in
the biology major. Courses in field and aquatic biology are offered at the Iowa Lakeside Laboratory. Courses in marine biology can be taken at the Gulf Coast Research Laboratory in Mississippi. Iowa State University is a member of the Organization for Tropical Studies, and students may take courses at the organization's field Station in Costa Rica. Courses taught at field Stations associated with other universities throughout the country may also be applied to the degree. Attending a summer field Station adds an important component to an undergraduate program of study.

Courses Offered at Iowa Lakeside Laboratory at Milford, Iowa
Iowa Lakeside Lab is an Iowa Regents facility located at Lake Okoboji in northwest Iowa where various summer courses in field and aquatic biology are offered. Any of the following courses taken at the lab are directly applicable to the degree program in Biology. See the Iowa Lakeside Laboratory entry elsewhere in the catalog for a full description of the courses.

Courses Offered at Gulf Coast Research Laboratory
The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number Biol 480. Written permission of the Biology Program Director is required for this arrangement. Courses that are available each summer may be viewed at www.coms.usm.edu.

Courses offered at Summer Biological Field Stations
Courses taken at summer field Stations may be transferred to Iowa State University as credit in Biol 481. Such Stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu for links to field Stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts.

Courses offered by the Organization for Tropical Studies
Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as Biology 482. For further information check www.ots.duke.edu or inquire in the Biology Program Office.

Undergraduate research.
Students who have interest in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in Biol 490. Internship experiences are often available at other universities and at industrial or government laboratories. Students participating in such projects may receive internship credit in Biol 494. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education.

International experience.
Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in Biol 394 or similar courses in other departments. Most students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in Emerging Global Disease, International Studies, or a foreign language can add an international emphasis to a degree in biology. Biology advisers are eager to help plan and arrange such experiences with interested students.

Supporting course requirements.
Understanding the modern biological sciences requires an understanding of the physical and Mathematical sciences. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics are required. See the Biology Program Website for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take: two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Website and in the Biology Program Office.

Students in the College of Liberal Arts and Sciences, must fulfill the foreign language and general education requirements listed elsewhere in this catalog for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college as listed elsewhere in the catalog.

Given the important role of writing in the modern sciences, biology majors must demonstrate English competency by earning a minimum of C in both English 150 and 250 or equivalent composition courses and in one advanced writing course numbered English 302 through 316, or Jl MC 347.

Customizing a degree.
The advantage of choosing a biology major is the flexibility it allows in customizing a program of study to individual goals. That said, the faculty recognizes that many students studying biology have common goals. Consequently, the faculty has developed specific recommendations for students interested in pursuing the following areas of study:

Teacher Licensure. Biology majors seeking licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Premedical and Prehealth Professions Studies. Biology majors who will go on to medical or health professional schools are urged to determine the entrance requirements for the institutions where they might study. A list of courses recommended for those who wish to pursue a pre-med curricula is available in the Biology Program office.

Preveterinary Studies. Many students whose goal is to attend between humans and their environment the Preveterinary Program. Discussions in the topic of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Satisfactory-fail only.

Biol 111. Opportunities in Biology. (1-0) Cr. 0.5. S. Introduction to the scope of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Satisfactory-fail only.

Biol 155. Human Biology. (3-0) Cr. 3. F.S. A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science.

Biol 165. Field Botany. (2-4) Cr. 2. F.S. 8 weeks. Field and laboratory studies of plants in various local habitats. Includes trees, shrubs, flowering plants and other green plants, lichens and fungi. Not recommended for students with professional interest in plant science.

Biol 173. Environmental Biology. (Cross-listed with Env S). (3-0) Cr. 3. F.S. An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and the environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Non-majors only.

Biol 211. Principles of Biology I. (3-0) Cr. 3. F.S. Prereq: High school biology and chemistry or credit or enrollment in Chem 163 or 177. Introduction to the nature of life, including the cellular basis of life, the nature of heredity, evolution; diversity of microbial, plant, and animal life; and principles of ecology. Intended for life science majors. Only one of Biol 101 or 211 may count toward graduation.
2009-2011
Biol 211L. Principles of Biology Laboratory I. (0-3)
Cr. 1. F.S. Prereq: Credit or enrollment in 211. Laboratory to accompany 211.
Biol 212. Principles of Biology II. (3-0) Cr. 3. F.S.
Prereq: 211. Introduction to the nature of life, including
the cellular basis of life; energy relationships; the
nature of heredity; evolution; form and function of
microbial, plant, and animal life.
Biol 212L. Principles of Biology Laboratory II. (0-3)
Cr. 1. F.S. Prereq: credit or enrollment in 212. Laboratory to accompany 212.
Biol 255. Fundamentals of Human Anatomy. (3-0)
Cr. 3. F. Prereq: high school biology and chemistry,
or Biol 101. An introduction to human anatomy,
beginning with cells and tissues, surveying all body
systems, relating form to function. Systems covered
include: integumentary, bones and joints, muscles,
nervous, sensory, endocrine, circulatory, lymphatic,
respiratory, digestive, urinary, and reproductive. PreMedical students should consider Biol 351 for their
anatomy background. Not intended for major credit
in biology.
Biol 255L. Fundamentals of Human Anatomy
Laboratory. (0-3) Cr. 1. F. Prereq: Credit or enrollment
in 255. Investigation of human anatomy using models
and dissections of preserved organs and model
mammals. Pre-Medical students should consider 351
for their anatomy background. Not intended for major
credit in biology.
Biol 256. Fundamentals of Human Physiology. (3-0)
Cr. 3. S. Prereq: high school biology and chemistry, or
Biol 101, or 255 (recommended). An introduction to
human physiology, studying the function of all body
systems. Systems covered include: integumentary,
bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic and immune, respiratory,
digestive, urinary, and reproductive. Pre-Medical
students should consider 335 for their physiology
background. Not intended for major credit in biology.
Biol 256L. Fundamentals of Human Physiology
Laboratory. (0-3) Cr. 1. S. Prereq: Credit or enrollment
in 256. Student-conducted experiments investigating
concepts of human physiology with computer data
acquisition and analysis. Interpretation of experimental results and preparation of lab reports. Pre-Medical
students should consider 335 for their anatomy and
physiology background. Not intended for major credit
in biology.
Biol 258. Human Reproduction. (Cross-listed with
W S). (3-0) Cr. 3. F. Prereq: Biol 101, or 155, or 211.
Anatomy and physiology of human reproductive systems, including fertility, pregnancy, and delivery.
Biol 305. Embryology. (2-0) Cr. 2. S. Prereq: 212. Basic principles and processes of development. Course
will cover classical as well as current aspects of developmental biology. Emphasis will be on vertebrate
model systems. Not acceptable for credit in the major
for Biology or Genetics major.
Biol 305L. Embryology Laboratory. (0-3) Cr. 1. S.
Prereq: Credit or enrollment in 305. Selected experiments demonstrating basic concepts in development.
Mixture of live embryo experiments and vertebrate
developmental anatomy.
Biol 306. Metabolic Physiology of Mammals.
Cr. 3. Prereq: 211, 212. Introduction to physiology of
metabolic function in mammals and other animals.
Metabolic processes and their interactions with
various subsystems, approached form an organismal
perspective. Integration of cellular, gastrointestinal,
cardiovascular, respiratory, and renal processes,
relevant to their control and integration at the nervous
and endocrine system levels. Functional aspects of
organismal physiology; energy and water balances,
physiology of rest exercise, and environmental stress.
Students cannot receive credit for both Biol 306 and
Biol 335
(Cross-listed with W S). (3-0) Cr. 3. F. Prereq: a 200
level course in science, engineering or women’s studies; Engl 250. The interrelationships of women and

Biology
science and engineering examined from historical,
sociological, philosophical, and biological perspectives. Factors contributing to underrepresentation;
feminist critiques of science; examination of successful strategies.
(3-3) Cr. 4. F.SS. Prereq: 211L and 212L. Fundamental
concepts and principles of ecology dealing with organisms, populations, communities and ecosystems.
Laboratory and field exercises examine ecological
principles and methods as well as illustrate habitats.
Biol 313. Principles of Genetics. (Cross-listed with
Gen). (3-0) Cr. 3. F.S. Prereq: 211, 211L, 212, and 212L.
Introduction to the principles of transmission and
molecular genetics of plants, animals, and bacteria.
Recombination, structure and replication of DNA,
gene expression, cloning, quantitative and population
genetics. Students may receive graduation credit for
no more than one of the following: Gen 260, Gen 313
and 313L, Gen 320, Biol 313 and 313L, and Agron
320.
Biol 313L. Genetics Laboratory. (Cross-listed with
Gen). (0-3) Cr. 1. F.S. Prereq: Credit or enrollment in
313. Laboratory to accompany 313. Students may
receive graduation credit for no more than one of the
following: Biol 313 and 313L, Gen 260, Gen 313, Gen
320, and Agron 320.
Biol 314. Principles of Molecular Cell Biology. (3-0)
Cr. 3. F.S. Prereq: Biol 313. Integration of elementary
principles of metabolism, bioenergetics, cell structure
and function to develop a molecular view of how the
cell works.
Biol 314L. Molecular Cell Biology Laboratory. (0-3)
Cr. 1. F.S. Prereq: Credit or enrollment in 314. Laboratory to accompany Biology 314.
Biol 315. Biological Evolution. (3-0) Cr. 3. F.S.
Prereq: 313. The mechanisms of evolution. Topics in
microevolution: population genetics, natural selection,
genetic variation, and adaptation. Macroevolution:
speciation, extinction, phylogeny, and major evolutionary patterns.
Biology 328. Cell Physiology of Human Diseases. (3-0)
Cr. 3. Prereq: 212. Survey of macromolecular and ultrastructural organization of animal cell and membrane
structures, including recent molecular discoveries in
areas of genomics and proteomics involved with cell
growth and cell interactions. Emphasis on selected
topics of cellular functions with known human
disease states.
Biol 330. Principles of Plant Physiology. (3-0)
Cr. 3. Prereq: Biol 313 or Gen 320; Biol 314 or BBMB
301; Chem 231 or 332; Phys 106 or 111. An overview
of classical and current concepts, principles and
approaches regarding the basic mechanisms of plant
function underlying growth, development and survival
of plants. Topics covered include environmental and
developmental signals, plant hormone action, signal
transduction, mineral nutrition, water relations, metabolism and photosynthesis..
Biol 330L. Principles of Plant Physiology Laboratory. (0-3) Cr. 1. Prereq: Credit or enrollment in 330.
Laboratory to accompany Biol 330. Experiments and
explorations illustrating fundamental principles of
plant physiology. Nonmajor graduate credit.
Biol 335. Principles of Animal Physiology. (3-3)
Cr. 4. F.S. Prereq: Biol 314. Introduction to systemic
functions with emphasis on mammals. Nonmajor
graduate credit.
Biology 336. Ecological and Evolutionary Animal
Physiology. (3-0) Cr. 3. Prereq: 211, 212. Study of
mechanisms by which animals perform life-sustaining
functions; the evolution and adaptive significance of
physiology traits, the diversity of physiological mechanisms, and how physiology and ecology interact.
Biol 351. Comparative Chordate Anatomy. (3-4)
Cr. 5. S. Prereq: 212, junior classification. The evolution of chordates as reflected in the anatomy of
extinct and living forms. Lecture topics include the
history and diversity of chordates; comparisons of

157

anatomic structures among major groups, the adaptive significance of anatomic structures. Laboratory
involves dissection of representative species.
Biol 352. Vertebrate Histology. (3-3) Cr. 4. S. Prereq:
212. Microscopic structure of vertebrate tissues and
organs, with an introduction to histological techniques.
Biol 353. Introductory Parasitology. (Cross-listed
with Micro). (3-3) Cr. 4. F. Prereq: Biol 212. Biology
and host-parasite relationships of major groups of
animal parasites, and techniques of diagnosing and
studying parasites.
Biol 354. Animal Behavior. (3-0) Cr. 3. F. Prereq:
212. Ethological and Sociobiological approaches to
animal behavior. Genetic and developmental aspects
of behavior, biological rhythms, orientation (including
navigation, migration), communication, and social
behavior (mating, aggression, parental care).
Biol 354L. Laboratory in Animal Behavior. (0-3)
Cr. 1. F. Prereq: Credit or enrollment in Biol 354. Laboratory techniques for observation, description and
analysis of animal activities; independent projects.
Biol 355. Plants and People. (3-0) Cr. 3. S. Prereq:
Credit in 211 and 211L. Uses of plants and fungi by
humans and the importance of plants in the past,
present and future. Discussion of fruits, vegetables,
grains, herbs, spices, beverages, oils, fibers, wood,
medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern Societies. Emphasis on origins and worldwide diversity of
culturally important plants, their characteristics, and
uses.
Biol 356. Dendrology. (Cross-listed with For). (2-4)
Cr. 4. F. Prereq: Biol 211. Identification and ecology of
North American woody plant species. Importance of
woody plants in timber production and wildlife habitat.
Natural disturbances, human impacts, management
and restoration concerns for major North American
forest regions will be addressed. Nonmajor graduate
credit.
Biol 364. Invertebrate Biology. Cr. arr. F. Prereq:
Biol 212. Emphasis on diversity, development,
physiology and behavior of invertebrate organismsthe “spineless wonders” of the world. Laboratory
involves hands-on study and investigation of living
invertebrates.
Biol 365. Vertebrate Biology. (Cross-listed with
A Ecl). (3-2) Cr. 4. F. Prereq: 212, 212L. Evolution,
biology, and classification of fish, amphibians, reptiles,
birds, and mammals. Emphasis on a comparative
analysis of the structure and function of organ Systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.
Biol 366. Plant Systematics. (2-4) Cr. 4. S. Prereq:
211. Introduction to plant phylogenetic systematics,
plant classification, survey of flowering plant families,
identification and field study of local plants.
Biol 371. Ecological Methods. (Cross-listed with
A Ecl). (2-2) Cr. 3. F. Prereq: 312; Stat 101 or 104.
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. Nonmajor
graduate credit.
Biol 381. Environmental Systems I: Introduction
to Environmental Systems. (Cross-listed with
EnSci, Env S, Micro). (2-4) Cr. 4. F. Prereq: 12 credits
of natural science including Biology and chemistry.
Introduction to the structure and function of natural
environmental systems. Systems approach to the
analysis of material and energy flows in natural environmental systems and the primary environmental
factors controlling these systems. Nonmajor graduate
credit.
Biol 382. Environmental Systems II: Analysis of
Environmental Systems. (Cross-listed with EnSci).
(2-4) Cr. 4. S. Prereq: EnSci 381. Continuation of EnSci
381. Systems approach to the analysis of material and
energy flows in natural environmental systems and
the primary environmental factors controlling these
systems. Nonmajor graduate credit.



Biol 394. International Field Trips in Biology. Cr. arr. Repeatable. Prereq: Two courses in the biological sciences and by approval of application. Extended field trips, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule. A. Pre-trip Seminar. Cr. 1. Discussion of relevant biological and cultural topics during semester preceding trip. B. Field trip. Cr. 1 to 3. Trip to international location under supervision of faculty member. Report required. Offered on a satisfactory-fail grading basis only.

Biol 423. Developmental Biology. (3-0) Cr. 3. S. Prereq: Biol 313. Principles of embryogenesis and animal development. Establishment of body axes, organ and limb development, and specification of cell fates. Emphasis on cell signaling and the control of gene expression within the context of a developing organism. Medically relevant subjects will be discussed, including stem cells, cancer biology, fertilization, and cloning.

Biol 423L. Developmental Biology Laboratory. (0-3) Cr. 1. S. Prereq: Credit or enrollment in 423L. Experiments and explorations illustrating fundamental principles of multicellular development.

Biol 428. Topics in Cell Biology. (3-0) Cr. 3. S. Prereq: 314. Selected topics on biological organization and function at the cellular level. Emphasis on the basis of evolutionary processes in higher organisms. The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change. Nonmajor graduate credit.

Biol 436. Neurobiology. (3-0) Cr. 3. S. F. Prereq: Biol 335 or Psych 310; physics recommended; permission of instructor to enroll in lab. (3-3) for 4 cr. Integration, coding, plasticity, and development in nervous systems. Nonmajor graduate credit.

Biol 436L. Neurobiology Laboratory. (0-3) Cr. 1. S. Prereq: Credit or enrollment in 436L, permission of instructor to enroll in lab. Laboratory experimentation and demonstrations on integration, coding plasticity, and development in nervous systems. Nonmajor graduate credit.

Biol 444. Introduction to Bioinformatics. (Cross-listed with BCB, Com S, Cpr E, Gen). (4-0) Cr. 4. S. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics. Nonmajor graduate credit.

Biol 455. Bryophyte and Lichen Biodiversity. (Dual-listed with EEOB). Cr. 3. S. Prereq: Biol 212, 212L. Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of lichens. Laboratory activities of these three groups of organisms. Required field trips and service-learning. Nonmajor graduate credit.

Biol 457. Herpetology. (Cross-listed with A Ecl). (2-3) Cr. 3. F. Prereq: A Ecl 365 or Biol 351. Dual-listed with EEOB 557. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuataras, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

Biol 458. Ornithology. (Cross-listed with A Ecl). (2-3) Cr. 3. S. Prereq: A Ecl 365 or Biol 351. Dual-listed with EEOB 558. Biology, ecology, evolution, and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory focus on lecturers, comparisons, identification and distribution of Midwestern birds, and include field trips.

Biol 471. Introductory Conservation Biology. (3-0) Cr. 3. S. Prereq: Biol 312. Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

Biol 472. Community Ecology. (2-0) Cr. 3. S. Prereq: Biol 312. The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates. Nonmajor graduate credit.

Biol 480. Studies in Marine Biology. Cr. arr. Repeatable. Courses taken at Gulf Coast Research Laboratory and other marine biological Stations are transferred to Iowa State University under this number. See www.biology.iastate.edu for links to field Stations located in different biomes: coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mountains.

Biol 482. Tropical Biology. Cr. arr. Repeatable. Prereq: One year of college biology; knowledge of Spanish desirable but not required. Students registering for courses taught by the Organization for Tropical Studies will receive credit for this ISU course when requesting a transfer of credits.

Biol 486L. Aquatic Ecology Laboratory. (Cross-listed with A Ecl, EnSci). (0-3) Cr. 1. F. Prereq: Concurrent enrollment in 486L. Dual-listed with EEOB 586L. Field trips and laboratory exercises to accompany 486L. Hands-on experience with aquatic research and monitoring techniques and concepts. Nonmajor graduate credit.

Biol 487. Microbial Ecology. (Cross-listed with EnSci, Micro). (3-0) Cr. 3. S. Prereq: Six credits in biology and 6 credits in chemistry. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

Biol 489. Population Ecology. (2-0) Cr. 3. S. Prereq: Biol 312, Stat 101 or 104, a course in calculus, or graduate standing. Dual-listed with EEOB 589. Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

Biol 490. Independent Study. Cr. arr. Repeatable. Prereq: 8 credits in biology and permission of instructor. Research opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biology may be counted toward graduation and of those, only 6 credits may be applied to the major. I. Iowa Lakeside Laboratory. (Same as La LL 490) Cr. 1 to 4 each time taken. See Iowa Lakeside Laboratory. R. Biological research. Cr. 1 to 6 each time taken. For students registering to work on an independent research project under the direction of a faculty member.

Biol 491. Laboratory Teaching Experience. Cr. arr. Repeatable. Prereq: Permission of supervising staff. For students registering to be undergraduate laboratory assistants. Satisfactory-fail only.
Biol 494. Biology Internship. Cr. arr. Repeatable. Prereq: 8 credits in biology and permission of instructor. Intended to provide credit for significant professional experiences in biological sciences. A written proposal is required prior to registration. Intended for Biology majors.

Biol 495. Undergraduate Seminar. Cr. arr. Repeatable. F.S. Prereq: 15 credits in biological science; permission of instructor. Content varies from year to year and may include detailed discussion of special topics in biology, current issues in biology, or careers in biology.

Biol 498. Cooperative Education. Cr. R. Repeatable. F.S.S. Prereq: Junior classification and permission of the department cooperative education coordinator. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Biomedical Sciences

James Bloedel, Chair of Department

Distinguished Professors: Anderson, Kanthasamy
Distinguished Professors (Emeritus): Christensen, Dellmann

University Professor: Draper

University Professors (Emeritus): Adams, Reece

Professors: Bloedel, Evans, Franke, Goff, Hsu, King, Lin, Martin, Nara, Riedesel, Sharp, Uemura, Ware

Professors (Emeritus): Ahrens, Bal, Carithers, Dyer, Engen, Ghoshal, Randic

Associate Professors: Bracha, Carlson, Day, Jeffinina, Millman, Sakaguchi, Singh

Associate Professors (Collaborators): Hamouche, Kangas, Rich, Milman, Sakaguchi, Singh

Assistant Professors: M. Greenlee, Kanthasamy, Kimber, Palic, Rowe

Assistant Professor (Adjunct): Singh

Assistant Professors (Collaborators): Barton, J. Greenlee, Kes, Kwon

Senior Lecturer: Bolser

Lecturer: Kibbel

Professional Program of Study

For professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum. A good foundation in anatomy, physiology, and pharmacology of animals is necessary to understand the mechanisms of animal disease processes and their treatment. Study of mammalian anatomy and physiology prepares students with a background in the structural and functional activities of cells, tissues, organs, and body systems relevant to veterinary medicine.

An understanding of drug action is essential for rational drug therapy. The general pharmacology courses provide students with a background in basic pharmacodynamics, toxicology, and the clinical application of drugs. Special emphasis is placed on chemical agents and therapeutic practices specific to veterinary medicine.

Graduate Programs

The department offers Master of Science and Doctor of Philosophy degrees with a major in Biomedical Sciences and specializations in Anatomy, Physiology, Pharmacology, and Cell Biology. Up to 10 credits of dual-listed veterinary courses may be applied for major graduate credit. Departmental research facilities allow for training in experimental anatomy, pharmacology, and physiology. Graduate studies are supervised by faculty members recognized in their areas of expertise. Current areas of research include: Alzheimer’s disease, aquatic animal health, calcium and mineral homeostasis, diabetes mellitus, glia-neuron signaling, neurophysiology of pain, neurotoxicology, physiology and pharmacology of nematode ion-channels, Parkinson’s disease, physiology of schistosomiasis, pharmacology of salmonellosis, physiology and pharmacology of thalamic neurons, physiology of the retina, Spinal Muscular Atrophy, and study of neural stem cells. The objective of the department is to prepare graduate students for successful careers in biomedical research and professional service. The department is part of interdepartmental programs in neuroscience, toxicology, and molecular, cellular, and developmental biology. The combined Ph.D./DVM program is an option offered by the department.

Courses primarily for undergraduate students

B M S 329. Anatomy and Physiology of Domestic Animals. (3-0) Cr. 3. S. Prereq: Biol 212, 212L. Survey of body systems of domestic animals. Provides a medical science orientation particularly useful to students in a preveterinary medicine curriculum.

Courses primarily for professional curriculum students

B M S 333. Biomedical Sciences I. (5-3) Cr. 6. S. Prereq: First-year classification in veterinary medicine. Microscopic anatomy and physiology of cells, tissues, cardiovascular system, respiratory system, and urinary system.

B M S 334. Biomedical Sciences II. (5-3) Cr. 6. S. Prereq: First-year classification in veterinary medicine. Microscopic anatomy of the immune system and integument. Microscopic anatomy and physiology of the digestive system, endocrine system, and reproductive system.

B M S 346. Case Study II. (0-1) Cr. 1. S. Prereq: First-year classification in veterinary medicine. Clinical applications of basic sciences taught concurrently in the spring semester of the first year curriculum in veterinary medicine.

B M S 354. General Pharmacology. (Dual-listed with 554). (3-0) Cr. 3. S. Prereq. 333, 334. General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems. Nonmajor graduate credit.

B M S 355. Topics in Molecular Veterinary Medicine. (Dual-listed with 555). (1-0) Cr. 1. S. Prereq: Enrollment in or completion of 354. Receptor and signal transduction anomalies and their diagnosis in veterinary medicine.

B M S 401. Intro to Aquatic Animal Medicine. (Cross-listed with A Ecl). (1-2) Cr. 1. S. 8 week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, and current research. Field trip to aquaculture facility.

B M S 421. Special and Applied Anatomy of the Horse. (1-3) Cr. 2. F. Prereq: 330 or 331 or Art S 316 or 415. Classification in veterinary medicine. Special and applied anatomy of the horse. Nonmajor graduate credit.

B M S 443. Pharmacology and Therapeutics. (Dual-listed with 543). (3-0) Cr. 3. F. Prereq: 354. Pharmacology and therapeutic uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions.

B M S 496. International Preceptorship. (0-40) Cr. arr. Repeatable. S. Prereq: Second-year classification in veterinary medicine. International Preceptorships and Study Abroad Group programs. This course will provide opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses primarily for graduate students, open to qualified undergraduate students

B M S 501. Selected Research Methods in Biomedical Sciences. (0-8) Cr. 3. F.S.S. Prereq: Graduate classification, permission of a BMS faculty member. Experience in biomedical techniques in selected BMS laboratories that include but is not limited to cytometry and chemistries, molecular techniques, extracellular and intracellular unit recording, microiontophoresis, microinjection, spectrophotofluorometric analysis of chemicals, use of radiotopes, radiomunoassay, Ca2+ imaging, confocal microscopy, fluorescence microscopy, and immunocytochemistry.

B M S 530. Principles of Morphology I. (Dual-listed with 330). (3-6) Cr. 3. F. Prereq. 10 credits in biological science and permission of the instructor. Anatomy of the dog.

B M S 537. Neuroanatomy. (Dual-listed with 337). (2-2) Cr. 3. S. Prereq. 10 credits in biological science and permission of the instructor. Neuroanatomy of domestic animals.
Courses for graduate students

A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. F.S.S.S.
B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. (S.S.S.)
C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)
D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)
E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F)

B M S 543. Pharmacology and Therapeutics. (Dual-listed with 443.) (3-0) Cr. 3. F. Prereq: 566. Pharmacology and therapeutic uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions.

B M S 549. Advanced Vertebrate Physiology I. (Cross-listed with An S, Kin.) (3-0) Cr. 3. F. Prereq: Biol 335, credit or enrollment in BBMB 404 or 420. Neurophysiology, sensory systems, muscle, neuroendocrinology, and endocrinology.

B M S 552. Advanced Vertebrate Physiology II. (Cross-listed with An S, Kin, NutrSI.) (3-0) Cr. 3. S. Prereq: Biol 335, credit or enrollment in BBMB 404 or 420. Cardiovascular, renal, respiratory, and digestive physiology.

B M S 554. General Pharmacology. (Dual-listed with 554.) (Cross-listed with Tox.) (3-0) Cr. 3. S. Prereq: 549 and 562; BBMB 404, 406. General principles: drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems.

B M S 555. Topics in Molecular Veterinary Medicine. (Dual-listed with 355.) (1-0) Cr. 1. S. Prereq: Enrollment in or completion of 554 and graduate classification. Receptor and signal transduction anomalies and their diagnostic applications.

B M S 556. Cellular, Molecular and Developmental Neuroscience. (Cross-listed with GDCB, Neuro.) Cr. arr. F. Prereq: Biol 335 or Biol 436; physics recommended. Fundamental principles of neurosciences including cellular and molecular neuroscience, nervous system development, sensory, motor and regulatory systems.

B M S 575. Cell Biology. (Cross-listed with Tox.) (3-0) Cr. 3. F. Prereq: 10 credits in biological science and permission of instructor: A multi-instructor course covering major topics in cell structure and function, including: universal features of prokaryotic and eukaryotic cells, types of utilization and conversion of energy, genetic control of cell shape and functionality, internal organization of cells, communication between cells and their environment, development of multicellular systems. Students have to write a term paper.

A. Anatomy
B. Physiology
C. Pharmacology
D. Cell biology

Biorenewable Resources and Technology

www.biorenew.iastate.edu

(Interdepartmental Graduate Program)

D. R. Raman, Chair
Program Coordinating Committee: R. Anex, R.C. Brown, L. Johnson, G. Kraus, M. Liebman, B. Nikolau, B. Shanks
Over 60 Iowa State University faculty members from 16 academic departments and five colleges are affiliated with the Biorenewable Resources and Technology (BRT) graduate program; a complete and up-to-date listing is maintained at: www.biorenew.iastate.edu.

Graduate Study

The graduate program in Biorenewable Resources and Technology (BRT) offers students advanced study in the use of plant and crop-based resources in the production of biobased products (fuels, chemicals, materials, and energy). The BRT program was the first graduate program in biorenewable resources established in the United States. This multi-disciplinary program offers the degrees of master of science and doctor of philosophy in Biorenewable Resources and Technology, and a minor to students taking major work in other departments. The curriculum is designed to encourage students to obtain co-major degrees in Biorenewable Resources and Technology and a more traditional science or engineering discipline. A thesis is required for the master of science degree.

Prerequisite to major graduate work is a bachelor’s degree or prior graduate training in engineering or a physical or biological discipline, including agricultural sciences.

The core required courses in the Biorenewable Resources and Technology graduate program include:

- A foundation course entitled BRT 501 “Fundamentals of Biorenewable Resources”
- BRT 506 “Biobased Products Seminar”
- BRT 590 “Special Topics”
- And BRT 591L “Biorenewable Resources Laboratory”

The elective core courses must come from an approved list of courses from a variety of traditional disciplines encompassing one or more of four areas crucial to the development of biobased products: plant science, production, processing, and utilization. Students must complete elective core courses from at least three of the four topical areas, selected in consultation with the student’s Program of Study (POS) committee.

Graduates of the program will be equipped with skills to develop and manage cost effective and environmentally attractive technologies for producing fuels, chemicals, materials, foods and energy from renewable plant biomass.

Information on application procedures and specific requirements of the major can be obtained from the following Internet address: www.biorenew.iastate.edu

Courses primarily for graduate students, open to qualified undergraduate students

BRT 501. Fundamentals of Biorenewable Resources. (3-0) Cr. 3. S. Prereq: Undergraduate training in an engineering or physical or biological discipline or degrees in agriculture or economics. Introduction to the science and engineering of converting biorenewable resources into bioenergy and biobased products. Survey of biorenewable resource base and properties; description of biobased products; methods of biorenewable resource production; processing technologies for fuels, chemicals, materials, and energy; environmental impacts; economics of biobased products and bioenergy.

BRT 506. Biobased Products Seminar. Cr. arr. F. Prereq: Undergraduate training in an engineering or physical or biological discipline or degrees in agriculture or economics. Taken one semester for 1 credit and remaining semesters as R credit. Seminars and discussion on current topics in biorenewable resources and technology. Satisfactory-fail only. A. Cr. 1. Paper required. B. Cr. R. Attendance only.

BRT 511. Bioprocessing and Bioproducts. (Cross-listed with A E, BSE, C E.) (3-0) Cr. 3. F. Prereq: A E 218 or equivalent, Math 166 or 165, one of Chem 167 or higher, Biol 101 or higher (or BRT 501, senior or graduate classification). Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrocatalysis, microbial fuel cells, nanotechnology, genetic engineering, transgenics. Term paper for graduate level only.

BRT 535. Thermochemical Processing of Biomass. (Cross-listed with M E.) (3-0) Cr. 3. S. Prereq: Undergraduate course work in thermodynamics and transport phenomena. Introduction to thermal and catalytic processes for the conversion of biomass to biofuels and other biobased products. Topics include gasification, fast pyrolysis, gasification, syngas to synfuels, and bio-oil upgrading. Application of thermodynamics, heat transfer, and fluid dynamics to bioenergy and biofuels.

BRT 590. Special Topics. Cr. arr. Repeatable. F.S.S.S. Prereq: Permission of instructor. Investigation of an approved topic on an individual basis. Course content and requirements to be designed and developed in consultation with the student’s major professor or instructor, but in all cases a formal report should be written.

BRT 591L. Biorenewable Resources Laboratory. (0-0) Cr. 1. Repeatable. F.S.S.S. Prereq: Permission of student’s major professor and instructor. A laboratory report is required. For student in the BRT program, BRT 591L may be taken twice. For student in the BRT program, BRT 591L may be taken twice.

Courses for graduate students

Botany
www.eeob.iastate.edu
Interdepartmental Graduate Major
Robert S. Wallace, Director of Graduate Education

Undergraduate Study
Students wishing to pursue an undergraduate degree in the basic plant sciences are encouraged to investigate the numerous possibilities available to them at Iowa State University. The undergraduate Biology Program, jointly administered by the departments of Ecology, Evolution, and Organismal Biology (EEOB) and Genetics, Cell and Developmental Biology (GDCB), includes a wide spectrum of opportunities for students to develop their academic interests through the study of plant biology. Students can major in Biology in the College of Liberal Arts and Sciences or in the College of Agriculture. Contact the Biology Student Services office in 103 Bessey Hall for general information about the Biology Program. For those students interested in applied plant sciences, undergraduate majors in Agronomy, Horticulture, and Forestry are also available through the College of Agriculture.

Graduate Study
The Botany Graduate Program offers work for the degrees Master of Science and Doctor of Philosophy with a graduate major in Botany, and minor work for students majoring in other departments or graduate programs. Within the Botany Graduate Major, one of the following areas of specialization may be designated: aquatic and wetland ecology, cytology, ecology, morphology, mycology, physiology and molecular biology, or systematics and evolution. Relevant graduate courses that may be counted toward completion of these degrees are offered by the departments of EEOB and GDCB, and by other departments and programs. The specific requirements for each student’s course distribution and research activities are set by the Program of Study Committee established for each student individually, and must satisfy all requirements of the Graduate College. Undergraduate students majoring in Botany are encouraged to contact the Botany Graduate Program Director of Graduate Education, Dr. Robert Wallace (rwallace@iastate.edu) for specific details about the program’s status and application procedures.

Business Administration
Labh S. Hira, Dean

Undergraduate Study
Kay M. Palan, Professor in charge, Undergraduate Programs in Business.
For undergraduate curriculum leading to the degree bachelor of science, majors in accounting, business economics, finance, management, management information systems, marketing, operations management, and supply chain management, and a minor in international business, see College of Business, Curricula.
The department of Business Administration supports undergraduate programs in the departments of Accounting, Finance, Logistics, Operations, and Management Information Systems, Management, and Marketing by providing specialized coursework in orientation to business, and cooperative education opportunities.

Graduate Study
Michael Crum, Professor in Charge, Graduate Programs in Business.
The College of Business offers work towards two graduate programs in business administration: the master of business administration (M.B.A.) and the master of science (M.S.), which are described below. The college also has two specialized master degree programs: the master of accounting (M.Acc.), which is described under the Department of Accounting and the master of science in information systems (M.S.I.S.) which is described under Management Information Systems. The college also offers a Ph.D. in business and technology, with specialization in customer management, supply chain management, and management of information technology. Finally, the College of Business is a participating member of the following interdepartmental programs: master of science in transportation, master of science in seed technology and business, master of science and Ph.D. in human computer interaction, and master of science in information assurance.

Master of Business Administration (M.B.A.)
The College of Business offers a 48 credit program leading to a nonthesis master of business administration degree with a specialization in accounting, agribusiness, family financial planning, finance, information systems, international business, marketing, or supply chain management. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The M.B.A. is the professional management education program for those pursuing careers in business.

Students working toward the M.B.A. are required to complete a series of core courses in the basic functional areas of business (accounting, economics, statistics, finance, supply chain management, organizational behavior, management information systems, marketing, international business, ethics and social responsibility, strategic management), and advanced elective coursework.

Courses for the M.B.A. are provided by the departments of Accounting, Economics, Finance, Logistics, Operations and Management Information Systems, Management, Marketing, and Statistics. Courses from other departments may also be chosen to meet specific student interests.

A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in civil, computer, electrical, industrial, or mechanical engineering. The College of Business and the College of Veterinary Medicine offer a concurrent M.B.A./D.V.M. degree.

Double master’s degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.C.R.P./M.C.R.I.), information systems (M.B.A./M.S.I.S.) and Statistics (M.B.A./M.S.-Statistics).

Students may enroll in the M.B.A. on either a full-time or part-time basis. The part-time M.B.A. is designed for employed professionals. Part-time MBA classes are held in the evenings in Ames and Des Moines.

The M.B.A. program is open to all individuals with a baccalaureate degree. Undergraduates from liberal arts, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit Graduate Management Admission Test (GMAT) scores, official transcripts of previous academic work, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) scores. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) scores.

Business Administration 161
Ph.D. in Business and Technology

The College of Business offers graduate work leading to the doctor of philosophy degree in business and technology, with one of three specializations—customer management (CM), supply chain management (SCM), or management of information technology (MIT). Many departments in the college (Logistics, Operations, Management Information Systems, marketing and Management), and the departments of Statistics, Economics, Psychology and Sociology cooperate in providing coursework toward this degree. The program will prepare individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by a 12-credit thesis or dissertation.

Students do not need to have an undergraduate or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 hours of business foundation requirements. These include:

- Financial and managerial accounting (min. 2 Cr)
- Corporate finance (min. 2 Cr)
- Strategic management (min. 2 Cr)
- Management information systems (min. 2 Cr)
- Marketing (min. 2 Cr)
- Supply chain management (min. 2 Cr)
- Economics — micro and macro (min. 6 Cr)

Students can choose one of three areas of specialization—CM, SCM or MIT. The customer management (CM) area will focus on identification and delivery of solutions that help improve the ways in which businesses attract, capture, service and maintain customers. To do these activities well, organizations will need to integrate process goals and activities across different functional areas and across multiple organizational partners. This area of study will examine issues relating to inter-functional and inter-organizational relationships and their management in pursuit of maximizing the lifetime value of a businesses’ customer base.

The supply chain management (SCM) specialization will focus on supply chain development, and control of business processes for conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems included as well. However, in today’s world, where competition is across supply chain networks, SCM, just like CM, will involve integrating business processes across firms.

The management of information technology (MIT) specialization examines issues related to the development, building, management, and use of information and business technologies. Such technologies enable users to collect organizing data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. The MIT specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

Programs of study for the doctoral study are designed for each student in consultation with the major professor and the student’s PhD committee. Each student must complete advanced courses in their area of specialization, a minor area that supports the major area, and research methods. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

Application deadline for the Ph.D. program is February 1 for fall admission. Applicants must submit official transcripts of previous educational coursework and complete Management Admission Test (GMAT) scores, personal essays, resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

Courses primarily for undergraduate students

BusAd 101. Orientation. (1-0) Cr. 0.5 S. First 8 weeks. A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Either BusAd 101 or 102 may be counted towards graduation. Satisfactory-fail only.

BusAd 101H. Orientation. (1-0) Cr. 0.5 F. Prereq: Membership in the Freshman Honors Program. Designed to supplement the Freshman Honors Orientation (Hon 121) with college specific information, to facilitate the development of Honors programs of study in business, and to acquaint students with university policies and procedures. Either BusAd 101 or 102 may be counted towards graduation. Satisfactory-fail only.

BusAd 102. Expanded Orientation. (1-0) Cr. 1 S. A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. Either BusAd 101 or 102 may be counted towards graduation. Satisfactory-fail only.

BusAd 150. Computer Competencies for Business. Cr. R. Students will demonstrate proficiency in MS Word, Excel, and PowerPoint, as well as the ability to conduct research using the Internet, use WebCT, and communicate via e-mail. Self-paced instruction available for students who are unable to demonstrate appropriate proficiency. Satisfactory-fail only.

BusAd 201. Career Issues in Business. (1-0) Cr. 0.5 S. Prereq: 101. Eight-week course designed to provide students with knowledge of careers in business and issues relevant to any workplace. Presentations by business professionals, current students who have previously interned, and faculty and staff with knowledge of careers in the various majors. Includes coverage of diversity and ethics issues in the workplace. Satisfactory-fail only.

BusAd 250. Introduction to Business. (3-0) Cr. 3. Prereq: 101, 150 or Com S 103. Introduction to the functional areas of business and how the functional areas are integrated for the purpose of implementing business strategies. Introduces students to decision making tools (spreadsheets and databases) that are integral to business decision making. Includes application exercises to all functional areas of business.

BusAd 291. Experiential Learning. Cr. arr. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience. This course provides students with the skills to develop and implement a professional job search and to function professionally in a workplace setting. Topics include resume and professional correspondence, interviewing, working a career fair, the comprehensive job search, evaluating offers, business etiquette, networking, and transitioning to employee. Satisfactory-fail only.

BusAd 325. Biorenewable Systems. (Cross-listed with A E, Agron, An S, Econ, TSM). (3-0) Cr. 3 F. Prereq: Econ 101, Chem 155 or higher, Math 140 or higher. Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing.

BusAd 398. Cooperative Education. Cr. R. Repeatable. Prereq: Permission of department. Required of all cooperative students. Students must register for this course prior to commencing each work period. No more than three credits may be taken in addition to BusAd 398 during any given semester. Satisfactory-fail only.

BusAd 490. Independent Study. Cr. arr. Repeatable. Prereq: 490A: Mgmt 414, Mkt 448, LSCM 466 or Fin 380; senior classification, permission of instructor; for 490H: Admission to the Business Honors Program.

A. International Business

B. Entrepreneurship

H. Honors

BusAd 491. Professional Experiential Learning. Cr. arr. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experiences in a business related discipline. Satisfactory-fail only.

A. Domestic Internship

B. International Internship

C. Domestic Travel and Study

D. International Travel and Study

E. Other Experiential Learning Experience

Courses primarily for graduate students, open to qualified undergraduate students

BusAd 501. Strategy and Planning. (2-0) Cr. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor: Critical analysis of current practice and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

BusAd 503. Information Systems. (2-0) Cr. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Introduction to a broad variety of information systems (IS) topics, including current and emerging developments in information technology (IT), IT strategy in the context of corporate strategy, and IS planning and development of enterprise architectures. Cases and discussions highlight the techniques and tactics used by managers to cope with strategic
issues within an increasingly technical competitive environment.

BusAd 504. Marketing and Logistics. (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

BusAd 507. Organizational Behavior. (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

BusAd 508. Accounting and Finance. (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

BusAd 509. Seed Trade, Policy and Regulation. (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Cultural, financial, economic, political, legal/regulatory environments shaping an organization's international business strategy. Topics include entry (and re-patriation) of people, firms, goods, services, and capital. Special attention to the institutions of seed regulation and policy. Ethical issues facing managers operating in an international context.

BusAd 533. Economic and Business Decision Tools. (Cross-listed with Econ). (3-0) Cr. 3. Prereq: Econ 501 or Econ 532. Team taught by faculty in the Department of Economics and the College of Business, this course focuses on applied economic and business tools for decision making. The topics covered include: Monte Carlo analysis with applications to option pricing and insurance mechanism design, portfolio analysis using existing standard spreadsheet software and add-ons, dynamic programming tools for inventory management and sequential decisions, discrete choice modeling and Statistical bootstrapping, and financial performance evaluation using commercially available software.

BusAd 591. Professional Experiential Learning. Cr. art. Repeatable. Prereq: Graduate standing; written approval of supervising instructor and department chair on required form prior to the learning experience. Academically supervised travel and/or work experiences in a business related discipline.

BusAd 592. MBA Professional Skills Development. Cr. R. Prereq: Admission to Full-time MBA Program. Provides first-year MBA students with tools necessary to develop and implement a successful internship and career search, and to develop professional skills critical to success in the competitive business environment. Topics include career search strategy, resume and cover letter development, interviewing, strategic networking, salary negotiation, impression management, team skills development, presentation skills development, and business etiquette. Required for all full-time MBA students. Satisfactory-fail only.

BusAd 598. Cooperative Education. Cr. R. Prereq: Permission of instructor. Professional work experience. Students must register for this course prior to commencing work. Satisfactory-fail only.

Courses primarily for graduate students

Chemical Engineering

(Administered by the Department of Chemical and Biological Engineering)

www.cbe.iastate.edu

James Hill, Chair of Department

Distinguished Professors: Brown, Reilly
Distinguished Professors ( Emeritus): Burnet, Doraiswamy, Seagrave
University Professor: Hill
University Professor (Emeritus): Wheelock
Professors: Fox, Glatz, Hebert, Jolls, Kushner, Malapragada, Narasimhan, Rollins, B. Shanks, J. Shanks
Professors (Emeritus): Abraham, Boylan, Schrader, Ulrichson, Youngquist
Professor (Collaborator): Porter
Associate Professors: Hillier, Olsen, Vigil
Associate Professor (Emeritus): Collins
Associate Professors (Adjunct): Hanneman
Assistant Professors: Clapp, Cochran, Dong, Jarboe, Lamm, O'Donnell, Schneider
Senior Lecturer: Loveland
Lecturer: Stehl

Undergraduate Study

For undergraduate curriculum in chemical engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

Chemical engineering is a profession which provides a link between scientific knowledge and manufactured products. The chemical engineer relies on science, experience, creativity, and ingenuity to produce these materials economically. Almost everything of a material nature used by Society today has at some point felt the influence of the chemical engineer. From raw materials such as minerals, coal, petroleum, and agricultural products, chemical engineers create versatile intermediate and commodity chemicals, high performance fuels, new materials for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, plastics, solid state electronic components, and dozens of other engineered materials. The chemical engineer’s influence has been important in the development of catalysts, fuel cells, automatic controls, biochemical processes, artificial kidneys, tissue engineering, nuclear energy, medical instruments and devices, as well as in the development of air and water pollution control systems. Many new and equally exciting challenges await the practicing chemical engineer of the future.

The profession of chemical engineering embraces a wide variety of activities including research, process development, product development, design, manufacturing supervision, technical sales, consulting, and teaching. The engineer can be behind a desk, in a laboratory, in a manufacturing plant, or engaged in nationwide and worldwide travel. Successful chemical engineers find chemistry, mathematics, and physics to be interesting and exciting. Many chemical engineers also have interest in the biological sciences. The curriculum in chemical engineering includes continued study of chemistry, mathematics, and physics as well as intensive study in the engineering sciences such as chemical reaction engineering, thermodynamics, mass transfer, fluid mechanics, heat transfer, system analysis and process synthesis, and design.

The curriculum in chemical engineering is designed to produce graduates that have the ability to apply knowledge of mathematics, science, and engineering; the ability to design, conduct and interpret experiments, and the ability to design a chemical engineering system, component, or process. Graduates should also have the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve chemical engineering problems; and the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. The curriculum should also assure that graduates have the ability to communicate effectively, the broad education necessary to understand the impact of chemical engineering solutions in a global and societal context, and recognition of the need for, and an ability to engage in life-long learning, as well as a knowledge of contemporary issues and an understanding of professional and ethical responsibility. The curriculum assures that graduates have a thorough grounding in chemistry, along with a working knowledge of advanced chemistry such as organic, inorganic, physical, analytical, materials chemistry, or biochemistry. In addition, a working knowledge, including safety and environmental aspects, of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; process design; and appropriate modern experimental and computing techniques is assured. A significant number of chemical engineering graduates should have an ability to function as engineers in an international setting, and an ability to pursue research and advanced studies in chemical engineering, or in related fields such as medicine, law, and business.

A cooperative education program is available to students in chemical engineering. See Cooperative Programs, College of Engineering.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with major in chemical engineering, and minor work to students taking major work in other departments. Prerequisite to major graduate work is a bachelor’s degree in chemical engineering, chemistry, or other related field. Students with undergraduate background other than chemical engineering should contact the department for further details. A thesis is required for the master of science degree. The master of science degree also requires a minimum of 30 graduate credits (minimum of 15 for coursework,
Chemical Engineering

12 within Ch E and 2 outside). The master of engineering requirements are the same for credits and include a special project rather than research thesis. The doctor of philosophy degree requires a minimum of 72 graduate credits (minimum of 30 for coursework, 19 inside Ch E and a minimum of 8 credits taken outside of Ch E). Candidates for the doctor of philosophy degree can refer to the department’s home page and/or the department’s Graduate Student Handbook for degree options and credit requirements.

Courses primarily for undergraduate students

Ch E 104. Chemical Engineering Learning Community. Cr. R. F.S. Prereq: Enrollment in Chemical Engineering Learning Team. (1-0) Curriculum in career planning and academic course support for Freshmen learning team.

Ch E 204. Chemical Engineering Continuing Learning Community. Cr. R. F.S. Prereq: Corequisite-enrollment in Chemical Engineering Learning Team. (1-0) Curriculum and career planning, academic course support for learning community.

Ch E 298. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work.

Ch E 302. Seminar. (1-0) Cr. 1. F. Prereq: Junior classification in chemical engineering.

Ch E 325. Chemical Engineering Laboratory I. (0-4) Cr. 2. F.S.S. Prereq: 357 credit or enrollment in 358. Experiments covering fundamental material and energy balances, some process transport phenomena, and thermodynamics. Computer applications. Nonmajor graduate credit.

Ch E 356. Transport Phenomena I. (3-0) Cr. 3. F.S. Prereq: 210, Phys 221, credit or enrollment in Math 267. Momentum and mechanical energy balances. Incompressible and compressible fluid flow. Applications to fluid drag, piping system design, filtration, packed beds and settling. Nonmajor graduate credit.

Ch E 357. Transport Phenomena II. (3-0) Cr. 3. F.S. Prereq: Credit or enrollment in 310, 356. Conduction and diffusion, convective heat and mass transfer, boiling and condensation, radiation, and design of heat exchange equipment. Introduction to diffusion. Nonmajor graduate credit.

Ch E 358. Separations. (3-0) Cr. 3. F.S. Prereq: 310, 357. Diffusion and mass transfer in fluids. Analysis and design of continuous contacting and multistage separation processes. Binary and multicomponent distillation, absorption, extraction, evaporation, membrane processes, and simultaneous heat and mass transfer. Nonmajor graduate credit.

Ch E 381. Chemical Engineering Thermodynamics. (3-0) Cr. 3. F.S. Prereq: Credit or enrollment in 310, Math 267, Phys 222, Chem 325. Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of fluids, phase equilibria, and chemical reaction equilibria. Nonmajor graduate credit.

Ch E 382. Chemical Reaction Engineering. (3-0) Cr. 3. F.S. Prereq: Credit in 310, 381, credit or enrollment in 357. Kinetics of chemical reactions. Design of homogeneous and heterogeneous chemical reactors. Nonmajor graduate credit.

Ch E 391. Foreign Study Orientation. Cr. an. Prereq: Credit or enrollment in 357 and 381 or permission of instructor. Credit for graduation allowable only upon completion of Ch E 392. Satisfactory-fail only. A. Foreign Study Orientation ISU (1-0) Cr. 1. S. B. Foreign Study Orientation Europe Cr. 2. SS.

Ch E 392. Foreign Study Program. Cr. 4. SS. Prereq: Enrollment in 391B. Study of chemical engineering including laboratories and lectures at University College London or other collaborating international universities. Comparative study of U.S. and international manufacturing facilities. Expenses required.

Ch E 396. Summer Internship. Cr. R. Prereq: Permission of department and Engineering Career Services. Summer professional work period. Students must register for this course prior to commencing work.

Ch E 397. Engineering Internship. Cr. R. Prereq: Permission of department and Engineering Career Services. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Ch E 398. Cooperative Education. Cr. R. F.S.SS. Prereq: 298, permission of department and Engineering Career Services. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Ch E 406. Environmental Chemodynamics. (3-0) Cr. 3. F. Prereq: 381, credit or enrollment in 358. Examines the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment. Nonmajor graduate credit.

Ch E 408. Surface and Colloid Chemistry. (Dual-listed with 508). (3-0) Cr. 3. F. Prereq: 381 or equivalent. Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application analysis of basic phenomena of foaming, detergency, sedimentation, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis. Nonmajor graduate credit.

Ch E 415. Biochemical Engineering. (Dual-listed with 415). (3-0) Cr. 3. S. Prereq: 357, 382, Chem 331. Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation. Term project required for graduate credit.

Ch E 515. Biochemical Engineering. (Dual-listed with 415). (3-0) Cr. 3. S. Prereq: 357, 382, Chem 331. Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation. Term project required for graduate credit.

Ch E 540. Biomedical Applications of Chemical Engineering. (Dual-listed with 440). (3-0) Cr. 3. F. Prereq: 210, Math 266, Phys 222. Applications of material and energy balances, transport phenomena, chemical reaction engineering, and thermodynamics to problems in biomedical engineering and applied physiology; survey of biomedical engineering; biomaterials; biomedical imaging. Term project required for graduate credit.

Ch E 542. Polymeric Biomaterials. (3-0) Cr. 3. F. Prereq. Chem 331 or a polymers class. Polymeric biomaterials, overview of biomaterial requirements, different classes of polymers used as biomaterials, specific bioapplications of polymers.

for heat and mass transfer; scaling and approxima-
tion techniques; fundamentals of fluid mechanics;
unidirectional flow; creeping flow; laminar flow at high
Reynolds number; forced-convection heat and mass
transfer in confined and unconfined laminar flows.
Ch E 562. Bioseparations. (3-0) Cr. 3. Prereq: 357 or
advanced standing in a science major. Principles and tech-
niques for separation and recovery of biologically-
produced molecules, especially proteins. Relationship
between the chemistry of biological molecules and
efficient separation and preservation of biological ac-
tivity. Includes centrifugation and filtration, membrane
processing, extraction, precipitation and crystalization,
chromatography, and electrophoresis.
Ch E 572. Turbulence. (Cross-listed with Aer E). (3-0)
Cr. 3. Alt. S., offered 2010. Prereq: Aer E 543 or M E
538. Qualitative features of turbulence. Statistical and
spectral representation of turbulent velocity fields:
averages, moments, correlations, length and time
scales and the energy cascade. Averaged equations of
motion, closure requirements, Reynolds stress, dissipation rate. Isotropic turbulence, homogeneous
shear flows, free shear flows, wall bounded flows.
Scalar transport, particulate transport.
Ch E 583. Advanced Thermodynamics. (3-0) Cr. 3. F.
Prereq. 381. Application of thermodynamic principles
to chemical engineering problems. Thermodynamic
properties of non-ideal fluids and solutions; phase and
temperature-enthalpy equilibrium/instability.
Ch E 587. Advanced Chemical Reactor Design. (3-0)
Cr. 3. S. Prereq: 382. Analysis of complex reactions and
kinetics. Fixed bed, fluidized bed, and other industrial
reactors. Analysis and design of non-ideal flow mixing, and residence times. Heterogeneous
reactors.
Ch E 590. Special Topics. Cr. arr. Repeatable. Investi-
gation of an approved topic on an individual basis.
Ch E 595. Special Topics. Cr. arr. Repeatable. A.
Separations B. Advanced Control Theory C. Crystallization
D. Thermodynamics G. Biological Engineering I.
Materials & Biomaterials J. Protein Engineering/Bioseparations K. Surfaces L. Combinatorial Design
Ch E 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students
Ch E 601. Seminar. Cr. R. Repeatable. F.S. Satisfac-
tory-fail only.
Ch E 625. Metabolic Engineering, (3-0) Cr. 3. Prereq:
Emphasis on emerging topics in biorenewables and
plant metabolic engineering. Overview of bio-
chemical pathways, determination of flux distributions
by stoichiometric and labeling techniques; kinetics
and thermodynamics of metabolic networks; meta-
abolic control analysis; genetic engineering for over-
expression, deregulation, or inhibition of enzymes;
directed evolution; application of bioinformatics,
genomics, and proteomics.
(3-0) Cr. 3. Alt. S., offered 2011. Prereq: M E
538. Single particle, multi-particle and two-phase fluid
flow phenomena (gas-solid, liquid-solid and gas-liquid
mixtures); particle interactions, transport phenomena,
wake effects; bubbling and boiling of multiphase flow;
Dense phase (fluidized and packed beds) and ducted
flows; momentum, heat and mass transfer. Computer
solutions.
Ch E 642. Principles and Applications of Molecul-
lar Simulation. (3-0) Cr. 3. Prereq: 546. Principles
of Statistical physics. General features of molecular
simulations including Monte Carlo (MC) methods,
molecular mechanics (MM), and molecular dynamics
(MD). Overview of intermolecular and interatomic
potentials. Evaluation of phase equilibria, free energies,
and surface/interfacial properties. Coarse-grained
methods.
Ch E 652. Advanced Transport. (3-0) Cr. 3. Prereq:
552 and 553. Advanced topics in momentum trans-
port, fluid mechanics, and mass transport including study
of recent literature.
Ch E 688. Catalysis and Catalytic Processes. (3-0)
Cr. 3. Prereq: 382. Principles and applications of het-
erogeneous and homogeneous catalysis. Adsorption,
Reactor kinetics, Catalytic organic and inorganic effects, Catalyst characterization. Industrial catalytic
processes.
Ch E 690. Advanced Topics. Cr. arr. Repeatable.
A. Separations B. Advanced Statistical Modeling and Control C. Crystallization D. Thermodynamics
E. Protein Engineering/Bioseparations F. Biological Engineering G. Materials & Biomaterials
H. Surfaces I. Combinatorial Design
F.S.S. Prereq. Permission of major professor; graduate
classification. One semester and one sum-
mer maximum per academic year professional work
period.

Chemistry

Jacob Petrich, Chair of Department
Distinguished Professors: Barton, Corbett, Gordon, Larock, Thiel
Distinguished Professors (Emeritus): Angelici, Espenson, Fritz, Johnson, Ruedenberg, Yeung
University Professors: Hoffman, Kraus, Verkade
Professors: Geoffroy, Greenbowe, Holme, Hong, Houk, Jenks, Lin, Miller, Petrich, Schmidt-Rohr, Shin, Tranahovsky, Windus, Wlo
Professors (Emeritus): Franzen, Gerstein, Hutton, Jacobson, McCarley, Powell, Russell, Struve
Professor (Adjunct): Bakac, Pruski
Professor (Adjunct Emeritus): Tranahovsky
Professor (Collaborator): Porter
Associate Professors: Hillier, Pohl, Song, Zhao
Assistant Professors: Fang, Jeffries-Elli, Lee, Sadow, Smith, Stauffer
Senior Lecturers: Burnett
Lecturers: Bonaccorsi, Kingston

Undergraduate Study
For undergraduate curricula in liberal arts and
sciences leading to the degrees bachelor of sci-
ence and bachelor of arts, see Liberal Arts and
Sciences, Curriculum.
Graduates holding the B.S. degree in chemistry
qualify in many fields: as teachers of chemistry,
as supervisors in industry, as technical sales
personnel, and as research chemists in federal,
state, municipal, academic, or industrial laborato-
ries. Students with high scholastic standing often
continue with graduate work, where they can
explore more thoroughly the specialized areas of
chemistry in which they are interested.
The B.A. degree is useful for students who intend
to pursue studies in parallel areas, such as sec-
ondary school teaching, or to obtain joint majors or
strong minors. The B.A. degree does not prepare
students for graduate work or professional
employment in chemistry.
Graduates hold firm foundations in the fundamen-
tals and application of current chemical theories.
They are able to design, carry-out, record, and ana-
lyze the results of chemical experiments. They are
able to use modern instrumentation and classical
techniques to identify and solve chemical prob-
lems as well as explore new areas of research.
Graduates are able to communicate the results
of their work to chemists, as well as non-chemists.
They understand the ethical and environmen-
tal dimensions of problems and issues facing
chemists. They follow the proper procedures and
regulations for safe storage, labeling, use of
chemicals, and disposal of chemicals. Graduates
are skilled in problem solving, critical thinking, and
analytical reasoning. These skills can be applied to
careers in education and industry and professions
such as law, medicine, environmental sciences,
and forensic sciences. The curricula in chemistry
are approved by the American Chemical Society
(ACS). Students who complete the program obtain
an ACS certified baccalaureate degree provided
they also take one Biochemistry course, typically
BBMB 301 or 404.
Liberal arts majors who wish to transfer into
chemistry at the end of their second year may still
complete all degree requirements and graduate
within five years.
Undergraduate students seeking the B.S. degree in
chemistry usually take courses essential to the
degree program according to the following schedule:
First year: Chem 177 and 178, or 201; 177L or
201L; 211, 211L; Math 165, 166; Engl 150; Lib 160.
Second year: Chem 331, 332, 333L, 334L; Math
265; Phys 221, 222.
Third year: Chem 324, 325, 322L, 316, 316L, 301;
Engl 250 or 250H; Foreign language requirement.
Fourth year: Chem 402, 401L, 2 advanced chem-
istry courses (minimum 4 credits). Chem 399 or
499 is strongly recommended. Credits earned in
399/499 can only be used to meet one of the
advanced course requirements.
Chemistry majors seeking certification to teach
chemistry in secondary schools must meet the
requirements of the College of Human Sciences
as well as those of the chemistry program. In
addition, they must apply formally for admission to
the teacher education program.
Undergraduate students seeking the B.A. degree
in chemistry have the following courses in their
degree programs as minimum requirements:
177, 178L, or 201L and 177L or 201L; 211,
211L, 301, 316, 316L, 324, 321L or 322L, 325,
331, 331L, 332, 332L. Math 165, 166 and Phys
221, 222 are required as supporting work.
The Department offers a minor in chemistry which
may be earned by credit in Chem 177, 177L (or 167L
and 167L), 178, 211, 211L, 324, 331, 331L and one
of the following: Chem 301; 316 and 316L, or 325
and 321L, or 332 and 332L. The total minimum
credits in chemistry thus will be 20 to 23 depend-
ing on which advanced courses are selected.
Communication Proficiency Requirement: The
Department requires a grade of C- or better in each
of English 150 and 250 or 250H.

Graduate Study
The Department offers work for the degrees
master of science and doctor of philosophy with
majors in chemistry areas: inorganic, organic,
and physical chemistry. Co-majors may be taken
between areas within chemistry or between one of
the areas in chemistry and another department.
Courses in other areas of chemistry as well as
courses in other departments may be used to
satisfy the requirement for coursework outside
the major field. A Ph.D. student in chemistry may
choose an additional specialty in one of the six
areas: Materials Chemistry, Industrial Chemistry,
Biomolecular Sciences, Chemistry Education, Chemical Instrumentation, and forensic Chemistry. A minimum of ten credits is required for each additional specialty. A course which counts towards an additional specialty may also count toward the outside course requirement. A minor in chemistry is available to students in other departments. The Department participates in the interdepartmental major in toxicology.

The Department of Chemistry requires all graduating students majoring in chemistry to teach as part of their training for an advanced degree. Pre-requisite to major graduate work is the completion of undergraduate work in chemistry, mathematics, and physics substantially equivalent to that required of undergraduate chemistry majors at this institution.

The course numbers for general chemistry courses include 155-178, and 201. Index to field of work for 200 level courses and above is given by the second and third digits of course numbers:

(a) Inorganic Chemistry 00-09
(b) Analytical Chemistry 10-19
(c) Physical Chemistry 20-29 and 60-69
(d) Organic Chemistry 30-39
(e) Chemical Education 50-59
(f) Interdisciplinary Chemistry 70-89
(g) Research 99

Courses primarily for undergraduate students

Chem 050. Preparation for College Chemistry. (3-0) F. Prereq: 1 year high school algebra. An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on Mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school chemistry preparatory chemistry course. Credit for Chem 50 does not count toward graduation.

Chem 155. Foundations of Chemistry for Engineers. (3-0) Cr. 3. F. Prereq: Math 140 or the high school equivalent. The first semester of a two-semester sequence covering principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Chem 155 may not be counted for credit toward graduation in any engineering curriculum.

Chem 163. College Chemistry. (4-0) Cr. 4. F. Prereq: 1 year of high school algebra and geometry and either Chem 50 or 155 or 1 year of high school chemistry; and credit or enrollment in 163L. The first semester of a two-semester sequence. A general survey of chemistry and properties with an emphasis on conceptual problems. Stoichiometry, atomic structure, chemical bonding, states of matter, energy relations, acid-base theory and oxidation-reduction reactions. The 163, 164 sequence does not meet the prerequisite for 331. Credit for examination (test-out exams) for 163 is available only to students who are not currently enrolled in the course. Only one of Chem 163, 165, 167, 177, or 201 may count toward graduation.

Chem 163L. Laboratory in College Chemistry. (0-3) Cr. 1. F.S.SS. Prereq: Credit or enrollment in 163L. Laboratory to accompany 163. Must be taken with 163. Only one of 163L, 167L, and 177L may count toward graduation.

Chem 165. Foundations of Chemistry for Engineers. (4-0) Cr. 4. S. Prereq: 155. Continuation of 155. Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Only one of Chem 163, 165, 177, or 201 may count toward graduation.

Chem 167. General Chemistry for Engineering Students. (4-0) Cr. 4. F. Prereq: Math 140 or the high school equivalent and one year of traditional college prep chemistry or Chem 50. Principles of chemistry and properties of matter explained in terms of modern chemistry; the emphasis on topics of general interest to the engineer. This is an accelerated course designed for students with an excellent preparation in math and science and is a terminal course intended for engineering students who do not plan to take additional chemistry. Credit by examination (test-out exams) for 167 is available only to students who are not currently enrolled in the course. Only one of Chem 165, 167, 177, or 201 may count toward graduation.

Chem 167L. Laboratory in General Chemistry for Engineering. (0-3) Cr. 1. F. Prereq: Credit or enrollment for credit in 167 or 165. Laboratory to accompany 167. Only one of Chem 163L, 167L, and 177L may count toward graduation.

Chem 177. General Chemistry I. (4-0) Cr. 4. F.S.SS. Prereq: Math 140 or high school equivalent and 155 or 1 year high school chemistry and credit or enrollment in 177L. Chemistry and biochemistry majors must consider taking 177. The first semester of a two-semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 163-164. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, chemical bonding, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Credit by examination (test-out exams) for 177 is available only to students who are not currently enrolled in the course. Only one of Chem 165, 167, 177, or 201 may count toward graduation.

Chem 177L. Laboratory in General Chemistry I. (0-3) Cr. 1. F.S.SS. Prereq: Credit or enrollment for credit in 177L Laboratory to accompany 177. Only one of Chem 163L, 167L, and 177L may count toward graduation.

Chem 177N. Laboratory in General Chemistry I. (0-3) Cr. 1. F.S.SS. Prereq: Credit or enrollment for credit in 177N. For chemistry and biochemistry majors. Laboratory to accompany 177. Only one of Chem 163L, 167L, and 177N may count toward graduation.

Chem 178. General Chemistry II. (3-0) Cr. 3. F. Prereq: 177. Continuation of 177. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry by examination (test-out exams) for 178 is available only to students who are not currently enrolled in the course. Only one of Chem 164 and 178 may count toward graduation.

Chem 178L. Laboratory in College Chemistry II. (0-3) Cr. 1. F.S. Prereq: 177L, or credit or enrollment for credit in 178. Laboratory to accompany 178. Only one of Chem 164L and 178L may count toward graduation.

Chem 201. Advanced General Chemistry. (5-0) Cr. 5. F. Prereq: Math 140 or high school equivalent and one year of high school chemistry. Co-enrollment in 201L. A one semester course in general chemistry designed to give students an in-depth, broad-based view of modern chemistry, and, in part, to facilitate participation in independent undergraduate research. Topics include stoichiometry, atomic and molecular structure, chemical bonding, kinetics, chemical equilibria, and thermodynamics. Discussion of current trends in various chemical disciplines, which may be given by guest experts in chemistry, biochemistry, and chemical engineering, will help the student appreciate the scope of the chemical sciences and how research is carried out. Only one of Chem 163, 165, 167, 177 or 201 may count toward graduation.

Chem 201L. Laboratory in Advanced General Chemistry. (0-3) Cr. 1. Prereq: Credit or enrollment for credit in 201. Introductory laboratory experience in synthesis and analysis to prepare student for research activities 201L must be taken with 201. Only one of 163L, 167L, 177L, 177N or 201L may count toward graduation.

Chem 211. Quantitative and Environmental Analysis. (2-0) Cr. 2. F. Prereq: 164 and 164L, credit or enrollment in 178, or 201 and 201L; and concurrent enrollment in 211L. Theory and practice of elementary volumetric, spectrophotometric, electrochemical and spectrometric methods of analysis. Chemical equilibrium, sampling, and data evaluation. Emphasis on environmental analytical chemistry; the same methods are widely used in biological and materials sciences as well.

Chem 211L. Quantitative and Environmental Analysis Laboratory. (0-6) Cr. 2. F. Prereq: Credit or enrollment in 164 and 178, or 201 and 201L; and concurrent enrollment in Chem 211. Introductory laboratory experience in volumetric, spectrophotometric, electrochemical and chromatographic methods of chemical analysis.

Chem 231. Elementary Organic Chemistry. (3-0) Cr. 3. F.S.SS. Prereq: 163, 163L, or 177L, credit or enrollment in 231L. Survey of modern organic chemistry including naming, structure and bonding, and reactions of hydrocarbons and important classes of natural and synthetic organic compounds. For students desiring only an elementary course in organic chemistry. Students in physical or biological sciences and premed or preveterinary curricula should take the full year sequence 331L and 332L (the accompanying laboratories 331L and 332L). Only one of Chem 231 and 331 or BMB 221 may count toward graduation.

Chem 231L. Laboratory in Elementary Organic Chemistry. (3-0) Cr. 3. F.S.SS. Prereq: Credit or enrollment for credit in 231L, 163L or 177L. Laboratory to accompany 231. Only one of Chem 231L and 331L may count toward graduation.

Chem 298. Cooperative Education. Cr. F.R. Prereq: Permission of the Department cooperating instructor and sophmore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Chem 299. Undergraduate Research (for Freshmen and Sophomores). Cr. ar: Repeatable. Prereq: Permission of staff member with whom student proposes to work.

Chem 301. Inorganic Chemistry. (2-0) Cr. 2. S. Prereq: 324. Atomic and molecular structure and bonding principles; molecular shapes and symmetry; acids and bases; solid-state structures and properties; inorganic chemistry of H, C, N. Nonmajor graduate credit.

Chem 316. Instrumental Methods of Chemical Analysis. (2-0) Cr. 2. F. Prereq: 211L, 211L, Math 166, and concurrent enrollment in 316L. Prereq: Advanced practice in spectrophotometry, atomic absorption and emission spectroscopy, mass spectrometry, and thermodynamics. Discussion of current trends in various chemical disciplines, which may be given by guest experts in chemistry, biochemistry, and chemical engineering, will help the student appreciate the scope of the chemical sciences and how research is carried out. Only one of Chem 163, 165, 167, 177 or 201 may count toward graduation.

Chem 316L. Instrumental Analysis Laboratory. (0-6) Cr. 2. F. Prereq: Credit or enrollment in Chem 316L. Advanced laboratory experience in UV-visible spectrophotometry, atomic absorption and emission spectroscopy, spectrophotometry, and liquid and gas chromatography, electrophoresis, literature of chemical analysis. Nonmajor graduate credit.
Chem 321L. Laboratory in Physical Chemistry. (1-3) Cr. 2. S. Prereq: Credit or enrollment for credit in 324 or 325. Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, infrared and optical spectroscopy, lasers. Not applicable towards the B.S. degree in Chemistry. Only one of Chem 321L and 322L may count toward graduation. Nonmajor graduate credit.

Chem 322L. Laboratory in Physical Chemistry. (1-6) Cr. 3. S. Prereq: Chem 324. Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, surface science, infrared and optical spectroscopy, lasers. Only one of Chem 321L and 322L may count toward graduation. Nonmajor graduate credit.

Chem 324. Introductory Quantum Mechanics. (3-0) Cr. 3. F. Prereq: 178, Math 166, Phys 222 recommended. Quantum mechanics, atomic and molecular structure, spectroscopy, kinetic theory of gases, chemical kinetics. Nonmajor graduate credit.

Chem 325. Chemical Thermodynamics. (3-0) Cr. 3. F.S. Prereq: 178, Math 166, Phys 222 recommended. Classical thermodynamics 1st, 2nd, and 3rd laws with applications to gases and interfacial systems, multicomponent, multiphase equilibrium of reacting systems, surface chemistry, and electrochemical systems. Students taking a two-semester physical chemistry sequence are advised to take 324 first; in the spring semester, a molecule-based section of this course, stressing Statistical thermodynamics, is offered for which knowledge of 324 is useful. Nonmajor graduate credit.

Chem 331. Organic Chemistry I. (3-0) Cr. 3. F.S. Prereq: 178 or 201, enrollment in 331L highly recommended. The first half of a two semester sequence. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms. For students majoring in physical and biological sciences, premedical and prevetinary curricula, chemistry and biochemistry. Students desiring only one semester of organic chemistry should take 331L or 331L1. Only one of Chem 331 and 331L may count toward graduation. Nonmajor graduate credit.

Chem 332. Organic Chemistry II. (3-0) Cr. 3. F.S. Prereq: 331, enrollment in 332L highly recommended. Continuation of 331. Modern organic chemistry including advanced preparation and characterization of inorganic and organometallic compounds by modern research techniques.

Chem 503. Bioinorganic Chemistry. (Cross-listed with BBMB). (2-0) Cr. 2. Alt. S., offered 2010. Prereq: 402 or BBMB 456. Essential elements: transport and storage ions, short-lived isotopes in all chemistries, physis and mathematics courses. Research in chosen area of chemistry, with final written report as senior thesis. This course should be elected for two consecutive semesters. For students majoring in chemistry. No more than Six total credits for Chem 399 and 499 may count toward graduation.

Courses primarily for graduate students, open to qualified undergraduate students

Chem 537. Physical Organic Chemistry I. (3-0) Cr. 3. F. Prereq: 502 or 502L and 324. Elementary group theory and molecular orbital theory applied to characterization of inorganic compounds and organometallic compounds.

Chem 561. Fundamentals of Quantum Mechanics. (4-0) Cr. 4. F. Prereq: 224; Schroedinger equation and exact solutions; square wells and barriers; harmonic oscillator; the hydrogen atom; atomic orbitals; opera- tors including angular momenta; time-independent and time-dependent perturbation theory; Schroedinger- er and Heisenberg representations; unitary operators; interaction picture, density matrix.

Chem 562. Fundamentals of Atomic and Molecular Quantum Mechanics. (3-0) Cr. 3. S. Prereq: 561; credit or enrollment in 583. Variational method, many electron atoms; addition of angular momentum, self-consistent field method for open and closed shells, linear combinations of atomic orbitals, origin of chemical bonding, many-electron diatomic and poly- atomic molecules, treatments of electron correlation, approximation methods.

Chem 563. Statistical Mechanics. (3-0) Cr. 3. S. Prereq. 325. Microscopic and macroscopic properties, laws of thermodynamics, ensembles and distribution functions, applications to gases, solids, and chemical equilibrium.

Chem 540. Seminar in Forensic Sciences, Cr. 1. Repeatable. S. Prereq: 231 or graduate enrollment. Seminars by professional criminals, research scientists, certificate students, and educators. Emphasis on opportunities for research and development, citizen involvement, and educational outreach related to forensic science. Weekly report required.

Chem 579. Introduction to Research in Chemistry. (1-0) Cr. R. F.S. Introduction to the various areas of research in chemistry at Iowa State University.

Chem 580. Introduction to Computational Quantum Chemistry. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 324. Basic principles of quantum mechanics, Schroedinger equation, molecular orbital theory, introduction to group theory, introduction to modern methods of computational chemistry; applications include molecular structure, potential energy surfaces and their relation to chemical reactions; molecular spectroscopy, photochemistry, solvent effects and surface chemistry.

Chem 581. Principles of Lasers and Optics. (3-0) Cr. 3. Alt., offered 2011. Prereq: 324, Phys 222. Students with weak background should take Chem 580. For students working with lasers and optics; stimulated adsorption and emission based on the classical electron oscillator model; population inversion, laser amplification, laser pumping, oscillation and cavity modes; laser beam characterization; linear propagation; design of laser resonators, ray and wave optics, nonlinear optics.

Chem 582. Chemical Group Theory. (1-0) Cr. 1. F. Prereq: 324. Basic concepts and theorems, representation theory; point groups, molecular orbitals, molecular states, molecular vibrations, rotation group and angular moments; space groups and crystals; permutation group, antisymmetry, and spin states.

Chem 583. Current Topics in Chemistry. (1-0) Cr. R. F.S. Present literature and chemical problems under current investigation.

Chem 600. Seminar in Inorganic Chemistry. (1-0) Cr. 1. Repeatable. F.S. Prereq: Permission of instructor.

Chem 601. Selected Topics in Inorganic Chemistry. (2-0) Cr. arr. F.S. Prereq: Permission of instructor. Topics such as molecular structure and bonding; organometallic compounds; physical techniques of structure determination; nonaqueous solutions; Zintl phases; transition-metal oxides; free-radical reactions; electron transfer reactions; metal-metal bonding; and organoorganic chemistry of nucleic acids.

Chem 611. Seminar in Analytical Chemistry. (1-0) Cr. 1. Repeatable. F.S. Prereq: Permission of instructor.

Chem 619. Special Topics in Analytical Chemistry. (2-0) Cr. arr. Repeatable. F.S. Prereq: Permission of instructor. Raman Spectroscopy, sensors, spectro-electrochemistry, capillary electrophoresis, analytical plasmas, chromometrics and bioanalytical chemistry.

Chem 632. Selected Topics in Organic Chemistry. (2-0) Cr. arr. Repeatable. F.S. Prereq: 537. Topics of current interest in organic chemistry such as spectroscopy, physical organic chemistry, photochemistry, organometallic chemistry, mechanisms of oxidation and reductions, modern organic synthesis, reactive intermediates, biorganoic chemistry, and polymers.

Chem 660. Seminar in Physical Chemistry. (1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor.

Chem 667. Special Topics in Physical Chemistry. (2-0) Cr. arr. F.S. Prereq: Permission of instructor. Advanced and recent developments in physical chemistry are selected for each offering.

Civil Engineering

(Administered by the Department of Civil, Construction and Environmental Engineering)

James Alleman, Chair of Department

Distinguished Professors: Klaiber

Distinguished Professors (Emeritus): Baumann, Cleasby, Handy

University Professors (Emeritus): Lohnes

Professors: Alleman, Fanous, Jasalskis, Kannel, Maze, Nambisan, Ong, Pomneto, Porter, Sarkar, Schaefer, Souleyyette, Van Leeuwen, Wipf

Professors (Emeritus): Bergeson, Brewer, Carstens, Greimann, Hardy, Jellinger, Kao, Lee, Mashaw, Mickel, Morgan, Northup, Oulman, Sanders

Professors (Collaborators): Surampalli

Associate Professors: Abendroth, Baenziger, Bhandari, Ellis, Gu, Hallmark, Jahren, Koziel, Gehman, Ourman, Wang, White, Williams

Associate Professors (Emeritus): Chase, Mercier, Sheelee, Ward

Assistant Professors: Aslök, Bolluyt, Ceylan, Gkritza, Grewell, Kandil, Rouse, Shane

Assistant Professors (Adjunct): Phares, Plazak, Schlorholtz, Smadi, Taylor

Instructors (Adjunct): Amenson, Gaunt

Senior Lecturers: Cormicle, Jones, Sirotiak, Walton

Lecturers: Baker, Cackler, Hawkins, Hunacek, Mescher, Perkins, Smith, Stout

Clinician: Gopalan

Undergraduate Study

For undergraduate curriculum in civil engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of the ABET.

Civil engineering consists of the application of the laws, forces, and materials of nature to the planning, design, construction, maintenance, and operation of public and private facilities, subject to economic, social, and environmental constraints. Commonly included are transportation systems; bridges and buildings; water supply, pollution control, irrigation, and drainage systems; river and harbor improvements; and the underground reservoirs. Civil engineering also includes the planning, design, and responsible execution of surveying operations, and the location, delineation, and delineation of physical and cultural features on the surface of the earth. Research, testing, sales, management, and related functions are also a part of civil engineering. Work on the campus is supplemented by inspection trips which furnish an opportunity for firsthand study of engineering systems in operation, as well as projects under construction.

Environmental engineering, as a specialty area in civil engineering, is concerned with protecting the public and natural health; providing safe, palatable and ample water supply; management of solid and hazardous waste; proper treatment and disposal of domestic and industrial wastewaters and waste; resource recovery; providing adequate drainage of urban and rural areas for sanitation; and the control of water quality, soil contamination, and air pollution. At the undergraduate level, the study of various environmental and water resource engineering topics is part of the course of study leading to the Bachelor's degree in civil engineering.

Program Goal

Consultation with an industrial advisory board of employers of civil engineers, with a broad base of civil engineering educators, and with students and alumni has yielded a continuous process of program planning, program assessment, curriculum development, and instructional development to produce an integrated, learning-based curriculum. The curriculum listed in this catalog has the academic program goal of developing an effective program that fulfills student educational needs and that equips and empowers qualified students for a successful career in civil or environmental engineering.

Program Objectives

To achieve the program goal, the Department has developed objectives intended to result in the following outcomes such that graduates:

1. have a comprehensive education in the fundamentals of civil engineering;

2. are prepared to undertake civil engineering design tasks;

3. demonstrate effective communication skills and teamwork in multidisciplinary projects;

4. play a constructive role to address the needs of Society and the environment, and

5. are motivated to continue their professional development.

The faculty encourages the development of the student's professional skills through participation in cooperative education, internships, or progressive summer engineering employment. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue the bachelor degree and a master of science in Civil Engineering or a master of business administration in the College of Business Administration.

Graduate Study

The Department of Civil, Construction and Environmental Engineering offers work for the master of science and doctor of philosophy degrees with a major in civil engineering with areas of specialization in structural engineering, environmental engineering, construction engineering and management, geotechnical engineering, civil engineering materials, and transportation engineering. The department also offers minor work to students from other engineering departments.

Candidates for the degree master of science are required to satisfactorily complete 30 credits of acceptable graduate work, including preparation of a thesis or creative component.

Candidates for the doctor of philosophy degree refer to the department's home page and/or the department's Graduate Handbook for degree options and credit requirements. The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of engineering students at this university. However, because of the diversity of interests within the graduate programs in civil engineering, a student may qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering. Supporting work will be required depending upon the student's background and area of interest. A prospective graduate student is urged to specify the degree program and area of specialization in which he or she is interested on the application for admission. The department participates in the interdepartmental majors in transportation (master of science only), environmental science, and bio-renewable resources and technology (see Index).
Engineering business management principles, including organizational structures and business economics. Applications and impacts of regulations in civil engineering. Written and oral technical presentations.

C 306. Project Management for Civil Engineers.
(2-3 Cr.) 3. F.S. Prereq: 305. Project management, including work breakdown structures, cost estimating, and scheduling. Civil engineering project life cycle, including planning, design, construction, and maintenance processes. Techniques in interpretation of contract documents and in estimating quantities.

(2-3 Cr.) 3. F.S. Prereq: 166, credit or enrollment in E M 378. Introduction to environmental problems, water quality indicators and requirements, potable water quality and quantity objectives, water sources and treatment methods; water pollution control objectives and treatment methods; survey of solid and hazardous waste management and air pollution control. Nonmajor graduate credit.

C 332. Structural Analysis I.

C 333. Structural Steel Design I.

C 350. Introduction to Transportation Planning.
(3-0) Cr. 3. S. Prereq: 3 credits in statistics, junior classification. An introductory course for planning urban and regional transportation systems within government and private organizations. Topics include traffic engineering, transportation planning, traffic analysis, and other related topics. Civil engineering and transportation planning.

C 360. Geotechnical Engineering.

(2-3 Cr.) 4. F.S. Prereq: E M 376, a course in statistics from the approved list. Hydrograph analysis, flood routing, frequency analysis and urban hydrology. Applied hydraulics including pipe and channel flow with design applications in culverts, pumping, water distribution, storm and sanitary sewer systems. Design project required. Nonmajor graduate credit.

C 382. Design of Concretes.
(2-3 Cr.) 3. F.S. Prereq: Credit or enrollment in 380. Physical and chemical properties of bituminous, portland, and other cements; aggregate properties and blending; mix design and testing of concretes; admixtures, mixing, handling, placing and curing. Principles of pavement thickness design. Nonmajor graduate credit.

C 383. Design of Portland Cement Concrete.
(0-2) Cr. 1. F.S. Prereq: Credit or enrollment in 380. For Con E students only. Physical and chemical properties of portland cement and p.c. concrete. Mix design and testing of p.c. concrete.

C 388. Sustainable Engineering and International Development.
(Cross-listed with A E, E E, E M, Mat E). (2-2) Cr. 3. F. S. Prereq: Junior classification in engineering. Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, equity analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as non-government organizations (NGOs). Course readings, final project/design report.

C 396. Summer Internship.
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services, completion of two terms in residence in civil engineering, employment in civil engineering related field. Summer professional work period. Students must register for this course prior to commencing work. Satisfactory-fail only.

C 397. Engineering Internship.
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services. Second professional work period in the cooperative education program. Students must register for this course prior to commencing work. Satisfactory-fail only.

C 403. Program and Outcome Assessment.
Cr. R. F.S. Prereq: Verification of undergraduate application for graduation by the end of the first week of classes. Permission of instructor for students who are scheduled for summer graduation. Assessment of C E Curriculum and educational objectives. Satisfactory-fail only.

C 411. Bioprocessing and Bioproducts.
(Dual-listed with 511). (Cross-listed with A E, BioE, BSE). (3-0) Cr. 3. F. S. Prereq: E A 218 or equivalent, Math 160 or 165, one of Chem 167 or higher, BioI 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass-energy balances. Bioprocess integration, pretreatment, separation. Membrane reactors, bioelectrosynthesis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

C 417. Land Surveying.
(2-3 Cr.) 3. S. Prereq: 111. Legal principles affecting the determination of land boundaries, public domain survey systems. Locating, sequential and instantaneous conveyances. Record research, plat preparation, and land description. Study of selected court cases. Nonmajor graduate credit.

(Double-listed with 520). (2-3 Cr.) 3. F. S. Prereq: 326, Chem 173 or 177, Math 160. Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.
C E 421. Environmental Biotechnology. (Dual-listed with 421) (Cross-listed with EnSci). (3-0) Cr. 3. Prereq: Chem 177 and 178, Math 166. Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions and mass transfer principles. Finding ideal laboratory practicals and group projects required. Term paper and oral presentation for graduate level only.

C E 422. Water and Wastewater Treatment Plant Design. (2-2) Cr. 3. S. Prereq: 326. Physical, chemical and biological processes for the treatment of water and wastewater including coagulation and flocculation, sedimentation, filtration, adsorption, chemical oxidation/disinfection, fixed film and suspended growth biological processes and sludge management.

C E 483. Pavement Analysis and Design. (Dual-listed with 583) (3-0) Cr. 3. Prereq: 360 and 382. Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle costs and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of performance and economic evaluation of pavement systems. Nonmajor graduate credit.

C E 486. Civil Engineering Design II. (1-4) Cr. 3. F. Prereq: 326, 332 or 334, 382; credit or enrollment in 428 or 453, and 485. The engineering design computations, case histories of design inadequacies, environmental impact, safety and health in the workplace, ethics, contract documents, design plans and specifications, teamwork, synthesis of previous coursework in a group project, oral presentations.

C E 498. Cooperative Education. Cr. R. Repeatable. F.S.S. Prereq: 398, permission of department and engineering career services. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

C E 501. Preconstruction Project Engineering and Management. (3-0) Cr. 3. Prereq: Con E 221 and 421. Application of engineering and management control techniques to construction project development from conceptualization to notice to proceed. Determinants of construction project success, conceptual estimating, design and engineering planning for automated construction techniques, constructability review procedures, planning for safety, value engineering.

C E 502. Construction Project Engineering and Management. (3-0) Cr. 3. Prereq: Con E 221 and 421. Application of engineering and management control techniques to construction projects. Construction project control techniques, equipment selection and utilization, project administration, construction process simulation, Quality Management, and productivity improvement programs.

C E 503. Construction Management Functions and Processes. (3-0) Cr. 3. Prereq: Con E 421. Analysis of critical construction management skills. Analysis of organizational systems related to construction management. Case studies. Analysis of theories of motivation, planning, leadership, organizational change, etc., as they relate to field construction operations.

C E 506. Case Histories in Construction Documents. (3-0) Cr. 3. Prereq: Con E 221, credit or enrollment in Con E 421. Study of cases involving disputes, claims, and responsibilities encountered by management in construction projects. Analysis of methods of resolving differences among the owner, architect, engineer, and construction contractor for a project.

C E 510. Information Technologies for Construction. (3-0) Cr. 3. Prereq: Con E 421, Engr 180 or 421 or equivalent. Information technologies including microcomputer based systems, management information systems, automation technologies, computer-aided design, and expert systems and their application in the construction industry. Overview of systems acquisition, communications, and networking.

C E 511. Bioprocessing and Bioproducts. (Dual-listed with 411). (Cross-listed with A E, BRT, BSE). (3-0) Cr. 3. Pr. F. A E 218 or equivalent, Math 160 or 161, one of Chem 167 or higher. Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioremediation and coproducts. Mass-energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis. Term paper for graduate level only.

C E 520. Environmental Engineering Chemistry. (Dual-listed with 420). (Cross-listed with EnSci). (3-2) Cr. 3. Prereq: Chem 177 and 178. Principles of chemicals and chemical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions and mass transfer principles. Finding ideal laboratory practicals and group projects required. Term paper and oral presentation for graduate level only.

C E 523. Physical-Chemical Treatment Process. (Cross-listed with EnSci). (2-3) Cr. 3. Prereq: 520. Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and desorption of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

C E 524. Air Pollution. (Dual-listed with 424). (Cross-listed with A E, EnSci). (1-0) Cr. 1. Prereq: Either Phys 221 or Chem 178 and either Math 166 or 3 credits in statistics. Senior classification or above. Module A prereq for all modules; module B prereq for D and E.

A. Air quality and effects of pollutants

B. Climate change and causes

C. Transportation constraints

D. Off-gas treatment technology

E. Agricultural sources of pollution
C E 527. Solid Waste Management. (Cross-listed with EnSci). (3-0) Cr. 3. Prereq: 326. Planning and design of solid waste management systems; includes characterization and collection of domestic, commercial, and industrial solid wastes, waste minimization and recycling, education and materials recovery, composting, incineration, and landfill design.

C E 532. Structural Analysis II. (3-0) Cr. 3. Prereq: 326. Analysis of indeterminate structural problems by the force and generalized direct displacement methods. Direct stiffness method for 2-D frames, grids, 3-D frames. Additional topics for the stiffness method.

C E 536. Masonry and Timber Design. (2-1) Cr. 3. Prereq: E M 354, offered Fall 2010. Behavior and design of clay and concrete masonry beams, columns, walls, and structural systems. Behavior and design of timber and laminated timber beams, columns, connections, and structural systems.

C E 550. Advanced Highway Design. (3-0) Cr. 3. Prereq: 453. Evaluation of rural and urban street and highway design theory. Establishment of design criteria, application to street and highway systems, and to intersections and interchanges; drainage design, and urban freeway design aspects. Computer applications.

C E 553. Traffic Engineering. (2-2) Cr. 3. Prereq: 355. Driver, pedestrian, and vehicular characteristics. Traffic characteristics; traffic surveys; traffic analysis and design practices. Principles of traffic control for improved highway traffic service. Application of intersection, corridor or network analysis computer evaluation and optimization tools.

C E 555. Advanced Traffic Operations. (3-0) Cr. 3. Prereq: 553. Solve real-world traffic engineering problems; explore interactions between traffic systems components; advanced skills related to signal timing, coordination, and optimization; practical applications of common traffic engineering tools.

C E 556. Transportation Data Analysis. (3-0) Cr. 3. Prereq: 355, 356. Focus in statistics of accident incidence and severity through highway design and traffic control. Accident analysis. Legal implications. Safety in highway design, maintenance, and operation.

C E 557. Transportation Systems Analysis. (3-0) Cr. 3. Prereq: 355, Stat 101 or 105. Analysis of transportation data, identification of data sources and limitations. Static and dynamic data elements such as infrastructure characteristics, flow and operation, socioeconomic data and regional trends and time and spatial extents data for planning, design, operations, and management of transportation systems. Summarizing, analyzing, modeling, and interpreting data. Use of information technologies for highways, transit, and aviation systems.

C E 559. Transportation Systems Development and Management Laboratory. (2-2) Cr. 3. Prereq: 350 or 355. Study of designated programs in traffic engineering, urban transportation planning, and urban development. Forecasting and evaluation of social, economic, and environmental impact of proposed solutions; considerations of alternatives. Formulation of recommendations and publication of a report. Presentation of recommendations in the host community.

C E 560. Fundamentals of Soil Mechanics. (3-0) Cr. 3. Prereq: 360. Limiting stress analysis, stress paths, introduction to critical state soil mechanics, constitutive models, soil strength under various drainage conditions, seepage, pore pressure parameters, consolidation, slope stability and retaining wall applications.

C E 562. Site Evaluations for Civil Engineering Projects. (2-2) Cr. 3. Prereq: 360. Identification and mapping of engineering soils from airphotos. Use of remote sensing and GIS, planning subsurface investigations, geomatics prospecting, water resource applications.

C E 563. Experimental Methods in Geo-Engineering. (1-4) Cr. 3. Prereq: 360. Principles of geo-engineering laboratory testing including the conduct, analysis, and interpretation of soil classification tests, compaction tests, permeability tests, consolidation, triaxial, direct and ring shear tests. Issues regarding laboratory testing versus field testing and acquisition, transport, and storage of soil and rock samples for geotechnical testing. Field and laboratory geotechnical monitoring techniques, including the measurements of deformation, strain, total stress and pore water pressure.

(Cross-listed with EnSci. (3-0) Cr. 3. Prereq: 4 courses in natural, biological or engineering sciences and senior or above classification. Review of federal and state requirements for environmental impact assessment, requirements of the National Environmental Policy Act and Council on Environmental Quality, methods of evaluating the environmental impacts on the physical, biological, socioeconomic, cultural/historic, human health and psychological environments, public participation in EIS, review and evaluate project environmental impact statements. An environmental impact assessment of a proposed project will be completed in small teams.

C E 576. Environmental Flows. (3-0) Cr. 3. Prereq: EM 376 or equivalent. Analysis and applications of flows in civil engineering, environmental engineering, and water resources. Primary topics include conservation laws, laminar flow, turbulence, mixing, diffusion, dispersion, water waves, and boundary layers. Associated applications include particle settling, transfer at air-water and water-sediment boundaries, flow and friction in pipes and open channels, contaminant transport, waves in lakes, jets, plumes, and salt wedges.

C E 583. Pavement Analysis and Design. (Dual-listed with 488J). (3-0) Cr. 3. Prereq: 360 and 382A. Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems.

C E 594. Special Topics in Construction Engineer- ing and Management. Cr. arr. Repeatable. Prereq: Con E 322. Con E 306, and permission of instructor. Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics:

A. Planning and Scheduling
B. Computer Applications for Planning and Scheduling
C. Cost Estimating
D. Computer Applications for Cost Estimating

E. Project Controls
F. Computer Applications for Project Controls
G. Integration of Planning, Scheduling and Project Controls
J. Trenchless Technologies
K. Electrical and Mechanical Construction
L. Advanced Building Construction Topics
M. Design Build Construction
N. Industrial Construction
Q. Highway and Heavy Construction
P. Advanced Technologies
Q. Construction Quality Control
R. Risk Management
S. Building Information Modeling

C E 595. Research Methods in Construction Engi- neering and Management. (0-1) Cr. 1. Prereq: Credit or enrollment in 301, 302, 303, or 505. Assigned readings and reports on research methods to solve construction engineering and management problems such as robotics, project controls, automation, etc. Identification of research methods and priorities, selection and development of research design, and critique of research in construction engineering and management.

Courses for graduate students

C E 622. Advanced Topics in Environmental Engineering. (2-0) Cr. 2. Repeatable. Prereq: Permission of environmental engineering graduate faculty. Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:
A. Water Pollution Control
B. Water Treatment
C. Solid and Hazardous Waste
D. Water Resources

C E 649. Advanced Topics in Structural Engineer- ing. (3-0) Cr. 3. Repeatable. Prereq: Permission of structural engineering graduate faculty. Advanced concepts in structural engineering topics. Emphasis for a particular offering will be selected from the following topics:
A. Behavior of Metal Structures
B. Design of Concrete Shells
D. Advanced Matrix Analysis of Structures
E. Dynamic Design of Structures
F. Reliability Assessment of Structures

C E 697. Engineering Internship. Cr. R. Repeatable. Prereq: Permission of coop advisor, graduate classification. One semester and one summer maximum per academic year professional work period. Satisfactory-fail only.

Classical Studies

www.iastate.edu/~classics

(Interdepartmental Undergraduate Program)

Program Committee: M. Henry, Chair; G. Betcher, T. Butler, J. Cunnally, J. Goodwin, M. Graham, J. Hagge, D. Hollander, R. Meyer, M. Mook

The Classical Studies program is a cross-disciplinary program in the College of Liberal Arts and Sciences which offers an integrated curriculum of courses in the languages, literatures, history, and thought of ancient Greece, Rome, and Rome from theochristic times to the reign of the Emperor Constantine. Complete and current information about the Program may be found on-line at: www.iastate.edu/~classics/

Courses in Classical Studies provide background for students whose major fields of study or career interests include Anthropology, English, World Languages and Cultures, History, Music, Philosophy, Women's Studies, law, medicine, material culture, political science, the life sciences and related fields. Students who wish to pursue an interdisciplinary major in Classical Studies should consult the Program Chair.

A student who wishes to declare a minor must successfully complete the following requirements: (a) Greek 102 or Latin 102; (b) CI St 273 or 275; (c) Three additional courses in the courses listed below (primary or departmental), or as approved by the program committee

Courses primarily for undergraduate students

CI St 273. Greek and Roman Mythology. (3-0) Cr. 3. F.S.S.S. Survey of the legends, myths of the classical world with emphasis on the principal gods, and heroes, and their relation to ancient social, psychologi- cal, and religious practices: some attention may be given to important modern theories.

H. Honors (4-0) Cr. 4.

CI St 275. The Ancient City. (3-0) Cr. 3. S. Examination of ancient urban life, including historical context, physical space, material culture, religion, literature, and art; examination of civic identity (the “polis”). Contrast between the concepts of urban and rural. Examples drawn from specific ancient cities; some attention to modern methods of recovering the conditions of ancient urban life and the fundamental concept of the city in European history.

H. Honors. (4-0) Cr. 4.

CI St 304. Cultural Heritage of the Ancient World. (Cross-listed with Hist). (3-0) Cr. 3. Prereq: Sopho- more classification. Historical examination of art, literature, thought, and religious beliefs of major civilizations of the ancient Mediterranean countries until the end of the 8th century.

CI St 310. Ancient Philosophy. (Cross-listed with Phil). (3-0) Cr. 3. F. Prereq: Phil 201. Survey of ancient Greek Philosophy, focusing on the pre-Socratics, Plato, and Aristotle. Questions concerning being, knowledge, language, and the good life are treated in depth. Nonmajor graduate credit.

CI St 350. Rhetorical Theories and Issues in Context. (Cross-listed with Engl, Sp Cm). (3-0) Cr. 3. S. Prereq: Engl 250. Ideas about the relationship between rhetoric and Society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology.

CI St 353. World Literature: Western Foundations through Renaissance. (Cross-listed with Engl). (3-0) Cr. 3. F.S. Prereq: Engl 250. Representative works from the drama, epic, poetry, and prose of the Ancient World through the late sixteenth century. May include Homer, Aeschylus, Sappho, Catullus, Dante, Marie de France, Boccaccio, Christine de Pizan, Cervantes, and others.

CI St 367. Christianity in the Roman Empire. (Cross-listed with Relig). (3-0) Cr. 3. An historical introduction to the rise of Christianity in the Roman empire, with special attention to the impact of Greco-Roman cul- ture on the thought and practice of Christians and the interaction of early Christians with their contempo- raries. Nonmajor graduate credit.

CI St 372. Greek and Roman Tragedy and Comedy. (3-0) Cr. 3. Prereq: 273 or 275 or one course in Latin or Greek or English 250. Greek and Roman drama from the beginnings until today. Readings in English from authors such as Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence, Seneca. Course may cover performance, theories of comedy and tragedy, recent and current expressions of the comic and tragic in film and other media.

H. Honors (4-0) Cr. 4.

2009-2011
Cl St 374. Women in the Ancient Mediterranean World. (Cross-listed with Hist, W S). (3-0) Cr. 3. Repeatable. S. Prereq: Any one course in Cl St, W S, Latin, or Greek. Chronological and topical survey of the status of women in the Ancient Mediterranean world; study of constructs of the female and the feminine. Readings from ancient and modern sources. Emphasis on lives both outside and inside the political order. Nonmajor graduate credit.

Cl St 590, Seminar in Ancient European History. (Cross-listed with Hist). (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Readings in European History.

A. Ancient (Same as Hist 512A)

Cl St 594. Seminar in Ancient European History. (Cross-listed with Hist). (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Topics vary each time offered.

A. Ancient (Same as Hist 594A)

Primary Courses (Offered by Other Departments)

Art H 383. Greek and Roman Art, See Art and Design.

Greek 101. Elementary Ancient Greek I. See World Languages and Cultures.

Greek 102. Elementary Ancient Greek II. See World Languages and Cultures.

Greek 201. Intermediate Classical Greek. See World Languages and Cultures.

Greek 332. Introduction to Classical Greek Literature. See World Languages and Cultures.

Greek 441. Advanced Readings in Greek Literature. See World Languages and Cultures.

Greek 442. Advanced Topics in Greek Literature. See World Languages and Cultures.

Greek 490. Independent Study. See Foreign Language and Literature website. (www.language.iastate.edu)

Hist 280. Introduction to History of Science I. See History.

Latin 101. Elementary Latin I. See World Languages and Cultures.

Latin 102. Elementary Latin II. See World Languages and Cultures.

Latin 201. Intermediate Latin. See World Languages and Cultures.

Latin 322. Introduction to Latin Literature. See World Languages and Cultures.

Latin 441. Advanced Readings in Latin Literature. See World Languages and Cultures.

Latin 442. Advanced Topics in Latin Literature. See World Languages and Cultures.

Latin 490. Independent Study. See World Languages and Cultures website. (www.language.iastate.edu)

Communication Studies

(Administered by the College of Liberal Arts and Sciences)

The Communication Studies Major

The communication studies major prepares students for careers in business and industry and graduate education majoring in ComSt will find their career opportunities enhanced in professions requiring applied communication expertise, e.g., human resource management, personnel, public relations, training and development, sales, management, organizational development, business communication, law, and international and intercultural relations.

ComSt majors master a focused course of inquiry into the contemporary study of human communication. The ComSt major provides this focus through emphasis in applied communication theory and research in interpersonal, small group, organizational, and intercultural communication.

ComSt majors must earn at least 120.5 credits, with 45 credits at the 300-400 levels, and a minimum of 33 credits in ComSt.

Communication Proficiency Requirement:

To meet the University's Communication Proficiency requirement, students are required to take Engl 202, 209, 314, or 415. An average of C- is required in English 150, 250 (or 250H), and this additional writing course.

The Communication Studies Major

Core Introduction (15 credits)

1 Introduction to Communication Studies, ComSt 101
2 Introduction to Interpersonal Communication, ComSt 102
3 Introduction to Communication Research Methods, ComSt 203
4 Human Communication Theory, ComSt 301

Select one of these courses:

3 Professional Communication, ComSt 214
3 Conflict Management, ComSt 218
3 Fundamentals of Public Speaking, SpCm 212

Upper Division Requirements

Select five courses (15 credits)

1 Language, Thought and Action, ComSt 305
2 Intercultural Communication, ComSt 310
3 Relational Communication, ComSt 311
4 Organizational Communication, ComSt 314
5 Small Group Communication, ComSt 317
6 Nonverbal Communication, ComSt 325
7 Computer Mediated Communication, ComSt 330
8 Semantics, SpCm 305
9 Gender and Communication, ComSt 323

Select one of these seminars:

1 Communication Theory or Research, ComSt 404A
2 Interpersonal Communication, ComSt 404B
3 Small Group Communication, ComSt 404C
4 Organizational Communication, ComSt 404D
5 Intercultural Communication, ComSt 404E
6 Nonverbal Communication, ComSt 404F
7 Training and Development, ComSt 404G
8 Computer Mediated Communication, ComSt 404H

33 Total

Enhancement Requirement (4 credits)

1 Computer Applications, Com S 103
Recommended: Stat 101 or equivalent
ComSt 102. Introduction to Interpersonal Communication. (3-0) Cr. 3. Application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.

ComSt 203. Introduction to Communication Research Methods. (3-0) Cr. 3. An introduction to analyzing and conducting communication research. Includes theory development, statistics, and methodologies.

ComSt 214. Professional Communication. (3-0) Cr. 3. Communication theory and skill development in organizational settings. Emphasis on interpersonal skill development, team and meeting facilitation, informational interviewing, and team presentations and self-assessment.

ComSt 218. Conflict Management. (3-0) Cr. 3. Exploration of communication theories, principles and methods associated with effective conflict management.

ComSt 301. Human Communication Theory. (3-0) Cr. 3. Prereq: 101. Examination of the major theories related to human communication; with particular emphasis on theories underlying interpersonal, small group, organizational, and intercultural communication.

ComSt 305. Language, Thought and Action. (Cross-listed with Sp Cm, Lingl) (3-0) Cr. 3. F.S. Cr. Prereq: Engl 250. The study of symbolic processes and how meaning is conveyed in words, sentences, and utterances; discussion of modern theories of meaning; and an exploration of relationships among language, thought and action. Nonmajor graduate credit.

ComSt 310. Intercultural Communication. (3-0) Cr. 3. Cr. Prereq: 101 or 102, 203, 301. Examines the theories, principles, and research on intercultural communication to enhance cultural sensitivity and to recognize, accept, and adapt to cultural diversity. Interactive assignments.

ComSt 311. Relational Communication. (3-0) Cr. 3. Prereq: 102, 203, 301. A study of contemporary interpersonal communication theories and research. Emphasis on relational development research including initiation, maintenance, conflict management, and dissolution.

ComSt 314. Organizational Communication. (3-0) Cr. 3. Prereq: 101 or 102, 203, 301. Theory and research in organizational communication; strategies for assessing and improving individual and organizational communication effectiveness; an understanding of how organizational meaning is created and sustained through human communication.

ComSt 317. Small Group Communication. (3-0) Cr. 3. Prereq: 101 or 102, 203, 301. Theory and research in small group communication; application to group decision-making and leadership. Includes communication analyses of groups and teams.

ComSt 323. Gender and Communication. (Cross-listed with Sp Cm, W S) (3-0) Cr. 3. F. Cr. Prereq: Sp Cm 212. The rhetorical strategies women and men use to succeed in oral communication; the theory, principles, and practice of effective gender communication in a variety of settings. Nonmajor graduate credit.

ComSt 325. Nonverbal Communication. (Cross-listed with Sp Cm, W S) (3-0) Cr. 3. Cr. Prereq: ComSt 101 or 102, 203, 301. Theory and research in nonverbal communication; exploration of nonverbal subcodes; function of nonverbal communication in various contexts; student-designed investigations.

ComSt 330. Computer Mediated Communication. (3-0) Cr. 3. Prereq: 101 or 102, 203, 301. Theories and perspectives related to mediated communication in interpersonal and organizational settings. Focus on how new technology will impact human interaction with computers as well as between and among humans.

ComSt 404. Seminar in Communication Studies. (D-M-A) (3-0) Cr. 3. Repeatable. Prereq: ComSt 301 plus 9 additional hours of 300 level ComSt courses.

ComSt 400. Independent Study. Cr. arr. Repeatable. Prereq: 9 credits in communication studies and junior classification. Application must be submitted for approval the semester prior to the independent study.

ComSt 499. Professional Internship. Cr. arr. Repeatable. Four hundred hours of on-site work is required for 3 hours credit. Registration by application only. Application must be submitted to Communication Studies faculty adviser for approval the semester prior to the internship.

Courses primarily for graduate students, open to qualified undergraduate students:

ComSt 590. Special Topics. Cr. arr. Repeatable. Application must be submitted for approval the semester prior to the independent study.

Community Development

www.gpiidea.org

(Interinstitutional Graduate Program)

Participating Institutions:

- Iowa State University
- Kansas State University
- University of Nebraska
- North Dakota State University
- South Dakota State University

Community Development is an interinstitutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the six universities: Iowa State University, Kansas State University, University of Nebraska, North Dakota State University, and South Dakota State University.

At Iowa State University, Community Development is an optional area of specialization within the Interdisciplinary Graduate Studies degree program that consists of 37 semester credits for completion of the program. A thesis or creative component is required. A computer with minimum specifications, Web access, and an email address are required for completing the program.

Registration

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

C Dev 502. Community and Natural Resource Management. (3-0) Cr. 3. Detailed introduction to community resource management. Theoretical frameworks, methodological investigation, applied practices. Enhancement of ability of community development professionals to work with communities to plan, develop and monitor conversation and development of natural resources with multiple functions.

C Dev 503. Community Development I: Principles and Strategies of Community Change. (3-0) Cr. 3. Analysis of principles and practices of community change and development. Use of case studies to relate community development approaches to conceptual models from diverse disciplines. Exploration of professional practice principles, and student construction of their personal framework for practicing community development.

C Dev 504. Community Analysis: Introduction to Methods. (3-0) Cr. 3. Introduction to research methods relevant to community development. Formulate and begin a research effort, methods of data collection and how conceptual frameworks are used to develop the questions and analyze data. Emphasis on strategies for reporting findings and applying findings in community action and methods of evaluating the entire research process. Significant attention paid to issues of research ethics and inclusiveness.

C Dev 505. Community Development II: Organizing for Community Change. (3-0) Cr. 3. Examines role of civil society in community organizing efforts. Comparative approach to planning theories and approaches. Focus on change within communities and the roles of government, planners, and citizens in reacting to or shaping change. Dimensions of social capital and the context of change covered.

C Dev 506. Community and Regional Economic Analysis. (3-0) Cr. 3. Introduction to concepts of communities and regions, theories of economic growth, drivers of economic growth, the economic base of a community, sources of growth or decline in the community, roles of local government and institutions, and analytical tools. Strategies for local economic Development will also be explored.

C Dev 507. Introduction to Native Communities. (3-0) Cr. 3. A base knowledge course. For students currently working within, in partnership with, or considering working with Native communities. Basic understanding within the context of community development of the diversity of the tribal structures and cultures and the unique history and jurisdictional considerations of these nations. Working with tribes, Federal and Indian relations, and governance and cultural issues.

C Dev 508. Ecological Economics. (3-0) Cr. 3. Approaches economy and community by looking at the inherent interdependence, jointness, and potential complementarity between ecology and economy (utility) of a place.

C Dev 509. Building Native Community and Economic Capacity. (3-0) Cr. 3. Focus on non-western approaches to helping Native communities build their capacity. Students will learn to take a participatory, culture-centered, and strength-based approach to development.

C Dev 510. Indian Country Agriculture and Natural Resources. (3-0) Cr. 3. Introduction to the historical and contemporary issues related to natural resource management on Native American lands. Philosophical and economic arguments concerning natural resource conservation, preservation and extraction will be explored.

C Dev 512. Sustainable Communities. (3-0) Cr. 3. Students will learn the conceptual relationships among Community and Sustainable Development and Sustainable Communities and examine the social, environmental, and economic aspects of sustainable communities. The course includes analysis of public policy impacts on community sustainability, practical actions for enhancing sustainability, and changing power dynamics and reward structures involved in incorporating sustainability into Community Development.

C Dev 513. Economic Development Strategies and Programs. (3-0) Cr. 3. Course explores theories of local economic development and addresses the development issues faced by communities in the 21st century. Students will understand and apply concepts from economic Development planning, economic analysis, business development, human resource development, community-based development, and high-technology development.
Community and Regional Planning

Community and Regional Planning

Douglas Johnston, Chair of Department

Professors: Johnston, Mahayni

Professors (Emeritus): Shinn

Associate Professors: Borich, Bradbury, Coates, Owusu

Associate Professors (Emeritus): Huntington, Knox, Malone

Assistant Professors: Basmajian, Clapp, Haddad, Sandoval, Taylor, Trabz

Assistant Professors (Adjunct): Swenson

Lecturers: Jensen, Mehrtra

Undergraduate Study

For undergraduate curriculum in community and regional planning leading to the degree bachelor of science, see College of Design, Curricula.

Community and regional planning is a professional field of study aimed at assessing the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to understand and solve problems. Most planners work at the local level, but they are concerned with issues that affect the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunity; and the management of growth and change of all kinds.

Planning has its roots in landscape architecture, architecture, engineering, law, economics, and public administration. Most contemporary planners are trained in the physical and social sciences so they can understand the society and economy in which plans must be implemented. Planning demands technical competence as well as creativity, plus pragmatism and an ability to envision alternatives to the physical and social environments in which we live.

Graduates of the Community and Regional Planning Department will be capable of performing in entry level positions in public planning agencies or with planning consulting firms. Graduates are able to integrate planning knowledge and skills in practical applications to current planning issues, and to communicate in written and oral form.

Graduates of the Community and Regional Planning Department are expected to have knowledge of the structure and functions of urban settlements, the history of planning, and aspects of plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written/oral and graphic communication, collaborative approaches to these, and in synthesizing and applying knowledge to practice. Graduates are expected to assess the impact of values in terms of equity and social justice, economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning, thus providing the student with an education which, when combined with experience, supports the individual's eligibility for membership in the American Institute of Certified Planners.

The department cooperates in the undergraduate minors in design studies and environmental studies.

Graduate Study

The Department offers work for the Master of Community and Regional Planning degree with areas of concentration in land use and transportation, community design and development, and rural and environmental planning. In addition, students can design an area of concentration if it does not fit in any of the three areas, with the assistance of their major professor. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Degree requirements include completion of a 2-year, 48-credit program, including a thesis of 6 credits or a professional planning report of 4 credits.

M.B.A.), public administration (M.C.R.P/P.M.A.), and landscape architecture (M.C.R.P./M.L.A.). The department also participates in the interdepartmental major in transportation.

The department also offers a 13-credit graduate certificate in Geographic Information Systems (GIS) in spatial analysis, GIS applications and program management. The program is open to students in all disciplines of the University. Information guides for the graduate degree and certificate may be obtained from the department office at the department's web page at:
http://www.design.iastate.edu/CRP/

CRP currently offers several courses via distance learning to graduates and planning professionals interested in expanding their knowledge of planning. Further details of current distance course offerings may be found on the CRP website and on the ISU Continuing Education website. For more information, send an e-mail to crp@iastate.edu

Courses primarily for undergraduate students

C R P 253. Survey of Community and Regional Planning. (3-0) Cr. 3. A historical survey of planning, the nature and problems of urban areas, and the goals, procedures, and results of urban planning.

C R P 270. Forces Shaping Our Metropolitan Environment. (Cross-listed with Dsn S). (3-0) Cr. 3. Must be taken prior to completing 9 credits in C R P . Introduction to the social, political, physical, and economic forces as they shape metropolitan areas. A comprehensive picture of metropolitan development showing important roles other urban disciplines play in the planning process and the interrelationships of the disciplines.

C R P 272. Planning Analysis and Techniques I. (2-2) Cr. 3. F. Existing and emerging techniques for preparation of community planning studies. Sources of planning information and data. Survey techniques including survey instruments, sampling methods, and use of demographic studies. Land use surveys for comprehensive and transportation planning. Student's oral and graphic presentation of analytical results. Laboratory emphasizes practical uses and computer applications for data analysis.

C R P 274. Planning Analysis and Techniques II. (2-2) Cr. 3. S. Prereq. 272. Use of quantitative methods for analysis of population, land use, economic, and transportation make-up of a community; activities and location, intensity, and timing of land uses and public services. Student's oral and graphic presentation of analytical results. Laboratory emphasizes practical uses and computer applications for data analysis.

C R P 291. World Cities and Globalization. (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. F. offered 2010. Prereq: Sophomore classification. World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, environmentalism, tourism, popular culture and place-based identity.

C R P 293. Environmental Planning. (Cross-listed with Dsn S, Env S). (3-0) Cr. 3. F. Prereq: Sophomore classification. Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

C R P 320. Urban form. (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2011. Prereq. 253 or 270, or permission of instructor. Examines how urban form is shaped, what constitutes good urban form, and what are the trends in emerging urban forms. Descriptive, explanatory and normative theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.

C R P 331. Professional Practice Seminar. (Dual-listed with 531). (1-0) Cr. 1. S. Prereq: Major in community and regional planning. Preparation for working in a planning office of expectation of employment in an employer; presentations from planning professionals, and discussion of differences/similarities between public and private planning offices. Satisfactory-fail only.

C R P 332. Community Planning Studio I. (2-4) Cr. 4. F. Prereq: 253, 272. Application of planning methods and skills to issue identification and investigation. Introduction to problem formulation, study, and analysis in a community setting.

C R P 376. Rural, Urban and Regional Economics. (Cross-listed with Econ). (3-0) Cr. 3. F.S. Prereq: Econ 101. Farm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime. Nonmajor graduate credit.

C R P 383. Theory of the Planning Process. (3-0) Cr. 3. S. Prereq: 253, junior status. The nature of planning and its relation to social and economic planning; levels of planning, place of planning in decision making; steps in the planning process, uses and limitation of knowledge in planning, relation of facts and values.

C R P 391. Field Travel. Cr. art. Repeatable. F.S.SS. Prereq: CRP major and permission of instructor. Observation of professional practice and community or regional problems and issues. Satisfactory-fail only.

C R P 416. Urban Design and Practice. (Dual-listed with 516). (3-0) Cr. 6. S. Prereq: 253 or 270. Principles of urban design and their application to residential and commercial development in studio projects.

C R P 417. Urban Revitalization. (Dual-listed with 517). (Cross-listed with 523). (3-0) Cr. 3. Alt. S. offered 2010. Prereq: 253 or 270. Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 425. Growth Management. (Dual-listed with 525). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Junior classification. Review of techniques used to manage growth-related change and to implement and evaluate investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

C R P 429. International Planning. (Dual-listed with 529). (Cross-listed with Dsn S). (3-0) Cr. 3. S. Prereq: Junior classification. Issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C R P 442. Site Development. (Dual-listed with 542). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 253, 272. Introduction to site analysis using landscape architecture and environmental principles, drainage, microclimate, and street crossings concepts. Work will evolve from analysis to land development design.

C R P 445. Transportation Policy Planning. (Dual-listed with 545). (3-0) Cr. 3. F. Prereq: C E 350 or equivalent. Comprehensive overview of key policy issues relevant to transportation planning and investment in the United States. Urban issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

C R P 451. Introduction to Geographic Information Systems. (Dual-listed with 551). (2-3) Cr. 3. F.S.SS. Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data presentation, analytical modeling, and applications of spatial databases. Laboratory emphasizes practical applications and uses of GIS.

C R P 452. Geographic Data Management and Planning Analysis. (Dual-listed with 552). (2-2) Cr. 3. F. Prereq: C R P 451 or equivalent. Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 475. Grant Writing. (Dual-listed with 575). (1-0) Cr. 1. F. Prereq: 253 or 270 and junior classification. A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 481. Regional and State Planning. (Dual-listed with 581). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 253 or 270. Analysis of theories, policies, and functions at the metropolitan, regional, and state levels with emphasis on area-wide governance structures and strategies for guiding development.

C R P 492. Planning Law, Administration and Implementation. (3-0) Cr. 3. F. Prereq: 383. The basis in constitutional, common, and statutory law for the powers of planners and the practical aspects of balancing public and private interests as revealed in the study of leading court cases. Administration of planning agencies and programs.

C R P 494. Senior Seminar in Planning. Cr. art. Repeatable. F.S.SS. Prereq: Senior classification, 332 should be taken prior to or concurrently. An advanced forum for seniors that focuses upon recent trends and important issues affecting planning today. Topics addressed will vary. A demonstration of understanding current issues and their affects upon planning applications is expected.

C R P 498. Portfolio Development and Review. (1-0) Cr. 1. F.S. Should be taken in the final semester of the planning program. Preparation of a portfolio of student work that represents student learning throughout the entire planning program.

Courses primarily for graduate students, open to qualified undergraduate students

C R P 501. Methods I. (3-0) Cr. 3. F. Prereq: Graduate classification and Stat 401. Approaches to quantitative methods in planning with emphasis on the collection, description, analysis, presentation, and interpretation of planning data. Primary data collection using survey techniques, Secondary data types and sources of planning information for population projection and demographic analysis.

C R P 502. Methods II. (3-0) Cr. 3. S. Prereq: Gradu- ate classification and Stat 401. Investigative and participatory methods for citizen involvement and planning research including public meetings and processes, consultation, case studies, and focus groups. Research design for planning practice, and thesis and professional report proposal development.

C R P 504. Why Change Anything?. (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Graduate classification. Introduction to a range of approaches to justifying innovations, changes, and interventions proposed by designers, planners, and artists. Reasons for change and their bases in social, philosophical, and design reasoning; and their usefulness in justifying change to different audiences. Investigation of fallacies, ideologies, and contemporary problems in justifications.

C R P 511. Introduction to Community and Regional Planning. (3-0) Cr. 3. F. Prereq: Graduate classification. Development of planning in the United States; history and evolution of the planning profession and constructs of current practice. Theoretical basis of planning.

C R P 516. Urban Design Practice. (Dual-listed with 418). (3-0) Cr. 6. S. Prereq: Graduate classification. Principles of urban design and their application to residential and commercial development in studio project.

C R P 517. Urban Revitalization. (Dual-listed with 417). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Graduate classification. Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 519. Middle Eastern Cities. (3-0) Cr. 3. F. Prereq: Graduate or senior standing. Middle Eastern cit- ies introduce a particular continuity between history and contemporary life where in some cases the latter is about re-defining the former. Introduction to basic academic writings on Middle Eastern cities in addition to other contemporary cultural productions of the region. Study of various aspects of Middle Eastern life paid the greatest attention.

Community and Regional Planning

C R P 492. Planning Law, Administration and Implementation. (3-0) Cr. 3. F. Prereq: 383. The basis in constitutional, common, and statutory law for the powers of planners and the practical aspects of balancing public and private interests as revealed in the study of leading court cases. Administration of planning agencies and programs.
Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS. C R P 555. Community Economic Development. (Dual-listed with 455). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Graduate classification. The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

C R P 575. Grant Writing. (Dual-listed with 475). (1-0) Cr. 1. F. Prereq: Graduate classification. A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 590. Special Topics. Cr. arr. Repeatable. F.S.S. Prereq: Graduate classification and written approval of instructor and department chair on required form. A. Planning Law, Administration and Implementation B. Economic Development C. Urban Design D. Housing and Urban Revitalization E. Environmental Planning F. Land and Transportation Planning G. Environmental Planning H. International Planning I. Planning in Small Towns J. Diversity and Equity in Planning K. Geographic Information Systems L. Environmental Law and Planning. (Dual-listed with 491). (Cross-listed with 53-54) Cr. 3. S. Prereq: offered 2011. Prereq: Graduate classification. Deep understanding of the cross-disciplinary aspects of artificial life techniques. Students who complete a minor in this graduate program are able to describe and report on various artificial life techniques as applied to many fields, even outside their own field of application.

Courses for graduate students:

C R P 592. Land Use and Development Regulation Law. (3-0) Cr. 3. F. Prereq: Graduate classification. An in-depth analysis of the legal constructs that shape the practice of planning and plan implementation in the United States. An exploration of how land use regulations are applied to reconcile the competing needs and diverse uses of land. The positive and negative consequences of developing and implementing regulatory controls will be addressed.

Courses primarily for graduate students, open to qualified undergraduate students:

C R P 599. Professional Planning Report. Cr. arr. Repeatable. F.S.S. Independent student research on planning topic. The course will serve as a capstone experience for the student, demonstrating ability to integrate planning knowledge and skills in the practical application of the student's abilities on a current planning issue. The completed report must be submitted to and approved by the POS committee as evidence of the mastery of the principles of community and regional planning.

Complex Adaptive Systems

(Interdepartmental Graduate Minor)

Program Co-chairs: K.M. Bryden and J. E. Mayfield

The Complex Adaptive Systems (CAS) minor provides graduate students with an understanding of the interrelationships among the various methodologies often collectively referred to as Artificial Life. Of special importance in the program is the interplay of biological principles and computer simulations in various fields including Economics, Engineering, Mathematicians, and Biology.

Graduates understand the ways in which artificial life techniques may be a major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of artificial life techniques. Students who complete a minor in this graduate program are able to describe and report on various artificial life techniques as applied to many fields, even outside their own field of application.

Work in the CAS minor is offered for students pursuing any graduate degree. The primary cooperating departments are Economics; Computer Science; Electrical and Computer Engineering; Mechanical Engineering; Mathematics; Psychology; Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology.

Each student’s Masters Program of Study (POS) must include at least 9 CAS relevant course credits chosen in consultation with the student’s POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503 (see below). Each student’s Ph.D. POS must include at least 12 CAS relevant course credits chosen in consultation with the student’s POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503. Ph.D. students who also minors in CAS at the master’s level must take one additional CAS relevant course (3 cr.) and two additional credits of CAS seminar. Courses that satisfy CAS requirements may also be used to satisfy major requirements if such “double counting” is acceptable to the major program.

Intersted students may contact the chairperson of the advisory committee for complete lists of courses and of CAS faculty members.

C R P 502. Complex Adaptive Systems Seminar. (Cross-listed with Com S). (1-0) Cr. 1. F. Prereq: Admission to CAS minor. Understanding core techniques in artificial life is based on basic readings in
Undergraduate Study
For the undergraduate curriculum in computer engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of ABET. The Electrical and Computer Engineering (ECPE) Department at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, to study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of computer engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The computer engineering curriculum offers focus areas in software, software systems, embedded systems, networking, information security, computer architecture, and VLSI. Students may also take elective courses in control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing. The objective of the computer engineering program at ISU is that its graduates should demonstrate expertise, engagement, learning, leadership, and teamwork within five years after graduation.

Expertise: Graduates should establish peer-recognized expertise together with the ability to articulate that expertise and use it for problem solving in the analysis, design, and evaluation of computer and software systems, including system integration and implementation, using contemporary practices.

Engagement: Graduates should be engaged in the engineering profession, locally and globally, contributing through the ethical, competent, and creative practice of computer engineering in industry, academia, or the public sector, or graduates may use the program as a foundation for interdisciplinary careers in business, law, medicine, or public service.

Learning: Graduates should demonstrate sustained learning through graduate work or professional improvement opportunities and through self-study, and they should demonstrate the ability to adapt in a constantly changing field.

Leadership: Graduates should exhibit leadership and initiative to advance professional and organizational goals, facilitate the achievements of others, and obtain results.

Teamwork: Graduates should demonstrate effective teaming and commitment to working with others of diverse cultural and interdiscipli

ary backgrounds by applying engineering abilities, communication skills, and knowledge of contemporary and global issues.

As a complement to the instructional activity, the ECPE Department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. See College of Engineering, Cooperative Programs. Students have the opportunity to participate in advanced research activities; and through international exchange programs, students learn about engineering practices in other parts of the world.

Well qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both bachelor of science and master of science or bachelor of science and master of business administration degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s web site.

Courses primarily for undergraduate students
Cpr E 166. Professional Programs Orientation. (Cross-listed with E E). Cr. R. F. S. (1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, student services operations, degree requirements, program of study planning, career options, and student organizations.
Cpr E 186. Introduction to Computer Engineering and Problem Solving II. (0-2) Cr. 1. S. Preq: 185. Project based examples from computer engineering. Group skills needed to work effectively in teams.
Group problem solving. Computer based projects. Technical reports and presentations. Students will work on 2 or 3 self-directed team based projects that are representative of problems faced by computer engineers.

Cpr E 394. Program Exploration. (Cross-listed with E E). (3-2) Cr. 4. F. S. Prereq: 284 or E E 284. Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based on skills. Introduction to a professional portfolio development and construction. Satisfactory-fail only.

Cpr E 396. Summer Internship. Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services. Internship for this course before commencing work.

Cpr E 310. Theoretical Foundations of Computer Engineering. (3-0) Cr. 3. F. S. Prereq: Credit or enrollment in Cpr E 288. Com S 228. Propositional logic and methods of proof, set theory and its applications; Mathematical induction and recurrence relations; functions and relations; and counting; trees and graphs; applications in computer engineering.

Cpr E 370. Toying with Technology. (Cross-listed with Mat E). (3-2) Cr. 3. F. S. Prereq: C 1201, junior standing in non-engineering major. A project-based, hands-on learning course. Technology literacy appreciation for technological innovations, principles behind many technological innovations, hands-on laboratory experiences based upon simple systems constructed out of LEDGs and controlled by small microcomputers. Future K-12 teachers will leave the course with complete lesson plans for use in their upcoming careers.

Cpr E 394. Program Exploration. (Cross-listed with E E). (3-2) Cr. R. Prereq: 294 or E E 294. Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based on skills. Introduction to a professional portfolio development and construction. Satisfactory-fail only.

Cpr E 396. Summer Internship. Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services. Internship for this course before commencing work.

Cpr E 397. Engineering Internship. Cr. R. Repeatable. F. S. Prereq: Permission of department and Engineering Career Services. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Cpr E 416. Software Evolution and Maintenance. (Cross-listed with Com S). (3-0) Cr. 3. Prereq: Com S 309, S E 319. Fundamental concepts in software evolution and maintenance; practical software evolution processes; legacy systems, program comprehension, impact analysis, program migration and transformation, refactoring, tools for software evolution and maintenance. Case studies, experimental software projects. Written reports and oral presentation. Nonmajor graduate credit.

Cpr E 425. High Performance Computing for Scientific and Engineering Applications. (Cross-listed with Com S). (3-1) Cr. 3. S. Prereq: Com S 311, Com S 320. Prereq: Com S 320. Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports. Nonmajor graduate credit.

Cpr E 426. Introduction to Parallel Algorithms and Programming. (Dual-listed with 526). (Cross-listed with Com S). (3-1) Cr. 4. F. Prereq: Cpr E 308 or Com S 321. Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms. Nonmajor graduate credit.

Cpr E 431. Basics of Information System Security. (3-0) Cr. 3. S. Prereq: credit or enrollment in Cpr E 489 or Com S 454. Introduction to and application of basic mechanisms for protecting information systems from accidental and intentional threats. Basic cryptography use and practice. Computer security issues including authentication, access control, and malicious code. Newtork security mechanisms such as intrusion detection, firewalls, IPSEC, and related protocols. Ethics and legal issues in information security. Other selected topics. Programming and system configuration assignments. Nonmajor graduate credit.

Cpr E 435. Analog VLSI Circuit Design. (Cross-listed with E E). (3-3) Cr. 4. S. Prereq: 330, E E 322, 324, and either E E 322 or Stat 330. Basic analog integrated circuit and system design including design space exploration, performance optimization strategies, operational amplifiers, references, integrated filters, and data converters. Nonmajor graduate credit.

Cpr E 444. Introduction to Bioinformatics. (Dual-listed with 544). (Cross-listed with BCB, Com S, Biol, Gen). (4-0) Cr. 4. F. Prereq: Math 185 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic tree, comparative and functional genomics. Nonmajor graduate credit.

Cpr E 450. Distributed Systems and Middleware. (Dual-listed with 550). (3-0) Cr. 3. Prereq: 308 or Com S 352. Fundamentals of distributed computing, software agents, naming services, distributed transactions, security mechanisms. Distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and internet applications. Nonmajor graduate credit.

Cpr E 454. Distributed and Network Operating Systems. (Dual-listed with 558). (3-0) Cr. 3. Prereq: 308 or Com S 352. Fundamentals of distributed operating systems and distributed computing environments (DCE). The client server paradigm, interprocess communications, layered communication protocols, synchronization and concurrency control, and distributed file system technologies. Includes additional in-depth study of advanced operating systems. Written reports. Nonmajor graduate credit.

Cpr E 465. Digital VLSI Design. (Cross-listed with E E). (3-3) Cr. 4. S. Prereq: E E 330. Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages. CMOS logic design styles, area-energy-delay design.
Cpr E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Aer E, E E, Engr E, I E, Mat E, M E). (1-4) Cr. 3. Repeatable. F.S. Prereq: Student must be within two semesters of graduation and receive permission of instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufactur- ing and life cycle concerns. Amos. Application of design tools such as CAD, CAM, and FEM. Design methodol- ogies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, presentations, proposals and models and engineering drawings.

Cpr E 488. Embedded Systems Design. (3-3) Cr. 4. Prereq: 381 or Com S 321. Embedded microproces- sor, embedded memory and I/O devices, component interfaces, embedded software, program development, basic compiler techniques, platform- based FPGA technology, hardware synthesis, design methodology, real-time operating system concepts, performance analysis and optimizations. Nonmajor graduate credit.

Cpr E 491. Senior Design Project I and Profession- alism. (Cross-listed with E E). (2-3) Cr. 3. F. Prereq: 308 or E 422, completion of 24 credits in the E E core professional program or 29 credits in the Cpr E core professional program, Engr 314. Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

Cpr E 492. Senior Design Project II. (Cross-listed with E E). (1-3) Cr. 2. F. Prereq: 491 or E 491. Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or Cpr E 491 and the evaluation of project results. Techni- cal writing of final report; oral presentation of project achievements; project poster.

Cpr E 494. Portfolio Assessment. (Cross-listed with E E). Cr. R. Prereq: Credit or enrollment in 491. Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

Cpr E 498. Cooperative Education. Cr. R. Repeat- able. F.S.SS. Prereq: 396, permission of department and Engineering. Third and subsequen- t professional work periods in the cooperative education program. Students must register for this course before beginning work.

Courses primarily for graduate students, open to qualified undergraduate students

Cpr E 507 VLSI Communication Circuits. (Cross- listed with E E). (3-3) Cr. 3. Alt. S., offered 2011. Prereq: 330 or 501. Phase-locked loops, frequency synthesis, clock generation, clock recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

Cpr E 511. Design and Analysis of Algorithms. (Cross-listed with Com S). (3-3) Cr. 3. F. Prereq: Com S 311. A study of basic algorithm design and analysis. Use of techniques to analyze and compare data structures, amortized analysis and randomized algorithms. Applications to sorting, graphs, and geometry. NP-completeness and approximation algorithms.

Cpr E 525. Numerical Analysis of High-Perform- ance Computing. (Cross-listed with Com S, Math). (3-0) Cr. 3. S. Prereq: Math 471. Exposure to scientific programming; knowledge of FORTRAN or C. Development, analysis, and testing of efficient numerical methods for use on state-of-the- art high performance computers. Applications of the methods to the student’s area of research.

Cpr E 526. Introduction to Parallel Algorithms and Programming. (Cross-listed with Com S). (4-2) Cr. 3-2 Cr. Prereq: Math 471. An introduction to parallelism in scientific programming; knowledge of FORTRAN or C. Development, analysis, and testing of efficient algorithms for use on state-of-the-art high performance computers. Applications of the methods to the student’s area of research.

Cpr E 528. Probabilistic Methods in Computer Engineering. (3-3) Cr. 3. Prereq: Com S 311. The appli- cation of randomness and probabilistic methods in the design of computer algorithms, and their efficient implementation. Discrete random variables in modeling algorithm behavior, with applications to sorting, selection, graph algorithms, hashing, pattern matching, cryptography, distributed systems, and massive data sets.

Cpr E 530. Advanced Protocols and Network Secu- rity. (Cross-listed with InfAs). (3-3) Cr. 3. Prereq: 499 or 530 or Com S 486 or MIS 535. Computer and network security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

Cpr E 532. Information Warfare. (Cross-listed with InfAs). (3-3) Cr. 3. Prereq: 499 or 530 or Com S 486 or MIS 535. Computer and network security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

Cpr E 533. Cryptography. (Cross-listed with Math, InfAs). (3-3) Cr. Prereq: Math 301 or Cpr E 499 or Com S 330. Basic concepts of secure communica- tion, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications. Relevant material on number theory and finite fields.

Cpr E 534. Legal and Ethical Issues in Information Assurance. (Cross-listed with InfAs, Pol S). (3-3) Cr. 3. S. Prereq: Graduate classification, Cpr E or InfAs 531. Legal and ethical issues in information security. State and local codes and regulations. Privacy issues.

Cpr E 536. Computer and Network Forensics. (Cross-listed with InfAs). (3-3) Cr. 3. Prereq: 499 or 530. Fundamentals of computer and network forensics, forensic duplication and analysis, network surveil- lance, intrusion detection and response, incident response, anonymity and pseudonymity, privacy-protection techniques, cyber law, computer security policies and guidelines, court testimony and report writing, and case studies. Emphasis on hands- on experiments.

Cpr E 537. Wireless Network Security. (3-3) Cr. 3. S. Prereq: Credit or enrollment in 499 or 530. Intro- duction to the physical issues which lead to the design of protocols and device drivers associated with security of the airlink interface. Communication system modeling, wireless networking, base Stations, mobile Stations, airlink multiple access, jamming, spoofing, signal intercept, wireless LANs and moderns, cellular positioning, spread spectrum, signal modeling, propagation modeling, wireless security terminology.

Cpr E 541. High-Performance Communication Networks. (3-0) Cr. 3. Prereq: 499 or 530. Selected topics from recent advances in high performance networking. Next generation networks; asynchronous transfer made; traffic management, quality of service; high speed switching.

Cpr E 542. Optical Communication Networks. (3-0) Cr. 3. S. Prereq: 499. Optical components and interfaces; optical transmission and reception techniques; wavelength division multiplexing, network architectures and protocol for first generation, single and multihop optical network; routing and wavelength assignment in second generation wavelength routing networks; traffic grooming, optical network control; access networks, metro networks.

Cpr E 543. Wireless Network Architecture. (3-0) Cr. 3. S. Prereq: Credit or enrollment in 499 or 530. An introduction to the protocol architecture of the data link layer, network layer and transport layer for wireless networking. Operation and management of Medium Access Control in wireless local area networks; recent develop- ments in 802.11 and Bluetooth; wireless ATM; Mobile Internet Protocol; Mobile Transmission Control Protocol; wireless application protocol; ad-hoc wireless networks.

Cpr E 544. Introduction to Bioinformatics. (Dual- listed with 444). (Cross-listed with BCB, Com S, GenE). (3-0) Cr. 4. F. Prereq: Math 160 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, rNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

Cpr E 545. Fault-Tolerant Systems. (3-0) Cr. 3. Prereq: 381. Faults and their manifestations, errors, and failures; fault detection, location and reconfigura- tion techniques; time, space, information (coding) redundancy management; design for testability; self-checking and fail-safe circuits; system-level fault diagnosis; Byzantine agreement; stable storage and RAID; fault-tolerant network implementations in real- time systems; reliable software design; checkpoint- ing and rollback recovery; and reliability evaluation techniques and tools.

2009-2011 Computer Engineering
Cpr E 546. Wireless Sensor Networks. (3-0) Cr. 3. Prereq: Cpr E 489 or S300. Selected topics from recent advances in wireless sensor networks, including data-centric routing, query, and storage; data fusion and aggregation; coverage, connectivity, and lifetime of wireless sensor networks; sensor network deployment and management; security issues; energy-efficiency issues; radio and link characteristics in wireless sensor networks; medium access control protocols and link layer techniques; tracking and localization; geographic routing; robust routing; time synchronization; wireless sensor networks applications. Introduction to TinyOS and the nesC language. Hands-on experiments with Crossbow Motes.

Cpr E 549. Advanced Algorithms in Computational Biology. (Cross-listed with Com S, BCB). (3-0) Cr. 3. Alt. S., offered 2007 and 2009; Com S 311 and either Com S 228 or Com S 208. Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

Cpr E 550. Distributed Systems and Middleware. (Dual-listed with 450). (3-0) Cr. 3. Prereq: 308 or Com S 352. Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based, middleware-based application design and development, case studies of middleware and internet applications.

Cpr E 554. Distributed and Network Operating Systems. (Dual-listed with 454). (Cross-listed with Com S). (3-1) Cr. 3. Alt. S., offered 2011. Prereq: Com S 311, laboratory course dealing with practical issues of design and implementation of distributed and network operating systems and distributed computing environments (DCE). The client server paradigm, inter-process communications, layered communication protocols, synchronization and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports.

Cpr E 556. Scalable Software Engineering. (3-0) Cr. 3. Prereq: Com S 309. Study of methods, techniques, and problems in the design and evolution of complex software, aspect-oriented programming, domain-specific software technologies, automation for reliable and scalable software engineering, program analysis, comprehension, and program transformations.

Cpr E 564. Synthesis and Optimization of Digital Circuits. (3-0) Cr. 3. Prereq: 381. Algorithms and techniques to generate application-specific VLSI circuits from high-level behavioral modeling in hardware description languages. Boolean logic representation, two-level and multi-level logic synthesis, sequential logic optimization, hardware models, architectural-level synthesis and optimization, scheduling algorithms, resource sharing and binding.

Cpr E 575. Computational Perception. (Cross-listed with Com S, HCI). (3-0) Cr. 3. S. Prereq: Graduate standing or permission of instructor. This class covers Statistical and algorithmic methods for sensing, reasoning, and interpreting the activities of individuals by a computer. This semester we will focus on machine perception techniques that facilitate and augment human-computer interaction. The main goal of the class is to introduce computational perception on the software and hardware levels. You will work in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

Cpr E 581. Computer Systems Architecture. (Cross-listed with Com S). (3-0) Cr. 3. F. Prereq: 281. Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, cache coherence, cache coherency, interconnection networks and message routing, I/O devices and peripherals.

Cpr E 582. Computer Systems Performance. (3-0) Cr. 3. Prereq: 381, 310 and Stat S 330. Review of probability and stochastic processes concepts; Markovian processes and their applications; renewal theory; semi-Markovian queues; queueing networks, multiprocessor architectures; computer networks; switching systems; case studies.

Cpr E 583. Reconfigurable Computing Systems. (Cross-listed with Com S). (3-0) Cr. 3. Prereq: Background in computer architecture, design, and organization. Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architecture, and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurability.

Cpr E 587. Text Mining, Text Processing, and the Internet. (3-0) Cr. 3. Prereq: Com S 309 or Com S 311. Mining keyword, and other processing of text, including text and hypermedia on the world wide web. Human computer interaction in the context of text and hyper media. Topics of particular interest to enrolled students.

Cpr E 589. Multimedia Systems. (3-0) Cr. 3. S. Prereq: 308 or Com S 352. Fundamentals concepts in multimedia systems. Resource management issues in distributed/networked multimedia systems, QoS routing and multicasting, Traffic shaping, Task and message scheduling, Internet QoS. Adaptive multimedia applications over the Internet. Operating system support for multimedia, Storage architecture and scalable media servers. Compression techniques, synchronization techniques, processor architectures for multimedia.

Cpr E 590. Special Topics. Cr. arr. Repeatable. Formulation and solution of theoretical or practical problems in computer engineering.

Cpr E 594. Selected Topics in Computer Engineering. (3-0) Cr. 3. Repeatable.

Cpr E 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students

Cpr E 632. Information Assurance Capstone Design. (Cross-listed with InfAs). (3-0) Cr. 3. Prereq: 537, 532, 534. Capstone design course which integrates the security design process. Design of a security policy. Creation of a security plan. Implementation of the security plan. The students will attach each other's secure environments in an effort to defeat the security systems. Students explore the security plans and the performance of the plans. Social, political and ethics issues. Student self-evaluation, journaling, final written report, and an oral report.

Cpr E 697. Engineering Internship. (Cross-listed with E El). Cr. R. Repeatable. Prereq: Permission of department chair and Engineering Careers Services, graduation classification. One semester and one summer maximum per academic year professional work period. Satisfactory-fail only.

Undergraduate Study

Carl Chang, Chair of Department

Professors: Aluru, Bergman, C. Chang, Fernandez-Baca, Honavar, Huang, Kothari, J. Lutz, R. Lutz, Mad-dux, Miller, Sliutzki, Wong

Professors (Emeritus): Brearley, Oldehoeft, Stewart, Thomas

Associate Professors: Adurj, J. Chang , Chaudhuri, Chou, Eulenstein, Gadia, Jia, Miner, Prabhjui, Tavana- pong, Tyagi, Zhu

Associate Professor (Collaborators): Mayordome

Assistant Professors: Basu, Cai, Harding, Margaritis, Rajan, Ruan, Song, Stoytchev, Tian, T. Zhang, W. Zhang

Senior Lecturers: Lathroup, Mitra

Lecturers: S. Chang, Johnson, Kautz

Undergraduate Study

The curriculum leading to the baccalaureate degree in computer science is designed to prepare students for positions as computer scientists with business, industry, or government, or for graduate study in computer science. The main objectives are to impart to students an understanding of the basics of computer science, to develop proficiency in the practice of computing, and to prepare them for continued professional development.

The following are intended learning outcomes for computer science majors. Seniors will assess these outcomes in a survey conducted before they graduate and feedback thus obtained will be used to improve the curriculum.

A. Impart an understanding of the basics of the discipline. Each graduate will know
A.1 Fundamental principles of computing.
A.2 Basic Foundations of Mathematics, Statistics, and physical sciences
A.3 Design and implementation of programs
B. Develop proficiency in the practice of computing. The graduated student will be able to
B.1 Formulate and solve problems in computing,
B.2 Understand design and performance requirements of software systems,
B.3 Apply sound principles to the synthesis and analysis of computer systems
C. Prepare for continued professional development. Our students will
C.1 Engage in lifelong learning and expect to embrace change,
C.2 Communicate effectively and think critically and creatively, both independently and with others,
C.3 Be aware of social and ethical issues of computer science

Students must earn at least a C- in each course taken to fulfill the Degree Program.

To complete an undergraduate degree in Computer Science, a student must satisfy the requirements of the College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum) and include the following courses within the group requirements:

- Phil 343; Sp Crm 212; 14 credits of Math and Statistics including Math 165, Math 166, one Statistics course from Stat 105, 231, 305, 330, 333, or 341, and at least one Math course from Math 265, 266, 304, 307, 314, or 317; a minimum of 13 credits of natural science including Phys 221, 222, and at least one additional natural science course from the following list: A Ecl 312, Anthr 202, 207, BMB/221, Biol 312, Biol 365, Chem 163-231, Ent 370, Env S 324, Env S 330, FS HN 167, Gen 260, Geol 100-108, 201, 311, 451, 475, Mat E 207, 211, Mteor 206, 301, Psych 310. Communication Proficiency requirement: Engl 150, 250 and one of Engl 302, 305, 309 or 314. The minimum grade accepted in each of the three required English courses is a C-

Students wishing to pursue the B.S. degree in computer science must successfully complete the premajor program consisting of the following courses and minimum grade requirements:

- Course          Minimum Grade
  227
  228
  Math 165

Students majoring in computer science must successfully complete this premajor program prior to taking any other courses in the Department.

Thus, for computer science majors, this premajor serves as a necessary prerequisite to all the other courses offered by the Department.

Computer science majors transferring from other institutions must take at least 15 of their credits at the 300-level or above in our department while in residence at Iowa State.

To graduate with a major in the Computer Science Department, a student must earn at least a C- in each of the courses taken to fulfill the program of study.

A minimum of 44 credits is required for the B.S. degree in computer science. The required courses are: Com S 101, 203, Cpr E 281, Com S 277, 228, 229, 309, 311, 321, 330, 331, 342, 352, 362 or 363. In addition, two advanced-level courses must be selected from the following groups:

Group W: 426, 440, 454, 477, 486
Group B: 401, 409, 416, 417, 425, 430, 455, 461, 472, 474
Group N: 412, 418, Math 421, 471, 481, 426; Cpr E 485, Cpr E 489, M E 557

Courses in Group W require written reports and those in Group B require both oral and written reports. Students must take one course from Group B and one course from any group.

Students must earn a C- or better in each course in the department which is a prerequisite to a course listed in the student’s degree program.

Undergraduate Minor. The Computer Science Department offers an undergraduate minor in Computer Science. The minor requires at least 19 credits in computer science courses. Com S 227, 228, and 229, adding up to 10 credits are required. In addition, at least 9 credits should be taken in courses at the 300 level or above.

Undergraduate Curriculum in Software Engineering. The Department of Computer Science together with the Department of Electrical and Computer Engineering also offer a curriculum leading to an undergraduate degree in software engineering. The software engineering curriculum offers emphasis areas in software engineering principles, process, and practice. Students may also take elective courses in computer engineering and computer science.

See Index, Software Engineering. For curriculum information, see also College of Engineering and College of Liberal Arts and Sciences.

Computer Science

Graduate Study

The department offers work for the degrees Master of Science and Doctor of Philosophy with a major in Computer Science. The Doctor of Philosophy degree may also be earned with computer science as a co-major with some other discipline. Additionally, the department offers a minor to students majoring in other departments.

Established research areas include algorithms, artificial intelligence, computational complexity, computer architecture, bioinformatics, computational biology, computer networks, database systems, formal methods, information assurance, machine learning and neural networks, multimedia, operating systems, parallel and distributed computing, programming languages, robotics, and software engineering. There are also numerous opportunities for interdisciplinary research.

Typically, students beginning graduate work in Computer Science have completed a bachelor’s degree or equivalent in Computer Science. However, some students with undergraduate majors in other areas, such as Mathematical, physical, or biological science or engineering become successful graduate students in Computer Science.

For the degree Master of Science, a minimum of 30 semester credits is required. A thesis demonstrating research and the ability to organize and express significant ideas in computer science is required.

The purpose of the doctoral program is to train students to do original research in Computer Science. Each student is also required to attain knowledge and proficiency commensurate with a leadership role in the field. The Ph.D. requirements are governed by the student’s program of study committee within established guidelines of the department and the graduate college. They include coursework, demonstrated proficiency in four areas of Computer Science, a research skills requirement, a preliminary examination, and a doctoral dissertation and final oral examination.

The department recommends that all graduate students majoring in Computer Science teach as part of their training for an advanced degree.

Courses primarily for undergraduate students

Com S 101. Orientation. Cr. R. F.S. Introduction to the procedures and policies of Iowa State University and the Department of Computer Science, test-outs, the procedures and policies of Iowa State University. Cr. R. F.S. Satisfactory-fail only.

Com S 103. Computer Applications. Cr. 4. F.S.SS. Introduction to computer literacy and applications. Applications: Windows, Internet browser/HTML, word processing, spreadsheets, database management and presentation software. Literacy: history of computing, structure of computers, telecommunications, computer ethics, computer crime, and history of programming languages. No prior computer experience necessary. Course is offered online only. Students must attend an orientation session the first week of class.

Com S 104. Introduction to Computers. (1.5-1) Cr. 2. F.S. Offered first 8 weeks and last 8 weeks. Use of personal computer and workstation operating systems and beginning programming. Project-oriented approach to computer operation and programming, including use of tools to aid in programming. Topics from computer history, using basic Windows and Unix tools, program structure, expression, variables, decision and logic, and iteration. No prior computer experience necessary.
Com S 107. Applied Computer Programming. (3-0) Cr. 3. F.S. Introduction to computer programming for non-majors using a language such as the Visual Basic language. Basics of good programming and algorithm development. Graphical user interfaces.

Com S 201. Computer Programming in COBOL. (3-0) Cr. 3. S.S. Prereq: 107 or 207 or 227. Computer program construction and testing in COBOL. COBOL Emphasis on the design, writing, debugging, and testing of business applications programs in a transaction-oriented environment.

Com S 207. Programming I, I, I. (3-1) Cr. 3. S.S. Prereq: Math 150 or placement into Math 140/141/142 or higher. An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. Exceptions/ errors-handling. This course is designed for nonmajors. Credit may not be applied toward graduation for both Com S 207 and 227.

Com S 208. Programming II. (3-1) Cr. 3. S. Prereq: 207, credit or enrollment in Math 151, 160, or 165. Intermediate-level programming techniques. Emphasis on design, writing, testing, debugging, and documenting medium-sized programs. Data structures and their uses. Dynamic storage. Inheritance and polymorphism. Algorithm design and efficiency: recursion, searching, and sorting. Event-driven and GUI programming. The software development process. This course is designed for nonmajors. Credit may not be applied toward graduation for both Com S 207 and 227.

Com S 227. Introduction to Object-oriented Programming. (3-2) Cr. 4. F.S. An introduction to object-oriented design and programming techniques. Symbolic and numerical computation. Recursion and iteration. Modularity procedural and data abstraction, specifications and subtyping. Object-oriented techniques. Imperative programming. Emphasis on principles of programming and object-oriented design through extensive practice in design, writing, running, debugging, and reasoning about programs. This course is designed for majors. Credit may not be applied toward graduation for both Com S 207 and 227.

Com S 228. Introduction to Data Structures. (3-1) Cr. 3. F.S. Prereq: C- or better in 227, credit or enrollment in Math 165. An object-oriented approach to data structures and algorithms. Object-oriented analysis, design, and programming. Programming experience using an object-oriented language suitable for exploring advanced topics in programming. Topics include memory management, parameter passing, inheritance, compiling, debugging, and maintaining programs. Significant project experience.

Com S 252. Linux Operating System Essentials. (2-2) Cr. 3. F. Prereq: 103 or 207 or 227. Selected topics include: Linux Distributions, installation, configuration, and management of a Linux based computer system, shell programming, network accessing technologies, package management systems, system security, user, file sharing techniques, cooperation with other computers on the network, and open source software. This is a hands-on course designed to demonstrate the installation and utilization of the Linux operating system for a personal computer.

Com S 290. Independent Study. Cr. arr. F.S. Prereq: Permission of instructor. Satisfactory-fail only. H. Honors

Com S 309. Software Development Practices. (3-1) Cr. 3. F.S. Prereq: Com S 228 with C- or better, Com S 229 or Cpr E 211, Engi 250. A practical introduction to methods for managing software development. Processes, models, requirements analysis, structured and object-oriented design, coding, testing, maintenance, cost and schedule estimation, metrics. Programming projects.

Com S 311. Design and Analysis of Algorithms. (3-1) Cr. 3. F.S. Prereq: 228 with C- or better, Math 166, Engl 250, Cpr E 281, Engl 250. Asymptotic, worst-case, average-case and amortized analyses. Data structures including heaps, hash tables, binary search trees and red-black trees. Programming projects. Credit may not be applied toward graduation for both Com S 311 and 381. Nonmajor graduate credit.

Com S 321. Introduction to Computer Architecture and Machine-Level Programming. (3-1) Cr. 3. F.S. Prereq: C- or higher in 228, Cpr E 281 and Engi 250. Introduction to computer architecture and organization. Emphasis on evaluation of performance, instruction set architecture, datapath and control, memory hierarchy design, and pipelining. Assembly language on a simulator. Nonmajor graduate credit.

Com S 330. Discrete Computational Structures. (3-1) Cr. 3. F.S. Prereq: C- or higher in 228, C- or higher in Math 166, Engl 250. Concepts in discrete Mathem-ematics as applied to computer science. Logic, proof techniques, set theory, relations, graphs, combinatorics, discrete probability and number theory. Nonmajor graduate credit.

Com S 331. Theory of Computing. (Cross-listed with S E). (3-1) Cr. 3. F. Prereq: C- or better in 228, C- or higher in Math 166, Engi 250. Models of computation: finite state automata, pushdown automata and Turing machines. Study of grammars and their relation to automata. Limits of digital computation, unsolvability and Church-Turing thesis. Chomsky hierarchy and relations between classes of languages. Nonmajor graduate credit.

Com S 342. Principles of Programming Languages. (3-1) Cr. 3. F.S. Prereq: 321, 330 or Cpr E 310, either 309 or 331, 362 or 363. Design of program-ming languages emphasizing language design con-cepts and semantics. Study of language features and major programming paradigms, especially functional programming. Programming projects. Nonmajor graduate credit.

Com S 362. Introduction to Operating Systems. (3-1) Cr. 3. F.S. Prereq: 227, Engl 250. Survey of operating system issues. Introduction to hardware and software components including: processors, peripherals, interrupts, management of processes, threads and memory, deadlock, file systems, protection, virtual machines and system organization, and introduction to distributed operating systems. Programming projects. Nonmajor graduate credit.

Com S 362. Object-Oriented Analysis and Design. (3-1) Cr. 3. F.S. Prereq: 228 with C- or better, Engi 250. Object-oriented requirements analysis and systems design. Design notations such as the Unified Modeling Language. Design Patterns. Group design and programming with large programming projects. Nonmajor graduate credit.

Com S 363. Introduction to Database Management Systems. (3-2) Cr. 3. F.S. Prereq: 222 with C- or better, Engi 250. Object-oriented requirements analysis and systems design. Design notations such as the Unified Modeling Language. Design Patterns. Group design and programming with large programming projects. Nonmajor graduate credit.

Com S 369. Cooperative Education. Cr. R. Prereq: Permission of department chair. Required of all cooperative students. Students must register for this course prior to commencing each work period.

Com S 401. Projects in Computing and Business Applications. (2-2) Cr. 3. F. S. Prereq: Engi 250, Sp Cm 212, Com S 309, and either 382 or 383. Applications of software development methods (requirements collection and analysis, project management, documentation and testing, programming techniques, database designs and administration, network application programming to solve computing needs in business settings. A study of practical applications of emerging technologies in computing. Emphasis on semester-long team programming projects. Lab assignments. Oral and written reports. Nonmajor graduate credit.

Com S 409. Software Requirements Engineering. (Dual-listed with 509). (Cross-listed with S E). (3-0) Cr. 3. F. Prereq: Com S 309, Engl 250, Sp Cm 212. The requirements engineering process, including identification of stakeholders, requirements elicitation techniques such as interviews and prototyping, analysis fundamentals, requirements specification, and verification. Use of Models: State-oriented, Func-tion-oriented, and Object-oriented. Documentation for Software Requirements. Informal, semi-formal, and formal representations. Structural, informational, and behavioral requirements and functional require-ments. Use of requirements repositories to manage and track requirements through the life cycle. Case studies, software projects, written reports, and oral presentations will be required. Nonmajor graduate credit.

Com S 417. Software Testing. (Cross-listed with S E). (3-0) Cr. 3. S. Prereq: Com S 309, 319, Engi 250, Sp Cm 212. Comprehensive study of software testing, principles, methodologies, management, strategies and techniques. Test models, test design techniques (black box and white box testing Techniques), integration, regression, system testing methods, and software testing tools. Nonmajor graduate credit.

Com S 418. Introduction to Computational Geometry. (Dual-listed with 518). (3-3) Cr. 3. Alt., offered 2011. Prereq: 311 or permission of instruc-tor. Introduction to computational geometry, and analysis techniques for computational problems that involve geometry. Line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality, Voronoi diagrams, and Delaunay triangulation, convex hulls, robot motion.
planning, visibility graphs. Other selected topics. Programming assignments. Nonmajor graduate credit. Com S 421. Logic for Mathematics and Computer Science. (Cross-listed with Math.) (3-0) Cr. 3. S. Prereq: Math 301 or 307 or 317 or Com S 330. Propositional and predicate logic. Topics selected from Horn logic, equational logic, resolution and unification, foundations of logic programming, reasoning about programs, program specification and verification, model checking and binary decision diagrams. Nonmajor graduate credit.

Com S 425. High Performance Computing for Scientific and Engineering Applications. (Cross-listed with Cpr E.) (3-3) Cr. 4. F. Prereq: Cpr E 308 or Com S 321, Com S 311. Models of parallel computation, performance measures, basic parallel constructs and communications. Parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms. Nonmajor graduate credit.

Com S 430. Advanced Programming Tools. (3-1) Cr. 3. F. Prereq: 311, 362 or 363, Eng 250, Sp Cm 212. Topics in advanced programming tools and techniques widely used by industry (e.g., event-driven programming and graphical user interfaces, standard libraries, client/server architectures and techniques for distributed applications). Emphasis on programming projects in a modern integrated development environment. Oral and written reports. Nonmajor graduate credit.

Com S 433. Computational Models of Nanoscale Self-Assembly. (Densely listed with 526.) (3-0) Cr. 3. S. Prereq: C- or higher in 331 or consent of the instructor. Modeling and analysis of natural and engineered systems that assemble themselves from small components. Topics include biomolecular self-assembly, tile assembly models, computation via self-assembly, distributed folding, origami models, self-assembly, tile assembly models, computation via self-assembly, distributed folding, origami models, self-assembly, tile assembly models, and selected applications of self-assembly, distributed folding, origami models, self-assembly, tile assembly models, and selected applications of self-assembly.

Com S 471. Computational Linear Algebra and Fixed Point Iteration. (Cross-listed with Math.) (3-0) Cr. 3. F. Prereq: Math 266 or Math 267. Emphasis on eigenvalues, solution of nonlinear equations in one and several variables. Nonmajor graduate credit.

Com S 474. Elements of Neural Computation. (3-1) Cr. 3. Alt. F. offered 2010. Prereq: Math 228, Math 307 or Cpr E 310, Math 166, Math 307 or Math 317 or consent of the instructor. Selected topics in applied Mathematics and modern heuristics that have found applications in areas such as geometric modeling, graphics, robotics, vision, human machine interface, speech recognition, computer animation, etc. Polynomial interpolation, roots of polynomials, real and complex numbers, linear and nonlinear equations, approximation, data fitting, fast Fourier transform, linear programming, nonlinear optimization, Lagrange multipliers, genetic algorithms, integration of ODEs, curves, curvature, Frenet formulas, cubic splines, program assembly. Programming components. Written report for graduate credit. 

Com S 548. Numerical Solution of Differential Equations and Interpolation. (Cross-listed with Math.) (3-0) Cr. 3. S. Prereq: Math 265 and either Math 265 or Math 267; knowledge of programming languages. Polynomial and spline interpolation, orthogonal polynomials, least squares, numerical differentiation and integration, numerical solution of ordinary differential equations. Nonmajor graduate credit.

Com S 486. Fundamental Concepts in Computer Networking. (3-0) Cr. 3. S. Prereq: 362. An introduction to fundamental concepts in the design and implementation of computer communication in both the wired and wireless networks, their protocols, and applications. Layered network architecture in the Internet, applications to wireless, distribution, and network security. Nonmajor graduate credit.

Com S 490. Independent Study. Cr. arr. Repeatable. F.S. Prereq: 6 credits in computer science, permission of instructor. No more than 9 credits of Com S 490 may be counted toward graduation. Satisfactory-fail only. H. Honors.

Courses primarily for graduate students, open to qualified undergraduate students

Com S 502. Complex Adaptive Systems Seminar. (Cross-listed with CAS). (3-0) Cr. 3. F. Prereq: Admission to CAS minor. Understanding core techniques in artificial life are based on basic readings in complex adaptive systems. Understand techniques of complex system analysis methods including evolutionary computation, Neural nets, Agent based simulations (Agent based Computational Economics). Large-scale simulations are to be emphasized, e.g. power grids, whole ecosystems.

Com S 509. Software Requirements Engineering. (Densely listed with 409.) (3-0) Cr. 3. F. Prereq: 309. The requirements engineering including identification of stakeholders requirements elicitation techniques such as interviews and prototyping, analysis fundamentals, requirements specification, and validation. Use of Models: State-oriented, Function-oriented, and Object-oriented. Documentation for Software requirements. Informal, semi-formal, and formal representations. Structural, informational, and behavioral requirements. Non-functional requirements. Use of requirements repositories to manage and track requirements through the life cycle. Case studies, small scale exercises, written reports, and oral presentations will be required.

Com S 511. Design and Analysis of Algorithms. (Cross-listed with Cpr E.) (3-0) Cr. 3. F. Prereq: Com S 311. A study of basic algorithm design and analysis techniques. Advanced data structures, amortized analysis and randomized algorithms. Applications to sorting, graphs, and geometric problems. NP-completeness and approximation algorithms.

Com S 512. Formal Methods in Software Engineering. (3-0) Cr. 3. S. Prereq: 311, 330. A study of formal techniques for specification and verification of software systems. Topics include temporal logic, propositional and predicate logic, model checking, process algebra, theorem proving. Tools providing automated support for these techniques will also be discussed.
Com S 515. Software System Safety. (3-0) Cr. 3. F. Prereq: 309 or 311, 342. An introduction to the analysis, design, and testing of software for safety-critical and high-integrity systems. Analysis techniques, formal verification, fault identification and recovery, model checking, and certification issues. Emphasizes a case-based and systematic approach to software's role in safe systems.

Com S 518. Introduction to Computational Geometry. (Dual-listed with 418) (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 311 or permission of instructor. Introduction to computational geometry, algorithms, and analysis techniques for computational problems that involve geometry. Line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality, Voronoi diagrams and Delaunay triangulation, convex hulls, robot motion planning, visibility graphs. Other selected topics. Programming assignments. A scholarly report must be submitted for graduate credit.

Com S 525. Numerical Analysis of High Performance Computing. (Cross-listed with Cpr E, Math). (3-0) Cr. 3. Prereq. Cpr E 302, or one of Math 471, 481; experience in scientific programming; knowledge of FORTRAN or C. Development, analysis, and testing of efficient numerical methods for use on current state-of-the-art High performance computers. Applications of the methods to the students' areas of research.

Com S 526. Introduction to Parallel Algorithms and Programming. (Dual-listed with 426). (Cross-listed with Cpr E). (3-2) Cr. 4. F. Prereq: Cpr E 302 or Com S 321, Com S 311 Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems involving sorting, matrix, tree and graph problems, fast Fourier transforms.

Com S 531. Theory of Computation. (3-0) Cr. 3. S. Prereq. 331 or permission of the instructor. A systematic study of the fundamental models and languages of theoretical computer science. Computability, the Church-Turing thesis, decidability and un decidable problems, and the elements of recursive function theory. Time complexity, logic, Boolean circuits, and NP-completeness. Role of randomness in computation.

Com S 533. Computational Models of Nanoscale Self-Assembly. (Dual-listed with 433). (3-0) Cr. 3. S. Prereq: C or higher in 331 or consent of the instructor. Modeling and analysis of natural and engineered systems that spontaneously assemble themselves from small components. Topics include biomolecular self-assembly, tile assembly models, computation via self-assembly, distributed folding, origami models, and self-repair. Emphasis on Mathematical methods of describing, simulating, programming, and verifying the behaviors of self-assembling systems. Graduate credit requires a written or oral report on current research.

Com S 541. Programming Languages. (3-1) Cr. 3. F. Prereq: 342 or 440. Survey of the goals and problems of language design. Formal and informal studies of a wide variety of programming language features including type systems. Creative use of functional and declarative programming paradigms.

Com S 544. Introduction to Bioinformatics. (Dual-listed with 444). (Cross-listed with BCB, Cpr E, GDCB). (4-0) Cr. 4. F. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics, including a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

Com S 549. Advanced Algorithms in Computational Biology. (Cross-listed with BCB, Cpr E). (3-0) Cr. 3. S., offered 311 and either 288 or 208. Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string comparison, phylogenetic inference of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

Com S 550. Evolutionary Problems for Computational Visualization and Distributed Computing. (3-0) Cr. 3. Alt. F, offered 2009. Prereq: Com S 311 and some knowledge of programming. Discussion and analysis of basic evolutionary principles and the necessary knowledge in computational biology to solve real world problems. Topics include character and distance based methods, phylogenetic tree distances, and consensus methods, and approaches to extract the necessary information from sequence-databases to build phylogenetic trees.

Com S 551. Computational Techniques for Genome Assembly and Analysis. (Cross-listed with BCB). (3-0) Cr. 3. Alt. F, offered 2009. Prereq: 311 and some knowledge of programming. Huang. Introduction to practical sequence assembly and comparison techniques. Topics include global alignment, local alignment, overlaying alignment, banded alignment, linear-space alignment, word hashing, DNA-protein alignment, DNA-cDNA alignment, comparison of two sets of sequences, construction of contigs, and generation of consensus sequences. Focus on development of sequence assembly and comparison programs.

Com S 554. Distributed and Network Operating Systems. (Dual-listed with 454). (Cross-listed with Cpr E). (3-1) Cr. 3. Alt. S., offered 2011. Prereq: 311, 352. Laboratory course dealing with practical issues of design and implementation of distributed and network operating systems. Networking, computing environments (DCE). The client server paradigm, inter-process communications, layered communication protocols, synchronization and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports.

Com S 558. Introduction to the 3D Visualization of Scientific Data. (Cross-listed with Geol HCL). (2-2) Cr. 3. Alt. S., offered 2011. Prereq: Graduate-student standing in the Mathematical or natural sciences. Introduction to visualization techniques and examples of 3D visualization projects from different disciplines (natural sciences, medicine, engineering). Class project in interactive 3D visualization using the OpenDX, VTK or a similar system.

Com S 562. Implementation of Database Systems. (3-0) Cr. 3. F. Prereq: 461 or 561. Implementation topics and projects are chosen from the following: Storage architecture, buffer management and caching, access methods, design, parsing and compilation of query languages and update operations, application programming interfaces (APIs), user interfaces, query optimization and processing, and transaction management for relational, object-oriented, semistructured (XML), and special purpose database models; client-server architectures, metadata and middleware for database integration, web databases.

Com S 567. Bioinformatics I (Fundamentals of Genome Informatics). (Cross-listed with BCB, Cpr E). (3-0) Cr. 3. F. Prereq: Com S 208 and distributed databases, and special purpose databases. Oral and written reports. Satisfactory-fail only.

Com S 574. Intelligent MultiAgent Systems. (3-0) Cr. 3. Alt. F. offered 2009. Prereq: Stat 330; Com S 331; 572, 573, 472, or 474. Specification, design, implementation and applications of multi-agent systems. Intelligent agent architectures; infrastructures, languages and tools for design and implementation of distributed multi-agent systems; Multi-agent organization, cooperation, interaction, cooperation, team formation, negotiation, competition, and learning. Selected topics in decision theory, game theory, contract theory, bargaining theory, auction theory, and organizational theory. Selected topics in knowledge representation and ontologies. Agent-based systems and the Semantic Web. Applications in distributed intelligent information networks for information retrieval, information integration, inference, and discovery from heterogeneous, autonomous, distributed, dynamic information sources.

Com S 575. Computational Perception. (Cross-listed with Cpr E, HCI). (3-4) Cr. 3. S. Prereq: Graduate standing or permission of instructor. Statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. Focuses on machine perception techniques that facilitate and augment human-computer interaction. Introduce computational perception on both theoretical and practical levels. You will work in small groups to design, implement, and evaluate a prototype of a human-computer system that uses one or more of the techniques covered in the lectures.

Com S 577. Problem Solving Techniques for Applied Computer Science. (Dual-listed with 477). (3-0) Cr. 3. Alt. F. offered 2010. Prereq: 228, 330 or Cpr E 310, Math 166, Math 307 or Math 317, or consent of the instructor. A computer system that assembles in applied mathematics and modern heuristics that have found applications in areas such as geometric modeling, graphics, robotics, vision, human machine interface, speech recognition, computer animation, etc. Homogeneous coordinates and transformations, perspective projection, quaternions and rotations, polynomial interpolation, roots of polynomials, resultants, solution of linear and nonlinear equations, approximation, data fitting, Fourier series and fast Fourier transform, linear and nonlinear optimization, Lagrange multipliers, parametric and algebraic curves, curvature, Frehet formulas,Bezier curves. Programming components. A scholarly report is required for graduate credit.

Com S 581. Computer Systems Architecture. (Cross-listed with Cpr E, ECE). (3-0) Cr. 3. F. Prereq: Cpr E 381. Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory, memory hierarchy, cache coherency, interconnection networks and message routing, I/O devices and peripherals.

Com S 583. Reconfigurable Computing Systems. (Cross-listed with Cpr E). (3-0) Cr. 3. Prereq: Background in computer architecture, design, and organization. Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic reconfigurable interconnection architectures, processor architectures incorporating reconfigurability.

Com S 586. Computer Network Architectures. (3-0) Cr. 3. S. Prereq: ECE 479 or Cpr E 489. Design and implementation of computer communication networks: layered network architectures, local area networks, data link protocols, distributed routing, transport services, network programming interfaces, network applications, error control, flow control, interconnection of heterogeneous networks, TCP/IP ATM networks, multimedia communications, IP and application multicast, overlay networks, network security and web computing.

Com S 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor. Satisfactory-fail only.

Com S 596. Genomic Data Processing. (Cross-listed with BCB, GDCB). (3-0) Cr. 3. S. Pre req: Some knowledge of programming. Study the practical aspects of using computing as a tool to help organizing a large number of hand-on projects. Students will carry out major data processing steps using bioinformatics tools. Topics include base-calling, raw sequence cleaning and contaminant remove procedures. EST and EST clustering methods; genome closure strategies and practices; sequence homology search and function prediction; annotation and submission of GenBank reports; and data collection and dissemination through the NCBI. Examples of genomic topics like microarray design and data analysis will also be covered.

Com S 598. Graduate Internship. Cr. R. Repeatable. F.S.S. Pre req: Graduate Classification. Supervised internship working in professional settings appropriative to the students major program. Academic work under faculty supervision.

Com S 599. Creative Component. Cr. arr. Creative component for nonthesis option of Master of Science degree. Satisfactory-fail only.

Courses for graduate students

Com S 610. Seminar. Cr. arr. Satisfactory-fail only.

Com S 641. Advanced Topics in Programming Language Semantics. (3-0) Cr. 3. Repeatable. Alt. S., offered 2010. Pre req: 531. Functional and other Mathematical models of programming language semantics. Type systems and their soundness. Applications of semantics on areas such as program correctness, language design or translation.

Com S 661. Advanced Topics in Database Systems. (3-0) Cr. 3. Repeatable. Alt. F., offered 2010. Prereq: 467 or 561. Advanced topics chosen from the following: database design, data models, query systems, query optimization, incomplete information, logic and databases, multimedia databases, temporal, spatial and belief databases, semistructured data, concurrency control, parallel and distributed databases, information retrieval, data warehouses, wrappers, mediators, and data mining.

Construction Engineering

(Administered by the Department of Civil, Construction and Environmental Engineering)

James Alleman, Chair of Department

Distinguished Professor: Klaiber

Distinguished Professors (Emeritus): Baumann, Cleasby, Handy

University Professor (Emeritus): Lohnes

Professors: Alleman, Fanous, Jaselskis, Kannel, Maze, Nambsing, Ong, Pommet, Porter, Sarkar, Schaefer, Souleyrette, Van Leeuwen, Wipf

Professors (Emeritus): Bergeson, Brewer, Carstens, Greimann, Hardy, Jellinger, Kao, Lee, Mashaw, Mickel, Morgan, Northup, Oulman, Sander

Professor (Collaborator): Surampalli

Associate Professors: Abendroth, Baenzerig, Bhandari, Ellis, Gu, Hallmark, Jahren, Kosiel, Rehmman, Sitrharn, Strong, Sung, Wang, White, Williams

Associate Professors (Emeritus): Chase, Mercier, Sheeler, Ward

Assistant Professors: Asllok, Bolluyt, Ceylan, Gitirita, Grewell, Kandi, Rouse, Shane

Assistant Professors (Adjunct): Phares, Schlorholz, Smadi, Taylor

Assistant Professors (Collaborators): Boyle, Khanal, Ozasy

Instructors (Adjunct): Amenson, Gaunt

Senior Lecturers: Cornicle, Sirotiak, Walton

Lecturers: Baker, Caccker, Hawkins, Hunacek, Mescher, Perkins, Smith, Stout

Clinician: Gopalakrishnan

Undergraduate Study

For undergraduate curriculum in construction engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

Construction engineering is a curriculum administered by the Department of Civil, Construction and Environmental Engineering. For details of the curriculum in construction engineering leading to the degree bachelor of science, see the College of Engineering, Curricula. General objectives, which are common to all departments in engineering, are stated in the College of Engineering, Objectives of Curricula in Engineering. The curriculum in construction engineering is designed with the objective to prepare students for life-long careers in the constantly changing technical and managerial environment of the construction industry. Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and control work. With the emergence of design-build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphasis courses within building, heavy, mechanical or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer’s plans and specifications are converted into physical structures and facilities. To achieve this, a construction engineering graduate should have:

• confidence.
• initiative.
• leadership ability.
• the ability to think critically, systematically, and generatively.
• an understanding of the engineering and architectural design process.
• proficiency in construction engineering and the design of construction processes which includes the ability to:
  - apply knowledge of mathematics, science, and engineering
  - design and conduct experiments, as well as to analyze and interpret data.
  - identify, formulate, and solve engineering problems.
  - design a system, component, or process to meet desired needs.
• an understanding of:
  - the overall construction process.
  - the estimating process.
  - the planning and scheduling process.
  - risk assessment.
  - contracts and laws.
  - business and management.
  - ethical reasoning.
  - contemporary issues in the industry.
  - construction engineering and the industry’s impact on Society.- business and construction engineering terminology.
• an ability to:
  - function in multi-disciplinary teams.
  - communicate orally, graphically and in writing.
  - a desire for life-long learning and intellectual and professional growth.
• an awareness of modern techniques, skills and technologies for construction.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by providing students with opportunities to:

• interact with practicing professionals.
• gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers.
• develop leadership skills by participating in student organizations.
• develop, analyze, and interpret alternative solutions to open-ended problems.
• study abroad.

The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student’s perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study-abroad programs. Interested and qualified students have the opportunity to participate in the cooperative education program or internship.
program to supplement academic work with work experience. See Cooperative Education Programs, College of Engineering.

Construction engineering students are encouraged to participate in life-long learning, continuous professional development, and to achieve professional engineering registration and/or registration as a certified professional constructor. Qualified construction engineering students within 30 credits of completing a graduate degree may apply for concurrent enrollment in the Graduate College. See Civil Engineering Graduate Study for more information.

Graduate Study

An area of specialization in construction engineering and management is offered within the graduate program of the Department of Civil, Construction, and Environmental Engineering. See Civil Engineering, Courses and Programs.

Courses are offered for minor work to students taking major work in other curricula or in interdisciplinary programs.

Courses primarily for undergraduate students

Con E 121. Cornerstone Learning Community: Orientation to Academic Life. (0-2) Cr. 1. F. Integration of first-year and transfer students into the engineering profession and the Construction Engineering program. Assignments and activities completed both individually and in learning teams involving teamwork, academic preparation, and study skills. Teamwork topics include interdisciplinary teamwork, skills for academic success and diversity issues. Introduction to organization of program, department, college, and university. Overview of faculty, staff, policies, procedures and resources.

Con E 122. Cornerstone Learning Community: Orientation to Professional Life. (0-2) Cr. 1. S. Continuation of Con E 121. Integration of first-year and transfer students into the engineering profession. Career preparation, professional ethics, construction research. Introduction to construction industry professionals including how they interact with engineers in other disciplines. Continued introduction to program, department, college, and university organization. Overview of faculty, staff, policies, procedures and resources.

Con E 221. Contractor Organization and Management of Construction. (4-0) Cr. 4. F.S. Prereq: Permission of basic program. Entry level course for construction engineering: integration of significant engineering and management issues related to efficient construction company operations. Time value of money; methods of evaluating alternative projects; organization; operations; construction company administration; project administration; project management systems; construction contracts; integrated delivery systems (design/build and others); marketing; insurance and bonding; construction safety; labor law; labor relations; productivity; motivation and leadership; contract documents; interpretation and utilization of drawings, specifications, agreements, bidding forms, general conditions, subcontracts, shop drawings and related documents.

Con E 298. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work.

Con E 340. Concrete and Steel Construction. (2-3) Cr. 3. F.S. Prereq: E M 324, credit or enrollment in 352 Cr. 3. F.S. Prereq: 251, Phys 222. Comprehensive coverage of mechanical systems, plumbing, fire protection, vertical transportation. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

Con E 352. Mechanical Systems in Buildings. (3-0) Cr. 3. F.S. Prereq: 251, Phys 222. Comprehensive coverage of mechanical systems, plumbing, fire protection, vertical transportation. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

Con E 353. Electrical Systems in Buildings. (2-0) Cr. 2. F.S. Prereq: Phys 222 and credit or enrollment in 352. Comprehensive coverage of building electrical systems including power, lighting, fire alarm, security and communications. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

Con E 380. Engineering Law. (3-0) Cr. 3. F.S. Prereq: Junior classification. Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding procedures, intellectual property, products liability, risk analysis. Emphasis on development of critical thinking process, abstract problem analysis and evaluation. Nonmajor graduate credit.

Con E 381. Bidding Construction Projects I. (0-3) Cr. 1. F. Prereq: Permission from the instructor. Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialties: A. Heavy and Highway B. Building C. Mechanical D. Electrical E. Mechanical and Electrical F. Miscellaneous

Con E 386. Summer Internship. Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services. Summer professional work period. Students must register for this course before commencing work.

Con E 397. Engineering Internship. Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services. Professional work period, one semester maximum per academic year. Students must register for this course before commencing work.

Con E 441. Construction Planning, Scheduling, and Control. (2-2) Cr. 3. F.S. Prereq: Credit or enrollment in 421. Integration of previous construction coursework into the planning, scheduling, and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer project management applications. Nonmajor graduate credit.

Con E 481. Bidding Construction Projects II. (0-3) Cr. 1. F. Prereq: Permission from the instructor. Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience. A. Heavy and Highway B. Building C. Mechanical D. Electrical E. Mechanical and Electrical F. Miscellaneous

Con E 487. Construction Engineering Design I. (1-2) Cr. 2. F.S. Prereq: Con E 340 (B, H), 352 (B, E, M), 353 (B, E, M), 421, 441. Student must be within two semesters of graduation. The integrated delivery of project services including preliminary engineering design process, constructability review, interaction with the client, identification of engineering problems, developments of a proposal, identification of design criteria, cost estimating, planning and scheduling, application of codes and standards, development of feasible alternatives, selection of best alternative, and delivery of oral presentations.

Criminal Justice Studies

(Interdepartmental Undergraduate Program)

Matthew J. DeLisi, Program Coordinator

The criminal justice studies minor, a cross-disciplinary course of study in the College of Liberal Arts and Sciences, offers an opportunity for students to learn about the components of the criminal and juvenile justice systems, to become acquainted with the issues and problems affecting these systems, to apply theoretical concepts to real-world problems, and to plan a career in criminal or juvenile justice.

Students who declare a minor in criminal justice studies are required to complete 15 credits of course work. Students must take five of the following six courses: CJ St 240, 241, 320, 332, 340 or 341. Students are also required to complete a minimum of 3 credits of internship experience (CJ St 460). Completion of the minor requires 18 total credits.
Courses primarily for undergraduate students

CJ St 240. Introduction to the U.S. Criminal Justice System. (3-0) Cr. 3. F. Provides systematic overview of law, police organization and behavior, prosecution and defense, sentencing, the judiciary, community corrections, penology, and capital punishment. The course demonstrates the role of discretion in all of these agencies as well as the sociological influences of age, race, gender, and social class on criminal justice system processes.

CJ St 241. Youth and Crime. (Cross-listed with Soc. (3-0) Cr. 3. F. Prereq: Soc 130 or 134. An examination of delinquency that focuses on the relationship between youth and the law as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents' rights, and traditional and alternative ways of dealing with juvenile crime.

CJ St 320. American Judicial Process. (Cross-listed with Pol). (3-0) Cr. 3. S. Prereq: Pol S 215. An overview of the American judicial process. Emphasis on specific topics such as application of constitutional rights to the states (particularly the Fourth, Fifth, Sixth, and Fourteenth Amendments), mechanics of judicial opinions, constitutional Philosophizations of Supreme Court Justices, decisions of first impression, and the value and scope of precedent.

CJ St 332. Philosophy of Law. (Cross-listed with Phil). (3-0) Cr. 3. F. Prereq: Phil 201 or 230. Extent of our obligation to obey the law; what constitutes just punishment; how much of the immoral should be made illegal? Relation of these questions to major theories of law and the state. Discussion of such concepts as coercion, equality, and responsibility. Nonmajor graduate credit.

CJ St 340. Deviant and Criminal Behavior. (Cross-listed with Soc. (3-0) Cr. 3. S. Prereq: Soc 130 or 134. Theory and current sociology of crime and deviance; aggression and violence; characteristics of the delinquent; the criminological approach to the study of delinquency; the sociological analysis of delinquency; the study of the family as a factor in the development of delinquency.

CJ St 341. Criminology. (Cross-listed with Soc). (3-0) Cr. 3. F. Prereq: Soc 130 or 134. The nature of crime and criminology; the concept of crime; Statistics and theories of criminality; major trends of crime; official responses to crime and control of crime.

CJ St 351. Police and Society. (Cross-listed with Soc). (3-0) Cr. 3. F.S.S. Prereq: Soc 241 or CJ St 240. Introduction and overview of law enforcement in the United States. Theory and research on police history, function, and organization; constitutional issues of policing; and critical topics, such as community policing, officer discretion and decision-making, corruption, use of force, and racial profiling. The course illustrates the interconnections between communities, police organizations, citizens, and criminal offenders.

CJ St 402. White-Collar Crime. (Cross-listed with Soc). (3-0) Cr. 3. S. Prereq: Soc 241 or CJ St 240. Introduction and overview of white-collar crime as a form of deviance. Theory and research on occupational, corporate, and organizational offending; prevalence, costs, and consequences of white-collar crime; predictors and correlates of white-collar crime; and political, business, and public policy responses to white-collar crime.

CJ St 403. Criminal Offenders. (3-0) Cr. 3. F. Prereq: 240 or 241. Introduction and overview of criminal offenders. Theory and research on epidemiology, offender typologies, etiology of violence, recidivism, societal costs, correctional supervision, treatment, and prevention of serious antisocial behavior.

CJ St 460. Criminal and Juvenile Justice Practicum. (Cross-listed with Soc). Cr. arr. Repeatable. F.S.SS. Prereq: Junior or senior classification; permission of criminal justice studies coordinator; major or minor in Sociology, or criminal justice studies minor. Study of the criminal and juvenile justice systems and social control processes. Supervised placement in a police department, prosecutor's office, court, probation and parole department, penitentiary, juvenile correctional institution, community-based rehabilitation program, or related agency.

Cross Disciplinary Studies

The College of Liberal Arts and Sciences administers a number of Cross Disciplinary Studies, Interdepartmental Studies, and Certificate Programs which enable students to develop individual programs of study toward majors and minors in a range of disciplines. Information on the requirements for these programs is available in the Academic Advising Office, College of Liberal Arts and Sciences, located in Catt Hall. (See Index, Liberal Arts and Sciences Cross Disciplinary Studies)

Curriculum and Instruction

www.edu.cihs.iastate.edu

Carl Smith, Interim Chair of Department

Distinguished Professors (Emeritus): Moyer, Rasmussen

University Professor: Thompson

University Professors (Emeritus): Brown, D. Williams

Professors: Abelson, Andre, Blount, Greenbove, Martin, G. Miller, W. Miller, Mokhtari, Owen, Phye, Smith, Stuart, Whaley

Professors (Emeritus): Barnhart, Bath, Baum, Breiter, Brun, Burkhalter, Carter, Charles, Coulson, Daly, Dits, Downs, Duffelmenier, Henney, Hoerner, Hunter, Keller, McCormick, Rudolph, Schneider, Shliokee, Smith, Tanner, Thomas, Volker, Williams, Zbaracki

Associate Professors: Allen, Bloom, Caldwell, Carlson, Clough, Foegen, Rhuler, Gentzler, Hargrave, Hausaufs, Leigh, Munsen, Niederhauser, Olsen, Payne, Schilling, Torrie

Associate Professors (Emeritus): Amos, Ebert

Associate Professor (Adjunct): Rosenbusch

Assistant Professors: Bang, Blumenfeld, Bruna, Coreia, Drake, Estes, Lee, Horton-Meier, Smith, Seymour

Assistant Professors (Emeritus): Charterfield, Tartakov

Assistant Professors (Adjunct): Andreotti, McShay

Missions and Goals

The mission of the Department of Curriculum and Instruction is to serve the state of Iowa, the Nation, and the World through discovery, learning, and engagement efforts that enhance and develop human potential and equity through education and that promote understanding of learning, teaching, and education as disciplines. In our discovery mission, we strive to:

• to conduct the highest quality research and scholarship that significantly contribute to educational theory and practice and
• to be known locally, nationally, and internationally as a department of distinction.

In our learning mission, we strive to be a recognized high quality teacher preparation department that:

• prepares highly effective teachers and educational leaders;
• prepares graduate students and post doctoral professionals who become leaders in their respective fields; and
• conducts significant ongoing research and evaluation on the process of effective teacher preparation.

In our engagement mission, we strive to develop partnerships within and beyond the university that

• enhance the quality and effectiveness of education in practice and
• serve our discovery and learning missions.

Undergraduate Study

The Department of Curriculum and Instruction provides the professional education coursework that leads to licensure of pre-service teachers. Students major in early childhood education - birth through third grade or elementary education - K-6. Students who are interested in teaching at the secondary level (5-12) major in a specific discipline and complete the courses necessary for their teaching license. Early childhood education and elementary education majors must complete a professional course sequence: C1 201, 204, 332, 406 and Sp Ed 250. Secondary education students must complete a professional course sequence: C1 202, 204, 333, 406 and Sp Ed 450. Some secondary licensure areas also require C1 426.

The department offers a minor in digital learning that may be earned by completing the following courses: C1 201 or 202; Com S 107 or Com S 207 or Cpr E/Mat E 370; C1 280A; 302; 403; and 407.

The Department of Curriculum and Instruction offers courses that can lead to a reading endorsement for grades K-8 or grades 5-12. Students seeking a K-8 endorsement should see a Curriculum and Instruction academic adviser. The 5-12 endorsement is offered collaboratively with the English Department. Students seeking this endorsement should see an adviser in the English Department. Copies of transcript(s) can also be sent to the Licensure Analyst in the Student Services Office to receive a list of courses needed for an Iowa State University Reading Endorsement. Prerequisites for the reading endorsement courses are listed in the catalog course descriptions.

Early Childhood Education

The curriculum in Early Childhood Education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms or home based programs, with emphasis on inclusive services. Graduates may be employed by either public or private agencies or schools. The curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is an interdepartmental major administered by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies within the College of Human Sciences.

Early Childhood Education majors must satisfy a world language requirement for graduation. For detailed information, see College of Human Sciences - Curriculum in Early Childhood Education.

Students who enroll in Early Childhood Education must make application to and be accepted into the teacher education program prior to enrolling.
in advanced courses. All early childhood education students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandate for a performance based system of teacher training. Following this same type of system, the State of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the eleven Iowa State University Teacher Education Standards and the eight State of Iowa Teaching Standards, along with other information about the University Teacher Education Program, can be found at www.teacher.hs.iastate.edu, the teacher education website. Information is also available from the student’s academic adviser.

Students in early childhood education must meet the performance outcome standards for teacher licensure. Standards are assessed in coursework through designated performance indicators such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsement 100 in the State of Iowa. These include competencies in (1) child growth, development, and learning, (2) developmentally appropriate learning environment and curriculum implementation, (3) health, safety, and nutrition, (4) family and community collaboration, and (5) professionalism. Pre-student teaching field experiences and student teaching experience in at least two different settings is required. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes through their program at Iowa State University.

Elementary Education

For the undergraduate curriculum in elementary education, leading to the degree bachelor of science, see College of Human Sciences.

The curriculum in elementary education is planned for students preparing to teach at the elementary school level. This program leads to careers in working with school-aged children, kindergarten through sixth grade. Graduates in this curriculum may teach in elementary classrooms in either public or private school districts.

Endorsements in art, English/language arts, English as a second language, health, family and consumer sciences, music, basic science, social studies, mathematics, special education (Instructional Strategist I: Mild/Moderate Disabilities K-8), and speech communication/theater are available for elementary education students. An endorsement for teaching world languages in elementary schools is available through the Department of World Languages and Cultures.

Elementary Education majors must satisfy a world language requirement for graduation. For detailed information, see College of Human Sciences - Curriculum in Elementary Education.

Students who enroll in elementary education must make application to and be accepted into the teacher education program prior to enrolling in advanced elementary education courses. For admission and licensure requirements, see College of Human Sciences. Every student must meet the performance outcome standards for teacher licensure. These standards will be assessed in each course. Students will receive both formative and summative evaluations of their progress toward meeting these standards throughout their program of study. A detailed explanation of the standards and assessment process may be found on the department’s website (www.ci.hs.iastate.edu). The same information is also available from the student’s academic adviser.

Graduates of the elementary education program will be able to demonstrate through professional practice their understanding of academic disciplines, teaching and learning, the nature of the student, and how to adapt instruction for diversity. More specifically, graduates will be able to demonstrate their understanding of concepts and theories in elementary education, how students learn and develop, and the effects of individual differences on learning. Graduates will be able to demonstrate a broad range of instructional strategies, including knowledge of technology applicable to instruction. In their teaching, graduates will demonstrate the ability to stimulate active inquiry with collaboration and supportive interaction among their students. In appropriate settings graduates will demonstrate their ability to develop professional relationships with colleagues, parents, and agencies that support students and their learning.

Secondary Education

For specific requirements for each area of specialization, see Teacher Education and curricula for the college in which the chosen degree major is sought.

Students seeking recommendations for a license to teach in the secondary schools must be admitted to the teacher education program and pursue a program that includes the professional core: CI 202, 204, 333, 406, 426, and Sp Ed 450; special methods; and student teaching in the area of specialization. Note: Students seeking licensure in agriculture and science do not take CI 426. Students seeking a teaching license in physical education must see an advisor in the Department of Kinesiology in the College of Human Sciences. All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the teacher education program and be recommended by the College of Human Sciences. Each student must meet the performance outcome standards for teacher licensure. Each standard will be assessed in every major. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at Iowa State University. A detailed explanation of the standards and assessment process may be found at www.teacher.hs.iastate.edu. For more information on licensure requirements, consult the departmental advisor. Each student will be enrolled in the department in which he or she plans to major, and must meet the graduation requirements of that department and the college in which it is located.

Graduate Study

The Department of Curriculum and Instruction offers work for the degrees Master of Science, Master of Education, and Doctor of Philosophy with a major in education and minor work to students taking major work in other departments. Within the education major in the Department of Curriculum and Instruction a student may earn an education degree with no area of specialization (master’s and doctorate) or specialize in elementary education (master’s only), historical, philosophical, and comparative studies in education (master’s only), special education (master’s only), or curriculum and instructional technology (master’s and doctorate). The specialization in elementary education (advanced teacher) is designed to prepare candidates for teaching and curricular leadership positions in elementary settings. The specialization in historical, philosophical, and comparative studies in education is designed to provide graduate students experiences in analyzing educational problems and issues, critiquing policies that affect education in Society, and making connections between educational practice and learning. The special education specialization is designed to prepare candidates as practitioners and researchers in the field of mild/moderate disabilities or behavioral disorders/learning disabilities. The specialization in curriculum and instructional technology is designed to prepare candidates as researchers in the fields of curriculum and instructional technology. Students may also opt not to select an area of specialization. These students are asked to select a focus area for their graduate study. Focus areas include educational psychology, world language education, literacy education, mathematics education, multicultural education and international curriculum studies, and science education. See the Curriculum and Instruction web site at http://www.cihs.iastate.edu for more information on these focus areas.

A minor is available in curriculum and instructional technology at both the master’s and doctoral level. Information about the minors can be found on the web at http://www.cihs.iastate.edu/gradstds/grad/Grad2/Deegrees.php.

A Master of Arts in Teaching degree program leading to teacher licensure (science only) is available to students who currently have a bachelor’s degree in science or another field. A teacher licensure program in mathematics education is also available to graduate students (Department of Curriculum and Instruction). Teacher licensure at the graduate level is also offered in agricultural education (College of Agriculture and Life Sciences) and family and consumer sciences (College of Human Sciences). The Department of Curriculum and Instruction provides the professional education coursework. Students in a graduate teacher licensure program must complete Sp Ed 501, CI 505, 506, 529, and HPC 504. Mathematics licensure students also take CI 526. Graduate level teaching endorsements are offered through the Department of Curriculum and Instruction. Graduate students who seek a teaching endorsement in special education, but do not wish to pursue a master’s degree can incorporate those courses from a professional certificate program. Endorsement programs include Instructional Strategist I: Mild/Moderate Disabilities K-8 or Special Education (Severe Behavioral Disorders/Learning Disabilities, and special education consultant. A graduate level reading endorsement is also available.

Prerequisite to major graduate work in education is preparation substantially equivalent to the completion of one of the undergraduate curricula in education offered at Iowa State University, or graduate preparation in a discipline to be used as a teaching field in a community college or university, and adequate proof that the student ranks above average in scholastic ability and promise of professional competence.

The world language requirement, if any, for the Ph.D. degree will be determined by the student’s program of study committee. If no world language is required, the total program must consist of a minimum of 78 semester credits, at least 12 of which must be earned outside the education major, and at least 16 of which must be earned outside the area of specialization. Statistics and research methods may not be included in the 16 credits. Should world language be included, the program of study committee may adjust the minimum integration requirement downward, but in no instance may the program of study be less than 72 semester credits. Students whose native language is not English may substitute competence...
in English. All applicants for the Ph.D. must submit Graduate Record Examination (GRE) scores. Other graduate programs related to education (including General Graduate Studies) may be planned for students on the basis of previous education and experiences as well as future plans and needs. Students should refer to Agricultural Education and Studies, Family and Consumer Sciences Education, Kinesiology, Educational Leadership and Policy Studies, and General Graduate Studies or to graduate level course offerings within other departments.

Curriculum and Instruction (C)

Courses primarily for undergraduate students

C 201. Digital Learning in the PK-6 Classroom. (2-2) Cr. 3. F.S. Alt. SS., offered 2011. Overview of ways to use instructional technologies to support instruction in PK-6 classrooms. Focus on pedagogical approaches that integrate technologies to support learning in the content areas. Laboratory experiences include development of activities to use tool software, interactive multimedia, webpage development, digital video and other technologies to facilitate learning and teaching.

C 202. Digital Learning in the 7-12 Classroom. (2-2) Cr. 3. F.S. Alt. SS., offered 2010. Overview of ways to use instructional technologies to support instruction in 7-12 settings. Focus on pedagogical approaches that integrate technologies to support learning in the content areas. Laboratory experiences include development of activities to use tool software, interactive multimedia, webpage development, digital video and other technologies to facilitate learning and teaching.

C 204. Social Foundations of American Education. (3-0) Cr. 3. F.S.SS. Goals of schooling, including the roles of teachers today; historical development of schools; educational reforms and alternative forms; and current Philosophical issues. Human relations aspects of teaching and discussions about teaching as a career.

C 245. Strategies in Teaching. (2-0) Cr. 2. F.S. Prereq: 204; HD FS 220 or 221 or 226 (or concurrent enrollment in one of these courses); concurrent enrollment in C 268; eligibility for admission to teacher education program. Introduction to elementary education teaching strategies, classroom management, and curriculum organization. Open to students in the elementary education curriculum or the early childhood education curriculum.

C 280. Pre-Student Teaching Experience. (1-0) Cr. arr. Repeatable. F.S.SS. Prereq: 280A may be taken alone. For enrollment in 280B-I, 280A must be either a prerequisite or taken concurrently. Field experience in area educational settings. 2-1/2-hour blocks of time needed for field experience. C 280B may be taken more than once for credit toward graduation.

A. Teacher Aide. Cr. 1 or 2
B. Educational Computing. Cr. 1 or 2 (2 credits by permission only)
C. Native American Tutoring. Cr. 1
D. Museum Education. Cr. 1
E. Multicultural/Youth Experience. Cr. 1 or 2
F. International Student. Cr. 1 or 2 (Permission of instructor required)
G. Mild/Moderate Disabilities. Cr. 1 (concurrent with Sp Ed 330)
H. Early Field Experience. Cr. 3
I. Secondary Science. Cr. 1 or 2
J. CoHoT Field Experience. Cr. 1 (permission of department required)
K. Art Education Field Experience. Cr. 1 (permission of department required)
L. Field Experience. Cr. 1 or 2

C 332. Educational Psychology of Young Learners. (3-0) Cr. 3. F.S. Prereq: Psych 230 or HD FS 220, open only to majors in Early Childhood Education or Elementary Education. Prerequisite or permission of instructor required to classroom learning, cognition, motivation, classroom management and assessment for children from birth to grade 6. Implications of theory for teaching children and for assessing learning in educational settings with young and grade school aged children.

C 333. Educational Psychology. (Cross-listed with Psych). (3-0) Cr. 3. F.S. Prereq: Psych 230 or HD FS 220, application to the teacher education program or major in psychology. Classroom learning with emphasis on theories of learning and cognition, and instruction techniques. Major emphasis on measurement theory and the classroom assessment of learning outcomes.

C 347. Nature of Science. (Dual-listed with 547). (3-0) Cr. 3. F.S. Prereq: 280M; concurrent enrollment in 418 or instructor permission. The intersection of issues in the history, philosophy Sociology, and psychology of science and their application to and impact on science teaching and learning, science teacher education, and science education research.

C 377. The Teaching of Reading and Language Arts in the Primary Grades (K-3). (4-0) Cr. 4. F.S.SS. Prereq: admission to teacher education program, C 124S, Sp Ed 250, Sp Ed 251, EL Ed maj or 221 (ECE majors), concurrent enrollment in 448, 468A, 468B (EL Ed majors) or 438, 468F, 468G, Sp Ed 368, HD FS 343 (ECE majors). Theories, teaching strategies, and instructional materials pertinent to teaching reading, writing, listening, and speaking to children in kindergarten through third grade.

C 395. Teaching Reading in Middle and Secondary Schools. (Dual-listed with 395S). (3-0) Cr. 3. F.S. Prereq: 204 and junior standing. Analysis and application of strategies to enhance students’ literacy development in middle and secondary school settings.

C 401. Middle School Student Growth and Development. (3-0) Cr. 3. Prereq: Psych 230. Study of the physical, emotional, intellectual, and social development of 10 to 15 year old middle school students. Focus on implications for school and teachers. Includes strategies for classroom management and working with parents. Issues of risk, resiliency, substance abuse, suicide, and sexual identity will also be examined.

C 402. Middle School Curriculum Design. (3-0) Cr. 3. Prereq: 401; admission to teacher education. Emphasis on the middle school components of interdisciplinary teaming, curriculum frameworks, teacher-based guidance and assessment.

C 406. Multicultural Foundations of School and Society: Introduction. (3-0) Cr. 3. F.S.SS. Prereq: 201 or 202, 302, 323, 417. Junior classification, admission to teacher education program. Awareness and nature of cultural pluralism; need for multicultural education; multicultural concepts and theories; cultural groups; their perceptions, needs, and contributions, problems and issues regarding ethnic prejudice, and discrimination based on race, ethnicity, socioeconomic class, sex/gender, sexual identity, and language in the school environment; curriculum infusion and transformation, multicultural interaction, design and execution of teaching strategies.

C 407. Principles and Practices of Distance Learning. (Dual-listed with 507). (2-2) Cr. 3. F.S.SS. Prereq: 201 or 202; convenient access to the Web. Review of flexible and distance learning (FDL) cases in a variety of contexts and pedagogical styles, research into relevant topics. Identification of principles and frameworks for best practice in this field. Offered in FDL modes, utilizing telecommunications and the Internet.

C 417. Student Teaching. (Dual-listed with 517). (Cross-listed with ENG, WLC, Music). Cr. arr. F.S. Prereq: GPA 2.5; Admission to teacher education, approval of coordinator during semester before student teaching. Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences. A. Social Studies-Middle School B. Physical Science C. Mathematics D. Biological Sciences E. English and Literature (Same as Eng 417E) F. World Language (Same as W/LC 417G) G. Earth Science H. Music-Elementary (Same as Music 417K) J. Music-Secondary (Same as Music 417K) L. Music-Elementary (Same as Music 417L) M. Science-Basic N. International Student Teaching P. Social Studies-High School

C 418. Secondary Science Methods I: A Research-Based Framework for Teaching Science. (Dual-listed with 518). (2-0) Cr. 2. F.S. Prereq: 280M; concurrent enrollment in 347 and 468J. Development of a research-based framework for teaching science that includes student goals, congruent student actions, the character and role of science inquiry, teaching...
behaviors and strategies, contemporary learning theories, and self evaluation.

C 1419. Secondary Science Methods II. (Dual-listed with 519). (2-0 Cr. 2. S. Prereq: 418 or 518, graduate students must register concurrently for 468K. Advancing a research-based framework for teaching science in a variety of school settings, emphasizing the teacher's role, the development and revision of science curriculum, exceptional learners, content area reading strategies, management strategies, technology and student assessment.

C 1420. Bilingualism, Bilingual Education, and U.S. Mexican Youth. (Dual-listed with 520). (3-0) Cr. 3. F. Prereq: 406. Introduction to research on bilingualism and examination of the social, historical, and political contexts of bilingual education in U.S. schools. Attention to policy environment, school program structure, mode of classroom instruction, family and community context, and attainment of bilingualism and biculturalism for U.S. Mexican youth.

C 1426. Principles of Secondary Education. (Dual-listed with 526). (3-0) Cr. 3. F.S.SS. Prereq: 202, senior classification, admission to teacher education program. The curriculum, human relations, student evaluation, services, classroom management, organization of schools, legal aspects of schools, professionalism, and career planning.

C 1443. The Teaching of social Studies. (3-0) Cr. 3. F.S.SS. Prereq: 377. Study, development, and application of current methods, curriculum materials, and assessment strategies for providing appropriate social studies learning experiences for primary and intermediate grade children.

C 1452. Corrective Reading. (Dual-listed with 552). (3-0) Cr. 3. F.S.SS. Prereq: 378 or equivalent; undergraduate students must register concurrently for Sp Ed 365, 436; graduate students must have a teaching license. Identification, analysis and correction of reading problems in five areas: print knowledge, integration of print knowledge, oral reading fluency, vocabulary, and comprehension.

C 1456. Integrating Technology into the Reading and Language Arts Curriculum. (Dual-listed with 556). (3-0) Cr. 3. F.S.SS. Prereq: 201 or 202. 377 Methods and strategies used to integrate technology into the reading and language arts curriculum. Use and evaluation of reading and language arts software for elementary classrooms.

C 1480. Field Experience for Secondary Teaching Preparation. (Cross-listed with MUSIC). Cr. arr. Repeatable. F.S. Prereq: Permission of area coordinator required prior to enrollment. Observation and participation in a variety of school settings assigned after identity with the teacher preparation program. (S/F grading may be used in some offerings of some sections.) A. History/Social Sciences C. Mathematics K. Music (Same as Music 480K)

C 1495. Teaching Speech. (Cross-listed with Sp Cm). (3-0) Cr. 3. F. Prereq: Sp Cm 313; 9 credits in speech communication; minimum grade point average of 2.5 in speech communication courses. Problems, theories, and methods related to teaching speech, theatre, and media in secondary schools.

C 1498. Methods of Teaching History/Social Sciences. (3-0) Cr. 3. F.S. Prereq: Concurrent enrollment in 480A. Admission to teacher education and 30 credits in subject-matter field. Theories and processes of teaching and learning secondary history/social sciences. Emphasis on development and enactment of current methods, assessment of curriculum materials for providing appropriate learning experiences.

Courses primarily for graduate students, open to qualified undergraduate students

C 1503. Designing Effective Learning Environments. (3-0) Cr. 3. F. Prereq: 501 Introduction to theories and models of instructional design. Design decision-making based on the analysis of performance problems and instructional inputs. Practical experience with the design and development of instructional strategies and evaluation principles.

C 1506. Multicultural Foundations of School and Society: Advanced. (3-0) Cr. 3. F.S.SS. Prereq: 6 graduate credits in education. Theories, legal bases, and principles of multicultural education. Pluralism and contributing cultures in the United States; presence and contributions of cultural group diversity with implications for educational programs, curriculum development, classroom instruction, materials utilization and development; problems and issues regarding ethnocentrism, prejudice, and discrimination based on race, ethnicity, socioeconomic class, sex/gender, sexual identity, and language in the school environment; curriculum infusion and transformation, multicultural curricula and instruction; execution of teaching strategies and techniques; inquiry and research on multicultural education issues.

C I 508. Algebra in the K-12 Classrooms. (3-0) Cr. 3.
Prereq: 448, 497, or graduate Status. Focus on Algebraic concept explorations and associated procedures. Use of research-based strategies and appropriate technologies to apply fundamental ideas of pattern, the common core, and relationships among variables in K-12 classrooms. Additional topics include critical examination of K-12 curriculum, pedagogy, and assessment.

C I 509. Geometry in the K-12 Classrooms. (3-0) 
Prereq: 448, 497, or graduate Status. Euclidean and nonEuclidean explorations with a focus on pedagogical issues in the K-12 classroom. Use of research-based strategies and appropriate technologies to teach geometry in K-12 classrooms. Additional topics from discrete Mathematics, history and Philosophy of geometry and fractal geometries.

C I 511. Technology Diffusion, Leadership and Change. (3-0) Cr. 3.
Prereq: Admission to graduate study. 501 or equivalent and 505 or equivalent. Introduction to practices and principles of technology diffusion, leadership and strategic change in education. Frameworks and strategies for professional development and organizational change; current issues such as the digital divide.

C I 512. Research Trends in Digital Learning. (3-0) 
Prereq: C I 201 or 202, non-engineering major. A capstone course to consolidate graduate students' knowledge of current research in curriculum and instructional technology for students in M.S. and Ph.D. programs.

C I 513. Mathematical Problem Solving in K-12 Classrooms. (3-0) Cr. 3.
Prereq: 6 credits of Mathematics, 448 or 497 or 597 or permission of instructor. Strategies for improving problem solving skills across all strands of Mathematics (e.g., geometry, algebra, number theory) will be emphasized. Issues surrounding the appropriate role of problem solving in K-12 Mathematics classrooms will also be discussed, including distinctions among teaching “about,” “for,” and “through” problem solving.

C I 514. Introduction to the Purposes and Complexities of Science Teaching. (1-2) Cr. 2.
Prereq: ADMISSION to M.A.T. program. Introduction to critical issues facing science education, science education goals reflecting contemporary purposes of schooling, and how people learn science.

C I 515. Action Research in Education. (3-0) 
Prereq: Admission to graduate study, one course in research methods, educational inquiry, statistics, educational psychology, or instructional design. Philosophy and methods of conducting and communicating action research. Current issues in action research. Use of action research to improve education. Designed primarily for individuals involved in teaching or development of educational materials or student in M.Ed. programs.

C I 516. Antiracist Curriculum Development and Implementation. (2-2) Cr. 3.

C I 517. Student Teaching. (Dual-listed with 417).
Art. F.S. Prereq: Full admission to teacher education, approval of coordinator during semester before student teaching. Supervised student teaching in the liberal arts at the secondary level.

B. Physical Sciences
1. Mathematics
2. Biological Sciences
J. Earth Science
M. Science - Basic

C I 518. The Historical Context of Science Education. (1-2) Cr. 2.
Prereq: 514; concurrent enrollment in 547 and 591D. Development of a research-based framework for teaching science that includes student goals, cognitive development, characteristic process and role of science inquiry, teaching behaviors and strategies, contemporary learning theories, and self-evaluation.

C I 519. Secondary Science Methods II. (Dual-listed with 419). (2-0) Cr. 2.
Prereq: 418 or 518. A course in secondary science methods and applications in the K-12 classroom. Advanced methods, techniques, and strategies for teaching science to diverse student populations.

C I 520. Bilingualism, Bilingual Education, and U.S. Mexican Youth. (Dual-listed with 420). (3-0) Cr. 3.
Prereq: 506. Introduction to research on bilingualism and examination of the social, historical, and political contexts of bilingual education in U.S. schools. Attention to policy environment, school program structure, mode of classroom instruction, family and community context, and attainment of bilingualism and biculturalism for U.S. Mexican youth.

C I 522. Teaching Mathematics to Struggling Elementary Learners. (3-0) Cr. 3.
Prereq: 438 or 448. Instructional methods and assessment techniques for elementary students struggling to learn Mathematics. Emphasis on current research and practices for at-risk students and students with disabilities.

C I 523. Design and Development of Media. (2-0) 
Prereq: 2 S. Prereq: 501; graduate classification. Principles of the design and production of instructional media, visual development and the creation of various traditional and emerging media. Laboratory experiences in the production of several instructional media.

C I 524. Principles of Secondary Education. (Dual-listed with 426). (3-0) Cr. 3.
F.S.SS. Prereq: 6 credits in education. The creation, evaluation, use, and development of print materials for K-12 application. The role of the teacher in classroom management, organization of schools, social aspects of schools, professionalism and career planning.

C I 529. Educational Psychology and the Secondary Classroom. (3-0) 
Prereq: 3 S.SS. Prereq: Bachelor's degree; admission into a graduate level teacher licensure program. Analysis of psychological research related to learning, cognition, motivation, individual differences, and teaching techniques. Student and classroom assessment to facilitate positive learning outcomes. Adaptation and differentiation of instruction to meet individual learners’ needs. This course can only be used for teacher licensure programs. It is not acceptable for use in the non-licensure M.Ed., M.S. or Ph.D. requirements.

C I 533. Educational Psychology of Learning, Cognition, and Memory. (Cross-listed with Psych).
(3-0) Cr.
Prereq: 3 S. Prereq: Licensure, Level I. Cognition, memory and educational/training settings.

C I 541. How People Learn: Implications for Teaching Science. (3-0) Cr.
Prereq: Bachelor’s degree. Current learning theories within science education and their application to science classrooms. Examination of models which assist the implementation of these theories of learning.

C I 546. Advanced Pedagogy in Science Education. (3-0) Cr.

C I 547. Nature of Science. (Dual-listed with 347).
(3-0) Cr.
Prereq: Concurrent enrollment in 518 or permission of instructor. The intersection of issues in the history, philosophy, sociology, and psychology of science and their application to and impact on science teaching and learning, science teacher education, and science education research.

C I 548. Restructuring Science Activities. (3-0) Cr.
Prereq: Admission to teacher education or teaching license. Modification of laboratory activities and other everyday science activities so they are more congruent with how students learn, the nature of science, and the National Science Education Standards.

C I 550. Ethnicity and Learning. (Dual-listed with 450).
(3-0) Cr.
Secondary. Prereq: Graduation and completion of 506 or permission of instructor. Examination of cultural relevance in education. Development of multicultural curriculums, strategies and techniques for implementing multicultural goals and multietnic perspectives in PreK-12 school classroom settings.

C I 551. Foundations of Reading and Language Arts. (3-0) 
Prereq: 3 S. F. Prereq: Teaching license. Analyzing, discussing, and researching the theory, practice, and context of current literacy issues.

C I 552. Corrective Reading. (Dual-listed with 452).
(3-0) Cr.
F. S.SS. Prereq: 378 or equivalent; undergraduate students must register concurrently for Sp Ed 385, 436; graduate students must have a teaching license. Identification, analysis, and correction of reading problems in students; print knowledge, integration of print knowledge, oral reading fluency, vocabulary, and comprehension.

C I 553. Reading for Adolescents with Mild/Moderate Disabilities. (3-0) Cr.
Prereq: Teaching license. Instructional strategies for enhancing the comprehension and retention of students with mild/moderate disabilities, in conjunction with content-area reading material.

C I 554. Reading and Responding to Children’s Literature. (3-0) 
Prereq: 3 S. Prereq: Teaching license. Senior Status or teaching license. Research and discussion of issues surrounding the classroom use of literature for children and young adults; including censorship, diversity, selection, and the influences of technology.

C I 556. Integrating Technology into the Reading and Language Arts Curriculum. (Dual-listed with 456).
(3-0) Cr.
F. S.SS. Prereq: Teaching license. Methods and strategies used to integrate technology into the reading and language arts curriculum. Use and evaluation of reading and language arts software for elementary classroom.

(3-0) Cr.
Prereq: Secondary teaching experience. Instructed methods and assessment techniques for secondary students struggling to learn Mathematics. Particular emphasis on current research, practices, and trends in mathematics interventions for at-risk students and students with disabilities.

C I 570. Tying with Technology for Practicing Teachers. (Cross-listed with M S E). (2-0) Cr.
Prereq: C I 201 or 202, non-engineering major. A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on experiences based on simple systems constructed out of LEGO’s and controlled by small microcomputers. Other technological advances with K-12 applications will be explored. K-12 teachers will leave the course with complete lesson plans for use in their classrooms.

Prereq: Graduate or senior level Status or permission of instructor. This course takes a nonlinear, reflective view of the historical, social, economic, political, and legal environments of the African Americans in the U.S. Educational theories and Philosophies, Critical Race Theory and Black Feminist Thought. Form the framework for investigating broad-based, multiple issues of education for African Americans in the U.S. as they are situated in the prevailing dominant views.

C I 588. Supervised Tutoring in Reading. (2-2) Cr.
F.S.SS. Prereq: Graduate Status, teaching license and concurrent enrollment in or completion of one course
Courses for graduate students

C 1603. Advanced Learning Environments Design. (Cross-listed with HCI). (3-0) Cr. 3. S. Prereq: 502. Exploration of advanced aspects of the instructional design process. Application of analysis, design, development, production, evaluation, implementation, and project management processes. Focus on the production and use of instructional technology with an emphasis on the instructional design consulting process. Theory and research in instructional technology provides the foundation for design decisions.

C 1610. Digital Learning in Teacher Education. (2-0) Cr. 2. F. Prereq: 505. Research on using technology in teacher education programs. Application examples studied. Field component involving relating material from class to a teacher education situation.

C 1611. Philosophical Foundations of Digital Learning. (3-0) Cr. 3. Prereq: 12 graduate credits in curriculum and instruction. Exploration of Philosophies of science that serve as foundations for research and practice in instructional technology, including positivism, post-positivism, interpretivism/constructivism, and critical theory. The roles of language, nature of truth and reality, and acceptable ways of knowing are explored in terms of their implications for instructional technology design, delivery, research, and scholarship.

C 1612. Socio-psychological Foundations of Digital Learning. (3-0) Cr. 3. Prereq: 12 graduate credits in curriculum and instruction. Exploration of theories of learning and associated instructional models that are the foundation for research and practice in education and educational technology, including behaviorism, information processing theory, and cognitive science. Emphasis on cognitive and social constructivist paradigms and the creation and use of constructivist learning environments supported by technology.

C 1615. Seminar. (0-2) Cr. 1. F. Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research.

C 1671. Discourse in Classrooms. (Cross-listed with Ling). (3-0) Cr. 3. Alt. F, O. Prereq: 506. Exploration of both foundational and current literature on discourse in K-12 classrooms; focuses on both discourse as a classroom phenomenon and discourse as an analytic tool for doing research in classrooms; and provides a close look at enacted and hidden curricula through an examination of interaction and communication patterns.

Courses for graduate students

I. Elementary Education
J. World Language Education
K. Educational Psychology
L. Social Studies Education
M. Literacy Education

Historical, Philosophical, and Comparative Studies in Education (HPC)

David Owen, Program Coordinator

This program provides graduate experiences in historical, philosophical, and comparative studies in education. Students develop facility in analyzing educational problems and issues, critiquing policies that affect education in Society, and making connections between educational practice and learning.

Courses primarily for graduate students, open to qualified undergraduate students

H PC 504. Studies in the Foundations of American Education. (3-0) Cr. 3. F. Prereq: Admission to graduate licensure program in teacher education or permission of instructor. An exploration of the social, historical, and Philosophical context of American education today. Emphasis is given to reflection on the varying perspectives on the goals of schooling, roles of teachers, curricular and pedagogical issues, and educational policy and reform proposals. Note: This course does not meet the requirements of the M.Ed., M.S., or Ph.D. core.

H PC 581. Philosophy of Education. (3-0) Cr. 3. SS. Prereq: Graduate classification. The bases of American educational theory and practice. Analysis of the viewpoints on education of selected individuals and groups.

H PC 584. Classics of Educational Philosophy. (3-0) Cr. 3. S. Prereq: Graduate classification. Intensive study of influential statements of educational purpose, organization, curriculum, practice, and problems in the development of Western education.

H PC 585. Comparative Education: Traditions. (3-0) Cr. 3. Prereq: Graduate classification. Analysis of the cultural traditions of education outside the United States. Emphasis is given to an examination of the principles upon which selected national educational systems have been built. Special attention given to noneuropean traditions.

H PC 588. History of American Education. (3-0) Cr. 3. Prereq: Graduate classification. Historical analysis of selected educational policies, such as equal educational opportunity, governance, discipline, and teacher education. Biographies, school records, and government reports are examined. Antecedents to current issues are stressed.

H PC 591. Supervised Field Experience. Cr. arr. Prereq: 6 graduate credits in special area. Supervised on-the-job field experience in special areas.

H PC 615. Seminar. (1-3) Cr. arr. Repeatable. B. Philosophy of Education. C. Comparative Education.

H PC 690. Advanced Special Topics. Cr. arr. Repeatable. F.S. Advanced special topics

Special Education (Sp Ed)

Courses primarily for undergraduate students

Sp Ed 250. Education of the Exceptional Learner in a Diverse Society. (3-0) Cr. 3. F. Prereq: C I 204. An overview of students with diverse learning needs. Emphasis on early identification, educational services and strategies in inclusive settings, and preparation for community living in a heterogeneous Society.

Sp Ed 339. Collaborative Partnerships in Special Education. (3-0) Cr. 3. F. Prereq: Concurrent enrollment in 330. Collaborative skills used in education of students with mild/moderate disabilities. Includes collaboration between general and special education teachers, parents, paraprofessionals, and other education professionals and agencies.

Sp Ed 355. Classroom Assessment in Inclusive Primary Settings. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in 345; C I 433, 439, 496G, 486F. Examination and application of strategies for determining educational needs, planning and evaluating instructional programs, and monitoring student progress.

Sp Ed 436. Instructional Methods for Students with Mild/Moderate Disabilities. (3-0) Cr. 3. S. Prereq: 250, concurrent enrollment in 355, C I 290N, 377. Evidence-based instructional strategies/techniques in academic areas and materials for individual instruction and classroom management for elementary students with mild/moderate disabilities.

Sp Ed 459. Field Experiences and Practicum Students with Mild/Moderate Disabilities. (1-0) Cr. 1. Prereq: 365, 436; concurrent enrollment in 480. Observation and involvement with students with mild/moderate disabilities in a resource room program. Satisfactory-fail only.

Sp Ed 460. Special Education Capstone. (1-0) Cr. 1. F. Prereq: 439, concurrent enrollment in 459. Discussion and application of evidence-based instructional strategies/techniques in academic and behavioral areas with students who have mild/moderate disabilities. Discussion of issues related to education of students with mild/moderate disabilities.

Courses primarily for graduate students, open to qualified undergraduate students

Sp Ed 501. Teaching Students with Exceptionalities in General Education. (3-0) Cr. 3. S. Prereq: Baccalaureate degree. Overview of characteristics and needs of exceptional children/youth and appropriate service delivery options. Emphasis on accommodations and modifications for instruction and assessment and collaboration among professionals and parents.

Sp Ed 510. Foundations in Mild/Moderate Disabilities. (3-0) Cr. 3. S. Prereq: 501 or equivalent. Historical and legal foundations for special education. Characteristics, prevalence, and etiology of mild/moderate disabilities. Historical and contemporary models of programming for students with disabilities.

Sp Ed 511. Foundations of Behavioral Disorders and Learning Disabilities. (3-0) Cr. 3. S. Study of theory, interventions and special education service delivery models to students with moderate/severe behavior/learning disabilities in the public schools and residential settings.

Sp Ed 517. Research in Special Education. (2-0) Cr. 2. S. Prereq: 510, 515. Critical review of recent literature in education and related behavioral sciences as applied to education of students with disabilities.

Sp Ed 520. Instructional Methods for Mild/Moderate Disabilities. (3-0) Cr. 3. Prereq: 510, 515. Evidence-based instructional methods for meeting the academic and behavioral needs of students with mild/moderate disabilities. Includes methods, strategies, and behavior management techniques appropriate for students with mild/moderate disabilities.

Sp Ed 530. Evidence-based Practices in Behavior Disorders. (3-0) Cr. 3. Prereq: 511, 515. Current research on evidence-based interventions designed to improve the behavior and social skills of students with moderate/severe behavior disorders. Particular emphasis on positive behavioral supports and behavior change strategies.

Sp Ed 553. Reading for Adolescents with Mild/Moderate Disabilities. (Cross-listed with C I 3) Cr. 3. S. Prereq: At least 1 year of teaching experience. Emphasis on teaching adolescents with mild/moderate disabilities to use strategies for reading in content-area reading material.

Sp Ed 555. Career Education and Transition for Youth with Disabilities. (2-0) Cr. 2. S. Prereq: 510 or 511. Examination of the academic, personal, social, employability, and daily living skills needed for a satisfactory adult life. Exploration of curricula, programs, and services to meet these needs.

Sp Ed 560. Classroom Management/Behavioral Support. (3-0) Cr. 3. F. Prereq: Teaching license. Emphasis on positive behavioral supports and understanding behavior and its context through a functional behavioral approach. Design and development of carefully planned behavioral intervention programs for groups and individual students in general and special education settings.

Sp Ed 564. Collaborative Consultation. (3-0) Cr. 3. F. Prereq: 510, 515, 520 or 530 or 540. Models of consultation. Characteristics and methods to promote effective collaboration with families, paraprofessionals, other school personnel, and representatives of other agencies. Includes specific attention to IEP development as a collaborative process.

Sp Ed 565. Role of the Consultant. (1-0) Cr. 1. Prereq: 564. Explore role of the educational consultant in different settings (State department, area education agency, school district, private). Examine roles in relationship to models (mental health, collaborative, organizational).

Sp Ed 570. Systems-Level Services for Youth with Behavioral and Learning Disabilities. (3-0) Cr. 3. S. Prereq: 517. Overview of systems (education, juvenile justice, mental health, families, communities) that serve students with special education needs. Emphasis on how these systems work to provide needed programs and services for youth with behavioral and learning disabilities.

Sp Ed 591. Supervised Field Experience. (0-2) Cr. att. F. Prereq: 15 graduate credits in special area, admission to the graduate program in special education. Supervised on-the-job field experience in special area.

Courses for graduate students

Sp Ed 615. Seminar. (1-0) Cr. 1. Repeatable. Selected topics in special education. Analysis of current special education research potential. Evaluation of impact upon the profession. Implications for additional research.

Design Studies
(Interdepartmental Undergraduate Program)
Kate Schwennsen, Program Coordinator

The Design Studies program brings together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design fields. Students in any college may elect to take a minor in Design Studies.

Core Design Program
Several Design Studies courses are part of the Core Design Program, which is required for all undergraduate students in the College of Design.

Minor—Design Studies
The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinry study within the College of Design. This minor is open to all undergraduate students at Iowa State University. Additional information is available in the Student Programs and Services Office, 297 College of Design.

Minor—Digital Media
To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open only to undergraduate students in the College of Design.

Detailed information is available in the Student Programs and Services Office, 297 College of Design.

Courses primarily for undergraduate students

Dan S 102. Design Studio I. (1-8) Cr. 4. F. A core design studio course exploring the intersection of two- and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Investigation of creative process, visual order and materials, and development of critical thinking through studio projects and lectures. Includes study of precedents, core design practices and disciplines in their cultural contexts.

Dan S 111. Design Exchange Seminar II. (0-2) Cr. 1. S. Prereq: Member of the Design Exchange Learning Community. Development and clarification of career and academic plans. Satisfactory-fail only.

Dan S 115. Design Collaborative Seminar. (1-0) Cr. 0.5. Prereq: Member of Design Collaborative Learning Community. Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Satisfactory-fail only.

Dan S 131. Design Representation. (1-8) Cr. 4. F. An introduction to drawing through lecture and studio experiences. Focus on creative problem solving and communication in order to give visual form to ideas. Emphasis on perceptual, conceptual, and evaluative abilities through experiences that build eye, brain, and hand coordination. Explorations include drawing from observation and memory, working at various scales and duration, and using a variety of media and processes.

Dan S 181. Origins and Evolution of Modern Design. (Cross-listed with Art H). (3-0) Cr. 3. F. History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

Dan S 183. Design Cultures. (3-0) Cr. 3. F. A broad-based exploration of the dynamic relationship between design and culture, employing case study method to investigate particular examples of cultural production in contemporary Society. Design processes and design works are presented as culturally, economically, environmentally, historically, ideologically, politically, and socially grounded events and artifacts.

Dan S 221. History of Western Architecture I. (Cross-listed with Arch). (3-0) Cr. 3. F. Introductory survey with emphasis on the cultural, visual, rational, and contextual relationships of the disciplines. Ancient, through Renaissance.

Dan S 222. History of Western Architecture II. (Cross-listed with Arch). (3-0) Cr. 3. S. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Renaissance to present.

Dan S 270. Forces Shaping Our Metropolitan Environment. (Cross-listed with C R P). (3-0) Cr. 3. S. Must be taken prior to completing 9 credits in C R P. Introduction to the social, political, physical, and economic forces as they shape metropolitan areas. A comprehensive picture of metropolitan development showing important roles other urban disciplines play in the planning process and the interrelationships of the disciplines.

Dan S 274. The Social and Behavioral Landscape. (Cross-listed with L A). (3-0) Cr. 3. S. Exploration of social and behavioral factors pertinent to design of the domestic, civic, and commercial landscape. Focus on working familiarity with design principles as they relate to the behavior and activities of people across a broad demographic and cultural spectrum; application of these principles to design of outdoor environments. Lectures and discussions, including group exercises and field trips.

Dan S 280. History of Art I. (Cross-listed with Art H). (3-0) Cr. 3. F. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. H. Honors. Cr. 4.

Dan S 281. History of Art II. (Cross-listed with Arch H). (3-0) Cr. 3. S. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twenty century. H. Honors. Cr. 4.

Dan S 291. World Cities and Globalization. (Cross-listed with C R P). (3-0) Cr. 3. F. Art, offered 2010. Prereq: Sophomore classification. World cities and globalization in developing and developed countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity.

Dan S 292. Introduction to Visual Culture Studies. (Cross-listed with ART). (3-0) Cr. 3. F. Prereq: Open to all majors. An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary influences of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields.

Dan S 293. Environmental Planning. (Cross-listed with C R P and Env S). (3-0) Cr. 3. F. Prereq: Sophomore classification. Comprehensive overview of the field of environmental planning. The efforts being made to organize, control, and coordinate environment, aesthetic, and cultural characteristics of land, air, and water.

Dan S 301. Study Abroad Preparation Seminar. (1-0) Cr. 1. Repeatable. F.S. Cultural introduction to host country, introduction to faculty sponsor and program of study, the particulars of traveling and living abroad, and financial and logistical preparations. Guest lectures. Required of all students planning to participate in a College of Design study abroad program for 8 or more credits. Satisfactory-fail only.

Dan S 302. Design Leadership Seminar. (1-2) Cr. 2. Repeatable. Prereq: Selection as a peer mentor for the Core Design program. For students serving as peer mentors for the Core Design Program, under faculty supervision. Development of teaching and leadership skills within the context of design education experiences. Satisfactory-fail only.

Dan S 303. Design Ambassadors. (1-2) Cr. Repeatable. Prereq: Admission into one of the professional programs in the College of Design. Opportunity to strengthen leadership, communication and presentation skills. Introduction to student development theory. Students participate in collaborative projects focused on prospective design students. Satisfactory-fail only.

Dan S 310. Practical Experience. Cr. R. Prereq: Permission of adviser or Coordinator of Design Studies. Independent educational enrichment through practical experience. Students must register for this course prior to commencing early work hours. Available only to students taking course loads of eleven credits or less.

Dan S 320. Urban Form. (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: C R P 253 or 270, or permission of instructor. Examines how urban form is shaped, what constitutes good urban form, and what are the trends in emerging urban forms. Descriptive, explanatory theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.

Dan S 351. Solar Home Design. (Cross-listed with Arch). (3-0) Cr. 3. S. Prereq: Arch 202. Architectural design and technical analysis of residential structures with emphasis on energy conservation and solar energy utilization.

Dan S 371. Landscape Architectural History: 1750 to Present. (Cross-listed with L A). (3-0) Cr. 3. S. Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

Dan S 373. Landscape Architectural History: Prehistory to 1750. (Cross-listed with L A). (3-0) Cr. 3. F. Investigation of international landscape design concepts and trends as observed over time, from pre-history to the mid 18th century. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

Dan S 382. Art and Architecture of Asia. (Dialisted with 582). (Cross-listed with Art H). (3-0) Cr. 3. F. Introduction to the history of art and architecture in China, Korea, and Japan before the modern era. Visual materials selected based on important themes that are critical in understanding East Asian culture and art tradition. Museum field trip expenses to be paid by students. Nonmajor graduate credit.

Dan S 383. Greek and Roman Art. (Cross-listed with 583). (Cross-listed with Art H, Cl St). (3-0) Cr. 3. Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

Dan S 385. Renaissance Art. (Cross-listed with 585). (Cross-listed with Art H). (3-0) Cr. 3. European art including painting, sculpture, architecture, and crafts;
Design Studies

thirteenth through sixteenth centuries. Nonmajor graduate credit.

Dsn S 394. Women/Gender in Art. (Dual-listed with 594i). (Cross-listed with Art H, V S). (3-0) Cr. 3. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture. Nonmajor graduate credit.

Dsn S 397. Internship Search Seminar. (1-0) Cr. 1. F. Prereq: Sophomore classification or above in one of the College of Design degree programs. A structured environment to set realistic learning goals, research potential sites, develop a strategy, develop essential job search materials and skills for finding an internship. Successfully obtaining an internship either for credit or non-credit is encouraged but not required. Satisfactory/unsatisfactory grading.

Dsn S 417. Urban Revitalization. (Dual-listed with 517i). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: C R P 263 or 270. Planning methods available to further revitalize and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

Dsn S 425. Growth Management. (Dual-listed with 525i). (Cross-listed with C R P). (3-0) Cr. 3. F. Prereq: Junior classification. Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

Dsn S 426. Topics in Native American Architecture. (Cross-listed with Am In, Arch). (3-0) Cr. 3. Repeatable. F. Prereq: Junior classification. History, theory, and principles of Native American/American Indian Architecture, landscape Architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arc 426 may be applied to degree program. Nonmajor graduate credit.

Dsn S 429. International Planning. (Dual-listed with 529i). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Junior classification. Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

Dsn S 442. Site Development. (Dual-listed with 542i). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: C R P 263, 272. Introduction to site analysis using landscape Architecture and environmental principles, drawing also on basic engineering concepts. Work will evolve from analysis to land development design.

Dsn S 446. Interdisciplinary Design Studio. (Dual-listed with 546i). (0-12) Cr. Repeatable. F. Prereq: Junior classification in a curriculum in the College of Design and permission of instructor. Advanced interdisciplinary design projects.

Dsn S 478. Topical Studies in Landscape Architecture. (Dual-listed with 578i). (Cross-listed with L A). Cr. 3. Repeatable. F.S.S. Prereq: L A 371 or senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-9) to (3-0) depending on number of credits.

A. Landscape Design
B. Planting Design
C. Construction
D. History, Theory, Criticism
E. Landscape Planning
F. Urban Design
G. Graphics
H. Honors
I. Interdisciplinary Studies
J. International Studies
K. Computer Applications
L. Ecological Design
M. Social, Behavioral
N. Natural Resources

Dsn S 481. Art and Architecture of India. (Dual-listed with 581i). (Cross-listed with Art H). (3-0) Cr. 3. Survey of Indian-style art and Architecture through history. Examine how art and Architecture developed in the Indian world to define the Indian identity religiously, culturally, socially, and politically. Nonmajor graduate credit.

Dsn S 484. Sustainable Communities. (Dual-listed with 584i). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Senior classification. The history and theory of sustainable community planning, procedural and substantive dimensions. Cases studies of communities engaged in sustainability planning. Use and development of indicators.

Dsn S 487. Nineteenth Century Art. (Dual-listed with 587i). (Cross-listed with Art H). (3-0) Cr. 3. European and American art and Architecture from 1780 to 1900 focusing on the major European and American art and Architecture of the eighteenth to the nineteenth centuries. Nonmajor graduate credit.

Dsn S 488. Modern and Contemporary Art and Theory I. (Dual-listed with 588i). (Cross-listed with Art H). (3-0) Cr. 3. F. Visual arts and critical theory from Impressionism to Abstract Expressionism. Nonmajor graduate credit.

Dsn S 489. Sequential Art. (Dual-listed with 589i). (Cross-listed with Art H). (3-0) Cr. 3. F.S.S. An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present.

Dsn S 490. Independent Study. Cr. arr. Repeatable. F.S.S. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

A. History, Theory, Criticism
B. Technology
C. Communications
D. Design
E. Entrepreneurship
F. Social/Behavioral
H. Honors

Dsn S 491. Environmental Law and Planning. (Dual-listed with 591i). (Cross-listed with C R P Env S). (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences. Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Dsn S 492. Special Topics: Italian Culture. Cr. 1. Repeatable. F.S.S. Prereq: Enrollment in the College of Design Rome Study Abroad Program or in Dsn S 301. Introduction to Italian contemporary culture, including language, fashion, politics, media, and social mores. Taught the semester prior and during study in Rome for students in the College of Design Rome program.

Dsn S 495. Modern and Contemporary Art and Theory II. (Dual-listed with 595i). (Cross-listed with Art H). (3-0) Cr. 3. Visual arts and critical theory from Abstract Expressionism to the present. Nonmajor graduate credit.

Dsn S 496. History of Photography. (Dual-listed with 596i). (Cross-listed with Art H). (3-0) Cr. 3. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an Art Historical perspective, emphasizing causative factors, cultural influences, and major masters and schools. Nonmajor graduate credit.

Dsn S 498. Selected Topics in Art History. (Dual-listed with 598i). (Cross-listed with Art H). (3-0) Cr. 3. Repeatable. Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Courses primarily for graduate students, open to qualified undergraduate students

Dsn S 504. Why Change Anything?. (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Graduate classification. Introduction to a range of approaches to justifying innovations, changes, and interventions proposed by designers, planners, and artists. Reasons for change and their bases in social, philosophical, and design reasoning, and their usefulness in justifying change to different audiences. Investigation of fallacies, ideologies, and contemporaneous problems in justifications.

Dsn S 517. Urban Revitalization. (Dual-listed with 417i). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Graduate Classification. Planning methods available to further revitalize and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

Dsn S 525. Growth Management. (Dual-listed with 425i). (Cross-listed with C R P). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Graduate classification. Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban, rural relationships; and land preservation.

Dsn S 528. Topical Studies in Architecture. (Cross-listed with Arch). (3-0) Cr. arr. Repeatable. F.S.S. Prereq: Arch 221, 222 or senior classification or graduate standing.

A. Studies in Architecture and Culture
B. Technology
C. Communications
D. Design
E. Practice

Dsn S 529. International Planning. (Dual-listed with 429i). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Graduate classification. Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development and housing.

Dsn S 542. Site Development. (Dual-listed with 442i). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Graduate classification. Introduction to site analysis using landscape Architecture and environmental principles, but drawing also on basic engineering concepts. Work will evolve from analysis to land development design based on that analysis.

Dsn S 546. Interdisciplinary Design Studio. (Dual-listed with 446i). (0-12) Cr. Repeatable. Prereq: Admission to a graduate program in the College of Design and permission of instructor. Advanced interdisciplinary design projects.

Dsn S 558. Sustainability and Green Architecture. (Cross-listed with Arch). (3-0) Cr. 3. F. Prereq: Graduate standing. Issues of Sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment; Issues of Green Architecture as it relates to building materials selection, systems of building materials, the environment of the United States and the World, Architects and examples of buildings with green or sustainable designations.

Dsn S 567. Preservation, Restoration, and Rehabilitation. (Cross-listed with Arch). (3-0) Cr. 3. S. Prereq: Senior classification. Construction standards and procedures for preserving, restoring, reconstructing and rehabilitating existing buildings following the guidelines of the National Park Service and the
National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Dan S 571. Design for All People. (Cross-listed with Arch, Geron). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Dan S 575. Contemporary Urban Design Theory. (Cross-listed with Arch). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Dan S 578. Topical Studies in Landscape Architecture. (Dual-listed with 478). (Cross-listed with L.Ai). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

A. Landscape Design
B. Planting Design
C. Construction
D. History, Theory, Criticism
E. Landscape Planning
F. Urban Design
G. Graphics
H. Honors
I. Interdisciplinary Studies
J. International Studies
K. Computer Applications
L. Ecological Design
M. Social/Behavioral
N. Natural Resources

Dan S 581. Art and Architecture of India. (Dual-listed with 481). (Cross-listed with Art H). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Survey of Indian-style art and Architecture through history. Examine how art and Architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically.

Dan S 582. Art and Architecture of Asia. (Dual-listed with 382). (Cross-listed with Art H). (3-0) Cr. 3. S. Prereq: Graduate classification, permission of instructor. Introduction to the history of art and Architecture in China, Korea, and Japan before the modern era. Visual materials selected based on important themes that are critical in understanding East Asian culture and art tradition. Museum field trip expenses to be paid by students.

Dan S 583. Greek and Roman Art. (Dual-listed with 383). (Cross-listed with Art H). (3-0) Cr. 3. S. Prereq: Graduate classification, permission of instructor. Greek art from Neolithic and Hellenistic eras. Roman art from the traditional founding to the end of the empire in the West.

Dan S 585. Renaissance Art. (Dual-listed with 385). (Cross-listed with Art H). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. European art including painting, sculpture, Architecture, and crafts; thirteenth through sixteenth centuries.

Dan S 587. Nineteenth Century Art. (Dual-listed with 487). (Cross-listed with Art H). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. European and American art and Architecture from 1780 to 1900, focusing on the major movements of western Europe: Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

Dan S 588. Modern and Contemporary Art and Theory I. (Dual-listed with 488). (Cross-listed with Art H). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Visual arts and critical theory from Impressionism to Abstract Expressionism.

Dan S 589. Sequential Art. (Dual-listed with 489). (Cross-listed with Art H). (3-0) Cr. 3. F.S.S. Prereq: Graduate classification, permission of instructor. An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present.

Dan S 590. Special Topics, Cr. arr. Repeatable. F.S.S. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

Dan S 591. Environmental Law and Planning. (Dual-listed with 491). (Cross-listed with C R P L A). (3-0) Cr. 3. S. Prereq: Graduate classification. Environmen-
tal law and policy as applied in planning at the local and State levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Dan S 594. Women/Gender in Art. (Dual-listed with 394). (Cross-listed with Art H, W S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

Dan S 595. Modern and Contemporary Art and Theory II. (Dual-listed with 495). (Cross-listed with Art H). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an Art Historical perspective, exploring the relationships of cultural influences, and major masters and schools.

Dan S 598. Selected Topics in Art History. (Dual-listed with 498). (Cross-listed with Art H). (3-0) Cr. 3. Prereq: Graduate classification. Permission of instructor. Specialized study in the history or criticism of art and/or design.

Dietetics

Interinstitution Graduate program

Participating faculty:
Iowa State University:
Colorado State University: Mary Harris
Kansas State University: Deborah D. Canter
Michigan State University: Sherr
Montana State University: Christina Campbell
North Dakota State University: Ardith Brunt
Oklahoma State University: Nancy Betts
South Dakota State University: Kendra Kattelmann
University of Kansas Medical Center: Linda Griffith
University of Nebraska: Marilyn Schnepf

“Dietetics” is an interinstitutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the ten institutions: Iowa State University, Colorado State University, Kansas State University; Michigan State University, Montana State University, North Dakota State University, Oklahoma State University, South Dakota State University: Kendra Kattelmann, University of Kansas Medical Center, and University of Nebraska.

At Iowa State University, Dietetics is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-Diet) that consists of 36 credits. This is a non-thesis option and a special project of the instructor component is required. Students typically complete the program in 6-8 semesters while employed full-time. Admission is limited to those who are Registered Dietitians or Registration-eligible Dietitians. A computer with minimum specifications, web access, and an email address are required for completing the program.

Admission procedures: Admission to the MFCS-Diet program requires exactly the same procedures as admission to the Graduate College. See Graduate College section of this catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee processes through ISU.

The department cooperates in the interinstitution Master of Family and Consumer Sciences program to offer a specialization in Dietetics. The Master of Family and Consumer Sciences-Dietetics is designed for the Registered Dietitian or Registration-eligible Dietitian. The 36 credit program is non-thesis and seeks to develop research skills, stimulate independent thought, and provide up-to-date knowledge in foods, nutrition, and foodservice/ business management. This program prepares individuals to integrate and apply the principles from the biomedical sciences, human behavior, and management to design and lead effective food and nutrition programs in a variety of settings. Students may build a program of study from offerings of the partner institutions such as human nutrition, nutrient metabolism, biostatistics, health promotion/disease prevention, foodservice systems management, food science, lifespan nutrition, wellness, entrepreneurship, nutrition education, nutritional assessment and food safety. The online program is tailored for credentialed, practicing dietetics professionals who seek to enhance their knowledge in a specific area of dietetics practice or retell for new career opportunities in dietetics practice.

Diet 511. Research Methods. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics. An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. www only. Only one of Diet 511 or FCEEd 511 may count toward graduation.

Diet 530. Nutrition in Wellness. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Addresses wellness promotion through nutrition. Nutritional risk and protective factors will be examined in relation to public health and individual nutrition. www only. Only one of Diet 511 or FCEEd 511 may count toward graduation.

Diet 532. Maternal and Child Nutrition. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Critical examination of behavioral, physiological, and public health issues impacting dietary and nutritional factors that support normal growth and development. Content focuses on each stage of the life cycle: gestation, lactation, infancy, preschool, school age, and adolescence. www only.

Diet 534. Nutrition Education in the Community. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Principles and practices of teaching individuals and groups to translate nutrition knowledge into action. Emphasis on research in and evaluation of nutrition education. www only.
Diet 538. Nutrition: A Focus on Life Stages. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Explores influence of normal physiological stresses on nutritional needs throughout the life span. Evaluates dietary intake and identification of appropriate consultation services in online discussions. Specific considerations, such as the influence of age and cultural heritage, are incorporated. www only.

Diet 540. Nutrition and Physical Activity in Aging. (Cross-listed with Geront). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: enrollment in GP-IDEA MFCS in Dietetics. WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

Diet 544. Pediatric Clinical Nutrition. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Examines the physiological, biochemical and nutritional aspects of disease processes relevant to infants and children up to 18 years of age. Discussion of medical nutrition therapy for a variety of medical conditions in this population including inborn errors of metabolism, food hypersensitivity, obesity, and diseases of the major organ systems. www only.

Diet 546. Phytochemicals. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Overview of phytochemicals (non-nutritive biologically active compounds) from fruits, vegetables, cereals and oilseeds. Covers recent findings of chemistry, physiologic functions, and potential health implications of phytochemicals. www only.

Diet 548. Professional Development Assessment. (Cross-listed with FS HN). (1-0) Cr. 1. F.S.SS. Prereq: Enrollment in GPIDEA MFCS in Dietetics. Web-based course providing information and practice for student to assess and evaluate own professional development and continuing professional education needs. Completion of professional 5-year plan. Satisfactory-fail only.

Diet 550. Finance and Cost Controls. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Overview of the fundamental knowledge of hospital, managerial accounting, cost controls, and financial management. Important topics include financial statement analysis, cost concepts, cost-volume-profit analysis, controlling and calculating food and beverage costs, pricing, and cost accounting. www only.

Diet 554. Statistics. (3-0) Cr. 3. S.SS. Prereq: enrollment in GPIDEA MFCS in Dietetics. Tools used to make statistical decisions. Major emphasis on explanation and understanding of important concepts involved; basic theme is understanding of data and methods used to analyze such data. www only. Only one of Diet 554 or Stat 401, 495, 542 may count toward graduation.

Diet 556. Advanced Nutrition: Macronutrients. (3-0) Cr. 3. S. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics. Integration of the molecular, cellular and physiologic aspects of vitamins, minerals and energy metabolism in mammalian systems. Interactions among nutrients, metabolic consequences of deficiencies or excesses, relevant polymorphisms, major research methodologies, and current topics related to micronutrients and non-nutrient components. www only. Only one of Diet 556 or NutrS 502 may count toward graduation.

Diet 558. Advanced Nutrition: Macronutrients. (3-0) Cr. 3. F. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics. Integration of the molecular, cellular and physiological aspects of macronutrients and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, their interactions, metabolic consequences, and major research methodologies. www only. Only one of Diet 558 or NutrS 501 may count toward graduation.

Diet 560. Medical Nutrition and Disease. (3-0) Cr. 3. F.S.SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention directed to medical nutrition needs of patients in the treatment of each disease state. www only. Only two of Diet 560 or NutrS 561, 564 may count toward graduation.

Diet 565. Malnutrition in Low-Income Countries. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Identification and assessment of malnutrition in low-income countries. Social, cultural, political, economic, and geographic determinants of malnutrition. Protein-energy malnutrition, vitamin and mineral deficiencies. Intervention approaches, international efforts and local sustainability. www only.

Diet 566. Nutrition Counseling and Education Methods. (2-0) Cr. 3. F. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Dual listed with FS HN 466. Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in planning, design, delivery, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories. www only.

Diet 567. Nutrition for Dietitians. (Cross-listed with FS HN). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 380; BBMB 301, undergraduate course in physiology; enrollment in GP-IDEA MFCS in Dietetics. Study of the current scientific literature to evaluate current trends and issues in nutrition science and Dietetic practice. Emerging areas of research investigating the role of nutrients in health and disease in humans will be explored. Emphasis on the impact of emerging research on nutrition recommendations and interventions designed to promote human health. www only.

Diet 568. Entrepreneurship in Dietetics. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Definition and discussion of entrepreneurship and its importance to economic and business environment. www only.

Diet 570. Nutrition and Human Performance. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Develop an understanding of nutrition based on knowledge of the biochemical and physiologic process and functions of specific nutrients in meeting nutritional requirements. Emphasis on the relationship of optimal nutrition and physical efficiency and performance. www only.

Diet 572. Environmental Scanning and Analysis of Current Issues in Dietetics. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Overview of current topics, issues, and trends in Dietetics practice. www only.

Diet 573. Administration of Health Care Organizations. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. A comprehensive review of today’s health care institutions and their response to the economic, social, ethical, political, legal, technological and ecological environments. www only.

Ecology and Evolutionary Biology
www.grad-college.iastate.edu/EEB/ [interdepartmental Graduate Major]

Supervisory Committee: G. Courtney, Chair; A. Bronikowski; J. Dekker; J. Downing; J. Nason; D. Ota

The ecology and evolutionary biology (EEB) interdepartmental major is offered through a faculty housed in ten departments of the university. Faculty from the departments of Agronomy, Anthropology, Ecology, Evolution and Organismal Biology; Entomology; Geological and Atmospheric Sciences; Horticulture; Mathematics; Natural Resource Ecology and Management; Plant Pathology; and Statistics cooperate to offer courses and research opportunities leading to the M.S. and Ph.D. degrees in a major in ecology and evolutionary biology.

Applicants should have completed an undergraduate or master of science or arts degree in one of the biological, physical, or Mathematical sciences. Applicants also should have taken undergraduate courses in both basic ecology and evolution. The EEB major is designed for students interested in the study of mechanisms controlling the composition, structure, and functional processes of ecological systems and the mechanisms that regulate the pattern and rate of evolutionary change within and among species.

Cooperating departments offer courses and research opportunities in population biology, community ecology, and ecosystems ecology; landscape ecology, modeling, and spatial dynamics; systematics, biodiversity, and bogeography; physiological and behavioral ecology; conservation and restoration ecology; agroecology; natural resources ecology and management; evolutionary ecology; population, quantitative and evolutionary genetics; and environmental Statistics, stochastic modeling, and quantitative ecology and evolution. In addition, interdisciplinary courses in ecology and evolution are offered, including a special topics course, a seminar, and an extended field trip.

Students majoring in EEB may prepare themselves for careers focused on basic or applied ecology and evolutionary biology in a variety of settings, including academia, government, industry, and private organizations. Graduates have a broad understanding of ecology and evolutionary biology, experience designing and conducting research, writing grant proposals, and communicating effectively with scientific colleagues at meetings and through publications. All graduates become aware of Societal and ethical issues that surround the discipline.

Information on application procedures, research interests of the faculty, and specific requirements of the major may be obtained from the EEB web site www.grad-college.iastate.edu/EEB/, or by contacting eeboffice@iastate.edu.

Courses for graduate students

EEB 511. Conceptual Foundations in Ecology and Evolutionary Biology. (2-3) Cr. 4. F. Prereq: Graduate classification. Introduction to key figures and ideas that have shaped the development of ecology and evolutionary biology. Covers major developments in ecology and evolutionary biology at five levels of biological organization: Genome, Organism, Population, Community, and Ecosystem. Impacts of these developments on current approaches to investigation and interpretation of ecological and evolutionary phenomena advances on the direction of scientific investigations. Introduction to analytical skills important for critical thinking in ecology and evolutionary biology and the impact of accepted lines of scientific reasoning on the objectives and conduct of research, such as explanation and prediction, design of studies as experimentation, and structured or unstructured observation.

EEB 585. Extended Field Trip. (0-4) Cr. 2. Repeatable. S. Prereq: Graduate classification. Annual field trip to a region of North America to study the major terrestrial and aquatic ecosystem types of the region. Report required.

EEB 590. Special Topics. Cr. arr. Repeatable. FS.SS. Prereq: Graduate classification and permission of instructor. For students wishing to conduct in-depth study of a particular topic in ecology and evolutionary biology.
EEB 698. Seminar. (1-0) Cr. 1. Repeatable. F.S. Reports and discussion of recent research and literature.

Courses Offered by the Organization for Tropical Studies

ISU graduate students can take courses through the widely recognized Organization for Tropical Studies (OTS) at field sites in Central and South America. Students register for OTS courses and upon successful completion, receive credit from University of Costa Rica which transfers as either OTS 510 or OTS 515. For further information about OTS courses, see www.ots.duke.edu.

For information regarding OTS course offerings, please contact the EEB Program Office at eeboffice@iastate.edu.

OTS 510. Tropical Biology: An Ecological Approach. Cr. 8. This course is designed for students in the early stages of graduate study in biology or a related field, with the goal of training graduate students in research methods by providing intensive field experience in diverse tropical ecosystems.

OTS 515. Topics in Tropical Biology. Cr. 1-8. This course is designated for students enrolled in graduate course offerings through OTS (excluding OTS 510). Examples of graduate courses offered by OTS include Tropical Plant Systematics, Tropical Ecology and Conservation, Molecular Methods in Tropical Ecology, and Tropical Agroecology.

Ecology, Evolution, and Organismal Biology

www.eebbs.iastate.edu

Jonathan Wendel, Chair of Department

Distinguished Professors (Emeritus): Tiffany, Ulmer

University Professor: Horner

Professors: Ackerman, L. Clark, W. Clark, Courtneyy, Danielson, Debinski, Downing, Janzen, Nason, Van der Valk, Vleck, Wendel

Professors (Emeritus): Brown, Buttrey, D. Farrar, Jeska, Larsten, Mutchmor, Redmond

Professor (Collaborator): Otis

Associate Professors: Adams, Colbert, Crampton, Jurik, Moloney, Raich, Wallace, Wilsey

Associate Professors (Emeritus): E. Farrar, Shaw

Associate Professors (Collaborators): Newton, Rossburg

Assistant Professors: Bronikowski, Harpole, Hoffer, Hofmackel, Kelly, Lavern, Serb, Valenzuela-Castro

Assistant Professors (Adjunct): Bowen, B. Pleasants, J. Pleasants, Roe

Assistant Professors (Collaborators): Koford, Fierce

Lecturers: Folinsee, Spalding

Undergraduate Study

Within the Biological Sciences, studies of ecology, evolution, and organismal biology are essential in understanding the complex relationships of life on Planet Earth. Ecology focuses on the interactions among organisms as well as the interactions between organisms and their physical environments. Evolutionary theory addresses the origins and interrelationships of species. Organismal biology studies both the diversity of biological organisms and the structure and function of individual organisms. The EEOB Department offers several undergraduate majors with other departments. Students interested in the areas of ecology, evolution, and organismal biology should major in Biology, Environmental Science, or Genetics. The Biology Major is administered and offered jointly by the EEOB and GDCB departments. The faculty of EEOB, together with those in GDCB and BBMB, administer and offer the Genetics Major. Faculty in EEOB, in cooperation with faculty from other departments on campus, administer and offer the Environmental Science Major.

These majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. Faculty in the EEOB Department also teach undergraduate courses at Iowa Lakeside Laboratory (see the Iowa Lakeside Laboratory listing).

The Biology Major, the Environmental Science Major, and the Genetics Major prepare students for a wide range of careers in biological sciences. Some of these careers include conservation of natural resources and biodiversity, human and veterinary medicine, and life science education. These majors are also excellent preparation for graduate study in systematics, ecology, biological diversity, physiology, and related fields. Faculty members in EEOB contribute to the graduate courses listed below. The titles and descriptions of these courses are in the Biology section of the catalog.

Graduate Study

The department offers graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees. EEOB graduate students major in one of several interdepartmental majors including Bioinformatics and Computational Biology, Ecological and Evolutionary Biology, Environmental Science, Genetics, Interdisciplinary Graduate Studies, Neuroscience, and Toxicology. The EEOB faculty members are active in the interdepartmental graduate majors and teach a wide range of graduate courses. Faculty research programs cover a wide range of specializations including physiology and physiological ecology; Microbiology; animal behavior; evolutionary genetics of plants and animals; modeling of evolutionary and ecological processes; plant and animal systematics; developmental biology; aquatic and wetland ecology; functional, population, community, landscape, and ecosystem theory; and conservation biology. For further information on faculty research interests check the EEOB web site (www.eebbs.iastate.edu).

EEOB 501. Evolutionary Ecology. (Cross-listed with A Ecol). (3-0) Cr. 3. F.

EEOB 511. Freshwater Algae. (Cross-listed with La LL). Cr. 4. S. Structure of freshwater algae based on field collected material; emphasis on genus-level identifications, habitats visited include lakes, fens, streams, and rivers; algal ecology.

EEOB 507. Advanced Animal Behavior. (3-0) Cr. 3. S. Prereq: Graduate standing. Biol 354, or permission of instructor. Analysis of research in animal behavior. Topics covered may include behavioral ecology, mechanisms of behavior, evolution of behavior, applications of animal behavior to conservation biology, and applications of animal behavior to wild animals in captivity.

EEOB 514. Evolutionary Ecology. (Cross-listed with A Ecol). (3-0) Cr. 3. F. Prereq: Biol 519, Biol 315; graduate standing. Evolution of ecological adaptations in the individual, population, community and landscape levels. Emphasis on evolutionary mechanisms and adaptive strategies; units and mechanisms of evolution; life history strategies, species interactions and organization of communities, behavior, and patterns of distribution, speciation and macroevolution.

EEOB 531. Conservation Biology. (Cross-listed with A Ecol). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Biol 312, Biol 313 or graduate standing. Examination of conservation issues from the population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

EEOB 535. Restoration Ecology. (Cross-listed with EnSci, NREM). (2-3) Cr. 3. F. Prereq: Biol 366 or 474 or graduate standing. Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

EEOB 537. Plant Stress Biology. (Cross-listed with Hort, Agron). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Biol 339 or Biol 378. Emphasis on the role of the hormone abscisic acid (ABA) in the regulation of water loss from plants. Lectures are prepared from journal papers that elucidate key ABA controlling responses to drought, flooding, salt, nutrient deficiencies, freezing, pathogens and herbivores. Plants studied included genetic model systems and crops of Horticultural and Agronomic value.

A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.S.)
B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. (S.S.S.)
C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)
D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)
E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F)

EEOB 552. Pteridology. (1-3) Cr. 2. Prereq: 10 credits in biological sciences. Morphology, taxonomy, and ecology of the lower vascular plants, with emphasis on ferns.

EEOB 558. Ornithology. (Cross-listed with A Ecl). (2-3) Cr. 3. S. Prereq: A Ecl 365 or Biol 351. Dual-listed with Biol 458. Biology, ecology, evolution, and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

EEOB 561. Plant Diversity and Evolution. (2-6) Cr. 4. Prereq: 10 credits in biological sciences. Current concepts of plant phylogeny from the origin of land plants through the origin of angiosperms, with emphasis on morphology, reproduction and evolutionary trends in bryophytes, pteridophytes, and gymnosperms.

EEOB 563. Molecular Phylogenetics. (2-3) Cr. 3. F. Prereq: Biol 313 and 315. An overview of the theory underlying phylogenetic analysis and the application of phylogenetic methods to molecular datasets. The course emphasizes a hands-on approach to molecular phylogenetics and combines lecture presentations with computer exercises and discussion of original scientific literature.

EEOB 564. Wetland Ecology. (Cross-listed with EnSci). (3-0) Cr. 3. S. Prereq: 15 credits in biological sciences. Ecology, classification, creation and restoration, and management of wetlands. Field studies will examine the composition, structure and functions of local natural wetlands and restored prairie pothole wetlands. Individual or group projects.

EEOB 566. Molecular Evolution. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: Permission of instructor. Seminar/discussion course covering the fundamentals of molecular evolution. Emphasis is placed on original scientific literature and current topics, including rates and patterns of genetic divergence; nucleotide and allelic diversity; molecular clocks; gene duplications; genome structure; organellar genomes; polyploidy; transposable elements; and mechanisms of gene and genome evolution.

EEOB 567. Empirical Population Genetics. (3-0) Cr. 3. F. Prereq: Permission of instructor. An overview of fundamental population genetic theory and the ecological and evolutionary factors underlying the distribution of genetic variation within and among natural populations. Emphasis on the analysis of inbreeding, breeding systems, parentage, relatedness, spatial autocorrelation, effective population size, hierarchical population models, and phylogeography.

EEOB 569. Biogeography. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Biol 315 or equivalent; permission of instructor. Principles underlying the geographic distribution of organisms throughout the world; biological influences of geological history and tectonic movements; role of climate, migration, dispersal, habitat, and phylogeny on past and present organizational distribution patterns; biogeographic methods.

EEOB 570. Landscape Ecology. (Cross-listed with A Ecl). (2-3) Cr. 3. Alt. F., offered 2010. Prereq: Permission of instructor; EEOB 588, a course in calculus. The study of ecological and evolutionary processes within a spatial context with emphasis on behavior, population, and community dynamics.

EEOB 573. Techniques for Biology Teaching. (Cross-listed with Ia LL, A Ecl). Cr. arr. Repeatable. SS. The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A. Animal Biology (Same as A Ecl 573A)
B. Plant Biology
C. Fungi and Lichens
D. Aquatic Biology
E. Prairie Ecology
F. Wetland Ecology
G. Limnology (Same as A Ecl 573G)
H. Animal Behavior (Same as A Ecl 573H)
I. Insect Ecology
J. Biology of Invertebrates
K. Non-invasive Use of Biologing Organisms
W. Project WET (Same as A Ecl 573W)

EEOB 576. Field Mycology. (Cross-listed with Ia LL, Cr. 4. Alt. SS., offered 2010. Identification and classification of the common fungi in the area. Emphasis on identification, preservation, and culture practiced with members of the various fungi groups.

EEOB 580I. Ecology and Systematics of Diatoms. (Cross-listed with Ia LL, Cr. 4. SS. Field and laboratory study of freshwater diatoms; techniques in collection, preparation, and identification of diatom samples. Study of environmental factors affecting growth, distribution, taxonomic characters; project design and execution including construction of reference and voucher collections and data organization and analysis.

EEOB 581. Environmental Systems I: Introduction to Environmental Systems. (Cross-listed with EnSci). (2-4) Cr. 4. F. Prereq: 12 credits of natural science including biology and chemistry. Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural systems and the primary environmental factors controlling these systems.

specimen chemical and cryopreservation methods, x-ray microanalysis, backscattered and topographic imaging, image digitization, processing and presentation. Limit of 10 students.

EEOB 698. Seminar. Cr. 1. Repeatable. Meetings of graduate students and faculty to discuss recent literature and problems under investigation.

EEOB 588. Aquatic Ecology. (Cross-listed with EnSci). (3-0) Cr. 3. F Prerequisite: Concurrent enrollment in 588. (Dual-listed with Biol 488.) Field trips and laboratory exercises to accompany 586. Hands-on experience with aquatic research and monitoring techniques and concepts.

EEOB 586L. Aquatic Ecology Laboratory. (Cross-listed with EnSci). (3-0) Cr. 3. F Prerequisite: Concurrent enrollment in 588. (Dual-listed with Biol 486.) Field trips and laboratory exercises to accompany 586. Hands-on experience with aquatic research and monitoring techniques and concepts.

EEOB 587. Microbial Ecology. (Cross-listed with EnSci, Micro). (3-0) Cr. 3. Prerequisite: 6 credits in biology and six credits in chemistry. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

EEOB 589. Population Ecology. (Cross-listed with A Ecl). (2-2) Cr. 3. F Prerequisite: Biol 312, Stat 101 or 104, a course in calculus, or graduate standing. (Dual-listed with Biol 489.) Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

EEOB 590. Special Topics. Cr. arr. Repeatable. Prerequisite: 10 credits in biology, permission of instructor. A. Current Topics in Ecology  B. Current Topics in Evolutionary Biology  C. Current Topics in Organismal Biology  I. Iowa Lakeside Laboratory (Cross-listed with the LL 599L, A Ecl 590L, Anh 590L.)

EEOB 596. Ecology and Society. (Cross-listed with Phil). (3-0) Cr. 3. Prerequisite: Graduate classification in biological or environmental sciences/studies with at least one course in ecology. Analysis of conceptual and methodological debates in ecology. Historical development of competing research traditions and Philosophies. Topics include i) methodological issues in ecological science, ii) conceptual issues in theoretical ecology, iii) conceptual issues in applied ecology, iv) relation of ecology to environmental and social issues.

EEOB 599. Creative Component. Cr. arr. Research toward nirthesis master's degree.

Courses for graduate students

EEOB 611. Analysis of Populations. (Cross-listed with A Ecl). (2-2) Cr. 3. Alt. F, offered 2009. Prerequisite: Biol 312, Stat 401; a course in calculus. Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on Statistical inference and computing.

EEOB 641. General Mycology. (2-6) Cr. 4. F Prerequisite: PI P 407 First semester of a full-year course. Taxonomy, morphology, ecology, and phylogeny of slime molds and fungi (omycolates, chytridiums, zygomycetes, ascomycetes, basidiomycetes, and fungi imperfecti).

EEOB 642. General Mycology. (2-6) Cr. 4. S. Prerequisite: 641. Continuation of 641. Taxonomy, morphology, ecology, and phylogeny of slime molds and fungi (oomycotes, chytridiums, zygomycetes, ascomycetes, basidiomycetes, and fungi imperfecti).

EEOB 680. Scanning Electron Microscopy. (Cross-listed with GDCB, Micro). (2-9) Cr. 5. Alt. F, offered 2009. Prerequisite: Permission of instructor. Current theories encompassing scanning electron optics and their applications for high and low vacuum microscopy, collective organizations, governments, and the general public using a variety of means. Graduates understand the interaction of technology, human activity, and the environment. They are able to apply concepts associated with making “optimal” choices among economic alternatives. Graduates are prepared for graduate work in law, economics, and business, as well as to work, having learned tools of critical analysis and skills essential to getting and keeping meaningful employment.

College of Agriculture

For the undergraduate curriculum in agricultural business, see College of Agriculture, Curricula. The agricultural business curriculum prepares students for advanced studies and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A major in agricultural business with a minor in economics is not permitted; however, a double major in agricultural business and economics is permitted. A minor in agricultural business will be offered pending administrative approval.

College of Business

For the undergraduate curriculum in business economics, see College of Business, Curricula. The major in business economics provides a high-quality education with a balanced emphasis in both business economics. Graduates from the business economics major possess a unique mix of analytical and applied business skills well-suited for employment in upper level management and public service positions. Graduates also have solid preparation for graduate studies in law, economics, and in Master of Business Administration (MBA) programs. A double major in business economics and agricultural business is not permitted; a double major in business economics and economics is not permitted, either. A major in business economics with a minor in economics is not permitted.

College of Liberal Arts and Sciences

Candidates for the bachelor of science degree with a major in economics must fulfill requirements established by the College of Liberal Arts and Sciences. (For details of undergraduate curricula in liberal arts and sciences, see College of Liberal Arts and Sciences, Curricula.) The economics curriculum prepares students for advanced studies, professional degrees such as law and business administration, and for careers in finance, business and economic research, management, insurance, brokerage, real estate, labor relations, international development, and government service.

Students majoring in economics are required to take either Math 165 and 166 or Math 165 and Econ 207 or Math 160 and Econ 207 within the mathematical and natural sciences group. Students who plan to take postgraduate work in economics should take Math 165 and 166 for the above sequence. Additional requirements are Stat 226 and 326. Twenty-eight credits in economics are required for the bachelor of science degree. Students must complete the following courses in economics: Econ 101, 102, 301, 302, 371, three Econ courses numbered 400-489, plus one additional Econ course selected from an approved departmental list. Economics majors must maintain a C average in 101, 102, 301, and 302, with no grade lower than a C-.
Optimal progress for an economics major would be to complete the principles sequence, Econ 101 and 102, in the freshman year. Math 165, 166, or Math 165, Econ 207, or Math 160, Econ 207 should also be completed in the freshman year, followed by the intermediate theory sequence, Econ 301 and 302, in the sophomore year. Stat 226 and 326 are recommended in the sophomore year.

A minor in economics is offered. Courses to be included in the minimum of 15 hours are Econ 101, 102, and 301.

Communication Proficiency Requirement: The major in economics requires a grade of C or better in each of the following English courses: 150, 250 (or 250H), and 314.

The department participates in the interdepartmental programs in international studies and women's studies.

Learner Outcome Goals
In general, our goal is that all Department of Economics graduates at Iowa State are able to use economic reasoning to think critically; to make decisions and to communicate effectively; to be ethical; to respect the environment, and to be multi-culturally and internationally aware.

Specifically, with respect to:

1. Critical Thinking, all graduates of the Department of Economics are able to:
   a) distinguish factual statements from opinions or value judgements
   b) use scientific methods to analyze and interpret data
   c) distinguish causal relationships from correlations
   d) determine the accuracy of statements
   e) understand the usefulness of abstractions and models
   f) distinguish simplifying and critical assumptions from unnecessary details
   g) objectively critique competing viewpoints to make reasoned judgements

2. Economic Reasoning:
   a) distinguish positive (what is) and normative (what should be) economics
   b) determine the opportunity cost of alternatives
   c) apply the concepts of comparative advantage, specialization, and exchange to analyze resource allocation issues
   d) identify the conditions under which markets allocate resources efficiently or markets fail
   e) apply marginal economic analysis to solve problems
   f) conduct comparative static analyses
   g) pose and test hypotheses

3. Decision Making/Problem Solving:
   a) work effectively alone and in teams to solve problems
   b) use scientific methods to identify optimal choices among economic alternatives
   c) identify decision-makers, objectives, choice variables, incentives, and constraints
   d) identify and apply the solution technique best suited for the specific problem
   e) understand how conclusions depend on assumptions

4. Communications:
   a) communicate economic and business concepts to professionals, organizations, governments, and the general public
   b) obtain information by accessing electronic or traditional media, listening, or by observation
   c) use computer and statistical methods to organize and analyze data
   d) write clearly and effectively
   e) speak clearly and persuasively
   f) prepare and present visual information effectively

5. Ethics:
   a) develop ethical perspectives and sense of moral responsibility and values
   b) discuss contemporary ethical and moral issues in professional and private life
   c) critically evaluate their own arguments and those of others

6. Environment Awareness:
   a) understand the physical and biological properties of the environment and ecological systems
   b) understand how economic activity, such as business or agriculture, impacts the environment

7. International/Multi-Cultural Awareness:
   a) understand cultural diversity within our own nation
   b) understand cultural diversity around the world
   c) know the different economic or agricultural systems in other countries
   d) have human relation skills essential in the work place and the community

Graduate Study
The department offers work toward the degrees master of science and doctor of philosophy with majors in economics and agricultural economics. The department also offers minors to students with majors in other departments.

Students do not need to have an undergraduate major in economics or agricultural economics in order to qualify for graduate work in the department. However, students must have completed undergraduate coursework in macroeconomics, microeconomics, statistics, and calculus. Some background in Math courses emphasizing logic and proofs is preferred, particularly for the Ph.D.

Candidates for the degree master of science (thesis option) are required to complete satisfactorily 30 credits of acceptable graduate work, including preparation of a thesis.

Candidates for the degree master of science (non-thesis option) must fulfill requirements by satisfactorily completing 32 credits of coursework, including preparation of a creative component.

Programs of study for the doctorate are organized by each student in consultation with their major professor and the individual's committee. Students may select fields of concentration from the following: agricultural economics, financial economics, industrial organization, international economics, human resources, macroeconomics, and environmental and resource economics.

Each student must complete advanced courses in microeconomic and macroeconomic theory, quantitative methods and econometrics in two fields from the list above. Students must demonstrate competence in theory by passing qualifying examinations. Students must also participate in workshops.

With the cooperation of the College of Law at Drake University, a joint degree consisting of a jurisprudence and master of science in agricultural economics or economics may be pursued concurrently. Other cooperative programs of study may be arranged with the University of Iowa College of Law or other recognized institutions.

The department cooperates in the interdepartmental graduate majors in transportation and sustainable agriculture, and the interdepartmental minor in gerontology.

Courses primarily for undergraduate students

Econ 101L. Laboratory in Principles of Microeconomics. (0-2) Cr. 1. F. Prereq: Concurrent enrollment in the appropriate section of 101. Discussion of material typically covered in Econ 101. Application of economic principles to real world problems. Economic principles and basic business management concepts applied to decision-making in agribusiness operations.

Econ 110. Orientation in Agricultural Business. (1-0) Cr. 0.5. F. Orientation course for freshman and new transfer students in agricultural business. Satisfactory-fail only.

Econ 207. Applied Economic Optimization. (2-2) Cr. 3. S. Prereq: Math 151, 160, 165 or equivalent. Application of linear algebra, calculus, and unconstrained and constrained optimization techniques to economic problems. Learning outcomes include the ability to (i) identify the objective, decision variables and constraints in economic decision problems, (ii) represent elements of an economic problem in simple mathematical models, (iii) identify and apply mathematical tools that can be used to solve the problems, (iv) identify the strengths and limitations of the solution method, and (v) interpret the economic meaning and implications of the solution.

Econ 235. Introduction to Agricultural Markets. (3-0) Cr. 3. S. Prereq: 101. Basic concepts and economics principles related to markets for agricultural inputs and products. Overview of current marketing problems faced by farms and agribusinesses, farm and retail price behavior, structure of markets, food marketing channels, food quality and food safety, and the role of agriculture in the general economy. The implications of consumer preferences at the farm level. Introduction to hedging, futures, and other risk management tools.

Econ 292. Career Seminar. (1-0) Cr. 1. F. Prereq: Classification in economics or agricultural business. Career opportunities in the various industries and...
government institutions. Required training and skills needed to perform successfully in different types of careers. Factors important in finding and obtaining employment either before or after graduation including personal resumes, interviewing, and letter writing.

Econ 297. Internship. Cr. 2. Repeatable. F. Prereq: Permission of instructor and classification. Students complete a research report, based on their internship or approved work experience, that examines chosen topics in management, marketing or finance. No more than 4 credits of Econ 297 may be applied toward graduation. Satisfactory-fail only.

Econ 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Econ 301. Intermediate Microeconomics. (3-0) Cr. arr. F.S.S.S. Prereq: 101; Math 160 or 165. Theory of consumer and business behavior; optimal consumption choices and demand; theory of firm behavior; costs, production, and supply; competitive and imperfectly competitive demand and supply; factors of production; general equilibrium analysis. Recitation required for 4 credits. Nonmajor graduate credit.

Econ 302. Intermediate Macroeconomics. (3-0) Cr. F. Prereq: 101, 102; Math 160 or 165. Theory of income, employment, interest rates, and the price level; fiscal and monetary policy; budget and trade deficits; money and capital inflows, interest rates, and inflation. Nonmajor graduate credit.

Econ 312. History of Economic Thought. (3-0) Cr. 3. S. Prereq: 101. The logic and explanatory value of received economic doctrines since the middle of the eighteenth century. The reflection of past economic doctrines on present macroeconomic theory and policy. Discussion of major works by Smith, Ricardo, Mill, Marx, Marshall, Wicksell, and Keynes.

Econ 320. Labor Economics. (3-0) Cr. F. Prereq: 101. Survey of contemporary labor market problems and public policy toward labor. Economic analysis of topics such as labor supply and demand, work incentives and compensation, transfer programs, education and training, mobility, minimum wages, unions, working conditions, benefits, discrimination, unemployment, wage differentials across regions, and labor markets in other countries. Nonmajor graduate credit.

Econ 321. Economics of Discrimination. (Cross-listed with W.Si.) (3-0) Cr. 3. F. Prereq: 101. Economic theories of discrimination. Analysis of the economic problems of women and minorities in such areas as earnings, occupations, and unemployment. Public policy concerning discrimination. Poverty measurement and anti-poverty programs in the U.S. Nonmajor graduate credit.

Econ 325. Biorenewable Systems. (Cross-listed with A.E, A.S, TSM, Agron, BusAd). (3-0) Cr. 3. F. Prereq: Econ 101; Chem 155 or higher; Math 140 or higher. Converting biorenewable resources into bioenergy and bio-based products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing. Counts as a general elective course for majors in agricultural business, economics, and business economics.

Econ 332. Cooperatives. (3-0) Cr. 3. S. Prereq: 101. Survey of cooperative activities with emphasis on agricultural cooperatives, types of cooperatives, methods of organization and operation, principles, legal and tax aspects, cooperative finance, economic policies, and limitations and regulations of cooperation. Students will learn how to work together in teams to solve problems while role playing directors of cooperative boards. Nonmajor graduate credit.

Econ 333. Advanced Farm Business Management. (3-2) Cr. 3-4. F. Prereq: 230. Effective use of strategic planning, decision, and computer assistance for solving farm problems. Applications of economic and management theory to analyze farm business decisions using efficiency measures to assess current resource use and direct the farm business analysis, planning, and tax process. Computers as aids in the decision process. Three credits available only to students enrolled in AgPAG. Laboratory required for 4 credits. Nonmajor graduate credit.

Econ 334. Entrepreneurship in Agriculture. (3-0) Cr. 3. Prereq: 101. Introduction to the process of entrepreneurship in the agricultural and food sectors. Emphasis on opportunity recognition and assessment, resource acquisition and feasibility analysis for both private and social enterprises. Students will develop a comprehensive feasibility study for a new business or non-profit organization.

Econ 338. Topics in Agricultural Marketing. Cr. arr. F. Prereq: 235 recommended for topics B and C. A given topic can be taken only once. A hands-on application of economic concepts and principles to agricultural commodity markets, marketing methods, risk management, and related agribusiness decisions. A. Dairy marketing. 2 cr. B. Livestock marketing. 1 cr. C. Grain marketing. 1 cr.

Econ 353. Money, Banking, and Financial Institutions. (3-0) Cr. F.S.S.S. Prereq: 101, 102. Theoretical and applied analysis of money, banking, and financial markets; interest rates and portfolio choice; the banking industry in transition; the money supply process; the Federal Reserve System and the conduct of monetary policy; macro implications of monetary policy; international finance.

Econ 355. International Trade and Finance. (3-0) Cr. F. Prereq: 101, 102. Explanations of causes of international trade and the impact of trade on welfare and employment patterns. Analysis of government policies towards trade, such as tariffs, quotas, and free trade areas. Theory of balance of payments and exchange rate determination, and the role of government policies. Examination of alternative international monetary policies and international monetary systems. Nonmajor graduate credit.

Econ 362. Applied Ethics in Agriculture. (Cross-listed with Soc) (3-0) Cr. 3. F. Prereq: Econ 101 or Soc 130 or Soc 134, junior or senior status in the College of Agriculture and Life Sciences. Identify major ethical issues and dilemmas in the conduct of agricultural and food systems research and business management and decision making. Discuss and debate proper ethical behavior in these issues and situations and the relationship between business and personal ethical behavior.

Econ 370. Comparative Capitalism and Economic Transitions. (3-0) Cr. F. Prereq: 101, 102. Theories of capitalism and the economics of transition from a planned to a market economy; the role and the creation of economic institutions supporting different economic systems. An examination of recent experiences of Eastern European countries, the former Soviet Union, China, the European Union, and the United States.

Econ 371. Introductory Econometrics. (4-0) Cr. 4. F.S. Prereq: 301, 302 or 353, Stat 326. Introduction to the models and methods of statistical relationship analysis and test hypotheses pertaining to economic variables. Simple and multiple regression analysis; stochastic regressors; heteroskedasticity; autocorrelation; measurement error; simultaneous equations. Nonmajor graduate credit.

Econ 378. Economics of Aging. (Cross-listed with HD FS, Geront.). (3-0) Cr. 3. S. Prereq: 3 credits in principles of economics and 3 credits in human development and family studies. Economic status of the aging, retirement planning and the retirement decision, role of Social Security, public transfer programs for the elderly, intrafamily transfers to/from the elderly, private pensions, financing medical care and housing for the elderly, prospects and issues for the future.

Econ 385. Economic Development. (3-0) Cr. 3. S. Prereq: 101, 102. Current problems of developing countries, theories of economic development, agriculture, and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required for satisfying basic needs of Third World countries, interrelationships between industrialized countries and the developing countries, including foreign aid. Nonmajor graduate credit.

Econ 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Econ 401. Topics in Microeconomics. (3-0) Cr. 3. Econ 391. Start 228. Advanced treatment of selected topics from one or more of the following areas: household production models, factor markets, game theory and imperfect competition, general equilibrium, intertemporal choice, asset markets, income distribution, externalities and public goods, etc. Nonmajor graduate credit.

Econ 402. Topics in Macroeconomics. (3-0) Cr. 3. Soc 133. Econ 370, 391, Start 228. Advanced treatment of selected topics from one or more of the following areas: business cycle theory, growth theory, fiscal and monetary policy, coordination issues, open economy macroeconomics, and financial economics. Nonmajor graduate credit.

Econ 415. Firms, Markets and Industry Structure. (2-2) Cr. 3. F. S. Prereq: 301. The theory of the firm, determinants of firm boundaries; firm behavior; perfectly competitive markets; welfare and market efficiency;
monopoly and monopsony; price discrimination; oligopoly and oligopsony; strategic market behavior. Nonmajor graduate credit.

Econ 416. Industrial Organization. (3-0) Cr. 3. F. Prereg: 301, 415. Game theoretic approaches to competition and strategizing; spatial competition; research and development; entry deterrence; the economics of regulation. Nonmajor graduate credit.

Econ 431. Managerial Economics. (3-0) Cr. 3. S. Prereg: 301. Theory of the firm; organizational incentives and efficiency; moral hazard; role of information and decision making under uncertainty; ownership and control; business investment. Nonmajor graduate credit.

Econ 455. International Trade. (3-0) Cr. 3. S. Prereg: 301. Rigorous treatment of theories of international trade and international factor movements. Examination of the impact of international labor migration on domestic and world welfare and on the distribution of income. Theoretical analysis of governance policies towards trade and factor movements, including quotas, tariffs, free trade areas and immigration restrictions. Discussion of contemporary issues and controversies concerning globalization, including multinational firms and labor migration. Nonmajor graduate credit.

Econ 457. International Finance. (3-0) Cr. 3. F. Prereg: 302. National income accounting and balance of payments; foreign exchange rates and exchange rate markets; money, interest rates, and exchange rate determination; prices, exchange rates, and output in the short run; international monetary arrangements; fixed versus flexible exchange rates; optimal currency areas; international capital flows; currency and financial crises in emerging markets. Nonmajor graduate credit.

Econ 460. Agricultural, Food, and Trade Policy. (Dual-listed with 560). (3-0) Cr. 3. S. Prereg: 301 or 501. Description and analysis of economic problems of U.S. agriculture. Explanation and economic analysis of government policies and programs to develop agriculture, conserve agricultural resources, address consumer food concerns, stabilize farm prices, and raise farm incomes. The influence of macropolicy, world economy, and international trade on U.S. agriculture. Nonmajor graduate credit.

Econ 466. Agricultural Finance. (3-0) Cr. 3. S. Prereg: 301, 306. Fin 301 and Econ 393 (recommended). Financial analysis of agricultural businesses; liquidity, capital structure, and growth and risk of agricultural firms; capital budgeting methods; analysis of land investments, leasing, and costs of credit; financial intermediation and major financial institutions for agriculture; borrower-lender relationships, and asset-liability management techniques by financial intermediaries; public policies affecting agricultural credit markets. Nonmajor graduate credit.

Econ 490. Independent Study. Cr. arr. Repeatable. Prereg: Junior or senior classification, 14 credits in economics. No more than 9 credits of Econ 490 may be used toward graduation. Satisfactory-fail only. E. Entrepreneurship H. Honors

Econ 496. Economics Travel Course. Cr. arr. Repeatable. Prereg: Sophomore status, permission of instructor. Tour and study of international agricultural and/or nonagricultural economics, markets, and institutions. Locations and duration of tours will vary. Limited enrollment.

Econ 498. Cooperative Education. Cr. R. F.S. Prereg: Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

Econ 500. Quantitative Methods in Economic Analysis I. (3-0) Cr. 4. F. Prereg: 301, 1 year of calculus, Stat 401, and permission of Director of Graduate Education. Economic applications of selected mathematical and statistical concepts: linear models and matrix algebra; decision and optimization; integral calculus and economic dynamics; probability distributions, estimation, and hypothesis testing in the analysis of economic data.

Econ 501. Microeconomics. (4-0) Cr. 4. F. Prereg: 301, credit or enrollment in 500 or equivalent background in microeconomic theory and the use of calculus, Stat 401, and permission of Director of Graduate Education. Economic applications of selected mathematical and statistical concepts: linear models and matrix algebra; decision and optimization; integral calculus and economic dynamics; probability distributions, estimation, and hypothesis testing in the analysis of economic data. This is a Master's level course.

Econ 502. Macroeconomics. (4-0) Cr. 4. F. Prereg: 301, credit or enrollment in 500 or equivalent background in macroeconomic theory and the use of calculus. Models of aggregate supply and demand, theories of consumption and investment, money supply and demand, inflation, rational expectations, stabilization policy, financial markets, and international finance. This is a Master's level course.

Econ 520. Labor Supply and Human Capital formation. (3-0) Cr. 3. F. Prereg: 501 or 501H. Labor supply decisions and empirical analysis for agricultural operators and other self-employed and wage-earning households; multiple job holding; resource allocation in productive households; human capital formation by households, firms, and public institutions, which includes schooling, on-the-job training, migration, health, research, raising of children, and implications for household income and welfare; applications to problems in rural areas of developing and developed countries.

Econ 521. Labor Markets. (3-0) Cr. 3. Prereg: 501 or 601. Analysis of labor demand and market determination of wages and employment; analysis of distortions in labor markets due to non-competitive forces, legislation, and discrimination; wage inequality, compensa-tion and work incentives, public policy issues; microeconomic analysis of unemployment and job search.

Econ 532. Business Economics. (3-0) Cr. 3. Prereg: 101 and enrollment in MBA or BIAS program; not for economics majors. Applications of microeconomic theory and decision analysis. Demand analysis, production and cost analysis, forecasting, pricing, market structures and strategy, capital investment analysis, decision-making under uncertainty, government and business.

Econ 533. Economic and Business Decision Tools. (Cross-listed with BusAd). (3-0) Cr. 3. Prereg: Econ 501 or 532. Team taught by faculty in the Department of Economics and the College of Business, this course focuses on applied economic and business tools for decision making. The topics include: Monte Carlo analysis with applications to option pricing and insurance mechanism design, portfolio analysis using existing standard spreadsheet software and add-ons, dynamic programming tools for inventory management and sequential decision, discrete choice modeling and statistical bootstrapping, and financial performance evaluation using commercially available software.

Econ 545. Public Economics. (3-0) Cr. 3. Prereg: 501 or 601. Optimal taxation; excess burden; partial and general equilibrium analysis of tax incidence; social insurance; effects of taxation on labor supply and savings; economics of the health sector.

Econ 553. Applied Research in Monetary and Macroeconomics. (3-0) Cr. 3. Prereg: 502, 571. Application of economic theory and analysis of contemporary issues in macroeconomics, monetary economics, and financial economics. This is a Master's level course.

Econ 560. Agricultural, Food, and Trade Policy. (Dual-listed with 460). (3-0) Cr. 3. S. Prereg: 301 or 501. Description and analysis of economic problems of U.S. agriculture. Explanation and economic analysis of government policies and programs to develop agriculture, conserve agricultural resources, address consumer food concerns, stabilize farm prices, and raise farm incomes. The influence of macropolicy, world economy, and international trade on U.S. agriculture. Nonmajor graduate credit.
Econ 563. Issues in Government Policy Affecting Agriculture. (2-4) Cr. 1. Prereq. 101. Off campus. Offered as demand warrants. Government policy and the policy-making process as it affects food, agriculture, and trade. Description and analysis of government policies and programs designed to address production agriculture problems and consumer food concerns. Evaluation of the interaction of agriculture and world trade as affected by U.S. and foreign government policies. Designed for master of agriculture program only.

Econ 571. Intermediate Econometrics. (3-0) Cr. 3. S. Prereq. 500. Single and multiple regression models; dummy explanatory variables; serial correlation; heteroskedasticity; distributed lags; qualitative dependent variables; simultaneity. Use of econometric models for tests of economic theories and forecasting.

Econ 576. Spatial Economics. (3-0) Cr. 3. Prereq. 501. Analysis of location choice by firms, employees, and households emphasizing the role of spatial variations in agglomeration economies, economies of scale, distance, transport, endowments, amenities, and local government. Models of land use, urban form, spatial competition, central place theory, and migration. Techniques of discrete choice analysis, statistical analysis of categorical data, urban system modeling, and interregional computable general equilibrium.

Econ 590. Special Topics. Cr. arr. Repeatable. Satisfactory-fail only.

Econ 599. Creative Component. Cr. arr. Satisfactory-fail only.

Courses for graduate students

Econ 600. Quantitative Methods in Economic Analysis II. (4-1) Cr. 4. F. Prereq. 500 and linear algebra. Unconstrained and equality- and inequality-constrained optimization; the Kuhn-Tucker formulation; constrained optimization; Lagrange multipliers; duality; the strong duality theorem; convexity; saddle points; the Karush-Kuhn-Tucker theory; complementarity; and property rights. Legal and social constraints. Policy approaches.

Econ 602. Macroeconomic Analysis. (4-1) Cr. 4. S. Prereq. 301, previous or concurrent enrollment in 600 and permission of Director of Graduate Education. Economic theory and methodology; theory of consumer behavior, theory of the competitive firm, supply and factor demand; duality relations in consumer and producer theory, welfare change measures; partial equilibrium analysis, perfect competition, monopoly; choice under uncertainty, the expected utility model, risk aversion, insurance, portfolio and production decisions under risk.

Econ 604. Advanced Macroeconomic Analysis. (4-1) Cr. 4. F. Prereq. 601, 602 and permission of Director of Graduate Education. Topics will be selected from: new Keynesian approaches to business cycle theory; endogenously generated business cycles; models of credit and financial intermediation; mechanism design and time inconsistency issues; political economy models; heterogeneous-agent models with strategic interaction; path dependence, network effects, and lock-in; economies as evolving self-organizing systems.

Econ 605. Advanced Topics in Microeconomics. (3-0) Cr. 3. Prereq. 603. Selected topics in microeconomic theory of current significance to the profession.

Econ 606. Advanced Topics in Macroeconomics. (3-0) Cr. 3. Prereq. 603, and credit or current enrollment in 604. Selected topics in macroeconomic theory of current significance to the profession.

Econ 615. Theoretical Industrial Organization. (3-0) Cr. 3. Prereq. 603. Theoretical analysis of traditional topics in industrial organization. Review of game theory. Monopoly and oligopoly theory, price discrimination, product differentiation, research and development, cognitive and network externalities, and asymmetric information.

Econ 618. Game Theory. (3-0) Cr. 3. Prereq. 603, or 501 and permission of instructor. Theoretical analysis and applications of strategic games, extensive form games, and cooperative games. Nash equilibrium, correlated and Bayesian equilibria, Bayesian games, subgame perfect equilibrium, the core, evolutionary equilibrium, repeated games with finite automata, and common knowledge.

Econ 654. Advanced Topics in Financial Economics. (3-0) Cr. 3. Repeatable. Prereq. 603. Selected topics in financial economics of current significance to the profession.

Econ 655. International Trade. (3-0) Cr. 3. Prereq. 603. Theories of international trade; welfare and distributional aspects of trade and commercial policies. Optimal trade policies in the presence of domestic distortions; strategic trade policy; international trade and economic growth.

Econ 657. International Finance. (3-0) Cr. 3. Prereq. 602. The intertemporal approach to current account determination; non-traded goods and the real exchange rate; fiscal policy in the open economy; monetary approach to balance of payments and exchange rate determination; sticky price models of the open economy; exchange-rate based stabilizations; capital inflows; financial and balance of payments crises; international business cycles.

Econ 671. Econometrics I. (4-1) Cr. 4. F. Prereq. 501 and Stat 447 or 542. Probability and distribution theory for univariate and multivariate normal random variables, introduction to the theory of estimators for linear models, hypothesis testing and inference, introduction to the construction of estimators; derivation of common estimators and their properties for the classical and general multiple regression models; hypothesis testing, forecasting, implications of specification errors - missing data, left-out regressors, measurement error, stochastic regressions.

Econ 672. Econometrics II. (4-1) Cr. 4. S. Prereq. 671. Identification, estimation, and evaluation of systems of simultaneous equations; qualitative choice and limited dependent variable models; introduction to time series methods and applications, including alternative variance specifications.

Econ 673. Microeconometrics. (3-0) Cr. 3. Prereq. 672. Econometric treatment of models arising in microeconometric applications. Topics are primarily concerned with the analysis of cross-section data. Topics may include: systems of demand equations in panel data settings, random utility models of discrete choices, production possibilities frontier estimation, and discrete/continuous models of participation and consumption.

Econ 674. Macroecometrics. (3-0) Cr. 3. Prereq. 672, 602. Time-series econometric techniques and their application to macroeconomics. Topics may include ARCH and GARCH models, unit-root tests, nonlinear adjustment models, structural VARs, and cointegration tests.

Econ 675. Advanced Topics in Econometrics. (3-0) Cr. 3. Repeatable. Prereq. 672 or Stat 543. Advanced treatment of issues important in econometrics. Topics chosen from asymptotic theory, nonlinear estimation, Bayesian and robust econometrics, econometric time series, limited dependent variables and censored regression models, nonparametric and semiparametric methods, bootstrapping and Monte Carlo techniques.

Econ 680. Advanced Resource Economics. (3-0) Cr. 3. Prereq. 603. Dynamic allocation of scarce, exhaustible, and renewable resources, including minerals and energy, soil, water, forests, and fish. Social versus private decisions. Market and nonmarket considerations. Technological change. Regulation. Dynamics and uncertainty.

Econ 690. Advanced Topics. Cr. arr. Repeatable. Satisfactory-fail only.

Econ 691. Third-Year Paper. Cr. 3. Under the direction of the major professor, Ph.D. students write a formal research paper and present it to the dissertation research process. Satisfactory-fail only.

Econ 693. Workshops. Cr. arr. Repeatable. Prereq. 6 graduate credits in chosen field. Satisfactory-fail only.

**Educational Leadership and Policy Studies**

(wwwelps.hs.iastate.edu/elps/homepage.htm)

Laura Rendon, Chair of Department

Distinguished Professor: Schuh

Distinguished Professor (Emeritus): Warren

University Professors: Ebbers, Licklider, Robinson

University Professors (Emeritus): Manatt

Professors: Evans, Hagedorn, Rendon, Smith

Professors (Emeritus): Blake, Boyles, Bryan, Engell, Hopper, Huba, Jones, Kizer, Lagomarcino, Lawrence, Mccandless, Moore, Pellegren, Vanast

Professors (Collaborators): Barak, Gardner, Pierce

Associate Professors: Hannick, Laanan, Mcleod, Porter

Associate Professor (Emeritus): Thienlen

Associate Professor (Adjunct): Tesfagiorgis

Assistant Professors: Gildersleeve, Marshall, Osei-Kofi, Patton, Starobin

Assistant Professors (Adjunct): Arthur, Gruenwald, Hill, Jackson, Payne

Senior Clinician: Scharrf

Lecturers: Bradley, Cooper, Coppenroll, Drake, Duree, Englin, Forsythe, Ganseme-Topf, Holcomb, Kimpton, Saunders, Shahjahan, Steven

Clinician: Book, Ratigan, Westerman-Beatty

**Departmental Mission, Vision and Goals**

**Mission:**
The mission of the Department of Educational Leadership and Policy Studies is to advance the quality and effectiveness of educational institutions and individuals engaged in education. The department is guided by the missions of Iowa State University and the College of Human Sciences and embodies the concepts of the land-grant tradition of teaching, research, and service. The department is dedicated to enhancing the intellectual, cultural, social, and ethical potential of students and faculty for the benefit of Iowa, the nation, and the world. Specifically, the Department of Educational Leadership and Policy Studies:

- Provides graduate degree and career preparation programs, coursework, and other learning opportunities for students and practitioners.
- Conducts and disseminates basic and applied research for the advancement of educational theory and practice.
- Provides professional service for institutions, individuals, and organizations at all levels of education.

**Vision:**

**Research**
All Educational Leadership and Policy Studies faculty create and disseminate knowledge and promote educational inquiry that enhances educational practices at local, state, national, and international levels.

**Teaching**
All Educational Leadership and Policy Studies faculty engage in teaching that is consonant with the principles of adult learning and effective teaching that help students develop critical thinking and professionally relevant skills, and that provides a foundation for the application of knowledge to practice.

**Service**
All Educational Leadership and Policy Studies faculty, using their professional expertise, work with educators, educational institutions, and other constituent groups to solve problems.

**Advising**
All Educational Leadership and Policy Studies faculty foster students’ professional and personal growth by guiding and inspiring them to formulate and complete relevant programs of study and to conduct high quality research.

**Curricula/Program**
The Educational Leadership and Policy Studies faculty develop and implement curricular programs to ensure that students learn to think critically and perform their professional roles in an exemplary fashion.

**General Goals:**
The general goals of the department, and hence of each of its program areas and affiliated programs, are to:

- Conduct high quality graduate education programs, both on- and off-campus, for students seeking graduate degrees in a major in education and/or seeking professional licensure as school service personnel.
- Establish appropriate conditions, opportunities, and resources with which both faculty and graduate students may engage in scholarly activities.
- Assist the educational enterprise of Iowa in development by utilizing, when appropriate, the talents and expertise of the faculty and graduate student body in such activities as workshops, conferences, and consultation in small groups, both on- and off-campus.

**Graduate Study**

**Degrees**
The Department of Educational Leadership and Policy Studies – ELPS – offers work for the degrees master of science, master of education, certificate of advanced study, and doctor of philosophy with a major in education. ELPS also offers minor work to students majoring in other fields of study. At the master’s level, students may specialize in educational administration; higher education; and research and evaluation. Interested students should consult the specific program area for master’s degree information related to that program.

Students may complete the Ph.D. with a major in education and a specialization in educational leadership with emphasis in either educational administration or higher education. Specific information about the requirements of the Ph.D. degree is available from the departmental office or on the web (wwwelps.hs.iastate.edu/elps/elpsdoc.htm).

The following information refers only to the Ph.D. program:

**Prerequisites**
Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

**Outcomes**
Graduates of the Ph.D. program, regardless of the emphasis chosen, possess skills and knowledge related to five core domains: leadership, educational research, communication, educational evaluation, and educational foundations. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

- Work effectively with individuals and groups.
- Engage in ethical decision-making and management of resources to accomplish goals.
- Engage in scholarly inquiry.
- Express ideas clearly, both orally and in writing.
- Articulate their values, beliefs, and Philosophy of life.
- Relate sensitively to individuals from diverse backgrounds.
- Use the principles of program evaluation and assessment intelligently.
- Have a clear understanding of the foundations of education, grounding their work in theory and Philosophy.
- Articulate the concepts, theories, and practices related to the educational content area emphasized in their studies.

**Other Related Programs**
Other graduate programs related to education (including Interdisciplinary Graduate Studies) may be more suited to the interests of potential students on the basis of previous education and experiences as well as future plans and needs. Potential students should refer to programs in the Departments of Agricultural Education and Studies, Curriculum and Instruction, Family and Consumer Sciences Education and Studies, Kinesiology, and Interdisciplinary Graduate Studies, or to graduate level course offerings within the other departments, to determine if these offerings may be more closely matched with their career interests.

The following information refers only to the masters level programs:

**Prerequisites**
Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

**Educational Administration (EdAdm)**
Scott McLeod, Program Coordinator

**Degrees and Certificates**
Several programs are offered: (1) master of science degree, with thesis or creative component, in elementary or secondary school administration; (2) master of education practitioner; (3) advanced study leading to principal's license; (4) certificate of advanced studies providing post-master’s training for superintendent licensure; and (5) doctor of philosophy with major in education and specialization in educational leadership. Courses are scheduled with consideration for cohort-collegial teams or groups.

**Emphasis**
The Educational Administration Program places dual emphasis on preparation of professional educational administrators and on the academic/scholarly aspects of educational leadership and management.

**Prerequisites**
Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.
Learning Opportunities Students will complete courses, laboratory experiences, field experiences, and independent research so that they can effectively serve in leadership roles.

Careers Graduates of Master’s Degree and Certificate of Advanced Study Programs in Educational Administration are prepared for leadership roles in Pre-K-12 school districts and education agencies, typically as building-level principals, assistant principals, curriculum, guidance, and central office administrators. Doctoral graduates are prepared for PreK-12 leadership roles and academic or leadership positions in higher education.

Outcomes Graduates of the Certificate of Advanced Study Programs will possess administrative and leadership skills necessary for the superintendency and central office administration. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

• Serve as visionary leaders, with effective skills in curricular and instructional leadership.
• Work effectively with individuals and groups, both within the district and community, to create and sustain a positive learning culture.
• Engage in ethical decision-making and effective management of human, material, and financial resources to accomplish district goals.
• Express ideas clearly to various publics, both orally and in writing.
• Articulate their values, beliefs, and Philosophies of education.
• Relate sensitively to individuals from diverse backgrounds.
• Access and utilize research information and technology to assist with organizational improvement.
• Translate educational administration concepts and theories into sound management and leadership practices.

Graduates of the Master’s Program with a specialization in educational administration and the Principal Licensure Program possess administrative and leadership skills necessary for PreK-12 building-level leadership roles. Upon program completion, each student will possess the knowledge and skills to:

• Work effectively with all members of the school community to create a shared vision of learning, which builds upon the formation of a shared understanding of the purposes of schooling in a pluralistic Society.
• Demonstrate effective skills in collaborative instructional leadership, including an understanding of curriculum standards, principles of effective teaching practices, and assessment practices that lead to improved student learning.
• Implement a system of shared governance and empower faculty, staff, students, and families in the school improvement process.
• Create and sustain a safe and caring school culture that values diversity and maintains a commitment to equity in school practices.
• Engage in ethical and moral leadership practices and the effective management of human, material, and financial resources to accomplish school goals.
• Work collaboratively with internal and external stakeholders in responding to school needs and providing community resources to support the learning process.
• Access research and use data to inform teaching and learning practices and support the process of continuous improvement.
• Apply various technologies to support and enhance administrative and instructional purposes.
• Use leadership skills to transform the school into a learning community that promotes change and sustains school improvement initiatives.
• Engage all members of the school community in critical inquiry and reflection, to promote the belief that learning is a lifelong endeavor for every individual.

Graduates of the Ph.D. Program with a specialization in educational administration will possess skills and knowledge related to the six core domains: leadership, educational research, communication, educational evaluation, educational foundations, and educational technology. By the time of graduation, students will demonstrate the necessary skills and knowledge for those outcomes as listed under the ELPS Ph.D. program outcomes.

Courses primarily for graduate students, open to qualified undergraduates students

EdAdm 541. Principles of Educational Leadership. (3-0) Cr. 3. F.S.SS. Prereq: Teacher licensure and permission of instructor. Basic principles of educational organizations, including an understanding of organizational behavior and theoretical approaches to administration. Exploration of substantive elements related to school reform, such as leadership, the change process, current issues in education, and developing a shared vision and mission.

EdAdm 551. Supervision for Learning Environments. (3-0) Cr. 3. F.S.SS. Prereq: 541 Study of effective classroom instructional practices that reflect current principles of learning. Understanding and practice of supervisory techniques that support teachers in improving teaching and learning. Activities that facilitate the development of a school culture that embraces change and school reforms that result in high quality schools dedicated to improved student achievement.

EdAdm 554. Leading School Reform. (3-0) Cr. 3. F.S.SS. Prereq: 541 Study of principles of transformational leadership and collaborative decision-making skills. Leadership activities that facilitate the development of a school culture that embraces change and school reforms.

EdAdm 556. School Systems as Learning Cultures. (3-0) Cr. 3. F.S.SS. Prereq: 541 Practical and theoretical perspectives on school administrative problems from critical pedagogical studies and research. Exploration of related issues such as cultural literacy, forms of authority and control, and other historical problems of schools in dealing with minorities and culturally different persons.

EdAdm 557. Human Resource Development for Learning. (3-0) Cr. 3. F.S.SS. Prereq: 541 Leadership theory and practice that focuses on the professional development of school staff to promote improved student learning. Principles of school personnel evaluation; legal issues related to hiring, retention, and dismissal; evaluation models for professional and classified staff; and effective professional development models to support lifelong learning and reflective practice.

EdAdm 558. Diverse Learning Needs. (3-0) Cr. 3. F.S.SS. Prereq: 541. Learner needs will be examined from major psycho/social perspectives with stress upon developmental phases of normal growth along with common problems encountered in schools. Issues of racism, gender bias, and Socio-economic problems that influence learner responsiveness to school curricula and administrative regulations, routines, and legal requirements.

EdAdm 559. Curriculum Leadership. (3-0) Cr. 3. F.S.SS. Prereq: 541. Generic administrative approaches to the design and delivery of elementary and secondary school curricula including the study of the organizations for learning; cognition and learning theories; validation; conceptual balance; school goals; student assessments and reporting of progress; alignment, and professional development; development of curriculum guides; mapping; employing national standards and benchmarks.

EdAdm 575. Education Law and Ethics. (3-0) Cr. 3. F.S.SS. Prereq: 541 Examinations of constitutional, statutory, and judicial provisions as a basis for the legal operation of educational institutions. Rights and ethical responsibilities of school leaders are examined in relation to their roles and responsibilities with boards, other school personnel, and students.

EdAdm 591. Supervised Field Experience. Cr. arr. Repeatable. Prereq: 541 and admission to program and instructor’s approval. Supervised on-the-job field experience in special areas.

A. Elementary Principal
B. Secondary Principal

EdAdm 593. Workshops. Cr. arr. Prereq: 9 credits in educational administration.

EdAdm 599. Creative Component Development. Cr. arr. Prereq: 9 credits in educational administration.

Courses for graduate students

EdAdm 601. Planning Systems, Operations and School Environments. (3-0) Cr. 3. F.S.SS. Prereq: 541 Planning and management theories, assumptions, strategies, and tactics within belief systems; development of vision and mission positions; strategic goals; objectives and operational tactics to attain them, with emphasis on facility renovation and school construction projects.

EdAdm 602. Human Resource Development and Negotiations. (3-0) Cr. 3. S.SS. Prereq: 541. Development and practice of collective negotiations within human resource development concepts and strategies, with emphasis on creating and implementing “win-win” approaches that enhance system productivity and performance. Specific contract language and concepts which enhance system effectiveness will be highlighted.

EdAdm 603. Personnel Evaluation and System Assessment Practices. (3-0) Cr. 3. F.S.SS. Prereq: 541. Theory, strategies, and systems for supervising programs and personnel in school districts and independent schools. Focuses on the principal, cabinet level administrator, e.g., director, headmaster, or assistant superintendent for instruction.

EdAdm 604. Theories of Leadership. (3-0) Cr. 3. F.S.SS. Prereq: 541. Specific leadership theories and models will be studied with an emphasis on: organization building and constructivist strategies for teachers; developing and assessing internal and external support groups for schools; and organizational capacity building.

EdAdm 605. Current Practices of the Superintendent. (0-0) Cr. 3. S.SS. Prereq: 541. The historical development of the American Superintendency in public education, problems and pitfalls, and politics and tensions separating executive actions from board policy formulation; executive challenges among contemporary educational problems of resource acquisition and allocation; collaborative relationships; union/system issues; system changes and capacity building models.

EdAdm 606. The Administration of Technology Systems. (3-0) Cr. 3. F.S.SS. Prereq: 541. The design, acquisition and operations of technology in educational administration; accounting; personnel record keeping and health system interfaces; compensation practices, staff development, and instruction record keeping, maintenance and groups.
Higher Education (Hg Ed)

Frankie Laanan, Program Coordinators

Degrees
Higher Education offers work for the master of science degree with thesis and master of education degree (non-thesis) and a specialization in higher education, as well as postgraduate professional development. A community college leadership certificate program and a community college teaching and learning certificate program are also offered.

The Master's Program in Higher Education

Emphasis
The Higher Education program provides graduate instruction and leadership development in community college education, student affairs practice, institutional research, post-secondary curriculum, and higher education administration.

Prerequisites
Prerequisite to major graduate work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Learning Opportunities
Master's students in Higher Education will complete courses, practical experiences, and independent research or a culminating experience that will enable them to serve as leaders in various educational settings.

Careers
Master's students in Higher Education are prepared for entry level positions in student affairs administration, general institutional administration, teaching positions in community colleges, and support positions in post-secondary settings.

Outcomes
Graduates of the Master's Program in Higher Education with a specialization in student affairs will demonstrate leadership in student affairs settings. By the time of graduation, students will possess the necessary skills and knowledge to:

- Demonstrate effective oral communication.
- Effectively communicate in writing.
- Work effectively with a diverse student population.
- Employ interventions designed to facilitate the development and learning of college students.
- Create, design, and implement programs and interventions.
- Effectively advise students individually and in groups.
- Organize and administrate student services in post-secondary settings.
- Conduct basic assessment, evaluation, and research.

Graduates of the Master's Program in Higher Education with a specialization in community college education and learning will possess teaching and learning leadership skills. By the time of graduation, students will possess the necessary skills and knowledge to:

- Facilitate college student learning.
- Employ pedagogical techniques.
- Demonstrate a clear understanding of the foundations of education, grounding their work in theory and philosophy.
- Use technology effectively in learning and organizational processes.
- Articulate the concepts, theories and practices related to the content of higher education as emphasized in their course work.
- Develop curriculum.
- Assess student learning.
- Understand the Philosophy, organization, functions, and current issues of community colleges.

Graduates of the Master's Program in Higher Education with a specialization in community college administration will demonstrate leadership in community college settings. By the time of graduation, students will possess the necessary skills and knowledge to:

- Create positive environments for community college students.
- Perform administrative functions in community college settings.
- Assist community college students with the academic and personal issues they face.
- Develop effective teaching and learning strategies.
- Work effectively with diverse student populations.
- Shape community college curricula.

The Ph.D. Program in Higher Education

Emphasis
The Ph.D. in education with a specialization in educational leadership includes an emphasis on higher education. This program is designed to prepare leaders for post-secondary settings and is concerned with advanced study and independent research on various topics related to post-secondary settings. See departmental overview of the Ph.D. degree in educational leadership.

Prerequisites
Prerequisite to doctoral work in educational leadership is completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence. In addition, students are expected to have completed a master's degree and 3-5 years of professional work experience in higher education.

Learning Opportunities
Doctoral students will complete courses, laboratory experiences, field experiences, independent research, a capstone experience, and a dissertation so that they can serve as leaders in various post-secondary educational settings such as colleges and universities, private and state educational agencies, and other organizations concerned with post-secondary education.

Careers
Typical careers available to graduates include leadership positions in post-secondary institutions, agencies, and other organizations concerned with post-secondary education. Special experiences are available to those who are interested in a career as a faculty member in post-secondary settings.

Outcomes
Graduates of the doctoral program with an emphasis in higher education will possess knowledge and skills related to five core domains: leadership, educational research, communication, educational evaluation, and educational foundations. By the time of graduation, students will demonstrate the necessary skills and knowledge for these outcomes as listed under ELPS Ph.D. program outcomes.

Courses open to community college faculty members only

Hg Ed 420. Introduction to Vocational Technical Teaching at Community Colleges. (3-0) Cr. 3. F.
Examine the competencies for successful teaching in vocational technical programs; a focus on lesson planning, motivating students, teaching methods, time management, and evaluation.

Hg Ed 421. Vocational Technical Teaching Methods at Community Colleges. (3-0) Cr. 3. S. Prereq: 420.
Develops competencies necessary to identify, develop, implement, and evaluate collaborative learning, learning to learn, and other classroom and lab/clinical teaching techniques.

Hg Ed 422. Vocational Technical Curriculum at Community Colleges. (Dual-listed with 522). (3-0) Cr. 3. F. Prereq: 421. With a focus on alignment and
accountability develops competencies necessary to identify, develop, implement, and evaluate outcome-based vocational technical courses and programs in community colleges.

Hg Ed 423. Vocational Technical Assessment at Community Colleges. (Dual-listed with 523). (3-0) Cr. 3. S. Prereq: 422. With a focus on classroom assessment develops competencies necessary to identify, develop, implement, and evaluate outcome-based vocational technical courses and programs in community colleges.

Hg Ed 522. Vocational Technical Curriculum at Community Colleges. (Dual-listed with 422). (3-0) Cr. 3. S. Prereq: Hg Ed 550. With a focus on alignment and accountability develops competencies necessary to identify, develop, implement, and evaluate outcome-based vocational technical courses and programs in community colleges.

Hg Ed 523. Vocational Technical Assessment at Community College. (Dual-listed with 423). (3-0) Cr. 3. S. Prereq: 522. With a focus on classroom assessment develops competencies necessary to identify, develop, implement, and evaluate teaching and learning success.

Hg Ed 540. Foundations of Leadership: Learning, Ethics, Self and Interaction. (2-0) Cr. 2. F. Prereq: permission of instructor. Serving as an introduction to developing practicing leaders, this course will create the foundation upon which enduring understanding of leadership will be built. Sequentially explored will be learning as the foundation of human enterprise, everyday leadership, determination of common good, roots of individual actions, sensitivity to others, merits of divergent ideas, questioning the Status quo, ethics as personal responsibility and choosing to grow.

Hg Ed 541. Leadership, Ethics, and Community. (2-0) Cr. 2. S. Prereq: permission of instructor. Serving as the second semester in a program to develop practicing leaders, this course will build upon the foundations developed in the first semester to help students embrace the enduring understandings of leadership. Specifically explored will be team learning and the effect on individuals, skills required for a team to move forward, importance of decisions based on the good of the community, and the role of leadership as a means of enhancing learning, and interconnectedness of the individual, the community, and the world.

Hg Ed 542. Learning, Leadership, Ethics, and Teams; Knowing, Doing and Being. (2-0) Cr. 2. F. Prereq: permission of instructor. The overall purpose of this course is to expand the foundation started in Foundations of Leadership: Learning, Ethics, Self and Interactions Learning, Leadership, Ethics and Community for developing practicing leadership. The focus will shift from a naive understanding of the concepts of self within a team and community to a more sophisticated understanding of knowing, being and doing leadership.

Hg Ed 543. Leadership, Leadership, Ethics and Teams in Action. (2-0) Cr. 2. S. Prereq: permission of instructor. The purpose of this last (in a series of four) course is to allow students to put their knowledge, skills, and abilities related to leadership, learning, Ethics and Teams into practice. In addition to planning and implementing a major service learning project, the focus will be on the next wave of the study of leadership - connecting leadership to the research about the brain and human learning.

Hg Ed 544. Foundations of Leadership & Learning. (3-0) Cr. 3. F. Prereq: graduate student classification. First of two-course series to help leaders develop the knowledge and skills to engage the collective capacity of a group to think, learn, and achieve important purpose. The foundation for developing deep understanding about leadership, learning, and the relationships therein. Focus on application of recent knowledge about human learning in the professional practice of leadership. Relationship leadership model and relationship to other leadership models, theories, and concepts; current theories of human learning (including expertise/transfer of learning), and interrelationships with leadership practice; critical understanding of self; facilitating learning for others; metacognition as a habit of mind; fundamentals of group interaction theories; social interdependence, communication, trust, and decision-making, cohesion, controversy, team development; power, resources, and development of community.

Hg Ed 545. Connecting Leadership & Learning in Practice. (3-0) Cr. 3. F. Prereq: Graduate student classification and completion of Hg Ed 544. Second of a two-course series designed to help leaders develop the knowledge and skills to best engage the collective capacity of a group to think, learn and achieve important purpose. Builds on foundation course to support students in creating applications of the relationship-learning-education-leading. Focus on developing the habits of mind and habits of practice to best use knowledge about human learning in the professional practice of leadership. Applications of relational leadership model; applications of group interaction theories; and implementation of action plans to achieve measurable goals; application of current theories of human learning as they relate to leadership; exploration of the fundamentals of emotional intelligence and the impacts on leadership; developing critical habits of mind to practice leadership focused on learning.

Hg Ed 550. Teaching, Learning and Leadership. (3-0) Cr. 3. F. Prereq: Teacher licensure. Current issues and practices in community college teaching and learning, and the roles and responsibilities of teachers as leaders.

Hg Ed 562. Curriculum Development in Colleges. (3-0) Cr. 3. Prereq: Graduate classification. Modest of curriculum design, development, and change in colleges. Development of curricular leadership and evaluation strategies.

D. Residential Life
G. Student Affairs Institute
H. Student Diversity

Hg Ed 574. Student Affairs Practice in Higher Education. (3-0) Cr. 3. F. Prereq: Graduate classification. An introduction to the field of student affairs practice with a consideration of student activities, counseling services, financial aid, admissions, student conduct, academic advising, and residential programs; includes community college programs.

Hg Ed 575. Organization and Administration of Student Affairs. (3-0) Cr. 3. S. Prereq: Admission to Higher Education Program, 534. Organization structures, role and function of student affairs staff; policies and decision-making for student affairs practice.
Courses for graduate students

Hg Ed 664. College Organization and Administration. (3-0) Cr. 3. F. Prereq: 504. Administrative organization and behavior; communications, leadership, finance, strategic planning, and institutional governance.

Hg Ed 665. Financing Higher Education. (3-0) Cr. 3. S. Prereq: 504. Lectures, discussions, and individual investigation relating to financial administration in colleges and universities. Budgeting, auxiliary enterprises, administration of financial planning, fund raising, examination of theories on expenditures. Designed for persons aspiring to serve as college administrators.

Hg Ed 666. Academic Issues and Cultures. (3-0) Cr. 3. S. Prereq: 504. Examination of institutional culture and issues in higher education focusing on the roles and responsibilities of faculty and academic administrators.

Hg Ed 676. Student Development Theory II. (3-0) Cr. 3. S. Prereq: 676. Life span approaches to student development, social identity development, and spiritual development with emphasis on application of these theories in student affairs practice.

Organizational Learning and Human Resource Development (OLHRD)

Courses primarily for graduate students, open to qualified undergraduate students

OLHRD 541. Adult Learning. (3-0) Cr. 3. Examines how adults acquire and use knowledge, skills, and attitudes within organizational settings; individual differences in learning as well as the principles and elements of the learning organization.

OLHRD 544. Performance Improvement and Change Through Learning Interventions. (3-0) Cr. 3. Prereq: OLHRD 541, 542. Examines the characteristics and elements of the performance improvement and change processes, with special attention to the roles and responsibilities of employees, managers, and organizations when improving individual and organizational learning.

OLHRD 545. Learning Acquisition, Transfer, and Evaluation. (3-0) Cr. 3. Prereq: OLHRD 541, 542, 544. Critical examination of learning acquisition, transfer, and evaluation barriers, partnerships, strategies, and activities; and the roles and responsibilities of human resource development professionals, managers, employees, and organizations in the application and evaluation of learning on the job.

Research and Evaluation (ResEv)

John Schuh and Linda Serra Hagedorn, Program Co-Coordinators

Degree Research and Evaluation offers work for the Master of Science degree with a specialization in research and evaluation. Emphasis Research and Evaluation students receive a broad foundation in the areas of quantitative and qualitative research methodology, data analysis, assessment, and evaluation. Students select one area for in-depth study.

Prerequisites

Prerequisites to major graduate work in educational leadership are completion of an undergraduate degree with coursework appropriate to the planned specialization, and evidence that the student ranks above average in scholastic achievement and promise of professional competence.

Learning Opportunities

Students in Research and Evaluation will complete courses, laboratory experiences, field experiences, independent research and a thesis.

Careers

Graduates are prepared for professional roles in institutional research, assessment of student learning, and program evaluation in post-secondary settings, school districts, and not-for-profit organizations.

Outcomes

Graduates of the master's program with a specialization in research and evaluation will be prepared for leadership roles for careers in assessment and evaluation. By the time of graduation, students will demonstrate the necessary skills and knowledge to:

- Articulate current issues and principles in research, program evaluation, and assessment.
- Implement various conceptual approaches to research, program evaluation, and assessment.
- Effectively use the principles and skills of research data analysis.
- Interpret data and prepare accurate and useful reports.

Courses primarily for graduate students, open to qualified undergraduate students

ResEv 550. Introduction to Educational Research. (3-0) Cr. 3. F.S.SS. Understanding the nature of quantitative and qualitative research; reviewing the literature; developing research problems and questions; research designs; data collection and analysis issues; evaluating research studies.

ResEv 552. Basic Educational Statistics. (3-0) Cr. 3. F. Statistical concepts and procedures for analyzing educational data; descriptive Statistics, correlation, t tests, and chi square with computer applications.

ResEv 553. Intermediate Educational Statistics. (3-0) Cr. 3. S. Prereq: 552 or equivalent. A continuation of Statistical concepts and procedures for analyzing educational data; inferential techniques including simple and multiple regression, multiple ANOVA, etc., with educational computer applications.

ResEv 554. Intermediate Research Methods. (3-0) Cr. 3. S. S. Prereq: 580, 553. Intermediate quantitative and qualitative research methodology in preparation for carrying out thesis and dissertation research; problem formulation; design; data collection and analysis; interpreting and summarizing research findings.

ResEv 560. Assessing Student Learning. (3-0) Cr. 3. Prereq: 550 or basic Statistical skills. The purpose and techniques of formal and informal classroom assessment; rubrics, performance assessment, portfolios, paper and pencil tests, communicating assessment findings; emphasis on both theory and practical applications.

ResEv 570. Surveys in Educational Research. (3-0) Cr. 3. S. Prereq: ResEv 552 or equivalent. Examination of survey design and administration in educational research. Designing surveys; developing, evaluating, and asking survey questions; survey sampling; measuring survey reliability and validity; administering mail and web surveys; decreasing survey nonresponse; conducting post-collection survey data processing; conducting survey research with integrity.

ResEv 580. Qualitative Research Methodology. (3-0) Cr. 3. Prereq: 550. Qualitative research procedures in education, particularly historical, philosophical, biographical, ethnographic, and case study; use of sources, principles of qualitative research, methods of data collection and analysis, field techniques, and writing of research results.

Courses for graduate students

ResEv 680. Critical Issues in Interpretive Methodology. (3-0) Cr. 3. S. Prereq: 580. An intensive reading and discussion course focusing on contemporary methodological theory for interpretive inquiry; examines how interpretive field work is conducted, how narrative and ethnographic data are theorized and analyzed, and how interpretive texts are written.

ResEv 690. Advanced Special Topics. Cr. arr. Repeatable. Prereq: Graduate standing. Guided reading and/or study on special topics of an advanced nature.

Electrical Engineering

ece.ece.iastate.edu

(Administered by the Department of Electrical and Computer Engineering)

Arun Somani, Chair of Department

Distinguished Professors: Somani, Soukoulis

Distinguished Professors (Emeritus): Brown, Fouad, Lord, Nilsson, Palm

University Professor: Jacobson

University Professor (Emeritus): Jones

Professors: Aijarapu, Arul, J. Bowler, Dalal, Geiger, Kamal, Kothari, Kumar, Kushner, Liu, Lueckoe, McCauley, Oliver, Rover, Shinar, Wang

Associate Professors: Anderson, Basart, Brearley, Brockman, Comstock, Fanslow, Hale, Horton, Hsieh, Koppin, Melia, Porter, Red, Sheble, Smay, Stewart, Swift, Townsend, Venkata

Professor (Adjunct): Shinar

Professor (Emeritus Adjunct): Hillesland

Professors (Collaborators): Jiles, Lee

Associate Professors: N. Bowler, Chang, Chen, Chu, Davidson, Davis, Dickerson, Dogandzic, Elia, Govindarasu, Guan, S. Kim, Song, Tirthapura, Tuttle, Tyagi, Z. Wang

Associate Professors (Emeritus): Bond, Carlson, Coady, Mericle, Pavlat, Scott, Stephenson

Associate Professors (Adjunct): Biswas, Sosonkin

Associate Professors (Collaborators): Ashlock, Salapaka

Assistant Professors: Aliprants, Bigelow, Chaudhary, Chung, Daniels, Dong, Fayed, Hornbuckle, Jones, J. Kim, Ma, Nehart, Nguyen, Pandey, Qiao, Rama-moorthy, Stoytchev, Vaidya, Vaswani, L. Wang, Ying, Zambrano, Zhang

Assistant Professors (Adjunct): Amin, Bode

Assistant Professors (Collaborators): Balasubramanian

Senior Lecturer: Mina, Wiersema

Undergraduate Study

For the undergraduate curriculum in electrical engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

The Department of Electrical and Computer Engineering at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, to study applications of the most recent
advances in state-of-the-art technologies, and to prepare for the practice of electrical engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The electrical engineering curriculum offers a number of emphasis areas at the undergraduate level, including control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing. Students are required to choose at least one course sequence which focuses on one of these areas; therefore graduates have substantial depth in specific areas to complement the breadth obtained in the required curriculum. Students may also take elective courses in computer networking, security, computer architecture, digital systems, and software.

The objective of the electrical engineering program at ISU is that its graduates should demonstrate expertise, engagement, leadership, and teamwork within five years after graduation.

**Expertise:** Graduates should establish peer-recognized expertise together with the ability to articulate that expertise and use it for problem solving in at least one of the following domains of communications and signal processing, controls, electromagnetics, power and energy, electronic devices, semiconductor materials, and analog and digital circuits.

**Engagement:** Graduates should be engaged in the engineering profession, locally and globally, contributing through the ethical, competent, and creative practice of engineering in industry, academia, or the public sector, or graduates may use the program as a foundation for interdisciplinary careers in business, law, medicine, or public service.

**Learning:** Graduates should demonstrate sustained learning through graduate work or professional improvement opportunities and through self-study, and they should demonstrate the ability to adapt in a constantly changing field.

**Leadership:** Graduates should exhibit leadership and initiative to advance professional and organizational goals, facilitate the achievements of others, and obtain results.

**Teamwork:** Graduates should demonstrate effective teaming and commitment to working with others of diverse cultural and disciplinary backgrounds by applying engineering abilities, communication skills, and knowledge of contemporary and global issues.

As a complement to the instructional activity, the ECPE Department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. See College of Engineering, Cooperative Programs.

Students have the opportunity to participate in advanced research activities; and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the bachelor of science and master of science degrees or the bachelor of science and master of business administration degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's web site.

**Courses primarily for undergraduate students**

E E 166. Professional Programs Orientation. (Cross-listed with Cpr E). Cr. R. F.S. (1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, advising center operations, degree requirements, program of study planning, career options, and student organizations.

E E 186. Introduction to Electrical Engineering and Problem Solving II. (2-0) Cr. 1. S. Prereq: E E 185. Project based and hands on continuation of 185. Group skills needed to work effectively in teams. Individual interactive skills for small and large groups. Learning to use tools and methods for solving electrical engineering problems.

E E 201. Electric Circuits. (3-2) Cr. 4. F.S. Prereq: Credit or registration in Math 267 and Phys 222. Emphasis on Mathematical tools. Circuit elements (resistors, inductors, capacitors) and analysis methods including power and energy relationships. Network theorems. DC, sinusoidal steady-state, and transient analysis. AC power. Frequency response. Two port models. Diodes, PSPICE. Laboratory instrumentation and experimentation. Credit for only E E 201 or 442 may be used towards graduation.

E E 294. Program Discovery. (Cross-listed with Cpr E). Cr. R. F.S. (1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, advising center operations, degree requirements, program of study planning, career options, and student organizations.

E E 166 is a repeatable course and may be used more than once to satisfy the certificate requirement.

Well qualified juniors or seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the bachelor of science and master of science degrees or the bachelor of science and master of business administration degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's web site.

**E E 166. Professional Programs Orientation.**

**Graduate Study**

The department offers work for the degrees of master of science and doctor of philosophy with major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

**Graduate Study**

The department offers work for the degrees of master of science and doctor of philosophy with major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

The degree master of science with thesis is recommended for students who intend to continue toward the doctor of philosophy degree or to undertake a career in research and development. The nonthesis master of science degree requires a creative component.

The normal prerequisite to major graduate work in electrical engineering is the completion of undergraduate work substantially equivalent to that required of electrical engineering students admitted to this university. Because of the diversification in the electrical engineering graduate program, however, it is possible for a student to qualify for graduate study in certain areas of electrical engineering even though the student’s undergraduate or prior graduate training has been in a discipline other than electrical engineering. Supporting work, if required, will depend on the student’s background and area of research interest. Prospective students from a discipline other than electrical engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General Test scores for all applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores.

Students pursuing the doctor of philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdisciplinary graduate minor in complex adaptive systems. Students interested in this program should see the Complex Adaptive Systems section of the catalog for requirements.

The Department of Electrical and Computer Engineering is a participating department in the interdisciplinary master of science and doctor of philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

The Department of Electrical and Computer Engineering is a participating department in the interdisciplinary master of science in information assurance program. Students interested in studying information assurance topics may earn a degree in computer engineering or in information assurance. (See catalog section on Information Assurance.)

The Department of Electrical and Computer Engineering offers a graduate certificate in electric power systems engineering. Completion of the certificate requires at least twelve credits selected from 553, 554, 555, 556, and 653. E E 653 is a
E E 298. Cooperative Education. Cr. R. F.S.S.
Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work.

E E 303. Energy Systems and Power Electronics. (3-0) Cr. 3. F.S.
Prereq: Math 267, Phys 222. Credit or registration in Math 267 Fundamentals and applications of electric, magnetic and field materials. Electrostatics and magnetostatics, potentials, capacitance and inductance, energy, force, torque. Uniform plane electromagnetic waves, Poynting vector. Transmission lines: transient and sinusoidal steady-state conditions, reflection coefficient. Nonmajor graduate credit.

E E 311. Electromagnetic Fields and Waves. (4-0) Cr. 4. F.S.
Prereq: 201, Math 265, Phys 222, credit or registration in Math 267. Theoretical and practical treatment of electromagnetic wave phenomena.

E E 322. Probabilistic Methods for Electrical Engineering. (4-0) Cr. 3. F.S.

E E 324. Signals and Systems II. (3-3) Cr. 4. F.

E E 330. Integrated Electronics. (Cross-listed with Cpr E). (3-3) Cr. 4. F.
Prereq: 201, credit or enrollment in 230. Cpr E 281. Semiconductor technology for integrated circuits. Modeling of integrated devices including diodes, BJTs, and MOSFETs. Physical layout. Circuit simulation. Digital building blocks and digital circuit synthesis and design of analog building blocks. Laboratory exercises and design projects with CAD tools and standard cells. Credit for only one of E E 330 or 331 may be counted toward graduation. Nonmajor graduate credit.

E E 331. Electronics I. (3-3) Cr. 4. F.

E E 332. Semiconductor Materials and Devices. (Cross-listed with Mat E). (3-0) Cr. 3. S.
Prereq: Phys 222 and, only for Mat E majors, Mat E 334. Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED's. Nonmajor graduate credit.

E E 394. Program Exploration. (Cross-listed with Cpr E). Cr. R. F.S. 294 or Cpr E 294. Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Satisfaction-Fail only.

Prereq: Permission of department and Engineering Career Services. Summer professional work period. Students must register for this course before commencing work.

Prereq: Permission of department and Engineering Career Services. One semester maximum per academic year professional work period. Students must register for this course before commencing work.

E E 398. Cooperative Education. Cr. R. F.S.S.
Prereq: 298, permission of department and Engineering Career Services. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

E E 408. Interdisciplinary Problem Solving. (Cross-listed with I E, TSM). (3-0) Cr. 3. F.S.
Prereq: Junior or senior classification. Use of the Theory of Constraints as a way of approaching problem solving, win-win negotiation, project planning and effective delegation in the context of engineering/business systems. Team projects aimed at improving design outcomes. Nonmajor graduate credit.

E E 409. Interdisciplinary Systems Effectiveness. (Cross-listed with I E, TSM). (3-0) Cr. F.S.
Prereq: Junior or senior classification. Focus on functions that determine the effectiveness of an entire organization. Generic Theory of Constraints solutions to production, distribution, and service problems and the use of inter-process control in inter-process coordination. Process improvement and creative thinking. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation for predictive performance models. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS). Nonmajor graduate credit.

E E 422. Introduction to Digital Signal Processing. (3-3) Cr. 4. F.

E E 423. Communication Systems Laboratory. (3-0) Cr. 1. F.

E E 424. Microelectronics Fabrication Techniques. (Cross-listed with 532). (Cross-listed with Mat E). (2-4) Cr. 4. F.S.
Prereq: Phys 222, Math 267 E E 332 or Mat E 334 recommended. Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical vapor deposition and etching. Process integration, process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation for predictive performance models. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS). Nonmajor graduate credit.

E E 425. Analog VLSI Circuit Design. (Cross-listed with Cpr E). (3-3) Cr. 4. S.
Prereq: 324, 330, 332, and either E E 322 or Stats 330. Basic analog integrated circuit and system design including design techniques for analog signal processing, performance enhancement strategies,
operational amplifiers, references, integrated filters, and data converters. Nonmajor graduate credit.

E 439. Nanoelectronics. (3-0) Cr. 3. S. Prereq. E E 332/Mat E 332 or Mat E 331. Concepts of quantum mechanics relevant to nanoelectronic devices, including quantization, tunneling, and transport; overview of some of the latest measurement techniques for nanoelectronics, including carbon nanotubes, quantum dots, and molecular transistors; fabrication methods for building nanoelectronic devices. Nonmajor graduate credit.

E 442. Introduction to Circuits and Instruments. (3-2) Cr. 2. F. Prereq. Phys 222, Math 267. Half-semester course. Basic circuit analysis using network theorems with time domain and Laplace transform techniques for resistive, resistive-inductive, resistive-capacitive, and resistive-inductive-capacitive circuits. Transient circuit behavior. Basic operational amplifiers—amplifiers, signal processing, and common E E instrumentation and demonstration of basic principles. Credit for only 201 or 442 may be counted toward graduation; credit for 442 will not count toward graduation for E E or Cpr E majors. Nonmajor graduate credit.

E 448. Introduction to AC Circuits and Motors. (3-2) Cr. 2. F. S. Prereq. 303 or 441 or 442. Half-semester course. Magnetic circuits. Power transformers. AC steady state and three-phase circuit analysis. Basic principles of operation and control of induction and single-phase motors. Nonmajor graduate credit.

E 452. Electrical Machines and Power Electronic Drives. (3-2) Cr. 3. S. Prereq. 303 or 330 or 332; credit or registration in E E 324. Basic concepts of electromagnetic energy conversion. DC motors and three-phase induction motors. Basic introduction to power electronics. Adjustable speed drives used for control of DC, induction, and synchronous motors. Experiments with converter topologies, DC motors, AC motors and adjustable speed drives. Nonmajor graduate credit.

E 455. Introduction to Energy Distribution Systems. (3-0) Cr. 3. F. Prereq. 303, credit or registration in 324. Overhead and underground distribution system, transformers, protection, load descriptions and characteristics, overhead line and underground cable models, distribution transformers, power flow and fault analysis, overcurrent protection, power factor correction, system planning and automation, and economics in a deregulated environment. Nonmajor graduate credit.

E 456. Power System Analysis I. (3-0) Cr. 3. F. Prereq. 303, credit or registration in 324. Power transmission lines and transformers, synchronous machine modeling, network analysis, power system representation, load flow. Nonmajor graduate credit.

E 457. Power System Analysis II. (3-0) Cr. 3. S. Prereq. 303, credit or registration in 324. Power system protection, symmetrical components, faults, stability. Power system operations including the new utility environment. Nonmajor graduate credit.

E 463. Design of Electrical Systems. (1-10) Cr. 5. SS. Prereq. 322 and completion of 24 credits in the E E core professional program, Engr 314. Distance-education students only. Team project design experience. Emphasis on defining, planning, and implementing to achieve project objectives to meet a client’s need with due consideration to professional and technical considerations of engineering design and implementation. Oral and written presentations of project achievements.

E 465. Digital VLSI Design. (Cross-listed with Cpr E). (3-0) Cr. 4. S. Prereq. E E 330. Digital design of integrated circuits employing very large scale integration (VLSI). Design methodology, design considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architecture and synthesis issues on a chip (SoC) considerations. VLSI chip hardware design project. Nonmajor graduate credit.

E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Aer E, Cpr E, Engr 1, E M, E E, Mat E). (1-4) Cr. 3. Repeatable. F. S. Prereq. Student must be within two semesters of graduation and receive permission of instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and EDM. Design methodology, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

H. Honors

E 491. Senior Design Project I and Professionalization. (Cross-listed with Cpr E). (2-3) Cr. 3. F. S. Prereq. 322 or Cpr E 388, completion of 24 credits in the E E core professional program, Engr 314. Preparation for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and report, design review presentation. First of two-semester team-oriented, project design and implementation experience.

E 492. Senior Design Project II. (Cross-listed with Cpr E). (1-3) Cr. 2. S. Prereq. 491 or Cpr E 491. Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the project completed in E E 491 or Cpr E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

E 494. Portfolio Assessment. (Cross-listed with Cpr E). Cr. 1. R. Prereq. Credit or enrollment in 491. Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

E 496. Modern Optics. (Cross-listed with Phys). (3-0) Cr. 3. Prereq. Credit or enrollment in Phys 322 and 385. Review of wave and electromagnetic theory; topics selected from: reflection/refraction, interference, geometrical optics, Fourier analysis, dispersion, coherence, Fraunhofer and Fresnel diffraction, holography, quantum optics, nonlinear optics. Nonmajor graduate credit.

E 498. Cooperative Education. Cr. R. Repeatable. F.S.S. Prereq. 398; permission of department and Engineering Career Services. Third and subsequent professional work periods in the cooperative education programs. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

E 505. CMOS and BiCMOS Data Conversion Circuits. (Cross-listed with Cpr E). (3-3) Cr. 3. Alt. S., offered 2010. Prereq. 507. Theory, design and applications of data conversion circuits. (A/D and D/A converters) including: architectures, characterization, quantization effects, conversion algorithms, spectral performance, element matching, design for yield, and practical comparators, implementation issues.

E 507. VLSI Communication Circuits. (Cross-listed with Cpr E). (3-0) Cr. 3. Alt. S., offered 2011. Prereq. 330 or 501. Phased-array antennas, frequency synthesizers, clock and data recovery circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

E 514. Microwave Engineering. (Dual-listed with 414). (3-0) Cr. 4. F. Prereq. 230, 311. Principles, analysis, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators.

E E 518. Microwave Remote Sensing. (Cross-listed with Agron, Mteor). (3-0) Cr. 3. Att. S., offered 2010. Prereq: Math 285 or equivalent or permission of instructor. Microwave remote sensing of Earth’s surface and atmosphere. Overview of relevant electromagnetic theory and antenna theory. Planck emission and the radiative transfer equation. The electrical properties of natural materials at microwave frequencies. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, and soil and water vegetation content.

E E 523. Random Processes for Communications and Signal Processing. (3-0) Cr. 3. Prereq: 322, Math 317. Axioms of probability; Repeated trials; Functions of a random variable; Elementary random variables: covariance matrix, conditional distribution, joint distribution, moments, and joint moment generating function; Mean Square estimation, stochastic convergence. Stochastic processes: Random walk, Poisson, Wiener, and shot noise; Markov chains; Power spectral analysis; Selected applications.

E E 528. Digital Image Processing. (3-0) Cr. 3. S. Prereq: 322, 424. Review of sampling, linear algebra and probability. Classical image processing topics such as image sampling and quantization, image transforms (2D Fourier, KLT, DCT etc), image enhancement, restoration and filtering. Image analysis topics including edge detection, segmentation, registration and tracking (uses least squares estimation, EM, Kalman filter). Medical image reconstruction from tomographic projections (Radon transform, Fourier slice theorem and reconstruction algorithms using them) and Magnetic Resonance Imaging (MRI). Basic introduction to image and video compression methods.

E E 530. Selected Topics in Electronics, Microelectronics and Photonics. (3-0) Cr. 3. Repeatable. Prereq: 332.

E E 535. Physics of Semiconductors. (Cross-listed with Phys). (3-3) Cr. 4. Prereq: 311 and 332. Basic elements of quantum theory. Fermi, Statistics, motion of electrons in periodic structures, crystal structure, energy bands, equilibrium carrier concentration and doping, excess carrier generation, carrier transport at low and high fields, phonons, optical properties, amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density.

E E 553. Steady State Analysis. (3-0) Cr. 3. S. Prereq: 454, 456. Power system economic dispatch, unit commitment, electricity markets, automatic generation control, sparse matrix techniques, interconnected operation, voltage control.

E E 555. Advanced Energy Distribution Systems. (3-0) Cr. 3. Prereq: 455. Transient models of distribution components, automated system planning and distribution automation, surge protection, reliability, power quality, power electronics and intelligent systems applications.

E E 556. Power Electronic Systems. (3-0) Cr. 3. Prereq: 452. Converter topologies, AC/DC, DC/DC, DC/AC, AC/AC. Converter applications to do motor drives, power supplies, AC motor drives, power system utility applications (var compensators) and power quality.

E E 565. Systems Engineering and Analysis. (Cross-listed with Aer E, E I, E). (3-0) Cr. 3. Prereq: Coursework in basic Statistics. Introduction to multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test, evaluation and systems engineering planning and organization. Not available for degrees in industrial engineering.

Engineering

Most of the courses with the designator of Engr are broad-based engineering courses applicable to all engineering disciplines. Several of these courses are part of the basic program which is required for engineering students. All courses are administered by the college and with the exception of Engr 160 and Engr 170 are coordinated through Engineering Student Services in Engineering Academic and Student Affairs. Course-related questions should be directed to the department or unit with responsibility for that course. The following is a list of those responsibilities:

Engr 160 Materials Science and Engineering

Engr 170 Agricultural and Biosystems Engineering

Courses primarily for undergraduate students

Engr 104. LEAD Program Orientation. (1-0) Cr. 1. F. Seminar for LEAD Program participants. Application of problem solving, engineering design, teamwork, study, and time management techniques and skills. Engineering professional development. Satisfactory-fail only.

Engr 105. LEAD Program Seminar. (1-0) Cr. 1. Seminar for LEAD Program participants in the residential learning community. Students in this course will participate in activities related to the residential engineering learning community. Satisfactory-fail only.

Engr 131 Learning Community Seminar. (1-0) Cr. R. FS. Peer mentored review of course topics in engineering undeclared learning communities. Available to students interested in engineering if in Liberal Arts and Science (open) major. Satisfactory-fail only.

Engr 160. Engineering Problems with Computer Applications Laboratory. (2-2) Cr. 3. FS:SS. Engr 160: Satisfactory scores on Mathematics placement examinations; credit or enrollment in Math 142, 165. Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Engineering and curve-fitting, flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics.)

A. Chemistry 155 (Fall only)
B. Chemistry 165 (Spring only)
C. Chemistry 167
D. Mathematics 165
E. Mathematics 166
F. Physics 221
G. Physics 222

I. Engineering Problems-Computer Applications

Engr 320. International Experience Report. Cr. 3. FS. Satisfactory completion of international work experience of at least ten weeks or nine credit hours of approved course work taken abroad. Permission of student’s department prior to departure. Critique of work/study abroad experience as it relates to professional development. Taken the semester after completion of work abroad or study abroad. Written report and presentation. Satisfactory-fail only.

Engr 397. Professional Internship. Cr. R. FS:SS. Engr 397: Permission of adviser and engineering college classification officer. Professional or interdisciplinary work period in engineering or career-related field. Enrollment limited to one semester per academic year. Satisfactory-fail only.

Engr 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Aer, Cpr, Engr, E E, I E, M E, Mat E). (1-4) Cr. 3. Repeatable. FS. Student must be within two semesters of graduation and receive permission of instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

E. Entrepreneurship

Engineering Mechanics

(Administered by the Department of Aerospace Engineering)

Thomas Shih, Chair of Department

Distinguished Professors: Soukoulis, R. B. Thompson

Distinguished Professors (Emeritus): D. Thompson, Young

Professors: Chandra, Chimeti, Durbin, Holger, Keltar, Levitas, Lu, Oliver, Rajagopal, Rothmayr, Rudolph, Sarkar, Schmerr, Shih, Taint, Wang, Zachary

Professors (Emeritus): Akers, Greer, Inger, Iversen, Jenison, McConnell, McNell, McDaniel, Munson, Pierson, Rizzo, Rogge, Rohach, Tannelle, Tsai, Weiss, Wilson

Professors (Adjunct): Hsu, Nakagawa

Associate Professors: Bastawros, Byrd, Dayal, Hilliard, Hindman, Mitra, Sherman, Sturges

Associate Professor (Emeritus): Hermann, Saverese, Tiulin, Vogel

Associate Professors (Adjunct): Birer, Cox, Roberts

Associate Professor (Collaborator): Flatau

Assistant Professors: Chung, Holland, Hong, Hu, Jacobson

Assistant Professors (Adjunct): Byrd, Gray

Assistant Professor (Collaborator): Chavez

Senior Lecturers: Deam, Haugli, Schaefer

Lecturer: Boylan
Undergraduate Study

The undergraduate courses in mechanics are intermediate between those in physics and mathematics and the professional and design courses of the senior engineering curricula. In these courses the student is expected to acquire an understanding of the basic principles and analysis techniques pertaining to the static and dynamic behavior of rigid media, deformable solids, fluids, and gasses. Physical properties of engineering materials are studied in the classroom and tested in the laboratory. General physical laws are given mathematical expression and are made suitable for use in the solution of specific problems in machine and structural design, and in the flow and measurement of fluids.

Graduate Study

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and a minimum of 8 research credits. It has strong research emphasis and is recommended for students who anticipate entering a doctoral program later. At least 30 credits of acceptable graduate work are required for the degree.

The master of engineering degree does not require either research credits or a thesis. However, at least two credits of acceptable creative component and at least 26 credits of acceptable graduate coursework are required for the degree. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

Credits for creative component will be obtained by registering for E M 599. A written report and an oral presentation will be given to the student’s graduate committee.

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to the required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

Courses primarily for undergraduate students

E M 274. Statics and Mechanics of Engineering, (3-0) Cr. 3. F.S.SS. Prereq: Credit or enrollment in Math 166; credit or enrollment in Phys 111 or 221. Vector and scalar treatment of coplanar and noncoplanar force systems. Resultants, equilibrium, friction, centroids, second moments of areas, principal second moments of area, radius of gyration, external forces, shear and bending moment diagrams. H. Honors. F.S.

E M 327. Mechanics of Materials Laboratory, (0-2) Cr. 1. F.S.SS. Prereq: Credit or enrollment in 324. Experimental determination of mechanical properties of selected engineering materials. Experimental verification of assumptions made in 324. Use of strain measuring devices. Preparation of reports. Students who are not present for the first laboratory meeting of their own sections may qualify for continuation in the course only by attending the first laboratory meeting of some other section of the course. Nonmajor graduate credit.

E M 345. Dynamics, (3-0) Cr. 3. F.S.SS. Prereq: 274; credit or enrollment in Math 266 or 267. Particle and rigid body kinematics, Newton’s laws of motion, kinetics of plane motion, rigid body problems using work-energy, linear, and angular impulse-momentum principles, vibrations. Nonmajor graduate credit.

E M 362l. Principles of Nondestructive Testing. (Cross-listed with Mat E) (3-0) Cr. 3. S. Prereq. Phys 112 or 222. Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of tests; materials to which applicable, types of defects detectable; calibration standards, and reliability safety precautions. Nonmajor graduate credit.

E M 362l. Nondestructive Testing Laboratory. (Cross-listed with Mat E) (3-0) Cr. 3. S. Prereq. Credit or enrollment in 362. Application of nondestructive testing techniques to the detection and sizing of flaws in materials and evaluation of material's microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. Field trips to industrial laboratories. Nonmajor graduate credit.

E M 425. Introduction to the Finite Element Method. (3-0) Cr. 3. S. Prereq: 324, Math 266 or 267. Introduction of finite element analysis through applications to one-dimensional, steady-state problems such as elastic deformation, heat and fluid flow, consolidation, beam bending, and mass transport. Transient heat conduction and wave models. Canonical solutions. Constitutive models of inelastic solids and selected problems of elastoplasticity, contact mechanics, fracture mechanics and defects in crystalline solids.

E M 652. Finite Element Analysis. (Cross-listed with Aer E) (3-0) Cr. 3. S. Prereq: 425, Math 385. Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of

methods and response to periodic and random force inputs, numerical methods of solution, eigenvalues and modal analysis, energy methods, vibration isolation and suppression, string or cable dynamics, beam bending dynamics, application problems in aerospace and mechanical engineering (as relevant). Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

E M 548. Advanced Engineering Dynamics. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 345, Math 266 or 267. 3-D kinematics and dynamics of particles and rigid bodies. Coordinate systems, calculus of variations. Lagrange's equations with constraints, modified Euler's equations, torque-free motion of rigid bodies in 3-D, moment equations with constraints.

E M 550. Fundamentals of Nondestructive Evaluation. (Cross-listed with M S E). (3-2) Cr. 4. S. Prereq: 324, Math 385. Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, computed tomography, and thermoelastics are analyzed. Laboratory experiments on all basic methods: ultrasonics, eddy currents, x-ray, liquid penetrants, magnetic testing, and visual inspection are performed.

E M 564. Fracture and Fatigue. (Cross-listed with M S E, M E). (3-0) Cr. 3. F. Prereq: 324 and either Mat E 216 or 272 or 392. Undergraduates: Permission of instructor. Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests: mechanics and materials designed to avoid fracture or fatigue.

E M 570. Wind Engineering. (Cross-listed with Aer E). (3-0) Cr. 3. F. Prereq: 378, 345. Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

Undergraduate Study
The department offers a wide variety of courses for students seeking a degree in English or Technical Communication, as well as for students wishing to broaden their general education. Offerings include classes in introductory college writing, literature, film, creative writing, rhetoric and professional communication, technical communication, English education, linguistics, and teaching English as a second language/applied linguistics. The discipline of English helps to develop students’ understanding of how language functions in literature, mass media, and both personal and professional writing. Students not pursuing an English or Technical Communication major may select English courses to fulfill electives, to pursue a minor, or to complement their training in other majors.

Graduates majoring in English will possess a broad-based knowledge and understanding of the discipline. They will also understand their particular disciplinary specialization whether it be literary studies, rhetorical studies, teacher education, creative writing, or teaching English as a second language/applied linguistics. Graduates in Technical Communication will learn how to communicate scientific and technical information through coursework both in English and in scientific and technical fields. Graduates in either major will be able to write well-organized, well-reasoned essays that demonstrate their ability to read and think critically.

Introductory writing courses in the department are designed to improve the skills in communication and reading comprehension necessary for successful university work.

Through the Intensive English and Orientation Program, the department offers special courses in English for both undergraduate and graduate students who are native speakers of other languages. (See catalog entries under English Courses for Native Speakers of Other Languages and English Requirement for International Students.)

Careers for English Majors
Students who graduate with a major in English often enter fields that require special communication skills, such as publishing, public service, research, business and technical writing, or human resources. An undergraduate major in English can be a solid basis for the professional study of law, medicine, theology, or business management. Students in English Education can qualify to teach English in middle or high school. (See Index, Teacher Education.) English majors may also pursue graduate studies in a number of communication-related fields.

Careers for Technical Communication Majors
Students who graduate with a major in Technical Communication will be prepared for careers in scientific and technical writing and editing. They will typically seek positions in companies or nonprofit organizations; in communication-based units of local, state, and federal government; in the documentation units of software developers or publishers; or in such areas as web design and communication consulting. Technical Communication majors may also pursue graduate study in rhetoric and professional communication or other communication-related fields.

English Major Requirements
English majors choose one of three programs of study: Literary Studies, Rhetorical Studies, or English Education. Students interested in creative writing typically choose Literary Studies as a program of study. English majors are required to have, in addition to ISUComm foundation courses, at least 24 credits in English; those in English Education must have 48 credits in English in addition to required teaching-related courses taken in other departments. English majors transferring from other institutions must take at least 18 of their credits in English while in residence at Iowa State.

To graduate with a major in the English Department, a student must earn at least a C (not a C-) in English 150 and 250 as well as in each of the courses taken to fulfill the program of study. Earn- ing at least a C in ISUComm foundation courses and in one advanced communication course also meets the departmental Communication Proficiency requirement.

Finally, all English majors must take at least one pre-1800 literature course and one pre-1900 literature course.

Distributed Requirements
All English majors, no matter what their program of study, must take nine courses for a total of 27 credits from a list of distributed requirements:

<table>
<thead>

**Technical Communication Major Requirements**

Technical Communication majors must take 39 credits within the major as well as 12 credits in a Designated Area of Concentration (DAC) in a technical, scientific, or design field. Majors develop advanced skills in multiple aspects of technical communication and apply their knowledge of technical communication to a specific discipline.

**Designated Area of Concentration in a Technical, Scientific, or Design Field**

The DAC is a student-designed grouping of related courses in a technical, scientific, or design field that will meet the student’s professional or academic interests. All courses for the 12-credit DAC must be taken outside the English Department and approved by the Technical Communication Program Coordinator. A second major or a minor in areas such as computer science, social science, natural science, entrepreneurial studies, design studies, engineering studies, or another technical, scientific, or design field may substitute for the DAC.

**Learning Goals**

Graduates of the bachelor’s degree programs in the English Department will demonstrate knowledge of the nature, history, current practice and critical issues in their curricular fields. They will employ the terminology, skills, and techniques specific to the field. Specifically, they will demonstrate advanced skills in reading and writing, speaking and argumentation, and research and application of appropriate technology. They will demonstrate the ability to perform professionally as educators, communicators, writers and editors. They will also be able to analyze aspects of culture and society and will become critical thinkers, having an awareness of ethical and humane issues essential to professional careers and to the practice of lifelong learning. (See department’s URL for learning goals for specific programs.)

Graduates of advanced degree programs in the department will have, in addition to these...
Graduate Study

The master of arts degree programs offer various possibilities for the advanced study of writing, language, and literature. Prospective students must first secure admission to the graduate studies program through the English Department. Students can be admitted to the M.A. in English with a specialization in literature which is designed to prepare students for teaching at the secondary, two-year college, or beginning college and university levels; or for further graduate study in language and literature. Students can be admitted to the M.A. in Rhetoric, Composition, and Professional Communication designed to prepare students for technical writing, business communication, editing, and associated professional writing. Students can be admitted to one of the specializations for the M.A. in TESL/ Applied Linguistics: Computer-Assisted Language Learning (CALL); Language Assessment; English for Specific Purposes (ESPI); Literacy; and Literature in ESL. The Master of arts degree requires 30 hours of graduate credits, including a thesis or project (9 credits), professional English (literature specialization) and the M.A. in TESL/Applied Linguistics: Computer-Assisted Language Learning (CALL); Language Assessment; English for Specific Purposes (ESPI); Literacy; and Literature in ESL. The Master of Arts degree requires 30 hours of graduate credits, including a thesis or project (9 credits), professional English (literature specialization) and the M.A. in TESL/Applied Linguistics: Computer-Assisted Language Learning (CALL); Language Assessment; English for Specific Purposes (ESPI); Literacy; and Literature in ESL.

The master of fine arts program in Creative Writing and Environment is unique in its effort to cultivate in its students an interdisciplinary approach to research and writing, as well as develop a heightened environmental imagination that finds expression in quality, publishable works of fiction, nonfiction, and poetry. The program is designed to prepare students for careers as writers, teachers at the college and university level, and editors. Prospective students must first secure admission to the graduate studies program through the English Department. The master of fine arts degree requires 54 hours of graduate credit: a core of creative writing courses, a book-length thesis (6 credits), a fieldwork experiential component (3 credits), and 18 credits in disciplines other than English (such as Landscape Architecture, Anthropology, Environmental Science, among many others) relevant to an individual student’s research interests and thesis project.

The doctor of philosophy in Applied Linguistics and Technology focuses on English language teaching and assessment with particular emphasis on issues and practices related to technology use in these areas. It prepares students to hold a variety of academic appointments in departments of applied linguistics, English, and professional opportunities in research and development foundations, international publishing enterprises, and government agencies in the U.S. and around the world where English as a second language is taught and used for specific educational, vocational, and professional purposes. Prospective students must first secure admission to the graduate studies program through the English Department. Candidates are required to complete 72 hours of graduate credit and a dissertation, and to pass a portfolio assessment, a preliminary examination consisting of a dissertation proposal and pilot study and a written response to questions about the proposal or pilot study, and an oral defense of the dissertation.

The department offers graduate students an opportunity to gain professional experience through professional writing internships, selected departmental research activities, the Intensive English and Orientation Program (IEOP), the ISUComm foundation courses program, the advanced communication program, and the interpersonal and rhetorical communication program. Teaching and research assistantships are available for qualified students. Teaching assistants are responsible for teaching with faculty supervision, classes in ISUComm foundation courses, classes in public speaking, courses in English as a second language, and courses in business and technical communication. Research assistants are assigned to individual faculty members engaged in projects in writing, language, or literature. One or more Pearl Hogrefe Fellowships in Creative Writing covering stipend and tuition are awarded each year to outstanding graduate students. Grannis Scholarships are awarded to new students in the Applied Linguistics and Technology doctoral program. Several Freda Huncke Endowment Graduate Teaching Fellowships are available to first-year Rhetoric and Professional Communication doctoral students. Miller Fellowships are also available to highly qualified students.

With prior written approval from the College of Human Sciences, students may take English courses to meet part of the requirements for certification to teach English in two-year and community colleges. Selected courses may also be used to meet requirements for ESL endorsement (K-12) for teachers.

A graduate minor in the English Department at the M.A. level requires 9 credits of English at the 500 or 600 level in the respective major (English, RCPC, TESL/AL). A graduate minor in the English Department at the M.F.A. or Ph.D. level requires 12 credits at the 500 or 600 level in the respective major (CWE, ALT, RPC). A graduate certificate in Teaching English as a Second Language is a 12 credit program that includes two prerequisites, one core requirement (Engl 518), and three graduate courses chosen from a list of accepted graduate courses.

Courses primarily for undergraduate students

Engl 099. Strategies for Non-native Speakers of English. F.S. Prereq: Recommendation of English Department. placement in sections is determined by examination. L. Strategies for Listening. Available P/NP to graduate students at their department’s option. R. Strategies for Reading. Available for P/NP to graduate students at their department’s option.
Engl 101. English for Native Speakers of Other Languages. (3-0) Cr. 3. F.S. Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.) For undergraduates: Completion of English 101 requirement prepares students for English 150. For graduates: Completion of English 101 satisfies the English requirement of the Graduate College. Engl 101 courses are limited to students who are nonnative speakers of English. Credit from Engl 101 does not count toward graduation.

B. Academic English I. Available P/NP to graduate students at their department's option.
C. Academic English II—Undergraduates. Available P/NP to graduate students at their department's option.

Engl 120. Computers and Language. (Cross-listed with Ling). (3-0) Cr. 3. Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

Engl 180. Communication Skills for International Teaching Assistants. Cr. arr. Repeatable. F.S. Placement based upon SPEAK/TEACH test results. Persons whose native language is English cannot take 180 for credit. No more than one section of 180 may be taken per semester; up to two sections total. Credit for Engl 180 does not apply toward graduation. Satisfactory-fail only.
A. Speaking Skills. Cr. 3. Emphasis on pronunciation improvement and greater fluency in spoken English for teaching purposes.
B. Intermediate Spoken English. Cr. 3.
C. Advanced Spoken English. Cr. 3. For students who have completed 180A or 180B but have not reached the passing level on the SPEAK/TEACH test.
D. Presentation Skills. Cr. 3. Developing explanations, supporting a claim and using primary and secondary evidence to influence an audience. Emphasis on major principles, and processes of effective written communication typically encountered in business and the professions. Extensive practice in many areas of workplace communication, including letter, memo, email correspondence; short proposals and reports; policies and procedures; job packet including letters of application and resumes; website analysis; brochures; and individual and team presentations.

Engl 199. Introduction to the Study of English. (1-0) Cr. F.S. 8 weeks. General introduction to the discipline; discussion of the various fields in English; consideration of career opportunities. Satisfactory-fail only.

Engl 201. Introduction to Literature. (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from 150. Study of selected examples of drama, poetry, short fiction, and the novel drawn from both British and American literature. Recommended for nonmajors.

Engl 205. Popular Culture Analysis. (Cross-listed with Sp Cm). (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from 150. Analysis of how information and entertainment works and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

Engl 207. Introduction to Creative Writing. (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from 150. Course introduces students to the fundamentals of writing fiction, poetry, and creative nonfiction. Extensive readings in all three genres. Students learn creative processes through writing exercises, workshops, and conferences.

Engl 219. Introduction to Linguistics. (Cross-listed with Ling). (3-0) Cr. 3. F.S. Prereq: Sophomore classification. Introduction to linguistic concepts and principles of linguistic analysis with English as the primary source of data. Sound and writing systems, sentence structure, vocabulary, and meaning. Issues in the study of usage, regional and social dialects, language acquisition, and language change.

Engl 220. Descriptive English Grammar. (Cross-listed with Ling). (3-0) Cr. 3. F.S. Prereq: 250. Overview of grammatical structures and functions. Parts of speech; phrase, clause, and sentence structure; sentence types and sentence analysis; rhetorical grammar and sentence style; terminology. Not a remedial, English composition, or ESL course.

Engl 225. Survey of British Literature to 1800. (3-0) Cr. 3. Prereq: 250. Representative works of British literature from the origins to 1800 in historical, cultural, and literary contexts. Will include multiple genres.

Engl 226. Survey of British Literature since 1800. (3-0) Cr. 3. Prereq: 250. Representative works from 1800 to the present in historical, cultural, and literary contexts. Will include multiple genres.

Engl 227. Survey of American Literature to 1865. (3-0) Cr. 3. Prereq: 250. Representative works of American literature from its origins (including indigenous and conquest literatures) through the end of the Civil War in historical, cultural, and literary contexts. Will include multiple genres.

Engl 228. Survey of American Literature since 1865. (3-0) Cr. 3. Prereq: 250. Representative works written in the United States since the Civil War in historical, cultural, and literary contexts, with attention to the cultural and ethnic diversity of Americans. Will include multiple genres.

Engl 237. Survey of Film History. (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from 150. A survey of the history of film, both U.S. and international, from the beginnings in the late nineteenth century to the present.

Engl 240. Introduction to American Indian Literature. (Cross-listed with Am In). (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from Engl 150. Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works.

Engl 250. Written, Oral, Visual, and Electronic Composition. (3-0) Cr. 3. F.S. Prereq: 150 or exemption from 150; sophomore classification or exemption from 150; credit for or concurrent enrollment in Lib 160. Analyzing, composing, and reflecting on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on supporting a claim and using primary and secondary sources. Continued development of student portfolio.

Engl 250H. Written, Oral, Visual, and Electronic Composition, Honors. (3-0) Cr. 3. F.S. Prereq: Exemption from 150 and admission to Freshman Honors Program; credit for or concurrent enrollment in Lib 160. In-depth analysis, composition, and reflection on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on argumentation: developing claims, generating reasons, providing evidence. Individual sections organized by special topics. Development of student portfolio.

Engl 260. Introduction to Literary Study. (3-0) Cr. 3. F.S. Prereq: Credit in or exemption from 150. Basic principles of literary study. Emphasis on writing of interpretive and critical essays. Particular attention to poetry. Designed for English majors.

Engl 302. Business Communication. (3-0) Cr. 3. F.S.SS. Prereq: 250. Junior classification. Theory, principles and processes of effective written communication typically encountered in business and the professions. Extensive practice in many areas of workplace communication, including letter, memo, email correspondence; short proposals and reports; policies and procedures; job packet including letters of application and resumes; website analysis; brochures; and individual and team presentations.

Engl 303. Free-Lance Writing for Popular Magazines. (3-0) Cr. 3. S. Prereq: 250, not open to freshmen. Practical workshop in writing nonfiction articles for popular magazines. Emphasis on writing, market research, preparation of manuscripts, methods of submission. Major goal of the course is production of marketable material.

Engl 304. Creative Writing—Fiction. (Cross-listed with W S). (3-0) Cr. 3. F.S. Prereq: 250, not open to freshmen. Progresses from practice in basic techniques of fiction writing to fully developed short stories. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

Engl 305. Creative Writing—Nonfiction. (3-0) Cr. 3. F.S. Prereq: 250, not open to freshmen. Workshop in writing imaginative essays, both critical and personal. Analytical reading, development of literary techniques. Individual and small group conferences.

Engl 306. Creative Writing—Poetry. (3-0) Cr. 3. F.S. Prereq: 250, not open to freshmen. Progresses from practice in traditional to contemporary forms. Emphasis on writing, analytical reading, workshop criticism, and individual conferences.

Engl 309. Report and Proposal Writing. (3-0) Cr. 3. F.S. Prereq: 250, junior classification. Introduction to the theory and practice of preparing and analyzing reports and proposals intended for businesses, governmental agencies, and/or private and corporate foundations. Individual assignments and group projects include text documents and oral presentations.

Engl 310. Rhetorical Analysis. (3-0) Cr. 3. F.S. Prereq: 250. Fundamental principles of rhetorical criticism. Focus on selected theories for analyzing cultural texts, including essays, speeches, film, technical and scientific documents, and websites. Emphasis on identifying artifacts, formulating research questions, applying methodologies, and understanding and practicing critical analysis through discussion and in writing.

Engl 312. Biological Communication. (3-0) Cr. 3. F.S. Prereq: 250. Emphasis on effective writing and communication methods in the biological sciences, presentation of research data, methods of bibliographic citation, ethical communication, use of oral and visual presentation methods for biological information, manuscript and report preparation. For students in the biological and related life sciences.

Engl 314. Technical Communication. (3-0) Cr. 3. F.S.SS. Prereq: 250, junior classification. Theories, principles, and processes of effective written communication of technical information. Attention to major structures for analyzing and adapting to audiences in various communication situations and composing technical discourse including organizing visual and verbal information. Extensive practice in many areas of technical communication: Preparation of instructions and procedures, proposals and reports, website analysis, and design, and individual and team presentations.

H. Honors.
Engl 315. Creative Writing—Screenplays. (3-0) Cr. 3. F. Prereq: 250, not open to freshmen. Stresses master scene technique of writing fully developed screenplays. Emphasis on movie techniques, writing, workshop criticism, analytical reading and viewing, and individual conferences. Nonmajor graduate credit.

Engl 316. Creative Writing—Playwriting. (Cross-listed with Theatre). (3-0) Cr. 3. S. Prereq: Engl 250, not open to freshmen. Progresses from production of scenes to fully developed one-act plays. Emphasis on action, staging, writing, analytical reading, workshop criticism, and individual conferences. Nonmajor graduate credit.

Engl 330. Science Fiction. (3-0) Cr. 3. Prereq: 250. Study of science fiction from its origins in nineteenth-century to the present. May include study of specific types of science fiction, such as classic, cyberpunk, feminist, or apocalyptic narratives; and may include consideration of science fiction film and/or theory.

Engl 339. Literary Theory and Criticism. (3-0) Cr. F. S. Prereq: 250 and 3 and 3 additional credits in literature. Study of selected texts of literary criticism, with attention to the purposes and practices of criticism.

Engl 344. U.S. Latino/a Literature. (3-0) Cr. 3. S. Prereq: 250. An introduction to the literature of Mexican Americans, Puerto Ricans, Cuban Americans and other Latino/a sub-groups. Special emphasis on themes such as ethnic relations and comparisons with Euro-American forms (if applicable).

Engl 345. Women and Literature: Selected Topics. (Cross-listed with W S). (3-0) Cr. 3. S. Prereq: Engl 250. Literature by women and/or dealing with the images of women, e.g., study of individual authors or related schools of authors; exploration of specific themes or genres in women’s literature; analysis of recurrent images of women in literature. Nonmajor graduate credit.

Engl 346. American Indian Literature. (Cross-listed with Am In). (3-0) Cr. 3. S. Prereq: 250. Survey of literature by Native Americans from pre-Columbian tales and songs to contemporary novels and poetry. Nonmajor graduate credit.

Engl 347. African American Literature to 1960. (Cross-listed with Afr Am). (3-0) Cr. 3. Prereq: 250. Intensive study of African American writing, possibly including slave narratives, Harlem Renaissance works, literature of social protest, and forerunners of contemporary works that reveal key thematic, stylistic, and historical range of the literature. Nonmajor graduate credit.

Engl 349. Topics in Multicultural Literatures of the United States. (3-0) Cr. 3. Repeatable. Prereq: 250. Literature by writers from U.S. multicultural groups. May include literature of several groups or focus upon one of the following: Asian Americans, African Americans, Latinos/ Latinas, American Indians. Nonmajor graduate credit.

Engl 350. Rhetorical Theories and Issues in Context. (Cross-listed with Cl St, Sp Cm). (3-0) Cr. 3. S. Prereq: 250. Ideas about the relationship between rhetoric and society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology.

Engl 351. Literature and Science. (3-0) Cr. 3. Prereq: 250. Study of texts that may include the following topics: the representation of science in literature; the use of literary by science and scientists; reading “scientific” texts as literature; the interactions between literary and scientific ideas. Nonmajor graduate credit.

Engl 352. Gay and Lesbian Literature. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Engl 250. Literary portrayals of gay and lesbian lives and relationships from many different genres. Attention to changing definitions and representations of sexual orientation and gender identity over time. Nonmajor graduate credit.

Engl 353. World Literature: Western Foundations through Renaissance. (Cross-listed with Cl St). (3-0) Cr. 3. F. S. Prereq: 250. Representative works from the drama, epic, poetry, and prose of the Ancient World through the Middle Ages. May include Homer, Aeschyhus, Sappho, Catullus, Dante, Marie de France, Boccaccio, Christine de Pizan, Cervantes, and others.

Engl 354. World Literature: Seventeenth Century to the Present. (3-0) Cr. 3. F. S. Prereq: 250. Global literatures in their various cultural and aesthetic contexts. Representative works, oral and written literature, including poetry, fiction, nonfiction, and drama.

Engl 355. Literature and the Environment. (Cross-listed with Env S). (3-0) Cr. 3. Prereq: 250. Study of literary texts that address the following topics, among others: the relationship between people and natural urban environments, and the impact of place in the literary imagination. Nonmajor graduate credit.

Engl 358. Myth and Fairytale. (3-0) Cr. 3. Prereq: 250. Study of traditional fairytales, myths, and legends from diverse cultures. Nonmajor graduate credit.

Engl 359. Literature and the Arts. (3-0) Cr. 3. Prereq: 250. Study of texts that may include the following topics: the relationship between literature and other art forms (including painting, sculpture, dance, music, photography, film); the representation of the arts in literature; the influences of other art forms on literature; the interrelation of art theory and literary theory. Nonmajor graduate credit.

Engl 360. Studies in American Literature to 1800. (3-0) Cr. 3. Prereq: Classification. Selected readings in American literature from its beginnings through the colonial period; may reflect themes, genres, or social and cultural contexts.

Engl 362. Studies in 19th Century American Literature. (3-0) Cr. 3. Prereq: 250; sophomore classification. Selected readings in American literature of the 19th century; may reflect themes, genres, or social and cultural contexts.

Engl 364. Studies in American Literature: 1900 to the Present. (3-0) Cr. 3. Prereq: 250; sophomore classification. Selected readings in American literature since 1900; may reflect themes, genres, or social and cultural contexts.

Engl 370. Shakespeare. (3-0) Cr. 3. S. Prereq: 250. Readings and analysis of selected plays. Development of Shakespeare’s dramatic art in its social and intellectual context.

Engl 373. Studies in British Literature: The Middle Ages. (3-0) Cr. 3. Prereq: 250; sophomore classification. Selected readings in medieval literature from its beginnings through the fifteenth century; may reflect themes, genres, or social and cultural contexts.

Engl 374. Studies in British Literature: The Renaissance. (3-0) Cr. 3. Prereq: 250; sophomore classification. Selected readings in British literature from 1500 to 1660; may reflect themes, genres, or social and cultural contexts.

Engl 375. Studies in British Literature: The Restoration and 18th Century. (3-0) Cr. 3. S. Prereq: 250; sophomore classification. Selected readings in British literature from 1660 to 1800; may reflect themes, genres, or social and cultural contexts.

Engl 376. Studies in British Literature: Romantic and Victorian. (3-0) Cr. 3. Prereq: 250; sophomore classification. Selected readings from British literature from the late eighteenth century to about 1900; may reflect themes, genres, or social and cultural contexts.

Engl 378. Studies in British Literature: 1900 to the Present. (3-0) Cr. 3. Prereq: 250; sophomore classification. Selected readings in British literature since 1900; may reflect themes, genres, or social and cultural contexts.

Engl 389. Postcolonial Literature. (3-0) Cr. 3. Prereq: 250; sophomore classification. Historical, thematic and theoretical study of postcolonial literatures from one or more of the following areas: Africa, South Asia, the Caribbean, and the Middle East. Irish and immigrant British writers may also be included.

Engl 396. Teaching the Reading of Young Adult Literature. (3-0) Cr. 3. F. S. Prereq: 250. Critical study and evaluation of the genre; examination of modes and themes found in the literature; strategies of effective reading; study of the relationship of the genre to children’s literature and adult literature; discussion approaches to teaching secondary language arts. Current theories and practices in the teaching of reading to secondary school students. Approaches of rhetoric, approaches to teaching, lesson design and planning. Evaluating writing. Professional portfolio preparation.

Engl 404. Creative Writing Workshop—Fiction. (3-0) Cr. 3. Repeatable. F. S. Prereq: 304. Individual projects in short fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting.

Engl 405. Creative Writing Workshop—Nonfiction. (3-0) Cr. 3. Repeatable. F. S. Prereq: 305. Individual projects in memoir, immersion journalism, character studies, and/or the personal essay on a workshop and conference basis. Readings in creative nonfiction.

Engl 406. Creative Writing Workshop—Poetry. (3-0) Cr. 3. Repeatable. F. S. Prereq: 306. Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language.

223
Engl 411. Technology, Rhetoric, and Professional Communication. (3-0) Cr. 3. S. Prereq: 310, 302, 309, 313, or 314; junior classification. Study of the implication of technologies, especially computer technology, for the writing and reading of business, technical, and academic texts. Focus on selected technology-related topics.

Engl 415. Business and Technical Editing. (3-0) Cr. 3. S. Prereq: 302, 309, or 314; junior classification. Editing journal articles, research reports, technical manuals, newsletters, and proposals. Attention to editorial levels and aspects, project management, editor-author relationships, and electronic editing. Nonmajor graduate credit.

Engl 417. Student Teaching. (Cross-listed with C. I. Cr. arr. S. F. Prereq: 494; admission to teacher education, approval of coordinator the semester prior to student teaching. Full-time teaching in secondary English: long term planning, lesson planning, classroom teaching practice in English language arts, E. English and Literature (Same as C I 417E.)

Engl 418. Seminar in Argumentation. (3-0) Cr. 3. S. Prereq: 310, junior classification. Advanced seminar in theory and analysis with extensive practice in various modes of argument. Nonmajor graduate credit.

Engl 420. History of the English Language. (Cross-listed with Ling). (3-0) Cr. 3. S. F. Prereq: 219, 220. Comparison of English to other languages by family background and by type. Analysis of representative Old, Middle, Early Modern and present-day English texts, including both literary works and non-literary documents. Nonmajor graduate credit.

Engl 422. Women, Men, and the English Language. (Cross-listed with W S). (3-0) Cr. 3. S. Prereq: 219. The ways men and women differ in using language in varied settings and the ways in which language both creates and reflects gender divisions. Nonmajor graduate credit.

Engl 437. Grammatical Analysis. (Dual-listed with 537). (Cross-listed with Ling). (3-0) Cr. 3. F. Prereq: 220; junior classification. Theories and methods for analysis of English syntax with emphasis on recent syntactic theory.

Engl 440. Seminar in British Literature. (3-0) Cr. 3. Repeatable. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected authors, movements, eras, or genres in British literature. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 441. Seminar in American Literature. (3-0) Cr. 3. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected authors, movements, eras, or genres in American literature. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 445. Seminar: Literature Crossing Boundaries. (3-0) Cr. 3. F. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Intensive study of selected literature that bridges traditional genre, period, national, or disciplinary boundaries. Readings in criticism; required research paper. Nonmajor graduate credit

Engl 450. Seminar in Drama and Film. (3-0) Cr. 3. Repeatable. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected playwrights, screenwriters, film directors, dramatic or cinematic movements, genres, or national literatures. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 451. Seminar in Poetry. (3-0) Cr. 3. Repeatable. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected authors, movements, eras, or national literatures. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 452. Seminar in Prose. (3-0) Cr. 3. Repeatable. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected authors, movements, eras, or national literatures. May include the novel, the short story, the essay, or autobiography. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 460. Seminar in Gender and Ethnicity. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339; junior classification. Selected readings of various authors, movements, eras, or genres. Readings in criticism; required research paper. Nonmajor graduate credit.

Engl 477. Seminar in Technical Communication. (3-0) Cr. 3. Repeatable. F. Prereq: 302, 309, or 314 and 6 additional credits in technical communication. Intensive study of a selected topic that bridges theory and practice in technical communication. Required project that contributes to the understanding of an emerging issue in the profession. Nonmajor graduate credit.

Engl 487. Internship in Business, Technical, and Professional Communication. (3-0) Cr. 3. F. S. Prereq: 302, 309, 313, 314, 415 preferred; 416, or 477; and permission of coordinator. An opportunity to write, edit, and design business and technical documents in a professional setting. Projects include reports, proposals, manuals, brochures, newsletters.

Engl 488. Undergraduate Seminar. (Cross-listed with Ling). (3-0) Cr. 3. Repeatable. F. Prereq: 9 credits in English beyond 250. Intensive study of a selected topic in literature, criticism, rhetoric, writing or language. Cross-listing with linguistics acceptable only when offered as a course in linguistics. Nonmajor graduate credit.

Engl 490. Independent Study. Cr. arr. F. S. Prereq: 9 credits in English beyond 250; may verify to the section taken, junior classification, permission of Undergraduate Studies Committee. Designed to meet the needs of students who wish study in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Engl 490 may be used toward graduation.

A. Literature

B. Linguistics, Semantics (Ling 490B)

C. Rhetoric, Teaching of Composition

D. Criticism and Theory of Literature

E. Reading: Instructional Methods and Research

F. Creative Writing

G. Business/Technical Communication

H. Honors

Engl 494. Practice and Theory of Teaching Literature in the Secondary Schools. (Cross-listed with C I) (3-0) Cr. 3. S. Prereq: Engl 310, 391 9 other credits in English beyond 280; junior classification; admission to teacher education program. Portfolio review. Current theories and practices in the teaching of literature to secondary school students. Integrating literary study and writing. Preparation and selection of materials. Classroom presentation. Unit planning. (Taken concurrently with C I 280, Cr. 2, and Sp Ed 450)

Engl 497. Capstone Assessment. Cr. R. F. Prereq: 199. Must be taken by all seniors in their last semester of classes.

Courses primarily for graduate students, open to qualified undergraduate students

Open on a priority basis to graduate students admitted to one of the degree programs in English; instructor permission required for other students.

Engl 500. Proseminar: Teaching English Composition. (3-0) Cr. 3. F. Required of all new English teaching assistants. Introduction to the teaching of ISUCComm Foundation Courses. Foundational and relevant newer composition theory and pedagogical methods related to ISUCComm Foundation Courses objectives and their classroom enactment, including development of assignments and supporting activities, and evaluation of student projects.

Engl 506. Theory and Research in Professional Communication. (3-0) Cr. 3. S. Prereq: 6 credits in English. Introduction to professional communication as a discipline, with emphasis on theories of communication and discourse that inform professional communication research and on trends and developments in that research and the field.

Engl 507. Writing and Analyzing Professional Documents. (3-0) Cr. 3. F. Prereq: 8 credits in English. Introduction to the theory and practice of planning, preparing, and presenting information in written, oral, and visual forms preparation of brochures, newsletters, reports, software for language teaching, linguistic analysis, and application of technology, in communication practices within academic and workplace settings.

Engl 508. Advanced Workshop in Academic Writing. (3-0) Cr. 3. Repeatable. Alt. S., offered 2011. Prereq: 6 graduate credits. Hands-on practice in writing academic discourse for publication; rhetorical analyses of student-selected academic journals; discussion of current trends in academic writing; professional perspectives on the referees process and on journal editorial decision making. Focus on the writing of selected short pieces (opinion essays, standard reviews, conference-length papers) and of article-length manuscripts.

Engl 509. Writing Proposals and Grant Applications. (3-0) Cr. 3. F. Prereq: 6 credits in English composition. Introduction to the theory and practice of preparing and analyzing proposals and grant applications intended for businesses, governmental agencies, and/or private and corporate foundations. Individual assignments and group projects include text documents and oral presentations.

Engl 510. Introduction to Computers in Applied Linguistics. (Cross-listed with Ling). (3-0) Cr. 3. F. Prereq: Graduate classification. Principles and methods of linguistic analysis with emphasis on phonology, morphology,
Engl 525. Methods in Teaching Listening and Speaking Skills to Nonnative Speakers of English. (Cross-listed with Ling.) (3-0) Cr. 3. S. Prereq: 511 or an introductory course in linguistics. Theoretical and practical issues and techniques in the teaching of second language listening, and speaking skills. Topics will be relevant to those intending to teach in various contexts involving both K-12 and adult learners.

Engl 526. Computer-Assisted Language Learning. (Cross-listed with Ling.) (3-0) Cr. 3. S. Prereq: 511 or an introductory course in linguistics. Methods and theoretical foundations for linguistic approaches to discourse analysis. Applications of discourse analysis to the study of texts in a variety of settings, including academic and research contexts.

Engl 528. English for Specific Purposes. (3-0) Cr. 3. Alt. F. Prereq: 511 or an introductory course in linguistics. Issues and techniques in analyzing, teaching, and assessing English for specific purposes. Topics include theories of specific purpose language use, analysis of learner needs in target language contexts, and syllabus and materials development for teaching and assessment.

Engl 529. Multimedia Content Management. (3-0) Cr. 3. Alt. S. Prereq: 513, 506, or permission of instructor. Strategies for developing and delivering multimodal content via digital media. Focus on the principles of database design, interface development and usability testing, and collaborative content management within professional communication settings.

Engl 530. Topics in the Study of Literature. (3-0) Cr. 3. Repeatable. S. Prereq: 2010. Prereq: 6 credits in literature. Intensive study of literary genres, periods, movements, or themes; e.g., Literature and Historicism, Narrating the Feminine, Allegory.

multimedia training programs in both education and industry. Work with interactive hypertext, digital audio, and non-linear video editing.

Engl 550. Creative Writing: Craft and Professional. (3-0) Cr. 3. F. Prereq: Admission into MFA Program in Creative Writing and Environment. A multigenre craft course required of all incoming students in the MFA Program in Creative Writing and Environment. Students develop an understanding of craft and environmental writing across genres (poetry, fiction, nonfiction) as well as learn about editing and publication practices. Through the lens of a working literary journal, Flyway: A Journal of Writing and Environment. Other course activities include presentations on the production practices of leading literary journals; individual editing projects; pragmatic tips for finding publication outlets for polished creative work; and a field trip to publishing houses.

Engl 551. Advanced Multi-Genre Creative Writing Workshop. (3-0) Cr. 3. Prereq: Fourth-semester or equivalent standing in the Creative Writing and Environment M.F.A. program. Students develop book-length manuscripts of fiction, creative nonfiction, or poetry.

Engl 553. Graduate Workshop: Writing The Long Project. (3-0) Cr. 3. Repeatable. Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor. Individual long creative writing project ideas developed in course. Portions of long creative writing project workshopped, revised, discussed in conferences.

Engl 554. Graduate Fiction Workshop. (3-0) Cr. 3. Repeatable. Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor. Individual projects in fiction on a workshop and conference basis. Readings in short fiction. Discussion of elements of narrative such as plot, point of view, characterization, theme, setting.

Engl 555. Graduate Nonfiction Workshop. (3-0) Cr. 3. Repeatable. Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor. Individual projects in nonfiction on a workshop and conference basis. Readings in creative nonfiction.

Engl 556. Graduate Poetry Workshop. (3-0) Cr. 3. Repeatable. Prereq: 550 and graduate classification. Open to graduate students outside Creative Writing only with permission of instructor. Individual projects in poetry on a workshop and conference basis. Readings in poetry. Discussion of poetic elements such as image, sound, internal structure, rhythm, tone, figurative language.

Engl 557. Studies in Creative Writing. (3-0) Cr. 3. Repeatable. Prereq: Graduate classification. Special topics course on ideas, issues, and techniques in creative writing. Subject matter may include specific genres, aspects of the creative writing process, or themes of particular interest. Significant readings and written work required; previous workshop experience helpful.

Engl 558. Teaching Creative Writing. (3-0) Cr. 3. Prereq: Graduate classification. Pedagogical approaches that are effective for grade-school through adult-education creative writing teaching. Writing exercises, workshops, test evaluation, and visits from creative writers.

Engl 559. Creative Writing Teaching Internship. Cr. arr. Prereq: Permission of participating instructor. Students assist in an introductory creative writing class. Some supervised teaching is mainly evaluation of submissions and individual conferences. Requirements and grades determined by participating instructors.

Engl 560. Environmental Field Experience. (3-0) Cr. 3. Repeatable. Prereq: Graduate classification. Students spend a term on a project that requires fieldwork. Projects might include working for a federal, state or private non-profit environmental organization or farm, or living and working in a specified natural area.

Engl 587. Internship in Business, Technical, and Professional Communication. (3-0) Cr. arr. Repeatable. F. S. Prereq: 507 plus 3 additional graduate credits in business and technical writing or composition and rhetoric, permission of instructor. Limited to master’s and doctoral degree candidates in the English Department. An opportunity to write, edit, and design business documents in a professional setting. Projects include reports, proposals, manuals, brochures, newsletters.

Engl 588. Supervised Practicum in Teaching English as a Second Language. (Cross-listed with Ling). (1-0) Cr. F.S.S.S. Prereq: 15 credits toward the TESL/ Applied Linguistics master’s degree. Intensive observation of ESL instruction and supervised practice in teaching teachers of English in a context appropriate to the practicum student’s goals. Seminar discussion of observed practices in relation to language teaching theories and methods.

Engl 589. Supervised Practicum in Literary Editing. (3-0) Cr. 3. Prereq: 552 at least one graduate creative writing workshop, permission of instructor. Students assume editorial duties for Flyway, a nationally distributed literary journal; overseeing a staff; screening submissions; corresponding with authors; editing and proofing; assisting with layout; communicating with the printer; overseeing a contest; and promoting the magazine.

Engl 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of the Graduate Studies Committee according to guidelines available in the department office.
A. Literature
B. Teaching English as a Second Language (TESL/Applied Linguistics). (Cross-listed with Ling 906B)
C. Composition and Rhetoric
D. Rhetoric and Professional Communication
E. Creative Writing
F. Applied Linguistics and Technology

Engl 592. Studies in Rhetoric and Professional Communication. (3-0) Cr. 3. Repeatable. Prereq: 12 hours in rhetoric, linguistics, or literature, excluding 195/250. Seminar on selected topics in rhetoric and professional communication or composition.

Engl 595. Graduate Study and Travel. Cr. R. Prereq: Permission of instructor. Supervised study of an appropriate area of the discipline while traveling in a foreign country or in the U.S. Special fees apply.
A. Literature
B. Creative Writing
C. Linguistics
D. Rhetoric and Professional Communication
E. Teacher Education

Engl 599. Creative Component. Cr. F.S.S.S. Prereq: Graduate classification, permission of major professor.

Courses for graduate students

Engl 611. Topics in the History of Rhetorical Theory. (3-0) Cr. 3. Repeatable. Alt. F., offered 2009. Prereq: 547 or 548. Rhetorical theory, criticism, and/or practice in relation to a historical period; the historical development of a rhetorical concept.

Engl 621. Topics in Current Rhetorical Theory. (3-0) Cr. 3. Repeatable. S. Prereq: 503 or 506. Advanced study of a specialized topic or problem in rhetorical theory, criticism, or practice.

Engl 623. Research Methods in Applied Linguistics. (Cross-listed with Ling). (3-0) Cr. 3. Prereq: 517, 517 518, 519. Survey of research traditions in applied linguistics. Focus on theoretical and practical aspects of quantitative and qualitative approaches to applied linguistic study, including experimental and quasi-experimental methods, classroom observation and re-search, introspective methods, elicitation techniques, case studies, interational analysis, ethnography, and program evaluation. Computational tools and resources for linguistic research will be highlighted.

Entomology

www.ent.istate.edu

Leslie Lewis, Chair of Department

Assistant Professors: Beetham, Holscher
Assistant Professors (Collaborators): Hellinich, Sappington, Sumnerford
Undergraduate Study

For undergraduate curriculum in Insect Science, see College of Agriculture, Curricula.

A degree in Insect Science will provide students with a strong foundation in the biological sciences with an emphasis on insects. This degree prepares students for positions in industry, government, education, and public health. Chemical and seed companies, pest-management or consulting firms, and Horticultural nurseries employ insect scientists. State and federal agencies employ insect science graduates as consultants, extension directors, mosquito abatement agents, and research aides. A significant number of graduates pursue advanced graduate degrees in academia or professional degrees in the medical or veterinary fields.

Graduates understand the evolutionary and ecological relationships of insects with other life forms, and the impact of insects relative to human and animal health, as well as the relationships between insects and humanity's food, fiber, structural, and aesthetic environments and expectations. They are skilled in identifying insects and related groups and understand the biology, ecology, behavior, diversity, and evolutionary relationships of the major groups of insects. Graduates understand the principles and methods available to manage beneficial and pest insects. They understand the application of the scientific method in problem solving and the principles of experimental design and analysis. Graduates are able to communicate research and educational materials properly and competently - orally, visually, and in writing - and are able to work effectively with others.

Graduates of the agricultural and Horticultural insect management option are skilled in identifying pests and measuring their impact on plant and animal hosts for the management of these pests. They understand the environmental, legal, and ethical issues involved in insect population management. Graduates of the insect biology option have achieved an understanding of the biochemical and physiological processes governing insect metabolism, growth, and form. They understand the evolutionary and ecological significance of insects. Graduates of this option often enter graduate or professional schools.

The department offers a minor in Insect Science that may be earned by completing Ent 370 and 12 credits in courses selected from an approved list supplied by the department. Entomology administers the Emerging Global Diseases minor (see www.ent.iastate.edu/department/undergrad/egd/). Core courses address the biology of emerging disease agents (e.g., protozoa, fungi, microbes, and viruses), the clinical manifestations and epidemiology of emerging diseases, and the impact of those diseases on human interactions and Socioeconomics. One course must be taken from each of three core areas: (Pathogens and Disease) Micro 310 or Biol/Micro 353; (Sociology and Economics) Soc 411, Soc 345, FS HN 342, or Anthr 439; (Arthropod-borne Diseases) Ent 374 or Ent 574. The remainder of the credits (for a total of 15) may be selected from any of the above-listed courses not selected, and from other appropriate courses as approved by Emerging Global Diseases program advisers.

Graduate Study

The department offers work for the master of science and doctor of philosophy degrees with a major in entomology. Studies at the Ecosystem, Organismal, and Subcellular levels occur in the following areas: aquatic entomology, biological control, chemical ecology, ecology, host plant resistance, insecticide toxicity, medical/veterinary entomology, pathology, pest management, physiology, population genetics, or systematics. Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Prerequisite to the entomology major and to minor graduate work in the department is completion of at least two years of zoo logical courses, for part of which credit may be earned with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Entomology participates in the interdepartmental majors in ecology and evolutionary biology; genetics; Microbiology; and molecular, cellular and developmental biology; and in the interdepartmental major and minor in toxicology (see Index). The Federal Corn Insects and Crop Genetics Research Unit and the North Central Plant Introduction Station are available for advanced study in certain phases of entomological research. More information about the department, such as current research, faculty resumes, physical facilities, and graduate student opportunities can be viewed on the department’s website at www.ent.iastate.edu. Curriculum assessment for the department can be viewed here: http://www.ent.iastate.edu/assessment.

Courses primarily for undergraduate students

Ent 201. Introduction to Insects. (1-0) Cr. 1. F.S.SS. 5 weeks. S. Classroom section spring only, World Wide Web section of course offered summer and fall semesters. Biological and ecological aspects of insects.

Ent 283. Pesticide Application Certification. (Cross-listed with Agron, For, Horti). (2-0) Cr. S. Holscher. Core background and specialty topics in agricultural, and Horticultural pesticide applicator certification. Students can Select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

Ent 371. Introduction to Insect Ecology. (Cross-listed with La LLI. (3-3) Cr. 4. Alt. SS., offered 2011. Field and laboratory study of insects, their diversity, life history, emphasis on ecology and behavior.

Ent 374. Insects and Our Health. (Cross-listed with Micro). (3-0) Cr. 3. S. Prereq: 3 credits in biological sciences. Bartholomay. Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Nonmajor graduate credit.

Ent 374L. Insects and Our Health Laboratory. (Cross-listed with Micro). (1-0) Cr. 1. Alt. S., offered 2010. Prereq. Credit or enrollment in Ent 374. Bartholomay. Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

The following two categories: Systematics (Ent 576, Ent 525, Ent 568), Biochemistry (BBMB 404, BBMB 405, BBMB 501).

Entomology participates in the interdepartmental majors in ecology and evolutionary biology; genetics; Microbiology; and molecular, cellular and developmental biology; and in the interdepartmental major and minor in toxicology (see Index). The Federal Corn Insects and Crop Genetics Research Unit and the North Central Plant Introduction Station are available for advanced study in certain phases of entomological research. More information about the department, such as current research, faculty resumes, physical facilities, and graduate student opportunities can be viewed on the department’s website at www.ent.iastate.edu. Curriculum assessment for the department can be viewed here: http://www.ent.iastate.edu/assessment.

Entomology 227
Ent 376. Fundamentals of Entomology and Pest Management. (2-3) Cr. 3. S. Prereq: Biol 101 or 211. O’Neal. Introduction to entomology and insect-pest management, including life processes, ecology, economics, tactics of population suppression, and ecological back-up plans. Credit for either Ent 376 or 386, but not both, may be applied toward graduation. Nonmajor graduate credit.

Ent 386. Management of Insect Pests. (2-0) Cr. 2. Alt. S., offered 2010. Prereq: Biol 101 or 211. Tollefsen. Introduction to insects and their lifestyles. Theory and application of pest control practices. Examples are drawn primarily from field crops. Credit for either Ent 376 or 386, but not both, may be applied for graduation. Nonmajor graduate credit.

Ent 471. Insect Ecology. (Dual-listed with 571). (2-3) Cr. 3. Alt. F., offered 2010. Prereq: 9 credits in biological sciences. O’Neal. The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

Ent 478. Global Protozoology - Molecular Biology of Protozoa. (Dual-listed with 578). (Cross-listed with V Pth). (2-1) Cr. 3. F. Prereq: Permission of instructor. Analysis of cellular systems, molecules, and organelles of pathogenic and parasitic protozoa. Emphasis is placed on cellular systems and processes that are unique to protozoa, are important to understanding vector-parasite-host biology/ecology, or are targets of disease prevention/treatment programs for international pest management programs.

Ent 490. Independent Study. Cr. arr. Repeatable. Prereq: 15 credits in biological sciences, junior or senior classification. A maximum of 6 credits of Ent 490 may be used toward the total of 128 credits for graduation. E. Research or work experience. U. Laboratory teaching experience. For students registering to be undergraduate laboratory assistants.

Ent 493. Workshop on Insect Management. Cr. 1. SS. Prereq: 370, 372, 376, or 386. Holscher. Insect recognition and sampling will be practiced in agricultural systems. The applications of current pest management tactics will be demonstrated in both crop and livestock systems. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

Ent 511. Integrated Management of Tropical Crops. (Cross-listed with PI Hort). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: PI Hort 312 or equivalent. Gleason, Lewis, Nonnecce. Applications of Integrated Crop Management principles (including plant pathology, entomology, and Horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then upkeep of individual projects. Tour expenses paid by students.

Ent 530. Ecologically Based Pest Management Strategies. (Cross-listed with Agron, PI P SusAg). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: SusAg 509. D. Gassman. Principles of insecticidal use; insecticidal delivery systems; and insecticidal formulation.

Ent 555. Insect Physiology. (3-3) Cr. 4. S. Prereq: Ent 370. Jurenka. Life processes of the insects, including reviews of current problems in insect physiology.

Ent 571. Insect Ecology. (Dual-listed with 471). (2-3) Cr. 3. Alt. F., offered 2010. Prereq: 9 credits in biological sciences. O’Neal. The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

Ent 574. Medical Entomology. (3-3) Cr. 4. Alt. S., offered 2010. Prereq: 9 credits in biological sciences. Bartholomay. Identification, biology, and significance of insects and other arthropods that attack people and animals, particularly those that are vectors of disease.

Ent 578. Global Protozoology - Molecular Biology of Protozoa. (Dual-listed with 478). (Cross-listed with V Pth). (2-1) Cr. 3. F. Prereq: Permission of instructor. Analysis of cellular systems, molecules, and organelles of pathogenic protozoan parasites. Emphasis is placed on processes and systems that are unique to protozoa, are important to understanding vector-parasite-host biology/ecology, or are targets of disease prevention/treatment programs for international disease control.

Courses for graduate students

Ent 600. Seminar. Cr. 1. F.S.S. Präsentation of research results.

Entrepreneurial Studies

www.isupjcenter.org/education/minor

(Interdepartmental Undergraduate Minor)

Supervisory Committee: Kay Palan (Business); Chao; Lisa Nolan (Vet Med); David Acker (Engineering); Corly Brooke (Human Sciences); David Acker (Ag); Diane Rower (Engineering); Lisa Nolan (Vet Med); David Acker (Engineering); Corly Brooke (Human Sciences); Kate Schwenkens (Design); Zora Zimmerman (LAS).

Entrepreneurial Studies is an interdisciplinary program that provides opportunities to students to learn about entrepreneurship—the process of creating value through recognizing and developing opportunities. It serves to complement the student’s major area of study, in any college, by offering a means of putting theory and practice into practice. The goal of the Entrepreneurial Studies program is to provide the knowledge and skills needed to create value through recognizing and developing opportunities. In addition to feasibility analysis and business planning, the program deals with the topics of innovation, opportunity recognition, technology assessment, industry analysis, and competitive strategy. Although the program introduces some fundamental concepts from accounting, finance, marketing, and management, it does not attempt to substitute for any business courses in these areas.

A minor in entrepreneurial studies is available to all undergraduate students at ISU. Students must follow college specific rules in selecting courses. The college representatives to the supervisory committee will be responsible for advising students in their college, and will inform students about the details of the college rules.
Minor
A student seeking a minor in entrepreneurial studies must successfully complete a minimum of 15 credits in courses approved for use in the entrepreneurial studies program, including the two required courses, Management 310 and 313. Management 310, Entrepeneurship and Innovation, is the introductory course and provides an overview of the entire field. Management 313, Feasibility Analysis and Business Planning, emphasizes development of an idea for a new venture, conducting a feasibility study, researching the potential market, analyzing the competition, and preparing a formal business plan. Students take two entrepreneurship-oriented electives (6 cr.), from an approved course list and must also take 3 cr. of experiential learning. Up to six of the 15 credits required for the minor may also be used in the student’s required program of study. More information about the minor and the list of approved electives are available online.

Environmental Science
www.ensci.iastate.edu
(Interdepartmental Program)
William G. Crumpton: Coordinator
Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study
The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major in an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following: (1) A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and Statistics, (2) 29 credits of course work in the major, including the Environmental Science core (EnSci 110, 201, 250, 381, and 382) and 15 additional credits of approved course work in Environmental Science. A combined average grade of C or higher is required in courses applied in the major.

Graduate Study
Environmental Science offers an interdisciplinary graduate program leading to the M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics.

Applicants should have completed an undergraduate or masters degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science graduate program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in Environmental Science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Courses primarily for undergraduate students

EnSci 201. Introduction to Environmental Issues. (Cross-listed with Env SI.) (2-0) Cr. 2. F. Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

EnSci 250. Environmental Geography. (Cross-listed with Env S.) (3-0) Cr. 3. F. The distribution, origins and functions of the earth’s physical systems and the spatial relationship between human activity and the natural world.

EnSci 290. Apprenticeship. Cr. arr. Repeatable. F.S.SS. Prereq: Approval of the Environmental Science Coordinator. Practical experience in an approved setting such as a research laboratory, government office, or private office. Satisfactory-fail only.

EnSci 301. Natural Resource Ecology and Soils. (Cross-listed with NREM.) (3-0) Cr. 4. F. Prereq: Biol 211L and 211L, for 201, or second course in Biology. Effects of environmental factors on ecosystem structure and function using forest, Prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennal plant communities in agricultural landscapes. Nonmajor graduate credit.

EnSci 312. Ecology. (Cross-listed with A EcL, Biol.) (3-3) Cr. 4. F.SS. Prereq: Biol 211L and 212L. Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

EnSci 312L. Ecology. (Cross-listed with A EcL, la LL) Cr. 4. SS. An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

EnSci 360. Environmental Soil Science. (Cross-listed with Agron.) (2-3) Cr. 3. S. Prereq: Agron 260 or Geol 100 or 201, Burras and Kilborn. Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

EnSci 381. Environmental Systems I: Introduction to Environmental Systems. (Dual-listed with 581). (Cross-listed with Biol, Env S, Microl.) (2-4) Cr. 4. F. Prereq: 12 credits of natural and physical sciences including Biology and chemistry. Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

EnSci 382. Environmental Systems II: Analysis of Environmental Systems. (Dual-listed with 582). (Cross-listed with Biol.) (2-4) Cr. 4. S. Prereq: EnSci 381. Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

EnSci 402. Watershed Hydrology. (Cross-listed with 502). (Cross-listed with Agron, Geol, Mteor, NREM). (3-0) Cr. 4. F. Prereq: Four courses in physical or Biological sciences or engineering; junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

EnSci 402L. Watershed Hydrology and Surficial Processes. (Cross-listed with Agron, la LL). Cr. 4. S. Prereq: Four courses in physical or Biological sciences or engineering. Effects of geomorphology, soils, and land use on transport of water and materials. (Nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.

EnSci 404. Global Change. (Dual-listed with 504). (Cross-listed with Agron, Env S, Mteor). (3-0) Cr. 3. S. Prereq: Four courses in physical or Biological sciences or engineering; junior standing. Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Nonmajor graduate credit.

EnSci 405. Environmental Biophysics. (Dual-listed with 505). (Cross-listed with Agron, Mteor). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Math 166 or equivalent. Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind, Heat, mass, and radiative transport. Applications to animals, plants, and plant communities. Nonmajor graduate credit.

EnSci 406. World Climates. (Cross-listed with Agron, Mteor). (3-0) Cr. 3. F. Prereq: Agron 260 or Agron/Geo 100 or 201, Burras and Kilborn. Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

2009-2011
Introduction to the chemical and redox reactions. EnSci 422I. Prairie Ecology. (Cross-listed with La LL). Cr. 4. SS. Prereq: Familiarity with basic principles in Biological sciences and ecology. Basic patterns and underlying physical and biotic causes of both regional and local distributions of plants and animals of North American prairie and savanna ecosystems. Nonmajor grade credit.

EnSci 424. Air Pollution. (Distributed with 524I). (Cross-listed with A E, C E). (10) Cr. 1. Prereq: Either Phys 221 or Chem 178 and either Math 166 or 3 credits in statistics. Senior classification or above. 1 cr. per module. Module D and E. A. Air quality and effects of pollutants B. Climate change and causes C. Transportation constraints D. Off-gas treatment technology. E. Agricultural sources of pollution

EnSci 446. Integrating GIS and GPS for Natural Resource Management. (Distributed with 548I). (Cross-listed with NREM). (3) Cr. 3. S. Prereq: 12 credits in student's major at 300 level or above. NREM 345 or equivalent experience with ArcGIS. Emphasis on the use of GPS as a tool for GIS. Basic theory of GPS. Use of Global Positioning System (GPS) technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct ways to use for GPS navigation.

EnSci 451. Applied and Environmental Geophysics. (Distributed with 551I). (Cross-listed with Geol). (2-2) Cr. 3. S. Prereq: Geol 100 or 201, Math 181 or equivalent experience. Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investiga- tions and imaging. Data interpretation methods. Emphasis on computer interpretation packages. Field work with seismic and resistivity-imaging systems and radar. Nonmajor grade credit.

EnSci 452. GIS for Geoscientists. (Distributed with 522I). (Cross-listed with Geol). (2-2) Cr. 3. F. Prereq: Geol 100, Geol 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Use of ESRI’s ArcGIS Desktop version 9.x. Emphasis on typical GIS operations and analysis in the geosciences to prepare students for advanced GIS courses. Nonmajor grade credit.

EnSci 459. Environmental Soil and Water Chemistry. (Distributed with 559I). (Cross-listed with Agron). (3) Cr. 4. F. Prereq: Agron 384 or EnSci 360; Chem 164, 165, or 178; Math 140. Chem 211 or 231 recommended. Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, phase-chip composition of soils, reactions at the solid-solution interface, and approaches to contaminants environmental issues. Nonmajor grade credit.

EnSci 461I. Introduction to GIS. (Cross-listed with Env S, La LL, La LL). (3) Cr. 3. SS. Descriptive and predictive GIS modeling techniques, spatial Statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management. Nonmajor grade credit.

EnSci 463I. Soil formation and Landscape Relationships. (Distributed with 563I). (Cross-listed with Agron). (2-4) Cr. 3. S. Prereq: Agron 154 or 260. Sandor. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of EnSci 463I or 465I may be applied for graduation. Nonmajor grade credit.

EnSci 463I. Soil formation and Landscape Relationships. (Distributed with 563I). (Cross-listed with Agron). (2-4) Cr. 3. S. Prereq: Agron 154 or 260. Sandor. Relationships between soil formation, geomorphology, and environment. Soil description classification, geography, mapping, and interpretation for land use. Credit for one of EnSci 463I or 465I may be applied for graduation. Nonmajor grade credit.

EnSci 479. Surficial Processes. (Distributed with 579I). (Cross-listed with Geol). (3-2) Cr. 3. F. Prereq: Geol 100 or 201 or equivalent experience. Study of surficial processes in modern and ancient geological environments. Topics include weathering, soil characteristics, transport, and landscape formation with emphasis on fluvial, glacial, hillside, eolian, and coastal processes. Application of engineering and environmental problems. Laboratory emphasis on aerial photo and topographic map interpretation. Nonmajor grade credit.

EnSci 484. Ecosystem Ecology. (Cross-listed with BioL). (3-0) Cr. 3. S. Prereq: Combined 12 credits in biology and chemistry. Introduction of the study of ecosystems and the factors that influence their properties and dynamics. Conceptual foundations for ecosystem studies. Qualitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems.

EnSci 487. Microbial Ecology. (Cross-listed with Biol, Micro). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

EnSci 496. Travel Course. Cr. arr. Repeatable. Prereq: Permission of instructor: Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by students. Check with department for current offerings.

A. International Tours
B. Domestic Tours

EnSci 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. Prereq: Permission of Environmental Science Coordinator: Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

EnSci 502. Watershed Hydrology. (Dual-listed with 402). (Cross-listed with Agron, Mteor). (3-0) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrologic processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

EnSci 504. Global Change. (Dual-listed with 404). (Cross-listed with Agron, Mteor). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior, senior, or graduate standing. Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

EnSci 505. Environmental Biophysics. (Dual-listed with 405). (Cross-listed with Agron, Mteor). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Math 168 or equivalent. Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy, mass and water (carbon and exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind, heat, mass, and radiation transport. Applications to animals, plants, and plant communities. Semester project required.

EnSci 508. GIS and Natural Resource Management. (Dual-listed with 408). (Cross-listed with A E). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment. Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures and management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS. In addition to other assignments, graduate students will prepare research literature reviews on topics covered in class and develop enterprise applications.

EnSci 508I. Aquatic Ecology. (Cross-listed with la LL, NREM). Cr. 4. S. Prereq: Courses in ecology, chemistry, and physics; junior classification; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

EnSci 509. Field Methods in Hydrogeology. (Dual-listed with 409). (Cross-listed with Geol). (4-0) Cr. 2. Alt. S., offered 2010. Prereq: Geol 100 or 201; Math 111 or 113. Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, mini-piezometers, stream gaging, electronic instrumentation for data collection, and geophysics. Field trips to investigate water resource, water quality, and remediation projects.

EnSci 511. Hydrogeology. (Dual-listed with 411). (Cross-listed with Geol). (3-2) Cr. 4. F. Prereq: Geol 100 or 201; Math 111 or 113. Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.

EnSci 515. Paleoclimatology. (Dual-listed with 415). (Cross-listed with Geol). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Four courses in biological or physical science. Introduction to mechanisms that drive climate, including the interplay between oceanic, atmospheric, and oceanic circulation and in Earth’s orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geophysical proxies (e.g., tree rings analysis, O isotope analysis for calculation of organic carbon and carbonates) and dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years).

EnSci 519. Environmental Geochemistry. (Dual-listed with 419). (Cross-listed with Geol). (2-2) Cr. 3. F. Prereq: 511 or equivalent. Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate geochemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

EnSci 520. Environmental Engineering Chemistry. (Cross-listed with 420). (Cross-listed with Geol). (3-3) Cr. 3. F. Prereq: Cross-listed with Geol 107 and 178; Math 166. Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions and mass transfer principles. Individual laboratory practicals and group projects required. Term paper and oral presentation for graduate level only.

EnSci 523. Physical-Chemical Treatment Process. (Cross-listed with C E). (2-2) Cr. 3. F. Prereq: C E 520. Material and energy balances. Principles and design of physical-chemical unit processes including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludged; theoretical and practical demonstrations; case studies in mineral processing and secondary industries. Individual and group projects required.

EnSci 524. Air Pollution. (Dual-listed with 424). (Cross-listed with A E, C E). (1-0) Cr. 1. Prereq: Either Phys 221 or Chem 178 and either Math 166 or 3 credits in statistics. Senior classification or above. 1 cr. per module. Module A prereq for all modules; module B prereq for D and E. A. Air quality and effects of pollutants B. Climate change and changes C. Transportation constraints D. Off-gas treatment technology E. Agricultural sources of pollution

EnSci 526. Stable Isotopes in the Environment. (Dual-listed with 426). (Cross-listed with Geol). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Four courses in biological or physical sciences or environmental science; approval of the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen. Isotopology of isotopic measurements and techniques for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance.

EnSci 527. Solid Waste Management. (Cross-listed with C E). (3-0) Cr. 3. F. Prereq: C E 326. Planning and design of solid waste management systems; includes characterization and collection of domestic, commercial, and industrial solid wastes, waste minimization and recycling, energy and materials recovery, composting, incineration, and landfill design.

engineering design; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmospheric system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

EnSci 555. Restoration Ecology. (Cross-listed with EEBS, NREM). (2-3) Cr. 3. F. Pre: Biol 368 or 474 or graduate standing. Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

EnSci 556, Integrating GIS and GPS for Natural Resource Management. (Dual-listed with 446). (Cross-listed with NREM). (2-3) Cr. 3. S. Pre: 12 credits in student's major at 300 level or above, NREM 345 or equivalent experience with ArcGIS. Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

EnSci 557. Applied and Environmental Geophysics. (Dual-listed with 451). (Cross-listed with Geol). (2-2) Cr. 3. S. Preq: Geol 100 or 201, Math 181 or equivalent experience with seismic data interpretation. Seismic properties such as texture, density, and water content of shallow subsurface investigation and imaging. Interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic- and resistivity-imaging systems and radar.

EnSci 558. GIS for Geoscientists. (Dual-listed with 452). (Cross-listed with Agron, Geol). (2-2) Cr. 3. F. Preq: Geol 100, Geol 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific applications. General concepts, digital database design, geospatial analysis, and map production. Emphasis on ArcGIS Desktop Software and extension modules.

EnSci 559. Laboratory Methods in Soil Chemistry. (Cross-listed with Agron). (2-3) Cr. 3. F. Preq: Agron 354 and Chem 178 or 211. Tabatabai. Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

EnSci 560. Environmental Soil and Water Chemistry. (Dual-listed with 459). (Cross-listed with Agron). (2-4) Cr. S. Pre: Agron 361 or Chem 164, 165, or 178; Math 140. Chem 211 or 231 recommended. Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Emphasis on soil chemistry including the behavior of contaminants in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, chemical-equilibrium speciation programs, and applications to contemporary environmental issues.

EnSci 574. Environmental Impact Assessment. (Cross-listed with C E). (3-0) Cr. 3. S. Preq: Four courses in natural, biological, or engineering sciences and senior or above classification. Review of federal and state requirements for environmental impact assessment, requirements of the National Environmental Policy Act and Council on Environmental Quality, methods of evaluating the environmental impacts on the physical, biological, socioeconomic, cultural-historical, human health and psychological environments, public participation in EIS, review and evaluate project environmental impact statements. An environmental impact assessment of a proposed project will be completed in small teams.

EnSci 578. Laboratory Methods in Soil Physics. (Cross-listed with Agron). (1-0) Cr. S. Preq: 577 concurrent. Horton. Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.

EnSci 579. Surficial Processes. (Dual-listed with 475). (Cross-listed with Agron). (3-0) Cr. 3. S. Preq: Geol 100 or 201 or equivalent experience. Study of surficial processes in modern and ancient geological environments. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hilly, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory emphasizes aerial photo and topographic map interpretation.

EnSci 581. Environmental Systems I: Introduction to Environmental Systems. (Dual-listed with 381). (Cross-listed with 481). (2-0) Cr. 3. S. Preq: 15 credits of natural science including biology and chemistry. Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems, and the primary environmental factors controlling these systems.

EnSci 584. Ecosystem Ecology. (Cross-listed with EEBS). (2-0) Cr. 3. S. Preq: Combined 12 credits in biology and chemistry. Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems, and the primary environmental factors controlling these systems.

EnSci 586. Aquatic Ecology. (Dual-listed with 486). (Cross-listed with EEOL). (3-0) Cr. S. Preq: EnSci 301 or 312 or 381 or 402. Structure and function of
Environmental Studies

(Interdepartmental Undergraduate Program)

William G. Crompton: Coordinator

Environmental Studies deals with the relationship and interactions between humans and the environment. Students in any college at ISU may elect to take a secondary major or minor in Environmental Studies. The curriculum is designed to give students an understanding of current and emerging environmental issues and an appreciation of different perspectives regarding these issues. Courses are provided for students pursuing careers related to the environment and for others who simply want to know more about environmental issues.

Secondary Major

The Environmental Studies secondary major is taken in addition to one’s first major and provides the breadth of preparation and integrated perspectives necessary to understand environmental issues. Students seeking a major in Environmental Studies complete 24 credits of Env S coursework including (1) at least one general survey course chosen from Env S 101, 120, 173, and 201, (2) at least one integrative/issues course chosen from Env S 160, 204, 324, 404, 424, and 450, and (3) at least two human/Societal perspectives courses chosen from Env S 293, 320, 334, 345, 355, 380, 382, 384, 442, 472, 482, 484, and 491. Beyond these three categories, any Environmental Studies course and up to six credits of approved departmental coursework may be applied toward the 24 credit total for the major. Regardless of their home college, Environmental Studies majors must complete 10 credits of approved coursework in natural science. Unless prohibited by program or college rules, courses used in the major may also be used to satisfy general education and other requirements of departments and colleges. A combined average grade of C or higher is required in courses applied to the major.

Regardless of their primary major, Environmental Studies graduates have a broad foundation in science and humanities, an understanding of major environmental issues, and an appreciation of the varied and sometimes opposing perspectives regarding these issues.

Minor

Students seeking a minor in Environmental Studies complete 15 credits of approved Environmental Studies coursework including (1) at least one general survey course chosen from Env S 101, 120, 173, and 201, (2) at least one integrative/issues course chosen from Env S 160, 204, 324, 342, 404, 424, and 450, and (3) at least two human/Societal perspectives courses chosen from Env S 293, 320, 334, 345, 355, 380, 382, 384, 442, 472, 482, 484, and 491. A combined average grade of C or higher is required in courses applied to the minor, and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Courses for graduate students

Courses for undergraduates

Env S 101. Environmental Geology: Earth in Crisis. (Cross-listed with Geol). (3-0) Cr. 3. F. An introduction to geologic processes and the consequences of human activity from local to global scales. Disasters of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism.

Env S 120. Introduction to Renewable Resources. (Cross-listed with Agron, NREM). (3-0) Cr. 3. F. S. Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History, organization and management of resource management. Concepts of integrated resource management.

Env S 130. Natural Resources and Agriculture. (Cross-listed with NREM). (3-0) Cr. 3. S. Survey of the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on low input, conservation management practices for private agricultural lands. Designed for nonmajors.

Env S 160. Water Resources of the World. (Cross-listed with Agron, Geol, Mteor). (3-0) Cr. 3. S. Study of the occurrence, history, development, and management of world water resources. Basic hydrologic principles including climate, surface water, groundwater, and water quality. Historical and current perspectives on water policy, use, and the role of water in Society and the environment.

Env S 173. Environmental Biology. (Cross-listed with Biol). (3-0) Cr. 3. S. An introduction to the structure and function of ecosystems with emphasis on the interrelationships between human beings and the environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution.

Env S 250. Environmental Geography. (Cross-listed with EnSci). (3-0) Cr. 3. F. The distribution, origins and functions of the earth’s physical systems and the spatial relationship between human activity and the natural world.

Env S 293. Environmental Planning. (Cross-listed with C R P Dsn S). (3-0) Cr. 3. F. Prereq: Sophomore classification. Comprehensive review of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

Env S 320. Ecocriticism. (Cross-listed with W S). (3-0) Cr. 3. F. Offered 2009. Prereq: W S 201 or 3 credits in W S at the 300 level or above. Women’s relationships with the earth, non-human nature, and other humans. The course explores the connections between the mastery of women and the mastery of nature; origins of ecofeminism to the science of ecology and to other branches of feminist Philosophies. Critique of modern science, technology, political systems as well as solutions will be included.

Env S 324. Energy and the Environment. (Cross-listed with Geol, Mteor). (3-0) Cr. 3. S. Sustainable and non-renewable energy resources. Origin, occurrence, and extraction of fossil fuels, wind, and solar energy. Energy efficiency. Environmental effects of energy production and use, including air pollution, acid precipitation, groundwater contamination, nuclear waste disposal, and global climate change.

Env S 334. Environmental Ethics. (Cross-listed with Phil). (3-0) Cr. 3. F. Prereq: Three credits in Philosophy or junior classification. thorough study of some of the central moral issues arising in connection with human impact on the environment, e.g., human overpopulation, species extinction, forest and wilderness management, pollution. Several world views of the proper relationship between human beings and nature will be explored. Nonmajor graduate credit.

Env S 345. Population and Society. (Cross-listed with Soci). (3-0) Cr. 3. F. Preston. Soc 130 or 134. Human population growth and structure; impact on food, environment, and resources; gender issues; trends of birth, death, and migration; projecting future population; population policies and laws; comparison of the United States with other Societies throughout the world.

Env S 355. Literature and the Environment. (Cross-listed with Engl). (3-0) Cr. 3. F. Prereq: Engl 250. Study of literary texts that address the following topics: among others: the relationship between people and natural/urban environments, ecocriticism, and the importance of place in the literary imagination. Nonmajor graduate credit.

Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural envi-
ronmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

Env S 382. Environmental Sociology. (Cross-listed with Soc). (3-0) Cr. 3. F.S. Prereq: Soc 120, 134, or 3 credits of Env S. Environment-Society relations; social construction of nature and the environment; social and environmental impacts of resource extraction, production, and consumption; environmental inequality; environmental mobilization and movements; U.S. and international examples.

Env S 384. Religion and Ecology. (Cross-listed with Relig). (3-0) Cr. 3. Introduction to concepts of religion and ecology as they appear in different religious traditions, from both a Historical and contemporary perspective. Attention to religious response to contemporary environmental issues. Nonmajor graduate credit.

Env S 390. Internship in Environmental Studies. Cr. arr. Repeatable. F.S.SS. Prereq: Approval of the Environmental Studies Coordinator. Practical experience with state and local government agencies, schools, private conservation groups, and other organizations. Satisfactory-fail only.

Env S 404. Global Change. (Cross-listed with Agron, EnSci, Meteor). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Recent changes in global biogeochem-
ical cycles and climate models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethi-
cultural issues of global environmental change. Nonmajor graduate credit.

Env S 407. Watershed Management. (Cross-listed with EnSci, NREM). (3-0) Cr. 4. S. Prereq: A course in general biology. Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

Env S 424. Sustainable and Environmental Horticulture Systems. (Cross-listed with Hort). (2-0) Cr. 2. F. Inquiry into ethical issues and environmental consequences of Horticultural cropping systems and production practices. Emphasis on production systems that are resource efficient, environmentally sound, socially acceptable, and profitable.

Env S 442. The Policy and Politics of Coastal Areas. (Cross-listed with Pol S). (3-0) Cr. 3. S. Prereq: Exploration of political implications of coastal policy. Issues include: “Carrying capacity,” zoning, regulation of human de-
velopment activities, trade-offs between conservation and jobs, the quality of coastal lifestyle, ways in which citizens participate in policy for coastal areas.

Env S 450. Issues in Sustainable Agriculture. (Cross-listed with Agron). (3-0) Cr. 3. F. Zdorkowski. Agricultural science as a human activity; contem-
porary agricultural trends; agroecological perspective. Comparative analysis of intended and un-
intended consequences of agricultural activities. Emphasis on human dimensions of controversial natural resource issues using a case approach that considers uncertainty and adequacy of information and scientific understanding. Ecological, social, politi-
cal, economic, and ethical implications of issues will be analyzed. Nonmajor graduate credit.

Env S 472. U.S. Environmental History. (Cross-listed with Hist). (3-0) Cr. 3. Prereq: Sophomore classifi-
cation. Survey of the interactions of human communi-
ties with the North American environment. Focus on the period from precontact to the present, with a particular concentration on natural resources, disease, settlement patterns, land use, and conservation poli-
cies. Nonmajor graduate credit.

Env S 482. Environmental Politics and Policies. (Cross-listed with Pol S). (3-0) Cr. 3. F. Prereq: Senior classification. Major ideas and policies related to conservation and ecology. Processes, par-
ticipants, and institutions involved in state, national, and global environmental policymaking. Case studies of environmental controversies and proposals for policy reform. Nonmajor graduate credit.

ment of indicators.

Env S 490. Independent Study. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of instructor and approval of Environmental Studies coordinator. Satisfactory-fail only.

Env S 491. Environmental Law and Planning. (Cross-listed with C.R.P Dan S). (3-0) Cr. 3. S. Prereq: Six credits in natural sciences. Environmental law and policy as applied in planning at the local and state level-
es. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Env S 496. Travel Course. Cr. arr. Repeatable. Prereq: Permission of instructor. Extended field trips to study environmental topics in varied locations. Location and duration of trips will vary. Trip expenses paid by stu-
dents. Check with department for current offerings.

Family and Consumer Sciences

Master of Family and Consumer Sciences (M.F.C.S.)
The College of Human Sciences offers a nonthesis master's degree program that might appeal to individuals with a bachelor's degree in family and consumer sciences/home economics subject area or related disciplines. This program is considered to be a professional master's degree. For students interested in further graduate study beyond the MFCS, the nonthesis degree program may mean additional requirements before completion of a Ph.D. or other terminal degree graduate program.

Students select either a comprehensive option or a specialization option. The comprehensive option can be followed on or off-campus and requires 36 credits covering a variety of family and consumer sciences subject matter. Off-campus courses are offered via the World Wide Web (WWW). Specializations are available in Nutrition; Dietetics; Human Development and Family Studies; Food service and Lodging Management; and Textiles and Clothing.

In addition, students may select a 42-credit specialization in Family Financial Planning (FFP), a 36-credit specialization in Gerontology or a 36-credit specialization in Dietetics. The FFP, Ger-
ontology, and Dietetics specializations, offered in collaboration with six to eight other universities in the Great Plains Interactive Distance Education Al-
liance, are offered exclusively through courses on the Web. The FFP program has been approved by the Board of Examiners of the Certified Financial Planner Board of Standards as a program with the competencies required to permit those completing the degree to sit for the CFP® Certification Ex-
amination. CFP® is a certification mark owned by the Certified Financial Planner Board of Standards.

The Program of Study committee, in consultation with the student, establishes the courses to be taken and the acceptability of transfer credits. The major professor is selected from the discipline in which the concentration of coursework will be taken. Written and oral final integrative examinations are required in lieu of a thesis or creative component. A thesis or creative component could be included on mutual agreement of the student and major professor, with approval of the Gradu-
ate College.

Admission requirements for the MFCS include a bachelor's degree in a family and consumer sciences/home economics subject area or related disciplines, Graduate Record Examina-
tion (GRE) scores (not required for the FFP and Geron specializations), official transcripts, three letters of recommendation, a goal statement, and graduation in the upper one-half of class with a bachelor's degree from a regionally accredited U.S. institution or graduation in the upper one-half of class from a recognized foreign institution.

Non-English speaking international students are required to have a TOEFL score of at least 550 at time of admission.

Graduate Certificates

An 18-credit graduate certificate in Family Financial Planning is offered for students who do not need a master's degree and want to obtain the educational requirements of the Certified Financial Planner Board of Standards CFP® Certification Examination.

A 21-credit graduate certificate in Gerontology is offered. For additional information, students should contact the Research and Graduate Education Office, E262 Lagomarcino, Ames, Iowa 50011-3191, mfcsinfo@iastate.edu

Environmental Studies 234
**Undergraduate Study**

The program offers one curriculum for the bachelor of science degree in Family and Consumer Sciences Education and Studies. Students in the curriculum choose one of three options: Teacher Licensure, Communications, or Professional Studies. Graduates of the teacher licensure option teach in general and occupational programs of family and consumer sciences in middle, junior, and senior high schools. Graduates of the Communications option have a broad-based knowledge of family and consumer sciences and the ability to communicate in a global and technologically changing society. They are able to plan, develop, creatively present and evaluate information. Graduates of the Professional Studies option pursue individualized career goals in family and consumer sciences that apply integrative knowledge of family and consumer sciences in diverse careers for global settings.

Admission to all three options is initiated in the course FCEdS 206. In addition, students in Teacher Licensure follow program and university procedures for admission to the university teacher education program. This program option is approved by the Iowa Department of Education for the preparation of career and technical education family and consumer sciences teachers. Every teacher licensure student must demonstrate achievement of the identified teacher licensure standards. Standards will be assessed in all core courses including FCEdS 206, 214, 280, 306, 318, 403, 413, 417, 460 for additional teacher education requirements, see Teacher Education.

Graduates in Family and Consumer Sciences Education and Studies have a broad understanding of individual and family well-being. Graduates apply knowledge of family and consumer sciences content in global professional settings. They use research findings to improve the well-being of individuals, families, and communities. Due to the integrative and synergistic nature of family and consumer sciences, graduates address and act on complex problems confronting individuals, families, and communities.

Opportunities are available for obtaining a minor from other programs through careful selection of elective credits and consultation with an adviser. For example, students pursuing the Communications and Professional Studies options are encouraged to consider obtaining a minor in journalism and mass communications or in one of the subject matter areas of family and consumer sciences such as family finance, housing, and policy. They also are encouraged to enhance their program by electing relevant additional courses in their area of interest. Students in the Teacher Licensure option may choose to add an additional endorsement such as Health Education or Coaching Interscholastic Athletics.

The program offers a minor in family and consumer sciences education. The minor is earned by successfully completing 15 credits including FCEdS 206, 306, 415, and 418. See program for details.

Communication Proficiency Requirement: C or better in Engr 150 and 250.

**Graduate Study**

The program offers work for the degrees of master of science, master of education, and doctor of philosophy, each with the major, family and consumer sciences education. The M.S. degree requires a thesis; the M.Ed. degree requires a creative component; the Ph.D. requires a dissertation. Minors are available. The Family and Consumer Sciences Education Leadership Academy provides opportunity for completion of a graduate degree through condensed summer courses and distance education delivery. For additional information see http://www.aeshm.hs.iastate.edu/academy/.

Programs for advanced degrees with a major in family and consumer sciences education are tailored to fit the educational background, experience, and professional goals of the student. Areas of study provided by the department include program planning, curriculum, evaluation, research methods, supervision and administration, state and national levels, and teacher education. Opportunities are available for strengthening one’s background in subject matter in other programs in the College of Human Sciences.

Students who complete a graduate program are professional family and consumer sciences educators and teacher educators who foster program planning, implementation, and evaluation at state, national, and international levels. They are producers and disseminators of research and scholarship in family and consumer sciences education and are leaders in programs and services for clientele in diverse settings.

Courses primarily for undergraduate students

FCEdS 110. Orientation. (1-0) Cr. F.S. Orientation to the university, the college, and the college curricula. Adjustment to the university; discussion of student responsibilities; interpersonal, critical thinking, and study skills; and management of time and energy. Development of a long-term curriculum plan. Satisfactory-fail only.

FCEdS 206. Professional Roles in Family and Consumer Sciences. (2-3) Cr. 3. F. Historical development of family and consumer sciences. Overview of various roles in professional settings, e.g., community agencies, secondary schools, business and industry, Cooperative Extension. Completion of a 20-hour practicum in an educational setting.

FCEdS 318. Occupational, Career and Technical Programs. (Dual-listed with 518). (2-0) Cr. 2. S. Prereq: 206 and 400 hours work experience in a family and consumer sciences related job. Planning and implementing programs in occupational family and consumer sciences including FCSLA. Critical impact of selected legislation on family and consumer sciences programs. Techniques for cooperative education, school-to-work, and work-based education programs. May be used toward Multi-Occupational Cooperative endorsement.

FCEdS 403. Learner Assessment for Family and Consumer Sciences Programs. (2-2) Cr. 3. S. Prereq: Enrollment in 413. Philosophy of learner assessment. Development and critique of tests and authentic assessment tools to measure cognitive, affective, and psychomotor learning and to evaluate processes, performances, products, and dispositions. Procedures for grading, interpreting, and reporting assessment data.

FCEdS 415. Program Planning and Evaluation in Family and Consumer Sciences. (3-0) Cr. 3. S. Prereq: 15 credits in Family and Consumer Sciences subject matter. Program development principles including needs analysis, planning, instruction, promotion, evaluation, grant writing and reporting. Approaches appropriate for diverse groups. Environmental and cultural conditions affecting programs. Nonmajor graduate credit.

FCEdS 417. Supervised Teaching in Family and Consumer Sciences. Cr. arr. Repeatable. F.S. Prereq: 413, 24 credits in family and consumer sciences subject matter, cumulative grade point of 2.50, full admission to teacher education. Supervised teaching experience in secondary schools. Examination of ways to implement actions that reflect a professional philosophy of family and consumer sciences for teaching middle and high school level students. Reservation required.

A. Vocational family and consumer sciences. Cr. B. Family and consumer sciences. Cr. 3 to 8.

FCEdS 418. Supervised Experiences in a Professional Setting. Cr. arr. Repeatable. F.S.SS. Prereq: 24 credits in family and consumer sciences. Supervised professional experience in an approved setting such as Cooperative Extension, business, community, human Service, or government agency. Reservation required.

A. Communications. Prereq: 415, 24 credits in family and consumer sciences.

B. Professional Studies. Prereq: 421, 24 credits in family and consumer sciences.

FCEdS 460. Capstone Seminar. (1-0) Cr. 1. S. Prereq: senior classification in Family and Consumer Sciences Education and Studies. Ways professionals work across disciplines to address contemporary social issues that affect individuals and families. Methods to initiate public policy at the local, national, and international levels. Transition from student to professional role.

FCEdS 490. Independent Study. Cr. arr. F.S.SS.

A. Adult Education

C. Curriculum

D. Evaluation

E. Cooperative Extension

G. General

H. Honors

I. International

K. Occupational Education

N. Leadership and Human Relations

P. Special Needs/Mainstreaming

R. Vocational Education

S. Technology and Distance Education
Courses primarily for graduate students, open to qualified undergraduate students

FCEdS 504. Institutional Foundations of Family and Consumer Sciences Leadership. (3-0) Cr. 3. F. Prereq: Graduate classification. Exposure to a variety of selected readings that provide an intellectual foundation and frame the role of the family and consumer sciences profession. Connects the historical and philosophical structure of the profession with perspectives leading to innovative professional action.

FCEdS 506. Curriculum Development in Family and Consumer Sciences. (3-0) Cr. 3. Alt. SS., offered 2011. Prereq: Analysis and development of family and consumer sciences curriculum related to philosophy, design and adaptability within public education programming as influenced by subject matter, professional, national and state educational standards and legislation.

FCEdS 507. Program Development in Family and Consumer Sciences. (3-0) Cr. 3. SS. Prereq: Professional experience in family and consumer sciences or related area. Application of principles of program development to formal and nonformal educational settings, e.g., secondary school family and consumer sciences programs, training positions in business, Cooperative Extension, human services agencies.

FCEdS 508. Models for Teaching Family and Consumer Sciences. (3-0) Cr. 3. S. Prereq: 6 credits in family and consumer sciences. Selecting teaching strategies and instructional materials based on theories of learning and human development that reflect a professional philosophy of family and consumer sciences. Application to formal and nonformal educational settings with diverse audiences.

FCEdS 511. Research Methods. (3-0) Cr. 3. F. Prereq: Graduate classification. An overview of diverse research approaches on methodology for collecting and analyzing quantitative and qualitative data. Critique of research reports and development of research proposals.

FCEdS 518. Occupational, Career and Technical Programs. (Dual-listed with 318). (2-0) Cr. 2. S. Prereq: 400 hours work experience in a family and consumer sciences related job. Planning and implementing programs in occupational family and consumer sciences including FCLCA. Impact of selected legislation on family and consumer sciences programs. Techniques for cooperative education, school-to-work, and work-based education programs. Critique of national occupational competency standards. May be used toward Multi-Occupation Cooperative endorsement.

FCEdS 519. Reflective Human Action Leadership. (2-0) Cr. 2. Alt. SS., offered 2011. Examination of the meaning and qualities of reflective human action. Analysis of the roles that reflective human action plays in Society, the profession, and family life. Critically and imaginatively address social needs, identify meaningful leadership opportunities and engage in worthwhile actions that benefit individuals, families and communities.

FCEdS 520. Supervision in Family and Consumer Sciences Programs. (3-0) Cr. 3. Alt. SS., offered 2011. Prereq: Professional experience or 6 credits in family and consumer sciences. Examination of change, communication and leadership theories as related to supervision. Application of conferencing techniques, observation skills, and performance evaluation to professional leadership positions in educational settings.

FCEdS 521. International Perspectives of Family and Consumer Sciences. (3-0) Cr. 3. Alt. SS., offered 2010. Prereq: 6 credits in family and consumer sciences from an international perspective; focus on the roles and responsibilities of women in development. Application and adaptation of content to working with families in other countries and cultures. Student participation in cultural activities and critique of international research articles.

FCEdS 524. International Study Abroad Seminar. Cr. arr. Repeatable. F.S.S.S. Orientation to study abroad program considering topics related to country and location; travel arrangements and preparation for study abroad; on-site fieldwork and academic experiences in an international setting. Individually-developed research project on a topic related to study abroad.

FCEdS 593. Workshop. Cr. arr. Repeatable. F.S.S.S. Prereq: 6 credits in family and consumer sciences or education. Concentrated group study of new developments in family and consumer sciences education. Sections offered will vary from year to year.

FCEdS 599. Creative Component. Cr. arr. Prereq: 9 graduate credits in Family and Consumer Sciences Education.

Courses for graduate students

2009-2011

FCEdS 618. Coordination of Educational Programs in Family and Consumer Sciences. (2-0) Cr. 2. Alt. SS., offered 2011. Prereq: 520. Approaches to coordination of family and consumer sciences programs in adult education, extension, state department of education, and teacher education. Study of undergraduate programs in family and consumer sciences education, observation and participation in undergraduate courses, and practicum experience.

FCEdS 626. Advanced Research Methods in Family and Consumer Sciences. (3-0) Cr. 3. Alt. SS., offered 2011. Prereq: 511. Examination of various modes of inquiry used to conduct research in educational and social arenas culminating in development of a research project. Empirical/analytic, interpretive and critical/post-modern inquiries in relation to human context will be discussed.

Courses primarily for graduate students

FFP 520. Family Systems. (3-0) Cr. 3. F. S. Research and theory relating to family functioning through the life cycle, especially financial decision making during crisis and conflict. Emphasis on factors that shape family values, attitudes, and behaviors from a multicultural perspective. New and emerging issues critical to family functioning are addressed.

FFP 525. Family Economics. (3-0) Cr. 3. SS. Major issues related to the economics of families include household production, and human capital development; the economics of crises, public policy and family life cycle spending, saving and borrowing; and new and emerging issues in the field of family economics; special attention to the role of ethics in family economic issues. A theoretical and research perspective are used to illuminate the concepts in the course.

FFP 530. Fundamentals of Family Financial Planning. (3-0) Cr. 3. F. The nature and functioning of financial systems, including currencies, markets, monetary and fiscal policy, and supply/demand for land, labor, and capital. Focus is on the impact of global financial interdependence on individuals and families in the U.S. Current and emerging issues, as well as current research and theory relative to financial systems.

FFP 535. Financial Counseling. (3-0) Cr. 3. S. Theory and research are emphasized to understand the relationship between the client and the practitioner, including communication techniques, motivation and esteem building, the counseling environment, ethics, and methods of data intake, verification, and analysis. Other topics include legal issues, compensation, uses of technology to identify resources, information management, and current or emerging issues.

FFP 540. Estate Planning for Families. (3-0) Cr. 3. S. Fundamentals of the estate planning process, including estate settlement, estate and gift taxes, property ownership and transfer, and powers of appointment. Tools and techniques used in implementing an effective estate plan, ethical considerations used in providing estate planning services, and new and emerging issues in the field. Case studies provide experience in developing estate plans suitable for varied family forms.

FFP 541. Housing and Real Estate in Family Financial Planning. (Cross-listed with HD FS). (3-0) Cr. 3. SS. www only. The role of housing and real estate in the family financial planning process, including taxation, mortgages, financial calculations, legal concerns, and ethical issues related to home ownership and real estate investments. Emphasis on emerging issues in the context of housing and real estate.

FFP 545. Retirement Planning, Employee Benefits, and the Family. (3-0) Cr. 3. F. S. Study of micro and macro considerations for retirement planning. Survey of various types of retirement plans, ethical considerations in providing retirement planning services, assessing and forecasting financial needs in retirement, and integration of retirement plans with government benefits.

FFP 555. Insurance Planning for Families. (3-0) Cr. 3. S. In-depth study of risk management concepts, tools, and strategies for insurance and financial planning, including life insurance; property and casualty insurance; liability insurance; accident, disability, health, and long-term care insurance; and government-sponsored programs designed to meet some of the family's financial needs, and related choices. Relationships between investment options and employee/employer benefit plan choices. Current and emerging issues and ethics are included.

FFP 565. Personal Income Taxation. (3-0) Cr. 3. F. In-depth study of the income tax process and procedures including tax regulations, tax return preparation, the tax audit processes, the appeals process, preparation for an administrative or judicial forum, and ethical considerations of taxation. New and emerging issues related to taxation. Family/individual case studies provide practice in applying and analyzing tax information and recommending appropriate tax strategies.

FFP 570. Professional Practices in Financial Planning. (3-0) Cr. 3. S. Challenges of managing financial planning practices including, but not limited to: business valuation, personnel, marketing, client services, ethics and technological applications. Relying both on a theoretical as well as an applied approach, students analyze case studies that provide relevant, practical exposure to practice management issues, with a strong emphasis on current research findings.

FFP 583. Investing for the Family’s Future. (Cross-listed with HD FS). (3-0) Cr. 3. F. Prereq: HD FS 483. Evaluation of investment markets for the household. Analysis of how families choose where to put their savings. Emphasis is on using the family’s overall financial and economic goals to help inform investment choices.

FFP 595. Financial Planning - Case Studies. (3-0) Cr. 3. F.S. Prereq: FFP 530, 540, 545, 555, 565, 583. Professional issues in financial planning, including ethical considerations, regulation and certification requirements, communication skills, and professional responsibility. Students are expected to utilize skills obtained in other courses and work experiences in the completion of personal finance case studies, the development of a targeted investment policy, and other related financial planning assignments.

Finance

Marvin Bouillon, Chair of Department
University Professor: Power
Professors: Carter, Cowan, Hayes, Stover
Associate Professors: Campbell, Dark, Sapp
Assistant Professors: Borisova, Flores, Porter, Yunus
Lecturers: Hoff, Mccullough, Nappnain, Premkumar

Undergraduate Study

For undergraduate curriculum in business, major in finance, see College of Business, Curricula.

In addition to the basic business requirements, finance majors must also complete: (1) Fin 310, 320; (2) select four from Fin 330, 361, 371, 380, 415, 424, 425, 427, 445, 462, and 472 of which two must be at the 400 level, and (3) select one from Act 393, 398, 391 and one 400 level accounting course or Finance courses listed in (2) above. Statistics 326 is highly recommended to be taken prior to Fin 310 and Fin 320. Statistics 326 is required for Fin 380 and 400 level finance courses.

The courses in finance constitute a broad program of study designed to provide a descriptive, behavioral, and analytical background of financial management to enable students to qualify for opportunities in business, government, insurance, brokerage, government, real estate, and financial management of business enterprises. Finance is also an excellent area for those who wish to become more knowledgeable as consumers, particularly in the fields of investments, insurance, and real estate.

Areas of study in the field of finance include financial management, corporate investment, real estate, and financial services. Upper-level courses include a review of contemporary literature in the field, case studies, and financial problem analysis integrating finance courses previously taken.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such an education should provide the student with: (1) a mastery of basic financial concepts and methods of analysis; (2) an
understanding of financial operations in a global setting and of the role of financial institutions in the economics system; (3) an ability to effectively communicate and work with others as the finance member of a team; (4) an ability to demonstrate leadership capabilities in financial analysis and portfolio management.

The department also offers a minor for non-Finance majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand-alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

### Graduate Study

The department participates in the M.B.A. full-time and part-time programs. The M.B.A. program is a 48-credit program, nonthesis, noncreative component curriculum. Twenty-four of the 48 credits are core courses and the remaining 24 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in finance. This specialization requires that 12 of the 24 credits of the graduate electives be from an approved list of graduate finance courses.

#### Courses primarily for undergraduate students

**Fin 301. Principles of Finance. (3-0) Cr. 3. F.S.S.**

Prereq: Acct 284, Econ 101, Stat 228. Introduction to financial management with emphasis on corporate financing and investment decision making, time value of money, asset valuation, capital budgeting decision methods, cash budgeting, and financial markets.

**Fin 310. Corporate Finance. (3-0) Cr. 3. F.S.S.**

Prereq: 301. Theory used in a firm’s investment and financing decisions. Analysis of environment in which financial decisions are made, applications of analytical techniques to financial management problems.

**Fin 320. Investments. (3-0) Cr. 3. F.S.S.**

Prereq: 301. Introduction to various investment media and markets from the viewpoint of the individual investor. Emphasis on mechanics of trading, behavior of security prices, corporate stocks and bonds, mutual funds, individual asset and portfolio selection techniques, and performance evaluation.

**Fin 327. Fixed Income Securities. (3-0) Cr. 3.**

Prereq: 307, Stat 326. Valuation of fixed income securities, including price determinations, term structure of interest rates, default, duration, and hedging of interest rate risk. Analysis of active and passive investment strategies for managing fixed income portfolios. Nonmajor graduate credit.

**Fin 330. Financial Markets and Institutions. (3-0) Cr. 3. F.S.**

Prereq: 301. Introduction to the structure and operations of the United States financial system and its markets and institutions. Emphasis on developing and integrated understanding of markets and financial service providers including global linkages.

**Fin 361. Personal Risk Management and Insurance. (3-0) Cr. 3.**

**Fin 371. Real Estate Principles. (3-0) Cr. 3.**

Prereq: Econ 101. Legal, economic, social and financial aspects of real estate, including property rights, contracts, mortgage instruments, tax factors, brokerage, valuation, risk and return analysis, financing techniques, and investments.

**Fin 415. Business Financing Decisions. (3-0) Cr. 3.**

Prereq: 301 and Stat 326. In depth study of the firm’s external financing decision. Emphasis on the development of cash flow statements, projected financing needs and the selection of the appropriate financing instrument. Focus on case studies and application of developed techniques on actual field project. Nonmajor graduate credit.

**Fin 424. Financial Futures and Options. (3-0) Cr. 3.**

Prereq: 320 and Stat 326. Advanced study of the pricing and use of derivative market instruments, current topics and issues. Nonmajor graduate credit.

**Fin 425. Security Analysis and Portfolio Management. (3-0) Cr. 3.**

Prereq: 320, Stat 326 and permission of instructor. Advanced study of security analysis, security structure, selection techniques and portfolio management. Emphasis on the applications of methods learned via the selection and evaluation of a portfolio of actual securities purchased in securities markets in the U.S. or abroad. Tracking and periodic reporting of the portfolio’s performance relative to standard benchmarks is also required.

**Fin 428. Advanced Fixed Income Analysis and Portfolio Management. (3-0) Cr. 3.**

Prereq: 327, 320, Stat 326 and permission of the instructor. Advanced analysis of fixed income markets and securities, including valuation of securities, corporate bonds, mortgage backed securities. Students are also required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active beta taken on market direction, duration, yield curve, and credit spreads. Nonmajor graduate credit.

**Fin 445. Bank Management Decisions. (3-0) Cr. 3.**

Prereq: Stat 326 and Fin 330 or Econ 353. Analysis of operations of depository financial institutions from management viewpoint. Emphasis on evaluating performance, point of failure, asset and liability management, the role of capital, and the operating environment. Nonmajor graduate credit.

**Fin 462. Corporate Risk Management and Insurance. (3-0) Cr. 3.**

Prereq: 301 and Stat 326. Analysis of an organization’s approaches to the management of property, and pure risk. Emphasis on the consideration and selection of risk control and financing treatments and the decision making framework underlying the alternatives selected. Covers commercial insurance, self-insurance, and alternative financing arrangements. Nonmajor graduate credit.

**Fin 472. Real Estate Finance. (3-0) Cr. 3.**

Prereq: 301 and Stat 326. Introduction to the techniques of assessing the value of real estate and real estate financing instruments. Nonmajor graduate credit.

**Fin 480. International Finance. (3-0) Cr. 3.**

Prereq: 301 and Stat 326. Advanced study of contemporary topics and issues in international finance.

**Fin 490. Independent Study. Cr. arr. Repeatable.**

Prereq: 301 and Stat 326 and permission of instructor.

**Fin 499. Finance Internship. (3-0) Cr. arr.**

Prereq: F.S.S. Prereq: GPA 2.5; permission of internship coordinator; Stat 326, 498A, 498B; 498C: 301 plus 3 additional credits in finance; 499D: 320. Supervised experience in a private sector banking, insurance, real estate or investments organization or in a governmental agency that regulates such organizations. Satisfaction-tail only:

A. Banking  
B. Insurance  
C. Real Estate  
D. Investments

**Courses primarily for graduate students, open to qualified undergraduate students**

**Fin 505. Financial Valuation and Corporate Financial Decisions. (2-0) Cr. 2.**

Prereq: Graduate classification. Modern theory of corporate finance and its application to financial management problems. Advanced treatment of firm’s investment, financing, and dividend decisions and survey of related research. Examples of potential topics are the investment banking process, convertible securities and warrants, financial derivatives, asset leasing, mergers and divestitures, leveraged buyouts, international financial management, executive compensation, and pension fund strategy.

**Fin 515. Case Studies in Financial Decision Making. (3-0) Cr. 3.**

Prereq: 505. This course focuses on case studies to develop an integrated set of financial decisions. Topic areas include fixed asset, working capital, capital structure, dividend and merger/acquisition decisions. The objective of the course is to examine different firm settings and establish a framework within which to apply financial tools.

**Fin 520. Investments. (3-0) Cr. 3.**

Prereq: 3. F. Prereq: Graduate classification. An applied course in derivative markets. Topics covered include futures and options markets, option pricing, swaps, use and rating of insurance products, and alternative forms of reinsurance. Emphasis will be placed on agricultural commodity markets, but energy, interest, currency and stock index contracts will also be covered.

**Fin 572. Real Estate Finance. (3-0) Cr. 3.**

Prereq: MBA Core. Survey of techniques for assessing the value of real estate assets. Introduction to real estate financing instruments, their use and appropriateness.

**Fin 590. Special Topics. Cr. arr. Repeatable.**

F.S.S. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of finance.

### Food Science and Human Nutrition

Ruth MacDonald, Chair of Deartment

Distinguished Professors: Birt, Sebranek

Distinguished Professors (Emeritus): N. Jacobson, Roderuck

University Professors: Murphy, P. White, Wilson

University Professors (Emeritus): Glatz, Hammond, Parrish

Professors: Alekel, Hendrich, Hurburgh, Jane, L. Johnson, MacDonald, Nikolau, Prusa, Van Itterbeek, Robson, Sharp, Stupnick, Taylor, Woltering, Wurth

Professors (Emeritus): Dupont, Garcia, Kaplan, Kraft, Lagrange, Mcmillan, Runyan, Rust, Schafer, Stomer, Swan, Topel, Walker

Professor (Collaborator): Pometto

Associate Professors: Boyston, Campbell, Ford, Love, Mendoza, Reddy, Schalinske, Wang, W. White

Associate Professors (Emeritus): Bohnenkamp, Madden, Mccomber, Oakland

Associate Professor (Collaborator): Marquis

Assistant Professors: Beattie, Brehm-Stecher, Hollis, Jung, Lamsal, Lanningham-Foster, Litchfield, Rowling

Assistant Professors [Collaborators]: Beaunais, Klucinec, Lopes

Lecturers: Basler, Martin

Lecturers: Beirman, Bergquist, Dahlstrom, Hanson, Oldham, St. Germain, Strohl, Svendsen

Senior Clinician: Anderson

Clinicians: Barclay, J. Johnson

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These curricula include culinary science,
diabetes, diet and exercise, food science, and nutritional science. Visit the department web site at: www.fshn.hs.iastate.edu/.

Undergraduate Study
Culinary science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internships in the food industry and culinary business are required. Culinary science graduates are qualified to work as managers and specialists in food research, product development, nutritional applications, and food marketing and sales.

The Didactic Program in Dietetics (DPD) is accredited by the American Dietetic Association (ADA). The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor’s and Master’s degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited/approved dietetic internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to obtain a Registered Dietitian (R.D.) and to practice in the field of dietetics. The dietetic program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates are prepared for careers in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs. There is a $30 fee for a statement of verification of completion of the DPD. For information about verification statements provided to non-ISU students or students with degrees from international universities, see the department website: www.dietetics.iastate.edu.

Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and storage of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also serve in government regulatory agencies and academic institutions.

Three options are available in food science: food science and technology, food science and industry, and consumer food science. The food science and technology option prepares students to pursue either the food science and technology or the food science and industry option. Students who wish to go to graduate or professional schools or who are College of Agriculture Scholars of Excellence should elect food science and technology. Students who wish to emphasize business, journalism, or special aspects of food science should elect food science and industry. Students interested in test kitchen positions, food product formulation and recipe development, food promotion, and consumer services in government and industry should elect the consumer food science option.

Students who wish to combine education in engineering with food science may select additional courses in chemical or agricultural engineering. Double majors are available and may require an additional year.

Nutritional science offers students a strong basic science education along with human nutrition expertise that enables them to gain the knowledge and skills necessary to work in research laboratories of colleges and universities, government agencies, industries, and foundations. The curriculum can serve as a preprofessional program for medicine, dentistry, veterinary medicine, or for graduate study in nutrition or other biological sciences.

Students graduating with degrees in culinary science, dietetics, diet and exercise, food science, or nutritional science will be able to: 1) demonstrate a high level of technical competence in their chosen field, perform successfully in a graduate program, supervised practice program or entry-level professional position; 2) communicate effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 8) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field.

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (Engl 150 and 250 or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

A combined Bachelor of Science and Master of Science (B.S./M.S.) degree in diet and exercise is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FSHN), within the College of Agriculture and Life Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as freshmen in the pre-diet and exercise program. In the fall of the junior year, students apply for admission to the B.S./M.S. program. Students not accepted into the program continue toward completion of a B.S. degree in dietetics or kinesiology and health.

Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in diet and exercise.

Well qualified students in food science and technology or in nutritional science who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue B.S. and M.S. degrees in which students take both undergraduate and graduate courses. See the B.S./M.S. program under Graduate Study.

The department offers work for the degrees master of science and doctor of philosophy with majors in food science and technology and in nutritional sciences, and minors in food science and technology and in nutrition. Graduate work in meat science is offered as a co-major in animal science and food science and technology.

Prerequisite to major work is a baccalaureate degree in food science and nutrition, or other physical or biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, sociology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition.

The department offers work for minors in food science and in nutrition and participates in the interdepartmental minor in food safety. See department office or web site for requirements: www.fshn.hs.iastate.edu/ugrad/ugminors.php.

Food Safety Minor
Patricia A. Murphy (Coordinator)
The Interdepartmental food safety minor is designed to provide undergraduate students with exposure to the principles of food safety to complement their current major and offer new opportunities for their future careers. Depending on the student’s major, the minor enhances the student’s expertise in food safety issues pertinent to the student’s major. Student learning outcomes include: awareness of food safety issues as they appear in each step of the food chain; ability to analyze a situation, identify food safety problems, use resources to gain additional information; develop a procedure or solution to identified problems; examine proposed solutions for viability and effectiveness; and to be able to speak and write about food safety issues. Graduates with a food safety minor are better prepared for employment in agricultural, medical, and veterinary medical agencies and with state, national and international businesses.

The food safety minor requires 15 credits of coursework with 9 credits from 3 core courses and elective courses to supplement the training in the minor. See approved list for minor courses at www.fshn.hs.iastate.edu/ugrad/ugminors.php.

Postbaccalaureate Program
The didactic internship program has received initial accreditation from the American Dietetic Association. For more information, refer to Special Interests Programs listed under the College of Human Sciences or visit the website at www.dietetics.iastate.edu. There is a nonrefundable application fee of $75 and a program fee of $500 payable upon acceptance into the program.

Courses primarily for undergraduate students

**FS HN 101. Food and the Consumer, (3-0) Cr. 3.** F.S. Prereq: High school biology and chemistry, or 3 credits each of biology and chemistry. The food system from point of harvest to the consumption of the food by the consumer. Properties of food constituents. Problems facing food against deterioration and microbial contamination. Introduction of foods into the marketplace. Processes for making various foods. Government regulations. Use of food additives. Current and controversial topics. Electronic communication from web emphasized for class reports, notes and assignments.

**FS HN 104. Introduction to Professional Skills in Culinary Science, (3-0) Cr. 1. S.** Introduction to culinary science. Students will develop fundamental culinary skills by arranged on-campus work experience (100 hours). Sessions with instructor arranged.

**FS HN 110. Professional and Educational Preparation, (1-0) Cr. 1. F.** Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation, enhancement of communication skills, and portfolio development. Satisfactory-fail only.

**FS HN 112. Orientation to Learning and Productive Team Membership, (Cross-listed with NREM, Aer E, Hort, TSM). (2-0) Cr. 2. F.** Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; evaluation of individual and group interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing interconnectedness of the individual, the community, and the world.

**FS HN 114. Developing Responsible Learners and Effective Leaders, (Cross-listed with Hort, NREM, TSM). (2-0) Cr. 2.** Focus on team and community. Application of human learning, evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

**FS HN 167. Introduction to Human Nutrition, (3-0) Cr. 3. F.S.S. Prereq: High school biology or 3 credits of biology. Understanding and implementing present day knowledge of nutrition. The role of nutrition and food intake in the health and well being of the individual and family.

**FS HN 203. Contemporary Issues in Food Science and Human Nutrition, (1-0) Cr. 1. F.S.** Introduction to published research and discussion of current issues in food science and human nutrition. Emphasis on sources of credible information, ethics, communication and portfolio development.

**FS HN 265. Nutrition for Active and Healthy Life-styles, (3-0) Cr. 3. S. Prereq: Credit or enrollment in BMBB 301. Fundamentals of nutrient metabolism and nutrient requirements. Role of macronutrient metabolism in physical performance and disease prevention. Effect of manipulation of macronutrient metabolism on physical performance and disease prevention. Applications of nutrient metabolism principles to dietary recommendations and planning.

**FS HN 272. Basic Principles of Food Processing, (1-0) Cr. 3. F. S. Prereq: Credit or enrollment in Chem 231 & 231L and Biol 212. Biological and physico-chemical principles of food processing as they determine the quality of foods.

**FS HN 298. Cooperative Education, Cr. R. F.S.S. Prereq: Permission of the department chair; sophomore classification. Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

**FS HN 311. Food Chemistry, (3-3) Cr. 4. Pr. F.S. Prereq: 203, TSM 118, Chem 231 and 231L or 331L; credit enrollment in both. The structure, properties, and chemistry of food constituents and animal and plant commodities. Nonmajor graduate credit.

**FS HN 314. Foundations of Culinary Science, (1-0) Cr. 1. S. Prereq: 214 and junior classification. Introduction to the roles culinary scientists hold within industry including product development, research, and quality assurance. Discussions focused on professional and educational development, enhancement of communication skills, ethics and emerging issues and trends in culinary science.

**FS HN 342. World Food Issues: Past and Present, (Cross-listed with Agron, Env S, T SCI). (3-0) Cr. 3. F.S. Prereq: Junior classification. Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects.

Nonmajor graduate credit.

**FS HN 351. Unit Operations in Food Processing, (3-0) Cr. 3. S. Prereq: A course in calculus and Phys 106. Introduction to material and energy balances. Fluid flow, physical and thermal properties of food materials. Fundamentals of heat and mass transfer. Application of momentum and heat transfer to unit operations in food processing. Calculations and computer applications in food processing. Field trip. Nonmajor graduate credit.

**FS HN 360. Advanced Human Nutrition and Metabolism, (3-0) Cr. 3. F.S. Prereq: 261, 3 credits in biochemistry; 3 credits in physiology recommended. Physiological and biochemical basis for nutrient needs; assessment of nutrient deficiency and toxicity; examination of nutrient functions and regulation of metabolism; nutrient-gene interactions. Nonmajor graduate credit.

**FS HN 361. Nutrition and Health Assessment, (1-3) Cr. 2. F.S. Prereq: Credit or enrollment in 360, 3 credits in statistics. The assessment of nutritional status in healthy individuals. Laboratory experiences in food composition and assessment of dietary intake, body composition, and biochemical indices of nutritional status. Nonmajor graduate credit.

**FS HN 362. Nutrition in Growth and Development, (3-0) Cr. 3. S. Prereq: 360; credit or enrollment in a course in physiology. Nutrient needs throughout the life cycle. Interrelationships of genes, gene expression and nutrients with physiological outcomes during
human development and aging. Nonmajor graduate credit.

FS HN 398. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of the department chair; junior classification. Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

FS HN 403. Food Laws, Regulations, and the Regulatory Process. (2-0) Cr. 2. S.SS. Prereq: 3 credits in food science coursework at 200 level or above. History of the development of the current federal and state food regulations. Guidelines that govern the practice of regulating the wholesomeness of red meats, poultry, and eggs. Presentation of state and federal food regulations. Nonmajor graduate credit.

FS HN 405. Food Quality Assurance. (2-2) Cr. 3. S.SS. Prereq: 214 or 272 or 471; Stat 101 or 104. Basis of food quality control/assurance programs and establishment of decision-making processes using official (government and industry) instrumental, chemical, and sensory procedures. Statistical process and quality control procedures and their applications to various food systems. Development of hazard analysis procedures, specifications, grades, and standards. Nonmajor graduate credit.

FS HN 406. Sensory Evaluation of Food. (Dual-listed with 560). (2-0) Cr. 1. S.SS. Prereq: 214 or 311 or An S 380; 3 credits in statistics. Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements of color and texture. Acceptance and preference testing.

FS HN 407. Microbiological Safety of Foods of Animal Origin. (Dual-listed with 567). (Cross-listed with Micro). (3-0) Cr. S. S. Prereq: 420. Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Points (HACCP) system.

FS HN 410. Food Analysis. (2-3) Cr. 3. S. Prereq: 214 or 311 or BBMB 311 or Chem 211; TSM 115. An introduction to the theory and application of physical and chemical methods for determining the constituents of food. Modern separation and instrumental analysis. Use of food composition data bases. Nonmajor graduate credit.

FS HN 411. Food Ingredient Interactions and Formulations. (1-3) Cr. 2. F. Prereq: 214 or 311. Application of food science principles to ingredient assurance in food products. Laboratory procedures for standard formulations and instrumental evaluation, with emphasis on problem-solving and critical thinking. Nonmajor graduate credit.

FS HN 412. Food Product Development. (Dual-listed with 512). (2-6) Cr. 4. S. Prereq: 311 or 411. 471. Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, microbiology, sensory evaluation, and plant experiences. Electronic communication from web emphasized for class reports, notes and assignments. Nonmajor graduate credit.

FS HN 419. Foodborne Hazards. (Cross-listed with Micro, Tox). (3-0) Cr. 3. Alt. A., offered 2010. Prereq: Micro 201 or 302; a course in biochemistry. Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Only one of FS HN 419 and 519 may count toward graduation. Nonmajor graduate credit.

FS HN 420. Food Microbiology. (Cross-listed with Micro, Tox). (3-0) Cr. 3. F. Prereq: Micro 201 or 302. Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications. Nonmajor graduate credit.

FS HN 421. Food Microbiology Laboratory. (Cross-listed with Micro). (0-6) Cr. 3. F. Prereq: Micro 201 or 302; 201L or 302L. Credit or enrollment in Micro 420. FS HN 203. Standard techniques used for the microbiological examination of foods. Independent and group projects. Presented questions in food microbiology. Emphasis on oral and written communication and group interaction. Nonmajor graduate credit.

FS HN 441. Dietetics Management. (1-9) Cr. 5. F.SS. For students enrolled in the dietetic internship program. Supervised participation in and analysis of organizational leadership, human resource management, budget and quantity food production management, including quality control, menu planning, work methods and other functions related to business management in food service, health care and other institutions. Satisfactory-fail only.

FS HN 442. Medical Dietetics I. (3-0) Cr. 8. S.SS. For students enrolled in the dietetic internship program. Biological basis of medical, drug, and diet therapy for selected pathologies. Consideration of factors in planning and conducting nutritional care of patients. Integration of principles with clinical experience. Satisfactory-fail only.

FS HN 443. Medical Dietetics II. (1-9) Cr. 5. F.SS. Prereq: Concurrent enrollment in 442. For students enrolled in the dietetic internship program. Supervised clinical experience in assessing, implementing and evaluating nutritional care of patients in specialized clinical settings. Satisfactory-fail only.

FS HN 445. Experience in Community Dietetics. (1-6) Cr. 3. S.SS. For students enrolled in the dietetic internship program. Supervised experience in planning and providing nutritional care for individuals and groups in a variety of community settings. Satisfactory-fail only.

FS HN 446. Experience in Dietetics. (2-0) Cr. 2. F.SS. For students enrolled in dietetic internship. Supervised experience in planning and providing nutrition education for individuals and groups in a variety of dietetic settings. Satisfactory-fail only.

FS HN 448. Professional Development Assessment. (Dual-listed with 548). (1-0) Cr. 1. S.SS. For students enrolled in the dietetic internship program. Web-based course providing information and practice for students to assess and evaluate their own professional development and continuing professional education needs. Satisfactory-fail only.

FS HN 461. Medical Nutrition and Disease I. (4-0) Cr. 4. F. Prereq: 380, 361; 3 credits in physiology at 300 level or above. (Dual-listed with Nutr 561) Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state. Recitation section (1 cr.) will focus on refinement of assessment skills, diagnosis of nutritional problem, nutrition care, and documentation.

FS HN 463. Community Nutrition. (3-0) Cr. 3. F. Prereq: 362. Dual-listed with Nutr 563. Survey of current public health nutrition problems among nutritionally vulnerable individuals and groups. Discussion of the multidimensional nature of those problems and of community programs addressing them. Grant writing as a means for funding community nutrition program development. Significant emphasis written and oral communication at the team and professional level. Field trip. Nonmajor graduate credit.

FS HN 464. Medical Nutrition and Disease II. (3-0) Cr. 3-4. S. Prereq: 360, 461; 3 credits in physiology at 300 level or above. (Dual-listed with Nutr 564) Pathophysiology of selected acute and chronic disease states and their associated medical problems.

Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state. Recitation section (1 credit) will focus on refinement of assessment skills, diagnosis of nutritional problem, nutrition care, and documentation. Course may be taken for 4 credits for dietetics degree, diet and exercise degree, or if Didactic Program in Dietetics (DPD) verification statement of completion is desired. Students in non-dietetics majors may take the (3 credit) lecture portion without the recitation section.

FS HN 471. Food Processing. (3-0) Cr. 3. F. Prereq: Micro 201 or 302; Chem 163; Phys 106. Food preservation, including packaging, fermentation, irradiation, canning, freezing, dehydration, additives. Sanitation and plant design. Applications to food products. Nonmajor graduate credit.

FS HN 472. Food Processing Laboratory. (Dual-listed with 572). (1-3) Cr. 2. F. Prereq: 351; credit or enrollment in 471. Pilot plant experiences such as thermal processing, food fermentations, oil seed processing, high pressure processing, corn wet milling, industrial baking, and waste treatment. Special emphasis on interpreting data, writing project reports, and applying engineering principles from FS HN 351.

FS HN 480. Professional Communication in Food Science and Human Nutrition. (1-0) Cr. 1. F.S. Prereq: 203; senior classification in the department. Presentation of current topics and issues of public policy. Emphasis on communication in the profession and portfolio assessment.

FS HN 489. Issues in Food Safety. (Cross-listed with An S, HRI, VDPAM). (1-0) Cr. 1. S. Prereq: Credit or enrollment in FS HN 101 or 272 or HRI 233; FS HN 419 or 420; FS HN 403. Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

FS HN 490. Independent Study. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of instructor. Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

A. Dietetics
B. Food Science
C. Nutrition
D. International Experience
E. Entrepreneurship
H. Honors

FS HN 491. Supervised Work Experience. Cr. arr. Repeatable. F.S.SS. Prereq: Advance approval of instructor and adviser. Supervised off-campus work experience relevant to the academic major. A maximum of 4 credits of FS HN 491 may be used toward graduation. Satisfactory-fail only.

A. Dietetics
B. Food Science
C. Nutrition
D. Culinary Science

FS HN 492. Research Concepts in Human Nutrition. (1-3) Cr. 2. F. Prereq: junior or senior classification. Students will develop and implement a research project with faculty supervision, based on knowledge gained from nutrition, biology and chemistry courses. Students will prepare a research proposal, conduct research and report results. Students will gain appreciation for independent research and experience creative and innovative aspects of nutrition research.
Courses primarily for graduate students, open to qualified undergraduate students

FS HN 502. Advanced Food Science-Chemistry. (1-0) Cr. 1 S. Prereq: 3 credits in organic chemistry. Key principles and applications in the chemistry of food.

FS HN 503. Advanced Food Science-Processing. (1-0) Cr. 1 Alt., S., offered 2010. Prereq: 3 credits each in physics and mathematics. Key principles and applications in the processing of food.

FS HN 504. Advanced Food Science-Microbiology. (1-0) Cr. 1 S. Prereq: 3 credits each in Microbiology and organic chemistry. Key principles and applications in the Microbiology of food.

FS HN 505. Short Course in Food Science. Cr. F.S.SS. Prereq: Permission of instructor.

FS HN 506. Sensory Evaluation of Food. (Dual-listed with 406). (2-3) Cr. 3 F. Prereq: 214 or 311 or An S 380; 3 credits in statistics. Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements of color and texture. Acceptance and preference testing.

FS HN 507. Microbiological Safety of Foods of Animal Origins. (Dual-listed with 407). (Cross-listed with Micro). (3-0) Cr. 3 S. Prereq: Micro 420. Examination of the various factors in the production of foods of animal origin through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

FS HN 512. Food Product Development. (Dual-listed with 412). (2-6) Cr. 4 S. Prereq: 311 or 411, 471. Principles of developing consumer packaged food products. Application of skills developed in food chemistry, formulation, microbiology, and processing. Some pilot plant experiences. Electronic communication from web emphasized for class reports, notes and assignments.

FS HN 515. Regulatory Toxicology. (Cross-listed with Tox). (1-0) Cr. 1 Alt., F. offered 2010. Prereq: BBMB 404 or FS HN 403. Regulatory toxicology in the real world. Approaches used by toxicologists in regulatory agencies for generating, enforcing and complying with laws and regulations in an unambiguous, defensible manner. Different obligations of scientists in research and regulatory settings. Perform simple risk assessments and suggest way to deal with data gaps. Examine strengths and weaknesses of common approaches used by regulatory agencies.

FS HN 529. Foodborne Toxins. (Dual-listed with 429). (2-0) Cr. 2 Alt., F., offered 2009. Prereq: a course in biochemistry. Mechanisms of action, metabolism, sources, remediation or detoxification, risk assessment of major foodborne toxins of current interest, design of HACCP plans for use in food industries targeting foodborne toxins. Taught online only.

A. DNA Techniques. Include genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.SS.)

B. Protein Techniques. Include fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. (S.SS.)

C. Cell Techniques. Include immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)

D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transforms. (S.)

E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F.)

FS HN 543. Medical Diabetics II. (1-0) Cr. 3 F.SS. Prereq: Concurrent enrollment in dietetic internship or MFCS. Discussion of diabetes mellitus, diagnosis, intervention, and outcomes of neurological problems in complex medical conditions.

FS HN 548. Professional Development Assessment. (Dual-listed with 448). (Cross-listed with Diet). (1-0) Cr. 1 S. Prereq: RD credential or enrollment in GPIDEA MFCS in Dietetics. Web-based course providing information and practice for student to assess and evaluate own professional development and continuing professional education needs. Completion of professional 5-year plan. Satisfaction-fail only.

FS HN 567. Nutrition for Dietitians. (Cross-listed with Diet). (3-0) Cr. 3 Alt., F., offered 2009. Prereq: 360; BBMB 301, undergraduate course in physiology. RD credential or enrollment in GPIDEA MFCS in Dietetics. Study of the current scientific literature to evaluate current trends and issues in nutrition science and dietetic practice. Emerging areas of research investigating the role of nutrients in health and disease in humans will be explored. Emphasis on the impact of emerging research on nutrition recommendations and interventions designed to promote human health.

FS HN 572. Food Processing Laboratory. (Dual-listed with 472). (1-3) Cr. 2 F. Prereq: 503 or equivalent. Pilot plant experiences such as thermal processing, food fermentation, oil seed processing, high pressure processing, corn wet milling, industrial baking, and waste treatment. Special emphasis on interpreting data, writing project reports, applying engineering principles from FS HN 351, and special projects for each exercise.

FS HN 575. Processed Foods. (3-0) Cr. 3 F. Prereq: 214 or 311; a course in nutrition. Survey of the effects of home and commercial food preparation and processing on the nutrients in food.

FS HN 580. Orientation to Food Science and Nutrition Research. (1-0) Cr. 1 F. Orientation to and discussion of research interests in food science and nutrition. Discussion of policy and ethical issues in the conduct of research. Intended for entering students in FS HN and related disciplines. Satisfaction-fail only.

FS HN 581. Seminar. (1-0) Cr. 1 S. Discussion and practice of oral presentation of scientific data in a professional setting. Discussion of issues related to data presentation. Satisfaction-fail only.

FS HN 595. Grant Proposal Writing for the Working Professional. (Cross-listed with Diet). (1-0) Cr. 1 Alt., F., offered 2009. Prereq: Enrollment in GPIDEA MFCS in Dietetics Grant proposal preparation experiences including writing and critiquing research proposals and budget planning. Designed for the working professional. Not intended for the MS or PhD student. Satisfaction-fail only.

FS HN 596. Food Science and Human Nutrition Travel Course. (Dual-listed with 496). Cr. Alt. Repeatable. F.S.SS. Prereq: Permission of instructor. (One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

A. International travel B. Domestic travel

FS HN 599. Creative Component. Cr. F. Nonthesis option only.

Courses for graduate students

FS HN 606. Instrumental Measurement of Food Quality. (2-3) Cr. 3 Alt., F., offered 2011. Prereq: 311 or 411 or 502 or BBMB 404. Principles of instrumental measurements of color, aroma, flavor, texture, and rheology. Techniques and instrumentation for measuring the quality of foods; relationship of these methods to food color, taste, flavor, texture, and rheological quality. Application of methods to various foods and biorenewable materials.

FS HN 610. Food Enzymology. (2-3) Cr. 3 Alt., F., offered 2010. Prereq: 311 or 411 or 502 or BBMB 404. Properties of enzymes important in food processing and production including flavor, texture and color. Quantitative evaluation of substrates, enzyme, and inhibitors, pH, pressure and temperature on enzyme activity. Experimental determination of specificity and mechanisms important to food biochemistry. Techniques to purify food enzymes.

FS HN 612. Lipid Chemistry and Applications. (3-0) Cr. 3 Alt., S., offered 2010. Prereq: 311 or 411 or 502 or BBMB 404. Structure and analysis of lipids; glycereide structure; crystal form and texture; autoxidation and chemical modification; extraction, refining and processing; applications of fats and oils in food, biofuel and biobased products.

FS HN 613. Food Proteins. (3-0) Cr. 3 Alt., F., offered 2009. Prereq: 311 or 411 or 502 or BBMB 404. Properties of proteins found in milk, eggs, meat, legumes, and cereal grains. Effect of processing on food proteins.

FS HN 614. Carbohydrates: Structures, Properties, and Applications. (3-0) Cr. 3 Alt., S., offered 2011. Prereq: 311 or 411 or BBMB 404. Study of chemical structures and physical properties of carbohydrates, applications of carbohydrates in foods and as biomaterial, and changes they undergo during processing and storage.

FS HN 626. Advanced Food Microbiology. (Cross-listed with Micro, Tox). (3-0) Cr. 3 Alt., S., offered 2011. Prereq: 420 or 421 or 504. Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and modes of action of antimicrobials.

FS HN 627. Rapid Methods in Food Microbiology. (Cross-listed with Micro, Tox). (2-0) Cr. 2 Alt., S., offered 2010. Prereq: 420 or 421 or 504. Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests
(phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and “next generation” testing formats now in development.

FS HN 681. Seminar. (1-0) Cr. F.S.S.S. Presentation of thesis or dissertation research. May be taken once for M.S. program and twice for the Ph.D. program.

FS HN 690. Special Problems. Cr. arr. Repeatable. F.S.S.S. Prereq: 502 or 503 or 504 or 563 or 564.

FS HN 695. Grant Proposal Writing. (Cross-listed with Nutri.) (1-0) Cr. 1. F. Prereq: 3 credits of graduate course work in food science and/or nutrition. Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Formation of grant writing teams in food science and/or nutrition. Satisfactory-fail only.

Genetics, Development and Cell Biology

Martin Spalding, Chair of Department

University Professor: Horner

University Professors (Emeritus): Dolphin, Stadler

Professors (Emeritus): Athery, Bishop, Buss, Imsande, Lamotte, Miller, Pattee, POLLak, Robertson, Smith, Stewart, Swenson, Welschon

Professors (Collaborators): Link, Shoemaker, Voytas

Associate Professors: Bassham, Becraft, Chou, Colbert, Dornan, Ingebretsen, McCloskey, Powell-Coffman, Sakaguchi, Viles

Associate Professor (Adjunct): Duivick

Associate Professors (Collaborators): Danilevskaya, Tucker

Assistant Professors: Coffman, Essner, Kuhlman, Schneider, Vollbrecht, Yang, Yin

Assistant Professors (Adjunct): Ilarslan, McGrail, Muszynski

Assistant Professors (Collaborators): Buell, Hopkins, Lawrence, Sen

Lecturer: Bastawros, Krumhardt

The Department of Genetics, Development and Cell Biology (GDCB) is dedicated to biological discovery and excellence in undergraduate and graduate education. The research and teaching mission of the department is to achieve a greater understanding of fundamental principles of life by focusing on basic cellular and subcellular processes, including genome dynamics, cell structure and function, cellular response to environmental and developmental signals, and molecular mechanisms of development. Recognizing that student education is of paramount importance, GDCB strives for excellence in teaching and research. GDCB plays a leading role in undergraduate and graduate training through a variety of activities including traditional courses, undergraduate internships in research laboratories, and advanced graduate seminars and courses. Innovative approaches to learning are emphasized throughout the curriculum.

Undergraduate Study

The GDCB Department offers undergraduate majors in conjunction with other departments. Students interested in the areas of genetics, development and cell biology should major in Biology, Genetics Bioinformatics and Computational Biology (BCBio). The Biology Major is administered and offered jointly by the GDCB and EEOB departments. The GDCB faculty, together with those in EEOB and BBMB, administer and offer the Genetics Major. Each of these majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. BCBio is administered by the Departments of Computer Science, GDCB, and mathematics and is available through the college of Liberal Arts and Sciences.

The Biology Major and the Genetics Major prepare students for a wide range of careers in biological sciences. Training in Biology or Genetics may lead to employment in teaching, research, or any of a variety of health-related professions. Some of these careers include biotechnology, human and veterinary medicine, agricultural sciences and life science education. BCBio majors are prepared for careers at the interfaces of biological, informational and computational sciences in the above fields. These majors are also excellent preparation for graduate study in bioinformatics, molecular genetics, cell and developmental biology, neuroscience and related fields. Faculty members in GDCB contribute to the undergraduate courses listed below. The full descriptions of these courses can be found in the Biology, Genetics and BCBio sections of the catalog.

Graduate Study

Understanding the genetic blueprint and the functions of cells is critical to virtually all aspects of biology. The basic mission of the Department of Genetics, Development and Cell Biology is to achieve a greater understanding of fundamental principles of life. The GDCB faculty and students conduct hypothesis-driven research into the biology of animals, plants and microbes. While research in GDCB is often driven by the discovery and analysis of molecular mechanisms of life processes, a true understanding of living organisms will ultimately require the integration of molecular mechanisms in the context of dynamic structural components of the living cell. Thus, research efforts within GDCB use molecular, genetic, biochemical, computational and imaging techniques to study systems at increasingly complex levels of organization. GDCB faculty contribute to a broad but integrated array of cutting-edge research topics, implementing interactive and multidisciplinary approaches that bridge conventional boundaries, and incorporating experimental and computational biology as complementary approaches. Examples include using genetics and molecular biology to investigate the cellular basis of development, or combining biochemical and computational approaches to study basic subcellular functions, signal transduction or metabolism.

The faculty in the GDCB department train graduate students in several interdepartmental majors/programs including Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Genetics, Immunobiology, Plant Physiology, Interdisciplinary Graduate Studies, Microbiology, Molecular, Cellular and Developmental Biology, Neuroscience and Toxicology. Graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees are available.

Prospective graduate students need a sound background in the physical and biological sciences, as well as Mathematics and English. Interested students should check the links on the GDCB web site (www.gdcb.iastate.edu/) for specific admission procedures and the latest information about individual faculty and their research programs. The interdepartmental majors/programs require submission of Graduate Record Examination (GRE) aptitude test scores. Advanced GRE scores are recommended. International students whose native language is other than English must also submit TOEFL scores with their application.

Students who are enrolled in the interdepartmental graduate majors with affiliations with GDCB are required to actively participate in seminars, research activities, and to show adequate progress in professional development while pursuing their degree. For both the M.S. and Ph.D. degrees, it is expected that research conducted by the student will culminate in the writing and presentation of a thesis or dissertation. The Graduate College, the GDCB Faculty, and the individual student’s major professor and Program of Study Committee provide requirements and guidelines for study. General information about graduate study requirements can be found at the web site for the Graduate College (www.grad-college.iastate.edu) and requirements for the interdepartmental majors can be found by following the links from the GDCB web site above. Although not a formal requirement, the GDCB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Courses primarily for graduate students, open to qualified undergraduate students

GDCB 510. Transmission Genetics. (3-0) Cr. 3. F. Prereq: Gen 410 or graduate standing. An in-depth investigation of the modern research practices of transmission genetics. Basic genetics for students interested in genetic research. Topics include: Mendelian genetic analysis, analysis of genetic pathways, mutational analysis of gene function, chromosomal mechanics, gene mapping, extranuclear inheritance, human genetic analysis.

GDCB 537. Statistics for Molecular Genetics. (Cross-listed with Stat). (3-0) Cr. 3. Att. S., offered 2011. Prereq: 401, 447; Gen 320 or Biol 313. Statistical models, inference, and computational tools for linkage analysis, quantitative trait analysis, and molecular evolution and inference; quantitative trait traits, variance component mapping, interval and composite-interval mapping, and phylogenetic tree reconstruction.

GDCB 538. Computational Genomics and Evolution. (Cross-listed with CBM). (3-0) Cr. 3. Att. S., offered 2011. Prereq: 401, 447; Gen 320 or Biol 313. Statistical models, inference, and computational tools for linkage analysis, quantitative trait analysis, and molecular evolution and inference; quantitative trait traits, variance component mapping, interval and composite-interval mapping, and phylogenetic tree reconstruction.

GDCB 544. Introduction to Bioinformatics. (Cross-listed with BBMB, EEOB). (3-0) Cr. F. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

GDCB 556. Cellular, Molecular and Developmental Neuroscience. (Cross-listed with Neuro, B M S). (3-0) Cr. S. Prereq: Biol 335 or Biol 438: physics required. Fundamental principles of neuroscience including cellular and molecular neuroscience, nervous system development, sensory, motor and regulatory systems.

GDCB 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor.

GDCB 596. Genomic Data Processing. (Cross-listed with Com S, CBM). (3-0) Cr. 3. F. Prereq: Basic knowledge of programming. Study the practical aspects of genomic data processing with an emphasis on hands-on projects. Students will carry out common data processing steps using bioinformatics tools. Topics include base-calling, raw sequence cleaning and contaminant removal; shotgun assembly procedures and EST clustering methods; genome closure strategies and practices; sequence homology search and function prediction; annotation and submission of GenBank reports, and data collection and dissemination through the Internet. Important post-genomic topics like microarray design and data analysis will also be covered.

Courses for graduate students

GDCB 632. Current Topics in Signal Transduction. Cr. 2-3. Prereq: Permission of instructor. Selected topics of current signal transduction reactions, their molecular mechanisms and their relation to cellular processes. Topics may include cell recognition, second messenger systems, information integration and transfer, cell cycle, cell differentiation, and pattern formation.

GDCB 640. Signal Transduction. (Cross-listed with BBMB, CBM). (3-0) Cr. 0-0. Cr. F. Prereq: Gen 405. Advanced course focusing on components of cellular signal transduction including receptors, G-proteins, second messengers, protein phosphorylation, other post-translational protein modifications, and transcriptional regulation.

GDCB 691. Faculty Seminar. Cr. 1. Repeatable. Faculty research series.

G. Genetics. F. Prereq: Permission of instructor. H. Bioinformatics and Computational Biology. ISame as CBM 691H I. Plant Development. S. Prereq: GDCB 512 (can be taken concurrently).

GDCB 696. Research Seminar. (Cross-listed with Agron, BBMB, Pblio, Hort, for). Cr. 1. Repeatable. Research seminars by faculty and graduate students. Satisfactory-fail only.

Genetics - Interdisciplinary

www.genetics.iastate.edu

e-mail: genetics@iastate.edu

(Interdepartmental Graduate Major)

Supervisory Committee: P Bechart, Chair, Jo Anne Powell-Coffman, Associate Chair; D. Hannapel, T. Peterson, D. Spurlock, T. Lumbredt.

Undergraduate Preparation

Undergraduates wishing to prepare for graduate study in Genetics should elect courses in basic biology, chemistry at least through organic chemistry, one year of college-level physics, mathematics at least through calculus, and at least one thorough course in basic transmission and molecular genetics. One year of upper level statistics and a year of biochemistry are strongly encouraged.

See Genetics - Undergraduate for information on a bachelor of science degree in Genetics.

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Genetics in thirteen cooperating departments: Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Ecology, Evolution and Organismal Biology; Entomology; Food Sciences; Human Nutrition; Genetics, Development and Cell Biology; Horticulture; Plant Pathology; Natural Resource Ecology and Management; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The diversity of faculty in the Interdepartmental Genetics major ensures a broad, well-balanced education from the best instructors, while offering flexibility in choice of research area. Genetics faculty have strengths in many areas, from fundamental studies at the molecular, cellular, organismal, and population levels, to research with immediate practical application. Ongoing research projects span all the major areas of theoretical and experimental genetics, including genomics, molecular studies of gene regulation, gene mapping, transposable element studies, developmental genetics, quantitative and mathematical genetics, computational molecular biology, evolutionary genetics, and population genetics.

Students are admitted by the approval of the Chair after review by the Genetics Admissions Committee. Students are admitted either to participate in research rotations with several faculty or by direct admission into a specific lab and department. First year students participating in rotations with Genetics faculty will take Genet 697 (graduate research rotation). All Ph.D. candidates take a core curriculum comprising one course each from the following four categories and attend seminars and workshops as described Transmission Genetics (GDCB 510), Molecular Genetics (GDCB 511 or BBMB 502), Quantitative, Population, and Evolutionary Genetics (An S/Agron 561 or EEOB 562 or EEOB 563 or EEOB 566 or EEOB 567), Biochemistry (BBMB 404 or BBMB 501). Students will give three research presentations (Genet 900), attend two genetics faculty seminar series (Genet 691), and participate in three Workshops in Genetics (Genet 591) during their training period. First-year graduate students will also take Genet 692 (Seminar in the Conceptual Foundations of Genetics).

Students may elect a computational molecular biology speciality within the genetics major. This requires that the research project be in the field of computational molecular biology. IG majors will be expected to complete all of the courses required for the major, except that one semester of Student Seminar in Bioinformatics and Computational Biology (BCEB 890) is required to take additional courses in the area of specialization.

M.S. students will take the above core courses and seminars with the following changes: participate in two of the Workshops in Genetics (Genet 591) and present their research once (Genet 690). Additional coursework may be selected to satisfy individual interests or departmental requirements.

The course designator Genet applies to graduate courses taught by the interdepartmental major in Genetics.

Students wishing to minor in genetics must submit a complete application to the graduate program. Requirements for the successful completion of a minor at the Ph.D. or M.S. levels are: completion of three of the four categories of the common-core required lecture courses listed above. One semester of seminar in Genetics (Genet 690 or 691 or 692) is recommended. One member of the POS committee must be a Genetics faculty member.

Student Outcomes: Most students awarded doctoral degrees continue their training as postdoctoral associates at mutual research institutions in the U.S. or abroad in preparation for research and/or teaching positions in academia, industry, or government. A few go directly to permanent research positions in industry. Many students awarded master’s degrees continue their training as doctoral students; however, some choose research support positions in academia, industry, or government. More thorough lists of outcomes is available at our Web site. Courses for graduate students

Genet 590. Special Topics. Cr. arr. Repeatable. F.S.SS. Contact individual faculty for special projects or topics. Graded.

Genet 591. Workshop in Genetics. (1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor. Current topics in genetics research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.

Genet 690. Seminar in Genetics. (1-0) Cr. 1. Repeatable. F. Prereq: Permission of instructor. Research presentations by students to improve their ability to orally present scientific work in a clear and meaningful way, critically evaluate oral presentations, and give and receive constructive criticism.

Genet 691. Seminar in Genetics. (1-0) Cr. 1. Repeatable. F. Prereq: Permission of instructor. Faculty research seminars that introduce students to the variety of genetics research projects on campus and provide an opportunity for students to become engaged in the scientific presentation to the point where they can think critically and ask meaningful questions.

Genet 692. Conceptual Foundations of Genetics. (1-0) Cr. 1. F. Prereq: Permission of instructor. Landmark papers in the development of genetics concepts. Papers are presented and discussions led by students, guided and mentored by the instructors. Instructors provide a broad overview and history of the development of fundamental concepts in genetics.

Genet 697. Graduate Research Rotation. Cr. arr. Repeatable. F.S.SS. Graduate research projects performed under the supervision of selected faculty members in the graduate Genetics major.

Genet 698. Research. Cr. arr. Repeatable. F.S.SS. Genetics - Undergraduate

Jack R. Girton, Chair, Genetics Major Committee

http://www.iastate.edu/~ugradgen/

Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

Undergraduate Study

Undergraduate study in genetics is jointly administered by three departments: Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.A. or a B.S. degree are available. A minor in genetics is also offered for students majoring in several areas of the life sciences.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. or B.A. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, business, and genetic counseling.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, research-related activities in the biological sciences.

The respective communications and communication proficiency requirements of both colleges are met by an average of C or better in Engl 150, 250 or 250H, and an additional English writing course. The lowest grade acceptable in any of these courses is C-. Students in the College of Agriculture must also achieve a C or better in an oral communications course.

A grade of C– or better is required in all biological science courses within the major and a cumulative GPA of at least 2.0 is required for graduation.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, nursing, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements. (See Preprofessional Study.)
**Graduate Study**

Graduate study in genetics leading to the Master of Science and doctor of philosophy degrees is offered at ISU. Graduate study is organized as a separate interdepartmental graduate major from the undergraduate program. For more information on graduate study in genetics see: Genetics - Interdisciplinary.

**Curriculum in Genetics**

In addition to basic degree requirements listed in the Curricula in Agriculture or in Liberal Arts and Sciences, genetics majors must satisfy the following requirements:

2. Gen 110, 409, 410, 491, and either 462 or EEOB 563.
3. Eleven credits of calculus and Statistics including at least one course in each.
4. Three years of chemistry and biochemistry.

Eight credits of general college physics.

5. Additional credits of biological science support electives chosen from an approved list. For degrees in the College of Agriculture nine credits are required, for degrees in the College of Liberal Arts and Sciences six credits are required.

6. Majors in the College of Liberal Arts and Sciences must take one course that involves both humanities and biology such as history of science, or bioethics. This course may also count toward a college group requirement. A list of acceptable courses is available from the program office.

7. Majors in the College of Agriculture must include Biol 312 in their program.

The minor in genetics may be earned by completing Gen 313, 313L, 314L, Gen 409, 410 and 491. A Genetics major may not double major or minor in Biology.

**Courses primarily for undergraduate students**

Gen 110. Genetics Orientation. (1-0) Cr. 1. F.S. Orientation to the area of genetics. For students considering a major in genetics. Specializations and career opportunities. Satisfactory-fail only.

Gen 260. Human Heredity and Society. (3-0) Cr. 3. F.S. Prereq: One semester of college biology or Anthr 202. A survey course in genetics for non-biology majors interested in heredity and its importance, and implications to self and Society. Not recommended for those intending to take advanced courses in genetics. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 313L, Bio 313 and 313L, Agron 320.

Gen 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Gen 313L. Genetics Laboratory. (Cross-listed with Biol). (3-0) Cr. 1. F.S. Prereq: Credit or enrollment in 313 Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.

Gen 320. Genetics, Agriculture and Biotechnology. (Cross-listed with Agron). (3-0) Cr. 3. F.S. Prereq: Biol 212. Transmission genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320, Biol 313 and 313L, and Agron 320.

Gen 340. Human Genetics. (3-0) Cr. 3. Alt. S., offered 2010. Preq: Prereq: Biol 313 or Gen 313. Fundamental concepts and current issues of human genetics. Human chromosomes, mendelian inheritance, disease analysis, genetic mapping, the human genome project, sex determination, genetics of the immune system, genetics of cancer, gene therapy, the genetic basis of human diversity, eugenics.

Gen 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Gen 409. Molecular Genetics. (3-0) Cr. 3. F. Prereq: Biol 314. The principles of molecular genetics: gene structure and function at the molecular level, including regulation of gene expression, genetic rearrangement, and the organization of genetic information in proaryotes and eukaryotes. Nonmajor graduate credit.

Gen 444. Introduction to Bioinformatics. (Cross-listed with BCBl, Biol, Com S, Cpr E). (4-0) Cr. 4. F. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics. Nonmajor graduate credit.

Gen 462. Evolutionary Genetics. (Cross-listed with Biol). (3-0) Cr. 3. S. Prereq: Biol 313. The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change. Nonmajor graduate credit.

Gen 490. Independent Study. Cr. arr. Repeatable. Prereq: Gen 313, junior or senior classification, permission of instructor. Students in the College of Agriculture may use no more than 6 credits of Gen 490 toward the total of 128 credits required for graduation; students in the College of Liberal Arts and Sciences may use no more than 9 credits of Gen 490 toward graduation.

R. Genetics research. Cr. 1 to 5 each time taken. S. Attendance and critique of genetics seminars. Required of majors in genetics. (Cross-listed with Agron). (3-0) Cr. 1. F.S. Prereq: Junior classification. The investigation of current issues in genetics. Graduate school and employment opportunities discussed. Practice in resume writing and interview techniques. Required for majors in genetics.

Gen 495. Molecular Biology for Computational Scientists. (Cross-listed with BCB). (3-0) Cr. 3. F. Survey of molecular cell biology and molecular genetics for nonbiologists, especially those interested in bioinformatics/computational biology. Basic cell structure and function; principles of molecular genetics; biosynthesis, structure, and function of DNA, RNA, and proteins; regulation of gene expression; selected topics. Provides biological background for BCB 584. Credit for graduation will not be allowed for more than one of Gen 411 and Gen/BCB 495. Nonmajor graduate credit.

Gen 498. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

**Geological and Atmospheric Sciences**

Please refer to the latest catalog for detailed information. The department offers courses in Geology and Meteorology. Majors can be earned in earth science (B.A., B.S.), geology (B.S.), and meteorology (B.S.). Candidates for all degrees must satisfy the requirements established by the College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum). In addition, the department has requirements for each major.

The bachelor of science in Geology prepares the student for a professional career and/or graduate study in the geological sciences. Students selecting geology as a major will elect an option in traditional geology or environmental geology/hydrogeology. The traditional option prepares a student for employment in state and U.S. geological surveys, mineral and petroleum exploration, and graduate study in most aspects of geology. Required courses in this option include Geol 100, 100L, 102, 102L, 302, 311, 356, 365, 368, 479 and at least 9 credits of geology electives. The environmental geology/hydrogeology option prepares a student for employment in environmental consulting, state and U.S. geological surveys, regulatory agencies, and graduate study in the environmental aspects of geology. Required courses in this option include Geol 100, 100L, 102, 102L, 302, 311, 356, 368, 411, 419 or 426 or 434, 479, and at least 6 credits of geology electives. Required supporting courses include Chem 177, 177L, 178, 178L; Phys 111, 112; Math 165, 166 or Math 181, 182; at least 6 additional credits from an approved departmental list of courses in the science, engineering, or mathematically disciplined outside of geology. No more than 9 credits in 490 may be counted toward a degree in Geology.
A minor in Geology may be earned by taking 15 credits of geology coursework, including Geol 100 and 100L (or 201), 102, and 102L. The remainder should be at the 300 level or above.

Graduates work to understand natural processes on Earth and other planets. They are able to apply their knowledge of forces and factors that shape the Earth to reconstruct the past and anticipate the future. Graduates provide essential information for solving problems such as resource management, environmental protection, and public health, safety, and welfare. They work as consultants on environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

Graduates are able to integrate field and laboratory data and to prepare reports. They are able to make presentations that include maps and diagrams that illustrate the results of their studies.

The study of Meteorology involves the description of the earth’s atmosphere and the processes responsible for its behavior. Students majoring in Meteorology earn the bachelor of science degree. Successful preparation for professional or graduate work in Meteorology requires the student to develop and integrate a diverse range of skills and knowledge bases. These include weather observing, the physics and dynamics of the global atmosphere, application of new weather technologies, advanced mathematical tools, computer programming and modeling, and effective oral and written communication. The faculty view the senior thesis in Meteorology 499, in particular, as a capstone experience in which students demonstrate they have achieved this integration. Also, contemporary meteorology is an earth-system science with ties to a variety of human experiences. The electives and general education requirements in the college are further experiences that the meteorology student must integrate with their core meteorology knowledge in order to function effectively in a global-oriented profession. The program requires the following courses: Mteor 111, 201, 206, 227, 301, 311, 341, 342, 411, 417, 432, 443, 454, and 499. An additional 9 credits must be chosen from Mteor 402, 404, 406, 407, 452, 490, and Geol 415 or C E 372 (some experimental Mteor courses can also be used). Supporting work is required in areas at least equivalent to Chem 163, 183L; Phys 221, 222; Math 165, 166, 265, 266; Stat 105; Sp Cm 212. A grade of C or better (not C-) is required in each of the following courses to meet minimum graduation requirements for a bachelor of science degree in Meteorology: 206, 301, 311, 341, 342, and 443. Several co-op programs are available for upper division undergraduates. Although a range of opportunities exists for men and women who terminate their studies with a bachelor of science, students who meet the necessary academic standards are encouraged to continue their studies in a graduate program. For these students, minor work is recommended in a mathematical or physical science. Other students can choose a wide range of supporting courses that will contribute to their particular area of interest in meteorology.

The department offers a minor in Meteorology which may be earned by completing 15 credits including Mteor 201 (no Mteor 206 may count toward the minor), Mteor 206 and Mteor 301. Further information concerning programs of study, including sample degree programs, is available from the department.

The Earth Science major is a broad program that typically emphasizes an interdisciplinary field. Programs leading to the bachelor of science major may be individually designed but will include required courses in Geology and Meteorology, and required supporting work in chemistry, physics, and mathematics. Specific programs have been designed for students interested in a geology, meteorology, or an environmental earth science emphasis. Programs leading to the bachelor of arts for earth science teaching are available. The latter program must satisfy the requirements of the Teacher Education Program (see Index, Teacher Education). Communication Proficiency requirement: The department requires a grade of C or better in each of English 150 and 250 (or 250H), and a C or better in English 314 or 302 or Jl MC 347.

Graduate Study

The department offers programs leading to the master of science and doctor of philosophy with majors in Earth Science, Geology, and Meteorology. Program options are available for the M.S. and Ph.D. degrees in earth science leading to careers in teaching. The department also cooperates in the interdepartmental major in Water Resources (see Index). Students desiring a major in the above fields normally will have a strong undergraduate background in the physical and mathematical sciences. Individual graduate programs are evaluated by considering their undergraduate background and performance and their expressed goals.

Programs of study are designed on an individual basis in accordance with requirements of the Graduate College and established requirements for each departmental major. Minor work is normally taken in aerospace engineering, Agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, materials engineering, mathematics, mechanical engineering, microbiology, physics, or Statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A dissertation is required of all Ph.D. candidates. M.S. students in Geology are required to complete a thesis. The M.S. in Earth Science is available to students electing the non-thesis (Creative Component) option in Geology or Meteorology. A non-thesis option is also offered for the M.S. degree in Meteorology.

Graduates in Geology specialize in a subdiscipline, but they comprehend and can communicate the basic principles of geology and supporting sciences. They possess the capacity for critical and independent thinking. They are able to write a fundable research proposal, evaluate current relevant literature, carry out the proposed research, and communicate the results of their research to peers at national meetings and to the general public. They work as consultants on environmental and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

All candidates for an advanced degree in Meteorology are expected to complete Mteor 542, 543, and 552. In addition, students without prior synoptic course-work must complete Mteor 511; other students must elect Mteor 507 or Agron 507. Students must also complete Mteor 504 or Agron 504 or Mteor 605 or Agron 505.

Graduates in Meteorology have a good comprehension of basic principles, a capacity for critical and independent thought and an ability to communicate effectively with scientific colleagues. They have an appropriate breadth in their understanding of meteorology with a suitable specialization. Graduates are able to undertake thorough research and explain the results in a scientifically reasonable fashion.

Geology (Geol)

Cours es primarily for undergraduate students

Geol 100. The Earth. (3-0) Cr. 3. F.S.S.S. How does the earth work, what is it made of, and how does it change through time? Plate tectonics, Earth materials, land forms, structures, climate, and natural resources. Emphasis on the observations and hypotheses used to interpret earth system processes. Students may also enroll in Geol 100L.

Geol 100L. The Earth: Laboratory. (0-2) Cr. 1. F. S. Pre req: Credit or enrollment in 100. Characterization of rocks and minerals; interpretation of structures and landforms.

Geol 101. Environmental Geology: Earth in Crisis. (Cross-listed with Env S). (3-0) Cr. 3. F. An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism.

Geol 102. History of the Earth. (3-0) Cr. 3. S. Prereq: 100 or 201. The Earth’s physical and biological evolution; concepts of global tectonics. Methods used to decipher earth history. Students majoring in geology must also enroll in Geol 102L.

Geol 102L. History of the Earth: Laboratory. (0-2) Cr. 1. S. Prereq: Credit or enrollment in 102. Introduction to the use of sedimentary rocks and fossils in reconstructing the Earth’s history.

Geol 201. Geology for Engineers and Environmen tal Scientists. (2-2) Cr. 3. F. Introduction to Earth materials and processes with emphasis on engineering and environmental applications.

Geol 298. Cooperative Education. Cr. R. F.S.SS. Prereq: 100 or 201, 100L, 102, 102L, and permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing the work period.

Geol 302. Summer Field Studies. Cr. 6. SS. Geologic mapping; structural, stratigraphic, sedimentologic, and geomorphic analyses. Study areas include world-class dinosaur localities. A 6-week summer field course required of all geology majors. Nonmajor graduate credit.

Geol 306. Geology Field Trip. Cr. arr. Repeatable. F.S.SS. Prereq: 100 or 201, permission of instructor. Geology of selected regions studied by correlated readings followed by a field trip to points of geologic interest. Ten-day field trip required.
Geol 311. Mineralogy and Earth Materials. (3-4) Cr. 5. F. Prereq: 100 or 201, Chem 163. Introduction to mineral classification, elementary crystal chemistry, crystal morphology, mineral stability, and associations. Laboratory problems in mineral identification methods, including hand-specimen identification, optical microscopy, and x-ray diffraction. Nonmajor graduate credit.

Geol 324. Energy and the Environment. (Cross-listed with Env S, Mteor). (3-4) Cr. 3. S. Renewable and non-renewable energy resources. Origin, occurrence, and extraction of fossil fuels, nuclear energy, and solar energy. Energy efficiency. Environmental effects of energy production and use, including air pollution, acid precipitation, groundwater contamination, nuclear waste disposal, and global climate change. Geol 324 does not count toward credits required in the Geology major.

Geol 356. Structural Geology. (3-6) Cr. S. Prereq: 100 or 201, Phys 111, Math 165 or 181. Principles of stress and strain. Brittle and ductile behavior of rocks. Description and classification of joints, faults, folds, fractures, foliation, and lineation. Plate tectonics and regional geology. Laboratory includes application of geometrical techniques to solve structural problems; emphasizes map interpretation and use of stereonet and computer methods. Nonmajor graduate credit.

Geol 365. Igneous and Metamorphic Petrology. (2-3) Cr. 3. S. Prereq: 311. Nature and origin of igneous and metamorphic rocks. Emphasis on important rock-forming environments and processes and their influence on rock characteristics. Laboratory includes thin section study of rock textures and mineralogy and the interpretation of these features. Field trips. Nonmajor graduate credit.

Geol 369. Stratigraphy and Sedimentation. (3-2) Cr. 4. F. Prereq: 311. Origin of sedimentary rocks and the characteristics of major depositional systems, geologic time, stratigraphic nomenclature, methods of correlation, facies and facies analysis, sequence stratigraphy, sedimentary and basin analysis. Required field and laboratory-based problem with a comprehensive written report. Nonmajor graduate credit.

Geol 398. Cooperative Education. Cr. F.S.SS. Prereq: 100 or 201, 100L, 102L, and permission of the department cooperative education coordinator; junior or senior classification. Open to all cooperative education students. Students must register for this course prior to commencing each work period. 3 credits, nonmajor graduate credit.

Geol 402. Watershed Hydrology. (Dual-listed with 502). (Cross-listed with Agron, EnSci, Mteor, NREM). (3-6) Cr. 4. F. Prereq: Four courses in physical or biological sciences and junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

Geol 411. Hydrogeology. (Dual-listed with 511). (Cross-listed with EnSci). (3-2) Cr. 4. F. Prereq: Geol 100 or 201, Math 165 or 181, Phys 111 or 221. Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations. Nonmajor graduate credit.

Geol 415. Paleoclimatology. (Dual-listed with 515). (Cross-listed with EnSci). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Four courses in biological or physical science. Introduction to mechanisms that drive climate, including atmospheric and oceanic circulation and atmospheric circulation and circulation in Earth’s orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis, O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years). Nonmajor graduate credit.

Geol 419. Environmental Geochemistry. (Dual-listed with 519). (Cross-listed with EnSci). (2-2) Cr. F. Prereq: 402 or 411 or equivalent. Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbon chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling. Nonmajor graduate credit.

Geol 426. Stable Isotopes in the Environment. (Dual-listed with 526). (Cross-listed with EnSci). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Four courses in biological or physical science. Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, distribution, and fractionation of carbon, hydrogen, oxygen, nitrogen and isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, and respiration on isotopic fractionation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance. Nonmajor graduate credit. 

Geol 434. Contaminant Hydrogeology. (Dual-listed with 534). (Cross-listed with EnSci). (3-2) Cr. 3. S. Prereq: Geol 411 or equivalent. Field work with computer interpretation packages. Field work with geophysical survey and environmental monitoring equipment. Soil and groundwater monitoring and remediation strategies. Nonmajor graduate credit.

Geol 445. Applied and Environmental Geophysics. (Dual-listed with 545). (Cross-listed with EnSci). (2-2) Cr. 3. S. Prereq: 100 or 201, Math 181 or equivalent experience. Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and mining. Ore deposits, resource assessment, and mineral exploration. Data interpretation methods, including computer interpretation packages. Field work with seismic- and resistivity-imaging systems and radar. Nonmajor graduate credit.

Geol 452. GIS for Geoscientists. (Dual-listed with 552). (Cross-listed with Agron, EnSci). (2-2) Cr. 3. F. Prereq: 100, 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses. Nonmajor graduate credit.

Geol 474. Glacial and Quaternary Geology. (Dual-listed with 574). (2-2) Cr. 3. Alt. S., offered 2011. Prereq: 100 or 201 or equivalent experience. Field study of the depositional and erosional processes of glaciers using modern glacier analogs and landforms. Discussion of glaciation, glacier hydrology, Quaternary stratigraphy and stratigraphy, paleoecology, and glacial geology. Laboratory emphasis on aerial and topographic map interpretation and the Quaternary stratigraphy of Iowa. Two required field trips. Nonmajor graduate credit.

Geol 479. Surficial Processes. (Dual-listed with 579). (Cross-listed with EnSci). (2-2) Cr. 3. F. Prereq: 100 or 201 or equivalent experience. Study of surficial processes in modern and ancient geological environments. Topics include weathering, sediment transport, and landscape genesis with emphasis on fluvial, glacial, hillslope, erosion, and coastal processes. Applications to engineering and environmental problems. Laboratory emphasizes aerial photo and topographic map interpretation. Nonmajor graduate credit.

Geol 490. Independent Study. Cr. arr. Repeatable. Prereq: 8 credits in geology and permission of instructor. No more than 9 credits of Geol 490 may be counted toward graduation.

Geol 495. Undergraduate Seminar. Cr. 1. F. Prereq: Junior or senior classification. Weekly seminar on topics of current research interest.

Geol 498. Cooperative Education. Cr. F.S.SS. Prereq: Geol 100 or 201, 100L, 102L, and permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

Geol 502. Watershed Hydrology. (Dual-listed with 402). (Cross-listed with Agron, EnSci). (3-3) Cr. 3. F. Prereq: 100 or 201, Math 181 or equivalent experience. Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and mining. Ore deposits, resource assessment, and mineral exploration. Data interpretation methods, including computer interpretation packages. Field work with seismic- and resistivity-imaging systems and radar. Nonmajor graduate credit.

Geol 506. Geology Field Trip. Cr. arr. Repeatable. F. Prereq: Geol 365. On-site inspection of various ore deposits, mining operations, and terrain dominated by igneous or metamorphic rocks. Nonmajor graduate credit.

Geol 509. Field Methods in Hydrogeology. (Dual-listed with 409). (Cross-listed with EnSci). (0-4) Cr. 2. Alt. S., offered 2010. Prereq: 402 or 411 or C E 473. Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well instillations, and monitoring well installation techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gauging, electronic instrumentation for data collection, and geophysics. Field trips to investigate water resources problems, water quality, and contaminant transport projects.

Geol 511. Hydrogeology. (Dual-listed with 411). (Cross-listed with EnSci). (3-2) Cr. 4. F. Prereq: Geol 100 or 201, Math 165 or 181; Phys 111 or 221.
Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.

Geol 515. Paleoclimatology. (Dual-listed with 415). (Cross-listed with EnSci). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Four courses in biological or physical science. Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth’s orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years).

Geol 519. Environmental Geochemistry. (Dual-listed with 419). (Cross-listed with EnSci). (2-2) Cr. 3. F. Prereq: Geol 511 or equivalent. Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

Geol 551. Applied and Environmental Geophysics. (Dual-listed with 451). (Cross-listed with EnSci). (2-2) Cr. 3. S. Prereq: 100 or 201. Math 181 or equivalent experience. Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Lab and interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic- and resistivity-imaging systems and radar.

Geol 552. GIS for Geoscientists. (Dual-listed with 452). (Cross-listed with Agron, EnSci). (2-2) Cr. 3. F. Prereq: Geol 100, 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

Geol 555. Soil Clay Mineralogy. (Cross-listed with Agron). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Agron 472, Chem 132, or equivalent. Recommended: Geol 311. Structure and behavior of clay minerals in soil environments, with emphasis on layer silicates and on Fe, Mn, and Al oxides.

Geol 558. Introduction to the 3D Visualization of Scientific Data. (Cross-listed with HCI, Com S). (2-2) Cr. 3. Alt. S., offered 2011. Prereq: Graduate-student standing in the Mathematical or natural sciences. Introduction to visualizing scientific information with 3D computer graphics and their foundation in human perception. Overview of different visualization techniques and examples of 3D visualization projects from different disciplines (natural sciences, medicine, engineering). Class project in interactive 3D visualization using the OpenDX, VTK or a similar system.

Geol 574. Glacial and Quaternary Geology. (Dual-listed with 474). (2-2) Cr. 3. Alt. S., offered 2011. Prereq: 100 or 201. The study of the depositional and erosional processes of glaciers using modern glacial analogs and landforms. Discussion of glaciology, glacier hydrology, Quaternary history and stratigraphy, paleoecology, and causes of glaciation. Laboratory emphasizes aerial photo and topographic map interpretation and the Quaternary stratigraphy of Iowa. Two required field trips.

Geol 579. Surficial Processes. (Dual-listed with 479). (Cross-listed with EnSci). (2-2) Cr. 3. F. Prereq: Geol 100 or 201 or equivalent experience. Study of surficial processes in modern and ancient geological environments. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory emphasizes aerial photo and topographic map interpretation.

Geol 595. Graduate Seminar. Cr. 1. Repeatable. F.S. Prereq: Senior or graduate classification. Weekly seminar on topics of current research interest. All students seeking a graduate degree in geology must enroll during each semester of residence. Students pursuing a non-thesis option for the M.S. in Earth Science must enroll for one semester. Satisfactory-fail only.

Geol 599. Creative Component. Cr. arr. Repeatable. Courses for graduate students

Meteorology (Mteor) Courses primarily for undergraduate students

Mteor 111. Synoptic Applications. (1-0) Cr. 1. Repeatable. F. Prereq: Credit or enrollment in Math 165. Current weather discussions and introduction to synoptic-scale interpretation of meteorology. Application and use of calculus in meteorology. Course restricted to majors. Others with permission of instructor.

Mteor 201. Introductory Seminar. (1-0) Cr. F. An overview of the atmospheric sciences, the meteorology program at Iowa State, and the major research journals used in the discipline.

Mteor 206. Introduction to Meteorology. (Cross-listed with Agron). (3-0) Cr. 3. F. Basic concepts in meteorology, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety. Self-study laboratory assignments utilize interactive computerized exercises, worksheets and computerized real-time forecasting. Self-study section may be available to distant education students.
Mteor 227. Computational Meteorology I. (3-1) Cr. 3. F. Prereq: Credit or concurrent enrollment in Mteor 206, credit or concurrent enrollment in Phys 221. An introduction to computer programming using FORTRAN with focus on meteorological applications. Emphasis on basic programming techniques and style through extensive practice in top-down design, writing, running, and debugging small programs. Topics include operations and functions, selective execution, repetitive execution, arrays, input/output, file processing, and subroutines. This course is designed for majors.

Mteor 265. Scientific Balloon Engineering and Operations. (Cross-listed with Aer E.) (0-2) Cr. 1. F. Engineering aspects of scientific balloon flights. Integration of science mission objectives with engineering requirements. Team certification. FAA and FCC regulations, communications, and command systems. Flight path prediction and control.

Mteor 298. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing the work period.

Mteor 301. General Meteorology. (4-0) Cr. 4. S. Prereq: Math 166, credit or enrollment in Phys 222. Global distribution of temperature, wind, and atmospheric constituents; atmospheric thermodynamics, radiative transfer, global energy balance, storms and clouds, and introductory dynamics. Nonmajor graduate credit.

Mteor 311. Introduction to Synoptic Meteorology. (1-2) Cr. 2. F. Prereq: 301. Concepts of weather map plotting and analysis. Introduction to forecasting and to the use of real-time UNIDATA computer products. Nonmajor graduate credit.

Mteor 321. Meteorology Internship. Cr. arr. Repeatable. F.S.S.S. Prereq: 311; junior or senior standing; permission of co-op program coordinator; acceptance by sponsoring agency. Supervised practical experience in a professional meteorological agency. Experiences may include providing weather information for radio, TV, utilities, government agencies, construction, or agribusiness.

Mteor 342. Atmospheric Physics II. (3-0) Cr. 3. S. Prereq: 341. Precipitation physics, radar, atmospheric radiation, atmospheric optics, atmospheric electricity. Nonmajor graduate credit.

Mteor 398. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing the work period.

Mteor 402. Watershed Hydrology. (Dual-listed with 502). (Cross-listed with Agron, EnSci, Geol, NREM). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

Mteor 404. Global Change. (Dual-listed with 504). (Cross-listed with Agron, EnSci, Env S). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Recent changes in global biogeochemical cycles and climate, models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Nonmajor graduate credit.

Mteor 405. Environmental Biophysics. (Dual-listed with 505). (Cross-listed with Agron, EnSci). (3-0) Cr. 3. Alt., S., offered 2010. Prereq: Math 166. Introduction to the microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water and carbon) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind. Heat, mass, and radiative transport. Applications to animals, plants, and plant communities.

Mteor 406. World Climates. (Cross-listed with Agron, EnSci). (3-0) Cr. 3. F. Prereq: Agron/Mteor 206. Arrit. Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of climate change. Semester project and in-class presentation required. Nonmajor graduate credit.

Mteor 411. Synoptic Meteorology. (Dual-listed with 511). (1-4) Cr. 3. S. Prereq: Credit or enrollment in 454. Current weather forecasting and discussion. Applications of atmospheric physics and dynamics in real-time weather situations. Use of UNIDATA computer products. Nonmajor graduate credit.

Mteor 417. Mesoscale Forecasting Laboratory. (Dual-listed with 517), (1-5) Cr. 3. S. Prereq: Credit or enrollment in 411. Real-time computer analysis of current weather, with emphasis on small-scale features. Studies of severe weather, lake-effect snow, CSI, cold-air damming. Nonmajor graduate credit.

Mteor 432. Instrumentation and Measurements. (3-0) Cr. 3. S. Prereq: Credit or enrollment in Stat 106, Math 266, Phys 222. Measurement of meteorological variables and instruments including surface, upper air, and remote sensors; measurement errors, signal processing, recording and archiving; quality assurance. Nonmajor graduate credit.

Mteor 452. Physics of Climate. (Dual-listed with 552). (3-0) Cr. 3. S. Prereq: Mteor 301. Exploration of the fundamental physical principles that govern the climate systems of the Earth and other planets. Emphasis on coupled, nonlinear system interactions of physical processes such as circulation dynamics, radiative transfer, and cloud/precipitation physics, starting with fairly simple 0- and 1-dimensional analytical and numerical models based on energy, mass, and momentum conservation. Observational study of seasonally varying systems that form climates around the world. Nonmajor graduate credit.

Mteor 454. Dynamic Meteorology II. (3-0) Cr. 3. F. Prereq: 443. Planetary boundary layer, linear perturbation theory, atmospheric wave motions, baroclinic and convective instability, mesoscale circulations. Nonmajor graduate credit.

Mteor 490. Independent Study. Cr. arr. Repeatable. Prereq: 6 credits in meteorology, permission of instructor. No more than 9 credits in Mteor 490 may be counted toward graduation.

Mteor 499. Senior Research. (2-0) Cr. 2. F. Required of all senior meteorology majors. Research projects in collaboration with faculty. Written and oral presentations of results at the end of the semester.

Courses primarily for graduate students, open to qualified undergraduate students

Mteor 502. Watershed Hydrology. (Dual-listed with 402). (Cross-listed with EnSci, Geol). (3-3) Cr. 4. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

Mteor 504. Global Change. (Dual-listed with 404). (Cross-listed with Agron, EnSci). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior, senior, or graduate standing. Recent changes in global biogeochemical cycles and climate, models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

Mteor 505. Environmental Biophysics. (Dual-listed with 405). (Cross-listed with Agron, EnSci). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Math 166 or equivalent. Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water and carbon) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind. Heat, mass, and radiative transport. Applications to animals, plants, and plant communities. Semester project required.

Mteor 511. Synoptic Meteorology. (Dual-listed with 411). (1-4) Cr. 3. S. Prereq: Credit or enrollment in 454. Current weather forecasting and discussion. Applications of atmospheric physics and dynamics in real-time weather situations. Use of UNIDATA computer products.

Mteor 517. Mesoscale Forecasting Laboratory. (Dual-listed with 417). (1-5) Cr. 3. S. Prereq: Credit or enrollment in 411. Real-time computer analysis of current weather, with emphasis on small-scale features. Studies of severe weather, lake-effect snow, CSI, cold-air damming.

250 Geological and Atmospheric Sciences 2009-2011
Mteor 518. Microwave Remote Sensing. (Cross-listed with Agron, E E) (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Math 265 or equivalent or permission of instructor. Hornbuckle. Microwave remote sensing of Earth's surface and atmosphere. Overview of relevant electromagnetic theory and antenna theory. Planck emission and the radiative transfer equation. The electrical properties of natural materials at microwave frequencies. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, and soil and vegetation water content.

Mteor 552. Physics of Climate. (Dual-listed with 452). (3-0) Cr. 3. F. Prereq: Mteor 301. Exploration of the fundamental physical principles that govern the climate systems of the Earth and other planets. Emphasis on coupled, nonlinear-system interactions of physical processes such as circulation dynamics, radiative transfer, and cloud/precipitation physics, starting with fairly simple 0- and 1-dimensional analytical and numerical models based on energy, mass, and momentum conservation. Observational study of seasonally evolving weather patterns that form climates around the world.

Mteor 561. Geophysical Fluid Dynamics. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 455 or E M 378 or M E 335 or Phys 361. Basic concept of rotating fluid dynamics, governing equations and boundary conditions, dynamics of vorticity, potential vorticity and geostrophic motion, wave motion in a rotating system, dynamics of Ekman and Stewardson layers, ocean circulation.

Courses for graduate students

Courses primarily for undergraduate students

Geron 377. Aging and the Family. (Cross-listed with HD FS). (3-0) Cr. 3. Prereq: HD FS 102. Interchanges of the aged and their families. Emphasis on role changes, social interaction, and independence as influenced by health, finances, life styles, and community development.

Geron 378. Economics of Aging. (Cross-listed with Econ, HD FS). (3-0) Cr. 3. S. Prereq: 3 credits in principles of economics and 3 credits in human development and family studies. Economic Status of the aging, retirement planning and the retire ment decision, role of Social Security, public transfer programs for the elderly, intrafamily transfers to/from the elderly, private pensions, financing medical care and housing for the elderly, prospects and issues for the future.

Geron 463. Environments for the Aging. (Dual-listed with 563). (Cross-listed with HD FS). (3-0) Cr. 3. S. Prereq: 3 credits in principles of economics and 3 credits in human development and family studies. Emphasis on independent living within residential settings including specialized shelter, supportive services, and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.

Geron 466. Gerontology Prepracticum Seminar. (1-0) Cr. 1. F.S.SS. Prereq: 9 credits in core courses for the gerontology minor and approval of the gerontology undergraduate coordinator. Prepracticum training for students planning a gerontology practicum. Exploration of possible agencies for the practicum, in-depth study of a selected agency, and development of goals and objectives for the practicum.

Geron 490. Independent Study. Cr. arr. Consult program coordinator for procedure. Courses primarily for graduate students, open to qualified undergraduate students

Geron 501. Seminar. Cr. arr. Repeatable. F.S.SS.

Geron 530. Perspectives in Gerontology. (Cross-listed with HD FS). (3-0) Cr. 3. F. WWW only. Overview of current aging issues including theory and research, critical social and political issues in aging, the interdisciplinary focus of gerontology, career opportunities, and aging in the future.

Geron 534. Adult Development. (Cross-listed with HD FS). (3-0) Cr. 3. F. WWW only. Exploration of the biological, psychological, and social factors associated with aging. Although the focus is on the later years, information is presented from a life-span developmental framework. Empirical studies are reviewed and their strengths, limitations and implications for normative and optimal functioning are discussed.

Geron 540. Nutrition and Physical Activity in Aging. (Cross-listed with Diet). (3-0) Cr. 3. Alt. F. offered 2010. WWW only. Basic physiologic changes during aging and their impact in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

Geron 545. Economics, Public Policy, and Aging. (Cross-listed with HD FS). (3-0) Cr. 3. Alt. F, offered 2010. WWW only. Policy development in the context of the economic Status of the older adult population. Retirement planning and the retirement decisions; social security and public transfer programs; intra-family transfers to/from the aged; private pensions; financing medical care; prospects and issues for the future.

Geron 563. Environments for the Aging. (Dual-listed with 463). (Cross-listed with HD FS). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies. Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.

Geron 571. Design for All People. (Cross-listed with Arch, Dsn Sj). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Geron 584. Program Evaluation and Research Methods in Gerontology. (Cross-listed with HD FS). (3-0) Cr. 3. Alt. SS., offered 2010. WWW only. Overview of program evaluation, research methods, and grant writing in gerontology. Includes application of quantitative and qualitative methods in professional settings.

Geron 590. Special Topics. Cr. arr. Repeatable. Consult program coordinator for procedure.

Geron 594. Professional Seminar in Gerontology. (Cross-listed with HD FS). (3-0) Cr. 3. Alt. SSS., offered 2011: WWW only. Comprehensive experience for gerontology students designed to be taken near the end of the degree program. By applying knowledge gained in earlier coursework, students will strengthen skills in ethical decision-making behavior, applying these skills in gerontology-related areas such as advocacy, professionalism, family and workplace issues. Students from a variety of professions will bring their unique perspectives to bear on topics of common interest.

Global Resource Systems
www.globe.iastate.edu

Gail R. Nonnecke, Faculty Coordinator
Supervisory Committee: David Acker, Richard Hall, Arne Hallam, Jeffery Iles, Kendall Lamkey, Ruth MacDonald, and Robert Martin

Global Resource Systems is a cutting-edge, interdisciplinary, college-wide major that prepares students to make a difference in the world. This major is offered by the College of Agriculture and Life Sciences. The major emphasizes global and cross-cultural engagement while equipping students with a strong technical competency in a resource area of their choice. The interdisciplinary program is designed to prepare students to work on complex global resource issues through leadership positions in global businesses, governmental agencies engaged in international trade and development, non-governmental organizations and globally engaged foundations, educational institutions, and volunteer organizations. It aims to produce systemic thinkers and problem solvers with a global perspective who are trained in resource issues and able to lead teams representing high levels of cultural diversity. Students interested in this major are encouraged to contact the Faculty Coordinator at globe@iastate.edu.

Undergraduate Study

The Global Resource Systems undergraduate major empowers a truly interdisciplinary and systemic approach to understanding complex global resource issues. The major allows students to develop a core set of technical competencies in a resource area selected from among the 23 minors and certificates offered by the College of Agriculture and Life Sciences. Students choose a world region in which to specialize, develop competency in a relevant world language, participate in a significant cross-cultural living and working immersion experience in their chosen world region, and carry out a senior project related to their resource specialization within the context of the world region.

Multidisciplinary themes will be developed in the context of the physical, biological and sociological factors affecting global resource systems. In this context, resource systems will include agricultural (including crops, livestock and aquaculture), food, fuel, natural, environmental, biological, financial, governmental, institutional, human, knowledge, and other resources. Graduates of this program will have the knowledge and transnational leadership skills and will be successful integrators of various specializations on a team. They will be skilled in developing a systemic perspective and accomplished at solving complex global resource systems problems.

Courses for undergraduate students

Globe 110. Orientation. (1-0) Cr. 1. F. An introduction to Global Resource Systems (GRS) program, development of student and professional skills, participation in GRS Learning Community and service learning project.

Globe 211. Issues in Global Resource Systems. (1-0) Cr. 1. Repeatable. F. Prereq: credit or enrollment in 211. Discussion of topics of current importance in global resource systems. A maximum of 3 credits of 211 may be used towards degree requirements.

Globe 221. Apprenticeship. Cr. R. Repeatable. F.S.SS. Prereq: Approval by the Global Resource Systems Faculty Coordinator. Practical work experience in approved domestic or international settings such as with a company, research laboratory, governmental agency or non-governmental organization. Satisfactory-fail only.

Globe 290. Independent Study. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator. Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for freshmen and sophomores. H. Honors
Globe 301. Resource Systems of Industrialized Nations. (2-3) Cr. 3. F. Prereq: 201, Econ 101 or 102. In-depth analysis of the opportunities, constraints and consequences of the resource systems common in industrialized nations. Topics integrate natural resources with land tenure, societal structure, food security, agriculture, shelter, energy and wealth dynamics.

Globe 302. Resource Systems of Developing Nations. (2-3) Cr. 3. S. Prereq: 201, Econ 101 or 102. In depth appraisal of resource systems common throughout the developing world. Topics integrate natural resources with land tenure, societal structure, food security, agriculture, shelter, energy and wealth dynamics.

Globe 321. Internship - Global. Cr. arr. Repeatable. Prereq: Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator. A supervised learning experience including an analysis of an international location's resource system via immersion in a foreign culture lasting at least five weeks. The experience should focus on the region consistent with the student's degree track. A maximum of 12 credits of 321 and 322 may be used for degree requirements.

Globe 322. Internship - United States. Cr. arr. Repeatable. Prereq: Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator. A supervised learning experience including an analysis of a domestic location's resource system via immersion in a different culture within the United States lasting at least five weeks. Designed for international students and for students who are not in a position to leave the United States. A maximum of 12 credits of 321 and 322 may be used for degree requirements.

Globe 401. Senior Project. Cr. 3. F.S. Prereq: Senior classification in Global Resource Systems. Research project in collaboration with faculty that complements and further develops a student's experiences from Globe 321 and 322 while simultaneously bringing into focus entire four-year experience. Student will write a research report and make either an oral or poster presentation. H. Honors

Globe 402. Responses to Global Resource System Challenges. (1-4) Cr. 3. S. Capstone analysis of critical challenges facing global resources and, especially, identification of alternative solutions.

Globe 446. International Issues and Challenges in Sustainable Development. (Cross-listed with Agron, IntSt). Cr. 4. S. Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor. Muller. An interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economic, political, and historical factors affecting sustainable development of communities and countries from an art and science perspectives. International field experience with foreign language training required. A program fee is charged to students for international study abroad.

Globe 490. Independent Study. Cr. arr. Repeatable. F.S. Prereq: Permission of instructor. Global resource systems topics will include the agricultural industries, climate, crops, culture, economics, food, geography, government, history, livestock, marketing, natural resources, public policies, soils, and preparation for travel to locations to be visited. Students enrolled in this course intend to register for Globe 496 or 497 the following term.

Globe 496. Global Resource Systems Study Abroad Course Preparation. Cr. R. Repeatable. F.S. Prereq: Permission of instructor. Global resource systems topics will include the agricultural industries, climate, crops, culture, economics, food, geography, government, history, livestock, marketing, natural resources, public policies, soils, and preparation for travel to locations to be visited. Students enrolled in this course intend to register for Globe 496 or 497 the following term.

Globe 497. Deans Global Ag and Food Leadership Program. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of instructor. An integrated agricultural and food production and policy program that allows students to assess, analyze and evaluate complex, country-specific situations and to develop their skills, knowledge and abilities via team-oriented projects that involve complex issues such as development of effective foreign food aid and agricultural and food production systems, drivers of world hunger, sustainable resource management and efficacy of policy, and the role of the USA and the United Nations and other development agencies in these systems. International location and duration of program will vary. Pre-trip sessions arranged through Globe 496. Trip expenses paid by students.

Globe 499. Undergraduate Research. Cr. arr. F.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator. Research projects in collaboration with faculty.

Graduate Studies

No major is granted in Graduate Studies. At the recommendation of the major professor and/or the department chair, graduate students may enroll in the following graduate courses to fulfill certain enrollment requirements.

Courses for graduate students

Gr St 585. Preparing Future Faculty Introductory Seminar. Cr. 1. Prereq: One year of graduate coursework; admission into PFF program. Introduction to faculty life issues such as hiring, tenure, teaching, and service at a variety of higher education institutions. Includes presentations from faculty at other institutions.

Gr St 586. Preparing Future Faculty Intermediate Seminar. Cr. 1-3. Prereq: Admission into PFF program; completion of 585 or permission of instructor. Consideration of a wide range of faculty life issues. Includes topics such as higher education trends, diversity issues, learning styles, assessment, grant and proposal writing, and legal and ethical issues. Written components include job and teaching portfolios.

Gr St 587. Preparing Future Faculty Teaching Practice Seminar. Cr. 1. Prereq: Permission of instructor, 585, credit for or concurrent enrollment in 586. Students complete a stand-alone teaching assignment at Iowa State or another higher education institution. Written components include pedagogical documents.

Gr St 588. Preparing Future Faculty Special Topics. Cr. 1-3. Prereq: Permission of instructor, 585, credit for or concurrent enrollment in 586. In-depth study of topic providing academic professional development.

Gr St 600. Examination Only. Cr. R. Reserved for graduate students the term they take the final oral examination. Students must have completed all required coursework and not be registered for another course.

Gr St 601. Required Enrollment. Cr. R. Reserved for graduate students who must be registered for a particular term, but are not required to take additional coursework.

Gr St 680. Doctoral Post Prelim (Continuous) Registration. Cr. R. Repeatable. Reserved for Ph.D. candidates only. See the Graduate College Handbook for specific requirements.

The History department offers curricula leading to the B.A. and B.S. degrees in history, the M.A. degree in history, the M.A. and Ph.D. degrees in the history of technology and science, and the Ph.D. degree in agricultural history and rural studies. The department offers a variety of survey courses (200 series) designed to serve primarily first- and second-year students as either general education courses or as introductions to advanced courses in history or other subject areas. In addition to 200-level survey courses, it offers advanced undergraduate courses in the history of Europe, Asia, Latin America, the United States, technology and science, agriculture, and other selected topics.

Undergraduate Study

The History major. For a description of the undergraduate curriculum with a major in History see Liberal Arts and Sciences, Curriculum. History majors may earn either a bachelor of arts or bachelor of science degree. The minimum required for a major in history is 36 credits, of which at least 24 must be in courses numbered 300 or above. Students may take a maximum of 12 credits at the 200-level, a maximum of 15 credits at the 300-level, and must take a minimum of 12 credits at the 400-level or above. A minimum of 15 credits numbered 300 or above must be taken in residence at Iowa State. Candidates for the B.A. must complete two years of university-level study in one foreign language or the equivalent.

Objectives for History Majors

1. Display the appropriate level of cognitive knowledge of historical themes and events based upon the student's course of study.
2. Display an understanding of past cultures and social organizations, based on the course of study.
3. Develop the fundamental methodological skills of the historical craft:
   - The ability to contextualize and analyze primary source evidence.
   - Familiarity with the concepts of historical argument and interpretation, and the ability to formulate effective argumentation in written and oral forms.
   - Awareness of the basic historiography in selected research area.
   - The ability to conduct research and to write a historical essay based upon primary and secondary source research.
4. Display a sophisticated understanding of the relationship between past events and the present.
For purposes of outcomes assessment, all History majors must complete three credits of History 495 or, if qualified and willing, one graduate level writing/research seminar.

Communication Proficiency requirement: History majors must receive a grade of C or better in each of Eng 150 and 250 (or 250H), and Hist 495 or any graduate seminar.

For a description of the major in History as preparation for professional programs, see Preprofessional Study. Students majoring in History may also earn a second major in International Studies; see International Studies.

Majors must distribute their courses across geographic and chronological areas such that they take at least 3 credits at the 300-level or above in five of the following six areas:

- U.S. history, European history, African/Asian/Latin American history
- Ancient history (pre-500), medieval and early-modern history (ca. 500-1750), and modern history (post-1750)

It is expected that individual courses will fulfill both a geographic and a chronological area. For example, a course on nineteenth century France would count as both European history and modern history. No single course, however, may be used to fulfill more than one geographic and one chronological area. If a course stretches significantly across two or more areas, students will select which geographic and/or chronological area they want the course to fulfill. The History Department undergraduate adviser should be consulted as to which courses fulfill what areas. History 495 may not be used to fulfill any area.

The department offers a minor in History, which may be earned with 15 credits in History courses, of which at least 9 must be in courses numbered 300 or above, excluding Hist 490. A minimum of 9 credits numbered 300 or above must be taken at Iowa State. The College of Liberal Arts and Sciences requires students to earn a C or higher in at least 6 of the required 300-level credits. The History minor is most frequently chosen by students majoring in Political Science, English, Journalism, Computer Science, and Business.

Graduate Study
Graduate students may take any 400-level history course except 490 and 495 for graduate credit. No more than 12 credits of 400-level courses, however, may be used toward the minimum credits required for a graduate degree in history. Additional work is required for graduate credit in 400-level courses.

Most history graduate courses are either proseminars or seminars. Proseminars acquaint students with the historical literature of a field and prepare them for careers in teaching and research. Seminars require students to conduct original historical research and to write extensive research papers reporting the results.

The M.A. in history. For the M.A. in history, students may elect a thesis or a nonthesis program. See the departmental website on the M.A. in History for a full discussion of the options and requirements. An M.A. in History serves as the basis for continued study in history, as well as preparation for careers in law, education, business, and government service. For international students, a TOEFL score of 600 is required at the time of admission.

The M.A. and Ph.D. in history of technology and science. The Graduate program in the history of technology and science examines the role of technology and science in the formation of modern Societies and their attitudes toward people and the world. The program is structured in a sequence of courses leading to the M.A. and Ph.D. degrees. Since these courses approach their subject in the context of social and cultural change, they are also open to and appropriate for students in engineering, the sciences, science education, and science journalism. For a thorough description of the program requirements, see the department’s website on the history of technology and science program.

The Ph.D. in agricultural history and rural studies. The program is designed as a Ph.D. program, but students without an M.A. in history will be expected to qualify for the departmental M.A. in history while progressing toward the doctorate. If they wish to do so, students may elect a thesis or a nonthesis program. Their dissertation, and defend it orally in the Ph.D. final examination. See the departmental website on the program for a full description of requirements.

Courses primarily for undergraduate students
Hist 201. Introduction to Western Civilization I. (3:0) Cr. 3. F. Western civilization from ancient Mediterranean to 1500. Social and cultural developments; economic and political ideas and institutions; problems of historical continuity.

Hist 202. Introduction to Western Civilization II. (3:0) Cr. 3. S. Western civilization from 1500 to present. Social and cultural developments; economic and political ideas and institutions; problems of historical change and continuity.

Hist 207. Chinese Civilization. (3:0) Cr. 3. Origins, development, decline and transformation of China from earliest times to present.

Hist 221. Survey of United States History I. (3:0) Cr. 3. F. Colonial foundations: revolution, confederation, and constitution; nationalisms and democracy; sectional disunity, Civil War, and reunion.

Hist 222. Survey of United States History II. (3:0) Cr. 3. S. Industrialization; emergence as a great power; boom and depression; war, internationalism and Cold War; modern industrial Society.

Hist 245. Introduction to Latin American History. (3:0) Cr. 3. Latin America from pre-conquest times to the present. Economic, social, political, and cultural developments; problems of historical change and continuity.

Hist 280. Introduction to History of Science I. (3:0) Cr. 3. F. Ideas of nature from ancient Greece to the seventeenth-century scientific revolution.

Hist 281. Introduction to History of Science II. (3:0) Cr. 3. S. Science from seventeenth-century scientific revolution to Darwin and Einstein.

Hist 284. Wonders of the World, Ancient to Early Modern. (3:0) Cr. 3. F. Starting from the classical “Seven Wonders of the World,” examines machines, structures, buildings, innovations, and technologies from Sumer, Egypt, Greece, and Rome, through China, Latin America, and the Islamic world, up to Europe’s Industrial Revolution. Topics include developments in warfare and weaponry, architecture, agriculture, printing, religious ceremony, entertainment, and major engineering achievements.

Hist 285. Modern Wonders of the World. (3:0) Cr. 3. S. Examines machines, structures, buildings, innovations, and technologies from the Industrial Revolution to the twenty-first century, including the US, Europe, Asia, and Middle East. Topics include developments in manufacturing, communication, electricity, automobiles, airplanes, warfare, computers, the atom bomb, and major engineering achievements.

Hist 304. Cultural Heritage of the Ancient World. (Cross-listed with CI St). (3:0) Cr. 3. Prereq. Sophomore classification. Historical examination of art, literature, thought, and religious beliefs of major civilizations of the ancient Mediterranean countries until the end of the 8th century.

Hist 305. Cultural Heritage of the Modern World. (3:0) Cr. 3. Prereq. Sophomore classification. Examination of parallel formal and structural elements in scientific and social thinking, technological design, and composition in literature and the arts from the late medieval period to the 20th century.

Hist 307. American Popular Culture. (3:0) Cr. 3. Prereq. Sophomore classification. Social practices, beliefs and material traits of everyday life in America from the mid-19th century to the present. Includes literature, music, theater and other entertainments. Dixie novels, vaudeville, rock and roll music, Hollywood and establishment of professional athletic leagues are among the cultural artifacts and phenomena considered.

Hist 336. History of Modern China I. (3:0) Cr. 3. Prereq. Sophomore classification. China from 1644 to 1912; internal and external stimuli on traditional structure leading to reform and revolution.

Hist 337. History of Modern China II. (3:0) Cr. 3. Prereq. Sophomore classification. China from 1912 to present; search for a new order and continuing Chinese revolution.

Hist 351. Social and Cultural History of American People I. (3:0) Cr. 3. Prereq. Sophomore classification. History of ordinary Americans since 1800; development of Society; dissemination of popular ideas; living conditions, work, and play; the arts, music, architectural styles, material culture; rural and urban lifestyles; majority-minority and gender relations; religion, mass culture, corporations, and technology in modern times.

Hist 352. Social and Cultural History of American People II. (3:0) Cr. 3. Prereq. Sophomore classification. History of ordinary Americans since 1900; development of Society; dissemination of popular ideas; living conditions, work, and play; the arts, music, architectural styles, material culture; rural and urban lifestyles; majority-minority and gender relations; religion, mass culture, corporations, and technology in modern times.
Hist 353. History of African Americans I. (Cross-listed with Af Am). (3-0) Cr. 3. Prereq: Sophomore classification. Examines African roots of black culture and the African American experience in the United States from the colonial period through the Civil War. Topics include Atlantic Slave Trade, slavery and American identity, abolition, the emergence of Black Nationalism, and black participation in the Civil War.

Hist 354. History of African Americans II. (Cross-listed with Af Am). (3-0) Cr. 3. Prereq: Sophomore classification. Explores African American political thought and political action from Reconstruction to the present. Topics include rise of Jim Crow segregation, urban migration, Garvey movement, Harlem Renaissance, Depression and world wars, Pan-Africanism, civil rights, Black Power, and black feminism.

Hist 355. Slavery and the Crisis of Union. (3-0) Cr. 3. Prereq: Sophomore classification. Examines causes and primary events of the sectional crisis over slavery leading up to the Civil War. Missouri Crisis through Presidential Election of 1860.

Hist 360. U.S. 1900 to 1945. (3-0) Cr. 3. Prereq: Sophomore classification. Sociology and politics in transition and crisis: Progressivism, World War I, the twenties, the Great Depression, and World War II.

Hist 361. U.S. 1945 to the Present. (3-0) Cr. 3. Prereq: Sophomore classification. From the Cold War to the Baby Boom to the liberal swing of the 1960s, back to the conservative counter-swing thereafter.

Hist 367. Topics in American Agriculture. (3-0) Cr. 3. Prereq: Sophomore classification. Thematic approach to the development of the American agricultural system. Topics vary, examples include food and agriculture, animals in agriculture, and systems of production.

Hist 370. History of Iowa. (3-0) Cr. 3. Prereq: Sophomore classification. Survey of major social, cultural, and economic developments in Iowa from the late 1700s. Emphasis on groups, pioneers, pioneer life, early economic development, industrial development, educational and religious development, and outstanding personalities.

Hist 374. Women in the Ancient Mediterranean World. (Cross-listed with Cl St, W S). (3-0) Cr. 3. Repeatable. S. Prereq: Any one course in Cl St, W S, Latin, or Greek. Chronological and topical survey of the status of women in the Ancient Mediterranean world; study of constructs of the female and the feminine. Readings from ancient and modern sources. Emphasis on either the Greek world and Hellenistic Egypt, or Hellenistic Egypt and Rome. A. Hellenic World and Hellenistic Egypt B. Roman World including Roman Egypt

Hist 376. Classical Archeology. (Cross-listed with Cl St, Relig). (3-0) Cr. 3. Repeatable. Chronological survey of the material culture of the ancient Greece-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.

A. Bronze Age (Minoan and Mycenaean palatial cultures) and Early Iron Age Greece (ca 3000-700 BC).
B. Archaic through Hellenistic Greece (ca 700-300 BC).

Hist 380. History of Women in Science, Technology, and Medicine. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Sophomore classification. History of women's relationship to the fields of science, technology, and medicine, as students and professionals, consumers, subjects and patients, family members, workers and citizens. Concentrates especially on 19th and 20th century United States, concluding with an examination of current issues of special interest to women in science, technology, and medicine.

Hist 383. Technology, Public Science, and European Culture, 1715-Present. (3-0) Cr. 3. Prereq: Sophomore classification. A survey from the Age of Enlightenment to the end of the twentieth century of the relationship between science, technology, and public or popular culture in a comparative European context (including Russia and the former Soviet Union).

Hist 386. History of Women in America. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Sophomore classification. A study of the various aspects of the role of women from colonial era to present; emphasis on employment, education, concepts of sexuality, and changing nature of the home.

Hist 390. World Military History. (3-0) Cr. 3. Prereq: Sophomore classification. Covers military history from the Neolithic era through the mid- and late-19th century wars, the First and Second World Wars, Korean War, Vietnam War, and Gulf Wars.

Hist 392. Crime and Policing in England 1550-1850. (3-0) Cr. 3. Prereq: Sophomore classification. Course examines different forms and ideas of criminality and the nature and development of law enforcement in England between 1550 and 1850. Significant issues will include the nature of criminal records and Statistics, the legal system, the politics of the law and its links with social relations, policing, female crime, juvenile delinquency, organized crime, riots, “social crime,” and the treatment of crime in creative literary texts.

Hist 419. History of Modern France. (3-0) Cr. 3. Prereq: Sophomore classification. From absolutism to revolution and the rise of modern democracy. Nonmajor graduate credit.

Hist 420. France’s Revolutionary Century, 1715-1815. (3-0) Cr. 3. Prereq: Sophomore classification. An in-depth investigation of the French Revolution, its causes and consequences, beginning in the Ancien Regime and ending with the fall of Napoleon. Nonmajor graduate credit.

Hist 421. History of Russia I. (3-0) Cr. 3. Prereq: Sophomore classification. Russia to 1815. Origins of Russian people; Byzantine influences; Mongol invasion; rise of Moscow; Westernization. Nonmajor graduate credit.

Hist 422. History of Russia II. (3-0) Cr. 3. Prereq: Sophomore classification. Russia since 1850. Reform and revolution; transformation of Society; USSR as a world power; recent changes. Nonmajor graduate credit.

Hist 424. History of Modern Germany. (3-0) Cr. 3. Prereq: Sophomore classification. Political, social, and cultural history of Germany from the 19th century to the present. Nonmajor graduate credit.

Hist 427. Crime and Policing in England 1550-1850. (3-0) Cr. 3. Prereq: Sophomore classification. Course examines different forms and ideas of criminality and the nature and development of law enforcement in England between 1550 and 1856. Significant issues will include the nature of criminal records and Statistics, the legal system, the politics of the law and its links with social relations, policing, female crime, juvenile delinquency, organized crime, riots, “social crime,” and the treatment of crime in creative literary texts. Nonmajor graduate credit.

Hist 429. “Monstrous London”: London’s Histories 1500-1800. (3-1) Cr. 4. Prereq: Sophomore classification. Study of London’s social, economic, cultural, political, and environmental history 1500-1800, using both qualitative and quantitative methods to examine contemporary and secondary sources. Course combines standard lecture and discussion format with one week of intensive study abroad for 4th hour of course credit. Nonmajor graduate credit.

Hist 433. Science, Technology, and Medicine in Latin America. (3-0) Cr. 3. Prereq: Sophomore classification. Development of science, technology, and medicine in Latin America from pre-colonial times to the present. Themes include: intersection of science, medicine, and technology with colonization, impact of human populations on environments, formation of nation-states, spread of disease, and how perceptions of accepted scientific knowledge change over time. Nonmajor graduate credit.
Hist 450. Colonial America. (3-0) Cr. 3. Prereq: Sophomore classification. Exploration, colonization, and development of political, economic, religious, and cultural institutions of North American colonies before 1754. Topics also include social history, emergence of African-American relations with American Indians. Nonmajor graduate credit.

Hist 451. American Revolutionary Era. (3-0) Cr. 3. Prereq: Sophomore classification. Participants, ideas, and events leading to independence and the foundation of the United States, 1754 to 1789. Topics include political, military, social, cultural history, also issues of gender and race relations. Nonmajor graduate credit.

Hist 456. American Family History. (3-0) Cr. 3. Prereq: Sophomore classification. The impact on American families from colonial times onward of agricultural change, industrialization, urbanization, and wars and depressions. Nonmajor graduate credit.

Hist 457. The Rural South. (3-0) Cr. 3. Prereq: Sophomore classification. History of the American South from colonial period to present. Emphasis on economic, social, and political change in this rural region. Nonmajor graduate credit.

Hist 461. History of American Thought I. (3-0) Cr. 3. Prereq: Sophomore classification. American religious, social, and political thought; development of democracy and nationalism, and of the arts and sciences from colonial times to late nineteenth century. Nonmajor graduate credit.

Hist 465. The American West. (3-0) Cr. 3. Prereq: Sophomore classification. History of trans-Mississippi West from 1800 to present, concentrating on settlement and regional identity. Emphasis on the state, the environment, urbanization, agriculture, Native Americans, and minority communities. Nonmajor graduate credit.

Hist 468. History of Medical History and the Body. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Sophomore classification. History of medicine, history of science, and women's history combine for an intensive examination of topics related to health, the body, and medical care over the centuries. Topics include gender and sexuality, reproduction, historical interpretations of gender differences, and the politics of women's health. Nonmajor graduate credit.

Hist 483. Modern Science and Human Nature. (3-0) Cr. 3. Prereq: Sophomore classification. History of science since the 18th century: evolutionary natural and social science, the modern social sciences; anthropology, psychology, economics, law, psychiatry, human growth and development, political science, city planning, public administration, international relations, and others, and the uses of the human Sciences in education, politics, advertising, corporate functioning, warfare, psychotherapy, childrearing, and other pursuits in modern times, as well as the impact of postmodernism on the human Sciences. Nonmajor graduate credit.

Hist 488. History of Medicine, Gender, and the Body. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Sophomore classification. History of medicine, history of science, and women's history combine for an intensive examination of topics related to health, the body, and medical care over the centuries. Topics include gender and sexuality, reproduction, historical interpretations of gender differences, and the politics of women's health. Nonmajor graduate credit.

Hist 510. Proseminar in East Asian History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Readings in East Asian history. Topics vary each time offered.

Hist 511. Proseminar in American History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Readings in American history. Topics vary each time offered.

Hist 520. Proseminar in European History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Readings in European history. A. Ancient (Same as CI St 512A) B. Medieval C. Modern

Hist 513. Proseminar in Latin American History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Readings in Latin American history. Topics vary each time offered.

Hist 530. Proseminar in Modern Russian/Soviet History. (3-0) Cr. 3. Repeatable. Prereq: Hist 422. Readings in modern Russian history. Topics vary each time offered.

Hist 550. Proseminar in European Rural and Agricultural History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. A. Modern European Rural Life B. Twentieth Century Europe

Hist 552. Proseminar in American Rural and Agricultural History. (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Readings in modern American history. Topics vary each time offered.

Hist 570. Seminar in General History of Science I. (3-0) Cr. 3. Prereq: Permission of instructor. The history of science from pre-classical civilizations to the Age of Isaac Newton with emphasis on the historical literature, varying interpretations of the period, and problems for continuing research.

Hist 571. Seminar in General History of Science II. (3-0) Cr. 3. Prereq: Permission of instructor. The history of science from Isaac Newton to modern times, with emphasis on the historical literature, varying interpretations of the period, and problems for continuing research.

Hist 575. Seminar in General History of Technology. (3-0) Cr. 3. Prereq: Permission of instructor. The history of technology from the 11th century to the present, with emphasis on the historical literature, differing interpretations of major problems, and problems identified for college-level teaching and for further scholarly research.

Hist 576. Colloquium in the History of Science. (3-0) Cr. 3. Prereq: Permission of instructor. Seminar on topics of interest to specialists in history of science. Topics include history of technology and science. Required of all graduate students in history of technology and science.

Hist 580. Museum or Archive Internship. (3-0) Cr. 3. Prereq: 15 graduate credits in history and permission of instructor. Introduction to work and research in either a museum or archive setting.

Hist 583. Historical Methods. (3-0) Cr. 3. Study of evidence, theory, and methods. A. Historical Narrative B. Statistical Evidence and Analysis

opportunities for independent study and research

Students may designate any course as an Honors program. (See programs. These courses, open only to Honors courses and Honors sections of regular programs of study, students are offered numerously Honors courses, seminars, and independent study. They derive the fullest benefit from their undergraduate education. 

Students in the Honors Program are offered a variety of academic opportunities designed to help them derive the fullest benefit from their undergraduate education. To enhance their individualized programs of study, students are offered numerous Honors courses, seminars, and independent research opportunities.

Honors courses and Honors sections of regular courses are offered by several departments and programs. These courses, open only to Honors Program members, have limited enrollment and are taught by specially selected instructors. Most of these courses are listed by department or program. (See Economics, Engineering, English, Mathematics, Physics, Psychology, and Speech Communication.)

In addition to established Honors courses, Honors students may designate any course as an Honors course by making appropriate arrangements with the course instructor and obtaining approval of the Honors Program Director. Most departments offer opportunities for independent study and research under 290 and 490; when designated by an H, these courses also carry Honors credit. Research grants are available to support Honors research.

Listed below are those courses that are offered directly by the University Honors Program. Specific information about the full range of Honors courses and seminars for the current academic year, including the Honors courses offered by individual departments and programs, may be obtained from the Honors Program Office in Jischke Honors Building.

Courses primarily for undergraduate students

Hon 121. First-Year Honors Seminar. (0-2) Cr. 1. F. Prereq: Membership in the First-year Honors Program. Orientation to Iowa State University and to the University Honors Program. Satisfactory-fail only.

Hon 290. Special Problems. Cr. arr. Prereq: Membership in and permission of the University Honors Program. Independent study on topics of an interdisciplinary nature. Intended primarily for freshmen and sophomores. Satisfactory-fail only. H. Honors. U. Undergraduate Research

Hon 302. Honors Leadership Seminar. (1-2) Cr. 2. F. Prereq: Selection as a leader of a First-year Honors Seminar. For students serving as leaders of First-year Honors Seminars, under faculty supervision. Development of teaching and leadership skills within the context of an Honors education experience. Satisfactory-fail only.

Hon 321. University Honors Seminars. Cr. arr. F.S.SS. Prereq: Membership in the University Honors Program. Interdisciplinary seminars on topics to be announced in advance. Satisfactory-fail only.

Hon 322. University Honors Seminars. Cr. arr. F.S.SS. Prereq: Membership in the University Honors Program. Interdisciplinary seminars on topics to be announced in advance. Satisfactory-fail only.

Hon 323. University Honors Seminars. Cr. arr. F.S.SS. Prereq: Membership in the University Honors Program. Interdisciplinary seminars on topics to be announced in advance. Satisfactory-fail only.

Hon 324. University Honors Seminars. Cr. arr. F.S.SS. Prereq: Membership in the University Honors Program. Interdisciplinary seminars on topics to be announced in advance. Satisfactory-fail only.

Hon 490. Independent Study. Cr. arr. Prereq: Membership in and permission of the University Honors Program. Independent study on topics of an interdisciplinary nature. Intended primarily for juniors and seniors.

Horticulture

www.hort.iastate.edu

Jeffery Iles, Chair of Department

University Professors: Christians, Nonnecke
Professors: Arora, Domoto, Gleason, Graves, Han-napel, Iles, Minner, Taber

Professors (Emeritus): Chaplin, Hall, Hodges
Professor (Collaborator): Yadav

Associate Professors: Delate, Fei, Gladon, Haynes, Stephens, VanDerZanden

Associate Professors (Collaborators): Beeson, Krebs

Assistant Professor: Reinert

Assistant Professors (Collaborators): Sharma, Widrichner

Senior Lecturers: Osborn, Rollenhagen

Lecturer: Niles

Undergraduate Study

For undergraduate curriculum in Horticulture leading to the Bachelor of Science degree, see Horticulture, Curriculum.

Graduates possess the technical knowledge and skills to become professional horticulturists. They understand plant growth and development and are familiar with cultural and management principles for a wide assortment of horticultural crops. They are able to work and communicate effectively with fellow horticultural professionals and with ordinary citizens who share an interest in Horticulture. Graduates also understand the ethical and environmental dimensions of problems and issues facing horticultural professionals.

A degree in Horticulture opens the door to employment opportunities with production nurseries, seed companies, interior landscaping firms, greenhouses, garden centers, conservatories, landscape design/installation firms, public gardens and arboreta, orchards and vineyards, food processing companies, vegetable farms, golf courses, sports fields, sod production companies and lawn care businesses. Several industries closely related to Horticulture provide employment opportunities in the areas of sales, management, and communication. Opportunities also exist for careers in research, teaching, and business after obtaining advanced training in graduate school.

Undergraduate students have the option of selecting a secondary major in one of several interdepartmental programs including, seed science, agricultural education, environmental studies, or international agriculture (see Index).

The Department of Horticulture offers work for a minor in Horticulture that is earned by taking Hort 221 plus 12 additional credits with a maximum of 3 credits at the 200-level and a minimum of 9 credits at the 300-level or above. Visit our departmental website at www.hort.iastate.edu

Graduate Study

The graduate major in Horticulture leads to the M.S. (thesis required) and Ph.D. A nonthesis master’s degree is offered through the master of agriculture program. Some faculty members of the department serve as major professors for students in interdepartmental major graduate majors in plant biology; genetics; molecular, cellular, and developmental biology; ecology and evolutionary biology; sustainable agriculture; and environmental science.
Graduate students majoring in Horticulture usually take minor course work in Agronomy, botany (cytology, morphology, or physiology), biochemistry, chemistry, entomology, food science and human nutrition, genetics, plant pathology, or Statistics. There is no uniform foreign language requirement for the Master of Science or Doctor of Philosophy degree.

Graduates possess a broad understanding of horticulture and the allied plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and other interested citizens. They are experienced in conducting research and communicating the results from that research. They are capable of addressing and solving complex problems that confront the many Horticultural, agricultural and plant science professions. They also understand the ethical, legal, social, and environmental issues associated with modern agricultural/horticultural practices.

Courses primarily for undergraduate students

Hort 110. Orientation in Horticulture. (1-0) Cr. 1. F. Introduction to the field of Horticulture.

Hort 112. Orientation to Learning and Productive Team Membership. (Cross-listed with Aer E, FS HN, TSM, NREM). (2-0) Cr. 2. F. Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

Hort 114. Developing Responsible Learners and Effective Leaders. (Cross-listed with NREM, FS HN, TSM). (2-0) Cr. 2. S. Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind, planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

Hort 121. Home Horticulture. (2-0) Cr. 2. F. Growing plants in and around the home including requirements for growing house plants; plant propagation; designing and maintaining flower, fruit, and vegetable gardens; lawn, tree, and shrub maintenance.

Hort 122. Hands-On Home Horticulture. (1-0) Cr. 1. F. Demonstration and activities that illustrate principles of growing plants for the home garden. Topics include plant identification, propagation, selection, and management for indoor and outdoor gardens.

Hort 193. Topics in Horticulture. Cr. arr. Repeatable. F.S.SS. Off Campus. Offered as demand warrants. Includes practical courses in the field of Horticulture. A maximum of 12 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

A. Greenhouse Crops
B. Nursery Crops
C. Turfgrass
D. Fruit Crops
E. Vegetable Crops
F. Cross-Commodity
G. Landscape Horticulture

Hort 221. Principles of Horticulture. (2-2) Cr. 3. F. S. Prereq: Biol 211. Biological principles of growing Horticultural crops including anatomy, reproduction, light, temperature, water, nutrition, and growth and development. Laboratory exercises emphasize environmental factors and permit detailed observation of plant growth.

Hort 240. Trees, Shrubs and Woody Vines for Landscaping. (3-0) Cr. F. Students will learn to identify trees, shrubs, and woody vines. Factors influencing the horticultural use of woody plants also will be taught.

Hort 280. Landscape Graphics. (3-0) Cr. 3. S. Introduction to computer and hand rendering techniques of landscape graphics. Students will gain proficiency in plan view, section and elevation graphics. Intensive studio and computer based instruction.

Hort 283. Pesticide Application Certification. (Cross-listed with Ent, for, Agron). (2-0) Cr. 2. S. Holmes. Core background and specialty topics in agricultural, and Horticultural pest catalog certification. Students can Select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

Hort 321. Horticulture Physiology. (3-0) Cr. 3. F. Prereq: 221 or Biol 211. Principles of plant physiology relating to growth and development of Horticultural crops. A report of 10 or more pages describing the student’s experience is required. One credit is awarded to students who successfully complete this course. A maximum of two credits may be used toward the Horticulture courses required for graduation.

Hort 322. Plant Propagation. (2-2) Cr. 3. S. Prereq: 221 or Biol 212. Fundamental principles underlying sexual and asexual propagation of plants; practice in reproducing plants by use of seeds, leaves, stems, and roots.

Hort 330. Herbaceous Ornamental Plants. (2-2) Cr. F. S. Prereq: 221 or by permission of instructor. Identification, botanical characteristics, origins, propagation, uses and general culture of herbaceous annual and perennial plants for Midwestern gardens and landscapes.

Hort 332. Greenhouse Operation and Management. (3-3) Cr. 4. F. S. Prereq: 221. Principles of greenhouse and other controlled environment operation and management. Methods of monitoring and manipulating environmental factors such as light, temperature, fertility, production media, etc., to maximize production rate and quality and minimize production costs and time. Field trip(s) outside scheduled class time required. Nonmajor graduate credit.

Hort 338. Seed Science and Technology. (Cross-listed with Agron). (2-2) Cr. 3. F. S. Prereq: Agron 144 or Hort 221, Biol 211. Goggi. Seed production, maturation, senescence and related aspects of seed production, handling, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

Hort 341. Woody Plant Cultivars: Shade Trees. (1-0) Cr. 1. S. Prereq: 240 or a L. A 221 or L A 222. Students will learn how to identify and care for the most Horticulturally important shade tree taxa suitable for the Midwest. Cultivars of the most prevalent species also will be taught.

Hort 342. Landscape Installation and Establishment. (2-2) Cr. 3. F. S. Prereq: 240 or a L A 221 or L A 222. Principles and practices involved with establishment of managed landscapes. Laboratory work involves site evaluation, installation techniques, postplant care, and maintenance of established landscape plants.

Hort 351. Turfgrass Establishment and Management. (Cross-listed with Agron). (3-0) Cr. 3. F. S. Prereq: 221 or Agron 114 or Biol 211. Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, roadway sides, and seed and sod production. The biology and control of turfgrass pests. Nonmajor graduate credit.

Hort 351L. Turfgrass Establishment and Management Laboratory. (Cross-listed with Agron). (0-3) Cr. 1. F. S. Prereq: Credit or enrollment in 351. Those enrolled in the Horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor. Nonmajor graduate credit.

Hort 354. Soils and Plant Growth. (Cross-listed with Agron). (3-0) Cr. 3. F. S. Prereq: Biol 101 or 211. Killorn or Lounkanen. Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutrient elements, pH, organic matter maintenance, and rooting development. Nonmajor graduate credit.

Hort 354L. Soils and Plant Growth Laboratory. (Cross-listed with Agron). (0-3) Cr. 1. F. S. Prereq: Credit or enrollment in 354. Kennin. Exercises in soil testing that assess a soil’s ability to support nutritive requirements for plant growth.

Hort 380. Principles of Garden Composition. (2-0) Cr. 2. S. Prereq: 240. Not available as credit for LA majors. Functional and aesthetic aspects of landscape planning as a basis for design decisions; emphasis on plant selection. Includes site analysis, development process, and design principles.

Hort 381. Beginning Garden Composition Studio. (0-1) Cr. 2. S. Prereq: 240. To be taken concurrently with 380. Not available as credit for LA majors. Development of landscape graphic techniques. Studio-based projects implementing principles of landscape design.

Hort 391. Horticultural Management Experience. Cr. 1. Repeatable. F.S.SS. Prereq: 221, permission of instructor. A structured work experience for the student to gain insight into management operations associated with production and management of Horticultural crops. A report of 10 or more pages describing the student’s experience is required. One credit is given for each term the student is enrolled in the course. A maximum of two credits may be used toward the Horticultural sciences course requirements, and two additional credits may be used toward the 128 credits required for graduation.

Hort 398. Cooperative Education. Cr. R. Repeatable. F.S.SS. Prereq: Permission of department resource and career center coordinator. Students must register for this course before commencing each work period.

Hort 421. Introduction to Plant Breeding. (Cross-listed with Agron). (3-0) Cr. 3. F. S. Prereq: Gen 320 or Biol 313. Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated, and asexually reproduced Agronomic and Horticultural crops. Applications of biotechnology techniques in the development of improved cultivars. Nonmajor graduate credit.

Hort 422. Postharvest Technology. (3-3) Cr. 4. Alt. F. offered 2009. Prereq: 221, senior or junior standing, permission. Principles, methods, and techniques related to postharvest maintenance of quality of Horticultural commodities. Emphasis on the effects of handling, storage facilities and techniques, and quality evaluation. Field trips outside scheduled class time required. Weekend/overnight field trips may be required. Nonmajor graduate credit.

Hort 424. Sustainable and Environmental Horticulture Systems. (Dual-listed with 524). (Cross-listed with Env S.). (2-0) Cr. 2. F. Inquiry into ethical issues and environmental consequences of Horticultural cropping systems and production practices. Emphasis on production systems that are resource efficient, environmentally sound, socially acceptable, and profitable.

Hort 442. Nursery Production and Management. (2-0) Cr. 2. Alt. F., offered 2009. Prereq: 221. Theory, nursery layout and design, and cultural practices important for growing and shipping field and container-grown nursery crops. Overview of garden center design and retailing and marketing strategies. Field trips outside scheduled class time may be required. Nonmajor graduate credit.

Hort 444. Landscape Construction. (2-3) Cr. 3. F. Prereq: 240. Junior or senior classification. Principles and practices of residential landscape construction. Encompasses process from initial client contact, materials procurement, job sequencing, and installation of plant material and landscapes. Laboratory work involves the evaluation and implementation of landscape construction using various landscape materials and techniques.

Hort 445. Horticulture Management and Administration. (2-0) Cr. 2. F. Prereq: 221, junior or senior classification. In-depth presentation and discussion of skills and strategies needed to manage a Horticultural enterprise. Topics include motivating employees, managing meetings, conducting performance appraisals, dealing with conflict, and managing an increasingly diverse work force.

Hort 446. Landscape Contracting and Estimating. (2-0) Cr. 2. F. Prereq: 240 and credit or enrollment in 342, junior or senior classification. Overview and implementation of landscape estimating and contracting. Includes estimating procedures (material, labor, equipment) and landscape business issues (contracts, insurance, personnel).

Hort 451. Professional Turfgrass Management. (2-0) Cr. 2. Alt. S., offered 2011. Prereq: 291. Turfgrass science including the study of (1) specific information on soil chemistry and soil modification as they relate to the development and maintenance of turfgrass areas, (2) specialized management practices used in athletic field care, professional lawn care, and golf course industries, and (3) construction methods for golf courses and sports fields. Nonmajor graduate credit.

Hort 453. Sports Turf Management. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 351. Management techniques for today's specialized athletic fields. The Horticultural and budgetary aspects of football, soccer, baseball, and softball fields will be presented. Field trips and laboratory exercises will develop a practical understanding of actual principles in field development, construction, and management. Nonmajor graduate credit.

Hort 454. Turf & Landscape Irrigation. (3-0) Cr. 3. Alt. F., offered 2009. Irrigation systems and principles for turf and landscape environments. Topics include design, installation, equipment, management, and troubleshooting of irrigation systems for golf, athletic fields, residential lawns and landscapes. Participation in practical exercises and local field trips to irrigation sites are required.

Hort 461. Fruit and Nut Crop Production and Management. (2-0) Cr. 3. Alt. S., offered 2011. Prereq: 221. Principles and practices of small fruit, tree fruit, and nut culture and production. Morphology, physiology of growth and development, plant establishment, pest management, pruning, training, harvesting, storage, and marketing. Emphasis on sustainable practices. Participation in practical exercises and local field trips is required. Nonmajor graduate credit.

Hort 471. Vegetable Production and Management. (2-0) Cr. 2. Alt. S., offered 2010. Prereq: 221 or Agron 114 and Agron 154 or 155. Principles of vegetable production with emphasis on sustainable practices, market outlets, business aspects, and risk management. Organic techniques will be discussed. Major crop climatic conditions, physiological growth and development, harvesting, storage, and marketing.

Hort 471L. Vegetable Production and Management Laboratory. (3-0) Cr. 1. Alt. S., offered 2010. Prereq: Credit or enrollment in Hort 471 is required, except by permission of the instructor. Sequence planting techniques, seed and seedling identification, seed germination quality and requirements, earliness techniques, irrigation management, fertilizer and compost application, postharvest handling, high tunnel production, and pesticide application will be covered. Field trip required. Some laboratory projects will require time outside the regular scheduled class period. Nonmajor graduate credit.

Hort 475. Urban Forestry. (Cross-listed with For). (2-3) Cr. 3. F. Prereq: Senior or junior classification. 3 credits in biology. Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban stormwater control, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management). Nonmajor graduate credit.

Hort 478. Contemporary Issues in the Green Industry. (2-3) Cr. 3. S. Prereq: Junior or senior classification. 3 credits in biology. Analysis and evaluation of contemporary issues facing the green industry including environmental regulations, labor, market share, landscape contracting, business management and professionalism. Discussion format and interaction with green industry professionals.

Hort 481. Advanced Garden Composition. (0-0) Cr. 3. F. Prereq: 240, 330, 380, 381. Limited to Planting Design/Installation option students. Development of residential landscapes using design principles and the design process. Projects encompass site analysis, concept development, preliminary design, final design, and graphic presentation techniques. Techniques will include hand and computer rendering.

Hort 524. Sustainable and Environmental Horticulture Systems. (Dual-listed with 424). (2-0) Cr. 2. F. Inquiry into ethical issues and environmental consequences of horticultural cropping systems and production practices. Emphasis on production systems that are resource efficient; environmentally sound, socially acceptable, and profitable.

Hort 529. Publishing in Biological Sciences Journals. (Cross-listed with Agron, NREM). (2-0) Cr. 2. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data. Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

Hort 530. Research Orientation. (1-3) Cr. 2. F. Instruction in scientific methods and communication skills.

Hort 543. Seed Physiology. (Cross-listed with STB). (2-0) Cr. 2. Alt. F., offered 2010. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. Brief introduction to plant physiology. Physiological aspects of seed development, maturation, longevity, dormancy and germination. Links between physiology and seed quality.

Hort 546. Organizational Strategies for Diversified Farming Systems. (Cross-listed with Agron, Soc, SusAg). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: SusAg 509. Examination of the organization and operation of complex, diversified farming systems using tools and perspectives drawn from ecology, Agronomy, and Sociology. The course contains a significant field component focused on an Iowa farm.

Hort 551. Growth and Development of Perennial Grasses. (Cross-listed with Agron). (2-0) Cr. 2. Alt. S., offered 2010. Prereq: Junior or senior or graduate classification or permission of instructor. The grass plant. Selected topics on anatomy, morphology, and physiological relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.

Hort 556. Professional Practice in the Life Sciences. (Cross-listed with Pl Pt, A S). (3-0) Cr. Alt. S. Prereq: Graduate classification. Professional discourse on the ethical and legal issues facing life science researchers. Offered in modular format; each module is four weeks. A. Professional Practices in Research. (Cr. 1.0) Good scientific practices and professional ethics in the life sciences.

B. Intellectual Property and Industry Interactions. (Cr. 0.5) Ethical and legal issues facing life scientists involved in research interactions with industry.

Hort 590. Special Topics. Cr. arr. Repeatable. Prereq. a major or minor in Horticulture.

Hort 690. Advanced Topics. Cr. arr. Repeatable.

Hort 698. Horticulture Teaching Practicum. (1-0) Cr. 1. S. Prereq: Graduate student classification. Discussions are intended to foster the development of graduate students as teaching assistants and future Horticulture/plant science teachers. Topics include establishing a classroom presence, improving lectures, motivating students, dealing with difficult or disruptive students, and developing a teaching philosophy. Satisfactory-fail only.

Hotel, Restaurant, and Institution Management (Administered by the Department of Apparel, Educational Studies, and Hospitality Management)

Robert Bosselman, Chair of Department
Distinguished Professors (Emeritus): Fanslow, Moyer, Winakor
University Professors (Emeritus): Farrel-Beck
Professors: Bosselman, Damhorst, Fiore, Kadolph
Professors (Emeritus): Anderson, Beavers, Brun, Burnet, Cowan, Crabtree, Gilmore, Smith, Stone, Williams
Associate Professors: Baltzer, Hausafus, Jeong, Neihm, Oh, Parsons
Associate Professors (Emeritus): Amos, Brackelsberg, Brown, Ebert, Huss, Kundel, Kunz, Walsh
Associate Professor (Adjunct): Strohbehn
Assistant Professors: Barker, Hurst, Karpova, Keino, Y. Lee, Marketti, Rajagopal, Wohlsdorf-Arendt, Zheng
Assistant Professor (Adjunct): Glock
Instructor (Adjunct): Fratzke

Lecturers: Ackerman, Burger, Christensen, Fihri, Fitzpatrick, Kramer, M. Lee, Sanger, Trost, Wirth, Wise

The Hotel, Restaurant, and Institution Management (HRIM) program aspires to excellence in professional and leadership development, economic development, and food safety for the hospitality industry through education, research, and outreach with a mission of developing leaders in practice, education, and research for the hospitality industry. Educational experiences are planned to contribute to the graduate’s effectiveness as a career professional and as a person, family member, and citizen. Research and extension efforts are conducted with the purpose of improving management effectiveness and quality of services within hospitality organizations. Finally, the program is committed to serving the respective missions of Iowa State University and the College of Human Sciences and to serving the needs of the citizens of Iowa.

Undergraduate Study

The program offers work for the degree bachelor of science in hospitality management. Coursework is planned to provide students with a general education plus professional preparation for supervisory and executive positions in hospitality organizations. Principles of business management are presented, as well as fundamentals of hospitality operations. Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, marketing, and operational principles for managing hospitality operations. They demonstrate best practices in meeting customer expectations and use of technology to achieve operational efficiency.

Learning experiences are provided in the quantity food production and service facility of the HRIM program and other approved establishments. Students are required to have a total of at least 600 hours of relevant work experience prior to graduation. Of the 600 hours, 200 hours are required prior to completing one year in the program. The HRIM program offers a minor that may be earned by successfully completing at least 15 credits of AESHM/HRIM courses in consultation with the advisor. The program also participates in food safety and entrepreneurship interdisciplinary minors.
Communication Proficiency Requirement: Grade of C or better in either Engl 150 and 250 or equivalent transfer courses.

Graduate Study

The HRIM program offers work for the master of science and doctor of philosophy degrees in hospitality management. Graduates of the program are able to interpret trends and adapt operating practices of hospitality organizations to changing economic, social, political, technological, and environmental conditions. They can manage a hospitality enterprise successfully to achieve objectives of the operation or, at the doctoral level, successfully carry out responsibilities of a hospitality educator. Graduates will make positive contributions to the growth and improvement of the hospitality industry using current research in the decision-making process.

A degree in hotel, restaurant, and institution management is the usual background for graduate study; however, applicants with preparation in dietetics, business, or closely related fields are encouraged to apply. Ph.D. applicants must have two (2) years of professional work experience in the field.

The master of science degree requires either a thesis or non-thesis (creative component) project. Students also are required to take one course in three of four core areas (human resources, financial management, marketing, and strategic management).

The program participates in the Master of Family and Consumer Sciences degree by offering a specialization in Hospitality Management. The program also participates in the Master of Family and Consumer Sciences degree with specialization in Dietetics, offered in cooperation with the Department of Food Science and Human Nutrition. The Ph.D. program requires 80 credits, up to 30 of which may be applied from the Master’s degree. All Ph.D. students take a minimum of 15 research/dissertation credits.

Courses primarily for undergraduate students:

HRI 101. Introduction to the Hospitality Industry. (3-0) Cr. 3. F. Introduction to the foodservice, lodging, and tourism components of the hospitality industry. Background information, current issues, and future challenges in various segments of the industry.

HRI 189. Introduction to University Dining Services Management. (1-0) Cr. 1. S. Overview of management concepts and distinct features of university dining services.

HRI 193. Hospitality Work Experience I. Cr. R. F.S.SS. Approved work experience in foodservice, lodging, or related operations. A minimum of 200 hours required prior to completing one year in the program. Satisfactory-fail only.

HRI 260. Global Tourism Management. (3-0) Cr. 3. S. Overview of the global tourism industry: hospitality and related services, destination attractions, and transportation. Introduction to travel behavior, tourism planning and research, and economic and social impacts of tourism development.

HRI 315. Hospitality Law. (3-0) Cr. 3. S. PreReq: 101. Laws relating to ownership and operation of hospitality organizations. The duties and rights of both hospitality business operators and customers. Legal implications of various managerial decisions. Nonmajor graduate credit.

HRI 333. Hospitality Operations Cost Controls. (3-0) Cr. 3. F. PreReq: Credit or enrollment in 380, 380L, Math 104 or 150, Com S 103. Introduction to revenue and cost systems in foodservice and lodging operations. Application of principles related to procurement, production, and inventory controls.

HRI 352. Lodging Operations Management I. (3-0) Cr. 3. F. PreReq: Credit in 101. Introduction to functional department activities and current issues of lodging operations with emphasis on front office and housekeeping. Reservation activities and night audit exercises. Case studies.

HRI 380. Quantity Food Production Management. (3-0) Cr. 3. F.S. PreReq: 233 or 2 cr Micro; FS HN 111 or 214; at least junior classification; enrollment in 380L. Principles of and procedures used in quantity food production management including quality control, food costing, work methods, menu planning, food production systems, and service.

HRI 380L. Quantity Food Production and Service Management Experience. (2-0) Cr. 2. F. S. PreReq: 233 or 2 cr Micro; FS HN 111 or 214; at least junior classification; enrollment in 380. Expense management. Principles of quantity food production and service management procedures and practices in the program’s foodservice operates.

HRI 382. Field Study. Cr. arr. F.S.SS. SSS. Pre Req: Permission by application. Supervised study opportunity for students to observe and apply classroom theory to actual hospitality operations across the U.S. Hospitality operations may include hotels, restaurants, resorts, wineries, theme parks, clubs, hospitals, and tourism operations. Required pre-study sessions may be arranged. Expenses paid by student.

HRI 383. Introduction to Wines, Beers, and Spirits. (2-0) Cr. 2. F. S. Pre Req: Must be at least 21 years old. Introduction to history and methods of production for a variety of wines, beers, spirits, and other beverages. Product knowledge, sales, and service techniques related to the hospitality industry.

HRI 391. Foodservice Systems Management I. (3-0) Cr. 3. F. Pre Req: Credit or enrollment in 380, 380L. Principles and techniques related to basic management, leadership, and human resource management of foodservices in health care and other institutional settings. Food safety and sanitation for institutions. Credit for either HRI 391 or 287 and 333 may count toward graduation. Not accepted for credit toward a major in HRIM.

HRI 392. Foodservice Systems Management II. (3-0) Cr. 3. S. Pre Req: 391. Introduction to foodservice departments: procedures for controlling food, labor, and other variable costs. Application of principles related to food product selection, specification, purchase, and storage in health care and other institutions. Credit for either HRI 392 or 233 and 333 may count toward graduation. Not accepted for credit toward a major in HRIM.

HRI 393. Hospitality Work Experience II. Cr. 2. F.S.SS. Pre Req: 101, 193, 233, 287; adviser approval. Approved 400-hour experience in foodservice, lodging, or related operations for HRIM majors. Open to minors. Satisfactory-fail only.

HRI 433. Hospitality Financial Management. (3-0) Cr. 3. S. Pre Req: 333; Acct 284; Econ 101; credit or enrollment in Stat 101. Use of common financial statements, accounting ratios, and financial techniques to impact management decisions.

HRI 452. Lodging Operations Management II. (3-0) Cr. 3. S. Pre Req: 392; Com S 103. Development of business plan and evaluation of business performance in a simulated environment. Operational decision making practices by applying concepts of management, operations, marketing, and finance for a computer-mediated environment. Nonmajor graduate credit.

HRI 455. Introduction to Strategic Management in Foodservice and Lodging. (3-0) Cr. 3. S. Pre Req: 340; credit or enrollment in 432, 438. Introduction to strategic management principles and practices with an application of human resources, operations, marketing, and financial management concepts. Case studies.

HRI 487. Fine Dining Management. (Dual-Listed with 587). (2-3) Cr. 3. F. Pre Req: 380, 380L; credit or enrollment in 333. Creative experiences with U.S. regional and international foods appropriate for fine dining. Application of management principles in food preparation and service in fine dining operations. Exploration of the historical and cultural development of the world food table.

HRI 489. Issues in Food Safety. (Cross-listed with An S, FNS, VDOMAM). (1-0) Cr. 1. S. Pre Req: Credit or enrollment in FS HN 101 or 272 or HRI 233; FS HN 419 and 420; FS HN 403. Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

HRI 498. Cooperative Education. Cr. R. F.S.SS. Pre Req: Permission of undergraduate coordinator. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students:

HRI 504. Seminar. (0-1) Cr. 1. F. (A), S. (B). 504B may be taken more than once for credit. A. Hospitality Research. B. Current Issues.

HRI 511. Research Methods in Foodservice & Lodging Management. (3-0) Cr. 3. S. Pre Req: Graduate standing in the Department. Overview of research methods. Methods for collecting and analyzing quantitative and qualitative data. Development of research plan.
HRI 533. Financial Decision Making in Foodservice and Lodging Organizations. (3-0) Cr. 3. S. Prereq: 433. Concepts of financial management applied to strategic decision making.

HRI 555. Strategic Management in Foodservice and Lodging Organizations. (3-0) Cr. 3. Prereq: Courses in Mkt. and Fin. Management. Strategic management process as a planning and decision-making framework; integration of human resources, operations, marketing, and financial management concepts.

HRI 575. Professional Experience in Foodservice and Lodging Organizations. Cr. 2. F.S.S. Prereq: Accepted in HRIM graduate program. Analysis and interpretation of professional functions or data, or design and implementation of a management project.

HRI 590. Special Topics. Cr. arr. Repeatable. Prereq: 9 credits in HRI at 400 level or above; permission of instructor.

HRI 638. Advanced Human Resources Management in Foodservice and Lodging Organizations. (3-0) Cr. 3. F. Prereq: 538. Research in human resources management with an emphasis on organization or unit administration.

HRI 652. Advanced Lodging Operations. (3-0) Cr. 3. Prereq: Enrollment in PhD program. Analysis and applications of concepts and theories of operations research for lodging operations.

HRI 675. HRIMTeaching Experience. Cr. 1. F.S.S. Prereq: Accepted in PhD program. Development of objectives, teaching methods and materials, and test items for selected topics. Implementation in an HRIM course.

Human Computer Interaction

www.hci.iastate.edu

(Interdepartmental Graduate Program)

Supervisory Committee: James Oliver, Chair; Chui Shui Chan; Julie Dickerson, Steven Hennstard, Doug Gentile, Stephen Gilbert, Brian Mennenneke

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Human Computer Interaction (HCI). A Graduate Certificate in Human Computer Interaction is also offered. It is targeted especially for the benefit of students working in business and industry wanting education in this field. The graduate program in Human Computer Interaction (HCI) welcomes applications from a diverse collection of technical and creative fields whose unifying characteristic is the desire to develop new ways to bridge the gap between human and machine. The students must demonstrate skill in software development and proficiency in high-level, object-oriented programming. To accommodate students who lack exposure to programming, the HCI interdepartmental graduate major will offer an introductory course to provide a base of technical skills.

At the Masters level, entrance requirements will include an undergraduate degree and demonstrable software skills. The degree calls for 30 credits of course work including appropriate credit for the master’s thesis. MS students must take one core course of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena. MS Students must also take two semesters of HCI 591 Seminar in HCI.

All programs of study for the Ph.D. must include 1) one core course of their choice from each of the categories of Implementation, Design, Evaluation and Phenomena, if not completed as part of the student’s masters program; 2) two more courses of their choice from a list of recommended electives; and 3) four semesters of HCI 591 Seminar in HCI.

Information on applications procedures and specific requirements of the major can be obtained from the following Internet address: www.hci.iastate.edu.

Courses for graduate students

HCI 409. Computer/Video Game Design and Development. (Dual-listed with 509). (Cross-listed with ArtIS). (3-0) Cr. 3. Repeatable. F.S. Prereq: Permission of instructor. Programming emphasis: Com S 227, 228, 229 or equivalent in Engineering, art or graphics emphasis. Art 230 and ArtIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: junior classification. Independent project based creation and development of “frivolous and non-frivolous” computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of indie development and current trends in the industry will be discussed. Nonmajor graduate credit.

HCI 504. Managing and Evaluating Instructional Technology Interventions. (Cross-listed with C II). (3-0) Cr. 3. S. Prereq: CI 501. Principles and procedures for analysis, review, and assessment of instructional technology interventions in education and corporate settings. Methods for planning, organizing, and conducting evaluative studies are applied.

HCI 509. Computer/Video Game Design and Development. (Dual-listed with 409). (Cross-listed with ArtIS). (3-0) Cr. 3. Repeatable. F.S. Prereq: Permission of instructor. Programming emphasis: Com S 227, 228, 229 or equivalent in Engineering, art or graphics emphasis. Art 230 and ArtIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: junior classification. Independent project based creation and development of “frivolous and non-frivolous” computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of indie development and current trends in the industry will be discussed. Nonmajor graduate credit.

HCI 515. Statistical Natural Language Processing. (Cross-listed with Engl, Ling). (3-0) Cr. 3. F. Prereq: Stat 330 or equivalent, recommended Ling 219 or Ling 511. Introduction to computational techniques involving human language and speech in applications such as information retrieval and extraction, automatic text categorization, word prediction, intelligent Web searching, spelling and grammar checking, speech recognition and synthesis, statistical machine translation, n-grams, POS-tagging, word-sense disambiguation, online lexicons and thesauri, markup languages, corpus analysis, and Python programming language.

HCI 520. Computational Analysis of English. (Cross-listed with Engl, Ling). (3-0) Cr. 3. F. Prereq: Engl 510 or 511. Concepts and practices for analysis of English by computer with emphasis on the applications of computational analysis to problems in applied linguistics such as corpus analysis and recognition of learner language in computer-assisted learning and language assessment.

HCI 521. Cognitive Psychology of Human Computer Interaction. (Cross-listed with Psych). (3-0) Cr. 3. Prereq: Graduate classification or instructor approval. Biological, behavioral, cognitive, linguistic, and social issues relevant to human computer interactions.

HCI 525. Optimization Methods for Complex Designs. (Cross-listed with M E). (3-0) Cr. 3. S. Prereq: Engr 180, Math 265. Optimization techniques involving unconstrained and constrained minimization, linear programming, and particle swarm optimization. Both the theory and methods and the application to complex designs will be presented.

HCI 558. Introduction to the 3D Visualization of Scientific Data. (Cross-listed with Geol, Com S). (2-2) Cr. 3. Alt. S., offered 2011. Prereq: Graduate-student standing in the Mathematical or natural sciences. Introduction to visualization using software with 3D computer graphics and their foundation in human perception. Overview of different visualization techniques and examples of 3D visualization projects from different disciplines (natural sciences, medicine, engineering). Class project in interactive 3D visualization using the OpenDX, VTK or a similar system.
HCI 575. Computational Perception. (Cross-listed with Com S, Cpr E). (3-4) Cr. 3. S. Prereq: Graduate standing or permission of instructor. This class covers statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. This semester we will focus on machine perception techniques that facilitate and augment human-computer interaction. The main goal of the class is to introduce computational perception on both theoretical and practical levels. You will work in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

HCI 592. Entrepreneurship Workshop. (1-3) Cr. 1. F. Students will be taken step-by-step through activities that must be undertaken when attempting to commercialize a technology or start their own company. Speakers will be brought in to introduce relevant topics, provide resources, answer questions, and provide working examples.

HCI 603. Advanced Learning Environments Design. (Cross-listed with C I). (3-0) Cr. 3. S. Prereq: C I 503. Exploration of advanced aspects of the instructional design process. Application of analysis, design, development and production, evaluation, implementation, and project management principles. Focus on the production and use of instructional technology with an emphasis on the instructional design consulting process. Theory and research in instructional technology provides the foundation for design decisions.

HCI 655. Organizational and Social Implications of Human Computer Interaction. (Cross-listed with MIS). (3-0) Cr. 3. Prereq: Graduate Classification. Examine opportunities and implications of information technologies and human computer interaction on social and organizational systems. Explore ethical and social issues appurtenant to human computer interaction, both from a proscriptive and prescriptive perspective. Develop informed perspective on human computer interaction. Implications on research and development programs.

HCI 697. HCI Internship. Cr. R. Repeatable. Prereq: Permission of Director of Graduate Education, graduate classification.

Undergraduate Study
For undergraduate curricula in Human Development and Family Studies, leading to the degree bachelor of science, see Human Sciences, Curriculum.

The Department of Human Development and Family Studies offers courses that focus on the interactions among individuals, families, their resources, and their environments throughout the life span. The department offers work for the Bachelor of Science degree in three curricula: Child, Adult, and Family Services; Early Childhood Education; and Family Finance, Housing, and Policy.

The Child, Adult, and Family Services curriculum leads to work in the helping professions with employment opportunities in public and private agencies, including Head Start. Opportunities exist to observe and work with infants, preschoolers, school-age children, adolescents, adults, and families. Graduates of the program are prepared for employment in agencies and organizations serving children, youth, families, and adults as program development specialists, directors, teachers, direct care staff, and administrators. This flexible program provides a broad emphasis in theory, research, and application in child, adult and family services including attention to community issues and public policy.

Students in the Child, Adult, and Family Services curriculum are eligible to participate in Camp Adventure™ Youth Services. Administered by the University of Northern Iowa, Camp Adventure™ offers students an opportunity to plan and implement school-age service and youth development, develop leadership and management skills, enhance one’s global awareness and promote cultural sensitivity. Comprehensive school age and youth service programs directed primarily toward U.S. military installations, U.S. embassies, and corporate clubs and associations are offered. Students will earn 12 credits from the University of Northern Iowa, which can be transferred and applied to CAFS requirements. Students in the child program and youth program options may use Camp Adventure as HD FS 491 Internship if prerequisites are met before beginning the internship. See departmental advisor for information and eligibility.

Students graduating in the Child, Adult, and Family Services major will 1) demonstrate competency in human development and family studies and their chosen field of emphasis; 2) demonstrate proficiency in interpersonal communication and in working with diverse groups to solve multidisciplinary problems; 3) effectively practice preparation and delivery of information to human service and child care professionals as well as to the general public; 4) critically evaluate information and accurately interpret and use research; and 5) understand the complexity of issues facing professionals in the field, including ethical, cultural and environmental elements.

The curriculum in Early Childhood Education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may be employed by either public or private agencies or schools. The curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is an interdepartmental major administered by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies within the College of Human Sciences.

Students who enroll in Early Childhood Education must make application to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandate for a performance based system of teacher training. Following this same type of system, the State of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the eleven Iowa State University Teacher Education Standards and the eight State of Iowa Teacher Licensing Standards, along with other information about the University Teacher Education Program, can be found at www.teacher.hiastate.edu., the teacher education website.

Information is also available from the student’s academic advisor.
Students in early childhood education must meet the performance outcome standards for teacher licensure. Standards are assessed in coursework through designated performance indicators such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsement 100 in the State of Iowa. These include competencies in (1) child growth, development, and learning; (2) developmentally appropriate learning environment and curriculum implementation; (3) health, safety, and nutrition; and (4) family and community collaboration; and (5) professionalism. Pre-student teaching field experiences and student teaching experience in a least two different settings are required. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at ISU.

The department offers minors in Child, Adult, and Family Services, and Family Finance, Housing, and Policy.

The Child, Adult, and Family Services minor may be earned by completing 102; selecting 3 credits from 237, 228, 227, or 277; and selecting 9 credits from 270, 344, 349, 360, 367, 373, 380, 395, 449, 463 or 479.

The Family Finance, Housing, and Policy minor may be earned by completing HD FS 239, 283; 395; and selecting 6 credits from HD FS 341, 360, 378, 463, 483, 488 or 489.

Communication Proficiency requirement: A student must achieve a grade of C or higher in English 150 and 250. A student achieving a grade of C– or lower in 150 and/or 250 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the advising of a minor in Gerontology, the Master of Family and Consumer Sciences - Gerontology program (MFCGeron) and the Graduate Gerontology Certificate program are designed to prepare professionals who work directly with older people or are involved in education and research related to the elderly. Professionals offering direct services often are involved in health promotion programs, direct intergenerational activities, managing senior centers, counseling and older people and their families, and helping people plan for retirement. Professionals involved in education and research may evaluate community-based services, teach others about the aging process, develop policies and programs to serve the needs of the elderly, and work with business and industry on issues related to an aging work force.

Courses primarily for undergraduate students

HD FS 202. Individual and Family Life Development. (3-3) Cr. 3. F.S. Development of individuals, families, and their reciprocal relationships as affected by external factors; examined within a framework of life-span developmental tasks.

HD FS 110. Freshman Learning Community Orientation. (2-0) Cr. 2. F. Prereq: Membership in HD FS Learning Community. Introduction to the Department of Human Development and Family Studies including academic requirements and opportunities, strategies for transitioning to college, learning and study strategies, reading and reflection, and career awareness.

HD FS 218. Professional Orientation and Service Learning. Cr. 2. F. Prereq. 102. Restricted to CH FS majors. Ethics, professional development, and career exploration in child, adult and family services. Visits to and service learning with programs that serve children, adults and families with diverse needs. Participation in service learning project required. Satisfactory-fail only.

HD FS 221. Development and Guidance: Ages 3 through 8 Years. (3-1) Cr. 3. F. Alt. SS., offered 2010. Prereq. 102. Typical and atypical development from 3 through 8 years of age. Development and guidance within the contexts of family, program, and Society. Guided observation of physical, motor, cognitive, communication, social, and emotional development; practicum.

HD FS 223. Development and guidance: Ages Birth through 8 Years. (3-0) Cr. 3. S. Typical and atypical development from birth through eight years of age. Development and guidance within the contexts of family, program, and Society. Guided observation of physical, motor, cognitive, communication, social, and emotional development.

HD FS 227. Adolescent Development. (3-0) Cr. 3. F. Prereq. 102 or Psych 101 or 230. Physical, cognitive, and socioemotional development of adolescents and young adults in the context of family, relationships, and culture.

HD FS 239. Housing and Consumer Issues. (3-0) Cr. 3. F. Introduction to factors affecting housing consumption of individuals and families, including current housing consumer issues related to housing choices, housing context of neighborhoods and communities, housing structure types, and credit and housing finance. Issues such as homelessness, housing discrimination, indoor air quality, accessible design.

HD FS 240. Literature for Children. (3-0) Cr. 3. F.S. Prereq. 102 or Psych 230. Evaluation of literature for children. Roles of literature in the total development of children. Literature selection and use.

HD FS 269. Research in Human Development and Family Studies. (3-0) Cr. 3. F.S. Prereq. 102 or Psych 230. Understanding and evaluating research. Use of primary and secondary data to identify and study problems related to human development and family issues, including finance and housing. An introduction to Statistical concepts and computer analysis. Research participation.

HD FS 270. Family Relationships. (3-0) Cr. 3. F.S. Alt. SS., offered 2011. Prereq. 102 or Psych 230. Introduction to and application of family theories. Family communication and its functions to develop, maintain, enrich and limit family relationships.

HD FS 283. Personal and Family Finance. (3-0) Cr. 3. F.S. SS. Introduction to basic principles of personal and family finance. Budgeting, record keeping, checking and savings accounts, consumer credit, insurance, investments, and taxes.

A. Early Childhood Education Programs. Prereq. 343. B. Family Services Programs. Prereq. 9 credits in HD FS.

HD FS 378. Economics of Aging. (Cross-listed with Econ, Gerion.) (3-0) Cr. 3. S. Prereq: 3 credits in principles of economics and 3 credits in human development and family studies. Economic Status of the aging, retirement planning and the retire- ment decision, role of Social Security, public transfer programs for the elderly, intrafamily transfers to/from the elderly, private pensions, financing medical care and housing for the elderly, prospects and issues for the future.

HD FS 380. Family Law. (3-0) Cr. 3. S. Prereq: Junior classification. Family relationships, rights, and duties as prescribed by law. Investigation of sources and interpretations of law.

C. Early Childhood Special Education Programs. F.S. Prereq: GPA 2.5, full admission to teacher education program, 455, 456. Teaching experience with preschool children with disabilities.

HD FS 445. Administration of Programs for Children. (3-0) Cr. 3. F.S. Prereq: C. Early Childhood Special Education Programs. Prereq: 8 credits in human development and family studies.

HD FS 446. Administration of Human Service Pro- grams. (3-0) Cr. 3. F.S. Prereq: Junior classification, 6 credits in HD FS at 300 level and above. An examination of purposes, staffing, operation, and clientele of organizations and agencies serving families. Analysis of issues in coordination and delivery of services.

HD FS 488. Families in the Economy. (3-0) Cr. 3. S. Prereq: Econ 101. Analysis of the family as an economic unit in Society. Structure and composition of the family. Patterns of resource use and activities pursued by the family. Family economic transitions such as marriage, divorce, and childbirth. Nonmajor graduate credit.

HD FS 489. Financial Counseling. (Dual-listed with 589L). (3-0) Cr. 3. F.S. Prereq: 283. Personal, social/psych- ological, and legal climates affecting financial decisions. A life-cycle approach to financial decision-making. Development of financial counseling and planning skills to assist families and individuals to become self-sufficient in achieving financial manage- ment. Nonmajor graduate credit.

HD FS 489L. Financial Counseling Laboratory. (Dual-listed with 589L). (0-2) Cr. arr. Repeatable. F.S. Prereq: Instructor permission. Practical experience in remedial, preventative, and productive approaches to both financial and housing counseling in one-on-one and/or group settings.

A. Child and Family Studies

B. Housing

C. Family Finance

F. Early Childhood Education

G. Early Childhood Special Education

H. Honors

I. Human Development and Family Studies

Policy Programs.
HD FS 491. Internship. Cr. arr. Repeatable. F.S.S. Prereq: 449; permission of instructor, senior classification. Reservation required one semester before placement; minimum 2.0 GPA. Supervised work experience related to the student’s curriculum. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

HD FS 501. Graduate Study Orientation. (1-0) Cr. F. Orientation to graduate study and current research in the department.

HD FS 503. Quantitative Research Methodology. (3-0) Cr. 3. S. Prereq: Stat 401 or ResEv 553, concurrent enrollment in HD FS 505. Concepts, methods, and strategies for research in human development and family studies. Topics include the nature of scientific research, measurement, types of research in human development and family studies, validity of research designs, methods of data gathering, and strategies for and issues in the study of change.

HD FS 504. Qualitative Research Methods I. (3-0) Cr. 3. F. Prereq: 9 credits of social sciences. Introduction to qualitative research methodology. Application of fieldwork methods, analysis, interpretation, and writing through individual qualitative research projects.

HD FS 511. Family Theory. (3-0) Cr. 3. F. Prereq: 9 credits in social sciences. Theoretical approaches and current research in family development. Review the nature and value of theory to the study of the family and evaluate the use of theory in empirical research. Policy implications.

HD FS 525. Theories and Research in Early Childhood Education. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 510 or 6 credits in social sciences. Analysis of contemporary and historical models, including early intervention programs. Examination of relationships among physical environment, programming, teacher effectiveness, and child outcomes.

HD FS 530. Perspectives in Gerontology. (Cross-listed with Gerion). (3-0) Cr. 3. F. WWW only. Overview of current aging issues including theory and research, critical social and political issues in aging, the interdisciplinary focus of gerontology, career opportunities, and aging in the future.

HD FS 534. Adult Development. (Cross-listed with Gerion). (3-0) Cr. 3. F. On campus. S: WWW only. Exploration of the biological, psychological and social factors associated with aging. Although the focus is on the later years, information is presented from a life-span developmental framework. Empirical studies are reviewed and their strengths, limitations and implications for normative and optional functioning are discussed.

HD FS 541. Housing and Real Estate in Family Financial Planning. (Cross-listed with FFPI). (3-0) Cr. 3. Alt. SS., offered 2010. WWW only. The role of housing and real estate in the family financial planning process, including home ownership, mortgage calculations, legal concerns, and ethical issues related to home ownership and real estate investments. Emphasis on emerging issues in the context of housing and real estate.

HD FS 545. Economics, Public Policy, and Aging. (Cross-listed with Gerion). (3-0) Cr. 3. Alt. F., offered 2010. WWW only. Policy development in the context of the economic Status of the older adult population. Retirement planning and the retirement decisions, social security and public transfer programs, intra-family transfers to/from the aged, private pensions; financing medical care, prospects and issues for the future.

HD FS 548. Parent Education. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 510 or 511 or 6 credits in social sciences. Needs assessments, models, delivery systems, and evaluation procedures used in parent education programs for families with diverse needs, including single parents, adolescent parents, and parents of children with developmental disabilities. Developmental aspects of parenting. Effects of values, family structures, family goals, and parenting styles on parent education.

HD FS 555. Current Issues in ECSE. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 9 credits in social sciences. Examination of research and current issues in early childhood special education with special emphasis on inclusion, activity-based intervention, and developmentally appropriate programming. Emphasis on continuum of strategies to embed learning opportunities that promote physical, language, cognitive, and social development.

HD FS 563. Environments for the Aging. (Dual-listed with 463). (Cross-listed with Gerion). (3-0) Cr. 3. Prereq: 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies. Emphasis on independent living within residential settings including specialized sheltered, transitional, and supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.

HD FS 566. Impact of Public Policy on the Family. (3-0) Cr. 3. S. Prereq: 9 credits in social sciences. The effect of public policy on families and children, especially those at risk. Examines poverty in the U.S.; the consequences of poverty; the programs used to alleviate the consequences of poverty; evaluation of the efficacy of these programs.

HD FS 567. Family Stress, Abuse, and Illness. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 9 credits in social sciences. Contemporary theory and research on the causes and consequences of family stressors including physical, sexual, and emotional abuse; substance abuse; and mental and physical illness across the life span. Interplay between victims, offenders, and the treatment system. Identification of barriers to services and supports and exploration of approaches to assist families in overcoming these barriers.

HD FS 573. Ethics and Professional Studies in Marriage and Family Therapy. (3-0) Cr. 3. Alt. S., offered 2010. 9 credits in graduate level social sciences. Professional ethics and legal responsibilities relevant to family therapy. Professional socialization and the role of professional organizations and state licensure/certification.

HD FS 576. Marriage Across the Life Course. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 511. A developmental approach to exploring predictors of the formation, maintenance, and dissolution of intimate relationships across the life course. Understanding how intimate relationships develop and change over time, beginning with the development of early adolescent relationships and continuing through later life.

HD FS 579. Family Interaction Dynamics. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 9 credits in social sciences. Current research and theory in family interaction, with emphasis on family dynamics and family change across the life course.

HD FS 583. Investing for the Family’s Future. (Cross-listed with FFPI). (3-0) Cr. 3. F. Prereq: 483. Evaluation of investment markets for the household. Analysis of how families choose where to put their
HD FS 593. Workshop. Cr. arr. Repeatable. F.S.SS. Prereq: Senior classification. (Dual-listed with 493.)
HD FS 594. Professional Seminar in Gerontology. (Cross-listed with Geron.) (3-0) Cr. 3. Alt. SS., offered 2011. WWWW only. An integrative experience for gerontology students designed to be taken near the end of degree program. By applying knowledge gained in earlier coursework, students will strengthen skills in ethical decision-making behavior, applying these skills in gerontology-related areas such as advocacy, professionalism, and family and workplace issues. Students from a variety of programs will bring their unique perspectives to bear on topics of common interest.

Courses for graduate students
HD FS 603. Advanced Quantitative Methods. (3-0) Cr. 3. S. Prereq: 502; Stat 402 or 404. Methodological and analytical issues in research in human development and family studies. Advanced research design and measurement, selection of Statistical techniques, and issues in the interpretation of findings.
HD FS 604. Advanced Qualitative Research. (3-0) Cr. 3. F. Prereq: 503. Qualitative methods and related theory in human development and family studies. Research procedures, including phenomenology, grounded theory, ethnography, and case studies. Methods of data collection and analysis.
HD FS 616. Seminar. Cr. arr. May be repeated. F.S.SS.

Human Sciences
David Whaley, Program Coordinator
Human Sciences courses provide integrative study and enriching experiences in areas that cut across the diverse curricula of the College of Human Sciences. These may include such areas as leadership, global understanding, social justice/responsibility, and ethics. Students in any college may take these courses.

Courses primarily for undergraduate students
H Sci 150. Dialogues on Diversity. (1-0) Cr. 1. FS. An exploration of diversity within the context of the Iowa State University community through understanding human relations issues. Satisfactory-fail only.
H Sci 482. The Dean's International Leadership Seminar. (Dual-listed with 582.) (3-0) Cr. 3. S.S. Prereq: Permission of the seminar leader. Leadership strategies and effective use of leadership skills in an international setting. Compare leadership theories and practices in the U.S. and foreign countries. Construct individual leadership strategies to deal with complex issues in a global environment. Use discussion, personal assessment inventories, and simulated experiences to evaluate leadership strategies. Develop and improve skills in meeting the challenges of teamwork. Learn about the culture of a foreign country.
H Sci 490. Independent Study. Cr. arr. E. Entrepreneurship
H Sci 582. The Dean's International Leadership Seminar. (Dual-listed with 482.) (3-0) Cr. 3. S.S. Prereq: Permission of the seminar leader. Leadership strategies and effective use of leadership skills in an international setting. Compare leadership theories and practices in the U.S. and foreign countries. Construct individual leadership strategies to deal with complex issues in a global environment. Use discussion, personal assessment inventories, and simulated experiences to evaluate leadership strategies. Develop and improve skills in meeting the challenges of teamwork. Learn about the culture of a foreign country.
Immunobiology
www.immunobiology.iastate.edu

(Interdepartmental Graduate Program)

Supervisory Committee: Marian Kohut, Chair; Mike Wannemuehler, Louisa Tabatabai; Jesse Hostetter; Bryan Belleire

The Graduate Faculty: Marian Kohut, Chair; Ackermann, Mark, Andreasen; Claire, Andreotti, Amy; Bartholomay, Lynn; Belleire, Bryan; Cunnick, Joan; Griffith, Ronald; Harris, DL; Hostetter, Jesse; Jarvinen, Julie; Jones, Doug, Kanthasamy, Anumantha; Lamont, Susan; Lippolis, John; Minion, F Chris; Nilsen-Hamilton, Marit; Nonnecke, Brian; Nystrom, Evelyn; Opriessnig, Tanja; Palic, Dusan; Petersen, Christine; Platt, Ken; Rendtorff, Rosenebusch, Ricardo; Roth, James; Rothschild, Max; Sacco, Randy; Stabel, Judy; Tabatabai, Louisa; Thoen, Charles; Wannemuehler, Mike; Waters, Ray; Zhang, Qijing

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Immunobiology. Faculty are drawn from eight departments: Animal Science, Biochemistry, Biophysics, and Molecular Biology; Biomedical Sciences; Entomology; Kinesiology; Veterinary Diagnostic & Production Animal Medicine; Veterinary Microbiology & Preventive Medicine; and Veterinary Pathology. The diversity of faculty expertise ensures a broad education, while offering flexibility in choice of specialization. Ongoing research projects include areas such as: antibody and cell-mediated immunity, immunochemostry, immunogenetics, immunomodulation, mucosal immunity and nutritional immunology. Students may enter the Immunobiology major in one of two ways: they may apply to and be directly accepted into the major, or they may be admitted to a participating department followed by formal admission to the major. Students directly admitted into the Interdepartmental Immunobiology Major will take Imbio 697 (graduate research rotation) in their first two semesters, and by the end of the second semester, students will enter a department by choosing a major professor from the participating faculty. Students first admitted to a department will choose a major professor from the participating faculty in that department.

Students should have a strong background in the biological sciences, including work in immunology, genetics and biochemistry. Prior research experience is highly encouraged. A submission of scores of the GRE General Test is required.

Immunobiology students should include in their program of study a core of courses which will provide a broad coverage of the basic program in immunobiology. Formal courses should include immunology, biochemistry, and Statistics. Additional coursework may be selected to satisfy individual interests or departmental requirements. The foreign language and teaching requirements are determined by the student's department. All students will take a minimum of one seminar course per year.

Graduates have a broad understanding of the interdisciplinary field of immunobiology, and can effectively integrate the principles of immunology with related disciplines. They are able to effectively communicate with scientific colleagues and the general public in both formal and informal settings. Graduates are able to integrate theory and research to address complex problems facing scientific professionals studying animal and human health, taking into account related ethical, social, legal and environmental issues. They are skilled at carrying out research, communicating research results, and writing persuasive grant proposals.

Courses for graduate students

Imbio 602. Current Topics Workshop in Immunology. (1-0) Cr. 1. Repeatable. Lectures provided by off-campus experts. Students are required to participate in discussion sessions with lecturers.

Imbio 604. Seminar in Immunobiology. (1-0) Cr. 1. Repeatable. Student and faculty presentation.

Imbio 697. Graduate Research Rotation. Cr. Arr. Repeatable. Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Immunobiology major.

Industrial Engineering

(Administered by the Department of Industrial and Manufacturing Systems Engineering)

Gary Mirka, Chair of Department

Distinguished Professors (Emeritus): Cowles University Professor: Vardeman

University Professor (Emeritus): David

Professors: Heising, Mirka, Morris, Ryan

Professors (Emeritus): Barta, Berger, Even, Mohr, Montag, Moore, Patterson, C. Smith, G. Smith, Tamashunas, Vaughn

Associate Professors: Gemmill, Jackman, Meeks, Min, Olafsson, Peters

Associate Professor (Emeritus): Love

Assistant Professors: Frank, Stone, Wang

Assistant Professor (Collaborator): Guerra-De-Castillo

Senior Lecturer: Potter

Lecturers: Sly

Undergraduate Study

For the undergraduate curriculum in industrial engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission ABET.

Industrial engineers are employed to design, analyze, and improve systems and processes found in manufacturing, consulting, and service industries. Professional responsibilities are typically in design, management, analysis, optimization, and modeling of industrial systems. An industrial engineer is focused on human factors, operations research, engineering management, manufactur- ing engineering, and quality. Industrial engineers are typically found in organizations responsible for operations management, process engineering, automation, logistics, supply chain management, scheduling, plant engineering, quality control, and technical sales. The overall goal of the industrial engineering undergraduate curriculum is to pro- duce technically qualified industrial engineers who are capable of successful professional practice in the field. To meet this goal, the curriculum includes in-depth instruction to accomplish the integration of systems using appropriate analyti- cal, computational, and engineering practices. The curriculum also provides graduates with the nec- essary educational foundation to pursue advanced studies in industrial engineering or related fields.

In the industrial engineering curriculum the following objectives. The industrial engineering curriculum is preparing its graduates during their professional careers to:

1. Make decisions on system design or analysis with broad-based analytical tools and information technology.

2. Formulate and analyze problems in specific application areas including manufacturing, produc- tion, logistics, ergonomics, service industries, public policies, or information systems.

3. Develop and implement project solutions concerning designs, processes, operations, or systems.

4. Prepare and deliver professional communica- tions in written and oral formats.

5. Achieve team goals in a multidisciplinary team environment and provide leadership in some capacity, based on an understanding of team dynamics and project management.

6. Acquire new skills and training for lifelong learning.

Details on industrial engineering program out- comes that foster the attainment of these objec- tives are available at appropriate sections of: www.imse.iastate.edu

The industrial engineering undergraduate curricu- lum provides students with fundamental knowl- edge in mathematics, teaching research, engineering science, social science, and humanities as well as professional industrial engineering course work. Management electives provide students with an opportunity to become familiar with modern business practices that they will encounter in their career. A senior capstone design course provides students with an opportunity to solve open-ended industrial problems with an industrial partner. The cooperative education program provides students with real world experience in the profession and a good perspective on career choices. Students are encouraged to participate in international experiences through exchange programs and industrial internships. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue both B.S. and M.S. degrees in Industrial Engineering or B.S. and M.B.A. degrees.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with a major in industrial engineering. A formal minor is available to graduate students having a major in another department. Graduate study is designed to improve the student’s capability to conduct research as well as improve professional expertise in industrial engineering.

The prerequisite to major graduate work is the completion of a curriculum similar to the required of undergraduate students in engineering at this institution.

With the help of a program of study committee, a graduate student develops an educational program in areas within industrial engineering. Typical areas of concentration include ergonomics, engineering management, human computer interfaces, manufacturing systems, operations research and optimization, and information engineering.

Courses primarily for undergraduate students

I E 271. Applied Ergonomics and Work Design. (3-0) Cr. 3. S. Prereq: Phys 221. Basic concepts of ergonomics and work design. Their impact on worker and work place productivity, and cost. Investigations of work physiology, biomechanics, anthropometry, work methods, and their measurement as they relate to the design of human-machine systems.

I E 298. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work.

I E 312. Optimization. (3-0) Cr. 3. F. Prereq: Math 267 Concepts, optimization and analysis techniques, and applications of operations research. Formulation of Mathematical models for systems, concepts, and methods of optimization. Linear programming and sensitivity analysis, network models, and integer programming. Nonmajor graduate credit.

I E 341. Production Systems. (3-0) Cr. 3. F. Prereq: Stat 231 or enrollment in I E 312. Introduction of key concepts in the design and analysis of production systems. Topics include: inventory control, forecasting, material requirement planning, project planning and scheduling, operations scheduling, and other production systems such as Just-In-Time (JIT), warehousing, and global supply chains. Nonmajor graduate credit.

I E 403. Introduction to Sustainable Production Systems. (Dual-listed with 503). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Credit or enrollment in 341. Quantitative introduction of sustainability concepts in production planning and inventory control. Review of material requirements planning and production component recovery (remanufacturing) from productivity perspectives. Sustainability rubrics ranging from design and processes to systems. Application to multi-e-chelon net-work subject to forward/backward flow of material and information. Closed-loop supply chains. Comparative study of sustainable vs traditional models for local and global production systems.

I E 408. Interdisciplinary Problem Solving. (Cross-listed with E E, TSM) (3-0) Cr. 3. S. Prereq: Junior or senior classification. Use of the Theory of Constraints as a way of approaching, win-win negotiation, project planning and effective delegation in the context of engineering/business systems. Team projects aimed at improving design outcomes. Nonmajor graduate credit.

I E 409. Interdisciplinary Systems Effectiveness. (Cross-listed with E E, TSM) (3-0) Cr. 3. S. Prereq: Junior or senior classification. Focus on functions that determine the effectiveness of an entire organization. Generic Theory of Constraints solutions to production, distribution, and project management are compared to traditional solutions. Strategy for improvements discovered using simulations. Nonmajor graduate credit.

I E 413. Stochastic Modeling, Analysis and Simulation. (4-0) Cr. 4. F. Prereq: Math 267, Stat 231. Development and analysis of simulation models using a simulation language. Introduction to various areas of manufacturing and service systems such as assembly, material handling, and customer queues. Utilizing model output to make important business decisions. Fitting of data to Statistical distributions. Introduction to Markov processes and other queuing models. Nonmajor graduate credit.

I E 419. Manufacturing Systems Modeling. (3-0) Cr. 3. S. Prereq: Stat 231. Modeling material handling systems, inventory systems, and production systems for performance analysis. Introduction to analysis, simulation, and physical models of manufacturing systems. Simulation languages such as ARENA, AwSim, and ProModel. Not available for degrees in industrial engineering. Nonmajor graduate credit.

I E 441. Industrial Engineering Design. (1-8) Cr. 3. S. Prereq: F. Prereq: Math 248. 271, 361; credit or enrollment in 341, 413, and 448. A large, open-ended design project related to an enterprise. Application of engineering design principles including problem definition, analysis, synthesis, and evaluation. Nonmajor graduate credit.

I E 446. Geometric Variability in Manufacturing. (Dual-listed with 548). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: I E 348, or Mat E 341, or M E 324. Assessment, accommodation of geometrical variability of manufacturing processes. Use of CMMs, vision and scanning systems, and profilometers. Techniques to successfully accommodate variation through design of product, tooling or process plan including plastic injection molding, metalcasting, welding, powder metallurgy, Metallography to control geometric variability. Nonmajor graduate credit.

I E 448. Manufacturing Systems Engineering. (3-0) Cr. 3. S. Prereq: 248 or similar manufacturing experience. 305. Fixturing and tooling requirements for manufacturing process planning, geometry, visualization and tolerancing, computer aided inspection, cellular and flexible manufacturing, and factory layout. The role of these topics in supporting lean manufacturing will be discussed throughout the course. Nonmajor graduate credit. Nonmajor graduate credit.

I E 466. Multidisciplinary Engineering Design. (Cross-listed with A. E, Aer E, Cpr E, E E, Engr, Mat E, M E I) (4-1) Cr. 3. Repeatable. F.S. Prereq: Students must be in good standing and receive permission of instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

I E 483. Knowledge Discovery and Data Mining. (Dual-listed with 583). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 148, 312, and Stat 231. Introduction to data mining and mining of multimedia data. Case studies from both manufacturing and service industries. A computing project is required. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

I E 503. Introduction to Sustainable Production Systems. (Dual-listed with 403) (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Credit or enrollment in 341. Quantitative introduction of sustainability concepts in production planning and inventory control. Review of material, information, and decision making, Introduction to products recovery (remanufacturing) from productivity perspectives. Sustainability rubrics ranging from design and process to systems. Application to multi-e-chelon networks subject to forward/backward flow of material and life cycle and other perspectives. Product development and implementation of data centers in manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

I E 508. Design and Analysis of Allocation Mechanisms. (3-0) Cr. 3. Prereq: 312 or Math 407. Market-based allocation mechanism models from quantitative economic systems perspective. Pricing and costing models designed and analyzed with respect to decentralized decision processes, information requirements, and coordination. Case studies and examples from industries such as regulated electricity, semiconductor manufacturers, and financial engineering services.

I E 513. Analysis of Stochastic Systems. (3-0) Cr. 3. Prereq: Stat 231. Introduction to modeling and analysis of manufacturing and service systems subject to uncertainty. Topics include the Poisson process, renewal processes, Markov chains, and Brownian motion. Applications to inventory systems, production system design, production scheduling, reliability, and capacity planning.

I E 514. Production Scheduling. (3-0) Cr. 3. Prereq: 312, 341. Introduction to the theory of machine shop systems. Complexity results for various systems such as job, flow, and open shops. Applications of linear programming, integer programming, network analysis. Enumerative methods for machine sequencing. Introduction to stochastic scheduling.

I E 531. Quality Control and Engineering Statistics. (Cross-listed with Stat). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Stat 232 or 447 Wu. Statistical models and methods applicable to problems of industrial process monitoring and improvement. Statistical issues in industrial measurement; Shewhart, CUSUM, and other control charts; feedback control; process characterization studies; estimation of product and process characteristics; acceptance sampling, continuous sampling and sequential sampling; economic and decision theoretic arguments in industrial statistics.

I E 533. Reliability. (Cross-listed with Stat). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Stat 342 or 447 Wu. Statistical methods and theory applicable to problems of industrial process monitoring and improvement. Statistical issues in industrial measurement; Shewhart, CUSUM, and other control charts; feedback control; process characterization studies; estimation of product and process characteristics; acceptance sampling, continuous sampling and sequential sampling; economic and decision theoretic arguments in industrial statistics.

I E 537. Reliability and Safety Engineering. (3-0) Cr. 3. Prereq: Stat 231 or Stat 401. Mathematical basics for dealing with reliability data, theory, and analysis. Bayeasian vs. Frequentist approaches to reliability estimation. Regression models with applications to accelerated life testing; repairable system data; planning studies to obtain reliability data.

I E 541. Inventory Control and Production Planning. (3-0) Cr. 3. Prereq: 341. Economic Order Quantity, dynamic lot sizing, newsboy, base stock, and (Q, r) models, Material Requirements Planning. Just-In-Time (JIT), variability in production systems, push and pull production systems, aggregate and workforce planning, and capacity management.

I E 545. Rapid Prototyping and Manufacturing. (3-0) Cr. 3. Prereq: 248 or similar manufacturing experience. Introduction to rapid prototyping processes and other rapid manufacturing methodologies. Operating principles and characteristics of current and developing rapid prototyping processes. Use of rapid prototypes in product design, development, and service. Selection of a systems basis on rapid methodologies used in manufacturing processes and rapid tooling approaches.

I E 546. Geometric Variability in Manufacturing. (Dual-listed with 446). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: I E 348, or Mat E 341, or M E 324. Assessment, accommodation of geometric variability of manufacturing processes. Use of CMMs, vision and scanning systems, and profilometers. Technologies to successfully accommodate variation through design of product, tooling or process planning including plastic injection molding, metal casting, welding, machining, powder metallurgy. Methodologies to control geometric variability.

I E 565. Systems Engineering and Analysis. (Cross-listed with Aer E, E E). (3-0) Cr. 3. Prereq: Coursework in basic Statistics. Introduction to organized multidisciplinary approach to designing and developing systems. Applications of systems engineering as applied to large integrated systems. Life cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

I E 566. Applied Systems Engineering. (3-0) Cr. 3. Prereq. 565. Design for reliability, maintainability, usability, supportability, producibility, disposability, and life cycle costs in the context of the systems engineering process. Students will be required to apply the principles of systems engineering to a project including proposal, program plan, systems engineering management plan, and test and evaluation plan. Not available for degrees in industrial engineering.

I E 570. Systems Engineering and Project Management. (3-0) Cr. 3. Prereq. Coursework in basic Statistics. Systems view of projects and the processes by which they are implemented. Focuses on qualitative and quantitative tools and techniques of project management. Specific systems concepts, methodologies, and tools for effective management of both simple and complex projects. Concepts, principles, and practice of systems engineering as part of the product development process. Introduction of important performance parameters for planning, cost control, scheduling, and productivity, including discussions of traditional and state of the art tools and systems.

I E 576. Human Factors in Product Design. (3-0) Cr. 3. Prereq: 577. Investigation of the human interface to consumer and industrial systems and products, providing a basis for their design and evaluation. Discussions of human factors in the product design process: modeling the human during product use; usability; human factors methods in product design evaluation; user/device interface; safety, warnings, and instructions for products; considerations for human factors in the design of products for international use.

I E 577. Human Factors. (3-0) Cr. 3. Prereq: 271, Stat 231 or 401. Physical and psychological factors affecting human performance in systems. Signal detection theory, human reliability modeling, information theory, and performance shaping applied to safety, reliability, productivity, stress reduction, training, and human/equipment interface design. Laboratory assignments related to system design and operation.

I E 582. Enterprise Modeling and Integration. (3-0) Cr. 3. Prereq. 3 credits in information technology or information systems. The design and analysis of enterprise models to support information engineering of enterprise-wide systems. Representation of system behavior and structure including process modeling, information modeling, and conceptual modeling. Applications in enterprise application integration, enterprise resource planning systems, product data management systems, and manufacturing execution systems.

I E 583. Knowledge Discovery and Data Mining. (Dual-listed with 483). (3-0) Cr. 3. Alt. F, offered 2010. Prereq: 148, 312, and Stat 231. Introduction to data warehouses and knowledge discovery. Techniques for data mining, including probabilistic and Statistical methods, genetic algorithms and neural networks, visualization techniques, and Mathematical programming. Advanced topics include web-mining and mining of multimedia data. Case studies from both manufacturing and service industries. A computing project and an additional project with more theoretical content are required.

I E 585. Requirements Engineering. (3-0) Cr. 3. Prereq: 3 credits in information technology or information systems. Principles and practices for requirements engineering as part of the product development process with emphasis on software systems engineering. System definition, problem analysis, requirements analysis, requirements elicitation, validation, specifications. Case studies using requirements engineering methods and techniques.

I E 588. Information Systems for Manufacturing. (3-0) Cr. 3. Prereq: 148, 448. Design and implementation of systems for the collection, maintenance, and usage of information needed for manufacturing operations, such as process control, quality, process definition, production definitions, inventory, and plant maintenance. Topics include interfacing with multiple data sources, methods to utilize the information to improve the process, system architectures, and maintaining accurate and accurate data for entities internal and external to the enterprise to achieve best manufacturing practices.

Courses for graduate students

I E 613. Stochastic Production Systems. (3-0) Cr. 3. Prereq: 513. Modeling techniques to evaluate performance and address issues in design, control, and planning.
and operation of systems. Markov models of single-stage make-to-order and make-to-stock systems. Approximations for non-Markovian systems. Impact of variability on flow lines. Open and closed queuing networks.

IE 631. Nonlinear Programming. (3-0) Cr. 3. Prereq: S 534. Develop nonlinear models, convex sets and functions, optimality conditions, Lagrangian duality, unconstrained minimization techniques. Constrained minimization techniques covering penalty and barrier functions, sequential quadratic programming, the reduced gradient method.

IE 632. Integer Programming. (3-0) Cr. 3. Prereq: S 534. Integer programming including cutting planes, branch and bound, and Lagrangian relaxation. Introduction to complexity issues and search-based heuristics.

IE 690. Advanced Topics. Cr. arr. Repeatable. Prereq: Permission of the instructor. Advanced topics related to Ph.D. research in industrial engineering under the direction of the instructor.

IE 697. Engineering Internship. Cr. R. Repeatable. F.S.S.S. Prereq: Permission of department. Professional work period for a maximum of one semester per academic year. Satisfactory-fail only.

Information Assurance

www.iac.iastate.edu

(Interdepartmental Graduate Major)

Supervisory Committee: D. Jacobson (Chair), C. Bergman, J. McCormick, J. Wong.

Work is offered for the degree Master of Science with a major in information assurance under a cooperative arrangement with various departments including Electrical and Computer Engineering, Computer Science, Political Science, Logistics, Operations, and Management Information Systems, Mathematics, Industrial and Manufacturing Systems Engineering. Students graduating from the major will help to fill the need for well-educated system security specialists in the government, private sector, and academia.

The program objectives identified as being critical to the accomplishment of this mission are: (1) Impart and enhance knowledge about information infrastructure security; (2) Expand and develop ability to engineer complex systems; (3) Instill and nurture social awareness, and the ability to function in a team; (4) Instill and nurture a sense of ethics; and (5) Develop an understanding of strategic and policy issues.

Students interested in the interdepartmental major apply and are admitted to both a home department (the department that is most closely aligned with the student’s research interest and background) and to the program. The home department sets the admission standards, course requirements, and thesis standards.

The program is broadly based and uses courses in the various departments. The program will consist of 24 course credits with 6 credits of research work for a Master of Science with thesis. A non-thesis Master of Science will consist of 27 credits of courses and 3 credits of creative component. The courses are divided into three categories: core, electives, and thesis research.

A student’s Program of Study Committee, in consultation with the student, determines the elective courses to be taken and the acceptability of transfer credits. The major professor will be selected from the discipline where the student is admitted (home department).

The basic prerequisite for admission to this program is a baccalaureate degree in engineering, mathematics, computer science, management information systems, political science, or closely related field. The GRE or GMAT examination may be required based on the standards of the home department. If the GRE or GMAT is not required it will be considered in admissions decisions if offered. Potential students with baccalaureate degrees in the physical sciences, statistics, or other related fields will be considered on an individual basis, possibly with provisional admission. The degree awarded is a master of science in information assurance.

A graduate certificate in Information Assurance is offered, which consists of four courses (12 credits) (InfAs 530, 531, 532, 533 or 535i). For additional information students should contact the chair of the Supervisory Committee, 2215 Cooper Hall, ISU, Ames, Iowa 50011, or www.iac.iastate.edu.

Courses for graduate students

InfAs 531. Information System Security. (Cross-listed with Cpr E). (3-0) Cr. 3. Prereq: Cpr E 489 or 530 or Com S 598 or 533. Computer and network security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

InfAs 533. Cryptography. (Cross-listed with Cpr E). (3-0) Cr. 3. S. Prereq: Math 301 or Cpr E 310 or CS 530. Basic principles of secret communication, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications, relevant material on number theory and finite fields.

InfAs 534. Legal and Ethical Issues in Information Assurance. (Cross-listed with Cpr E, Pol Sci). (2-0) Cr. 3. S. Prereq: Graduate classification, Cpr E or InfAs 531. Legal and ethical issues in computer security. State and local codes and regulations. Privacy issues.

InfAs 536. Computer and Network Forensics. (Cross-listed with Cpr E). (3-0) Cr. 3. Prereq: Cpr E 381 and Cpr E 489 or 530. Fundamentals of computer and network forensics, forensic duplication and analysis, network surveillance, intrusion detection and response, incident response, anonymity and pseudonymity, privacy-protection techniques, cyber law, computer security policies and guidelines, court testimony and report writing, and case studies. Emphasis on hands-on experiments.

InfAs 592. Seminar in Information Assurance. Cr. arr. Repeatable. Prereq: Permission of instructor. Projects or seminar in Information Assurance.

InfAs 632. Information Assurance Capstone Design. (Cross-listed with Cpr E). (3-0) Cr. 3. Prereq: S 531, 532, 534. Capstone design course which integrates the security design process. Design of a security policy. Creation of a security plan. Implementation of the security plan. The students will attack each other’s secure environments in an effort to defeat the security systems. Students evaluate the security plans and the performance of the plans. Social, political and ethical issues. Student self-evaluation, journaling, final written report, and oral report.

InfAs 697. Information Assurance Summer Internship. Cr. R. Prereq: Permission of department, graduate classification. One semester and one summer maximum per academic year professional work period. Satisfactory-fail only.

Interdisciplinary Graduate Studies

www.grad-college.iastate.edu/igs/

(Interdepartmental Graduate Program)

Supervisory Committee: G. A. Jackson, Chair; J. Courteau (Arts and Humanities), J. Mayfield (Biological and Physical Sciences), G. A. Jackson (General), S. Freeman (International Development Studies), S. J. Case, (Social Sciences), C. Flora (Community Development)

The degree of master of science or master of arts with major in interdisciplinary graduate studies is available to graduate students who wish to have a more diversified program of advanced study than that generally permitted students who specialize in a single subject. Areas of specialization in arts and humanities, biological sciences, international development studies, physical sciences, social sciences, community development (see below) and a general area are designed to broaden and supplement a student’s program. Students must take courses in three different graduate subject matter areas, each subject contributing a minimum of nine credits toward the total of 36 credits. Nine credits required for the degree. Courses which may be used for credit toward this degree program are selected from those listed in the Graduate College Catalog for graduate credit.

Both thesis and nonthesis options are available except in arts and humanities in which a thesis is required. If the thesis option is chosen, a minimum of three credits of IGS 699 (Research) is required and a maximum of five credits of IGS 699 may be counted in the total of 35 required credits. If the nonthesis option is elected, evidence of original creative effort must be presented. This may be submitted in the form of a demonstration of independent creativity such as a written report of laboratory, field, or library research in fine arts; or some other original contribution acceptable to the student’s committee. In the nonthesis option a minimum of three credits of IGS 599 (Creative Component) is required and a maximum of five credits of IGS 599 may be counted toward the total of 35 graduate credits. The student, in consultation with the program of study committee, will decide on the option. The committee also aids the student in planning a program of study and in selecting appropriate courses. Graduates will have
experience in designing their own program centered around issues they have identified. Because of the interdisciplinary nature of IGS, students are expected to synthesize knowledge from three different areas of study.

Students who wish to apply for admission to interdisciplinary graduate studies should communicate with the chair of the program, the chair of the supervisory committee or one of its members (see above).

Students in IGS may select a 37-credit area of specialization in Community Development. The Community Development area of specialization, offered in collaboration with five other universities in the Great Plains Interactive Distance Education Alliance, is offered exclusively through courses on the Web.

Courses for graduate students

IGS 599. Creative Component. Cr. arr. Repeatable.

Interdisciplinary Studies

www.las.iastate.edu/academic/interdisciplinarystudies.shtml

(Interdepartmental undergraduate major administered by the College of Liberal Arts and Sciences)

A major in interdisciplinary studies is offered in the College of Liberal Arts and Sciences for undergraduate students who have unique interdisciplinary educational goals. The student, a faculty advisor, and an academic advisor design the major. Leading to either the bachelor of arts or the bachelor of science degree, the major includes 36 to 48 credits of coursework chosen to provide a coherent, carefully planned program in an area of interest that bridges two or more departments. This specialized area is identified on the diploma. Learning goals are individually crafted for each proposed major.

A degree in Interdisciplinary Studies may be particularly attractive to students who wish to develop an area of interest based upon one of the College's cross-disciplinary programs. Areas of interest in Interdisciplinary Studies have included Classical Studies, Criminology and Criminal Justice, International Relations, Ecology Studies, African American Cultural Studies, Asian Studies, and U.S. Latino/a Studies.

A student seeking admission to the program in interdisciplinary studies submits a letter of application that explains how the proposed major meets specific educational and learning goals. A faculty advisor reviews the application. Since students are expected to earn at least 30 credits after they are admitted into the program, the proposal is ordinarily submitted to the review board in the sophomore or junior year. The proposal will be considered if the area of interest properly falls within the College of Liberal Arts and Sciences and if the student's educational goals cannot be met by a more traditional combination of existing majors, minors, and electives.

The interdisciplinary studies major must satisfy the requirements of the liberal arts and sciences curriculum in the College of Liberal Arts and Sciences. A major emphasizing the humanities or communicative arts normally leads to a B.A.; a major emphasizing the natural or social sciences normally leads to a B.S. Different requirements for the B.A. and B.S. degrees are determined by the nature of the chosen field of study. Courses listed in the individualized major may come from any department of the university with the following restrictions:

1. The selection of courses needs to focus on a single theme and be consistent with the career and educational goals of the student.
2. At least one half of the courses in the major will come from departments within the College of Liberal Arts and Sciences.
3. The courses will be chosen from at least two disciplines.

All courses in the major must be at the 200-level or higher. At least 15 credits must be at the 300-level or higher with at least 6 credits at the 400-level or higher. An average grade of C or better must be earned in 15 credits at the 300-level or higher in the major. To meet the English and communication proficiency requirement, a grade of C or better must be earned in either an advanced English composition course or a course in the major with a significant writing component.

Further information may be obtained from the college office.

International Agriculture

www.age.d.iastate.edu/intnlag/index.htm

(Interdepartmental Undergraduate Program)

Supervisory Committee: Robert A. Martin, Chair; Michael D. Kenealy, Ebby Luvaga

The international agriculture program provides opportunities to develop knowledge and skills related to the factors that interact to impact agricultural and environmental issues, production, processes, distribution and utilization worldwide. The program puts emphasis on international experience through structured internships and study abroad. The international agriculture program is appropriate for students seeking positions that require knowledge and experience related to global agricultural issues and their impact on local, regional, national and international policies and practices. Students preparing for careers in the following areas will benefit from the international agriculture program: governmental and non-governmental development agencies, agribusinesses, educational institutions, and non-profit assistance agencies. Outcomes from participation in this program include developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

Secondary Major

International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in agriculture and life sciences curriculum. Students choosing international agriculture as a secondary major will be required to complete the requirements for a primary major in International Business or one of the College's other majors. Students pursuing this secondary major must also complete the requirements for their primary major.

Courses for the secondary major include Agron 342; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Six credits in the secondary major cannot be used to meet requirements of the primary major or any other college or university requirement.

Minor

A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and life sciences and agricultural systems.

Courses for the minor include Agron 342; 3 to 6 credits of study abroad and/or foreign language and 3 to 6 credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Nine credits of the 15 credit total for the minor cannot be used for meeting requirements for the major.

For more information about a secondary major or minor in international agriculture, see descriptions in the designated departments or the supervisory committee.

For more information about courses for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

International Business

Interdepartmental Undergraduate Secondary Major

Supervisory Committee: Dr. Ann Coppennoli-Farni (contact person) and others annually appointed by College.

The international business program is designed to provide students with information that will enable them to work for companies that are involved with international business. Students are expected to develop an understanding of international business issues applied to the different functional areas of business. They will also develop skills to prepare themselves for business positions with international responsibilities. The program is designed to prepare students for employment in multinational companies and for business assignments beyond the United States.

International business is an undergraduate secondary major that may be taken only in conjunction with a primary major in business. Technical knowledge of international business will strengthen the expertise acquired with the primary major. Business students pursuing this program should strengthen their placement opportunities with multinational corporations.

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum of 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major must not be used for the primary major.
International Studies
www.iastate.edu/international/major.shtml
(Interdepartmental/Ugndergraduate Major and Minor, Administered by the College of Liberal Arts and Sciences)

Director: Dawn Bratsch-Prince
Faculty Steering Committee: Charles Dobbs, Chad Gasta, Hsain Ilahaine, Olga Mesropova, Thomas Waldemar

Undergraduates completing the International Studies major understand the interconnections between local and global issues and events. They can integrate their understanding of a selected global issue with knowledge of the major culture, values, and problems of a selected geographical area. They can communicate with persons of cultures other than their own and, in so doing, appreciate the impact of their own cultural and educational experience on their perception of the world. The international studies program provides opportunities for students to develop skills and understanding about international events and problems, and global issues. The program is designed for students who wish to prepare for work or advanced study in the international arena, such as in foreign service, journalism, advocacy organizations, scientific or research institutions, business, nongovernmental development organizations (NGOs), humanitarian agencies, environmental organizations, human rights organizations, think tanks, international agriculture, engineering, and other fields.

A secondary major and a minor in International Studies are available for undergraduates. The program requirements are structured around a combination of a designated Topical Module and a Geographic Regional Studies Component. Each student’s program of study is designed to reflect programmatic opportunities at Iowa State University and the academic, intellectual, and professional interests of the student.

Secondary Major
A student seeking a secondary major in International Studies must successfully complete a minimum of 27 semester credits in courses approved for use in the International Studies program, including: IntSt 235, 430; 21 credits in courses approved for the International Studies program, with a minimum of 9 credits (at least 6 of which are numbered 300 or above) in a designated Topical Module and a minimum of 9 credits (at least 6 of which are numbered 300 or above) in a Geographic Regional Studies Component; Fulfillment of Language Proficiency (see below); study abroad.

The major must include a minimum of 12 credits not used to meet any other department, college, or university requirement.

Minor
A student seeking a minor in International Studies must successfully complete a minimum of 18 semester credits in courses approved for use in the International Studies program, including: IntSt 235, IntSt 430; 12 credits in courses approved for the International Studies program, with a minimum of 6 credits (at least 3 of which are numbered 300 or above) in a designated Topical Module and a minimum of 6 credits (at least 3 of which are numbered 300 or above) in a Geographic Regional Studies Component; Fulfillment of Language Proficiency (see below); study abroad.

The minor must include a minimum of 9 credits not used to meet any other department, college, or university requirement.

Language Proficiency
Students with a major or minor in International Studies fulfill the Language Proficiency requirement through one of the following options:
• Completion of two years of university-level language instruction in a single, appropriate foreign language, as determined by a foreign language course numbered 202 or higher. Students whose first language is other than English fulfill Language Proficiency with Engl 250 at a grade of “C” or better.
• Passing an examination given by the Dept. of World Languages and Cultures or otherwise certifying proficiency equivalent to two years of college instruction. Students proficient in a language (biology, psychology, etc.) at ISU may petition for special consideration.
• Intensive study abroad experience that includes in-the-field-use of a language other than English (individual prior approval of committee required for this option).

A. Topical Modules
• Global Environmental Issues
• Globalization and Economic Development
• International Issues in Science and Technology
• International Communication
• International Conflict
• Social and Cultural Change

B. Geographic Regional Studies Component
• Africa and Middle East
• Asia
• Latin America
• Western Europe
• Russia, East Europe and Central Asia

International Studies students are required to participate in study and/or work abroad programs. Students may petition to use up to 9 credits in the minor (6 credits earned in study abroad and/or international internships) to substitute for courses within the Topical Module, Geographic Regional Studies Component, and/or Language Proficiency requirements.

Courses primarily for undergraduate students

IntSt 235. Introduction to International Studies. (3-0) Cr. 3. F.S.S. Overview of international studies, emphasizing cultural, geographic, economic, and political characteristics of major world areas and nations.

IntSt 350. Topics in International Studies. Cr. arr.

IntSt 430. Seminar in International Studies. (3-0) Cr. 3. S. Capstone seminar in international studies focused on economic development, women’s issues, war and ethnic conflict, population, the environment, globalization, human rights, international trade and business and other issues. Students develop a project on a subject linked to their area of professional interest or academic specialization.

IntSt 446. International Issues and Challenges in Sustainable Development. (Cross-listed with Agron, Glob.) Cr. 4. S. Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor: Mullien. Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economical, political, and historical factors affecting sustainable development of communities and countries from art and science perspectives. Interna
tional field experience with foreign language training required. A program fee is charged to students for international study abroad.

IntSt 490. Independent Study. Cr. arr. Repeatable. Prereq: Permission of International Studies Advisory Committee Chair and faculty supervisor. Designed to meet the needs of students who wish to study in areas other than those in which courses are offered or to integrate areas of study appropriate to special problems with international focus. No more than 3 credits of IntSt 490 may be used in the International Studies major or minor.

Iowa Lakeside Laboratory
www.lakesidelab.org
(International Institutional Program)
Participating Faculty: Neil P. Bernstein (Biology, Mount Mercy College), Bonnie S. Boxen (Ecology, Evolution and Organismal Biology, Iowa State University), C. Lee Burris (Agronomy, Iowa State University), C. Arthur Coyl (Art and Design, University of Northern Iowa), John F. Doershuk (Anthropology, University of Iowa, and State Archaeologist), Mark B. Edlund (Science Museum of Minnesota, St. Crox Watershed Research Station), Jim Heynen (English, St. Olaf College), Laura Johnson (Biology, University of Northern Iowa), Stephen Juggins, (School of Geography, Politics & Sociology, University of Newcastle, UK), Kenneth L. Lang (Biological Sciences, Humboldt State University), Michael J. Lannino (Muncie Center for Medical Education, Bail State University), William R. Norris (Natural Sciences, Western New Mexico University), Clay L. Pierce (Natural Resource Ecology and Management, Iowa State University), Thomas R. Rosburg (Biology, Drake University), Daryl D. Smith (Native Roadside Vegetation Center, University of Northern Iowa), Sarah A. Spaulding (Inst. of Arctic & Alpine Research, University of Colorado), Lois H. Tiffany (Ecology, Evolution and Organismal Biology, Iowa State University), Amanda Volk (Ecology, Evolution, and Organismal Biology), James L. Wee (Biological Sciences, Loyola University).

Iowa Lakeside Laboratory is run cooperatively by the Iowa Lakeside Laboratory Consortium whose members include Drake University, Iowa State University, the University of Northern Iowa, and the University of Iowa. Lakeside courses can be taken for credit through all Consortium members. Students should check with their advisers to determine whether Lakeside courses can be used to satisfy major or minor requirements or college or university general education requirements.

The Laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially those of the Iowa Great Lakes region with its numerous lakes, wetlands, and prairies. Its campus is located on an approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Lakeside’s mission is to provide undergraduate and graduate students an opportunity to get hands-on experience working with a variety of natural and human elements through its field-oriented summer courses and to provide research facilities and support for graduate students and faculty working on research projects in northwestern Iowa. Each summer, Iowa Lakeside Laboratory offers students a unique educational experience: small, full-immersion, field-oriented courses in the natural sciences (archaeology, ecology, environmental science, hydrology, evolution, geology, soils, taxonomy). All courses meet all day from Monday through Friday. The majority of courses run for 4 weeks. Enrollments in most courses are limited to 8 to 10 students. Courses are taught at the undergraduate ( sophomore and junior) and the senior/graduate level. Students obtain one credit for each week (40 hours) in class. One and two week courses are also available, including courses designed especially for teachers. Weather permitting, students normally spend at least part of each day doing field work, either as part of their class work or working on individual or group projects. Because some courses are offered intermittently, the current Iowa Lakeside Laboratory summer brochure or the Lakeside Lab Website (www.lakesidelab.org) should be consulted for the list of courses being offered in a given summer session. The Lakeside Lab Website
projects stress techniques of population analysis and emphasis on field studies of local avifauna. Group (Cross-listed with A Ecl). Cr.

interactions, and roles of plants and animals in native at the population, community and ecosystem level. Ia LL 312I. Ecology.

ence as interpreters, rangers, and technicians. conservation boards, camps, parks, etc. for experi-

ter and sophomore standing. (Cross-listed with Agron, EnSci). Cr. 4. SS. Principles of ecological and evolutionary concepts related to the physio-chemical and biological environment. Problems and issues (global, national, regional, and local) associated with freshwa-

ies to cover travel expenses. Nonmajor graduate credit.

students. All scholarships cover room and board. Information about how to apply for Iowa Lakeside Laboratory Scholarships is included on the Web-site (www.lakesidelab.org). Students should also consult the Student Financial Aid Office for other scholarships, work study, and loan programs for which they are eligible.

Students can only enroll in Iowa Lakeside Lab courses by submitting an Iowa Lakeside Lab Registration and Scholarship form and Housing form to the Iowa Lakeside Laboratory Administrative Office. These forms are found on the Iowa Lakeside Laboratory-Web-site (www.lakesidelab.org) where they can be submitted online or downloaded. For further information, contact

Iowa Lakeside Laboratory 1838 Highway 86 Milford, IA 51351 Phone: (712) 337-3669 FAX: (712) 337-0361 E-mail: petervanderlinden@iowa.edu

Early registration is advisable. Because enrollment in Lakeside courses is limited, students should register before May 1 for the following summer session. Housing is also limited and students must apply for housing or indicate that they plan to live off campus at the time of registration.

Courses primarily for undergraduate students

la LL 302. Plant-Animal Interactions, Cr. 4. Alt. SS., offered 2011. Prereq: One course in the biological sciences. Introduction to ecology and co-evolution of plants and animals; emphasis on dispersal, pollination, and plant-herbivore interactions; field and laboratory work, reading, discussion.

la LL 303I. Undergraduate Internships. (Cross-listed with NREM). Cr. Arr. SS. Prereq: Permission of instruc-
tor and sophomore standing. Placement with county conservation boards, camps, parks, etc. for experi-
ence as interpreters, rangers, and technicians.

la LL 312I. Ecology. (Cross-listed with A EcI, EnSci). Cr. 4. SS. An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

la LL 328I. Ornithology. (Cross-listed with A EcI). Cr. 4. SS. The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress techniques of population analysis and methodology for population studies.

la LL 367. PlantTaxonomy, Cr. 4. SS. Principles of classification and evolution of vascular plants; taxo-
tomics and collection techniques; use of keys. Field and laboratory studies emphasizing identification of local flowering plants and recognition of major plant families.

la LL 371I. Introduction to Insect Ecology. (Cross-

listed with Ent). (3-3) Cr. 4. Alt. SS., offered 2011. Field and laboratory study of insects, their diversity, life history; emphasis on ecology and behavior.

la LL 402I. Watershed Hydrology and Surficial Processes. (Cross-listed with Agron, EnSci). Cr. 4. SS. Prereq: Four courses in physical or biological sciences or engineering. Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.

la LL 403. Evolution, Cr. 4. SS. Mechanisms and patterns in microevolution and macroevolution. Field exercises will emphasize studies of natural selection, adaptation, genetic variation, and population genetics of local plant and animal populations. Nonmajor gradu-
ate credit.

la LL 404I. Behavioral Ecology. (Cross-listed with A EcI). Cr. 4. Alt. SS., offered 2010. Prereq: Two sem-
esters of biology. Animal coloniality, courtship, terri-
toriality, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior.

la LL 415. Freshwater Invertebrates. Cr. 4. SS. Prereq: One or more ecology courses. Field-oriented introduction to the identification, life-history, and ecology of common, free-living freshwater inverte-
brates of north-temperate lakes, rivers, and wetlands. Emphasis on the role of invertebrates in aquatic food chains and litter processing. Nonmajor graduate credit.

la LL 419I. Vertebrate Ecology and Evolution. (Cross-listed with A EcI). Cr. 4. SS. Field and labora-

tory study of representative vertebrates of north-western Iowa. Observations and experimentation em-
phasize ecological histories by integrating concepts of functional morphology, behavioral ecology, and evolutionary biology. Nonmajor graduate credit.

la LL 420I. Amphibians and Reptiles. (Cross-listed with A EcI). Cr. 4. Alt. SS., offered 2010. Prereq: Two semesters of biology. Ecology, behavior, and conservation biology of amphibians and reptiles with emphasis on their anatomy and morphology; temper-

ature and water regulation; locomotion; life history; reproduction, population and community ecology; and conservation.

la LL 422I. Prairie Ecology. (Cross-listed with EnSci). Cr. 4. SS. Prereq: Familiarity with basic principles in biological sciences and ecology. Basic patterns and underlying physical and biotic causes of both regional and local distributions of plants and animals of North American prairies; field and laboratory analyses and projects. Nonmajor graduate credit.

la LL 425I. AquaticToxicology and Wetland Dynam-

ics in Freshwater Systems. Cr. 4. SS. Prereq: Intro-
dutory biology course and general chemistry course. Fundamental knowledge and understanding of the scientific concepts related to the physico-chemical and biological environment. Problems and issues (global, national, regional, and local) associated with freshwa-
ter systems and how wetland restoration can be used to ameliorate problems. Discussion and application of basic tools used to assess aquatic toxicological problems. Nonmajor graduate credit.

la LL 427I. Archaeology. (Cross-listed with Anthr). Cr. 4. SS. Nature of cultural and environmental evi-
dence in archaeology and how they are used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying and exca-
vation techniques. Nonmajor graduate credit.

la LL 435I. Illustrating Nature I Sketching. (Cross-

listed with BIP I). Cr. 2. SS. Sketching animals, an-
imals and terrain. Visual communication, development of a personal style, and integration of typographic and visual elements on a page will be emphasized.

la LL 436I. Illustrating Nature II Photography. (Cross-listed with BP I). Cr. 2. SS. Beginning to intermediate technical and compositional aspects of color photography of natural areas and their plants and animals.

la LL 461I. Introduction to GIS. (Cross-listed with En-

la LL 463I. Soil Formation and Landscape Relation-

la LL 484. Plant Ecology. Cr. 4. SS. Principles of plant population, community, and ecosystem ecology illustrated through studies of native vegetation in local prairies, wetlands and forests. Group or individual projects. Nonmajor graduate credit.

la LL 490I. Undergraduate Independent Study. (Cross-listed with Anthr, NREM). Cr. arr. Repeatable. SS. Prereq: Junior or senior classification and permis-

sion of instructor.

la LL 493. Natural History Workshop. Cr. arr. SS. Offered as demand warrants. Five day-long, non-

la LL 494. Ecosystems of North America. Cr. arr. SS. Prereq: A general ecology course and permission of the instructor. An extended field trip to study a particular type of ecosystem (prairie, coastal wetland, forest, alpine, coral reefs, etc.) or the ecosystems of a specific region (Rocky Mountains, Gulf Coast, Appa-

lachian Mountains, Deserts of the Southwest, Central America, etc.). Prior to the field trip, there will be an orientation period and after each field trip a review and synthesis period. A field trip fee will be assessed to cover travel expenses. Nonmajor graduate credit.

la LL 499. Undergraduate Research. Cr. arr. Prereq: Junior or senior classification and permission of instruc-
tor.

Courses primarily for graduate students

Ia LL 501. Freshwater Algae. (Cross-listed with EEOB). Cr. 4. SS. Structure and taxonomy of freshwa-
ter algae based on field collected material; emphasis on genus-level identifications, habitats visited include lakes, fens, streams, and rivers, algal ecology.
la LL 503. Graduate Internships. Cr. arr. SS. Prereq: Permission of instructor and graduate standing. Placement with county conservation boards, camps, parks, schools, etc. For experience as interpreters, rangers, technicians, and teachers.

la LL 508I. Aquatic Ecology. (Cross-listed with EnSci, NREM). Cr. 4. SS. Prereq: Courses in ecology, chemistry, and physics. Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

la LL 523I. Fish Ecology. (Cross-listed with A Ecl). Cr. 4. Att. SS., offered 2010. Basic principles of fish interaction with the biotic and abiotic environment. Field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa.

la LL 526I. Advanced Field Ornithology. (Cross-listed with A Ecl. Cr. 2. SS. Prereq: Concurrent registration in la LL 326I. Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project.

la LL 532I. Analysis of Environmental Data. (2-0) Cr. 2. SS. Prereq: An undergraduate course in statistics, understanding of basic concepts such as correlation and regression, and familiarity with PC-based software for data analysis. Analysis of Environmental Data will provide students with training in the theory and application of a range of Statistical techniques useful for the analysis of ecological and paleoecological data. Topics will include data management, exploratory data analysis, regression analysis, direct and indirect ordination methods, classification techniques, transfer functions and the analysis of temporal data. Practical classes will provide hands-on training in the use of Statistical and graphical software including R, CANOCO, C2, and TWINSPLAN. The course will be directed towards advanced undergraduate, graduate and working professionals in ecology and paleoecology.

la LL 573I. Techniques for Biology Teaching. (Cross-listed with EEOB, A Ecl). Cr. arr. Repeatable. SS. The development and implementation of laboratory exercises suitable for elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A. Animal Biology (Same as A Ecl 573A)
B. Plant Biology

C. Fungi and Lichens
D. Aquatic Ecology
E. Prairie Ecology
F. Wetland Ecology
G. Limnology (Same as A Ecl 573G)
H. Animal Behavior (Same as A Ecl 573H)
I. Insect Ecology
J. Biology of Invertebrates
K. Non-invasive Use of Living Organisms
W. Project WET (Same as A Ecl 573W)

la LL 578I. Field Mycology. (Cross-listed with EEOB). Cr. 4. Att. SS., offered 2010. Identification and classification of the common fungi; techniques for identification, preservation, and culture practiced with members of the various fungal groups.

la LL 580I. Ecology and Systematics of Diatoms. (Cross-listed with EEOB). Cr. 4. SS. Field and laboratory study of freshwater diatoms; techniques in collection, preparation, and identification of diatom samples; study of environmental factors affecting growth, distribution, taxonomic characters; project design and execution including construction of reference and voucher collections and data organization and analysis.

la LL 590I. Graduate Independent Study. (Cross-listed with A Ecl, Anthr, EEOB). Cr. arr. Repeatable.

la LL 593. Natural History Workshop. Cr. arr. Prereq: Permission of instructor. Graduate workshop on some aspect of the natural history of the Upper Midwest or on techniques for studying natural history.

Courses for graduate students

la LL 699I. Research. (Cross-listed with A Ecl, Anthr, EEOB, GDCB). Cr. arr. Repeatable.

Undergraduate Study

Students who complete degrees in advertising or journalism and mass communication will develop competencies in 12 key areas:

History/role of professionals and institutions: Demonstrate an understanding of the history and role of professionals and institutions in shaping communications;

First Amendment/Law: Understand and apply the principles and laws of freedom of speech and press, including the right to dissent, to monitor and criticize power, and to assemble and petition for redress of grievances;

Theory: Understand concepts and apply theories in the use and presentation of images and information;

Research and evaluation: Conduct research and evaluate information by methods appropriate to the communications professions in which they work;

Diversity: Demonstrate an understanding of the diversity of groups in a global society in relationship to communications;

Ethics: Demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity;

Critical thinking: Think critically, creatively and independently;

Writing: Write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve;

Visual Communication: Conceptualize, prepare or select appropriate methods to convey information in visual form, whether as a complement or supplement to words;

Numeracy: Apply basic numerical and statistical concepts; Critical Evaluation/Editing: Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness;

Tools and technology: Apply tools and technologies appropriate for the communications professions in which they work.

To become an advertising or journalism and mass communication major, the student must 1) have either achieved a score of 26 or higher on the ACT English exam, 590 or higher on the SAT verbal exam, or passed the School’s English Usage Test as outlined in the Greenlee School’s policy for meeting the English Usage Standard; and 2) have completed the pre-major core requirements (See majors). Until these requirements are successfully completed, advertising and journalism and mass communication students are designated as pre-majors. A copy of the EUT policy, including additional details and requirements, is available from the Greenlee School.

Communication Proficiency Requirement

To meet the University’s Communication Proficiency requirement, all majors in the School must earn a grade of C or better in English 150 and 250 (or 250H). These additional requirements apply: Advt majors must earn a C+ or better in Jl MC 201 and one of Advt 334 or 336. Jl MC majors must earn a C+ or better in Jl MC 201 and 202 or 206 or 321.
The Advertising Major

The advertising major prepares students for careers in business and industry or for graduate education. Students majoring in advertising find career opportunities in professions requiring applied communication expertise. Graduates are qualified for positions in the creative and account sides of advertising within businesses, agencies and media.

To become an advertising major, a student must successfully complete JI MC 101, 110, and 201 (with a C+ or better) and Advrt 230. Until the EUT standard is met and these courses are successfully completed, journalism and mass communication students are designated as pre-majors. To receive a bachelor of arts degree in advertising, a student must earn at least 120 credits. A minimum of 80 credits must come from courses other than Advrt or JI MC and must include Principles of Marketing, Mkt 340. At least 65 of these credits must come from the liberal arts and sciences, and must include Principles of Statistics, Stat 101, or other approved statistics course, and Fundamentals of Public Speaking, Sp Cm 212. Overall, at least 45 credits must be from 300-level courses or above.

The degree requirements allow for a minimum of 33 and a maximum of 40 credits to be taken in Advrt and JI MC. These include the pre-major core requirements of 6 credits: Mass Media and Society, JI MC 101, 3 credits; Orientation to Journalism and Communication, JI MC 110, required; Reporting and Writing for the Mass Media, JI MC 201, 3 credits; and Principles of Advertising, Advrt 230, 3 credits.

Advrt 301, Strategic Planning for Advertising and Public Relations, JI MC 460 Law of Mass Communication, and JI MC 499 Professional Media Internship, are required of all Advrt majors. Additional recommended courses and requirements for the advertising major are available from the Greenlee School.

Advrt majors need a broad-based academic background that the School seeks to ensure by requiring a Designated Area of Concentration (DAC) made up of 21 credits with at least 12 credits from the 300-level or above. The DAC is a secondary area of expertise made up of courses selected and designed by the student, with adviser approval, to complement the student’s professional and academic interests. A second major outside of Advrt or JI MC may substitute for the DAC.

The Journalism and Mass Communication Major

The major in journalism and mass communication prepares students for careers that involve all aspects of news and information. The emphasis is on generating ideas, organizing, writing, editing and presenting information for various media and platforms and audiences. Graduates most likely will work in journalism (magazines, newspapers, and broadcast advertising). Evaluations of advertising research, media, strategy, and appeals. Study of the creation of print and broadcast advertising.

Advrt 301. Strategic Planning for Advertising and Public Relations, JI MC 460 Law of Mass Communication, and JI MC 499 Professional Media Internship, are required of all Advrt majors. Additional recommended courses and requirements for the advertising major are available from the Greenlee School.

Advrt majors need a broad-based academic background that the School seeks to ensure by requiring a Designated Area of Concentration (DAC) made up of 21 credits with at least 12 credits from the 300-level or above. The DAC is a secondary area of expertise made up of courses selected and designed by the student, with adviser approval, to complement the student’s professional and academic interests. A second major outside of Advrt or JI MC may substitute for the DAC.

Minors

The Greenlee School offers a minor in Advertising and a minor in Journalism and Mass Communication. For a minor in Advertising or Journalism and Mass Communication, students complete 15 credits, beginning with JI MC 101. The remaining 12 credits, at least 9 of which must be from Iowa State University, are selected from course offerings in the advertising and journalism and mass communication majors, as follows: 6 credits from the following 200- and 300-level courses, Advrt 230, 301, and 335; JI MC 220, 301, 305, 341, and 342; and 6 credits from the following 400-level courses; JI MC 401, 406, 453, 454, 481, 462, 464, 474, 476 and 477 and Advrt or JI MC 497.

JI MC majors may not minor in Advrt and Advrt majors may not minor in JI MC.

Graduate Study

The Greenlee School of Journalism and Communication offers work for a master of science degree in journalism and mass communication. Two tracks are available: one for students who desire specialized study in communication theory and research, and the second for students who wish to strengthen professional strategic skills.

Major plans of study in one of two tracks:

I. Communication as theory and research – The School offers advanced academic preparation in communication theory and research leading to the master of science degree. Graduate work prepares students to teach and contribute to research and scholarship in the field of communication. The degree requires a thesis or creative component based on original research, which must be defended successfully before a committee at the end of the program. Areas of research emphasis include: science and risk communication, media performance, media effects, advertising, public relations, political communication, communication technology, law and ethics, international communication and visual communication.

II. Professional and Strategic Communication – The School offers advanced professional study in journalism and mass communication leading to the master of science degree. Graduate work prepares students for professional careers in a variety of mass communication fields. Students with limited training or experience in journalism and mass communication may include skills courses in their programs for no credit. The degree requires either a creative component or thesis.

All students must complete four core courses: Introduction to Graduate Study in Journalism and Mass Communication (JI MC 592), Theories of Mass Communication (JI MC 501), Communication Research Methods (JI MC 540), and Mass Communication Internship in Mass Communication (JI MC 598). Each student selects elective courses based on his/her area of emphasis and career goal, in consultation with the student’s major professor and Program of Study Committee.

The Greenlee School graduate program offers minor work for students majoring in other departments. The M.S. minor requires JI MC 501 (Communication Theory), JI MC 540 (Communication Strategies), and one other course in journalism and mass communication for a total of 9 credits taken within the Greenlee School.

Advertising (Advrt)

Courses primarily for undergraduate students

Advrt 230. Advertising Principles, (3-0) Cr. 3. F.S. Historical, social, economic and legal aspects of advertising. Evaluations of advertising research, media, strategy, and appeals. Study of the creation of print and broadcast advertising.

Advrt 301. Strategic Planning for Advertising and Public Relations, (Cross-listed with JI MC). (3-0) Cr. 3. F.S. Prereq: Advrt 230 or JI MC 220; Sophomore classification. Prospect analysis, market segmentation, positioning, strategic planning, public opinion formation, communication strategy formation and development of critical thinking skills.

Advrt 336. Advertising Account Management, (3-0) Cr. 3. Prereq: C+ or better in JI MC 201; Advrt/JI MC 301. Fundamentals of account management with emphasis on leadership, sales techniques, relationship building, presentation skills, and strategic thinking. Includes aspects of agency revenue growth, team building, client management, evaluating creative concepts and media plans, and developing strategic proposals and campaign recommendations.

Advrt 390. Professional Skills Development. (Cross-listed with JI MC). Cr. arr. Repeatable. Prereq: C+ or better in 201, other vary by topic; instructor permission. Credit not given for working on student or professional media. Check School for course availability.

Advrt 434. Advertising Campaigns, (3-0) Cr. 3. F.S. Prereq: Advrt/JI MC 301; C+ or better in 334 or 336, and major Status. Development of advertising campaigns for business and social institutions. Projects
Journalism and Mass Communication (Jl MC)

Courses primarily for undergraduate students

Jl MC 101. Mass Media and Society. (3-0) Cr. 3. F.S. Communication models and their application to the mass media; the mass communication process; organization, characteristics and responsibilities of the mass media; media-related professional operations.

Jl MC 110. Orientation to Journalism and Communication. Cr. R. F.S. Orientation to career opportunities, emphasis areas and requirements in the Greenlee School. Satisfactory-fail only.

Jl MC 201. Reporting and Writing for the Mass Media. (1-4) Cr. F.S. Prereq: Engl 250 (or testout) and either a score of 26 or higher on the ACT English exam, 590 or higher on the SAT verbal exam or a passing score on the School's English Usage Test. Generating story ideas, exercising news judgment and gathering information via interviews, observation and documentary sources to produce news and informational material for the mass media. Emphasis on analyzing and organizing information, as well as accuracy and principles of good writing.

Jl MC 202. Intermediate Reporting and Writing for the Mass Media. (2-2) Cr. 3. F. Prereq: C+ or better in 201. Designed for students interested in writing for newspapers, magazines and online media. Enhancing and refining skills in developing sources and generating story ideas. Information-gathering techniques, reporting and writing. Emphasis includes segments on local government and judiciary.

Jl MC 206. Reporting and Writing for the Electronic Media. (2-3) Cr. 3. F.S. Prereq: C+ or better in 201. Researching, organizing, and writing for radio, television and online media. Basic principles of news, information and entertainment. An emphasis on development, content and structure.

Jl MC 220. Principles of Public Relations. (3-0) Cr. 3. F.S. Introduction to public relations in business, government and non-profit organizations; functions, processes, and management; attitudes, public opinion and persuasion; overview of theory.

Jl MC 301. Strategic Planning for Advertising and Public Relations. (Cross-listed with Advrt.) (3-0) Cr. 3. F.S. Prereq: Advrt 230 or Jl MC 220. Sophomore classification. Prospect analysis, market segmentation, positioning, strategic planning, public opinion formation, communication strategy formation and development of critical thinking skills.

Jl MC 308. Electronic Media Production. (2-2) Cr. 3. F.S. Prereq: C+ or better in Jl MC 201. Introduction to studio production equipment. Course focus on visual concepts, maintenance and practical operation of studio equipment.

Jl MC 309. Electronic News Gathering and Production. (2-3) Cr. 3. Prereq: C+ or better in 202 or 302 or 321. Field techniques in single-camera video production used to shoot and edit visual stories. Introduction to electronic news gathering.

Jl MC 310. Fundamentals of Photojournalism. (1-3) Cr. 3. Prereq: C+ or better in 201. Basic photojournalism techniques. Preparation, camera operation, lighting, composition, and photo reproduction techniques for print or computer-mediated applications. Emphasis on using the camera as a reporting tool. Basic use of digital imaging and editing software. Ethical issues involving photojournalism.

Jl MC 315. Multimedia Production. (2-2) Cr. Prereq: 302 or 342L or 343L, or equivalent computer design proficiency. Concepts and principles for evaluating, constructing, and designing information for the Web and other computer-mediated communication systems. Explores the use of computer-generated animation and graphics, audio and video. Issues of ethics and ownership of work pertinent to the new media are discussed.

Jl MC 312. Public Relations Writing. (2-3) Cr. Prereq: C+ or better in 201, 220 or Advrt 230, 342L or computer design proficiency recommended. May be taken concurrently with 301. Developing and writing public relations materials with an emphasis on media relations and news. Techniques addressed include media kits, brochures, newsletters and speeches.

Jl MC 342. Visual Principles for Mass Communicators. (3-0) Cr. 3. Prereq: Sophomore classification. Understanding of the visual message. Visual perception, visual communication theory, design syntax, design elements and how they are applied in journalism and mass communication.

Jl MC 342L. Laboratory in Basic Visual Principles. (2-2) Cr. 3. Prereq: Credit or enrollment in 342. Introduction to desktop publishing, beginning techniques in layout. Application of visual principles to design simple print projects.

Jl MC 343L. Laboratory in Intermediate Visual Principles. (2-2) Cr. 3. Prereq: 342L or equivalent computer design proficiency. Assignment of more advanced features of desktop publishing and other document-enhancing software. Production of newsletters, multi-page brochures and other documents.

Jl MC 344. Depth Reporting and Writing. (2-2) Cr. 3. F. Prereq: C+ or better in 202 or 302 or 321. Developing and writing comprehensive news features and magazine articles. Majors may not apply both 344 and Engl 303 toward graduation.

Jl MC 346. Public Affairs Reporting. (2-2) Cr. 3. S. Prereq: C+ or better in 202 or 302 or 321. Reporting on government, business, and other institutions; identification of and access to public records; investigative reporting techniques. Assignment major stories on government and non-profit organizations, and issues for print and broadcast media.

Jl MC 347. Science Communication. (Dual-listed with 547). (2-2) Cr. 3. S. Prereq: C+ or better in 202 or 302 or 321 for Jl MC majors; C+ or better in Jl MC 201 and Advrt 324 or 336 for Advrt majors. Nonmajors by permission of instructor. Understanding science and technology topics for general audiences. Outlets for stories include print, broadcast and online media. Story topics include reporting about basic, applied sciences and social sciences, as well as ethical, political and policy issues related to science and technology.

Jl MC 349. Print Media Editing. (1-5) Cr. Prereq: C+ or better in 202 or 302 or 321. Grammar, punctuation, usage, syntax and logic. Editing newspaper, magazine and online copy. Headline, title writing and visual presentation. Use of computer editing programs.

Jl MC 390. Professional Skills Development. (Cross-listed with Advrt). Cr. Ar. Repeatable. Prereq: C+ or better in 201, other vary by topic. Instructor permission. Credit not given for work on student or professional media. Check School for course availability.

Jl MC 401. Mass Communication Theory. (3-0) Cr. 3. Prereq: Junior classification. Theory and research in mass communication processes and effects: the scientific processes of measuring, evaluating and reporting mass communication research.

Jl MC 406. Media Management. (Dual-listed with 508). (3-0) Cr. 3. Prereq. Junior classification. Decision-making functions of media. Basic media market analysis, media organization and management, circulation and audience development, technological developments affecting management decisions, and relationships with labor and regulatory agencies that affect media operations.

Jl MC 424. Public Relations Campaigns. (3-0) Cr. Prereq: 220, 301, and C+ or better in 321; junior classification. Section B may be taken in 202 or 206; instructor permission only. Developing public relations and corporate communication campaigns for business and social institutions.

Jl MC 449. Advanced Print Media Editing. (3-0) Cr. 3. S. Prereq: 342, 342L, 349 or concurrent enrollment; junior classification. Developing high-level editorial skills needed for issue-planning, editorial management and decision making. Designing, developing, and repositioning existing and new magazines, newspapers, and new media. Editing complex manuscripts, with continued emphasis on grammar, punctuation, usage, syntax and logic. Use of computer publishing programs. Nonmajor graduate credit.

Jl MC 480. Law of Mass Communication. (3-0) Cr. 3. F.S. Prereq: C+ or better in 201, junior classification. First Amendment law, libel, privacy, obscenity, contempt, copyright, trademark, the Federal Communications Act; laws affecting advertising, legal publication, and other business activities of the media, including the Internet. Nonmajor graduate credit.

Jl MC 481. History of American Journalism. (3-0) Cr. 3. Prereq: Junior classification. Role of the mass media, including advertising and public relations, in shaping the social, economic and political history of America; impact of change in these areas on the development, traditions, and philosophies of the media. Nonmajor graduate credit.

Jl MC 482. Media Ethics, Freedom, Responsibility. (3-0) Cr. 3. Prereq: Junior classification. Media ethics and performance; functions of the media in relation to the executive, judicial and legislative branches of government; agencies of media criticism; right to know versus right to privacy.

Jl MC 484. Journalism and Literature. (3-0) Cr. 3. Prereq: Junior classification. A study of journalism's impact on literary writing and literature's impact on journalism, as seen through the works of such American author-journalists as Ernest Hemingway, Truman Capote, Joan Didion, John McPhee, Tom Wolfe, Hunter Thompson. Nonmajor graduate credit.
health and human performance (teacher licensure option) and minor in dance. An interdisciplinary Performing Arts major with a dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index, Theatre and Performing Arts.

The department offers a minor in dance that may be earned by completing the following: Dance 220, 222, 270, 320, 360, 384, 385 or 386, and three additional credits selected from dance courses numbered 200 or above. Participation in Orchesis I or II is recommended.

Kinesiology. Kinesiology. The undergraduate curriculum in Kinesiology is comprised of four components: general education, the Basic Core, the Advanced Core, and the option component. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and option components. The Basic Core enables students to understand, define and explore their own health and physical activity through the cognitive, affective and psychomotor domains. The Advanced Core extends this learning to include disciplinary concepts and tools of inquiry that comprise scientific literacy associated with health and physical activity. Finally, coursework within each specialization option builds upon this personal and scholarly learning by enabling students to master content and skills specific to career applications. The specialization Options comprise a focused area of study within Kinesiology. Options available are 1) Athletic Training, 2) Community and Public Health, 3) Exercise Science, 4) General Studies, and 5) Health/Fitness Management and 6) Physical Education/Licensure. Enrollment in the Athletic Training and Physical Education Licensure options is limited because of accreditation requirements and the provision of more individualized field experiences.

Academic options within the undergraduate program. Students in the CAATE accredited Athletic Training option are prepared for the National Athletic Training Association Board of Certification examination or for graduate work in athletic training. Graduates of this option will effectively use their expertise to plan Strategies aimed at the prevention, treatment and rehabilitation of athletic injuries. Academic options within the undergraduate program. Students in the CAAHEP accredited Athletic Training option are prepared for the National Athletic Training Association Board of Certification examination or for graduate work in athletic training. Graduates of this option will effectively use their expertise to plan Strategies aimed at the prevention, treatment and rehabilitation of athletic injuries.

Academic options within the undergraduate program. Students in the CAAHEP accredited Athletic Training option are prepared for the National Athletic Training Association Board of Certification examination or for graduate work in athletic training. Graduates of this option will effectively use their expertise to plan Strategies aimed at the prevention, treatment and rehabilitation of athletic injuries. Students in the Community and Public Health option are prepared for professional employment at local, state or national health agencies, medical centers, and other public organizations that seek to promote health in the population. The curriculum prepares students to take the Certified Health Education Specialist certification examination upon graduation. Students in the Exercise Science option utilize an interdisciplinary approach to the study of human movement. In so doing, they become prepared for graduate study in Kinesiology or advanced study leading to careers in medicine, physical therapy, or other allied health programs. Students in the General Studies option combine kinesiology with a concentration in another area of study to support an individualized program, such as community sport and recreation, dance, and other sport, exercise, or health related fields. Programs of study must be approved by the undergraduate program coordinator.

Students in the Health/Fitness Management option are prepared for professional roles as health and fitness leaders or program managers. Employment opportunities include work in corporate fitness programs, health clubs, cardiac rehabilitation programs or personal training. Graduates are able to plan, implement and supervise exercise programs which will improve fitness and health. Graduates also have a basic understanding of economic and management issues related to business applications in the health and fitness field.

Students in the Physical Education Licensure option are prepared to teach Physical Education in grades K-12 and to meet the State of Iowa learning outcomes for teachers. Graduates can plan developmentally appropriate physical education, and individualize instruction and assessment for diverse audiences.

Learning outcomes for the undergraduate degree. Despite the diversity in specialization Options, the Learning Outcomes comprise a common framework for each student as they matriculate through Iowa State University. The learning outcomes emphasized in academic coursework in the Department of Kinesiology are:

Content knowledge. The student has a broad conceptual view of physical activity and health, recognizes its scientific underpinnings (e.g. history, content, disciplinary concepts, and tools of inquiry) and appreciates the interdisciplinary nature of the study of physical activity and health. Literacy will be gained from the personal, scholarly and professional perspectives.

Discovery and critical thinking. The student can use accepted techniques of discovery and apply critical thinking within and outside of the discipline area. The student will be able to solve problems independently and evaluate opinions and outcomes at the personal scholarly and professional level.

Communication. The student uses knowledge of effective verbal, nonverbal and media communication techniques to foster inquiry, collaboration, and engagement in physical activity and health related settings.

Numeracy. The student understands and uses qualitative and quantitative analysis through formal and informal assessment strategies.

Technology. The student understands and uses a variety of technological applications to improve personal understanding and to enhance scholarly pursuits and professional practice in their chosen area of study.

Learning in the following domains occurs both in and outside the Iowa State University experience. The department will foster development in these domains through its courses and other activities.

Citizenship. The student uses value and ethics based decision making to demonstrate personal, professional and world citizenship through fostering relationships, embracing leadership, accepting social responsibility, seeking and completing opportunities to improve the quality of life for others.

Lifelong learning. The student is a reflective professional who actively seeks to further self-knowledge and seeks opportunities to grow professionally.

Diversity. The student understands how individuals differ in their approaches to initiating and maintaining a physically active, healthy lifestyle, and creates appropriate environments for diverse participants.

The department offers a minor in athletic coaching. The minor may be earned by completing the following: Kin 220, 258, 315, 355, 358, 365, Biol 155, and Psych 230.

The department offers a minor in sport and culture. The minor may be earned by completing the following: Kin 360 and 365; and completing 9 credits from the following: Kin 242, 316, 331, 442, and 445.

Endorsement to Coach Interscholastic Athletics. The State Department of Education has provided for the endorsement of licensed teachers for the coaching of athletic teams in schools. The endorsement does not lead to licensure to teach physical education. For requirements of the program, leading to the coaching endorsement, see Teacher Education, Requirements for Areas of Specialization.

Basic Activity Instruction Program. The department offers a wide selection of beginning, intermediate, and advanced courses in the areas of aquatics, dance, and sports. These courses are designed to serve general education purposes for all students.

B.S./M.S. degree in Diet and Exercise. A combined Bachelor of Science and Master of Science (B.S./M.S.) degree in diet and exercise is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), within the Colleges of Agriculture and Human Sciences, and the Department of Kinesiology, within the College of Human Sciences. Students interested in this program must enroll as freshmen in the pre-diet and exercise program. In the fall of the junior year students will apply for admission to the B.S./M.S. program. Students not accepted into the program will continue toward completion of a B.S. degree in dietetics or kinesiology. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in diet and exercise.

Graduate Study

The Department of Kinesiology graduate seeks to integrate discovery and learning by preparing graduate students to understand and create basic and applied knowledge in the study of physical activity, exercise and sport. The graduate degrees the department offers specializes in behavioral basis of physical activity and biological basis of physical activity. The normal prerequisite to major graduate work is the satisfactory completion of a curriculum essentially equivalent to that required of undergraduate students in kinesiology at this university. However, it is possible for students to qualify for graduate study if undergraduate preparation has been in a related area.

Students in the M.S. and Ph.D. degrees are required to complete original research and write a thesis or dissertation. There is a nonthesis degree option for M.S. students requiring more coursework and an internship experience or other creative component. Specific information about the requirements for these degree options is available from the department office or from the department web site (www.kin.hs.iastate.edu/graduate).

The department participates in the interdepartmental minor in gerontology (see Index).

Kin 102. Swimming II. (0-3) Cr. 1. F.S. Prereq: 101 or equivalent skill. Intermediate course. Emphasis on learning and improving five basic strokes and personal water safety skills. Satisfactory-fail only.

Kin 108. Aquatic Fitness. (0-3) Cr. 1. F.S. Prereq: 102 or equivalent skill. Water related exercises, activities, and swimming workouts to improve physical fitness. Satisfactory-fail only.

Kin 114. Lifeguard Training. (0-3) Cr. 1. F.S. Prereq: Ability to swim 500 yards continuously of front crawl, sidestroke, and breaststroke, perform a standing and surface dive; swim under water; and tread water for one minute. Minimum age 16. Specific training for Red Cross Lifeguard certification. First aid and CPR included. Satisfactory-fail only.

Kin 116. Water Safety Instructor Practicum. (0-3) Cr. 1. Prereq: H S 105, CPR certification, and permission of instructor. Supervised teaching experience in swimming, aquatic fitness, lifeguard training, and WSI courses. Satisfactory-fail only.

Kin 230. Fundamentals of Aquatics. (0-3) Cr. 1. Prereq: Minimum age 17, able to swim 500 yards; current lifeguard, first aid, and CPR certifications. The students will learn skills (rescue skills and CPR for the Professional Rescuer) to certify prospective Lifeguards in the American Red Cross. Lifeguard Training Program. Satisfactory-fail only.

Kin 235. Fundamentals of Racquet Sports. (0-3) Cr. 1. S. Prereq: Eligibility for admission to Kin teacher education program. Fundamentals of racquet sports, for example tennis, badminton, racquetball. Skill enhancement, analysis, understanding practice and the development of progressions.

Kin 236. Fundamentals of Individual Sports. (0-3) Cr. 1. F. Prereq: Eligibility for admission to Kin teacher education program. Fundamentals of individual sports, for example track and field, golf, archery and bowling. Skill enhancement, analysis, understanding practice and the development of progressions.

Kin 238. Fundamentals of Outdoor and Adventure Activities. (0-3) Cr. 1. F. Prereq: Eligibility for admission to Kin teacher education program. Techniques of individual and group facilitation for initiatives involving outdoor adventure activity. Topics include ropes/challenge course events, activity presentation, and sequencing, safety techniques, preparation principles and new games Philosophy. Participation is required in one weekend of fieldwork.

Kin 240. Introduction to Taping, Equipment, and Bracing Techniques. (0-3) Cr. 1. F. Prereq: Permission of Kin teacher education program director. Basic information and laboratory instruction regarding basic taping techniques, athletic equipment fitting procedures, and the use and proper fitting of prophylactic braces. Open to students in the athletic training option. Satisfactory-fail only.

Kin 242. Introduction to the Management of Community and Recreational Sport. (3-0) Cr. 3-0 F. S.

Kin 243. Exercise Physiology. (0-3) Cr. 1. S.

Kin 244. Swimming II. (0-3) Cr. 1. F. S.

Kin 245. Aquatic Fitness I. (3-0) Cr. 1. F.

Kin 246. Aquatic Fitness II. (0-3) Cr. 1. S.

Kin 247. Aquatic Fitness III. (0-3) Cr. 1. S.

Kin 249. Aquatic Fitness IV. (0-3) Cr. 1. S.

Kin 250. Aquatic Fitness V. (0-3) Cr. 1. S.

Kin 251. Aquatic Fitness VI. (0-3) Cr. 1. S.

Kin 252. Aquatic Fitness VII. (0-3) Cr. 1. S.

Kin 253. Aquatic Fitness VIII. (0-3) Cr. 1. S.

Kin 254. Aquatic Fitness IX. (0-3) Cr. 1. S.

Kin 255. Aquatic Fitness X. (0-3) Cr. 1. S.

Kin 256. Aquatic Fitness XI. (0-3) Cr. 1. S.

Kin 257. Aquatic Fitness XII. (0-3) Cr. 1. S.

Kin 258. Aquatic Fitness XIII. (0-3) Cr. 1. S.

Kin 259. Aquatic Fitness XIV. (0-3) Cr. 1. S.

Kin 260. Aquatic Fitness XV. (0-3) Cr. 1. S.

Kin 261. Aquatic Fitness XVI. (0-3) Cr. 1. S.

Kin 262. Aquatic Fitness XVII. (0-3) Cr. 1. S.

Kin 263. Aquatic Fitness XVIII. (0-3) Cr. 1. S.

Kin 264. Aquatic Fitness XIX. (0-3) Cr. 1. S.

Kin 265. Aquatic Fitness XX. (0-3) Cr. 1. S.

Kin 266. Aquatic Fitness XXI. (0-3) Cr. 1. S.

Kin 267. Aquatic Fitness XXII. (0-3) Cr. 1. S.

Kin 268. Aquatic Fitness XXIII. (0-3) Cr. 1. S.

Kin 269. Aquatic Fitness XXIV. (0-3) Cr. 1. S.

Kin 270. Aquatic Fitness XXV. (0-3) Cr. 1. S.

Kin 271. Aquatic Fitness XXVI. (0-3) Cr. 1. S.

Kin 272. Aquatic Fitness XXVII. (0-3) Cr. 1. S.

Kin 273. Aquatic Fitness XXVIII. (0-3) Cr. 1. S.

Kin 274. Aquatic Fitness XXIX. (0-3) Cr. 1. S.

Kin 275. Aquatic Fitness XXX. (0-3) Cr. 1. S.
Kin 258. Physical Fitness and Conditioning. (1-3) Cr. 2. F.S. Prereq: Kinesiology and health majors only. Development of personal fitness using a variety of conditioning and exercise techniques such as aerobics, weight training, and aquatic fitness. Introduction to acute and chronic responses to exercise, and the role of exercise in health promotion and weight management. Credit for only one of the following courses may be applied toward graduation: Kin 163, 258.

Kin 259. Leadership Techniques for Fitness Programs. (1-3) Cr. 2. F.S. Prereq: 258. Development of exercise leadership skills in a variety of activities. Includes planning, promotion, and teaching techniques for developing fitness in others using a variety of exercise modalities including aerobics, weight training, and aquatic fitness.

Kin 266. Advanced Strength Training and Conditioning. (1-2) Cr. 2. F.S. Prereq: 258, 259. This course is designed to enhance the student’s current level of knowledge and expertise to an advanced level in the area of strength training and conditioning. The course will prepare students interested in taking the National Strength and Conditioning Association Certified and Conditioning Specialist’s exam. The course will focus on the assessment and implementation of training programs with strong emphasis on the areas of resistance training, metabolic training, flexibility, reaction time, speed, and power.

Kin 280. Directed Field Experience in Elementary Physical Education. (0-3) Cr. arr. S. Observing, planning, and facilitating movement experiences of children in an elementary school setting. Satisfactory-fail only.

Kin 281. Directed Field Experience in Physical Education. (0-3) Cr. arr. S. Prereq: Admission to University Teacher Education Program. Observing, planning, and facilitating movement experiences of students in a public school setting. Satisfactory-fail only.

Kin 284. Elementary and Pre-school Movement Education. (2-3) Cr. 3. F.S.S.S. Prereq: 3 credits in human development and family studies. Approaches to teaching movement skills to pre-school and elementary school age children. Emphasis on planning and conducting developmentally appropriate movement experiences for preschool and elementary aged children based upon motor development research. Practical experience provided. Credit in only one of the following courses may be applied toward graduation: Kin 284, 312.

Kin 285. Pre-Internship in Kinesiology. Cr. arr. F.S.S.S. Prereq: Kinesiology and Health majors only. Internship coordinator. Pre-Internship experience with a community sport and recreation or health fitness organization. Satisfactory-fail only.

Kin 312. Movement Education in Elementary School Physical Education. (2-3) Cr. 3. S. Prereq: Concurrent enrollment in 280. Planning for management and instruction of developmentally appropriate physical education for children pre-school through elementary grade 6. Laboratory experience required. Credit for only one of the following courses can be applied toward graduation: Kin 284, 312.

Kin 315. Coaching Theory and Administrative Issues. (3-0) Cr. 3. S. Study in the theory, ethics, strategy, and mechanics of coaching various interscholastic and intercollegiate sports. Emphasis on formulating a Philosophy, identifying goals and psychological aspects, teaching skills, and developing strategies.

Kin 323. Therapeutic Modalities for Athletic Injuries. (2-2) Cr. 3. F. Prereq: Permission of athletic training program director. Theory and technique of therapeutic modalities used in the management of injuries.

Kin 324. Therapeutic Modalities Clinical Practicum. (0-3) Cr. 1. F. Prereq: Permission of athletic training program director. Therapeutic clinical experience to accompany 323. Open to students in athletic training option. Satisfactory-fail only.

Kin 326. Rehabilitation of Athletic Injuries. (2-2) Cr. 3. S. Prereq: Permission of athletic training program director. Theory and practical application of rehabilitation principles used in the management of athletic injuries.

Kin 327. Rehabilitation of Athletic Injuries Clinical Practicum. (0-3) Cr. 1. S. Prereq: Permission of athletic training program director. Athletic training clinical experience to accompany 326. Open to students in the athletic training option. Satisfactory-fail only.

Kin 331. Youth Sports. (Dual-listed with 531). (3-0) Cr. 3. S. The research findings from non-school related sport programs for children and adolescents and how these impact programs, particularly those involving biophysical, social, psycho-motor and cognitive factors.

Kin 345. Management of Health-Fitness Programs and Facilities. (3-0) Cr. 3. S. Application of management concepts to the fitness industry, e.g., understanding customers, marketing, program management, financial management, legal issues, and evaluation and planning.

Kin 355. Biomechanics. (2-2) Cr. 3. S. Prereq: Phys 106 or 111. Mechanical basis of human performance; application of mechanical principles to exercise, sport and other physical activities. Nonmajor grade credit.

Kin 360. Sociology of Sport and Exercise. (3-0) Cr. 3. S. Prereq: Soc 134 and one of Stat 101, 104 or 226/226, or Kin 471. Sport and exercise as social systems and as institutions related to other institutions such as the police, the economy, mass media, and education.

Kin 365. Sport Psychology. (3-0) Cr. 3. S. Prereq: Psych 101 or Psych 230. Psychological factors that influence performance in sport settings. The influence of personality, anxiety, motivation, social factors, and psychological skills training.

Kin 372. Motor Control and Learning Across the Lifespan. (2-2) Cr. 1. Lab 1. S. Psych 230, Biol 256, 256L. Introduction to major concepts of neuromotor control, behavioral motor control and motor learning in the child, adult and older adult, with emphasis on the adult system.

Kin 375. Teaching Physical Education. (2-3) Cr. 3. S. Prereq: admission to University Teacher Education Program. Current theory, practice and research on teaching focusing on management, instructional, and learning styles of students in secondary schools.

Kin 385. Search Strategies for Field Experiences and Employment. (Cross-listed with H. S. Pr. Cr. R. F.S. Prereq: Junior classification; to be taken within two semesters prior to Kin 485. Search techniques and preparation of materials utilized for acquisition of jobs and/or internships in kinesiology and health fields. Internship process and policies/procedures will be covered.

Kin 395. Adapted Physical Education. (Dual-listed with 589). (2-3) Cr. 3. F. Prereq: 376. Specific disabling conditions in terms of etiology, characteristics, needs, and potential for movement experiences. Techniques of assessment, prescription, adaptation of activities, methods, and program planning. Laboratory experience required. Kin 386 may not be taken by students who have previously earned credit in Kin 395.

Kin 418. Supervised Teaching in Physical Education in the Elementary School. Cr. 8. F.S. Prereq: 280, 312, 355, 358, 375, 395, 471, 475. Students must be fully admitted to Teacher Education and must apply for approval to enroll at the beginning of the semester prior to registering. Supervised teaching in the elementary schools.

Kin 442. Sport, Recreation, and Tourism. (3-0) Cr. 3. F. Prereq: 242, 280, Soc 134. The role of sport in developing fitness, recreational opportunities, and tourism, with special emphasis on issues related to youth sport, volunteerism, and the marketing of sport events and facilities.

Kin 445. Legal Aspects of Sport. (3-0) Cr. 3. S. Students will understand legal concepts and terminology relevant to sport/activity, identify strategies for limiting liability in sport/fitness programs, and identify solutions for elimination of discriminatory practices in sport and physical activity.

Kin 450. Medical Concerns for the Athlete-Trainer. (3-0) Cr. 3. F. Prereq: Permission of athletic training program director. Current medical issues and concerns, including pathology of illness and injury, dermatological conditions, exposure to allied health care professionals, and pharmaceutical indications in relation to the profession of athletic training and in patient/athlete care.

Kin 458. Principles of Fitness Assessment and Exercise Prescription. (3-2) Cr. 4. S. Prereq: 358. Psychological principles and organization for design and administration of fitness programs; testing, evaluation, and prescription; cardiac risk factor modification.

Kin 462. Medical Aspects of Exercise. (3-0) Cr. 3. F.S. Prereq: 358. The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise prescription for individuals with these conditions. Environmental and nutritional aspects of exercise.

Kin 471. Measurement in Physical Education. (Dual-listed with 571). (3-0) Cr. S. Study of grading, assessment and evaluation in physical education with a focus on measuring cognitive and psycho-motor achievement.

Kin 472. Neural Basis of Human Movement. (Dual-listed with 572). (0-3) Cr. 3. S. Prereq: 372 or Psych 310. Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Concepts are organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, animal and single cell studies provide the primary basis for the content. Nonmajor grade credit.

Kin 475. Physical Education Curriculum Design and Program Organization. (Dual-listed with 575). (3-0) Cr. 3. F. Prereq: Admission to University Teacher Education Program. Current theory, practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings.
Kin 480. Functional Anatomy, (3-0) Cr. 3. S. Prereq: 355; Biol 155 or 255 and 256. The structure and function of human muscular, skeletal and nervous systems. The relationship of these systems to efficient and safe human motion. Non-major graduate credit.

A. Health/Fitness Management. Prereq: C or better in 458 and 459, Kinesiology and Health majors only. Cumulative GPA 2.0.

B. Sport and Physical Activity. Prereq: Kinesiology and Health majors only. Cumulative GPA 2.0.

Kin 489. Review of Athletic Training Competencies and Clinical Proficiencies. Cr. R. F.S. Prereq: Senior classification, permission of athletic training program director. Preparation for professional endorsement and certification by review of required competencies and clinical proficiencies. Required for endorsement or approval to sit for Board of Certification Exam. Satisfactory-fail only.

Kin 490. Independent Study. Cr. arr. Repeatable. Prereq: 6 credits from Kin advanced core and permission of coordinator. Independent study of problems of areas of interest in exercise and sport science and related areas.

A. Exercise and Sport Science
B. Coaching
H. Honors

Kin 501. Research Methods in Physical Activity. (3-0) Cr. 3. Repeatable. Prereq: Graduate classification in kinesiology and health. Methods and techniques used in the design and interpretation of research involving physical activity. Emphasis on styles of writing, library use, and computer applications.

Kin 505. Research Laboratory Techniques in Exercise Physiology, (3-4) Cr. 2. Prereq: Kin 388 or equivalent course with basic laboratory experience. Application and use of laboratory research equipment in exercise physiology, including operation, calibration, and use in selected situations.

Kin 510. Advanced Medical Aspects of Exercise. (2-0) Cr. 2. Prereq: Kin 388. The role of exercise in preventive medicine. Impact of exercise on various diseases, and the effect of various medical conditions on the ability to participate in vigorous exercise and competitive sports. Principles of exercise testing and prescription for individuals with these conditions.

Kin 512. Methods in Physical Education, (3-0) Cr. 3. S. Study of learning and teaching in physical education for elementary and secondary schools.

Kin 516. Quantitative Analysis of Human Movement. (3-0) Cr. 3. 3. F. Prereq: 355 or permission from instructor. Systematic problem-solving approaches and design of computer programs for biomechanical analyses. Estimation of anthropometric parameters and mechanical properties of muscles, tendons, and joints. Integration of anthropometrics, kinematics, and muscle mechanics into simulations of human movement.

Kin 518. Student Teaching in Elementary Physical Education, (0-8) Cr. 8. F.S. Prereq: 512, 570, 578. Student teaching for 8 weeks in an elementary school.

Kin 519. Student Teaching in Secondary Physical Education, (0-8) Cr. 8. F.S. Prereq: 512, 570, 578. Student teaching for 8 weeks in a middle or high school.

Kin 520. The Social Analysis of Sport. (3-0) Cr. 3. Prereq: 360; open to majors only or by permission of instructor. Sociological analysis of sport with emphasis on Sociological theory, sports structure, and function in modern industrialized Society; the systems of sport in regard to their role structure, formal organization, and professionalization and its differentiation among social class, age, and sex.

Kin 521. Advanced Topics in Exercise and Sport Psychology. (3-0) Cr. 3. Prereq: 365 or 368, 3 courses in psychology; open to majors only or by permission of instructor. Aspects of psychology which form a basis for understanding and explaining behavior in the context of exercise and sport. Emphasis on evaluating published research, particularly theory and research methodology; student presentations.

Kin 531. Youth Sports, (Dual-listed with 331), (3-0) Cr. 3. S. The research findings from non-school related sport programs for children and adolescents and how these impact programs, parents and children including bio-physical, social, psycho-motor and cognitive factors.

Kin 549. Advanced Vertebrate Physiology I, (Cross-listed with An S. B. M. S) (3-0) Cr. 3. F. Prereq: Bio 335; credit or enrollment in BBMB 404 or 420. Neurophysiology, sensory systems, muscle, neuroendocrinology, endocrinology.

Kin 552. Advanced Vertebrate Physiology II. (Cross-listed with An S. B. M. S., NutrSi) (3-0) Cr. 3. Prereq: Biol 335; credit or enrollment in BBMB 404 or 420. Cardiovascular, renal, respiratory, and digestive physiology.

Kin 558. Physical Fitness – Principles, Programs, and Evaluation. (2-3) Cr. 3. Prereq: Kin 388. Physical principles of physical fitness, design and administration of fitness programs; testing, evaluation, and prescription; electrocardiogram interpretation.

Kin 560. Principles of Motor Control and Learning. (2-0) Cr. 3. Prereq: Kin 372. Theoretical perspectives of motor control and learning will be examined as well as factors that facilitate motor learning. Motor control and learning will also be addressed by studying functional tasks such as reach and grasp, posture and locomotor, handwriting, catching and other speech.

Kin 570. Physical Activity Assessment for Health Related Research, (2-2) Cr. 3. This course will cover the broad scope of research in physical activity and public health. Emphasis will be placed on the application of physical activity assessment techniques since accurate measures are needed to more accurately assess the health benefits from physical activity and to evaluate the effectiveness of behavioral interventions designed to promote physical activity.

Kin 571. Measurement in Physical Education. (Dual-listed with 4711), (3-0) Cr. 3. Study of grading, assessment and evaluation in physical education with a focus on measuring cognitive and psycho-motor achievements.

Kin 572. Neural Basis of Human Movement. (Dual-listed with 472), (3-0) Cr. 3. Prereq: Kin 372 or Psych 310. Addresses the role of the central nervous system in the control of voluntary human movement, with the focus on the cerebral cortex, basal ganglia and cerebellum. Content organized around specific nervous system damage (such as stroke, apraxia, spasticity, or spinal cord damage) and functional movements (such as reaching and grasping, balance and gait). Converging evidence from human movement disorders, brain imaging, animal lesion and single cell studies provide the primary basis for the content.

Kin 575. Physical Education Curriculum Design and Program Organization, (Dual-listed with 475), (3-0) Cr. F. Current theory, practices and principles applied to curriculum development for programs in physical education, K-12. Organizing for teaching in a variety of school settings.

Kin 590. Special Topics. Cr. arr. Repeatable. A. Physical Education
B. Health and Exercise Promotion
D. Exercise Physiology
E. Sport Sociology
F. Sport/Exercise Psychology
G. Motor Behavior
H. Biomechanics
I. Human Growth and Puberty

Kin 591. Supervised Field Experience, Cr. arr. Prereq: 10 graduate credits in health and human performance and/or related areas. Supervised on-the-job field experience in special areas.

A. Physical Education
B. Health and Exercise Promotion
D. Exercise Physiology

Kin 595. Adapted Physical Education, (Dual-listed with 395), (2-3) Cr. F. Prereq. 375. Specific disabling conditions in terms of etiology, characteristics, needs, and potential for movement experiences. Techniques of assessment, prescription, adaptation of activities, methods, and program planning. Laboratory experience required. Kin 595 may not be taken by students who have previously earned credit in Kin 395.

Kin 599. Creative Component, Cr. arr. Repeatable.

Kin 620. Advance Research Methods in Physical Activity, (3-0) Cr. 3. S. Prereq: 501, Stat 401 and 402. Doctoral students only. Cumulating seminar designed to synthesize Statistical and design courses with practical research issues using data from physical activity.

Athletics (Ath)

Courses primarily for undergraduate students

Ath 101. Intercollegiate Athletics, Cr. 1. Repeatable. F.S. Prereq: Permission of head coach. Limited to 1 credit per year to a maximum of 4. Credit for a sport section of Ath 101 may not be applied toward graduation requirements. Non-athletes only. No credit for Kin 168 or any skill technique course in the same sport. Satisfactory-fail only.

B. Basketball (men)
C. Basketball (women)
D. Cross Country (men)
E. Cross Country (women)
F. Football (men)
G. Golf (men)
J. Gymnastics (women)
K. Softball (women)
M. Swimming/Diving (women)
O. Tennis (women)
P. Track and Field (men)
Q. Track and Field (women)
R. Volleyball (women)
S. Wrestling (men)
T. Golf (women)
U. Soccer (women)

Dance (Dance)

Dance 202. Modern Dance I, (3-0) Cr. F.S. Introduction and practice of basic dance concepts, including preparatory techniques and guided creativity problems. No previous modern dance experience required. Satisfactory-fail only.

Dance 210. Modern Dance I, (3-0) Cr. F.S. Introduc-
Dance 130. Ballet I. (0-3) Cr. 1. F.S. Introduction to the basic skills, vocabulary, and tradition of ballet with concentration on control and proper alignment. No previous ballet experience required. Satisfactory-fail only.

Dance 140. Jazz I. (0-3) Cr. 1. F.S. Introduction to the modern jazz style with concentration on isolation and syncopation. No previous jazz experience required. Satisfactory-fail only.

Dance 150. Tap Dance I. (0-3) Cr. 1. F. Instruction and practice in basic tap technique and terminology. No previous tap experience required. Satisfactory-fail only.

Dance 199. Dance Continuum. Cr. arr. Repeatable. F.S. Prereq: Permission of instructor. Advance registration required. Continued instruction and practice in either modern dance, recreational dance, ballet, jazz and/or compositional skills. Satisfactory-fail only.

Dance 211. Fundamentals and Methods of social and World Dance. (1-3) Cr. 2. S. Skill enhancement, teaching, progressions with emphasis on world and social dance. Designed for kinesiology and health majors, open to others.

Dance 220. Modern Dance Composition. (1-3) Cr. 2. F. Prereq: 120 or previous modern dance experience. Theory and practice of the creative skills involved in solo and small group composition.

Dance 222. Modern Dance II. (0-3) Cr. 1. F. Prereq: 120 or previous modern dance experience. Dance techniques emphasizing strength, balance, endurance, rhythmic activity and extended combinations.

Dance 223. Modern Dance III. (0-3) Cr. 1. S. Prereq: 222. Continued experience in dance techniques and extended combinations. Emphasis on maturation of skill and artistry. Exposure to a variety of modern dance technical styles.

Dance 224. Concert and Theatre Dance. (Cross-listed with Theatre). (0-3) Cr. arr. Repeatable. F.S. Prereq: By audition only. Choreography, rehearsal, and performance in campus dance concerts and/or musical theatre productions. Satisfactory-fail only.

Dance 232. Ballet II. (0-3) Cr. 1. S. Prereq: Previous ballet experience in classical skills in the classical movement vocabulary. Emphasis on alignment, technique, sequence development, and performing quality.

Dance 242. Jazz II. (0-3) Cr. 1. S. Prereq: Previous jazz dance experience. Dance concepts within the jazz idiom. Instruction in extended movement sequences and artistic interpretation.

Dance 270. Dance Appreciation. (3-0) Cr. 3. F.S.SS. Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required.

Dance 320. Sound and Movement. (2-2) Cr. 3. S. Prereq: 220. Intermediate composition based on the relationship of movement to improvised sounds, rhythmic scores, and the musical works of composers from various periods.

Dance 384. Teaching Children’s Dance. (1-3) Cr. 2. S. Content, experiences, and methods of a comprehensive dance program at the elementary school level. Theories and practice in guiding elementary school children on creating, organizing, and evaluating a modern program of dance experiences.

Dance 385. Methods of Teaching Dance. (1-3) Cr. 2. F. Methods and techniques of teaching social and world dance forms. Introduction to teaching educational modern dance.

Dance 386. Teaching Dance Technique and Composition. (1-3) Cr. 2. Prereq: 320. Teaching of dance as an expressive art form with emphasis on technique, rhythm, and the creative teaching process.

Dance 490. Independent Study. Cr. arr. Repeatable. Prereq: 6 credits in dance and permission of coordinator. Independent study of problems or areas of interest in dance.

Health Studies (H S)

H S 105. First Aid and Emergency Care. (1-2) Cr. 2. F.S. Discussion and application of the basic techniques of administering first aid and cardiopulmonary resuscitation. ARC certification available.

H S 110. Personal and Consumer Health. (3-0) Cr. 3. F.S. Physical, mental, and social aspects of health as a basis for understanding health problems. False and misleading advertising and effects of cultists and faddists on consumer health. Study of legislation and agencies concerned with consumer protection and health insurance.

H S 215. Drug Education. (3-0) Cr. 3. Prereq: Psych 101 or 230. Use and abuse of mood modifying substances in contemporary society. Includes study of tobacco, alcohol, and other drugs.
