H S 385. Search Strategies for Field Experience and Employment. (Cross-listed with KIN). Cr. R. F.S. Prereq: Junior classification, to be taken minimum of two semesters prior to KIN 485. Search techniques and preparation of materials utilized for acquisition of jobs and/or internships in kinesiology and health fields. Internship process and policies/procedures will be covered. Satisfactory-fail only.

H S 390. Administration of the School Health Program. (3-0) Cr. 3. F. Prereq: 310. History and legal basis of school health programs. Procedures for developing, organizing, teaching, and evaluating a modern program of health services, healthful school living, and health instruction. Includes administration, community and school relationships.

H S 430. Community Health Program Development. (3-0) Cr. 3. Prereq: 380. Techniques of needs assessment, program design, administration, and evaluation of community health education programs in various settings.

H S 485. Directed Field Experience in Health Education. Cr. arr. Prereq: All required health studies courses and permission of coordinator. Advance registration required. Supervised experience in health education. Satisfactory-fail only.

Landscape Architecture

www.design.iastate.edu/LA/

Douglas Johnston, Chair of Department

Distinguished Professor (Emeritus): Dyas

Professors: Anderson, Engler, Hightshoe, Johnston, Keller

Professors (Emeritus): Boon, Harvey, Lane

Associate Professors: Badenhoep, Grundmann, Hohmann, Martin, Wagner

Assistant Professors: Rogers, Seeger

Assistant Professors (Adjunct): Kane, M. Miller, Pritchard

Lecturers: Belkacemi, Groe

Undergraduate Study

Landscape architecture is an environmental design discipline. Landscape architects actively shape the human environment: they map, interpret, imagine, draw, build, conceptualize, synthesize, and project ideas that transcend landscapes.

The design process involves creative expression that derives from an understanding of the context of site (or landscape) ecosystems, cultural frameworks, functional systems, and social dynamics. Students in our program learn to change the world around them by re-imaging and re-shaping the landscape to enhance its aesthetic and functional dimensions, ecological health, cultural significance, and social relevance. The profession addresses a broad range of landscapes in urban, suburban, rural, and wilderness settings. The scale of landscape architecture projects varies from broad, regional landscape analysis and planning to detailed, individual site-scale designs. The curriculum at Iowa State prepares students for this challenge as they develop their abilities to design and communicate ideas through a sequence of foundational courses and studios.

Graduates draw upon scientific and historical/cultural knowledge in applying their creative and technical skills in the planned arrangement of natural and constructed elements on the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments serve useful, aesthetic,
Graduates have a broad understanding of landscape architecture and related disciplines. They are able to communicate effectively with colleagues in the sciences and/or humanities as well as in the allied professions. Graduates are prepared to work individually and in multidisciplinary teams to address complex problems dealing with the cultural/ecological environment. They are skilled at undertaking research and/or creative activities and communicating the results of these efforts in a concise and persuasive manner. The department participates in the Graduate Certificate Program in Geographic Information Systems (GIS), administered by the Department of Community and Regional Planning.

Courses primarily for undergraduate students

L A 201. Studio: Landscape Interpretation and Representation. (1-15) Cr. 6. F. Prereq: Enrollment in the professional program. Reading and representing varied landscapes; development of aesthetic sensitivity to the geomorphology, vegetation and cultural influences on these landscapes. Small scale interventions and exploration of landscape phenomena and change. Emphasis on a variety of documentation and drawing techniques.

L A 202. Studio: Site Design I. (1-15) Cr. 6. S. Prereq: 201. Fundamental issues of landscape planning and design at a site scale. Projects introduce a variety of (objective and subjective) site inquiry methods, space and place sensitive and creative integrations of architecture and landscape for specific land uses. User needs, precedent study, programming, site engineering, planting design, and outdoor space design expressed through a variety of three-dimensional modeling, graphic, and written media.

L A 222. Introduced Plants of the Midwest. (2-3) Cr. 3. S. Prereq: 221. Identification, observation and study of plants introduced to cultivation in the Midwest region. Plant cultural requirements, including adaptations to climate changes, solar exposure and soil conditions. Investigation of history of plant introduction and use in designed landscape, including consequent impacts of such plant invasion. Introduction to planting design at the site scale, including matching plant cultural requirements to site conditions, functional uses of plants and expressive composition using plant form, texture and color.

L A 241. Developing Identity as a Landscape Architect. (1-00) Cr. 1. F. Prereq: Enrollment in the professional program. Designed to accompany L A 201, 222, 272, 281. Development of life skills for conflict resolution, effective interpersonal communication, and CPR/First Aid. Examination of personal values as they relate to the backgrounds, attitudes, and values of others; exploration of how these influence personal decision-making and group interaction. Reading, discussion, class activities, journal-keeping, writing.

L A 272. Cultural Landscape Studies. (3-0) Cr. 3. F. Prereq: Enrollment in the professional program. Exploration of cultural landscapes, from broad settlement patterns to individual sites, with an emphasis on the origins and evolution of landscapes. Investigation of relationships between vernacular and designed landscapes. Landscapes considered as modes of cultural production that shape and are shaped by social, political, and economic processes. Exploration of landscapes as persistent (yet ephemeral) repositories of culture. Lectures, reading, field studies, and writing.

L A 274. The Social and Behavioral Landscape. (Cross-listed with Dan SJ. 038-0) Cr. 3. S. Exploration of social and behavioral factors pertinent to design of the domestic, civic, and commercial landscape. Focus on working familiarity with design principles as they relate to the behavior angle across a broad demographic and cultural spectrum; application of these principles to design of outdoor environments. Lectures and discussions, including group exercises and field trips.

L A 281. Investigating Landscape Form, Process, and Design. (1-6) Cr. 3. F. Prereq: Enrollment in the professional program. Exploration of the poetics and principles of landscape construction. Investigation and interpretation of landform and geomorphic processes such as the hydrologic cycle, erosion, and sedimentation. Close observation and representation of detail design, with an emphasis on material types, their connections and weathering. Readings, field studies, and drawings.

L A 301. Site Design II. (1-15) Cr. 6. F. Prereq: 202. Development of half-acre to hundred-acre landscape design and planning proposals. Apply critical methodological frameworks to shape site systems while providing appropriate support for diverse user groups and creating culturally meaningful places. Assess and interpret a program of use, organize subjective and objective site inventory and analysis, develop functional and poetic design strategies for infrastructure and natural systems, and craft artistic and functionally explicit landscape architectural proposals. Development of appropriate technique and high level of craft in representations of and formal design thinking process and final scheme presentation.

L A 302. Ecological Design at the Regional Scale. (1-15) Cr. 6. S. Prereq: 301, 381, 485 and Agronomy 156. Application of ecological theories and processes in design and planning at the hundred plus-acre scale specifically focusing on urban fringe landscapes. Apply advanced landscape analysis of soil, water, and vegetation utilizing geographic information systems. Particular focus on stream and wetland restoration, mitigation, and regulations and developing design representations for public use.

L A 303. Field Travel. Cr. 1. Repeatable: P.S.SS. Prereq: Enrollment in the professional program and permission of instructor: Observation of professional practice and landscapes in urban, rural, and wilderness areas. Satisfactory-fail only.

L A 322. Fundamentals of Planting Design. (2-6) Cr. 4. Alt. F. offered 2008. Prereq: 221. The art and techniques of selecting and placing plant material in the landscape that respond to cultural and biophysical contexts. Investigation of soil properties and plant/soil relationships relevant to the built environment. Methods of site inventory and analysis, developing plant palettes and composing plant assemblages that address expressive and functional needs. Introduction to the techniques of preparing planting plans, including standards for plant selection, plant lists and plant specification.

L A 335. Contemporary Landscape Architecture. (1-0) Cr. 1. Prereq: 235-232. Exploration of contemporary landscape architecture practice through individualized research into practicing firms. Preparation of paper and presentation outlining broad framework and specific parameters of a selected area of contemporary practice using specific case studies. Work may result in invitation of current practitioner(s) as a lecture series or event. Resume and portfolio preparation in advance of required off-campus semester (L A 451 A, B or C).
LA 371. Landscape Architectural History: 1750 to Present. (Cross-listed with Dsn S). (3-0) Cr. 3. S. Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

LA 373. Landscape Architectural History: Prehistory to 1750. (Cross-listed with Dsn S). (3-0) Cr. 3. F. Investigation of international landscape design concepts and trends as observed over time, from pre-history to the mid 18th century. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

LA 381. Shaping the Land. (3-0) Cr. 3. F. Prereq: 281, Math 141. Manipulation of the land form and its change through the use of contour maps and models. Transformation of the landform and its implications on the surrounding environment. Surface drainage and storm water runoff calculations, contour manipulation to insert swales, channels, ditches, walls, walks, steps, terraces, buildings, road layout and alignment, and other constructed elements. Class exercises, case study precedents, and preliminary construction documents.

LA 401. Community Design. (1-15) Cr. 6. F. Prereq: 402. Design of urban and/or rural places utilizing participatory methods and techniques. Projects address midwestern community issues including reuse of abandoned sites, in-fill, recreation, and peri-urban agriculture. Emphasis on development of user-centered relationship skills and design research.

LA 402. Urban Design. (1-15) Cr. 6. F. Prereq: 302. Comprehensive planning and design for urban Sites or for sites within urban contexts. Projects typically include planning for a variety of integrated land uses, and cover the full range of design scales from master planning to proposals for site details. Emphasis on written and verbal forms of graphic communications. Integrated seminar component.

LA 405. Senior Thesis. (0-15) Cr. 6. S. Prereq: 401, 402, 403, and enrollment in Honors program; permission of advisor, chair and thesis advisor. Individual advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are encouraged.

LA 421. Advanced Planting Design. (2-4) Cr. 4. Alt., offered 2011, Prereq: 221, 222 or equivalent. Introduction to the theory and practice of planting design, with emphasis on the ecological, cultural and aesthetic factors affecting planting design and vegetation management in the built environment. Three venues for collaborative learning form the basis of the course: topical research inquiry, case history investigation and completion of one comprehensive project design.

LA 441. Professional Practice. (2-0) Cr. 2. S. Prereq: 481. Studies of conventional and developing forms of public and private practice. Explore relationships between professional life and the culture of the professional design firm; investigate firm identities and structures; understand design projects, their delivery process, and contractual agreements. Lecture and class discussion.

LA 465. Landscape Change and Conservation. (Dual-listed with 565). (Cross-listed with NREM). (3-0) Cr. 3. F. Prereq: 202. Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

LA 478. Topical Studies in Landscape Architecture. (Dual-listed with 578). (Cross-listed with Dsn S). Cr. arr. Repeatable. F.S.S.S. Prereq: L A 371 or senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

LA 481. Landscape Construction. (1-4) Cr. 3. F. Prereq: 381. Development of construction details with emphasis on materials and their aesthetic and functional uses as building materials. Explore characteristics and uses of construction materials; investigate structural theory; application of wood systems, paving systems, retaining walls, masonry and concrete systems, and metals. Preliminary preparation of construction documents.

LA 482. Advanced Landscape Construction. (1-4) Cr. 3. S. Prereq: 481. Advanced site construction issues, with emphasis on water and irrigation systems, mechanical and electrical systems, site lighting, proposal preparation, project scheduling, project costing and estimating. Final construction document preparation including drawings and specifications.

Courses primarily for graduate students, open to qualified undergraduate students

LA 501. Landscape Architectural Theory. (3-0) Cr. 3. S. Prereq: Admission to graduate program or permission of instructor. Exploration of major theories of landscape architectural design and their relationships to broader cultural and theoretical practices. Examination of key texts and projects in landscape architecture, art, and related fields. Emphasis on developing critical ways of analyzing ideas. Lectures, readings, discussion, and writings.

LA 541. Principles of Research for Landscape Architects. (3-0) Cr. 3. F. Prereq: Admission to graduate program or permission of instructor. Examination of design inquiry and research methods appropriate to landscape architectural projects, including bibliographical, historical, numerical, statistical, survey, and geographical methods. Readings, discussions, and application problems. Preparation of a research proposal.

LA 562. Studio in Resource Conservation and Management. Cr. arr. Repeatable. S. Prereq: 465 or 565, admission to graduate program or permission of instructor. Developing plans and policies that feature ecological landscape description, planning, and resource conservation. Hands-on field experience with professional resource planners and managers. Contact hours (1-3) to (1-15) depending on number of credits.

LA 565. Landscape Change and Conservation. (Dual-listed with 465). (Cross-listed with NREM). (3-0) Cr. F. Prereq: 202. Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

LA 572. Landscape Architectural History and Preservation. (3-0) Cr. 3. S. Prereq: Admission to graduate program or permission of instructor. Methods applied to preservation of historic landscapes, including current federal standards and regulations. Outstanding historic landscapes and recent landscape preservation projects of varied time periods and scales used to familiarize students with methods of archaeological and documentary research. Philosophical issues of significance and interpretation, and technical concerns of treatment, management, and maintenance. Lectures, readings, discussion, and independent and group research.

LA 578. Topical Studies in Landscape Architecture. (Dual-listed with 478). (Cross-listed with Dsn S). Cr. arr. Repeatable. F.S.S.S. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

Courses primarily for graduate students, open to qualified undergraduate students

Landscape Architecture 285

LA 582. Research Colloquium. (1-0) Cr. 1. Repeatable. F. Prereq: Admission to graduate program or permission of instructor. Examination and discussion of professional practice, research in landscape architecture, and environmental planning through research and projects by faculty and graduate students in landscape architecture and related fields.

LA 590. Special Topics. Cr. arr. Repeatable. F.S.S.S.
A. Landscape Design
B. Planting Design
C. Construction
D. History
E. Landscape Planning
F. Urban Design
G. Graphics
H. Honors
I. Interdisciplinary Studies
J. International Studies
K. Computer Applications
L. Ecological Design
M. Social/Behavioral
N. Natural Resources

LA 591. Environmental Law and Planning. (Cross-listed with C R P 597 S.) (3-0) Cr. 3. S. S. Prereq: Graduate classification. Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

LA 599. Creative Component. Cr. arr. Repeatable. F.S.S.S. Prereq: Permission of major professor. Comprehensive study and original development of a project selected by the student and approved by the major professor. Completed project must be submitted to and approved by a graduate faculty committee as evidence of mastery of the principles of landscape architecture.

Course for graduate students, major or minor

Liberal Arts and Sciences Cross-Disciplinary Studies

Zora D. Zimmerman, Associate Dean for Academic Programs

Cross-disciplinary studies in the College of Liberal Arts and Sciences encompasses a variety of interdisciplin ary and cross-disciplinary areas of study as well as courses that cross established departmental lines. Students may enroll in Program courses; declare majors or minors where offered, or develop an Interdisciplinary Studies major built upon Program offerings. (See Index for Program courses).

Cross-Disciplinary Programs

African American Studies Program (Minor only) see Index, African and African American Studies.

American Indian Studies Program (Minor only) see Index, American Indian Studies.

Biological/Premedical Illustration Program (Major or minor) see Index, Biological/Preliminary Illustration.

Classical Studies (Minor only) see Index, Classical Studies.

Communication Studies (Major or minor) see Index, Communication Studies.

Criminal Justice Studies (Minor only) see Index, Criminal Justice Studies.

International Studies Program (Second major or minor) see Index, International Studies.

Latino/a Studies, U.S. Program Program Director: H. Avalos U.S. Latino/a Studies is devoted to the study of Mexican Americans, Puerto Ricans, Cuban Americans and other groups of people living in the United States who trace ancestry to the Spanish-speaking countries of Latin America, and who comprise the fastest growing ethnic groups in America. U.S. Latino/a Studies is to be distinguished from Latin American Studies, which focuses on people living in Latin America. The methodology of U.S. Latino/a Studies is cross-disciplinary, drawing from the methods established in anthropology, sociology, political science, economics, history, literary studies, and other fields.

In addition to the general requirements of a major in Interdisciplinary Studies, (see Index, Interdisciplinary Studies) a major in Interdisciplinary Studies focusing on U.S. Latino/a Studies would require the completion of 24 credits. At least 15 of the 24 credits must be in courses numbered 300 and above. These 24 credits in the major focusing on U.S. Latino/a Studies must include the following courses, each of which is worth three credits: LAS 211 (Introduction to U.S. Latino/a Studies), Anthr 323 (Peoples and Cultures of Latin America), Engl 344 (U.S. Latino/a Literature), Hist 441 (History of Mexico and Central America) or a course in U.S. Latino/a history, Relig 338 (The Latino/a Religious Experience), and Soc 332 (The Latino/a Experience in U.S. Society). The student must have an average grade of C in the required courses of the major. Fulfillment of the foreign language requirement with Spanish is strongly recommended, but not required. For a list of other eligible courses and more information on the U.S. Latino/a Studies Program, contact the program committee chair.

Linguistics Program (Major or minor; graduate minor) see Index, Linguistics.

Speech Communication Program (Major or minor) see Index, Speech Communication.

Teacher Education Program see Index, Teacher Education, Courses and Programs.

Technology and Social Change (Minor, graduate minor) see Index, Technology and Social Change.

Women’s Studies Program (Major or minor) see Index, Women’s Studies.

Interdepartmental Degree Programs

(Administered by the College of Liberal Arts and Sciences)

Bioinformatics and Computational Biology (Major only) see Index, Bioinformatics and Computational Biology.

Emerging Global Disease (Minor only) see Index, Emerging Global Disease.

Entrepreneurial Studies (Minor only) see Index, Entrepreneurial Studies.

Environmental Science (Major or minor) see Index, Environmental Science.

Environmental Studies (Secondary minor or major) see Index, Environmental Studies.

Gerontology (Minor only) see Index, Gerontology.

The Honors Program in Liberal Arts and Sciences see Index, Honors Program.

Interdisciplinary Studies Program (Major only) see Index, Interdisciplinary Studies.

Premedical and Preprofessional Health Programs see Index, Preprofessional Study.

Teacher Education Program see Index, Teacher Education, Courses and Programs.

Certificate Programs

Community Leadership and Public Service (Certificate Only)

Interdisciplinary undergraduate program Dianne Bystrom, Director

This interdisciplinary certificate program utilizes university courses offered in a variety of academic disciplines to provide a strong foundation and appropriate experiences for undergraduate students who plan to become community leaders and engage in public service—regardless of their profession—in the public, nonprofit or private sectors.

The program requires the completion of 21 credits through three, three-hour core required courses in leadership, speech communication and public administration; a three-hour elective course in communication; six hours of elective courses in leadership; and a three-hour capstone experience through a course, internship or study abroad experience.

The certificate will be awarded by the College of Liberal Arts and Sciences. Completion of the certificate will be noted on the student’s transcript and via a certificate provided by the Registrar.

Objectives:

• Provide opportunities for students to learn about leadership and organizational theories, ethics and decision-making, principles of public service, effective communication, leadership practices in groups and organizations, and diversity issues.

• Develop leadership skills—including written and oral communication, creative thinking, personal management, group and organizational effectiveness, and problem-solving—important to students’ careers, communities and personal development.

• Bring students into contact with faculty members from diverse academic departments, backgrounds and leadership experiences.

• Prepare students to undertake leadership roles in their careers and in service to their community through course work and co-curricular activities.

Learning outcomes: Upon completion of the Certificate in Community Leadership and Public Service, students will:

• Demonstrate understanding of key concepts of leadership theories and effective practices within groups and organizations and diverse communities.

• Demonstrate understanding of key concepts of organizational theories, ethics and principles of public service.

• Demonstrate proficiencies in written and oral communication.

• Demonstrate awareness of cultural values and diversity issues as they pertain to community leadership and public service.

• Become engaged citizens through service to the university and larger community.
General requirements:
The Certificate in Community Leadership and Public Service requires 21 credits. At least 9 credits must be taken in courses numbered at the 300 level or above. At least 9 credits used for the certificate cannot be used to meet any other departmental, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses for the certificate cannot be taken pass-fail. A cumulative grade point average of at least 2.0 is required in courses taken for the certificate.

The 21 credits required for the certificate are fulfilled by:

- 9 credits of core required courses—LAS 222, Leadership Strategies and a Diverse Society, 3 credits; SP Cm 312, Business and Professional Speaking, 3 credits; and Pol S 371, Introduction to Public Administration, 3 credits.
- 3-credit communication course chosen from the designated list.
- 6 credits of leadership courses chosen from the designated list.
- 3 credits of a capstone course or experience, which can be fulfilled by a 3-credit course from the list of approved capstone courses, or a 3-credit internship with a community leadership or public service focus, or a 3-credit study abroad experience. Capstone courses focus on the scholarship of leadership and community fields of study whereas an internship or study abroad provides a leadership-in-practice experience. Required courses (9 credits): LAS 222, Sp Cm 312, Pol S 371.

Additional communication course (3 credits), from: Engl 302, 309, 412; JI MC 305; Sp Cm 212, 322, 323, 327

Additional leadership topic courses (6 credits), from: AESHM 287, 379; A/E C/E E 388; AgEds 315; Con E 380; C R F 291, 293, 322, 426, 429, 435, 455, 481, 484, 491, 492; Engr 150, 327X; HD FS 395, 445; LAS/W S 333; LAS 381; M 412; M E/Hist 488; Mgmt 371, 419, 472; Pol S 310, 311, 344, 385, 413, 477, 480, 487; Soc 310, 334, 420, 435; Sp Cm 416, 417; U St 170; W S 301, 435

Capstone Course, Internship or Study Abroad (3 credits), from: AESHM 421, C R P 432, 475; Engl 418; HD FS 449; LAS/W S 488; M E/WLC 484; Pol S 475, Psych 450, Soc 464

Instead of a capstone course, students may complete a 3-credit internship. The internship must have a public service or community leadership focus and must be approved by the department of the student’s major and the Community Leadership and Public Service Advisory Committee. Information on internships is available through the participating colleges and departments, including career services offices. Examples: LAS 380, 382, 490G, 491, 499; Pol S 499; WS 491.

Instead of a capstone course or internship, students may participate in a study abroad experience that includes 3 hours of credit. The study abroad experience must include a public service or community leadership focus. It must be approved by the student’s major department and by the Community Leadership and Public Service Advisory Committee. Information is available through the ISU Study Abroad Center and international programs offices in the participating colleges and departments. Examples: International Leadership Seminar in Australia; International Leadership in Educational Technology Academy in Spain and England; International Partnership for Service Learning and Leadership; College of Design Programs in Rome: Community and Regional Planning; LAS 395, Interdisciplinary Study Abroad Series.

Additional courses may be proposed and approved for inclusion in the list of communication, leadership and capstone courses applicable to the certificate program. Students and advisers should contact the Carrie Chapman Catt Center for Women and Politics, 309 Catt Hall, 294-3181, cattcntr@iastate.edu, www.las.iastate.edu/Catt-Center/ for the current list of courses.

Application and selection process: Enrollment is limited to 20 entering students per academic year, with applications reviewed twice each year. Selection will be based on current and past leadership experiences; previous leadership education and training; academic performance; and, most importantly, how completion of the certificate program will add value to the student’s major/minor areas of study and future leadership goals.

Applicants should meet with their adviser on course planning and questions regarding prerequisites and then submit an application packet consisting of a Proposal of Admission form, Leadership Involvement Worksheet, and Proposed Program of Study form (signed by the adviser) by March 1 or October 1 to the Community Leadership and Public Service Advisory Committee, 309 Catt Hall, Iowa State University, Ames, IA 50011, 1305. The committee will be comprised of one representative each from the Catt Center, Public Policy and Administration, Speech Communication and Student Affairs and one representative from another participating department.

Latin American Studies (Certificate only) (Interdepartmental undergraduate program) Kathy S. Leonard, Director

The certificate in Latin American Studies is a cross-disciplinary course of study in the College of Liberal Arts and Sciences and is designed for undergraduates in any major who wish to enhance their degree and employment possibilities by adding expertise in Latin America and linguistic competence in a primary and secondary foreign language.

Completion of the Certificate is noted on the student’s transcript, and via a Certificate provided by the Registrar.

Objectives:
- Provide opportunities for students to develop skills and understanding about issues concerning Latin America by bringing them into contact with faculty members from many different academic backgrounds
- Provide students an immersive experience where they gain cultural awareness and sensitivity
- Prepare students for work or advanced study in Latin America, such as in foreign service, journalism, advocacy organizations, scientific or research institutions
- Help students acquire proficiency in at least two of the languages of Latin America (Spanish and Portuguese)
- Guide students in interdisciplinary study leading to an understanding of the mult-faceted picture of the past, present, and future of Latin America

Learning Outcomes:
- Upon Completion of the Certificate in Latin American Studies, students will be able to:
  - Demonstrate understanding of key concepts pertaining to Latin American cultural, historical and political contexts
  - Understand, interpret and articulate the major processes, theories and problems of selected contemporary and historical issues in Latin America
  - Demonstrate oral, aural, and written proficiency in a primary foreign language (Spanish or Portuguese) equivalent to the mid advanced level
  - Demonstrate oral, aural, and written proficiency in a secondary foreign language (Spanish or Portuguese) equivalent to the low Intermediate level
- Effectively communicate with persons of Latin American cultures
- Become effective global citizens through knowledge and comparison of the cultures and issues of the United States and Latin American countries
- Be able to read Latin American cultural, literary, and historical texts in the target language with comprehension and analytical insight
- Demonstrate awareness of cultural values, beliefs, and ideologies of the various Latin American countries
- Demonstrate a thorough knowledge of the geography of the Latin American countries

Requirements for the Certificate in Latin American Studies are satisfied through an internal language instruction and by completing a minimum of 24 credits at the 300 level or above. Students will take coursework in at least four different disciplines and departments (Spanish, Portuguese, Anthropology, and Political Science) with other possible course offerings in LAS, History, Agriculture, and Agronomy.

Course Requirements:
- Students will complete 12 credits of core courses: Pol S 343, Anthr 323
- Complete 12 credits of the following courses: Spanish 332, 333
- Complete 12 credits of the following courses: Anthr 337, Span 324, 322

Other Requirements:
- Students will complete an additional 12 credits selected from the approved list of courses in Latin American Studies at the 300 level or above. At least one of these courses must be at the 400 level and approved by the Latin American Studies Program adviser.
- In order to stress the interdisciplinary aspect of the Certificate no more than three credits from a single department will count toward the Certificate.
- No more than 3 credits may be taken as a 490, independent study, and the topic must deal with Latin America.
- A minimum of 12 credits applied toward the Certificate cannot be used to meet any other departmental, college, or university requirement.
- Students may receive credit on a pre-approved basis for internships completed in Latin America. No more than 3 credits from this area may be applied to the Certificate.
- Courses taken for the Certificate may not be taken on a pass-not-pass basis.
- Credits for a Certificate may be used to satisfy the credit requirement for graduation and to meet the credit requirements for courses numbered 300 and above.
- A certificate is not awarded if the baccalaureate degree is not completed.
- For students earning an ISU baccalaureate degree, a certificate is awarded concurrently with or after the ISU baccalaureate degree.
- After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate.
- A cumulative grade point average of at least 2.0 is required in courses taken at ISU for a certificate.

Language Requirement:
- The minimum requirement in formal language instruction is completion of two years or the equivalent of a primary language (Spanish or Portuguese) at the university level. At ISU the completion of 202 in the appropriate language satisfies this requirement.
- Students are required to take at least one year or the equivalent of a secondary language (Spanish or Portuguese) at the university level. At ISU the completion of 102 or 112 in the appropriate language satisfies this requirement.
- Native speakers, or those with in-field experience of another Latin American language with a level equivalent to 202 can have the primary language requirement waived. Equivalence will be normally assessed.
Study Abroad

Students are required to participate in an ISU-approved study abroad program in a Latin American country with a minimum duration of 4 consecutive weeks. The Study Abroad Office has a list of ISU-approved programs. Students may elect to participate in other study abroad programs with the approval of the Latin American Studies Program Advisory Committee.

Approved courses available toward the Certificate:
The decision as to whether or not a class can be counted toward the Certificate is based primarily on the course title and description as it appears in the ISU General Catalog. Courses which deal primarily with Hispanic or Latin/o cultures in the U.S. will not count toward credit for the Certificate in Latin American studies. Courses which primarily deal with Spain or Portugal and their cultures also do not count toward the certificate. When in doubt students should consult with the Director of the Latin American Studies Program.

Prerequisites for undergraduates students

LAS 101. Orientation for Open Option and Preprofessional Students. (1-0) Cr. 0.5. F.S. First 8 weeks. Self-responsibility and university procedures. LAS general education requirements, ISU departments and programs, time management, academic study skills, adjustment to the university environment. Required of all first year students in the Open Option and Preprofessional Health Programs. Satisfactory-fail only.

LAS 103. Frontiers of the Discipline. (1-0) Cr. 1. Prereq: First-year student. Seminar focusing entirely on the on “cutting edge” research activities of faculty members. Satisfactory-fail only.

General

B. Humanities

C. Communication

D. Mathematics and Natural Sciences

E. Social Sciences

LAS 104. Personal Career Development. (2-0) Cr. 2. F.S. Prereq: 12 credits of ISU coursework. Comprehensive approach to personal career development; intensive self-analysis; utilization of a computerized career exploration system; contact with area professionals; examination of work in modern Society and the impact of technology on the future of work; exposure to job search skills necessary for career choice implementation.

LAS 125. Connections. (1-0) Cr. 1. Links a large lecture class with a small learning community / seminar session led by the same faculty member teaching the lecture. In each case the professor teaching the large lecture will facilitate a small weekly seminar. The seminar is designed to explore the connections between the lecture topic and issues and areas beyond the lecture discipline. Features informal discussions about critical issues of the day through films, public lectures and other events which students and the faculty leader attend. At the end of the semester all of the Connections seminars will have a joint event in conjuction with an exhibit at the Brunnier Museum entitled Shattered Earth.

A. General

B. Humanities

C. Communication

D. Mathematics and Natural Sciences

E. Social Sciences

LAS 140. Advancing Citizenship Together Learning Community Seminar. (1-0) Cr. 1. Repeatable. Fowler. First semester of required seminar for participants in the ACT (Advancing Citizenship Together) Learning Community. Build citizenship skills with a focus on women issues and politics, and includes a service-learning component. Linked with Introduction to Women’s Studies and Speech Communication classes. Satisfactory-fail only.

LAS 160. Intro to Race and Ethnicity in America. (3-0) Cr. 3. Prereq: Permission of Instructor. One of two courses linked with the Multicultural Learning Community (MLC). Concepts and methods employed in understanding the social and cultural experiences of the major ethnic minority groups in the U.S. with explorations primarily of Native, African, Latino, and Asian Americans.

LAS 161. Studies in Race and Ethnicity in America. (1-0) Cr. 1. Prereq: 160. Permission of Instructor. Second of two courses linked with the Multicultural Learning Community (MLC). Application of concepts and methods to understanding the social and cultural experiences of the major ethnic minority groups in the U.S. with explorations of Native, African, Latino, and Asian.

LAS 211. Introduction to U.S. Latino/a Studies. (3-0) Cr. 3. A survey of the people in the United States who trace their origin to the Spanish-speaking countries of Latin America, focusing principally on Mexican Americans, Puerto Ricans, and Cuban Americans. History, history, religion, social structure, political participation, literature, and other aspects of each group within the framework of various Sociological theories of ethnic identity and relationship.

LAS 222. Leadership Styles and Strategies in a Diverse Society. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Sophomore classification. Develop and practice leadership skills through understanding personal leadership styles, leadership theory and communication theory, including how they relate to gender issues and cultural diversity; exploring personality types, communication styles, and leadership styles, networking and developing mentoring relationships, setting goals and participating in leadership opportunities and service.

LAS 250. Cultures in Transition. (3-0) Cr. 3. An interdisciplinary introduction to a world region in a state of rapid social and cultural transition. Discussion of the history, social and political institutions, arts, economy, agriculture, and environment of the new nations.

LAS 298. Internship/Co-op. Cr. R. F.S.SS. Prereq: Permission of the dean of the College of Liberal Arts and Sciences; sophomore classification. Students participating in an internship or co-op on a full-time basis must register for this course prior to beginning their work experience to remain in full-time student Status. More than 9 credits of LAS 490 may be applied toward graduation.

LAS 395. Interdisciplinary Study Abroad. Cr. arr. Repeatable. Multifaceted exploration of a selected world region directed at developing a comprehensive understanding of a selected culture’s role in contemporary society.

A. Pre-Departure Seminar. Cr. 1. 

B. Humanities. Cr. 1-4.

C. Communications. Cr. 1-4.

LAS 398. Internship/Co-op. Cr. R. F.S.SS. Prereq: Permission of the dean of the College of Liberal Arts and Sciences Career Services; junior classification. Students participating in an internship or co-op on a full-time basis must register for this course prior to beginning their work experience to remain in full-time student Status.

LAS 488. Interdisciplinary Research on Women and Leadership. (Cross-listed with W S). (3-0) Cr. 3. Research on women and leadership in selected content areas (e.g., Athletics, Business, Education, Politics and Public Service, and Science and Engineering). Following overview of quantitative and qualitative methods and critical analyses of journal articles on women and leadership. Students will work with a faculty mentor in selected content areas to research, write and present paper.

LAS 490. Independent Study. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of the instructor for LAS 490G; other topics need: permission of the dean of the College of Liberal Arts and Sciences. More than 9 credits of LAS 490 may be applied toward graduation.

LAS 491. Service Learning. Cr. arr. F.S.SS. Prereq: Permission of the dean of the College of Liberal Arts and Sciences. Service work as appropriate to the student’s degree program. Academic work under faculty supervision may include written project, report, and guided reading.

LAS 498. Internship/Co-op. Cr. R. F.S.SS. Prereq: Permission of the dean of the College of Liberal Arts and Sciences Career Services; senior classification. Students participating in an internship or co-op on a full-time basis must register for this course prior to beginning their work experience to remain in full-time student Status.
LAS 499. Internship. Cr. arr. Repeatable. F.S.SS. Prereq: Permission of Liberal Arts and Sciences Career Services. Work experience in professional setting appropriate to the student's degree program. Academic work under faculty supervision may include written projects, reports, and guided reading.

Liberal Studies

The bachelor of liberal studies degree (B.L.S.) was established by the three Iowa Regent universities to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. The degree may be earned from Iowa State University, the University of Iowa, or the University of Northern Iowa.

The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals.

Up to three-fourths of the total degree requirements can be transferred from accredited institutions. Work done in community colleges or other accredited colleges and universities can be applied toward the degree, as can applicable courses taken at any of the three Iowa Regent universities, whether on or off campus.

The B.L.S. program has no residence requirements. To complete the degree, students may offer credits earned in various study formats: correspondence courses; telecourses; Saturday and evening courses; off-campus courses, including those with distance-learning formats; and regular on-campus courses. Students may also earn credits by proficiency or test-out examinations.

Admission

Admission to the B.L.S. program is open to persons who meet either of the following levels of previous educational attainment:

- Hold the associate in arts (A.A.) or associate in science (A.S.) degree from an accredited two-year college. (holders of the associate in applied science or associate in applied arts degree are not automatically eligible, although some courses may be found applicable upon review.)
- Have at least 62 semester credits of collegiate work acceptable toward graduation at ISU with a total cumulative grade point average of at least 2.00 (a C average).

Library

Olivia Madison, Dean of Library Sciences

Professors: Cole, Gerhard, Goedeken, Madison

Professors (Emeritus): Dobson, Galejs, Kuhn, Morris, Yates

Associate Professors: Boydstun, Christian, Coffey, Gregory, Jackson, Kappmeyer, King, Kushkovich, Lawson, Leyden, Marinico, McKiernan, Parsons, Pedersen, Pelland, Shontz, Stacy-Bates, Vega-Garcia, Wool, Zanich-Belcher

Assistant Professors (Emeritus): Mathews, Pelzer, Wendell

Assistant Professors: Arcand, Dinkelmann, Kurupp, Lewin, Matava, McMinn, Passonneau, Seo

Assistant Professor (Emeritus): Fryer

Assistant Professor (Adjunct): Lesar

Undergraduate Study

A foundation of library instruction is the Library 160 course, which is a requirement for undergraduate graduation. Library faculty also offer course-related instruction for undergraduate students in the effective use of library resources in all fields of study. Offered F.S.SS. For more information, call the Library at 294-3642.

Graduate Study

Library faculty offer course-related instruction for graduate students in the effective use of library resources. These sessions cover sources of information in all fields of study. Offered F.S.SS. For more information, call the Library at 294-3642.

Courses primarily for undergraduate students

Lib 160. Library Instruction. (1-0) Cr. 0.5. F.S.SS. Prereq: for students whose native language is not English: Completion of English 101 requirement. 8 week course required for undergraduate degree. Use of research libraries and information sources, including services of the University Library, with an emphasis on finding, evaluating, and using scholarly information. To be taken as early as possible in the student's undergraduate career. See course descriptions of Engl 150 and 250 for prerequisite related to Lib 160. Satisfactory-fail only.

Linguistics

www.public.iastate.edu/~apling/Lingprog.html

(Interdepartmental Program)
Program Committee: C.A. Chapelle (Chair), K.S. Leonard, J. M. Levis, Nick Pendar, W. S. Robinson, H. Venkatagiri

Undergraduate Study

Linguistics is a cross-disciplinary program in the College of Liberal Arts and Sciences designed to meet the needs of students interested in various aspects of language—its structure, history, varieties, meanings, and uses. The program includes courses in anthropology, English, computer science, psychology, and speech communication and world languages, providing a multi-disciplinary approach to the study of human language.

Courses in linguistics serve as background for students interested in any career that involves working with language, such as linguistic anthropology, computational linguistics, second language studies, teaching English both as a first and as a second language, psycholinguistics, cross-cultural communication, speech-language pathology and audiolog.

In the College of Liberal Arts and Sciences, courses in linguistics can be applied as electives or as part of the group requirements. They may also be used in a minor or in a major.

Majors in linguistics complete a minimum of 36 hours in linguistics with a grade of C or better in each linguistics course. Courses specifically required are Ling 119, 120, 207, 219, 220, 309, 371, 413, 420, and 437. In addition, linguistics majors must choose credits of courses from one or more of the following areas: communication disorders (Ling 275, 286, 471), computational linguistics (Ling 331, 520), second language studies (Ling 425, 486, 487, 519, 524, 525, 526), sociolinguistics and language use (Ling 305, 422, 514, 527), or world language (351, 352, 462, 463). Additional courses on world languages are available through study abroad. Majors in linguistics must show proficiency in a foreign language equivalent to that achieved after two years of university-level study.

Minors in linguistics are individually tailored to the interests of the student, who consults with the chair of the supervisory committee for linguistics. All minors must have a minimum of 15 credits in linguistics, of which 6 must be in courses numbered over 300. All programs must include Ling 219.

Communication Proficiency requirement: The linguistics program requires grades of C+ or better in each of the following: English 150; 250 or 250H; and one of English 305, 314, or a World Languages and Cultures 370 course; or one of CI St 372, 373, 374, or 376.

For information about using linguistics courses in an interdisciplinary studies major, see Liberal Arts and Sciences, Cross-Disciplinary Studies.

Graduate Study

A graduate minor in linguistics is offered through a cooperative agreement with the departments and programs of Anthropology, Computer Science, English, Psychology, Speech Communication, and World Languages and Cultures. The permit students to investigate a variety of aspects of linguistics, emphasizing the ability to think about language in a systematic and disciplined way and to apply the methods of the field to research problems in their own disciplines.

For the master’s degree, a declared minor consists of 9 credits in linguistics including two foundation courses (511 and either 514, 527 or 537) and one elective from the list of courses approved for graduate credit. For the Ph.D. degree, the minor consists of 12 credits in linguistics including three foundation courses (511, 527, and 537) and one elective. Additional courses beyond those listed below may be used as electives. The chair of the supervisory committee can provide information about these.

At least one member of the linguistics faculty will serve on a student’s program of study committee. A list of faculty members may be obtained from the Linguistics program website. Ph.D. candidates will write one section of the preliminary examination on an area of linguistics. All students in the minor are expected to attend linguistics lectures and colloquia. Students in Teaching English as a Second Language/Applied Linguistics are not eligible for a graduate minor in linguistics.

Courses primarily for undergraduate students

Ling 119. Introduction to World Languages. (Cross-listed with WLO). (3-0) Cr. 3. Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and dialects, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy.

Ling 120. Computers and Language. (Cross-listed with Engl. (3-0) Cr. 3. Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques through the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

Linguistics 289
Ling 207. Introduction to Symbolic Logic. (Cross-listed with Phil). (3-0) Cr. 3. S. Introduction to fundamental logical concepts and logical symbolism. Development of natural deduction through first order predicate logic with identity. Applications to arguments in ordinary language and to philosophical issues. Majors should take Phil 207 as early as possible.

Ling 219. Introduction to Linguistics. (Cross-listed with Engl). (3-0) Cr. 3. F. Prereq: Sophomore classification. Introduction to linguistic concepts and principles of linguistic analysis with English as the primary source. Sound and writing systems; sentence structure, vocabulary, and meaning. Issues in the study of usage, regional and social dialects, language acquisition, and language change.

Ling 220. Descriptive English Grammar. (Cross-listed with Engl). (3-0) Cr. 3. F. Prereq: Engl 250. Overview of grammatical structures and functions. Parts of speech; word order; phonology; vocabulary and syntax; sentence types and sentence analysis; rhetorical grammar and sentence style; terminology. Not a remedial, English composition, or ESL course.

Ling 275. Introduction to Communication Disorders. (Cross-listed with CmDis). (3-0) Cr. 3. Survey of nature, causes, and major communicative disorders including phonological, adult and child language, voice, cleft palate, fluency, and hearing disorders.

Ling 286. Basic Sign Language. (Cross-listed with CmDis). (3-0) Cr. 3. Development of basic skills in the use and understanding of signed English, a modification of American Sign Language. Overview of the types, causes and consequences of hearing impairment, deaf culture and the education of hearing-impaired children.

Ling 305. Language, Thought and Action. (Cross-listed with Sp Cm, ComStl). (3-0) Cr. 3. F.S.S. Prereq: Engl 250. The structure and meaning of words; their variations and relationships in context; the roles of social and psychological factors in the acquisition, development, and use of language. Not open to qualified undergraduate students.

Ling 327. Introduction to Spanish Phonology. (Cross-listed with Anth). (2-2) Cr. 3. F. Prereq: Anth 201. Language as a human attribute; language versus animal communication; human communication in cultural context; paralinguage, kinesics, proxemics, artifacts as communication; language and culture; cross-cultural sociolinguistics, and language policies. Participation lab: focus on analysis of non-Western and European language and communication systems.

Ling 331. Theory of Computing. (Cross-listed with Com Sl). (3-1) Cr. 3. F.S. Prereq: C- or higher in 228, C- or higher in Com S 330 or Cpe 310, C- or higher in Math 166, and Engl 250. Models of computation: finite state automata; pushdown automata and Turing machines. Study of grammars and their relation to automata. Limits of digital computation, unsolvability and Church-Turing thesis. Chomsky hierarchy and relations between classes of languages. Nonmajor graduate credit.

Ling 352. Introduction to Spanish Phonology. (Cross-listed with Span). (3-0) Cr. 3. F. Prereq: Span 301, 303 or 304. An introductory study of the articulation, classification, distribution, and regional variations of the sounds of the Spanish language. Taught in Spanish. Nonmajor graduate credit.

Ling 371. Phonetics and Phonology. (Cross-listed with CmDis). (3-0) Cr. 3. F. Prereq: CmDis 275 or Engl 219. Analysis of speech through study of individual sounds, their variations, and relationships in context; English phonology; practice in auditory discrimination and transcription of sounds of American English; description of speech sounds in terms of their production, transmission, and perception.

Ling 413. Psychology of Language. (Cross-listed with Psych). (3-0) Cr. 3. Prereq: Psych 101. Introduction to psycholinguistics. Topics may include origin of language, speech perception, language comprehension, reading, bilingualism, brain bases of language, and computational modeling of language processes. Nonmajor graduate credit.

Ling 420. History of the English Language. (Cross-listed with Engl). (3-0) Cr. 3. F.S. Prereq: Engl 219. Comparison of English to other languages by family background and by type. Analysis of representative Old, Middle, Early Modern and present-day English texts, including both literary works and non-literary documents. Nonmajor graduate credit.

Ling 437. Grammatical Analysis. (Dual-listed with 537). (3-0) Cr. 3. Prereq: Engl 220; junior classification. Theories and methods for analysis of English syntax with emphasis on recent syntactic theory.

Ling 463. Hispanic Dialectology. (Cross-listed with Span). (3-0) Cr. 3. F. Prereq: Spanish 352. Intensive study of the phonology, morphosyntax and lexicum of the Hispanic dialects of Spain and Latin America in their historical context. Taught in Spanish. Nonmajor graduate credit.

Ling 471. Language Development. (Cross-listed with CmDis). (3-0) Cr. 3. Prereq: CmDis 275 or Psych 230 or Engl 219. Definition of components of language. Overview of theories and developmental processes related to each component of linguistic skill (semantics, lexicon, syntax, morphology, phonology, pragmatics). Overview of normative information available for infants, children, adolescents, and adults. Attention to metalinguistic skills and the complementation of cognitive and paralinguistic skills. Nonmajor graduate credit.

Ling 486. Methods in Elementary School World Language Instruction. (Cross-listed with WLC, C I). (3-0) Cr. 3. F. Prereq: 25 credits in a world language. Current educational methods and their application in the elementary school classroom. Special emphasis on planning, evaluation and teaching strategies. Nonmajor graduate credit.

Ling 489. Undergraduate Seminar. (Cross-listed with Engl). (3-0) Cr. 3. Repeatable. F. Prereq: 9 credits in English beyond 250. Intensive study of a selected topic in literature, criticism, rhetoric, writing, or language. Cross-listing with linguistics acceptable only when offered as a course in linguistics. Nonmajor graduate credit.

Ling 490B. Independent Study. (Cross-listed with Engl). Cr. arr. Repeatable. F.S. Prereq: 9 credits in English beyond 250 appropriate to the section taken, junior classification, permission of Undergraduate Studies Committee. Designed to meet the needs of students who wish to study areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields.

Ling 490D. Independent Study: Linguistic Anthropology. (Cross-listed with Anthr). Cr. arr. Repeatable. Prereq: 9 credits in anthropology. D. Linguistic Anthropology (Same as Anthr 490D)

Courses primarily for graduate students, open to qualified undergraduate students

Ling 500. Language and Culture. (Cross-listed with Anthr). (3-0) Cr. 3. S. Prereq: Anthr 309 or 510. Approaches to the study of the relationship between language structure, world view, cognition; social and structural linguistic variation; cross-cultural aspects of verbal and non-verbal communication; linguistic change; contemporary applications of linguistic anthropology.

Ling 511. Introduction to Linguistic Analysis. (Cross-listed with Engl). (3-0) Cr. 3. F. Prereq: Graduates classification. Principles and methods of linguistic analysis with emphasis on phonology, morphology, and syntax. Description of linguistic variation and current theoretical approaches to linguistics.

Ling 512. Linguistic Change in English: Historical Analysis of Literary and Non-Literary Texts. (Cross-listed with Engl). (3-0) Cr. 3. S. Prereq: Graduate classification. Linguistic change in English; connections to literary and rhetorical history. Development of formal written English and its conventions. Historical survey of ideas about the English language.

Ling 514. Sociolinguistics. (Cross-listed with Engl). (3-0) Cr. 3. S. Prereq: 511 or an introductory course in linguistics. Theories and methods of examining language in its social setting. Analysis of individual characteristics (e.g., age, gender, ethnicity, social class, region), interactional factors (e.g., situation, topic, purpose) and national policies affecting language use.

Ling 515. Statistical Natural Language Processing. (Cross-listed with Engl, HCI). (3-0) Cr. 2. F. Prereq: Stat 330 or equivalent; recommended 219 or 511. Introduction to computational techniques involving human language and speech in applications such as information retrieval and extraction, automatic text categorization, word prediction, intelligent searching, spelling and grammar checking, speech recognition and synthesis, statistical machine translation, n-grams, POS-tagging, word sense disambiguation, on-line lexicons and thesauri, markup languages, corpus analysis, and Python programming language.

Ling 517. Second Language Acquisition. (Cross-listed with Engl). (3-0) Cr. 3. F. Prereq: 511 or an introductory course in linguistics. Theory, methods, and results of second language acquisition research with emphasis on approaches relevant to second language teaching.

Ling 518. Teaching English as a Second Language Methods and Materials with Engl). (3-0) Cr. 3. F. Prereq: 511 or an introductory course in linguistics. Introduction to approaches, methods, techniques, materials, curricular design, and assessment for various levels of ESL instruction. Attention to issues related to the teaching of listening, speaking, reading, writing, vocabulary, pronunciation, and culture.

Ling 520. Computational Analysis of English. (Cross-listed with Engl, HCI). (3-0) Cr. 3. F. Prereq: Engl 510 or 511. Concepts and practices for analysis of English by computer, and the applications of computational analysis to problems in applied linguistics such as corpus analysis and recognition of learner language in computer-assisted learning and language assessment.

Ling 524. Literacy: Issues and Methods for Non-Native Speakers of English. (Cross-listed with Engl). (3-0) Cr. 3. Alt. S. offered 2010. Prereq: 511 or an introductory course in linguistics. Theoretical and practical issues and techniques in the teaching of
literacy in a variety of contexts, involving children and adults at basic skill levels and teens and adults in academic and vocational programs.

Ling 525. Methods in Teaching Listening and Speaking Skills to Nonnative Speakers of English. (Cross-listed with Engl.) (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 511 or an introductory course in linguistics. Theoretical and practical issues and techniques in the teaching of second language pronunciation, listening, and speaking skills. Topics will be relevant to those intending to teach in various contexts involving both K-12 and adult learners.

Ling 526. Computer-Assisted Language Learning. (Cross-listed with Engl.) (3-0) Cr. 3. S. Prereq: 511 or an introductory course in linguistics. Methods and theoretical foundations for linguistic approaches to discourse analysis. Applications of discourse analysis to the study of texts in a variety of settings, including academic and research contexts.

Ling 537. Grammatical Analysis. (Dual-listed with 437t.) (Cross-listed with C IJ) (3-0) Cr. 3. F. Prereq: 219, 220, or 511; junior classification. Theories and methods for analysis of English syntax with emphasis on recent syntactic theory.

Ling 588. Supervised Practicum in Teaching English as a Second Language. (Cross-listed with Engl.) (1-9) Cr. 3. F.S.SS. Prereq: 15 credits toward the TESL/Language as a Second Language major, and a year of practical experience as a volunteer, tutor, or teacher. Prereq: 15 credits toward the TESL/Language as a Second Language major, and a year of practical experience as a volunteer, tutor, or teacher. Prereq: 15 credits toward the TESL/Language as a Second Language major, and a year of practical experience as a volunteer, tutor, or teacher.

Ling 590. Special Topics: Teaching English as a Second Language (TESL)/Applied Linguistics. (Cross-listed with Engl.) Cr. arr. Repeatable. Prereq: Permission of the English Department Graduate Studies Committee according to guidelines available in the department office.

B. Teaching English as a Second Language (TESL)/Applied Linguistics. (Cross-listed with Engl 590B)

Ling 623. Research Methods in Applied Linguistics. (Cross-listed with Engl.) (3-0) Cr. 3. F. Prereq: 511, 517, 518, Engl 519. Survey of research traditions in applied linguistics. Focus on theoretical and practical aspects of quantitative and qualitative approaches to applied linguistic study, including experimental and quasi-experimental methods, classroom observation and research, introspective methods, elicitation techniques, case studies, interactional analysis, ethnography, and program evaluation. Computational tools and resources for linguistic research will be highlighted.

Ling 630. Seminar in Technology and Applied Linguistics. (Cross-listed with Engl.) (3-0) Cr. 3. Prereq: 510, 517, 517, 518, others depend on the topic. Topic changes each semester. Topics include advanced methods in natural language processing, technology and literacy in a global context, feedback in CALL programs, and advances in language assessment.

Ling 671. Discourse in Classrooms. (Cross-listed with C IJ) (3-0) Cr. 3. Alt. F., offered 2010. Prereq: graduate classification. Explores both foundational and current literature on discourse in K-12 classrooms; focuses on both discourse as a classroom phenomenon and discourse as an analytic tool for doing research in classrooms; and provides a close look at enacted and hidden curricula through an examination of interaction and communication patterns.

Courses for graduate students

Ling 630. Seminar in Technology and Applied Linguistics. (Cross-listed with Engl.) (3-0) Cr. 3. F. Prereq: 510, 517, 517, 518, others depend on the topic. Topic changes each semester. Topics include advanced methods in natural language processing, technology and literacy in a global context, feedback in CALL programs, and advances in language assessment.

Ling 671. Discourse in Classrooms. (Cross-listed with C IJ) (3-0) Cr. 3. Alt. S., offered 2009. Prereq: graduate classification. Explores both foundational and current literature on discourse in K-12 classrooms; focuses on both discourse as a classroom phenomenon and discourse as an analytic tool for doing research in classrooms; and provides a close look at enacted and hidden curricula through an examination of interaction and communication patterns.

Logistics and Supply Chain Management

(Logistics and Supply Chain Management) (Administered by the Department of Logistics, Operations, and Management Information Systems) Richard Poist, Chair of Department

Linguistics and Supply Chain Management

(Logistics and Supply Chain Management) (Administered by the Department of Logistics, Operations, and Management Information Systems) Richard Poist, Chair of Department

Distinguished Professor (Emeritus): Baun

Professors: Crum, Poist, Walter

Professors (Emeritus): Thompson, Voorhees

Associate Professors: Blackhurst, Johnson, Mennecke, Montabon, Nilakanta, Ruben, Suzuki, Tiwana, Townsend, Zhu

Assistant Professors: Jiang, Martens, Scheibe

Instructor (Adjunct): Choobineh

Lecturer: Helmer

Undergraduate Study

For the undergraduate curriculum in business, major in Logistics and Supply Chain Management, see College of Business, Curricula.

Logistics and Supply Chain Management is a program of study concerned with the efficient flow of materials, products, and information within and among organizations. Logistics management entails a wide variety of activities that have a significant influence on customer service, including inventory control, transportation, warehousing, facility location analysis, packaging, materials handling, parts and service support, and product returns. Supply chain management involves the integration of business processes across organizations, from material sources and suppliers through manufacturing and processing to the final customer. Logistics management is, thus, taught in the context and framework of interorganizational supply chain systems.

The study of Logistics and Supply Chain Management prepares students for professional careers with shippers (e.g., manufacturers and distributors), transportation carriers, and logistics service providers. The curriculum provides the required theoretical/conceptual base and analytical methods for making sound operational and strategic business decisions.

The requirements for the Logistics and Supply Chain Management major are met by completion of the following courses: LSCM 460, 461, 485, 486, 487, plus one course from an approved list. The department also offers a minor for non-Logistics and Supply Chain Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

For graduate study options, including the Ph.D. degree, see the Supply Chain Management listing.

Courses primarily for undergraduate students

LSCM 360. Business Logistics. (3-0) Cr. 3. Prereq: Econ 101. Introduction and analysis of the logistics concept to include the management of transportation, inventory, packaging, warehousing, materials handling, order processing, facility location, and customer service.

LSCM 440. Supply Chain Information Systems. (Cross-listed with MIS, DSCM). (3-0) Cr. 3. Prereq: MIS 320, OSCM 320. LSCM 380. Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include: design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

LSCM 460. Decision Tools for Logistics and Operations Management. (3-0) Cr. 3. Prereq: LSCM 380, OSCM 320. Technical tools and skills required for problem solving and decision making in logistics and operations management. Transportation and network planning, inventory decision making, facility location planning, vehicle routing, scheduling, and production planning. Quantitative tools include linear and integer programming, non-linear programming, and simulation. Emphasis on the use of PC-based spreadsheet programs. Nonmajor graduate credit.

LSCM 461. Principles of Transportation. (3-0) Cr. 3. Prereq: LSCM 380. Economic, operating, and service characteristics of the various modes of transportation, with a special emphasis on freight transportation. Factors that influence transport demand, costs, market structures, carrier pricing, and carrier operating and service characteristics and their influence on other supply chain costs and supply chain performance. Nonmajor graduate credit.
LSCM 462. Transportation Carrier Management. (3-0) Cr. 3. Prereq: Credit or enrollment in LSCM 461. Analysis of transport users’ requirements. Carrier management problems involving ownership and mergers, routes, competition, labor, and other decision areas. Nonmajor graduate credit.

LSCM 466. International Transportation and Logistics. (3-0) Cr. 3. Prereq: LSCM 360, Logistics systems and legal framework for the international movement of goods. Operational characteristics of providers of exporting and importing services. The effects of government trade policies on global logistics. Nonmajor graduate credit.

LSCM 469. Transportation and Logistics Issues. (3-0) Cr. 3. Prereq: LSCM 460, 461. An integrative course designed to study contemporary problems and issues in transportation and logistics. Nonmajor graduate credit.

LSCM 485. Demand Planning and Management. (Cross-listed with OSCM). (3-0) Cr. 3. Prereq: LSCM 360, OSCM 320. Demand planning process which synchronizes demand with manufacturing and distribution. Addresses linking business plans and demand forecasts both horizontally and vertically within the organization and collaboratively among supply chain partners. Forecasting, customer relationship management, sales and operations planning, customer service, distribution channels, e-fulfillment, and information systems requirements. Nonmajor graduate credit.

LSCM 486. Principles of Purchasing and Supply Management. (Cross-listed with OSCM). (3-0) Cr. 3. Prereq: LSCM 360, OSCM 320. Sourcing strategies, concepts, tools and dynamics in the context of the integrated supply chain. Make or buy decision, supplier evaluation and selection, global sourcing, the total cost of ownership, contracts and legal terms, negotiation, purchasing ethics, and information systems requirements. Nonmajor graduate credit.

LSCM 487. Strategic Supply Chain Management. (Cross-listed with OSCM). (3-0) Cr. 3. Prereq: LSCM 460 or OSCM 422 or OSCM 424; LSCM 485 or LSCM 486. Capstone course in supply chain management. Integrating and applying the theories, concepts, and methods covered in the prerequisite courses through the use of readings, case studies, projects, and industry speakers. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

The department offers graduate courses under the heading of Supply Chain Management. These courses include SCM 601, 602, 603, 604, 605, 650, 651, and 699. For descriptions of these courses, see Supply Chain Management.

Management

Thomas Chacko, Chair of Department
University Professors: McElroy, Morrow Shrade
Professors: Chacko, Van Aukcn, Werbel
Professor (Emeritus): Hunger
Associate Professors: Blackburn, Demarie, Herrmann, Johnson
Associate Professor (Emeritus): Atchison
Assistant Professors: Anderson, Schwab, Zhang
Senior Lecturer: Elston, R. Smith
Lecturer: Mullen

Undergraduate Study

For undergraduate curriculum in business, major in management, see College of Business, Curriculum.

The Department of Management offers a major in management. Students will complete the general education requirements (including business foundation courses) and business core requirements for the bachelor of science (B.S.) degree and 18 credits in the major. The instructional objective of the Department of Management is to provide students with knowledge of organizations and management functions within organizations. Management majors will demonstrate an understanding of (1) employee work-related attitudes and behaviors, (2) competitive strategy and advantage, (3) challenges and strategies in international business, and (4) human resource management practices in firms. Students will demonstrate an awareness of the role of diversity, ethics, and technology in business decisions, the impact of external forces and global issues on organizations, and an ability to think critically, to communicate effectively, and to work effectively as a member of a team.

Management is a broadly defined discipline and activity, which is neither industry nor function specific. Management concepts, theories, techniques and skills are applicable to all business, functional areas and are essential components for successful organizations. Management requires sound conceptual, technical, and human skills for the effective utilization of organizational resources. In addition to the basic business foundation and core courses, management majors are required to complete 18 credits of management or department approved courses. Included in these 18 credits are four required courses: Mgmt 371, 377, 414, and 471.

The department also offers a minor for non-Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Department of Management participates in three graduate programs: the M.S. in Business, the M.B.A. full-time and part-time programs, and the Ph.D. program in Business and Technology. The M.S. in Business is a 30-credit curriculum culminating in a thesis. The M.B.A. program is a 48-credit curriculum. Twenty-four of the 48 credits are core courses and the remaining 24 are graduate electives. The Ph.D. program is a 56 credit curriculum that culminates in a dissertation.

Courses primarily for undergraduate students

Mgmt 310. Entrepreneurship and Innovation. (3-0) Cr. 3. F.S. Prereq: Sophomore classification. Review of the entrepreneurial process with emphasis on starting a new business. How to analyze opportunities, develop an innovative product, organize, finance, market, launch, and manage a new venture. Deals with the role of the entrepreneur and the importance of a business plan. Speakers and field project.

Mgmt 313. Feasibility Analysis and Business Planning. (3-0) Cr. 3. S. Prereq: 310 and Entrepreneurship Minor or Management Major. Developing an idea for a new business venture, conducting a feasibility study, researching the potential market, analyzing the competition, and writing a formal business plan. Basic business functions are discussed in terms of their application to conducting feasibility analysis and writing a business plan for an entrepreneurial venture.

Mgmt 370. Management of Organizations. (3-0) Cr. 3. F.S.S. Prereq: Econ 101 or 102 or equivalent. A management functions approach is used to explain what managers do in organizations; how they deal with external constituents, how they structure their companies, and how they deal with employees. A contingency approach is used as a framework for understanding how to increase the effectiveness and efficiency of organizations in today’s dynamic, highly competitive business environment.

Mgmt 371. Organizational Behavior. (3-0) Cr. 3. F.S. Prereq: 370. The study of individual attributes, interpersonal relations, and employee attitudes in organizations. Instructional emphasis is placed on how management concepts such as reward systems, job design, leadership, teams, etc., can be used to manage employee attitudes and behavior.

Mgmt 377. Competitive Strategy. (3-0) Cr. F. Prereq: Econ 101 and junior classification. Developing competitive strategy and achieving competitive advantage in firms, including: industry analysis, generic strategies, hypercompetition, competing against time, and building distinctive capabilities.

Mgmt 414. International Management. (3-0) Cr. 3. F. The nature and economic role of the multinational firm and entrepreneurial ventures, including the impact of legal, political, and cultural variables upon firm performance and managerial activity; case studies illustrate interdependent nature of functional areas of credit projected across national boundaries.

Nonmajor graduate credit.

Mgmt 415. Managing New Ventures. (3-0) Cr. 3. F.S. Prereq: 370; Mkt 340; Fin 301; LSCM 360, OSCM 320. Examination of business problems and issues in new and growing firms. Emphasis is on analyzing existing businesses. Includes a field project. Nonmajor graduate credit.

Mgmt 419. Social Responsibility of Business. (3-0) Cr. 3. A consideration of the role of business in Society. Critical analysis of ethical, managerial, and public issues as they affect the corporation.

Mgmt 471. Personnel and Human Resource Management. (3-0) Cr. 3. F. Prereq: Junior standing. Recruitment and selection, utilization, and development of people in organizations. Examination of each personnel function; interrelationships among the functions.

Mgmt 472. Management of Diversity. (3-0) Cr. 3. F.S. Prereq: Junior classification. One of the most crucial problems in organizations today is the management of diversity. Attempts to define the differences between equal employment opportunity/affirmative action, which has a legal basis, and diversity which has an educational basis. Organized around the concepts of: (1) cultural diversity and cultural unity; (2) development of skills and tools to manage diversity; and (3) structure of diversity development programs in organizations. Nonmajor graduate credit.

Mgmt 478. Strategic Management. (3-0) Cr. 3. F.S.S. Prereq: 370; OSCM 320; Fin 301; Mkt 340; LSCM 360, Acct 286, graduating senior. Strategy formulation, implementation, and evaluation and control in today’s organizations. Emphasis is on strategic planning and decision making using the case method and/or projects.

Courses primarily for graduate students, open to qualified undergraduate students

Mgmt 507. Organizational Behavior. (2-0) Cr. 2. F. Prereq: Graduate classification. Understanding human behavior in organizations and the nature of organizations from a managerial perspective. Special emphasis is placed on how individual differences, such as perceptions, personalities, motivation, cultural influences and individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

Mgmt 511. Ethics and Social Responsibility. (1-0) Cr. 1. S. Prereq: Graduate classification. The ethical issues, moral dilemmas, and stakeholder responsibilities experienced by today’s corporate decision makers. The morality of current management models and practices. Corporate governance and control, moral reasoning in groups, whistleblowing, employee safety, truth in advertising, environmental pollution, plant closings, insider trading, employee rights.

Mgmt 555. Technology Transfer and Feasibility Analysis. (3-0) Cr. 3. Prereq: Graduate classification. Commercialization of new technology. Topics covered include market analysis, intellectual property, product development, feasibility analysis, and new business evaluation.

Mgmt 566. Entrepreneurship and New Business Creation. (3-0) Cr. 3. Prereq: Graduate classification or permission of instructor. The essentials of starting and operating a new business. Topics include current research on entrepreneurial perspective, starting and developing a new business, financing the venture, managing the growing firm, and special issues.

Mgmt 567. International Entrepreneurship. (3-0) Cr. 3. Essentials of operating an entrepreneurial firm in an international environment. Topics include international entrepreneurship, starting and developing a business in an international market, financing international ventures, international management issues, exchange rates, and culture.

Mgmt 570. Managing Employee Attitudes and Behaviors. (3-0) Cr. 3. F.S.S. Prereq: 371 or 507 or Psych 450. Advanced topics germane to the management of individual attitudes and behaviors in the work environment. Sustainable work commitment, motivation and job/career satisfaction, absenteeism, turnover, stress, leadership and career development (e.g., career ladders, mentoring).

Mgmt 571. Seminar in Personnel and Human Resources Management. (3-0) Cr. 3. S. Prereq: 371 or 507 or Soc 420. Topics and issues in personnel management with a focus on the management of human resources in organizations. Current personnel practices, Philosophies, and behavioral science research.

Mgmt 575. Compensation Management. (3-0) Cr. 3. F. Prereq: 571. Concepts, techniques, and issues dealing with remuneration of the workforce. The impact of government legislation as well as organizational and societal issues.

Mgmt 581. Strategic Planning and Environmental Analysis. (3-0) Cr. 3. F. Prereq: 501 or permission of instructor. Discussion of concepts and techniques used in long range strategic planning. Examination of planning practices in For-Profit and Not-For-Profit organizations. Topics include environmental scanning, industry analysis, forecasting, corporate and competitive strategies, and tactics.

Mgmt 582. Corporate Governance and Leadership. (Cross-listed with Acct). (3-0) Cr. 3. Prereq: 502 or permission. Examination of top managers and corporate boards of directors in terms of roles, responsibilities, and tasks. Examination of corporate governance structure and functioning. Topics include CEO tenure and compensation, board monitoring and composition, board responsibility and accountability, board structure and performance, CEO and board roles in strategic management, shareholder and stakeholder representation, corporate social responsibility, ethics and corporate governance, international governance, and executive leadership style.

Mgmt 583. Strategic Management of Innovation. (3-0) Cr. 3. Prereq: 501 or permission of instructor. Critical analysis and discussion of cases focused on strategic management of innovation. Assessment of a firm’s innovative capabilities and competitive dynamics to manage innovative processes. Practical applications through emphasis on implementation, including internal corporate venturing, management of the corporate R&D function, and institutionalization of innovation.

Mgmt 584. Management Consulting. (3-0) Cr. 3. Prereq: 501 or permission of instructor. Provides the opportunity for students to understand the role of the professional consultant facing the management consulting industry, the competencies of various management consulting firms, the nature and form of strategic consulting engagements, and the nature and scope of strategic change in business firms. Students will learn about management consulting functions and will practice the consultant role through cases and field studies.

Mgmt 590. Special Topics. Cr. arr. Repeatable. F.S.S. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of management.

Courses for graduate students

Mgmt 601. Philosophy of Science. (3-0) Cr. 3. Prereq: enrollment in the PhD program. This course provides a Philosophical introduction to the theoretical and empirical development of scientific knowledge. It focuses on a variety of basic problems common to the social sciences: the nature of explanation, the structure of theories, forms of knowledge, scientific laws, nature of theory and ethics. The purpose of the course is to help doctoral students define a research context by addressing the purposes, assumptions and primary components of scientific inquiry.

Mgmt 602. Organizational Theory. (3-0) Cr. 3. Prereq: enrollment in the PhD program. This seminar involves the examination of the core theories and perspectives in organizational theory, as well as their applications and extensions. This material addresses the fundamental rationale for organizations in modern society, basic processes of organizing and organizational structure, a consideration of inter-organizational relationships and the external environment, and a variety of factors that help determine organizational effectiveness.

Mgmt 603. Strategic Management of Technology and Innovation. (3-0) Cr. 3. Prereq: 601. This course will offer a critical review of organizational decision making with respect to technology and innovation. Students will learn how technological change can alter the basis of competition; how competitive strategy drives technology investment decisions; how market orientation should be the other backbone of technological innovation; and best practices of organizing and managing the new product development process to achieve strategic goals.

Mgmt 604. Seminar in Organizational Behavior. (3-0) Cr. 3. Prereq: enrollment in the PhD program. The purpose of this seminar is to introduce behavioral science literature relevant to the study of behavior in organizational settings. The course will focus on the individual’s role within organizations and cover topics such as individual differences, motivation, leadership, decision-making, leadership risk taking, interpersonal relations, etc. Both theoretical and empirical contributions will be examined, with emphasis on integration of diverse theoretical perspectives.

Mgmt 650. Research Practicum I. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

Mgmt 651. Research Practicum. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Management Information Systems

(Administered by the Department of Logistics, Operations, and Management Information Systems)

Richard Poist, Chair of Department

Distinguished Professor (Emeritus): Baumel

Professors: Crum, Poist, Walter

Professors (Emeritus): Thompson, Voorhees

Associate Professors: Blackhurst, Johnson, Mennecke, Montabon, Nilakanta, Ruben, Suzuki, Tiwana, Townsend, Zhu

Assistant Professors: Jiang, Martens, Scheibe

Instructor (Adjunct): Choobineh

Lecturer: Helmer

Undergraduate Study

For undergraduate curriculum in business, major in management information systems, (MIS) see College of Business, Curricula.

The MIS Program is designed to provide students with a strong educational foundation that prepares them as information system (IS) professionals.

The academic program consists of a specially designed curriculum that integrates conceptual, analytical, technical and interpersonal skills. The major offers students comprehensive training in the application, use and management of information systems to prepare them to provide effective information services and support to organizations. The coursework is designed to provide the technical and conceptual skills associated with the use of information technology in business organizations. The program will: impart knowledge on existing and emerging information technologies and their impact on the IS function; train to critically analyze business processes, identify inefficiencies and problems, assess information requirements, create business solutions and technical specifications for the supporting system; provide expertise to design and develop database applications using the latest database technologies; provide expertise in the latest telecommunication technologies; train in interpersonal and communication skills to effectively interact with various information systems’ clients; and provide managerial skills to manage IS projects.

The MIS major requires students to take seven courses. The required courses are: MIS 331, 432, 433, 435, and 438. In addition they will take two courses from an approved list. These courses are designed to provide the conceptual, technical, and managerial skills necessary to design and develop systems in organizations.

The department also offers a minor for non-Management Information Systems majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. The 15 credits must include either MIS 423 or 433. Students with declared majors have priority over students with declared minors in courses with space constraints.
Graduate Study

MIS 437. Project Management. (3-0) Cr. 3. Prereq: 330. Emphasis on the strategic, operational, and technical issues associated with project initiation and execution. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods. Nonmajor graduate credit.

MIS 438. Information Systems Development. (3-0) Cr. 3. Prereq: 342, 433, credit or enrollment in 435. Design of business systems using contemporary tools and methods such as SQL, CASE tools, OO D tools, etc. Focuses on synthesizing concepts from earlier MIS courses. Nonmajor graduate credit.

MIS 439. Topics in Management of Information Systems. (3-0) Cr. 3. Repeatable. Prereq: 330, permision of instructor. A variety of topics will be covered. Topics may vary between semesters. Some of the topics are information resources management, electronic commerce, decision support systems, and expert systems.

MIS 440. Supply Chain Information Systems. (Cross-listed with LSCM, OSCM). (3-0) Cr. 3. Prereq: MIS 330, OSCM 320, LSCM 360. Introduction to the concepts and use of data structures, file access and object oriented programming methodologies in contemporary business environments. Application development environments will be covered.

MIS 445. Advanced Data Communication. (3-0) Cr. 3. Prereq: 436. Contemporary theories, concepts, and practices in network infrastructure, network design, and information security. Design, install, and administer a complex network infrastructure. Study security threats and countermeasures. Investigate exposure to attacks, firewalls, and development of intrusion detection systems. Other security topics such as risk management, IT audit, and security regulations will also be addressed.

Courses primarily for graduate students, open to qualified undergraduate students

MIS 503. Management Information Systems. (2-0) Cr. 2. Prereq: Graduate classification. Current theories and practices of information processing and decision making. Focus on information technology and its uses in improving work practices, products, and tools for decision support. Use of artificial intelligence and other developments in technology. Competitive pressures and risks of information technology (IT). Setting IT strategy, information system planning and development of enterprise architecture. Focus on systems development and implementation.

MIS 531. Business Intelligence and Software. (3-0) Cr. 3. Prereq: 503. Focus on IT-enabled business intelligence systems. Conceptualize, design, and implement software applications that transform data into intelligence.

MIS 532. Advanced Business Software Development. (3-0) Cr. 3. Prereq: 531 or equivalent. A survey of business-oriented programming languages with emphasis on state-of-the-art development techniques for business software. Topics include object-oriented and Internet programming issues and methods.

MIS 533. Data Management for Decision Makers. (Cross-listed with Acct. 3-0) Cr. 3. Prereq: 503. Addresses data needs of functions such as marketing, finance, and production. Advanced skills needed to design, develop and use database, data warehousing and data mining systems for effective decision support. Emphasizes the importance of contemporary technologies.

MIS 534. Electronic Commerce. (3-0) Cr. 3. Prereq: 503. Overview of how modern communication technologies including the internet and world wide web have revolutionized the way we do business. Provides an understanding of various internet technologies and how companies are using the internet for commercial purposes. Explores the impact of the use of these technologies and their impact on various industries and the industry.

MIS 535. Telecommunications Management. (3-0) Cr. 3. Prereq: 503. Issues involved in the management of telecommunications function. Overview of communications technology used in various business applications, local area network, wide area network, broad band network, wireless and voice networks. Internet technologies and protocols. Analyzing the strategic impact of these technologies on organizations. Strategic planning of telecommunication communications, including networking planning and analysis.

MIS 537. Information Resource Management. (3-0) Cr. 3. Prereq: 503. Information Resource Management (IRM) is a popular concept of viewing information systems resources from a strategic resource perspective. Discuss the IRM concept as well as provide pragmatic tools for implementing this approach within the organization. Topics will include: IS outsourcing, total cost of ownership, IS planning and strategic analysis, justification for IT investment, management of IT human resources, traditional project management theory, and project management techniques derived from the Theory of Constraints (TOC).

MIS 538. Business Process Systems. (3-0) Cr. 3. Prereq: 503. Examines current and historical perspectives on business process management. Topics include

Management Information Systems
process identification, mapping, and improvement. Additional topics will address business process automation and integration, business process outsourcing. Investigate current and potential tools and methods for business process management. Include process management projects.

MIS 539. Topics in Management of Information Systems. (3-0) Cr. 3. Repeatable. Prereq: 503. A variety of topics may be offered in different semesters. Topics may include electronic commerce, information resources management, decision support systems, and expert systems.

MIS 590. Special Topics. Cr. art. Repeatable. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of MIS.

MIS 598. Research Seminar in Management Information Systems. (3-0) Cr. 3. Prereq: Graduate classification. Examines issues such as the nature and content of information systems research; aspects of starting and pursuing research topics in information systems; exploring and understanding relevant research methods and tools. Develop preliminary research proposals.

MIS 599. Creative Component. Cr. 3. Prereq: Graduate classification, permission of supervisory committee chair. Preparation and writing of creative component.

Courses for graduate students,

MIS 601. Behavioral Issues in IS Research. (3-0) Cr. 3. Prereq: MIS 503 or equivalent, enrollment in PhD program. The state of behavioral research in the IS function. MIS activities in an organization span the following three major areas: design and implementation of the MIS, use of the MIS, and management of the MIS function. Each of these processes is carried out at several levels: individual, group, organizational and inter-organizational. Identify behavioral issues of relevance for the cells defined by the process and level dimensions. Reading and discussion of the research literature surrounding the development, use, and implications of information technology.

MIS 602. Current Issues in IS Research. (3-0) Prereq: MIS 503 or equivalent, enrollment in PhD program. Three fundamental areas of information Systems, namely, infrastructure, management, and processes. Infrastructure studies examine the IT architecture including computing, communication, data, and application. Management focuses on addressing the value added notion of IT. Finally processing addresses topics related to enabling role of IT in myriad of areas.

MIS 603. Seminar on IT Strategy and Structure. (3-0) Cr. 3. Prereq: MIS 503. Strategic issues in IT management. Address issues such as aligning IT strategy with corporate strategy and functional strategies, IT structure, valuation, governance and control, and related topics. Provide students with research skills related to the boundary between IT and the firm’s external environment.

MIS 604. Collaboration, Knowledge, and Intelligence in Organizations. (3-0) Cr. 3. Prereq: MIS 501. Research issues in the emerging areas of collaboration, knowledge management, and enterprise intelligence. Topics will include emerging and contemporary technologies of Data Mining, Knowledge Discovery from Databases, Web Mining, organizational memory, and knowledge management.

MIS 650. Research Practicum I. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MIS 651. Research Practicum II. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

MIS 655. Organizational and Social Implications of Human Computer Interaction. (Cross-listed with HCI). (3-0) Cr. 3. Prereq: Graduate classification. Examine opportunities and implications of information technologies and human computer interaction on social and organizational systems. Explore ethical and social issues appurtenant to human computer interaction, both from a prescriptive and descriptive perspective. Develop informed perspective on human computer interaction. Implications on research and development programs.

Marketing

Thomas Chacko, Chair of Department

Distinguished Professor (Emeritus): Teas

Professors: Agarwal, Lacznik, Ramaswami

Professors (Emeritus): Zober

Associate Professors: Kim, Palan, Wong

Assistant Professors: Brocato, Raju, Roy, Smarandescu, Walker

Lecturer: Folger

Undergraduate Study

For undergraduate curriculum in business, major in marketing, see College of Business, Curriculum.

The Department of Marketing offers a major in marketing. Students will complete the general education requirements (including business foundation courses), and business core requirements for the bachelor of science (B.S.) degree and 18 credits in the major.

Marketing is concerned with management decisions that deal with the satisfaction of customer needs and wants in the purchase and use of goods and services. The primary decision areas in marketing involve the identification of market segments and decisions dealing with product design, pricing, promotion (including personal selling and marketing communications), and distribution. A major in marketing prepares the student for careers in selling and sales management, marketing research, marketing management, retail management, marketing communications, promotion management, and/or international marketing. Each area of study may be applied to consumer, business-to-business, and/or services marketing environments in business and nonprofit organizations.

The instructional objective of the Marketing department is to provide knowledge of the marketing process and an understanding of its functions. The students are expected to develop decision-making skills, computational skills, and communication skills with appreciation for global marketplace and ethical concerns. In addition to the basic business foundation and core courses, marketing majors are required to complete 18 credits of marketing or department approved courses. Included in these 18 credits are three required courses: Mkt 443, 444, and 447.

The department also offers a minor for non-Marketing majors in the College of Business. The minor required 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.
Mkt 447. Fundamentals of Consumer Behavior. (3-0) Cr. 3. F., S. Prereq: 340. Study of how consumers select, purchase, use, and dispose of goods and services. Includes analyses of how markets and others influence these processes. Application of concepts and methods of behavioral sciences to marketing management decision making. Nonmajor graduate credit.

Mkt 448. Fundamentals of International Marketing. (3-0) Cr. 3. F., S. Prereq: 340. Introduction to terms used in international marketing and sources of information on international markets. Development of sensitivity toward foreign business environment and familiarity with operations of multinational corporations. Nonmajor graduate credit.

Mkt 449. Marketing Seminar. (3-0) Cr. 3. Prereq: 340. Analysis of current issues and problems in marketing with emphasis on new theoretical and methodological approaches and research. Nonmajors may be enrolled. Nonmajor graduate credit.

Mkt 451. Marketing Channels. (3-0) Cr. 3. F.S. Prereq: 340. Focuses on marketing channels, the downstream part of a value chain, companies that come together to bring products and services from their point of origination to consumers. Topics include channel institutions, channel design, channel coordination and implementation. Highlights international and technological aspects of marketing channels so that students can Successfully develop and manage marketing channels in a contemporary business environment.

Mkt 453. Brand Management. (3-0) Cr. 3. F.S. Prereq: 447. Examines the role of brands and branding in market environments characterized by intense competition and consumer power. Covers issues relating to why branding is important to firms, what brands represent to consumers, and what should be done to manage them effectively.

Mkt 492. Comparative Marketing. (3-0) Cr. 3. S.S. Prereq: 340. Provides experience to students in culture, social, economic, and political environment of marketing in a foreign country. Students complete a term project (e.g., a marketing plan) based on information collected in the foreign country. Students attend briefings by experts/officials of private and public organizations. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

Mkt 504. Marketing. (2-0) Cr. 2. Prereq: Graduate classification. The scope of marketing and the identification and assessment of marketing opportunities. Consumer behavior and decision-making processes and the role of research in the marketing planning process. Market definition and analysis, segmentation, competitor analysis, targeting and strategic decisions involved in developing the marketing program. Developing marketing mix strategies and relating them to the overall strategic marketing plan. Organizational design for marketing strategy implementation and control, and effectiveness.

Mkt 540. Marketing Management. (3-0) Cr. 3. F.S. Prereq: 504. Strategic marketing and decision making, with emphasis on cases utilizing qualitative and quantitative techniques and marketing models.

Mkt 541. International Marketing. (3-0) Cr. 3. F. Prereq: 504, 509. Scope and nature of global marketing operation; the context of international environment in which firms operate. Recent developments of international business activities, and a framework for better understanding of the basic forces driving international business and marketing operations. Development of market entry strategies and global marketing mix policies, as well as export operations. Organizational issues related to the globalization of the firm.

Mkt 542. New Product Development and Marketing. (3-0) Cr. 3. S. Prereq: 504. Principles and concepts of new product development and introduction; decision areas include market definition and structure, idea generation, concept evaluation, test marketing, launch tracking, and global product planning; models and techniques of new product evaluation used by consumer product companies.

Mkt 544. Marketing Research. (3-0) Cr. 3. S. Prereq: 504, Stat 328 or 401. Marketing research methods are examined with emphasis on the use of advanced research methods in business research. Application of advanced sampling, measurement, and data analysis methods in research on market segmentation, market structure, consumers' perceptions and decision processes, marketing communication, new product development, and pricing.

Mkt 545. Integrated Marketing Communication. (3-0) Cr. 3. Prereq: 504. Introduces the student to the field of marketing communications. Covers a number of topics and areas essential for understanding how to design and evaluate communication strategies necessary for the successful marketing of products and services. An integrated marketing communications (IMC) perspective is employed in covering material, with a corresponding focus on various elements of an IMC strategy, including advertising, promotions, point-of-purchase communications, direct marketing techniques, and other topics.

Mkt 547. Consumer Behavior. (3-0) Cr. 3. S. Prereq: 504. The behavior of consumers. Intensive review of literature from relevant disciplines. Applications of concepts and methods of the behavioral sciences to marketing management decision making.

Mkt 549. Global Marketing Planning and Execution. (3-0) Cr. 3. Prereq: 501, 504, 509. Allows students to develop and execute a B2B business by integrating aspects of marketing with other business functions in the international context. Product strategy, innovation, foreign market entry, supply strategies for foreign markets, pricing strategy, market research, customer service, international payments, managing international subsidiaries, licensing, distribution strategy, and responding to changing international environmental conditions. Involves a simulation-based instruction in planning and managing an international B2B business.

Mkt 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of marketing.

Courses for graduate students

Mkt 601. Seminar in Consumer Behavior. (3-0) Cr. 3. Prereq: Mgmt 601. A rigorous foundation of the major conceptual and methodological paradigms in the consumer behavior literature. Seeks to aid students in understanding the psychological, sociological, and anthropological roots of consumer behavior research. Read the latest research in the area reported in leading consumer behavior/psychology journals.

Mkt 602. Marketing Strategy. (3-0) Cr. 3. Prereq: Mgmt 601. Review major contributions and recent developments in marketing strategy research and practice. Review commonly used modeling approaches and research methods to study strategic interaction between firms seeking to build competitive advantages. Provide an overview of empirical research regarding measurement, level and persistence of business success and implications of findings for theory and strategy development.

Mkt 603. Customer Management Strategy and Implementation. (3-0) Cr. 3. Prereq: Mkt 601. Addresses key strategy and implementation issues behind customer management. Topics such as typology of CM strategies, antecedents and outcomes, environmental and managerial influences on CM strategy, technology and impact on CM strategy; and value of CM strategy. Examine theories and concepts behind important CM issues such as customer satisfaction, customer loyalty and customer profitability.

Mkt 604. Marketing Issues in Inter-Organizational Relations. (3-0) Cr. 3. Prereq: Mgmt 602. Inter-firm and network competition; relationship among suppliers, distributors, alliance partners, external employees, and internal employees. Theories including agency theory, network theory, relationship marketing, channels of distribution theories on cooperation versus competition, I/O theories.

Mkt 644. Research Methods. (3-0) Cr. 3. Prereq: Knowledge of introductory Statistics, Stat 401, enrollment in the PhD program. Introduction to methodological issues that arise when addressing a wide variety of research questions in organizational and consumer studies. Address measurement issues (scales, reliability and construct validity), design (for experiments, surveys, or qualitative studies), sampling, and analysis (univariate and multivariate Statistical procedures). Measurement issues in cross-cultural and international research will also be covered. It is assumed that students entering the course have knowledge of introductory Statistics.

Mkt 650. Research Practicum I. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

Mkt 651. Research Practicum II. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Materials Engineering

(Administered by the Department of Materials Science and Engineering)

Richard Lesar, Chair of Department

Distinguished Professors: Gschneider, Pedharsky, Thiel, Thompson, Trivedi

Distinguished Professors (Emeritus): Verhoeven

University Professors: S. Martin

Professors: Akin, Chumbley, Genalo, Gleeson, King, Lesar, Levis, Mallapragada, Rajan, Russell, Shechtman

Professors (Emeritus): Larsen, D. Martin, McGee, Patterson, J. Smith, Wechsler, Wilder

Professors (Adjunct): Anderson, McCullum

Professors (Collaborators): Jiles, Tsukruk

Associate Professors: Bowler, K. Constant, Napolitano, X. Tan, Ustandag

Associate Professors (Adjunct): Athreya, Biner, Kramer

Assistant Professors: Beckman, Chaudhary, Hong, Kessler, Lin

Assistant Professors (Adjunct): Selby

Lecturer: A. Constant, M. Martin
Undergraduate Study

For the undergraduate curriculum in materials engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Accreditation Committee of ABET. Materials engineering is a broadly-based discipline relating the composition, microstructure, and processing of materials to their properties, uses and performance. Materials engineering includes a variety of traditional and modern technologies involving metals, ceramics, polymers, composites, and electronic materials.

Because of its interdisciplinary nature, career opportunities for materials engineers bridge all industrial and government sectors including: materials based technologies (materials production), communication/information technologies (semiconducting materials, fiber optics), medical/environmental technologies (biomedical, energy production, waste containment), nanotechnologies consumer products (building and construction, durable goods), and transportation industries (automotive, aerospace).

The objectives of the materials engineering program are to produce graduates who

- practice materials engineering in a broad range of industries including materials production, semiconductors, medical/environmental, consumer products, and transportation products
- respond to environmental, social, political, ethical and economic constraints to improve the quality of life in Iowa and the world
- work independently and in teams and are proficient in written, oral and graphical communication
- engage in lifelong learning in response to the rapidly expanding knowledge base and changing environment of our world
- engage in advanced study in materials and related or complementary fields.

Graduates in materials engineering are able to apply scientific and engineering principles to select or design the best materials to solve engineering problems. They are also able to control the microstructure of materials through processing to optimize properties for a specific application. They are skilled in creative, independent problem solving under time and resource constraints. Graduates will have gained experience in materials engineering practice through cooperative work experience or internships in industry, national laboratories, or other funded research work. They will have hands-on skills with a broad range of modern materials processing and characterization equipment and methods.

A degree in materials engineering relies on a strong foundation of math, chemistry and physics. The core materials courses include fundamentals of materials, kinetics and thermodynamics, mechanophysical properties, computational methods, design, and professional practice experience. Students tailor their program to their goals and interests through the selection of two areas of specialization from the four available: ceramic materials, electronic materials, metallic materials and polymeric materials. In lieu of the second specialty from the four listed, a student may propose an individually designed, alternative career path. Satisfactory-fail only.

This curriculum is approved by the College of Engineering, Curricula and Phase Equilibria in Materials Engineering. (3-0) Cr. 3. F.S.SS. Prereq: 216, Chem 167 or 177, Math 165. Introduction to the structure of metals, polymers and ceramics. Crystal structure and imperfections in metals. Diffusion, mechanical properties, and failure mechanisms. Phase equilibrium diagrams and heat treatment principles for steels, composite materials, and aluminum alloys. Engineering applications. Only one of Mat E 215, 272, or 392 may count toward graduation.

Mat E 298. Cooperative Education. Cr. F. S.SS. Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Mat E 298 and for Mat E majors only Mat E 334. Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED’s. Nonmajor graduate credit.

Materials Engineering 297
Mat E 362. Principles of Nondestructive Testing. (Cross-listed with E M I). (3-0) Cr. 3. S. Prereq: Phys 112 or 222. Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of tests; materials to which applicable; types of defects detectable; calibration standards, and reliability safety precautions. Nonmajor graduate credit.

Mat E 362L. Nondestructive Testing Laboratory. (Cross-listed with E M I). (0-0) Cr. 1. S. Prereq: Credit or enrollment in 362. Application of nondestructive testing techniques and sizing of flaws in materials and to the characterization of material's microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. Field trips to industrial laboratories. Nonmajor graduate credit.

Mat E 370. Toying with Technology. (Cross-listed with CPR E). (2-2) Cr. 3. F. Prereq: C 201. Junior standing in non-engineering major. A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on laboratory experiences based upon simple systems constructed out of LEGO’s and controlled by small microcomputers. Future K-12 teachers will leave the course with complete lesson plans for use in their upcoming careers.

Mat E 388. Sustainable Engineering and International Development. (Cross-listed with A E, C E, E E, M E). (2-2) Cr. 3. F. Prereq: Junior classification in engineering. Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report.

Mat E 391. Introduction to US Women’s roles in Industry and Preparation for Summer Study. (3-0) Cr. 3. S. Introduction to the historical role of women as related to US industry, family and community with emphasis on the years 1830 - 1945, but also related to the current climate. Topics completed in 392 with arranged lectures at Brunel University. Orientation for Brunel summer study program. Credit for graduation allowable only upon completion of Mat E 392. Satisfactory-fail only.

Mat E 392. Principles of Materials Science and Engineering. (3-0) Cr. 3. S. Prereq: 391, Chem 167 or 177 Structure and properties of ceramic, electronic, polymeric and metallic materials, emphasizing differences based on structure and bonding. Phase equilibria and phase transformations. Taught on Brunel University campus. Only one of Mat E 215, 272, or 392 may count toward graduation. Satisfactory-fail only.

Mat E 397. Engineering Internship. Cr. R. Repeatable. S. Prereq: Permission of department and Engineering Career Services; junior classification. Professional work period, one semester maximum per academic year.

Mat E 398. Cooperative Education. Cr. R. F.S.S.S. Prereq: 298, permission of department and Engineering Career Services. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Mat E 413. Materials Design and Professional Practice I. (2-2) Cr. 3. F. Prereq: Senior Status in Mat E. Fundamentals of materials engineering design, information sources, team behavior, professional preparation, quantitative design including finite-element analysis, materials properties and selection, informatics and combinatorial methods. Analysis of design problems, development of solutions, selected case studies. Oral presentation skills. Preparations for spring project.

Mat E 442. Polymers and Polymer Engineering. (Cross-listed with Ch E). (3-0) Cr. 3. S. Prereq: Ch E 382 and Chem 331 or Mat E 351. Chemistry of polymers, addition polymerization, physical and mechanical properties, polymer rheology, production methods. Applications of polymers in the chemical industry. Nonmajor graduate credit.

Mat E 444. Corrosion and Failure Analysis. (2-3) Cr. 3. S. Prereq: 216 and credit or enrollment in 418. Corrosion and corrosion control of metallic systems. Corrosion fundamentals, classification of different types of metallic corrosion, corrosion properties of various engineering alloys, and failures. Failure analysis. Characteristics of common types of metallic failures, case studies of failures, designing to reduce failure risk. Nonmajor graduate credit.

Mat E 453. Physical and Mechanical Properties of Polymers. (Dual-listed with M S E 553). (3-0) Cr. 3. F. Prereq: 351. Basic concepts in polymer composites, blends, and block copolymers. Phase separation and miscibility, microstructures and mechanical behavior. Fiber reinforced and laminated composites. Viscosity, rheology, viscoelasticity of polymers. Polymer melt processing methods such as injection molding and extrusion, selection of suitable processing methods and their applications. Nonmajor graduate credit.

Mat E 456. Biomaterials. (Dual-listed with M S E 558). (3-0) Cr. 3. S. Prereq: 216 or 272 or 392. Presentation of the basic chemical and physical properties of biomaterials, including metals, ceramics, and polymers, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

Mat E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Aer E, CPR E, E E, Engr, I E, M E). (1-4) Cr. 3. Repeatable. F. Prereq: Student must be within two semesters of graduation and receive permission of the instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, computer simulations, computer models and engineering drawings.

Mat E 490. Independent Study. Cr. arr. Repeatable. Investigation of individual research or special topics.

Mat E 498. Cooperative Education. Cr. R. Repeatable. S. Prereq: 388, permission of department and Engineering Career Services. Third and subsequent professional work period under the cooperative education program. Students must register for this course before commencing work.

Materials Engineering 2009-2011
Materials Science and Engineering

Graduate Study

The department offers work toward the following advanced degrees: Master of Science in Materials Science and Engineering and Doctor of Philosophy in Materials Science and Engineering.

Built on a foundation of thermodynamics, kinetics of phase transformations, mechanical behavior, physical properties, solid state science, and the structure and chemistry of materials, the graduate program offers advanced studies in many areas of materials science and engineering, including the design and control of materials for structural, electronic, photonic, magnetic, optical, and biological functionality. Graduates of the program have a fundamental understanding of the critical aspects of the field and how they are applied to real materials systems. The program is highly flexible and research-oriented, where students work carefully with their major professor in tailoring the various academic and research components to meet their interests.

With the ability to address complex problems in materials science while considering the various constraints and constraints to both academic and industrial environments, our graduates are well prepared for a wide range of academic and research-related careers. They are skilled in carrying out independent and collaborative research, able to communicate effectively in formal and informal settings, and proficient at writing persuasive technical articles and grant proposals.

The department boasts excellent facilities for academic materials research, maintaining a wide range of faculty laboratories across the ISU campus. In addition, departmental research is highly integrated with the operation of several Research Centers, such as the Ames Laboratory, the Center for Nondestructive Evaluation, the Microelectronics Research Center, and the Center for Advanced Technology Development. These laboratories offer excellent resources and opportunities for graduate student research.

Prerequisite to major graduate work is completion of an undergraduate curriculum in physical science, biological science, or engineering discipline. Graduate students from disciplines other than materials science and engineering may expect that supplemental coursework will be needed, in addition to the required graduate coursework. Well qualified students (juniors) enrolled in the undergraduate materials engineering program at Iowa State University can apply to the Graduate College for admission to the concurrent enrollment program, where students may simultaneously pursue both master of science and bachelor of sciences degrees.

The requirements for the M.S. and Ph.D. degrees are established by the student’s program of study committee within the established guidelines of the Graduate College. Minimum requirements include coursework, research, proposal, preliminary oral examination (Ph.D. only), dissertation, and a final oral examination. Academic coursework requirements include 18 credits for the M.S. degree and 24 credits for the Ph.D., with additional specific rules for choices available from the department.

There are no foreign language requirements for either of the graduate degrees administered by the Department of Materials Science and Engineering. Graduate students wishing to declare a formal minor in materials science and engineering will have at least one major course in science and engineering, and a faculty member serving on their program of study committee. For the M.S. and Ph.D. degrees, they will take a minimum of 8 and 12 materials science and engineering course credits, respectively.

Courses primarily for graduate students, open to qualified undergraduate students

M S E 520. Thermodynamics and Kinetics in Multicomponent Materials. (3-0) Cr. 3. F. Prereq: Mat E 311 or Chem 321, Math 266 or Math 267. A review of the fundamental principles of heat, work, basic thermodynamic relations, and criteria for equilibrium. Analytical treatments for the thermodynamic description of multicomponent chemical solutions and reacting systems are developed and employed to predict phase equilibria in materials systems. Builds on the thermodynamic construction to treat t kinetic energetics of chemical reactions and phase transformations. Topics include general first order and second order transitions, along with chemical diffusion. Detailed examples involving nucleation and diffusion limited growth, spinodal decomposition, martensitic transformations, magnetic and electric transitions, and glass formation will be considered.

M S E 540. Mechanical Behavior of Materials. (3-0) Cr. 3. F. Prereq: Mat E 418, Math 266 or Math 267. Mechanical behavior of materials with emphasis on micromechanics of deformation in three generic regimes: elasticity, plasticity, and fracture. A materials science approach is followed to understand and model the mechanical behavior that combines continuum mechanics, thermodynamics, kinetics, and microstructure. Some topics include elastic properties of materials, permanent deformation mechanisms at different temperatures (e.g., dislocation motion and creep), and fracture in ductile and brittle materials. Specific classes of materials that are studied: metals, ceramics, polymers, glasses and composites.

M S E 550. Fundamentals of Nondestructive Evaluation. (Cross-listed with E M). (3-2) Cr. 4. S. Prereq: M E 324, Math 268. Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, computed tomography, and thermoelectrically analyzed. Laboratory experiments on all basic methods: ultrasonics, eddy currents, x-ray, liquid penetrants, magnetic testing, and visual inspection are performed.

M S E 553. Physical and Mechanical Properties of Polymers. (Duality-listed with Mat E 453). (3-2) Cr. 3. F. Prereq: Mat E 361. Overview of polymer chemical composition, microstructure, thermal and mechanical properties, rheology, and principles of polymer materials selection. Intensive laboratory experiments include chemical composition studies, microstructural characterization, thermal analysis, and mechanical testing.

M S E 554. Polymer Composites and Processing. (Duality-listed with Mat E 454). (3-2) Cr. 3. S. Prereq: Mat E 361. Basic concepts in polymer composites, blends, and block copolymers. Phase separation and miscibility, microstructures and mechanical behavior. Fiber reinforced and laminated composites. Viscosity, rheology, viscoelasticity of polymers. Polymer melt processing methods such as injection molding and extrusion; selection of suitable processing methods and their applications.

M S E 555. Advanced Polymer Materials. (3-0) Cr. 3. S. Prereq: Mat E 361. Overview of basic principles of polymeric materials and their applications. Recently introduced polymeric materials (functional block-copolymers, biomedical, conductive, nanocomposites, electrooptical, non-linear optical polymers) and prospective applications in functional coatings, artificial implants, microelectronics, chemo/bio-sensors, and optical computing.

M S E 556. Biomaterials. (Duality-listed with Mat E 456). (3-0) Cr. 3. S. Prereq: Mat E 216 or 272 or 392. Presentation of the basic chemical and physical properties of biomaterials, including metals, ceramics, and polymers, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.
M S E 564. Fracture and Fatigue. (Cross-listed with E M, M. E. (3-0) Cr. 3. F. Prereq: E M 324 and either Mat E 216 or 272 or 392. Undergraduates: Permission of instructor. Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture toughness, fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

M S E 570. Toying With Technology for Practicing Teachers. (Cross-listed with C I). (2-0) Cr. 2. SS. Prereq: C I 201, non-engineering major. A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on experiences based upon simple systems constructed out of LEGO’s and controlled by small microcomputers. Other technological advances with K-12 applications will be explored. K-12 teachers will leave the course with complete lesson plans for use in their classrooms.

Courses primarily for graduate students

M S E 610. Academic Teaching Practices. (2-0) Cr. 2. Repeatable. F.S. Prereq: Permission of instructor. Provides instruction and directed experience in undergraduate level teaching practices. Students engage in lesson planning, classroom/laboratory teaching, student assessment, web-based lessons, and other aspects of academic course delivery.

M S E 697. Engineering Internship. Cr. R. Repeatable. F.S.S. Prereq: Permission of department, graduate classification. One semester and one summer maximum per academic year professional work period. Satisfactory-fail only.

Graduate Study

The department offers programs leading to a master of science or doctor of philosophy degree in mathematics or applied mathematics, as well as minor work for students whose major is in another department. The department also offers a program leading to the degree of master of school mathematics (M.S.M.).

Students desiring to undertake graduate work leading to the M.S. or Ph.D. degree should have at least 12 semester credits of work in mathematics beyond calculus. It is desirable that these credits include advanced calculus and abstract algebra.

The M.S. degree requires at least 30 credits and students must write a creative component or thesis and pass a comprehensive oral examination over their coursework and their creative component or thesis. See the department handbook for specific requirements.

The Ph.D. degree requires a student to take 54 hours of coursework in addition to research hours, pass written qualifying examinations, pass an oral preliminary exam, and perform an original research project culminating in a dissertation

Graduates understand a broad range of mathematical topics and are familiar with a broad range of mathematical models. They have skills for solving problems in diverse situations. They can construct rigorous arguments to demonstrate mathematical facts. They can communicate their mathematical methods to others and can justify their assumptions.

The requirements for an undergraduate major include:

(a) Math 165, 166, 201, 265, 317, 301, 414, and either 266 or 267.

(b) 15 additional credits in mathematics courses at the 300 level or above.

(c) The courses used to satisfy a) and b) above must include one of the sequences 301, 302; 414, 415; 435, 436.

(d) In addition to the credits in (b), either Math 492 or 2 credits of CI LAS 480C. (CI LAS 480C is available only for students seeking secondary school certification).

(e) Communication Proficiency requirement: The department requires a grade of C– or better in each of English 150 and 250 (or 250H) and an upper-level communication skills requirement that may be met by writing an acceptable undergraduate thesis (Math 491) or by taking at least one of Eng 302, 305, 314 or JM MC 201. A grade of C– or better is required.

The department strongly recommends that each student majoring in mathematics include in the program substantial supporting work beyond the minimum general education requirement of the college in one or more areas of application of mathematics, such as other mathematical sciences, engineering, natural science, or social science. In particular, it recommends that each student take Corn S 207, 208; Phys 221, 222; and Stat 341, 342 (or Math 304). It also recommends that students contemplating graduate study in mathematics acquire a reading knowledge of French, German, or Russian. Credits earned in Math 104, 105, 140, 141, 150, 151, 160, 181, 182, 195, 196, cannot be counted toward graduation by mathematics majors.

The department offers a minor in mathematics which may be earned by credit in Math 201, 265, 266 or 267, (307 or 317), and 301.
which is defended by an oral exam. Ph.D. candidates must have at least one year of supervised teaching experience. See the on-line Mathematics Graduate Handbook for specific requirements.

The M.S.M. degree is primarily for inservice secondary mathematics teachers. Students desiring to pursue the M.S.M. degree should present some undergraduate work in mathematics beyond calculus. Candidates for the M.S.M. degree must write an approved creative component and pass a comprehensive oral examination over their course work and their creative component.

Courses primarily for undergraduate students

Math 010. High School Algebra. (4-0) F.S.SS. For students who do not have adequate facility with topics from high school algebra or do not meet the algebra admission requirement. The course is divided into tracks of one- and two-semester lengths. For most students a diagnostic exam will determine which track must be taken. Students will receive a grade in Math 25 or 30 respectively depending on the level of material covered. Satisfactory completion of Math 30 is recommended for students planning to take Math 140 or 151, while Math 25 is sufficient for Math 104, 105, 150, 195, Stat 101 or 105. Students must complete Math 30 to remove a deficiency in the algebra admission requirement. Topics include signed numbers, polynomial and radical expressions, exponential and logarithmic expressions, and equations. Satisfactory-fail only.

Math 025. High School Algebra. (4-0) F.S.SS. Students should initially enroll in Math 10. See description of Math 10. Satisfactory-fail only.

Math 030. High School Algebra. (4-0) F.S.SS. Students should initially enroll in Math 10. See description of Math 10. Satisfactory-fail only.

Math 101. Orientation in Mathematics. C. R. F. For new majors. Issued to consider in planning a program of study. Sources of general information and perspectives concerning mathematics. Discussion of possible areas of study and careers. Satisfactory-fail only.

Math 104. Introduction to Probability and Matrices. (3-0) C. 3. F.S. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Permutations and combinations, probability, binomial and multinomial theorems, matrices, expected value. Either Math 104 or 150 may be counted toward graduation, but not both.

Math 105. Introduction to Mathematical Ideas. (3-0) C. 3. F.S. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Coordinate geometry, complex numbers, quadratic and polynomial equations, functions, graphing, linear, polynomial and rational functions, exponential and logarithmic functions, inverse functions, linear inequalities, systems of equations. Students in the College of Liberal Arts and Sciences may not count Math 140, 141, 142, or 195 toward Group III of the General Education Requirements.

Math 141. Trigonometry. (2-0) C. 2. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry, or enrollment in 140. May be taken concurrently with 140. Trigonometric functions and their inverses, solving triangles, trigonometric identities and equations, graphing. Students in the College of Liberal Arts and Sciences may not count Math 140, 141, 142, or 195 toward Group III of the General Education Requirements. Only one of Math 141, 142 may count toward graduation.

Math 142. Trigonometry and Analytic Geometry. (2-1) C. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry, or enrollment in 140. May be taken concurrently with 140. Trigonometric functions and their inverses, solving triangles, trigonometric identities and equations, graphing, polar coordinates, complex numbers, standard equations of lines and conic sections, parametric equations. Students in the College of Liberal Arts and Sciences may not count Math 140, 141, 142, or 195 toward Group III of the General Education Requirements. Only one of Math 141, 142 may count toward graduation.

Math 150. Discrete Mathematics for Business and Social Sciences. (2-1) C. 3. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Linear equations and inequalities, matrix algebra, linear programming, discrete probability. Either Math 104 or 150 may be counted toward graduation, but not both.

Math 151. Calculus for Business and Social Sciences. (2-1) C. 3. F.S. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Differential calculus, applications to max-min problems, integral calculus and applications. Will not serve as prerequisite for 285 or 286. Only one of Math 151, 160, the sequence 165-166, or the sequence 181-182 may be counted toward graduation.

Math 160. Survey of Calculus. (4-0) C. 4. F.S. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of geometry. Analytic geometry, derivatives and integrals of elementary functions, partial derivatives, and applications. Will not serve as a prerequisite for 285 or 286. Only one of Math 151, 160, the sequence 165-166, or the sequence 181-182 may be counted toward graduation.

Math 165. Calculus I. (4-0) C. 4. F.S.SS. Prereq: Satisfactory performance on placement exam, 2 years of high school algebra, 1 year of high school geometry. Differential calculus, applications of the derivative, introduction to integral calculus. Only one of Math 151 or 160 or the sequence 165-166, or the sequence 181-182 may be counted toward graduation. Math 166. Calculus II. (4-0) C. 4. F.S.SS. Prereq: Grade of C- or better in 165 or high math placement scores. Integral calculus, applications of the integral, infinite series. Only one of Math 151, 160, the sequence 165-166, or the sequence 181-182 may be counted toward graduation.

Math 166H. Honors Calculus II. (4-0) C. 4. F.S. Prereq: Permission of the instructor and 165 or high math placement scores. Integral calculus, applications of the integral, infinite series. Additional material of a theoretical, conceptual, computational, or modeling nature. Some of the work may require more ingenuity than is required in Math 165. Preference will be given to students in the University Honors Program.

Math 279. Intermediate Topics for School Mathematics. (2-2) C. 3. F.S. Prereq: Enrollment in elementary education and grade of C- or better in 165. Mathematical reasoning, data fitting, and topics in Euclidean and non-Euclidean geometry. Discrete mathematics topics selected from graphs, networks, recurrence relations, probability, Markov chains. Use of technology to learn and teach mathematics.

Mathematics 301. Mathematics for Elementary Education I. (2-2) C. 3. F.S. Prereq: Satisfactory performance on placement exam, 2 years high school algebra, 1 year of high school geometry, enrollment in elementary education or early childhood education. Theoretical and hands-on models; standard and non-standard algorithms and properties related to whole numbers and whole number operations. Students in the College of Liberal Arts and Sciences may not count Math 140, 141, 142, or 195 toward Group III of the General Education Requirements.

Math 301. Mathematics for Elementary Education II. (2-2) C. 3. F.S. Prereq: Grade of C- or better in 165 and enrollment in elementary education. Two-and three-dimensional measurement, probability, data fitting, statistics, operations and algorithms for computing with integers, fractions, and decimals.

Math 301. Introduction to Proofs. (3-0) C. 3. F.S. Prereq. 166 or 166H. Reading and writing simple proofs, using logical reasoning, including quantifiers and truth tables. Proof Techniques. Mathematical induction. Proofs in set theory, number theory, and calculus.

Math 303. Calculus III. (4-0) C. 4. F.S.SS. Prereq: Grade of C- or better in 165 or 166. Analytic geometry and vectors, differential calculus of functions of several variables, multiple integrals, vector calculus. Additional material of a theoretical, conceptual, computational, or modeling nature. Some of the work may require more ingenuity than is required in Math 265. Preference will be given to students in the University Honors Program.

Math 304. Introductory Combinatorics. (3-0) Cr. 3.
Prereq: 166 or 168H. 201 or experience with proofs.
Permutations, combinations, binomial coefficients, inclusion-exclusion principle, recurrence relations, generating functions. Additional topics selected from probability, random walks, and Markov chains. Nonmajor graduate credit.

Math 307. Matrices and Linear Algebra. (3-0) Cr. 3.
F.S.SS. Prereq. 2 semesters of calculus.
Systems of linear equations, determinants, vector spaces, linear transformations, orthogonality, least-squares methods, eigenvalues and eigenvectors. Emphasis on methods and techniques. Only one of Math 307, 317 may be counted toward graduation. Nonmajor graduate credit.

Math 314. Graphs and Networks. (3-0) Cr. 3.
S. Prereq. 166 or 168H. 201 or experience with proofs.
Structure and external properties of graphs. Topics are selected from: trees, networks, colorings, paths and cycles, connectivity, planarity, Ramsey theory, forbidden structures, enumeration, applications.
Nonmajor graduate credit.

Math 317. Theory of Linear Algebra. (4-0) Cr. 4.
S. Prereq: 166. credit or enrollment in 201. Systems of linear equations, determinants, vector spaces, inner product spaces, linear transformations, eigenvalues and eigenvectors. Emphasis on writing proofs and results. Only one of Math 307, 317 may be counted toward graduation. Nonmajor graduate credit.

Math 331. Topology. (3-0) Cr. 3. Alt. S., offered 2011.
Prereq: 307 or 317. Topological properties of metric spaces, including Euclidean n-space, continuous functions, homeomorphisms, and topological invariants. Examples from surfaces, knots, links, and three-dimensional manifolds. Nonmajor graduate credit.

S. Prereq. Math 265 and Stat 385. Probability; distribution functions and their properties; classical discrete and continuous distribution functions; multivariate probability distributions and their properties; moment generating functions; simulation of random variables and use of the R statistical package.

Math 342. Introduction to the Theory of Probability and Statistics II. (Cross-listed with Stat). (3-0) Cr. 3.
S. Prereq. Math 265 and Stat 385. Math 301 or 307 or 317. Transforms of random variables; sampling distributions; confidence intervals and hypothesis testing; theory of estimation; estimation; linear model theory; enumerative data; use of the R statistical package for simulation and data analysis.

Math 350. Number Theory. (Cross-listed with Com S). (3-0) Cr. 3.
S. Prereq. 166. Divisibility, integer representations, primes and divisors, linear diophantine equations, congruences, and multiplicative functions. Applications to cryptography. Nonmajor graduate credit.

Math 365. Complex Variables with Applications. (3-0) Cr. 3.
S. Prereq. 265. Functions of a complex variable, including differentiation, integration and series expansions, residues, evaluation of integrals, conformal mapping. Nonmajor graduate credit.

Math 373. Introduction to Scientific Computation. (3-0) Cr. 3.
S. Prereq. 265 or 266. Mastery of basic programming and numerical methods. Students will gain a working knowledge of the mathematical sciences and their tools. Nonmajor graduate credit.

Math 381. Teaching Secondary Mathematics Using University Mathematics. (2-2) Cr. 3.
S. Prereq. 201. Coursework in university mathematics including calculus, abstract algebra, discrete mathematics, geometry, and other topics as they relate to teaching mathematics in grades 7-12. Prerequisite: Math 341. Students must register for this course prior to commencing each work period.

Math 415. Analysis II. (3-0) Cr. 3. S. Prereq. 414. Sequences and series of functions of a real variable, uniform convergence, power series and Taylor series, Fourier series, topology of n-dimensional space, implicit function theorem, calculus of the plane and 3-dimensional space. Additional topics may include metric spaces or Steieties or Lebesgue integration. Nonmajor graduate credit.

Math 421. Logic for Mathematics and Computer Science. (Cross-listed with Com S). (3-0) Cr. 3.
S. Prereq. Math 301 or 307 or 317 or Com S 330. Propositional and predicate logic. Topics selected from Horn logic, equational logic, resolution and unification, foundations of logic programming, reasoning about programs, unification, verification, model checking and binary decision diagrams, temporal logic and modal logic. Nonmajor graduate credit.

Math 436. Geometry II. (3-0) Cr. 3. S. Prereq. 435. Continuation of Euclidean geometry with topics from elliptic, projective, or hyperbolic geometry. Emphasis on analytic methods. Nonmajor graduate credit.

Math 441. Computational Linear Algebra and Fixed Point Iteration. (Cross-listed with Com S). (3-0) Cr. 3.
Alt. S. Prereq. 201. F. Prereq. Math 265 and either Math 266, or 267; knowledge of a programming language. Computational error, solutions of linear systems, least squares, similarity methods for eigenvalues, solution of nonlinear equations in one and several variables. Nonmajor graduate credit.

Math 449. Numerical Solution of Differential Equations and Interpolation. (Cross-listed with Com S). (3-0) Cr. 3.
Alt. S., offered 2010. Prereq. Math 265 and either Math 266 or 267; knowledge of a programming language. Polynomial and spline interpolation, orthogonal polynomials, least squares, numerical differentiation and integration, numerical solution of ordinary differential equations. Nonmajor graduate credit.

Math 481. Numerical Solution of Differential Equations. (3-0) Cr. 3.
S. Prereq. 8 credits in mathematics at the 300 level or above. Recommended credit or enrollment in 301, 414 or 435. History of mathematical ideas found in the undergraduate curriculum. It includes a discussion of the historical and cultural settings in which these ideas arose, and the influence of the culture on the type of mathematical ideas that developed. Some of the particular cultures and their mathematics that are studied include: Babylonian and Ancient Egyptian, Ancient Greek, Arabic, Indian, Western European and Chinese. Nonmajor graduate credit.

Prereq. 301 or 317; 6 credits in mathematics. No more than 9 credits of Math 490 may be counted toward graduation.

H. Honors

Math 491. Undergraduate Thesis. Cr. arr. Writing a formal mathematics paper. Upon approval by the department, the paper will satisfy the departmental advanced English requirement.

Math 492. Undergraduate Seminar. (2-0) Cr. 2.
S. Prereq. Consent of instructor. Introduction to mathematics research, a participating seminar on advanced topics in mathematics. Mathematical literature search, reading a mathematical article with the guidance of the instructor, mathematical presentation. Seminar content varies.

F.S.SS. Prereq. Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

Math 501. Introduction to Real Analysis. (3-0) Cr. 3.

Math 504. Abstract Algebra I. (3-0) Cr. 3.
F. Prereq. 302. Algebraic systems and their morphisms, including groups, rings, modules, and fields.

Math 505. Abstract Algebra II. (3-0) Cr. 3.
S. Prereq. 504. Continuation of Math 504.

Math 510. Linear Algebra. (3-0) Cr. 3.
F. Prereq. 307 or 317. Advanced topics in linear algebra including canonical forms; unitary, normal, Hermitian and positive-definite matrices; variational characterizations of eigenvalues, and applications to other branches of mathematics.

Math 511. Functions of a Single Complex Variable. (3-0) Cr. 3.
F. Prereq. 414 or 465 or 501. Theory of analytic functions, integration, topology of the extended complex plane, singularities and residue theory, maximum principle.

Math 515. Real Analysis I. (3-0) Cr. 3.
S. Prereq. 414 or 501. Lebesque measure and Lebesque integral, one variable differentiation theory, product integration, LP spaces.

Math 516. Real Analysis II. (3-0) Cr. 3.

Math 517 Finite Difference Methods. (3-0) Cr. 3.
S. Prereq. 461 or 503. Finite difference methods for partial differential equations, with emphasis on parabolic and hyperbolic equations, and other partial differential equations from application areas. Topics include convergence, stability and implementation issues.

Math 520. Methods of Applied Mathematics II. (3-0) Cr. 3. S. Prereq: 519. Continuation of Math 519.

Math 525. Numerical Analysis of High Performance Computing. (Cross-listed with Com S, Cpr E). (3-0) Cr. Math 301 or Math 310 or Com S 330. Basic concepts of secure communication, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications. Relevant material on number theory and finite fields.

Math 530. Steganography and Watermarking. (Cross-listed with Cpr E, InfAs). (3-0) Cr. 3. S. Prereq: Cpr E 308, or one of Math 471, 481; experience in scientific programming; knowledge of FORTRAN or C. Development, analysis, and testing of efficient numerical methods for use on current state-of-the-art high performance computers. Applications of the methods to the students' areas of research.

Math 533. Cryptography. (Cross-listed with Cpr E, InfAs). (3-0) Cr. 3. Prereq: Cpr E 308, or one of Math 471, 481; experience in scientific programming; knowledge of FORTRAN or C. Development, analysis, and testing of efficient numerical methods for use on current state-of-the-art high performance computers. Applications of the methods to the students' areas of research.

Math 540. Seminar in Mathematics Education. (1-0) Cr. 1. S. Prereq: Enrollment in the Master of School Mathematics program. Five to six sessions per semester. The emphasis is on relevant studies of instructional strategies and theoretical issues of research in mathematics education. Material is chosen to help students understand how to incorporate new ideas and methodologies into their own teaching.

Math 542. Investigating the Teaching and Learning of Secondary Mathematics. (1-0) Cr. 1. Repeatable. Alt. F., offered 2010. Prereq: Enrollment in master of school mathematics program, professional studies in education or by permission for secondary mathematics education majors. The purpose of this course is to provide students opportunities to engage in collaborative learning in order to improve their teaching. The course is designed for those enrolled in the master of school mathematics program.

Math 543. Topics in Mathematics Education. (1-0) Cr. 1. F. Prereq: Teaching a mathematics course. Cr. arr. Repeatable.

Math 546. Algorithms in Analysis and Their Computer Implementation. (2-2) Cr. 3. Prereq: 3 semesters in calculus or concurrent enrollment in 546 and enrollment in the master of school mathematics program. Offered on a 3-year cycle, offered SS. 2009. The use of technology in mathematics education, applied with an emphasis on the exploration and implementation of algorithms.

Math 549. Intermediate Geometry. (3-0) Cr. Prereq: 435 or equivalent and enrollment in the master of school mathematics program. Offered on a 3-year cycle, offered SS. 2009. A study of geometry with emphasis on metrics, the group of isometries, the group of similarities, and the affine group. Specific spaces studied normally include the Euclidean plane, the 2-sphere, and projective 2-space. Emphasis on analytical methods.

Math 554. Introduction to Stochastic Processes. (Cross-listed with Stat). (3-0) Cr. 3. F. Prereq: Stat 542. Markov chains on discrete spaces in discrete and continuous time (random walks, Poisson processes, birth and death processes) and their long-term behavior. Optional topics may include branching processes, renewal theory, introduction to Brownian motion.

Math 557. Ordinary Differential Equations I. (3-0) Cr. 3. F. Prereq: 415 or 465 or 501. The initial-value problem, existence and uniqueness theorems, continuous dependence on parameters, linear systems, stability and asymptotic behavior of solutions, linearization, topics from dynamical systems and two-point boundary-value problems.

Math 597. Introductory Computational Structural Biology. (Cross-listed with Bcb). (3-0) Cr. 3. S. Prereq: 561 and 562. Mathematical and computational approaches to protein structure prediction and determination. Topics include molecular distance geometry, potential energy minimization, and molecular dynamics simulation.

Math 599. Creative Component. Cr. arr.

Courses for graduate students

Math 607 Modern (Structural) Graph Theory. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 504 or permission of instructor. Structural and extremal theory of graphs. Topics include basic structures (trees, paths and cycles), networks, coloring, connectivity, graph theory, Ramsey theory, forbidden graphs and minors, introduction to random graphs, applications.

Math 610. Seminar. Cr. arr.

Math 621. Topology. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: Permission of instructor. Introduction to general topology. Topological spaces, continuous functions, compactness. Topics selected from connectedness and separation axioms, metrization, and complete metric spaces.

Math 656. Partial Differential Equations II. (3-0) Cr. 3. S. Prereq: 655. Continuation of Math 655. • design of various products for consumer and commercial markets

Mechanical Engineering

Jonathan Wickett, Chair of Department

Distinguished Professors: Bernard, R. Brown

Distinguished Professor (Emeritus): Serovy

University Professor (Emeritus): Bahadur

Professors: Chandra, Heindel, Keikar, Levitas, Molian, Nelson, Olver, Wingerd, Wechsler, de Andrade

Professors (Emeritus): Bathie, Baumgarten, Colver, Cook, Danofsky, Dajong, Eide, Hall, Hendrickson, Henkin, Junkhan, Kavannagh, Miscke, Okishi, Pate, Peters, Pletcher, Roberts, Shapiro, Spinrad, Wechsler

Associate Professors: Anex, Bastawros, Bryden, Luecke, Mann, Maxwell, Olsen, Subramanian, Sun, Dararajan, Wang

Associate Professors (Emeritus): Joensen, Vannmeter

Associate Professor (Adjunct): Gray

Assistant Professors: Bigelow, Faidley, Ganapathy-Subramanian, Kim, Kong, Meyer, Shrotriya, Stone, Winer, Zhang, Zou

Senior Lecturer: Starns

Lecturer: Feve, Heise

Undergraduate Study

For the undergraduate curriculum in mechanical engineering leading to the degree bachelor of science, see College of Engineering, Curriculum. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

Mechanical engineers are typically involved with such activities as:

• generation, distribution, and use of energy
• development and application of manufacturing systems and processes
• automation and control of mechanical and thermal systems
aesthetic considerations in design of engineering components and systems. The curriculum provides flexibility to allow students to broaden their perspectives or to focus in more depth in areas of particular interest. Organized sequences of technical electives can be chosen from areas which represent major concentrations in the field of mechanical engineering. Optional areas of specialization include energy conversion and utilization, thermal system design, mechanical system design, materials and manufacturing, nuclear engineering, thermal and environmental engineering, and vehicle propulsion.

• Elective courses provide additional emphasis in terms of the student’s unique educational goals, whether they include immediate entry into industry or further study at the graduate level. In addition, students elect courses in the humanities, social sciences, U.S. diversity and international perspectives.

• Through these courses, students develop an understanding of the societal context in which they will practice engineering, including environmental, legal, aesthetic, and human aspects. Students in mechanical engineering are encouraged to participate in the cooperative education program or to obtain engineering internships, both domestically and abroad. Study abroad is encouraged, and the department has exchange programs with several universities around the world. These experiences help students to round out their education and to better prepare for careers in the increasingly global practice of engineering.

Nuclear Engineering Minor

The nuclear engineering minor is multidisciplinary and open to undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from a list of courses available through the Mechanical Engineering Advising Center. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Graduate Study

The department offers work for the degrees of master of science and doctor of philosophy with a major in mechanical engineering. The master of science degree may be earned with or without a thesis. Although co-major and formal minor programs are not available, mechanical engineering, courses may be used for minor work by students taking major work in other departments.

The graduate program offers advanced study in a variety of thrust areas, including biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization.

The department offers students the opportunity to broaden their education by participating in minor programs in established departments, interdepartmental programs, or other experiences as approved by their program of study committees.

The requirements for advanced degrees are established by the student’s program of study committee within established guidelines of the Graduate College. Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduate students in the department can expect that additional supporting coursework will be required. A foreign language requirement exists for the degree of doctor of philosophy only if the student’s program of study committee deems it appropriate to a specific program of study.

Courses primarily for undergraduate students

M E 190. Learning Communities. 1-0 Cr. 1. Repeatable. F.S. Enrollment in M E learning communities.

M E 270. Introduction to Mechanical Engineering Design. (1-0) Cr. 3. F.S. Prereq: Engr 170, Phys 221. Introduction to fundamentals of mechanical engineering design with applications to thermal and mechanical systems. Examination of existing machines and systems. Team-based projects, open-ended problems and prototyping. Application of engineering tools. Oral and written reports required.

M E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department. First professional work period in the cooperative education program. Students must register for this course before commencing work.

M E 324. Manufacturing Engineering. (3-2) Cr. 4. F.S. Prereq: 270, M E 324, Mat E 272. Plastic deformation and manufacturing processes including forming, machining, casting and welding with emphasis on manufacturing considerations in design. Modern manufacturing practices. Laboratory exercises will be an integral component of the course. Nonmajor graduate credit.

M E 330. Thermodynamics. (3-0) Cr. 3. F.S. Prereq: Phys 222. For students electing one course in engineering thermodynamics. First and second laws of thermodynamics. Properties and processes for pure substances. Selected applications including cycles for power and refrigeration, heat engines, and propulsors. Credit for either M E 231 or 330, but not both, may be applied toward graduation. Majors in mechanical engineering may not apply M E 330 toward a degree in mechanical engineering.

M E 335. Fluid Flow. (3-2) Cr. 4. F.S. Prereq: Credit or enrollment in 332 and 370, E M 345, Math 266 or 267. Incompressible and compressible fluid flow fundamentals. Determining analysis and simulation. Internal and external flow applications. Lab experiments emphasizing concepts in thermodynamics and fluid flow. Written reports are required. Nonmajor graduate credit.

M E 388. Sustainable Engineering and International Development. (Cross-listed with A E, C E, E E, Mat E). (2-2) Cr. 3. F.S. Prereq: Junior classification in engineering. Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as non-government organizations (NGOs). Course readings, final project/design report.

M E 410. Mechanical Engineering Applications of Mechatronics. (2-3) Cr. 3. S. Prereq; E E 442, 448, credit or enrollment in 421. Fundamentals of sensor characterization, signal conditioning and motion control, coupled with concepts of embedded computer control. Digital and analog components used for interfacing with computer controlled systems. Mechanical system analysis combined with various control approaches. Focus on automation of hydraulic actuation processes. Laboratory experiences provide hands-on development of mechanical systems. Nonmajor graduate credit.

M E 412. Ethical Responsibilities of a Practicing Engineer. (3-0) Cr. 3. F. Prereq: Credit or enrollment in 325, senior classification in engineering. Failure modes associated with product environment. Interaction between the legislator, legislative bodies, standards, and the design engineer, using a case study approach in design applications. Litigation involving designs, standards, and laws applicable to specific designs surveyed. The influence of laws and standards upon design. Nonmajor graduate credit.

M E 414. Hydraulic Systems and Control. (3-0) Cr. 3. F. Prereq: 421, 335. Characteristics of hydraulic motors and pumps, system components, system analysis, feedback control and stability, control circuits, computer simulation. Nonmajor graduate credit.

M E 415. Mechanical Systems Design. (0-6) Cr. 3. F.S. Prereq: 324, 325. Solution of a total design problem involving a mechanical system, documentating decisions concerning form and function, material specification, manufacturing methods, safety, cost, and conformance with codes and standards. Solution description includes oral and written reports. Nonmajor graduate credit.

Mechanical Engineering

M E 418. Mechanical Considerations in Robotics. (3-0) Cr. 3. S. Prereq: 421. Three dimensional kinematics, dynamics, and control of robot manipulators, hardware elements and sensors. Laboratory experiments using industrial robots. Nonmajor graduate credit.

M E 423. Creativity and Imagination for Engineering and Design. (3-0) Cr. 3. S. Prereq: Junior classification in mechanical engineering. Historical examples of technical innovations based on creativity and imagination. Introduction to the psychology and theory of creativity and imagination. Background and simplified exercises in the creative arts, including poetry (both free verse and prose) and the visual arts (both two and three dimensional), for skill strengthening. Additional exercises in creative and imaginative thinking. Application of creative and imaginative skills for formulating conceptual design solutions. Additional applications related to technology including problem solving and inventing.

M E 425. Optimization Methods for Complex Designs. (Dual-listed with 525). (3-0) Cr. 3. S. Prereq: Engr 160, Math 265. Optimization techniques including unconstrained and constrained minimization, linear programming, and the use of the swarm optimization. Both the theory and methods and the application to complex designs will be presented. Nonmajor graduate credit.

M E 433. Alternative Energy Conversion. (3-0) Cr. 3. F. Prereq: Phys 221/222 and Chem 167. Basic principles, thermodynamics, and performance of alternative energy conversion systems such as direct energy conversion (fuel cells, photovoltaics, magnetohydrodynamics), wind energy, biomass energy, non-combustion thermal sources (lunar geothermal, geothermal and nuclear fusion) and unconventional environmental energy sources (ocean tides and currents), and finally other alternative approaches (molecular motors, cryo-engines, and solar sailing). Performance analysis and operating principles of systems and components, economic analysis for system design and operation. Nonmajor graduate credit.

M E 441. Fundamentals of Heating, Ventilating, and Air Conditioning. (3-0) Cr. 3. F. Prereq: Credit or enrollment in 436. Space conditioning and most air processes. Application of thermodynamics, heat transfer, and fluid flow principles to the analysis of heating, ventilating, and air conditioning components and systems. Performance and specification of components and systems. Nonmajor graduate credit.

M E 444. Elements and Performance of Power Plants. (3-0) Cr. 3. S. Prereq: 322, credit or enrollment in 335. Basic principles, thermodynamics, engineer analysis of power plants. Topics include existing power plant technologies, the advanced energyplex systems of the future, societal impacts of power production, and environmental and regulatory concerns. Nonmajor graduate credit.

M E 448. Fluid Dynamics of Turbomachinery. (Cross-listed with Aer E). (3-0) Cr. 3. Prereq: M E 335 or equivalent. Applications of fluid mechanics and thermodynamics in performance analysis and design of turbomachinery and related fluid system components. Nonmajor graduate credit.

M E 450. Engineering Vibrations. (Cross-listed with E M). (3-0) Cr. 3. F. Prereq: E M 324 and 345. Elementary vibration analysis, single and multiple degrees of freedom, energy methods, free and forced vibrations, viscous and other forms of damping transform methods and response to periodic and random force inputs, numerical methods of solution, eigenvalues and modal analysis, energy methods, vibration isolation and suppression, string or cable dynamics, beam bending dynamics, application problems in aerospace and mechanical engineering (as relevant). Nonmajor graduate credit.

M E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Aer E, Cpr E, E E, Engr, I E, K E, M E). (3-0) Cr. 3. F. Prereq: 325 or equivalent. Approaches include classical, pole assignment, model reference, internal model, and adaptive control methods. Mechanical design projects.

M E 511. Advanced Control Design. (3-0) Cr. 3. S. Prereq: 411. Application of control design methods using continuous, discrete, and frequency-based models. Approaches include classical, pole assignment, model reference, internal model, and adaptive control methods. Mechanical design projects.

M E 484. Technology, Globalization, and Culture. (Dual-listed with 584). (Cross-listed with WLC). (3-0) Cr. 3. S. Prereq: senior classification for 484, graduate classification for 584. Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitates an understanding of the theoretical opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists.

M E 486. Appropriate Technology Design. (3-0) Cr. 3. F. Prereq: 281, current enrollment in 336. Hands-on design experience utilizing knowledge acquired in core mechanical engineering courses. Emphasis with engineering problem formulation and solution, oral and written communication, team decision-making and ethical conduct. Design projects include engineering considerations in appropriate technology which have multidisciplinary components in economics and sociology.

M E 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. Prereq: 298; permission of department and Engineering Career Services. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

M E 511. Advanced Control Design. (3-0) Cr. 3. S. Prereq: 411. Application of control design methods using continuous, discrete, and frequency-based models. Approaches include classical, pole assignment, model reference, internal model, and adaptive control methods. Mechanical design projects.

Mechanical Engineering

2009-2011

M E 526. Optimization Methods for Complex Designs. (Dual-listed with 425). (Cross-listed with HCI). (3-0) Cr. 3. S. Prereq: Engr 160, Math 265. Optimization techniques including unconstrained and constrained minimization, linear programming, and particle swarm optimization. Both the theory and methods and the application to complex designs will be presented.

M E 535. Thermochemical Processing of Biomass. (Cross-listed with BRT). (3-0) Cr. 3. S. Prereq: Undergraduate course work in thermodynamics and transport phenomena. Introduction to thermal and catalytic processes for the conversion of biomass to biofuels and other biobased products. Topics include gasification, fast pyrolysis, hydrothermal processing, syngas to synfuels, and bio-oil upgrading. Application of thermodynamics, heat transfer, and fluid dynamics to bioenergy and biofuels.

M E 538. Advanced Fluid Flow. (3-0) Cr. 3. F. Prereq: Credit or enrollment in 436. Detailed analysis of incompressible/compressible, viscous/inviscid, laminar/turbulent and isothermal fluid flows on a particle/point control volume basis.

M E 547. Computational Fluid Mechanics and Heat Transfer II. (Cross-listed with Aer E). (3-0) Cr. 3. S. Prereq: M E 546. Application of computational methods to fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulent modeling; and direct design methods. Design using state-space methods. Controllability, observability, pole placement, state estimators. Digital filters in control systems. Microcomputer implementation of digital filters. Control of moving and stationary objects. Static and dynamic optimal control in digital control systems. Simulation of digital control systems.

M E 575. Technology, Globalization and Culture. (Cross-listed with 484). (Cross-listed with WLC). (3-0) Cr. 3. F. Prereq: senior classification for 484. Graduate classification for 484. Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists.

Courses primarily for graduate students

M E 600. Seminar. Cr. R. Repeatable. (1-0)

M E 690. Advanced Topics. Cr. arr. Repeatable. Investigation of advanced topics of special interest to graduate students in mechanical engineering.
A. Experimental Gas Dynamics
B. Fluid Mechanics
C. Heat Transfer
D. Thermodynamics and Energy Utilization
E. Turbomachinery
F. Vehicular Propulsion Systems
G. Advanced Machine Design
I. Automatic Controls
J. Operating and Environmental Considerations in Design
K. Mechanical Behavior of Materials
L. Manufacturing Processes
M. Tribology
N. Sensitivity Methods
O. Engineering Computation
P. Engineering Measurements and Instrumentation
Q. Independent Literature Investigation
R. Nuclear Engineering
S. CAD/CAM

(Interdepartmental Undergraduate Major)

Supervisory Committee: J. Curnick, Professor-in-Charge, J. Beetham, N. Bouyr, J. Dickson, E. Braun, M. Gleason, G. Phillips

(Interdepartmental Graduate Major)

Supervisory Committee: A. Bogdanove, Chair, Halverson, Vice Chair, N. Cornick, L. Bartholamy, B. Brehm-Stecher

Undergraduate Study

Undergraduate study for the bachelor of science degree with a major in microbiology. For the curriculum in microbiology, see Agriculture, Curricula. In this curriculum, principal emphasis is placed on understanding microorganisms and their interrelationships with other organisms in nature, the application of microbiology in medicine, agriculture and industry, and the study of fundamental life processes as exemplified by microorganisms. Some fields of microbiology, especially advanced research, may require further training. Undergraduate work in the program is designed to provide sound preparation for graduate study, training for bachelors-level employment, and admission to professional programs such as medicine, veterinary medicine and dentistry.

Graduates of the Interdepartmental Undergraduate Microbiology Program will learn about the diversity and complexity of microbial life represented by procaryotes, eucaryotes and viruses. In addition to being able to explain fundamental principles of microbial growth, physiology, genetics, biochemistry, and ecology, students will be able to evaluate the impact that the microbial world has on human, animal and plant health, as well as on environmental quality, industry and biotechnology. Graduates are able to design and implement experimental approaches to address specific questions. In addition, graduates are able to communicate scientifically, using a variety of media.

Students graduating in microbiology find career opportunities in a wide variety of areas including: hospital and clinical laboratories; federal, state, and local government agencies; research and development; dairy and food processing industries; and the pharmaceutical and fermentation industries.

The undergraduate program for the major in microbiology requires the following basic courses: 110, 302, 510, 520, 430 or 477, 450, 451, and labs including 302L, 310L, and 440. In addition, students must take 9 credits of elective microbiology courses from an approved list. Aspects of these courses emphasize communication skills, environmental issues, problem solving, and laboratory techniques. Courses in the following areas are required as supporting work: biology, chemistry, biochemistry, genetics, mathematics and physics.

For additional details on the undergraduate curriculum in Microbiology see College of Agriculture, Curricula. Students are encouraged to participate in independent studies, internship opportunities, and international experiences.

Preventive preparation may be accomplished through the curriculum major in this program (see College of Veterinary Medicine, Admission Requirements).

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses.

Graduate Study

The program offers work for the degrees master of science and doctor of philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences; Plant Pathology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology. Faculty coordinate graduate education and research in a wide range of topics fundamental to the discipline of microbiology. Specific information about individual faculty and their research areas is available at www.micro.iastate.edu.

Prerequisites to graduate study include a sound undergraduate background in chemistry, mathematics and biology, including microbiology and genetics.

All M.S. and Ph.D. students complete coursework that is comprised of one year of modular courses in microbiology (Micro 551, 552, 553, 554, 555, 556). Students also take at least 3 credits (M.S.) or 9 credits (Ph.D.) of coursework from an approved list of microbiology courses, one year of biochemistry (BBMB 404 and 405, or the equivalent), one course (0.5) credits in ethics (Micro 565A), and 3 credits (M.S.) or 5 credits (Ph.D.) of seminar (Micro 604).

Graduates in the Microbiology Graduate program have a broad-based knowledge in the fundamentals of microbiology as well as advanced knowledge in specific areas as determined by their areas of research focus. Students completing the thesis have the technical, research, critical-thinking, problem-solving, and computer skills to design, implement, and conduct research using a variety of current techniques and equipment. They are also able to communicate research results effectively with scientific peer groups in both oral and written formats.
Courses primarily for undergraduate students

Micro 110. Orientation in Microbiology. (1-0) Cr. 0.5. F Orientation to the discipline of microbiology, the curriculum in microbiology, and educational research opportunities within the department. Satisfactory-fail only.

Micro 201L. Introductory Microbiology Laboratory. (0-2) Cr. 1. F. Prereq: Credit or enrollment in 201 or 302L. Basic microbiology laboratory techniques for non-microbiology majors. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

Micro 302. Biology of Microorganisms. (3-0) Cr. 3. F.S. Prereq: Biol 211, credit or enrollment in Biol 212; 1 semester of chemistry. Basic cell biology, physiology, metabolism, genetics and ecology of microorganisms, with an emphasis on prokaryotes and viruses, as well as the roles of microorganisms in the environment, disease, agriculture, and industry.

Micro 302L. Microbiology Laboratory. (0-3) Cr. 1. F.S. Prereq: Credit or enrollment in 302L. Basic microbiology laboratory techniques for majors in microbiology, biological sciences and related fields. Credit for either Micro 302L or 302, but not both, may be applied toward graduation.

Micro 310. Medical Microbiology. (3-0) Cr. 3; F. Prereq: 201 or 201L if a B or better was obtained. Study of infection and immunity by bacterial and viral pathogenic agents of humans. Nonmajor graduate credit.

Micro 310L. Medical Microbiology Laboratory. (0-3) Cr. 1; F, S. Prereq: credit or enrollment in 302L. Isolation and identification of human bacterial pathogens using basic staining techniques and biochemical tests. Brief introduction to techniques in cell culture and virology.

Micro 320. Microbial Physiology and Genetics. (4-0) Cr. 4. S. Prereq: 302; Biol 313, credit or enrollment in Chem 322. Introductory course in microbial physiology and genetics with special emphasis on prokaryotes. Topics include the structure, function, and assembly of cell components, bioenergetics, metabolic diversity, environmental stress tolerance, regulation of genetic adaptation, and growth and cellular differentiation.

Micro 374. Insects and Our Health. (Cross-listed with Ent). (3-3) Cr. 3; S. Prereq: 3 credits in biological sciences. Bartholomay. Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Nonmajor graduate credit.

Micro 374L. Insects and Our Health Laboratory. (Cross-listed with Ent). (0-3) Cr. 1; S. Prereq: offered 2010. Prereq: Credit or enrollment in Ent 374L. Bartholomay. Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

Micro 381. Environmental Systems I: Introduction to Environmental Systems. (Cross-listed with Biol, EnSci, Env S). (2-4) Cr. 4; F. Prereq: 12 credits of natural science including Biology and chemistry.

Introduction to the structure and function of natural environmental systems. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

Micro 402. Microbial Genetics. (Dual-listed with 502L). (3-0) Cr. 3; Alt; F, offered 2010. Prereq: 302, Biol 313. The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.

Micro 407. Microbiological Safety of Foods of Animal Origins. (Dual-listed with 507L). (Cross-listed with FS HN). (0-3) Cr. 3; S. Prereq. 420. Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) systems.

Micro 419. Foodborne Hazards. (Cross-listed with FS HN, Toxicol). (3-0) Cr. 3; Alt. S., offered 2010. Prereq: Micro 201 or 302, a course in biochemistry. Pathogenesis of human microbiological foodborne infections and intoxications, microbial ecology, major classes of toxins in the food supply, governmental regulation of foodborne hazards. Nonmajor graduate credit.

Micro 420. Food Microbiology. (Cross-listed with FS HN, Toxicol). (3-0) Cr. 3; F. Prereq: 201 or 302. Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications. Nonmajor graduate credit.

Micro 421. Food Microbiology Laboratory. (Cross-listed with FS HN). (0-6) Cr. 3; F. Prereq: Micro 201 or 302, 201L or 302L. Credit or enrollment in 301. Isolation and identification of microorganisms in food and water. Foodborne infections and intoxications. Nonmajor graduate credit.

Micro 475. Soil and Environmental Microbiology. (Cross-listed with 575). (Cross-listed with Pl P). (3-0) Cr. 3; S. Prereq: offered 2010. Micro 201 or Micro 302 may be applied to graduation. Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth promotion, and biological control.

Micro 485. Soil and Environmental Microbiology. (Dual-listed with 585). (Cross-listed with Agron, EnSci). (3-0) Cr. 3; F. Prereq: Agron 154 or EnSci 402, Micro 201 (Micro 302 recommended). Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. Nonmajor graduate credit.

Micro 487. Microbial Ecology. (Dual-listed with 587) (Cross-listed with Biol, EnSci). (3-0) Cr. 3; F. Prereq: Six credits in biology and/or microbial genetics. Bartholomay. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

Micro 490. Independent Study. Cr. arr. Repeatable. F.S.S. Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor. A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation. H. Honors

Micro 495. Internship. Cr. arr. Prereq: At least 6 credits of 300-level or above coursework in microbiology. Permission of instructor. A maximum of 8 credits of Micro 495 may be used toward the total of 128 credits required for graduation. H. Honors

Courses primarily for graduate students, open to qualified undergraduate students

Micro 502. Microbial Genetics. (Dual-listed with 402). (3-0) Cr. 3; Alt. F, offered 2010. Prereq: 302, Biol 313. The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.
Micro 507. Microbiological Safety of Foods of Animal Origins. (Dual-listed with 407). (Cross-listed with FS HN). (3-0) Cr. 3. S. Prereq: 420. Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution, and consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

Micro 530. Procratic Diversity and Ecology. (Dual-listed with 430). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 302, 302L. Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

Micro 553. Pathogenic Microorganisms. (1-0) Cr. 1. F. Prereq: 302, Biol 313. Review and contrast/comparison of pathogenic bacteria of plants and animals and their mechanisms of virulence, including toxins, protein secretion, host invasion and iron acquisition strategies. An overview of eukaryotic cell biology that is relevant to pathogenesis will also be included.

Micro 554. Virology. (1-0) Cr. 1. S. Prereq: 302, Biol 313. Review and contrast/comparison of insect, animal and plant viruses and bacteriophage. Growth dynamics, replication of model viruses, and the role of specific viruses in disease will also be included.

Micro 556. Microbial Ecology and Environmental Monitoring. (1-1) Cr. 1. S. Prereq: 302, Biol 313. Examination of microorganisms in their natural habitats, including aquatic, terrestrial and extreme environments, community and biofilm development, microbe-microbe interactions, and current and traditional methods of microbial analysis in natural environments.

Micro 566. Advanced Food Microbiology. (Cross-listed with FS HN, Tox). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: FS HN 420 or 421 or 504. Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties on microbial growth, and mode of action of antimicrobials.

Micro 575. Immunology. (Dual-listed with 475s). (3-0) Cr. 3. S. Prereq: 310. An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Micro 475s optional. Credit for either Micro 575 or V VPM 520, but both may be applied toward graduation.

Micro 586. Medical Bacteriology. (Cross-listed with V VPM). (4-0) Cr. 4. F. Prereq: 310. Bacteria associated with diseases of vertebrates, including virulence factors and interaction of host responses.

Micro 587. Microbial Ecology. (Cross-listed with 487). (Cross-listed with EEOB, Ent). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

Micro 590. Special Topics. Cr. arr. Repeatable. F.S.S. Prereq: Permission of instructor. Courses for graduate students

Micro 604. Seminar. (1-0) Cr. 1. Repeatable. FS. Course will expose students to the breadth of subspecialties within microbiology to offer opportunities for direct interaction between the students and the faculty members within the Interdepartmental Microbiology Graduate Program, and promote interactions among the students within the program. Satisfactory-fail only.

Micro 608. Molecular Virology. (Cross-listed with V VPM, PI Pl). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: BBMB 420 or 425. Current topics in molecular aspects of virology: T and B cell receptors; major histocompatibility complex; antibody structure; immunity suppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control intracellular immune function.

Micro 625. Methods of Bacterial Pathogenesis. (Cross-listed with V VPM). (4-0) Cr. 4. Alt. S., offered 2011. Prereq: Credit in Biochemistry and Microbiology. Review of current concepts in specific areas of microbial pathogenesis including the genetic basis for bacterial disease, genetic control and regulation of virulence factors and their mechanisms of action, and host-pathogen interactions at the cellular and molecular levels. The application of microbial genetics to understanding pathogenesis will be included.

Micro 626. Advanced Food Microbiology. (Cross-listed with FS HN, Tox). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: FS HN 420 or 421 or 504. Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties on microbial growth, and mode of action of antimicrobials.

Micro 692. Molecular Biology of Plant-Pathogen Interactions. (Cross-listed with PI Pl). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: BBMB 420 or BBMB 425 or Gen 411 or Micro 402 or course in molecular biology. Bogdanove, Whitham. Seminar and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete an interinstitutional research proposal writing and peer review exercise.

Micro 697. Graduate Research Rotation. Cr. arr. Repeatable. F.S. Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Microbiology major.

Micro 698. Seminar in Molecular, Cellular, and Developmental Biology. (Cross-listed with MCDB, GDCB, BBMB, V VPM). (2-0) Cr. arr. Repeatable. F.S. Student and faculty presentations.

Military Science

www.public.iastate.edu/~armyrotc/

Lt. Col. John Soupene, Chair of Department

Professor: Soupene

Assistant Professor (Adjunct): Meyer

Instructors (Adjunct): Bower, Gledhill, Porter, Scott, Stephenson, Taylor, White

The Military Science Department does not offer an academic degree and is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program. The mission of the department is derived directly from regulations governing Army Reserve Officers’ Training Corps (AROTC), which are issued by the Army Cadet Command and Army Training and Doctrine Command and cannot be modifiable by this department.

Freshmen Year Learning Outcomes: The student will have a working knowledge of the following areas: The Role of the Army, Roles and Origins of the Army, Army Customs and Traditions, Branches (Jobs) in the Army and Military Operations and Tactics.

Sophomore Year Learning Outcomes: The student will have a working knowledge of the following areas: The Role of an Officer, Role of the Officer and Noncommissioned Officer, communications, code of conduct, first aid, principles of war and military operations and tactics.

Junior Year Learning Outcomes: The student will have a working knowledge of the following areas: Small Unit Training, Command and Staff Functions, Nuclear, Biological and Chemical Warfare, Law of War, Weapons, Human Behavior, Math Reasoning, Computer Science and Military Operations and Tactics.

Senior Year Learning Outcomes: The student will have a working knowledge of the following areas: Transition to Becoming an Officer, Military Justice, Intelligence and Electronic Warfare, Army Personnel Management, Army Logistics, Post and Installation Support and Military Operations and Tactics.

The mission of the Army Reserve Officers’ Training Corps (AROTC) is to commission the future leaders of the United States Army. Since ROTC produces over 65 percent of the Army’s Officer Corps, our task is one of the most important undertakings in the Army and our country today. We seek top quality college students. We train these potential leaders, assess their abilities, and challenge them with the highest standards of profession/professionalism. Those who successfully complete the program, receive a commission as a second lieutenant in the United States Army, if approved as an Army officer affords the opportunity to pursue a profession in one or several of the 300 different jobs held by Army officers. Students may request to serve as an officer in either the active army, or part time in the Army Reserve or National Guard. Regardless of the method of service, officers in today’s Army can be proud to know that they are doing their share in the defense of the United States of America.

The ISI Military Science program is divided into two segments, the basic program and the advanced program. The basic program (courses numbered 101-290) is designed primarily for freshmen and sophomores. No military obligation is incurred by a person participating in the basic program. The basic program is designed to be informative and to acquaint students with the military as a profession. The basic program or an allowed substitute is required for entry into the advanced program. No more than 10 credits in 100- and 200-level courses may be applied toward graduation. Each scholarship cadet in the Basic Program receives a monthly allowance (freshmen $300; sophomore $350) for up to 10 months. The curriculum is designed to train freshmen and sophomores in individual and team skills. It also helps the Professor of Military Science identify individual leader developmental needs.

**Basic Program**

These courses are primarily for freshmen and sophomore students and, except for persons with prior military service and basic training graduates, are required for entry into the advanced program. No more than 10 credits in 100- and 200-level courses may be applied toward graduation. Each scholarship cadet in the Basic Program receives a monthly allowance (freshmen $300; sophomore $350) for up to 10 months. The curriculum is designed to train freshmen and sophomores in individual and team skills. It also helps the Professor of Military Science identify individual leader developmental needs.

**Advanced Program**

These courses are for students who have completed the basic program (or received equivalent credit) and are mandatory for potential commissioning upon contracting at the beginning of their junior year. Each cadet receives a monthly allowance (junior $450; senior $500) for up to 10 months. This stipend is given during the junior and senior years. These courses are primarily taught to academic juniors and seniors.

Successful completion normally obligates the student to military service on active or reserve duty. In addition to the advanced program of study, a student (cadet) will be expected to pass the Army Physical Fitness Test (precondition for commissioning) each semester and continually maintain military appearance standards in both personal grooming and uniform. Physical fitness training is regularly conducted outside of class and laboratory hours in a separate course, M S 150 “Army Physical Readiness.” Students are encouraged to attend and participate in this class.

Professional Military Science Education (PME) coursework outside of the military science curriculum is also a precondition to commissioning. The PME component consists of Basic Academic proficiency standards. These standards are explained to prospective students as they consider enrollment in the advanced program. Army Uniforms will be worn at least once a week. The 300-level courses are designed to prepare cadets for the Leader Development and Assessment Program, which is a 32 day summer internship/training program where cadets are trained to Army standards, develop leadership skills, and have their officer potential evaluated. The 400-level courses are the final preparation for commissioning as a second lieutenant in the United States Army. Students must meet academic alignment criteria and receive basic program credit before entering the advanced program.

The College of Liberal Arts and Science offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credits must be in courses numbered 300 or above.

**Courses primarily for undergraduate students**

**Basic Program**

M S 101. Introduction to Military Science. (1-0) Cr. 1. F, S. Prereq: Concurrent enrollment in M S 101L required. Examines the role of a Cadet in the Army Reserve Officer Training Corps and a Lieutenant in the United States Army. The course explores a military culture whose ultimate success is determined by the character and proficiency of its leaders. Instruction introduces students to the cultural heritage and history of the U.S. Army. Students will begin to understand the structure of the U.S. Army and how it functions as an organization and institution. The curriculum promotes the development of students’ communication skills to enhance their ability to transmit ideas. The class examines how the Army’s cultural values drive the development of leadership in the Officer Corps. Hands-on activities enable students to gain insight on the skills and abilities required of cadets and officers interacting with civilians and soldiers.

M S 101L. Basic Leadership Laboratory I. (0-2) Cr. 1. F, S. Prereq: Concurrent enrollment in M S 101L required. Uses basic military training, missions and scenarios to provide a hands-on-method of developing confidence and leadership skills. Students observe and participate in the rotation through various levels of leadership positions and squadron and platoon level within the Army command structure. This concept provides a constant learning environment as they learn to communicate effectively and work as a team while assigned to positions at various levels within the organization. Marching, rifle firing, and tactical patrolling; students gain confidence through rappelling and construction/use of rope bridges; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISI Army, Camp Dodge (National Guard Facility), Pammel Woods (ISU campus), and ISI fitness centers. Full participation in all events will be determined based on students’ physical and medical eligibility.

M S 102. Structure and Function of the U.S. Army. (1-0) Cr. 1. S. Prereq: Concurrent enrollment in M S 102L required. Instructs students on the fundamental skills and proficiency criteria of Cadets in the Army Reserve Officer Training Corps and Officers in the United States Army. All cadets are required to show the Army culture whose ultimate success is determined by the character and proficiency of its leaders. Students will gain an insight to the effects of human behavior and communication on the function of the Army’s basic unit structures. Special focus is given to the emphasis the Army puts on the development and character of the leader and how that affects the culture and operation of the Army as an institution. Students will develop an understanding of the role that morals and ethics play in becoming an Army Officer and leading American Soldiers. Introduction to basic officer/soldier skills will elucidate the complex role of the Officer in the modern Army.

M S 102L. Basic Leadership Laboratory II. (0-2) Cr. 1. S. Prereq: Concurrent enrollment in M S 102L required. Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Rotation through various levels of leadership positions at the platoon and squad level within the Army command structure. Provides a constant learning environment as they learn to communicate effectively and work as a team while assigned to positions at various levels within the organization. Students also learn various military tasks such as marching, rifle firing, and tactical patrolling, gain confidence through rappelling and construction/use of rope bridges; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISI Army, Camp Dodge (National Guard Facility), Pammel Woods (ISU campus), and ISI fitness centers. Full participation in all events will be determined based on students’ physical and medical eligibility.

M S 150. Army Physical Readiness. (0-3 Cr. 1. Repeatable. F.S. Prereq. None. This lab is designed to use basic military skills and instruction to develop confidence, leadership, and physical fitness. The team approach is utilized in the instruction and application of Army physical fitness requirements. Students will learn various Army physical techniques as well as how to conduct physical fitness sessions. Teaching locations include Lied Recreation Center, Beyer Hall, State Gym as well as around campus. Full participation in all events will be determined based on students’ physical and medical eligibility.

M S 150. Army Physical Readiness. (0-3 Cr. 1. Repeatable. F.S. Prereq. None. This lab is designed to use basic military skills and instruction to develop confidence, leadership, and physical fitness. The team approach is utilized in the instruction and application of Army physical fitness requirements. Students will learn various Army physical techniques as well as how to conduct physical fitness sessions. Teaching locations include Lied Recreation Center, Beyer Hall, State Gym as well as around campus. Full participation in all events will be determined based on students’ physical and medical eligibility.

M S 150. Army Physical Readiness. (0-3 Cr. 1. Repeatable. F.S. Prereq. None. This lab is designed to use basic military skills and instruction to develop confidence, leadership, and physical fitness. The team approach is utilized in the instruction and application of Army physical fitness requirements. Students will learn various Army physical techniques as well as how to conduct physical fitness sessions. Teaching locations include Lied Recreation Center, Beyer Hall, State Gym as well as around campus. Full participation in all events will be determined based on students’ physical and medical eligibility.
students physical and medical eligibility. No more than 10 credits in MS 100 and 200-level courses may be applied toward graduation. Satisfactory-fail only.

M S 201. Principles of Leadership and Communication Skills. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in M S 201L required. Explores the development of leadership and communication skills by understanding and studying the principles, traits, and dynamics of leadership and effective communication techniques. These include: leadership dimensions, human behavior, time management skills, stress management on the job, ethics, decision making process, problem solving skills, team building exercises, communication techniques, briefing skills, delegating, nutrition, fitness, and counseling. Leadership assessment programs, role playing, active class participation, speeches, briefs, and video clips are used to enhance and reinforce the instruction.

M S 201L. Basic Leadership Laboratory III. (0-2) Cr. 1. F. Prereq: Concurrent enrollment in M S 201 required. Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Students observe and participate in the rotation through various levels of leadership positions at the platoon and squad level within the Army command structure. Learn to communicate effectively and work as a team while assigned to positions within the organization. Students also learn various military tasks such as marching, rifle firing, and tactical patrolling; gain confidence through rappelling and construction of rope bridges; and increase professional knowledge in areas such as land navigation, personal physical fitness, and land navigation. Teaching locations include the ISU Armoury, Camp Dodge (National Guard Facility), Plamml Woods (ISU campus), and ISU Fitness Centers. Full participation in all events will be determined based on students’ physical and medical eligibility.

M S 202. Map Reading and Land Navigation. (2-0) Cr. 2. S. Prereq: Concurrent enrollment in M S 202L required. Class focuses on the characteristics and features of the earth’s land mass and how to apply different methods of conducting navigation on land. These methods include; by use of topographical maps, compasses, aerial photographs, military maps, symbols, and all their practical application. These navigation techniques are used in class in conjunction with actual land navigation and squad movement exercises. Students will utilize verbal and non-verbal communication, communication techniques, and briefing techniques during this class. Students are also assigned to a Professional book from the Army Reading List and complete a written review of the book in the Army writing style.

M S 202L. Basic Leadership Laboratory IV. (2-0) Cr. 1. S. Prereq: Concurrent enrollment in M S 202 required. Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Students observe and participate in the rotation through various levels of leadership positions at the platoon and squad level within the Army command structure. Learn to communicate effectively as a team while assigned to positions at various levels within the organization. Students also learn various military tasks such as marching, rifle firing, and tactical patrolling; gain confidence through rappelling and construction of rope bridges; and increase professional knowledge in areas such as land navigation, personal physical fitness, and land navigation. Teaching locations include the ISU Armoury, Camp Dodge (National Guard Facility), Plamml Woods (ISU campus), and ISU Fitness Centers. Full participation in all events will be determined based on students’ physical and medical eligibility.

M S 210. Independent Study: Basic Military Study. Cr. arr. Repeatable. F.S.S. Prereq: Permission of the Chair of Military Science Department. Investigation of an approved topic in a professional journal-worthy paper on ethics, current military issues, interpersonal communications, or leadership development. No more than 10 credits in MS 100- and 200-level courses may be applied toward graduation.

M S 210L. Methods of Instructing Military Skills. (3-0) Cr. 3. F. Prereq: Completion of the basic Military Science program, concurrent enrollment in MS 201L, and permission of the Chair of the Military Science Department. Develops student’s proficiency in analyzing, planning, and executing plans within a military organizational structure. Students are given situational opportunities and then measured on their leadership abilities through systematic feedback. Students evaluate the leadership dimensions within the realms of values, attributes, skills, and actions. Students develop an understanding of human cultural heritage and history, as it pertains to the armed forces.

M S 301L. Advanced Leadership Laboratory I. (0-4) Cr. 1. F. Prereq: Completion of the basic program, concurrent enrollment in MS 301 and permission of the Chair of the Military Science Department. The lab complements MS 301 by providing opportunities to practice the lessons from class. On-the-job training and evaluation provided by the ROTC cadre. Developing training programs, structuring laboratories, presenting classes, planning various events, and accepting responsibility for the leadership labs. Participating in the Water Survival test, Army Physical Fitness test and the Land Navigation test are required.

M S 302L. Advanced Leadership Laboratory II. (0-4) Cr. 1. S. Prereq: Completion of the basic program, concurrent enrollment in MS 302 and permission of the Chair of the Military Science Department. Prepares students to attend the Leadership Development and Assessment Course at Fort Lewis, Washington in which they will be assigned specific and situational tasks to accomplish by providing purpose, motivation, and direction to fellow students across the nation. Students will learn how to identify sixteen leadership dimensions in the leader classroom and provide specific feedback on their leadership behaviors. Students will develop their oral communication skills about the plans developed by the class, through small group presentation settings. Students will develop methods of studying human behavior.

M S 302L. Advanced Leadership Laboratory II. (0-4) Cr. 1. S. Prereq: Completion of the basic program, concurrent enrollment in MS 302 and permission of the Chair of the Military Science Department. The lab complements MS 302 by providing opportunities to practice the lessons from class. On-the-job training and evaluation provided by the ROTC cadre. Developing training programs, structuring laboratories, presenting classes, planning various events, and accepting responsibility for the leadership labs. Participating in the Water Survival test, Army Physical Fitness test and the Land Navigation test are required.

M S 310. Practicum: Advanced Military Skills. (3-0) Cr. 1. Repeatable. S. Prereq: Permission of the Chair of the Military Science Department. An annual 72-hour military field training exercise that requires weeks of planning, participation, and ROTC cadre evaluation. Designed for the advanced ROTC candidate preparing for being commissioned as officers in the U.S. Army. Actual military conditions are simulated; detailed instruction in weapons training and execution of a simulated operation order in accomplishing a specific military mission. Conducted as a weekend exercise at Camp Dodge (National Guard Facility). Satisfactory-fail only.

M S 401. Seminar: The Military Team. (3-0) Cr. 3 F. Prereq: Completion of the basic program, concurrent enrollment in MS 401L and permission of the Chair of the Military Science Department. Develops student proficiency in analyzing and evaluating leadership behaviors, such as personal actions. Students are given situational opportunities to assess leadership and provide feedback to other students placed in leadership roles. Students will be measured by their ability to both give and receive systematic and specific feedback on leadership behaviors. Students will develop their ability to communicate thoughts and ideas orally through small group presentations and group discussions. Students will supervise and evaluate the planning and execution of complex operations within a military organizational structure.

M S 402L. Advanced Leadership Laboratory III. (0-4) Cr. 1. F. Prereq: Completion of the basic program, concurrent enrollment in MS 401L and permission of the Chair of the Military Science Department. The lab complements the instruction from class by demonstrating the indelible link between personal values and successful leadership. On-the-job training and evaluation provided by the ROTC cadre. Developing training programs, structuring laboratories, presenting classes, planning various events, and accepting responsibility for the leadership labs.

M S 410. Practicum: Military Skills Leadership. (3-0) Cr. 1. S. Prereq: Permission of the Chair of the Military Science Department. An annual 72-hour military field training exercise that requires weeks of planning, participation, and ROTC cadre evaluation. Designed for the advanced ROTC candidate preparing for being commissioned as officers in the U.S. Army. Actual military conditions are simulated; detailed instruction in weapons training and execution of a simulated operation order in accomplishing a specific military mission. Conducted as a weekend exercise at Camp Dodge (National Guard Facility). Satisfactory-fail only.

M S 490. Independent Study: Advanced Military Study. (1-0) Cr. 1. Repeatable. F.S.S. Prereq: MS 301, 302, 401 and 402 and permission of the Chair of the Military Science Department. Investigation of an approved topic. Must result in a professional journal-worthy paper on ethics, current military issues, interpersonal communications, or leadership development.

Military Studies (Interdepartmental Minor)

Advisory Committee: Lieutenant Colonel Soupene, Captain Waring, Colonel Cramp

The Military Studies program is designed for students interested in learning about military skills and careers. The mission of the Reserve Officers’ Training Corps (ROTC) programs is threefold. First, students are developed mentally, morally, and physically in order to make them strong leaders. Second, a desire to develop in mind and character is instilled in students so they may assume the highest responsibilities of command, citizenship, and government. Finally, students are imbued with the highest ideals of duty, honor, and
loyalty in order to graduate with a basic professional background and motivation toward their careers.

The Military Science, Naval Science and Air Force Aerospace departments accomplish this mission through detailed courses of instruction occurring throughout a typical student’s college career. All academic courses offered by these departments focus on the development of professional military skills and their application. Each department offers courses unique to its branch of the military. Students in Army ROTC classes gain an appreciation for ground warfare and doctrine, while the Naval Science program develops basic seamanship skills such as navigation and marine propulsion. The Air Force Aerospace Studies curriculum familiarizes students with Air Force structure and doctrine.

On a broader scale, all three departments offer courses promoting leadership and sound management practices that investigate the military’s role in American domestic and foreign policy, and can be employed in any career path.

Military Science, Naval Science and Air Force Aerospace courses are offered in the interdepartmental Military Studies program in the following participating departments: Military Science, Naval Science and Air Force Aerospace.

Undergraduate Study

Undergraduate study in this program provides the student with an opportunity to develop a minor in Military Studies. The three Iowa State University ROTC programs offer over 64 credits of specialized coursework. The minor in Military Studies is open to any Iowa State University student.

Undergraduate students may minor in Military Studies by taking 15 credits of coursework from a combination of any of the three ROTC programs - regardless of whether or not a commission in the Armed Forces is tendered. At least 6 of the 15 credits must be in courses numbered 300 or above.

Courses primarily for undergraduate students

AFAS 241. The Evolution of Air and Space Power.
AFAS 242. The Evolution of Air and Space Power.
AFAS 441. National Security Affairs and Preparation for Active Duty.
AFAS 442. National Security Affairs and Preparation for Active Duty.

Molecular, Cellular, and Developmental Biology

www.mcdb.iastate.edu

(Interdepartmental Graduate Major)

Program Executive Committee: Jeff Beetham, Chair; F. C. Minion Associate Chair; W. A. Miller, and James Reecy

Undergraduate Study

A special program in molecular, cellular, and developmental biology is available for the baccalaureate. Undergraduates wishing to prepare for graduate study in molecular, cellular, and developmental biology should elect courses in biochemistry, biology, genetics, microbiology; and mathematics throughout a typical student’s college career. All academic courses offered by these departments are employed in any career path.

Graduate Study

Work is offered for the master of science and doctoral of philosophy degrees with a major in molecular, cellular, and developmental biology in several cooperating departments: Agronomy; Animal Science; Biochemistry, Biophysics & Molecular Biology; Biomedical Sciences; Entomology; Food Science and Human Nutrition; Genetics, Development and Cell Biology; Horticulture; Physics & Astronomy; Plant Pathology; Veterinary Microbiology & Preventive Medicine; Veterinary Pathology. Facilities and graduate assistants are available in these departments for conducting fundamental research in the various aspects of molecular, cellular, and developmental biology. Ongoing research projects include molecular and cellular studies of viral, prakryotic, plant, and animal systems.

Students may enter the MCB database major in one of two ways: they may apply to and be accepted into the major directly or they may formally apply to the major after being accepted by a participating department. Students admitted into MCB database will take MCB database 697 (Graduate Research Rotations) in their first two semesters and choose a major professor by the end of their second semester. Students admitted by a department will choose a major professor from the participating faculty in that department. All Ph.D. students take a core curriculum consisting of the following courses: Molecular biology (MCDB 511, 520, or 545 or Micro 502 or MCB 676 or V MPM 608). In seminar, students will make journal and research presentations and attend MCDB seminars. M.S. students take the above course but may delete either the molecular genetics, cell biology, or developmental biology component. Additional coursework is selected to meet departmental requirements and to satisfy individual student research interests. All graduate students are required to teach as part of their training for an advanced degree.

Students minoring in molecular, cellular, and developmental biology at the Ph.D level must meet the following requirements: one year of chemistry and biology (BBMB 404, 405, or BBMB 501, 502; one course in each of the two above three areas molecular biology (MCDB 511, 520, or 545 or Micro 502 or MCB 676 or V MPM 608).

Courses primarily for graduate students

MCDB 511. Molecular Genetics. (Cross-listed with GDCB) (3-0) Cr. 3. Prereq: Biol 313 and BBMB 405. The principles of molecular genetics: gene structure and function at the molecular level, including regulation of gene expression, genetic rearrangement, and the organization of genetic information in prokaryotes and eukaryotes.

MCDB 512. Plant Growth and Development. (Cross-listed with GDCB, PIBiol) (2-0) Cr. 3. Pr. Prereq: Biol 530 or a course in developmental biology. GDCB 545 or BBMB 404, 405 or GDCB 520. Plant growth and development and its molecular genetic regulation. Hormone biosynthesis, metabolism, and action. Signal transduction in plants.

MCDB 520. Genetic Engineering. (Cross-listed with GDCB, BBMB.) (3-0) Cr. 3. At F. offered 2009. Prereq: Gen 411 or BBMB 405. Principles and methods of gene cloning, restriction endonuclease mapping, southern hybridization, isolation and manipulation of plasmid DNA, and detection of specific genes in bacteria.

MCDB 590. Special Topics. Cr. arr. Repeatable.

MCD 697. Graduate Research Rotation. Cr. arr. Repeatable. F.S. Graduate research projects performed under the supervision of selected faculty members in the molecular, cellular, and developmental biology program.

MCD 698. Seminar in Molecular, Cellular, and Developmental Biology. (Cross-listed with BBMB, GDCB, Micro, V NPMI). (2-0) Cr. arr. Repeatable. F.S. Student and faculty presentations.

Music

www.music.iastate.edu

Michael Goleno, Chair of Department

Distinguished Professor (Emeritus): White

University Professor: David

Professors: Cox, Darlington, Prater, Rodde, Simonson, Stuart, Work, Zeigler

Professors (Emeritus): Bleyle, Brandt, Burkhalter, Dreixel, Haug, Messenger, Molison, Swift, Vrongarobw

Professor (Adjunct): Estes

Associate Professors: Bovinette, Creswell, Goleno, Larkin, Munsen, Schilling, Sturm, Sunderman, Tam

Assistant Professors (Emeritus): Alcorn, Bjurstrom

Assistant Professor (Collaborator): Foss

Senior Lecturers: Rodde, Smith, Tener

Lecturers: Conklin, Dell, Duckett, Foss, Giles, Grunmann, Hefferman, Kortenkamp, Lin, Schumacher, Steele, Zwick-Tapley

Undergraduate Study

The Department of Music offers a strong undergraduate music program, where students study with full-time faculty professionals in a supportive environment that encourages students to become their best.

The curriculum of the music department provides:

1. A comprehensive program of professional studies for students who wish to prepare for careers in music, including teaching, performance, and composition, and for students who plan to pursue graduate studies in music.

2. Courses in music literature, theory and areas of performance for all students, regardless of major.

The department embodies the land-grant philosophy of service to the people of the state with a faculty of active scholars, teachers, and artists committed to excellence in teaching, creative/scholarly work, and arts outreach. The department is an accredited institutional member of the National Association of Schools of Music (NASM). The Theatre Program is administered by the Department of Music (see Index; Theatre Courses.)

Minor in Music. Candidates for the minor in music will complete 19 credits in music including:

a. 221 and 231

b. two of the following: 102, 120 or 302, 304, 383

c. four credits chosen from the following ensembles and applied music: 111, 113, 115, 141, 151, 161, 181, 212, 218, 290F

At least 6 of the 19 credits must be in courses numbered 300 and above taken at ISU with a grade of C or better. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Students pursuing a music minor must meet the audition requirements and/or prerequisites for all courses they wish to take.

Minor in MusicTechnology. Candidates for the minor in music technology will complete 15 credits including:

a. eight credits: Music Technology Core—Music 246 (2 cr.), 346 (3 cr.), 446 (3 cr.)

b. seven credits from the following technology and music electives: Com S 107, 207, 208, 227, 228, 229, 309; Cbr E 329; E E 201, 224, 324, 424; M E 451; Phys 198; S E 319; Music 101 or 105, 102, 118, 120 or 302, 221, 222, 231, 232, 304, 318, 331, 332, 337, 338, 395, 398, 472, 490, 593L.

Music majors may use the following music courses toward the music technology minor: 246, 346, 446, 490L, 590L.

Bachelor of Music students may not count Phys 198 in the Music Technology minor.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above with a grade of C or higher. The minor must include at least nine credits not used to meet any other department, college, or university requirement. Students pursuing a minor in music technology must meet the audition requirements and/or prerequisites for all music courses they wish to take.

Curricula Available to Music Majors

Students interested in pursuing an emphasis in music theater should see Index; Theater and Performing Arts.

Bachelor of Music

This curriculum leads to the degree bachelor of music. This degree is more specialized and contains fewer general education requirements than the bachelor of arts degree with a major in music. Students in this curriculum choose between options in education, performance, and composition. To obtain a bachelor of music degree, a student must earn a minimum of 124.5-146 credits (depending on the option chosen) including a minimum of 32 credits in residence at Iowa State University and a minimum of 45 advanced credits in courses numbered 300 or above and must meet all of the requirements specified below.

Courses taken on a pass/not pass basis may be counted toward the required total credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement.

Cr. Degree Requirements

32 General Education Requirements (Students choosing the music education option should consult their advisers regarding general education requirements)

6 Social sciences
6 Humanities
6 Music 383, 384
3 Phys 198
6 Mathematical, physical, and biological sciences
5 Electives

6.5-14.5 Other Requirements

6 Engl 150, 250 (average grade C- or better required)

124.5-146 Total credits
Bachelors of Arts—Music Major

A more general degree than the bachelor of music, the bachelor of arts degree requires no formal specialization. It includes more general education requirements and provides a broader course of academic study.

For the undergraduate curriculum in Liberal Arts and Sciences, major in music, leading to the degree bachelor of arts, see Liberal Arts and Sciences, Curriculum.

Candidates for the degree bachelor of arts with a music major will normally complete 48 credits of music including the following required courses: 119, 120, 219, 221, 222, 231, 232, 319, 331, 332, 337, 338, 383, 384, 4 credits from: 111, 113, 115, 141, 151, 161, 181, 321.

Bachelors of arts students whose chief professional interest lies in research are encouraged to minor in world languages and cultures, history, literature, or philosophy.

General Requirements

Prior to being accepted as a music major, students are required to audition for applied faculty in their performance area (piano, organ, woodwinds, strings, percussion, brass, or voice), and must successfully demonstrate performance skills appropriate for college level instruction. Once accepted, a student must complete a placement examination in keyboard skills. This examination will be given by members of the departmental faculty during summer orientation, the week preceding the opening of classes for fall semester, or by appointment.

Seminars and Recitals. All music majors enrolled for applied music courses will attend a weekly 1-hour seminar in their areas and departmental recitals each semester.

Ensemble Requirement. All bachelor of music students must register for an ensemble course (111, 115, 141, 151, 161, 181) and one semester of chamber music ensemble (113, 161, 301, 321). Instrumental music education students may count one semester of 114A as a large ensemble. All full-time Bachelor of Music students in options other than music education must include among their ensembles at least two semesters of large ensemble (111, 115, 141, 151, 161, 181) and one semester of chamber ensemble (113, 161, 301, 321).

Continuation Examination. To be approved for continuation as a music major at the junior level, a student must pass a continuation examination taken normally at the end of the fourth semester. Before taking this examination, the student must fill out the requisite forms as well as write an essay including: (1) his/her personal goals, (2) a self-assessment of his/her progress thus far, and (3) an assessment of what he/she expects to accomplish before graduation.

The student taking the Continuation Examination performs for a Continuation Examination Committee. Requirements include the performance of three works representing different periods or styles selected by and studied with the applied teacher, a self-prepared piece, and sight-reading. The student must demonstrate acceptable solo ability and performance techniques in at least one of the applied areas. A written evaluation will be given each student following his/her performance. This evaluation will include a candid assessment of the student’s potential to achieve his/her goals.

In addition, the student may arrange to meet with members of the Continuation Examination Committee at a later date to discuss the results of his/her Continuation Examination.

All music majors must demonstrate proficiency in piano as a part of the continuation examination. Proficiency will normally be demonstrated by completing Music 228 or, for keyboard majors, by completing Music 327. The student must pass all parts of the continuation examination in order to enroll in Music 319 or 419. Applied Music Details and forms available at: www.music.iastate.edu.

Graduation Proficiency. To be recommended for graduation, a student must successfully demonstrate to the music faculty mature acquaintance with performance styles, technique, and repertoire. All music majors will participate in departmental recitals to the satisfaction of the department. Candidates for the bachelor of music degree will present a graduation recital.

Communication Proficiency requirement: The department requires a grade of C- or better in each of Engl 150 and 250 (or 250H). In addition the Communication Proficiency must be certified through one of the following options:

1. Certification of writing skills, by the instructor, after completion of Music 120, 383, 384, 472, 473, or 475. (Passing one of these courses does not automatically satisfy the requirements for Communication Proficiency.)

2. Satisfactory completion of an advanced writing course (e.g., English 302, 305, or 314).

Learning Outcomes and Assessment

Music graduates will understand and demonstrate: (1) Knowledge of music cultural heritage and history, (2) Appreciation for musical creativity, reasoning, and the aesthetic value of music, (3) Knowledge of organization and structures of music, (4) Analytical skills necessary for listening, performing, and teaching, (5) Skills necessary to perform music from a variety of periods, styles, and genres, (6) Necessary abilities to communicate ideas musically, verbally, and in writing, (7) Awareness of the diversity of musical ideas throughout the world’s cultures, and (8) For Music Education students: success in meeting the ISU Teaching Standards as outlined by the Univer- sity Teacher Education Program. Assessment measures include the continuation examination, graduating senior surveys and exit interviews, public performances, senior projects, course grades, teacher certification (for music education students), and the National Association of Schools of Music accreditation review.

Courses primarily for undergraduate students

Music 101. Fundamentals of Music. (1-2) Cr. 2. F.S. Prereq: Ability to read elementary musical notation. Notation, recognition, execution and analysis of scales, intervals, triads, and rhythm; key signatures; time signatures; transposition. Open to non-majors only.

Music 102. Introduction to Music Listening. (3-0) Cr. 3. F.S.S. SS. Expansion of the music listening experiences for the general student through greater awareness of differences in techniques of listening, performance media, and materials of the art. The course focuses on the elements of music: rhythm, melody, form, and style, and how these elements are used in music of different cultures and time periods. Ability to read or perform music not required.

Music 105. Basic Musicianship. (1-4) Cr. 3. S. Prereq: Performing arts majors classification. Beginning keyboard techniques, sight-reading, and ear training. Basic materials of music: notation, scales, intervals, key signatures, time signatures, rhythm, and harmony.

Music 111. Wind Ensemble. (0-3) Cr. 1. Repeatable. F.S. Prereq: Open to all students by audition. Emphasis on significant extended compositions for wind and percussion instruments. Performances include formal concerts on campus and the annual tour.

Music 112. Concert Band. (0-2) Cr. 1. Repeatable. F.S. Prereq: Open to all students who have performed on a wind or percussion instrument in high school band or orchestra. Repertoire includes the broad spectrum of band music. Two concerts are presented each semester.

Music 113. Jazz Ensemble. (0-2) Cr. 1. Repeatable. F.S. Prereq: Open to all students by audition. Designed to explore various styles and trends in contemporary jazz.

A. Marching Band.

F. Membership determined by audition and band application. Auditions held for woodwind, brass, percussion, flag, and twirler positions. Presentation of pre-game and half time shows at each home football game; additional performances are also scheduled on and off campus. Audition information is listed on the band website (www.music.iastate.edu/org/marching).

B. Pep Band.

Students selected by audition from current members of 114A. Performances at basketball games.

Music 115. Symphonic Band. (0-3) Cr. 1. Repeatable. F.S. Prereq: Open to all students by audition. Stresses high quality wind literature. Performances include formal concerts on campus.

Music 118. Applied Music: Non-majors. (0-5) Cr. art. Repeatable. F.S.S. Prereq: Audition, permission of instructor. (5-0) for 1 cr. (1-0) for 2 cr. Applied music for the general student. Open only to non-majors. Will not satisfy applied music requirements for music majors.

A. Voice

B. Piano

C. Organ

D. Strings

E. Carillon

F. Woodwinds

G. Brass

I. Percussion

K. Harpsichord

Music 119. Applied Music: Majors. (0.5-2) Cr. art. Repeatable. F.S.S. Prereq: Audition, permission of instructor; restricted to music majors. (5-2) for 1 cr. (1-2) for 2-3 cr. Minimum weekly practice of 5 hours per credit is expected. Weekly seminar required.

A. Voice

B. Piano

C. Organ

D. Strings

E. Carillon

F. Woodwinds

G. Brass

I. Percussion

K. Harpsichord

Music 120. Introduction to Music Literature and Styles. (3-0) Cr. 3. S. Prereq: 221. Directed studies via aural analysis for music majors with emphasis on the materials of music, form and aesthetic issues.

Introduction to style and literature of the major performance media in context of historical chronology. Fundamentals of score reading and performance terminology. Only one of Music 120 and 302 can count toward graduation.

Music 127. Class Study in Piano I. (0-2) Cr. 1. F.S. Prereq: 101 or audition, and permission of instructor. Beginning keyboard technique, transposition, harmonization, ensemble and solo repertoire, and sight-reading skills.
Music 128. Class Study in Piano II. (0-2) Cr. 1. F.S. Prereq. 127 or audition, and permission of instructor. Continuation of beginning keyboard technique, transposition, harmonization, ensemble and solo repertory, and sight-reading skills.

Music 131. Vocal Jazz Ensemble: "Off the Record". (0-2) Cr. 1. Repeatable. Prereq. Open by audition and permission of instructor; concurrent enrollment in one of the following: 141, 151, 161. Small mixed chorus specializing in advanced vocal jazz techniques. Performances on and off campus.

Music 141. Lyrica Women's Choir. (0-3) Cr. 1. Repeatable. F.S. Prereq. Open to all female students by audition. Large chorus; emphasis on fundamental vocal and choral skills, wide variety of literature. Campus concerts each semester.

Music 151. Oratorio Chorus. (0-3) Cr. 1. Repeatable. F.S. Prereq. Open to all students by audition. Advanced skills required, high quality literature. Campus concerts each semester, some concerts in conjunction with orchestras. Men's and women's choirs separately and in combination.

A. Cantamus Women's Choir
B. Statesmen Men's Choir

Music 219. Applied Music: Majors. (0.5-2) Cr. arr. Repeatable. F.S.S. Prereq. Audition, permission of instructor; restricted to music majors. (1-2) for 1 cr. (1-2) for 2-3 cr. Minimum weekly practice of 5 hours per credit is expected. Weekly seminar required.

A. Voice
B. Piano
C. Organ
D. Strings
E. Carillon
F. Woodwinds
G. Brass
I. Percussion
K. Harpsichord

Music 221. Introduction to Music Theory. (3-0) Cr. 3. F. Prereq. Music major status or permission of instructor; concurrent enrollment in 222 recommended. Fluent identification and application of the elements of music and music notation. The study of two-voice species counterpoint as an introduction to voice-leading principles in common practice period music.

Music 222. Introduction to Aural Theory and Music Technology. (0-4) Cr. 2. F. Prereq. Music major status or permission of instructor; concurrent enrollment in 221 recommended. Aural discrimination of musical elements and patterns as demonstrated by proficiency in ear training, sight singing, and related musicianship skills. Introduction to technological equipment and software used in the study of music.

Music 227. Class Study in Piano III. (0-2) Cr. 1. F.S. Prereq. 128 or audition and permission of instructor. Intermediate keyboard technique, transposition, harmonization, improvisation, repertory, sight-reading skills. Introduction to score reading, hymn playing, and accompanying at the piano.

Music 228. Class Study in Piano IV. (0-2) Cr. 1. F.S. Prereq. 227 or audition and permission of instructor. Continuation of intermediate keyboard technique, transposition, harmonization, improvisation, repertory, score reading, hymn playing, and accompanying at the piano.

Music 231. Materials of Music I. (3-0) Cr. 3. S. Prereq. 221. Harmonic, melodic, and rhythmic materials of the common practice period. Application of these materials in analysis and writing. Techniques of melodic construction, formal design, and harmonization.

Music 232. Aural Theory I. (0-3) Cr. 1. S. Prereq. 222. Development of sight reading, ear training, and related musical skills with emphasis on melodic, harmonic and rhythmic materials from the common practice period.

Music 246. Introduction to Music Technology. (2-0) Cr. 2. F.S. Prereq. 101, 105, or 221, or permission of instructor. Introduction to audio and MIDI technologies in lab-based music instruction, basic recording/sound reinforcement and music website management. Intended for Music Education Majors.

Music 265. Music in Elementary Education. (3-0) Cr. 3. S. F.S. Prereq. HD FS 226 or Psych 230. Experiencing and understanding the fundamentals of music through singing, playing classroom instruments, body movement, reading notation, listening, and creative activities. Developing lesson plan strategies and sequence, exploring multicultural musics, integrating music with other subjects in the elementary classroom, and evaluating aspects of musical learning.

Music 266. Introduction to Music Education. (1-2) Cr. 2. F. Prereq. Concurrent enrollment (0.5 cr.) in 480K. Required for second-year majors in music education. Historical, philosophical, and social foundations of music education; music curricula overview including goals of the music program, and contemporary and international curriculum development; psychology of teaching music including discipline techniques. Preparation for required observations in area schools.

A. Education
B. Theory
C. Composition
D. History
E. Literature
F. Applied Music
G. Conducting
H. Honors

A. Opera/Operetta
B. Music Theater

Music 302. The History of Music in Western Culture. (3-0) Cr. 3. S. Prereq. 102. Study of the evolution of music styles through history with emphasis on listening. Primarily European music with some non-Western music providing a global perspective. Individual composer's unique approaches to timbre, texture, rhythm and melody. General trends in the progress of style and form. Concert reports and papers in addition to examinations. Ability to read music recommended, but not required. Open to non-majors only. Only one of Music 120 and 302 can count toward graduation.

Music 304. History of Rock 'n' Roll. (0-3) Cr. 3. S. Prereq. 101, 102, 221, or 222. Rock 'n' Roll from the mid 1950s through the 1990s, focusing on the development of rock styles from its roots in blues, folk, country, and pop. Expansion of listening experience through study of song forms, musical instruments of rock, and the socio-political significance of song lyrics. Examinations, research paper or in class presentation required. Ability to read or perform music not required.

Music 318. Applied Music: Non-majors. (0-5) Cr. art. Repeatable. F.S.S.S. Prereq. Audition, permission of instructor. (1.5-0) for 1 cr. (1.0-0) for 2 cr. Applied music for the general student. Open only to non-majors. Will not satisfy applied music requirements for music majors.

A. Voice
B. Piano
C. Organ
D. Strings
E. Carillon
F. Woodwinds
G. Brass
I. Percussion
K. Harpsichord

Music 319. Applied Music: Majors. (0.5-2) Cr. arr. Repeatable. F.S.S.S. Prereq. Audition, permission of instructor; restricted to music majors. (1.2-0) for 1 cr. (1-2) for 2-3 cr. Minimum weekly practice of 5 hours per credit is expected. Weekly seminar required.

A. Voice
B. Piano
C. Organ
D. Strings
E. Carillon
F. Woodwinds
G. Brass
I. Percussion
K. Harpsichord

Music 321. Advanced Ensemble. (0-3) Cr. 1. Repeatable. F.S. Prereq. Advanced proficiency and performing ability, permission of instructor. Performance in ensembles that demand high proficiency. Open to a limited number of undergraduate and graduate students.

A. Voice
B. Piano
C. Organ
D. Strings
E. Musica Antiqua
F. Woodwinds
G. Brass
I. Percussion
J. Mixed

Music 324. English and Italian Diction for Singing. (2-0) Cr. 2. Alt. F., offered 2010. Prereq. Credit or enrollment in 118A or 119A. The international phonetic alphabet and its application to correct pronunciation of English and Italian in singing.

Music 325. French and German Diction for Singing. (2-0) Cr. 2. Alt. S., offered 2011. Prereq. Credit or enrollment in 118A or 119A. The international phonetic alphabet and its application to correct pronunciation of French and German in singing.

Music 327. Functional Piano. (0-3) Cr. 2. S. Prereq. 228 or audition and permission of instructor. Emphasis on sight reading, three and four-part score reading, improvisation, accompanying, and advanced harmonization.

A. Keyboard majors
B. Vocal/choral majors

Music 331. Materials of Music II. (3-0) Cr. 3. F. Prereq. 221. Harmonic, melodic, and rhythmic materials of the common practice period. Application of these materials in analysis and writing. Techniques of melodic construction, formal design, and harmonization.

Music 332. Aural Theory II. (0-2) Cr. 1. F. Prereq. 232. Development of sight singing, ear training, and related musical skills with emphasis on melodic, harmonic and rhythmic materials from the eighteenth and nineteenth centuries.

Music 337. Materials of Music III. (3-0) Cr. 3. S. Prereq. 331. Writing and analysis based on musical styles since 1900.

Music 338. Aural Theory III. (0-2) Cr. 1. S. Prereq. 332. Development of sight singing, ear training, and related musical skills with emphasis on melodic, harmonic and rhythmic materials from the twentieth century.
Music 346. MIDI and Digital Audio Techniques. (3-0) Cr. 3. S. Prereq: 246 or permission of instructor. MIDI theory and programming applications, sampling/synthesis control, digital signal processing techniques. Composition projects using integrated audio/MIDI sequencing applications. Nonmajor graduate credit.

Music 366. Methods of Music Education. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in 480K and Sp Ed 450; 266 and admission into teacher education. Music education strategies and materials involving development of appropriate objectives and plans for general music classes utilizing traditional and multicultural musics, evaluating musical learning; overview of Orff Schulwerk, Kodaly, and Dalcroze approaches; music in special education; required teaching in lab settings and observations in area schools.

Music 367. Choral Literature. (2-0) Cr. 2. Alt. S., offered 2010. Prereq: 361 recommended. Overview of choral repertoire from the sixteenth century to the present, including accessible works for the young conductor.

Music 368. Marching Band and Jazz Ensemble Techniques. (2-0) Cr. 2. Alt. S., offered 2011. Prereq: Credit or enrollment in 362B recommended. Techniques and materials for teaching marching band in the high school; philosophy, computer assisted drill design, music analysis, band set up, and other related skills. Jazz style, articulation, phrasing, materials and teaching techniques for secondary school jazz ensembles.

Music 383. History of Music I. (3-0) Cr. 3. F. Prereq: 120. History of the stylistic and cultural development of music: Middle Ages through Baroque.

Music 419. Applied Music: Majors. (0.5-2) Cr. arr. Repeatable. F.S.SS. Prereq: Audition, permission of instructor. Restriction to music majors. (1-2) Cr. 2-3 cr. Minimum weekly practice of 4 hours per credit is expected. Weekly seminar required. A. Voice B. Piano C. Organ D. Strings E. Carillon F. Woodywinds G. Brass I. Percussion K. Harpsichord

Music 440. Seminar in Music Theory. (3-0) Cr. 3. Repeatable. S. Prereq: 337, 338. Various topics in music theory including analysis, counterpoint, arranging, pedagogy, and psychology of music. Content will vary. Contact the Department of Music for the current year offering. Nonmajor graduate credit.

Music 446. Electronic Music Synthesis. (3-0) Cr. 3. F. Prereq: 246 or permission of instructor. Techniques of digital sound synthesis, software synthesizer design, and electronic music composition. Nonmajor graduate credit.

Music 466. Program Development and Evaluation in Music Education. (2-1) Cr. 2. F. Prereq: Continuation Examination passed, 362, 366, concurrent enrollment (1 cr.) in 480K. Developing a rationale for music education; music program development; evaluation of music curricula, programs and facilities; professional growth of the teacher; preparation for student teaching and the job market. Required observations in area schools.

Music 471. The Tones of Florence - A Study of Humanism. Cr. 3. SS. Prereq: Application through the Study Abroad Program; interview with instructor; sophomore classification. A survey of the masterpieces of music, literature, painting, sculpture, architecture, mathematics and theology that made Florence the major European center of humanism in the Renaissance.

Music 472. History of American Music. (3-0) Cr. 3. Prereq: Ability to read music; 9 credits from music, American literature, American history, art history. Offered F. 2010. History and development of the sacred and secular music in North America from approximately 1600 to the present, exploring the diverse cultural backgrounds that have contributed to the variety of contemporary musical styles. Nonmajor graduate credit.

Music 480. Field Experience for Secondary Teaching Preparation. (Cross-listed with C II). Cr. arr. Repeatable. F.S. Prereq: Permission of area coordinator required prior to enrollment. Observation and participation in a variety of school settings after admission to the teacher preparation program. (SF grading may be used in some offerings of some sections.)
Our educational mission for the undergraduate and graduate programs is to provide those learning experiences and opportunities that will ensure students can learn to function effectively in their chosen fields.

Central to that effective functioning are the abilities to:

- Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.
- Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.
- Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.
- Assess, analyze, synthesize, and evaluate information fairly and objectively.
- Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem solving approaches.
- Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.
- Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.
- Recognize and interpret resource problems and opportunities across spatial scales from local to global.
- Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.
- Exercise leadership skills as professionals and engaged citizens.
- Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.
- Exercise life-long learning skills developed before graduation.

Undergraduate Study

The Department of Natural Resource Ecology and Management offers work for the bachelor of science degree with majors in animal ecology and management, natural resources planning and administration, teaching, and environmental consulting, among others. Graduate training is necessary for many specialized positions within the fields of animal ecology. Majors preparing for graduate study should consult with their academic adviser concerning appropriate coursework.

Students seeking certification to teach biology in secondary schools must meet requirements of the College of Human Sciences as well as those of the Animal Ecology curriculum. In addition, they must apply formally for admission to the teacher education program (see Index, Teacher Education Program). Students with an interest in careers in outdoor writing are encouraged to obtain a minor or a second major in journalism (see Index, Journalism and Communication, Courses and Programs). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Index, Criminal Justice Studies).

The department offers a minor in animal ecology that may be earned by taking 15 credits in the department including 312, 365, NREM 120, plus four additional credits of Animal Ecology courses at the 300 level or above.

Forestry (For)

The forestry curriculum offers courses dealing with the management of forest ecosystems for multiple benefits including wood and fiber products, biodiversity, recreation, water, wilderness, and wildlife. Conservation and preservation of natural resources are emphasized. The department offers work for the bachelor of science degree with a major in forestry and options in forest ecosystem management, interpretation of natural resources, urban and community forestry, natural resource conservation and restoration, or sustainable materials science and technology. All options lead to a professional degree in...
forestry (Bachelor of Science). The forestry major has been accredited by the Society of American Foresters (SAF) since 1935. The Council for Higher Education Accreditation recognizes SAF as the specialized accrediting body for forestry education in the United States. The primary goal of the undergraduate curriculum in forestry is to educate foresters to be capable of scientifically managing the nation’s forest lands and related ecosystems—private and public.

Graduates understand and can apply scientific principles associated with forests, forest ecosystem management, and wood and non-wood products. Graduates are able to communicate effectively and work well in teams. They are capable of preparing and delivering effective oral and written communication, computer usage, inventory, economic analysis, data and situation analysis, and ecosystem assessment. They recognize the importance of ethics in forestry and are sensitive to cultural diversity and broad environmental concerns.

Graduates of the forest ecosystem management option are skilled at understanding how forests function and how forests can be managed to produce desired goods (wood, fiber, recreation, wildlife habitat) and services (clean water, carbon sequestration, wilderness) in the long-run. They are skilled at interpretation of interactions and effects of abiotic and biotic factors in forests and quantification of bio-physical, social, and economic outputs from forest ecosystems. They are skilled at complex decision-making involving private and public forest resources where ethical, legal, social, economic, and ecological dimensions are explicitly considered.

Graduates of the interpretation of natural resources related to effective, skillful, and safe communication with the public about the values associated with forest ecosystems and providing educational programs for all ages.

Graduates of the urban and community forestry option are able to combine biological, social, legal, and economic expertise to effectively manage trees or forests in an urban setting. They are skilled at decision-making related to site assessment, and long-term management of urban trees and forests to achieve multiple goals.

Graduates of the natural resource conservation and restoration option are skilled at assessing the natural functions of the environment and human impacts. They are skilled at interpretation of forest and other natural environments and making decisions related to their conservation and preservation.

Graduates of the sustainable materials science and technology option understand the anatomical, physical, and chemical properties of wood and other bio-renewable materials and know wood processing operations involved in drying, composite materials manufacturing, and chemical treatment.

Elective courses related to the forest ecosystem management option can be selected to emphasize forest ecology; wildlife, wilderness, and recreation management; water quality and erosion protection; quantitative-analytical techniques; business and marketing; and other areas related to natural resource management. Elective courses in the urban and community forestry option can be selected to emphasize plant health, policy and planning, ecology, hydrology, sociology, business administration, or horticulture/design. Elective courses related to the natural resource conservation and restoration option can be selected to emphasize, ecology, wildlife, recreation, nature interpretation, landscape design, sociology and ethics of conservation and preservation. Similarly, elective courses in the sustainable materials science and technology option can be selected to emphasize wood production, bio-renewable materials, wood fiber, business and marketing, and quality assurance. Elective courses in the interpretation of natural resources option can be selected to emphasize natural history, animal ecology, and environmental education.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resources and to contribute multiple benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agroforestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in production, product development, quality control, and marketing.

With advanced graduate study, the range of professional job opportunities for a person with a B.S. in forestry is expanded. Opportunities include research and education as well as more specialized managerial and administrative positions with private firms and public agencies.

During fall semester of the second year of study (sophomore year, typically), forestry students are required to enroll in the department’s integrated forestry modules consisting of 201, 202, 203, 204, 205, and 206. That semester, consisting entirely of forestry coursework, is designed to give students an early understanding of the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week off-campus field camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer students should check with the department for counsel on timing their completion of the integrated forestry modules.

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses: 302, 356, 451, NREM 120, 301, 345, 390, 407, and 472. Students wishing to emphasize wood products and wood utilization must complete 280 and an additional 12 credits from the following courses: 480, 481, 483, 485, 486, 487, and 490B.

Graduate Study

The Department of Natural Resource Ecology and Management offers work for the degrees master of science and doctor of philosophy with majors in fisheries biology, forestry, and wildlife ecology. A non-thesis masters degree is available for students desiring a general degree program without thesis research. Students may also major in interdepartmental graduate majors in bioenewable resources technology, ecology and evolution- ary biology, environmental science, genetics, plant physiology, sustainable agriculture, or toxicology (see Index). All students are required to teach and conduct research as part of their training for the Ph.D. degree.

Fisheries Biology and Wildlife Ecology

Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings.

Personnel of the U.S. Geological Survey’s Iowa Cooperative Fish and Wildlife Research Unit contribute significantly to the graduate program of the department through teaching and research. Governmental agencies such as the U.S. Fish and Wildlife Service, Natural Resources Conservation Service and the Iowa Department of Natural Resources, and non-governmental agencies such as The Nature Conservancy and the Iowa Natural Heritage Foundation also contribute to the graduate program by funding research, providing in-kind support, and providing numerous formal and informal mentoring relationships.

No more than two dual-listed animal ecology courses may be applied for major graduate credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.

Forestry

The department offers programs leading to the degrees of master of science and doctor of philosophy with a major in forestry and minor work to students taking major work in other departments.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled in communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to, and suitable for, students who have majored in forestry or related natural resource fields. A non-thesis master’s option is available.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry.

Animal Ecology (A Ecl)

Courses primarily for undergraduate students

A Ecl 312L. Ecology. (Cross-listed with Ia LL, EnSci). Cr. 4. S. An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.
A Ecl 321. Fish Biology. (2-3) Cr. 3. S. Prereq: 365. Biology, ecology, and evolution of fishes. Emphasis on structure, physiology, and behavior, including a focus on the conservation and management of fishes and their habitats. Laboratory focus on fish morphology, survey methods, identification, distribution, habits, and habitats of fishes. 

A Ecl 326L. Ornithology. (Cross-listed with la LL). Cr. 4. SS. The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress techniques of population analysis and methodology for population studies. 

A Ecl 368. Natural History of Iowa Vertebrates. (2-3) Cr. 3. S. Prereq: Biol 211, 211L, 212, 212L. Vertebrate fauna of Iowa, including fishes, amphibians, reptiles, birds, and mammals. Species identification, habitat requirements, community structure and assessment, conservation issues, and the historical population changes and value of wild animals to the region's ecological and economic health. 

A Ecl 371. Ecological Methods. (Cross-listed with Biol). (2-3) Cr. 3. F. Prereq: 312; Stat 101 or 104. Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. Nonmajor graduate credit. 

A Ecl 401. Introductory Aquatic Animal Health and Medicine. (Cross-listed with B M S I). (1-2) Cr. 1. S. 8 weeks. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, and current research. Field trip to aquaculture facility. 

A Ecl 404L. Behavioral Ecology. (Cross-listed with la LL). Cr. 4. Alt. S.S., offered 2010. Prereq: Two semesters of biology, Animal colonyology, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior. 

A Ecl 418. Stream Ecology. (Dual-listed with Biol). (2-3) Cr. 3. F. Prereq: 312; Stat 101 or 104. Emphasis on the conservation and management of freshwater and anadromous aquatic ecosystems with application to fishery and conservation perspectives; assessment of biodiversity; design and management of preserves. 

A Ecl 440. Fishery Management. (Dual-listed with 540). (2-3) Cr. 3. F. Prereq: 312, 312L. Stat 101 or 104; credit or enrollment in 441 and 486. Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries. 

A Ecl 441. Fisheries Techniques. (Dual-listed with 541). (2-3) Cr. 3. F. Prereq: 321 and Stat 104. Overview of field, laboratory, and analytical techniques associated with managing fisheries and aquatic resources. Specific topics include sampling design, fish and habitat sampling techniques, structural indices, age and growth, and biotelemetry. 

A Ecl 526L. Advanced Field Ornithology. (Cross-listed with la LL). Cr. 2. SS. Prereq: Concurrent registration in la LL. 326L. Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project. 

A Ecl 531. Conservation Biology. (Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 312; Biol 313 or graduate standing. Examination of conservation issues from a population and community perspectives. Population dynamics, extinction, population structure, genetics and demography in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology. 

A Ecl 540. Fishery Management. (Dual-listed with 448). (2-3) Cr. 3. F. Prereq: 312, 321; credit or enrollment in 541. Prerequisites: Courtney. Morphology, ecology, diversity and significance of aquatic insects, with emphasis on community sampling, identification, and classification of taxa in local streams and lakes. 

A Ecl 541. Fishery Techniques. (Dual-listed with 441). (2-3) Cr. 3. F. Prereq: 321 and Stat 104. Overview of field, laboratory, and analytical techniques associated with managing fisheries and aquatic resources. Specific topics include sampling design, fish and habitat sampling techniques, structural indices, age and growth, and biotelemetry. 

A Ecl 542. Aquaculture. (Dual-listed with 442). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 485; credit or enrollment in 321. Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetic, diseases, and marketing. 

Courses primarily for graduate students, open to qualified undergraduate students

A Ecl 557. Herpetology. (Dual-listed with 457). (Cross-listed with EEOB). (2-3) Cr. 3. S. Prereq: A Ecl 365 or Biol 351. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuataras, turtles, crocodilians). Emphasis on structural, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A Ecl 559. Ornithology. (Dual-listed with 458). (Cross-listed with EEOB). (2-3) Cr. 3. S. Prereq: A Ecl 365 or Biol 351. Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

A Ecl 570. Landscape Ecology. (Cross-listed with EEOB). (2-3) Cr. 3. Alt. F., offered 2010. Prereq: Permission of instructor; EEOB 588; a course in calculus. The study of ecological and evolutionary processes within a spatial context with emphasis on behavior, population, and community dynamics.

A Ecl 573. Techniques for Biology Teaching. (Cross-listed with la LL, EEOB). Cr. arr. Repeatable. SS. The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field 2010.

A. Animal Biology (Same as la LL 573A)
B. Limnology (Same as la LL 573G)
H. Animal Behavior (Same as la LL 573H)
W. Project WET (Same as la LL 573W)

A Ecl 5901. Graduate Independent Study. (Cross-listed with la LL, EEOB, Anthr. Cr. arr. Repeatable. SS. Prereq: Graduate classification and permission of instructor.

A Ecl 599. Creative Component. Cr. arr. Prereq: Nonthesis M.S. option only.

Courses primarily for graduate students

A Ecl 600. Seminar. (2-0) Cr. 1. Repeatable. FS. Current topics in ecological research, fish and wildlife management, and environmental problems related to fish or wildlife resources.

A Ecl 611. Analysis of Populations. (Cross-listed with EEOB). (2-2) Cr. 3. Alt. F., offered 2010. Prereq: Biol 312; Stat 401; a course in calculus. Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on statistical inference and computing.

Forestry (For)

Courses primarily for undergraduate students

For 201. Forest Biology. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in 202, 203, 204, 205, and 206. Discussion of ecological concepts, individual tree structure and growth, variation and diversity in tree populations. Physical environment of trees and forests, ecological processes in forest communities, and introduction to different regional forest communities.

For 202. Wood Utilization. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in 201, 203, 204, 205, and 206. Processing of sustainable materials including wood into products and general properties and proper use of these products.

For 203. Resource Measurements/Evaluation. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in 201, 202, 204, 205, and 206; Math 140. Survey techniques involved in quantification, valuation, and evaluation of tree and stand growth and other variables in the forest environment, recreational use, wildlife habitat value, biomass, and solid wood.

For 204. Forest Ecosystem Decision-Making. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in 201, 202, 203, 205, and 206. Methods of decision-making related to forest ecosystems including communications, teams and conflict resolution. Current issues relating to public, private, and urban forests; quantification of processes, services, and goods produced by the forest and expected by the public such as wildlife, water, range, recreation, wilderness, biodiversity, as well as wood and fiber products.

For 205. Integrated Forestry Laboratory. (2-0) Cr. 3. F. Prereq: Concurrent enrollment in 201, 202, 203, 204, and 206. Field and laboratory exercises integrating the evaluation and management of forest goods, services, and the processing of wood products.

For 206. Fall Forestry Camp. Cr. 4. F. Prereq: Concurrent enrollment in 201, 202, 203, 204, and 205. Three-week field camp to address topics and issues covered in 201, 202, 203, 204, and 205.

For 280. Wood Properties and Identification. (3-3) Cr. 4. S. Properties of wood and how they relate to its successful use. Comparative anatomical characteristics, scientific nomenclature, and hand lens identification of commercially important North American woods.

For 283. Forest Applicaton Certification. (Cross-listed with Ent, Agron, Hort). Cr. 2-4. S. Cr. 2. H. Holtscher. Core background and specialty topics in agricultural, horticultural and pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

For 290. Special Problems. Cr. arr. Repeatable. Prereq: Freshman or Sophomore classification, permission of instructor.

A. Leadership in Forestry Teams (LIFT) Learning Community
B. Forest Ecosystem Management
C. Natural Resource Conservation
D. Urban and Community Forestry
E. Wood Science and Technology

For 302. Silviculture. (2-2) Cr. 3. S. Prereq: 201. Manipulation of forest vegetation based on ecological principles for the production of wood and other forest products. Nonmajor graduate credit.

Methods for assessing tree growth and reconstructing past stand development. Applications to forest and savanna management. Nonmajor graduate credit.

For 416. Forest Insect and Disease Ecology. (Cross-listed with PI P). (3-3) Cr. 4. S. Prereq: 8 credits in biological sciences, including Biol 102, 202, 211. Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests. Nonmajor graduate credit.

For 452. Ecosystem Management. (Cross-listed with NREM). (2-3) Cr. 3. F. Prereq: Junior classification, and NREM 301 or A Ecl 312. Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. Nonmajor graduate credit.

For 453. Forest Resource Policy and Administration. (2-2) Cr. 3. S. Prereq: Junior or senior classification. Forest and related natural resource policies and contemporary policy issues. Integration of elements of policy development processes, various participants in these processes, and resulting programs. Ethics in professional forestry and natural resource conservation, and conflict resolution. Participation in the policy process involving communication with policy makers and natural resource professionals, study of current issues, promotion of issues with students as issue educators. Participation in policy meetings to identify/determine various elements and applications of strategies associated with the policy development process. Nonmajor graduate credit.

For 454. Forestry Practicum. (1-4) Cr. 3. S. Prereq: 20 credits in student’s major at 300 level or above. Introduction to decision making in forest management and preservation of private and public forests, wildlands, urban/community forests, and/or the production and utilization of wood products. Students team work with a client and develop management plans that incorporate ecological, social, economic, ethical, and institutional/political factors. Effective teamwork, written/oral/visual communication, and problem-solving stressed. Multiple trips to project site and client. Nonmajor graduate credit.

For 475. Urban Forestry. (Cross-listed with Hort). (2-3) Cr. 3. F. Prereq: Junior or senior classification, 3 credits in biology. Discussion of establishment and management of woody perennials in community-owned urban greenspaces, consideration of urban site and soil characteristics, plant physiology, plant culture, urban forest valuation, inventory methods, species selection, and urban forest maintenance (health care and pest management). Nonmajor graduate credit.

For 486. Moisture Interactions of Lignocellulosic Materials. (2-3) Cr. 3. Alt. F., offered 2010. Prereq: 280 or permission of instructor. Principles of moisture relations in hygroscopic materials; adsorption, desorption, equilibrium moisture content. Transport processes in natural materials such as wood. Drying processes for wood and other lignocellulosic material. Influence of moisture on dimensional stability and durability of lignocellulosics and composites. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

For 599. Creative Component. Cr. arr. Repeatable. A. Forest Biology B. Forest Biometry C. Forest and Recreation Economics D. Forest Management and Administration E. Wood Science

Courses for graduate students

For 603. Plant Physiological Ecology. (4-0) Cr. 4. Alt. F., offered 2010. Prereq: NREM 301 or a course in plant physiology. Structural and functional adaptations in woody and herbaceous plant species to environmental variables, with emphasis on understanding relationships between physiological processes at the whole plant scale with ecosystem processes related to nutrient, water, and carbon cycling. Plant physiological responses to natural disturbances, management practices, global climate change, and other forces of environmental change.

Natural Resource Ecology and Management (NREM)

Courses primarily for undergraduate students

NREM 104. Practical Work Experience. Cr. R. Three months of relevant work experience in natural re- sources, animal management. Study at a summer biological station may be applicable. See adviser for specific requirements and approval process.

NREM 111. NREM Transitions Learning Community Seminar. (1-0) Cr. 1. FS. Enrollment limited to mem- bers of the NREM Transitions Learning Community. Designed to assist new transfer students and continu- ing sophomore students with their transition to the academic expectations and professional development aspects of the natural resource program. Satisfactory-fail only.

NREM 112. Orientation to Learning and Productive Team Membership. (Cross-listed with A E, FS HN, Hort, TSM) (2-0) Cr. 2. F. Introduction to develop- ing intentional learners and worthy team members. Learning as the foundation of human enterprise; intel- lectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Inten- tional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

NREM 114. Developing Responsible Leaders and Effective Leaders. (Cross-listed with FS HN, Hort, TSM) (2-0) Cr. 2. S. Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; plan- ning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

NREM 120. Introduction to Renewable Resources. (Cross-listed with Agron, Env Sl) (3-0) Cr. 3. FS. Over- view of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

NREM 130. Natural Resources and Agriculture. (Cross-listed with Env Sl) (3-0) Cr. 3. S. Survey of the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on Iowa. Conservation and management practices for private agricultural lands. Designed for nonmajors.

NREM 211. Careers in Natural Resources. Cr. 1. FS. Prereq: Sophomore classification. Career planning exploration in natural resources. Discussion of the job application process, including techniques for suc- cessful interviewing and development of an effective resume. Satisfactory-fail only.

NREM 256. Midwestern Prairie Plants. (1-2) Cr. 1. F. Offered 1st half semester only. Survey of the major plant families, genera, and representative species of Midwestern prairies with emphasis on plant identifi- cation and use of keys. Prairie restoration, conserva- tion, and management and development will also be considered.

NREM 285. The Natural Parks: Culture and Nature. (Cross-listed with L A) (2-0) Cr. 1. F, offered 2010. Reviews cultural setting for park establishment and management, ideas about wilderness, and philosophy of parks as types of land use. History of landscape architecture in the National Park Service, the development of American parks, the history of park wildlife management, and natural inspiration. Recent initiatives in ecosystem management, community conservation, and international points of comparison. Readings, discussion, exercises.

NREM 301. Natural Resource Ecology and Soils. (Cross-listed with EnSci) (3-0) Cr. 4. F. Prereq: Biol 211, 211L. For 201 or a second course in biology. Effects of environmental factors on ecosystem struc- ture and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communi- ties in agricultural landscapes. Nonmajor graduate credit.

NREM 303. Internship. Cr. arr. Repeatable. F.S.S. Prereq: Permission of instructor and sophomore standing. Placement with county conservation boards, camps, zoos, parks, etc., for experience as interpreters, rangers, and technicians.

NREM 303I. Undergraduate Internship. (Cross-listed with la LL) Cr. 1. F, offered 2009. Prereq: Permission of instructor and sophomore standing. Placement with county conservation boards, camps, parks, etc. For experience as interpreters, rangers, and technicians.

NREM 305. Seminar. (2-0) Cr. 1. Repeatable. F. Pre- req: Permission of instructor. Current topics in natural resources or related issues.

NREM 330. Interpretation of Natural Resources. (2-3) Cr. 3. S. Prereq: 6 credits in biological sciences. History, objectives, forms, and techniques of natural resource interpretation in the settings of county, state, national parks, and zoos.

NREM 385. Natural Resource Policy. (Dual-listed with SBIS) (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Junior standing. History, theory, and practice of natural resource policy. Integrative approach with topi- cal studies in wildlife, forest, water, and other natural resources, mainly in North America. Exercise roles and relationships in policy formulation between major policy actors, including legislative bodies, government agencies, and non-profits. The role of science and scientists in policy.

NREM 390. Fire Ecology and Management. (3-0) Cr. 3. F. Characteristics and role of fire in forest ecosystems. Major topics covered include fuels, fire weather, fire behavior, fire danger rating systems, fire control, prescribed burning, and fire dynamics in major ecosystem types. Nonmajor graduate credit.

NREM 402. Watershed Hydrology. (Cross-listed with Agron, EnSci, Geol, Mteor) (3-0) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineer- ing; junior standing. Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understand- ing of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes. Nonmajor graduate credit.

NREM 407. Watershed Management. (Dual-listed with SBIS) (Cross-listed with EnSci, Env Sl) (3-3) Cr. 4. S. Prereq: A course in general biology. Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes develop- ing a management plan using landscape buffers.
NREM 430. Media Techniques in Natural Resources Interpretation. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 320. Media techniques used by interpreters for teaching the public about natural resources. Nonmajor graduate credit.

NREM 446. Integrating GPS and GIS for Natural Resource Management. (Dual-listed with 446). (Cross-listed with EnSci). (3-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS. Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System Technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 452. Ecosystem Management. (Cross-listed with Forl. (2-3) Cr. 3. F. Prereq: Junior classification, and NREM 301 or a Ec 312. Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints. Nonmajor graduate credit.

NREM 460. Controversies in Natural Resource Management. (Cross-listed with Env S). (3-0) Cr. 3. F. Prereq: 120, and A Ec 312 or NREM 301, and Junior classification. Analysis of controversial natural resource issues using a case approach that considers uncertainty and adequacy of information and scientific understanding. Ecological, social, political, economic, and ethical implications of issues will be analyzed. Nonmajor graduate credit.

NREM 465. Landscape Change and Conservation. (Dual-listed with 565). (Cross-listed with L A). (3-0) Cr. 3. F. Prereq: L A 202. Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

NREM 472. Landscape Ecology and Natural Resource Management. (Dual-listed with 572). (2-2) Cr. 3. F. Prereq: NREM 301 or A Ec 312 or equivalent and NREM 345 or C R P 451 or equivalent. Analysis and management of spatial patterns and processes in populations, communities, and ecosystems with emphasis on broad spatial scales. Human influences on natural systems are strongly considered.

NREM 490. Independent Study. Cr. arr. Repeatable. Prereq: Junior or senior classification, permission of instructor. A. Animal Ecology B. Forestry E. Entrepreneurship H. Honors Program

NREM 490I. Undergraduate Independent Study. (Cross-listed with la LL). Cr. arr. Repeatable. Prereq: Junior or senior classification and permission of the instructor.

NREM 493. Workshop. Cr. arr. Repeatable. Prereq: Permission of instructor. Ecological concepts and management practices for landowners, teachers and others. Not for students majoring in animal ecology or forestry. NREM 493 may be taken more than once for graduation credit.

NREM 496. Travel Course. (Dual-listed with 596). Cr. arr. Repeatable. Prereq: Permission of instructor. Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. A. International B. Domestic

NREM 498. Cooperative Education. Cr. arr. Prereq: Permission of departmental chair. Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

NREM 501. Genealogy. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Gen 320 or Biol 313. Genealogy principles and practices. Genes are the building blocks of populations and plants and animals. Genetic systems as they interact with long-term natural selection to produce clonal or ecotypic variation. The impact of current environmental and genetic modifications of domesticated organisms on short-term selection pressures. Special coverage of species of interest to students enrolled in the course.

NREM 504. Forest Landscapes, Wildlife, and Silviculture. (3-3) Cr. 4. Alt. F., offered 2010. Prereq: 301. Detailed analysis of factors and processes underlying forest systems and stand growth and development. Applications of this knowledge to forest culture to support a diversity of use and protection objectives. Discussions of regional silviculture, tropical forests, and experimentation in forest biology.

NREM 505. Seminar. (2-0) Cr. 1. Repeatable. F. S. Prereq: Permission of instructor or graduate classification. Current topics in natural resources research and management.

NREM 507. Watershed Management. (Dual-listed with 407). (Cross-listed with EnSci). (3-3) Cr. 4. S. Prereq: A course in general biology. Managing human impacts on the hydrologic cycle. Field and watershed level management practices for modifying these impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

NREM 508I. Aquatic Ecology. (Cross-listed with La LL, EnSci). Cr. 4. SS. Prereq: Courses in ecological, chemical, and physics. Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

NREM 529. Publishing in Biological Sciences Journals. (Cross-listed with Agron, Hort). (2-0) Cr. 2. S. Prereq: Permission of instructor; evidence of a publishable unedited research data. Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

NREM 532. Human Dimensions of Natural Resource Management. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: A Ec 312 or equivalent plus 6 credits of biological sciences; permission of instructor. Exploration of institutions that help shape natural resource management and policies. Current research on interaction of humans with natural resources. Roles of social forces, politics and economics in natural resource management.

NREM 535. Restoration Ecology. (Cross-listed with EnSci, EEOB). (2-3) Cr. 3. F. Prereq: Biol 366 or 474 or graduate standing. Theory and practice of restoring animal and plant populations and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

NREM 546. Integrating GPS and GIS for Natural Resource Management. (Dual-listed with 446). (Cross-listed with EnSci). (3-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS. Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 565. Landscape Change and Conservation. (Dual-listed with 465). (Cross-listed with L A). (3-0) Cr. 3. F. Prereq: L A 202. Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

NREM 572. Landscape Ecology and Natural Resource Management. (Dual-listed with 472). (2-2) Cr. 3. F. Prereq: NREM 301 or A Ec 312 or equivalent and NREM 345 or C R P 451 or equivalent. Analysis and management of spatial patterns and processes in populations, communities, and ecosystems with emphasis on broad spatial scales. Human influences on natural systems are strongly considered.

NREM 580. Research Orientation. (2-0) Cr. 2. F. Prereq: 20 credits in biological sciences and a course in statistics. Research design, proposal preparation, and technical writing.

NREM 581. Methods for Presenting Scientific Results. (2-0) Cr. 2. S. Prereq: Permission of instructor. Techniques of proper platform presentation. Discussion of effective audio/visual presentations, and projected visuals. Practice in oral presentation of research findings. Practice in development of effective audio/visual techniques for presentation. (F.)

formulation between major policy actors, including legislative bodies, government agencies, and nonprofits. The role of science and scientists in policy.

NREM 596. Travel Course. (Dual-listed with 496). Cr. arr. Repeatable. Prereq: Permission of instructor. Limited enrollment. Extended field trips to study ecological topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. A: International B: Domestic

NREM 599. Creative Component. Cr. arr.

Courses for graduate students

NREM 600. Seminar. Cr. 1. Repeatable. F.S. Current topics in natural resources research and management.

Naval Science

www.iastate.edu/~navy

Captain Gary Waring, Chair of Department

Professors: Waring
Assistant Professors (Adjunct): Asjes

Instructors (Adjunct): Corbeil, Dienes, Kamp

The Department of Naval Science is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program but does not offer an academic degree. The courses offered by the Department are developed by the Department of the Navy. The Naval Science Department and Naval ROTC (NROTC) Program develop individuals mentally, morally, and physically, and imbue in them the highest ideals of duty and loyalty, in order to commission them upon graduation as Navy and Marine Corps officers. Program graduates possess a basic professional background, are motivated towards careers in the Naval Service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship, and government. Emphasis is placed on the core values of courage, honor and commitment.

Naval Science courses are open to any ISU student who has met the course prerequisites. To participate in the Naval ROTC Program, students must apply through one of two programs: the NROTC Scholarship Program (full scholarship); which includes a book stipend, tuition, laboratory fees, uniforms, and a monthly stipend, or the College Program (nonscholarship, with limited financial assistance). Applicants for the Scholarship Program are selected by the Professor of Naval Science from among students already in attendance at, or selected for admission by, the university. The College Program involves limited financial assistance for each of the last two academic years. Upon application, students choose between the Naval Science and Marine Corps Option, for the purposes of training focus. NROTC students pursue their studies like other university students except that they must meet certain additional requirements that will prepare them to serve as naval officers upon graduation.

A Scholarship Program student incurs a minimum 4-year active duty military obligation as a commissioned officer after graduation; a College Program student incurs a 3-year active duty obligation. Further information is available from the Professor of Naval Science, Iowa State University.

While in the NROTC Program, students will participate (with pay) in summer at-sea training cruises. Students are also exposed to regular and extracurricular activities that teach leadership principles and help them decide which field of the Navy or Marine Corps they wish to enter. These activities also include weekly leadership laboratory periods and opportunities for involvement in several student societies.

Undergraduate Study

Naval science courses are primarily for those students in the NROTC program, however, other university students may also enroll. Students enrolled in the NROTC program must fulfill the following requirements:

2. All NROTC students must complete one course in American military history or national security policy. A course in non-western culture or religion is also required of all Navy-option students.

3. All Navy option scholarship students must successfully complete Math 165 and 166 by the end of the sophomore year and Phys 221 and 222 by the end of the junior year.

4. In addition to the normal Naval Science courses, all NROTC students are required to participate in laboratory periods that supplement the various academic courses. The Leadership Lab emphasizes human relations, teaches basic military formations, movements, commands, courtesies, and honors, and provides practice in unit leadership. Non NROTC program students enrolled in Naval Science courses are not required to participate in laboratory periods.

5. Navy option scholarship students are encouraged to major in engineering and physical sciences to meet the technological requirements of the modern Navy. Navy-option students and Marine Corps-option students may pursue any major leading to a Bachelor’s Degree.

6. The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from any of the three ROTC programs offered on campus. At least 6 credits must be in courses numbered 300 or above.

For basic undergraduate curriculum requirements, see Liberal Arts and Sciences, Curriculum; or Engineering, Curricula.

Courses primarily for undergraduate students

N S 111. Introduction to Naval Science. (3-0) Cr. 3. F. Introduction to the organization, regulations, and capabilities of the Navy, with emphasis on mission and principal warfare components.

N S 212. Seapower and Maritime Affairs. (3-0) Cr. 3. S. Requests to waive this prerequisite must be approved by Naval Science Department. Development and concept of seapower including the Merchant Marine; role of various warfare components of the Navy in supporting the Navy’s mission; implementation of seapower as an instrument of national policy; evolution and network-centric warfare and review of Cold War naval strategy.

N S 220. Leadership and Management. (3-0) Cr. 3. Experiential approach to learning the principles of leadership and management by examining business management theories and their applications. Skills are developed in the areas of communication, counseling, control, direction, management, and leadership through active guided participation.

N S 230. Navigation. (3-0) Cr. 3. S. Prereq: Sophomore classification. Requests to waive this prerequisite must be approved by Naval Science Department. Study of the fundamentals of marine navigation used by ships at sea, including practical exercises in piloting using visual and electronic means. In-depth discussion of laws that govern conduct of vessels in national/international waters. Course is supplemented with review/analysis of case studies involving actual navigation incidents.

N S 320. Naval Ship Systems I (Engineering). (3-0) Cr. 3. F. Prereq: Physics 221, sophomore classification. Requests to waive these prerequisite must be approved by Naval Science Department. Introduction to naval engineering with emphasis on the equipment and machinery involved in the conversion of energy for propulsion and other purposes aboard the major ship types of the U.S. fleet. Basic concepts of the theory and design of steam, gas turbine, diesel, and nuclear propulsion. Introduction to ship design, stability, hydrodynamic forces, compartmentation, electrical and auxiliary systems.

N S 321. Evolution of Warfare. (3-0) Cr. 3. Alt. F. offered 2009. Prereq: Sophomore classification. Requests to waive this prerequisite must be approved by Naval Science Department. Evolution of warfare from 3500 B.C. to contemporary times; analysis of the impact of historical precedents on modern military thought and action; emphasis on the historical development of military tactics, strategy, and technology.

N S 330. Naval Ship Systems II (Weapons). (3-0) Cr. 3. S. Prereq: Physics 221, sophomore classification. Requests to waive this prerequisite must be approved by Naval Science Department. Introduction to the theory and principles of operation of naval weapon systems. Included coverage of types of weapons and fire control systems, capabilities and limitations; theory of target acquisition, identification and tracking; basics of naval ordnance.

N S 410. Naval Operations and Seamanship. (3-0) Cr. 3. F. Prereq: Senior classification. Requests to waive this prerequisite must be approved by Naval Science Department. Study of tactical naval operations; emphasizes the practical use of maneuvering boards together with shiphandling principles to arrive at tactical shipboard maneuvering solutions for single ship and formation operations. Study also of command and control, leadership, and ethics issues associated with surface naval operations.

N S 412. Leadership and Ethics. (3-0) Cr. 3. S. Prereq: For NROTC students only - N S 111, N S 212 or Hist 389, N S 220, N S 230, N S 320, N S 330 and N S 410. Requests to waive this prerequisite must be approved by Naval Science Department. Basic background concerning the duties and responsibilities of the junior naval officer and division officer in the areas of integrity and ethics, human resources management, personnel management, material management, and the administration of discipline. Preparation for responsibilities encountered immediately upon commissioning.

N S 421. Evolution of Amphibious Warfare. (3-0) Cr. 3. Alt. F. offered 2010. Prereq: Sophomore classification. Requests to waive this prerequisite must be approved by Naval Science Department. Study of the modern amphibious operations; emphasizes the historical and contemporary development of amphibious operations as a military tactic; history of amphibious operations from 3500 B.C. to the modern military era; the political, military, and technological factors that have influenced the evolution of amphibious warfare.
N S 490. Independent Study. Cr. arr. Repeatable. Prereq: Senior classification and prior approval of Naval Science Department Chair, 6 credits in naval science. No more than 9 credits of N S 490 may be counted toward graduation.

Neuroscience
www.neuroscience.iastate.edu/
(Interdepartmental Graduate Program)
Co-Chairs: D. Sakaguchi, R. Martin
Supervisory Committee: V. Bracha, S. Jef tinjia, A. G. Kanthasamy, R. Martin, D. Sakaguchi

Graduate Study
Work is offered for the master of science and doctor of philosophy degrees with a major in neuroscience. Cooperating departments include Animal Science; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Ecology, Evolution and Organismal Biology; Genetics, Development and Cell Biology; Kinesiology; and Psychology. Facilities and faculty are committed to research in the following areas: neuronal membrane functions, signal transduction, neuroanatomy, neurodegenerative diseases, neuroendocrinology, neurotoxicology, neuropathology, developmental neurobiology, neurogenetics, computational neuroscience, neural networks, and behavioral neuroscience.

An undergraduate or advanced degree in the sciences is ordinarily a prerequisite for admission to the program. A student majoring in neuroscience will select a major professor from the faculty participating in the program. All students take a core curriculum consisting of Neuro 556, 557, 661, 690, 696, BBMB 404, and Stat 401. All students are also expected to take elective neuroscience courses from the following: B M S 537, 575; Com S 474; E E 545; Psych 517, 519; and tox 501.

Courses for graduate students

Neuro 556. Cellular, Molecular and Developmental Neuroscience. (Cross-listed with GDCB, B M S). Cr. f. Prereq: Biol 335 or Biol 436; physics recommended. Fundamental principles of neurosci ence including cellular and molecular neuroscience, nervous system development, sensory, motor and regulatory systems.

Neuro 661. Current Topics in Neurobiology. (Cross-listed with GDCB, BBMB). Cr. arr. Repeatable. Prereq: Permission of instructor. Topics may include communication, hormones and behavior, neural integration, membrane biophysics, molecular and cellular neuroscience, developmental neurobiology, neuroanatomy and ultrastructure, sensory biology, social behavior, techniques in neuroscience and behavior.

Neuro 690. Journal Club in Neuroscience. (1-0) Cr. 1. Repeatable. Prereq: Neuro 556. Students are required to attend and make at least one presentation at a weekly journal club focusing on current topics.

Neuro 696. Neuroscience Seminar. (1-0) Cr. 1. Repeatable. F/S. Prereq: 556. Presentations and discussion of research by students, faculty, and visiting scholars.

Nuclear Engineering
www.iastate.edu/~nuclearengineering
Minor administered by Mechanical Engineering
The nuclear engineering undergraduate minor allows engineering students to acquire a formal background in nuclear engineering topics that will not only benefit them, but also fulfill a societal need for future hiring of engineers. Through this program, students can enroll in a formal minor that enables them to acquire a basic and fundamental knowledge of nuclear sciences and engineering, thus enabling them to pursue employment in any one of a number of fields associated with the construction, operation or regulation of nuclear power generation.

Students completing this minor acquire a body of knowledge in the fundamentals of nuclear science and engineering. The required courses selected ensures that all graduates of the nuclear engineering minor obtain a minimum body of knowledge in nuclear science and engineering that would allow them to apply their specialized field of engineering knowledge to nuclear-related applications, such as nuclear plant and site construction, nuclear power plant operations, nuclear safety and radiation protection.

The supporting courses that are listed in this program provide an opportunity for students to build upon the knowledge gained in the required courses by taking either more advanced courses or more specialized courses dealing with specific areas of nuclear engineering.

Undergraduate Study
Students interested in completing the nuclear engineering minor must be enrolled in the College of Engineering at Iowa State University. They should complete and submit the “Request for Minor” form. The selection process is based on approval by the administering department, Mechanical Engineering.

The course requirements for the undergraduate minor in nuclear engineering are: Required courses (9 credits) — Nuc E 401, 3 cr., Nuc E 402, 3 cr., and Nuc E 408, 3 cr.; Supporting courses (select two for 6 credits) — Nuc E 410, 3 cr., Nuc E 411, 3 cr., Nuc E 490, 3 cr., or M E 433, 3 cr. The minor must include at least nine credits which are beyond the total used to meet curriculum requirements for the bachelors degree in engineering.

Interinstitutional Program: Contact: Gregory Maxwell Participating Faculty: Iowa State University Gregory Maxwell, gmaxwell@iastate.edu Carolyn Heising, cheising@iastate.edu Kansas State University William Dunn, dunn@ksu.edu Kenneth Shultis, jks@ksu.edu University of Missouri Columbia Mark Prelas, PrelasM@missouri.edu Kansas State University Raymond Juzaitis, rjuzaitis@tamu.edu Texas A&M University University of Texas at Austin Sheldon Landsberger, s.landsberger@mail.utexas.edu

Nuclear engineering courses are provided through an inter-institutional distance education program offered through the Web. Some of the courses that comprise this minor are offered at Iowa State University, while others are offered through four of the Big 12 Engineering Consortium universities that have formal nuclear engineering departments or programs. The four universities offering an assortment of nuclear engineering courses via web-based distance education are Texas A & M (TAMU), the University of Missouri Columbia (UMC), Kansas State University (KSU) and the University of Texas at Austin (UTA).

Courses primarily for undergraduate students

Nuc E 405. Radiation Protection and Shielding. (3-0) Cr. 3. Prereq. 401. WWW only. Basic principles and concepts of radiation protection and design: dosimetric units and response functions, hazards of radiation dose, radiation protection, basic methods for dose evaluation, and shielding design techniques for photons and neutrons.

Nuc E 411. Nuclear Reactor Analysis. (3-0) Cr. 3. S. Prereq: 410. WWW only. Group diffusion theory, Multigroup reactors, heterogeneous reactors. Reactor kinetics, changes in reactivity.

Nutritional Sciences
(Interdepartmental Graduate Major)
Advisory Committee: K. Schalinske, Chair; D. Beitz, M. Spurlock, M. Reddy, W. White
Participating Faculty: Faculty mainly from Food Science and human Nutrition and Animal Science and also from other departments such as Kinesiology; Biochemistry, Biophysics, and Molecular Biology; Agronomy; Human Development and Family Studies, Sociology; Agricultural and Biosystems Engineering, and Statistics

Graduate Study
The Interdepartmental Graduate Program in Nutritional Sciences (IGPS), administered through the Graduate College, under the auspices of the Chairs of Food Science and Human Nutrition (FS HN) and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. M.S. and Ph.D. degrees in Nutritional Sciences will be offered with three specializations: Animal Nutrition, Human Nutrition, or Molecular/Biochemical Nutrition.

The following undergraduate course work is recommended of all applicants who are applying to the IGPS, but may be modified depending upon the student’s area of emphasis. Recommended course work includes organic chemistry
with laboratory, physics, analytical chemistry, a nutrition course that requires biochemistry or organic chemistry as a prerequisite, and a course in biology/physiology or anatomy. Under certain circumstances students can be admitted or provisionally admitted with course work deficiencies. Students with an undergraduate degree will be given admission into the M.S. program and upon completion, they can then apply for admission into the Ph.D. program. However, exceptional students with experience can apply directly to the Ph.D. program.

The general requirements of the Nutritional Sciences degree at the MS level, in addition to those of Graduate College, are: NutrS 501; NutrS 502, a minimum of 4 additional credits of graduate-level advanced nutritional physiology; 3-6 credits of graduate-level biochemistry; 3 credits of graduate-level statistics (STAT 401); graduate student orientation course (FS HN 580 or An S 501); seminar(s) attendance in Food Science and Human Nutrition (FS HN 581) or Animal Science (An S 603); seminar presentation course (FSHN 681 or An S equalivalent); one semester credit of seminar pertaining to student’s research; Teaching assistant requirement (FS HN 590C or AnS 590L), summer lecturership (NutrS 505) and successful completion of a thesis and defense of the thesis. They are expected to complete the course work as established by the Program of Study (POS) committee based on specialization with a minimum of 30 graduate-level semester credits, not less than 22 of which must be earned at Iowa State University.

The general requirements of the Nutritional Sciences degree at the PhD level, in addition to those of the Graduate College, are: completion of all requirements for the MS degree in Nutritional Sciences; 3 additional credits in each of graduate-level biochemistry, graduate-level statistics (Stat 402), and systemic physiology; and one additional graduate-level courses in the field of study as deemed appropriate by the POS Committee and additional teaching assistant requirements (FS HN 590C or An S 600L). Satisfactory completion of a preliminary examination, a written dissertation, seminar presentation of dissertation research, and defense of the dissertation is also required. Overall a minimum of 72 graduate-level semester credits, not less than 36 of which must be earned at Iowa State University.

Courses for graduate students

NutrS 501. Biochemical and Physiological Basis of Nutrition: Macronutrients. (3-0) Cr. 3. F. Prereq: Credit or enrollment in BBMB 403 or BBMB 420 Integration of the molecular, cellular, and physiologic aspects of macronutrient and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, metabolism, metabolic consequences, and major research methodologies.

NutrS 502. Biochemical and Physiological Basis of Nutrition: Vitamins and Minerals. (3-0) Cr. 3. S. Prereq: BBMB 404 or BBMB 420, and credit or enrollment in BBMB 405. Integration of the molecular, cellular, and physiologic aspects of vitamin and mineral metabolism in mammalian systems. Interactions among nutrients, metabolic consequences of deficiencies or excesses, relevant polymorphisms, major research methodologies, and current topics related to micronutrients.

NutrS 503. Biology of Adipose Tissue. (2-0) Cr. 2. S. Prereq: Undergraduate consent of instructor. Graduate. NutrS 501. Principles regarding the development of adipose tissue and its role in energy balance, and will consider notably on endocrine and immune actions of the adipocyte. Course material will be in lecture format, including handouts and selected journal articles. Students will be asked to lead critical discussions of key research findings as summary material for a given topic. Species differences will be highlighted, particularly as they relate to research models.

NutrS 505. Short Course. Cr. arr. F.S.SS. Prereq: Permission of instructor.

NutrS 552. Advanced Vertebrate Physiology II. (Cross-listed with B M S, An S). (3-0) Cr. 3. S. Prereq: Biol 335, credit or enrollment in BBMB 403 or 420. Cardiovascular, renal, respiratory, and digestive physiology.

NutrS 561. Medical Nutrition and Disease I. (4-0) Cr. arr. F. Prereq: FS HN 380, 3 credits in physiology at 300 level or above. (Dual listed with FS HN 461.) Pathophysiologic of selected chronic disease states and their associated medical problems. Specific attention will be directed towards the treatment of medical nutrition needs of patients in the treatment of each disease state. Recitation section (1 cr) will focus on refinement of assessment skills, diagnosis of nutritional problems, nutrition care, and documentation. Course must be taken for 4 credits if Didactic Program in Dietetics (DPD) verification statement of completion is desired. Graduates from Army ROTC are eligible for the dissertation. Students with an undergraduate degree will take the lecture portion without the recitation section.

NutrS 563. Community Nutrition. (3-0) Cr. 3. F. Prereq: FSHN 203, 362. Dual listed with FS HN 463. Survey of current public health nutrition problems among nutritionally vulnerable individuals and groups. Discussion of the multidimensional nature of those problems and community programs designed to help solve them. Role of community nutritionists in grant writing for project development. Significant emphasis on written and oral communication.

NutrS 564. Medical Nutrition and Disease II. (4-0) Cr. arr. S. Prereq: FS HN 380, FS HN 461, or NutrS 561. 3 credits in physiology at 300 level or above. (Dual listed with FS HN 464.) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state. Recitation section (1 cr) will focus on refinement of assessment skills, diagnosis of nutritional problems, nutrition care, and documentation. Course must be taken for 4 credits if Didactic Program in Dietetics (DPD) verification statement of completion is desired. Nutritional science undergraduates and graduate students may take the 3 credit lecture portion without the recitation section.

NutrS 695. Grant Proposal Writing. (Cross-listed with FS HN). (1-0) Cr. 1. F. Prereq: 3 credits of graduate course work in food science and/or nutrition. Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Formation of grant writing teams in food science and/or nutrition. Satisfactory-fail only.

Officer Education Programs

Iowa State University offers Reserve Officers Training Corps (ROTC) programs for the professional training of officers for the Army, Air Force, Navy and Marines.

The purpose of these programs is to provide an avenue for interested students to become reserve or regular officers in one of the United States military services, and the university regards this training as the foundation for possible careers in the military. The Air Force and the Navy require a period of active duty service upon completion of the ROTC program. Graduates from Army ROTC serve in either active Army, the Army Reserve, or the National Guard.

All students enrolled in advanced ROTC programs receive financial allowances, which are described under Student Financial Aid. Scholarships are also available for all services as outlined in the section on financial aid.

For specific courses and programs see also Air Force Aerospace Studies, Military Science, and Naval Science.

Operations and Supply Chain Management

(Administered by the Department of Logistics, Operations and Management Information Systems)

Richard Poist, Chair of Department

Distinguished Professor (Emeritus): Baumehl

Professors: Crum, Poist, Walter

Professors (Emeritus): Thompson, Voorhees

Associate Professors: Blackhurst, Johnson, Men- necke, Montabon, Nilakanta, Ruben, Suzuki, Tiwana, Townsend, Zhu

Assistant Professors: Jiang, Martens, Schelbe

Instructors (Adjunct): Choobineh

Lecturer: Helmer
Undergraduate Study

For undergraduate curriculum in business, major in Operations and Supply Chain Management, see College of Business, Curriculum.

Operations and Supply Chain Management is a program of study concerned with the efficient and timely flow of materials, products, and information within and between organizations. Operations management encompasses the planning, control and implementation of the processes used to transform inputs into finished goods and services. Supply chain management involves the integration of business processes across organizations, from material sourcing to buyer through manufacturing and processing to the final customer. Operations management is, thus, taught in the context and framework of inter-organizational supply chain systems.

The study of Operations and Supply Chain Management prepares students for professional careers with manufacturers, distributors, logistics service providers and consulting firms. The curriculum provides the required theoretical/conceptual base and analytical methods for making sound operational and strategic business decisions.

The requirements for the Operations and Supply Chain Management major are met by completion of the following courses: OSCM 422, 424, 485, 486, 487, plus one course from an approved list.

The department also offers a minor for non-operations and Supply Chain Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

For graduate study options, including the Ph.D. degree, see the Supply Chain Management listing.

Courses primarily for undergraduate students

OSCM 320. Production/Operations Management. (3-0) Cr. 3. Prereq: Stat 226. Introduction and analysis of the basic concepts in production/operations management. Topics include: forecasting, aggregate planning, scheduling, shop floor control, total quality management, inventory management, facility layout and project management.

OSCM 422. Manufacturing Planning and Control. (3-0) Cr. 3. Prereq: OSCM 320. Advanced treatment of manufacturing planning and control procedures. Master production scheduling, material requirements planning, enterprise resource planning, capacity planning, shop floor control, just-in-time, and competitive analyses of modern manufacturing systems. Nonmajor graduate credit.

OSCM 428. Special Topics in Operations Management. (3-0) Cr. 3. Prereq: OSCM 320. In-depth analysis of current issues, problems, and systems in operations management with emphasis on new theoretical and methodological developments. Topics may include in different semesters, supply chain management, productivity and quality improvement, management of technology and innovation, information technology in operations management, quick response manufacturing, and service operations management. Nonmajor graduate credit.

OSCM 440. Supply Chain Information Systems. (Cross-listed with MIS, LSCM). (3-0) Cr. 3. Prereq: MIS 330, OSCM 320, LSCM 360. Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

OSCM 485. Demand Planning and Management. (Cross-listed with LSCM). (3-0) Cr. 3. Prereq: LSCM 360, OSCM 320. Demand planning process which synchronizes demand with manufacturing and distribution. Addresses linking business plans and demand forecasts both horizontally and vertically within the organization and collaboratively among supply chain partners. Forecasting, customer relationship management, sales and operations planning, customer service, distribution channels, e-fulfillment, and information systems requirements. Nonmajor graduate credit.

OSCM 486. Principles of Purchasing and Supply Management. (Cross-listed with LSCM). (3-0) Cr. 3. Prereq: LSCM 360, OSCM 320. Sourcing strategies, concepts, tools and dynamics in the context of the integrated supply chain. Make or buy decision, supplier evaluation and selection, global sourcing, the total cost of ownership, contracts and legal terms, negotiation, purchasing ethics, and information systems requirements. Nonmajor graduate credit.

OSCM 487. Strategic Supply Chain Management. (Cross-listed with LSCM). (3-0) Cr. 3. Prereq: OSCM 422 or OSCM 424 or LSCM 460; OSCM 485 or OSCM 486. Capstone course in supply chain management. Integrating and applying the theories, concepts, and methods covered in the prerequisite courses through the use of readings, case studies, projects, and industry speakers. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

The department offers graduate courses under the heading of Supply Chain Management. These courses include SCM 502, 520, 522, 524, 560, 561, 563, 565, and 590. For descriptions of these courses, see Supply Chain Management.

Courses for graduate students

The department offers graduate courses under the heading of Supply Chain Management. These courses include SCM 601, 602, 603, 604, 605, 650, 651, and 689. For descriptions of these courses, see Supply Chain Management.

Philosophy and Religious Studies

Tony Smith, Chair of Department

University Professor: Kuper

Professors: Avelos, Hollinger, Kirschenmann, Robinson, Sawyer, Smith, Wilson

Professors (Emeritus): Hollenbach, Vanuten

Associate Professors: Bado-Fralick; T. Butler, Clifford, De Laplante, Fehr, Geirsson, Holmgren, Wolf

Assistant Professors: Alexander, A. Butler, Kelley, Padgett-Walsh, Qu

Senior Lecturer: Northway

Lecturer: Bevin, Wirth

Graduate Study

For graduate study options, including the Ph.D. degree, see the Supply Chain Management listing. The department offers graduate courses under the heading of Supply Chain Management. These courses include SCM 502, 520, 522, 524, 560, 561, 563, 565, and 590. For descriptions of these courses, see Supply Chain Management.

Philosophy

Undergraduate Study

Philosophy tries to make sense of human experience and reality through critical reflection and argument. The questions it treats engage and provoke all of us, and they occupy an important place in our intellectual tradition: Are there objective standards for deciding what is right and wrong, or is morality merely a subjective matter? Is capitalism morally acceptable? Do I have a will, and is it free? How do my words and thoughts come to be about the world? Does God exist? Can machines think? How are mind and body related? Students in philosophy classes will be exposed to arguments on both sides of such questions, and they will be encouraged to develop and rationally defend their own positions.

Philosophy is not an isolated discipline. It enjoys mutually beneficial exchanges with many fields of study within the humanities and sciences. Philosophers develop tools that allow them to examine critically the assumptions and implications of the social and natural sciences, religion, and law.

The study of philosophy provides several benefits. It emphasizes rigorous understanding of problems, together with careful analysis of the strengths and weaknesses of the available solutions. It encourages clarity in the presentation of one’s own ideas, as well as sensitivity in the consideration of the ideas of others. The study of philosophy therefore encourages one to develop skills and habits that are useful not only in philosophy, but in other areas as well. Philosophy students historically do well, for example, in law and medical schools.

However, one should not think that philosophy is only valuable in academic settings. Philosophical questions arise in many areas of family, business, and civic life. Philosophers strive to face these questions with the kind of intellectual honesty that leads to respect for the views of others, and continual reassessment of their own. In this way, the study of philosophy fosters values and attitudes that are helpful for responding to a lifetime of intellectual challenges.

The degree program in philosophy requires a minimum of 33 credits, plus the zero credit 492 core course. The following courses compose the core program of the major from which 15 credits shall be chosen. Additionally, two courses at the 400 level or above (other than 490 and 492) are required.

a. Ethical theory: One course required. Choose from 330 (Ethical Theory), 335 (Social and Political Philosophy), 535 (Contemporary Political Philosophy).

b. History: Two courses required, namely, 310 (Ancient Philosophy) and either 314 (17th Century Philosophy) or 315 (18th Century Philosophy).

d. Logic: 207 (Introduction to Symbolic Logic) is required.

The department offers a minor in philosophy which may be earned by completing a total of 15 credits in philosophy. At least 9 credits must be in courses numbered 300 or above. Students may want to emphasize specific areas by taking 15 hours of courses chosen from the following:

- Philosophy of Science: 201, 206 or 207, 314, 315, 380, 381, 480, 483, 485
History of Philosophy: 201, 310, 314, 315, 316, 317, 318, 460
Communication Proficiency requirement: The department requires A of C or better in each of Engl 150 and 250 (or 250H), and approval of writing by instructor of any philosophy course 300 level or above, to be designated by the student.

Graduate Study
The department offers work for a graduate minor in philosophy. For those taking the M.A. or M.S., the minor requirement is two courses above 300 (but not 490) each taken in conjunction with 590. For those taking the Ph.D., the requirement is four courses above 300, at least one of which is above 400 (but not 490) each taken in conjunction with 590. Interested students should ask the chair to assign a minor adviser.

The department participates in the interdisciplinary program in general graduate studies. (See Index.)

Courses primarily for undergraduate students
Phil 201. Introduction to Philosophy. (3-0) Cr. 3. F, S.S.S. It has been rumored that the unexamined life is not worth living. Philosophers have attempted to begin examining life by considering such questions as: What makes us human? What is the world ultimately like? How should we relate to other people? Is there a god? How can we know anything about these questions? Understanding questions of this kind and proposed answers to them is what this course is all about.

Phil 206. Introduction to Logic and Scientific Reasoning. (3-0) Cr. 3. F, S.S.S. Basic principles of critical reasoning and argument evaluation. A consideration of basic forms of argument in science and everyday life. Application to contemporary issues and controversies.

Phil 207. Introduction to Symbolic Logic. (Cross-listed with Ling). (3-0) Cr. 3. S. Introduction to fundamental logical concepts and logical symbolism. Development of natural deduction through first order predicate logic with identity. Applications to arguments in ordinary English and to philosophical issues. Majors should take Phil 207 as early as possible.

Phil 230. Moral Theory and Practice. (3-0) Cr. 3. F, S.S.S. Investigation of moral issues in the context of major ethical theories of value and obligation; e.g., punishment andeconomic justice, job discrimination, world hunger, and sexual morality. Emphasis on critical reasoning and argument analysis.

Phil 235. Ethical Issues in A Diverse Society. (3-0) Cr. 3. S. This course will examine a range of arguments on diversity issues. Topics will include: the social status of women, the moral status of sexuality and homosexuality, the nature and role of racism in contemporary society, the relationship between biology, gender roles and social status, and various proposals for change from a variety of political perspectives.

Phil 310. Ancient Philosophy. (Cross-listed with Cl Stl). (3-0) Cr. 3. F, S.S. Prerequisite: 201. Survey of ancient Greek philosophy, focusing on the pre-Socratics, Plato, and Aristotle. Questions concerning being, knowledge, language, and the good life are treated in depth. Nonmajor graduate credit.

Phil 314. 17th Century Philosophy. (3-0) Cr. 3. Alt. S., offered 2010. Prerequisite: 201. Readings from philosophers such as Hobbes, Descartes, Spinoza, Leibniz, and Locke. Changing conceptions of knowledge, self, and deities in response to Galileo’s new science and religious controversies. Various perspectives on the philosophy of history, the nature of reason and subjectivity, the contrast between dialectical and nondialectical philosophy, and the relationship between philosophy and society. Nonmajor graduate credit.

Phil 317. 20th and 21st Century Continental Philosophy. (3-0) Cr. 3. Alt. F., offered 2010. Prerequisite: 201. Major movements of 20th and 21st century thought, such as Phenomenology, Critical Theory, Post-structuralism, Postmodernism, and Feminism. Issues include the assumptions and limits of Western metaphysics, the nature of reason, the relationship between language and power. Nonmajor graduate credit.

Phil 318. 20th and 21st Century Anglo-American Philosophy. (3-0) Cr. 3. S. Prerequisite: 201. Major movements in recent and contemporary philosophy such as realism, ordinary language philosophy, and naturalism. Russell, Wittgenstein, Quine and other leading figures. Topics include knowledge of the material world, mind, language, values, and philosophical method. Nonmajor graduate credit.

Phil 330. Ethical Theory. (3-0) Cr. 3. F. Prerequisite: 201 or 230. Major theories in normative ethics and metaethics. Includes such topics as consequentialism and absolutism. Comparison of ethics with science and how moral judgments are justified. Nonmajor graduate credit.

Phil 331. Moral Problems in Medicine. (3-0) Cr. 3. Alt. S., offered 2011. Prerequisite: 230 or junior classification. In-depth study of some of the central moral problems arising in medicine, e.g., abortion, euthanasia, patients’ rights, health care professionals’ duties and responsibilities, allocation of medical resources. Major moral theories will be examined and applied. Nonmajor graduate credit.

Phil 332. Philosophy of Law. (Cross-listed with Cl Stl). (3-0) Cr. 3. S.S. Prerequisite: 201 or 230. Analysis of legal concepts, principles, institutions, and procedures. Theory of law and legal systems. Nonmajor graduate credit.

Phil 333. Family Ethics. (3-0) Cr. 3. Alt. S., offered 2011. Prerequisite: 3 credits in philosophy. Moral dimensions of marriage and love, parent-child relations, domestic work, and moral education. Can parents and children be asked to do things that childen “owe” their parents? Is there a feminist mode of moral thinking? Nonmajor graduate credit.

Phil 334. Environmental Ethics. (Cross-listed with Env S). (3-0) Cr. 3. F. Prerequisite: 3 credits in philosophy or junior classification. A survey of our obligation to obey the law; what constitutes just punishment; how much of the immoral should be made illegal? Relation of these questions to major theories of law and the state. Discussion of such concepts as coercion, equality, and responsibility. Nonmajor graduate credit.

Phil 336. Bioethics and Biotechnology. (3-0) Cr. 3. Prerequisite: 201 or 230. In-depth study of some of the central moral issues in the life sciences, e.g., genetic screening and testing, genetically engineered plants and animals, risk analysis, biotechnology patents, research ethics, and the impact of biotechnology on society and the environment. Major moral theories will be discussed and applied. (Phil 336 contains almost no similarities to Phil 331.) Nonmajor graduate credit.

Phil 337. Feminist Philosophy. (Cross-listed with W. S). (3-0) Cr. 3. F. Prerequisite: 2 credits in philosophy or women’s studies recommended. A critical, theoretical examination of the oppression of women, especially as it relates to issues of race, class, and sexual orientation. How concepts such as sex and gender, self and other, nature and nurture, understandings of what it means to be a woman. Historical and contemporary feminist philosophers addressing topics such as violence, sexuality, pornography, political power, family structure and women’s paid and unpaid labor. Nonmajor graduate credit.

Phil 340. Aesthetics. (3-0) Cr. 3. F. Prerequisite: 201 or 230. A looking at all this is to appreciate works of art or natural beauty? We will examine our aesthetic experiences, talk about such experiences (e.g., art criticism), and what makes them valuable. Do the different arts have common values? How are their differences important? Nonmajor graduate credit.

Phil 343. Philosophy of Technology. (Cross-listed with T SC). (3-0) Cr. 3. F. Prerequisite: 6 credits of social science or T SC 341 and 3 credits of social science. Moral and other philosophical problems related to developments in technology. Topics may include conditions under which technological innovations may give rise to human emancipation, relationship of technology and democracy, utility and limits of technological rationality, and problems of ensuring that benefits of technological advances are shared. Topics discussed with reference to such issues as contemporary developments in microelectronics, technology transfer to the Third World, etc. Nonmajor graduate credit.

Phil 350. Philosophy of Religion. (Cross-listed with Religi). (3-0) Cr. 3. F. Prerequisite: 201. The value and truth of religious life and belief. Mystical experience, religious faith and language; arguments for God’s existence; the problem of evil; miracles; and religion and morality. Historical and contemporary readings. Nonmajor graduate credit.

Phil 364. Metaphysics: God, Minds, and Matter. (3-0) Cr. 3. Prerequisite: 3 credits in philosophy. A survey of classical and contemporary views on some basic metaphysical issues. Issues discussed include: Does God exist? Do you have a mind and, if so, how does it relate to your body? What is the nature of cause and effect? Do objects have any essential properties? How can we account for properties objects have in common? Nonmajor graduate credit.

Phil 366. Truth, Belief and Reason. (3-0) Cr. 3. F. Prerequisite: 201 or permission of instructor. This course focuses on significant topics in theory of knowledge, including the value of truth, the role of sense experience in supporting our theoretical views, and the place of reason in human nature. Historical and contemporary views will be considered.

Phil 380. Philosophy of Science. (3-0) Cr. 3. F. Prerequisite: 201 or 6 credits in a science. Introduction to the philosophy of science. A variety of basic problems connected to the natural and social sciences: the nature of explanation, the structure of theories, the unity of science, and the distinction between science and nonscience. Nonmajor graduate credit.

Phil 381. Philosophy of the Social and Behavioral Sciences. (3-0) Cr. 3. S. Prerequisite: 201 or 6 credits in the social sciences. Theoretical, historical, and doctrinal issues about the social and behavioral sciences against the background of influence of the natural sciences. Focus is on the historical and cultural background of 19th and 20th century western thought. Nonmajor graduate credit.
Phil 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period. Nonmajor graduate credit.

Phil 430. Value-Theory. (3-0) Cr. 3. Repeatable. S. Prereq: 202. Theoretical and normative issues in ethics, aesthetics, religious thought, or political philosophy. Topics vary each time offered. Nonmajor graduate credit.

Phil 450. Persons and Causes. (3-0) Cr. 3. Repeatable. F. Prereq: 3 credits in philosophy; 207 strongly encouraged. Personal identity, agency, free will, moral responsibility, causation, future contingents, and time will be discussed. What makes a person the same person over time? Do humans have free will? Are we not morally responsible if our actions are inevitable consequences of the past and the laws of nature? What distinguishes causes from non-causes? Are there facts about the future? Nonmajor graduate credit.

Phil 460. Epistemology and Metaphysics. (3-0) Cr. 3. Repeatable. S. Prereq: 6 credits in philosophy. Issues in epistemology and metaphysics. Topics vary each time offered. Nonmajor graduate credit.

Phil 465. Brains, Minds, and Computers. (3-0) Cr. 3. F. Prereq: 201. Examination of concepts such as computability, intelligence, programming, and free will; and of arguments about whether any human capacity is forever beyond realization in a machine. Nonmajor graduate credit.

Phil 480. Controversies in Science. (3-0) Cr. 3. Repeatable. S. Prereq: 3 credits in philosophy or 6 credits in a natural or social science. Philosophical treatment of a branch of science that has (or has had) significant social, political, religious and/or moral implications. Possible topics include: the IQ debate, implications of Darwinism, the Galileo affair, the role of values in science, critical analysis of current science policy (e.g., the Human Genome Project). Topics will be arranged to meet the needs of interested students. Often taught by a philosopher and a scientist from the relevant discipline. Nonmajor graduate credit.

Phil 483. Philosophy of Biology. (3-0) Cr. 3. S. Prereq: 3 credits in philosophy or 3 credits in biology. Biology is powerful, both as a science and in its effects on our culture. Philosophy of biology evaluates this power. Possible topics include: What makes sciences such as evolutionary theory, ecology or molecular biology so good at explaining things? What is life? Can evolution account for design? What role does chance play in evolution? Can there be progress in the evolution of life on earth? What can sociobiology tell us about human nature, behavior and culture? Nonmajor graduate credit.

Phil 485. Philosophy of Physics. (3-0) Cr. 3. Prereq: 3 credits in Philosophy or 3 credits in Physics. S. Conceptual and philosophical issues relating to the interpretation of theories in classical and modern physics. May include one or more of the following topics: the relationship between mathematics and the physical world; Newtonian physics (determinism and predictability); the mechanics and statistical physics (the nature of probability; entropy and the direction of time); relativistic physics (determinism; realism and nonlocality; consciousness and the role of the observer). Nonmajor graduate credit.

Phil 490. Independent Study. Cr. Arr. Repeatable. Prereq: 6 credits in philosophy; permission of instructor; approval of chairman. Guided reading and research on special topics selected to meet needs of advanced students. No more than 9 credits of Phil 490 may be counted toward graduation. H. Honors

Phil 496. Ecology and Society. (Dual-listed with 596.) (3-0) Cr. 3. Prereq: Graduate classification in biological or environmental sciences/studies with at least one course in ecology. Analysis of conceptual and methodological debates in ecology. Historical development of competing research traditions and philosophies. Topics include i) methodological issues in ecological science, ii) conceptual issues in theoretical ecology, iii) conceptual issues in applied ecology, iv) relation of ecology to environmental and social issues. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

Phil 535. Contemporary Political Philosophy. (Cross-listed with Pol S.) (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 6 credits of philosophy or political science. Examination of theories of justice proposed by contemporary political philosophers. Analysis of the philosophical foundations of perspectives such as liberalism, libertarianism, communitarianism, socialism, feminism. Normative assessments of socio-political institutions.

A. History of Philosophy
B. Epistemology and Metaphysics
C. Value Theory
D. Logic and Philosophy of Science

Phil 596. Ecology and Society. (Dual-listed with 496.) (Cross-listed with EEOB.) (3-0) Cr. 3. Prereq: Graduate classification in biological or environmental sciences/studies with at least one course in ecology. Analysis of conceptual and methodological debates in ecology. Historical development of competing research traditions and philosophies. Topics include i) methodological issues in ecological science, ii) conceptual issues in theoretical ecology, iii) conceptual issues in applied ecology, iv) relation of ecology to environmental and social issues.

Religious Studies (Relig)

Undergraduate Study

Religious studies gives students the opportunity to investigate and reflect on the world’s religions in an objective, critical, and appreciative manner. Though there is emphasis in religious studies on the wide variety of religious phenomena as well as on the various methods in the study of religion, the aim is to help students develop their own integrated understanding of the nature of religion and its role in individual and social life.

Graduates of the religious studies program have knowledge of the religious diversity in the United States and the world. They have the ability to interpret religion empathetically and critically and to compare and contrast historical and contemporary differences and similarities of religious systems. They understand ways in which religion influences and is influenced by the historical, social, and cultural contexts in which religious systems function. Graduates often pursue careers in non-profit, community organizations; apply to professional schools or graduate programs; or enter seminaries to prepare for ministry.

The program provides students with the following opportunities: to major or minor in religious studies, to fulfill group requirements, to take religious studies courses that are integrated into another major, to take religious studies courses as electives, and to develop an interdisciplinary studies major. (See the professor in charge of the religious studies program for advice.)

The major in religious studies seeks to provide both breadth and depth. Breadth is provided through the exploration of the world’s various religious traditions and through exposure to a variety of theoretical approaches and methodologies in the academic study of religion. Depth is achieved through specialized courses in particular religious traditions and particular issues in the study of religions, culminating in research seminars. The objective is to expose the student to various components of the discipline of Religious Studies and by doing so develop skills that are valuable in a number of careers and that provide the necessary foundation for pursuing graduate studies.

Students pursuing a major in religious studies must complete a minimum of 33 credits, including the following requirements:

1. Either Relig 205, Introduction to World Religions or Relig 210, Religion in America.
4. Either 352, Religious Traditions of India or 353, Buddhism.
7. Three hours of Relig 475, Seminar.
8. A minimum of 12 credits of elective Religious Studies courses.

The program offers a minor which may be earned by completing a total of 15 credits in religious studies including either Relig 205 or 210. Nine hours must be in courses at the 300 level or above (no more than 3 hours of seminar and no more than 3 hours of independent study).

Communication Proficiency Requirement: The department requires a grade of C or better in each of English 150 and 250 or 250H, and requires one 300 level course in religious studies in which writing is evaluated as acceptable.

Students may choose to do a senior thesis under the supervision of a religious studies faculty adviser. This option may earn 3-6 credits toward the completion of the major.

Graduate Study

The program offers courses for nonmajor graduate credit in religious studies as supporting work in other fields. Religious studies may also be one of the three areas used for the interdisciplinary graduate studies master’s degree.

Courses primarily for graduate students

Relig 205. Introduction to World Religions. (3-0) Cr. 3. F.S.SS. An introduction to the academic study of religions, including myths, beliefs, rituals, values, social forms. Examples chosen from oral cultures and major religions of the world.

Relig 210. Religion in America. (3-0) Cr. 3. F.S.SS. Introductory study of the major beliefs, practices, and institutions of American Judaism, Catholicism, Protestantism, and Islam with emphasis on the diversity of religion in America, and attention to issues of gender, race, and class.
Relig 220. Introduction to the Bible. (3-0) Cr. 3. FS. Basic overview of the contents of the Old and New Testament in light of their ancient socio-historical background, and with attention to a variety of interpretations and relevance to modern American society.

Relig 242. History of Christianity. (3-0) Cr. 3. FS.SS. An introduction to Christian thought and practice from an historical point of view, stressing the development of belief, spirituality, and organization, and the continuities and changes involved in these developments. A. The Early Church through the Medieval period. B. The Reformation period to the present time.

Relig 280. Introduction to Catholicism. (3-0) Cr. 3. F. An exploration of the beliefs and practices of Roman Catholicism, including its understanding of God, sacramentality, the human person, and community, and its relationship to other forms of Christianity and other world religions.

Relig 321. Old Testament. (3-0) Cr. 3. F. An in-depth study of the literature and religion of ancient Israel in light of recent archaeological discoveries, research about the ancient Near East, and a variety of interpretations. Nonmajor graduate credit.

Relig 322. New Testament. (3-0) Cr. 3. S. A detailed survey of the sacred scriptures of Christianity in light of recent archaeological discoveries and historical research about their Greco-Roman and Jewish background. Nonmajor graduate credit.

Relig 323. Science and Religion. (Cross-listed with Hist). (3-0) Cr. 3. Prereq: Sophomore classification. History of changing interplay of science and religion in our understanding nature, from the trial of Galileo to our understanding nature, from the trial of Galileo to the rise of Christianity in the Roman empire, with attention to political, economic, and social, as well as spiritual, concerns. Nonmajor graduate credit.

Relig 328. American Indian Religions. (Cross-listed with Am Ind). (3-0) Cr. 3. F. Prereq: Prior course work in Religious Studies or African American Studies required. Examination of the American Indian experience from the perspective of black religion and the black church, with attention to political, economic, and social, as well as spiritual, concerns. Nonmajor graduate credit.

Relig 333. Introduction to Judaism. (3-0) Cr. 3. An introduction to basic Judaism. Special attention is given to Jewish sacred texts, rituals, social practices, and modern forms.

Relig 334. African American Religious Experience. (Cross-listed with Afr Am). (3-0) Cr. 3. F. Prereq: Prior course work in Religious Studies or African American Studies required. Examination of the African American experience from the perspective of black religion and the black church, with attention to political, economic, and social, as well as spiritual, concerns. Nonmajor graduate credit.

Relig 336. Women and Religion. (Cross-listed with W S). (3-0) Cr. 3. F. Prereq: 105, 210 or W S 201 recommended. Examines the status of women in various religions, feminist critiques of religious structures and belief systems, and contemporary women's spirituality movements. Nonmajor graduate credit.

Relig 339. Goddess Religions. (Cross-listed with W S). (3-0) Cr. 3. Prereq: Religion 205 recommended. Exploration of the foundational myths of Goddess spirituality, including historical and cross-cultural female images of the divine and their modern usage by American women. Nonmajor graduate credit.

Relig 340. Magic, Witchcraft, and Religion. (Cross-listed with Anthr). (3-0) Cr. 3. S. Prereq: Anthr 201 or 306. Origin and development of indigenous magico-religious systems; myth and ritual; therapeutic aspects; symbols and meanings; religion and socio-cultural change, including acculturation, nativistic, and revitalization movements.

Relig 348. Psychology of Religion. (Cross-listed with PSYCH). (3-0) Cr. 3. Prereq: Nine credits in psychology. Survey of psychological theory and research investigating religious and spiritual attitudes, beliefs and practices.

Relig 350. Philosophy of Religion. (Cross-listed with Phil). (3-0) Cr. 3. F. Prereq: Phil 201. The value and truth of religious life and belief. Mystical experience; religious faith and language; arguments for God's existence; the problem of evil; miracles; and religion and morality. Historical and contemporary readings. Nonmajor graduate credit.

Relig 352. Religious Traditions of India. (3-0) Cr. 3. Prereq: Prior course work in Asian, Asian-American or Religious Studies or Anthropology required. Examines the religious traditions of India, including Hinduism, Jainism, and Sikhism, through text, ritual, and contemporary practice. Nonmajor graduate credit.

Relig 353. Buddhism. (3-0) Cr. 3. S. The various Buddhist paths to realization and enlightenment and freedom. Special attention to meditation and yoga and their relationship to altered states of consciousness and to social contexts. Nonmajor graduate credit.

Relig 356. African Religions. (3-0) Cr. 3. Prereq: Prior course work in African, African-American or Religious Studies or Anthropology required. An introduction to the teachings, practices, and history of the religions that originated in Africa and other religions which have gained substantial followings among African peoples. Nonmajor graduate credit.

Relig 358. Introduction to Islam. (3-0) Cr. 3. An introduction to Islamic religion, culture, and society from 700 to the present. Nonmajor graduate credit.

Relig 360. Religious Ethics. (3-0) Cr. 3. Investigates different religious ethical theories and traditions of reasoning about practical moral issues (e.g., abortion, the just distribution of wealth, environmental ethics). Explores in detail the relationship between religious beliefs and moral practice.

Relig 367. Christianity in the Roman Empire. (Cross-listed with Cl St). (3-0) Cr. 3. A historical introduction to the rise of Christianity in the Roman empire, with special attention to the impact of Greco-Roman culture on the thought and practice of Christians and the interaction of early Christians with their contemporaries. Nonmajor graduate credit.

Relig 370. Religion and Politics. (Cross-listed with Pol S). (3-0) Cr. 3. Prereq: Religion 105 or 210 recommended. The interaction of religion and politics in the U.S. from both an historical and contemporary perspective, as well as the role of religion in politics internationally. Nonmajor graduate credit.

Relig 376. Classical Archaeology. (Cross-listed with Cl St Hist). (3-0) Cr. 3. Repeatable. S. Chronological survey of the material culture of the ancient Greek-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, art and crafts, trade and exchange, and burial customs will be explored.

A. Bronze Age (Minoan and Mycenaean palatial cultures) and Early Iron Age Greece. (ca 3000-700 BC).
B. Archaic through Hellenistic Greece (ca 700-300 BC).

Relig 377. Social Dimensions of Religion. (Cross-listed with Soci). (3-0) Cr. 3. Prereq: Prior course work in Religious Studies or Sociology required. The influence of religion in society, both as a conservator of values and as a force for social change. Nonmajor graduate credit.

Relig 380. Catholic Social Thought. (3-0) Cr. 3. S. Examines the major roots and major developments in Catholic social thought. Contemporary issues such as human rights, economic justice, the environment, and war and peace will be treated using principles of Catholic ethics, social thought, and official church documents, and contributions of notable sociologists and activists. Nonmajor graduate credit.

Relig 384. Religion and Ecology. (Cross-listed with Env Sc). (3-0) Cr. 3. Introduction to concepts of religion and ecology as they appear in different religious traditions, from both a historical and contemporary perspective. Special attention to religious response to contemporary environmental issues. Nonmajor graduate credit.

Relig 385. Theory and Method in Religious Studies. (3-0) Cr. 3. Prereq: 6 credits in Religious Studies or permission of instructor. Examines the variety of theories and methods employed in the study of religion. Application of these methods to various religions of the world. Nonmajor graduate credit.

Relig 475. Seminar: Issues in the Study of Religion. (3-0) Cr. 3. Prereq: 6 credits in religious studies. Topic changes each time offered. Closed to freshmen. Sophomores must have approval of instructor. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students.

Relig 590. Special Topics in Religious Studies. Cr. arr. Repeatable. Prereq: Permission of instructor. 9 credits in religious studies.

Physics and Astronomy

www.physics.iastate.edu/

Joseph Shinar, Chair of Department

Distinguished Professors: Canfield, Goldman, Harman, Ho, Johnston, Soukoulis

Distinguished Professors (Emeritus): Ciem, Finnemore, Lynch, Svenson

University Professor: Willson

Professors (Adjunct): Meyer, Vaknin

Professor (Collaborator): Womersley

Associate Professors: Cochran, McQueeny, Pohl, Prell, Rosati, Travesset-Casas

Associate Professors (Adjunct): Biswas, Budko, Kogan

Assistant Professors: Kaminski, Kerton, Prozorov, Sivasankar, Tuchin, Wang, Yu

Assistant Professor (Adjunct): Kreyssig

Senior Lecturers: Atwood, Herrera-Sikloody

Lecturers: Fretwell, Frishman, Levin, Meyers, Schuler, Shirokov

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in physics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum.

Physics and astronomy are basic natural sciences which attempt to describe and provide an understanding of both our world and our universe. Physics serves as the underpinning of many different disciplines including the other natural sciences.
and technological areas. Graduates are proficient in the methods of rigorous scientific analysis, relevant mathematical techniques, and modern computational and laboratory methods. They have a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, and modern physics. They are able to communicate clearly and effectively at general and technical levels. They are prepared to pursue a wide range of careers as a professional physicist, astronomer, or science educator. They are also prepared to pursue advanced studies and careers in areas as diverse as engineering, medicine, law, and business administration.

Many opportunities exist for students who terminate their studies with a bachelor’s degree, especially when combined with 20 to 25 credits in other areas. Students who meet the necessary scholastic standards often continue their studies in a graduate college, exploring and contributing to new developments in the field.

The department normally expects each student majoring in physics to complete at least the following courses: Phys 221, 222, 321, 321L, 322, 322L, 304, 306, 362, 364, 365, and three credits of laboratory work chosen from 310, 311, 311T, 470L, or Astro 344L. All students are required to earn at least 5 credits in laboratory work in physics in addition to the laboratory components of Phys 221 and 222. These 5 credits must be in courses numbered 300 or higher or in approved substitutions. All students must earn at least 20 credits in physics and astronomy courses numbered 304 or higher. The basic list of expected courses is not a rigid requirement and changes in this basic list will be approved by the department curriculum committee on recommendation of the student’s adviser when such changes will better serve the student’s needs. In particular, students planning a physics major and also seeking certification for high school teaching may, with the approval of their adviser, follow a significantly different program designed to meet their particular needs; these students should consult the department for further information. Further information concerning programs of study, including sample degree programs, is available from the department.

Students majoring in physics who wish an emphasis in astronomy/astrophysics should consider a minor in astronomy (see below). Those planning graduate work in physics or astronomy/astrophysics should add to the courses Phys 480 and 481. Other useful courses include Phys 496, Math 363, 426, and 471, and Stat 447. One or more of Astro 405, Phys 511 or 526 may also be added according to interest.

The department offers a minor in physics which may be earned by completing 20 credits in physics courses chosen as follows: Phys 221, 222, 321; at least one credit of laboratory chosen from 321L, 322L, 310, 311, and 311T. Other acceptable courses are 304, 306, 321, 362, 364, 365, 480, 481, and 496.

The department offers a minor in astronomy which may be earned by completing 15 credits chosen as follows: a total of 12 or more credits in Astro courses (must include Astro 344L and may include one of the courses Astro 120, Astro 150 or Astro 250), and three additional credits (if applicable) chosen from among Physics 394, 321, 361, 362, 364, 365, 480, 481, or 496; 12 or more credits must be at the 300 level or higher. Note that the same course may not be used to satisfy both the requirements of a physics major and an astronomy minor.

Communication Proficiency Requirement: The department requires a grade of C or better in each of Engl 150 and 250 (or 250H), and a C– or better in Engl 302, 305, 309 or 314. Students are also encouraged to study at least one foreign language. The expected outcomes for students in these programs are: (1) a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, wave motion and modern physics; (2) proficiency in laboratory practice; (3) proficiency in modern scientific computational methods; and (4) a sound foundation in the liberal arts including proficiency in communication skills.

In addition to the performance on exams and course grades, information on evaluating of the success in meeting these goals is obtained by: (1) an annual written survey of all students majoring in the program; (2) an annual written survey of all graduating seniors; (3) a personal survey of program alumni; (4) student evaluations of all courses; (5) adviser evaluations; and (6) a bimonthly meeting of program majors with the department chair.

Graduate Study

The department offers studies for the degrees of Master of Science and Doctor of Philosophy with majors at both levels in applied physics, astrophysics, condensed matter physics, high energy physics, nuclear physics, and physics; and minor credit courses for students majoring in other departments.

Facilities of various research groups of the department, the Ames Laboratory, and the Applied Science Center, including the Microelectronics Research Center, are available for research.

Students with bachelor’s degrees in physics or astronomy from other institutions ordinarily will qualify for graduate study at Iowa State provided they have satisfactorily completed course work similar to that suggested for undergraduate majors here intending to go on to graduate school. In some cases additional instruction at the intermediate level may be required.

Graduates have a broad understanding of physical science, as well as mastery of state-of-the-art methods in their specialization. They are able to communicate effectively to a wide range of audiences, from the general public to research colleagues. Their skills in rigorous scientific thinking prepare them for leadership in the broader community. They are skilled in carrying out research, communicating research results, and soliciting research support. They have considerable teaching experience. They have developed problem solving skills that prepare them for careers in either industry or academia.

All candidates for an advanced degree in physics are expected to complete Phys 531, 564, 571, 572, 591 and 592. Candidates for an advanced degree in applied physics are expected to complete Phys 571, 591, 470L (6 cr.), 699 (3 cr.) and either 572. Candidates for an advanced degree in astrophysics should complete Phys 531 and/or 564, Phys 571, Phys 591, Astro 505, and Astro 510. Astrophysics Ph.D. candidates must take at least three of the 580 level Astro courses, while candidates for the Research Masters must take at least two 590 level Astro courses.

Except for the applied physics major where a thesis is always required, the degree master of science is offered both with and without thesis. For all areas of study except applied physics the basic requirements for the M.S. are the same: at least 30 credits of acceptable graduate work must be completed, not less than 21 of which must be in physics or astronomy. Students must complete not less than 6 credits from outside their major area, with 3 credits being required from outside the department, and 3 credits from a 500 or 600 level course in another area of specialization. Students choosing a M.S. degree with thesis may apply up to 8 credits of 699 but no credits of 699 toward the minimum 30 credits. Students choosing a degree without thesis should apply 2 credits of 599, but may not apply any credits of 699 toward the minimum 30 credits.

Students whose major area is applied physics must complete at least 30 credits of acceptable graduate work for the M.S. degree and not less than 19 credits of these must be in the required courses listed above; the remaining 11 credits of the credit minimum may be chosen freely either from within the student’s major area or from without and either from the department or outside, but it should be noted that not more than 3 credits of Phys 699 may be applied toward the 30 credit minimum.

In addition to course work in the major area of study, all candidates for the Ph.D. degree must complete 12 credits from other areas. Of these 6 must be taken from other departments and 6 must be taken from the department with the additional constraint that this latter 6 must include at least one 500 or 600 level introductory course in another area of specialization. Each candidate for the Ph.D. degree is required to teach one year of elementary physics or astronomy.

Graduate students interested in a physics minor should contact the department for requirements.

Astronomy and Astrophysics (Astro)

Courses primarily for undergraduate students

Astro 102. North Star Astronomy. Cr. 1, 3. F.S. An entirely WEB-based course covering topics in observing the sky and navigation by the stars for students with little or no previous experience. The course combines material on common naked-eye phenomena, such as daily and seasonal variations in the sky, with information on how these helped navigators determine where they are on Earth. The course "lectures" are on-line, interactive units with built-in exercises, hands-on (offline) activities and layers of help. Graded homework and quizzes are administered via Web-CT. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

Astro 103. Evening Star. Cr. 1, 3. F.S. An entirely web-based course covering topics in observing the sky and navigation by the stars for students with little or no previous experience. The course combines material on common naked-eye phenomena, such as daily and seasonal variations in the sky, with information on how these helped navigators determine where they are on Earth. The course "lectures" are on-line, interactive units with built-in exercises, hands-on (offline) activities, and layers of help. Graded homework and quizzes are administered via Web-CT. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

Astro 120. The Sky and the Solar System. (3-0) Cr. 3, F.S.S. For the nonscientist. The sky: constellations, motions of the sun, moon, and planets; seasons and the calendar; eclipses. The solar system: origin and evolution; characteristics of the sun, planets, satellites, comets, meteors, and asteroids. Exposure to the planetarium is included. Gradestaff.

Astro 125L. The Sky and the Solar System Laboratory. (0-2) Cr. 1, F.S. Prereq: Concurrent or previous enrollment in Astro 120. Laboratory course to accompany Astro 120. Students carry out practical exercises involving naked eye and telescope observing to explore and reinforce ideas covered in Astro 120. Activities based on a sky-simulation computer program and other weather-independent exercises are also included.
Astro 150. Stars, Galaxies, and Cosmology. (3-0) Cr. 3. F.S. For the nonscientist. Observational aspects of stellar astronomy: motions, distances, sizes, spectra; types of stars; variability; binary systems. Stellar evolution: the birth, life, and death of stars, including supernovae, black holes, and the birth of galaxies. The Milky Way Galaxy: clouds of matter in space, the structure and evolution of our galaxy. Other galaxies: clusters of galaxies, quasars. Theories of the origin of the universe.

Astro 250. Astronomy Bizarre. (3-0) Cr. 3. S. Prereq: 120 or 150. For the nonscientist. New and exciting topics in modern astrophysics. Galaxy and star formation, black holes and pulsars. Colliding galaxies. Quasars. Cosmology, the Big Bang and the future of the universe. Prospects and searches for extraterrestrial life.

Astro 344L. Astronomy Laboratory. (1-0) Cr. 3. F. Prereq: Phys 222. Experiments in optical astronomy. Observational techniques, ranging from stellar photometry to CCD imaging. Available instruments include a variety of small telescopes up to 14-inch in size. Class meets at Fick Observatory south of Boone. Nonmajor graduate credit.

Astro 450L. Undergraduate Research. Cr. arr. Repeatable. F.SS. Prereq: 344L and permission of instructor. Laboratory or observational project under supervision of astronomy faculty.

Astro 490. Independent Study. Cr. arr. Repeatable. Prereq: 6 credits in astronomy, permission of instructor. No more than 9 credits of Astro 490 may be counted toward graduation. H. Honors

Courses primarily for graduate students, open to qualified undergraduate students

Astro 505. Astrophysical Processes. (Dual-listed with 506). (3-0) Cr. 3. F. Prereq: 346 or permission of instructor. Survey of astrophysical processes relating to stars, galaxies and the Universe. Radiation transport, radiation processes, scattering, kinetic description of plasma, hydrodynamics, magnetohydrodynamics, MHD waves, shocks, properties of systems in local thermodynamic equilibrium, non-thermal systems, astrophysical effects of general relativity.

Astro 510. Observational Astrophysics. (2-3) Cr. 3. Alt. F., offered 2009. Prereq: 405 or 505. Techniques in optical and near-infrared astronomy, including spectroscopy and CCD photometry. Emphasis on projects involving proficiency in the use of research telescopes and their instrumentation. Project topics range from photometric studies of pulsating and binary star systems to deep CCD imaging of faint nebulae and galaxies.

Astro 582. High Energy Astrophysics. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 405 or 505. Interactions of high-energy particles, non-thermal radiation processes, spectral evolution of non-thermal systems, cosmic rays, active galaxies, pulsars, neutrinos, measurement techniques for relativistic charged particles, high energy photons, and neutrinos.

Astro 584. Galactic Astronomy. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 405 or 505. Overall structure of our Galaxy and the interstellar medium. Physical processes in the interstellar medium (e.g., heating and cooling mechanisms, turbulence). Observational techniques for studying the interstellar medium. Kinematics and chemical evolution of the Galaxy.

Astro 586. Extragalactic Astronomy. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 405 or 505. Galaxy evolution, dynamics of external galaxies, evolution and classification of galaxies, groups and clusters of galaxies, extragalactic radio sources, quasars, structure formation, cosmological models and their observational consequences.

Astro 590. Special topics. Cr. arr. Repeatable.

Astro 599. Creative Component. Cr. arr. Prereq: Permission of instructor. Individually directed study of research-level problems for students electing the nonthesis M.S. option in astronomy.

Astro 650. Advanced Seminar. (1-0) Cr. 1. Repeatable. F.S. Topics of current interest in astronomy and astrophysics. Satisfaction-fail only.

Astro 660. Advanced Topics in Astronomy and Astrophysics. Cr. arr. Repeatable. F.S. Topics in stellar, galactic, and extragalactic astronomy, including stellar evolution, solar physics, variable stars, compact objects, the interstellar medium, active galaxies and quasars, formation and evolution of galaxies, cosmology, high energy astrophysics, advanced observational techniques, and astrophysical applications of hydrodynamics.

Physics (Phys)

Courses primarily for undergraduate students

Phys 101. Physics for the Nonscientist. (3-0) Cr. 3. F.S. Survey of the principal areas of both classical and modern physics. Emphasis on the nature of the physical universe and the application of physical principles to life in the modern world. Not suitable to meet a general physics requirement for natural science majors.

Phys 106. The Physics of Common Experience. (4-2) Cr. 4. F.S. Elementary topics from mechanics, heat, electricity, sound, and light, emphasizing the use of basic principles to understand everyday experience. Includes practical problem exercises and a coordinate-laboratory. Not suitable to meet a general physics requirement for natural science majors.

Phys 111. General Physics I. (4-2) Cr. 4. F.S. Prereq: 111 or 112. Elementary topics from mechanics, heat, electricity, and magnetism, ray and wave optics, topics in modern physics.

Phys 118. Physics of Music. (2-2) Cr. 3. F. Introduction to the sound for non-physics majors. Properties of pure tones and harmonics; human perception of sound; room acoustics; scales; production, and analysis of musical by voice, string, woodwind, brass, and percussion instruments. Not suitable to meet a general physics requirement for natural science majors.

Phys 199. Introductory Seminar. Cr. R. F. (1-1) Gain experience in key skills that physicists/astronomers use routinely, but are rarely explicitly taught in formal courses. Participate in faculty-led discussions on frontier areas and careers. Satisfactory-fail only.

Phys 221. Introduction to Classical Physics I. (4-1) Cr. 5. F.S.SS. Prereq: Credit or enrollment in Math 166. For engineering and science majors. 3 hours of lecture each week plus 3 recitations and 1 laboratory every 2 weeks. Elementary mechanics including kinematics and dynamics of particles, work and energy, linear and angular momentum, conservation laws, rotational motion, oscillations, gravitation, Heat, thermodynamics, kinetic theory of gases; waves and sound.

H. Honors. F.S.

Phys 222. Introduction to Classical Physics II. (4-2) Cr. 5. F.S.SS. Prereq: 111 or 112, Math 166. 3 hours of lecture each week plus 1 recitation and 1 laboratory each week. Electric forces and fields. Electrical currents; DC circuits. Magnetic forces and fields; LR, LC, LCR circuits; Maxwell's equations; ray optics and image formation; wave optics; topics in modern physics. H. Honors. F.S.

Phys 298. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Phys 302. The Challenge of Contemporary Physics. (3-0) Cr. 3. S. Prereq: Sophomore classification. A largely nonmathematical but intellectually challenging exploration of physics, which assumes no previous work in the field. Selected material from classical and modern physics establishes the conceptual framework for the study of major areas of contemporary physics, culminating in the discussion of topics at the frontier of present knowledge. Topics vary yearly and
may include quarks, lasers, superconductivity, fission and fusion, solid state devices, gravitational waves, string theory, facilities, led handed materials, and quantum computing. Not suitable to meet a general physics requirement for natural science majors.

Phy 306. Physics of Wave Motion. (3-0) Cr. 3. S. Prereq: 222, credit or enrollment in Math 267. Oscillating systems including damped and forced oscillations; fluids; geometric optics, wave waters, the wave equation, Fourier and Laplace transforms, non-uniform media, cylindrical and spherical waves, polarization, interference and diffraction, transmission lines, non-linear waves.

Phy 310. Electronic Instrumentation for Experimental Physics. (2-4) Cr. 4. F. Prereq: 222 Math 166. Common electrical instruments; power supplies, transducers; passive and active devices, analog integrated circuits, including filters and amplifiers; digital integrated circuits, signal transmission and enhancement. Nonmajor graduate credit.

Phys 311T. Intermediate Laboratory. (0-6) Cr. 3. Repeatable. S. Prereq: 312 or 222. Experiments in classical and modern physics performed independently by each student. Preparation for a career in high school teaching. Required for approval to teach physics in secondary schools.

Phys 321. Introduction to Modern Physics I. (3-0) Cr. 3. S. Prereq: 222, credit or enrollment in Math 266. Quantum nature of matter: photons, de Broglie's postulate: wave-like properties of matter; Bohr's model of the hydrogen atom; Schrodinger equations in one dimension: energy quantization; detailed solutions for potential steps, barriers and wells; one-electron atoms, spin and magnetic interactions; ground states, optical, and x-ray excitations of multi-electron atoms.

Phys 322. Introduction to Modern Physics II. (3-0) Cr. 3. S. Prereq: 321. Quantum statistics; lasers; physics of molecules. Properties of solids, including electron band structure, superconductivity and magnetism. Nuclear physics, including nuclear sizes and masses, stability, decay modes, reactions, fission and fusion. Elementary particles, including strangeness, charm, and quirks. Fundamental forces of nature.

Phys 322L. Introductory Laboratory in Modern Physics (2-0) Cr. 1. S. Prereq: Credit or enrollment in 322. Experiments related to the foundations of modern physics. Radioactive decay, elementary particles, Helion effect, quantization, spectroscopy, statistics and instrumentation.

Phys 362. Intermediate Mechanics. (3-0) Cr. 3. S. Prereq: 361. Rigid body motion; small oscillations, normal modes. Special relativity including length contraction, time dilation, simultaneity, Lorentz transformation, 4-vector covariant formalism, relativistic mechanics. Nonmajor graduate credit.

Phys 364. Electricity and Magnetism I. (3-0) Cr. 3. F. Prereq: 222, Math 385 or Math 395. Static electric and magnetic fields, potential theory; electromagnetism, Maxwell's equations. Nonmajor graduate credit.

Phys 365. Electricity and Magnetism II. (3-0) Cr. 3. S. Prereq: 364. Relativistic electromagnetic theory; radiation and propagation of electromagnetic waves; interaction with matter. Nonmajor graduate credit. Seminar. Cr. 3. S. 1-10. Required of all junior physics majors. Career opportunities: graduate school programs and application, job placement, alternative careers, basic skills needed for the job market competition. Satisfactory-fail only.

Phys 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Phys 432. Molecular and Cell Biophysics. (Dual-listed with 532). (3-0) Cr. 3. S. Prereq: 304 or Chem 325. Quantitative description of biological systems using basic physical laws, including a brief discussion of a variety of biological techniques. Topics include: thermodynamics, chemical equilibrium, gene expression, structure and physical properties of nucleic acids and proteins, folding of nucleic acids and proteins, chemical kinetics, catalysis, allosteric enzymes, cell membrane structure and physical properties, and machines in cell membranes. Nonmajor graduate credit.

Phys 450L. Undergraduate Research. Cr. arr. Repeatable. F. S. Prereq: 311, permission of instructor: Laboratory project under supervision of physics faculty.

Phys 470L. Applied Physics Laboratory. Cr. arr. Repeatable. F. S. Prereq: 322 and permission of instructor. Studies in modern experimental techniques via experimentation and simulation in various areas of applied physics, e.g. x-ray spectroscopy, magnetic ions in solids, electronic heat capacity; the Higgs mechanism; the CKM matrix; running coupling constants; relativistic heavy-ion collisions; selected topics beyond the standard model such as SUSY and grand unification.

Phys 531. Statistical Mechanics. (3-0) Cr. 3. S. Prereq: 304 and credit or enrollment in 481. First semester of a full-year course. Free electron model; crystal symmetry; band theory of solids; transport properties; Fermi surfaces and conductors; crystal surfaces; magnetism; superconductivity.

Phys 512. Condensed Matter Physics II. (3-0) Cr. F. Prereq: 511. Continuation of 511. Free electron model; crystal symmetry; band theory of solids; transport properties; Fermi surfaces and conductors; crystal surfaces; magnetism; superconductivity.

Phys 526. Particle and Nuclear Physics. (4-0) Cr. 4. S. Prereq: Credit or enrollment in 481. Basic properties and structures of nuclei, hadrons, and elementary particles; weak and strong interactions; the Standard Model; accelerators and detectors; nuclear models; nuclear decay and stability; nuclear astrophysics; the Higgs mechanism; the CKM matrix; running coupling constants; relativistic heavy-ion collisions; selected topics beyond the standard model such as SUSY and grand unification.

Phys 531. Statistical Mechanics. (3-0) Cr. 3. S. Prereq: 304 and credit or enrollment in 481. First semester of a full-year course. Free electron model; crystal symmetry; band theory of solids; transport properties; Fermi surfaces and conductors; crystal surfaces; magnetism; superconductivity.

Phys 526. Particle and Nuclear Physics. (4-0) Cr. 4. S. Prereq: Credit or enrollment in 481. Basic properties and structures of nuclei, hadrons, and elementary particles; weak and strong interactions; the Standard Model; accelerators and detectors; nuclear models; nuclear decay and stability; nuclear astrophysics; the Higgs mechanism; the CKM matrix; running coupling constants; relativistic heavy-ion collisions; selected topics beyond the standard model such as SUSY and grand unification.

Phys 531. Statistical Mechanics. (3-0) Cr. 3. S. Prereq: 304 and credit or enrollment in 481. First semester of a full-year course. Free electron model; crystal symmetry; band theory of solids; transport properties; Fermi surfaces and conductors; crystal surfaces; magnetism; superconductivity.

Phys 526. Particle and Nuclear Physics. (4-0) Cr. 4. S. Prereq: Credit or enrollment in 481. Basic properties and structures of nuclei, hadrons, and elementary particles; weak and strong interactions; the Standard Model; accelerators and detectors; nuclear models; nuclear decay and stability; nuclear astrophysics; the Higgs mechanism; the CKM matrix; running coupling constants; relativistic heavy-ion collisions; selected topics beyond the standard model such as SUSY and grand unification.

Phys 531. Statistical Mechanics. (3-0) Cr. 3. S. Prereq: 304 and credit or enrollment in 481. First semester of a full-year course. Free electron model; crystal symmetry; band theory of solids; transport properties; Fermi surfaces and conductors; crystal surfaces; magnetism; superconductivity.

Phys 526. Particle and Nuclear Physics. (4-0) Cr. 4. S. Prereq: Credit or enrollment in 481. Basic properties and structures of nuclei, hadrons, and elementary particles; weak and strong interactions; the Standard Model; accelerators and detectors; nuclear models; nuclear decay and stability; nuclear astrophysics; the Higgs mechanism; the CKM matrix; running coupling constants; relativistic heavy-ion collisions; selected topics beyond the standard model such as SUSY and grand unification.

Phys 531. Statistical Mechanics. (3-0) Cr. 3. S. Prereq: 304 and credit or enrollment in 481. First semester of a full-year course. Free electron model; crystal symmetry; band theory of solids; transport properties; Fermi surfaces and conductors; crystal surfaces; magnetism; superconductivity.

Phys 526. Particle and Nuclear Physics. (4-0) Cr. 4. S. Prereq: Credit or enrollment in 481. Basic properties and structures of nuclei, hadrons, and elementary particles; weak and strong interactions; the Standard Model; accelerators and detectors; nuclear models; nuclear decay and stability; nuclear astrophysics; the Higgs mechanism; the CKM matrix; running coupling constants; relativistic heavy-ion collisions; selected topics beyond the standard model such as SUSY and grand unification.

Phys 541. General Relativity. (3-3) Cr. 3. F. Prereq: 362 or Math 465. Tensor analysis and differential geometry developed and used to formulate Einstein field equations. Schwarzschild and Kerr solutions. Other advanced topics may include gravitational radiation, particle production by gravitational fields, alternate gravitational theories, attempts at unified field theories, cosmology.

Phys 551. Computational Physics. (0-4) Cr. 2. S. Prereq: 365, credit or enrollment in 481. Use of modern computational techniques to analyze topics in classical and modern physics. Satisfactory-fail only.

Phys 572. Electricity and Magnetism II. (3-0) Cr. 3. S. Prereq: 571. Special theory of relativity, least action and motion of charged particles in electromagnetic fields, radiation, collisions between charged particles, multipole fields, radiation damping.

Phys 591. Quantum Physics I. (4-0) Cr. 4. F. Prereq: 481. First semester of a full-year course. Postulates of quantum mechanics; time-dependent and time-independent Schrodinger equations for one-, two-, and three-dimensional systems; theory of angular momentum; Rayleigh-Schrödinger time-independent perturbation theory.

Phys 592. Quantum Physics II. (4-0) Cr. 4. S. Prereq: 591. Continuation of 591. Variational theorem and WKB method; time-dependent perturbation theory; method of partial waves and Born approximation for scattering by central potentials; optical potentials; amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density.

Phys 593. Physics of Semiconductors. (Cross-listed with E E) (3-3) Cr. 4. F. Prereq: 481 and E E 332. Basic elements of quantum theory, Fermi statistics, motion of electrons in periodic structures, crystal structure, energy bands, equilibrium carrier concentration and doping, excess carriers and recombination, carrier transport in collective fields; fionics; quantum optical properties, amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density.

Phys 594. Creative Component. Cr. arr. Prereq: Permission of instructor. Individually directed study of research-level problems for students electing the nonthesis M.S. degree option.

Courses for graduate students

Phys 601. Oral Communication of Physics Seminar. (2-0) Cr. 1. Repeatable. F. A practical introduction to communication methods in physics and astronomy classrooms and professional settings. For graduate physics majors only. Satisfactory-fail only.

Phys 602. Introductory Research Seminar. Cr. R. F. (1-1) Discussion by research staff of their research areas, expected thesis research work, and opportunities in the field for graduate physics majors only. Satisfactory-fail only.

Phys 511. Condensed Matter Physics I. (3-0) Cr. 3. S. Prereq: 304, credit or enrollment in 481. First semester of a full-year course. Free electron model; crystal symmetry; band theory of solids; transport properties; Fermi surface; phonons; semiconductors; crystal surfaces; magnetism; superconductivity.

Phys 512. Condensed Matter Physics II. (3-0) Cr. 3. F. Prereq: 511. Continuation of 511. Free electron model; crystal symmetry; band theory of solids; transport properties; Fermi surface; phonons; semiconductors; crystal surfaces; magnetism; superconductivity.

Phys 526. Particle and Nuclear Physics. (4-0) Cr. 4. S. Prereq: Credit or enrollment in 481. Basic properties and structures of nuclei, hadrons, and elementary particles; weak and strong interactions; the Standard Model; accelerators and detectors; nuclear models; nuclear decay and stability; nuclear astrophysics; the Higgs mechanism; the CKM matrix; running coupling constants; relativistic heavy-ion collisions; selected topics beyond the standard model such as SUSY and grand unification.

Phys 531. Statistical Mechanics. (3-0) Cr. 3. S. Prereq: 304 and credit or enrollment in 481. Math 465, credit or enrollment in Math 385 or 426. Thermodynamic properties of systems of many particles obeying Boltzmann, Fermi-Dirac, and Bose-Einstein statistics; microcanonical, canonical, and grand canonical ensembles and their application to physical problems; density matrices; introduction to phase transitions; renormalization group theory; kinetic theory and fluctuations.

Phys 532. Molecular and Cell Biophysics. (Dual-listed with 432). (3-0) Cr. 3. S. Prereq: 304 or Chem 325. Quantitative description of biological systems using basic physical laws, including a brief discussion of a variety of biophysical techniques. Topics include: thermodynamics, chemical equilibrium, gene expression, structure and physical properties of nucleic acids and proteins, folding of nucleic acids and proteins, chemical kinetics, catalysis, allosteric enzymes, cell membrane structure and physical properties, and machines in cell membranes.

Phys 534. Symmetry and Group Theory in Physics. (3-0) Cr. 3. S. Prereq: Credit or enrollment in 481. Theory of groups and group representations; introduction to both point and continuous groups, and their applications in physics.

Phys 535. Physics of Semiconductors. (Cross-listed with E E) (3-3) Cr. 4. E E 435. Basic elements of quantum theory, Fermi statistics, motion of electrons in periodic structures, crystal structure, energy bands, equilibrium carrier concentration and doping, excess carriers and recombination, carrier transport in collective fields; fionics; quantum optical properties, amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density.

Phys 541. General Relativity. (3-0) Cr. 3. F. Prereq: 362 or Math 465. Tensor analysis and differential geometry developed and used to formulate Einstein field equations. Schwarzschild and Kerr solutions. Other advanced topics may include gravitational radiation, particle production by gravitational fields, alternate gravitational theories, attempts at unified field theories, cosmology.

Phys 551. Computational Physics. (0-4) Cr. 2. S. Prereq: 365, credit or enrollment in 481. Use of modern computational techniques to analyze topics in classical and modern physics. Satisfactory-fail only.

Phys 572. Electricity and Magnetism II. (3-0) Cr. 3. S. Prereq: 571. Special theory of relativity, least action and motion of charged particles in electromagnetic fields, radiation, collisions between charged particles, multipole fields, radiation damping.

Phys 591. Quantum Physics I. (4-0) Cr. 4. F. Prereq: 481. First semester of a full-year course. Postulates of quantum mechanics; time-dependent and time-independent Schrodinger equations for one-, two-, and three-dimensional systems; theory of angular momentum; Rayleigh-Schrödinger time-independent perturbation theory.

Phys 592. Quantum Physics II. (4-0) Cr. 4. S. Prereq: 591. Continuation of 591. Variational theorem and WKB method; time-dependent perturbation theory; method of partial waves and Born approximation for scattering by central potentials; optical potentials; amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density.

Phys 624. Advanced Nuclear Physics. (3-0) Cr. 3. Prereq: 526 and 592. Microscopic few-body and many-body theory; theory of effective Hamiltonians; relativistic nuclear physics; nuclear effects in hadron-nucleus, lepton-nucleus, and nucleus-nucleus reactions.

Phys 625. Physics of Strong Interactions. (3-0) Cr. 3. Prereq: 681. Quark model; Quantum Chromodynamics (QCD), perturbation methods for QCD; effective field theories for pions and nucleons; finite temperature field theories; quark-gluon plasma; phase transitions in QCD.

Phys 638. Elementary Particle Physics II. (3-0) Cr. 3. Prereq: 637. Continuation of 637. Properties of leptons, bosons, and quarks and their interactions; Quantum chromodynamics, Glashow-Weinberg-Salam model, grand unification theories, supersymmetry, and superstring theory; modern theoretical techniques and tests of the Standard Model.

Phys 681. Quantum Field Theory I. (3-0) Cr. 3. F.
Phys 684. Quantum Electrodynamics. (2-0) Cr. 3.
Phys 686. Quantum Field Theory II. (3-0) Cr. 3.

All Ph.D. candidates take a core curriculum comprising courses recommended from the following four categories, attend research seminars, research credits (PIBio 699), annual Loomis Lecture and mini-symposium and retreats. Students will take additional courses of interest as directed by their Program of Study (POS) Committee members.

A total of 72 credits including a minimum of 24 course credits are required for a Ph.D.

(1) Complete the following core courses:
- a) Stat 401
- b) BBMB 404 or BBMB 501
- c) GDCB 513
- d) Agron/Gen/Pl 565
- e) Make four seminar presentations and enroll each term in the Interdepartmental Plant Physiology seminar PIBio 696P or its listed equivalent. The first seminar must be during the student’s first year and is a 20 minutes seminar. The last presentation must be an exit seminar.

(2) Take one course from the following courses:
- a) BBMB 405
- b) BBMB 502
- c) GDCB 511
- d) GDCB 545

(3) Take one course from the following courses:
- a) GDCB 512
- b) GDCB 529

(4) Take additional courses from the following list:
- Agron 516; Agron 527; Agron/Hort/NREM 529
- Agron 616; Agron 625; BBMB 405; BBMB 451; BBMB 502; BBMB 607; BBMB 645; BBMB 660; BBMB 675; BBMB 676; BCB 551; BCB 596; Biol 454; Biol 474; EEOB 563; EEOB 566; EEOB 595; GDCB 510; GDCB 512; GDCB 528; GDCB 529; GDCB 545; GDCB 640; GDCB 679; GDCB 680; GDCB 681.

Requirements for students seeking Plant Physiology as Minor:

(1) Prerequisite courses:
- Stat 401
- BBMB 404 or BBMB 501

(2) Take a minimum of nine credits from the following courses:
- Agron 516; Agron 527; BBMB 607; Biol 454; GDCB 512; GDCB 513; GDCB 529; GDCB 545.

In addition to the required core courses, a wide selection of courses is available in IPPM graduate students for broadening their scientific education. Decisions about which courses are taken and when they are taken are made by the student, initially in consultation with his or her temporary advisor, and then with his or her major advisor and eventually with POS Committee, which also serves as the Thesis or Dissertation Committee.

Courses for graduate students

PIBio 512. Plant Growth and Development. (Cross-listed with GDCB, MCBID). (2-0) Cr. 2. S. Prereq: Biol 330 or a course in developmental biology; GDCB 545 or BBMB 404, 405 or GDCB 520. Plant growth and development and its molecular genetic regulation. Hormone biosynthesis, metabolism, and action. Signal transduction in plants.

PIBio 513. Plant Metabolism. (Cross-listed with GDCB). (2-0) Cr. 2. F. Prereq: Biol 330, Phys 111, Chem 331; one semester of biochemistry recommended. Photosynthesis, respiration, and other aspects of plant metabolism.

Plant Pathology

The department participates in the interdepartment undergraduate Microbiology major; see Agriculture, Curricula

Graduate Study

The department offers studies for the degrees master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science nonthesis option is available. The department also participates in the interdepartmental majors in microbiology; toxicology; genetics; plant physiology; molecular, cellular, and developmental biology; ecology and evolutionary biology; and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They are skilled in research procedures, communicating research results, and writing concise and persuasive grant proposals.

Courses primarily for undergraduate students

PI P 391. Practical Plant Health. (0-4) Cr. 2. F. Prereq: 6 credits in biological sciences. Diagnosis of all types of plant-plant problems caused by diseases, insects, weeds, nutrient deficiencies and toxicities, herbicide injury, and environmental stress. Emphasis is on acquiring practical skills. Students will gain experience in written and oral communication.

PI P 408. Principles of Plant Pathology. (Dual-listed with 508). (2-3) Cr. 3. F. Prereq: 8 credits in biological sciences, including Biol 212, Braun. Principles underlying the nature, diagnosis, and management of plant diseases. Laboratory complements lecture topics and provides experience in plant disease diagnosis.
Courses primarily for graduate students, open to qualified undergraduate students

PI P 511. Integrated Management of Tropical Crops. (Cross-listed with Ent, Hort) (3-0) Cr. 3. S. Prereq: 408, Biol 370 or Hort 221. Gleason, Lewis, Nonnecke. Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writing of individual projects. Tour expenses paid by students.

PI P 530. Ecologically Based Pest Management Strategies. (Cross-listed with Agron, Ent, SusAg). (3-0) Cr. 3. F. Prereq: 2010. Prereq: 504 and 525. Nutter. Theory and practice related to the ecology and epidemiology of plant disease epidemics. Interactions among host and pathogen populations as affected by the environment are quantified with respect to time and space. Analysis of ecological and host and pathogen genetic factors that alter the course of plant disease epidemics. Risk assessment theory, disease forecasting, and modeling the impact of biotic plant stresses on yield and quality are also emphasized.

PI P 574. Plant Nematology. (2-3) Cr. 3. F. Prereq: 408 or 416. Baum. Morphology, anatomy, identification, control, and life cycles of common plant-parasitic nematodes; host-parasite interactions; Caenorhabditis elegans.

PI P 577. Bacterial-Plant Interactions. (Dual-listed with 477). (Cross-listed with Micro). (3-1) Cr. 3. S. Prereq: 2010. Prereq: 3 credits in microbiology or plant pathology. Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth promotion, and biological control.

PI P 590. Special Topics. Cr. arr. Repeatable. F.S.S. Prereq: 10 credits in biological sciences, permission of instructor.

PI P 592. Seed Health Management. (Cross-listed with STB). (2-0) Cr. 2. S. Prereq: 2010. Prereq: Admission to the Graduate Program in Seed Technology and Business. Consent of instructor. Munkvold. Occurrence and management of diseases during seed production, harvest, conditioning, storage, and planting; Emphasis on epidemiology, disease management in the field, seed treatment, effects of conditioning on seed health, and seed health testing. Credit may not be obtained for both PI P 592 and STB/PI P 592.

PI P 594. Pathology. (Cross-listed with 494). (2-2) S. Prereq: 352, S. Prereq: 408. Munkvold. Significance of diseases on the major phases of seed production; growing, harvesting, conditioning, storing, and planting seed. Pathogens considered include fungi, bacteria, viruses, nematodes, and abiotic agents. Emphasis on epidemiology, management, host-pathogen relationships, seed transmission, and seed health testing. Credit may not be obtained for both PI P 594 and STB/PI P 592.

Courses for graduate students

PI P 608. Molecular Virology. (Cross-listed with V MP, Micro). (3-0) Cr. 3. F. Prereq: 408, 416. Diagnosis of plant diseases, plant disease assessment methods, and the integration of disease management into commercial crop production practices. Objectives are to familiarize students with common diseases of Midwest crops and landscape plants, and to provide experience in disease diagnosis. Field trips include commercial operations, agricultural research facilities, and ornamental plantings.

PI P 692. Molecular Biology of Plant-Pathogen Interactions. (Cross-listed with Micro). (3-0) Cr. 3. F. Prereq: 2010. Prereq: 506 or BBMB 405 or Gen 411 or Micro 402 or course in molecular biology. Begdano- nove, Whitham. Seminal and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete an interinstitutional research proposal writing and peer review exercise.

PI P 694. Colloquium in Plant Pathology. (2-0) Cr. 2. Repeatable. F.S. Prereq: 408 or 418. Permission of instructor. Advanced topics in plant pathology, including biological control, cultural control, resistance gene deployment, genetic engineering for disease resistance, chemical control, integrated pest management, emerging diseases, fungal genetics, insect vector biology, professional communications, etc.

Political Science

www.iastate.edu/~polsci/

James McCormick, Chair of Department

Distinguished Professors (Emeritus): Rasmussen

University Professors: Schmidt, Shelly

Professors: Dobrzat, Mabusch, McCormick, Smith

Professors (Emeritus): Dearin, Kihl, Lee, Maney, Moses

Associate Professors: Hutter, Potsoki, Tuckness, Wolf

Associate Professor (Emeritus): Whitzer

Associate Professor (Adjunct): Waggoner

Assistant Professors: Birskyte, Conger, D. Cunningham, K. Cunningham, Urbatsch

Assistant Professor (Adjunct): Bystroom

Senior Lecturer: Deam

Undergraduate Study

For the undergraduate curriculum in Liberal Arts and Sciences, with major in political science, leading to the degree of Bachelor of Arts, see Liberal Arts and Sciences, Curriculum.

The study of political science is designed to enable students to understand the nature of politics, public values, and the institutions and processes of politics in their various forms.

Students completing a major in political science will understand and be able to interrelate the leading theories, literature, and approaches in the subfields of American government, political theory and methods, international relations, and comparative politics. Students can analyze and formulate effective argumentation in written and oral forms, including the ability to appreciate and
accommodate diverse political ideas, and the ability to collect and critique information and ideas of others in support of original arguments. Graduates appreciate the knowledge and civic responsibilities required for effective participation in political life.

The political science major is often chosen by students preparing for a career in law. Students with this goal should consult with the department in selecting courses. See also Preprofessional Study.

Several internship options are available to the political science major, offering students the opportunity to experience practical application of the knowledge learned in academic courses.

Requirements for the Major:

For the purpose of defining undergraduate requirements in the Department of Political Science, the Department employs four subfields within the discipline, with the following courses in each:

To complete the major in Political Science a student must earn 33 semester credits of courses in Political Science subject to the following conditions:

a. Students must satisfactorily complete Pol S 101, 301, and 302.

b. Students must complete at least 3 credits in each of the four subfields listed above. Students may apply only one half-semester mini-course (Pol S 312, 313, 314, 315) in each group.

c. Political Science courses in which a student has a grade of D+ or lower will not count for the major but can be counted as electives.

d. At least 18 credits of Political Science courses must be numbered 300 or above.

e. Students must pass one statistics course from among Stat 101, 104, 226 or 231.

f. No more than six credits of Pol S 490 or 499 (alone or in combination) can be used to fulfill any of these requirements. A maximum of three credits of Pol S 490 can be applied to meet any of the four subfield requirements.

g. A maximum of six credits from half-semester mini-courses (Pol S 312, 313, 314, 315) can be applied to satisfy the above requirements.

h. At least 15 credits of Political Science coursework must be earned at Iowa State University.

i. Advanced Communication Skills: Majors must earn at least a C+ in each of Engl 150 and 250. Those who do not must complete Engl 309 or 314 with a grade of C or higher. Majors must also complete Pol S 302.

The department offers a minor in political science that may be earned by completing 15 credits beyond the 100-level of coursework in political science, nine of which must be at the 300 level or above. A student minoring in Political Science normally will be expected to take at least 9 credits in Political Science coursework at Iowa State University. Only 3 credits of Pol S 490 or Pol S 499, alone or in combination, and only 2 credits of Pol S 312-315 may be included in the total of 15 credits required for the minor. All minors in the College of Liberal Arts and Science require a minimum of 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. Credits earned in Pol S 499, offered on a satisfactory/fail basis only, will not fulfill this requirement.

Graduate Study

The department offers work for a Master of Arts degree (M.A.), with a major in political science, and minor for students in other departments. The department offers a Master of Public Administration (MPA) degree or a Graduate Certificate of Public Management (GCMP) for those interested in an educational certificate program that requires less work than a full masters program. In addition, the Political Science Department offers work for the Master of Science in Information Assurance. Information with detailed requirements for all graduate degrees may be obtained at the department’s web page at www.pols.iastate.edu/gradhome.shtml.

The M.A. program is designed to enable its graduates to engage in governmental research, enter public service or private industry, teach, or pursue further graduate study. Graduate students may also work to work toward certification for high school or junior college teaching. A thesis is required for this degree. The department also has a joint Master of Arts/Juris Doctor (M.A./J.D.) program with the Law School of Drake University. Detailed information for the M.A./J.D. can be found at the ISU Political Science webpage as well as the Drake Law School website (under Joint Degree): www.law.drake.edu/admissions/specprograms.html. Students wishing to pursue this joint degree must submit separate applications to both Drake University and Iowa State University and be accepted by both institutions.

M.A. graduates have a broad substantive understanding of the political process and the academic study of politics. They also have in-depth knowledge of one or more subfields in political science. Graduates are skilled at conducting research and preparing thorough research summaries. They are able to identify and address complex political questions, taking into account related ethical, legal, economic, and social issues.

The usual prerequisites for major graduate work in the M.A. program normally are completion of at least 15 credits in political science, the GRE (Graduate Record Examination), one year of a foreign language (equivalent to 8 semester hours) and a course in basic statistics (equivalent to Stat 101). If the basic statistics requirement has not been met, the student may remedy the deficiency by passing equivalent courses, for which no graduate credit will be received. During their program of study, all students are expected to complete Stat 401, Pol S 502, and a thesis. Students normally do concentrated course work in at least one of the following three areas: international relations, comparative politics, or American politics. The student’s program of study committee may require additional work.

Students in other graduate programs may obtain a minor in political science by completing at least 9 credits of political science courses, including one of the proseminars. Interested students should consult the Graduate College Handbook for additional information on graduate minors.

The Master of Science in Information Assurance (MSIA) is a multi-disciplinary program designed to provide students with diverse backgrounds and interests the opportunity to obtain professional training in the emerging field of information assurance. The core of the MSIA program is built around a series of courses taught in Electrical and Computer Engineering, Mathematics, and Computer Science that introduce students to software and hardware aspects of cryptography and computer security. The program also recognizes, however, that information assurance-defined in terms of security, privacy, access, and reliability-is not simply a technical problem but also involves important societal dimension, including policy, education, ethics, and management. Recognizing that political science offers a potential intersections with information assurance e.g., public sector management of information technology; forensics and computer crime; information technology policy and law; information technology and international relations; information warfare; etc., students with interests in these areas are encouraged to select the Department of Political Science as their home department.

Students opting to pursue a MSIA degree through the Department of Political Science can expect to acquire skills and background knowledge relevant to a career in public policy or public sector management of information assurance technologies. The InfAs degree can also help prepare students who wish to go on to pursue a PhD in information politics and policy.

Students interested in the InfAs degree program should consider Political Science as a home department if their future career and/or educational interests lie in such areas as: institutional issues related to the internet and information technologies; information technology, international security, and information warfare, information technology policy and law; and public administration and public sector management of information technology.

Admission requirements generally follow the same guidelines as the M.A. or MPA in Political Science. Degree requirements are specified by the InfAs program in cooperation with Political Science. More in-depth information on the program can be found at: http://www.issi.iastate.edu/infas.html.

Public Policy and Administration

The Public Policy and Administration program offers work for the professional Master of Public Administration degree (MPA). The program is designed to educate and train students for careers in management and policy analysis at the federal, state, and local levels of government, and nonprofit sector management. The program serves a diverse student body, including pre-service students and in-service employees in government and nonprofit organizations. The curriculum covers a broad range of public administration and policy topics, including organizational and administrative processes, eGovernment, leadership, organizational change dynamics, human resource management, budgeting, cost benefit analysis, financial management, policy analysis, and ethics. The program offers three concentrations: Public Management, eGovernment and Management of Information Technology, and Policy Analysis.

The MPA degree requires 37 credits, which includes (a) 15 credits in core competency, (b) 9 credits in one of the concentration areas, (c) 4 credits in other required courses, (d) up to 7 credits of electives, and (e) 3 credits of creative component (a capstone project) or a minimum of 3 credits of research (thesis). Pre-service students are encouraged to obtain an internship for 3 credits.
The Program also offers a Graduate Certificate of Public Management program (GCPM), which requires a completion of 15 credits: 9 credits in the core, and two additional courses in the area of student interest. Some courses are available via videoconferencing, streaming video, one week and executive weekend formats, and online. The Program also offers joint master’s degrees with the Department of Community and Regional Planning (25 credits in each program plus a six-credit thesis), and the interdisciplinary Information Assurance program (30 credits). The requirement for all double degrees consists of 22 credits from each discipline for a total of 54 credits. Under the rules of the Graduate College a graduate student may pursue a joint degree between any two disciplines of their interest. Interested students are encouraged to consult the ISU’s Graduate Handbook. The minimum requirements for all double degrees consist of 22 credits from each program.

Requirements for admission are a graduate school application, an essay stating purposes for study, college transcripts, the GRE (waived for those with five or more years of public or nonprofit sector experience), three letters of recommendation, and the TOEFL for international students. The department cooperates in the interdisciplinary majors in transportation and water resources, and an interdepartmental minor in gerontology (see Note). Refer to the Schedule of Classes (www.iastate.edu/catalog) or consult the Public Policy and Administration (MPA) web page (http://mpa.las.iastate.edu) for up-to-date scheduling information.

Courses primarily for undergraduate students

Pol S 101. Orientation to Political Science. (2-0) Cr. 1. F.S. Prereq: Political Science and Open Option majors only or permission of the instructor. Introduction to the discipline and sub-fields of Political Science, including an introduction to analytical thinking, and research skills relevant to political science. Orientation to university, college, and departmental structure, policies, student roles and responsibilities; degree planning and career awareness. Satisfactory-fail only.

Pol S 215. Introduction to American Government. (3-0) Cr. 3. F.S.S. Fundamentals of American democracy; constitutionalism; federalism; rights and duties of citizens; executive, legislative, and judicial branches of government; elections, public opinion, interest groups, and political parties.

Pol S 236. Introduction to Ethics and Politics. (3-0) Cr. 3. F.S. Prereq: Sophomore standing. Introduction to moral controversies surrounding political issues such as violence, deception, corruption, civil disobedience, democracy, justice, equality, and freedom. Students will read classic and contemporary texts and consider political applications. This course serves as an introduction to advanced courses in political theory.

Pol S 241. Introduction to Comparative Government and Politics. (3-0) Cr. 3. F.S. Basic concepts and major theories; application to selected political systems, including non-western political systems.

Pol S 251. Introduction to International Politics. (3-0) Cr. 3. F.S. Dynamics of interstate relations pertaining to nationalism, the nation state; peace and war; foreign policy making; the national interest; military capability and strategy; case studies of transnational issues, such as population, food, energy, and terrorism.

Pol S 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Pol S 301. Introduction to Empirical Political Science Research. (3-0) Cr. 3. F.S.S. Prereq: 3 credits in political science; one statistics course required; sophomore classification. Techniques of quantitative and qualitative political research and analysis. Development and analysis of theories, methods of data collection, research design, and critical thinking. Applications of statistics to political research.

Pol S 302. Politics of Writing, Speaking, and Reading. (3-0) Cr. 3. F.S. Prereq: English 250; 3 credits in Political Science. Political Science majors only. Focus on the connections between communicative and rhetorical skill and effective civic understanding and participation. Techniques of effective communication and persuasion in writing and speaking. Development of skills of critical and rhetorical analysis in reading.

Pol S 305. Political Behavior. (3-0) Cr. 3. F. Prereq: Sophomore classification. Empirical theories and descriptions of political behavior, including decision-making, opinion, and attitudes, with an emphasis on groups and political elites.

Pol S 311. Municipal Government and Politics. (3-0) Cr. 3. Alt. F., offered 2009. Focus on the administration of municipal corporations; forms of government; administration of municipal services; problem-solving in municipal government; urban and metropolitan political process; implications of federal urban policies.

Pol S 312. Minicourse in American Government and Politics. (3-0) Cr. 2. F.S. Prereq: Sophomore classification. Half-semester course on selected topical issues in American government and politics. Designated repeat in Pol S 312 is not permitted. Use of Pol S 312 credit in Pol S major and minor is limited. See Undergraduate Study for information.

Pol S 314. Minicourse in Comparative Politics. (3-0) Cr. 2. F.S. Prereq: Sophomore classification. Half-semester course on selected topical issues in comparative politics. Designated repeat in Pol S 314 is not permitted. Use of Pol S 314 credit in Pol S major and minor is limited. See Undergraduate Study for information.

Pol S 315. Minicourse in International Relations. (3-0) Cr. 2. F.S. Prereq: Sophomore classification. Half-semester course on selected topical issues in international relations. Designated repeat in Pol S 315 is not permitted. Use of Pol S 315 credit in Pol S major and minor is limited. See Undergraduate Study for information.

Pol S 318. Campaign and Elections. (3-0) Cr. 3. Alt. F., offered 2010. Methods and techniques of political campaigns in general elections. Supervised participation in candidate and political party campaign activities required.

Pol S 319. Law and Politics. (3-0) Cr. 3. F.S. Prereq: Sophomore standing. 215 recommended. An evaluative analysis of the American legal system as it relates to controversial topics emphasizing the relationship between law and politics. Primary emphasis on topics such as statutory construction, judicial review, the proper role of the thesis and ambiguity in law, competing constitutional philosophies, executive branch concerns, and relative power of different branches. Credit for both Pol S 319 and 230 may not be applied toward graduation.

Pol S 320. American Judicial Process. (Cross-listed with CJ St.) (3-0) Cr. 3. S. Prereq: Pol S 215. An overview of the American judicial process. Emphasis on specific topics such as application of constitutional rights to the states (particularly the Fourth, Fifth, Sixth, and Fourteenth Amendments). Mechanics of judicial opinions, constitutional philosophies of Supreme Court Justices, decisions of first impression, and the value and scope of precedent.

Pol S 334. Politics and Society. (Cross-listed with Soc) (3-0) Cr. 3. F. Prereq: A course in political science or sociology. The relationship between politics and society with emphasis on American society. Discussion of theories of inequality, power, social movements, elites, ruling classes, democracy, and capitalism.

Pol S 335. Science, Technology, and Public Policy. (3-0) Cr. 3. S. Examines the history and political dynamics of public science and technology policies. Examines differences in political and technological orientations. Assessment of the roles of politics, media, engineering, science, and private business in the formation public policies that put heavy reliance on or seek to advance science and technology.

Pol S 340. Politics of Developing Areas. (3-0) Cr. 3. Alt. S., offered 2010. Focus on the processes and political development as they relate to the political process of developing states. Impact of social and technological change on political systems of developing areas. Some case studies.

Pol S 341. Politics of Asia. (3-0) Cr. 3. Alt. S., offered 2010. Political institutions, processes, and contemporary issues. Selected countries examined intensively to illustrate generalizations. Topics such as foreign policy, role of parties, military, religious groups, human rights, women, environmental issues, interest groups, ideology, and globalization.

Pol S 343. Latin American Government and Politics. (3-0) Cr. 3. F.S.S. Processes, institutions, and contemporary issues. Selected countries examined intensively to illustrate generalizations. Role of parties, military, church, human rights, women, environmental issues, interest groups, ideology, and globalization.

Pol S 344. Public Policy. (3-0) Cr. 3. S. How agendas come to be set in public policy, theories describing the policy-making process, forces molding policy choices and the impact of such choices.

Pol S 346. European Politics. (3-0) Cr. 3. S. Comparative study of political institutions of Europe and the European Union; emphasis on parties, elections, and governmental structures. Examination of policies and process of public policies in selected problem areas.

Pol S 347. African Politics. (3-0) Cr. 3. F. Major trends in African politics over the last 150 years and current issues facing Africans today. Basic African geography. Topics include democratization, economic development, civil conflict, ethnic politics and foreign aid.

Pol S 350. Politics of the Middle East. (3-0) Cr. 3. S. Introduction to the Middle East as a region and to issues of political importance to the Middle East and its place in the world. Topics covered include Islam, regional conflicts and alliances, local leaders, economic issues, and politics. Nonmajor graduate credit.

Pol S 356. Theories of International Politics. (3-0) Cr. 3. Introduction to essential theoretical concepts and approaches, both classical and contemporary on world politics including realism, empiricism, liberalism, and positivism; for example, war and
conflict, peace and cooperation, political economy, crisis decision-making, systemic theory, dependence and interdependence.

Pol S 357. International Security Policy. (3-0) Cr. 3. F. The major theoretical approaches in security policy – strategy and deterrence, game theory, bargaining theory, compliance, and coercive diplomacy, and crisis diplomacy. Illustration of these various approaches through historical and contemporary cases.

Pol S 358. United States Foreign Policy. (3-0) Cr. 3. F, Prereq: 215 or 251, or Hist 467 or 470 or 471. U.S. foreign policy since World War II with emphasis on changing American values in foreign policy, the role of the President, foreign policy-making and the bureaucracy in policy making, and a survey of current foreign policy issues and problems.

Pol S 359. Current Issues in American Foreign Policy. (3-0) Cr. 3. S. Prereq: 215, 251, or 358. Examination of contemporary U.S. foreign policy issues (e.g., U.S. policy in the Middle East; defense budgeting in the post-Cold War era; conventional and nuclear arms control policy). The course will explore alternate methods to analyze policy, survey the evolution of each issue, and discuss different policy alternatives.

Pol S 360. American Institutions: Congress. (3-0) Cr. 3. S. Prereq: 215. Theory and practice of representation and deliberation in the legislative branch of the republic; operations of Congress in terms of its committees, leadership, legislative and oversight processes, partisan politics, electoral campaigns, service to local and special electoral campaigns, service to local and special interests, and interactions with the President.

Pol S 363. American Institutions: Media. (3-0) Cr. 3. S. Prereq: Sophomore standing. Course surveys the influence of mass media organizations, forms, techniques, and technologies on the practices and expectations of American Politics. Evaluates the role of media in the political process, exploring the extent to which media promote or discourage political participation. Topics will examine the influence and political uses of news coverage, political advertising, political debates, talk radio, film, the Internet, and media spectaculars.

Pol S 370. Religion and Politics. (Cross-listed with Religi.) (3-0) Cr. 3. S. Prereq: Relig 105 or 210 recommended. The interaction of religion and politics in the U.S. from both an historical and contemporary perspective, as well as the role of religion in politics internationally. Nonmajor graduate credit.

Pol S 371. Introduction to Public Administration. (3-0) Cr. 3. S. F. Prereq: Sophomore standing. Survey of the historic and contemporary administrative realities that contribute to the unique challenges of public governance at the administrative and managerial levels of international, national, state, and local government. This introductory course explores the essential issues and competencies involved in the efficient, effective, and ethical provision of public goods and services. Critical topics addressed in the course include client relations, intergovernmental relations, social equity, public-sector partnerships, and privatization.

Pol S 381. International Political Economy. (3-0) Cr. 3. S. Introduction to the theoretical perspectives on international political economy. Exploration of specific issues such as the changing international trade regime, international financial, and Third World development under conditions of globalization.

Pol S 385. Women in Politics. (Cross-listed with W S). (3-0) Cr. 3. S. Examination of the entry and participation of women in politics in the United States and other countries including a focus on contemporary issues and strategies for change through the political process.

Pol S 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing work period.

Pol S 406. Public Opinion and Voting Behavior. (3-0) Cr. 3. S. Prereq: 6 credits in political science or junior classification. The formation of political opinions and attitudes, political participation, and voting behavior of the general public, and their influences on American politics; polling as a means of assessing public opinions and behaviors. Nonmajor graduate credit.

Pol S 413. Intergovernmental Relations. (Dual-listed with 513). (3-0) Cr. 3. S. Prereq: 6 credits in American government. Theories and practices of the American federal system. Politics and policy making among federal, state, and local governments. Nonmajor graduate credit.

Pol S 417. Campaign Rhetoric. (Cross-listed with Sp Cm.) (3-0) Cr. 3. Alt. F, offered 2019. Prereq. Sp Cm 212. Backgrounds of candidates for state and national elections; selected speeches and issues; persuasive strategies and techniques of individual speakers. Nonmajor graduate credit.

Pol S 420. Constitutional Law. (3-0) Cr. 3. S. Prereq: 215. The study of major political concepts and theories of the U.S. Constitution through judicial action; influence of public law and judicial interpretations upon American government and society. Nonmajor graduate credit.

Pol S 421. Constitutional Freedoms. (3-0) Cr. 3. S. Prereq: 320 or 420. Leading Supreme Court cases interpreting the Bill of Rights and the Fourteenth Amendment. Emphasis on religion, speech, privacy, due process, and equal protection. Nonmajor graduate credit.

Pol S 430. Foundations of Western Political Thought. (Cross-listed with Cl St). (3-0) Cr. 3. Prereq: 6 credits in political science, philosophy, or European history. Study of original texts in political thought ranging from the classical period to the Renaissance. Topics such as justice, freedom, virtue, the allocation of public power, democracy, human nature, and natural law. Nonmajor graduate credit.

Pol S 431. Early Modern Political Thought. (Dual-listed with 531). (3-0) Cr. 3. S. Prereq: 6 credits in political science, philosophy, or European history. Study of original texts in political thought ranging from the Reformation to the French Revolution and its aftermath. Topics such as justice, freedom, rights, democracy, toleration, property, power, skepticism, and normative views of international politics. Nonmajor graduate credit.

Pol S 433. American Political Thought. (3-0) Cr. 3. S. Prereq: 6 credits in political science or in American history. Review of major political concepts and theories in American political history. Analysis of current concepts in U.S. political thought, and their possible impacts on our political institutions. Nonmajor graduate credit.

Pol S 442. The Policy and Politics of Coastal Areas. (Dual-listed with 542). (Cross-listed with Env S). (3-0) Cr. 3. S. Prereq: 3 credits in political science or 3 credits in Environmental Studies; junior classification. Major ideologies related to conservation and ecology. Processes, participants, and institutions involved in state, national, and global environmental policymaking. Case studies of environmental controversies and proposals for policy reform. Nonmajor graduate credit.

Pol S 483. Law and Management. (Dual-listed with 583). (3-0) Cr. 3. Alt. S. Prereq: 215 or 251, junior classification. Constitutional/legal doctrines and requirements in public management: concept of new property rights in public employment/public service delivery; procedural due process requirement; scope of free speech and liberty protected in the public interest; the role of public management; equal employment opportunity requirements; and the scope of official and personal immunities and liability in public affairs.

Pol S 485. Comparative Public Administration. (Dual-listed with 585). (3-0) Cr. 3. F. Prereq: 583. Comparisons of government bureaucratic in major world regions, trends and issues of administrative and management reforms, globalization and other contemporary challenges to state administrative structures and policies, skills needed to evaluate and implement public management reforms.
Pol S 487. Electronic Democracy. (2-1) Cr. 3. F. Prereq: Sophomore standing or instructor approval. The impact of computers, the Internet, and the World Wide Web on politics and policy. The positive and negative effects on information technology (IT) on selected topics such as freedom, power and control, privacy, civic participation, the sense of “community,” virtual cities, interest group behavior, the new media, campaigns, elections, and voting will be examined. Nonmajor graduate credit.

Prereq: 6 credits in political science. Special studies in the political institutions, processes and policies of American, foreign, and international governments. Also, studies in traditional and behavioral political theory. Use of credit in Pol S major and minor is limited. See Undergraduate Study for information. No more than 9 credits of Pol S 490 may be counted toward graduation.

A. American Government and Politics
B. Theory and Method
C. Comparative Politics
D. International Relations
E. Extended credit. The student may earn an additional 1 or 2 credits for extra study done for any 300- or 400-level course, with instructor’s approval.
G. Catt Center Project
H. Honors

Pol S 491. Senior Thesis. Cr. 3. Prereq: 21 credits of Pol S and permission of instructor. Written under the supervision of a Political Science faculty advisor.

Pol S 495. Capstone Project in Political Science. (3-0) Cr. 3. S. Prereq: 21 credits in political science and permission of instructor. Capstone project for political science majors; integrating research, analysis and participation.

Pol S 498. Cooperative Education. Cr. R. F.S.S.S. Preq: Permission of cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Pol S 499. Internship in Political Science. Cr. arr. F.S.S.S. Preq: 6 credits in political science; junior or senior classification; and permission of internship coordinator. Work experience with a specific nongovernmental or governmental agency at the local, state, national, or international level, combined with academic work under faculty supervision. Use of credit in Pol S major and minor is limited. See Undergraduate Study for information. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

Pol S 504. Proseminar in International Politics. (3-0) Cr. 3. S. Preq: 6 credits in political science or graduate standing. An overview of the major theoretical and empirical works in the study of international politics and foreign policy. Among the major theoretical approaches surveyed and applied to international politics are realism, neo-realism, liberalism, functionalism, rational choice theory, game theory, and decision-making theory. Seminar writings by leading scholars will be reviewed.

Pol S 505. Proseminar in Comparative Politics. (3-0) Cr. 3. F. Preq: 6 credits in political science or graduate standing. Major theoretic approaches to the study of comparative politics – varying concepts and definitions of society and policy, administrative traditions, institutional arrangements, political behavior, etc. Contrasting research method designs.

Pol S 506. Proseminar in American Politics. (3-0) Cr. 3. S. Preq: 6 credits in political science or graduate standing. A presentation of the major theories and research on American government and politics. Substantive topics include modern democratic theory, institutional formance, and mass political behavior. A variety of research methodologies are examined, including normative theory, behavioralism, and rational choice analysis.

Pol S 510. State Government and Politics. (3-0) Cr. 3. Preq: 310. Comparative analysis of state political systems. Role of interest groups, political parties, legislatures, courts, and governors in state politics. Possible determinants of public policy outputs at the state level.

Pol S 513. Intergovernmental Relations. (Dual-listed with 413). (3-0) Cr. 3. S. Preq: 6 credits of American government. Theories and practices of the American federal system. Making among federal, state, and local governments.

Pol S 525. Mass Political Behavior. (3-0) Cr. 3. Preq: 6 credits in Political Science or graduate standing. An in-depth survey of the theoretical, empirical, and methodological works concerning mass political behavior. Substantive topics include political attitudes and ideologies, public opinion and voting behavior, and political psychology. Methods for studying mass behavior include survey research and experimental approaches.

Pol S 531. Early Modern Political Thought. (Dual-listed with 431). (3-0) Cr. 3. Preq: 6 credits in political science, philosophy, or European history. Study of original texts in political thought ranging from the Reformation to the French Revolution and its aftermath: Topics such as justice, freedom, rights, democracy, toleration, property, power, skepticism, and normative views of international politics.

Pol S 534. Legal and Ethical Issues in Information Assurance. (Cross-listed with Cpr E, InfAs). (3-0) Cr. 3. S. Preq: Graduate classification; Cpr E 531 or InfAs S31. Legal and ethical issues in computer security. State and local codes and regulations. Privacy issues.

Pol S 535. Contemporary Political Philosophy. (Cross-listed with Phil). (3-0) Cr. 3. S. offered 2011. Preq: 6 credits of philosophy or political science. Examination of theories of justice proposed by contemporary political philosophers. Analysis of the philosophical frameworks such as liberal, libertarian, communitarianism, socialism, feminism. Normative assessments of socio-political institutions.

Pol S 541. Strategic Public Management. (40-0) Cr. 3. S. Theory and practice of strategic planning and implementation in the public sector. Assignment of planning with other strategic systems. Discussion of fundamental strategic management issues and concepts. Introduction of alternatives to the bureaucratic paradigm. Includes group exercises and guidance for strategic management facilitation. Course is one-week intensive format.

Pol S 542. The Policy and Politics of Coastal Areas. (Dual-listed with 442). (3-0) Cr. 3. SS. Exploration of political implications of coastal policy. Issues include: “Carrying capacity,” zoning, regulation of human development activities, tradeoffs between conservation and jobs, the quality of coastal lifestyle, ways in which citizens participate in policy for coastal areas.

Pol S 544. Comparative Public Policy. (3-0) Cr. 3. Preq: 6 credits in political science. Examines how, why, and to what effect governments deal with substantive policy problems differently. Environmental factors, ideologies, cultures, domestic policy making processes, and interest groups.

Pol S 547. Political Leadership and Elites. (3-0) Cr. 3. Preq: 6 credits in political science. Various forms of leadership and leader-follower relations. Obligations, exchanges, incentives, coercion, corruption, bossism in both the U.S. and foreign experience.

Pol S 552. Comparative Foreign Policy. (Dual-listed with 452). (3-0) Cr. 3. S. Preq: 251. Various theoretical approaches to explain foreign policy making and behavior through the use of case studies of selected nations.

Pol S 555. International Relations Theory. (3-0) Cr. 3. F. Preq: 6 credits in international studies. Selected theoretical writings, both classical and contemporary, on world politics. Realism, war and conflict, peace and cooperation, political economy, crisis decision making, and transnational relations.

Pol S 560. American Political Institutions. (3-0) Cr. 3. Preq: 6 credits in American government. Examination of policy-making and governance in a separation of powers system. Interaction between the chief executive, the legislature, administrative agencies, and the public. How political and legal forces affect policy makers and are reflected in public policies and programs.

Pol S 569. Foundations of Public Administration. (3-0) Cr. 3. F. Preq: Graduate classification. An examination of the social, political, intellectual, and environmental factors contributing to the historical development and central issues of American Public Administration. Exploration of classic and contemporary texts of public administration emphasizing constitutive and civic roles of public servants, administrative responsibility in democratic governance and justice, and essential frameworks to identify managerial skills, perspectives, and resources for effective, equitable public service.

Pol S 570. Politics and Management of Nonprofit Organizations. (3-0) Cr. 3. S. Preq: Graduate classification. Major theories of administrative organization, including motivations of administrative personnel; comparisons of organizational arrangements, factors affecting organizational arrangements, and formal and informal decision-making structures.

Pol S 572. Public Finance and Budgeting. (3-0) Cr. 3. S. Preq: Graduate classification. Topics such as the fiscal role of government in a market economy; evaluation of sources of public revenue and credit; administrative, political, and institutional aspects of the budget and the budgetary process; alternative budget formats; skills required to analyze public revenue and spending. Spreadsheet use required.

Pol S 573. Public Personnel Administration. (3-0) Cr. 3. S. Preq: Graduate classification. Course discusses the history and development of high performance personnel administration in the public and nonprofit sectors regarding strategic planning, employee rights and responsibilities, performance assessment, collective bargaining, and civil service systems. Emphasized basic competencies in the essential human resource management tools in the areas of recruitment, retention, employee development, compensation, discipline, and conflict resolution.

Pol S 574. Policy and Program Evaluation. (3-0) Cr. 3. F. Preq: Graduate classification. Integration, application, and utilization of public administration and public policy concepts in the interpretation of results and effectiveness of public programs and the prediction of consequences for policymakers and administrators.

Pol S 575. Management in the Public Sector. (Dual-listed with 475). (3-0) Cr. 3. S. Preq: 6 credits in political science. Literature and research on organization behavior and management. Theory with emphasis on applied aspects of managing contemporary
by completing the admissions requirements of the CLS/MT program and most of the degree requirements in 3 years on campus, then spending their fourth year in one of the hospital programs that are affiliated with Iowa State University. Before beginning the off-campus study, students must earn at least 88 credits; the 32 most recent credits must have been earned in residence at ISU. A maximum of 32 semester credits earned in professional CLS/MT school can be used to partially fulfill the requirements for the bachelor's degree. Students who complete all degree requirements in residence at the university may apply to any school of medical technology for which the admission requirements have been met.

The following CLS/MT programs are affiliated with Iowa State University:

Mercy College of Health Sciences Clinical Laboratory Science Program, Des Moines, Iowa. Program Director: Kyla Deibler.

St. Luke’s Methodist Hospital, Cedar Rapids, Iowa. Education Coordinator, Nadine Sojka. Medical Director: Dorryl Buck.

Dentistry

Dentists diagnose, treat, and try to prevent diseases and injuries of the teeth, jaws, and mouth. Usually a general practitioner will have spent 3 or 4 years taking preprofessional courses at the undergraduate level and 4 years in dental school earning the degree of doctor of dental surgery (D.D.S.) or doctor of dental medicine (D.M.D.). Learning a specialty requires at least 2 more years. The courses necessary for admission to most dental schools include English, biology, general and organic chemistry, and physics. Students may earn a degree in any major that Iowa State University offers as the preadmission requirements; they should choose their major to reflect their own interests and abilities. Highly qualified students may be accepted into dental school after 3 years of preprofessional study without earning a baccalaureate degree.

Health Information Management

Health information managers serve as supervisors of medical records departments in hospitals, clinics, nursing homes, and other healthcare institutions. Certified registered record administrators (R.R.A.) must have completed a program leading to a bachelor’s degree in medical record administration. Most professional programs are 2 years in length and follow 2 years of college study in chemistry, biology, the humanities, social sciences, languages, and philosophy. Students may take the preprofessional courses at Iowa State University and then transfer to a university offering the professional program or they may earn a bachelor's degree at Iowa State University before entering a health information management program.

Hospital and Health Administration

Administrators of health care organizations manage and guide the varied activities in hospitals, clinics, nursing homes, and other health facilities. The professional requirement may be for a master’s degree or a bachelor’s degree, depending upon the size of the institution and whether an upper or middle-level position is desired. Students at Iowa State may take general education courses for two or more years and then transfer to a university offering a bachelor's degree in health administration, or they may spend four years earning a bachelor's degree in any department before entering the degree program at the University of Iowa or other university. Courses required for admission to master’s degree programs in hospital and health administration vary, but may include introductory accounting, management, statistics, and economics.
**Human Medicine**

Physicians study, diagnose, and treat illness and injury. They may work in offices, clinics, hospitals, or laboratories, in private practice or for government or industry. Their professional training usually consists of 4 years of study in a college of medicine to earn the doctor of medicine (M.D.) degree, and then completion of a hospital residency learning a specialty such as family medicine, pediatrics, surgery, obstetrics, or psychiatry. A degree of doctor of osteopathy (D.O.) is awarded to those students who complete 4 years in a college of osteopathic medicine before their residency. All medical schools recommend a broad preprofessional education that includes courses in biology, chemistry, physics, mathematics, English, the social sciences, arts, and humanities. The degree of a premedical student can be from any college and in any curriculum or major offered by the university. The major should reflect the student’s interests and provide appropriate preparation for an alternative career.

**Law**

An attorney offers assistance, often where a third-party neutral arbiter is required to resolve conflicts. Many attorneys work in private practice, but others secure positions in the public sector, e.g., federal or state governmental agencies. At least 3 years are completed in 3 years, with 90 credits. It may be completed earlier if the student attends summer school are needed to complete a law degree, a Doctor of Jurisprudence (J.D.). A bachelor’s degree is required for admission to all accredited law schools. A student planning to enter may major in any discipline. Courses taken as an undergraduate should be designed to assist the student in the development of critical thinking skills, including analytical written and oral skills. An understanding of social structures and institutions is invaluable. Perhaps most valuable are courses in philosophy, English language and literature, the social sciences, including political science, psychology, criminal justice, economics, and history. Courses in mathematics, particularly statistics, are also helpful in developing analytical skills.

**Library and Information Science**

Librarians are essential in educational institutions, medical facilities, government agencies, industries, and information centers. The professional preparation for library administration is provided by master’s degree programs. Admission requirements for the University of Iowa’s program, for example, include a bachelor’s degree with at least 85 semester credits in the arts and humanities and the natural and social sciences. Iowa State University students may choose majors that reflect their own interests and that may provide a foundation for working in medical, law, or other specialized libraries.

**Nursing**

A professional nurse may do clinical nursing, teaching, or research, in hospitals, private practice, public health centers, schools, or industry. Although becoming a registered nurse (R.N.) does not require a bachelor’s degree, the student who completes the bachelor of science degree in nursing (B.S.N.) has college-level preparation for clinical nursing and an essential base for graduate study. Iowa State University does not offer a nursing degree. Students may take prenursing courses for two years at Iowa State University and, if accepted, transfer to the BSN program at another college or university.

**Occupational Therapy**

Occupational therapists provide purposeful activities to help those who have been disabled by physical illness or injury, birth defects, emotional disorder, aging, drug abuse, or other problems to learn to cope with everyday living. Therapists treat patients in hospitals, school systems, and rehabilitation centers. Students may complete a bachelor’s degree in a related area at Iowa State University, and then enter a certification, master’s or doctoral degree program at another university; or they may complete preprofessional therapy courses at Iowa State and then transfer to another university to complete the requirements for a bachelor’s degree in occupational therapy. The prerequisites for admission to an occupational therapy program usually include English, art, biology, chemistry, physics, psychology, sociology, anthropology, and statistics, but vary from one school to another.

**Optometry**

Optometrists examine, diagnose, treat and manage diseases of the visual system, the eye and associated structures. Treatment may include corrective glasses or contacts, vision therapy and therapeutic drugs. Optometrists usually set up their own offices or work in group practice. Professional study requires 4 years in a school or college of optometry and leads to the doctor of optometry (O.D.) degree. All optometry schools require at least 90 semester credits of preprofessional courses, including biology, chemistry, physics, mathematics, and English. Certain optometry schools require a bachelor’s degree. Students wishing to earn the bachelor’s degree from Iowa State University may choose any major and take the courses required for graduation with that major as they take the courses required for admission to a professional optometry program.

**Pharmacy**

Pharmacists prepare and dispense therapeutic drugs; educate health care professionals, patients and the general public about the appropriate use of drugs; conduct pharmaceutical research and work in industrial settings which involve the manufacture, marketing and advertising of pharmaceuticals. Students may complete prepharmacy courses within two years at Iowa State University. Upon admission, the student will then transfer to a Pharm. D. program of study which will entail three or four years of study.

**Physical Therapy**

Physical therapists work with people who have been disabled by injury, illness, or birth defects. They assist in evaluating the physical problems and administer therapeutic agents such as massage and exercise, heat, baths, ultrasonics, and electricity; they work in hospitals, clinics, nursing homes, schools, rehabilitation centers, and private practice. Students may complete three years of undergraduate courses including prerequisites before transferring to a three-year professional curriculum such as the master’s degree program at St. Ambrose University or the doctoral degree program at Creighton University. Usually, students earn a bachelor’s degree in a related field at ISU before entering professional school to earn a master’s degree or doctoral. Admission to the master’s degree program at the University of Iowa requires a bachelor’s degree. The bachelor’s degree from ISU may be earned in any department, provided that the physical therapy prerequisites are completed. Earning a bachelor’s degree prior to entering professional school allows a student to apply to a range of graduate level programs and builds a strong liberal arts foundation. Courses required for admission to a professional program include biology, chemistry, physics, psychology, mathematics, and statistics.

**Physician Assistant**

A physician assistant provides medical services under the supervision of a licensed physician. PAs conduct physical examinations, order and interpret laboratory tests, make diagnostic and treatment decisions, and are allowed to prescribe medication in most states. Certification as a physician assistant requires 2 years in a professional program at the master’s or bachelor’s degree level. Students applying to a bachelor’s degree program must have completed at least 1 year of college work including general and organic chemistry, zoology, behavioral science, and humanities. Applicants who have had health-care experience with direct patient contact are preferred. Admission to a master’s degree program requires similar coursework and clinical experience in addition to a bachelor’s degree.

**Podiatry**

Podiatrists diagnose, and treat diseases and disorders of the human foot and ankle. They treat patients in private and group practice, hospitals, and, increasingly, in industrial and sports-related positions. Professional training requires 4 years in a college of podiatric medicine and leads to the degree of doctor of podiatric medicine (D.P.M.). This is usually followed by 1 to 3 years in a hospital residency. All podiatric colleges require at least 3 years of preprofessional study, including courses in biology, general and organic chemistry, physics, and English. Most entrants have a bachelor’s degree, which may be in any major. A few of the students may complete the admission requirements and most of the bachelor’s degree requirements in 3 years. If so, a maximum of 32 semester credits may be transferred to Iowa State University from the first year in an accredited podiatric college in order to complete the requirements for the bachelor’s degree.

**Theology or Religious Studies**

The professional education of a student of religion can follow one of two paths. The path to a profession as a pastor, priest, rabbi or other leadership position in a religious tradition usually requires 3 years in a program leading to the master of divinity (M.Div.) offered at a school of divinity or theology. The path to a profession as a teacher of religious studies at the college level requires 4-7 years in a program leading to the Ph.D. at a graduate school of Religious Studies. Both seminaries and graduate schools require a bachelor’s degree for admission. The American Association of Theological Schools recommends the following areas of study as the best preparation for theological studies: English language and literature; history, including non-Western culture; philosophy; natural sciences, social sciences, especially psychology, sociology and anthropology; the fine arts; Biblical and modern languages; and religion, both Western and Eastern. Although students in a variety of major fields may qualify for admission to a theological school, interested persons are advised to review their proposed programs with a representative of the Religious Studies Program in the Department of Philosophy and Religious Studies.

**Veterinary Medicine**

About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health education, research, food safety, industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine).

The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.).
Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Veterinary Medicine, Admission Requirements; for most recent information, consult the College of Veterinary Medicine Web site: www.vetmed.iastate.edu/)

Students may pursue their preveterinary preparation in any college at Iowa State University. A major (preveterinary medicine is not a major) should be selected that is allied to each student’s vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans fail for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor’s degree, the most effective progress toward a bachelor’s degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the preveterinary program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill preveterinary course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning, the opportunity for a student to earn the bachelor’s degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.

Professional Agriculture

www.agde.iastate.edu/  
(Interdepartmental Program administered by the Department of Agricultural Education and Studies)

Graduate Study

The Professional Agriculture major is an off-campus non-thesis program leading to the Master of Agriculture (M.Ag.) degree. It is available to students wishing to pursue graduate studies in agriculture, or natural resources through distance education. It is considered to be a professional degree and not preparation for a doctoral program. The program emphasizes agriculture/natural resource information and technology transfer in a variety of settings including education, extension, agencies, and industry training/development.

Graduates have a broad base of knowledge in one or more agriculture disciplines. They have the ability to communicate effectively and make decisions based on knowledge. To earn the 32 credits necessary for graduation, students must complete 28 semester credits of formal coursework, and 4 credits of creative component. Courses are delivered through distance education via the WWW and DVD. On-campus workshops are offered during summer sessions. Specific courses offered in the program are listed on the College of Agriculture’s distance education website: www. agde.iastate.edu/.

Psychology

Lecturers: Gilbert, Harms, Jenks, Shi, Sweet  

Undergraduate Study

For college-level requirements in undergraduate curricula leading to the degrees of bachelors of arts and bachelors of science, see Liberal Arts and Sciences, Curriculum.

An undergraduate major in psychology may be taken as liberal arts education, as preparation for graduate study in psychology, or as background for professional education in law and in the health professions. A student with a bachelor’s degree in psychology may qualify for a variety of positions including those in social sciences, mental health, corrections, rehabilitation, developmental disability centers, business, management, and public opinion surveying. Depending on professional goals, a minor in another discipline may be desirable. Students should consult with their academic advisors early in their undergraduate curriculum. The requirements of the program enable graduates to understand and apply the scientific principles, facts, and basic methods of psychology in their personal and professional activities. Graduates learn to think scientifically about human behaviors and mental processes. They can communicate effectively in speech and in writing, respect individual and cultural differences in behaviors, and appreciate ethical issues in both the science and practice of psychology. Professional work with a job title of psychologist in academic, business, clinical, government, and school settings requires graduate degrees.

The major must include the following psychology courses: 101, 102, 111, 201, 301, and 440, each with a minimum grade of C-. The major also must include four courses distributed across at least four of the following five areas: Area A – 230, 250; Area B – 280, 380; Area C – 310, 315; Area D – 312, 313, 316, 318(b); Area E – 360, 460. Three additional 3-credit courses in psychology must be taken. Area courses may be used to meet this requirement, but variable credit courses (470, 490, 491, and 492) may not. In accordance with college requirements, a C or better average is required in the courses used to satisfy the major.

Departmental requirements for the B.A. and B.S. include the following supporting courses: six credits in philosophy including 201; two of the following: Biol 101, 155 or 211; Chem 163; Gen 260 or Biol 258; one of the following: Stat 101, 104 or 226, with a minimum grade of C-; and a Math course, excluding 105, acceptable in LAS General Education Natural Sciences and Mathematics Discipline Area.

Students electing a B.S. degree also must complete Psych 302 with a minimum grade of C- and a minimum of 10 additional supporting credits in supporting courses from the list of courses in the LAS Gen Ed Natural Sciences and Mathematical Disciplines Area (or approved departmental list) as follows: three credits in mathematics, six credits in natural sciences, and one additional credit in a laboratory course.

Students electing a B.A. degree also must complete an ISU approved minor.

The department offers a minor in psychology. The minor requires completing 18 credits in psychology, including 101 and 301, each with a minimum grade of C-. At least 9 of the 18 credits must be in 300 level courses (or above), but no more than three credits total may be from Psych 490, 491, and 492. A C- or better is required in each course used to satisfy the minor and a C average or better is required in courses used to satisfy the minor. Contact the psychology advising office for more information.

Communication Proficiency Requirement: The department requires a grade of C- or better in Eng 150 and in Eng 250 (or 280H) and a C- or better in Psych 302 or Psych 490 (2 credits minimum) or Eng 302, 309, or 314.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy in psychology, and for a minor for students with a major in other departments.

Within the major of psychology, the department offers a doctoral specialization in counseling psychology (APA accredited) and doctoral areas of concentration in cognitive psychology and social psychology.

Students seeking a graduate major in psychology must have graduated from an accredited college in a curriculum substantially equivalent to the undergraduate curriculum in Liberal Arts and Sciences at Iowa State University. Prerequisite to admission is at least 15 credits of basic psychology, which should include a laboratory course, a measurement course, and a statistics course. Graduates function as academic psychologists in higher education or as professional psychologists in applied settings. They have an extensive knowledge of psychological principles and the conceptual and quantitative skills to conduct psychological research, communicating the results to the scientific community, students in the classroom, and the general public. Graduates in applied programs have specialized knowledge in counseling and program development. They are skilled in delivering such programs and services to diverse clientele in a variety of settings.

The department also participates in the interdepartmental programs in human computer interaction and neuroscience, and in the interdepartmental minor in gerontology (see Index).

A formal class and a supervised practicum in the teaching of psychology is recommended for all doctoral students whose future plans may include teaching at the college level. A 12-month internship in a training site or agency approved by the faculty is required of all doctoral students in counseling psychology.
Psych 302. Research Methods in Psychology. (2-2) Cr. 3. F.S. Prereq: 301. Discussion of and experience in designing research studies, collecting and analyzing data, and preparing research reports in psychology.

Psych 310. Brain and Behavior. (3-0) Cr. 3. F.S. Prereq: 101. Survey of basic concepts in the neurosciences with emphasis on brain mechanisms mediating sensory processes, arousal, motivation, learning, and abnormal behavior.

Psych 312. Sensation and Perception. (3-0) Cr. 3. F.S. Prereq: 101. Survey of the physiology and psychology of human sensory systems including vision, audition, smell, taste, the skin senses, and the vestibular senses.

Psych 313. Learning and Memory. (3-0) Cr. 3. F.S. Prereq: 101. Fundamental concepts and theories of learning and memory derived from human and animal research.

Psych 314. Motivation. (3-0) Cr. 3. F. Prereq: 101. Concepts and topics of motivation including curiosity, pain, emotion, sex, aggression, love, play, addiction, sleep, fatigue, and work.

Psych 315. Drugs and Behavior. (3-0) Cr. 3. F.S. Prereq: 101. Biochemical basis for the use and potential harmful effects of psychoactive drugs and the role of learning and memory in the use of addictive drugs.

Psych 316. Cognitive Processes. (3-0) Cr. 3. F.S. Prereq: 101. The study of the human mind, addressing the processes by which people perceive the world, remember information, access and use knowledge, understand language, make decisions, reason, learn and solve problems.

Psych 333. Educational Psychology. (Cross-listed with C.I.) (3-0) Cr. 3. F.S. Prereq: Psych 230 or HD 190. Application of psychological principles to educational practice in the classroom.

Psych 346. Psychology of Women. (Cross-listed with W S). (3-0) Cr. 3. S. Prereq: 2 courses in psychology. Overview of sex differences and similarities in cognitive, developmental, and social psychological processes.

Psych 348. Psychology of Religion. (Cross-listed with Relig). (3-0) Cr. 3. Prereq: Nine credits in psychology. Study of psychological research and theory on the effects of religious beliefs and practices.

Psych 350. Psychology of Normal Personality. (3-0) Cr. 3. S. Prereq: 101. Continuation of the exploration of theories and practices in the study of development and functioning of normal personality.

Psych 381. Social Psychology of Small Group Behavior. (Cross-listed with Soc). (3-0) Cr. 3. S. Prereq: 280 or Soc 305. Study of group dynamics and the role of social psychological processes in small groups.

Psych 401. History of Psychology. (3-0) Cr. 3. F.S. Prereq: 4 courses in psychology. Historical development of the field of psychology, including the contributions of major theorists and the impact of social and cultural contexts.

Psych 411. Evolutionary Psychology. (3-0) Cr. 3. S. Prereq: Junior classification, three courses in psychology; biology 211. Study of the evolutionary processes that have shaped human behavior and the role of cultural evolution in shaping human behavior.

Psych 413. Psychology of Language. (Cross-listed with Ling). (3-0) Cr. 3. Prereq: Psych 101. Introduction to the psychology of language, including speech perception, language acquisition, reading, bilingualism, and language disorders.

Psych 422. Counseling Theories and Techniques. (3-0) Cr. 3. F. Prereq: 3 courses in psychology. Overview of major counseling theories and techniques, including the role of the counselor, therapeutic goals, and the main techniques derived from each theory.

Psych 450. Industrial Psychology. (3-0) Cr. 3. F.S. Prereq: 2 courses in psychology including 101, Stat 101. Study of psychological principles and practices in the workplace, including motivation, job satisfaction, and performance improvement.

Psych 460. Abnormal Psychology. (Cross-listed with CmDis). (1-0) Cr. 3. Prereq: 2 courses in psychology or 101. Study of the psychological processes and mechanisms that lead to abnormal behavior.

Psych 470. Seminar in Psychology. (1-0) Cr. arr. Prereq: 12 credits in psychology. Discussion of current research and debates in psychological science.

Psych 484. Psychology of Close Relationships. (3-0) Cr. 3. Prereq: 9 credits in psychology including 280. Study of the psychological processes that underlie close relationships, including the nature of love, romantic attachment, and relationship maintenance.

Psych 485. Health Psychology. (3-0) Cr. 3. F. Prereq: Junior classification, 6 credits in psychology. Application of psychological theory and research methods to issues in physical health. Study of the psychological processes that influence health behaviors, including the role of stress, coping, and illness perception.

Psych 488. Cultural Psychology. (3-0) Cr. 3. Prereq: 280 and 301; Junior classification. Overview of the role of culture in shaping cognitive, behavioral, and social psychological processes.

Psych 490. Independent Study. Cr. arr. Prereq: 12 credits in psychology. Supervised research in an area of interest, with approval from the instructor.

Psych 544. Practicum in Assessment. (2-1) Cr. 2. Prereq: 542 and admission into the PhD program in counseling psychology. Supervised practice in designing and implementing observational systems and in administering, scoring, interpreting, and reporting individual tests.

A. Behavioral Assessment
B. Individual Tests: Children
C. Testing: Adult Ages

Psych 560. Advanced Personality Psychology. (3-0) Cr. 3. Prereq: 4 courses in psychology, including 360. Analysis of theories of personality, concepts, methods, and current research issues.

Psych 561. Psychopathology and Behavior Deviations. (3-0) Cr. 3. Prereq. 460. Examination of theoretical perspectives and current research pertinent to the major forms of adult dysfunction including, adjustment, anxiety, mood, eating, and substance abuse disorders.

Psych 562. Personality Assessment. (3-0) Cr. 3. Prereq. 360, 440, 542, and Stat 401 and admission to the PhD program in counseling psychology. Principles, concepts, and methods of personality assessment. Though not a practicum course, exposure is given to a variety of objective, projective, and situational tests.

Psych 563. Developmental Psychopathology. (3-0) Cr. 3. Prereq. 230 and 460 or graduate classification. Theory and research related to major disorders of childhood and adolescence with an emphasis on assessment, etiology, and developmental processes, and multimodal interventions.

Psych 580. Advanced Social Psychology: Psychological Perspectives. (3-0) Cr. 3. Prereq. 4 courses in psychology, including 280. Current theories, methods, and research in social psychology with an emphasis on cognitive, emotional, and interpersonal processes such as attribution, social cognition, attitude change, attraction, aggression, and social comparison.

Psych 581. Applications of social Psychology Theories. (3-0) Cr. 3. Prereq. 12 credits in psychology, including 280. Application of social psychological theory to various applied topics, including physical and mental health, stress, and coping.

Psych 586. Research Methods in Social Psychology. (3-0) Cr. 3. Prereq. Stat 402 and permission of instructor. Ethical issues, generating testable hypotheses, operationalizing independent and dependent variables, sampling and design issues, laboratory procedures, and interpretation of results in experimental research. Issues in analysis of variance, Bayesian reasoning, and effect size estimation will be emphasized, as well writing and publication strategies.

Psych 590. Special Topics. Cr. arr. Repeatable. Prereq. 12 credits in psychology, and permission of instructor. Guided reading on special topics or individual research projects.

A. Counseling
Q. Cognitive
R. Social
Z. General

Psych 592. Seminar in Psychology. (1-0) Cr. arr. Repeatable. Prereq: 440 or permission in psychology. Practicum for psychology. Psych 592A also requires admission into the doctoral program in counseling psychology.

A. Counseling

B. Industrial-Organizational
M. Professional Issues and Ethics
P. Research Methods and Psychometrics
Q. Cognitive
R. Social
Z. General

Psych 597. Internship in Psychology. Cr. R. Prereq: M.S. degree candidacy; permission of instructor. Full-time, non-clinical, supervised experience in a setting relevant to psychology. Intended for master’s degree level internships.

Psych 599. Creative Component. Cr. arr. Satisfactory-fail only.

Courses for graduate students

Psych 601. History of Philosophy of Psychology. (3-0) Cr. 3. Prereq: 4 courses in psychology. Origins of psychology in philosophical, medical, and related thought. Development as an independent discipline in the nineteenth and twentieth centuries as a science and as a practice including traditional and contemporary theory and philosophy.

Psych 621. Psychological Counseling: Theory and Practice. (3-0) Cr. 3. Prereq: 4 courses in psychology, including 517. Survey of current theory and research in perception, attention, memory, language, concepts/categorization in human cognition within the domains of perception, attention, memory, language, concepts/categoryization and spatial cognition.

Psych 622. Scientific Methods in Human Computer Interaction. (Cross-listed with HCI). (3-0) Cr. 3. Prereq: Graduate classification or instructor approval. Biological, behavioral, perceptual, cognitive and social issues relevant to human-computer interactions.

Psych 626. Group Counseling. (2-2) Cr. 3. Prereq. 691A and admission to the PhD program in counseling psychology. Theory, research, ethical issues, and therapeutic considerations relevant to group counseling. Participation in lab exercises for development of group counseling skills and observation of ongoing groups.

Psych 633. Teaching of Psychology. (3-0) Cr. 3. Prereq: Enrollment in doctoral degree program in psychology. Completion of at least 1 year of graduate study; permission of instructor. Orientation to teaching of psychology at college level: academic issues and problems, instructional and evaluative techniques.

Psych 635. Interventions with Children and Adolescents. (3-0) Cr. 3. Prereq: Graduate classification. Research and theory underlying application of behavioral and cognitive psychology to the treatment of childhood and adolescent psychopathology with an emphasis on internalizing disorders, developmental processes, and multimodal interventions.

Psych 691. Practicum in Psychology. Cr. arr. Prereq: Permission of instructor: Supervised practice and experience in the following fields of specialization in applied psychology:
A. Counseling (Beginning)
B. Intermediate Counseling
E. Group Counseling
F. Advanced Counseling
T. Teaching. Prereq: 633 (satisfactory-fail basis grading only)
**Seed Technology and Business**

(Interdepartmental Graduate Major)

www.seeds.iastate.edu/

Manjit Misra, Seed Science Center Director (Administration), Gary Munkvold, Program Chair; Paul Christensen, Program Coordinator

Advisory Committee: David Acker, Sanjeev Agarwal, Paul Christensen, Ana Correia, Michael Crum, Susana Goggi, Kendall Lamkey, Jeff Iles, Manjit Misra, Gary Munkvold, Gaylan Scofield

Faculty: Sanjeev Agarwal, Rajeev Arora, Jennifer Blackhurst, Paul Christensen, Anne Clem, Ana Correia, Michael Crum, Fredrick Dark, David Dornbos, Susana Goggi, Brian Mennecke, Manjit Misra, Gary Munkvold, Russell Mullien, Brad Shrader, James Werbel, John Wong

**On-Line Graduate Study**

The Graduate Program in Seed Technology and Business offers students advanced study in the seed science and technology and business management appropriate for application in the seed sector. The program is offered by nine departments in the Colleges of Business and Agriculture and Life Sciences: Accounting; Agronomy; Finance; Horticulture; Logistics, Operations, and Management Information Systems; Management; Marketing; and Plant Pathology. This multidisciplinary program offers a focused on-line curriculum for a Master of Science in Seed Technology and Business, along with Graduate Certificates in Seed Science and Technology and in Seed Business Management. Courses are available to students in other majors.

The curriculum offers a set of scientific and technical courses that are focused on seed, with a set of basic management courses, similar to those in the core courses of an MBA program. The business courses will use examples drawn from the seed industry. A creative component is required for the Master of Science degree.

Prerequisite for the program is a bachelor’s degree in business, agriculture, other biological discipline, or related degrees. Graduate training in these disciplines will also be considered.

Graduates of the Graduate Program in Seed Technology and Business will be prepared for roles in management and leadership within private and public seed and seed-related organizations.

All of the courses listed below are required for the Master of Science degree, and the students are expected to go through the curriculum in order. The pace of the course sequence is designed to allow the students with work and other commitments to participate. Students will complete the creative component under the guidance of their Program of Study Committee. In many cases, the creative component topic will be associated with the student’s work.

Graduates of the Master of Science curriculum will be prepared for roles in management and leadership within seed related organizations, private and public.

The program offers two graduate certificates: a graduate certificate in Seed Science and Technology, which consists of 9 courses (STB/Agron 535, STB/Agron 536, STB/Agron 510, STB/Hort 543, STB/PI P 592, STB/Agron 547, STB/Agron 534, STB/Agron 596), and a graduate certificate in Seed Business Management, which consists of 7 courses (STB/Agron 535, BusAd 501, BusAd 503, BusAd 504, BusAd 507, BusAd 508, and BusAd 509). Graduate certificate courses may be applied to the Master of Science in Seed Technology and Business. Those interested in these graduate certificates should contact the Program for details.

Information on application procedures and specific requirements of the major can be obtained from the following internet addresses: http://www.seedgrad.iastate.edu, or http://www.distance.iastate.edu or by writing to seedgrad@iastate.edu.

**Courses for graduate students**

**STB 510. Crop Improvement.** (Cross-listed with Agron). (3-0) Cr. 3. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. A study of the basic principles and methods in the genetic improvement of crop plants. Methods used in manipulating genomes through the use of biotechnology. Methods of cultivar development. Quantitative procedures for describing response to selection. Analysis of the relationship of reproductive characters and growth characteristics to response to selection.

**STB 534. Seed and Variety, Testing and Technology.** (Cross-listed with Agron). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out trials, isozyme testing, and DNA marker testing. Procedures for evaluating varieties. The variance tests appropriate for fixed effects analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot testing.

**STB 535. Introduction to the Seed Industry.** (Cross-listed with Agron). Cr. 1. Prereq: Curriculum requires undergraduate specialization in a business or biological science. An analysis of the defining characteristics of the seed industry and introduction to the Master in Seed Technology and Business curriculum. The tasks of crop improvement and seed production will be analytically related to basic management functions and classifications of management activities that are used in the study of business management. Management tasks and roles will be analyzed in relation to the public policy issues that shape the seed industry, including ethical and economical approaches to biotechnology, intellectual property, and corporate responsibility.

**STB 536. Quantitative Methods for Seed.** (Cross-listed with Agron). (1-0) Cr. 1. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. Quantitative Methods for analyzing and interpreting agronomic and business information for the seed industry. Principles of experimental design, including analysis of variance, regression, correlation and graphical representation of data. Use of spreadsheets for manipulating, analyzing and presenting data.

**STB 539. Seed Conditioning and Storage.** (Cross-listed with Agron). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use.
Associate Professor (Adjunct): Waggoner
Assistant Professors: Arbuckle, Bain, Downing-Matibag, Krer, Maldonado-Pabon, Monahan, Peters, Prokos
Assistant Professor (Adjunct): Emery
Lecturer: Conis, Reger

**Undergraduate Study**

Sociology graduates will understand and demonstrate: 1) general knowledge of sociology; 2) research methods in sociology; 3) critical thinking skills; 4) application of sociology to pressing social issues; 5) sociological and professional values; 6) information technology; 7) communication skills; and 8) personal and career development.

The department offers course work leading to either a bachelor of arts or bachelor of science in sociology. Additionally, a bachelor of science in Public Service and Administration in Agriculture is offered. The department offers course work for the Interdisciplinary Studies major in Criminology, Sociology and Criminal Justice and a minor in Criminal Justice Studies. Programs of study in sociology offered in both the College of Agriculture and the College of Liberal Arts and Sciences are outlined in this section. For the undergraduate curriculum in Liberal Arts and Sciences, with a major in sociology leading to the degrees of bachelor of arts and bachelor of science, see Liberal Arts and Sciences, Curricula. For the undergraduate curriculum in agriculture, with a major in public service and administration in agriculture, leading to the degree bachelor of science, see Agriculture, Curriculum in Public Service and Administration in Agriculture. For the undergraduate curriculum in Liberal Arts and Sciences, with a minor in criminal justice studies, see Liberal Arts and Sciences, Curriculum.

Graduates understand how social institutions, communities, and organizations work and change; they can examine the causes and consequences of conformity, deviance, and inequality. They can apply sociological understanding of human behavior to practical work situations and everyday life. Graduates can think critically, think independently, and communicate effectively about social issues and social policy.

**College of Liberal Arts and Sciences—Sociology**

A major in sociology can serve as a liberal arts education; as preparation for various positions in social service and related occupations in business and industry; as background for professional education in such areas as law and theology or as a basis for graduate professional training as a sociologist in academic, government, business, and industrial settings.

Departmental requirements for sociology majors include the following supporting course: Philoso-

**Course Descriptions**

**Soc 101.** An introduction to sociology. 3-0. Cr. 3. F. Students majoring in sociology may elect this course as part of their major program. The department offers work for the degrees of bachelor of arts and bachelor of science in sociology leading to the degree bachelor of science. The department also participates in the interdisciplinary program in interdepartmental majors in sustainable agriculture, transportation and water resources, and interdepartmental minors in gerontology (see Index).

**Courses Primarily for Undergraduate Students**

Soc 110. Orientation to Public Service and Administration in Agriculture. Cr. R. F. Survey of public service and administration in agriculture. Exploration of career tracks and career planning. Recommended during first semester of freshman year or as soon as possible after transfer into the department.

Soc 115. Orientation to Sociology. Cr. R. F. S. Orientation to sociology: Familiarization with University and LAS College requirements and procedures. Occupational tracks and career options open to sociology; introduction to career planning. Recommended during first semester of freshman year, or as soon as possible after transfer into the department. Satisfactory-fail only.

Soc 130. Rural Institutions and Organizations. 3-0. Cr. 3. F. S. An introductory analysis of sociological concepts and theories as they relate to rural institutions and organizations. Emphasis on the historical and functional aspects of these institutions and organizations and their dynamic adaptation to changing societal, environmental, and economic conditions. General sociological principles and perspectives. Credit for only Soc 130 or 134 may be applied toward graduation.

Soc 134. Introduction to Sociology. 3-0. Cr. 3. F. S.S. Social interaction and group behavior with emphasis on the scientific study of contemporary U.S. society, including issues relating to socialization, inequality, and changing rural and urban communities. Analysis of relationships among the institutions of family, religion, political participation, work, and leisure. Credit for only Soc 130 or 134 may be applied toward graduation. H. Honors.

Soc 219. Sociology of Intimate Relationships. 3-0. Cr. 3. S.S. Pre Req: 130 or 134. An analysis of intimate relationships among couples using a sociological perspective. Attention is given to singleness; dating and courtship; sexuality; mate selection, cohabitation, and marriage. Relationship quality, communication, conflict and dissolution of these types of relationship will also be explored.

Soc 235. Social Problems and American Values. 3-0. Cr. 3. S. S. Pre Req: 130 or 134. Sociological concepts, theories and methods to analyze the causes and consequences of social problems. Social problems discussed may include crime, substance abuse, income inequalities, discrimination, poverty, race relations, health care, family issues, and the environment. How American culture and values shape societal conditions, public discourse and policy.

Soc 241. Youth and Crime. (Cross-listed with CJ Stb.) 3-0. Cr. 3. F. S. Pre Req: 130 or 134. An examination of delinquency that focuses on the scientific study of the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents’ rights, and traditional and alternative ways of dealing with juvenile crime.

Soc 264. Small Group Dynamics. 3-0. Cr. 3. S. S. Pre Req: 130 or 134. An overview of social processes in small groups. Focus on group decision-making, group dynamics, conformity, intergroup relations, status and role effects, leadership, group development and group conflict. Includes student participation in small group processes.

Soc 110. Orientation to Public Service and Administration in Agriculture. Cr. R. F. Survey of public service and administration in agriculture. Exploration of career tracks and career planning. Recommended during first semester of freshman year or as soon as possible after transfer into the department.

Soc 115. Orientation to Sociology. Cr. R. F. S. Orientation to sociology: Familiarization with University and LAS College requirements and procedures. Occupational tracks and career options open to sociology; introduction to career planning. Recommended during first semester of freshman year, or as soon as possible after transfer into the department. Satisfactory-fail only.

Soc 130. Rural Institutions and Organizations. 3-0. Cr. 3. F. S. An introductory analysis of sociological concepts and theories as they relate to rural institutions and organizations. Emphasis on the historical and functional aspects of these institutions and organizations and their dynamic adaptation to changing societal, environmental, and economic conditions. General sociological principles and perspectives. Credit for only Soc 130 or 134 may be applied toward graduation.

Soc 134. Introduction to Sociology. 3-0. Cr. 3. F. S.S. Social interaction and group behavior with emphasis on the scientific study of contemporary U.S. society, including issues relating to socialization, inequality, and changing rural and urban communities. Analysis of relationships among the institutions of family, religion, political participation, work, and leisure. Credit for only Soc 130 or 134 may be applied toward graduation. H. Honors.

Soc 219. Sociology of Intimate Relationships. 3-0. Cr. 3. S.S. Pre Req: 130 or 134. An analysis of intimate relationships among couples using a sociological perspective. Attention is given to singleness; dating and courtship; sexuality; mate selection, cohabitation, and marriage. Relationship quality, communication, conflict and dissolution of these types of relationship will also be explored.

Soc 235. Social Problems and American Values. 3-0. Cr. 3. S. S. Pre Req: 130 or 134. Sociological concepts, theories and methods to analyze the causes and consequences of social problems. Social problems discussed may include crime, substance abuse, income inequalities, discrimination, poverty, race relations, health care, family issues, and the environment. How American culture and values shape societal conditions, public discourse and policy.

Soc 241. Youth and Crime. (Cross-listed with CJ Stb.) 3-0. Cr. 3. F. S. Pre Req: 130 or 134. An examination of delinquency that focuses on the scientific study of the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents’ rights, and traditional and alternative ways of dealing with juvenile crime.

Soc 264. Small Group Dynamics. 3-0. Cr. 3. S. S. Pre Req: 130 or 134. An overview of social processes in small groups. Focus on group decision-making, group dynamics, conformity, intergroup relations, status and role effects, leadership, group development and group conflict. Includes student participation in small group processes.
Soc 302. Advanced Research Methods. (3-0) Cr. 3. F.S.SS. Prereq: 100. Prearem. 202; Stat 101; Sociology or PSA Major. Experience in designing research projects, collecting and analyzing data and reporting results.

Soc 305. Social Psychology: A Sociological Perspective. (3-0) Cr. 3. F.S.SS. Prereq: 130 or 134. Examination of human behavior in a social environment with emphasis on development of the self, interpersonal relations, attitudes, and small groups.

Soc 310. Community. (3-0) Cr. 3. F.S. Prereq: 130 or 134. Analysis of evolving theory and research of community as an ideal type, an ecological system, a political economy, and an interactive field; examination of the impact of economic, cultural, social and political infrastructures on community power structures and change processes in a global era.

Soc 325. Transition in Agriculture. (3-0) Cr. 3. S. Prereq: 130 or 134 or permission of instructor. The impacts of agricultural changes on farm families, rural communities, and consumers. Past, present, and future trends in family farms and their social implications.

Soc 327. Sex and Gender in Society. (Cross-listed with W St). (3-0) Cr. 3. F.S.SS. Prereq: 130 or 134. How the biological fact of sex is transformed into a system of gender stratification. The demographics and social positions of women and men in the family, education, media, politics, and the economy. Theories of the sociopsychological and sociological bases for behavior and attitudes of women and men. The relationship between gender, class, and race.

Soc 328. Sociology of Masculinities and Manhood. (Cross-listed with W St). (3-0) Cr. 3. S. Prereq: Soc 130, 134, or W S 201. Examination of socially constructed and idealized images of manhood, the nature of social hierarchies and relations constructed on the basis of imagery, ideologies, and norms of masculinity. Theories on gender (sociological, psychological, and biological). Particular attention given to theory and research on gender variations among men by race, class, ethnicity, sexual orientation, physical ability and age.

Soc 330. Ethnic and Race Relations. (Cross-listed with At Am). (3-0) Cr. 3. F.S.SS. Prereq: 130 or 134. Analysis of ethnic and race relations, particularly in America; emphasis on the sociology and psychology of race and ethnic relations.

Soc 331. Social Class and Inequality. (3-0) Cr. 3. F.S.SS. Prereq: 130 or 134. Social stratification and processes resulting in social and economic inequalities; implications of status, class, and poverty for people of different races, ethnicities, and gender.

Soc 332. The Latino/Latina Experience in U.S. Society. (3-0) Cr. 3. F. Prereq: 130 or 134. Examination of the social, historical, economic and political experience of varied Latino ethnic groups in the U.S. - primarily focusing on Mexican, Puerto Ricans, and Cubans.

Soc 334. Politics and Society. (Cross-listed with Pol Si). (3-0) Cr. 3. F.S. Prereq: A course in political science or sociology. A survey of small group theory and research from an interdisciplinary, social psychological perspective.

Soc 382. Environmental Sociology. (Cross-listed with Env S). (3-0) Cr. 3. F.S. Prereq: Soc 130, 134 or 3 credits of Env S. Environment-society relations; social construction of nature and the environment; social and environmental impacts of resource extraction, production, and consumption; environmental inequality; environmental mobilization and movements; U.S. and international examples.

Soc 401. Contemporary Sociological Theories. (3-0) Cr. 3. F.S.SS. Prereq: 9 credits in sociology. Both historical and modern social theories as applied to understanding and researching the social world. Nonmajor graduate credit.

Soc 411. Social Change in Developing Countries. (3-0) Cr. 3. S. Prereq: 130 or 134 plus 3 credits in social sciences. An exploration of change, development in developing countries; international interdependence; causes and consequences of persistent problems in agriculture, city growth, employment, gender equality, basic needs; local and worldwide efforts to foster social change and international development. Nonmajor graduate credit.

Soc 412. Senior Seminar on Career Development. (1-0) Cr. 1. F. Prereq: Most of major core courses, senior classification. Transition from student to professional career development including self-assessment, short- and long-term goals, strategies for the job search, development of contacts and sources, resumes and interviews. Enrollment preferred in first semester as senior. Satisfactory-fail only.

Soc 415. Sociology of Technology. (3-0) Cr. 3. F. Prereq: 130 or 134 plus 3 credits in social sciences. Review of physical, biochemical, and social approaches to technology evaluation. Examination of public responses to complex and controversial technology. Strategies for gaining adoption/rejection of technology. Applications to topics in agriculture, development, and marketing. Credit for Soc 415 may be applied toward graduation. Nonmajor graduate credit.

Soc 420. Complex Organizations. (3-0) Cr. 3. F.S. Prereq: 130 or 134 plus 3 credits in social sciences. Study of bureaucracies and other large organizations as social systems through the perspective of basic social processes and structural variables. Incorporates topics of organizational effectiveness, power and change. Nonmajor graduate credit.

Soc 431. Chicanos/Chicanas in Contemporary Society. (3-0) Cr. 3. S. Prereq: 130 or 134. An interdisciplinary examination of Chicanos/as, the largest U.S. Latino ethnic group. Special attention will be given to social conflict and social transformation. The course relates to contemporary Chican@ issues, particularly in the Midwest.

Soc 435. Urban Society. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 130 or 134 plus 3 credits in social sciences. Development of cities and urban systems; human and spatial ecology; urban transformation, decline, and revitalization; poverty; immigration; homelessness; residential segregation; housing policy; urban social movements; local governance; alternative solutions and planning for cities; international comparisons.

Soc 460. Criminal and Juvenile Justice Practicum. (Cross-listed with CJ Stj). Cr. arr. Repeatable. F.S. Prereq: Junior or senior classification; permission of criminal justice studies coordinator; major or minor in sociology, or criminal justice studies minor. Study of the criminal and juvenile justice systems and social control processes. Supervised placement in a police department, prosecutor’s office, court, probation and parole department, penitentiary, juvenile correctional institution, community-based rehabilitation program, or related agency. Not more than a total of 12 credits of field experience (Soc 454 and 460) may be counted toward graduation. No credits in Soc 460 may be used to satisfy minimum sociology requirements for sociology majors. Satisfactory-fail only.

Soc 484. Community Action and Leadership. (3-0) Cr. 3. S.SS. Prereq: 6 credits in sociology. Methods of planning, organizing, and conducting planned social change and other action programs in communities. Strategies of change, change agent roles, client need identification, community organization strategies, citizen participation, leadership identification and development, program planning and evaluation.

Soc 484. Sociological Analysis of Crime. (3-0) Cr. 3. S.SS. Prereq: 6 credits in sociology. The analysis of crime and deviance in society. Theoretical perspectives, research projects, collecting and analyzing data and reporting results.
Software Engineering

www.se.iastate.edu

(A joint program administered by the Department of Electrical and Computer Engineering and the Department of Computer Science.)

Undergraduate Study

For the undergraduate curriculum in software engineering leading to the degree bachelor of science, see College of Engineering and College of Liberal Arts and Sciences.

This curriculum is jointly administered by the Electrical and Computer Engineering Department and the Computer Science Department at Iowa State University and it provides undergraduate students with the opportunity to learn software engineering fundamentals, to study applications of the state-of-the art software technologies, and to prepare for the practice of software engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The software engineering curriculum offers emphasis areas in software engineering principles, process, and practice. Students may also take elective courses in computer engineering and computer science.

The objective of the software engineering program at Iowa State University is that its graduates should demonstrate expertise, engagement, leadership, and teamwork within five years after graduation.

- **Expertise:** Graduates should establish peer-recognized expertise together with the ability to articulate that expertise and use it for problem solving in the planning, design, development, validation, and evolution of software using contemporary practices.

- **Engagement:** Graduates should be engaged in the professional practice, locally and globally, contributing through the ethical, competent, and creative practice of Software Engineering in industry, academe, or the public sector, or graduates may use the program as a foundation for interdisciplinary careers in business, law, medicine, or public service.

- **Learning:** Graduates should demonstrate sustained learning through graduate work or professional improvement opportunities and through self study, and they should demonstrate the ability to adapt to rapid technological changes.

- **Leadership:** Graduates should exhibit leadership and initiative to enhance professional and organizational goals, facilitate the achievements of others, and obtain results.

- **Teamwork:** Graduates should demonstrate effective teaming and commitment to working with others of diverse cultural and interdisciplinary background by applying software engineering abilities, communication skills, and knowledge of contemporary and global issues.

As a complement to the instructional activity, the Electrical and Computer Engineering and Computer Science Departments provide opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. See College of Engineering, Cooperative Programs. Students have the opportunity to participate in advanced research activities; and through international exchange programs, students learn about engineering practices in other parts of the world.

**Courses primarily for undergraduate students**

**S E 101. Software Engineering Orientation.** Cr. R. Introduction to the procedures, policies, and resources of Iowa State University and the department of Computer Science and Electrical and Computer Engineering. Information on engineering and computer-based professions.

**S E 166. Careers in Software Engineering.** Cr. R. Overview of the nature and scope of the software engineering profession. Relationship of coursework to careers. Departmental rules, student services operations, degree requirements, program of study planning, career options, and student organizations.

**S E 185. Problem Solving in Software Engineering.** (3-1) Cr. 3. Prereq: Credit or enrollment in Math 142. Introduction to software engineering and computer programming. Systematic thinking process for problem solving in the context of software engineering. Group problem solving. Solving software engineering problems and presenting solutions through computer programs, written documents and oral presentations. Introduction to principles of programming, software design, and extensive practice in design, writing, running, debugging, and reasoning about programs.

**S E 298. Cooperative Education.** Cr. R. F.S.SS. Preq: Permission of department and Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work.

**S E 396. Summer Internship.** Cr. R. Repeatable. SS. Preq: Permission of department and Career Services. Summer professional work period.

**S E 397. Software Engineering Internship.** Cr. R. Repeatable. FS. Preq: Permission of department and Career Services. One semester maximum per academic year professional work period.

**S E 398. Cooperative Education.** Cr. R. F.S.SS. Preq: 298, permission of department and Career Services. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

**S E 409. Software Requirements Engineering.** (Cross-listed with Com S). (3-0) Cr. 3. Preq: Com S 309, 319. The requirements engineering process, including identification of stakeholders, requirements elicitation techniques such as interviews and prototyping, analysis fundamentals, requirements specification, and validation. Use of Models: State-oriented, Function-oriented, and Object-oriented. Documentation for Software Requirements. Informal, semi-formal, and formal representations. Structural, informational, and behavioral requirements. Non-functional requirements. Use of requirements repositories to manage and track requirements through the life cycle. Case studies, software projects, written reports, and oral presentations will be required. Nonmajor graduate credit.

**S E 412. Formal Aspects of Specification and Verification.** (Cross-listed with Com S, Cpr E). (3-0) Cr. 3. Preq: Com S 319, Com S 309. Introduction to prepositional/predicate/temporal logic, program verification using theorem proving, model-based verification using model checking, and tools for verification. Nonmajor graduate credit.

**S E 416. Software Evolution and Maintenance.** (Cross-listed with Cpr E). (3-0) Cr. 3. Preq: Com S 309, 319. Fundamental concepts in software evolution and maintenance; practical software evolution processes; legacy systems, program comprehension, impact analysis, program migration and transformation, refactoring. Tools for software evolution and maintenance. Case studies, experimental software projects. Written reports and oral presentation. Nonmajor graduate credit.

**S E 417. Software Testing.** (Cross-listed with Com S). (3-0) Cr. 3. Preq: Com S 309, 319. Comprehensive study of software testing, principles, methodologies, management strategies and techniques. Test models, test design techniques (black box and white-box testing techniques), integration, regression, system testing methods, and software testing tools. Nonmajor graduate credit.

**S E 491. Senior Design Project I and Professionalism.** (2-3) Cr. 3. Preq: Com S 309, 319. Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; project poster. First of two-semester team-oriented, project design and implementation experience.

**S E 492. Senior Design Project II.** (1-3) Cr. 2. Preq: 491. Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in S E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements.

**S E 498. Cooperative Education.** Cr. R. Repeatable. F.S.SS. Preq: 398, permission of department and Career Services. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.
Undergraduate Study

The cross-disciplinary program in speech communication offers introductory courses designed for all students as part of their general education and as a complement to professional training. It also offers a major or minor in speech communication as well as an additional endorsement for secondary teachers who already have an endorsement in another content area.

Students who major or minor in speech communication will prepare themselves for a wide variety of employment opportunities in business, industry and government, as well as in non-profit and educational organizations. With their effective oral communication, listening, teamwork, problem-solving and leadership skills, speech communication students find positions in general business management: human resources, benefits, sales and marketing and serve various organizations as recruiters, trainers, promotions managers, communication specialists, community outreach personnel and event planners. The program also prepares students for the study of law, theology, and for graduate level work in speech communication or related disciplines.

The program participates in the following inter-disciplinary undergraduate minor programs: the interdisciplinary program in linguistics and the interdisciplinary program in technology and social change.

Speech Communication Major

A student electing to major in speech communication must earn at least 120 credits with 45 credits at the 300/400 level. A minimum of 33 of those credits must be earned in Speech Communication courses where the student earns a grade of C or better. Our flexible curriculum with few prerequisites can help you meet the 33 hour requirement in a timely way.

Core Requirements (18 credits)
3 ComSt 101 Intro to Communication
3 Sp Cm 212 Fundamentals of Public Speaking
3 Sp Cm 305 Language, Thought and Action
3 Sp Cm 327 Persuasion
3 Sp Cm 412 Rhetorical Criticism
3 Sp Cm 497 Capstone Course

Additional Coursework (Choose at least 5 of the following for 15 credits)
3 Sp Cm 110 Listening
3 Sp Cm 205 Popular Culture Analysis
3 Sp Cm 213 Computers in the Study of English—NO LONGER OFFERED (2-0)
3 Sp Cm 312 Business and Professional Speaking
3 Sp Cm 313 Communication for the Classroom Teacher
3 Sp Cm 322 Argumentation, Debate and Critical Thinking
3 Sp Cm 323 Gender and Communication
3 Sp Cm 324 Legal Communication
3 Sp Cm 325 Nonverbal Communication
3 Sp Cm 350 Rhetoric and the History of Ideas
3 Sp Cm 410 Persuasion in the Athenian Democracy
3 Sp Cm 416 American Public Address
3 Sp Cm 417 Campaign Rhetoric

Credits in Sp Cm 290, 499, or 590 cannot be applied toward the minimum required credits for the major.

The Communication Proficiency requirement may be met by (1) completion of Engl 150, 250 (or 250H), or its equivalent, with a grade in each of C or better; (2) one additional writing course beyond Engl 250 with a grade of C or better from the following approved list: Engl 302, 303, 304, 305, 309, 314, 415; Jl MC 201.

Speech Communication Minor

The area’s courses also provide a minor concentration for students in various majors such as business, English, journalism, world languages and cultures, and the social sciences. The requirements for a minor in speech communication may be fulfilled by credit in Sp Cm 212 plus at least 15 additional hours from the lists above, of which 9 credits are in courses numbered 300 or above. No credits in 290, 490, 499, and 590 may apply toward the minor.

Speech Communication Education

Students seeking a secondary endorsement in speech communication as an additional area to prepare to teach speech, dramatic arts, and media at the secondary school level. In addition, they prepare to direct co-curricular and extra curricular activities such as drama, speech and debate.

Each student seeking an additional endorsement in speech communication must meet a 29 hour requirement by taking the following courses: Sp Cm 110 or ComSt 102, Sp Cm 212, Sp Cm 313, Sp Cm 322, Sp Cm 412, Sp Cm 495A, Sp Cm 495B, Thitre 255, Thitre 358 and Ji MC 101.

Graduate Study

The program offers courses for a graduate minor in speech communication as well as supporting work for other disciplines. The Program of Speech Communication also participates in the interdisciplinary program leading to a master’s degree in Interdisciplinary Graduate Studies.

Courses open for nonmajor graduate credit: Sp Cm 305, 323, 324, 327, 412, 416, and 417.

Speech Communication (Sp Cm)

Courses primarily for undergraduate students

Sp Cm 110. Listening. (3-0) Cr. 3. F.S.SS. Theory, principles, and competency development in comprehension, therapeutic, critical, consumer, and appreciative listening. The impact of listening in relationships and partnerships.

Sp Cm 205. Popular Culture Analysis. (Cross-listed with Engl). (3-0) Cr. 3. F.S.SS. Theory and practice of basic speech communication principles applied to public speaking. Practice in the preparation and delivery of extemporaneous speeches.

Sp Cm 223. Intercollaborate Debate and Forensics. Cr. 1. Repeatable. F.S. Prereq: Permission of instructor. Participation in intramural and intercollegiate debate and other forensic events.

Sp Cm 290. Special Projects. Cr. arr. Repeatable. F.S.SS. Prereq: 3 credits in speech communication; permission of department chair.

Sp Cm 305. Language, Thought and Action. (Cross-listed with Ling, ComSt). (3-0) Cr. 3. F.S.SS. Prereq: Engl 250. The study of symbolic processes and how meaning is conveyed in words, sentences, and utterances; discussion of modern theories of meaning; and an exploration of relationships among language, thought and action. Nonmajor graduate credit.

Sp Cm 312. Business and Professional Speaking. (3-0) Cr. 3. F.S.SS. Prereq: 212. Theory, principles, and competency development in the creation of coherent, articulate business and professional oral presentations.

Sp Cm 313. Communication for the Classroom Teacher. (3-0) Cr. 3. Prereq: 212. Communication in the teaching profession; training in classroom-oriented communication activities; use of video recorder for analysis of presentation.

Sp Cm 322. Argumentation, Debate, and Critical Thinking. (3-0) Cr. 3. Prereq: 212. Practice in preparing and presenting argumentative and debate speeches, with emphasis on critical thinking and ethical and logical duties of the advocate; analysis, evidence, reasoning, attack, defense, research, case construction, and judging.

Sp Cm 323. Gender and Communication. (Cross-listed with W S, ComSt). (3-0) Cr. 3. Prereq: 212. The rhetoric strategies women and men use to succeed in oral communication; the theory, principles, and practice of effective gender communication in a variety of settings. Nonmajor graduate credit.

Sp Cm 324. Legal Communication. (3-0) Cr. 3. Prereq: 212. Speech communication in the legal system inside and outside the trial process: interviewing and counseling, negotiating and bargaining, voir dire, opening statements, examination of witnesses, closing arguments, judge’s instructions, jury behavior, and appellate advocacy. Nonmajor graduate credit.

Sp Cm 325. Nonverbal Communication. (Cross-listed with ComSt). (3-0) Cr. 3. Prereq: ComSt 101 or 102, 203, 301. Theory and research in nonverbal communication; exploration of nonverbal subcodes; function of nonverbal communication in various contexts; student-designed investigations.

Sp Cm 327. Persuasion. (3-0) Cr. 3. F.S.SS. Prereq: 212. Examination of persuasive theories, strategies and research in persuasion. Emphasis on application and analysis; logical, emotional, and ethical proofs. Nonmajor graduate credit.
Sp Cm 350. Rhetorical Theories and Issues in Context. (Cross-listed with Engl, C St). (3-0) Cr. 3. S. Prereq: Engl 250. Ideas about the relationship between rhetoric and society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology.

Sp Cm 404. Seminar. (Dual-listed with 504). Cr. 3. Repeatable. Prereq: 15 credits in speech communication.
A. Speech Communication
B. Speech Education

Sp Cm 412. Rhetorical Criticism. (3-0) Cr. 3. S. Prereq: 212 and 6 credits in speech communication. Development of rhetorical theory and practice from Corax to modern times. Application of principles of criticism to current public speaking practices. Nonmajor graduate credit.

Sp Cm 416. American Public Address. (3-0) Cr. 3. S. Relationship between public persuasions and leaders; process of preparing major public addresses; selected speakers and speeches as linked with political or historical events. Nonmajor graduate credit.

Sp Cm 490. Independent Study. Cr. arr. Repeatable. F.S.S. Prereq: 15 credits in speech communication, junior classification, permission of department chair. Only one independent study enrollment is permitted within the department per semester.

Sp Cm 495A. Directing Speech Activities. (1-0) Cr. 1. S. Prereq: C 1301; 9 credits in speech communication; minimum grade point of 2.5 in speech communication courses. Problems, methods, and materials related to directing speech activities in secondary schools.

Sp Cm 495B. Teaching Speech. (Cross-listed with C 16). (3-0) Cr. 3. F. Prereq: Sp Cm 313; 9 credits in speech communication; minimum grade point average of 2.5 in speech communication courses. Problems, methods, and materials related to teaching speech, theatre, and media in secondary schools.

Sp Cm 497. Capstone Seminar. (3-0) Cr. 3. Prereq: 15 credits in speech communication; junior or senior classification. Students synthesize relevant theory and research culminating in a capstone project/paper.

Sp Cm 499. Communication Internship. Cr. arr. Repeatable. F.S.S. Prereq: 18 credits in speech communication courses, other courses deemed appropriate by faculty adviser; 2nd semester junior or senior standing; cumulative GPA of at least 2.5 overall and 3.0 in speech communication, and permission of the internship committee. Applications should be submitted in the term prior to the term in which the internship is desired. Supervised application of speech communication in professional settings.

Courses primarily for graduate students, open to qualified undergraduate students

Sp Cm 504. Seminar. (Dual-listed with 404). (3-0) Cr. 3. Repeatable. F.S.S. Topics may include the following:
A. Speech Communication
B. Speech Education

Kenneth Koehler, Chair of Department

Distinguished Professors: Athreya, Meeker

Distinguished Professors (Emeritus): H. A. David, Fuller

University Professors: Koehler, Lorenz, Shelley, Stephenson, Vardeman

University Professors (Emeritus): D. Cox, Herbert T. David, Groeneveld, Hinz

Professors: Bailey, Bonett, Brendel, Carriquiry, Chen, Cook, Dixon, Isaacson, Kaiser, Morris, Nettleton, Nusser, Rollins

Professors (Emeritus): C. Cox, Harville, Hickman, Hotchkiss, Kennedy, Pollak, Stahran, Wolins

Professor (Collaborator): Therneau

Associate Professors: Adams, Dorman, Froehlich, Hofmann, Kim, Larsen, Mait, Mastra, Marasinghe, Roberts, Shao, Sherman, Wilson, Wu

Associate Professor (Emeritus): Sukhatme

Assistant Professors: Caragea, Ghosh, Liu, Nordman, Roy, Yu

Assistant Professors (Collaborators): Sargent, Sloan

Lecturers: Bhattacharyya, Genschel, Meyers

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in statistics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum.

The curriculum in liberal arts and sciences with a major in statistics is designed to prepare students for (1) entry level statistics positions requiring the B.S. degree in statistics in business, industry or commerce, nonprofit institutions, and in state or federal government; (2) graduate study in statistics. Entry-level positions include the following types of work: statistical design, analysis and interpretation of experiments and surveys; data processing and analysis using modern computer facilities and statistical computing systems; application of statistical principles and methods in commercial areas such as finance, insurance, industrial research, marketing, manufacturing, and quality control. Nonprofit organizations such as large health study institutions have entry-level positions for B.S. graduates in statistics. Also, there are opportunities for work in statistics that require a major in a subject-matter field and a minor in statistics.

Students completing the undergraduate degree in statistics should have a broad understanding of the discipline of statistics. They should have a clear comprehension of the theoretical basis of statistical reasoning and should be proficient in the use of modern statistical methods and computing. Such graduates should have an ability to apply and convey statistical concepts and knowledge in oral and written form. They should be aware of ethical issues associated with polling and surveys and in the summarization of the outcomes of statistical studies.

Undergraduate majors in this department usually include in their programs: (a) Statistics 101 or an alternative introductory course (104 or 226), (b) Mathematics 165, 166, 265 (or 165H, 166H, 265H), 307 (or 317) and Computer Science 207, and (c) Statistics 341, 342, 401, 402, 421, 479, 480.

These courses plus at least two additional courses in statistics at the 400 level or above constitute the major. With the permission of the department, I E/Stat 361 may be substituted for one of these 400 level courses. It is advisable to have a minor in a field of application.

The department offers a minor in statistics which may be earned by completing an introductory course in statistics plus additional courses from 341, 342, 361, and 400 level or above to yield a total of at least 15 credits in statistics courses.

English and Speech proficiency requirement: The department requires a grade of C- or better in each of Engl 150 and 250 (or 250H), and completion of one of Engl 302 or 314 with a grade of C- or better. The department requires a passing grade in ComSt 102 or Sp Cm 212.

Students intending to do graduate work in statistics normally will take additional courses in mathematics.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with a major in statistics, and for a minor for students majoring in other departments. Within the statistics major the student chooses to emphasize topics such as experimental design, probability, statistical methods, statistical theory, statistical computing, survey sampling, quality control, spatial statistics, time series, reliability, or applied statistics (e.g., bioinformatics, biometrics, econometrics, environmental statistics, psychometrics, sociometrics, etc.). A major in operations research leading to a master of science degree is offered in cooperation with the Department of Industrial and Manufacturing Systems Engineering. The doctor of philosophy degree is offered as a co-major with other graduate programs. Such programs have included graduate majors in Agronomy, Animal Ecology, Animal Science, Bioinformatics, Chemical and Biological Engineering, Computer Science, Electrical Engineering, Ecology, Evolution and Organismal Biology (EEOB), Economics, Educational Leadership and Policy Studies, Food Science and Human Nutrition, Genetics, Development and Cell Biology (GDCB), Industrial and Manufacturing Systems Engineering, Mathematics, Meteorology, Psychology and Sociology.

M.S. graduates have a basic understanding of statistical theory and methods. Elective courses in statistics provide the opportunity for the student to emphasize particular areas within the field of statistics, based on interest and future career goals. Communication skills are developed through course projects, assistantship duties and creative components. Ph.D. candidates study advanced theory and methods and are able to do independent research in statistics and collaborative research outside of statistics.

Prerequisite to major graduate work is the completion of an undergraduate curriculum essentially equivalent to the curriculum in liberal arts and sciences at this institution including at least a year of calculus.

The degree master of science may be earned on either a thesis or nonthesis basis. The nonthesis option requires the completion of at least 34 credits of acceptable graduate work, including the completion of a creative component and satisfactory performance on a written examination. The thesis option requires the completion of 30 credits of acceptable graduate work, including the completion of a thesis and satisfactory performance on a written examination. Ph.D. candidates must complete at least 90 semester credits (half or more from Iowa State with a minimum 3.0 (B) average and submit an original thesis representing a substantial contribution to statistics as a science.)
The department encourages students to prepare themselves in foreign languages and in computer languages, but specific requirements for the degrees master of science and doctor of philosophy are at the discretion of the student’s advisory committee.

The department participates in the interdepartmental program in bioinformatics and computational biology, molecular and evolutionary biology, forensic research, genetics, human computer interaction, and nutrition.

Courses primarily for undergraduate students

Stat 100. Orientation in Statistics. (1-0) Cr. F. Opportunities, challenges, and the scope of the curriculum in statistics. For students planning or considering a career in this area.

Stat 101. Principles of Statistics. (3-2) Cr. 4. F.S.SS. Prereq: 1 1/2 years of high school algebra. Statistical concepts in modern society; descriptive statistics and graphical displays of data; the normal distribution; data collection (sampling and designing experiments); elementary probability; elements of statistical inference; estimation and hypothesis testing; linear regression and correlation; contingency tables. Credit for only one of the following courses may be applied toward graduation: Stat 101, 104, 105, 226.

Stat 104. Introduction to Statistics. (2-2) Cr. 3. F.S.SS. Prereq: 1 1/2 years of high school algebra. Statistical concepts and their use in science; collecting, organizing, and summarizing data; elements of data; elementary probability; binomial and normal distributions; regression; estimation and hypothesis testing. For students in the agricultural and biological sciences. Credit for only one of the following courses may be applied toward graduation: Stat 101, 104, 105, 226.

Stat 105. Introduction to Statistics for Engineers. (3-0) Cr. 3. F.S. Prereq: Math 165 (or 165H). Statistical concepts with emphasis on engineering applications. Data collection; descriptive statistics; probability distributions and their properties; elements of statistical inference; regression; statistical quality control charts; use of statistical software; team project involving data collection, description and analysis. Credit for only one of the following courses may be applied toward graduation: Stat 101, 105, 226. Credit for both Stat 105 and 305 may not be applied for graduation.

Stat 226. Introduction to Business Statistics I. (3-0) Cr. 3. F.S. Prereq: Math 150 or 165. Obtaining, presenting, and organizing statistical data; measures of location and dispersion; the Normal distribution; sampling and sampling distributions; elements of statistical inference; estimation and confidence intervals; hypothesis testing; inference for simple linear regression analysis; use of computers to visualize and analyze data. Credit for only one of the following courses may be applied toward graduation: Stat 101, 104, 105, 226. Credit for both Stat 105 and 305 may not be applied for graduation.

Stat 231. Probability and Statistical Inference for Engineers. (4-0) Cr. 4. F.S. Prereq: Credit or enrollment in Math 265. Emphasis on engineering applications. Basic probability; random variables and probability distributions; joint and sampling distributions. Descriptive statistics; confidence intervals; hypothesis testing; simple linear regression; multiple linear regression; one way analysis of variance; use of statistical software.

Stat 305. Engineering Statistics. (3-0) Cr. 3. F.S.SS. Prereq: Math 165 (or 165H). Statistics for engineering problem solving. Principles of engineering data collection; descriptive statistics; elementary probability distributions; principles of experimentation; confidence intervals and significance tests; one-, two-, and multi-sample studies; regression analysis; use of statistical software; team project involving experimentation and data analysis. Credit for both Stat 105 and 305 may not be applied for graduation.

Stat 322. Probabilistic Methods for Electrical Engineers. (Cross-listed with E E) (3-0) Cr. 3. F.S. Prereq: E E 224. Introduction to probability with applications to electrical engineering. Sets and events, probability space, conditional probability, total probability and Bayes’ rule. Discrete and continuous random variables, cumulative distribution function, probability mass and density functions, expectation, moments, moment generating functions, random variables, functions of random variables. Elements of statistics, hypothesis testing, confidence intervals, least squares. Introduction to random processes.

Stat 326. Introduction to Business Statistics II. (2-2) Cr. 3. F.S. Prereq: 226. Multiple regression analysis; regression diagnostics; model building; applications in analysis of variance and time series; random variables; distributions; conditional probability; statistical process control methods; use of computers to visualize and analyze data.

Stat 330. Probability and Statistics for Computer Science. (3-0) Cr. 3. F.S. Prereq: Math 186. Topics from probability and statistics applicable to computer science. Basic probability; Random variables and their distributions; Elementary probabilistic simulation; Queuing models; Basic statistical inference; Introduction to regression. Nonmajor graduate credit.

Stat 342. Introduction to the Theory of Probability and Statistics II. (Cross-listed with Math). (3-0) Cr. 3. S. Prereq: Stat 341; Math 307 or 317 Transformations of random variables; sampling distributions; confidence intervals and hypothesis testing; theory of estimation and hypothesis tests, linear model theory, enumerative data; use of the R statistical package for simulation and data analysis.

Stat 401. Statistical Methods for Research Workers. (3-2) Cr. 4. F.S. Prereq: 101 or 104 or 105 or 226. Graduate students without an equivalent course should contact the department. Methods of analyzing and interpreting experimental and survey data. Statistical concepts and models; estimation; hypothesis testing with continuous and discrete data; simple and multiple linear regression and correlation; introduction to analysis of variance and blocking. Nonmajor graduate credit.

Stat 402. Statistical Design and the Analysis of Experiments. (3-0) Cr. 3. F.S. Prereq: 401. The role of statistics in research and the principles of experimental design. Experimental units, randomization, replication, blocking, subdividing and repeatedly measuring experimental units; factorial treatment designs and confounding; extensions of the analysis of variance to cover general crossed and nested classifications and models that include both classificatory and continuous factors. Determining sample size. Nonmajor graduate credit.

Stat 406. Statistical Methods for Spatial Data. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Six hours of statistics at the 400-level. The analysis of spatial data; geostatistical methods and spatial prediction; discrete index random fields and Markov random field models; models for spatial point processes. Emphasis on application and practical use of spatial statistical analysis. Nonmajor graduate credit.

Stat 416. Statistical Design and Analysis of Microarray Experiments. (3-0) Cr. 3. S. Prereq: Stat 407. Introduction to two-color microarray technology and single-channel platforms (Affymetrix GeneChips); the role of blotting, randomization, and biological and technical replication in microarray experiments; design of single-channel and two-color microarray experiments with factorial treatment structure; normalization methods for single-channel and two-color microarray data; methods for identifying differentially expressed genes including mixed linear model analyses, empirical Bayes analyses, and resampling based approaches; procedures for controlling false discovery rate for multiple testing and classification problems for microarray data; testing gene categories; emphasis on practical use of methods. Nonmajor graduate credit.

Stat 421. Survey Sampling Techniques. (2-2) Cr. 3. S. Prereq: 231 or 328 or 401. Concepts of sample surveys and the survey process; methods of designing sample surveys, including: simple random, stratified, and multistage sampling designs; methods of analyzing sample surveys including ratio, regression, domain estimation and nonresponse. Nonmajor graduate credit.

Stat 430. Empirical Methods for Computer Science. (3-0) Cr. 3. F.S. Prereq: Stat 350 or an equivalent course, Math 166, knowledge of linear algebra. Programs and systems as objects of empirical studies; exploratory data analysis; selected topics from analysis of designed experiments - analysis of variance, hypothesis testing and design among variables; linear regression, logistic regression, Poisson regression; parameter estimation, prediction, confidence regions, dimension reduction techniques, model diagnostics and sensitivity analysis, Markov chains and processes; simulation techniques and bootstrap methods; applications to performance assessment - comparison of multiple systems; communicating results of empirical studies. Statistical software: R. Nonmajor graduate credit.

Stat 447. Statistical Theory for Research Workers. (4-0) Cr. 4. F.S.S. Prereq: Math 151 and permission of instructor, or Math 265. Primarily for graduate students not majoring in statistics. Emphasis on aspects of the theory underlying statistical methods. Probability, probability density and mass functions, distribution functions, moment generating functions, sampling distributions, point and interval estimation, maximum likelihood ratio tests, introduction to posterior distributions and Bayesian analysis, linear model theory, use of simulation. Credit for both Stat 341 and 447 may not be applied toward graduation. Nonmajor graduate credit.

Stat 457. Applied Categorical Data Analysis. (3-0) Cr. 3. S. Prereq: 401, 341 or 447. Chi-square tests, matched-pair and repeated measures designs, conditional inference. Applications to social, behavioral, and health sciences. Nonmajor graduate credit.

Stat 479. Computer Processing of Statistical Data. (3-0) Cr. 3. F. Prereq: 401. Marasinghe. Structure, content and programming aspects of the Statistical Analysis System (SAS) software package: Advanced techniques in the use of SAS for data analysis including statistical graphics, regression diagnostics, and complex analysis of variance models. If time permits, the SAS macro programming language will be introduced. Nonmajor graduate credit.

Stat 493. Workshop in Statistics. (2-0) Cr. 2. Alt. S. Prereq: 101 or 104 or 226. Off-Campus only. Introduction to the methods of data analysis from surveys and experiments. Summarizing data, analysis of data from simple random samples and more complex survey designs, experimental design, estimation and hypothesis testing for data from simple experiments, good and bad graphical presentations of results. Designed for master of agriculture program only. Nonmajor graduate credit.

Stat 495. Applied Statistics for Industry I. (3-0) Cr. 3. F. Prereq: 101 or 104 or 105 or 226; Math 166 or 168H. Graduate students without an equivalent background in statistics. Statistical thinking applied to industrial processes. Assessing, monitoring and improving processes using statistical methods. Analytic/numerical studies; graphical displays of data; fundamentals of six sigma; process monitoring; control charts; capability analysis. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

Stat 501. Multivariate Statistical Methods. (3-0) Cr. 3. S. Prereq: 500 or 402; 447 or 542; knowledge of matrix algebra. Statistical methods for analyzing and displaying multivariate data: simultaneous analysis of multiple responses, multivariate analysis of variance; summarizing high dimensional data with principal components, factor analysis, canonical correlations, multidimensional scaling similar items with cluster analysis; classification methods; dynamic graphics. Statistical software: SAS, S-Plus or R, and GGobi.

Stat 503. Exploratory Methods and Data Mining. (2-2) Cr. 3. Alt. S. Prereq. 401, 341 or 447. Approaches to finding the unexpected in data; pattern recognition, classification, association rules, graphical methods, classical and computer-intensive statistical techniques, and problem solving. Emphasis is on data-centered, non-inferential statistics for large or high-dimensional data, topical problems, and building report writing skills.

Stat 506. Statistical Methods for Spatial Data. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 447 or 542. The analysis of spatial data; geostatistical methods and spatial prediction; discrete index random fields and Markov random field models; models for spatial point processes.

Stat 511. Statistical Methods. (3-0) Cr. 3. S. Prereq: 500 or 402 or 404; 447 or 542 and current enrollment in 543; knowledge of matrix algebra. Introduction to the general theory of linear models, least squares and maximum likelihood estimation, hypothesis testing, interval estimation and prediction, analysis of unbalanced designs. Models with both fixed and random factors. Introduction to non-linear and generalized linear models, bootstrap, simulation and smoothing methods. Requires use of R statistical software.

Stat 512. Design of Experiments. (3-0) Cr. 3. F. Prereq: 511. Basic ideas of experimental design and analysis; completely randomized, randomized complete block, and Latin Square designs; factorial experiments, confounding, fractional replication; split-plot and incomplete block designs.

Stat 516. Statistical Design and Analysis of Microarray Experiments. (3-0) Cr. 3. S. Prereq: Stat 500, 447 or 542. Introduction to two-color microarray technology including cDNA and oligo microarrays; introduction to single-channel Affymetrix GeneChips; the role of blocking, randomization, and biological and technical replication in microarray experiments; design of single-channel and two-color microarray experiments with factorial treatment structure; normalization methods; methods for identifying differentially expressed genes including mixed linear model analyses, empirical Bayes analyses, and resampling based approaches; adjustments for multiple testing; clustering and classification problems for microarray data; emphasis on current research topics in microarray statistics.

Stat 522. Advanced Applied Survey Sampling. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Stat 521 or both Stat 421 and Stat 477 Advanced topics in survey sampling and methodology; clustering and stratification in practice, adjustments and imputation for missing data, variance estimation in complex surveys, methods of panel and/or longitudinal surveys, procedures to increase response rates, and computing. Examples are taken from large, well-known surveys in various subject areas. Prior exposure to mathematica l statistics, probability, and at least one course in survey sampling theory is assumed.

Stat 528. Applied Business Statistics. (2-2) Cr. 3. F.S.S. Prereq: enrollment in MBA program, not for Stat majors. Application of statistical methods to problems in business and economics; simple and multiple linear regression; residual analysis; model building; analysis of variance; introduction to experimental design concepts; time series analysis and forecasting.

Stat 531. Quality Control and Engineering Statistics. (Cross-listed with I E). (3-0) Cr. 3. Alt. F. offered 2011. Prereq: Stat 401, 342 or 447 Wu. Statistical methods and theory applicable to problems of industrial process monitoring and improvement. Statistical issues in industrial measurement; Shewhart, CUSUM, and other control charts; process characterization studies; estimation of product and process characteristics; acceptance sampling, continuous sampling and sequential sampling; economic and decision theoretic arguments in industrial statistics.

Stat 533. Reliability. (Cross-listed with I E). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 342 or 432 or 447 Meeker. Probabilistic modeling and inference in engineering reliability; lifetime models, product limit estimator, probability plotting, maximum likelihood estimation for censored data, Bayesian methods in reliability, system reliability models, competing risk analysis, acceleration models and analysis of accelerated test data; analysis of recurrent data; planning studies to obtain reliability data.

Stat 542. Theory of Probability and Statistics I. (4-0) Cr. 4. Fall 414 or 462. Sample spaces, probability, conditional probability; Random variables, univariate distributions, expectation, median, and other characteristics of distributions, moment generating functions; Joint distributions, conditional distributions and independence, correlation and covariance; Probability laws and transformations; Introduction to the Multivariate Normal distribution; Sampling distributions, order statistics, Convergence concepts, the law of large numbers, the central limit theorem and delta method. Basics of stochastic simulation.

Stat 543. Theory of Probability and Statistics II. (3-0) Cr. 3. S. Prereq: 542. Point estimation including method of moments, maximum likelihood estimation, exponential family, Bayes estimators, Loss function and Bayesian optimality, unbiasedness, sufficiency, completeness; Basu’s theorem; Interval estimation including confidence intervals, prediction intervals, Bayesian interval estimation; Hypothesis testing including Neyman-Pearson Lemma, uniformly most powerful tests, likelihood ratio tests; Bayesian tests; Nonparametric methods, bootstrap.

Stat 544. Bayesian Statistics. (3-0) Cr. 3. S. Prereq: 542. Specification of probability models, subjective, conjugate, and noninformative prior distributions; hierarchical models; analytical and computational techniques for obtaining posterior distributions; model checking, model selection, diagnostics; comparison of Bayesian and traditional methods.

Stat 551. Time Series Analysis. (3-0) Cr. 3. F. Prereq: 447 or 542. Concepts of trend and dependence in time series data; stationarity and basic model structures for stationary dependence; moving average and autoregressive error structures; analysis in the time domain and the frequency domain; parameter estimation, prediction and forecasting; identification of appropriate model structure for actual data and model assumptions. Possible extended topics include dynamic models and linear filters.

Stat 557. Statistical Methods for Counts and Proportions. (3-0) Cr. 3. F. Prereq: 500 or 401, 543 or 447. Statistical methods for analyzing simple random samples when outcomes are counts or proportions; measures of association and relative risk, chi-squared tests, logistic regression and other generalized linear modeling methods. Extensions to longitudinal studies and complex designs, models with fixed and random effects. Use of statistical software: SAS, S-Plus or R.

Stat 556. Methods in Biostatistics. (Cross-listed with Toxi) (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Stat 500 or 401, Stat 543 or 447. Statistical methods useful for biostatistical problems. Topics include an analysis of cohort studies, case-control studies and randomized clinical trials, techniques in the analysis of survival data and longitudinal studies, approaches to handling missing data, and meta-analysis. Examples will come from recent studies in cancer, AIDS, heart disease, psychiatry and other human and animal health studies. Use of statistical software: SAS, S-Plus or R.

Stat 556. Survival Analysis for Biomedical Applications. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: Stat 543 and Stat 511. Statistical methods for analyzing time to event and estimation of survivor and hazard functions, proportional hazards models, diagnostic procedures, time dependent covariates. Extensions to cases with multiple or correlated end points. Applications include studies involving cancer treatments, liver and bladder diseases, autoimmune disorders, bone fractures, surgery mortality rates. Implementation of SAS, S Plus, and R.

Stat 571. An Introduction to R. (3-2) Cr. 1. F. Prereq: Enrollment in 500. An introduction to the logic of programming, numerical algorithms, and graphics. The R statistical programming environment will be used to demonstrate how data can be stored, manipulated, plotted, and analyzed using both built-in functions and user extensions. Concepts of modularization, loop, vectorization, conditional execution, and function construction will be emphasized.

Stat 580. Statistical Computing. (3-0) Cr. 3. S. Prereq: 579 and 447 or 542. Introduction to scientific computing and computational concepts in R: programming tools, modern programming methods, object-oriented design, design of statistical algorithms. Introduction to C programming for efficiency; interfacing R with C. Building statistical libraries. Use of algorithms in modern subroutine packages, optimization and integration. Implementation of simulation methods; inversion of probability integral transform, rejection sampling, importance sampling. Monte Carlo integration.

Stat 590. Special Topics. Cr. arr. Repeatable. A. Theory
B. Methods
C. Design of Experiments
D. Sample Surveys

Stat 599. Creative Component. Cr. arr.

Courses for graduate students

Stat 601. Advanced Statistical Methods. (3-2) Cr. 4. F. Prereq: 511, 543. Emphasis on the approaches statisticians take toward the statistical formulation of scientific problems. Students should develop an understanding of the way that various concepts of probability are used in problem formulation, analysis and inference, and the ability to develop one or more appropriate analyses for a variety of problems. Specific methodological topics include permutation procedures and design-based analysis; model building with simple and multiple stochastic components; estimation based on least-squares, likelihood functions, modified likelihood functions, sample reuse, and Bayesian analysis; inference in the sparse sample, parameter space, and belief space. Development of various analyses for real problems, including statistical formulation and necessary computations.

Stat 606. Advanced Spatial Statistics. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 506, 642. Consideration of advanced topics in spatial statistics, including areas of current research. Topics may include construction of nonparametric covariance structures, intrinsic random functions, examination of edge effects, general formulation of Markov random field models, spatial subsampling, use of pseudo-likelihood and empirical likelihood concepts in spatial analysis, the applicability of asymptotic frameworks for inference, and a discussion of appropriate measures for point processes.

Stat 611. Theory and Applications of Linear Models. (3-0) Cr. 3. F. Prereq: 500 or 402 or 404, 542 or 447, a course in matrix algebra. Wu. Matrix preliminaries, estimability, theory of least squares and of best linear unbiased estimation, analysis of variance and covariance, distribution of quadratic forms, extension of theory to mixed and random models, inference for variance components.

Stat 612. Advanced Design of Experiments. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 512. General theory of factorial experiments. Design optimality criteria, approximate design and general equivalence theory, computational approaches to constructing optimal designs for linear models. Advanced topics currently not in the design of experiments, including one or more of: distance based design criteria and construction of spatial process models, screening design strategies for high-dimensional problems, and design problems associated with computational experiments.

Stat 615. Mixed Models: Theory, Methods and Applications. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Stat 601 and Stat 611. The linear mixed effects (LME) model, the generalized linear mixed effects model (GLMM), quantile estimation, generalized estimating equations, nonlinear mixed effects (NLM) model, application in longitudinal data analysis, growth curve analysis and small area estimation, method of model diagnostics and influential analysis. The knowledge of general statistical inference is assumed.

Supplementary Study

The Department of Logistics, Operations, and Management Information Systems participates in three graduate degree programs: the M.S. in Business, the M.B.A. full-time and part-time programs and the Ph.D. program in Business and Technology. The M.S. degree in Business is a 30-credit curriculum culminating in a thesis. The M.B.A. program is a 48-credit, nonthesis, noncreditive component curriculum. Twenty-four of the 48 credits are core courses and the remaining 24 are graduate electives. The Ph.D. program is a 56-credit curriculum that culminates in a dissertation. The department also participates in the interdepartmental transportation major.

Students can obtain a Specialization in Supply Chain Management in the MBA program by taking 12 credits of graduate courses from a selected set of courses.

Students can also obtain a Ph.D. in Business and Technology with Supply Chain Management as the major area of specialization. They need to take 9 credits of the Ph.D. core curriculum 12 credits of doctoral seminars in the area of specialization, 9 credits in a minor area of the student's choice, and 12 credits from a recommended list of research methods courses.

Supply chain management is a program of study concerned with the efficient and timely flow of materials, products, and information within and among organizations. It involves the integration of business processes across organizations, from material sources and suppliers through manufacturing and processing to the final customer. Supply chain management encompasses a wide variety of activities that have a significant influence on customer service, including the planning, control, and implementation of the processes used to transform inputs into finished goods and services, transportation, warehousing, facility location, product returns, and support and service support, and product returns.

The study of Supply Chain Management prepares students for professional careers with manufacturers, distributors, logistics service providers, transportation carriers, and consulting firms. The curriculum provides the required theoretical/conceptual base and analytical methods for making sound operational and strategic supply chain management decisions.

Courses primarily for graduate students, open to qualified undergraduate students

SCM 502. Supply Chain Management (3-0) Cr. 2. Prereq: Graduate classification. Introduction to the fields of operations and logistics. The managerial issues and challenges of developing and implementing a firm's supply chain strategy. Inbound and outbound logistics, inventory, warehousing, manufacturing, materials handling, transportation and sourcing.

SCM 502. Supply Chain Management (3-0) Cr. 2. Prereq: Graduate classification. Introduction to the fields of operations and logistics. The managerial issues and challenges of developing and implementing a firm's supply chain strategy. Inbound and outbound logistics, inventory, warehousing, manufacturing, materials handling, transportation and sourcing.
SCM 602. Seminar in Supply Chain Strategy. (3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment. Review of research literature on supply chain strategy, including the impact of technology, global economic and social factors, and intra- and inter-organizational integration on supply chain strategy formation. The role of SCM in overall corporate strategy and the impact of SCM on firm performance will also be addressed.

SCM 603. Seminar in Purchasing. (3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment. Review of classic purchasing theories. Discussion of contemporary supply management strategy; the role of supply management and its relationship with other functional areas; its impact on logistics and transportation issues; management of supply uncertainties.

SCM 604. Seminar in Logistics Management. (3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment. Integration of network, economic, and systems theory in the design, management, and control of logistics systems in the context of integrated supply chain management. Functional areas addressed include transportation, inventory order fulfillment, distribution, and warehousing. Facility location analysis will also be covered.

SCM 605. Seminar in Operations Management. (3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment. Review of the research literature on methods of organizing, planning, controlling, and improving manufacturing systems to achieve the desired performance objectives related to cost, quality, speed, and flexibility. The relationship between the performance of the manufacturing system and the performance of the supply chain system will also be discussed.

SCM 650. Research Practicum I. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

SCM 651. Research Practicum II. (1-0) Cr. 1. Prereq: enrollment in the PhD program. Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Sustainable Agriculture (Interdepartmental Graduate Major)

www.sust.ag.iastate.edu/gpsa/

Program Leadership: M. Duffy, Chair and Director of Graduate Education.

The graduate program in sustainable agriculture is an interdepartmental major offered through faculty in sixteen participating departments: Agricultural and Biosystems Engineering; Agricultural Education and Studies; Animal Science; Community and Regional Planning; Ecology; Evolution and Organismal Biology; Economics; Entomology; Food Science and Human Nutrition; Horticulture; Landscape Architecture; Natural Resource Ecology and Management; Philosophy and Religious Studies; Plant Pathology; Political Science; and Sociology. Both M.S. and Ph.D. degrees are offered within the major.

Master’s students must have a bachelor’s degree in one of the life, social, or engineering sciences, or a bachelor’s degree plus equivalent experience in these areas. Doctoral students must have a master’s degree and either an undergraduate or master’s degree majors in the College of Agriculture and Life Sciences or its equivalent. Graduates of the program will be able to design and manage agricultural systems that increase food security, enhance human communities, and protect environmental quality. To acquire the necessary advanced agricultural and physiological principles, students will develop agronomic and biological skills through understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

SusAg 584. Organic Agricultural Theory and Practice. (Cross-listed with Agron, Hort). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 9 cr. in biological or physical sciences. Delate & DeLeuze. Development of an understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

SusAg 590. Special Topics. Cr. 3. Repeatable. F.S.SS. Prereq: Graduate classification, permission of instructor. For students wishing to conduct in-depth study of a particular topic in sustainable agriculture.

SusAg 599. Creative Component. Cr. 3. SS. Pre-enrollment contract required. For MS students pursuing the non-thesis degree option. Final product is a creative component.

SusAg 600. Sustainable Agriculture Colloquium. (1-0) Cr. 1. Repeatable. F.S.SS. Weekly seminar for graduate students in the Sustainable Agriculture program.

SusAg 610. Foundations of Sustainable Agriculture. (Cross-listed with Agron, A. E., Anthr, Soc). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Historical, biophysical, socioeconomic, and ethical dimensions of agroforestry sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

Systems Engineering

(Interdepartmental Graduate Major)

Supervisory Committee: D. Gemmill (Chair), D. Jacobson, and A. Mann

Work is offered for the master of engineering with a major in systems engineering. The graduate major in Systems Engineering is primarily an off-campus program. It is an interdisciplinary program that allows students to take courses across a variety of departments. Graduates of the program will possess the analytical abilities needed to design, evaluate, and build complex systems involving many components and demanding specifications. They will have the ability to work across disciplinary boundaries, as the practice of modern engineering often requires. Graduates will have developed management capabilities and extended their disciplinary knowledge.

The program is broadly based and uses courses in the various departments of the College of Engineering and courses in other departments of the university. The 30 credits necessary for graduation includes 27 semester credits of formal coursework and 3 credits for a creative component. Completion of the program requires two courses in systems engineering, two courses in the major discipline of the student, three engineering courses with a systems engineering emphasis, two courses from another college, and a creative component. Courses are delivered to off-campus students both with the instructor present and through various distance education systems, including video-streaming, podcasting, ftp downloading and CD-ROMs.

The program of study committee, in consultation with the student, determines the courses to be taken and the acceptability of transfer credits. The major professor should be selected from the discipline where a concentration of coursework will be taken.

Admission to the program requires a baccalaureate degree in engineering and admission to the graduate college. Students with degrees in other areas will be considered on an individual basis.
Teacher Education

David Whaley, Associate Dean, Teacher Education

Teacher Education Faculty: Geoff Abelison (C I), Linda Quinn Allen (WLC), Thomas Andre (C I), Alex Andreotti (C I), Janice Baker (KIN), EunJin Bang (C I), Leslie Bloom (C I), J. Jackie Blythe (C I), Warren Blumenfield (C I), Mary Jane Brotherton (HD FS), Katherine Richardson Bruna (C I), Patricia Carlson (C I), Mike Clough (C I), James Colbert (BIO), Karen Colbert (HD FS), Ana Correia (C I), Sashidi Crase (HD FS), Corey Drake (C I), Diane Draper (HD FS), Rich Engelhorn (KIN), Levon Esters (AgEds), Anne Foegen (C I), Michael Golermo (Music), Thomas Greenbowe (Chem), Connie Hargrave (C I), Cheryl Hausfalus (AESHM), Sue Hegland (HD FS), Beth Herbel-Eisenmann (C I), Kere Hughes (HD FS), Leah Keino (AESHM), Mimi Lee (C I), Patricia Leigh (C I), John Lewis (Eng), Gayle Lude (HD FS), Robert Martin (AgEds), James McShay (C I), Donna Merkely (C I), Greg Miller (AgEds), Wade Miller (AgEds), Koudier Mokhtari (C I), Susan Maude (HD FS), Sylvia Munsen (Music), Donna Niday (Eng), Dale Niederhauer (C I), Lori Norton-Meier (C I), Joanne Olson (C I), Carla Peterson (HD FS), Gary Phye (C I), Mark Rectanus (WLC), Michael Retallick (Music), James Rodde (Music), Connie Ringlee (Eng), Marcia Rosenbusch (C I), Elizabeth Schabel (Eng), Frank Schabel (KIN), Kevin Schilling (Music), Denise Schmidt (C I), Jennifer Seymour (C I), Carl Smith (C I), Katherine Thomas (KIN), Ann Thompson (C I), Margaret Torrie (HD FS), Robert Tremmel (Eng), Michael Tremmel (Eng), Roberta Vann (Eng), Kerry Whisnant (Phys), Kenneth Windom (Geo)

The mission of University Teacher Education is to develop educators who are caring, competent, and certified. Students who successfully complete the requirements for any of the endorsement areas offered at ISU must demonstrate the skills and knowledge required of beginning teachers. (See Iowa Teaching Standards and Criteria section.)

University Teacher Education is a shared responsibility that spans three colleges. For most licensure areas, students major in a content area while taking additional education courses. All students who are recommended by Iowa State University for teacher licensure must meet the requirements of University Teacher Education and be recommended by their department, college, and the ISU recommending official.

Undergraduate Teacher Licensure Areas

An undergraduate student seeking a bachelor’s degree must be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and college. Currently, there are sixteen undergraduate teacher licensure areas offered at Iowa State University. These areas and their corresponding grade levels are listed below:

- Early Childhood Education (birth-grade 3)
- Elementary Education (grades K-6)
- Agricultural Education (grades 5-12)
- Biology (grades 5-12)
- Chemistry (grades 5-12)
- Earth Science (grades 5-12)
- English (grades 5-12)
- Family and Consumer Sciences (grades 5-12)
- Health Education (grades 5-12)
- History-Social Sciences (grades 5-12)
- Mathematics (grades 5-12)
- Music (grades K-12)

Physical Education (grades K-12)
- Physical Science (grades 5-12)
- World Languages and Cultures (French, German, Latin, Russian, and Spanish) (grades 5-12)

Additional Endorsements

Students must fulfill the requirements for one of the licensure areas listed above to add any of the following endorsements:
- Art (K-8)
- Basic Science (K-8)
- Coaching Interscholastic Athletics (grades K-12)
- English and Language Arts (K-8)
- English as a Second Language (grades K-12)
- General Science (grades 5-12)
- Health (K-8)
- History (K-8)
- Instructional Strategist I: Mild/Moderate Disabilities (grades K-8 or 5-12)
- Instructional Strategist II: Behavior Disorders/ Learning Disabilities (K-12)
- Mathematics (K-8)
- Middle School (5-8)
- Reading (grades K-8 or 5-12)
- Social Sciences (K-8)
- Speech Communication (grades 5-12)
- World Languages and Cultures (French, German, Latin, Russian, and Spanish) (grades K-8)

Post-Bachelor’s Teacher Licensure Areas

Students already holding an appropriate bachelor’s degree may pursue teacher licensure in any of the undergraduate licensure areas listed above. Interested students should consult with the coordinator of the area in which they plan to specialize so that an individualized program of study can be developed.

Graduate Teacher Licensure Areas

Currently, there are five graduate initial teacher licensure programs. These programs are designed for students who do not currently hold a teaching license. The programs are listed below:

- Agricultural Education (M.S.)
- Family and Consumer Sciences Education (M.Ed. or M.S.)
- Mathematics Education (M.Ed.)
- Physical Education (M.S.)
- Secondary Science Education (M.A.T.)

Iowa State University also offers Master’s programs for practicing teachers. The Mathematics Department offers a Masters in School Mathematics. (See Mathematics in Courses and Programs section of this catalog.)

The Curriculum and Instruction Department offers a Master’s degree program and a certificate program that lead to a special education endorsement. (See Curriculum and Instruction in Courses and Programs section of this catalog.)

Graduate programs are also available for those who seek licensure in Educational Administration as PK-12 school principals or PK-12 superintendents. (See Educational Administration in Courses and Programs section of this catalog.)

Standards

University Teacher Education has a rigorous standards-based curriculum. Two sets of standards are used throughout the program, one that is targeted for pre-service teachers (Standards for University Teacher Education Programs/Candidates which originate from the Iowa Administrative Code, Chapter 79, Standards for Practitioner Preparation Programs) and the other set that is targeted for in-service teachers (the Iowa Teaching Standards and Model Criteria adopted by the State Board of Education). Both are listed below in full.

Standards for University Teacher Education Programs/Candidates

a. Content/subject matter specialization. The candidate demonstrates an understanding of the central concepts, tools of inquiry, and structure of the discipline(s) the candidate teaches, and creates learning experiences that make these aspects of the subject matter meaningful for students. This is evidenced by a completion of a 30-semester hour teaching major which must minimally include the requirements for at least one of the basic endorsement areas, special education teaching endorsements, or secondary level occupational endorsements. Each elementary candidate must also complete a field of specialization in a single discipline or a formal interdisciplinary program of at least twelve semester hours.

b. Student learning. The candidate demonstrates an understanding of human growth and development and of how students learn, and receives learning opportunities that support intellectual, career, social and personal development.

c. Diverse learners. The candidate demonstrates an understanding of how students differ in their approaches to learning and creates instructional opportunities that are equitable and adaptable to diverse learners.

d. Instructional planning. The candidate plans instruction based upon knowledge of subject matter, students, the community, curriculum goals, and state curriculum models.

e. Instructional strategies. The candidate demonstrates an understanding and use of a variety of instructional strategies to encourage student development of critical and creative thinking, problem-solving, and performance skills.

f. Learning environment/classroom management. The candidate uses an understanding of individual and group motivation and behavior; creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation; maintains effective classroom management; and is prepared to address behaviors related to substance abuse and other high-risk behaviors.

g. Communication. The candidate uses knowledge of effective verbal, nonverbal, and media communication techniques, and other forms of symbolic representation, to foster active inquiry, collaboration, and support interaction in the classroom.

h. Assessment. The candidate understands and uses formal and informal assessment strategies to evaluate the continuous intellectual, social, and physical development of the student, and effectively uses both formative and summative assessment of students, including student achievement data, to determine appropriate instruction.

i. Foundations, reflective practice and professional development. The candidate develops knowledge of the social, historical, and philosophical foundations of education. The candidate continually evaluates the effects of the candidate’s choices and actions on students, parents, and other professionals in the learning community; actively seeks out opportunities to grow professionally; and demonstrates an understanding of teachers as consumers of research and as researchers in the classroom.

j. Collaboration, ethics and relationships. The candidate fosters relationships with parents, school colleagues, and organizations in the larger community to support students learning and development; demonstrates an understanding of
Iowa Teaching Standards and Criteria

Standard 1: Demonstrates ability to enhance academic performance and support for implementation of the school district student achievement goals.

The teacher:

a. Aligns classroom instruction with local standards and district curriculum.

b. Uses research-based instructional strategies that address the full range of cognitive levels.

c. Demonstrates flexibility and responsiveness in adjusting instruction to meet student needs.

d. Engages students in varied experiences that meet diverse needs and promote social, emotional, and academic growth.

e. Connects students’ prior knowledge, life experiences, and interests in the instructional process.

f. Uses available resources, including technologies, in the delivery of instruction.

Standard 5: Uses a variety of methods to monitor student learning.

The teacher:

a. Aligns classroom assessment with instruction.

b. Communicates assessment criteria and standards to all students and parents.

c. Understands and uses the results of multiple assessments to guide planning and instruction.

d. Guides students in goal setting and assessing their own learning.

e. Provides substantive, timely, and constructive feedback to students and parents.

f. Works with other staff and building and district leadership in analysis of student progress.

Standard 6: Demonstrates competence in classroom management.

The teacher:

a. Creates a learning community that encourages positive social interaction, active engagement, and self-regulation for every student.

b. Establishes, communicates, models, and maintains standards of responsible student behavior.

c. Develops and implements classroom procedures and routines that support high expectations for student learning.

d. Uses instructional time effectively to maximize student achievement.

e. Creates a safe and purposeful learning environment.

Standard 7: Engages in professional growth.

The teacher:

a. Demonstrates habits and skills of continuous inquiry and learning.

b. Works collaboratively to improve professional practice and student learning.

c. Applies research, knowledge, and skills from professional development opportunities to improve practice.

d. Establishes and implements professional development plans based upon the teacher’s needs aligned to the Iowa Teaching Standards and district/building student achievement goals.

Standard 8: Fulfills professional responsibilities established by the school district.

The teacher:

a. Adheres to board policies, district procedures, and contractual obligations.

b. Demonstrates professional and ethical conduct as defined by state law and individual district policy.

c. Contributes to efforts to achieve district and building goals.

d. Demonstrates an understanding of and respect for all learners and staff.
teaching, unless the student's licensure area has an approved content-area course deemed to be equivalent (see specific Licensure Area Requirements section below for details.)

Early Childhood Education and Elementary Education:

Cr.
3 CI 201-Digital Learning in the PK-8 Classroom
3 CI 204-Social Foundations of American Education
2 CI 245—Strategies in Teaching
1 CI 288—Strategies Practicum
3 CI 332 - Educational Psychology of Young Learners
3 CI 406-Multicultural Foundations of Schools and Society: Introduction
3 Sp Ed 250—Education of the Exceptional Learner in a Diverse Society
16 Student teaching (16 weeks)

Secondary Education and K-12:

Cr.
3 CI 202: Digital Learning in the 7-12 Classroom
3 CI 204—Social Foundations of American Education
3 CI 332—Educational Psychology
3 CI 406-Multicultural Foundations of Schools and Society: Introduction
3 Sp Ed 450—Teaching Secondary Students with Exceptionalities in General Education Classrooms
14-16 Student teaching (minimum 14 weeks)

Secondary and K-12 students in the K-12 licensure areas and secondary education (grades 5-12) licensure areas must also complete the course listed below unless the student's licensure area has an approved equivalent. Areas with approved equivalents include: Agricultural Education, Physical Education and all Secondary Sciences. (See licensure area coordinator for more information).

Cr.
3 CI 426—Principles of Secondary Education
3 Sp Ed 501—Teaching Students with Exceptionalities in General Education
3 CI 506—Using Technology in Learning and Teaching
3 HPC 504—Studies in the Foundations of American Education
3 CI 506—Multicultural Foundations of School and Society: Advanced
3 CI 526—Principles of Secondary Education
3 CI 529—Educational Psychology in the Secondary Classroom
14-16 Student teaching (minimum 14 weeks)

Admission to University Teacher Education (Checkpoint 1)
The University Teacher Education Office monitors the progress of teacher education students. Admission to University Teacher Education is the first of three checkpoints. At this time, the requirements listed below will be checked. Students will not be able to progress to Student Teaching (Checkpoint 2) and Licensure (Checkpoint 3) without full admission to University Teacher Education (Checkpoint 1). Departments may have higher eligibility requirements for each checkpoint (see licensure area coordinator for more information).

Students transferring from other institutions with a minimum of 2.50 GPA or above may be admitted tentatively; full admission may be granted upon completion of nine semester credits averaging 2.50 or above at Iowa State University. Students who receive tentative admission are required to reapply the following semester by using the application for admission. A minimum of 20 semester credits averaging 2.50 or above must be earned at Iowa State University to receive institution licensure approval (nine of the required 20 semester hours must precede student teaching).

A student seeking admission to University Teacher Education must be accepted by a selection committee for the specific licensure area in which the student seeks to enter. Factors considered in evaluating applications (in addition to the requirements listed below) may include professional dispositions, scholarship, interest in teaching, character, interpersonal skills, and physical and mental health.

Recommendations by selection committees must be confirmed by the University Teacher Education Coordinating Council before admission is granted. Students may apply as early as four semesters before the one in which they plan to enroll for student teaching; however, they must be fully admitted into University Teacher Education at least one year prior to the semester they complete the Request for Student Teaching Placement. Students in accelerated graduate programs must be fully admitted by mid-semester prior to their planned student teaching semester.

Requirements for full admission to University Teacher Education as an undergraduate:
1. A minimum 2.5 cumulative grade point average.
2. Successful completion of one of the following basic skills tests:
   A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics.) Some licensure areas may have higher Praxis I scores.
   Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu
3. Documented completion of ISU approved 10 hours of pre-student teaching field experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. A report from a criminal background check initiated by ISU’s recommending official.

Requirements for full admission to University Teacher Education as a Master’s student:
1. Full admission to an appropriate Master’s degree program.
2. Minimum GRE scores (400 on each of the Verbal and Quantitative sections)
3. Documented completion of ISU approved 10 hours of pre-student teaching field experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. A report from a criminal background check initiated by ISU’s recommending official.

Requirements for full admission to University Teacher Education as a post-bachelor’s student:
1. A bachelor’s degree from a regionally accredited institution and a minimum 2.5 cumulative grade point average from that institution.
2. Successful completion of one of the following basic skills test:
   —Minimum GRE scores (400 on each of the Verbal and Quantitative sections.)
   OR
   —A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics.) Some licensure areas may require higher Praxis I scores.

Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu

3. Documented completion of ISU approved 10 hours of pre-student teaching field experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. A report from a criminal background check initiated by ISU’s recommending official.

Requirements for full admission to University Teacher Education as a post-bachelor’s student:
1. A bachelor’s degree from a regionally accredited institution and a minimum 2.5 cumulative grade point average from that institution.
2. Successful completion of one of the following basic skills test:
   —Minimum GRE scores (400 on each of the Verbal and Quantitative sections.)
   OR
   —A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics.) Some licensure areas may require higher Praxis I scores.

Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu

Documented completion of ISU approved 10 hours of pre-student teaching field experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. A report from a criminal background check initiated by ISU’s recommending official.

Students who do not meet the requirements for admission to University Teacher Education may choose to appeal to the University Teacher Education Coordinating Council. The description of the appeals process is available online: www.teacher.hs.iastate.edu

Maintaining Program Eligibility

Standards Assessments: In order to be recommended for licensure, all students must have demonstrated satisfactory performance across the teacher education competencies, as defined by their specific area. (See the teacher licensure area coordinator for more information.) Students’ progress is monitored throughout the program. Standards are assessed multiple times. More information is available online: www.teacher.hs.iastate.edu

GPA: All students admitted to the University Teacher Education Program must maintain a minimum of a 2.5 cumulative grade point average through completion of their licensure requirements.
Grades: For teacher education students, all Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C. Courses in the department and major specifically required for teacher licensure have a minimum grade requirement of a C-. Note: Individual departments preparing teachers may have higher eligibility requirements (see teacher licensure area coordinator for more information).

Student Teaching (Checkpoint 2)

Student teaching is the culminating experience. To ensure that students are prepared for this experience, the following requirements must be met prior to submitting your “Request for Student Teaching Placement” form:

1. Full admission to University Teacher Education is required a minimum of 1 year before the start of the student teaching semester. Students in accelerated graduate programs must be fully admitted by mid-semester prior to the student teaching semester.

2. Completion of the “Request for Student Teaching Placement” by the deadline in the fall semester for spring student teaching and by the deadline in the spring semester for fall student teaching. Details regarding this application are available in the University Teacher Education Office.

3. A minimum 2.5 cumulative grade point average.

4. A passing grade as determined by the licensure area must have been earned in all required professional teacher education requirement courses and selected courses in the student’s licensure area. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).

Teacher Licensure (Checkpoint 3)

The Iowa Board of Educational Examiners issues teaching licenses that are valid for specific ages or grades (e.g., Birth-3 for early childhood teachers, K-6 for elementary teachers and 5-12 for secondary teachers). Endorsements on a teaching license indicate which subject areas a teacher is qualified to teach. Completion of student teaching and required coursework does NOT guarantee recommendation for a teaching license. The Iowa License may be recommended for students who hold a bachelor’s degree from Iowa State University or another regionally accredited institution and who have completed the following:

1. All requirements of an approved licensure area, including the general education requirement and professional teacher education requirement listed above. Note: Specific courses to be used for licensure may not be taken pass/not pass.

2. Additional requirements as designated by the State of Iowa that include, but are not limited to, a special education component and 50 hours of pre-student teaching field experience, 40 of which are to be taken after admission to the University Teacher Education Program.

3. A minimum ISU cumulative grade point average of 2.50 or higher through graduation (or completion of the University Teacher Education Program). (Some licensure areas may require a higher cumulative grade point average.)

4. A minimum grade of C (not C-) must be earned in student teaching to be recommended for licensure.

5. Documentation from the student teaching supervisor that the student has successfully completed the final assessment documenting the student’s mastery of the skills and knowledge included in the Iowa Teaching Standards.

Undergraduate and Post-Bachelor’s (non-Master’s) Teacher Licensure Area Requirements

Certain competencies are required of those who plan to teach at the early childhood, elementary or secondary level. Those preparing to teach at the secondary level must develop a depth of understanding in one or more subject matter areas. For full-time teaching in secondary schools a major in an endorsement area or an approved subject matter concentration of at least 30 semester hours is required. Students interested in adding an additional endorsement area should consult with the coordinator or adviser of the additional area (see the following website for the contact information for the adviser or coordinator that works with students on teacher licensure: www.teacher.hs.iastate.edu). Persons interested in teaching in one of the following endorsement areas should also consult with the appropriate adviser or coordinator. Specific requirements for each teacher licensure area are described below (these requirements are in addition to the General Education Requirements and the Professional Teacher Education Requirements that were listed earlier).

Agricultural Education

The Department of Agricultural Education and Studies is responsible for preparing Agricultural Education teachers for grades 5-12.

For specific content area requirements see Curriculum in Agricultural Education and Studies (Teacher Certification Option).

Professional required courses are: AgEdS 110A, 211A, 310, 401, 402, 416, 417 (14 Cr.)

Required content courses are: AgEdS 488; Agron 114 and 154; An S 101 and 114; Hort 221; Econ 101, 331; NREM 120; 6 credits in agriculture and life sciences; 6 credits in courses 300-level or above to be chosen from technology systems management, animal science, agronomy, agricultural economics, forestry, or horticulture.

Earth Sciences

The Department of Geological and Atmospheric Sciences and the Department of Curriculum and Instruction share the responsibility for preparing students to work with children from birth to age 8 (PK-3 including special education).

For specific course requirements, see College of Human Sciences, Curriculum in Earth Childhood Education.

Earth Science teachers for grades 5-12

Required professional courses are: C I 280M, 347, 419, 468J, 468K, C I 417J.

Required content courses are: Geol 100, 100L, 102, 102L, 302, 311, 356, 365, 368 and a three credit geology elective; Mteor 206; Astro 120, 150; Chem 177, 177L, 178, 211, 211L, 331L, 331L, 332L, 332L or Chem 163, 163L, 164, 164L, 211, 211L, 231L.

Students with no natural science endorsement who seek approval to teach chemistry as an additional subject area must earn credits in the following courses (15 minimum credits):

Chem 316, 316L, 324, 325, 322L or BBMB 301, 311, 451.

Elementary Education

The Department of Curriculum and Instruction and the Department of Human Development and Family Studies in the College of Human Sciences share the responsibility for preparing teachers for grades K-8.

For specific course requirements, see College of Human Sciences, Curriculum in Elementary Education.

Chemistry

The Department of Chemistry and the Department of Curriculum and Instruction share the responsibility of preparing Chemistry teachers for grades 5-12.

Required professional courses are C I 280M, C I 347, C I 418, C I 419, C I 468J, C I 468K, and C I 417B.

Teacher Education
Required content courses are: see Curriculum, English.

Students seeking to add English as an additional endorsement area must earn 46 credits in the following courses:
3 Rhetoric: Engl 310
3 Language: Engl 220

18 Literature: Engl 260; Engl 225; Engl 226; Engl 227; Engl 228; Engl 340’s OR Engl 353 OR Engl 354

19 English Education: CI 395; Engl 396; Engl 397 and CI 290a; Engl 494 and CI 290a; SpEd 450

Students must earn grades of C or better in all of the above courses.

Family and Consumer Sciences

The Family and Consumer Sciences Program in the Department of Apparel, Educational Studies and Hospitality Management prepares Family and Consumer Sciences teachers for grades 5-12.

For specific content area course requirements, see Curriculum, Family and Consumer Sciences Education and Studies.

Required professional courses are: FCEdS 206, 306, 318, 403, 413, 417A, and 417B.

Students seeking approval for health education as an additional endorsement area must earn credits in the following courses: FS HN 167; HS 110, 215, 305, 350, 375, 390; Biol 255, 255L.

Students seeking approval for health education as an additional endorsement area must earn 46 credits in the following courses: FS HN 167; HS 110, 215, 305, 350, 375, 390; Biol 255, 255L.

History-Social Sciences

The Curriculum and Instruction Department and the History Department share the responsibility for preparing History-Social Sciences teachers for grades 5-12.

Contact the History Department for specific information.

History-Social Sciences Education students must earn grades of C or better in all content and pedagogical coursework required for teacher licensure.

Mathematics

The Mathematics Department and the Curriculum and Instruction Department share responsibility for the preparation of Mathematics teachers for grades 5-12.

For specific content area course requirements, contact Curriculum and Instruction Advising Office. Required professional courses are: CI 219, 280L, 280A, 480C, 497, 417C.

Required content courses are: Math 165, 166, 201, 265, 286 or 267, 301, 317, 341, 397, 435, 436, Com S 107 or 207 or 227, and Stat 101.

Students wishing to add mathematics as an additional endorsement area or as a non-mathematical major with a major in one of the mathematical sciences, physical sciences, or engineering seeking a license to teach mathematics must take the following:
Math 165, 166, 201, 301, 317, 341, 397 435, 436, Com S 107 or 207 or 227, Stat 101 and CI 480C, and 497.

Music

The Music Department prepares Music teachers for grades K-12.

For specific content area course requirements, see Curriculum, in Music.

Required professional courses are: Music 248, 266, 366, 367 or 400A, 464 or 465, 466; Music/C I 475K and 471L; Music/C I 480K.

Required content courses are: see Curriculum, in Music.

Physical Education

The Kinesiology Department prepares Physical Education teachers for grades K-12.

Kinesiology and Health (instead of Health and Human Performance)

Required professional courses are: KIN 280, 281, 312, 355, 358 or 365 or 396, 372, 375, 395, 417, 418, 470, 475.

Required content courses are: see Curriculum, Kinesiology and Health

Physics

The Physics and Astronomy Department and the Curriculum and Instruction Department share the responsibility for preparing Physics teachers for grades K-12.

For specific content area course requirements, see Curriculum, Physics.

Required professional courses are: CI 280M, 347, 418, 419, 468J, 468K, 417B.

Required content courses are: Phys 221, 222, 311T, 399, 321. Select 12 credits from the following:

Students with an endorsement in a natural science who seek approval to teach physics as an additional endorsement area must complete one of the following sets of courses:
Phys 221, 222, 311T, 321, 321L, 399 (2 cr.), OR Phys 111, 112, 302, 311T, 399 (2 cr.)

Students with no other natural science endorsement who seek approval to teach physics as an additional endorsement area must complete one of the two sets of courses listed above plus sufficient additional credits from the following list of courses to total 24 credits:
Phys 221, 222, 302, 304, 306, 310, 321, 321L, 322, 322L; Astro 342, 344L, 346; Chem 321, 324, 325; E E 441; E M 274, 345, 378; M E 330, 332.

Students seeking approval to teach a world language as their first endorsement must have a major in the target language. For an additional endorsement in a world language, students must earn 25 credits in that language. Nine (9) credits must be at the 300 level or above with six (6) of these credits in composition and conversation. Courses at the 100 level are not counted in the 25 required credits. For an endorsement in Latin, 10 of the 25 credits must be at the 300 or 400 level and must include Hist 430 (CI St 403). All students seeking to teach a world language must demonstrate their proficiency in the language by taking the ACTFL OPI (Oral Proficiency Interview). Students are responsible for the cost of the administration of the OPI and must request that their scores from the OPI be added to their transcript.

World Languages and Cultures

The Department of World Languages and Cultures prepares World Language teachers for grades 5-12.

World Language teachers can earn an endorsement in French, German, Latin, Russian or Spanish.

For specific content area course requirements, see Curriculum, World Languages and Cultures.

Required professional courses are: C I 280L, WLC/C 1480, WLC 417 and WLC 487.

Students seeking approval to teach a world language as their first endorsement must have a major in the target language. For an additional endorsement in a world language, students must earn 25 credits in that language. Nine (9) credits must be at the 300 level or above with six (6) of these credits in composition and conversation. Courses at the 100 level are not counted in the 25 required credits. For an endorsement in Latin, 10 of the 25 credits must be at the 300 or 400 level and must include Hist 430 (CI St 403). All students seeking to teach a world language must demonstrate their proficiency in the language by taking the ACTFL OPI (Oral Proficiency Interview). Students are responsible for the cost of the administration of the OPI and must request that their scores from the OPI be added to their transcript.

Requirements for Additional Endorsements

Students may elect to add additional endorsements to their teaching license by completing the necessary requirements. All “Undergraduate Teacher Licensure Areas” listed above can be pursued as an additional endorsement. Below are the additional endorsements only options that require students to pursue one of the undergraduate, post-bachelor’s or graduate teacher licensure areas listed above. Detailed requirements for any endorsement may be obtained from the University Teacher Education Office.

Art (grades K-8)

Students seeking an additional endorsement in Art (K-8) should see an adviser in the Department of Curriculum and Instruction.

Basic Science (grades K-8)

Students seeking an additional endorsement in Basic Science (K-8) should see an adviser in the Department of Curriculum and Instruction.

Coaching Interscholastic Athletics (grades K-12)

The Department of Kinesiology offers courses that can lead to a K-12 athletic coach endorsement.

Students seeking approval for the Iowa State University endorsement to coach interscholastic athletics must satisfy the requirements of an endorsement area listed above and earn credits in the following:
biology; one additional course numbered 300 and above in astronomy and astrophysics, chemistry, meteorology, physics, or geology.

Students with an endorsement in a natural science who seek approval to teach physical science as an additional area must earn credits in the courses listed below. Students with no other science endorsement, but who seek an additional endorsement in this area, must take the listed courses plus additional credits in the area to total at least 24. See coordinator for approval prior to taking additional courses.

Astro 120 or 150 or 342 or 346
Chem 163, 163L
Geol 100, 100L
Mteor 206
Phys 111, 112; or 221, 222
Biol 155, Psych 230, KIN 220, and KIN 315

English and Language Arts (grades K-8)

Students seeking an additional endorsement in English and Language Arts (K-8) should see an adviser in the Department of Curriculum and Instruction.

English as a Second Language (grades K-12)
The Department of English offers courses that can lead to a K-12 ESL Teacher endorsement. To add a K-12 teaching endorsement in English as a Second Language, students must fulfill the requirements of an endorsement area listed above and earn credits in the following courses. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites.

EngLing 219 or EngLing 511
EngLing 220
EngLing 425 or EngLing 517
EngLing 514 or C I 420/520
EngLing 518 or EngLing 524 and EngLing 525
EngLing 588

General Science (grades 5-12)

General Science is an interdisciplinary additional area of endorsement for grades 5-12

Students seeking approval to teach general science must earn credits in the following courses:

Biol 211, 211L, 212, 212L
Chem 177, 177L, 178, 178L, 231, 231L
Geol 100, 100L
Phys 111, 112; or 221, 222
Math 151 or 160 or 165 or 181

At least 6 credits from courses numbered 300 or above in astronomy and astrophysics, biochemistry and biophysics, biology, botany, chemistry, genetics, geology, meteorology, microbiology, or physics.

Health (grades K-8)

Students seeking an additional endorsement in Health (K-8) should see an adviser in the Department of Curriculum and Instruction.

History (grades K-8)

Students seeking an additional endorsement in History (K-8) should see an adviser in the Department of Curriculum and Instruction.

Mathematics (grades K-8)

Students seeking an additional endorsement in mathematics (K-8) should see an adviser in the Department of Curriculum and Instruction.

Middle School (grades 5-8)

Students seeking an additional endorsement in Middle School (5-8) should see an adviser in the Department of Curriculum and Instruction.

Reading (grades K-8, 5-12)
The Curriculum and Instruction Department offers courses that can lead to a reading endorsement for grades K-8. This department collaborates with the English Department to offer the necessary coursework for a 5-12 reading endorsement.

Students seeking an additional endorsement to teach elementary reading (K-8) should see a Department of Curriculum and Instruction adviser. Students seeking endorsement to teach reading (5-12) as an additional endorsement must earn credits in the following courses:

Foundations of Reading and Reading in the Content Area: C I 395/595 or CI 551 and C I(Eng) 494.

Practicum: C I 488/588

Language Development: EngL 219 or 511

Reading Assessment and Oral Communication: C I 452/552

Written Communication: C I 395/595 and Engl 397

Adolescent Nonfiction and Fiction: Engl 396 or C I 554

Reading Instructional Strategies: C I 456/556 or 553

Social Sciences (grades K-8)

Students seeking an additional endorsement in Social Sciences (K-8) should see an adviser in the Department of Curriculum and Instruction

Special Education (grades K-8, 5-12, K-12)
The Department of Curriculum and Instruction offers courses that can lead to special education endorsements (Instructional Strategist I: Mild/Moderate Disabilities (grades K-8 and grades 5-12) and Instructional Strategist II: Behavior Disorders/Learning Disabilities (K-12)). Students seeking 5-12 special education endorsement must have a current teaching license.

Students seeking an additional K-8 endorsement to teach special education should see an adviser in the Department of Curriculum and Instruction.

Speech Communication (grades 5-12)
The Department of Speech Communication offers courses that can lead to 5-12 speech/theatre endorsement.

Students seeking endorsement to teach speech as an additional area must earn credits in the following courses:

Sp Cm 110 or ComSt 102, Sp Cm 212, 313, 322, 412, 495A, 495B;
Thtr 255 or 360 or 455; Thtr 388; JI MC 101.

World Languages and Cultures (French, German, Latin, Russian, and Spanish) (grades K-8)

Students seeking an additional endorsement World Languages and Cultures (K-8) should see an adviser in the Department of Curriculum and Instruction.

Master’s Programs that Lead to Initial Teacher Licensure

Agricultural Education

The Agricultural Education and Studies Department offers Master’s of Science program that prepares Agricultural Education teachers for grades 5-12.

See coordinator for program requirements.

Mathematics

The Curriculum and Instruction Department offers a Master’s of Education program that prepares Mathematics teachers for grades 5-12.

See coordinator for program requirements.

Physical Education

The Department of Kinesiology offers a Master’s of Science program that prepares Physical Education teachers for grades K-12.

See coordinator for program requirements.

Secondary Sciences

The Department of Curriculum and Instruction offers a Master’s of Arts in Teaching program that prepares Secondary Science teachers for grades 5-12.

See coordinator for program requirements.

Technology and Social Change

Advisory Committee: Eric Abbott, coordinator; Robert Mazur, graduate coordinator.

Undergraduate Study

Technology and social change is a cross-disciplinary program examining the relationships between technologies and the social and cultural environments. The program has a national and international perspective, with courses addressing the interrelationships, policies, and impacts created by the international exchange of technologies. Through T SC, students will better understand the institutional and sociocultural consequences of technological change from differing perspectives and will become sensitive to the issues attending the use of technology to improve people’s lives. Work in the program can also serve as preparation for advanced study in this field.

The program requirement for a minor in technology and social change is a minimum of 15 credits. One of the courses must be T SC 341. An additional 3 credits must be taken from T SC cross-listed courses. The remaining 9 may be selected from T SC cross-listed courses or from the list of T SC approved courses. At least 9 of the 15 credits must be in courses numbered 300 or above. Because technology and social change is an interdisciplinary study, minor programs must include coursework in at least two departments. Students seeking a minor should develop a specific program of courses either with the T SC faculty representative in their department or with the T SC coordinator. The student’s minor program must be approved by the T SC program coordinator.

T SC courses are listed below. The list of T SC approved courses is available from the program coordinators. Through the program coordinator, students may petition for approval of courses not on the approved list that address matters relevant to technology and social change.

Graduate Study

The graduate minor in technology and social change is a cross-disciplinary program that enables students to study the interactions between technologies and their users, on both societal and individual levels. The minor strengthens the ability of students to apply differing perspectives in understanding the effects of the global exchange of technologies and to heighten their sensitivity to the institutional and sociocultural issues attending the use of technology to improve people’s lives.

Students choosing to minor in technology and social change will pursue a degree program in the major department. In consultation with their major professor, students are to identify a T SC Faculty member to serve on the committee guiding their program of study. This T SC Faculty member must be on the Graduate faculty and must be from a discipline outside the major field of study. With the agreement of the POS committee, the student declaring a minor in T SC will select a group of courses from the list of T SC approved courses available through the program coordinators. For the master’s degree, this group should be at least 9 credits; for a doctoral degree, the group should be at least 15 credits. In either case, T SC 543 is required. Students may not include in their minor any courses from their own major. All programs of study that include a T SC minor must be approved by the T SC Program coordinator.
Technology Systems Management

(Administered by the Department of Agricultural and Biosystems Engineering)

Rameshwar Kanwar, Chair of Department

Distinguished Professor: Brown

Distinguished Professor (Emeritus): H. Johnson

University Professor: Bern

University Professor (Emeritus): Baker

Professors: Chen, Downing, Glanville, Harmon, Hoff, Hurburgh, L. Johnson, Kanwar, Misra, Schwab, Van Leeuwen, Xin

Professors (Emeritus): Beer, Bekkum, Buchele, Bundy, Hazen, Hoerner, Keeney, Lovely, Maney, Mangold, Marley, Melvin, Miller, Pedersen, Riley, R. Smith

Professor (Collaborator): Lafren

Associate Professors: Anex, Bhandari, Birrell, Brunn, Burns, Freeman, Koziel, Mickelson, Raman, Steward, Tim

Associate Professors (Emeritus): Anderson, Greiner, Lorimer

Associate Professor (Collaborator): Han

Assistant Professors: Greweil, Helmers, Kaleta-Forbes, Keren, Kim, Soupir, Tang, Yu

Assistant Professors (Emeritus): Boyd, Brashdow

Assistant Professors (Adjunct): Inyang, Shahar, Tong

Assistant Professors (Collaborators): Dunn, Malone

Lecturer: Snell

Undergraduate Study

The Department of Agricultural and Biosystems Engineering offers work for the bachelor of science degree with majors in agricultural systems technology and industrial technology, (see College of Agriculture, Curricul).

Missions: The mission of the Agricultural Systems Technology program is to prepare women and men for careers that integrate and apply agricultural and biosystems engineering technology to manage human and natural resource systems for producing, processing, and marketing food and other biological products worldwide. The mission of the Industrial Technology is to prepare women and men for careers that integrate and apply industrial technology to lead and manage human, manufacturing, and safety systems.

Objectives: At two to five years after undergraduate graduation, through the professional practice in technology, graduates should:

1. Have demonstrated competence in methods of analysis involving use of mathematics, fundamental physical and biological sciences, technology, and computation needed for the professional practice in the field of agricultural systems technology or industrial technology.
2. Have developed skills necessary to contribute to the design process; including the abilities to think creatively, to formulate problem statements, to communicate effectively, to synthesize information, and to evaluate and implement problem solutions.
3. Be capable of addressing issues of ethics, safety, professionalism, cultural diversity, globalization, environmental impact, and social and economic impact in professional practice.
4. Have demonstrated professional and technical growth, with practical experience, so as to be licensed in their field or achieve that level of expertise, as applicable.

5. Have demonstrated the ability to:
   a. be a successful leader of multi-disciplinary teams.
   b. efficiently manage multiple simultaneous projects.
   c. work collaboratively.
   d. implement multi-disciplinary systems-based solutions.
   e. to apply innovative solutions to problems through the use of new methods or technologies.
   f. contribute to the business success of their employer, and
   g. build community.

Outcomes: At the time of graduation, students of the Agricultural Systems Technology or Industrial Technology programs should have:

   a. an ability to apply knowledge of mathematics, science, technology, and applied sciences;
   b. an ability to design and conduct experiments, as well as to analyze and interpret data;
   c. an ability to formulate or design a system, process or program to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
   d. an ability to function on multi-disciplinary teams;
   e. an understanding of professional and ethical responsibility;
   f. an ability to communicate effectively;
   g. the broad education necessary to understand the impact of solutions in a global, economic, environmental, and societal context;
   h. a recognition of the need for, and an ability to engage in life-long learning;
   i. a knowledge of contemporary issues; and
   k. an ability to use the techniques, skills, and modern scientific and technical tools necessary for professional practice.

Graduates have developed and demonstrated workplace competencies, and have completed a professional internship. They are able to communicate effectively, have problem-solving skills and awareness of global, economic, environmental and societal issues.

Agricultural Systems Technology graduates have the ability to apply science and technology to problems related to agriculture; they manage complex agricultural systems for sustainability. They find careers within a variety of agriculturally-related industries, businesses, and organizations, including: agricultural machinery, environment, government, farm builders, grain, feed, seed, fertilizer, chemical, food, biorenewable resources, and production agriculture.

Industrial Technology graduates understand commonly-used manufacturing processes, lean manufacturing principles, continuous improvement, quality management, safety, regulatory issues affecting manufacturing, and the properties of manufacturing materials. They find careers within a variety of industries, businesses, and organizations focusing in manufacturing (e.g., quality control, production supervision, and process and facility planning) or occupational safety (e.g., development, management, and evaluation of safety programs and systems; and hazard identification and mitigation).

Certificate: The Department of Agricultural and Biosystems Engineering offers a undergraduate certificate in occupational safety which may be earned by completing a minimum of 20 credits of technology systems management courses, which includes TSM 27, 272, 370, 372, 470, and 493D, plus an additional 6 credits from a departmentally approved list.
The Department of Agricultural and Biosystems Engineering offers a minor in agricultural systems technology which may be earned by completing a minimum of 15 credits of technology systems management courses, which includes TSM 115 and 210, plus an additional 9 credits from a departmentally approved list.

The Department of Agricultural and Biosystems Engineering also offers a minor in industrial technology which may be earned by completing a minimum of 18 credits of technology systems management courses, which includes TSM 115 and 210, plus an additional 12 credits from a departmentally approved list.

For the undergraduate curriculum in agricultural systems technology leading to the degree of bachelor of science, the undergraduate curriculum in industrial technology leading to the degree of bachelor of science, see College of Agriculture, Curricula.

The department also offers an undergraduate curricula and courses in agricultural engineering, biological systems engineering, see College of Engineering, Curricula.

Graduate Study

The department offers work for the degrees of master of science, and doctor of philosophy with a major in industrial and agricultural technology. It cooperates in the interdepartmental programs in professional agriculture, sustainable agriculture, environmental sciences, biorenewable resources and technology, and human computer interaction.

The master's program prepares advanced practicing professionals for industrial and/or agricultural technology positions in industry, business, and public service; it also provides a sound foundation for further graduate study. The doctoral program prepares exemplary industrial and/or agricultural technology professionals for learning, discovery, engagement, and leadership roles in education, industry, business, and public service organizations.

The department also offers work for the degree of master of science, master of engineering, and doctor of philosophy with a major in agricultural engineering. See College of Engineering, Curricula.

Visit our departmental website at www.abee.iastate.edu.

Courses primarily for undergraduate students.

TSM 110. Introduction to Technology. (1-0) Cr. 1. F. Prereq: AST and 1 Tec majors only or permission of instructor. Team-oriented introduction to agricultural systems technology and industrial technology. Report writing, internships, careers, competencies, academic success strategies, industry visits, transition to academic life.

TSM 111. Experiencing Technology. (0-2) Cr. 1. S. Prereq: AST or 1 Tec majors only or permission of instructor. Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of technology. Report writing, internships, competencies, portfolios, industry visits.

TSM 112. Orientation to Learning and Productive Team Membership. (Cross-listed with Aer E, FS HN, Hort, NREM). (0-2) Cr. 2. F. Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

TSM 114. Developing Responsible Learners and Effective Leaders. (Cross-listed with FS HN, Hort, NREM). (2-0) Cr. 2. S. Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

TSM 115. Solving Technology Problems. (2-2) Cr. 3. S. Prereq: Math 140 or higher (can be taken concurrently). Solving technology problems and presenting solutions through technical reports. Unit conversions, unit factor method, SI units, significant digits, graphing and curve fitting. Use of spreadsheet programs to solve and present technology problems. Solution of technology problems using computer programming languages.

TSM 116. Introduction to Design in Technology. (2-2) Cr. 3. F. 2D projections and 3D representations of objects, national and international standards for documentation, manufacturing processes, design projects, and teamwork. Free-hand sketching techniques and parametric solid modeling will be covered.

TSM 201. Entrepreneurship and Internship Seminar. (Cross-listed with A E, BSE). (1-0) Cr. 1. S. Prereq. Sophomore standing in AE, AST, or I Tec 8 week course. Overview of the entrepreneurial process and its importance in the economy and the engineering/technical workplace. Preparation for internship experiences. Relationship of workplace competencies to entrepreneurship, intrapreneurship, and internships; portfolios.

TSM 210. Fundamentals of Technology. (3-0) Cr. 3. F. Prereq: 115 (may be taken concurrently) or equivalent, Math 140 or higher. Introduction to problem solving related to fundamental agricultural and/or industrial technology systems. Basic laws of energy, force, and mass applied to technology systems such as: mechanical power transmission; equipment calibration; environmental and natural resources; heating, ventilation and air conditioning; electrical circuits. Using the time value of money to make economic decisions.

TSM 216. Advanced Technical Graphics, Interpretation, and CAD. (2-2) Cr. 3. S. Prereq: Math 116. Advanced design systems incorporating 2D and 3D design and productivity tools for use in manufacturing settings. Topics include: Geometric Dimensioning and Tolerancing, 3D modeling, weld symbols, advanced visualization, design modeling of parts and assemblies, feature based design, Use of AutoCAD and parametric modeling software.

TSM 240. Introduction to Manufacturing Processes. (1-4) Cr. 3. F. A study of selected materials and related processes used in manufacturing. Lecture and laboratory activities focus on materials, properties, and processes. This includes plastics and metals.

TSM 270. Principles of Injury Prevention. (3-0) Cr. 3. F. Basic foundations of injury causation and prevention in home, motor vehicle, public, and work environments.

TSM 272. Occupational Safety Management. (2-0) Cr. 2. F. Introduction to occupational safety and health administration and management. Focus on development and management of safety programs and obtaining employee involvement in occupational safety programs.

TSM 276. Fire Protection and Prevention. (3-0) Cr. 3. F. An analysis of the current problems and technology in the fields of fire protection and fire prevention, with emphasis on industrial needs, focusing on the individual with industrial safety responsibilities.

TSM 301. Leadership and Ethics Seminar. (Cross-listed with A E, BSE). (1-0) Cr. 1. F. Prereq. 201. 8 week course. Leadership and ethics experiences through case studies and seminar presentations by practitioners. Relationships of workplace competencies to leadership and ethics; portfolios.

TSM 310. Total Quality Improvement. (3-0) Cr. 3. S. Prereq: Stat 101 or 104, junior classification. Introduction to the fundamental concepts of TQM - Deming style of management, statistical studies to understand the behavior of processes, products, or services, and how to define and document processes and customer focus. Introduction to continuous improvement tools and methods - DMAIC, SPC, and Design of experiments; emphasis on team work and problem solving skills.

TSM 322. Preservation of Grain Quality. (2-3) Cr. 3. S. Prereq: Math 140 or higher. Principles and management for grain quality preservation. Grain drying and storage. Fans and airflow through grain. Grain handling methods and system planning. Grain quality measurement and end-use value analysis.

TSM 324. Soil and Water Conservation Management. (2-3) Cr. 3. S. Prereq: Math 140 or 160. Introduction to engineering and conservation principles applied to the planning of erosion control systems, water control structures, water quality management, and drainage and irrigation systems.

TSM 325. Biorenewable Systems. (Cross-listed with A E, Agron, An S, BusAd, Econ). (3-0) Cr. 3. F. Prereq: Econ 101, Chem 125 or higher. Math 140 or higher. Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing.

TSM 335. Tractor Power. (3-3) Cr. 4. F. Prereq: 210, Math 140 or higher. The theory of tractor engines, mechanical power trains and hydraulic systems. Introduction to traction, chassis mechanics, and hydraulic power.

TSM 370. Occupational Safety. (3-0) Cr. 3. S. Prereq: 270, Junior standing. Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing a safe workplace for their employees. Includes the identification and remediation of workplace hazards. Nonmajor graduate credit.

TSM 372. Legal Aspects of Occupational Safety and Health. (3-0) Cr. 2. F. Prereq: 272. Legal implications of legislation as it applies to health and safety in the workplace. Includes OSHA regulations, worker’s compensation, and workplace liability.

TSM 397. Internship in Technology. Cr. R. F.S.S. Prereq: At least 48 credits of coursework, in AST or I Tec major, and approval of internship coordinator. A supervised work experience in an approved learning setting with application to technology practices and principles. Reporting during work experience and self and employer evaluation required. Minimum GPA requirement.

TSM 399. Work Experience in Technology. Cr. 2. Repeatable. F.S.S. Prereq: 397 and approval of instructor. Written reports and reflection on work experience. A maximum of 4 credits of TSM 399 may be used toward the total credits required for graduation.

TSM 408. Interdisciplinary Problem Solving. (Cross-listed with I E, E E). (3-0) Cr. 3. F S. Prereq: Junior or senior classification. Use of the Theory of Constraints as a way of approaching problem solving, win-win negotiation, project planning and effective delegation in the context of engineering/business systems. Team projects aimed at improving design outcomes. Nonmajor graduate credit.

TSM 409. Interdisciplinary Systems Effectiveness. (Cross-listed with I E, E E). (3-0) Cr. 3. F S. Prereq: Junior or senior classification. Focus on functions that determine the effectiveness of an entire organization. Generic Theory of Constraints solutions to production, distribution, and transportation management and compared to traditional solutions. Strategy for improvements discovered using simulations. Nonmajor graduate credit.

TSM 415. Technology Capstone I. (1-2) Cr. 2. F S. Prereq: 415. Selection of promising potential solutions to technology problems identified in 415 for development and analysis by student teams. Preparation of project through oral presentations, written reports, and working prototypes.

TSM 424. Impacts of Agriculture on Water Quality. (3-0) Cr. 3. F. Prereq: Math 140 or 160, one of the following: 324, Agron 154. Water use and water quality standards; characteristics of surface and groundwater resources; types of agricultural water pollutants and their impacts on water quality; how agricultural pollutants move and enter water resources; management practices to reduce ag pollutant movement and protect water resources. Nonmajor graduate credit.

TSM 433. Precision Farming Systems Advanced Concepts and Applications. (3-0) Cr. 3. F. Prereq: Math 140 or equivalent, admission to Master of Agriculture program, or permission of instructor. Geospatial information technologies for precision agriculture (geographic information systems, global positioning systems, remote sensing systems). Sensing and sampling strategies in precision agriculture and crop production recommendations. Systems for precision agriculture, equipment, software uses, legal and social issues, and production economics. Advanced concepts and the future of precision agriculture. Only one of TSM 333 and 433 may be counted toward graduation. Nonmajor graduate credit.

TSM 443. Statics and Strength of Materials for Technology. (2-1) Cr. 3. F. Prereq: AE 271 or 272; Phys 111. Application of standard analytical and computer based techniques of solving problems related to force and motion. The properties of materials and how to select appropriate materials for a particular design is reviewed.

TSM 444. Facility Planning. (3-0) Cr. 3. F. Prereq: 216 and 240; Stat 101 or 104. Principles and practices in designing, evaluating, and organizing existing facilities or creating new facilities using AutoCAD based new facility design project – product design, production flow analysis, activity relationship analysis, layout development, materials handling, office and other service requirement design, and the necessary cost analysis for the new facility.

TSM 445. Polymer and Composite Processing. (2-2) Cr. 3. S. Prereq: 240 or equivalent. Design and production of plastic parts including thermoplastics and thermoset/composites. A study of plastic properties and their relationships to processing parameters and control techniques. Applying advanced CAE technology to check process feasibility, determine optimal process conditions, evaluate part and mold designs, and estimate the cost of plastic injection processes.

TSM 470. Industrial Hygiene: Physical, Chemical, and Biological Hazards. (3-0) Cr. 3. S. Prereq: 272; Math 180 or higher. A qualitative and quantitative introduction to health effects of chemical, biological, and physical hazards in a workplace. Nonmajor graduate credit.

TSM 471. Safety Laboratory. (2-0) Cr. 1. S. Prereq: 470 (can be taken concurrently). Introduction to equipment, methods, and strategies to measure, evaluate, control, and research hazards and risk in the workplace.

TSM 477. System Safety Analysis. (Dual-listed with 577). (3-0) Cr. 3. F. Prereq: Math 160, Stat 101 or 104. System safety focuses on developing a safety-oriented pattern of thinking that is appropriate for today’s complex systems. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 490. Independent Study. Cr. arr. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department. A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

H. Honors
I. Manufacturing
J. Agriculture and Biosystems Management
M. Machine Systems
O. Occupational Safety

TSM 491. Seed Science Internship Experience. (Cross-listed with Agron, Hort). Cr. arr. Repeatable. F.S.S. Prereq: Agron 338, advanced approval and participation of employer and instructor. A professional work experience and creative project for seed science secondary majors. The project requires prior approval and participation of the employer and instructor. The student must submit a written report.

Courses primarily for graduate students, open to qualified undergraduate students

TSM 541. Comprehensive Modern Manufacturing Systems. (3-0) Cr. 3. S. SS. Prereq: Permission of instructor. The study, design, and implementation of PULL manufacturing systems and their integration with functions of the production system for the manufacture of superior quality, low cost products. Topics include lean manufacturing system design, cost estimation/justification, JIT manufacturing, integrated quality and process control, automation, and CAD/CAM.

TSM 545. Manufacturability of Plastics. (2-3) Cr. Pr. 2. Prereq: Permission of instructor. Overview of current business environment and issues related to design for manufacturability of plastic products. Provide understanding of available materials and processes in manufacturing plastic parts, new materials and molding technology for an in-depth study of five elements for making successful plastic products; consumer input, part design, mold design, material selection, and manufacturing process. Computer-aided engineering exercises and laboratory practices included.

TSM 575. Safety and Public Health Issues in Modern Society. (2-0) Cr. 2. Exploration and analysis of current safety and public health issues impacting society. The focus will be on topics that impact individuals in work, public, and home environments.

TSM 577. System Safety Analysis. (Dual-listed with 477). (3-0) Cr. 3. F. Prereq: Math 160, Stat 101 or 104. System safety focuses on developing a safety-oriented pattern of thinking that is appropriate for today’s complex systems. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 590. Special Topics in Technology. Cr. arr. Repeatable. Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor. A. Agriculture and Biosystems Management B. Machine Systems

2009-2011

366 Technology Systems Management

2009-2011
Textiles and Clothing

(Administered by the Department of Apparel, Educational Studies, and Hospitality Management)

Robert Bosselman, Chair of Department

Distinguished Professors (Emeritus): Fanslow, Moyer, Winakar

University Professor (Emeritus): Farrell-Beck

Professors: Bosselman, Damhorst, Fiore, Kadolph

Professors (Emeritus): Anderson, Beavers, Brun, Burnet, Cowan, Crabtree, Gilmore, Smith, Stone, Williams

Associate Professors: Baltzer, Hausaufs, Niehm, Parsons

Associate Professors (Emeritus): Amos, Brackelsberg, Brown, Ebert, Huss, Kandel, Kunz, Walsh

Associate Professor (Adjunct): Stroebel

Assistant Professors: Barker, Hurst, Karpova, Keino, Y. Lee, Marchetti, Rajagopal, Wohlfahrt-Arendt, Zheng

Assistant Professor (Adjunct): Glock

Instructor (Adjunct): Fratzke

Lecturers: Ackerman, Burger, Christensen, Frih, Fitzpatrick, Kramer, M. Lee, Sanger, Trost, Wirth, Wise

Undergraduate Study

The program offers study for the degree of Bachelor of Science with a major in apparel merchandising, design, and production (AMDP). The program offers students a broad understanding of textile and apparel products, merchandising and marketing strategies, technical and creative design, product development, production processes, and business practices leading to a wide range of careers at state, national, and international levels in business and industry. Courses in the program provide scientific, technical, and humanistic knowledge about textiles, apparel, and related products basic to career preparation. Courses also provide knowledge applicable to development and use of apparel and textile products by individuals, families, and institutions. The program provides a foundation for graduate study. Graduates understand the production, distribution, and use of textiles and apparel, aesthetic expression, and communication. They are prepared to plan, develop, and present textile and apparel products to meet the needs of consumers. They understand the issues involved in textile and apparel production and marketing, both nationally and internationally. Graduates appreciate the interdependence of nations and cultures as producers and consumers of textile products.

The AMDP major provides a broad-based program of study with flexibility in creating an individualized program. To complete the program, a student combines general education, AMDP core classes, and structured clusters of courses to form an option in merchandising, creative design, technical design, product development, or production and sourcing management.

An option in merchandising prepares students for the planning, development, and presentation of market-oriented product lines and events. Career opportunities are in product development, buying, promotion, and management in both manufacturing and retailing sectors with a focus on the textile and apparel industry. An option in creative design is appropriate for those interested in the aesthetic and creative aspects of design, product or line development, or promotion of textiles and apparel. The option in technical design prepares students for careers in technical design, product development, and quality assurance. An option in product development is appropriate for those interested in both designing and merchandising products or lines for consumer groups. Students in design have a review of their design skills after T C 225 and T C 278.

In addition, a student in merchandising or production and sourcing management selects a secondary option from business and entrepreneurship, consumer behavior/marketing, communications/publications, history/museum studies, human resource management, international trade, or public relations/management. The combinations of primary and secondary options allow students to individualize their programs.

For additional courses of interest, see Apparel, Educational Studies, and Hospitality Management.

The program offers a minor in apparel merchandising, design, and production. The minor can be earned by taking T C 131 or 165; 204, 231, 245, or 275; 6 credits at the 300-400 level; for a total of 16 to 17 credits.

Grade point requirement: All students majoring in apparel merchandising, design, and production are required to earn a C- or better in all AESH and T C courses applied toward the degree, including transfer credits.

Graduate Study

The program offers work for the master of science and doctor of philosophy with a major in textiles and clothing. The program also participates in the Master of Family and Consumer Sciences degree by offering a specialization within that program. For all programs the field of study is highly interdisciplinary; programs of study are tailored to students’ background and interests.

Graduates understand how textiles and apparel are essential in meeting individual and societal needs and understand the interdependence of nations and cultures as producers and consumers. Graduates understand diverse philosophies of scholarship and apply multiple methods to creative activity, research, and teaching. Strong writing and oral communication skills help graduates disseminate scholarship and compete successfully for awards and grants.

Graduates accept positions relevant to their academic experience. All doctoral graduates have teaching experience. Masters and doctoral graduates have experience working in team-oriented and interactive environments. Graduates are prepared to adapt to future changes in their professions and to provide leadership in professional and public practice. They bring a strong sense of ethics to research, teaching, and business endeavors.

Program emphases for graduate study include consumer behavior; entrepreneurship; merchandising and marketing aspects of textiles and clothing; acquisition and use of textiles and apparel within cultural, social, psychological aspects of dress; aesthetics and design; product quality and development; textile conservation; and computer-aided design.
The program participates in the interdepartmental gerontology minor.

Courses primarily for undergraduate students.

T C 131. Overview of the Fashion Industry. (3-0) Cr. 3. F.S. Introduction to fashion industry, industry structure from concept to consumer. Focus on fashion-driven consumer goods.

T C 165. Dress and Diversity in Society. (3-0) Cr. 3. F.S.SS. Examination of diversity among consumers and forecasting future trends in consumer behavior. Social responsibility issues related to appearance.

T C 221. Apparel Assembly Processes. (1-4) Cr. 3. F.S.SS. Prereq: 204 or concurrent. Principles of garment assembly. Use of mass production equipment and methods to analyze, develop and assemble garments.

T C 278. Fashion Illustration. (0-0) Cr. 3. F.S. Prereq: 131, 245 or concurrent enrollment. Permission of instructor. Developing skills, including line, shape, perspective and value. Introduction to drawing the fashion figure and apparel using a variety of media. Fashion presentation and introduction to portfolio development.

T C 301. Basic Design Concepts Review. Cr. 1. Repeatable maximum of 2 credits. F.S. Prereq: Completion or enrollment in 225, 278. Permission of instructor. Project review and skill assessment related to 2-dimensional and 3-dimensional visualization, apparel assembly, basic product knowledge, design problem solving. Review of fashion illustration, textiles, flat pattern, basic apparel assembly, design problem solving. Satisfactory-fail only.

T C 326. Creative Design Processes. (Dual-listed with 526). (2-2) Cr. 3. F.S. Prereq: 325 or concurrent enrollment. Permission of instructor. Exploration of the creative process and sources of inspiration with emphasis on fashion presentation and design development for a variety of markets. Continued development of fashion illustration techniques. Use of traditional and non-traditional materials to create innovative garments.

T C 354. History of European and North American Dress. (3-0) Cr. 3. F. Prereq: 3 credits from Hist or Art H. Survey of history of dress from ancient times through present; focus on European and North American dress. Emphasis on connection of dress to the social, cultural, environmental, and technological contexts of the Western world. Nonmajor graduate credit.

T C 356. History of Twentieth Century Fashion. (Dual-listed with 556). (3-0) Cr. 3, 5. Prereq: 3 credits from Art H, T C 204 recommended. Survey of major design and technological developments in 20th Century fashion. Emphasis on fashion as a system of design and production, culture of consumption, fashion change, and trends in art, society, and culture.

T C 362. Cultural Perspectives in Dress. (3-0) Cr. 3. S. Prereq: 165 or 3 credits in anthropology, psychology, or sociology. Analysis of multiple factors related to dress in selected societies, including technology, aesthetics, social organization, ritual, stability and change. Applications to apparel business.

T C 372. Sourcing and Global Issues. (3-0) Cr. 3. F.S. Prereq: 231, AESHM 275, Econ 101 or 102 recommended. Evaluation of key issues facing textile and apparel businesses in global markets considering ethical, economic, political, social, and professional implications. Sourcing strategies in a global environment. Corporate and consumer social responsibility.

T C 376. Merchandise Planning and Control. (2-2) Cr. 3. F.S. Prereq: AESHM 275, Acct 284. Assortment planning, model stocks, budget development, retail math, buying concepts and strategies.

T C 377. Brand Management and Promotions. (3-0) Cr. 3. F.S. Prereq: 245; AESHM 340 or MKt 340. Principles of brand image development and management; focus on experiential marketing, promotions, store design/layout, visual merchandising concepts.

T C 380. Field Study. Cr. arr. Repeatable. F.S.SS. Prereq: 9 credits in T C, junior classification, minimum 2.0 GPA. Permission by application. Study of and tours of textile and apparel manufacturers, forecasting firms, design studios, showrooms, markets, retailers, museums, testing laboratories, trade seminars and exhibitions, and other areas of interest within the textile and apparel industry. Countries vary.

A. Pre-trip Orientation. Cr. R. Orientation to the international location during semester preceding trip. B. Field trip. Cr. 1-2. Trip to location under supervision of faculty member. Reports required.

T C 381. International Field Study. Cr. arr. Repeatable. Alt. S., offered 2010. SS. Prereq: 9 credits in T C, junior classification, minimum 2.0 GPA. Permission by application. Study of and tours of textile and apparel manufacturers, forecasting firms, design studios, showrooms, markets, retailers, museums, testing laboratories, trade seminars and exhibitions, and other areas of interest within the textile and apparel industry. Countries vary.

A. Pre-trip Orientation. Cr. R. Orientation to the international locations during semester preceding trip. B. Field trip. Cr. 1-3. Trip to international location under supervision of faculty member. Reports required.

T C 398. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department chair; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

T C 404. Textile Science II. (Dual-listed with 504). (3-0) Cr. 3. Alt. F. offered 2010. Prereq: 204, 245; one name change course. Theories and principles of textile science; emphasis on fiber chemistry, performance and smart textiles, dyeing, and durability.

T C 467. Consumer Behavior. (3-0) Cr. 3. F. Prereq: Start 101 or 104 or 226; T C 165. Application of concepts and theories from the social sciences to the study of consumer behavior related to apparel. Experience in conducting market and consumer research.

T C 470. Supervised Experience. Cr. 3. Repeatable. F.S.SS. Prereq: 311 and minimum 2.0 GPA; permission by application; junior or senior classification. Supervised work experience with a cooperating firm or organization.

A. Textile Industry. Prereq: 305. B. History of Dress and Textiles. Prereq: 6 credits from 257, 354, 368 or 362; 3 credits in anthropology or history recommended.

V. Sourcing and Global Issues. Prereq: TC 372

T C 475. Retail Information Analysis. (2-2) Cr. 3. F.S. Prereq: 3/6. Forecasting, customer demand, assortment planning, market research, analysis of customer databases, data mining, database interface, pattern recognition, retail technology applications and supply-chain/logistics management.
A. Textile Science
B. History of Dress and Textiles
C. Textile and Apparel Design
D. Aesthetics
E. Entrepreneurship
F. Sociological and Psychological Aspects of Dress and Textiles
G. Consumer Behavior
H. Honors
I. Merchandising
K. Cultural Analysis of Dress and Textiles
M. Museums
N. Apparel Production Management
O. Technical Design
Q. Quality Assurance
T. Public Relations and Publishing
U. Product Development
V. Sourcing and Global Issues

T C 496. Fashion Forecasting and Product Development. (3-0) Cr. 3. Prereq: 231, 245, AESHM 275. Applying consumer, aesthetic, and quantitative trend information to development of value-added apparel/textile products and presentation of merchandise/promotion campaigns for diverse target markets. Multi-function team projects. Presentation to industry representatives.

T C 498. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department chair; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

T C 504. Textile Science II. (Dual-listed with 404). (3-0) Cr. 3. Alt. F. Offered 2010. Prereq: 204, 245; one natural science course. Theories and principles of textile science; emphasis on fiber chemistry, performance and smart textiles, dyeing, and detergency.

T C 510. Foundation of Scholarship in Textiles and Clothing. (3-0) Cr. 3. F. Prereq: Graduate classification. Overview of scholarship in textiles and clothing with emphasis on current and future directions. Fundamentals of writing literature reviews. Examination of ethical issues in scholarship and academic life. Introduction to creativity and an entrepreneurial perspective.

T C 556. History of Twentieth Century Fashion. (Dual-listed with 356). (3-0) Cr. 3. S. Prereq: Graduate standing. Survey of major design and technological developments in 20th Century fashion. Emphasis on fashion as a system of design and production, culture of consumption, fashion change, and trends in art, society, and culture.

T C 562. Dress and Culture. (3-0) Cr. 3. Alt. F. Offered 2010. Prereq: 362 or 6 credits in social science or cultural anthropology. Analysis of dress as artifact, behavior, and symbol from cultural perspectives. Focus on construction of cultural identity. Examination of ethnographic approaches and field research methods to the study of dress as material culture.

T C 567. Consumer Behavior and Apparel. (3-0) Cr. 3. Alt. S. Offered 2010. Prereq: 487 or Mkt 447; Stat 407. Application of concepts and theories from the social sciences to the study of consumer behavior. Experience in conducting research; manuscript writing.

A. Teaching practicum
B. Internship

T C 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of department chair and instructor(s). Individually designed textile and clothing-related projects that reflect the special interests of the student.
A. Textile Science
B. History of Dress and Textiles
C. Textile and Apparel Design
D. Aesthetics
E. Entrepreneurship
F. Sociological and Psychological Aspects
G. Consumer Behavior
I. Merchandising
K. Cultural Analysis of Dress and Textiles
L. Conservation
M. Museums
N. Apparel Production Management
O. Technical Design
P. Interdisciplinary
Q. Quality Assurance

U. Product Development
V. Sourcing and Global Issues

Theatre and Performing Arts

Courses for graduate students

T C 610. Philosophical Issues of Textiles and Clothing Scholarship. (3-0) Cr. 3. Alt. F. Offered 2010. Prereq: 2 courses in research methods, 6 graduate credits in textiles and clothing. Models, theory, alternative philosophies, and ethics of science as applied in textiles and clothing scholarship. Grant writing and research program development.

T C 665. Social Science Theories of Appearance. (3-0) Cr. 3. Alt. S. Offered 2011. Prereq: 6 credits in sociology or psychology. Analysis of social science theories and concepts applicable to clothing and appearance research. Emphasis on qualitative research and philosophy of knowledge, including postmodern, symbolic interaction, semiotic, and feminist theories.

T C 675. Research in Merchandising. (3-0) Cr. 3. Alt. F. Offered 2009. Prereq: AESHM 275 or equivalent. Merchandising and related marketing theory, research processes, and methods. Experience in conducting research; prepare manuscripts for academic, industry and lay audiences.

T C 690. Advanced Topics. Cr. arr. Repeatable. Prereq: Enrollment in doctoral program, permission of instructor, and approval of D.O.G.E. Cr. arr. Repeatable.

Theatre and Performing Arts

www.theatre.iastate.edu
(Administered by the Department of Music)

Performing Arts graduates will understand and demonstrate: 1) Knowledge of the cultural heritage and history of the Performing Arts 2) A theoretical and experiential background in the areas of performance, theatrical design, music, and dance 3) Knowledge of creative problem solving and artistic collaboration 4) Skills necessary to perform in or design for a variety of periods, styles, and genres in theatre and dance and 5) Awareness of the diversity of expression in the Performing Arts throughout the world’s cultures 6) A practical understanding of the rigors of the field.

Assessment measures include the semester exhibit of design work or audition pieces, graduating senior seminar and exit interviews, public performances or designs, course grades, exhibited convention work, and internship evaluations.

Undergraduate Study

Students interested in theatre as a major area of concentration declare a major in Performing Arts and select an emphasis in Theatrical Design or Acting/Directing. Students implement the theories and concepts applicable to design, construction, musical, and technical aspects of performance, theatrical design, music, and artistic collaboration 4) Skills necessary to perform in or design for a variety of periods, styles, and genres in theatre and dance and 5) Awareness of the diversity of expression in the Performing Arts throughout the world’s cultures 6) A practical understanding of the rigors of the field.
The major in Performing Arts offers the undergraduate student a cross-disciplinary concentration in Music, Dance and Theatre. The core curriculum consists of 24 credits in the three areas. Students elect a 24-credit emphasis in either Dance, Theatrical Design or Acting/Directing. In addition to coursework, Performing Arts majors and minors participate in concert (Orchestrion, Fallsole), workshop (Opera Studio, Minority Theatre Workshop) and production (Barchie, Stays Over Veishea, ISU Theatre/Music/Theatre/Second Stage and Studioi experiences.

Performing Arts graduates, in addition to a solid theoretical and experiential background in the areas of performance, theatrical design, dance and music, are prepared to meet the challenges of the work force or graduate school with their strengths in collaboration, creative problem solving, meeting deadlines and processing diverse input to yield cohesive output. Two required professional internships prior to graduation are vital to the student's appreciation and practical understanding of the rigors of the field.

The theatre area offers a wide variety of courses. Students may select from courses in acting, design (costume, scenic, lighting/sound), make-up, stage direction, playwriting, stage management, and theatre history. Independent study and special topics courses supplement formal course offerings to provide opportunities to intensify study in a particular aspect of theatre.

Auditions for ISU Theatre productions are open to all students irrespective of academic major. Similarly, participation in areas of production other than acting is open to both majors and nonmajors. Qualified students also present experimental, laboratory, and Minority Theatre Workshop productions. Student actors, directors, designers, and technical crew heads are required to maintain a grade point average of at least 2.0 to participate in productions.

Theatre scholarships are awarded on a yearly basis to students who make significant contributions to Iowa State University Theatre.

**Bachelor of Arts - Performing Arts Major (Perf)**

**The Core for the Performing Arts Major (24 cr)**

(For individual Dance and Music course descriptions, see Index for individual department listing.)

Music 101, 102

Dance 120-Modern Dance, 130-Ballet I, 220-Modern Dance Composition

Dance 270-Dance Appreciation

Thtre 255, 263, 366

Perf 105—six semesters), Perf 310 (2), Perf 401

Emphasis in Theatrical Design (24 cr)

Thtre 250 (2 cr), 360, 366, 451, 461, 465, 466, Music 133

Emphasis in Dance (24 cr)

Art 292, Music 133, Ex Sp 355

Dance 222, 224 (2 cr), 232, 360, 370

Select 2 credits from: Dance 140, 150, 160, 170, 211 (instead of 160, 170)

Select 2 credits from: Dance 223, 233, 242, 243, 262

Select 3 credits from: Dance 320, 384, 385, 386

All students enrolled in the Dance Emphasis must register for one dance technique course every semester of residence up to a total of 8 credits and must complete one computer course (Com S 103, 107, 207, C 1 201).

Emphasis in Acting/Directing (24 cr)

Thtre 151, 250 (2 cr), 251, 351, 451, 455, 465, 466

Music 133

Minor in Performing Arts (21 cr)

Perf 105 (three semesters)

Music 101, 102

Dance 120 or 130, 270

Thtre 255, 263 or 251

plus six credits 300+ in Dance, Thtre or Perf

**Graduate Study**

The department offers graduate courses as supporting work in other fields.

**Performing Arts**

**Courses primarily for undergraduate students.**

Perf 105. Issues in the Performing Arts. (1-0) Cr. R. F.

Cross-disciplinary analysis and discussion of topics in the performing arts. Six semesters required of performing arts majors.

Perf 310. Performing Arts Internship. Cr. R. F.

Required of performing arts majors. A job or internship with a professional or semi-professional performing arts organization. Satisfactory-fail only.

Perf 401. Performing Arts Seminar. (2-0) Cr. S.

Intensive collaborative study and practice of topics in music, dance and theatre. Required of performing arts majors. Nonmajor graduate credit.

**Theatre**

**Courses primarily for undergraduate students.**

Thtre 106. Introduction to the Performing Arts. (3-0) Cr. S.

An audience oriented, broad-based, team-taught survey of the performing arts which emphasizes theatre and includes segments on television, radio, film, dance, and music.

Thtre 110. Theatre and Society. (3-0) Cr. F.

An introduction to Theatre focusing on its relationship with society throughout history.

Thtre 151. The Actor's Voice. (3-0) Cr. S.

Study and practice of fundamentals of vocal production; breathing, quality, articulation, projection, and expressiveness for the performing artist.

Thtre 224. Concert and Theatre Dance. (Cross-listed with DANCE). (0-3) Cr. arr. Repeatable. F.

Prereq: By audition only. Choreography, rehearsal, and performance in campus dance concerts and/or musical theatre productions. Satisfactory-fail only.

Thtre 250. Theatre Practicum. Cr. arr. Repeatable. F.

Prereq: Permission of instructor. Practice in various aspects of technical theatre production. Satisfactory-fail only.

Thtre 251. Acting I. (3-0) Cr. F.

Theory and practice in fundamentals of acting.

Thtre 255. Introduction to Theatrical Production. (3-3) Cr. F.

Standard structure and procedures, historical overview of performing arts production including the design and creation of scenery, costumes and lighting.

Thtre 263. Script Analysis. (3-0) Cr. F.

Theory, analysis, and interpretation of play scripts for production.

Thtre 290. Special Projects. Cr. arr. Repeatable. F.

Prereq: 3 credits in theatre; permission of instructor; approval of written proposal.

Thtre 291. Creative Writing -- Playwriting. (Cross-listed with Engl. (3-0) Cr. S.

Prereq: Engl 250, not open to freshmen. Progresses from production of scenes to fully developed one-act plays. Emphasis on action, staging, writing, analytical reading, workshop, criticism, and individual conferences. Nonmajor graduate credit.

Thtre 351. Acting II. (3-0) Cr. S.

Prereq: 251. Dance 120 recommended. Theory and practice of techniques of acting with emphasis on character and scene analysis.

Theory, history, and practice of theatrical combat. Includes tumbling, hand-to-hand, quarterstaff, broadsword, rapier, and dagger.

Thtre 354. Musical Theatre I. (2-2) Cr. 3.

Prereq: 251 or Music 232 or 3 credits in Dance. F.

Theory, history and practice of musical theatre techniques. Designed to develop the musical theatre performance skills of singers, dancers, and actors.

Thtre 355. Musical Theatre II. (2-2) Cr. 3.

Prereq: 354. F.

Theory, history and practice of musical theatre techniques. Designed to develop the musical theatre performance skills of singers, dancers, and actors.

Thtre 357. Stage Make-up. (1-2) Cr. 2.

F.

Theory and practice of make-up and hair-styling techniques for the performing arts: Theatre, Opera, Dance, Television and Film. Lab required.

Thtre 358. Oral Interpretation. (3-0) Cr. S.

Principles of oral interpretation: practice in analysis, in reading aloud of literary selections, and in reader's theatre.

Thtre 359. Theatre for Children and Youth. (3-0) Cr.

Thtre 360. Stagecraft. (3-2) Cr. 4.

Prereq: 255.

Tools, materials, and techniques of planning, constructing and painting of performing arts scenography. Basic principles of lighting technology. Technical drawing for performing arts production.

Thtre 365. Theatrical Design I. (2-2) Cr. 3.

Prereq: 255. An exploration of the elements, principles and art of theatrical design.

Thtre 366. Theatrical Design II. (2-2) Cr. 3.

Prereq: 365. Intensive application of the principles introduced in 365. In-depth study and practice of the graphic skills of rendering and drafting.

Thtre 367. Stage Management. (3-0) Cr. 3.

Prereq: 255.

The responsibilities and techniques of stage management for the performing arts.

Thtre 393. Workshop. Cr. 3.

Repeatable. F.

Prereq: 3 credits in theatre. Offered to explore special topics.

A. Minority Theatre

B. Repertory

C. Children's Theatre

D. Musical Theatre

E. Creative Dramatics

F. International Storytelling

Thtre 451. Acting III. (3-0) Cr. 3.

Prereq: 351 and permission of instructor. Analysis and practice of period scenes.

Thtre 455. Directing I. (3-0) Cr. 3.

Prereq: 255; 263; 251 recommended. F.

Theory, techniques, and practice of directing.

Thtre 456. Directing II. (2-2) Cr. 3.

Prereq: 455.

Practical and theoretical experience in directing the stage play.

Thtre 461. Theatrical Design Studio. (3-2) Cr.

Repeatable. F.

Prereq: Permission of instructor. Focuses on the art and craft of specific areas of theatrical design. Each semester the student will focus on one or two of the following: scenic, costume, or lighting design.

Thtre 465. History of Theatre I. (3-0) Cr.

Prereq: Hist 201 or equivalent. F.

Theatre history from ancient times to 1800. Nonmajor graduate credit.
Courses primarily for graduate students, open to qualified undergraduate students

Tox 501. Principles of Toxicology. (3-0) Cr. 3. F. Prereq: BBMB 404 or equivalent. Principles of toxicology governing entry, fate, and effects of toxicants on living systems. Includes toxicokinetics and foreign compound metabolism with toxification or detoxification. Fundamentals of foreign compound effects on metabolism, physiology, and morphology of different cell types, tissues, and organ systems.

Tox 502. Toxicology Methods. (0-6) Cr. 3. Alt. S., offered 2010. Prereq: Tox 501. Provides demonstrations or laboratory experience in the application of methods used in toxicology, including safety procedures, calculation and data analysis, teratologic and morphologic evaluation, electrophysiologic measures, in vitro enzyme induction/biotransformation, neural and behavioral toxicology testing.

Tox 504. Toxicology Seminar. (1-0) Cr. 1. Repeatable. F.S.SS. Prereq: Permission of instructor required. Presentation of a seminar about a current topic in toxicology as part of a weekly series of seminars by graduate students, faculty, and guest lecturers from off campus.

Tox 515. Regulatory Toxicology. (Cross-listed with FS HN, NutSi) (3-0) Cr. 1. Alt. F., offered 2010. Prereq: BBMB 404 or FSHN 402. Regulations in the real world. Approaches used by toxicologists in regulatory agencies for generating, enforcing and complying with laws and regulations in an unambiguous, defensible manner. Different obligations of scientists in research and regulatory settings. Perform simple risk assessments and suggest ways of dealing with data gaps. Examine strengths and weaknesses of common approaches used by regulatory agencies.

Tox 519. Food Toxicology. (Cross-listed with FS HN, NutSi) (3-0) Cr. 3. Alt. F., offered 2010. Prereq: A course in biochemistry. Basic principles of toxicology. Toxicants in the food supply: modes of action, toxicant defense systems, toxicant and nutrient interactions, risk assessment. Only one of Tox 419 and 519 may count toward graduation.

Tox 526. Veterinary Toxicology. (Cross-listed with VDPAM) (3-0) Cr. arr. Repeatable. F.S.SS. Prereq: D.V.M. degree or 526. Advanced study of current problems and issues in toxicology. Emphasis on problem solving utilizing clinical, epidemiological, and laboratory resources.

Tox 546. Clinical and Diagnostic Toxicology. (Cross-listed with VDPAM) (0-3) Cr. arr. Repeatable. F.S.SS. Prereq: Permission of instructor required. A study of disease processes in animals caused by toxicants and the use of differential diagnostic and therapeutic procedures. Emphasis is on use of clinical cases to define mechanism of poisoning, diagnostic and management procedures and public health and food safety issues.

Tox 554. General Pharmacology. (Cross-listed with B M S) (3-0) Cr. 3. S. Prereq: BMS 549 and 552. BBMB 404, 405. General principles; drug disposition, pharmacodynamics, pharmacokinetics, and therapeutic procedures. Emphasis is on clinical cases to define mechanism of poisoning, diagnostic and management procedures and public health and food safety issues.

Tox 565. Methods of Biostatistics. (Cross-listed with STAT) (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Stat 500 or 401, Stat 543 or 447. Statistical methods useful for biostatistical problems. Topics include analysis of cohort studies, case-control studies and randomized clinical trials, techniques in the analysis of survival data and longitudinal studies, approaches to handling missing data, and meta-analysis. Examples will come from recent studies in cancer, AIDS, heart disease, psychiatry and other human and animal health studies. Use of statistical software: SAS, S-Plus or R.

Tox 575. Cell Biology. (Cross-listed with B M S). (3-0) Cr. 3. F. Prereq: 10 credits in biological science and permission of instructor: A multi-instructor course covering major topics in cell structure and function, including: ultrastructural features of prokaryotic and eukaryotic cells, types of utilization and conversion of energy, genetic control of cell shape and functionality, internal organization of cells, communication between cells and their environment, development of multicellular systems. Students have to write a term paper.

Tox 590. Special Topics. Cr. arr. Repeatable. Contact individual faculty for special projects or topics. Graded.

Courses for graduate students

Tox 626. Advanced Food Microbiology. (Cross-listed with FS HN, Micro). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: FS HN 420 or 421 or 504. Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

Tox 627. Rapid Methods in Food Microbiology. (Cross-listed with FS HN, Micro). (2-0) Cr. 2. Alt. S., offered 2010. Prereq: FS HN 420 or 421 or 504. Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sampling, and "next generation" testing formats now in development.

Tox 656. Cellular and Molecular Pathology II. (Cross-listed with V PTH). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Graduate course in biochemistry, genetics, or cell biology. Cellular and molecular mechanisms of carcinogenesis.

Tox 675. Insecticide Toxicology. (Cross-listed with ENT). (3-0) Cr. 3. F. Prereq: Ent 562 or Ent 555. Coats. Principles of insecticide toxicology; classification, mode of action, metabolism, and environmental effects of insecticides.

Tox 697. Graduate Research Rotation. (0-12) Cr. arr. Repeatable. FS.SS. Prereq: Admission to Toxicology graduate program. Graduate research projects performed under the supervision of selected faculty members in the graduate Toxicology major.

Transportation

www.ctre.iastate.edu/mstrans/

(Interdepartmental Graduate Major)

Supervisory Committee: K. Gkritza, Chair; D. Johnston, M. Crum

Work is offered for the degree master of science with a major in transportation under a cooperative arrangement with various departments including Civil, Construction and Environmental Engineering (CCEE), Community and Regional Planning (CRP), and Logistics, Operations and Management Information Systems (LOMIS). Opportunities are afforded for research in such areas as modeling and performance of transportation systems, highway safety and information systems, remote sensing, environmental analysis, techniques for urban and regional transportation system planning, environmental and social policy analysis of transportation systems, transportation policy analysis, analysis of transportation demand and supply, commodity distribution, public administration of the transportation planning process, regional development and transportation system interrelationships, transportation economics and finance, and planning for logistics management.

Students majoring in transportation will develop a program of study under the guidance of a program of study committee selected by the student in consultation with and approved by the chair of the faculty supervisory committee. For administrative purposes, the student’s home department will be the department originally admitting the student. A major professor may be selected from any of the three participating departments. A student must designate at least one member of the POS committee from his or her home department, and at least one member from outside the home department.

A student must complete at least 36 credits of acceptable work including preparation of a 6 credit thesis or a 2-3 credit creative component. A structured minor requires 12 credits of approved transportation courses and a thesis or creative component on a transportation related topic. A required core includes C E 551, Trans 691, Stat 401 and at least one course from all three cooperating departments (CRP CCEE and LOMIS). Detailed requirements are available from the chair of the supervisory committee.

Graduate students pursuing a major in any of the cooperating departments who have an interest in transportation are encouraged to consider a formal declared minor in transportation. Students considering a declared minor should consult with the chair of the supervisory committee about the requirements for it.

Students typically focus their program of study to support a career in one of five areas: transportation consulting, regional and statewide transportation planning, transportation service operations and management, transportation policy and economic analysis, and transportation planning and operation for local and state governments. Graduates will have specific knowledge in one or more of these focus areas and the skills to conduct research and analysis of transportation issues. These skills allow graduates to be productive immediately in positions related to a focus area or to continue in more advanced transportation graduate work.

Courses primarily for graduate students

Trans 555. Economic Analysis of Transportation Investments. (3-0) Cr. 3. F. Prereq: C E 350 or 355. Application of economic analysis methodologies to evaluate transportation projects. Multi-modal approaches to evaluate impacts of transportation investments and maximize economic efficiency while considering equity and other social issues related to investment options.

Trans 691. Seminar in Transportation Planning. Cr. arr. Repeatable. S. Provides an overview of current transportation issues; lecturers provide seminars on a variety of timely transportation topics.

University Studies

Associate Provost for Academic Programs

Certain interdisciplinary courses are offered through university studies, at the discretion of the associate provost for academic programs and upon the advice of the Faculty Senate Curriculum Committee. No major is available in university studies, but credit obtained through university studies offerings may be applied toward a degree in any of the colleges, consistent with the stipulations of the student’s curriculum.

Requests to make use of U St 290, 490, 590 should be directed to the associate provost for academic programs and should be accompanied by a positive recommendation from the department heads and deans of the instructors making the request. The associate provost for academic programs will refer requests to the Faculty Senate Curriculum Committee which will make recommendations to the associate provost for academic programs regarding their disposition after consultation with appropriate college and university committees.

Courses primarily for undergraduate students.

U St 106. Carver Academy Seminar: Freshmen. (1-0) Cr. 1. S. Prereq: Acceptance in Carver Academy Program. George Washington Carver scholarship recipient. Introduction for Carver Academy students to resources at ISU to supplement classroom learning. Exploration of multicultural communities and leadership opportunities at ISU. Satisfactory-fail only.

U St 115. MVP Seminar. (1-0) Cr. 1. F. Prereq: Recipient of the MVP Award. Orientation to Iowa State University and the MVP Program. Satisfactory-fail only.

U St 116. MVP Seminar. (1-0) Cr. 1. S. Prereq: Recipient of the MVP Award, 115 or consent of instructor. A continuation of the introduction to life and resources at Iowa State University and to the functions of the Multicultural Vision Program focusing individually in areas of personal development, ethnic and racial identity, and leadership. Satisfactory-fail only.

U St 120. Student Support Services Program Seminar. (1-0) Cr. 1. S. Prereq: Acceptance in Student Support Services Learning Community. Designed to assist students in developing successful academic strategies to meet demands of college and achieve desired goals. Satisfactory-fail only.

U St 160. Gender Justice. (2-0) Cr. 1. F. S. Half semester course. Examines the socialization process in the United States and how our perspectives are formed. An introduction to patriarchalism and all male dominance, skills to enhance communication and understanding among women and men will be developed. Satisfactory-fail only.

U St 170. Leadership ISU. (2-0) Cr. 1. F. Prereq: Freshman or sophomore classification. An introductory leadership course for first-year and second-year students. Students will gain a basic understanding of leadership skill development and resources available to student leaders at Iowa State University. Course content will be delivered through a variety of methods such as guest speakers, team building exercises, and small group discussions. Students will be expected to
complete several out of class assignments to apply the leadership skills they have learned. Satisfactory-fail only.

U St 200. Independent Study. Cr. arr. Prereq: Permission of the associate provost for academic programs. Independent study on topics of an interdisciplinary nature. Intended primarily for freshmen and sophomores.

U St 301. McNair Scholars Seminar: Orientation to the McNair Program and to Academic Research. (0-2) Cr. 1. F. Prereq: New fall admit to the Ronald E. McNair Postbaccalaureate Achievement Program. Covers program guidelines and requirements, the basics of preparing for the graduate admissions process, and the formulation of a research topic to begin the required research project. Satisfactory-fail only.

U St 302. McNair Scholars Seminar: The Review of Literature and the Methodology. (0-2) Cr. 1. S. Prereq: 301. Covers the review of literature and the methodology components of the required research project. Satisfactory-fail only.

U St 305. Carver Academy Seminar: Community Leaders. (1-0) Cr. 1. F. Prereq: Intended primarily for juniors. Leadership development for Carver Academy students; frameworks for multicultural leadership. Students will research and assess needs for community enhancement projects under faculty supervision. Satisfactory-fail only.

U St 306. Carver Academy Seminar: Community Leaders. (1-0) Cr. 1. S. Prereq: Intended primarily for juniors. Leadership development for Carver Academy students; self-directed development of leadership abilities. Implement student-directed community enhancement projects under faculty supervision. Begin preparation for graduate and professional schools and career placement. Satisfactory-fail only.

U St 311. Leadership Seminar I. (1-0) Cr. 1. Repeatable. Prereq: 111, 115. For students serving as peer mentor first-year seminar leaders under faculty supervision. Development of course facilitation and peer leadership skills. Satisfactory-fail only.

A. Leaders in Hixson Seminar
B. Leaders in MVP Seminar

U St 312. Leadership Seminar II. (1-0) Cr. 1. Repeatable. Prereq: 311. For students serving as leaders in Hixson Seminar or MVP Seminar under faculty supervision. Development of course facilitation and peer leadership skills. Satisfactory-fail only.

A. Leaders in Hixson Seminar
B. Leaders in MVP Seminar

U St 336. International Perspectives in Career Development. (3-0) Cr. 3. Students will examine the career development process in the context of pursuing an international career. Topics will include career exploration, the job search, and cultural differences from international points of view. Faculty members will guest lecture on culture, history, economics, environment, and art of the selected country. Following the spring seminar students will participate in a study tour of the selected country where they will visit international employers and historical and cultural sites. Satisfactory-fail only.

U St 401. McNair Scholars Seminar: Data Collection and Data Analysis. (0-2) Cr. 1. F. Prereq: 302. Covers the data collection and data analysis sections of the required research project. Satisfactory-fail only.

U St 405. Carver Academy Seminar: Fellows. (1-0) Cr. 1. F. Prereq: Intended primarily for seniors. Continued preparation for graduate school, professional school, and/or career placement. Research project experience with faculty mentor is required. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

U St 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of graduate college. Independent study on topics of an interdisciplinary nature. Intended primarily for graduate students.

Veterinary Clinical Sciences

Claire Andreassen, Interim Chair of Department

Professors: Andreassen, Betts, Evans, Hoeftle, Hopkins, Jergens, Kraus, Merkley, Nixson, D. Riedesel, Toombs, Wane, Whitley

Professors (Emeritus): Carithers, Clark, Eness, Grier, Jackson, McGee

Professor (Collaborator): Carpenter

Associate Professors: Baldwin, Booth, Fox, McClure, Miles, O’Brien, Reinertson, E. Riedesel, Wagner

Senior Clinician: King

Lecturer: Howard-Martin

Clinicians: Berryessa, Buttrick, Caston, Cerfogi, Galow-Kersh, Howard, Kaufman, Kraus, D. Miller, Morrison, Pridkitt, Beatrice Sponseller, Thompson, Zacharias

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The curriculum of veterinary clinical sciences explores the preventive health care, and diagnosis and treatment of diseases of companion and competitive athletic animals. Veterinary specialists lead didactic and laboratory based learning in the clinical sciences. Experimental based courses are conducted through the Veterinary Medical Center during the fourth year provide the student an opportunity to participate in the application of clinical skills and knowledge

Graduate Study

The department offers work for the degree master of science with major in veterinary clinical science, and minor work for students majoring in other departments. Within the veterinary clinical sciences major, the student may specialize in veterinary medicine, surgery, or theriogenology. The D.V.M. degree or equivalent is prerequisite to a major graduate work.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits and a final examination.

World languages and cultures requirements may be established by the student’s program of study committee.

Courses primarily for professional curriculum students

V C S 305. Shelter Medicine. Cr. 1. S. Prereq: First year classification in Veterinary Medicine or with permission of instructor. An elective course designed to educate the veterinary student about issues of relevance to companion animal population and shelter medicine and wellness. Students may concurrently be enrolled in VCS 306X.

V C S 311. Veterinarian in Society I. Cr. 1. F. Prereq: First-year classification in veterinary medicine. Introduction to the veterinary profession and the various career opportunities available.

V C S 312. Veterinarian in Society II. Cr. 1. F. Prereq: First-year classification in veterinary medicine. A continuation of the Veterinarian in Society series. This course is designed to provide an introduction to the topics of animal behavior, animal welfare, and the human animal bond.

V C S 314. Veterinarian in Society IV. Cr. 1. F. Prereq: Third-year classification in veterinary medicine. A continuation of the Veterinarian in Society series. This course will focus on helping students develop their communication, leadership, team building and conflict resolution skills.

V C S 315. Veterinarian in Society V. Cr. 1. S. Prereq: Third-year classification in veterinary medicine. A continuation of the Veterinarian in Society series. This course will emphasize veterinary law.

V C S 385. Seminar. Cr. R. Repeatable. FS. Prereq: Classification in veterinary medicine. Seminars and case discussions on selected clinical subjects by staff and fourth-year students of the College of Veterinary Medicine. Attendance is required for a passing grade. Satisfactory-fail only.

V C S 391. Clinical Imaging. Cr. 1. F. Prereq: First-year classification in veterinary medicine. Evaluation of morphologic anatomy of the dog and cat utilizing clinical imaging methods - radiography, ultrasonography, computed tomography, magnetic resonance imaging and nuclear imaging. Emphasis will be placed on normal radiographic anatomy.

V C S 492. Orientation for International Experience. (2-0) Cr. 1. Repeatable. S. Prereq: Classification in veterinary medicine. 8 weeks. Predeparture orientation for group study abroad. Cultural considerations for the study abroad experience and a conversational language introduction. Out of class work may be assigned.

V C S 495. Seminar. Cr. R. S. Prereq: Fourth-year classification in veterinary medicine. Seminars and case discussions on selected subjects by staff of the College of Veterinary Medicine and others, including student presentations. Completion of the seminar is required for graduation. Satisfactory-fail only.

V C S 496. International Preceptorship. (0-40) Cr. arr. Repeatable. S. Prereq: Second-year classification in veterinary medicine. International Preceptorships and Study Abroad Group programs. Provides opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses primarily for graduate students, open to qualified undergraduate students

V C S 590. Special Topics. Cr. arr. Repeatable.
A. Medicine
B. Surgery
C. Theriogenology
D. Radiology
E. Anesthesiology

V C S 596. International Preceptorship. (0-40) Cr. arr. Repeatable. FS.SS. S. Prereq: Admission to graduate college. International Preceptorships and Study Abroad Group programs. Provides opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

V C S 599. Creative Component. Cr. arr. Repeatable. S. Prereq: Enrollment in nonthesis master's degree program.

Courses for graduate students

V C S 604. Seminar. Cr. 1. Repeatable. F.S.

V C S 671. Advanced General Surgery. (1-3) Cr. 2. S. Prereq: Permission of instructor. Course designed to discuss and perform advanced surgical procedures in soft tissue, orthopedic and neurological surgery. Minimally invasive surgical procedures and organ transplantation will be included.

V C S 672. Advanced Special Surgery. (1-3) Cr. 2. S. Prereq: Permission of instructor. Innovative techniques in microvascular, thoracic, gastrointestinal, neurological and reconstructive surgery will be investigated.

V C S 676. Advanced Medicine. (2-0) Cr. 2. S. Prereq: 445. Principles of general medicine. A study in depth of factors that contribute to the development of clinical signs as related to the pathogenesis of disease.

A. Medicine
B. Surgery
C. Theriogenology
E. Anesthesiology

Veterinary Diagnostic and Production Animal Medicine

Patrick Halbur, Chair of Department
University Professor: McKeen
Professors: Evans, Halbur, Harris, Hoffman, Hopkins, Hyde, Janke, Osweiler, Shearer, Thompson, Tramel, Uhlenhopp, Yoon, Zimmerman

Professors (Emeritius): Carson, Hartwig, Hopper, Kunesh, Wass

Professor (Collaborator): Thacker

Associate Professors: Engelken, Frana, Kurd, Kersting, Main, Millman, O’Connor, Thompson, Timms, Youngs

Associate Professors (Collaborators): Apley, Polson

Assistant Professors: G. Dewell, Holtkamp, Karriker, Opriessnig, Ramirez, Wang

Assistant Professors (Adjunct): Harmon, Imerman, Kinyon

Assistant Professors (Collaborators): Erdman

Instructors (Adjunct): Clothier, Irwin, Madson, Patterson, Vander Ley

Senior Clinicians: Baker, Cooper, Gorden

Lecturers: Bickett-Weddle, C. Plummer, Sweiger

Clinicians: R. Dewell, Enslay, Gauger, Johnson, Kim, Leuschen, P Plummer, Ramamorothy, Rathey, Schwartz, Strait, West

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

Courses in veterinary diagnostic and production animal medicine provide students with basic and advanced skills in diagnostics, reproduction, medicine, surgery, production, and health management of the major livestock species. Students in the fourth year of the curriculum in veterinary medicine may elect to take advanced courses in beef, dairy, swine, poultry or sheep production medicine. Elective courses may include preceptorships in private practices, at other veterinary schools, in research and disease control laboratories, or in related agribusinesses.

Production animal medicine emphasizes the integration of veterinary medicine with nutrition, genetics, economics, food safety, and other disciplines, enabling graduates to acquire and use a broad knowledge base to support the health and improve the production and efficiency of the food supply chain.

Graduate Study in Veterinary Preventive Medicine

Veterinary Preventive Medicine is a multidisciplinary program focused on the study of health and disease in populations. The various disciplines represented in the program are unified by a common approach based on the application of statistical methods to problem solving in populations. Through their research and course work, students will learn to understand and apply a variety of disciplines, principles, and techniques to population health issues involving environmental, ecological, nutritional, genetic, infectious, or non-infectious diseases.

Graduate study in Veterinary Preventive Medicine will provide valuable skills and experience to persons interested in public health, food safety, food policy, emerging infectious diseases, wildlife health management, and livestock health assurance. A degree in Veterinary Preventive Medicine may be valuable for individuals considering careers in the biological or pharmaceutical industries, government regulatory agencies, public veterinary practice, or international service agencies responsible for public health.

Veterinary Preventive Medicine is an interdepartmental major administered by the Department of Veterinary Diagnostic and Production Animal Medicine (VDPAM) with participating faculty from colleges and departments across the University and collaborators from the National Animal Disease Center (USDA-ARS) and the National Veterinary Services Laboratories (USDA-APHIS) located in Ames, Iowa.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits for thesis and 36 graduate credits for nonthesis and a final examination.

Graduate Study in Veterinary Diagnostic and Production Animal Medicine

Veterinary Diagnostic and Production Animal Medicine masters degree is a program focused on the assessment of health and disease in populations of animals and the development of methods to study populations of animals. The various disciplines represented in the program are unified by a common approach based on the application of epidemiological and statistical methods to enable quantitative evaluation and critical appraisal of clinical and research data to continuously establish best production practices for health assurance; further to provide the principles and tools for design and execution of hypothesis-based research in production animal units or in research trials supporting animal health issues. Through their research and course work, students will learn to understand and apply a variety of disciplines, principles, and techniques to population health issues involving environmental, ecological, nutritional, genetic, infectious, or non-infectious diseases. This includes gaining knowledge of current principles of diagnostic evaluation and critical to best support decisions about animal health programs and practices.

Graduate students will be provided experiences in production animal medicine by involvement in the animal health and food supply decision making processes of modern production systems.

Graduate study in Veterinary Diagnostic and Production Animal Medicine will provide valuable skills and experience to persons interested in public health, food safety, food policy, emerging infectious diseases, wildlife health management, and livestock health assurance. A degree in Veterinary Diagnostic and Production Animal Medicine may be valuable for individuals considering leadership positions in food supply veterinary medicine.

Veterinary Diagnostic and Production Animal Medicine is administered by the Department of Veterinary Diagnostic and Production Animal Medicine (VDPAM) with participating faculty from colleges and departments across the University and collaborators from the National Animal Disease Center (USDA-ARS) and the National Veterinary Services Laboratories (USDA-APHIS) located in Ames, Iowa.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits for thesis and 36 graduate credits for nonthesis and a final examination.
Courses primarily for professional curriculum students

VDPAM 309. Intro to Production Animal Informatics. (1-0) Cr. 1. S. The fundamentals of how clinical, diagnostic, production and financial information is obtained and used by production animal operations. Students will be expected to create and use spreadsheets for manipulating and summarizing data. They will also acquire knowledge where to find inexpensive and readily available resources with information on how to use spreadsheets and other software. Students will also have the opportunity to work with different record keeping programs used by swine, beef and dairy operations.

VDPAM 310. Intro to Production Medicine. Cr. 2. S. Prereq: Currently enrolled in Vet Med II. The role of the veterinarian in the management of animal health and production in dairy and beef cattle herds, beef feedlots and swine herds. Provides veterinary students with a starting point to understand the principles and techniques that are the basis of food-animal health management programs.

VDPAM 311. Introduction to Food Animal Clinics. (1-1) Cr. 1. Repeatable. S. Prereq: Vaccinated for rabies, enrolled in Veterinary Medicine. A one hour per week discussion of current cases in the food animal hospital and topics of interest. Student will learn physical examination of the food animal as well as animal handling techniques and record keeping procedures. Students will be able to participate in activities related to cases in the food animal hospital and the VDPAM Department. Satisfactory-fail only.

VDPAM 312. Veterinarian in Society II. (Cross-listed with V C S). (1-0) Cr. 1. S. Prereq: First-year classification in veterinary medicine. A continuation of the Veterinarian in Society I course, which will be on delivery of individual animal care and the University veterinarian in delivering health care to cattle producers to identify areas for improving profitability, health, and sustainability. Enrolling in the class has both a lecture and lab component and students should be used. The students will learn what software systems used in swine production will be provided. Students will learn to objectively evaluate the validity of information that is presented to them and also be able to make practical and useful recommendations regarding the types of information tools that can/ should be used. The students will learn what software and information systems are available and be able to critically evaluate them.

VDPAM 426. Veterinary Toxicology. (Dual-listed with 526). (3-0) Cr. 3. S. Prereq: Third-year classification in veterinary medicine. Study of toxicological diseases of domestic animals emphasizing clinical recognition, circumstances of poisoning, differential diagnosis with clinical and laboratory data, therapeutic procedures, preventive management and public health implications. Supplemented with case-based materials.

VDPAM 449. Advanced Swine Production Informatics. (1-0) Cr. 1. S. Prereq: 309. Advanced coverage of concepts related to collection, manipulation, analysis and reporting of information used by swine production companies. Production, financial, diagnostic and clinical data will be covered in the course. Hands-on experience with computer software and information systems used in swine production will be provided. Students will learn to objectively evaluate the validity of information that is presented to them and also be able to make practical and useful recommendations regarding the types of information tools that can/ should be used. The students will learn what software and information systems are available and be able to critically evaluate them.

VDPAM 451. Clinical Laboratory Practicum. (0-4) Cr. arr. Repeatable. F.S. Prereq: Fourth-year classification in veterinary medicine. 10 students per section. Laboratory.

VDPAM 458. Food Animal Field Service. (40-0) Cr. 2. F.S.SS. Prereq: Fourth year classification in Veterinary Medicine or Permission of Instructor. Elective course in food animal field services. Students will assist the University veterinarian in delivering health care production management services to the ISU livestock farms and other selected farms in the region. Focus will be on delivery of individual animal care and establishment of best practices for herd management of dairy production systems at the university and in the region.
VDPAM 477. Food Animal Medicine and Surgery. Cr. arr. Repeatable. Prereq: Fourth-year classification in veterinary medicine. Clinical assignment focused on the management of food animal medicine and surgery cases. Specific instruction in clinical evaluation of cases coupled with appropriate diagnostic testing and therapeutic intervention will be emphasized. Additional instruction will be provided in disease prevention, intensive care and management of food animal species. Particular emphasis will be placed on appropriate on-label and extra-label drug usage in food animal species.

VDPAM 479. Applied Swine Production Medicine. (10-40) Cr. arr. Repeatable. F.S.S. Prereq: 310. Advanced course in swine production medicine with emphasis on herd management, production analysis, and problem solving. Forty hours clinical experience per week. Assignments will include preceptorships with a practicing veterinarian and/or a production unit.

VDPAM 480. Swine Production Medicine. (15-25) Cr. 2. Repeatable. F.S.S. Prereq: 310 or permission of instructor. Two week clinical rotation in swine production medicine. Students will be assigned to take the lead in investigating field based client cases with supervision of the instructors. Develop critical thinking skills that will allow students to apply concepts of herd management, production analysis, economic analysis, and disease prevention in addressing client cases. Variable amounts of travel to farm sites will be required with the potential for rare overnight stays.

A. Assignment with practicing veterinarian and/or production unit
B. Bull Breeding Soundness at Great Plains Veterinary Educational Center (GPVEC)
C. Calving at GPVEC
D. Feedlot Management at GPVEC
E. Weaning Management at GPVEC
F. Pregnancy Examination at GPVEC
G. Bovine Reproduction at GPVEC

I. Stocker/Feedlot Management

VDPAM 483. Beef Production Medicine. (15-20) Cr. 2. F.S. Prereq: 310. Two week advanced clinical rotation in beef production medicine. Fifteen hours recitation/discussion and 20 hours clinical experience per week. This course is designed to expose students to cow-calf and feedlot production concepts. The activities scheduled for the rotation depend greatly on the specific rotation and what is possible. The class incorporates field trips. Students should anticipate that travel is required and overnight stays may be required. These field trips can vary in length from several hours to several days and may include weekends. As of 2006, one week of the rotation is spent at the Great Plains Veterinary Education Center, Clay Center, NE. Students should, therefore, plan accordingly and contact the instructor, immediately, if they anticipate a conflict. Students should not schedule Grand Rounds during this rotation.

VDPAM 484. Dairy Production Medicine. (15-20) Cr. 2. F.S. Prereq: Fourth-year classification in veterinary medicine, 310. Two week course in dairy production medicine combining class time with multiple on-farm visits covering various management aspects (DHA, DC305 & PC & Cattle record analysis, calf rearing through lactating cows, reproduction programs, udder health and milk quality, biosecurity, welfare, nutrition and cow comfort) for a wide variety of dairy operations. Students will learn the latest in dairy management by reviewing current topic articles and gain experience in farm evaluation through a group project. Fifteen hours recitation/discussion and 20 hours clinical experience per week.

VDPAM 485. Applied Dairy Production Medicine. (40-0) Cr. arr. Repeatable. F.S.S. Prereq: VDPAM 484. Advanced course in dairy production medicine with emphasis on herd management, production analysis, and problem solving. Forty hours clinical experience per week. Assignments will include preceptorships with a practicing veterinarian and/or a production unit.

VDPAM 486. Introduction to Small Ruminant Production Medicine. (13-6) Cr. 1. S. Prereq: Classification in veterinary medicine. Herd health, disease monitoring and production analysis and typical management systems will be emphasized in lecture. Students will be required to learn and demonstrate proficiency at typical veterinary procedures such as blood collection, breeding soundness exams and provide evaluation with Students will also be expected to develop herd health programs for individual producers. Field trip required.

VDPAM 487. Livestock Disease Prevention. (3-0) Cr. 3. F. A survey of diseases of large domestic animals, including discussion of causes, transmission, and control. Designed for students majoring in agricultural sciences.

VDPAM 489. Issues in Food Safety. (Cross-listed with An S, FS HH, HRI). (1-0) Cr. 1. S. Prereq: Credit or enrollment in FS HH 101 or 272 or HRI 232; FS HH 419 or 420; FS HH 403. Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

VDPAM 491. Advanced Ruminant Nutrition. (30-10) Cr. 3. F. Prereq: 350 recommended. Beef and dairy nutrition from the calf to the adult, lactating cow. Balanced rations for beef cow-calf, feedlot & dairy operations. Introduces different feedstuffs and forage varieties to determine those that are best suited for bovine diets.

VDPAM 492. Orientation for International Experience. (2-0) Cr. 1. S. Prereq: Classification in veterinary medicine. Predeparture orientation for group study abroad. Cultural considerations for the study abroad experience and a conversational language introduction. Out of class work will be assigned.

VDPAM 494. Advanced Dairy Production Medicine II. (20-20) Cr. 2. S. Prereq: 484 or permission of instructor. Advantages and disadvantages in investigating dairy herb problems relating to milk quality or nutrition. Milk quality and nutrition troubleshooting will be taught through the combination of lecture and on-farm investigations. Students will combine lecture knowledge, data acquired from on-farm investigations and record analysis to generate management plans.

VDPAM 496. International Preceptorship. (40-0) Cr. arr. Repeatable. F.S.S. Prereq. Second-year classification in veterinary medicine. International Preceptorships and Study Abroad Group programs. This course will provide opportunities for students to be involved in applied clinical production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses primarily for graduate students, open to qualified undergraduate students

VDPAM 507. Evidence Based Clinical Decision Making. (Dual-listed with 407). (1-0) Cr. 1. S. Prereq: Permission of instructor. Discussion, lectures and laboratories to assess the quality and significance of medical evidence in making informed decisions about the treatment of individual animals and animal populations.

VDPAM 514. Veterinary Practice Entrepreneurship. (Dual-listed with 414). Cr. 2. S. To provide a formal exposure to the entrepreneurial and business skills necessary to own and operate a successful veterinary practice.

VDPAM 526. Veterinary Toxicology. (Dual-listed with 426). (Cross-listed with Tox). (3-0) Cr. 3. S. Prereq: Permission of instructor: A study of the disease processes in animals caused by toxins and the use of different diagnostic and therapeutic procedures. Emphasis is on use of clinical cases to define mechanism of poisoning, diagnostic and management procedures and public health and food safety issues.

VDPAM 551. Advanced Veterinary Diagnostic Imaging. (0-3) Cr. arr. Repeatable. F.S.S. Prereq: 455. Necropsy techniques of animals with emphasis on gross and microscopic lesion description and microbiological diagnosis of disease in food animals.

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree of doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Microbiology and Preventive Medicine provides instruction on pathogenic bacteria, fungi, and viruses and their interaction with host animal species. Principles and applications of infectious diseases, immunity to disease, diagnostic methods for infectious diseases, and vaccination are covered. Principles and applications of epidemiology, public health, preventive veterinary medicine, regulatory veterinary medicine and food safety are also emphasized.

Graduate Study

The department offers opportunities for the degree doctor of philosophy with a major in veterinary microbiology. A specialization in preventive medicine is an option for this degree. Graduates in the Veterinary Microbiology and Preventive Medicine programs have a broad understanding of the fundamental processes involved in infectious diseases, pathogenesis and immunology. They are able to effectively establish research programs, which involve complex biological systems and disease syndromes. They are also prepared to address microbial-based social, ethical and environmental problems. Graduates acquire effective written and oral communication skills which lead to successful research and teaching careers in the medical and veterinary sciences. The department also offers work towards the master of science with majors in veterinary microbiology or veterinary preventive medicine. A non-thesis master's option is available for majors in preventive medicine. Courses are open for students majoring in other graduate programs.

Prerequisite to graduate study is completion of coursework in general microbiology, biology, biochemistry, mathematical sciences, and physics. Candidates for the majors in veterinary microbiology should possess an undergraduate degree in biomedical science with emphasis in medical microbiology or the D.V.M. degree. Candidates for the major in preventive medicine should possess the D.V.M. degree.

The department also participates in the interdepartmental majors and programs in genetics, immunobiology, and MCBB (molecular, cellular, and developmental biology; see Index).

Each graduate student must demonstrate proficiency in English composition within two semesters in residence.

Courses primarily for professional curriculum students

V MPM 378. Case Study IV. (2-0) Cr. 1. S. Prereq: Second-year classification in veterinary medicine. Case-based applied learning that relates to the basic science courses. Emphasis on early integration of basic and clinical science concepts.

V MPM 380. Veterinary Immunology. (2-0) Cr. 2. S. Prereq: First-year classification in veterinary medicine. Structure and function of the immune system in animals.

V MPM 386. Veterinary Microbiology. (3-5) Cr. 5. F. Prereq: Second-year classification in veterinary medicine. Bacteria and fungi: of veterinary importance with emphasis on mechanisms of disease production and laboratory diagnostic procedures.

V MPM 388. Public Health and the Role of the Veterinary Profession. (3-0) Cr. 3. S. Prereq: Second-year classification in veterinary medicine. Fundamental epidemiology, zoonotic diseases, public health, food safety, other public health topics.

V MPM 390. Topics in Veterinary History. (2-0) Cr. 1. S. 8 weeks. Significant persons, noteworthy events, and pivotal scientific discoveries in the course of the development and advancement of veterinary medicine from ancient times to the present.

V MPM 409. Infectious Diseases of Captive Wild Animals. (1-0) Cr. 1. F. Prereq: Second-year classification in veterinary medicine. Focus on infectious diseases (bacterial, viral, and mycotic) of non-human primates, birds, ruminants, cold-blooded animals, marine mammals, and carnivores.

V MPM 437. Infectious Diseases and Preventive Medicine. (3-0) Cr. 3. S. Prereq: Third-year classification in veterinary medicine. Etiology, epidemiology, laboratory diagnosis, regulatory control and preventive medicine aspects of the infectious diseases of swine, sheep, goats, cattle and horses.

V MPM 491. CDC Epidemiology Elective Preceptorship. Cr. 6. F.S.S.S. Introduction to preventive medicine, public health and the principles of applied epidemiology within the working atmosphere of the Centers for Disease Control.

V MPM 496. International Preceptorship. (0-0) Cr. arr. Repeatable. F.S.S.S. Prereq: Second-year classification in veterinary medicine. International Preceptorships and Study Abroad group programs. This course will provide opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

Courses primarily for graduate students, open to qualified undergraduate students

V MPM 520. Medical Immunology I. (4-0) Cr. 4. F. Prereq: Micro 310 or V MPM 386, 3 credits in biochemistry. Nature of the immune system and its role in health and disease. Credit for either V MPM 520 or 575, but not both may be applied toward graduation.

V MPM 536. Zoonoses and Environmental Health. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 386, 387 and 388 or equivalent or permission of instructor. Pathogenesis and control of zoonotic diseases. Factors influencing transmission and survival of pathogenic microorganisms in the environment.

A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.S.S.)

B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunoprecipitation, and monoclonal antibody production. (S.S.)

C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)

D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)

E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F)

A. Professional Practices in Research. (Cr. 1.0) Good scientific practices and professional ethics in the life sciences.

B. Intellectual Property and Industry Interactions. (Cr. 0.5) Ethical and legal issues facing life scientists involved in research interactions with industry.

V MPM 575. Immunology. (Cross-listed with Micro, MICO). (3-0) Cr. 3. S. Prereq: 310. Humoral and cellular immune functions. Interactions between cells and factors of the immune system that result in health and disease. Micro 475L optional. Credit for either MPM 575 or V MPM 520, but not both, may be applied toward graduation.

V MPM 586. Medical Bacteriology. (Cross-listed with Micro, MICO). (4-0) Cr. 4. Prereq: Permission of instructor. Bacteria associated with diseases of vertebrates, including virulence factors and interaction of host responses.

V MPM 586L. Medical Bacteriology Laboratory. (4-0) Cr. 2. F. Prereq: credit or enrollment in 586 or 625. Procedures used in isolation and identification of pathogenic bacteria, including molecular and genetic techniques used in research.

V MPM 587. Animal Virology. (4-0) Cr. 4. Prereq: Permission of instructor. The biology of animal viruses and pathogenic mechanisms in viral diseases.

V MPM 587L. Laboratory in Animal Virology. (0-3) Cr. 1. Prereq: Permission of the instructor. Basic laboratory techniques in virology.

V MPM 596. International Preceptorship. (0-0) Cr. arr. Repeatable. F.S.SS. Prereq: Admission to graduate college, International Preceptorship and Study Abroad Group programs. This course will provide opportunities for students to be involved in applied clinical, production, and research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

V MPM 599. Creative Component. Cr. arr. Prereq: Nonthesis M.S. Option only. A written report based on laboratory research, library reading, or topics related to the student's area of specialization and approved by the student's advisory committee.

Courses for graduate students

V MPM 604. Seminar. (1-0) Cr. 1. Repeatable. F. Satisfactory-fail only.

V MPM 615. Molecular Immunology. (Cross-listed with BBMB, Micro). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: BBMB 405 or 502. Current topics in molecular aspects of immunology; T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

V MPM 625. Mechanisms of Bacterial Pathogenesis. (Cross-listed with Micro). (4-0) Cr. 4. Alt. S., offered 2011. Prereq: Credit in Biochemistry and Microbiology. Review of current concepts in specific areas of microbial pathogenesis including the genetic basis for bacterial disease, genetic regulation and control of virulence factors and their mechanisms of action, and host-pathogen interactions at the cellular and molecular levels. The application of microbial genetics to understanding pathogenesis will be included.

A. Immunology

B. Infectious Diseases

V MPM 698. Seminar in Molecular, Cellular, and Developmental Biology. (Cross-listed with MCDB, BBMB, GDCB, Micro). (2-0) Cr. arr. Repeatable. F. Student and faculty presentations.

Veterinary Pathology

www.vetmed.iastate.edu/departments/vetpath/

Claire Andreessen, Chair of Department

Distinguished Professor (Emeritus): Cheville

University Professor (Emeritus): Kluge

Professors: Ackermann, Andreassen, Bender, Halbur, Haynes, Hyde, Janke, Myers, Osweiler

Professors (Emeritus): Carson, Greve, Hagemoser, Holter, Hopper, Jeska, Ledet, Miller, Moon, Niyo, Seaton, Staht

Professors (Collaborators): Arp, Brogden, Meador, Sasseville

Associate Professors: Beetham, Jarvinen, Jones, Yaeger

Associate Professors (Collaborators): Olsen, Perry

Assistant Professors: Daniels, Fales, Garcia-Tapia, Hostetter, Petersen

Assistant Professors (Adjoint): van Geelen

Assistant Professors (Collaborators): Greenlee, Harris, Meyerholz, Palmer, Thacker, Thomsen

Instructors (Adjoint): Burrough, Johnson, Olivier, Ostojic, Pillatzki, Plattner

Lecturer: Fishery

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree of Doctor of Veterinary Medicine, see Veterinary Medicine, Curriculum. The Department of Veterinary Pathology offers a systematic study of basic disease mechanisms with emphasis on the changes in gene expression, cells, tissues, organs, and body fluids associated with disease. The theory and practice of veterinary pathology, veterinary clinical pathology, veterinary parasitology, veterinary toxicology, and related disciplines provide the basis for accurate diagnosis and a rational approach to the treatment and prevention of animal diseases.

Graduate Study

The department offers work for the degree master of science and doctor of philosophy with a major in veterinary pathology. As an option, students may choose an area of specialization in pathology, veterinary anatomic pathology, veterinary clinical pathology, veterinary toxicology, or veterinary parasitology (www.vetmed.iastate.edu/departments/vetpath/default.aspx?id=2562&ekmensel =c57afa7b_166_170_2562_1). The master of science degree is available on a thesis or nonthesis basis in the veterinary pathology major with or without an area of specialization.

For the ACVP training track (residency) of the anatomic or clinical pathology graduate program designed to train veterinary pathologists, the student must have a funded position within the Department of Veterinary Pathology. If the student does not have a funded position or is not enrolled in the departmental degree program, enrollment in courses pertaining to the residency program and activities that support the residency program must have the approval of the Department Chair of Veterinary Pathology and the head of the department residency training program.

Graduates have a broad understanding of the mechanistic basis of disease pathogenesis. They are able to communicate with clinicians, other scientists, and other colleagues on scientific matters, and with the general public on related science policy matters. Graduates are able to address complex problems facing the agricultural and biomedical sciences, and comparative medicine, and are able to make appropriate diagnoses and investigations of animal diseases. They consider ethical, social, legal and environmental issues, and are skilled at carrying out research, communicating research results, and writing concise and competitive grant proposals.

Collaborative work is recommended in other departments in the College of Veterinary Medicine or departments or programs in other colleges. The department participates in the interdepartmental program in immunobiology (www.immunobiology.iastate.edu) and the interdepartmental major in veterinary anatomic or clinical pathology (www.vetpath.iastate.edu). (See Index.)

A veterinary degree (doctor of veterinary medicine or equivalent) is required for training in Veterinary Anatomic Pathology and Veterinary Clinical Pathology. Other specializations do not require the veterinary degree. A minimum score of 550 paper-based (213 computer-based; 79 internet based) is required on the TOEFL examination for students whose native language is not English. Scores on the standardized Graduate Record Examination (GRE) General Test are required of students not having a veterinary degree from the United States or Canada. The GRE General Test is strongly recommended for all other applicants. A foreign language requirement will be determined by the
Courses primarily for professional curriculum students

V Pth 342. Anatomic Pathology I. (Dual-listed with 542). (2-2) Cr. 3. S. Prereq: First-year classification in veterinary medicine. Basic pathology with emphasis on disease in animals and introduction to diseases by system.

V Pth 372. Anatomic Pathology II. (3-3) Cr. 4. F. Prereq: 342. Response to injury by each body system.

V Pth 377. Case Study III. (4-0) Cr. 2. F. Prereq: Second-year classification in veterinary medicine. Clinical applications of the basic sciences taught concurrently in the fall semester of the second year curriculum in veterinary medicine.

V Pth 401. Basics of Medical Terminology. (1-0) Cr. 1 F. 8 weeks, offered first half semester only. Discussion of prefixes, suffixes, and roots (mostly from Latin and Greek) that comprise medical terms.

V Pth 409. Introduction to Veterinary Cytology and Laboratory Techniques. (0-2) Cr. 1. S. Prereq: Third-year classification in veterinary medicine. Description, interpretation, and identification of cellular preparations from tissues and body fluids.

V Pth 410. Llama Medicine. (1-0) Cr. 1. S. Prereq: Second or third year classification in veterinary medicine. Introduction to basic camelid medicine, including anatomy, behavior, restraint, husbandry, health, common diseases, surgical conditions, and anesthesia protocols.

V Pth 425. Clinical Pathology. (2-4) Cr. 4. S. Prereq: 342 or 542; permission of instructor. Emphasis is placed on processes and systems that comprise medical terms.

Courses primarily for graduate students, open to qualified undergraduate students

V Pth 530. Teaching and Learning in Veterinary Medical Education. (3-0) Cr. 3. F. Study of principles of teaching and learning as they relate to veterinary medical education. These include: theories of learning, analyzing content/learners/context, identifying goals, identifying appropriate instructional strategies (specific to medical education), matching assessment processes to goals and strategies, common curricular approaches and decision-making processes in medical education, and the scholarship of teaching and learning for veterinary medical educators.

V Pth 542. Anatomic Pathology I. (Dual-listed with 342). (2-2) Cr. 3. S. Prereq: Graduate classification and Biol 352 or equivalent for graduate credit, permission of instructor. Basic pathology with emphasis on disease in animals and introduction to diseases by system.

V Pth 548. Diagnostic Parasitology Laboratory, Cr. 1-3. F.S.SS. Prereq: 376 or 576. Contact hours are (0-3 to 0-9). A laboratory experience in the technical and applied aspects of veterinary parasitology.

V Pth 549. Clinical Pathology Laboratory, (3-0) Cr. 1. Repeatable. F.S.SS. Prereq: 457; permission of instructor. Laboratory procedures and clinical interpretations with emphasis on hematology, cytology, and clinical chemistry. Satisfactory-fail only.

V Pth 550. Surgical Pathology Laboratory, Cr. 1-3. Repeatable. F.S.SS. Prereq: 570 or 571; permission of instructor. Contact hours are (0-3 to 0-9). Diagnosis of lesions in biopsy specimens; classification of neoplasms. Course includes rotation through departmental biopsy service and review of selected cases from departmental archives. Satisfactory-fail only.

V Pth 551. Postmortem Pathology Laboratory, Cr. 1-3. Repeatable. F.S.SS. Prereq: 542; permission of instructor. Contact hours are (0-3 to 0-9). Necropsy techniques of animals with emphasis on gross and microscopic lesions and diagnosis. Satisfactory-fail only.

V Pth 554. Ethics in Scientific Research and Writing. (1-0) Cr. 1. Alt. SS., offered 2010. Prereq: Graduate classification. Ethical conduct in biomedical research, criticism, writing, and adherence to regulations. Satisfactory-fail only.

V Pth 570. Systemic Pathology I. (2-4) Cr. 4. Alt. F, offered 2010. Prereq: 342 or 542; permission of instructor. Pathology of the respiratory, reproductive, endocrine, musculoskeletal, and cardiovascular systems. Emphasis on pathogenesis and anatomic pathology correlated with interpretive clinical pathol

V Pth 571. Systemic Pathology II. (2-4) Cr. 4. Alt. F., offered 2009. Prereq: 342 or 542; permission of instructor. Pathology of the integumentary, urinary, digestive, lymphoid, and nervous systems and special senses. Emphasis on pathogenesis and anatomic pathology correlated with interpretive clinical pathology where appropriate.

V Pth 576. Veterinary Parasitology. (Dual-listed with 376). (3-3) Cr. 4. F. Prereq: Graduate classification and 542. Parasitic diseases of domestic animals and their control.

V Pth 590. Special Topics. Cr. 1-4. Repeatable. F.S.SS. Prereq: Permission of instructor. A. Veterinary Pathology B. Veterinary Parasitology C. Veterinary Toxicology

student’s program of study committee with the approval of the departmental chair. The Graduate English Examination is a graduate college requirement for native English speakers.

The M.S. thesis degree in veterinary pathology, or with or without an area of specialization, requires a minimum of 30 graduate credits. Followings completion of all other requirements, a comprehensive final examination is administered covering all graduate work including the thesis. The examination is typically oral, but a written component may be specified by the program of study committee. The degree candidate must submit a thesis, including at least one manuscript suitable for publication, to the committee members and departmental chair at least two weeks prior to the final examination. The departmental requirement for graduate courses includes 3 credits of basic biological sciences (biochemistry, genetics, cell biology), 4 credits of statistics (Stat 401), 4 credits of systemic pathology (from V Pth 570 or 571), 1 credit of postmortem pathology (V Pth 551), 1 credit of seminar (V Pth 650), and a significant number of research credits (V Pth 699).

The M.S. nonthesis degree in veterinary pathology, or with or without an area of specialization, requires a minimum of 40 graduate credits including at least 10 graduate credits earned outside the department. Every nonthesis master’s degree program requires evidence of individual accomplishment demonstrated by completion of a creative component, special report, or scientific study. A minimum of 3 credits of such independent work (V Pth 599) and a practical diagnostic examination (V Pth 606) corresponding to the area of specialization are required on every program of study. The final examination is comprehensive and consists of written and oral questions. The departmental requirement for graduate courses includes those for the M.S. thesis degree plus additional courses corresponding to the area of degree emphasis of specialization.

Contact the department for a more complete list of requirements and information on areas of specialization.

The Ph.D. degree in veterinary pathology, with or without an area of specialization, requires a minimum of 72 graduate credits including at least 12 graduate credits earned outside the department. The preliminary examination, consisting of written and oral components, is comprehensive and not restricted to the graduate courses. The degree candidate must submit a dissertation, including at least two manuscripts suitable for publication, to the committee members and departmental chair at least two weeks prior to the final examination. The final examination is primarily a defense of the dissertation, but it may include questions on other areas of specialized knowledge. The department also offers a combined DVM/Ph.D. program designed for completion of courses for the Ph.D. degree in Veterinary Pathology simultaneously with study in the professional curriculum in the College of Veterinary Medicine.

Contact the department for a more complete list of requirements for the Ph.D. degree and information on areas of specialization.
Courses for graduate students

V Pth 606. Diagnostic Interpretation. Cr. R. F.S.SS. Prereq: permission of instructor. A comprehensive examination in the diagnostic description and interpretation of case materials relevant to veterinary pathology and areas of specialization for the graduate degree preliminary examination.

A. Veterinary Pathology
B. Veterinary Parasitology
C. Veterinary Toxicology
D. Veterinary Clinical Pathology

V Pth 656. Cellular and Molecular Pathology II. (Cross-listed with Toxi). (3-0) Cr. 3. Alt. S. offered 2010. Prereq: Graduate course in biochemistry, genetics, or cell biology. Cellular and molecular mechanisms of carcinogenesis.

V Pth 679. Histopathology of Laboratory Animals. (0-4) Cr. 2. Alt. S. offered 2010. Prereq: 570 or 571; permission of instructor. Study of microscopic lesions in laboratory animals with emphasis on description, etiology, pathogenesis, and diagnosis.

V Pth 699. Research. Cr. arr. Repeatable. Course restricted to graduate program within the department.

A. Veterinary Pathology
B. Veterinary Parasitology
C. Veterinary Toxicology
D. Veterinary Clinical Pathology

Women’s Studies

www.public.iastate.edu/~wsprogram/homepage.html

(Interdisciplinary Program)

Diane Price Herndl, Program Director
Julie Snyder-Yuly, Assistant Director
Core Faculty: Leslie Bloom (Curriculum & Instruction), Chrisy Moutsatsos (Anthropology), Anastasia Prokos (Sociology).

Undergraduate Study

Women’s Studies in the College of Liberal Arts and Sciences is a cross-disciplinary program in which students may elect a minor or a major. Women’s Studies provides an opportunity for students to examine women’s roles, contributions, and status in social and cultural context and to investigate a variety of disciplines from feminist perspectives. Women’s Studies creates an understanding that interrelated factors — e.g., race, ethnicity, class, age, disability, religion, national origin, and sexual orientation — inform knowledge of women’s history, culture, and social roles. Women’s Studies seeks to improve critical thinking and to provide students with the intellectual means to question prevailing assumptions. This course will encourage students to explore the contexts and ideological origins of knowledge and to examine the relationship between knowledge and power in society. It promotes social responsibility by examining the connections between personal experience and political activity, and validates student contributions and voices. Women’s Studies graduates are skilled in critical thinking, research methods, and effective communication. Because they have developed a thorough understanding of gender, race, and class, they can understand and work effectively with employers, colleagues, and clients to analyze and address complex social problems. Women’s Studies graduates acquire strong backgrounds for careers in such areas as counseling, education, human resources, public policy, politics, business, or law. The program includes core courses in Women’s Studies and cross-listed courses in anthropology, art history, classical studies, economics, English, history, health and human performance, political science, psychology, religion, sociology, speech communication, and world languages and cultures. An undergraduate major requires 33 credits of core, cross-listed, and independent study courses. Women’s Studies majors must satisfy the following requirements:

1. 21 credits selected from women’s studies core courses (W S).

A. Required core courses: W S 201, 301, 401 and 402. Students must also choose between a thesis, W S 499 (3 cr.) or an internship, W S 491 (3 cr.)

B. The remaining 6 credits should be chosen from the Women’s Studies core courses: W S 203, 205, 302, 320, 350, 425, 435, 450 (may be taken more than once), and 490.

C. No more than 6 credits of W S 490 may be counted toward the W S major.

2. 12 credits selected from W S cross-listed courses or W S core courses.

Women’s Studies majors must also declare either a minor or a second major in a different program or department. Communication Proficiency requirement: The Women’s Studies major requires an average grade of C- or better in English 150 and 250 (or 250H) and W S 301.

Graduate Study

The graduate minor in Women’s Studies is designed to provide students with knowledge of the theories and methods within a variety of approaches in feminist scholarship. The program seeks to integrate and synthesize knowledge from many disciplines and to offer students opportunities for systematic study of gender and women’s experiences and perspectives in all knowledge fields. Students will be prepared to take leadership roles in supporting gender equity and diversity in their careers in education, social service work, business, law, public policy, governmental and non-governmental organizations, and research.

Undergraduate Study

Women’s Studies in the College of Liberal Arts and Sciences is a cross-disciplinary program in which students may elect a minor or a major. Women’s Studies provides an opportunity for students to examine women’s roles, contributions, and status in social and cultural context and to investigate a variety of disciplines from feminist perspectives. Women’s Studies creates an understanding that interrelated factors — e.g., race, ethnicity, class, age, disability, religion, national origin, and sexual orientation — inform knowledge of women’s history, culture, and social roles. Women’s Studies seeks to improve critical thinking and to provide students with the intellectual means to question prevailing assumptions. This course will encourage students to explore the contexts and ideological origins of knowledge and to examine the relationship between knowledge and power in society. It promotes social responsibility by examining the connections between personal experience and political activity, and validates student contributions and voices. Women’s Studies graduates are skilled in critical thinking, research methods, and effective communication. Because they have developed a thorough understanding of gender, race, and class, they can understand and work effectively with employers, colleagues, and clients to analyze and address complex social problems. Women’s Studies graduates acquire strong backgrounds for careers in such areas as counseling, education, human resources, public policy, politics, business, or law. The program includes core courses in Women’s Studies and cross-listed courses in anthropology, art history, classical studies, economics, English, history, health and human performance, political science, psychology, religion, sociology, speech communication, and world languages and cultures. An undergraduate major requires 33 credits of core, cross-listed, and independent study courses. Women’s Studies majors must satisfy the following requirements:

1. 21 credits selected from women’s studies core courses (W S).

A. Required core courses: W S 201, 301, 401 and 402. Students must also choose between a thesis, W S 499 (3 cr.) or an internship, W S 491 (3 cr.)

B. The remaining 6 credits should be chosen from the Women’s Studies core courses: W S 203, 205, 302, 320, 350, 425, 435, 450 (may be taken more than once), and 490.

C. No more than 6 credits of W S 490 may be counted toward the W S major.

2. 12 credits selected from W S cross-listed courses or W S core courses.

Women’s Studies majors must also declare either a minor or a second major in a different program or department. Communication Proficiency requirement: The Women’s Studies major requires an average grade of C- or better in English 150 and 250 (or 250H) and W S 301.

Undergraduate students may minor in Women’s Studies by taking 15 semester hours of Women’s Studies classes, including W S 201, 301 and one 400 level core Women’s Studies course, plus 6 additional credits of core or cross-listed courses. Any student interested in a minor or major in Women’s Studies should contact the Assistant Director of the program.

Graduate Study

The graduate minor in Women’s Studies is designed to provide students with knowledge of the theories and methods within a variety of approaches in feminist scholarship. The program seeks to integrate and synthesize knowledge from many disciplines and to offer students opportunities for systematic study of gender and women’s experiences and perspectives in all knowledge fields. Students will be prepared to take leadership roles in supporting gender equity and diversity in their careers in education, social service work, business, law, public policy, governmental and non-governmental organizations, and research.

The graduate minor requires 12 credits for students enrolled in a master’s or a doctoral degree program. Students are required to take either W S 510 or W S 620; taking both is strongly recommended. Students will also take two or three electives selected from the list of core and cross-listed Women’s Studies courses approved for graduate study. At least one member of the Women’s Studies faculty will serve on the program of study for doctoral students. A list of eligible faculty members may be obtained from the Director of the Women’s Studies program. Women’s Studies has 70 affiliated faculty members from departments and programs throughout the University.

Courses primarily for undergraduate students

W S 201. Introduction to Women’s Studies. (3-0) Cr. 3. Introduction to the interdisciplinary field of Women’s Studies. Contemporary status of women in the U.S. and worldwide from social, economic, historical, political, philosophical and literary perspectives. Analysis of intersection of gender, race, class, and sexuality. Subject matter includes work, health, sexuality, and violence. Foundation for the other courses in the program.

W S 203. Introduction to Lesbian Studies. (3-0) Cr. 3. Study of contemporary and historic lesbian cultures and communities from a US and international perspective. Addresses issues of race, class, gender and sexuality as they intersect with the formation of lesbian identities. Explores who identifies as lesbian and how that dis/enable political resistance and formation of community.

W S 205. Introduction to Queer Studies. (3-0) Cr. 3. F. Prereq: Engl 160. Interdisciplinary study of issues relating to lesbian, gay, bisexual, transgender, and queer identities in the U.S. Attention will be given to race and socioeconomic class.

W S 222. Leadership Styles and Strategies in a Diverse Society. (Cross-listed with LAS). (3-0) Cr. 3. Prereq: Sophomore classification. Develop and practice leadership skills through understanding personal leadership styles, leadership theory and communication theory, including how they relate to gender issues and cultural diversity; exploring personality types, communication styles, and leadership styles, networking and developing mentoring relationships; setting goals and participating in leadership opportunities and service.

W S 258. Human Reproduction. (Cross-listed with BioII). (3-0) Cr. 3. F. Prereq: Biol 101, or 155, or 211. Anatomy and physiology of human reproductive systems, including fertility, pregnancy, and delivery.
leadership, gender differences in leadership styles, and the perceptions and expectations about women’s leadership. Multiple perspectives of women’s leadership will be highlighted through lectures, readings, videos, guest speakers.

W S 336. Women and Religion. (Cross-listed with Relig.) (3-0) Cr. F. Prereq: Relig 105, 210 or W S 201 recommended. Examines the status of women in various religions, feminist critiques of religious structures and belief systems, and contemporary women’s spirituality movements. Nonmajor graduate credit.

W S 338. Feminist Philosophy. (Cross-listed with Phil.) (3-0) Cr. F. Prereq: 3 credits in philosophy or women’s studies recommended. A critical, theoretical examination of the oppression of women, especially as it relates to issues of race, class, and sexual orientation. How concepts such as sex and gender, self and other, nature and nurture, complicate our understanding of what it means to be a woman. Historical and contemporary feminist philosophers addressing topics such as violence, sexuality, pornography, political power, family structure and women’s paid and unpaid labor. Nonmajor graduate credit.

W S 339. Goddess Religions. (Cross-listed with Relig.) (3-0) Cr. F. Prereq: Relig 205 recommended. Exploration of the foundational myths of Goddess spirituality, including historical and cross-cultural female images of the divine and their modern usage by American women. Nonmajor graduate credit.

W S 340. Women’s Literature. (Cross-listed with Engli.) (3-0) Cr. F. Prereq: Engli 250. Historical and thematic survey of literature by and about women. May include autobiographies, journals, letters, poetry, fiction, and drama. Nonmajor graduate credit.

W S 342. American Indian Women Writers. (Cross-listed with Am In.) (3-0) Cr. Prereq: Engli 250. Literature of American Indian women writers which examines their social, political, and cultural roles in the United States. Exploration of American Indian women’s literary, philosophical, and artistic works aimed at recovering elements of identity, redescribing stereotypes, resisting colonization, and constructing femininity. Nonmajor graduate credit.

W S 345. Women and Literature: Selected Topics. (Cross-listed with Engli.) (3-0) Cr. S. Prereq: Engli 250 Literature by women and/or dealing with the images of women, e.g., study of individual authors or relationships between women: explicit or implicit, race, specific themes or genres in women’s literature: analysis of recurrent images of women in literature. Nonmajor graduate credit.

W S 346. Psychology of Women. (Cross-listed with PSYCH.) (3-0) Cr. S. Prereq: 2 courses in psychology including 101. Survey of psychological literature relating to biological, interpersonal, and societal determinants of the behavior of women.

W S 350. African American Women. (Cross-listed with Afr Am) (3-0) Cr. S. Prereq: 3 credits in Women’s Studies or African American Studies. Economic, social, political and cultural roles of African American women in the U.S. Includes literary, philosophical, and artistic expressions. Myths and realities explored. Nonmajor graduate credit.

W S 352. Gay and Lesbian Literature. (Cross-listed with Engli.) (3-0) Cr. Prereq: Engli 250. Literary portrayals of gay and lesbian lives and relationships from many different genres. Attention to changing definitions and representations of sexual orientation and gender identity over time.

W S 370. Studies in English Translation. (3-0) Cr. Readings, discussions, and papers in English. F: French topics on women or feminism (cross listed to Frnch 370F) G: German topics on women or feminism (cross listed to Ger 370G) R: Russian topics on women or feminism (cross listed to Rus 370R) S: Spanish topics on women or feminism (cross listed to Span 370S)

W S 374. Women in the Ancient Mediterranean World. (Cross-listed with Cl St, Hist.) (3-0) Cr. Repeatable. S: Prereq: Any one course in Cl St, Hist, W S 201, Latin, Greek. Chronological survey of the status of women in the Ancient Mediterranean world; study of constructs of the female and the feminine. Readings from ancient and modern sources. Emphasis on either the Greek world and Hellenistic Egypt, or Hellenistic Egypt and the Hellenistic world; A: Hellenic World and Hellenistic Egypt B: Roman World including Roman Egypt

W S 380. History of Women in Science, Technology, and Medicine. (Cross-listed with Hist.) (3-0) Cr. Prereq: Sophomore classification. History of women’s relationship to the fields of science, technology, and medicine, as students and professionals, consumers, subjects and patients, family members, workers and citizens. Concentrates especially on 19th and 20th century United States, concluding with an examination of current issues of special interest to women in science, technology, and medicine.

W S 385. Women in Politics. (Cross-listed with Pol Sc) (3-0) Cr. S. Examination of the entry and participation of women in politics in the United States and other countries including a focus on contemporary issues and strategies for change through the political process.

W S 386. History of Women in America. (Cross-listed with Hist.) (3-0) Cr. Prereq: Sophomore classification. A survey of social, economic, and political aspects of women’s role from colonial era to present; emphasis on employment, education, concepts of sexuality, and changing nature of the home.

W S 401. Feminist Theories. (3-0) Cr. Prereq: W S 201 or 3 credits in Women’s Studies at the 300 level or above. Current theories of feminism, the feminine and sexual difference. Topics in race, class, sexuality, and ethnicity as they are addressed in diverse feminisms. May include readings in lesbian, Black, postcolonial, psychoanalytic and postmodern thought. Nonmajor graduate credit.

W S 402. Feminist Research in Action. (3-0) Cr. S. Prereq: W S 201 and 201. Feminist research methods and scholarship. Class collaborates on a community research and action project to improve women’s lives. Nonmajor graduate credit.

W S 422. Women, Men, and the English Language. (Cross-listed with Engli, Ling) (3-0) Cr. S. Prereq: Engli 219. The ways men and women differ in using language in varied settings and the ways in which language both creates and reflects gender divisions. Nonmajor graduate credit.

W S 425. Intersections of Race, Class and Gender. (Dual-listed with 525) (3-0) Cr. Prereq: W S 201 and one additional W S course. Race, ethnicity, class and gender distinctions and intersections lead to inequitable distributions of power, social well-being, and resources. Explores how inequities are institutionalized and how multiple identities are experienced by women in daily life.

W S 435. Women and Development. (Dual-listed with S335) (3-0) Cr. S. Prereq: 201 or 3 credits in Women’s Studies at the 300 level or above. Cross-cultural study of development utilizing both case studies and theoretical works. Explores the nature of women’s roles in developing countries and the ways in which women and their needs have been excluded/included in development approaches, policies, and projects. Includes discussion of actual development projects as well as women’s organizing.

W S 444. Sex and Gender in Cross-cultural Perspective. (Dual-listed with 644) (Cross-listed with Anthr.) (3-0) Cr. S. Prereq: Anthr 201; Anthr 306
recommend. Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.

W S 450. Topics in Women's Studies. (Dual-listed with 550). (3-0) Cr. 3. Repeatable. S. Preq: 201 or 3 credits in Women's Studies at the 300 level or above. Special and/or experimental topics in a specific discipline, e.g., women and education, women and religion, women and the law, women and science.

W S 460. Seminar in Gender and Ethnicity. (Cross-listed with Eng). (3-0) Cr. 3. Repeatable. F. Preq: Completion of 9 credits of surveys; completion of or concurrent enrollment in 339, junior classification. Selected readings on various experimental topics in a specific discipline, e.g., women and education, women and religion, and symbols of gender valuation.

W S 455. Women's Literature. (Cross-listed with Engl). (3-0) Cr. 3. Repeatable. Alt. F., offered 2010. Preq: 6 credits in literature. Primary texts by women writers; historical, thematic, formal, or theoretical approaches; secondary readings; e.g., Nineteenth-Century Women's Personal Narratives; Southern Women Writers of the U.S.

W S 550. Topics in Women's Studies. (Dual-listed with 450). (3-0) Cr. 3. Repeatable. Preq: 201 or 3 credits in Women's Studies at the 300 level or above. Special and/or experimental topics in a specific discipline, e.g., women and education, women and religion, women and science.

W S 555. Women's History and Feminist Theory. (Cross-listed with Hist). (3-0) Cr. S. Preq: Permission of instructor. Feminist theory from the 1960s to the present as it relates to the writing of women's history. Analysis of interpretations of U.S. women's history from patriarchal to postmodernist perspectives.

W S 587. Diversity Issues in Marriage and Family Therapy. (Cross-listed with HD FS). (3-0) Cr. 3. Alt. F., offered 2009. Review treatment implications associated with topics such as gender and power, race/ethnicity, family structure, and socioeconomic status. Discuss treatment implications of social oppression and discrimination on families.

W S 594. Women/Gender in Art. (Dual-listed with 394). (Cross-listed with ART H, Dan S). (3-0) Cr. 3. Preq: Graduate classification, permission of instructor. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

Courses for graduate students

W S 620. Advanced Seminar in Feminist Research Methods. (3-0) Cr. 3. S. Focus on feminist interdisciplinary research methods. Analysis of contemporary issues facing feminist scholars. Students conduct original research in their disciplinary areas.

World Languages and Cultures

Mark Rectanus, Chair of Department

University Professor (Emeritus): Joanna Courteau

Professors: Bratsch-Prince, Henry, Leonard, Matibag, M. Rectanus

Professors (Emeritus): Bernard, Dow, Fink, J. N. Lacasa

Associate Professors: Allen, Amidon, Gasta, Mariner, Mook, Mu

Associate Professors (Emeritus): Dial, Nabotzky, Thogmartin

Associate Professor (Adjunct): Rosenbusch

Assistant Professors: Dominguez-Castellano, Haywood-Ferreira, L’Hoste, Mesropova, Pardo-Ballester, Rizo-Arztuklie, Vander Lugt, Weber-Fewe

Assistant Professors (Emeritus): Chatfield, Johnson

Assistant Professor (Adjunct): Rodriguez

Instructor (Adjunct): Kottman

Senior Lecturers: Martin, Taoulet, Waldemar

Undergraduate Study

Curriculum: World language study should be an integral part of an academic program for most students. The theoretical understanding of and practical experience in language underlie many intellectual disciplines that try to meet the complex problems of contemporary society. Courses offered by the Department of World Languages and Cultures are designed to develop students' understanding of a second culture through the language spoken by that culture.

Upon the completion of their program of studies in the Department of World Languages and Cultures, majors with a concentration in French, German, Russian Studies, or Spanish will demonstrate proficiency in five goal areas: Communication, Cultures, Connections, Comparisons, and Communities. Students will be able to: (a) use their concentration language to present and interpret information and to communicate both orally and in writing; (b) demonstrate an understanding of the relationships among the products, practices, and perspectives of the culture(s) in which their concentration language is spoken; (c) demonstrate their ability to acquire information and further their knowledge of their concentration language; (d) demonstrate an understanding of the nature of language and the concept of culture by making comparisons with their own language and culture(s); and (e) demonstrate a desire to become a lifelong learner of their concentration language.

Graduates will achieve both linguistic proficiency and cultural literacy through the study of the language and culture of their program: Linguistic proficiency entails the ability to function effectively in the target language and the ability to communicate competently with native speakers of the target language. Students of Latin and Ancient Greek demonstrate proficiency by becoming able to read the language in which their concentration language was written; and (b) demonstrate an understanding of the nature of language and the concept of culture by making comparisons with their own language and culture(s); and (e) demonstrate a desire to become a lifelong learner of their concentration language.
in elementary or intermediate courses (100 and 200 level) in their native language. Students are considered to have native fluency if their ethnic first language as indicated on the matriculation form is the language in which they wish to enroll. Students are also considered to have native fluency if they have had substantial attendance at a secondary school or university where the language of instruction is the language in which they wish to enroll at ISU. Students with native fluency may be eligible to enroll in literature and civilization courses in a native language at the 300 level or above; such students must also consult the department office to determine eligibility for advanced composition and conversation courses (300 level and above). Students who have completed three or more years of high-school world language study may not enroll in or receive credit for 101-level world languages courses. Students may be allowed to take the on-line placement test available at www.language.iastate.edu. Span 97 is designed for students who need additional remedial work in the language at the first-year level (101-102) and are not planning to continue their language study at the second-year 201-202 level. Students who complete Span 97 with a passing grade will have fulfilled the LAS world language requirement. Students who have completed Span 97 and wish to pursue further work in Spanish at the 201-202 level may enroll in 102.

Students with disabilities who need to satisfy the world language requirement may direct questions to their academic adviser and the Disability Resource Office.

Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is not normally available.

The Department of World Languages and Cultures participates in the Iowa Regents’ world language summer programs in France, Peru, and Spain. The Department also offers summer programs in Greece, Russia, Spain and Mexico; and semester study abroad programs in Mexico and Spain. Information concerning these programs can be obtained directly from the Department.

Language and literature courses numbered 300 and above are principally taught in the target language. Courses numbered in the 270s, 370s, and 470s are taught in English. For courses taught in English about Ancient Greek and Rome, see Classical Studies. Students may not take intermediate (200 level) courses for credit after successfully completing any advanced (300/400 level) course, except those in the 370 series or courses taught in English translation. Students who have successfully completed any course in the intermediate (200 level) sequence may not take a lower-numbered course in that sequence for a grade.

Students at all levels of foreign language study will have access to the Language Studies Resource Center, located in 3142 Pearson. The Resource Center contains an extensive collection of world language materials, including audio-visual materials, electronic resources, music, books, language specific software and hardware, and other course-related materials.

Materials fees: Each student enrolled in a 100- through 400-level world language course is assessed a materials and professional support fee of $25.00 per course. No student will be charged more than $50.00 per semester, regardless of the number of world language courses in which she or he is enrolled for the semester. If a student drops a course subject to the fee by the 15th day of the semester the fee for that course will not be assessed.

Communication Proficiency requirement: The Department requires a grade of C- or better in each of Eng 150 and 150H (250H), and a grade of C- or better in any course numbered between 370 and 379 (with the exception of Rus 375) taught by the Department of World Languages and Cultures or the interdepartmental program in Classical Studies.

Languages and Cultures for Professions (LCP)

Students with primary majors in the College of Business or the College of Engineering are encouraged to complete an LCP second major option in World Languages and Cultures with a concentration in French, German, Russian Studies, Spanish, or Chinese Studies (minor only). The primary objective of the course work in Spanish for students who need additional remedial work in Spanish at the 201-202 level may enroll in 102.

Students with disabilities who need to satisfy the world language requirement may direct questions to their academic adviser and the Disability Resource Office.

Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is not normally available.

The Department of World Languages and Cultures participates in the Iowa Regents’ world language summer programs in France, Peru and Spain. The Department also offers summer programs in Greece, Russia, Spain and Mexico; and semester study abroad programs in Mexico and Spain. Information concerning these programs can be obtained directly from the Department.

Language and literature courses numbered 300 and above are principally taught in the target language. Courses numbered in the 270s, 370s, and 470s are taught in English. For courses taught in English about Ancient Greek and Rome, see Classical Studies. Students may not take intermediate (200 level) courses for credit after successfully completing any advanced (300/400 level) course, except those in the 370 series or courses taught in English translation. Students who have successfully completed any course in the intermediate (200 level) sequence may not take a lower-numbered course in that sequence for a grade.

Students at all levels of foreign language study will have access to the Language Studies Resource Center, located in 3142 Pearson. The Resource Center contains an extensive collection of world language materials, including audio-visual materials, electronic resources, music, books, language specific software and hardware, and other course-related materials.

Materials fees: Each student enrolled in a 100- through 400-level world language course is assessed a materials and professional support fee of $25.00 per course. No student will be charged more than $50.00 per semester, regardless of the number of world language courses in which she or he is enrolled for the semester. If a student drops a course subject to the fee by the 15th day of the semester the fee for that course will not be assessed.

Communication Proficiency requirement: The Department requires a grade of C- or better in each of Eng 150 and 150H (250H), and a grade of C- or better in any course numbered between 370 and 379 (with the exception of Rus 375) taught by the Department of World Languages and Cultures or the interdepartmental program in Classical Studies.

Languages and Cultures for Professions (LCP)

Students with primary majors in the College of Business or the College of Engineering are encouraged to complete an LCP second major option in World Languages and Cultures with a concentration in French, German, Russian Studies, Spanish, or Chinese Studies (minor only). The primary objective of this course work is to provide learning environments within which students can achieve general literacy, linguistic proficiency, and inter-cultural competence. In the LCP curriculum, students will learn how professions are shaped by social and cultural forces and, alternatively, how professions shape society. In courses on contemporary culture and society, students will identify and analyze issues dealing with the complex interrelationships of languages and cultures and consider how they may affect their chosen profession. Students will experience living and working in diverse cultural settings through study abroad and internship opportunities offered through the LCP program and in collaboration with the Colleges of Business and Engineering. Students enrolled in the LCP second major option may receive non-graded academic credit for the successful completion of internships (VLC courses numbered 499 in each language area).

For the LCP second major option, students will complete 30 credits within their language concentration beyond the fourth-semester level, selected from the list of approved LCP core courses and electives designated for their respective college curricula in either Business or Engineering. Students may only enroll in the LCP option as a second major and may not graduate with the LCP option in the WLC major alone.

Students in the College of Business may combine course work in the International Business (IB) Secondary Major with course work in LCP by selecting from a list of approved options. Students should consult their academic adviser in the College of Business and the WLC advisor for coursework and international experience that fulfill requirements in both the IB and LCP major options. (IB) Major

Graduate Study

The Department of World Languages and Cultures offers course work leading to a graduate minor in French, German, Latin, Russian Studies or Spanish. The graduate minor in each of these languages is designed to provide an opportunity for graduate students to further their knowledge of that language to complement work in their major disciplines. The graduate minor provides formal recognition of student achievement and expertise in one of the languages above. Graduate minor credits are also offered in Greek.

Graduate Minor

Program Requirements:

a. Prerequisites: Graduate students who wish to minor in one of the languages above must have 400-level proficiency in that language. When this is not the case, the student may be required to take a language course below the 400-level, which would not count towards the graduate minor requirements.

b. Course Requirements: For the M.A. or M.S.: Three courses in the language of the minor. No more than three credits may be in courses numbered 401, 402, and 403. For the Ph.D.: Four courses in the language of the minor which must include at least one three credit course at the 500 level. No more than three credits may be in courses numbered 401, 402, or 403. At least two courses for the M.A. and the Ph.D. minors must be taken in residence at Iowa State University. Papers written for these courses are expected to have a content and depth commensurate with the graduate status of the student.

Arabic (Arabic)

Arab 101. Elementary Arabic I. (4-0) Cr. 4. F. Preparation to modern standard Arabic. Development of reading, writing, listening comprehension, and speaking skills. Attention to use of the Arabic alphabet. Presentation of culture and social customs in Arabic-speaking countries.

Arab 102. Elementary Arabic II. (4-0) Cr. 4. S. Preparation to modern standard Arabic. Development of reading, writing, listening comprehension, and speaking skills. Attention to use of the Arabic alphabet. Presentation of culture and social customs in Arabic-speaking countries.

Chinese Studies (Chin)

Chinese Studies Minor Option 1: Chinese Studies

Minors in Chinese Studies are required to take Chin 202-202 (Intermediate Chinese), and 9 credits at the 300 level; of these at least 3 additional credits are in Chinese (courses taught in Chinese or English) and 3 credits in one of the following: Chin 375 (Chin Today, 3 cr.) Hist 337 (History of Modern China I, 3 cr.)

The remaining 3 credits are chosen from: Anthr 326 (Peoples and Cultures of East and Southeast Asia, 3 cr.)

Arch 427 (History, Theory, and Criticism of Chi nese Architecture, 3 cr.)

Chin 301 (Advanced Chinese Readings I, 3 cr.) Chin 302 Advanced Chinese Readings II, 3 cr.) Chin 370 (Contemporary Chinese Film & Fiction, 3 cr.)

Chin 375 (Chin Today, 3 cr.) Chin 490 (Independent Study, 1-6 cr.) Hist 336 (History of Modern China I, 3 cr.) Hist 337 (History of Modern China II, 3 cr.)

Chinese Studies Minor Option 2: Languages and Cultures for Professions

A. International Business Secondary Major and Languages and Cultures for Professions Minor Emphasis in Chinese Studies (18 credits) Required Core Courses: (12 cr.)

Chin 202 (Intermediate Chinese, 5 cr.)

Chin 304 (Chinese for Business and Professions, 4 cr.)

Chin 499 (Internship, 3 cr.) Electives: (6 cr. – choose from only one of the following categories)

Chin 302 (Advanced Chinese Readings II, 3 cr.)
Category 2
Chin 272 (Chinese Cultural Tradition, 3 cr.)
Chin 370 (Contemporary Chinese Film & Fiction, 3 cr.)
Chin 375 (China Today, 3 cr.)
Category 2
Chin 272 (Chinese Cultural Tradition, 3 cr.)
Chin 337 (Modern China II, 3 cr.)
Hist 336 (History of Modern China I, 3 cr.)
Hist 337 (History of Modern China II, 3 cr.)
Hist 479 (China and the Cold War, 3 cr.)
Pol S. 341 (Politics of Asia, 3 cr.)

B. Languages and Cultures for Professions (Business without International Business Secondary Major) (30 credits)
Required Core Courses: (12 cr.)
Chin 202 (Intermediate Chinese, 5cr.)
Chin 304 (Chinese for Business and Professions, 4 cr.)
Chin 499 (Internship, 3 cr.)
Electives (6 cr. -choose from only one of the following categories)
Category 1
Chin 272 (Chinese Cultural Tradition, 3 cr.)
Chin 370 (Contemporary Chinese Film & Fiction, 3 cr.)
Chin 375 (China Today, 3 cr.)
Category 2
Chin 272 (Chinese Cultural Tradition, 3 cr.)
Chin 337 (Modern China, 3 cr.)
Hist 336 (History of Modern China I, 3 cr.)
Hist 337 (History of Modern China II, 3 cr.)
Hist 479 (China and the Cold War, 3 cr.)
Pol S. 341 (Politics of Asia, 3 cr.)

C. Engineering Major and Languages and Cultures for Professions Minor Emphasis in Chinese Studies (18 credits)
Required Core Courses: (12 cr.)
Chin 202 (Intermediate Chinese, 5cr.)
Chin 304 (Chinese for Business and Professions, 4 cr.)
Chin 499 (Internship, 3 cr.)
Electives (6 cr. -choose from only one of the following categories)
Category 1
Chin 272 (Chinese Cultural Tradition, 3 cr.)
Chin 370 (Contemporary Chinese Film & Fiction, 3 cr.)
Chin 375 (China Today, 3 cr.)

Credit by examination for other courses in the Department is normally not available.
OPTION 1. Students may only enroll in the LCP Option as a Second Major. They may not graduate with the Second Major in LCP alone.

Business Option 2
International Business Secondary Major and Language and Cultures for Professions Major (42 credits)

I. International Business Secondary Major (12 credits from approved list)

II. LCP Core Courses: (15 credits)

Rus 301 (Advanced Composition and Conversation, 3 cr.)
Rus 304 (Russian for Business and Professions, 3 cr.)
Rus 320 (Russia Today, 3 cr.)
Rus 370 (Russian Studies in English Translation, 3 cr.)
Rus 395 (Study Abroad, 3 cr.)* or
Rus 499 (Internship 3 cr.)

*Additional credit from approved study abroad program may be applied to the major

III. Electives: (15 credits)

Rus 314 (Reading Russian Literary and Cultural Texts, 3 cr.)
Rus 378 (Russian Film Studies in English, 3 cr.)
Rus 395 (Study Abroad, 3 cr.)
Rus 401 (Advanced Composition and Conversation, 3 cr.)
Hist 421 (History of Russia I, 3 cr.)
Hist 422 (History of Russia II, 3 cr.)
Pol S 349 (Politics of Russia and Soviet Successor States, 3 cr.)

Curricular Notes: Students may only enroll in the LCP Option as a Second Major. They may not graduate with the Second Major in LCP alone. Business Option 3

Languages and Cultures for Professions (without International Business Major) (30 credits)

I. LCP Core Courses (15 credits)

Rus 301 (Composition and Conversation, 3 cr.)
Rus 304 (Russian for Business and Professions, 3 cr.)
Rus 320 (Russia Today, 3 cr.)
Rus 370 (Russian Studies in English Translation, 3 cr.)
Rus 395 (Study Abroad, 1-6 cr.)* or
Rus 490 (Internship in Russian, 1-3 cr.)

*Additional credit from an approved study abroad program may be applied to the major

II. Electives: (15 credits)

Rus 314 (Reading Russian Literary and Cultural Texts, 3 cr.)
Rus 378 (Russian Film Studies in English, 3 cr.)
Rus 395 (Study Abroad, 3 cr.)
Rus 401 (Advanced Composition and Conversation, 3 cr.)
Hist 421 (History of Russia I, 3 cr.)
Hist 422 (History of Russia II, 3 cr.)
Pol S 349 (Politics of Russia and Soviet Successor States, 3 cr.)

Curricular Notes: Rus 395 or 499 fulfills the IB 3 month international experience requirement. Students may only enroll in the LCP Option as a Second Major. They may not graduate with the Second Major in LCP alone. Business Option 3

Languages and Cultures for Professions (without International Business Major) (30 credits)

I. LCP Core Courses (15 credits)

Rus 301 (Composition and Conversation, 3 cr.)
Rus 304 (Russian for Business and Professions, 3 cr.)
Rus 320 (Russia Today, 3 cr.)
Rus 370 (Russian Studies in English Translation, 3 cr.)
Rus 395 (Study Abroad, 1-6 cr.) or
Rus 490 (Internship in Russian, 1-3 cr.)

II. LCP Electives: (15 credits)

Rus 314 (Reading Russian Literary and Cultural Texts, 3 cr.)
Rus 378 (Russian Film Studies in English, 3 cr.)
Rus 395 (Study Abroad, 1-6 cr.)
Rus 401 (Advanced Composition and Conversation, 3 cr.)
Rus 440 (Seminar in Russian Studies, 3 cr.)
Rus 590 (Special Topics in Russian, 2-4 cr.)
Hist 421 (History of Russia I, 3 cr.)
Hist 422 (History of Russia II, 3 cr.)
Hist 530 (Phsemear in Modern Russia/Soviet History, 3 cr.)
Pol S 349 (Politics of Russia and Soviet Successor States, 3 cr.)

Curricular Notes: Students may only enroll in the LCP Option as a Second Major. They may not graduate with the Second Major in LCP alone.

Courses primarily for undergraduate students

Rus 101. Elementary Russian I. (4-0) Cr. 4. F. Introduction to the Russian language, grammar and syntax. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Rus 301. Composition and Conversation. (3-0) Cr. 3. F. Prereq: 202. Thorough study of the Russian language, with emphasis on strengthening proficiency in writing, speaking, reading, and listening. Increased focus on syntax and word formation.

Courses primarily for graduate students, open to qualified undergraduate students

Rus 390. Special Topics in Russian. Cr. arr. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level Russian.

Courses primarily for graduate students

Serbo-Croatian (SerbC)

Courses primarily for undergraduate students

Serbc 101. Elementary Serbo-Croatian I. (3-3) Cr. 4. Introduction to the Serbo-Croatian language, grammar, and syntax. Basic language communication skills in reading, writing, speaking and listening. Offered as part of Russian, Eurasian, and East European Distance Learning Consortium via electronic technology and extensive use of Internet and digital materials. Credit by examination in the Department of World Languages and Cultures for courses numbered 101,
Students must take at least 6 credits of literature and/or culture at the 400 level, chosen from the following:

Spanish (Span)

World Languages and Cultures majors with a concentration in Spanish have two options:

WLC Option I: Hispanic Studies

Under WLC Option I, students with a concentration in Spanish must complete a minimum of 33 credits beyond the intermediate (201-202) level.

A. Hispanic Studies Required Core Courses: (12 cr.)

- Span 301 (Spanish Grammar and Composition, 3 cr.)
- Span 303 A or B (Spanish Grammar and Conversation, 3 cr.)
- Span 314 (Introduction to Reading Hispanic Texts, 3 cr.)
- Span 352 (Introduction to Spanish Phonology, 3 cr.)

B. Electives:

- Students must take at least 15 credits chosen from a, b, and c below (minimum of 3 credits from each section).

  a) At least 3 credits of literary studies chosen from the following:

- Span 330 (Studies in Spanish Literature from 1700, 3 cr.)
- Span 331 (Studies in Spanish Literature from 1700 to the Present, 3 cr.)
- Span 332 (Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century, 3 cr.)
- Span 333 (Studies in Latin American Literature from the Twentieth Century to the Present, 3 cr.)

  b) At least 3 credits of cultural studies chosen from the following:

- Span 304 (Spanish for Business and Professions, 3 cr.)
- Span 321 (Spanish Civilization and Culture, 3 cr.)
- Span 323 (Spain Today, 3 cr.)
- Span 324 (Latin America Today, 3 cr.)

  c) At least 3 credits of applied language and linguistics chosen from the following:

- Span 351 (Introduction to Spanish-English Translation, 3 cr.)
- Span 401 (Advanced Composition and Grammar, 3 cr.)
- Span 462 (Contrastive Analysis of Spanish/English for Translators, 3 cr.)
- Span 463 (Hispanic Dialectology, 3 cr.)
- Span 499 (Internship in Spanish, 3 cr.)

Students may apply up to 6 credits of Span 395 (Study Abroad) to section a, b, or c above (appropriate section based upon course content and assigned by the WLC adviser).

C. Students must take at least 6 credits of literature and/or culture at the 400 level, chosen from the following:

- Span 440 (Seminar on the Literatures and Cultures of Spain, 3 cr., repeatable to 6 cr.)
- Span 441 (Seminar on Cervantes and the Golden Age, 3 cr., repeatable to 6 cr.)
- Span 445 (Seminar on the Literatures and Cultures of Latin America, 3 cr., repeatable to 6 cr.)

D. Study Abroad: The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Under Option I, any student who chooses not to participate in a department-approved program will be required to take 3 additional elective credits of Spanish at or above the Span 321 level (for a total of 36 credits beyond the intermediate 201-202 level).

E. Communication Proficiency Requirements: Degree-seeking students must earn a grade of C- or better in a sequence of English composition courses, usually Engl 150 and 250. The department will certify Communication Proficiency for students who receive a C or better in a WLC or Classical Studies course numbered 370-379. Because of the cultural affinities, historical traditions and geographic boundaries shared between the Spanish-speaking and Portuguese-speaking populations of the Iberian Peninsula and in the Americas, Spanish majors are strongly encouraged to fulfill the requirement through Port 370. Such a course will also fill an LAS Group I (Arts and Humanities) requirement.

WLC Option II: Language and Cultures for Professions

Under WLC Option II, students with a concentration in Spanish must complete a minimum of 30 credits beyond the intermediate (201-202) level.

A. Languages and Cultures for Professions (Business)

- Students with a primary major in the College of Business may select from one of the following options:

  Business Option 1

  International Business Secondary Major And Languages And Cultures For Professions Minor Emphasis (27 credits total)

  I. International Business Secondary Major: (12 credits from approved CoB list)

  II. LCP Minor Emphasis Courses: (15 credits)

- Span 303 B (Spanish Conversation for Professionals, 3 cr.)
- Span 304 (Spanish for Business and Professions, 3 cr.)
- Span 351 (Introduction to Spanish-English Translation, 3 cr.)
- Span 323 (Spain Today, 3 cr.) or Span 324 (Latin America Today, 3 cr.)
- Span 499 Internship or Span 395 (Study Abroad, 3 cr.)

  * Span 321 Spanish Civilization and Culture and Span 322 Latin American Civilization and Culture may be substituted.

  ** Additional credit from an approved study abroad program may be applied to the major.

  Business Option 2

  International Business Secondary Major And Language And Cultures For Professions Major (42 credits total)

  I. International Business Secondary Major: (12 credits from approved CoB list)

  II. LCP Second Major (30 credits)
Sp 332. (Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century, 3 cr.)

Sp 333. (Studies in Latin American Literature from the Twentieth Century to the Present, 3 cr.)

Category 2:

Sp 440. (Seminar on the Literatures and Cultures of Spain, 3 cr.)

Sp 441. (Seminar on Cervantes and the Golden Age, 3 cr.)

Sp 445. (Seminar on the Literatures and Cultures of Latin America, 3 cr.)

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a second major. They may not graduate with the second major in LCP alone.

The Spanish minor: Option 1: Hispanic Studies, Option 2: Languages and Cultures for Professions

Option 1: The Spanish minor in Hispanic Studies requires at least 15 credits, 12 of which must be at the 300 level or higher. The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional credits in culture chosen from the following: 321, 322, 323, or 324. Courses primarily for undergraduate students

Sp 097. Accelerated Spanish Review. (3-2) F. S. Prereq: Two years but less than three years of high-school Spanish. For students who require additional review at freshman level. First year (101-102) level. The core components include a compact review of 101 and the essential elements of 102. Course completed with a passing grade fulfills the LAS foreign language requirement. Not recommended for students who wish to continue language at the second year (201-202) level without completing 102.

Sp 101. Elementary Spanish I. (4-0) Cr. 4. FSS. A communicative approach to grammar and vocabulary within the context of Hispanic culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Sp 102. Elementary Spanish II. (4-0) Cr. 4. SSS. Prereq. 101, 97 or placement by departmental exam. Continuation of Spanish 101. A communicative approach to grammar and vocabulary within the context of Hispanic culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Sp 195. Study Abroad. Cr. 3. SS. Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to student’s training, augmented by practical living experience. Taught in Spanish. Consult the department regarding equivalency with SPAN 101 or 102.

Sp 201. Intermediate Spanish I. (4-0) Cr. 4. F. Prereq. 102 or placement by departmental exam. Intensive review of basic grammar and conversation. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Sp 202. Intermediate Spanish II. (4-0) Cr. 4. S. Prereq. 201 or placement by departmental exam. Continuation of Spanish 201. Intensive review of basic grammar. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course.

Sp 295. Study Abroad. Cr. 3. SS. Prereq. 102 or equivalent. Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to student’s training, augmented by practical living experience. Taught in Spanish. Consult the department regarding equivalency with Sp 201 or 202.

Sp 301. Spanish Grammar and Composition. (3-0) Cr. F. S. Prereq. 202 or placement by departmental exam. Review and application of grammar concepts in the development of writing skills within the context of Hispanic culture. Taught in Spanish.

A. Conversation through Culture

B. Conversation for Professionals

Sp 304. Spanish for Business and Professions. (3-0) Cr. F. S. Prereq. 202 or placement by departmental exam (301 recommended). Introduction to professional communication within a cultural context. Grammar review as needed. Individual projects will focus on special interests. Taught in Spanish. Nonmajor graduate credit.

Sp 314. Introduction to Reading Hispanic Texts. (3-0) Cr. F. S. Prereq. 301. Critical reading of Hispanic literary and cultural texts. Presentation of techniques and terminology of literary criticism. Study of basic genres such as: narrative, poetry, drama, essay. Taught in Spanish. Required as prerequisite for 330, 331, 332 and 333.

Sp 321. Spanish Civilization. (3-0) Cr. 3. F. Prereq. One course at the 300 level. A survey of the social, political, religious, and cultural history of Spain. Taught in Spanish.

Sp 322. Latin American Civilization. (3-0) Cr. 3. S. Prereq. One course at the 300 level. A survey of the social, political, religious, and cultural history of Spanish America. Taught in Spanish.

Sp 323. Spain Today. (3-0) Cr. 3. Prereq. One course at the 300 level. A survey of social, political, economic, and cultural topics relevant to contemporary Spain. Taught in Spanish.

Sp 324. Latin America Today. (3-0) Cr. 3. Prereq. One course at the 300 level. A survey of social, political, economic, and cultural topics relevant to contemporary Latin America. Taught in Spanish.

Sp 326. Studies in Hispanic Art or Film. (Dual-listed with 326) (3-0) Cr. 3. Prereq. One course at the 300 level. Survey of major currents and figures in Spanish and Latin American art and/or film. Taught in Spanish.

Sp 330. Studies in Spanish Literature to 1700. (3-0) Cr. 3. F. Prereq. 314. Introduction to Spanish literature from the earliest times through the Golden Age; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish. Nonmajor graduate credit.

Sp 331. Studies in Spanish Literature from 1700 to the Present. (3-0) Cr. 3. S. Prereq. 314. Introduction to Spanish literature from the eighteenth century to the present: techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish. Nonmajor graduate credit.

Sp 332. Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century. (3-0) Cr. 3. F. Prereq. 314. Introduction to Latin American literature from the earliest times to circa 1900; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish. Nonmajor graduate credit.

Sp 333. Studies in Latin American Literature from the Twentieth Century to the Present. (3-0) Cr. 3. S. Prereq. 314. Introduction to Latin American literature from the twentieth century to the present: techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish. Nonmajor graduate credit.

Sp 351. Introduction to Spanish-English Translation. (3-0) Cr. 3. F. Prereq. 301, 303 or 304. Introduction to the theory, methods, techniques, and problems of translation. Consideration of material from business, literature, and the social sciences. Taught in Spanish. Nonmajor graduate credit.
Courses primarily for graduate students, open to qualified undergraduate students

WLC 540. Seminar on the Literatures and Cultures of Spain. (Dual-listed with 540). (3-0) Cr. 3. Prereq: 314 and one course at the 320-level or above. Advanced study of Spanish grammar and syntax. Students’ writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish. Nonmajor graduate credit.

WLC 541. Seminar on Cervantes and the Golden Age. (Dual-listed with 441). (3-0) Cr. 3. Prereq: Six credits in Spanish literature or culture at 400 level. Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish. Nonmajor graduate credit.

WLC 545. Seminar on the Literatures and Cultures of Latin America. (Dual-listed with 445). (3-0) Cr. 3. Prereq: Six credits in Spanish literature or culture at 400 level. Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial Times to the Present. Taught in Spanish.

WLC 549. Special Topics in Spanish. Cr. arr. Repeatable. Prereq: Permission of instructor; 6 credits of 400 level Spanish. A. Literature or Literary Criticism B. Linguistics C. Language Pedagogy D. Civilization Special Courses in World Languages and Cultures (WLC)

Courses primarily for undergraduate students

WLC 119. Introduction to World Languages. (Cross-listed with Ling). (3-0) Cr. 3. Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and dialects, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy.

WLC 147. Student Teaching. (Cross-listed with C.I). Cr. arr. F.S. Prereq: Admission to teacher education, approval of coordinator during semester before student teaching. Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences.

WLC 484. Technology, Globalization and Culture. (Dual-listed with 584). (Cross-listed with M.E). (3-0) Cr. 3. F. Prereq: senior classification for 484; graduate classification for 584. Cross-disciplinary examination of the present and future impact of globalization with a focus on preparing students for leadership roles in diverse professional, social, and cultural contexts. Facilitate an understanding of the threats and opportunities inherent in the globalization process as they are perceived by practicing professionals and articulated in debates on globalization. Use of a digital forum for presenting and analyzing globalization issues by on-campus and off-campus specialists.

Zoology

Interdepartmental Graduate Major

John E. Mayfield, Director of Graduate Education

Undergraduate Study

The undergraduate major in zoology is no longer available to new students. Those wishing to pursue an undergraduate degree in basic animal study are encouraged to investigate the numerous possibilities available to them at Iowa State University. The undergraduate Biology Program, jointly administered by the departments of Zoology, Entomology, Genetics, and Cell Biology (GDCB), includes a wide spectrum of opportunities for students to develop their academic interests through the study of animal biology. Contact the Biology Program office for more information, or see www.biology.iastate.edu for more information. For those students interested in applied animal study, undergraduate majors in Animal Science and Entomology are available.

Graduate Study

The Zoology Graduate Program is closed to new students. Prospective students should contact the Genetics, Development and Cell Biology (GDCB) Graduate Program Director of Graduate Education for specific details about the program’s status. Related interdepartmental graduate majors in Ecology and Evolutionary Biology, Genetics, Immunobiology, Molecular, Cellular, and Developmental Biology, Neurobiology, and Toxicology should be investigated as possible alternative graduate programs.
The Faculty

Distinguished Professor denotes those faculty members who have been recognized for having attained outstanding national and international reputations within their professional disciplines.

University Professor denotes those faculty members who have been recognized for having made outstanding contributions to the quality of education at Iowa State University.

Inquiries concerning the faculty list should be directed to the Office of the Provost, 1550 Beardshear Hall.

Agarwal, Sanjeev, Professor of Marketing. B.E., 1979, Roorkee (India); M.S., 1980, California (Davis); Ph.D., 1986, M.A., 1986, Ohio State.

Akinc, Mufti, Professor of Materials Science and Engineering. B.S., 1970, M.S., 1973, Middle East Technical (Turkey); Ph.D., 1977, Iowa State.

Al-Akawi, Mahdi, Associate Professor of Agronomy. B.S., 1974, Baghdad; M.S., 1982, Ph.D., 1986, North Dakota State.

Alcorn, Janet W., Emeritus Associate Professor of Music. B.Mus., 1958, Northwestern; M.Mus., 1960, Boston University.

Aliprantis, Dionyssios, Assistant Professor of Electrical and Computer Engineering. B.S., 1999, National Technical Athens, Greece; Ph.D., 2003, Purdue.

Allen, Beverly Lundy, Associate Professor of Sociology. B.S.W., 1975, M.S.W., 1977, Temple; Ph.D., 1996, Iowa State.

Allen, Linda Q., Associate Professor of World Languages and Cultures; Associate Professor of Curriculum and Instruction. B.A., 1978, Purdue; M.A., 1982, Ball State; Ph.D., 1984, Purdue.

Amarasinghe, Gay, Assistant Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1997 City University of New York; Ph.D., 2001, Maryland (Baltimore County).

Ambrosio, Linda, Associate Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1976, New York (Stony Brook); Ph.D., 1985, Princeton.

Amidon, Kevin Scott, Associate Professor of World Languages and Cultures. M.A., 1995, Ph.D., 2001, Princeton.

Amin, Viren R., Adjunct Assistant Professor of Electrical and Computer Engineering. B.S., 1987, NHL Medical College; M.S., 1989, Ph.D., 1992, Iowa State.

Amos, Rosalie Jeanne, Emeritus Associate Professor of Apparel, Educational Studies and Hospitality Management; Emeritus Associate Professor of Curriculum and Instruction. B.S., 1953, Iowa State; M.S., 1960, Ph.D., 1976, Cornell.

Anderson, Kevin F, Assistant Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1975, Iowa Wesleyan; M.S., 1983, Western Illinois.

Anderson, Lloyd Lee, Professor of Animal Science; Professor of Biomedical Sciences; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1957 Ph.D., 1961, Iowa State.

ANDRE, THOMAS, Professor of Curriculum and Instruction; Professor of Psychology. B.S., 1967, Massachusetts; M.A., 1970, Ph.D., 1971, Illinois.

ANDREASEN, CLAIRE B., Professor of Veterinary Pathology and Chair of the Department; Professor of Veterinary Clinical Sciences and Interim Chair of the Department. B.S., 1979, D.V.M., 1982, Texas A&M; M.S., 1987 Ph.D., 1990, Georgia.

ANDREOTTI, ALEJANDRO, Adjunct Assistant Professor of Curriculum and Instruction. B.A., 1989, Brandeis; Ph.D., 1994, Princeton.

ANEX, ROBERT P. JR., Associate Professor of Agricultural and Biosystems Engineering; Associate Professor of Mechanical Engineering. B.S., 1981, M.S., 1983, Ph.D., 1995, California (Davis).

ANGELI CI, ROBERT JOE, Emeritus Professor of Chemistry. Distinguished Professor in Liberal Arts and Sciences. B.S., 1959, St. Olaf; Ph.D., 1962, Northwestern.

ATHERLY, ALAN G., Emeritus Professor of Genetics, Development and Cell Biology; Emeritus Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1969, Western Michigan; Ph.D., 1964, North Carolina.

ATHERYA, KRISHNA B., Professor of Mathematics; Professor of Statistics; Distinguished Professor in Liberal Arts and Sciences. B.A., 1959, Loyola (India); Ph.D., 1967, Stanford.

ATHERYA, KRISHNA S., Adjunct Associate Professor of Materials Science and Engineering. Ph.D., 1986, Iowa State.

ATKINS, RICHARD E., Emeritus Professor of Agronomy. B.S., 1941, Kansas State; M.S., 1942, Ph.D., 1948, Iowa State.

AVOOD, DAVID M., Senior Lecturer in Physics and Astronomy. B.S., 1984, Toronto (Canada); M.S., 1987 Ph.D., 1989, McGill.

BACOCK, BRUCE A., Professor of Economics. B.S., 1980, M.S., 1981, California (Davis); Ph.D., 1987, California (Berkeley).

BAKO, ROBERT J., Professor of Educational Leadership and Policy Studies (Collaborator). B.S., 1972, Wisconsin State; M.S., 1972, Missouri (Kansas City); Ph.D., 1976, New York (Buffalo).

BARKER, JESSICA, Assistant Professor of Apparel, Educational Studies and Hospitality Management. B.S., 2000, Lewis State; M.S., 2003, Ph.D., 2007 Florida State.

BARTON, TOMMY J., Professor of Chemistry; Distinguished Professor in Liberal Arts and Sciences. B.S., 1962, Lamar; Ph.D., 1967, Florida.

BASMAJIAN, CARLTON, Assistant Professor of Community and Regional Planning. A.B., 1996, Chicago; M.P., 2000, Georgia Institute of Technology; Ph.D., 2008, Michigan.

BASSHAM, DIANE C., Associate Professor of Genetics, Development and Cell Biology. B.Sc., 1990, Birmingham (England); Ph.D., 1994, Warwick (England).

BASSLER, BRUCE LEE, Associate Professor of Architecture. B.S., 1972, Iowa State; M.Arch., 1975, Texas A&M.

BASSLER, EUNICE M., Senior Lecturer in Food Science and Human Nutrition. B.A., 1974, Northern Iowa; M.S., 1979, Kansas State.

BASTAWROS, ASHRAF, Associate Professor of Aerospace Engineering. Associate Professor of Mechanical Engineering. B.Sc., 1988, M.Sc., 1991, Cairo (Egypt); M.S., 1995, Ph.D., 1997, Brown.

BASTAWROS, HALA FAROUK, Lecturer in Genetics, Development and Cell Biology. Assistant Professor of Materials Science and Engineering. B.S., 1999, Iowa State; Ph.D., 2005, M.S., 2005, California (Berkeley).

BECRAFT, PHILIP W., Associate Professor of Genetics, Development and Cell Biology; Associate Professor of Agronomy. B.A., 1980, Montana; M.S., 1987, Montana State; Ph.D., 1992, California (Berkeley).

BEER, CRAIG E., Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1950, M.S., 1957, Ph.D., 1962, Iowa State.

BEETHAF, JEFFREY K., Associate Professor of Veterinary Pathology. Associate Professor of Entomology. B.S., 1989, Western Washington; Ph.D., 1994, California (Davis).

BEHN, JOHN C., Associate Professor of Microbiology. M.S., 1984, North Carolina State; Ph.D., 1988, California (Berkeley).

BEITZ, DONALD C., Professor of Biochemistry; Biophysics and Molecular Biology; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1962, M.S., 1963, Illinois; Ph.D., 1967, Michigan State.

BELL, BRYAN, Assistant Professor of Veterinary Microbiology and Preventive Medicine. B.S., 1995, Northern Arizona; Ph.D., 2001, Louisiana State.

BLANCO, MICHAEL, Assistant Professor of Agronomy (Collaborator). B.S., 1968, Georgia; M.S., 1973, Pennsylvania State; Ph.D., 1977 Missouri.

BLEMIRE, CARY, Emeritus Professor of Biological Engineering. B.S., 1977, Kentucky; M.B.A., 1980, University of Kentucky.

BLOOM, LESLIE R., Assistant Professor of Curriculum and Instruction. B.A., 1979, Boston University; M.A., 1985, Delaware; Ph.D., 1993, Indiana.

BLOUNN, DOREEN M., Professor of Food Science and Human Nutrition; Mary B. Welch Professor of Food Science and Human Nutrition. B.A., 1988, Latvia (Latvia); M.P.P., 2001, Minnesota; Ph.D., 2008, Indiana.

BOSWAS, RANA, Adjunct Associate Professor of Electrical and Computer Engineering; Adjunct Associate Professor of Physics and Astronomy. B.Sc., 1976, Bombay; M.Sc., 1978, Indian Institute of Technology; M.S., 1981, Ph.D., 1984, Cornell.

BOWERS, GORDON, Emeritus Professor of Human Development and Family Studies; Mary B. Welch Professor of Family and Consumer Sciences. B.A., 1972, Whittier College; Ph.D., 1975, Purdue.

BROWNING, BRYONY C., Professor of Entomology. B.S., 1984, Utah State; Ph.D., 1989, London School of Hygiene and Tropical Medicine.

BOWEN, GEORGE H., Emeritus Professor of Physics and Astronomy. B.S., 1949, Ph.D., 1953, California Institute of Technology.

BOWER, DUSTIN T., Adjunct Instructor in Military Science and Tactics.

BOWLER, NICOLA, Associate Professor of Materials Science and Engineering; Associate Professor of Electrical and Computer Engineering. B.Sc., 1990, Nottingham (UK); Ph.D., 1994, Surrey (UK).

BOYD, MORTON MCKEE, Emeritus Assistant Professor of Agricultural and Biosystems Engineering. B.S., 1954, Pennsylvania State; M.S., 1962, Massachusetts.

BOYLAN, DAVID RAY JR., Emeritus Professor of Chemical and Biological Engineering. B.S., 1943, Kansas; Ph.D., 1952, Iowa State.

BOYLE, LINDA NG, Assistant Professor of Civil, Construction and Environmental Engineering (Collaborator). BSIE, 1986, New York (Buffalo); M.S.E., 1989, Michigan; Ph.D., 1994, Iowa State.

BRANDT, FRANK E., Emeritus Professor of Music/ Theatre. B.A., 1938, Northern Iowa; M.S., 1948, Iowa State.

BRATCH-PRINCE, DAWN, Professor of World Languages and Cultures; Associate Dean of the College of Liberal Arts and Sciences. B.A., 1983, M.A., 1985, New York University; Ph.D., 1990, California (Berkeley).

BRAUN, EDWARD J., Professor of Plant Pathology. B.A., 1972, Miami (Ohio); Ph.D., 1977, Cornell.

BREARLEY, HARRINGTON, Emeritus Professor of Computer Science; Emeritus Professor of Electrical and Computer Engineering. B.E.E., 1948, Georgia Institute of Technology; M.S., 1950, Ph.D., 1954, Illinois.

BREWER, KENNETH ALVIN, Emeritus Professor of Civil, Construction and Environmental Engineering. B.S.C.E., 1960, M.S., 1961, Kansas State; Ph.D., 1968, Texas A&M.

BOYDSTON, TERRI, Associate Professor of Food Science and Human Nutrition. B.S., 1962, M.S., 1984, Iowa State; Ph.D., 1988, Michigan State.

BRACHA, VLASTISLAV, Associate Professor of Biomedical Sciences. B.S., 1981, Leningrad State (Russia); Ph.D., 1988, Czechoslovak Academy of Science.

BRADBURY, SUSAN L., Associate Professor of Community and Regional Planning. B.A., 1984, McMaster (Canada); M.A., 1987, Ph.D., 1989, Water-loo (Canada).

BRADSHAW, LARRY LEROY, Emeritus Assistant Professor of Agricultural and Biosystems Engineering. B.A., 1964, M.A., 1970, Northern Iowa; Ph.D., 1984, Iowa State.

BRANDELLE, JAMES, Professor of Natural Resource Ecology and Management (Collaborator). B.S., 1966, Tennessee; M.S., 1969, Ph.D., 1974, Missouri.

BROWN, FREDERICK G., Emeritus Professor of Psychology; Emeritus Professor of Curriculum and Instruction; University Professor. B.A., 1964, M.A., 1955, Wisconsin; Ph.D., 1958, Minnesota.

BROWN, NANCY EVELYN, Emeritus Associate Professor of Hotel Restaurant and Institutional Management. B.S., 1960, Vermont; M.S., 1964, Kansas State; Ph.D., 1972, Iowa State.

BROWN, ROBERT C., Professor of Mechanical Engineering; Professor of Chemical and Biological Engineering; Professor of Agricultural and Biosystems Engineering; Anson Marston Distinguished Professor in Engineering. B.A., 1976, B.S., 1976, Missouri; M.S., 1977, Ph.D., 1980, Michigan State.

BROWN, ROBERT GROVER, Emeritus Professor of Electrical and Computer Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1948, M.S., 1951, Ph.D., 1956, Iowa State.

BROWN, ROGER J., Emeritus Associate Professor of Agricultural Education and Studies. B.S., 1956, Iowa State.

BRUMM, THOMAS J., Associate Professor of Agricultural and Biosystems Engineering. B.S., 1979, Iowa State; M.S., 1980, Purdue; Ph.D., 1990, Iowa State.

BRUNA, KATHERINE R., Assistant Professor of Curriculum and Instruction. B.A., 1988, Vassar College; M.A., 1994, Ph.D., 2002, California (Davis).

BRYAN, RAY JAMES, Emeritus Professor of Educational Leadership and Policy Studies. B.S., 1933, M.S., 1937, Kansas State; Ph.D., 1940, Nebraska.

BRYDEN, KENNETH, Associate Professor of Mechanical Engineering; Associate Professor of Aerospace Engineering. B.S., 1977, Idaho State; M.S.M.E., 1993, Ph.D., 1997, Wisconsin.

BUCHELE, WESLEY F., Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1943, Kansas State; M.S., 1951, Arkansas; Ph.D., 1954, Iowa State.

BUCELL, C. ROBIN, Assistant Professor of Genetics, Development and Cell Biology (Collaborator). B.S., 1985, Maryland; M.S., 1988, Washington State; Ph.D., 1992, Utah State.

BUGEJA, DIANE FAYE, Lecturer in Greenlee School of Journalism and Communication. B.S., 1981, M.S., 1988, Oklahoma State.

BUGEJA, MICHAEL J., Professor of Greenlee School of Journalism and Communication and Director of the School. B.A., 1974, Saint Peter's College; M.S., 1976, South Dakota State; Ph.D., 1985, Oklahoma State.

BURKART, MICHAEL R., Associate Professor of Geological and Atmospheric Sciences. B.S., 1964, Wisconsin; M.S., 1969, Northern Illinois; Ph.D., 1976, Iowa.

BURKE, BENJAMIN, Assistant Professor of Geological and Atmospheric Sciences (Collaborator). Ph.D., 2006, Dartmouth College.

BUTLER, ANNE MARIE, Assistant Professor of Philosophy and Religious Studies. B.A., 1996, Trinity College; Ph.D., 2005, Iowa.

BUTLER, LORNA MICHAEL, Emeritus Professor of Sociology; Emeritus Professor of Anthropology. B.S., 1961, Manitoba; M.Ed., 1967, Colorado State; Ph.D., 1976, Washington State.

BUTTERS-JOHNSTON, ANNA KERR, Assistant Professor of Animal Science. B.S., 1995, Reading (England); M.S., 1997, Edinburgh (UK); Ph.D., 2001, Texas Tech.

BYRD, WILLIAM J., Adjunct Assistant Professor of Aerospace Engineering. B.S., 1975, Iowa State; M.S., 1982, Southern California; Ph.D., 1999, Kennedy Western.

CACKLER, ELLS THOMAS, Lecturer in Civil, Construction and Environmental Engineering. B.S., 1969, Iowa State.

CAI, LING, Lecturer in World Languages and Cultures. B.A., 1988, Beijing Normal (China); M.A., 2007, Iowa State.

CAMPBELL, CAMERON T., Assistant Professor of Genetics, Development and Cell Biology. B.S., 1970, Iowa State; Ph.D., 1983, California (San Diego).

CAMPFIELD, PAUL C., Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. B.S., 1982, Virginia; Ph.D., 1990, M.S., 1990, California (Los Angeles).

CARAGEA, PETRUMA CARMEN, Assistant Professor of Statistics. B.S., 1997, Bucuresti (Romania); Ph.D., 2003, North Carolina.

CARDINALPETT, CLARE, Associate Professor of Architecture. B.A., 1975, Hollins; M.Arch., 1982, Utah.

CARITHERS, ROBERT W., Emeritus Professor of Veterinary Clinical Sciences. D.V.M., 1966, Iowa State; M.S., 1968, Missouri; Ph.D., 1972, Iowa State.

CARLSON, DAVID L., Emeritus Associate Professor of Electrical Engineering. B.S., 1959, Minnesota; M.S., 1961, Ph.D., 1964, Iowa State.

CARLSON, PATRICIA M., Associate Professor of Curriculum and Instruction. B.S., 1975, Nebraska; M.S., 1977, Indiana; Ph.D., 1990, Nebraska.

CARTER, RICHARD I., Emeritus Professor of Agricultural Education and Studies; Emeritus Professor of Curriculum and Instruction. B.S., 1966, M.S., 1968, Oklahoma State; Ph.D., 1976, Iowa State.

CASTON, STEPHANIE S., Clinician in Veterinary Clinical Sciences. D.V.M., 2002, Texas A&M.

CERVATO, CINZIA, Associate Professor of Geological and Atmospheric Sciences. Ph.D., 1990, Swiss Federal Institute of Technology.

CHACKO, THOMAS I., Professor of Management and Chair of the Department. B.Sc., 1968, Madras (India); M.A., 1972, St. Francis; Ph.D., 1977, Iowa.

CHAN, CHIU SHUI, Professor of Architecture. B.S., 1982, National Central (Taiwan); M.S., 1986, Ph.D., 1990, Carnegie Mellon.

CHAN, CHUN KIT, Assistant Professor of Psychology. B.S., 2000, Victoria (Canada); Ph.D., 2007, Washington State (Louis).

CHANDRA, ABHIJIT, Professor of Mechanical Engineering; Professor of Aerospace Engineering. B.Tech., 1979, Ph.D., 1982, New Brunswick; Ph.D., 1983, Cornell.

CHANG, CARL KOCHAO, Professor of Computer Science and Chair of the Department. B.S., 1974, National Central (Taiwan); M.S., 1978, Northern Illinois; Ph.D., 1982, Northwestern.

CHANG, JIEN MORRIS, Associate Professor of Electrical and Computer Engineering; Associate Professor of Materials Science and Engineering. B.Tech., 2001, Ph.D., 2006, California (Riverside).

CHEN, CHING-SHIH, Associate Professor of Agricultural and Biosystems Engineering. B.S., 1982, Tonghai (Taiwan); M.S., 1988, Ph.D., 1994, Auburn.

CHEN, DEGANG, Associate Professor of Electrical and Computer Engineering. B.S., 1984, Tsinghua (China); M.S., 1988, Ph.D., 1992, California (Santa Barbara).

CHEN, SONG XI, Professor of Statistics. B.S., 1983, M.S., 1988, Beijing (China); M.S., 1990, Victoria (New Zealand); Ph.D., 1992, Australian National.

CHEN, TSING-HANG, Professor of Geographic and Atmospheric Sciences. B.A., 1965, Taiwan Normal; M.S., 1968, National Central (Taiwan); M.A., 1972, Johns Hopkins; Ph.D., 1975, Michigan.

CHEVILLE, NORMAN F., Emeritus Professor of Veterinary Pathology; Emeritus Professor of Veterinary Microbiology and Preventive Medicine; Emeritus Dean of the College of Veterinary Medicine; Clarence Hartley Cowalt Distinguished Professor in Veterinary Medicine. D.V.M., 1959, Iowa State; M.S., 1963, Ph.D., 1964, Wisconsin; Dr.H.C., 1986, Liege.

CHIMENTI, DALE E., Professor of Aerospace Engineering. B.A., 1968, Cornell College; M.S., 1972, Ph.D., 1974, Cornell.

CHOOBINEN, FARHAD, Adjunct Instructor in Logistics, Operations and Management Information Systems. B.S., 1974, Management (Iran); M.E., 1983, Iowa State.

CHOU, HUI-HSIEN, Associate Professor of Genetics, Development and Cell Biology; Associate Professor of Computer Science. B.S., 1989, National Taiwan; Ph.D., 1992, Maryland.

CHRISTENSEN, GEORGE C., Emeritus Professor of Biomedical Sciences; Clarence Hartley Cowalt Distinguished Professor in Veterinary Medicine. D.V.M., 1949, M.S., 1950, Ph.D., 1953, Cornell; D.Sc., 1978, Purdue.

CHRISTIAN, NICK E., Professor of Horticulture; University Professor. B.S., 1987, Colorado State; M.S., 1977, Ph.D., 1979, Ohio State.

CHU, CHIRIS CHONG-NUEN, Associate Professor of Electrical and Computer Engineering. B.S., 1993, Hong Kong; M.S., 1994, Ph.D., 1999, Texas.

CHUNG, SOON-JO, Assistant Professor of Aerospace Engineering; Assistant Professor of Electrical and Computer Engineering. B.S., 1998, Korea Advanced Institute of Science and Tech; S.M., 2002, Sc.D., 2007, Massachusetts Institute of Technology.

COCHRAN, ERIC W., Assistant Professor of Chemical and Biological Engineering. B.Sc., 1998, Iowa State; Ph.D., 2004, Minnesota.

COCHRAN, ERIC W., Assistant Professor of Chemical and Biological Engineering. B.Sc., 1998, Iowa State; Ph.D., 2004, Minnesota.

COCHRAN, ERIC W., Assistant Professor of Chemical and Biological Engineering. B.Sc., 1998, Iowa State; Ph.D., 2004, Minnesota.

COCHRAN, ERIC W., Assistant Professor of Chemical and Biological Engineering. B.Sc., 1998, Iowa State; Ph.D., 2004, Minnesota.
COCHRAN, JAMES, Associate Professor of Physics and Astronomy. B.S., 1985, Georgia Institute of Technology; M.A., 1987, Ph.D., 1993, New York (Stony Brook).

CODY, ROBERT, Emeritus Associate Professor of Geologic and Atmospheric Sciences, B.S., 1960, St. Louis; M.A., 1962, Wyoming; Ph.D., 1968, Colorado.

COFFMAN, CLARK, Assistant Professor of Genetics, Development and Cell Biology. B.S., 1986, Iowa State; Ph.D., 1993, California (La Jolla).

COLBERT, JAMEST, Associate Professor of Ecology, Evolution and Organismal Biology; Associate Professor of Genetics, Development and Cell Biology. B.S., 1978, Iowa State; M.S., 1981, Ph.D., 1985; Wisconsin.

COLLETTI, JOE PAUL, Professor of Natural Resource Ecology and Management; Senior Associate Dean of the College of Agriculture and Life Sciences. B.S., 1972, Humboldt; M.S., 1974, Ph.D., 1978, Wisconsin.

COLLINS, EDMUND R., Emeritus Associate Professor of Chemical and Biological Engineering. B.S., 1944, Louisiana State; M.S., 1947, Iowa State.

COWLES, HAROLD A., Emeritus Professor of Political Science; Associate Professor of Psychology. B.S., 1955, West Virginia.

COWAN, ARNOLD RICHARD, Professor of Agriculture and Human Sciences. B.S., 1959, M.S., 1960, Iowa State; Ph.D., 1962, Illinois.

CORMICLE, LARRY W., Senior Lecturer in Civil, Construction and Environmental Engineering. B.S., 1978, Iowa State.

CORN, STEPHEN C., Emeritus Professor of Animal Science. B.S., 1964, Iowa State.

CORNICK, NANCY, Associate Professor of Veterinary Diagnostic and Production Animal Medicine. B.S., 1981, Ph.D., 1987, Iowa State.

COURTNEY, GREGORY W., Professor of Entomology; World Languages and Cultures; University Professor. B.S., 1955, Ph.D., 1969, Iowa State.

COX, DAVID FRAME, Emeritus Professor of Statistics; University Professor. B.S., 1953, Cornell; M.S., 1957, North Carolina State; Ph.D., 1959, Iowa State.

COX, RONALD ARTHUR, Adjunct Associate Professor of Aerospace Engineering. B.S., 1979, Iowa State; M.S., 1982, Texas (Arlington); Ph.D., 1989, Iowa State.

COZMA, RALUCA, Assistant Professor of Greenlee School of Journalism and Communication. B.A., 2003, Bucharest (Romania); M.A., 2008, Ph.D., 2009, Louisiana State.

CRAWLEY, HENRY BERT, Professor of Physics and Astronomy. B.S., 1962, Louisiana Tech; Ph.D., 1966, Iowa State.

CROSS, SUSAN ELAINE, Associate Professor of Psychology. B.S., 1979, Texas A&M; M.A., 1982, Ohio State; Ph.D., 1990, Michigan.

CUNNINGHAM, JOHN, Associate Professor of Art and Design. B.A., 1972, Temple; M.S., 1976, Drexel; Ph.D., 1984, Pennsylvania.

CUNNINGHAM, JON E., Associate Professor of Animal Science; Associate Professor of Psychology. B.S., 1979, McPherson; Ph.D., 1987, Kansas State.
CUNNINHAM, DAVID E., Assistant Professor of Political Science. B.A., 1998, Wake Forest; M.S., 2001, George Mason; Ph.D., 2006, California (San Diego).

DALESSANDRO, DOMENICO, Associate Professor of Mathematics. Ph.D., 1996, Padua (Italy); Ph.D., 1999, California (Santa Barbara).

DALAL, VIKRAM L., Professor of Electrical and Computer Engineering. B.S., 1964, Bombay; Ph.D., 1969, Princeton.

DALY, BRENDA O., Emeritus Professor of English; University Professor. B.A., 1963, North Dakota; Ph.D., 1985, Minnesota.

DAMHORST, MARY LYNN, Professor of Apparel, Design. B.S., 1967, Illinois; M.S., 1975, California (Davis); Ph.D., 1981, Texas.

DE JONG, PAUL S., Emeritus Professor of Mechanical Engineering. B.A., 1972, Illinois; M.S., 1975, California (Santa Barbara).

DARR, MATTHEW JOHN, Assistant Professor of Agricultural and Biosystems Engineering. B.S., 2002, Ohio State; M.S., 2004, Kentucky; Ph.D., 2007, Ohio State.

DAVID, HERBERT ARON, Emeritus Professor of Statistics; Distinguished Professor in Liberal Arts and Sciences. B.Sc., 1947 Sydney; Ph.D., 1953, London.

DAVID, HERBERT T., Emeritus Professor of Statistics; Emeritus Professor of Industrial and Manufacturing Systems Engineering; University Professor. A.B., 1947, Harvard; M.A., 1948, Columbia; Ph.D., 1950, Chicago.

DAVIDSON, JENNIFER L., Associate Professor of Mathematics; Associate Professor of Electrical and Computer Engineering. B.A., 1979, Mount Holyoke; Ph.D., 1989, Florida.

DAVIS, JAMES A., Associate Professor of Computer Engineering; Vice Provost and Chief Information Officer. B.S., 1975, M.S., 1981, Ph.D., 1984, Iowa State.

DAY, TIMOTHY A., Associate Professor of Biomedical Sciences. B.S., 1986, Kansas State; M.S., 1990, Ph.D., 1993, Michigan State.

DAYAL, VINAY, Associate Professor of Mechanical Engineering. B.Tech., 1972, Indian Institute of Technology; M.S., 1983, Missouri; Ph.D., 1987, Texas A&M.

DEACON, RUTH ELINOR, Emeritus Professor of Human Development and Family Studies. B.S., 1944, Ohio State; M.S., 1948, Ph.D., 1954, Cornell.

DEAM, DIRK J., Senior Lecturer in Political Science; Senior Lecturer in Aerospace Engineering. B.S., 1981, J.D., 1985, Kansas; Ph.D., 1999, Iowa.

DILTS, HAROLD E., Emeritus Professor of Curriculum and Instruction. B.S., 1951, M.A., 1958, Northern Iowa; Ph.D., 1963, Iowa.

DIMITROVA, DANIELA, Assistant Professor of Greenlee School of Journalism and Communication. B.A., 1997 American (Bulgaria); M.A., 1999, Oregon; Ph.D., 2003, Florida.

DINKELMAN, ANDREA L., Assistant Professor, Library. B.S., 1984, Nebraska Wesleyan; PHARM, 1991, Nebraska Medical Center; M.S., 2003, Illinois.

DISNEY, RICHARD L., Emeritus Professor of Greenlee School of Journalism and Communication. B.A., 1937, Oklahoma.

DOAK, PAUL D., Emeritus Associate Professor of Economics. B.S., 1957, M.S., 1960, Missouri; Ph.D., 1965, Iowa State.

DOBBS, DRENA LEIGH, Professor of Genetics, Development and Cell Biology. B.S., 1977, Georgia; Ph.D., 1983, Oregon.

DODD, JAMES R., Emeritus Professor of World Languages and Cultures. B.A., 1959, Johns Hopkins; M.A., 1961, Minnesota; Ph.D., 1964, Illinois.

DUJOWICH, MAURICIO, Adjunct Instructor in Veterinary Clinical Sciences. B.S., 2000, California (San Diego); D.V.M., 2004, California (Davis).

DUNK, LARSON B. JR., Assistant Professor of Agricultural and Biosystems Engineering (Collaborator). B.A., 1977, Miami (Ohio); Ph.D., 1983, Texas A&M.

DUPONT, JACQUELINE, Emeritus Professor of Food Science and Human Nutrition. B.S., 1955, Florida State; M.S., 1959, Iowa State; Ph.D., 1962, Florida State.

DURBIN, PAUL, Professor of Aerospace Engineering. B.S.E., 1974, Princeton; Ph.D., 1979, Cambridge.

DUSSELIER, JANE, Assistant Professor of Anthropology. B.A., 1979, Avila; M.A., 1999, Sarah Lawrence; Ph.D., 2005, Maryland.

DUVICK, JONATHAN PAUL, Adjunct Associate Professor of Genetics, Development and Cell Biology. B.A., 1976, Earlham College; Ph.D., 1982, Wisconsin.

DYER, DONALD CHESTER, Emeritus Professor of Biomedical Sciences. B.S., 1961, Ph.D., 1965, Kansas State.

DÙJOWICH, MAURICIO, Adjunct Instructor in Veterinary Clinical Sciences. B.S., 2000, California (San Diego); D.V.M., 2004, California (Davis).

ENGELBRECHT, MARK C., Emeritus Professor of Architecture; Dean of the College of Design. B.Arch., 1963, Iowa State; M.Arch., 1964, Columbia.

ENGELKEN, TERRY, Associate Professor of Veterinary Medicine. B.S., 1954, Iowa State; M.S., 1958, Colorado State; Ph.D., 1965, Iowa State.

ESPENSON, JAMES H., Emeritus Professor of Chemistry; Distinguished Professor in Liberal Arts and Sciences. B.S., 1958, California Institute of Technology; Ph.D., 1962, Wisconsin.

EULENSTEIN, OLIVER, Emeritus Professor of Computer Science. Ph.D., 1998, Bonn (Germany).

FLETCHER, LEWIS, Emeritus Professor of Economics. B.S., 1954, Florida; Ph.D., 1960, California (Berkeley).

FLORA, CORNELIA B., Professor of Sociology; Charles F. Curtis Distinguished Professor in Agriculture and Life Sciences. A.B., 1965, California (Berkeley); M.S., 1966, Ph.D., 1970, Cornell.

FLORIO, JOHN P., Assistant Professor of Finance. B.Sc., 1998, Piraeus (Greece); M.Sc., 1999, Warwick (Poland); Ph.D., 2008, Pittsburgh.

FLORY, DAVID, Lecturer in Geological and Atmospheric Sciences. B.A., 1992, Michigan (Flint); M.S., 2003, Iowa State.

FOEGEN, ANNE MARIE, Associate Professor of Curriculum and Instruction. B.S., 1988, Winona State; M.A., 1987, Ohio State; Ph.D., 1989, Minnesota.

FORD, CLARK FUGIER, Associate Professor of Food Science and Human Nutrition. B.A., 1975, California (Los Angeles); M.S., 1977, Ph.D., 1981, Iowa.

FOREMAN, CHARLES F., Emeritus Professor of Animal Science. B.S., 1948, M.S., 1949, Kansas State; Ph.D., 1953, Missouri.

FORKER, BARBARA E., Emeritus Professor of Kinesiology; Distinguished Professor in Education. B.S., 1942, Eastern Michigan; M.S., 1950, Iowa State; Ph.D., 1957, Michigan.

FOUAD, ABD El-AZIZ A., Emeritus Professor of Electrical Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1950, Cairo; M.S., 1953, Iowa; Ph.D., 1956, Iowa State.

FOWLER, GILES MERRILL, Emeritus Associate Professor of Greenlee School of Journalism and Communication. B.A., 1955, Westminster; M.S., 1956, Columbia.

FOWLES, DOROTHY L., Emeritus Professor of Art and Design. B.A., 1941, Northwestern; M.A., 1944, Cornell; Ph.D., 1949, Iowa.

FOX, LESLIE ELIZABETH, Associate Professor of Veterinary Clinical Sciences. B.A., 1972, Hollins College; D.V.M., 1984, Michigan State; M.S., 1989, Wisconsin.

FOX, RODNEY O., Professor of Chemical and Biological Engineering. B.S., 1982, M.S., 1985, Ph.D., 1987, Kansas State.

GARY, ROBERT FRANK, Assistant Professor of Accounting. B.S.E.E., 1968, New Mexico State; M.S.E.E., 1971, Southern Methodist; M.B.A., 2000, New Mexico; Ph.D., 2005, Arizona State.

GASSMANN, AARON JOHN, Assistant Professor of Entomology. B.A., 1997; Saint Thomas; Ph.D., 2003, New York (Stony Brook).

GAUGER, CARLYLE J., Emeritus Professor of Agricultural Education and Studies. B.S., 1939, M.S., 1955, Iowa State.

GAUTENSTEIN, ARTHUR, Emeritus Professor of Mathematics. B.E., 1965, Cooper Union; Ph.D., 1968, Northwestern.

GEMMILL, DOUGLAS D., Associate Professor of Industrial and Manufacturing Systems Engineering. B.S., 1972, M.S., 1976, Iowa State; Ph.D., 1988, Wisconsin.

GENTILE, DOUGLAS A., Assistant Professor of Psychology. B.S., 1958, New York (Albany); M.A., 1967, Iowa; D.M.A., 2005, Minnesota.

GIRTON, JACK RICHARD, Professor of Biochemistry, Biophysics and Molecular Biology; University Professor. B.A., 1973, Oregon; Ph.D., 1979, Alberta.

GKRITZA, KONSTANTINA, Assistant Professor of Civil, Construction and Environmental Engineering. M.S.C.E., 2003, Virginia Polytechnic; Ph.D., 2006, Purdue.

GLADON, RICHARD J., Associate Professor of Horticulture. B.S., 1969, Ohio Northern; M.S., 1974, Ph.D., 1977, Ohio State.

GLANVILLE, THOMAS D., Professor of Agricultural and Biosystems Engineering. B.S., 1972, M.S., 1975, Ph.D., 1987, Iowa State.

GLATZ, BONITA ANN, Emeritus Professor of Food Science and Human Nutrition; University Professor. B.A., 1971, Cornell; M.S., 1973, Ph.D., 1975, Wisconsin.

GLATZ, CHARLES E., Professor of Chemical and Biological Engineering. B.S., 1971, Notre Dame; Ph.D., 1975, Wisconsin.

GLEASON, MARK L., Professor of Plant Pathology; Professor of Horticulture. B.A., 1972, Carleton; M.S., 1976, Ph.D., 1980, Virginia; Ph.D., 1985, Kentucky.

GLEEDHILL, JARED AYRES, Adjunct Instructor in Military Science and Tactics. B.S., 2005, Iowa State.
GRANT, DAVID, Associate Professor of Agronomy (Collaborator). B.S., 1971, New York (Stony Brook); Ph.D., 1977, Chicago.
GRANT, MICHAEL, Assistant Professor. B.S., 1973, Seattle; M.S., 1976, Ph.D., 1979, Iowa State.
GRAVES, DONALD JOHN, Emeritus Professor of Biochemistry; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1965, Illinois; Ph.D., 1969, Washington.
GREENBOWE, THOMAS J., Professor of Chemistry; Professor of Curriculum and Instruction. B.A., 1972, New Jersey; M.S., 1974, Indiana State; M.S., 1979, Ph.D., 1983, Purdue.
GREENLEE, JUSTIN J., Assistant Professor of Biomedical Sciences (Collaborator); Assistant Professor of Veterinary Pathology (Collaborator). B.A., 1995, Northern Iowa; D.V.M., 1999, Ph.D., 2003, Iowa State.
GREENLEE, MARY WEST, Assistant Professor of Biomedical Sciences. B.S., 1994, Ph.D., 1999, Iowa State.

HANNECK, LARRY F., Associate Professor of Chemical and Biological Engineering. B.S., 1984, Iowa State; M.S., 1987, Kansas State; Ph.D., 1989, Iowa State.

HANNUM, THOMAS E., Emeritus Professor of Psychology. B.S., 1941, M.S., 1949, Iowa State; Ph.D., 1952, Nebraska.

HANSEN, SCOTT W., Associate Professor of Mathematics. B.S., 1983, Southwest Missouri; Ph.D., 1988, Wisconsin.

HARDING, CHRIS, Assistant Professor of Geological and Atmospheric Sciences; Assistant Professor of Computer Science. M.Sc., 1993, Free (Berlin); Ph.D., 2001, Houston.

HARDY, ROLLAND LEE, Emeritus Professor of Civil Construction and Environmental Engineering. B.S., 1947, Illinois; B.S., 1950, C.E., 1956, Missouri (Rolla); Dr.Ing., 1963, Karlsruhe.

HARRIGE, DAVID J., Emeritus Professor of Psychology. B.S., 1988, California (Los Angeles); M.S., 1992, Missouri; Ph.D., 1996, Iowa State.

HARilingual, ERIC R., Emeritus Professor of Art and Design. B.Arch., 1952, Iowa State; M.Arch., 1958, Cranbrook.

HEGLAND, SUSAN M., Associate Professor of Human Development and Family Studies. B.A., 1970, St. Olaf; M.S., 1972, Iowa State; Ph.D., 1977, Ohio State.

HEINDEL, THEODORE JOHN, Professor of Mechanical Engineering. B.S.M.E., 1988, Wisconsin; M.S.M.E., 1990, Ph.D., 1994, Purdue.

HOURS, RICHARD H., Emeritus Associate Professor of Greeenlee School of Journalism and Communication. B.A., 1968, Nebraska Wesleyan; M.S.J., 1870, Northwestern.

HAYES, DERMOT JAMES, Professor of Economics. B.S., 1981, Dublin; Ph.D., 1988, California (Berkeley).

HAYNES, EMMIT HOWARD, Emeritus Professor of Animal Science. B.S., 1951, M.S., 1953, Kentucky; Ph.D., 1959, Cornell.

HAYNES, JOSEPH S., Professor of Veterinary Pathology. D.V.M., 1979, Missouri; Ph.D., 1986, Minnesota.

HAZEN, THAMON EDSON, Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1947, Oklahoma State; M.S., 1950, Purdue; Ph.D., 1956, Iowa State.

HEEMSTRA, HOWARD C., Emeritus Professor of Architecture. B.Arch., 1952, Iowa State; M.Arch., 1958, Cranbrook.

HEGLAND, SUSAN M., Associate Professor of Human Development and Family Studies. B.A., 1970, St. Olaf; M.S., 1972, Iowa State; Ph.D., 1977, Ohio State.

HEINDEL, THEODORE JOHN, Professor of Mechanical Engineering. B.S.M.E., 1988, Wisconsin; M.S.M.E., 1990, Ph.D., 1994, Purdue.

HOURS, RICHARD H., Emeritus Associate Professor of Greeenlee School of Journalism and Communication. B.A., 1968, Nebraska Wesleyan; M.S.J., 1870, Northwestern.

HAYES, DERMOT JAMES, Professor of Economics. B.S., 1981, Dublin; Ph.D., 1988, California (Berkeley).

HAYNES, EMMIT HOWARD, Emeritus Professor of Animal Science. B.S., 1951, M.S., 1953, Kentucky; Ph.D., 1959, Cornell.

HAYNES, JOSEPH S., Professor of Veterinary Pathology. D.V.M., 1979, Missouri; Ph.D., 1986, Minnesota.

HAZEN, THAMON EDSON, Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1947, Oklahoma State; M.S., 1950, Purdue; Ph.D., 1956, Iowa State.

HEEMSTRA, HOWARD C., Emeritus Professor of Architecture. B.Arch., 1952, Iowa State; M.Arch., 1958, Cranbrook.

HEGLAND, SUSAN M., Associate Professor of Human Development and Family Studies. B.A., 1970, St. Olaf; M.S., 1972, Iowa State; Ph.D., 1977, Ohio State.

HEINDEL, THEODORE JOHN, Professor of Mechanical Engineering. B.S.M.E., 1988, Wisconsin; M.S.M.E., 1990, Ph.D., 1994, Purdue.

HOURS, RICHARD H., Emeritus Associate Professor of Greeenlee School of Journalism and Communication. B.A., 1968, Nebraska Wesleyan; M.S.J., 1870, Northwestern.

HAYES, DERMOT JAMES, Professor of Economics. B.S., 1981, Dublin; Ph.D., 1988, California (Berkeley).

HAYNES, EMMIT HOWARD, Emeritus Professor of Animal Science. B.S., 1951, M.S., 1953, Kentucky; Ph.D., 1959, Cornell.

HAYNES, JOSEPH S., Professor of Veterinary Pathology. D.V.M., 1979, Missouri; Ph.D., 1986, Minnesota.

HENRICH, SUZANNE, Professor of Food Science and Human Nutrition. B.A., 1976, California (Los Angeles); Ph.D., 1985, California (Berkeley).

HENNESSY, HONG LI FENG, Adjunct Assistant Professor of Economics. B.S., 1996, Beijing Agricultural; Ph.D., 2001, Iowa State.

HENNING, STANLEY J., Assistant Professor of Agronomy. B.S., 1986, Iowa State; M.S., 1971, Ph.D., 1975, Oregon State.

HERMANN, PAUL JACOB, Emeritus Associate Professor of Aerospace Engineering. B.S., 1947 M.S., 1951, Iowa State.

HILL, THOMAS L., Adjunct Assistant Professor of Educational Leadership and Policy Studies; Vice President for Student Affairs. B.S., 1972, Arkansas State; M.S., 1976, Long Island; Ph.D., 1985, Florida.

HILLESLEND, GLENN G., Emeritus Adjunct Professor of Electrical and Computer Engineering. B.S.E.E., 1947, Iowa State.

HILLIER, ANDREW C., Associate Professor of Chemical and Biological Engineering; Associate Professor of Chemistry. B.S., 1990, Nebraska, Ph.D., 1995, Minnesota.

HIRA, LABH S., Professor of Accounting; Dean of the College of Business. B.S., 1969, M.S., 1971, Ludhiana; Ph.D., 1975, Missouri.

HO, KAI-MING, Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. B.S., 1973, Hong Kong; Ph.D., 1978, California (Berkeley).

HODGES, CLINTON, Emeritus Professor of Horticulture; Emeritus Professor of Agronomy; Emeritus Professor of Plant Pathology. B.S., 1962, M.S., 1964, Ph.D., 1967, Illinois.

HOERNER, THOMAS ALLEN, Emeritus Professor of Curriculum and Instruction. B.S., 1983, Wisconsin (Stout); M.S., 1971, Iowa State; Ph.D., 1978, Purdue.

HILL, JAMES CHRISTIAN, Professor of Chemical and Biological Engineering and Chair of the Department; University Professor. B.S., 1982, Stanford; Ph.D., 1968, Washington.

HILL, JOHN C., Professor of Physics and Astronomy. B.S., 1957, Davidson; Ph.D., 1966, Purdue.

HILL, JOHN HEMMINGSON, Professor of Plant Pathology. B.A., 1963, Carleton; M.S., 1966, Minnesota; Ph.D., 1971, California (Davis).
INYANG, ANIEFI O., Adjunct Assistant Professor of Agricultural and Biosystems Engineering. B.S., 1976, Kansas; M.S., 1978, Ph.D., 1982, Oklahoma.

IVERSEN, JAMES D., Emeritus Professor of Aerospace Engineering. B.S., 1956, M.S., 1958, Ph.D., 1964, Iowa State.

IVerson, NEAL R., Professor of Geological and Atmospheric Sciences. B.S., 1965, Iowa State; Ph.D., 1969, Minnesota.

JACOBSON, CARL ERNEST, Professor of Geological and Atmospheric Sciences and Chair of the Department. B.S., 1975, New York (Binghamton); Ph.D., 1980, California (Los Angeles).

JACOBSON, DOUG W., Professor of Electrical and Computer Engineering; University Professor. B.S., 1980, Ph.D., 1985, Iowa State.

JACOBSON, JOHN BRUCE, Assistant Professor of Aerospace Engineering. B.S., 1971, M.S., 1979, Iowa State.

JACOBSON, NORMAN L., Emeritus Professor of Animal Science; Emeritus Professor of Food Science and Human Nutrition; Charles F. Curtis Distinguished Professor in Agriculture and Life Sciences. B.S., 1940, Wisconsin; M.S., 1941, Ph.D., 1947, Iowa State.

JAMES, MARTHA GRAHAM, Adjunct Associate Professor of Biochemistry; Biophysics and Molecular Biology. B.A., 1968, Colorado; M.A., 1965, Drake; Ph.D., 1969, Ph.D., 1990, Iowa State.

JANE, JAVLIN, Professor of Food Science and Human Nutrition. B.S., 1973, National Chung-Hsing; Ph.D., 1984, Iowa State.

JARBOE, LAURA, Assistant Professor of Chemical and Biological Engineering. B.S., 2000, Kentucky; Ph.D., 2006, California (Los Angeles).

JEFFREY, CYNTHIA G., Associate Professor of Accounting. B.S., 1975, M.S., 1979, Iowa State; Ph.D., 1989, Minnesota.

JEFFINJA, SRIDU J., Associate Professor of Biomedical Sciences; Associate Professor of Animal Science. D.V.M., 1972, M.S., 1976, Belgrade; Ph.D., 1982, Iowa State.

JENKS, WILLIAM S., Professor of Chemistry. B.S., 1986, California (Los Angeles); Ph.D., 1991, Columbia.

JENSEN, HELEN HANNAY, Professor of Economics. B.A., 1968, Carleton; M.S., 1974, Minnesota; Ph.D., 1980, Wisconsin.

JERNIGAN, ROBERT L., Professor of Biochemistry, Biophysics and Molecular Biology; Distinguished Professor in Liberal Arts and Sciences. B.A., 1963, Bethel; Ph.D., 1967, Minnesota.

JOHANSON, HOWARD P., Emeritus Professor of Agricultural and Biosystems Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1949, M.S., 1960, Iowa State; M.S., 1954, Iowa; Ph.D., 1969, Iowa State.

JOHNSON, JANET S., Clinician in Food Science and Human Nutrition. B.S., 1976, Iowa State; M.S., 1985, Delaware.

JOHNSON, LAWRENCE A., Professor of Food Science and Human Nutrition. B.Sc., 1969, Ohio State; M.Sc., 1971, North Carolina State; Ph.D., 1978, Kansas State.

JOHNSON, MARGARET S., Emeritus Assistant Professor of World Languages and Cultures. B.A., 1956, Oregon; M.A., 1974, Drake.

JOHNSON, STANLEY R., Emeritus Professor of Economics; Charles F. Curtis Distinguished Professor in Agriculture and Life Sciences. B.A., 1961, Western Illinois; M.S., 1962, Texas Tech; Ph.D., 1966, Texas A&M.

JOHNSON, DAVID C., Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. B.A., 1989, California (Santa Barbara); Ph.D., 1975, California (San Diego).

JOHNSON, DOUGLAS MARSHALL, Professor of Landscape Architecture and Chair of the Department; Professor of Community and Regional Planning and Chair of the Department. B.S., 1979, B.L.A., 1980, SUNY; M.L.A., 1982, Harvard; Ph.D., 1986, Washington.

JOHNY, ROBERT WILIAM, Professor of Economics. B.S., 1969, M.S., 1974, Ph.D., 1976, Minnesota.

JONES, BERT LYN, Emeritus Associate Professor of Agricultural Education and Studies. B.A., 1970, Missouri; Southern; M.A., 1974, Central Missouri; Ph.D., 1985, Wisconsin.

JONES, CHRISTOPHER, Assistant Professor of Geographical and Atmospheric Sciences (Collaborator). B.A., 1983, Simpson College; Ph.D., 1989, Montana State.

JONES, EDWIN C. JR., Emeritus Professor of Electrical and Computer Engineering; University Professor. B.S.E.E., 1955, West Virginia; D.I.C., 1956, Imperial College; Ph.D., 1962, Illinois.

JONES, LADON CARLOS, Senior Lecturer in Civil, Construction and Environmental Engineering. B.S., 1981, California State (Humboldt); M.S., 1984, Ph.D., 1986, California Los Angeles.

KADOLPH, SARA JEAN, Professor of Apparel, Educational Studies and Hospitality Management. B.A., 1974, Texas; Ph.D., 1985, Arizona State.

KAMAL, AHMED EL-SAYED, Professor of Electrical and Computer Engineering. B.S., 1978, M.S., 1980, Cairo (Egypt); M.A.Sc., 1982, Ph.D., 1986, Toronto (Canada).

KAMINSKI, ADAM, Assistant Professor of Physics and Astronomy. M.S., 1991, Skiddorsy (Poland); Ph.D., 2001, Illinois (Chicago).

KANGAS, TRACY A., Associate Professor of Biomedical Sciences (Collaborator). B.S., 1983, Wisconsin (Eau Claire); Ph.D., 1989, M.D., 1990, Medical College of Wisconsin.

KANTHASAMY, ANUMANTHA G., Professor of Biomedical Sciences; Clarence Hartley Covalt Distinguished Professor in Veterinary Medicine. B.S., 1981, M.S., 1984, M.Phl., 1985, Ph.D., 1989, Madras (India).

KANTHASAMY, ARTHI, Assistant Professor of Biomedical Sciences. B.S., 1990, Ph.D., 2001, Purdue.

KANWAR, RAMESHWAR S., Professor of Agricultural and Biosystems Engineering and Chair of the Department. B.S., 1969, Pan Jhudda; M.S., 1975, Pantnarag; Ph.D., 1981, Iowa State.

KAPLAN, MURRAY LEE, Emeritus Professor of Food Science and Human Nutrition. B.A., 1962, Alfred; Ph.D., 1972, City University of New York.

KARAS, GEORGE G., Emeritus Professor of Psychology; Associate . B.A., 1956, Depauw; M.S., 1958, Ph.D., 1959, Purdue.

KAPROVA, ELENA EGRGOVNA, Assistant Professor of Apparel, Educational Studies and Hospitality Management. M.S., 1991, Dmsk State Technical Institute; Ph.D., 1995, St. Petersburg State (Russia).

KEENEY, DENNIS R., Emeritus Professor of Agronomy; Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1959, Iowa State; M.S., 1961, Wisconsin; Ph.D., 1965, Iowa State.

KEITH, PATRICIA M., Professor of Sociology. B.S., 1960, Southwest Missouri; M.S., 1968, Missouri; Ph.D., 1971, St. Louis.

KELKAR, ATUL G., Professor of Mechanical Engineering; Professor of Aerospace Engineering. B.E., 1984, Poona (India); M.S., 1990, Ph.D., 1993, Old Dominion.

KELLEY, KATE STOCKTON, Lecturer in English. B.A., 2002, California (Santa Barbara); M.Phil., 2003, Stirling (UK); M.A., 2006, Mississippi.

KELLY, CLINT DALE, Assistant Professor of Ecology, Evolution and Organismal Biology. B.Sc., 1995, Waterloo (Canada); M.Sc., 1999, Mount Allison; Ph.D., 2005, Toronto (Canada).

KENELY, MICHAEL D., Professor of Animal Science; University Professor. B.S., 1969, M.S., 1974, Central Missouri; Ph.D., 1979, Missouri State.
KEREN, NIR, Assistant Professor of Agricultural and Biosystems Engineering. B.Sc., 1990, M.Sc., 1998, Ben Gurion (Israel); Ph.D., 2003, Texas A&M.

KESLER, MICHAEL RICHARD, Assistant Professor of Materials Science and Engineering. B.S., 1996, Ph.D., 1999, Iowa State University.

KIBBEL, BRYCE W., Lecturer in Biomedical Sciences. D.V.M., 1999, Iowa State University.

Kim, Gap-Yong, Assistant Professor of Mechanical Engineering. B.S., 1997, Yonsei (South Korea); M.S.E., 2003, Ph.D., 2005, Michigan.

Kim, Jae-Kwang, Associate Professor of Statistics. B.S., 1991, M.S., 1993, Seoul National (Korea); Ph.D., 2000, Iowa State University.

Kim, Jeyoung, Assistant Professor of Electrical and Computer Engineering. B.S., 1992, M.S., 1997, Iowa State University.

Kim, Sang W., Associate Professor of Electrical and Computer Engineering. B.S., 1992, Kwangwoon (Korea); M.S., 1994, Arizona; Ph.D., 2003, Michigan.

Kim, Jae-Kwang, Associate Professor of Electrical and Computer Engineering. B.S., 1992, Kwangwoon (Korea); M.S., 1994, Arizona; Ph.D., 2003, Michigan.

Kim, Sang W., Associate Professor of Electrical and Computer Engineering. B.S., 1992, Yonsei (South Korea); M.S., 1994, Arizona; Ph.D., 2003, Michigan.

Kim, Sang W., Associate Professor of Computer Engineering; Professor of Computer Science. B.S., 1990, Wisconsin; M.S., 1993, Ph.D., 1996, Purdue.

Kirsch, Kevin D., Assistant Professor of Veterinary Pathology. B.A., 1981, Iowa; Ph.D., 1988, Maryland.

Kim, Gap-Yong, Assistant Professor of Mechanical Engineering. B.S., 1997, Yonsei (South Korea); M.S.E., 2003, Ph.D., 2005, Michigan.

Kim, Jae-Kwang, Associate Professor of Statistics. B.S., 1991, M.S., 1993, Seoul National (Korea); Ph.D., 2000, Iowa State University.

Kim, Jeyoung, Assistant Professor of Electrical and Computer Engineering. B.S., 1992, Kwangwoon (Korea); M.S., 1994, Arizona; Ph.D., 2003, Michigan.

Kim, Sang W., Associate Professor of Electrical and Computer Engineering. B.S., 1992, Yonsei (South Korea); M.S., 1994, Arizona; Ph.D., 2003, Michigan.

Kim, Sang W., Associate Professor of Electrical and Computer Engineering. B.S., 1992, Kwangwoon (Korea); M.S., 1994, Arizona; Ph.D., 2003, Michigan.

Kim, Sang W., Associate Professor of Computer Engineering; Professor of Computer Science. B.S., 1990, Wisconsin; M.S., 1993, Ph.D., 1996, Purdue.

Kogon, Vladimir G., Adjunct Associate Professor of Physics and Astronomy. B.S., 1956, M.S., 1961, State Pedagogical Institute (Russia); Ph.D., 1977, Israel Institute of Technology.

Kong, Sang-Chang, Assistant Professor of Mechanical Engineering. B.S., 1987, National Tsing-Hua (Taiwan); M.S., 1992, Ph.D., 1994, Wisconsin.

Kopp, Julian, Emeritus Professor of Electrical and Computer Engineering. B.S., 1949, Wisconsin; M.S., 1954, Ph.D., 1958, Purdue.

Kothari, Suraj C., Professor of Electrical and Computer Engineering; Professor of Computer Science. B.S., 1970, Poona; Ph.D., 1977, Purdue.

Kottmann, Nelle Hutter, Adjunct Instructor in Veterinary Clinical Sciences. B.V.Sc., 2005, Tokyo (Japan); D.V.M., 2008, Louisiana State.

Kothari, Suraj C., Professor of Electrical and Computer Engineering; Professor of Computer Science. B.S., 1970, Poona; Ph.D., 1977, Purdue.

Kozel, Jacek Adam, Associate Professor of Agricultural and Biosystems Engineering; Associate Professor of Civil, Construction and Environmental Engineering. M.S., 1989, Warsaw Technological (Poland); M.S., 1992, Alaska; Ph.D., 1998, Texas.

Krafsur, Elliot S., Emeritus Professor of World Languages and Cultures. B.A., 1961, Northwestern (Minnesota); M.A., 1965, Middlebury.

Kling, Catherine L., Professor of Economics. B.A., 1981, Iowa; Ph.D., 1988, Maryland.

Koch, Steven, Professor of Geology and Atmospheric Sciences (Collaborator). B.S., 1972, M.S., 1974, Wisconsin; Ph.D., 1979, Oklahoma.

Koehler, Kenneth J., Professor of Statistics and Chair of the Department; University Professor. B.S., 1972, Wisconsin (Parkside); Ph.D., 1977, Minnesota.

Koford, Rolf R., Assistant Professor of Ecology, Evolution and Organismal Biology (Collaborator); Assistant Professor of Natural Resource Ecology and Management (Collaborator). B.S., 1970, California (Davis); Ph.D., 1979, California (Berkeley).

Kogon, Vladimir G., Adjunct Associate Professor of Physics and Astronomy. B.S., 1956, M.S., 1961, State Pedagogical Institute (Russia); Ph.D., 1977, Israel Institute of Technology.
KRAUS, BONNIE HAY, Clinician in Veterinary Clinical Sciences. B.S., 1989, Rutgers; D.V.M., 1989, Missouri.

KRAUS, GEORGE A., Professor of Chemistry; University Professor. B.S., 1972, Rochester; Ph.D., 1976, Columbia.

KREBS, STEPHEN, Associate Professor of Horticulture (Collaborator). B.A., 1974, Chicago; M.S., 1985, California (Davis); Ph.D., 1989, Michigan State.

KREIDER, BRET E., Associate Professor of Economics. B.A., 1988, Hope College; M.S., 1993, Ph.D., 1994, Wisconsin.

KREYSIG, ANDREAS, Adjunct Assistant Professor of Physics and Astronomy. Ph.D., 2001, Technische Universität Dresden (Germany).

KRIZAN, ZLATAN, Assistant Professor of Psychology. B.A., 2001, Winona State; Ph.D., 2007, Iowa.

KRUMHARDT, BARBARA A., Lecturer in Genetics, Development and Cell Biology. B.S., 1974, Iowa State; M.T., 1979, Mercy Medical Center; Ph.D., 1989, Iowa State.

KUMAR, RATNESH, Professor of Electrical and Computer Engineering. B.Tech., 1987, Indian Institute of Technology (India); M.S., 1989, Ph.D., 1991, Texas (Austin).

KUNDELL, CAROLYN J., Emeritus Associate Professor of Apparel, Educational Studies and Hospitality Management. B.S., 1956, Iowa State; M.S., 1961, Nebraska (Omaha); Ph.D., 1969, Iowa State.

KUO, MONLIN, Associate Professor of Natural Resource Ecology and Management. B.S., 1965, Taibain; M.S., 1971, Missouri; Ph.D., 1977, California (Berkeley).

KUPFER, FERN L., Associate Professor of English. B.B., 1968, New York (Cortland); M.S., 1975, Iowa State.

KURTENBACH, JAMES M., Associate Professor of Accounting. B.S., 1980, Iowa State; M.S., 1987, Tulsa; Ph.D., 1992, Missouri.

KUSHER, MARK J., Professor of Electrical and Computer Engineering; Professor of Chemical and Biological Engineering. B.A., 1976, B.S., 1976, California (Los Angeles); M.S., 1977, Ph.D., 1979, California Institute of Technology.

KWON, YOUNG H., Assistant Professor of Biomedical Sciences (Collaborator). B.S., 1984, Ph.D., 1991, Massachusetts Institute of Technology; M.D., 1991, Yale.

L'HEUREUX, DEBORAH, Adjunct Instructor in Veterinary Clinical Sciences. B.S., 1985, Massachusetts; D.V.M., 2003, Louisiana State.

LACASA, JUDITH N., Emeritus Professor of World Languages and Cultures. B.S., 1958, Ph.D., 1968, Louisville State.

LADD, GEORGE WELLS, Emeritus Professor of Economics; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1950, South Dakota State; M.A., 1951, Michigan State; Ph.D., 1955, Illinois.

LAFLENC, JOHN M., Professor of Agricultural and Biosystems Engineering (Collaborator). B.S., 1959, M.S., 1960, Missouri; Ph.D., 1972, Iowa State.

LAGER, KELL Y M., Assistant Professor of Veterinary Clinical Sciences. B.S., 1985, M.S., 1989, Missouri; Ph.D., 1991, Florida State.

LAMONT, SUSAN J., Professor of Animal Science; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.A., 1975, Trinity (Illinois); Ph.D., 1980, Illinois.

LAMOTTE, CLIFFORD E., Emeritus Professor of Genetics, Development and Cell Biology. B.S., 1953, Texas A&M; Ph.D., 1960, Wisconsin.

LAND, ALISON A., Assistant Professor of Food Science and Human Nutrition. B.S., 1994, M.S., 1995, North Carolina (Greensboro); Ph.D., 1999, Florida.

LAND, JONATHAN T., Assistant Professor of Economics; University Professor. B.S., 1969, M.S., 1969, Ph.D., 1971, Massachusetts Institute of Technology.

LAND, JONATHAN T., Assistant Professor of Economics; University Professor. B.S., 1969, M.S., 1969, Ph.D., 1971, Massachusetts Institute of Technology.

LAND, JONATHAN T., Assistant Professor of Economics; University Professor. B.S., 1969, M.S., 1969, Ph.D., 1971, Massachusetts Institute of Technology.

LAND, JONATHAN T., Assistant Professor of Economics; University Professor. B.S., 1969, M.S., 1969, Ph.D., 1971, Massachusetts Institute of Technology.

LAND, JONATHAN T., Assistant Professor of Economics; University Professor. B.S., 1969, M.S., 1969, Ph.D., 1971, Massachusetts Institute of Technology.

LAND, JONATHAN T., Assistant Professor of Economics; University Professor. B.S., 1969, M.S., 1969, Ph.D., 1971, Massachusetts Institute of Technology.

LAND, JONATHAN T., Assistant Professor of Economics; University Professor. B.S., 1969, M.S., 1969, Ph.D., 1971, Massachusetts Institute of Technology.
LAWRENCE, ROGER LEE, Emeritus Professor of Educational Leadership and Policy Studies; Emeritus Professor of Agricultural and Policy Studies. B.S., 1943, Ohio State; M.A., 1949, George Washington; Ph.D., 1958, Iowa State.

LAWSON, KAREN GRUBER, Associate Professor, Library; Associate Dean, Library. B.A., 1974, M.L.S., 1976, New York (Buffalo).

LEANDRO, LEONOR F. S., Assistant Professor of Plant Pathology. B.S., 1996, Universidade Tecnica De Lisboa; M.S., 1997, Nottingham (UK); Ph.D., 2002, Iowa State.

LEE, DAH-YINN, Emeritus Professor of Civil, Construction and Environmental Engineering. B.S., 1958, Chen Kung, Ph.D., 1964, Iowa State.

LEE, GYUNGHO, Professor of Electrical and Computer Engineering (Collaborator). B.S., 1977, Sogang (Korea); M.S., 1979, Korean Institute of Science and Technology; Ph.D., 1986, Illinois.

LEE, MICHAEL, Professor of Agronomy; Professor of Genetics, Development and Cell Biology. B.S., 1981, Rutgers; M.A., 1984, Ph.D., 1986, Minnesota.

LIEBICH, MARY E. FRY, Senior Lecturer in English. B.S., 1972, National Taiwan; Ph.D., 1983, California (Berkeley).

LINSKY, STEVEN, Assistant Professor of Chemical Engineering. B.S., 1991, California (Davis).

LIPSEY, HOLLY J., Senior Lecturer in Kinesiology. B.A., 1993, Southwest State (Minnesota); M.S., 1995, South Dakota State.

LITCHFIELD, RUTH E., Assistant Professor of Food Science and Human Nutrition. B.A., 1984, Northern Iowa; M.S., 1986, Kansas State; Ph.D., 2000, Iowa State.

LIU, CHEN-CHING, Professor of Electrical and Computer Engineering. B.S.E.E., 1978, M.S.E.E., 1978, National Taiwan; Ph.D., 1983, California (Berkeley).

LIU, HAILIANG, Professor of Mathematics. B.Sc., 1984, Henan Normal (China); M.S., 1988, Tshinghua (China); Ph.D., 1995, Academia Siniria (Beijing).

LIU, PENG, Assistant Professor of Statistics. B.M.Ed., 1998, Beijing (China); M.S., 2001, Ph.D., 2006, Cornell.

LOHINES, ROBERT, Emeritus Professor of Civil, Construction and Environmental Engineering; University Professor. B.S., 1959, Ohio State; M.S., 1961, Ph.D., 1964, Iowa State.

LOPES, JOHN A., Assistant Professor of Food Science and Human Nutrition (Collaborator). B.S., 1960, M.S., 1963, Bombay (India); Ph.D., 1969, Waterloo (Canada).

LORD, WILLIAM, Emeritus Professor of Electrical and Computer Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1961, M.S., 1964, Nottingham.

LORENZ, FREDERICK O., Professor of Sociology; Professor of Psychology; Professor of Sociology; University Professor. B.S., 1970, Mankato; M.A., 1972, South Dakota State; Ph.D., 1980, Iowa State.

LORIMOR, JEFFERY C., Emeritus Associate Professor of Agricultural and Biosystems Engineering. B.S., 1967 Iowa State; M.S., 1970, Nebraska; Ph.D., 1996, Iowa State.

LOVE, MARK HOWARD, Associate Professor of Food Science and Human Nutrition. B.S., 1967, Ohio State; M.S., 1969, Ph.D., 1975, Michigan State.
LOVE, ROBERT D., Emeritus Associate Professor of Industrial and Manufacturing Systems Engineering. B.S., 1948, M.S., 1965, Iowa State.

LOVELY, WALTER G., Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1949, Maine.

LOWERY, JENNIFER, Senior Lecturer in English. B.S., 1974, Tennessee (Martin); M.A., 1981, South Carolina.

LOWITT, RICHARD, Emeritus Professor of History. B.S.S., 1943, City University of New York; M.A., 1945, Ph.D., 1950, Columbia.

LUBBERSTEDT, THOMAS, Associate Professor of Agronomy. Ph.D., 1993, Munich (Germany).

LUCKETT, DUDLEY G., Emeritus Professor of Economics; Distinguished Professor in Liberal Arts and Sciences. A.B., 1952, M.A., 1954, Missouri; Ph.D., 1958, Texas.

LUCKECE, GLENN R., Professor of Mathematics; Professor of Electrical and Computer Engineering. B.S., 1968, Michigan State; Ph.D., 1970, California Institute of Technology.

LUCKECE, GREG R., Associate Professor of Mechanical Engineering. B.S., 1987, Yale; Ph.D., 1992, Pennsylvania State.

LUTZ, JACK HAROLD, Professor of Computer Science; Professor of Mathematics. B.G.S., 1976, M.A., 1979, M.S., 1981, Kansas; Ph.D., 1987, California Institute of Technology.

LYNCH, DAVID, Emeritus Professor of Physics and Astronomy; Distinguished Professor in Liberal Arts and Sciences. B.S., 1954, Rensselaer; M.S., 1955, Ph.D., 1958, Illinois.

MA, YAO, Assistant Professor of Electrical and Computer Engineering. B.S., 1993, Anhui (China); M.S., 1996, Science and Technology (China); Ph.D., 2000, National (Singapore).

MABRY, JOHN W., Professor of Animal Science. B.S., 1972, Oklahoma State; M.S., 1974, Ph.D., 1977, Iowa State.

MACDONALD, MAURICE M., Professor of Human Development and Family Studies; Professor of Economics. B.A. 1969, California (Santa Cruz); M.S., 1971, Ph.D., 1974, Michigan.

MACDONALD, RUTH SEAMAN, Professor of Food Science and Human Nutrition and Chair of the Department. B.S., 1979, Western Maryland College; M.S., 1981, Ph.D., 1985, Minnesota.

MACINTOSH, GUSTA O., Assistant Professor of Biochemistry, Biophysics and Molecular Biology. Ph.D., 1997, Buenos Aires (Argentina).

MACK, BARBARA M., Associate Professor of Greenlee School of Journalism and Communication. B.S., 1974, Iowa State; J.D., 1977, Drake.

MADEN, BEVERLY S., Emeritus Associate Professor of Food Science and Human Nutrition. B.S., 1960, M.S., 1970, Iowa State.

MADUX, ROGER D., Professor of Mathematics; Professor of Computer Science. B.A., 1969, Pomona; Ph.D., 1978, California (Berkeley).

MADISON, OLIVIA MARIE, Professor, Library; Dean of the Library. B.S., 1972, Iowa State; M.A., 1979, Missouri.

MADON, STEPHANIE, Associate Professor of Psychology. B.A., 1987, Rutgers; M.Ed., 1990, Utah; Ph.D., 1998, Rutgers.

MAHANNA, BILL, Associate Professor of Animal Science (Collaborator). B.S., Cornell; Ph.D., M.S., Wisconsin.

MALLAPRAGADA, S., Professor of Chemical and Biological Engineering; Professor of Materials Science and Engineering. B.Tech., 1993, Indian Institute of Technology; Ph.D., 1996, Purdue.

MALONE, ROB W., Assistant Professor of Agricultural and Biosystems Engineering (Collaborator). B.S., 1988, West Virginia Wesleyan; M.S., 1992, Ph.D., 1996, Kentucky.

MARGRETT, JENNIFER, Assistant Professor of History. B.A., 1972, Wisconsin; M.A., 1975, Ph.D., 1979, Cincinnati.

MARGITIS, DIMITRIS, Assistant Professor of Computer Science. B.S., 1991, Athens (Greece); M.S., 1995, New York (Stony Brook); Ph.D., 2002, Carnegie Mellon.

MARINO, RITA ANN, Associate Professor, Library. B.A., 1980, California (San Diego); M.S., 1990, Texas; M.S., 1998, Minnesota State.

MARQUIS, GRACE S., Associate Professor of Food Science and Human Nutrition (Collaborator). B.A., 1993, Indiana; M.S., 1984, Michigan State; Ph.D., 1996, Cornell.

MARTIN, RICHARD J., Professor of Biomedical Sciences. B.V.Sc., 1972, Ph.D., 1977, Liverpool (UK); D.Sc., 1997, Edinburgh (UK).

MARTIN, ROBERT ALLEN, Professor of Agricultural Education and Studies and Chair of the Department; Professor of Curriculum and Instruction. B.S., 1968, M.S., 1974, Purdue; Ph.D., 1981, Pennsylvania State.

MARTIN, RYAN, Assistant Professor of Mathematics. B.S., 1995, Delaware; Ph.D., 2000, Rutgers.

MASON, TERRY WAYNE, Adjunct Assistant Professor of Psychology. B.A., 1977, Cornell College; Ph.D., 1982, Texas Tech.

MASTERS, CHARLES P., Adjunct Associate Professor of Architecture. B.Arch., 1969, Boston Architectural Center; M.Arch., 1971, New York (Buffalo).

MATAVA, TOBIE, Assistant Professor, Library. B.A., 1992, M.A., 1995, Missouri (Kansas City); M.L.S., 2006, Maryland.

MATHEWS, ELEANOR R., Emeritus Associate Professor. Library. B.A., 1956, Wheaton (Massachusetts); M.A., 1975, Iowa.

MATZAVINOS, ANASTASIOS, Assistant Professor of Mathematics. B.Sc., 1998, Crete (Greece); M.Sc., 2001, Athens (Greece); Ph.D., 2006, Dundee (Scotland).

MAVES, JOHN H., Assistant Professor of Architecture. B.Arch., 1968, Notre Dame; M.Arch., 1972, Minnesota.

MAYORDOME, EULVIRA, Associate Professor of Computer Science (Collaborator). B.S., 1990, Zaragoza (Spain); Ph.D., 1994, Polytechnic (Spain).

MAZE, THOMAS H., Professor of Civil, Construction and Environmental Engineering. B.S., 1975, Iowa State; M.E., 1977, California (Berkeley); Ph.D., 1982, Michigan State.

MAZUR, ROBERT EDWARD, Associate Professor of Sociology. B.S., 1976, Iowa; M.A., 1979, Ph.D., 1982, Brown.

MCCARLEY, ROBERT E., Emeritus Professor of Chemistry. B.S., 1953, Ph.D., 1956, Texas.

MCCLOSKEY, MICHAEL A., Associate Professor of Genetics, Development and Cell Biology. B.S., 1974, California (Riverside); Ph.D., 1979, California (Davis).

MCCLURE, SCOTT R., Associate Professor of Veterinary Clinical Sciences. B.S., 1982, M.D., 1986, Iowa State.

McDONALD, E. DAWN, Emeritus Assistant Professor of Psychology. B.S., 1960, Boston University; M.S., 1968, Southern Illinois.

McGRAW, MAURA, Adjunct Assistant Professor of Genetics, Development and Cell Biology. B.S., 1988, Massachusetts; Ph.D., 1996, Minnesota.

McIlRATH, TIMOTHY J., Emeritus Associate Professor of Art and Design. B.A., 1966, Dominican (Wisconsin); M.S., 1969, Wisconsin.

McMillan, THERMA J., Emeritus Professor of Food Science and Human Nutrition. B.S., 1940, Arizona; M.S., 1942, Nebraska; Ph.D., 1951, Cornell.

McNabb, HAROLD S. JR., Emeritus Professor of Plant Pathology; Emeritus Professor of Natural Resource Ecology and Management; University Professor. B.S., 1949, Nebraska; M.S., 1951, Ph.D., 1954, Yale.

McCoy, PATRICK T., Professor of Civil, Construction and Environmental Engineering (Collaborator). B.S., 1963, M.S., 1964, Iowa State; Ph.D., 1971, Texas A&M.

McSHAY, JAMES C., Adjunct Assistant Professor of Curriculum and Instruction. B.A., 1993, New York (Osage); M.S., 1996, Ph.D., 2000, Iowa State.

MEEEKER, WILLIAM Q. JR., Professor of Statistics; Distinguished Professor in Liberal Arts and Sciences. B.S., 1972, Clarkson; M.S., 1973, Ph.D., 1975, Union.

MEIKS, HOWARD D., Associate Professor of Industrial and Manufacturing Systems Engineering. B.S., 1969, Iowa State; M.S., 1966, Ph.D., 1970, Ohio State.

MEHROTRA, NEHA, Lecturer in Community and Regional Planning. B.Arch., 1999, TVB School of Habitat Studies; M.C.P., 2001, Auburn.

MELSA, JAMES L., Emeritus Professor of Electrical and Computer Engineering; Emeritus Dean of the College of Engineering. B.S., 1960, Iowa State; M.S., 1962, Ph.D., 1965, Arizona.

MENDELSOHN, MICHAEL T., Professor of English; University Professor. B.A., 1967 California (Irvine); M.A., 1969, California State (San Francisco); Ph.D., 1981, Washington State.

MENDONCA, AUBREY F., Associate Professor of Food Science and Human Nutrition. B.S., 1985, M.S., 1987, Ph.D., 1992, Iowa State.

MENSCHEK, ANDREW, Adjunct Assistant Professor of Air Force Aerospace Studies. B.A., 2001, Drake; M.S., 2003, Texas (San Antonio).

MERCER, CLETUS R., Emeritus Associate Professor of Civil, Construction and Environmental Engineering. B.S., 1957 M.S., 1973, Iowa State; Ph.D., 1985, Iowa.

MINION, FRANK C., Professor of Veterinary Microbiology and Preventive Medicine. B.S., 1972, M.S., 1977, Memphis; Ph.D., 1983, Alabama (Birmingham).

MISRA, MANJIT KUMAR, Professor of Agricultural and Biosystems Engineering. B.S., 1971, Orissa; M.S., 1973, Ph.D., 1978, Missouri.

MITRA, AMBAR K., Associate Professor of Aerospace Engineering. B.S., 1989, M.S., 1972, Calcutta; Ph.D., 1979, Indian Institute of Science.

MONAHAN, LAUREN, Lecturer in Greenlee School of Sociology. B.S., 1997, Radford; M.S., 2000, Virginia Commonwealth.

MONAHAN, BRIAN ALBERT, Assistant Professor of Sociology. B.S., 1997, Redford; M.S., 2000, Virginia Commonwealth; Ph.D., 2006, Delaware.

MONROE, JOHN W., Associate Professor of History. A.B., 1995, Princeton; Ph.D., 2002, Yale;

MOOK, MARGARET SUSAN, Associate Professor of World Languages and Cultures. B.A., 1983, Wooster; M.A., 1988, Ph.D., 1993, Minnesota.

MOORE, WAYNE R., Emeritus Professor of Industrial and Manufacturing Systems Engineering. B.S., 1942, Iowa State.

MULFORD, CHARLES L., Emeritus Professor of Sociology. B.S., 1958, M.S., 1959, Ph.D., 1962, Iowa State.

MULLEN, RUSSELL E., Professor of Agronomy. B.S., 1971, M.S.E.D., 1972, Northwest Missouri; Ph.D., 1975, Purdue.

MUNSEN, SYLVIA C., Associate Professor of Music; Associate Professor of Curriculum and Instruction. B.A., 1973, St. Olaf; M.S., 1977, Ed.D., 1986, Illinois.

MURDOCH, ALAN JAMES, Assistant Professor of Kinesiology. B.A., 1969, Berndt; M.S., 1970, Ph.D., 1984, Iowa State.

MURPHY, PATRICIA ANNE, Professor of Food Science and Human Nutrition; University Professor. B.S., 1973, M.S., 1975, California (Davis); Ph.D., 1979, Michigan State.

MUSZYNSKI, MICHAEL GERARD, Adjunct Assistant Professor of Genetics, Development and Cell Biology. B.A., 1985, Toledo; Ph.D., 1992, Iowa State.

NAKAGAWA, NORIO, Adjunct Professor of Aerospace Engineering. B.S., 1975, M.S., 1977, Ph.D., 1984, Tokyo (Uspan).

NASIBAN, SHASHI SATHISAN, Professor of Civil, Construction and Environmental Engineering. B.Tech., 1984, Indian Institute of Technology; M.S., 1985, Virginia Polytechnic; Ph.D., 1989, California (Berkeley).

NAPOLITANO, RALPH EDWARD, Associate Professor of Materials Science and Engineering. B.S., 1989, Florida; M.S., 1994, Ph.D., 1996, Georgia Institute of Technology.

NARASIMHAN, BALAJI, Professor of Chemical and Biological Engineering; Associate Dean of the College of Engineering. B.Tech., 1992, Indian Institute of Technology; Ph.D., 1996, Purdue.

NASON, JOHN DAVID, Professor of Ecology. Evolution and Organismal Biology. B.S., 1985, California (Davis); Ph.D., 1991, California (Riverside).

NEGROROS-CASILLIO, P., Assistant Professor of Natural Resource Ecology and Management (Collaborator). B.S., 1976, Puebla (Mexico); M.S., 1983, Iniree; Ph.D., 1991, Iowa State.

NEWON, THEODORE H., Emeritus Professor of Psychology. B.A., 1958, Iowa State.

NIDAY, DONNA MAE, Associate Professor of English. B.A., 1985, Northern Iowa; M.S., 1986, M.A., 1988, Iowa State.

NIFOST, JIANG, Professor of Animal Science (Collaborator). B.S., 1974, M.S., 1976, Guelph; Ph.D., 1979, Ohio State.

NILAKANTA, SREEVATSAL, Associate Professor of Logistics, Operations and Management Information Systems. B.E., 1973, Madras (India); M.B.A., 1979, Ph.D., 1985, Houston.

NILSEN-HAMILTON, MARIT, Associate Professor of Biological Sciences. B.S., 1975, Valdosta State College; D.V.M., 1988, M.S., 1989, Ph.D., 1992, Georgia University.

NONNECKE, BRIAN J., Professor of Animal Science (Collaborator). B.S., 1974, M.S., 1976, Guelph; Ph.D., 1979, Ohio State.

NOLAN, LISA K., Professor of Veterinary Microbiology and Preventive Medicine. B.S., 1975, Valdosta State College; D.V.M., 1988, M.S., 1989, Ph.D., 1992, Georgia University.

NORTON-MEIER, LORI ANN, Assistant Professor of Veterinary Clinical Sciences. B.S., 1994, Iowa State; Ph.D., 1997, Purdue.

OLIVER, DAVID J., Professor of Genetics, Development and Cell Biology; Associate Dean of the College of Liberal Arts and Sciences. B.S., 1971, M.S., 1973, New York (Syracuse); Ph.D., 1975, Cornell.

OLIVER, JAMES H., Professor of Mechanical Engineering; Professor of Aerospace Engineering; Professor of Electrical and Computer Engineering. B.S., 1979, Union; M.S., 1981, Ph.D., 1986, Michigan State.

OLSEN, MICHAEL G., Associate Professor of Mechanical Engineering; Associate Professor of Chemical and Biological Engineering. B.S., 1992, M.S., 1995, Ph.D., 1998, Illinois.

OLSON, DENNIS G., Professor of Mechanical Engineering. B.S., 1969, Ph.D., 1975, Iowa State.

ONG, SAV K., Professor of Civil, Construction and Environmental Engineering. B.E., 1980, Malaya (Malaysia); M.S., 1987, Vanderbilt; Ph.D., 1990, Cornell.

OPRIESSNIG, TANJA I., Assistant Professor of Veterinary Diagnostic and Production Animal Medicine. D.V.M., 2002, Veterinary Medicine (Australia); Ph.D., 2006, Iowa State.

ORAZEM, PETER FRANCIS, Professor of Economics; University Professor. B.A., 1977, Kansas; M.Phil., 1980, Ph.D., 1983, Yale.

OULMAN, MOTOKO LEE, Emeritus Professor of Sociology. B.A., 1959, Nara Women’s University; M.A., 1963, Indiana; Ph.D., 1969, Iowa State.

OVIDIO, PEDRO MARCELO, Assistant Professor of Economics. B.S., 1993, M.S., 1995, Nacional De La Organismal Biology (Collaborator); Professor of Veterinary Diagnostic and Production Animal Medicine; Professor of Veterinary Pathology (Collaborator). B.V.Sc., 1962, Orissa Veterinary College; M.S., 1968, Ph.D., 1992, Michigan State.

PALMER, MITCHELL VAN, Assistant Professor of Veterinary Pathology (Collaborator). B.S., 1985, Ph.D., 1992, Michigan State.

PAN, JUN, Lecturer in Mathematics. M.S., 1984, Henan Normal (China); Ph.D., 2000, Magdeburg (Germany).

PANIGRAHY, BRUNDABAN, Associate Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.V.Sc., 1962, Orissa Veterinary College; M.S., 1968, Minnesota; Ph.D., 1972, Texas A&M.

PATTERSON, JOHN W. JR., Emeritus Professor of Information Technology. B.S., 1967, M.S., 1972, Springfield; M.S., 1978, Cleveland State; Ph.D., 1984, Texas A&M.

PAULSEN, ARNOLD ALLEN, Emeritus Professor of Economics. B.S., 1961, Ph.D., 1959, Iowa State.

PAUL, ROBERT BRENT, Emeritus Professor of Agronomy. B.S., 1963, California (Davis); M.S., 1965, Ph.D., 1967, Virginia Polytechnic Institute.

PEASE, JAMES L., Emeritus Associate Professor of English; Associate Professor of Curriculum and Instruction. B.A., 1967, Louisville; M.A., 1968, Ph.D., 1980, Illinois.

PAYNE, WILLIAM DONALD, Associate Professor of English; Associate Professor of Curriculum and Instruction. B.A., 1967, Louisville; M.A., 1968, Ph.D., 1967, New Mexico State.

PEARCE, ROBERT BRENT, Emeritus Professor of Agronomy. B.S., 1963, California (Davis); M.S., 1965, Ph.D., 1967, Virginia Polytechnic Institute.

PECZERSKI, VITALI, Professor of Materials Science and Engineering; Anson Marston Distinguished Professor in Engineering. M.S., 1976, Ph.D., 1979, USSR.
PEDERSEN, JOHN H., Emeritus Professor of Agricultural and Biosystems Engineering. B.S., 1961, Cornell; M.S., 1952, Ph.D., 1955, Iowa State.

PEDIGO, LARRY, Emeritus Professor of Entomology; University Professor. B.S., 1963, Fort Hays; M.S., 1965, Ph.D., 1967, Purdue.

PENDAR, NICK, Assistant Professor of English. B.A., 1993, Azad (Iran); M.A., 2000, Ph.D., 2005, Toronto (Canada).

PERRY, RICK, Associate Professor of Veterinary Pathology (Collaborator). B.S., 1979, Columbus State; M.S., 1982, Kentucky; Ph.D., 1987, Ohio State.

PILE, JAMES L., Adjunct Associate Professor of Mathematics. B.S., 1965, Ph.D., 1968, Iowa State.

PICKETT, SAMUEL R., Emeritus Professor of Human Development and Family Studies. B.S., 1944, M.S., 1951, Tennesse; Ph.D., 1958, Iowa State.

PIERCE, CLAY L., Assistant Professor of Ecology; Evolution and Organismal Biology (Collaborator). Assistant Professor of Natural Resource Ecology and Management (Collaborator). B.S., 1980, Mankato; M.S., 1982, Kentucky; Ph.D., 1987, Maryland.

PITZ, FABIANO, Assistant Professor of Animal Science (Collaborator). M.S., 1999, Sao Paulo State (Brazil); Ph.D., 2003, Federal University of Vicosa (Brazil).

PLEASANTS, BARBARA P., Emeritus Assistant Professor of Nutrition, Development and Organismal Biology. B.S., 1971, Cornell; Ph.D., 1977, California (Los Angeles).

PLEASANTS, JOHN M., Adjunct Assistant Professor of Ecology, Evolution and Organismal Biology. B.S., 1971, Notre Dame; Ph.D., 1977, California (Los Angeles).

PLETCHER, RICHARD H., Emeritus Professor of Mechanical Engineering. B.S., 1957, Purdue; M.S., 1962, Ph.D., 1968, Cornell.

POGUE, LEANDER O., Emeritus Professor of English. B.A., 1970, California State (San Jose); Ph.D., 1973, Oregon.

POHL, MARTIN KARL WILHELM, Associate Professor of Physics and Astronomy. Ph.D., 1991, Bonn (Germany).

POHLMAN, THOMAS A., Emeritus Professor of Veterinary Pathology. B.S., 1966, Cornell; M.S., 1974, Iowa State.

POLLOCK, LINDA M., Associate Professor of Agronomy. B.S., 1978, Ohio State; M.S., 1980, Ph.D., 1982, Nebraska.

POLSTER, NANCY L., Emeritus Associate Professor of Art and Design. B.S., 1960, Iowa State; M.S., 1964, Syracuse.

POLLAK, EDWARD, Emeritus Professor of Statistics; Emeritus Professor of Genetics, Development and Cell Biology. B.S., 1954, Cornell; M.S., 1956, North Carolina State; Ph.D., 1964, Columbia.

POON, YU TUNG, Associate Professor of Mathematics. B.A., 1977, M.Phil., 1980, Hon Kong; Ph.D., 1985, California (Los Angeles).

PORTER, MARC DAVID, Professor of Chemistry (Collaborator). Professor of Chemical and Biological Engineering (Collaborator). B.S., 1977, M.S., 1979, Wright State; Ph.D., 1984, Ohio State.
ROBERTS, CARL W., Associate Professor of Engineering. B.S., 1960, Princeton; Ph.D., 1964, Pennsylvania.

REINERTSON, ERIC L., Associate Professor of Veterinary Clinical Sciences. D.V.M., 1971, Iowa State; M.S., 1974, Cornell.

REITMEIER, CHERYLL A., Professor of Food Science and Human Nutrition. B.S., 1973, Minnesota; M.S., 1975, Iowa State; Ph.D., 1988, Iowa State.

RETALLICK, MICHAEL STEVEN, Assistant Professor of Agricultural Education and Studies. B.S., 1993, Wisconsin (Platteville); Ph.D., 2005, Ohio State.

RICE, MARLIN E., Professor of Entomology. B.S., 1977, Central Missouri; M.S., 1979, Missouri; Ph.D., 1987, Kansas State.

RICHT, JUERGEN A., Associate Professor of Veterinary Microbiology and Preventive Medicine (Collaborator); Associate Professor of Biomedical Sciences (Collaborator). B.S., 1980, Hohenheim (Germany); D.V.M., 1985, Ph.D., 1988, Giessen (Germany).

RICKENBACH, MARK, Associate Professor of Natural Resource Ecology and Management (Collaborator). B.S., 1994, Pennsylvania State; M.S., 1996, Massachusetts; Ph.D., 2000, Oregon State.

RIEDESEL, DEAN HAROLD, Professor of Veterinary Clinical Sciences; Professor of Biomedical Sciences. B.S., 1940, Pittsburgh; M.S., 1942, Washington; M.P.H., 1943, Iowa State.

RINGS, COUNCIL ST., Senior Lecturer in English. B.S., 1970, M.A., 1976, Iowa State.

ROWLING, MATTHEW J., Assistant Professor of Food Science and Human Nutrition. B.S., 1999, Nebraska ( Kearney); Ph.D., 2004, Iowa State.

RYAN, VERNON DEAN, Emeritus Professor of Human Nutrition. B.S., 1951, Wisconsin; M.S., 1954, Minnesota.

RUSSELL, MARTHA E., Emeritus Adjunct Associate Professor of Animal Science and Human Nutrition. B.S., 1972, M.S., 1976, Ph.D., 1979, Wisconsin.

RUSSELL, JAMES R., Professor of Animal Science. B.S., 1980, California (Davis); M.C.P., 2002, Ph.D., 2007, California (Berkeley).

SCANS, COLIN GUY, Professor of Animal Science (Collaborator). B.S., 1969, Hull; Ph.D., 1972, Wales.

SCHALINSKE, KEVIN, Associate Professor of Food Science and Human Nutrition. B.S., 1983, M.S., 1988, Ph.D., 1992, Wisconsin.

SCHALLER, FRANK W., Emeritus Professor of Agronomy. B.S., 1937 Wisconsin; M.S., 1940, Ph.D., 1948, West Virginia.

SCHIELE, KAREN R., Senior Lecturer in Psychology. B.A., 1987 California (Santa Cruz); Ph.D., 1999, Iowa.

SCHILLING, KEVIN, Associate Professor of Music; Associate Professor of Curriculum and Instruction. A.B., 1969, Southern California; M.M., 1971, D.M., 1985, Indiana.

SCHMALIAN, JOERG, Professor of Physics and Astronomy. M.S., 1990, Marburg (Germany); Ph.D., 1993, Berlin (Germany).

SCHMERR, LESTER W. JR., Professor of Aerospace Engineering. B.S., 1965, Massachusetts Institute of Technology; Ph.D., 1970, Illinois Institute of Technology.

SCHMIDTROHR, KLAUS, Professor of Chemistry. Ph.D., 1991, Mainz (Germany).

SCHNABLE, PATRICK S., Professor of Agronomy; Professor of Genetics, Development and Cell Biology. B.S., 1981, Cornell; Ph.D., 1986, Iowa State.

SCHNEIDER, IAN, Assistant Professor of Chemical and Biological Engineering; Assistant Professor of Genetics, Development and Cell Biology. B.S., 2000, Iowa State; M.S., 2002, Ph.D., 2005, North Carolina State.

SCHNEIDER, LEO R., Emeritus Professor of Kinesiology; Emeritus Professor of Curriculum and Instruction. B.S., 1949, Iowa State; M.S., 1950, Washington State.

SEAGRAVE, RICHARD C., Emeritus Professor of Journalism; Emeritus Professor of Journalism and Mass Communication. B.S., 1961, M.S., 1964, Iowa State.

SEIBLY, MARTHA ANN, Adjunct Assistant Professor of Materials Science and Engineering. B.S., 1981, M.S., 1989, Iowa State.

SELL, JERRY L., Emeritus Professor of Animal Science; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1957, M.S., 1958, Ph.D., 1960, Iowa State.

SELBY, JOSHUA TAYLOR, Assistant Professor of Animal Science; Assistant Professor of Kinesiology. B.A., 1999, Wooster College; M.A., 2001, Ohio State; Ph.D., 2005, Florida.

SENCHINA, DAVID, Assistant Professor of Kinesiology (Collaborator). B.A., Northern Iowa; Ph.D., Iowa State.

SEO, HILARY, Assistant Professor, Library. B.A., 1991, California (Santa Barbara); M.A., 1993, Wisconsin.

SCHLARD, ANDREAS, Assistant Professor of Environmental Science; Assistant Professor of Environmental Science. B.S., 1981, Iowa State; M.S., 1983, Ph.D., 1987, Iowa State.

SHARMA, VIJAY K., Associate Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1977, M.S., 1976, Panjab (India); Ph.D., 1987, Toledo.

SHARP RICKEY LEE, Professor of Kinesiology; Professor of Food Science and Human Nutrition; Professor of Biomedical Sciences. B.A., 1974, California State (Chico); M.Ed., 1976, Nevada (Las Vegas); Ph.D., 1983, Ball State.

SHAW, ROBERT HAROLD, Emeritus Professor of Agronomy; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1941, M.S., 1942, Ph.D., 1949, Iowa State.

SHEARER, JAN K., Professor of Veterinary Diagnostic and Production Animal Medicine. B.S., 1971, Ashland; D.V.M., 1975, Ohio State.

SHEEHY, GERALD B., Emeritus Professor of Agronomy; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1957, M.S., 1959, Ph.D., 1961, Iowa State.

SHELLEY, JACK, Emeritus Professor of Greenlee School of Journalism and Communication. B.J., 1935, Missouri.

SHELLEY, MACK CLAYTON, Professor of Statistics; Professor of Political Science; University Professor. B.A., 1972, American; M.S., 1973, Ph.D., 1977, Wisconsin.

SHEN, SHAOQIU, Professor of Genetics, Development and Cell Biology (Collaborator). B.S., 1996, Shanghai Jiao Tong University; M.S., 1999, Ph.D., 2002, California Institute of Technology.

SHIBLES, RICHARD M., Emeritus Professor of Agronomy. B.S., 1956, Maine; M.S., 1958, Ph.D., 1961, Cornell.

SHIH, TOM I-PING, Professor of Aerospace Engineering and Chair of the Department. B.S.E., 1976, National Cheng Kung; M.S.E., 1977, Ph.D., 1981, Michigan.

SHIN, YOON-KYUN, Professor of Biochemistry, Biophysics and Molecular Biology; Professor of Chemistry. B.S., 1982, Seoul National (Korea); Ph.D., 1990, Cornell.

SHINAR, JOSEPH, Professor of Physics and Astronomy and Chair of the Department; Professor of Electrical and Computer Engineering. B.S.C., 1972, M.S.C., 1974, Ph.D., 1980, Hebrew (Israel).

SHIRLEY, RUTH, Adjunct Professor of Electrical and Computer Engineering. B.S., 1968, M.S., 1972, Ph.D., 1977, Hebrew (Israel).

SHIRKOV, ANDREY, Lecturer in Physics and Astronomy. M.S., 1976, Moscow State (Russia); Ph.D., 1987, Kurchatov Institute (Russia).

SHOEKING, RANDY C., Professor of Agronomy (Collaborator); Professor of Genetics, Development and Cell Biology (Collaborator). B.S., 1977 Wisconsin (Stevens Point); M.S., 1980, Wisconsin (Green Bay); Ph.D., 1984, Iowa State.

SHOGREN-KNAAK, MICHAEL, Assistant Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1994, Stanford, Ph.D., 2000, California Institute of Technology.

SHRADER, WILLIAM, Emeritus Professor of Agronomy. B.S., 1935, M.S., 1941, Missouri; Ph.D., 1953, Iowa State.

SHROTRIYA, PRANAV, Assistant Professor of Mechanical Engineering. B.Tech., 1996, Indian Institute of Technology (Indira); Ph.D., 2000, Illinois.

SIMONS, ROLAND L., Professor of Sociology (Collaborator). B.A., 1989, Northern Iowa; M.S.S.W., 1971, Ph.D., 1974, Florida State.

SINGER, JEREMY W., Assistant Professor of Aerospace Engineering and Chair of the Department. B.S.E., 1981, Buht (India); M.Tech., 1983, IIT (India); Ph.D., 2002, California (Los Angeles).

SINGH, SHAMINDRA, Associate Professor of Mechanical Engineering. B.S.C., 1983, M.Sc., 1985, Banaras Hindu (India); Ph.D., 1993, Russian Academy of Sciences.

SVASANKAR, SANJEEV, Assistant Professor of Physics and Astronomy. B.S.C., 1993, M.Sc., 1996, All India Institute of Medical Sciences; Ph.D., 2001, Illinois.

SKAEK, BRAD RICHARD, Associate Professor of Animal Science. B.S., 1979, Colorado State; M.S., 1982, Ph.D., 1985, Iowa State.

SKRDLA, WILLIS H., Emeritus Professor of Agronomy. B.S., 1941, Nebraska; Ph.D., 1949, Purdue.

SLUTZKI, GIORA, Professor of Computer Science. B.S., 1970, Hebrew (Jerusalem); M.S., 1973, Weizmann Institute; Ph.D., 1977 Tel-Aviv.

SMADI, OMAAR G., Adjunct Assistant Professor of Civil, Construction and Environmental Engineering. B.S., 1987, Yarmouk (Urdon); M.S., 1991, Ph.D., 2000, Iowa State.

SMARANDESCU, LAURA, Assistant Professor of Marketing. B.A., 2002, British Columbia; Ph.D., 2007, South Carolina.

SMITH, ARTHUR A. JR., Professor of Philosophy and Religious Studies and Chair of the Department; Professor of Political Science. B.A., 1974, Boston College; Ph.D., 1980, New York (Stony Brook).

SMITH, EMILY, Assistant Professor of Chemistry. M.S., 2000, Pennsylvania State; Ph.D., 2003, Wisconsin.
SMITH, FRANCES, Emeritus Professor of Apparel, Educational Studies and Hospitality Management; Emeritus Professor of Curriculum and Instruction. B.S., 1952, Southwestern (Oklahoma); M.S., 1958, Oklahoma State; Ph.D., 1966, Iowa State.

SMITH, FREDERICK G., Emeritus Professor of Genetics, Development and Cell Biology. B.S., 1939, Chicago; M.S., 1941, Ph.D., 1943, Wisconsin.

SMITH, JOHN F., Emeritus Professor of Materials Science and Engineering. B.A., 1948, Missouri (Kansas City); Ph.D., 1953, Iowa State.

SMITH, RICHARD JOHN, Emeritus Professor of Agricultural and Biosystems Engineering. B.S.c., 1962, Kings College; M.S., 1967, Ph.D., 1971, Iowa State.

SOBIECH-MUNSON, ANN CLARE, Assistant Professor of Architecture; Assistant Professor of Art and Design. B.A., 1991, Central College; M.Arch., 2000, Iowa State.

SOMANI, ARUN K., Professor of Electrical and Computer Engineering and Chair of the Department; Antion Marstan Distinguished Professor in Engineering. B.E., 1973, Bit (India); M.Tech., 1979, Iit Bombay; M.S.E.E., 1983, Ph.D., 1985, McGill (Canada).

SONG, GUANG, Assistant Professor of Computer Science. B.S., 1992, Jilin (China); M.S., 1998, Ph.D., 2003, Texas A&M.

SONG, JIMING, Associate Professor of Electrical and Computer Engineering. B.S., 1983, M.S., 1988, Nanjing (China); Ph.D., 1993, Michigan State.

SONG, SUNG YELL, Associate Professor of Mathematics. B.S., 1974, Seoul; Ph.D., 1987, Ohio State.

SONG, XUEYU, Associate Professor of Chemistry. B.S., 1984, Nankai (China); Ph.D., 1995, California Institute of Technology.

SOSNICKI, ANDRZEJ A., Associate Professor of Animal Science (Collaborator). M.S., 1978, Mickiewicz (Poland); Ph.D., 1984, Academy of Agriculture (Poland).

SOUKOULIS, COSTAS M., Professor of Physics and Astronomy; Professor of Aerospace Engineering; Professor of Electrical and Computer Engineering; Distinguished Professor in Liberal Arts and Sciences. B.S., 1973, Athens; M.S., 1975, Ph.D., 1978, Chicago.

SOUPIR, MICHELLE LYNN, Assistant Professor of Agricultural and Biosystems Engineering. B.S., 1999, Kansas State; M.S., 2003, Ph.D., 2007, Virginia Polytechnic.

SPALDING, BEATRIZ M., Lecturer in Ecology, Evolution and Organismal Biology. B.S., 1976, Napoli (Italy); M.S., 1980, Iowa State.

SPALDING, MARTIN H. II, Professor of Genetics, Development and Cell Biology and Chair of the Department. B.S., 1974, M.S., 1976, Washington State; Ph.D., 1979, Wisconsin.

SPEER, VAUGHN CURTIS, Emeritus Professor of Animal Science. B.S., 1949, M.S., 1951, Ph.D., 1957 Iowa State.

SPINRAD, BERNARD I., Emeritus Professor of Mechanical Engineering. B.S., 1942, M.S., 1944, Ph.D., 1945, Yale.

SPONSELLER, BRETT A., Assistant Professor of Veterinary Clinical Sciences; Assistant Professor of Veterinary Microbiology and Preventive Medicine. B.S., 1990, Virginia Polytechnic; D.V.M., 1994, Cornell; Ph.D., 2003, Iowa State.

SPURLOCK, DIANE MOODY, Associate Professor of Animal Science. B.S., 1982, Virginia Polytechnic; M.S., 1984, Oklahoma State; Ph.D., 1988, New Hampshire.

SPURLOCK, MICHAEL EUGENE, Professor of Food Science and Human Nutrition; Professor of Animal Science. B.S., 1981, M.S., 1987, Ph.D., 1989, Missouri.

STAPLETON, DEREK, Emeritus Professor of Economics. B.A., 1959, California (Berkeley); M.A., 1960, California (Los Angeles); Ph.D., 1967, Vanderbilt.

STAUFAFFER, HANS, Assistant Professor of Chemistry. Ph.D., 2000, Cornell.

STEPHENSON, MATTHEW WAYNE, Adjunct Instructor in Military Science and Tactics. B.S., 2003, Iowa State.

STEPHENSON, ROBERT, Professor of Statistics; University Professor. B.A., 1974, Gettysburg; M.S., 1976, Ph.D., 1979, Connecticut.

STEWARD, BRIAN LYN, Associate Professor of Agricultural and Biosystems Engineering. B.S., 1989, M.S., 1994, South Dakota State; Ph.D., 1999, Illinois.
THIELEN, JEAN-PIERRE, Senior Lecturer in World Languages and Cultures. B.A., 1989, Saint Joseph (Lebanon); M.A., 1993, Sorbonne Nouvelle (France).

TARTAKOV, CARLIE C., Emeritus Assistant Professor of Curriculum and Instruction. B.A., 1963, California State (San Francisco); M.A., 1973, Massachusetts; Ph.D., 1996, Iowa State.

TAVANAPONG, WALLAPA K., Associate Professor of Computer Science. B.S., 1992, Thammasat (Thailand); M.S., 1995, Ph.D., 1999, Central Florida.

TAYLOR, ADRIAN SEAN, Lecturer in Curriculum and Instruction. B.S., 1992, Brigham Young; M.S., 1996, Iowa State.

TAYLOR, GARY D., Assistant Professor of Community and Regional Planning. B.S., 1985, Northwest Missouri State; J.D., 1989, Nebraska; M.C.R.P., 1996, Iowa State.

TAYLOR, PETER C., Adjunct Assistant Professor of Civil, Construction and Environmental Engineering. Ph.D., 1995, Cape Town.

TAYLOR, ROD K., Adjunct Instructor in Military Science and Tactics.

TAYLOR, STERLING E., Professor of Agronomy. B.S., 1966, Utah State; Ph.D., 1970, Washington (St. Louis).

TEAS, ROBERT KENNETH, Emeritus Professor of Marketing; Distinguished Professor in Business. B.S., 1969, Augustana (South Dakota); M.B.A., 1970, Ph.D., 1975, Oklahoma.

THOMAS, KATHERINE A., Associate Professor of Kinesiology. B.S., 1971, Mississippi; M.S., 1977, Alabama (Birmingham); Ph.D., 1981, Louisiana State.

THOMPSON, DONALD O., Emeritus Professor of Aerospace Engineering; Anson Marston Distinguished Professor in Engineering. B.A., 1949, M.S., 1950, Ph.D., 1953, Iowa.

THOMPSON, ELIZABETH A., Professor of Curriculum and Instruction; University Professor. B.A., 1969, Pomona; M.A., 1966, Stanford; Ph.D., 1981, California (Santa Barbara).

THOMPSON, JAMES R., Associate Professor of Veterinary Diagnostic and Production Animal Medicine. B.S., 1954, D.V.M., 1979, Iowa State.

THOMPSON, MICHAEL L., Professor of Agriculture; Professor of Geological and Atmospheric Sciences. B.S., 1974, Illinois; Ph.D., 1980, Ohio State.

THOMPSON, R. BRUCE, Professor of Materials Science and Engineering; Professor of Aerospace Engineering; Anson Marston Distinguished Professor in Engineering. B.A., 1964, Rice; M.S., 1965, Ph.D., 1971, Stanford.

THOMPSON, WILLIAM H., Emeritus Professor of Transportation and Logistics. B.S., 1934, Pennsylvania State; M.S., 1939, Syracuse; Ph.D., 1948, Iowa State.

THOMSEN, BRUCE V., Assistant Professor of Veterinary Pathology (Collaborator). B.S., 1988, Northwest Missouri State; D.V.M., 1990, Missouri; Ph.D., 2001, Iowa State.

THOMSON, JOHN ULAN, Professor of Veterinary Diagnostic and Production Animal Medicine; Dean of the College of Veterinary Medicine. B.S., 1965, D.V.M., 1967, Iowa State; M.S., 1988, Northwest Missouri State.

THORNBURG, ROBERT W., Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1976, Tennessee; Ph.D., 1981, South Carolina.

TIAN, JIN, Assistant Professor of Computer Science. B.S., 1992, Tsinghua (China); M.S., 1997, Ph.D., 2002, California (Los Angeles).

TIFFANY, LOIS HATTERY, Emeritus Professor of Ecology, Evolution and Organismal Biology; Emeritus Professor of Plant Pathology; Distinguished Professor in Liberal Arts and Sciences. B.S., 1945, M.S., 1947, Ph.D., 1950, Iowa State.

TIM, UDOYARA S., Associate Professor of Agricultural and Biosystems Engineering. B.E., 1981, Ph.D., 1987, Concordia (Canada).

TIMMS, LEO LOUIS, Associate Professor of Animal Science; Associate Professor of Veterinary Diagnostic and Production Animal Medicine. B.S., 1978, Cornell; M.S., 1982, Ph.D., 1984, Wisconsin.

TIWANA, AMRIT, Associate Professor of Logistics, Operations and Management Information Systems. B.E., 1996, Bangalore; Ph.D., 2002, Georgia State.

TOLLEFSON, JOHN, Professor of Entomology. B.A., 1967, Gustavus Adolphus; Ph.D., 1975, Iowa State.

TOMAN, BETTY, Emeritus Professor of Kinesiology; Distinguished Professor in Education. B.S., 1948, Wisconsin; M.S., 1957, Iowa State.

TOMER, MARK D., Associate Professor of Natural Resource Ecology and Management (Collaborator); Associate Professor of Geological and Atmospheric Sciences (Collaborator). B.S., 1981, Montana; M.S., 1986, Montana State; Ph.D., 1994, Minnesota.

TONG, LUN, Assistant Professor of Computer Science. B.E., 1996, Bangalore; Ph.D., 2002, Georgia State.

TOOMBS, JAMES PRITCHETT, Professor of Veterinary Clinical Sciences. B.A., 1972, Iowa; D.V.M., 1976, Illinois; M.S., 1980, Minnesota.

TOPEL, DAVID GLEN, Emeritus Professor of Animal Science; Emeritus Professor of Food Science and Human Nutrition. B.S., 1969, Wisconsin; M.S., 1962, Kansas State; Ph.D., 1968, Michigan State.

TORRE, MARGARET C., Associate Professor of Human Development and Family Studies; Associate Professor of Curriculum and Instruction. B.S., 1969, M.Ed., 1971, Wayne State; Ed.D., 1976, Illinois.

TRABALZI, FERRUCCIO, Assistant Professor of Marketing; Distinguished Professor in Business. B.S., 1976, Tennessee; Ph.D., 1981, South Carolina.
TRAHANOVSKY, KATHLEEN, Emeritus Adjunct Associate Professor of Chemistry. B.A., 1960, Emmanuell; M.S., 1962, Ph.D., 1969, Iowa State.

TRAHANOVSKY, WALTER S., Professor of Chemistry. B.S., 1960, Franklin and Marshall; Ph.D., 1963, Massachusetts Institute of Technology.

TRAMPEL, DARRELL W., Professor of Veterinary Diagnostic and Production Animal Medicine. B.S., 1969, D.V.M., 1974, Iowa State; Ph.D., 1979, Georgia.

TRAVESSET, CASAS, ALEJANDRO, Associate Professor of Physics and Astronomy. B.Sc., 1992, Ph.D., 1997, Barcelona.

TRENKLE, ALLEN H., Emeritus Professor of Animal Science; Charles F. Curtiss Distinguished Professor in Agriculture and Life Sciences. B.S., 1956, Nebraska; M.S., 1958, Ph.D., 1960, Iowa State.

TRIVEDI, ROHIT K., Professor of Materials Science and Engineering; Anson Marston Distinguished Professor in Engineering. B.Tech., 1986, Indian Institute of Technology (India); Ph.D., 2004, California (Santa Barbara).

TRULIN, DARRYL JON, Emeritus Associate Professor of Aerospace Engineering. B.S., 1961, Iowa State; M.S., 1963, Oklahoma State; Ph.D., 1968, Iowa State.

TUCKER, ROBERT D., Associate Professor of Genetics, Development and Cell Biology (Collaborator). B.S., 1969, Nebraska; Ph.D., 1976, Minnesota; M.D., 1977, Nebraska Medical Center.

TUTTLE, GARY L., Associate Professor of Electrical and Computer Engineering. B.S., 1983, M.S., 1985, Iowa State; Ph.D., 1991, California (Santa Barbara).

TVRDIK, DEBRA FROHLING, Lecturer in Curriculum and Instruction. B.A., 1972, Northern Iowa; M.A., 1988, Iowa State.

TYLKA, GREGORY L., Professor of Plant Pathology. B.S., 1983, M.S., 1985, California (Pennsylvania); Ph.D., 1990, Georgia.

UHLENHOPF, ELDON KARL, Professor of Veterinary Diagnostic and Production Animal Medicine; Professor of Veterinary Microbiology and Preventive Medicine; Associate Dean of the College of Veterinary Medicine. D.V.M., 1972, M.S., 1986, Iowa State.

ULMER, MARTIN J., Emeritus Professor of Ecology, Evolution and Organismal Biology; Distinguished Professor in Liberal Arts and Sciences. B.S., 1942, M.S., 1943, Ph.D., 1950, Michigan.

ULRICHSON, DEAN, Emeritus Professor of Chemical and Biological Engineering. B.S., 1962, Nebraska; M.S., 1963, Illinois; Ph.D., 1970, Iowa State.

URBATSCH, ROBERT B., Assistant Professor of Political Science. B.S., 2000, Iowa State; Ph.D., 2006, Harvard.

USTUNDAG, ERSAN, Associate Professor of Materials Science and Engineering. B.S., 1990, Bogazici (Turkey); Ph.D., 1995, Cornell.

VANDERWALT, SUZANNE C., Senior Lecturer in English. B.A., 1971, Windsor (Ontario); M.A., 1994, Iowa State.

VARDEMAN, STEPHEN B., Professor of Statistics; Professor of Industrial and Manufacturing Systems Engineering; University Professor. B.S., 1971, M.S., 1973, Iowa State; Ph.D., 1975, Michigan State.

VASWANI, NAMRATA, Assistant Professor of Electrical and Computer Engineering. B.Tech., 1999, Indian Institute of Technology (India); Ph.D., 2004, Maryland.

VAUGHN, ERIC MARTIN, Assistant Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.S., 1986, M.S., 1990, Ph.D., 1994, Iowa State.

VENKATA, SUBRAHMANYAM, Emeritus Professor of Electrical and Computer Engineering. B.S., 1963, Andhra (India); M.S., 1966, Indian Institute of Technology; Ph.D., 1971, South Carolina.

VIATORI, MAXIMILIAN S. III, Assistant Professor of Anthropology. B.A., 1989, Missouri; M.A., 2000, Ph.D., 2005, California (Davis).

VIGIL, DENNIS R., Associate Professor of Chemical and Biological Engineering. B.S., 1985, New Mexico; M.S., 1986, Ph.D., 1990, Michigan.

VINOGRADO, BERNARD, Emeritus Professor of Mathematics; Distinguished Professor in Liberal Arts and Sciences. B.S., 1937, City University of New York; M.A., 1940, Ph.D., 1942, Michigan.

VOLKER, CAROL B., Emeritus Associate Professor of Human Development and Family Studies. B.S., 1956, M.S., 1979, Ph.D., 1985, Iowa State.

VOLLBRECHT, ERIK WARREN, Assistant Professor of Genetics, Development and Cell Biology. B.A., 1985, Ph.D., 1997, California (Berkeley).

VONDRA, CARL FRANK, Emeritus Professor of Geological and Atmospheric Sciences; Distinguished Professor in Liberal Arts and Sciences. B.S., 1956, M.S., 1958, Ph.D., 1963, Nebraska.

WEERASINGHE, ANANDA, Professor of Mathematics. B.S., 1979, Colombo; Ph.D., 1986, Minnesota.

WEI, MEIFEN, Associate Professor of Psychology. B.A., 1983, Soochow (Taiwan); M.A., 1986, Tunghai (Taiwan); M.A., 1998, Ph.D., 2000, Missouri.

WELLS, GARY L., Professor of Psychology; Distinguished Professor in Liberal Arts and Sciences. B.S., 1973, Kansas State; Ph.D., 1977, Ohio State.

WENDEN, BILLY J., Adjunct Assistant Professor of Air Force Aerospace Studies; B.S., 2004, Bellevue; M.S., 2008, Touro.

WENINGER, QUINN R. A., Associate Professor of Economics. B.Sc., 1989, Alberta (Canada); Ph.D., 1995, Maryland.

WESLEY, IRENE VARELAS, Assistant Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.A., 1965, California (Los Angeles); M.A., 1967 California (Irvine); Ph.D., 1973, California (Los Angeles).

WHALEY, DAVID CLAUDE, Professor of Curriculum and Instruction; Associate Dean of the College of Human Sciences. B.S., 1976, M.S., 1976, California (Davis); Ph.D., 1985, Cornell.

WHIELOCK, THOMAS D., Emeritus Professor of Chemical and Biological Engineering; University Professor. B.S., 1949, Ph.D., 1958, Iowa State.

WHIGHLAND, KEVIN A., Associate Professor of Music; Emeritus Professor of Liberal Arts and Sciences. B.S., 1972, Henderson State; M.S., 1988, Louisiana State; Ph.D., 1992, Iowa State.

WHITE, BERNARD J., Emeritus Professor of Biochemistry, Biophysics and Molecular Biology; University Professor. B.S., 1958, Portland; M.A., 1961, Ph.D., 1963, Oregon.

WHITE, DAVID J., Associate Professor of Civil, Construction and Environmental Engineering. B.S., 1997, Missouri; M.S., 1999, Ph.D., 2000, Iowa State.

WHITE, PAMELA JUNE, Professor of Food Science and Human Nutrition; University Professor; Interim Dean of the College of Human Sciences. B.S., 1972, M.S., 1974, Washington; Ph.D., 1981, Iowa State.

WHITEFORD, MICHAEL B., Professor of Anthropology; Dean of the College of Liberal Arts and Sciences. B.A., 1967 Beloit; M.A., 1970, Ph.D., 1972, California (Berkeley).

WHITHAM, STEVEN ALAN, Associate Professor of Plant Pathology. B.S., 1990, Iowa State; M.S., 1992, Ph.D., 1995, California (Berkeley).

WICKERSHAM, THOMAS W., Emeritus Professor of Animal Science; University Professor; Interim Dean of the College of Agriculture and Studies; University Professor; Interim Dean of the College of Agriculture and Studies. B.S., 1997, Missouri; M.S., 1999, Ph.D., 2000, Iowa State.

WILLIAMS, GARY C., Emeritus Professor of Music; Emeritus Professor of Mathematics; University Professor; Interim Dean of the College of Agriculture and Studies; University Professor; Interim Dean of the College of Agriculture and Studies. B.A., 1997, Missouri; M.S., 1999, Ph.D., 2000, Iowa State.

WILLIAMS, PAMELA JUNE, Professor of Food Science and Human Nutrition; University Professor; Interim Dean of the College of Human Sciences. B.S., 1972, M.S., 1974, Washington; Ph.D., 1981, Iowa State.

WILLIAMS, SALLY KEMP, Emeritus Professor of Agriculture; Emeritus Professor of Curriculum and Instruction; Emeritus Professor of Agriculture; Emeritus Professor of Curriculum and Instruction. B.A., 1959, Oklahoma State; M.S., 1965, Kansas State; Ed.D., 1969, Oklahoma State.

WILSEY, BRIAN J., Associate Professor of Environmental Studies. B.S., 1981, Georgia; Ph.D., 1982, Duke.

WILSON, DAVID BALL, Professor of History; Professor of Philosophy and Religious Studies. B.A., 1963, Wabash; Ph.D., 1968, Johns Hopkins.

WILSON, LESTER A., Professor of Food Science and Human Nutrition; University Professor. B.S., 1969, M.S., 1971, Oregon State; Ph.D., 1975, California (Davis).

WINAKOR, THORA GIETEL, Emeritus Professor of Apparel, Educational Studies and Hospitality Management; Mary B. Welch Distinguished Professor of Family and Consumer Sciences. A.B., 1950, Illinois; M.S., 1951, Drexel; Ph.D., 1960, Iowa State.

WINDOM, KENNETH, Associate Professor of Geological and Atmospheric Sciences. B.A., 1972, West Georgia; Ph.D., 1976, Pennsylvania State.

WINDUS, THERESA L., Professor of Chemistry. B.S., 1988, Minot State; Ph.D., 1993, Iowa State.

WINER, ELIOT H., Assistant Professor of Mechanical Engineering. B.S., 1992, Ohio State; M.S., 1994, Ph.D., 1999, New York (Buffalo).

WINTERSTEEN, WENDY, Professor of Entomology; Dean of the College of Agriculture and Life Sciences. B.S., 1978, Kansas State; Ph.D., 1988, Iowa State.

WIRTH, DANIELLE M., Lecturer in Philosophy and Religious Studies; Associate Professor of Philosophy and Religious Studies; Associate Professor of Philosophy. B.A., 1986, Oberlin College; M.A., 1989, Ph.D., 1993, Arizona.

WOO, LEE KEITH, Professor of Chemistry. B.S., 1977, Harvey Mudd; Ph.D., 1984, Stanford.

WOOD, SHIRLEY JEAN, Emeritus Associate Professor of Kinesiology. B.S., 1957, M.S., 1959, Indiana; Ph.D., 1971, Illinois.

WOODMAN, WILLIAM F., Professor of Sociology; University Professor. B.S., 1969, M.A., 1970, West Texas; Ph.D., 1972, Oklahoma State.

WOOLEY, DONALD GRANT, Emeritus Professor of Agronomy. B.S., 1951, M.S., 1956, Utah State; Ph.D., 1959, Iowa State.

WU, HUAQING, Associate Professor of Statistics. B.S., 1988, M.S., 1991, Beijing (China); Ph.D., 1997, Michigan.

WU, XIAOQING, Associate Professor of Geological and Atmospheric Sciences. B.S., 1983, Hanzhou (China); M.S., 1986, Chinese Academia Sinica; Ph.D., 1992, California (Los Angeles).

WURTELE, EYE S., Professor of Genetics, Development and Cell Biology; Professor of Food Science and Human Nutrition. B.S., 1971, California (Santa Cruz); Ph.D., 1980, California (Los Angeles).

YANG, YING, Associate Professor of Agriculture and Biosystems Engineering. B.S., 1993, Nanjing (China); M.S., 1998, Dalian (China); Ph.D., 2003, Wisconsin.

YANG, YU GONG, Professor of Statistics. B.S., 1995, Sichuan (China); M.S., 2000, Minnesota; Ph.D., 2005, Cornell.

YANG, YU LANG, Professor of Physics and Astronomy; Associate Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1989, M.S., 1991, Southern Illinois; Ph.D., 1997, Michigan.

YANG, BING, Associate Professor of Genetics, Development and Cell Biology. B.Sc., 1986, M.Sc., 1989, Southwest Forestry; Ph.D., 2000, Kansas State.

YEUNG, EDWARD S., Emeritus Professor of Chemistry; Distinguished Professor in Liberal Arts and Sciences. A.B., 1968, Cornell; Ph.D., 1972, California (Berkeley).

YIN, YANHAI, Assistant Professor of Genetics, Development and Cell Biology. B.S., 1989, Sichuan; Ph.D., 1997, Scripps Research Institute.

YONG-KOON-JIN, Professor of Veterinary Diagnostic and Production Animal Medicine; Professor of Veterinary Microbiology and Preventive Medicine. D.V.M., 1985, M.S., 1987, Korea; Ph.D., 1995, Iowa State.

YOUNG, BING-LIN, Emeritus Professor of Physics and Astronomy. B.S., 1959, National Taiwan; Ph.D., 1966, Minnesota.

YOUNG, DONALD F., Emeritus Professor of Aerospace Engineering; Anson Marston Distinguished Professor in Engineering. B.S., 1951, M.S., 1956, Ph.D., 1956, Iowa State.

YOUNGOUST, GORDON R., Emeritus Professor of Chemical and Biological Engineering. B.S., 1958, Minnesota; M.S., 1960, Ph.D., 1962, Illinois.

YOUNGS, CURTIS R., Associate Professor of Animal Science; Associate Professor of Veterinary Diagnostic and Production Animal Medicine. B.S., 1981, Ph.D., 1985, Minnesota.

YU, CHEN-JU, Assistant Professor of Agricultural and Biosystems Engineering. B.S., 1993, Nanjing (China); M.S., 1998, Dalian (China); Ph.D., 2003, Wisconsin.

YU, CINDY LONG, Assistant Professor of Statistics. B.S., 1995, Sichuan (China); M.S., 2000, Minnesota; Ph.D., 2005, Cornell.

YU, EDWARD WA-ON, Assistant Professor of Physics and Astronomy; Assistant Professor of Biochemistry, Biophysics and Molecular Biology. B.S., 1989, M.S., 1991, Southern Illinois; Ph.D., 1997, Michigan.

YANG, BING, Assistant Professor of Genetics, Development and Cell Biology. B.Sc., 1986, M.Sc., 1989, Southwest Forestry; Ph.D., 2000, Kansas State.

ZHANG, QIJING, Professor of Veterinary Microbiology and Preventive Medicine. D.V.M., 1983, Shandong Agricultural (China); M.S., 1986, National Control Institute of Veterinary; Ph.D., 1994, Iowa State.

ZHANG, SONG, Assistant Professor of Mechanical Engineering. B.S., 2000, Sciences and Technology (China); M.S., 2003, Ph.D., 2006, Stony Brook.

ZHANG, TING, Assistant Professor of Computer Science. B.S., 1996, Peking (China); M.S., 2001, Ph.D., 2006, Stanford.

ZHANG, WENSHENG, Assistant Professor of Computer Science. B.S., 1997, Tongji (China); M.S., 2000, Chinese Academy of Science; Ph.D., 2005, Pennsylvania State.

ZHANG, ZHAO, Assistant Professor of Electrical and Computer Engineering. B.S., 1991, M.S., 1994, Huazhong (China); Ph.D., 2002, William and Mary.

ZHAO, YAN, Associate Professor of Chemistry. Ph.D., 1996, Northwestern.

ZHENG, CHARLES ZHOUCHENG, Associate Professor of Economics. B.A., 1993, Lawrence; Ph.D., 1999, Minnesota.

ZHOU, DAN, Associate Professor of Operations and Management Information Systems; Associate Professor of Computer Science. B.E., 1985, Beijing Polytech; M.S., 1988, Academia Sinica (China); Ph.D., 1995, Carnegie-Mellon.

ZIMMERMAN, JEFFREY J., Professor of Veterinary Diagnostic and Production Animal Medicine; Professor of Veterinary Microbiology and Preventive Medicine. B.A., 1978, Nebraska (Omaha); D.V.M., 1984, M.S., 1986, Ph.D., 1990, Iowa State.

ZIMMERMAN, ZORA DEVNA, Professor of English; Associate Dean of the College of Liberal Arts and Sciences. B.A., 1967, Ph.D., 1974, New York (Buffalo).

ZOU, QINGZE, Assistant Professor of Mechanical Engineering. B.S., 1994, Electronic Science and Technology (China); M.S., 1997, Tsinghua (China); Ph.D., 2003, Washington.

ZUERNER, RICHARD L., Associate Professor of Veterinary Microbiology and Preventive Medicine (Collaborator). B.A., 1980, California State (Chico); M.S., 1983, Ph.D., 1986, West Virginia.

Entomology
Food Science and Human Nutrition
Genetics, Development and Cell Biology
Horticulture
Natural Resource Ecology and Management
Plant Pathology
Sociology

Students enrolled in the College of Agriculture and Life Sciences are provided a broad-based education that includes coursework in communications; biological, physical, and social sciences; humanities; and technical subject matter. Upon graduation students find diverse career opportunities because of the well balanced education they have received as undergraduates. Opportunities for graduates include production agriculture, business and industry, public agencies, education, biological and environmental sciences, value-added processing, natural resource management, rural development, animal and human health professions, and graduate studies.

High School Preparation
Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of biology and chemistry, or biology and physics, or chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.

Majors in the College of Agriculture and Life Sciences
A student has many majors from which to choose. Each major is unique although many courses are common. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits. Options and areas of specialization further define the majors and required coursework within some majors. In all cases, majors are designed to help students succeed in their chosen professions. Majors in agriculture and life sciences are:

Primary Majors
Agricultural Biochemistry
Agricultural Business
Agricultural and Life Sciences Education
Agricultural Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biochemistry
Biology
Culinary Science
Dairy Science
Dietetics
Diet and Exercise
Environmental Science
Food Science
Forestry
Genetics
Global Resource Systems
Horticulture
Industrial Technology
Insect Science
Microbiology
Nutritional Science
Public Service and Administration in Agriculture

Secondary Majors
Environmental Studies
International Agriculture
Seed Science
A secondary major must be taken in conjunction with a primary major.

Minors
Agricultural Biochemistry
Agricultural Education and Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biology
Emerging Global Diseases*
Entrepreneurial Studies*
Environmental Science
Environmental Studies
Food Safety*
Food Science
Forestry
Genetics
Horticulture
Industrial Technology
Insect Science
International Agriculture
Meat Science
Microbiology
Nutrition
*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

Certificate
Occupational Safety
See statement on minors in the Colleges and Curricula section of this catalog.

Special Programs
Agriculture Exploration
Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the Student Services Office until they select their majors.

Preventerinary Medicine
Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with preventerinary medicine (see College of Veterinary Medicine section of this catalog for specific admissions requirements). Students who are undecided about choice of major may enroll in general preventerinary studies (Gen PV). These students will also enroll in an orientation course, which describes the various college majors. A Gen PV student has up to 1.5 semesters to select a major.

Preventerinary medicine students also have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission to the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an individual major. Students also may meet degree requirements of an individual major through the College of Agriculture and Life Sciences Honors Program. Further details are available from an academic adviser or from members of the College of Agriculture and Life Sciences Honors Committee.

Honors Program
The College of Agriculture and Life Sciences Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

Off-Campus Programs
Coursework leading to a master of science degree in agricultural education, master of agriculture degree in professional agriculture and a master of science degree in agronomy are offered to students who choose to study off-campus; see Extended and Continuing Education for further information.
Study Abroad and International Travel Opportunities

Agriculture and life sciences are part of a highly interconnected global system; decisions made in one sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture and Life Sciences provides study abroad and international internship opportunities in more than 25 countries around the world. For additional information, contact the Office of Global Agriculture Programs in the College of Agriculture and Life Sciences.

Internships and Cooperative Education Programs

Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For additional information, contact a departmental adviser or internship coordinator.

College of Agriculture and Life Sciences Core Curriculum and Electives

All curricula in the College of Agriculture and Life Sciences lead to a bachelor of science degree. Each major has specific degree requirements for graduation based on department and college student learning outcomes. College of Agriculture and Life Sciences core curriculum requirements for the areas listed below are established to provide the foundation for successful accomplishment of both departmental and college level learning outcomes.

Students pursuing a primary major in another college and taking a second major in the College of Agriculture and Life Sciences must fulfill the core curriculum requirements of the College of Agriculture and Life Sciences, and all the requirements of the second major. The College of Agriculture and Life Sciences core curriculum follows.

Minimum Credits Subject Area
9.5 Interpersonal and public communication skills

6 English composition with grades of C or better
3 Speech fundamentals with grades of C or better; 0.5 credit in Lib 160
17 Mathematical, physical, and life sciences
3 credits of mathematics; 3 credits of statistics; 5 credits of physical science (e.g., chemistry, geological and atmospheric sciences, physics); 6 credits of life sciences including Biology 101 or 211, and 3 credits of life sciences from a college-approved list (http://www.ag.iastate.edu/student/student_services.php)

12 Humanities, social sciences
3 credits of humanities; 3 credits of social sciences; 3 credits of U.S. diversity from an approved list; 3 credits of international perspectives from an approved list.

3 Ethics
Requirement met in one of two ways designated by the student’s major program of study: 1) 3 credits from a college-approved list; or 2) a course in foundational elements of ethical/critical thinking offered by the Department of Philosophy specifically to meet this requirement for College of Agriculture and Life Sciences majors, and a course designated by the student’s major program designated to coordinate with this foundational course. Refer to the College of Agriculture and Life Sciences web site for details of the ethics requirement.

All students graduating with majors within the College of Agriculture and Life Sciences are expected to be proficient in the following college-level outcomes:

Professional, Interpersonal and Cross-cultural Communications
- Speak and write clearly and persuasively.
- Prepare effective visual, oral, written and electronic presentations.
- Effectively read, listen, observe and reflect.

Problem-Solving/Critical Thinking
- Apply a holistic approach to solving complex issue laden problems.
- Apply a rational and objective process to:
  - Distinguish verifiable facts from value claims.
  - Determine the accuracy of statements, identify assumptions and detect bias.
  - Distinguish relevant from irrelevant information.
  - Prioritize needs.
- Summarize, analyze, and interpret simple research data and policy issues.

Leadership
- Organize, facilitate, and participate effectively in a group, team, or organization.
- Define a problem or opportunity, implement an action planning process, work towards a goal and justify actions taken.

Entrepreneurship
- Demonstrate innovativeness and creativity regardless of context.
- Identify and pursue opportunities that produce value.
- Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

Life-long learning
- Articulate how continued learning after graduation will enrich their lives.
- Identify and participate in new areas for learning beyond the classroom and after graduation.

Ethics
- Define and assess their ethical perspective, moral responsibility, and values.
- Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

Environmental Awareness
- Explain the physical and biological interactions within ecosystems.
- Explain how human activities impact the environment and how societies are affected by environmental change.

International/Multi-Cultural Awareness
- U.S. Diversity – Students should achieve two of the following outcomes. They should be able to:
  - Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
  - Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
  - Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.,
  - Analyze the perspectives of groups and individuals affected by discrimination.
  - Analyze how cultural diversity and cooperation among social groups affect U.S. society.
- International Perspectives – Students should achieve two of the following outcomes. They should be able to:
  - Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
  - Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
  - Analyze and evaluate the influence of global issues in their own lives.
  - Describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events.
  - Communicate competently in a second language.

In addition to the college level learning outcomes, each department within the college has additional discipline-specific outcomes that apply to graduates of that department.
**Electives**

Students use electives to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog). Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the curriculum in which they expect to graduate. Students in ROTC may apply ROTC credits toward elective requirements.

**Advising**

Each student in the College of Agriculture and Life Sciences works closely with an academic adviser who is associated with the major in which the student is enrolled.

All entering students are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisers in planning their first semester schedule of classes.

The advisers also assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information on career choices. Advisers make a special effort to adjust course schedules in accordance with students’ interests and capabilities.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture and Life Sciences. This may be accomplished through several majors; however, it is recommended that the student work closely with an academic adviser.

Each department prepares a guide to help students chart their long-term programs and to specify the exact requirements for graduation. Visit the college web site www.ag.iastate.edu.

**Graduate Study**

Graduate study in agriculture is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdepartmental offerings:
- Biorenewable Resources and Technology
- Ecology and Evolutionary Biology
- Environmental Science
- Genetics
- Immunobiology
- Microbiology
- Molecular, Cellular, and Developmental Biology
- Neuroscience
- Nutritional Sciences
- Plant Biology
- Professional Agriculture (off-campus)
- Seed Technology and Business
- Sustainable Agriculture
- Technology and Social Change (interdepartmental minor)
- Toxicology

For details, consult the Graduate College section of this catalog.

### Curriculum in Agricultural Business

Administered by the Department of Economics. Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture and Life Sciences, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service.

Preveterinary Studies

Preparation for admission to veterinary medicine may be accomplished through the agricultural studies curriculum.
Curriculum in Agricultural Systems Technology

Administered by the Department of Agricultural and Biosystems Engineering. A minor in agricultural systems technology is available; the requirements appear under Technology Systems Management, Courses and Programs.

Students majoring in Agricultural Systems Technology choose between two options: Agricultural and Biosystems Management or Machine Systems.

Agricultural and Biosystems Management Option

12.5 Interpersonal and public communication skills
Engl 150, 250; Sp Cm 212 or AgEdS 311; Engl 302 or 309 or 314; Lib 160

29 Mathematical, physical, and life sciences
Math 142 and 160; Stat 104; Chem 163, 163L; Phys 111 and 112; and 6 cr. of life science from department-approved list.

15 Humanities, ethics, and social sciences
Econ 101; 3 cr. in humanities from college-approved list; 3 cr. in ethics from college-approved list; 3 cr. in International Perspectives from University-approved list; and 3 cr. U.S. Diversity from University-approved list.

30 Technology core
TSM 110, 111, 115, 116, 201, 210, 270, 301, 310, 363, 397, 399, 401, 415, and 416.

6 Business core
Acct 284; Econ 330 or 355 or 336, or Mgmt 370 or 414.

33 Option core
TSM 216, 240, 333, 335, 337, 370, 443, 465, and 5 cr. of technical electives from department-approved list.

125.5 Total credits

Typical Program for the First Year

Cr. Fall
1 Introduction to Technology—TSM 110
3 Trigonometry and Analytic Geometry—Math 142
3 Critical Thinking and Communication—Engl 150
5 General Chemistry—Chem 163, 163L
3 Life science elective
0.5 Library Instruction—Lib 160

Cr. Spring
1 Experiencing Technology—TSM 111
3 Solving Technology Problems—TSM 115
3 Principles of Microeconomics—Econ 101
4 General Physics—Phys 111
4 Survey of Calculus—Math 160

Curriculum in Agronomy

Students majoring in agronomy study crop, soil, and environmental sciences under one of five options: agroecology; agronomy management and business; plant breeding; research and development; or soil and environmental science. A minimum of 15 credits in agronomy courses must be earned at Iowa State.

Core Requirements

12.5 Interpersonal and public communication skills
Engl 150, 250; Lib 160; Sp Cm 212 or AgEdS 311; Engl 302 or 309, or 314

6-14 Mathematical sciences
Math 140 or 150 or 165/166 or 181/182, depending on option; and Stat 104

15-25 Physical sciences
Chem 163/163L, or 177/177L and 178/178L; and 231/231L or BBMB 221 or Chem 331/331L and 332/332L; and Phys 106 or 111 or 221 depending on option

11-26 Biological sciences
Biol 211, 211L, 212, 212L; other courses by option

15 Humanities, ethics, and social science
3 cr. each in ethics, U.S. diversity, international perspectives, humanities, and social sciences from approved lists

21.5-31.5 Agronomic sciences
Agron 105, 110, 114, 154, 206, 210, 310 or 311, 316, 354, 354L, 410 and agricultural issues course.

Options

Agroecology
The Agroecology option provides the scientific foundation for understanding and managing agricultural systems with ecological and environmental perspectives. More information is available from an agronomy adviser or www.agron.iastate.edu/academic/undergraduate/agro_ecol.aspx.

Agronomy Management and Business
The Agronomy Management and Business option is designed for those individuals who seek employment as agronomists working in agribusineses such as cooperatives, seed companies, herbicide and fertilizer dealers, or crop consulting firms. More information is available from an agronomy adviser or www.agron.iastate.edu/academic/undergraduate/mgt_bus.aspx.

Plant Breeding and Biotechnology
The Plant Breeding and Biotechnology option is a science-oriented option recommended for those who would like to work in plant breeding or plant biotechnology. More information is available from an agronomy adviser or www.agron.iastate.edu/academic/undergraduate/plantbreeding.aspx.

Research and Development
The Research and Development is recommended to those individuals interested in careers in environmental science, soil science, or natural resource management. More information is available from an agronomy adviser or www.agron.iastate.edu/academic/undergraduate/res_dev.aspx.

Soil and Environmental Quality
The Soil and Environmental Quality option is designed for those individuals interested in careers in environmental science, soil science, or natural resource management. More information is available from an agronomy adviser or www.agron.iastate.edu/academic/undergraduate/soil_env_sci.aspx.

Typical Program for the First Year

Cr. Fall
0.5 Orientation in Agronomy—Agron 110
3 Principles of Agronomy—Agron 114
3 Introduction to Meteorology—Agron 206
5 General Chemistry—Chem 163 and 163L
3 Critical Thinking and Communication—Engl 150

Cr. Spring
3 Fundamentals of Soil Science—Agron 154
4 Principles of Biology I and Lab—Biol 211/211L
3 Mathematics or Statistics—Stat 104
0.5 Library Instruction—Lib 160
3 Principles of Microeconomics—Econ 101
Pre-Degree Requirements

Cr. Degree Requirements
15.5 Interpersonal and public communication skills
Engl 150 and 250; Sp Cm 212; Lib 160; two additional 3-credit courses in written or oral communication from an approved list; and communications-intensive requirement
9-10 Mathematical sciences
Math 140 and 142; Stat 101 or 104
13 Physical sciences
Chem 163, 163L or 177, 177L; 231, 231L; Phys 106
20 Biological sciences
A Ecl 312, 365; Biol 211, 211L, 212, 212L; NREM 110, 120, 211
15 Humanities, ethics, and social science
From approved lists: 3 cr. in humanities; 3 cr. in social sciences; 3 cr. in ethics, 3 cr. in U.S. diversity, and 3 cr. in international perspectives; and environmental-intensive and problem-solving intensive requirements
R Practical experience requirement (NREM 104)
Students majoring in Animal Ecology are required to choose one of the following options by the end of their sophomore year: Aquatic Sciences, Fisheries, Interpretation of Natural Resources, Preveterinary and Wildlife Care, or Wildlife.

Options

Cr.
34 Aquatic Sciences
A Ecl 418, 486, 486L; Math 160 or 165, or 181; NREM 407; remaining credits to complete 34 total from approved list
34 Fisheries
A Ecl 321, 440, 441, 486, 486L; Math 160, 165, or 181; remaining credits to complete 34 total from approved list.
33 Interpretation of Natural Resources
A Ecl 366, Biol 366, Ent 370, NREM 303, 330, 430; one course from For 356 or Biol 474; one course from Agron 154, 206, Astro 120, Geol 100, 101, or Geol 108/Env S 108; remaining credits from approved list to equal 33 total.
33 Preveterinary and Wildlife Care
An S 214, NREM 330; one course from An S 336 or Biol 364; one course from Anth 438, BMS 329, 415 and 416, Biol 155, 235, 351, 352, 434; one course from An S 331, Biol 313, 423, or Gen 320, one course from A Ecl 366, 458, 459 (one of the 400-level courses preferred for prevet students); three or more credits from A Ecl 401, 442, 454 An S 319, 493, Micro 201 and 201L, or Biol 353, 3 credits of A Ecl or NREM coursework at 300-level or above; remaining credits to complete 33 total from approved lists.
42 Wildlife
A Ecl 371, 451; Biol 313 or Gen 320, Biol 366; Math 160 or 165, or 181; 6 credits from A Ecl 457, 458, 459; 6 credits from A Ecl 455, NREM 480X, 460, 385/585, 532, FOR 453, Env S 293, 482; C R P 491; 3 credits from A Ecl 454X, 515, 651, Biol 315, 336X, 354, 354L, 471X, Env S 370, EEOB 507, NREM 475X, Anth 438; 5 credits from Biol 355, 454, 456, 474, For 356, EEOB 564, Agron 317; remaining credits to complete 42 total from approved lists
12.5-22.5 Free electives
128 Total Credits

Typical Program for the First Year

Cr.
Fall
4 Principles of Biology—Biol 211, 211L
4 Orientation in Natural Resource Ecology and Management—NREM 110
3 Critical Thinking and Communication—Engl 150
3 College Algebra—Math 140
5 General Chemistry—Chem 163, 163L
Spring
4 Principles of Biology—Biol 212, 212L
3 Introduction to Renewable Resources—NREM 120
3 Statistics—Stat 101 or 104
0.5 Library Instruction—Lib 160
3 Trigonometry and Analytic Geometry—Math 142
3 Elective

Pre-Veterinary Studies
Preparation for admission to veterinary medicine may be accomplished through the animal ecology curriculum. The Preveterinary and Wildlife Care option has been designed for this purpose.

Curriculum in Animal Science

Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science (AnS) from Iowa State University (ISU) a minimum of 15 credits in AnS must be earned from courses taught in the AnS department at ISU. Students desiring to complete a minor in AnS must complete 17 credits in AnS courses from a list maintained in the department, and a minimum of 9 credits in AnS must be earned from courses taught in the AnS department at ISU.

Cr.
12.5 Interpersonal and public communication skills
Engl 150, 250, 302 or 309 or 314; Sp Cm 212 or AgEds 311 or ComSt 214; Lib 160; and communications-intensive requirement*
10 Mathematical and computer sciences
Stat 101 or 104 and 226
Com S 103
Math 140 or 160 or 165 or 181 (some options may restrict choices)
3 Business elective
Econ 101 or 102 or Acct 284 (some options may restrict choices)
8 Physical sciences
Chem 163 & 163L or Chem 177 and 177L (some options may restrict choices); BBMB 221 or Chem 231 & 231L or Chem 331 & 331L (some options may restrict choices)
8 Biological sciences
Biol 211, 211L, 212, 212L; Biol 313 or Gen 320; Micro 201 & 201L or Micro 302 & 302L
18 Personal development, human relations, and global awareness a minimum of: 3 credits in humanities; 3 cr. in social sciences; from approved lists: 3 cr. in ethics, 3 cr. in international awareness, 3 credits in U.S. multicultural awareness; and problem-solving-intensive requirement.
36 Animal science
An S 101, 110, 114, 211, 214, 214L, 311, 319, 331, 352, 411; three courses from: AnS 216, 223, 224, 225, 226, 229, 235, 270 (some options may restrict choices); one course from: AnS 336, 337, 345, 360, Biol 305, 314, 352, 353, Ent 372, 374, Micro 310, VDPAM 487 (some options may restrict choices); one course from: AnS 415, 423, 424, 425, 426, 429, 434, 434 or 434, 460, FS HN 405, 410, 420, Micro 407 (some options may restrict choices)
26.5 Pre-Veterinary Medicine
Chem 177, 177L, 178, 321, 331L, 332, BBMB 301 or Biol 314; Math 141 or 142 (if trigonometry not taken in high school) Phys 111; one course from AnS 415, 423, 424, 425, 426, 429 or 434; one course from AnS 415, 419, 423, 424, 425, 426, 429, 434, 460, FSHN 405, 410, 420, Micro 407; free electives 13.5
26.5 Livestock Management
Acct 284; AgEds 451; Econ 101, 300, 331; An S 270; two courses from An S 223, 225, 226, 229, 235; two courses from An S 336, 337, 345, 360; one course from AnS 423, 424, 425, 426, 429, 434; one course from AnS 415, 419, 423, 424, 425, 426, 429, 434, 460, FSHN 405, 410, 420, Micro 407; free electives 8.5
26.5 Animal Products
Chem 177 & 177L; two courses from An S 223, 225, 226, 229, 235; An S 270, 360, 460; one course from 423, 425, 426, 429, 434, FS HN 405 or 410; one course from FS HN 420 or Micro 407; free electives 23.5
Typical Program for the First Year

Curriculum in Dietetics

Administered by the Department of Food Science and Human Nutrition.

The student is prepared for admission to dietetic internships and other professional experience programs approved/credited by The American Dietetic Association. Courses included have been approved as meeting the academic requirements of The American Dietetic Association. There is a $30 fee for a statement of verification of completion of the approved program.

14.5 or 16.5

**Curriculum in Genetics**

Undergraduate study in genetics is jointly administered by the Department of Biochemistry, Biophysics, and Molecular Biology, the Department of Genetics, Development, and Cell Biology, and the Department of Ecology, Evolution, and Organismal Biology.

Cr.  Degree Requirements

**12.5 Communications**
   Engl 150, 250; an advanced English writing course (Engl 302-316); oral communication (AgEdS 311, Sp Cm 212; Lib 160

11  Math
   Must include at least one course from both calculus and statistics chosen from Math 160, 165, 166, 181, 182; Stat 101 or 104, 401, 402, 403

3  Computer Studies
   Three credits in computer science or computer applications chosen from an approved list. See department for list.

31  Physical sciences
   Chem 177, 177L, 178, 178L or 211, 331, 331L, 332, 332L; BBMB 404 or 420; Chem 211 or 321 or BBMB 405 or 411; Physics 111, 112 or 221, 222

23  Biological sciences
   Biol 211, 211L, 212, 212L, 313, 313L, 314, 314L; Micro 302; Biol 315

15  Humanities, ethics, and social sciences
   15 credits including at least 3 cr. each in the humanities, social sciences, ethics, international perspectives and U.S. diversity chosen from an approved list.

The environment-intensive and problem solving-intensive college requirements can be satisfied by selection of appropriate courses. See department for lists.
9.5 Genetics
Gen 110, 410, 411, 460 or 462, 491

9 Support electives
Choose 9 credits from approved list. See department for list.
Biol (A Ed) 312 must be included in the program.

Electives
Additional electives sufficient to equal the 128 credits required for graduation.

128 Total credits

Typical Program for the First Year

Cr.
Fall
1  General Chemistry—Chem 177, 177L
3  English—Engl 150
4  Calculus—Math 165 or 181
4  Principles of Biology—Biol 211, 212L
0.5 Orientation and Career Opportunities—Gen 110
0.5 Library Instruction—Lib 160

Spring
4  General Chemistry—Chem 178, 178L
3  Statistics 101 or 104
4  Calculus—Math 161 or 166 or 182
4  Principles of Biology—Biol 212, 212L

Curriculum in Global Resource Systems

Administered by a supervisory committee in the College of Agriculture and Life Sciences. Students choose a region of the world, either industrialized or developing, to develop an expertise; they choose a language to learn and develop proficiency through the intermediate level; they choose and possess an area of technical expertise by completing a minor or certificate program in the College of Agriculture and Life Sciences; they complete a required internship in an international setting; and they select and complete a senior research project with faculty mentoring.

Cr.
Degree Requirements
12.5 Interpersonal and Public Communications Skills
3  Critical Thinking and Communication—Engl 150
3  Written, Oral, Visual, and Electronic Composition—Engl 260
0.5 Library Instruction—Lib 160
3  Report and Proposal Writing—Engl 309 or
3  Business Communication—Engl 302 or
3  Technical Communication—Engl 314
3  Fundamentals of Public Speaking—Sp Cm 212 or
3  Presentation and Sales Strategies for Agricultural Audiences—AgEds 311

6-8 credits
Cr.
Mathematical Sciences
3-4 Mathematics (Math 140 or higher course number)
3-4 Statistics—101 or 104

15 credits
Cr.
Humanities, Ethics, and Social Science
3  Humanities (from approved list)*

27-35 credits (depending upon language study)
Cr.
Global Competency
12-20 Students will emphasize a region of the globe. World Language proficiency through intermediate levels. Complete 100 and 200 levels of a single college-level world language.
15 Coursework in culture, history, politics and economics in which students emphasize a global region outside the United States, up to 3 credits may be earned through travel courses. Courses in the WLC Language and Cultures for Professions are also eligible.

15 - 18 credits
Cr.
Physical and Life Sciences
5  General Chemistry—Chem 163, 163L; or 177, 177L
4  Principles of Biology—Biol 211, 211L
3  300-level or higher life sciences course

One of the following is required, two are recommended:
3  Environmental Geology—Geol 101
3  Fundamentals of Soil Science—Agron 154 or
3  Soils for Horticulture Scientists—Agron 155
3  Introduction to Meteorology—Agron 206
3  World Climates—Agron 406

22 credits
Cr.
Global Resource Systems
1  Orientation—Globe 110
3  Global Resource Systems (1Cr.)—Globe 201
3  Issues in Global Resource Systems—Globe 211
3  Resource Systems of Industrialized Nations—Globe 301
3  Resource Systems of Developing Nations—Globe 302
3  Internship Global or United States
3  Senior Research—Globe 401
3  Responses to Global Resource System Challenges—Globe 402

15 - 18 credits
Cr.
Technical Concentration
15 - 18 credits: Satisfied by any of the 23 minors or a certificate offered in the College of Agriculture and Life Sciences.

14 - 16 credits: Free Electives
128.5 Total Credits

Curriculum in Horticulture

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Specialization Options.

A horticulture minor is available. The requirements appear under Horticulture, Courses and Programs.

Cr.
Degree Requirements
12.5 Interpersonal and Public Communication Skills
Engl 150, 250, 302 or 314; Lib 160; Sp Cm 212 or AgEds 311; and a communications-intensive requirement (see department for procedure)

6-9 Mathematical sciences
Math 140 or 150 or 165 or 181; and Stat 101 or 104 or 226 or 401

13 Physical sciences
Chem 163, 163L; or 177, 177L; and 231, 231L, or 331, 331L; and one complete course from: Chem 164, 164L, 178, 178L; or Phys 106 or 111. A student must take either (1) Chem 163/163L and 164/164L; and Chem 231/231L; or (2) Chem 177/177L and 178/178L; and Chem 331/331L. A student may take Phys 106 or 111 instead of Chem 164/164L or 178/178L.

18 Biological sciences
Biol 211, 211L, 212, 212L select 10 credits from the following group: Agron 260, 316, 317, 354, 354L; Biol 312, 314, 314L, 330, 355, 366, 454, 474; Ent 370, 375, 376; For 416; Pl P 391, 408; Gen 320 or Biol 313, 313L.

15 Humanities, ethics, and social sciences
One 3-credit course from an approved list in each of the following areas: humanities, ethics, social science, U. S. diversity, and international perspectives; see department for procedure for meeting problem-solving, environmental-intensive, and communication-intensive requirements.

3 Soil science
Agron 154 or 155

30 Horticulture

Specialization Options
(A minor in an approved area of study may be substituted for the Specialization Option with permission of student’s adviser)

12 Environmental horticulture option:
Hort 424 must be among the courses that fulfill the horticulture requirement. Other recommended course is Hort 484. The student must
take Biol 312 and 9 or more credits from the following group: Agron 260, Biol 355, Econ 334, Ent 375, Env S 293, 324, 382, 450, 460, 491; TSM 324, 424.

12. Fruit and vegetable production and management option:
Hort 242, 445, 461, 471 and 471L must be among the courses that fulfill the horticulture requirement. Acct 284; and 9 or more credits from the following group: Acct 215, 285, 316; Com S 103; Econ 230, 334; FS HN 272, 403, 405, 471, 472; Mgmt 310, 313, 370, 371; Mkt 340, 442, 446, 447; TSM 270.

12. Greenhouse production and management option:
Hort 233, 322, 330, 332, 422, 434, 435 and 445 must be among the courses that fulfill the horticulture requirement. Acct 284; and 9 or more credits from the following group: Acct 215, 285, 316; Com S 103; Econ 230, 334; FS HN 272, 403, 405, 471, 472; Mgmt 310, 313, 370, 371; Mkt 340, 442, 446, 447; TSM 270.

12. Landscape Design, Installation and Management option:
Hort 240, 280, 300, 341, 342, 351, 380, 381, 444, 446, 480 and 481 must be among the courses that fulfill the horticulture requirement. Up to 3 credits can be used in the biological sciences area. Another recommended course is Hort 445. Acct 284; and 9 or more credits from the following group: Acct 215, 285, 316; Mgmt 310, 313, 370, 371; Mkt 340, 343, 442, 447; TSM 324.

12. Nursery crops production and garden center management option:
Hort 240, 322, 330, 341, 342, 351, 442, and 445 must be among the courses that fulfill the horticulture requirement. Acct 284; and 9 or more credits from the following group: Acct 215, 285, 316; Agron 208; Com S 103; Econ 230, 334; EnSci 446 or 461I; Mgmt 310, 313, 370, 371; Mkt 340, 442, 446, 447; TSM 270.

12. Public garden management and administration option:
Hort 233, 240, 262, 322, 330 and 445 must be among the courses that fulfill the horticulture requirement. Other recommended courses are Hort 280, 332, 341, 342, 351, 351L, 380 and 381. The student must select a minimum of 12 credits from the following: Acct 284, 285, 316; Econ 334; Engl 303, 309, 313, 415; EnSci 446 or 461I; Fin 301; JLMC 220; Mgmt 310, 313, 370, 371 471; Sp Cm 312, 313.

12. Science option:
Those who choose the Science Option must take: Biol 330 for part of the biological sciences requirement; Math 165 or 181 for the mathematical sciences requirement; Chem 177, 177L, 178, 178L, 331, 331L, 332, 332L, Phys 111 and 112 for the physical sciences requirement: BBMB 301 or 404, Math 166 or 182; and 5 or more credits from the following group: BBMB 311, 404, 405, 411; Biol 313, 313L, 314, 314L, 315; Chem 211, 211L, 316, 316L, 321L, 322L, 324; Com S 107, 207; Gen 409, 410.

12. Turfgrass management option:
Hort 240, 351, 351L, 445, 451, 452, 453 and 551 must be among the courses that fulfill the horticulture requirement. Other recommended course: Hort 330. Acct 284 and 9 or more credits from the following group: Acct 285, 316; Agron 206, 260, 317, 338, 366, 360, 459; Com S 103; Econ 334; Ent 375; Env S 201, 232; EnSci 446 or 448; HRI 289; Mgmt 370, 371; Pl P 391; TSM 270, 324, 424; additional business courses may be used with permission of adviser.

R Orientation in Microbiology—Micro 110
## Curriculum in Public Service and Administration in Agriculture

Administered by the Department of Sociology.

### Cr. Degree Requirements

12.5 Interpersonal and public communication skills
- Engl 150, 250; JI MC 205; Sp Cm 212; Lib 160; communication-intensive requirement

18 Mathematical, physical, and life sciences
- Math 150; Stat 101; electives in physical sciences (5 cr.); Biol 101; electives in biological sciences (3 cr.)
- To fulfill the College’s environmental intensive requirement, students are encouraged to choose Environmental Studies 120 or 173 as the elective in the biological sciences; demonstration of computer proficiency (see Sociology Department for requirements).

12 Humanities, ethics, and social sciences
- Humanities elective (3 cr.) from approved lists; 3 cr. in U.S. diversity; 3 credits in international perspectives. The 3-credit College of Agriculture and Life Sciences requirement in the social sciences is included as part of the Public Service and Administration Core as are the environmental-intensive requirement and problem solving-intensive requirement.

46 Public service and administration core
- Economics: 101, 102, 344 or Acct 284, 336; AgEds 451
- Political science: 215, 310, 371, 475, and 3 additional credits of political science courses at the 300-level or above. Sociology: 110, 130, 325 or 382, 415, 420 or 380, and 464

9 Agricultural sciences
- Required area of concentration

15.5 Free electives

128 Total credits

### Typical Program for the First Year

## Curriculum in Seed Science

Administered by the Departments of Agricultural and Biosystems Engineering, Agronomy, Horticulture, and Plant Pathology. Must be taken as a secondary major in conjunction with a primary major. The seed science program is designed for students with career interests in one or more aspects of the seed industry. Areas of study include: seed production, conditioning, pathology, physiology, quality control, and marketing, as well as seed plant designs.

### Cr. Degree Requirements

12.5 Interpersonal and public communication skills
- Engl 150, 250; Sp Cm 212 or AgEds 311; Lib 160; Engl 302 or 309 or 314 or Sp Cm 312

38 Mathematical, physical, and life sciences
- Math 140 or 150; Stat 101 or 104; Chem 163, 163L; BBMB 211 or Chem 213, 213L; Phys 106 or 111, or Chem 164, 164L; Biol 211, 211L; Biol 212, 212L; Ent 376; Gen 320 or Biol 313; Agron 317; Pl P 408; and demonstration of computer proficiency (see department of primary major for procedures)

15 Humanities, ethics, and social science
- 3 cr. each of humanities, social sciences, ethics (from an approved list), U.S. diversity (from an approved list), and international perspectives

21 Agricultural sciences
- Agron 114 or Hort 221; Agron 154, 206, 354; Agron or Hort electives (6 cr.); TSM electives (3 cr.)

9 Economics and business
- Econ 101, 235; and one course from the following group: Acct 284; Econ 102, 330, 336; Mgmt 370; Mkt 340

10 Seed science
- Agron 338, 421, 491, and 2 cr. of Agron, Hort, PI P or TSM electives at the 300-400 level

22.5 Primary major requirements and free electives

128 Total credits

### Typical Program for the First Year

Because seed science is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).
College of Business

Objectives of the Curriculum in Business

The instructional objective of the College of Business is to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the affect of diversity in the work place; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

The curriculum in business is accredited by the International Association for Management Education (AACSB), the national business accrediting agency.

Organization of Curriculum

The undergraduate curriculum in business is divided into two phases: a general education (pre-business) program and a professional program. The pre-business requirements provide a broad foundation in the liberal arts. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The eight majors offered for the degree of Bachelor of Science in Business provide specializations in: accounting, finance, management, management information systems, marketing, logistics and supply chain management; operations and supply chain management; or business economics.

Required High School Preparation

Students entering the pre-business curriculum must present evidence of the following high school preparation:

a. Four (4) years of English/Language Arts, emphasizing writing, speaking, and reading as well as an understanding and appreciation of literature.

b. Three (3) years of mathematics, including one year each of algebra, geometry, and advanced algebra.

c. Three (3) years of science, including one year each of courses from two of the following fields: biology, chemistry, and physics;

d. Two (2) years of social studies.

Admission Standards to Professional Programs

All new entering students are enrolled in the pre-business curriculum. To enter the professional program in the College of Business, students must complete any Engl 101 courses, Engl 150, and the following foundation courses or their approved substitutions: Math 150, Econ 101, Econ 102, Stat 226, Acct 284, and BusAd 101. See Curriculum in Business.

In addition, all students must achieve an Iowa State University cumulative grade point of 2.5 or a grade-point average of 2.5 in the foundation courses. Admission into the professional program is a prerequisite for pre-business students to gain admission into upper-level business classes.

Students who meet the following requirements qualify for early admission to the professional program. First Semester Freshman: ACT score of 30 or higher, or ranked in the top 5% of high school class, or National Merit/Achievement Finalist, or member of the Freshman Honors Program. All other Students: minimum ISU cumulative GPA of 3.35 in at least 12 credits, or full member of the University Honors Program.

If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If foundation courses initially taken at Iowa State University need to be repeated, they must be repeated at Iowa State University. With the exception of Acct 285 and MIS 330, pre-business students do not have access to business core classes. To facilitate registration, qualified students may be conditionally admitted during the semester in which they complete the admission requirements. Admission requirements are subject to change. Applications and the current requirements for admission to the College of Business are available on the Web at http://www.business.iastate.edu/ProfessionalProgram/ or from the Undergraduate Programs Office in the College of Business.

Academic Standards and Graduation Requirements

Policies for students enrolled in the College of Business may be obtained on the Web at http://www.business.iastate.edu/undergraduate/ or from the Undergraduate Programs Office in the College of Business.

Students are responsible for knowing and adhering to these College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2009-2011 catalog:

(1) A minimum of 122 semester credits are required.

(2) At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year college.

(3) At least 50% of the 122 credits required for graduation must consist of general education (non-business credits).

(4) A minimum of 12 credits of the last 32 credits earned in residence must be applied to the business core and/or the major.

(5) The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.

(6) Students must achieve Communication proficiency by earning a grade of C or better in two of the three required English courses.

(7) A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.

(8) A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution.

(9) Business majors may not take business courses Pass-Not Pass (P/NP).

(10) General education courses may not be taken P/NP.

(11) No more than 9 elective credits may be taken P/NP.
Curriculum in Business

The college offers programs of study leading to the degree bachelor of science with a major in accounting; finance; management; management information systems; marketing; logistics and supply chain management; operations and supply chain management; or business economics. The college also offers a secondary major in international business. Total credits required: 122

U.S. diversity course

1 Acct, Fin, and Bus Econ majors will also take State 326 as part of the supporting courses. Bus Econ majors will take Math 160 instead of 150, and Econ 207 instead of Math 151. See the Undergraduate Programs Office in the College of Business.

2 Students not adequately prepared in mathematics may have to take remedial courses in addition to courses listed above. Remedial mathematics courses may not be used to satisfy credit requirements for graduation in the business curricula.

3 Students without adequate computer background may take Com S 103 to satisfy the computer literacy requirement.

4 Students may satisfy this requirement either by taking six credit hours from the University International Perspectives list, or three credit hours from the International Perspectives list and three credit hours from the College of Business Global Perspectives list. Approved list of courses is available on the web at http://www.business.iastate.edu/undergraduate/ or from the Undergraduate Programs Office in the College of Business.

5 Courses for this requirement may also be used to fulfill other curriculum requirements or electives and therefore credits are not included in the sum needed.
Advising System

The Undergraduate Programs staff, under the leadership of the Director for Undergraduate Programs, facilitates student progress toward graduation while supporting the academic standards of the College of Business and Iowa State University. To accomplish this, the Undergraduate Programs staff provides services for all College of Business students, including academic advising, learning opportunities, and teaching and developmental activities.

Students in the College of Business have advisors located in the Undergraduate Programs Office. The advisor assists students with developing an academic program; accessing pertinent university resources; and meeting their educational objectives.

The college offers an orientation program for entering students. All entering students and family members are encouraged to attend orientation. During orientation the advisor and the student prepare an appropriate schedule and the student registers for courses. Placement assessments may be required in Mathematics and English to assist in placing students in the appropriate level of courses if this cannot be determined by ACT/SAT scores, high school preparation classes or transfer courses.

Honors

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30, or ranked in the top 5% of their high school classes; or selected as a National Merit or National Achievement finalist.

Enrolled students who have completed 12 graded credits at Iowa State University and earned a 3.35 can be admitted as a full member of the Honors Program. To qualify for full membership, students must have declared a major, developed a program of study, and have a minimum of 48 credits remaining before graduation. Special advisors will assist honors students in developing an appropriate program of study.

Internships

Credit and non-credit internships in business may be approved for College of Business students in all majors including pre-business. Credit hours and requirements vary. Arrangements must be made in the college prior to the beginning of the internship. An internship adviser from the Career Services Center will assist students in making these arrangements.

Multiple Majors

Undergraduates pursuing a degree in the College of Business may complete additional majors in the College of Business. Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and agricultural business or economics is not permitted. A major in business economics with a minor in economics is not permitted.

Undergraduates with a primary major outside the College of Business who want a second major in business must meet the admission requirements for the professional program as well as complete the following requirements: the business core courses; the major specialization; computer proficiency; Acct 215; and Math 151.

All students pursuing multiple majors or multiple degrees within the College of Business are required to have a minimum of 15 credits of coursework in each additional major that is not used in the other majors.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Curriculum Changes

Iowa State University students who want to change their curriculum to the College of Business must attend a curriculum change meeting. See Changing Curriculum or Major for more details on this process. Students on Academic Probation will not be allowed to change curriculum to the College of Business during enrollment period three. See Making Schedule Changes.

International Business Secondary Major

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum 6 credits) and an approved international experience (minimum 2 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor

The College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are ACCT 284, Acct 285 or ACCT 215 or BUSAD 250 (6 credits), three courses selected from Fin 301, Mgmt 370, MIS 330, Mkt 340, LSMC 360, or OSCM 320 (9 credits). The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University. A “C” average or higher is required in all courses used to satisfy the minor requirements. All requirements for the minor must be taken for a grade.

Students with a major in the College of Business may qualify for a minor specialization in one of the college’s departments by taking at least 15 credit hours in the minor specialization, nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students with a major outside the College of Business are eligible for a general business minor only—not a specialization in a business department.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Entrepreneurial Studies Cross-Disciplinary Minor

The College of Business participates in a cross-disciplinary minor in Entrepreneurial Studies. This minor is available to any undergraduate student. Requirements for the minor include Mgmt 310, Mgmt 313 (6 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available in the Undergraduate Programs Office in the College of Business and on the web at http://www.business.iastate.edu/undergraduate/minors/entrepreneurship.

Non-degree Seeking Students

Students who wish to take courses in the College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible to take up to 9 credits in 300-level and above business courses without meeting the college’s admission requirements.
Upper Division Courses for Students Outside the College

Students from outside the College of Business are eligible to take up to 9 credits of 300-level and above business courses without meeting the college’s admission requirements, as long as they meet course prerequisites.

Graduate Study

Four programs are offered at the graduate level: a master of business administration (M.B.A.) program, a master of accounting (M.Acc.), a master of science (M.S.) in business, and a master of science in information systems (M.S.I.S.). These programs are intended to meet distinct sets of educational objectives.

The M.B.A. is the professional management education program for those pursuing careers in business. The purpose of this professional program is to provide professional business education by preparing students to understand the impact of technology on business organizations in a global environment. The M.B.A. program consists of a 48-credit curriculum leading to a non-thesis, non-creative component master of business administration. Students may pursue a specialization in accounting, agribusiness, family financial planning, finance, information systems, international business, supply chain management or marketing.

The master of accounting (M.Acc.) is a 32-hour degree. The program requires 15 hours of graduate accounting courses, at least 9 hours of non-accounting graduate electives, a communications course, and an international course from an approved list. The M.Acc. is appropriate for any student wanting to pursue a variety of accounting careers. Additionally, the program is designed to help interested candidates meet the 150-hour education requirement for CPA certification in Iowa.

The master of science in information systems (M.S.I.S.) is designed to provide students with strong technical skills and a broad background in business needed to effectively develop and manage information systems projects. Using the latest software, students will apply information systems theory and concepts to modern information systems development. Program requirements range from 30-40 credits depending upon the student’s background. The M.S.I.S. curriculum includes business foundation courses, information systems core courses and electives, and a research requirement (creative component).

The M.S. program, consisting of 30 minimum credits, is oriented toward further business specialization at the master’s level for students with undergraduate degrees or academic backgrounds in business. The program is intended to serve those students who desire specialized study of an area within business. Students in the program must complete a thesis. This program is also a suitable vehicle for students planning to pursue a Ph.D. in business.

Double degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P.), information systems (M.B.A./M.S.I.S.), and statistics (M.B.A./M.S.-Statistics). The Department of Logistics, Operations, and Management Information Systems in the College of Business participates in the following graduate level interdepartmental programs: Information Assurance, Human Computer Interaction, Seed Science and Business, and Transportation. The College of Business also offers a business administration minor to students with majors outside the college. A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in civil engineering, computer engineering, electrical engineering, industrial engineering, and mechanical engineering.

Ph.D in Business and Technology

The College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of three specializations—customer management (CM), supply chain management (SCM), or management information technology (MIT). Many departments in the college (Logistics, Operations, Management Information Systems, Marketing and Management), and the departments of Statistics, Economics, Psychology, and Sociology cooperate in providing coursework toward this degree. The program will prepare individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44 credit course curriculum followed by 12 credit thesis or dissertation. Students do not need to have an undergraduate degree or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 credit hours of business foundation courses. For more details or application information see the Business Administration Department listing in this catalog.
College of Design

Community and Regional Planning
Landscape Architecture

Objectives of the Curricula in Design
The College of Design is among a small, elite number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific environmental design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college's programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, interior designers, studio artists, arts administrators and environmental designers.

Graduate Curricula
The College of Design offers graduate study in the areas shown below. Graduate study is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Organization of Curricula
The undergraduate curricula in design are divided into two phases: a pre-professional Core Design Program and a professional program. The Core Design Program grounds the undergraduate degree programs, provides a rich, rigorous inclusive base for the curricula. It creates shared language, experience, and community for programs, faculty and students and exposes students to all design disciplines, allowing them to make more informed degree choices, apply to multiple programs, and experiment with interdisciplinary work.

For students entering the Core Design Program, the college highly recommends purchase of a digital camera.

The intense, discipline-specific professional curricula that follow the Core focus on developing students' ability and knowledge in their major. Within the major area, students advance creative and professional skills through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

General education, contained in both the Core and the professional programs, is composed to ensure that students receive a well-rounded undergraduate education.

High School Preparation
Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended through not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements: 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability; 3 years of mathematics to develop problem solving skills, including 1 year each of algebra, geometry, and advanced algebra; 3 years of science, including at least two of the following: 1 year of biology, 1 year of chemistry, or 1 year of physics; 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government.

Admission Standards to Enrollment
Managed Professional Programs
Admission into the enrollment managed professional programs of Architecture, Community and Regional Planning, Graphic Design, Interior Design, and Landscape Architecture requires a separate application after completing the Core Design Program, depends on available resources, and is subject to review by faculty committee. Applicants are reviewed on the basis of a portfolio of original work, scholarship performance, and a written essay.

Advising
Each student receives personal assistance from an academic advisor within the student's curriculum area. Students enrolled in the college's Core Design Program are advised by professional advisers. Once admitted to professional programs, students are assigned to faculty advisers. Advisers help students develop a program of study, access pertinent university resources as well as provide information on career choice.

The college's career services office works with students to develop their career goals as well as prepare and search for employment.

Honors Program
The College of Design participates in the Honors Program which provides opportunities for outstanding students to individualize their programs of study. See Index, Honors Program.
Requirements in the College of Design

All students in the College of Design are expected to meet the following requirements of the college.

Core Design Program

* General education credits in the Core Design Program may count toward the minimum credits.

** Students applying to Architecture for admission must take Math 142 and Physics 111 in the first year. These two courses total seven credits for a total of 30.5 core credits.

General Education

Minimum Credits:

6 Biological sciences, physical sciences and mathematics
Includes courses in the fields of agronomy, astronomy and astrophysics, biology, botany, chemistry, civil engineering, computer science, geology, mathematics, physics, statistics, and zoology.

9.5 Communications
Engl 150*, 250*, Lib 160. Includes courses in the fields of English (composition), and speech communication (interpersonal and rhetorical).

6 Humanities
Includes courses in the fields of classical studies, English (literature), foreign languages, history, philosophy, religious studies, as well as history/theory/literature courses in dance, music, theater, journalism, African American studies, American Indian studies, environmental studies, Latino/a studies, women's studies, and university studies.

6 Social sciences
Includes courses in the fields of African American studies, American Indian studies, anthropology, economics, environmental studies, geography, human development and family studies, Latino/a studies, political science, psychology, sociology, and women's studies.

9 Additional credit hours selected from any of the above areas.
Six credits must be at the 300 level or above.

9 Selected from the above areas.
Six credits must be at the 300 level or above.

36.5 Minimum credits
See departmental curricula for specific course requirements within the general education areas.

-To meet requirements for graduation, a minimum grade of C– must be received.

Minor in Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of course work: three credits of history selected from College of Design course offerings and twelve additional credits selected from College of Design course offerings.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the fifteen credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses in their major or in the Core Design Program to satisfy this minor.

Minor in Digital Media

Manipulation of digital media has emerged as an essential skill for design inquiry alongside traditional methods of building models and drawing sketches. To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open to all undergraduate students at Iowa State University.

This minor requires 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement; and at least 3 credits from the listed courses numbered 200. Courses taken for this minor may not be taken on a pass-not pass basis.

Students enrolled in the College of Design may not use courses in their major or in the Core Design Program to satisfy this minor.

Curriculum in Architecture

The Department offers undergraduate and graduate degree programs:

A 138-credit undergraduate professional program, preceded by a 28-credit preprofessional program, leading to the bachelor of architecture degree.

A 100-credit graduate professional program leading to the Master of Architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in this program. (M.Arch.)

A 30-credit post-professional graduate program leading to the Master of Architecture. (M.Arch. II)

A 30-credit interdisciplinary graduate research program leading to the Master of Science in Architectural Studies. (M.S.A.S.)

For more complete graduate program descriptions see Graduate Study under Architecture in the Courses and Programs section.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master’s degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

Curriculum in Art and Design—B.A.

Administered by the Department of Art and Design and leading to a 120.5 credit undergraduate Bachelor of Arts degree including a 29.5 credit pre-professional program (college core).

This curriculum offers two concentrations: Art and Culture, and Art and Design History and Theory. Both concentrations are combined with an applied career minor or approved program.

Consideration for admission into the B.A. curriculum is based upon department resources, GPA earned in the college Core Courses and the freshman year.

Transfer students with studio credits from other programs, colleges and universities must present for department review a portfolio of work done in those courses in order to have the credits apply toward a formal second major or minor. Students have the opportunity to work with their faculty advisers to define their own areas of interest, which may include a minor.

Consideration for admission into the Community and Regional Planning professional program takes place either through review of the performance in the College of Design’s first year CORE design program, or through transfer from another curriculum or accredited institution. If applying through the CORE program, admission is based upon a student’s cumulative GPA for all courses earned during the first year, portfolio work submitted upon completion of the CORE courses, and an essay submission. In either case, predictors of success in the program include the quality of prior work and interest in the field. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking. Students entering the CRP professional program from outside the College of Design should provide a similar portfolio of their work for evaluation.

Cr. Degree Requirements
36.5 General education

6 min. Biological and physical sciences and mathematics
Select from Astro 120, 150, Biol 101, 173, 211, 212, Bot 111, 265, Chem 160, 163, 163L, Com S 103, 107, Geol 100, 101, Gen 260, Math 104 or 150, 105, 105, 140, 141, 151, Mteor 206, Phys 101, 106, Stat 101, 104 or any higher level course in these disciplines for which these courses are prerequisite

6 Art H 280 & 281 Art History I & II
6 selections 300 level or above Art and Culture Concentration
12 Design and Art Options
Select from all 200-level courses in Art, ArtLS, graphic design, and interior design, or approved list of courses in architecture, landscape architecture, community and regional planning, and textiles and clothing that are open to nonmajors.
30 Applied minor* or approved program of study (at least 6 credits 300 or above courses). See department for specific curriculum sheets with course information.

10 Electives
120.5 Total credits

*Second major or minor must be approved by the department offering the program of study. See university guidelines for structuring and declaring a second major and/or minor. Credit hours not applied toward a formal second major or minor must be used in a coherent program approved by the Department of Art and Design. Approval for these 30 credits must be documented in writing following completion of 75 credits and before completion of 100 credits toward the B.A. degree.

Curriculum in Community and Regional Planning

The Department of Community and Regional Planning administers the 129 credit undergraduate program leading to the Bachelor of Science. The curriculum is designed to prepare students to enter the profession of planning ready to work in a variety of professional settings. Students have the opportunity to work with their faculty advisers to define their own areas of interest, which may include a minor.

Consideration for admission into the Community and Regional Planning professional program takes place either through review of the performance in the College of Design’s first year CORE design program, or through transfer from another curriculum or accredited institution. If applying through the CORE program, admission is based upon a student’s cumulative GPA for all courses earned during the first year, portfolio work submitted upon completion of the CORE courses, and an essay submission. In either case, predictors of success in the program include the quality of prior work and interest in the field. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking. Students entering the CRP professional program from outside the College of Design should provide a similar portfolio of their work for evaluation.

Students are required to present this portfolio

upon admission and prior to registration for

classes. Arrangements for this process must

be made with department advisers.

Curriculum in Graphic Design

Administered by the Department of Art and
Design and leading to a 123.5 credit under-
graduate Bachelor of Fine Arts in Graphic Design including a 29.5 credit pre-professional program (the college core).

Consideration for admission into the graphic
design is based on department resources; GPA earned in the College Core courses and the freshman year; as well as portfolio, all of which are submitted at the end of the freshman year.

On admission to the program, the faculty
strongly recommend the purchase of a laptop
computer and software. Specifications for the laptop computer and software are available at www.design.iastate.edu under the “Students” link.

Transfer students with studio credits from oth-
er programs, colleges, and universities must

present for departmental review a portfolio of

work done in those courses in order to have

the credits apply toward studio requirements.

Students are required to present this portfolio

upon admission and prior to registration for

classes. Arrangements for this process must

be made with department advisers.

Curriculum in Integrated Studio Arts—B.F.A.

Administered by the Department of Art and Design and leading to a 120.5 credit undergraduate Bachelor of Fine Arts in Integrated Studio Arts including a 29.5 credit pre-professional program (the college core).

Consideration for admission into the Integrated Studio Arts program is based upon departmental resources; GPA earned in the College Core courses and in the freshman year; as well as a portfolio, all of which are submitted at the end of the freshman year.

Transfer students with studio credits from oth-
er programs, colleges, and universities must

present for departmental review a portfolio of

work done in those courses in order to have

the credits apply toward studio requirements.

Students are required to present this portfolio

upon admission and prior to registration for

classes. Arrangements for this process must

be made with department advisers.

On admission to the program, if the student wishes to pursue studies in digital media and or photography, the faculty strongly recom-
mend the purchase of a laptop computer

and software. Specifications for the laptop
computer and software are available at www.
design.iastate.edu under the “Students” link.

Design 75
Curriculum in Interior Design

Administered by the Department of Art and Design and leading to a 1275 credit undergraduate Bachelor of Fine Arts in Interior Design including a 29.5 credit pre-professional program (the college core).

Consideration for admission in the Interior Design program is based upon departmental resources; GPA earned in the College Core and the freshman year, as well as a portfolio, all of which are submitted at the end of the freshman year.

A 34 graduate credit program leading to the master of arts, for students planning to undertake professional or design research orientated pursuits (NOTE: Applicants without a previous undergraduate degree in interior design may be required to complete up to 40 additional credits of deficiency work).

A 60 graduate credit post-professional graduate program leading to the degree master of fine arts.

For more complete graduate program descriptions see Graduate Study under Interior Design in the Courses and Programs section.

Consideration for admission into the undergraduate Interior Design curriculum requires completion of 29.5 credit freshman design core program, including the following courses: Dsn S 102, Dsn S 131, Dsn S 183, 6 credits of Social Science/Humanities, 6 credits of Math/Science, English 150 or 250 and Library 160. Admission is based on department resources and will be determined by a formal review at the end of the freshman foundation year.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are advised to present portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Curriculum in Landscape Architecture

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five-year curriculum, requiring 149.5 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year pre-professional program of 29.5 credits and a four-year professional program of 120 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the pre-professional program. Applicants are reviewed on the basis of scholastic performance, a portfolio of original work, and a written essay.

The BLA from Iowa State University is an LAAB (Landscape Architectural Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional licensure. The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first professional degree programs in landscape architecture at the Bachelor’s and Master’s levels.

The department also offers a 36 credit graduate program leading to the degree Master of Landscape Architecture. For more complete graduate program descriptions, see Graduate Study under Landscape Architecture in the Courses and Programs section.

Aligning Education in Engineering with the University Mission

The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students’ critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Each program is guided by the criteria developed by ABET, a non-governmental organization of peer reviewers which assures the quality of post secondary engineering education. The outcomes and objectives of the accredited engineering programs can be found in the Courses and Programs section of the catalog.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Concurrent Graduate/Undergraduate Programs

Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are: agricultural engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, and materials engineering.

Programs offering concurrent bachelor of science/master of business administration degrees are: civil engineering, computer engineering, electrical engineering, industrial engineering, and materials engineering.

For more information, refer to the graduate study sections for each engineering program.

Advanced work in engineering is offered in the post-graduate programs. See the Graduate College section of this catalog.

Joint Undergraduate Programs

A bachelor of science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences. This program is jointly administered by the Department of Electrical and Computer Engineering and the Department of Computer Science.

Accreditation

Ten curricula in the College of Engineering are accredited by ABET. Two newer curricula will pursue accreditation. Accreditation status is indicated in the Courses and Programs section for each engineering curricula. For more information on accreditation practices contact:

Engineering Accreditation Commission
ABET
111 Market Place, Suite 1050
Baltimore, MD 21202-4012
Phone: 410-347-7700
http://www.abet.org

Organization of Curricula

All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students should complete the requirements of the basic program before proceeding to a professional program.

Preparation for the Engineering Curricula

In addition to the standard university admission requirements, the college also requires 2 years of a foreign language. Other high school credits particularly important to students wishing to study engineering include: 2 years of algebra, 1 year of geometry, and 1/2 year of trigonometry and 1/2 year of pre-calculus; 1 year each of chemistry, biology, and physics; 3 years of social science, and 4 years of English. See Index for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Basic Program for Professional Engineering Curricula

The first year program is much the same for all professional curricula in the College of Engineering. Students normally enroll in the majority of the basic program courses during their first year. The basic program is a set of courses common to all engineering curricula. Since students may also begin curriculum designated requirements during their first year, they will want to select a curriculum as soon as possible. This will enable them to receive the bachelor’s degree in a minimum time.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing either Math 141 or 142 before enrolling in Math 166 or CE 160.
The Department of English may recommend placement in one or more sections of Engl 101 if the placement test administered to students whose first language is not English indicates a deficiency in reading or writing. Satisfactory completion of the recommended course(s) will be required of students in the College of Engineering.

**Basic Program**

Students without a strong high school chemistry background may opt to take a two course sequence of Chem 155 (3 cr.) and Chem 165 (4 cr.) to meet the Chem 167 (4 cr.) requirement.

English 250 is normally taken in the second year. However, students who advance place into this course may be able to enroll during their first year. Credit for English 150 is earned upon successful completion of English 250. In addition to the basic program courses listed above, curriculum designated courses normally taken the first year of each engineering curriculum are listed below.

**Curriculum Designated Requirements**

- **Aerospace Engineering**—Aer E 160**, Aer E 161 (4 cr.), Aer E 192 (R), GenEd Electives (3 cr)
- **Agricultural Engineering**—Chem 167L (1 cr.), A E 110 (1 cr.), Engr 170 (3 cr.), SSH Elective (3 cr)
- **Biological Systems Engineering**—Chem 167L (1 cr.), BSE 110 (1 cr.), Engr 170 (3 cr.), SSH Elective (3 cr)
- **Chemical Engineering**—Chem 177*, 177L (1 cr.), 179 (3 cr.), 178L (1 cr.), SSH Elective (3 cr)
- **Civil Engineering**—Chem 167L (1 cr.) or Chem 177L (1 cr.), C E 105 (1 cr.), C E 160**, C E 170 (2 cr.), C E 111 (3 cr), SSH Elective (3 cr)
- **Computer Engineering**—Cpr E 185**, Cpr S 227 (4 cr.), Cpr E 166 (R cr.), Gen Ed Elective (3 cr)
- **Construction Engineering**—Con E 121 (1 cr.), 122 (1 cr.), Psychology Elective – Psych 101, 230, or 280 (3 cr.), Engr 170 (3 cr.), SSH Elective (3 cr)
- **Electrical Engineering**—E E 165** (3 cr.), Com S 207 (3 cr.) or 227 (4 cr.), E E 166 (R cr.), Gen Ed Elective (3 cr)
- **Industrial Engineering**—I E 101 (R cr.), I E 148** (3 cr.), SSH Elective (6 cr)
- **Materials Engineering**—Chem 177*, 177L (1 cr.), 178 (3 cr.), 178L (1 cr.), Engr 170 (3 cr.), Gen Ed Elective (3 cr.), (Physics 221 scheduled in sophomore year)
- **Mechanical Engineering**—Chem 167L (1 cr.), Engr 170 (3 cr.), M E 102 (R cr.), Gen Ed Elective (3 cr)
- **Software Engineering**—S E 185**, S E 166 (R cr.), Com S 227 (4 cr.), 228 (3 cr)

The student’s adviser may require or recommend courses in addition to those specified above if the preparation and progress of the student are such that additional courses are necessary or desirable.

* Students planning to enroll in C E*, Ch E, or Mat E will find Chem 177 to be a better preparation for Chem 178. However, Chem 167 is accepted as a substitute for 177 for those students declaring one of these curricula after having completed 167. The Chem 155-165 sequence is an acceptable substitute for Chem 167.

**Recommended choices by program:**

- **Aer E:** Aer E 160 (3 cr.)
- **C E:** C E 160 (3 cr.)
- **C pr E:** Cpr E 185 (3 cr.)
- **E E:** E E 185 (3 cr.)
- **I E:** I E 148 (3 cr.)
- **S E:** S E 185 (3 cr.)

Credit hours for graduation will be given for any one of Aer E 160, C E 160, Engr 160, I E 148, Cpr E 185, E E 185, or S E 185 without increasing a curriculum’s minimum number of credits required for graduation.

***Students enrolled in the joint software engineering degree program will take S E 101.***

Students in the general emphasis in C E have two chemistry/physics sequence options. The environmental emphasis requires Option 1.

**Option 1—Chem 177, 177L, 178, 178L, and Phys 221.**

**Option 2—Chem 167, 167L, or Chem 177, 177L; and Phys 221 and 222. Students who opt for Phys 222 rather than Chem 178, 178L will increase the total number of credits required by 1.**

**Requirement for Entry into Professional Program**

Students enrolled in the College of Engineering must satisfy both of the following requirements before enrolling in the professional courses (200-level and above) offered by departments in the Engineering College:

1. Completion of the basic program with a grade point average of 2.00 or better for all courses taken at Iowa State University.

2. A cumulative grade point average of 2.00 or better for all courses taken at Iowa State University.

In order to graduate in a professional engineering curriculum, students must have a minimum GPA of 2.00 in a department-designated group of 200-level and above courses known as the Core. These courses will total no fewer than 24 nor more than 48 semester credits.

**Engineering Minors**

The College of Engineering offers three undergraduate minors which are open only to students in the College of Engineering. These are minors in bioengineering, nondestructive evaluation, and nuclear engineering. These minors must include at least nine credits which are beyond the total used to meet curriculum requirements.

The bioengineering minor is a 15 credit interdisciplinary program that complements a student’s major discipline by providing additional insight into the interactions between various engineering disciplines and biological systems. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Bioengineering in Courses and Programs.

The nondestructive evaluation minor is a 16 credit minor open only to engineering students who have met the basic program requirements and are not on academic warning or probation. The minor is supervised by an interdisciplinary faculty committee. For minor course requirements, refer to Aerospace Engineering in Courses and Programs for minor course requirements.

The nuclear engineering minor is a 15 credit minor which enables engineering students to acquire a basic and fundamental knowledge of nuclear sciences and engineering. Courses are provided at Iowa State University and also through an inter-institutional distance education program offered through the Web by four of the Big 12 Engineering Consortium Schools. For minor course requirements, refer to Nuclear Engineering in Courses and Programs.

**Minor for Non-Engineers**

The College of Engineering also offers an undergraduate minor in engineering studies which is open only to students outside of the College of Engineering.

The engineering studies minor is a 21 credit interdepartmental minor. A student’s minor program in engineering studies must include at least nine credits which are beyond the total used to meet minimum degree requirements. The minor is supervised by an interdepartmental faculty committee. Refer to Engineering Studies in Courses and Programs for minor course requirements.
Undergraduate Majors and Minors Outside the College of Engineering

In addition to the engineering degree program, students may earn majors or minors in other colleges of the university. A major or minor program must meet all requirements of the offering department or program and its college and contain credits beyond the requirements for a B.S. degree in engineering. A minimum of 15 additional credits is required for each major area of study and an additional 9 credits for each minor.

Advising System

The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic programs and to maintain close contact with students during their college careers.

The college offers an orientation program during the spring and summer for students planning to enter in the fall, and during the fall for students planning to enter in the spring. All entering students are encouraged to attend an orientation session. Placement assessments given during the orientation program help determine the student’s level of achievement and enable the adviser to prepare an appropriate program for the student.

Special Programs

All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will enrich the standard academic experience. Engineering students are also encouraged to take advantage of study abroad opportunities available through the College of Engineering's International Programs Office.

a. Cooperative Education Program. The College of Engineering offers, through its curricula, a cooperative education program. Enrollment in the program allows students to gain practical experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional year to complete curriculum requirements.

These programs are arranged so that the student alternates academic work with employment periods. The student has the opportunity to assess career paths within her/his chosen curriculum and the employer evaluates the student's potential as a future full-time employee. Both domestic and international co-op programs are available.

Cooperative education students pay no fees to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (298, 398, or 498) for each work period and are considered full time students while enrolled in these courses. For additional information contact your academic adviser and the Office of Engineering Career Services.

b. Internship Program. Internships are a mechanism by which a student may work full-time for one semester per academic year while maintaining her/his status as a full-time student.

Internship students pay no fees to the university during their work periods and do not receive credit hours for their work experience. Students who register for the internship course (397) for a fall or spring semester work period or (396) for the summer term are considered to be full time students.

For additional information contact your academic adviser and the Office of Engineering Career Services.

c. Honors Program. The College of Engineering participates in the University Honors Program (see Index). The honors program is designed for students with above average ability who wish to individualize their programs of study. For further details consult the chair of the Engineering College Honors Program Committee or your departmental honors program adviser.

d. Engineering International Programs. In a world where the sun never sets, engineers must be prepared to understand other cultures and other ways of doing business. Engineers must expand their exportable skills, language and cross-cultural skills.

Engineering International Programs (EIP) has formed worldwide partnerships to create opportunities for students to work and study with leading universities in other countries and multinational corporations. With careful planning, students may earn credit in courses that fulfill their degree requirements. To learn more about work and study with leading universities in other countries and multinational corporations, visit the EIP home page at www.eng.iastate.edu/intl-progs/.

e. Engineering Leadership Program. Started in the Fall Semester of 2006, the Engineering Leadership Program (ELP) was developed to address the growing need for leaders trained in technology. Initial funding for the program was provided by 3M Company with additional funding from other corporate and private sources. Students selected into the ELP have opportunities to interface with engineers and company leadership of the donating companies. Mentored by a faculty and a peer mentor, each student receives individual direction and insight on academics, leadership opportunities, career paths and life skills. They are encouraged to develop their individual leadership styles and leadership competencies, while interacting with industry, government, faculty and student leaders. Incoming freshmen may apply the spring prior to their first fall semester at Iowa State University. Current Iowa State students may apply to be upper-level scholars each spring. Visit the ELP website at: http://www.eng.iastate.edu/leadership/.

Curriculum in Aerospace Engineering

Leading to the degree bachelor of science.

Total credits required: 126.5. See also Basic Program and Special Programs.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communication Proficiency and Library requirements: Engl 150 and Engl 250 with minimum grade of C; Lib 160. Department approval. (See Basic Program for credit requirements.)

General Education Electives: 15.0 cr

Complete 15 cr. including a series. A series of at least two courses must be taken to fulfill this requirement.

Basic Program: 26.5 cr

Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Aer E 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr. and Phys 221, 5 cr. (See Basic Program rule.

Math and Physical Science: 13 cr.

Math 265, 4 cr.; Math 267, 4 cr.; Phys 222, 5 cr.

Aerospace Engineering Core: 48 cr.

Aer E 243, 3 cr. and Aer E 243L, 0.5 cr.; Aer E 261, 4 cr.; Aer E 311, 3 cr. and Aer E 311L, 0.5 cr.; Aer E 321, 3 cr.; Aer E 331, 3 cr.; Aer E 343, 3 cr. and Aer E 343L, 1 cr.; Aer E 351, 3 cr.; Aer E 355, 3 cr.; Aer E 411, 3 cr.; Aer E 421, 3 cr.; Aer E 461, 3 cr.; Aer E 461, 3 cr.; Aer E 462, 3 cr.; E M 324, 3 cr.; M E 330, 3 cr.

Other Remaining Courses: 24 cr.

E M 274, 3 cr.; E M 345, 3 cr.; Mat E 272, 2 cr.; Aer E 161, 4 cr. Complete 3 cr., from Aer E 412, 3 cr.; Aer E 422, 3 cr.; Aer E 423, 3 cr.; Aer E 426, 3 cr.; Aer E 432, 3 cr.; Aer E 442, 3 cr.; Aer E 446, 3 cr.; Aer E 451, 3 cr. or Aer E 464. Technical Electives, 3 cr. and Career Electives, 6 cr. selected from preceding Aer E list or departmental-approved 300-level or above courses relevant to technical and career areas.

Seminar/Co-op/Internships:

Aer E 192, R cr.; Aer E 291, R cr.; Aer E 292, R cr.; Aer E 391, R cr.; Aer E 392, R cr.; Aer E 491, R cr. and Aer E 492, R cr.

1 These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program.

2 U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

3 Choose from department approved list.

4 See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

4.00 required including transfer courses.
Curriculum in Agricultural Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required: 127.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr. ¹
U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirement: Engl 150 and Engl 250 with a minimum grade of C; Lib 160. (See Basic Program for credits.) Complete one course from AgEds 311, Engl 309, Engl 314 or Sp Cm 212.

Social Sciences and Humanities: 12 cr. ²
Complete 3 cr. from international perspectives and 3 cr. from U.S. diversity university-approved list. Complete additional 6 cr. Social Sciences and Humanities courses.

Basic Program: 26.5 cr. ³

Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.; Lib 160, 0.5 cr.; Math 168, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 9 cr.
Chem 167L, 1 cr. or Chem 177L, 1 cr.; Phys 222, 5 cr.; and Stat 305, 3 cr.

Ag Engineering Core: 24 cr. ³
A E 216, 3 cr.; A E 316, 3 cr.; A E 363, 4 cr.; A E 415, 2 cr.; A E 416, 2 cr.; E M 274, 3 cr.; E M 324, 3 cr.; E M 327, 1 cr.; Math 266, 3 cr.

Other Remaining Courses: 16 cr.
A E 110, 1 cr.; A E 201, 1 cr.; A E 301, 1 cr.; A E 401, 1 cr.; A E 404, 3 cr.; Engr 170, 3 cr.; M E 330, 3 cr. Complete one course (3 cr.) from AgEds 311, Engl 309, Engl 314 or Sp Cm 212.

Select remaining courses from one of the following options:

Agricultural and Environmental Systems Engineering Option: 40 cr.
A E 271, 1 cr. or A E 272, 1 cr.; A E 431, 3 cr.; A E 431, 3 cr.; A E 472, 3 cr.; Biol 211, 3 cr.; C E 332, 3 cr.; C E 372, 4 cr.; E M 378, 3 cr.
Complete one course (3 cr.) from A E 340, A E 478, or BSE 480. Complete 3 cr. from Biological and Natural Resource Sciences list. ²

Power and Machinery Engineering Option: 40 cr.
A E 271, 1 cr. or A E 272, 1 cr.; A E 340, 3 cr.; A E 342, 3 cr.; A E 413, 3 cr.; Agron 154, 3 cr.; Biol 211, 3 cr.; E M 345, 3 cr.; E M 378, 3 cr.; M E 324, 4 cr.; M E 325, 3 cr.; Mat E 272, 2 cr.
Complete one course (3 cr.) from A E 431, A E 469, A E 472 or 478, or A E 480. Complete six credits of electives. ²

Co-op/Internships (Optional) ¹

Curriculum in Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required: 127.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr. ¹
U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirement: Engl 150 and Engl 250 with a minimum grade of C; Lib 160. (See Basic Program for credits.) Complete one course from AgEds 311, C E 203, Engl 309, or Sp Cm 212.

Social Sciences and Humanities: 12 cr. ²
Complete 3 cr. from international perspectives and 3 cr. from U.S. diversity university-approved list. Complete additional 6 cr. Social Sciences and Humanities courses.

Basic Program: 26.5 cr. ³

Complete with 2.00 GPA including transfer courses: Chem 167, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Biological, Math and Physical Science: 20 cr.
Biol 212, 3 cr.; Chem 167L, 1 cr.; Math 267, 4 cr.; Phys 222, 5 cr.; and Micro 302L, 1 cr., Stat 305, 3 cr.

Biological Systems Engineering Core: 26 cr.
A E 316, 3 cr.; A E 403, 4 cr.; A E 404, 3 cr.; BSE 201, 1 cr.; BSE 216, 3 cr.; BSE 301, 1 cr.; BSE 380, 3 cr.; BSE 401, 1 cr.; BSE 415, 2 cr.; BSE 416, 2 cr.; BSE 480, 3 cr.

Other Remaining Courses: 23 cr.
BSE 110, 1 cr.; Ch E 356, 3 cr.; Ch E 357, 3 cr.; Engr 170, 3 cr.; E M 274, 3 cr.; E M 324, 3 cr.; E M 327, 1 cr.; E M 330, 3 cr. Complete one course (3 cr.) from AgEds 311, C E 203, Engl 309, or Sp Cm 212.

Complete remaining courses from one of the following options:

Biorenewable Resources Engineering Option: 20 cr.
A E 388, 3 cr.; BSE 403, 3 cr.; Chem 331, 3 cr.; Chem 331L, 2 cr.; Chem 332, 3 cr. Complete 6 credits for option electives. ²

Bioenvironmental Engineering Option: 20 cr.
A E 431, 3 cr.; C E 326, 3 cr.; Chem 211, 2 cr.; Chem 211L, 1 cr.; Chem 231, 3 cr.; Chem 231L, 1 cr. Complete 3 cr. from A E 436, C E 421, C E 428, or EnSci 381. Complete 3 credits for remaining option elective. ²

Food Engineering Option: 20 cr.
A E 451, 3 cr.; BSE 469, 3 cr.; Chem 231, 3 cr.;
FSHN 311, 4 cr.; FSHN 420, 3 cr.; FSHN 471, 3 cr. Select 1 credit to complete option elective.

Pre-Professional and Pre-Graduate Option: 19-20 cr.
Chem 331, 3 cr.; Chem 331L, 1 cr.; Chem 332, 3 cr.; Chem 332L, 1 cr. Complete 3 credits from A E 406 or BSE 403. Complete 8 to 9 credits for remaining option electives. ²

Co-op/Internships (Optional) ¹

These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

Curriculum in Chemical Engineering

Administered by the Department of Chemical and Biological Engineering.

Leading to the degree bachelor of science.

Total credits required: 125.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr. ¹
U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirement: Engl 150 and Engl 250; Lib 160. (See Basic Program for credits.) Complete one course from Eng 309, 3 cr.; Eng 314, 3 cr.; or JL MC 347, 3 cr.

Social Sciences and Humanities: 15 cr.
Complete a total of 15 cr. with at least 6 cr. but not more than 9 cr. from the same department.

Basic Program: 26.5 cr. ³

Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 260, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 30 cr.
Math 265, 4 cr.; Math 267, 4 cr.; Phys 222, 5 cr.; Chem 167L, 1 cr. or Chem 177L, 1 cr.; Chem 178, 3 cr.; Chem 178L, 1 cr.; Chem 325, 3 cr.; Chem 331, 3 cr.; Chem 332, 3 cr.; BBMB 301, 3 cr.

Chemical Engineering Core: 33 cr.
Ch E 210, 3 cr.; Ch E 302, 1 cr.; Ch E 310, 3 cr.; Ch E 325, 2 cr.; Ch E 356, 3 cr.; Ch E 357, 3 cr.; Ch E 358, 3 cr.; Ch E 381, 3 cr.; Ch E 382, 3 cr.; Ch E 421, 3 cr.; Ch E 426, 2 cr.; Ch E 430, 4 cr.

Other Remaining Courses: 21 cr.
Complete one course from Eng 309, 3 cr.; Eng 314, 3 cr.; or JL MC 347, 3 cr.
Complete 3 cr. from Chemistry Electives list. ²
Complete 3 cr. from Statistical Electives list. ²
Complete 3 cr. from Chemical Engineering
Electives list. Complete 3 cr. from any 300+ level course in engineering. Complete 6 cr. from Professional Electives list.

**Biological Engineering Option**

The standard Chemical Engineering program may be modified to meet the option requirements for Biological Engineering:

- **Math and Physical Science** – BBMB 404 or Biol 313, 3 cr., may be substituted for BBMB 301 from list above.
- **Chemical Engineering Core** – Replace Ch E 426, 2 cr. with Ch E 427, 2 cr. in required Core.
- **Other Remaining Courses**:
  - Chemistry Electives, 3 cr. – BBMB 405 (prerequisite 404), BBMB 420 (prerequisite 301), or Biol 314.
  - Chemical Engineering Electives, 3 cr. – Ch E 415, Ch E 440, Ch E 542 or Ch E 562.
- **Engineering Electives**, 3 cr. – A E 373, A E 480, BRT 501, C E 421, or MSE 580.
- **Professional Electives**, 6 cr. – Ch E 415, Ch E 440, Ch E 542, Ch E 562, or Ch E 490; and one course from 300-level, or above, life sciences (not BBMB 301), 300- or above level course in Chem, FS HN or BBMB.

**Co-op/Internships: Optional**

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
2. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
3. Choose from department approved list.
4. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

---

**Curriculum in Civil Engineering (General)**

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

**Total credits required:** 131.5. See also Basic Program and Special Programs.

**International Perspectives:** 3 cr.

**U.S. Diversity:** 3 cr.

**Communication Proficiency/Library requirement:** Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.)

**Social Sciences and Humanities:** 12 cr.

Complete 12 cr. with 6 cr. at 200-level or above.

**Basic Program:** 26.5 cr.

- Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; C E 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

**Math and Physical Science:** 17 cr. (18 cr.)

- **C E Engineering Core:** 30 cr.
  - E M 274, 3 cr.; E M 324, 3 cr.; E M 345, 3 cr.; E M 378, 3 cr. C E 305, 3 cr.; C E 326, 3 cr.; C E 332, 3 cr.; C E 355, 2 cr.; C E 360, 3 cr.; and C E 372, 4 cr.
- **Other Remaining Courses:** 45 cr.

- **Seminar/Co-op/Internships:** R cr. C E 403, R. cr.

- **Co-op/Internship optional.**

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
2. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
3. Choose from department approved list.
4. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

---

**Curriculum in Civil Engineering with Environmental Option**

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

**Total credits required:** 126.5. See also Basic Program and Special Programs.

**International Perspectives:** 3 cr.

**U.S. Diversity:** 3 cr.

**Communication Proficiency/Library requirement:** Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.)

**Social Sciences and Humanities:** 12 cr.

Complete 12 cr. with 6 cr. at 200-level or above.

**Basic Program:** 26.5 cr.

Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Cpr E 185, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. (minimum grade of C) and Math 166, 4 cr. (minimum grade of C); and Phys 221, 5 cr. (See Basic Program rule.)
Math and Physical Sciences: 20 cr.
Com S 227, 4 cr. (minimum grade of C) and Com S 228, 3 cr. (minimum grade of C); Math 265, 4 cr.; Math 267, 4 cr.; and Phys 222, 5 cr.

Computer Engineering Core: 33 cr.4
Cpr E 281, 4 cr.; Cpr E 288, 4 cr.; Cpr E 308, 4 cr.; Cpr E 310, 3 cr.; Cpr E 381, 4 cr.; Com S 309, 3 cr.; Com S 311, 3 cr.; E E 201, 4 cr.; and E E 230, 4 cr.

Other Remaining Courses: 32 cr.
Cpr E 491, 3 cr. and Cpr E 492, 2 cr. Engl 314, 3 cr. or Engl 309, 3 cr. with a minimum grade of C. Complete 3 cr. of Computer Science courses, 6 cr. of Computer Engineering, 9 cr. of Technical Electives, and 3 cr. of Electrical Engineering courses.5 Stat 330, 3 cr.

Seminar/Co-op/Internships:
Cpr E 166, R cr. Cpr E 294, R cr., Cpr E 394, R cr. and Cpr E 494, R cr.

Co-op or internship is optional.
Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements
The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include Cpr E 491, Senior Design Project I and Professionalism, Cpr E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2Choose from department approved lists.
3See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
42.00 required including transfer courses

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Curriculum in Construction Engineering
Administered by the Department of Civil, Construction, and Environmental Engineering. Leading to the degree bachelor of science.

Total credits required: Building Option -123.5, Heavy Option - 123.5, Electrical - 126.5, Mechanical - 126.5 cr.
See also Basic Program and Special Programs.

International Perspectives: 3 cr.

Communication Proficiency/Library requirements: Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.) Business Communication Elective: one course from Engl 302, Engl 309 or Engl 314 with a minimum grade of C.

Social Sciences and Humanities: 12 cr.
Complete one of Psych 101, Psych 230, Psych 250, or Psych 280. Complete either Econ 101 or Econ 102. Complete 3 cr. from international perspectives and 3 cr. from U.S. diversity approved list.

Basic Program: 26.5 cr.4
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; C E 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 11 cr. (B, H); 12 cr. (E, M).
Stat 105, 3 cr.; Math 266, 3 cr. (B, H); Math 267, 4 cr. (E, M); Phys 222, 5 cr.

Construction Engineering Core: 24 cr. (B, H, E); 25 cr. (M).5
E M 274, 3 cr.; E M 324, 3 cr.; Con E 421, 3 cr.; E M 378, 3 cr.; C E 332, 3 cr.; (See options for remaining option Core courses.)

Additional Required Courses: 35 cr. (B, H), 36 cr. (E, M)
Con E 121, 1 cr.; Con E 122, 1 cr.; C E 170, 2 cr.; C E 111, 3 cr.; Acct 284, 3 cr.; Con E 221, 4 cr.; Con E 241, 3 cr.; Con E 251, 1 cr. Complete one 3 cr. Law Elective.6; Con E 441, 3 cr.; Con E 487, 2 cr. and Con E 488, 3 cr.; Complete one 3 cr. Business Communication Elective from Engl 302, 309, or 314. Complete one course from Math or Stat Elective, 3 cr. (B, H); 4 cr. (E, M)2
Select remaining courses from one of the following options:

Building Option:
Remaining Core courses (9 cr.)
C E 360, 3 cr.; Con E 322, 3 cr.; Con E 340, 3 cr.

Remaining option courses – 15 cr.
C E 335, 3 cr.; C E 334, 3 cr.; C E 383, 1 cr.; Con E 352, 3 cr.; Con E 353, 2 cr.; E M 327, 1 cr.; Complete 2 cr. from Engineering Topics Electives.2

Heavy Option:
Remaining Core courses (9 cr.)
C E 360, 3 cr.; Con E 322, 3 cr.; and Con E 340, 3 cr.

Remaining option courses – 15 cr.

Curriculum in Electrical Engineering
Administered by the Department of Electrical and Computer Engineering. Leading to the degree bachelor of science.

Total credits required: 126.5. See also Basic Program and Special Programs.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communication Proficiency/Library requirement: Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.) Engl 314 or Engl 309 with a minimum grade of C.

General Education Electives: 15 cr.2 Complete minimum of 6 cr. from Approved General Education Component at 300 or higher level. Complete additional 9 cr. from Approved General Education Component.

Basic Program: 26.5 cr.4
Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; C E 165, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. (minimum grade of C) and Math 166, 4 cr. (minimum grade of C); and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 16 cr.
Com S 207, 3 cr. or Com S 227, 4 cr. (minimum grade of C); Math 265, 4 cr.; Math 267, 4 cr.; and Phys 222, 5 cr.

1 These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2 Choose from department approved list.
3 See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4 2.00 required including transfer courses
Curriculum in Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering. Leading to the degree bachelor of science. Total credits required: 120.5 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirements:
Engl 150 and Engl 250 with minimum grade of C; Lib 160.

Remaining Communication courses: 6 cr. Engl 314, 3 cr.; Sp Cm 212, 3 cr.

Social Sciences and Humanities: 12 cr.²

Six of twelve credits must be from 200-level or above courses. Six credits must be sequential or related courses.

Basic Program: 26.5 cr.⁴

Chem 167, 4 cr.;¹ Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements), Engr 101, R cr.; I E 148, 3 cr.³, Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science: 17 cr.
Math 265, 4 cr.; Math 267, 4 cr.; Phys 222, 5 cr.; Stat 231, 4 cr.

Industrial Engineering Core: 31 cr.
I E 248, 3 cr.; I E 271, 3 cr.; I E 305, 3 cr.; I E 312, 3 cr.; I E 413, 4 cr.; I E 341, 3 cr.; I E 348, 3 cr.; I E 361, 3 cr.; I E 441, 3 cr.; I E 448, 3 cr.

Other Remaining Courses: 28 cr.
Mat E 272, 2 cr.; E M 274, 3 cr.; E E 442, 2 cr.; M E 330, 3 cr.; Focus Electives, 6 cr.²; Management Electives, 6 cr.²; and Engineering Topic Electives, 6 cr.²

Seminar/Co-op/Internships:
I E 101, R cr. Optional co-op/internship courses.

1 These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2 Choose from department approved lists.

³ See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

² 2.00 required including transfer courses.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Curriculum in Materials Engineering

Administered by the Department of Materials Science and Engineering. Leading to the degree bachelor of science. Total credits required: 1275 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:
Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.) Complete one course from Engl 302, 309, 314 or JL MC 347 with a minimum grade of C.

General Education Electives: 15 cr.
Complete 12 cr. from approved list with a minimum of 6 cr. but no more than 9 cr. from one designator, and a maximum of 9 cr. of 100-level courses. Complete one course from Engl 302, 309, 314 or JL MC 347.²

Basic Program: 26.5 cr.⁴

Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule.)

Math and Physical Science 18 cr.
Complete Chem 177L, 1 cr.; Chem 178, 3 cr. and Chem 178L, 1 cr.; Math 265, 4 cr.; Math 267, 4 cr.; and Phys 222, 5 cr.

Materials Engineering Core: 32 cr.⁴
Mat E 201, R cr.; Mat E 214, 3 cr.; Mat E 215, 3 cr.; Mat E 215L, 1 cr.; Mat E 216, 4 cr.; Mat E 311, 3 cr.; Mat E 314, 3 cr.; Mat E 316, 3 cr.; Mat E 317, 3 cr.; Mat E 413, 3 cr.; Mat E 414, 3 cr.; Mat E 418, 3 cr.

Other Courses: 12 cr.
Engr 170, 3 cr.; E M 274, 3 cr.; E M 324, 3 cr.; Complete 3 cr. from non-remedial courses.

Seminar/Co-op/Internships
Co-op and internships are optional.

Option Requirements: 18 cr.
Students must choose two from the four areas of specialization: ceramic, electronic, metallic and polymeric materials. In lieu of the second specialty from the four listed, a student may propose an individually designed, materials related technical specialty to meet specific career goals. Students must have a 3.00 gpa and a B+ in Mat E 215. Students may learn other requirements and procedures for applying in the Undergraduate Handbook or by speaking with their adviser. The options below meet that expectation by using the following specialization courses:

Ceramic Materials: 321, 322, 425
Electronic Materials: 334, 332, 433
Metallic Materials: 342, 443, 444
Polymeric Materials: 351, 453, 454

Technical Electives: 6 cr.
Complete 6 cr. technical electives from approved departments.²
These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

Choose from department approved list.

See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

2.00 required including transfer courses.

Note: A Mat E student may take up to 9 credit hours from General Education and free electives on a P/NP basis, except for courses used to meet the diversity and international perspectives requirement. S/F courses (different from P/NP) will be considered for these requirements on a course-by-course basis.

Curriculum in Mechanical Engineering

Leading to the degree bachelor of science.

Total credits required: 128.5 cr.

See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.)

Remaining Communication Courses: 3 cr.

Engl 314, 3 cr.

General Education Electives: 15 cr.

Econ 101, 3 cr. or Econ 102, 3 cr.

Complete 3 additional credits of Social Science Electives.²

Complete 6 cr. of Humanities Electives.²

Complete 3 additional General Education credits.²

Basic Program: 26.5 cr.⁴

Complete with 2.00 GPA including transfer courses: Chem 167 or Chem 177, 4 cr.; Engl 150, 3 cr. and Engl 250, 3 cr. (see above for grade requirements); Engr 101, R cr.; Engr 160, 3 cr.; Lib 160, 0.5 cr.; Math 165, 4 cr. and Math 166, 4 cr.; and Phys 221, 5 cr. (See Basic Program rule)

Math and Physical Science: 20 cr.

Engr 170, 3 cr.; Chem 167L, 1 cr. or Chem 177L, 1 cr.; Math 265, 4 cr.; Math 271, 4 cr. or Math 268, 3 cr. with Math 268, 1 cr.; Phys 222, 5 cr.; Stat 305, 3 cr.

Mechanical Engineering Core: 46 cr.⁴

E M 274, 3 cr.; E M 324, 3 cr.; E M 345, 3 cr.; E E 442, 2 cr.; E E 448, 2 cr.; M E 270, 3 cr.; M E 231, 3 cr.; M E 324, 4 cr.; M E 326, 3 cr.; M E 332, 3 cr.; M E 335, 4 cr.; M E 370, 3 cr.; M E 421, 3 cr.; M E 436, 4 cr.; Mat E 272, 2 cr.

Other Remaining Courses: 18 cr.

Complete one course from M E 415, 3 cr.; M E 442, 3 cr. or M E 486, 3 cr. Complete 15 cr. Technical Electives.²

Seminar/Co-op/Internships:

M E 102, R cr.; M E 202, R cr. Co-op/Internship Optional

These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

Choose from department approved list.

See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

2.00 GPA average required including transfer courses.

Transfer Credit Requirements - The Mechanical Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program. The degree program must include a minimum of 15 credits taken from courses offered through the Mechanical Engineering Department at Iowa State University. Of these 15 credits, three must be from one of the senior capstone design courses. The remaining 12 credits may be from the core curriculum program (if a student is deficient in these courses) or from 400-level ME technical electives. No more than 3 credits of ME 490 (independent study) shall be applied to meet the 12 credit requirement.

Curriculum in Software Engineering

Administered by the Department of Electrical and Computer Engineering and the Department of Computer Science in the College of Liberal Arts and Sciences.

Leading to the degree bachelor of science.

Total credits required: 124.5 cr.

See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

Engl 150 and Engl 250 with minimum grade of C; Lib 160. (See Basic Program for credit requirements.) Engl 314 with a minimum grade of C. Complete either Econ 101, 3 cr.; Econ 102, 3 cr. or I E 305, 3 cr. and Stat 330, 3 cr.

Complete 6 cr. from Math Electives list.²

Complete 6 cr. from Software Engineering course list.²

Complete 3 cr. from Technical Electives list.²

Complete 12 cr. from list of Supplementary Electives.²

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in software engineering. These 30 credits must include S E 491 Senior Design Project I and Professionalism, S E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The software engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

Choose from department approved lists.

See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

International Perspectives and U.S. diversity courses are used to meet the general education electives.

Math and Physical Science: 20 cr.

Engr 81, 4 cr. or Cpr E 81, 4 cr.

International Perspectives and U.S. diversity courses are applied to the degree program. The degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.
College of Human Sciences

Pamela White, Interim Dean
Carla Peterson, Associate Dean
www.hs.iastate.edu/

Departments of the College
Apparel, Educational Studies, and Hospitality Management
Curriculum and Instruction
Educational Leadership and Policy Studies
Food Science and Human Nutrition
Kinesiology
Human Development and Family Studies

The College of Human Sciences provides an integrative approach to improving the quality of life for individuals, families, schools and communities by linking discovery, science, creativity, and practice; applying the knowledge of learning in all endeavors; and developing leaders for roles in research, education, business and industry, and health and human services.

The College of Human Sciences (CHS) was founded in 2005 and is the newest college on the ISU campus. The college fosters innovative synergies in teaching and research, and in many ways is reinventing how human potential can be enhanced. Members of the College of Human Sciences community strive to improve the quality of people’s lives - helping them learn better, live longer, and lead lives that are more productive and fulfilling.

Recommended High School Preparation
Recommended preparation for students entering most departments of the College of Human Sciences should include 4 years of English (including speech) with emphasis in composition and communication skills; 3 years each of mathematics and natural sciences, and at least 2 years of social science and/or humanities. In addition, students interested in Elementary Education or Early Childhood Education are advised to complete three or more years of high school study in one foreign language.

Information for Prospective Students
Each student in the College of Human Sciences works closely with an academic adviser who is associated with the curriculum in which the student is majoring. In some majors, freshmen are advised by a general college adviser. After the freshmen year, these students are assigned an adviser in the department of the chosen curriculum. Advisers assist students in developing academic programs and in adjusting to university life. They also provide information and guidance about career choices. Advisers attempt to adjust each student’s schedule of course work in accordance with the student’s interests and capabilities.

The college offers a number of orientation sessions during the summer for students planning to enter in the fall. Incoming students are encouraged to attend an orientation session so that academic assessments can be made and appropriate classes may be scheduled for the following term.

Open Option Status
The College of Human Sciences offers an open option for entering students who have not selected a specific area of study. An orientation course helps students explore the opportunities available. Program planning information can be obtained from general college advisers.

Planned Transfer Programs
By careful planning, students may begin their education at another college, then transfer their courses to a curriculum within the College of Human Sciences with maximum efficiency in meeting the degree requirements. The college works closely with community colleges in Iowa and surrounding states to facilitate a transfer to Iowa State University. For more information, call 1-800-522-0683 or visit the College of Human Sciences Student Services.

Families Extension
Students may prepare for a career in the Cooperative Extension Service by enrolling in a curriculum in the College of Human Sciences that provides them with a broad subject matter base for conducting educational programs for families. Advice on choice of courses should be sought from the Family and Consumer Sciences Education and Studies program, the associate dean and director of Iowa State University Extension to Families programs, the director of Iowa State University Extension to Youth and 4-H programs, or the Extension Human Resources office.

Undergraduate Core Curriculum
Graduates of the College of Human Sciences will demonstrate professional and personal competencies in concepts fundamental to the College’s mission. These core concepts serve as a unifying focus for students in the College. Competencies will be assessed by designated outcomes in courses within each major in the College. For information on the specific core competencies for particular majors contact the departmental office administering the program.

General Education
Students in the College of Human Sciences are required to complete a program in general education which is integrated with their professional training and extends through the undergraduate curriculum.

The general education program emphasizes intellectual growth and personal development as contrasted with specific career preparation.

The program aims to stimulate a desire for learning and intellectual endeavor, develop understanding and appreciation for the physical and cultural world, encourage independent thinking and analysis, increase competence in all aspects of communication, and create an understanding of individuals as social, psychological, and physical beings.

The student is expected to complete studies in three categories in general education. Areas represented below are not departmental titles. In some cases, courses relating to a given area may be found in several different departments. Credits listed are minimum requirements.

Minimum Group Requirements in the College of Human Sciences

9.5 cr.
1. Communication Skills: English 150, 250; Library 160; and 3 credits in oral communication

9 cr.
2. Biological and physical sciences and mathematical disciplines: at least 3 credits in mathematical disciplines

15 cr.
3. Social sciences and humanities: at least 6 credits in social sciences and at least 6 credits in humanities

Accreditation and Licensure
The following program-specific accreditation/licensure/registrations have been attained by departments within the college:

Department of Apparel, Educational Studies, and Hospitality Management:
Family and Consumer Sciences Education
Teacher Licensure Program is licensed by the Iowa Department of Education and the Iowa Board of Educational Examiners.

Hotel, Restaurant, and Institution Management:

Production focus of the Apparel Merchandising, Design, and Production major is endorsed by the American Apparel and Footwear Association.

Department of Food Science and Human Nutrition:

The following program-specific accreditation/licensure/registrations have been approved by the Institute of Food Technologists. The Dietetics Internship Program and the Didactic Program in Dietetics are accredited by the Commission on Accreditation/Approval for Dietetics Education of The American Dietetic Association, 216 W. Jackson Blvd., Chicago, IL 60606-6995, 312/999-4876.

Department of Kinesiology:
The Athletic Training Option is accredited by the Commission on Accreditation of Athletic Training Education.

Department of Human Development and Family Studies:
The Child Development Laboratory School is accredited by the National Association for the Education of Young Children (NAEYC) Academy for Early Childhood Programs and licensed by the Iowa Department of Human Services.
Teacher Education and Licensure
All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the University Teacher Education Program and be recommended by the CHS Associate Dean for Teacher Education. Each student will be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and the college in which it is located.

For details concerning the professional teacher education requirements and the areas of specialization requirements, see Teacher Education, Courses and Programs.

Majors
For more information about a major, see: 1) the curriculum descriptions in this section of the catalog; 2) the department catalog section under Courses and Programs; and 3) department websites.

Apparel Merchandising, Design, and Production—Options: Merchandising; Design; Production—Administered by the Department of Apparel, Educational Studies and Hospitality Management

Child, Adult, and Family Services—Options: Child Programs; Youth Programs; and Adult/Family Programs — Administered by the Department of Human Development and Family Studies

Culinary Science— Administered by the Department of Food Science and Human Nutrition

Dietetics— Administered by the Department of Food Science and Human Nutrition

Early Childhood Education— Administered jointly by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies

Elementary Education—Administered by the Department of Curriculum and Instruction

Family and Consumer Sciences Education and Studies—Options: Communications; Professional Studies; Teacher Licensure— Administered by the Department of Apparel, Educational Studies and Hospitality Management

Family Finance, Housing, and Policy— Administered by the Department of Human Development and Family Studies

Food Science— Options: Consumer Food Science; Food Science and Industry; Food Science and Technology— Administered by the Department of Food Science and Human Nutrition

Kinesiology—Options: Athletic Training; Community and Public Health; Exercise Science; General Studies; Health/Fitness Management; and Physical Education Licensure—Administered by the Department of Kinesiology

Hotel, Restaurant, and Institution Management—Administered by the Department of Apparel, Educational Studies and Hospitality Management

Nutritional Science— Administered by the Department of Food Science and Human Nutrition

Secondary Education—The College of Human Sciences provides secondary education licensure programs in conjunction with subject matter areas, or majors, offered by various departments across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, foreign languages, general sciences, health, family and consumer sciences education, mathematics, music, physical science, physics, and social studies. See Index, Teacher Education.

Minors
Minors are available to all Iowa State students. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above. A student may not apply the same course to two different minors. The minor must include 9 credits that are not used to meet any other department, college or university requirement. Minors are available in the following areas:

Apparel Merchandising, Design, and Production
Athletic Coaching
Child, Adult, and Family Services
Dance
Educational Services in Family and Consumer Sciences
Family Finance, Housing, and Policy
Food Safety (interdepartmental minor)
Gerontology (interdisciplinary minor)
Hotel, Restaurant, and Institution Management
Nutrition (two minors: one for non FSHN majors and one for department majors)
See Index for minor requirements for specific departments and programs.

International Studies (secondary major only)

Sport and Culture

The International Studies Program is an interdisciplinary program which may be taken only as a second major. Students pursuing a second major in international studies must complete the International Studies Program as described in this catalog (see Index, International Studies).

Double Majors
Students may elect a second major from the departments and program areas listed above, or from a major field offered for the bachelor’s degree in another college of the university. Double majors may be prohibited between majors as determined by the appropriate curriculum committees.

The major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In this case, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major.

Students with a primary major in another college who wish to take a second major in the College of Human Sciences are required to meet all requirements for the major, including the CHS core, and prerequisite and supporting courses.

Two Bachelor’s Degrees
Any degree offered by the College of Human Sciences may be earned together with a degree in this or any other college of the university. For the requirements for two degrees, see Index, Two Bachelor’s Degrees.

International and Cross Cultural Programs
International experience opportunities are available and encouraged through the College of Human Sciences to broaden international and cross-cultural perspectives. Scholarships and other forms of financial assistance are available which provide partial support for students studying abroad. The College has established programs with a variety of colleges and universities around the world including Glasgow Caledonian University, Glasgow; Scotland; University of Otago, Dunedin, New Zealand; the International College of Hospitality Administration, Brug, Switzerland; the London College of Fashion, London, England; and Paris American Academy, Paris, France. Students also have an opportunity to participate in group study abroad programs to Europe, Africa, Central and South America, and Asia.

Other opportunities may be developed through consultation with the college director of international experiences and the student’s adviser; for example, students have acquired internships and studied in such countries as Kenya, Rwanda, Spain, Puerto Rico, Ireland, Guatemala, Switzerland, England, Australia, Germany, and France. Faculty members bring diversity and global perspectives to instruction and research through their work in India, South Korea, Central and South America, Pakistan, Africa, and Europe.

Honors Program
High achieving students, with a grade point average of above 3.35, are invited to apply to the Honors Program. Honors students are encouraged to develop a creative program of study expanding their interests while meeting individual educational objectives. Students in the Honors Program also participate in University Honors Seminars, Honors Courses and complete an honors project. For further information, contact the College Honors Committee or academic adviser. Also see Index, Honors Program.
Dietetics Internship (DI)

This post-baccalaureate program, administered by the Department of Food Science and Human Nutrition, is accredited by the American Dietetic Association (ADA). The purpose of the program is to enable those who meet the academic requirements of the ADA to obtain at least 900 hours of practice supervised by registered dietitians in medical nutrition therapy, community nutrition, and foodservice management to meet ADA performance requirements for entry level dietitians.

Students who satisfactorily complete the DI will be eligible to take the national registration examination administered by the Commission on Dietetic Registration.

Preparation for Graduate Study

Students considering graduate studies should gain background knowledge in basic subjects related to their area of interest. Undergraduate mathematics, statistics, and research methods courses are useful as preparation for advanced study in graduate school. Upon completion of graduate programs, students are qualified for leadership positions in public and private institutions and for teaching, research, and extension positions in colleges and universities.

Graduate Curricula

The College of Human Sciences offers programs leading to the degrees of master of science, master of education, and doctor of philosophy. Graduate study in the College of Human Sciences is conducted through the Graduate College. Details are found in the Graduate College section of this catalog, (www.grad-college.iastate.edu) and on department websites.

Curriculum in Apparel Merchandising, Design, and Production

Administered by the Textiles and Clothing Program. Leading to the degree bachelor of science. Total credits required: 123 including a minimum of 18 credits in AMDP at Iowa State University for the degree.

The major in apparel merchandising, design, and production provides a broad based program of study with flexibility in creating program options. Courses are required in general education, and textiles and clothing core. To complete the program, a student combines structured clusters of courses to form primary and secondary program options.

A minor in apparel merchandising, design, and production is available; the requirements appear under Textiles and Clothing, Courses and Programs.

Cr. Degree Requirements
9.5 Communications Skills
6.5 Engl 150, 250; Lib 160
3 Select from ComSt 214, 218; Sp Cm 212
9-14 Biological and Physical Sciences and Mathematical Disciplines
3-4 Mathematics (Math 150 recommended for Merchandising and Production Options)

9-10 Social sciences
6 Econ 101
3 T C 165
3 Select from the Human Sciences list (including T C 362)
9 Humanities
3 T C 257, 354, 356 or AESHM 342.
3 Select from Human Sciences approved list, foreign language requirement
3 One history/art history course. Creative Design: Art H required.

3-5 Select from natural sciences (including FS HN 167)
4-5 Stat 101 or 104, or 226

3 Select one: T C 362, 381 or Study Abroad

Secondary options
For Merchandising and Production/Apparel Engineering select a second cluster from the secondary option areas.

8-10 Business/Entrepreneurship
9-12 Select three courses from AESHM 287, 474; Advrt 215, 256; Econ 355; Fin 301, LSCM 360; Mgmt 310, 313, 370; Mkt 340; MIS 330; OSCM 320

9 Select three: ComSt 214; Engl 302, 303, 309, 313, 314; JI MC 310, 321, 341, 342; Sp Cm 212; any Art Graphic Design
9 Consumer Behavior/Marketing
3 T C 467
3 Select from T C 499; AESHM 340; Advrt 230; JI MC 205, 220; Mkt 410, 442, 444, 446, 447, 448, 451, 493
9 History/Museum Studies
3 T C 257
6 Select two courses from T C 354, 356, 362, 404, 467, 499; Any History; Any Art History; any Anthropology
9 Human Resource Management
9 Select three courses from AESHM 287; T C 428, 467, 499; ComSt 214, 218, 310, 314, 317; Mgmt 370, 371; Psych 450; Soc 380; Sp Cm 212
9 International Trade
3 T C 362
6-8 One foreign language or 6 credits from T C 381, AESHM 421; Anthr 323, 325, 326, 418; IntSt 120/220, 235; Mgmt 414; Mkt 448; TSC 341
9 Public Relations/Event Management
3 Select three: T C 287, 499; AESHM 471; Advrt 230, 301, 334, 424, 434; JI MC 205, 220, 321; Mkt 410, 447
9 Electives
Select courses to broaden or complement the options (see adviser).

Additional Requirements for a Primary Option

24-30 Design
R T C 301
9 T C 325, 326, 495
3 Select one: T C 354 or 356
12 Select from T C 257, 305, 340, 354, 356, 362, 377, 404, 415, 431
AESHM 471, 474; Thtr 255; Any Art History; Art Integrated Studio or Design Studies

24 Technical Design
R T C 301
12 T C 305, 325, 415, 431
6 Select two courses from T C 354, 356, 362, 496
6 Select two courses from: Acct 284, I E 408, OSCM 320; T C 340, 404
24 Product Development
15 T C 305, 431, 467, 496; Acct 284
15 Select one: Mkt 340, T C 340
12 Select two: T C 376, 377, 404, 415, 475; AESHM 474; I E 408

14-16 Merchandising Option

24-30 Merchandising Option
R Select three: AESHM 271, 287, 340, 471, 474, 477, T C 467, 496; Advrt 230; Mgmt 370, 371; Mkt 340*, 410, 446, 449
3 Select one: T C 354, 356, 362, 467
3 Select one: T C 221, 305, 331, 404
12 Production/Sourcing Management Option
6 Select two: I E 408; OSCM 320; Stat 495; AESHM 340*, 404; TSM 310
3 Select one: T C 354, 356, 362, 467

* If Merchandising primary option, may need to select another course from approved list.

Curriculum in Child, Adult, and Family Services

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science. Total credits required: 125.

The child, adult, and family services curriculum, with options in child programs, youth programs, adult/family programs, leads to employment opportunities in the helping professions working with children, adults, and families in a variety of public and private human service agencies and organizations.

A minor in child, adult, and family services is available; the requirements appear under Human Development and Family Studies, Courses and Programs.
The following requirements are for the child programs, youth programs, adult/family programs:

### Curriculum in Dietetics

Administered by the Department of Food Science and Human Nutrition

The student is prepared for admission to dietetic internship programs and other professional experience programs approved/accredited by The American Dietetic Association.

Courses included have been approved as meeting the academic requirements of The American Dietetic Association. There is a $30 fee for a statement of verification of completion of the approved program.
Curriculum in Early Childhood Education

The curriculum in early childhood education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms and home-based programs, with emphasis on inclusive services; graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets the requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is administered jointly by the Departments of Human Development and Family Studies and Curriculum and Instruction.

Students in early childhood education must make application to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandate for a performance-based system of teacher training. Following this same type of system, the state of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the eleven Teacher Education Standards along with other information about the University Teacher Education Program, can be found at www.teacher.hs.iastate.edu/, the teacher education website.

Foreign Language Requirement

Early childhood education majors must satisfy a graduation requirement equivalent to the first year of university-level study in one foreign language (normally, completion of a two-semester sequence in any one foreign language). The requirement may be met by completion of three or more years of high school study in one foreign language.

Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for 101-102 in those languages; test-out credit (T credit) may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. If these students choose to take 101-102 on a remedial basis, they will be graded S-F.

Degree Requirements

Select 3 credits from: Astro 120, 150, Chem 160, 163, 164, Geol 100, 102, LAS 111, Mteor 206, Phys 101, 106

Biological Sciences Options
Select 3 credits from: Biol 101, 173, 155, 211, 211L, 255L, 258, Ent 211

U.S. Diversity and International Perspectives Requirement: Students in Early Childhood Education fulfill the U.S. Diversity and International Perspectives Requirements by choosing three credits of coursework from each of the university-approved lists.

* Refer to departmental curriculum sheet, available from adviser, for specific course requirements.

Curriculum in Elementary Education

The curriculum in elementary education is planned for students preparing to teach in grades kindergarten through six. For additional information, see Index, Elementary Education.

Teaching endorsements in areas closely related to elementary education, including a special education endorsement in Instructional Strategist I: Mild/Moderate K-8, are available for elementary education majors. See Teacher Education, Courses and Programs, for information about specific endorsements.

Additional teaching endorsements, available at the graduate level to individuals who hold a valid Iowa teaching license, include the following: K-6 foreign language, reading, special education (Instructional Strategist I: Mild/Moderate K-8), Instructional Strategist I: Mild/Moderate 5-12, and Instructional Strategist II: Behavior Disorders/Learning Disabilities, ages 5-21.

Communication Proficiency

In order to meet graduation requirements, all students must have a C (2.0) or better for each of Engl 150 and Engl 250.

U.S. Diversity and International Perspectives

In order to meet graduation requirements, all students must complete 3 credits of course work in U.S. Diversity and 3 credits in International Perspectives. See department for approved lists of courses.

Foreign Language Requirement

Elementary education majors must satisfy a graduation requirement equivalent to the first year of university-level study in one foreign language (normally, completion of a two-semester sequence in any one foreign language). The requirement may be met by completion of three or more years of high school study in one foreign language.

Students who have completed three or more years of French, German, or Spanish in high school may not receive graded credit for 101-102 in those languages; test-out credit (T credit) may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. If these students choose to take 101-102 on a remedial basis, they will be graded S-F. Certification in American Sign Language is recognized by the University and satisfies the foreign language requirement for the curriculum in Elementary Education.

Total credits required: 128.5.

21 Required methods
Curriculum in Family and Consumer Sciences
Education and Studies

Administered by Apparel, Educational Studies and Hospitality Management. Leading to the degree bachelor of science. Total credits required: 125.5

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core. Students select one program option.

There are three choices for this curriculum. Option 1, teacher licensure, Option 2, communications, or Option 3, professional studies. In all options, students are prepared with a broad-based understanding of family and consumer sciences.

Option 1, teacher licensure, is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior, and senior high schools. With additional credits students may also be approved to teach in specific occupational areas: child care, fashion merchandising, and foodservice. Further information about licensure programs appears under Teacher Education.

Option 2, communications, is designed for students seeking careers emphasizing communication with diverse populations in extension, business, community agencies, community colleges, and youth and adult education programs in a global community.

Option 3, professional studies, is designed to provide students with the opportunity to pursue an individualized program which is planned with their academic advisers. Opportunities to participate in study abroad, internships, and field study build a solid base for work in a global community. Careers include working with diverse population in extension, business, community agencies, community colleges, and youth and adult education programs.

The program offers a minor in family and consumer sciences education; the requirements appear under Family and Consumer Sciences Education and Studies, Courses and Programs.
A minor in family finance, housing and policy is available; the requirements appear under Human Development and Family Studies, Courses and Programs.

15 Family Finance, Housing, and Policy Emphasis: Select from Acct 284, HD FS 360, 380, 378, 463, 483, 488
24 Electives
Courses from Accounting, Architecture, Art, and Design, Community and Regional Planning, Economics, Family and Consumer Sciences Education, Finance, Gerontology, Interior Design, Journalism, Management, Marketing, Political Science, Psychology, and Sociology are suggested.

Curriculum in Food Science

Administered by the Department of Food Science and Human Nutrition.

Option 1. Food Science and Technology
Cr. Degree Requirements*
12.5 Communications/Library
Engl 150, 250; Lib 160; ComSt 214 or Sp Cm 212; TSM 115
11-12 Mathematical Sciences
Math 165 and 166, or 181 and 182; Stat 101 or 104
23 Physical Sciences
Chern 177, 177L, 178, 331, 331L, 332, Phys 111, 112
13 Biological sciences
BBMB 301; Biol 211, 212; Micro 302, 302L
15 Humanities/Social Sciences
6 credits Humanities courses; 3 credits Social Sciences courses; FS HN 342; additional 3 credits Humanities or Social Sciences courses
44 Food science and human nutrition
FS HN 101, 110, 167, 203, 311, 351, 403, 405, 406, 410, 411, 412, 420, 421, 471, 472, 480
0-2 Electives
120.5 Total credits

*Additional degree requirements: Students must fulfill international perspectives and U.S. diversity by selecting coursework from approved lists. These courses may be used to fulfill other area requirements.

Option 2. Food Science and Industry
Cr. Degree Requirements*
15.5 Communications/Library
Engl 150, 250; Lib 160; JI MC 305, or 220, or 347; Sp Cm 212 or ComSt 214; TSM 115
7-8 Mathematical Sciences
Math 160, 165, or 181; Stat 101 or 104
16 Physical Sciences
Chern 163 and 163L or 177, 177L and 178; 231; 231L; Phys 106
12-13 Biological Sciences
BBMB 301; Biol 211, 212; Micro201 or 302; Micro 201L or 302L
15 Humanities/Social Sciences
Econ 101; FS HN 342; select 6 credits of humanities courses; select 3 additional credits of humanities or social science courses
6 Business
Select 6 credits from Acct 215, 284, 285, Econ 301, 320, Mgmt 310, 370, 371, 414, 472; MIS 330; Mkt 340, 442, 448
44 Food science and human nutrition
FS HN 101, 110, 167, 203, 311, 351, 403, 405, 406, 410, 411, 412, 420, 421, 471, 472, 480
0-5 Electives
120.5 Total credits

*Additional degree requirements: Students must fulfill international perspectives and U.S. diversity requirements by selecting coursework from approved lists. These courses may be used to fulfill other area requirements.

Concurrent B.S. and M.S. Program:
Well qualified students in Food Science who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a bachelor of science in Food Science and a master of science degree in Food Science and Technology. For more information, refer to www.fshn.hs.iastate.edu

Curriculum in Kinesiology and Health

The curriculum in Kinesiology and Health is designed for students preparing to enter professional areas related to the health, exercise or sport science fields. Students majoring in Kinesiology & Health may select one of six options: 1) Athletic Training, 2) Community and Public Health, 3) Exercise Science, 4) General Studies, 5) Health/Fitness Management, and 6) Physical Education Licensure.

Minors in dance, athletic coaching, and sport and culture are available; the requirements appear under Kinesiology, Courses and Programs.

A major in Performing Arts with a dance emphasis is available; the requirements appear under Curriculum in Performing Arts in Theatre.

Communication Proficiency
In order to meet graduation requirements, all students must earn an average of C (2.0) or better in Engl 150 and 250, with neither grade being lower than a C-. Students not meeting this condition must earn a C or better in an advanced writing course (select from Engl 220, 302, 309, or 314).

U.S. Diversity and International Perspectives
In order to meet graduation requirements, all students must complete 3 credits of course work in U.S. Diversity and 3 credits in International Perspectives. See university approved list.

Total credits required: 124 (46 credits in courses numbered 300 or above).

Cr. 42 General Education
9 Physical and Life Sciences
Basic Human Physiology and Anatomy
8 Biol 255, 255L, 256, and 256L
3 Introduction to Human Nutrition—FS HN 167
6 Mathematics and Computer Sciences
3-4 Computer Science choice
9 Social Sciences
6 Humanities
12.5 Communication Skills
6 Freshman Composition—Engl 150, 250
3 Fundamentals of Public Speaking—Sp Cm 212
0.5 Library instruction—Lib 160
3 Business Communication—Engl 302, 314, or Sp Cm 312

17 Core requirements: (Each course used to meet the Core requirements must be completed with a grade of C- or better.)

Basic Core
3 Personal and Consumer Health—H S 110
3 Fields and Disciplines in Kinesiology—Kin 252, 253, 254 (required of freshmen men only)
2 Concepts of Physical Fitness—Ex Sp 258

Advanced Core
(H S 110, Kin 252, 253, and 258 should be completed prior to enrollment in the advanced core courses; students must have completed three of these courses with at least one from each sub-discipline; some courses have unique prerequisites which can be taken as part of General Education coursework)

Biological Basis of Physical Activity and Health Promotion
3 Biomechanics - Kin 355
3 Physiology of Exercise—Kin 358
3 Human Diseases—H S 350

Behavioral Basis of Physical Activity and Health Promotion
3 Sociology of Sport and Physical Activity—Kin 360
3 Sport Psychology—Kin 365
3 Exercise Psychology—Kin 366
3 Motor Control and Learning Across the Lifespan—Kin 372
3 Consumer and Public Health—H S 310

Option 1. Athletic Training
The CAATE accredited athletic training option prepares students for the NATA BOC certification examination or for graduate work in athletic training. Admission to the athletic training option is competitive and based on available department resources and will be determined on the basis of grades and other performance factors. Technical standards can be found on the athletic training website. Details are available from the Kinesiology Advising Office or the Athletic Training Education Program.

3 Basic Athletic Training for Athletic Trainers—Kin 222
1 Athletic Training Clinical Practicum—Kin 221, Kin 223
1 Introduction to Taping, Bracing, and Equipment Fitting—Kin 240
3 Evaluation of Athletic Injuries I—Kin 224
1 Athletic Training Clinical Practicum—Kin 225
3 Evaluation of Athletic Injuries II—Kin 226
1 Athletic Training Clinical Practicum—Kin 227
3 Therapeutic Modalities for Athletic Trainers—Kin 323
1 Athletic Training Clinical Practicum—Kin 324
3 Rehabilitation of Athletic Injuries—Kin 326
1 Athletic Training Practicum—Kin 327
3 Organization and Administration of Athletic Training—Kin 425
3 Medical Concerns for the Athletic Trainer—Kin 450
3 Legal Aspects of Sport—Kin 445
4 Principles of Fitness Assessment and Exercise Prescription—Kin 458
R Review of Athletic Training Competencies—Kin 489
2 Instructor’s First Aid and CPR—H S 305
4 General Chemistry—Chem 163
1 Laboratory in General Chemistry—Chem 163L
4 Physics 106 or 111
3 Drug Education—H S 215

Elective to equal 124 total credits

The following courses are required; they can be taken as part of the General Education requirements:
3-5 Statistics—Stat 101, 104, 226
2-3 Mathematics—select from Math 140, 141, 142, 150, 165

The following six courses must also be taken; three can fulfill the Advanced Core requirement:

Option 2. Community and Public Health
This option emphasizes health promotion and disease prevention and prepares students for professional involvement in community health agencies which incorporate health services and the educational process. Students will be prepared for employment in state and public health agencies, volunteer health agencies, hospitals (patient education), and industry (health and wellness programs). Graduates are eligible to take the National Certified Health Education Specialist (CHES) exam which recognizes qualified specialists in the diversified field of health education.

2 First Aid and Emergency Care—H S 105
3 Drug Education—H S 215
3 Worksite Health Promotion—H S 380
R Search Strategies for Field Experiences and Employment—H S 385
3 Administration of School Health—H S 390
3 Community Health Program Development—H S 430
2 General Microbiology—Micro 201
1 Intro Micro Lab—Micro 201L
3 Human Sexuality—HD FS 276
3 Aging and the Family—HD FS 377
3 Principles of Accident Prevention—TSM 272
5 General Chemistry with lab—Chem 163 and 163L
4 Principles of Biology with lab—Biol 211 and 211L
3 Rehabilitation of Athletic Injuries—Kin 326
1 Athletic Training Practicum—Kin 327
3 Organization and Administration of Athletic Training—Kin 425
3 Medical Concerns for the Athletic Trainer—Kin 450
3 Legal Aspects of Sport—Kin 445
4 Principles of Fitness Assessment and Exercise Prescription—Kin 458
R Review of Athletic Training Competencies—Kin 489
2 Instructor’s First Aid and CPR—H S 305
4 General Chemistry—Chem 163
1 Laboratory in General Chemistry—Chem 163L
4 Physics 106 or 111
3 Drug Education—H S 215

Elective to equal 124 total credits

The following courses must also be taken; they can be taken as part of the General Education requirements:
3 Principles of Marketing—Mkt 340
3 Principles of Public Relations—Jl MC 220 or Publicity Methods—Jl MC 205
3 Principles of Microeconomics—Econ 101
3-4 Select from Engl 309, Engl 313, HD FS 395, HD FS 449 or Jl MC 342/342L
10-16 Directed Field Experience—H S 485

Electives to equal 124 total credits

The following courses must also be taken; they will fulfill the Advanced Core requirement:
H S 310, 350 and Kin 366.

Option 3. Exercise Science
The Exercise Science option is designed for students interested in an interdisciplinary approach to the science of human movement. By combining exercise science with another area of study to support an individualized program, this option is suitable for students interested in graduate study or who are preparing for advanced study leading to careers in medicine, physical therapy, or other allied health programs.

R Search Strategies for Field Experience and Employment—Ex Sp 385
6 Two 300-400 level Ex Sp courses
26 Meet the requirements of a specialization area in a related field

Electives to equal 124 total credits

A statistics course and one of Math 140, 141, 142, or 165 must be selected in the General Education requirements.

The following six courses must also be taken; three can fulfill the Advanced Core requirement:

Option 4. General Studies
The general studies option is provided for students interested in an interdisciplinary approach to the study of human movement. In this option kinesiology is combined with a concentration in another area of study to support an individualized program, such as community sport and recreation, dance, and other sport, exercise, or health related fields. Programs of study must be approved by the undergraduate program coordinator.

R Kin 385
6 Additional credits in 300-400 level courses
26 Credits in related areas of study (must be approved by Curriculum Coordinator)
8-12 Internship in Sport and Exercise Science—Kin 486

Electives to equal 124 credits
The following courses must also be taken. They can fulfill the General Education requirements:

2-3 Mathematics—Select from Math 140, 141, 142, 150, 165
3-5 Statistics—select from Stat 101, 104, 226
4 Physics—Physics 106 or 111

The following five courses must also be taken: three can fulfill the Advanced Core requirement: Kin 355, 358, 360, 365, 372.

**Option 5. Health/Fitness Management**

This option prepares students for careers in the physical fitness/health field. It is designed for those who wish to prepare for professional roles as exercise specialists or program directors in corporate fitness programs, health clubs, cardiac rehabilitation programs, or other public and private agencies providing physical fitness activities.

2 Basic Athletic Training—Kin 220
2 Leadership Techniques for Fitness Programs—Kin 259
3 Management of Health-Fitness Programs and Facilities—Kin 345
3 Worksite Health Promotion—H S 380
R Search Strategies for Field Experiences and Employment—Kin 385
4 Principles of Fitness Assessment and Exercise Prescription—Kin 458
1 Internship in Exercise Leadership—Kin 459
3 Medical Aspects of Exercise—Kin 462
8-16 Internship in Sport and Exercise Science—Kin 485A
3 Principles of Organization and Management—Mgmt 370
3 Principles of Macroeconomics—Econ 101
4 Phys 106 or 111

Electives to equal 124 credits

The following courses are required: they can be taken as part of the General Education requirements:

2-3 Mathematics - select from Math 140, 141, 142, 150, 165
3-5 Statistics - select from Stat 101, 104, 226

The following five courses must also be taken: three can fulfill the Advanced Core requirement: Kin 355, 358, 360, 365, and 372.

**Option 6. Physical Education Licensure**

This option is designed for students seeking a license to teach physical education K-12. Students interested in preparing to coach must earn additional credits in: Kin 220 and 315. Note: when making general education course selections, teacher licensure students must choose C I 201, Psych 230, a natural science and a U.S. history or political science course.

Professional education requirements

3 Foundations of American Education—C I 204
R Senior Seminar—C I 415
3 Multicultural Gender Fair Education—C I 406
8 Supervised Student Teaching in Physical Education in the Secondary School—Kin 417
8 Supervised Student Teaching in Physical Education in the Elementary School—Kin 418

Physical education professional theory

2 Leadership Techniques for Fitness Programs—Kin 259
3 Elementary and Pre-school Movement Education—Kin 312
0.5-1 Directed Field Experience in Elementary School Physical Education—Kin 280
0.5-1 Directed Field Experience in Physical Education—Kin 281
3 Teaching Physical Education—Kin 375
3 Adapted Physical Education—Kin 395
3 Measurement in Physical Education—Kin 471
3 Physical Education Curriculum Design and Program Organization—Kin 475

Physical education professional activity and related courses

2 First Aid and Emergency Care—H S 105
1 Aquatics—Kin 230
1 Tumbling and Gymnastics Skills—Kin 231
1 Fundamentals of Self-defense—Kin 237
1 Fundamentals of Outdoor and Adventure Activities—Kin 238
1 Team Sport - Kin 232 or 233
1 Individual Sport—Kin 235 or 236
2 Dance—Dance 211

Electives to equal 124 total credits

The following course must also be taken. It can fulfill the General Education requirement:

4 Physics 106 or 111

The following five courses must also be taken: three can fulfill the Advanced Core requirement: Kin 355, 358, 360, 365 and 366, and 372.

**Curriculum in Hotel, Restaurant, and Institution Management**

Administered by the Hotel, Restaurant, and Institution Management Program. Leading to the degree bachelor of science. Total credits required: 123.5

The curriculum in Hotel, Restaurant and Institution Management develops students as leaders for the hospitality professions.

Cr. Degree Requirements*

9.5 Communications and library
Engl 150, 250; Lib 160; ComSt 214 or Sp Cm 212; Engl 314

7-12 Mathematical sciences
Math 160, 165-166, or 181-182
Calculus (2 semesters recommended); Stat 101 or 104

24 Physical sciences
Chem 177, 177L, 178, 331, 331L, 332, 332L; Phys 111, 112

15 Humanities/Social sciences
FS HN 342; select 6 crs. of humanities courses; select 3 crs. of social science courses; select 3 additional crs. of humanities or social sciences courses

34-35 Food science and human nutrition
FS HN 110, 210, 220, 231 or 311, 265, 360, 361, 362, 461, 480, 492; select at least 9 additional credits from FS HN 403, 412, 419 or 519, 463, 464, 466, 490C 499,

0-2 Electives

120.5 Total credits

*Additional degree requirements: Students must fulfill international perspectives and U.S. diversity requirements by selecting coursework from approved lists. These courses may be used to fulfill other area requirements.

**Concurrent B.S. and M.S. Program:**
Well qualified students in Nutritional Science who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a bachelor of science in Nutritional Science and a master of science degree in Nutritional Sciences. The Curriculum
A baccalaureate degree in liberal arts and sciences is the end result of a curriculum that connects and integrates study in a major with general education. Requirements for a degree are deliberately flexible. Students select programs of study suited to a variety of interests and goals. Students having academic interests not fully met by a departmental major may also pursue a major offered by one of the college’s interdisciplinary programs or may apply for an undergraduate major in interdisciplinary studies (See Index, Cross-Disciplinary Studies, Courses and Programs). The college participates in the University Honors Program; thus, students with exceptional academic promise can develop unique and challenging programs of study.

The college has three curricula: a curriculum in Liberal Arts and Sciences, leading to the bachelor of arts or the bachelor of science degree; a curriculum in music, leading to the bachelor of music degree; and a curriculum in liberal studies, leading to the bachelor of liberal studies degree.

High School Preparation/Admission Requirements
Students entering the college are required to present evidence of the following high school preparation:

4 years of English. (Typically this preparation includes courses in British, American, and world literature in which critical reading and writing skills are emphasized and courses in speech and composition, including at least one senior-level writing course.)

3 years of social studies. (Typically such preparation includes two semesters of world history, two semesters of American history, and a semester of American government. Electives can be chosen from areas such as economics, sociology, or psychology.)

2 years of a single world language. (Three years or more of a single world language are strongly recommended for students who wish to continue their work in that language. A minimum of three years of a single world language is required to fulfill the world language graduation requirement in the College of Liberal Arts and Sciences.)

3 years of mathematics. (Such preparation shall include two semesters of beginning algebra, two semesters of geometry, and two semesters of intermediate algebra. A fourth year of study involving analytic geometry, trigonometry, linear algebra, and/or calculus is strongly recommended for students who will major in mathematical or scientific disciplines.)

3 years of science. (At least two years of such preparation shall be chosen from biology, chemistry, and physics.)

Recommended but not required as a condition of admission to the College of Liberal Arts and Sciences is one semester of computer experience. (Such a course should stress problem-solving with computers and should not substitute for courses in mathematics. In schools where computer use is an integral part of most courses, separate instruction in computers is not necessary.)

Students who transfer from another college or university with at least 24 credits of satisfactory coursework may be exempt from most of these requirements. Students who do not meet the requirements listed here may be admitted with a limited number of deficiencies. Contact the college office for further information about resolving these deficiencies.

Transfer Students
To graduate from the College of Liberal Arts and Sciences, a transfer student must complete the general requirements of the college as well as those of the university. Students planning to transfer to Iowa State University for the purpose of enrolling in the College of Liberal Arts and Sciences are advised to contact the college office for information concerning degree program requirements. Prospective transfer students are urged to learn about the academic programs that are of interest to them well before arriving on campus so that pre-transfer courses are appropriate to the planned major and transferable toward graduation from ISU. Additional information concerning transfer credit evaluation may be obtained through the Office of Admissions as well as the department in which a student is interested.

A transfer student in the College of Liberal Arts and Sciences may choose to graduate under the catalog in effect at the time of his or her graduation or under one of the two immediately preceding catalogs, provided that it covers the period of his or her enrollment either at Iowa State or any other accredited school. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed. A transfer student is responsible for reviewing his/her transfer credit evaluation with the academic adviser during the first semester of enrollment.

University Requirements
The university requirements for the bachelor’s degree, including statements of academic standards, learning goals, the university residence requirement, the Communication proficiency requirement, U.S. diversity and international perspectives requirement, and the library requirement, appear in the Colleges and Curricula portion at the beginning of this catalog.
Curriculum in Liberal Arts and Sciences

To obtain a bachelor’s degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, an undergraduate student must earn a minimum of 120 semester credits including a minimum of 32 semester credits earned in residence at Iowa State University. In addition, the student must meet general education, communication proficiency, literary proficiency, world language, and advanced credit requirements, as well as the requirements of a major. Courses taken on a pass/no pass basis may be counted toward the required total of 120 credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement. No more than 9 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation.

General Education

Requirements and Learning Goals

The central importance of a general education is reflected in the learning goals of each of four disciplinary areas. Whereas the courses in a major are designed to develop mastery of a specific field or discipline, courses in general education are designed to establish a strong, intellectual foundation for all specializations. Students earn the minimum credits listed in each of the four general education areas in courses not required by the department of the first major listed on the degree program. Interdisciplinary courses may be used to satisfy requirements in any area for which they have been approved, but a student may not apply the same course to more than one area.

Credit by Examination Program

Individual departments may use CLEP Subject Tests for testout of specific courses. Students in the College of Liberal Arts and Sciences may use CLEP General Test credits as free electives but not toward any of the general education area requirements.

World Language Requirement

The faculty of the College of Liberal Arts and Sciences believes that undergraduate students should acquire elementary practical experience in a second language, should be introduced to the theoretical study of language structure, and should begin to develop an understanding of a second culture through study of that culture’s language.

As a means of achieving this objective, a student must satisfy a graduation requirement equivalent to the first year of university-level study in one world language (normally, completion of a two-semester sequence in any one world language). Students who have completed three or more years of high-school world language study are deemed to have completed the LAS World Language Requirement. These students may not enroll in or receive credit for 101 or 102 in those languages; test-out credit may be obtained by passing an appropriate examination or by completing an advanced sequence (200-level or higher) in that language. 101 or 102 may not be taken on a remedial basis.

Students who have completed more than one year but less than three years of high-school world language study may not enroll in 101 in the same language. These students may enroll in either a 102 course in that language, or in the case of Spanish, Span 97. Before enrolling in either Span 97 or a 102 language course, students are advised to take the on-line placement test available at www.language.iastate.edu. Span 97 is designed for students who need additional remedial work in the language at the first-year level (101-102) and are not planning to continue their language study at the second-year 201-202 level. Students who complete Span 97 with a passing grade will have fulfilled the LAS World Language Requirement. Students who have completed Span 97 and wish to pursue further study in Spanish at the 201-202 level may enroll in 102.

Students who have completed more than one year but less than three years of high-school world language study may satisfy the World Language Requirement by (a) passing the exam for credit at the 102 level, (b) receiving a passing grade in a 102 world language course, or (c) receiving a passing grade in a world language course at the 200-level or higher. For more information see Department of World Languages and Cultures. (Courses taught in English do not satisfy the World Language Requirement). Iowa State University accepts a record of academic performance in American Sign Language or certification of proficiency in American Sign Language as fulfillment of entrance or graduation requirements in world language for a baccalaureate degree.

Questions about the World Language Requirement and how to meet it should be directed to the Department of World Languages and Cultures. Credits applied toward the World Language Requirement cannot be used to satisfy the general education requirements, but students who have fulfilled the World Language Requirement may apply additional courses in world languages toward the appropriate general education areas. Majors in any world language are deemed to have fulfilled the college World Language Requirement. International students for whom English is a second language may satisfy the World Language Requirement by completion of Engl 150 and 250 at ISU with an average grade of C- or better. See World Languages and Cultures for additional information on international students.

Advanced Communication Skills

The continued development of communication skills following the sophomore year is the responsibility of the student’s major department. The department promotes this development by adopting measures to certify the writing proficiency of its own majors. Certification occurs upon satisfactory completion of a designated course in which writing is evaluated and is a significant component. This designated course may be by either a course required in the student’s program or an advanced writing course offered by the Department of English (e.g., Engl 302, 305, or 314).

General Education Areas

The central importance of a general education is reflected in the learning goals of each of three disciplinary areas. Whereas the courses in a major are designed to develop mastery of a specific field or discipline, courses in general education are designed to establish a strong, intellectual foundation for all specializations. The general education areas with their minimum credit requirements for the College of Liberal Arts and Sciences are:

Arts and Humanities—(Minimum 12 credits). The student should develop an understanding of human cultural heritage and history, and an appreciation of reasoning and the aesthetic value of human creativity.

Natural Sciences and Mathematical Disciplines—(Minimum 11 credits, including 3 in the mathematical disciplines and 8 in the natural sciences). The student should experience science as a rational search for understanding the structure and behavior of the natural world, and should appreciate mathematics as a valuable tool of the sciences and as an intrinsically important way of thinking.

Social Sciences—(Minimum 9 credits). The student should develop an appreciation of the principal methods of studying human behavior and an understanding of the structure and functioning of institutions.

Because students fulfill, in part, the learning goals of the area of their first major by taking courses in their programs of study, the minimum number of general education credits required in the area of the first major is reduced from that listed above by 3 credits. Students in Liberal Studies or Interdisciplinary Studies majors must complete the minimum requirements in all three areas. The list of majors falling within each area is available from the Office of the Dean, College of Liberal Arts and Sciences, and is posted on the web site of the College of Liberal Arts and Sciences.

Courses from the department of the first major may not be applied to general education requirements. Courses cross-listed with a course in the student’s first major may be used to satisfy either major requirements or general education requirements, but may not be used more than once. Interdisciplinary courses may be used to satisfy requirements in any area for which they have been approved, but a student may not apply the same course more than once.

Lists of approved courses are available on the web, from academic advisers or from the Office of the Dean, College of Liberal Arts and Sciences.

Advanced Credit Requirements

To obtain a baccalaureate degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 200 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.
The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student’s grade is C or higher. In addition, the average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher. Courses from the department of the first major listed on the degree program may not be counted in the general education areas.

**The Major**

Students must show they have achieved depth in a specialized area by completing successfully the requirements and learning goals of a major. A major is comprised of 24 to 48 credits in a specific discipline as determined by the faculty. Tracks within a major must have a common 24 credit core. Some courses outside the major discipline may also be required as supporting work for the major. (See Index for page reference to individual department and program requirements.)

The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student’s grade is C or higher. In addition, the average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher. Courses in the first major listed on the degree program may not be counted in the general education groups.

Courses meeting the requirement of additional majors may be counted in the general education groups. When choosing an additional major, students must confirm that the additional major is allowable (see list under “Double Majors”).

The major is chosen from the following list, which also indicates the degree(s) offered in the respective majors.

- Advertising, B.A.
- Anthropology, B.A., B.S.
- Biochemistry, B.S.
- Bioinformatics and Computational Biology, B.S.
- Biological/Pre-Medical Illustration, B.A.
- Biology, B.S.
- Biophysics, B.S.
- Chemistry, B.A., B.S.
- Communication Studies, B.A.
- Computer Science, B.S.
- Earth Science, B.A., B.S.
- Economics, B.S.
- English, B.A., B.S.
- Environmental Science, B.S.
- Environmental Studies (may be taken as a second major with the degree to be determined by the first major)
- Genetics, B.S.
- Geology, B.S.
- History, B.A., B.S.
- Interdisciplinary Studies, B.A., B.S.
- International Studies (may be taken as a second major with the degree to be determined by the first major)

**Double Majors**

Students may elect a second major from the departments and program areas listed above, or from a major field offered for the bachelor’s degree in another college of the university. Double majors between the following are not allowed: Chemistry with Biochemistry and Agricultural Biochemistry; Biology with Animal Ecology, Agricultural Biochemistry, Biochemistry, Genetics, and Microbiology.

The major departments must then approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major.

If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In all cases, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major.

Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences are not required to meet the Liberal Arts and Sciences General Education and World Language Requirements.

**Minor**

A minor, which is optional, must consist of at least 15 credits, with at least 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. (See Index, Minors.)

The following minors are offered by the college of Liberal Arts and Sciences:

- Advertising
- African American Studies
- American Indian Studies
- Anthropology
- Astronomy
- Biochemistry
- Biological Illustration
- Biology
- Chemistry
- Chinese Studies
- Classical Studies
- Communication Studies
- Computer Science
- Criminal Justice Studies
- Economics
- Emerging Global Disease
- English
- Entrepreneurial Studies
- Environmental Science
- Environmental Studies
- French
- Genetics
- Geology
- German
- Gerontology
- History
- International Studies
- Journalism and Mass Communication
- Latin
- Linguistics
- Mathematics
- Meteorology
- Military Studies (Army Reserve Officers’ Training Corps)
- Music
- Music Technology
- Performing Arts
- Philosophy
- Physics
- Political Science
- Psychology
- Religious Studies
- Russian Studies
- Sociology
- Spanish
- Speech Communication
- Statistics
- Technical Communication
- Technology and Social Change
- Women’s Studies

A student may earn two degrees in the Liberal Arts and Sciences curriculum with two appropriate majors and at least 30 additional credits. Either the B.A. or the B.S. in this curriculum may be earned with the Bachelor of Music. A major in Liberal Arts and Sciences may not be added to a Bachelor of Liberal Studies or a Bachelor of Music degree. Any degree offered by this college may be earned together with a degree with a major in any other college of the university. For the requirements for two degrees, see Index, Bachelor’s Degree Requirements.
Courses applied toward the general education groups may be used to meet the requirements of a minor. (For restrictions, see Index, Minors.) If a student declares a minor and completes the requirements specified by the offering department/program, the minor will be recorded on the transcript.

**Electives**

Students will take additional courses, freely elected, sufficient to accumulate a total of 120 credits. These additional courses together with the general education courses may be used to meet the requirements of a minor or of another major, provided that they are taken on a graded basis.

**Planning the Program of Study**

Careful, comprehensive planning is important for meeting graduation requirements and taking advantage of the resources offered by the university. Each student is encouraged to work with his or her academic adviser in developing a four year plan as soon as possible after declaration of the major. A degree audit listing all completed courses and those remaining to be taken for fulfillment of the degree requirements in the student’s chosen major is provided to the student and the adviser each semester. The student should review the audit each semester and consult with the adviser when changes are required. Any changes to the audit must be approved by the academic adviser and by the dean’s office. It is essential that the audit be reviewed and updated in a timely fashion in order to avoid delay in the student’s graduation.

During the first year, students should meet proficiency requirements in English and in library. They should also make progress toward meeting the general education requirements, a large part of which should be completed by the end of the second year. The third and fourth years should emphasize completion of the major (and minor, if elected) and of general education requirements, and should give the student an opportunity to take electives.

**Academic Advising Learning Outcomes**

Through their experience with academic advising, students will:

- Develop an understanding of the structure, application, and goals of a liberal arts education in relation to their academic development.
- Be able to formulate appropriate questions, seek information, and evaluate and apply academic advice.
- Know the requirements, policies and protocol of the university, college, and department as they relate to their educational experience.
- Understand how degree programs can be enhanced by study and experiences tailored to their intellectual and personal goals.
- Be able to identify and utilize university resources effectively to:
  - Satisfy degree requirements
  - Plan programs of study, including selection of appropriate courses and registration
  - Discover how interests, skills and goals connect to fields of study and careers
  - Link curricular and co-curricular activities
  - Research and prepare for advanced study and/or careers
- Share responsibility for a mentor-mentee relationship between advisee and adviser.

**The Open Option**

Many students entering Iowa State University are not ready to declare a major. They want time to become familiar with the academic opportunities that the university offers and to determine the best match between their academic interests and abilities. These students enter Iowa State University as Open Option majors.

The Open Option experience is designed to help students explore majors and careers, become acquainted with the entire university, and make successful adjustments to the academic expectations of Iowa State. Open Option students are assigned academic advisers in the Liberal Arts and Sciences Student Academic Services Office. These advisers help students with academic and career development.

During the first year, an orientation class introduces them to all of the colleges and majors on campus. A career development class in the second semester guides students in selecting a major and career that match their academic and personal goals. Open Option majors also have the opportunity to be members of a learning community with other Open Option students.

Aided by their adviser, Open Option students select courses that allow them to sample their academic interests before committing to a specific university major. Open Option students are encouraged to declare this major by the end of the first year. In addition, students who may have started in a specific field and have discovered it is not meeting their needs may transfer into Open Option for a semester or two while they decide on a new major.

**Honors Program**

For information on the Honors Program in the College of Liberal Arts and Sciences, see Index, Liberal Arts and Sciences, Cross-Disciplinary Programs, Honors Program.

**Reserve Officers’ Training Corps Programs (ROTC)**

The College of Liberal Arts and Sciences also offers students the opportunity to combine their academic programs with ROTC programs in the Military Science (Army), Naval Science, and Air Force Aerospace Studies).
Teacher Licensure

Teaching licenses are issued by the Iowa Board of Educational Examiners. The Recommending Officer for the ISU University Teacher Education Program submits each candidate file after that candidate is determined to be eligible for licensure. Teaching licenses are issued for a specific teaching level, e.g., K-6 or 7-12. A subject area endorsement is listed on the candidate's license. The licensee may have multiple subject area endorsements listed.

Students in the College of Liberal Arts and Sciences who complete the approved licensure program in music education (BM degree with Vocal K-12 option or Instrumental K-12 option) may apply for a teaching license that allows them to teach music in grades K-12. Students who plan to teach in secondary schools (grades 7-12) may qualify for a license by completing an approved licensure program in one of the following LAS majors:

- Biology
- Chemistry
- Earth Science
- English
- French
- German
- History
- Spanish (Latin & Russian endorsements)
- Mathematics
- Physics

Students may also add these additional endorsements to their primary license:

- English as a Second Language
- General Science
- Physical Science
- Social Studies
- Speech Communication

For further information, see Index, Teacher Education.

Preprofessional Programs

Students in the College of Liberal Arts and Sciences may participate in preprofessional programs in human health-related fields, law, and theology by taking the courses required for admission to professional schools. Students may enter the college with the designation Premed, Prelaw, or Preprofessional Health Programs. Most will earn a bachelor's degree by choosing a major and meeting the requirements for the major while taking the preprofessional courses.

Others will spend one to three years as students in the college before transferring to a professional school to which they have applied and been accepted. For further information, see Index, Preprofessional Study.

Experiential Learning (Internship/Co-op Program)

The Experiential Learning (Internship/Co-op) Program assists students in gaining career-related experience while going to school. Internships/Co-ops provide students with the opportunity to gain specific skills, apply academic knowledge in practical situations, pretest their career choice, earn a salary, and establish a network of professional contacts.

Most internships are full-time and last for a semester or a summer, but a part-time experience is possible. Students wishing to receive academic credit for their internship must make arrangements with a faculty member in their major department. In contrast, co-op students work full-time on an extended basis (work two semesters) or on an alternating basis (work, school, work, etc.) during any semester (fall, spring, summer).

It may take students participating in the Experiential Learning (Internship/Co-op) Program an additional semester or more to complete their academic curriculum requirements. For additional information, contact Business/Liberal Arts and Sciences Career Services.

Curriculum for Bachelor of Music

The Department of Music offers a Bachelor of Music degree (B.Mus.) as well as a Bachelor of Arts degree in music. For information about both degrees, see Music, Courses and Programs.

In order to receive teacher certification in music, students must earn the bachelor of music degree.

Candidates for the bachelor of music will complete the following requirements.

- **Cr.**
  - 38.5-46.5 General education
  - 47 Music core
  - 31-52.5 Music option

(Students must select one of the following options: music education [vocal or instrumental], performance [voice, piano, organ, string instruments, wind or percussion instrument], or composition.)

Curriculum for Bachelor of Liberal Studies

The LAS College administers a bachelor's degree program in Liberal Studies. This degree, the bachelor of liberal studies (B.L.S.), was established by the three Iowa Regent universities to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals.

For specific degree requirements, see Liberal Studies, Courses and Programs.

Curriculum for Software Engineering

A bachelor of science degree in software engineering is jointly administered by the Department of Electrical and Computer Engineering (College of Engineering) and the Department of Computer Science (College of Liberal Arts and Sciences). The program is aimed at creating high-quality software in a systematic, controlled, and efficient manner. The specific objective of the program is to educate students on principles, processes, techniques, and tools for producing, analyzing, specifying, designing and evolving software. A broader objective is to cultivate among students intellectual curiosity, problem solving skills, good learning habits, effective communication skills, leadership, and teamwork.

This interdepartmental program enables students to take a range of Software Engineering courses, as well as elective courses from both Computer Science and Computer Engineering as part of their degree program.

For specific degree requirements, see Software Engineering, Courses and Programs.
College of Veterinary Medicine

John U. Thomson, Dean
Donald D. Draper, Associate Dean for Academic and Student Affairs
Donald L. Reynolds, Associate Dean for Research and Graduate Studies
Eldon Uhlenhopp, Interim Associate Dean for Outreach and Operations
vetmed.iastate.edu/

Departments of the College
Biomedical Sciences
Veterinary Clinical Sciences
Veterinary Diagnostic and Production Animal Medicine
Veterinary Microbiology and Preventive Medicine
Veterinary Pathology

Other units of the college include the Veterinary Teaching Hospital, Veterinary Diagnostic Laboratory, Veterinary Medical Research Institute, Veterinary Education and Technology Services and Office of Curricular and Student Assessment. The college participates in interdisciplinary graduate programs in genetics; molecular, cellular and developmental biology; toxicology; immunobiology; and neuroscience.

Objectives of the Curriculum
The instructional objective of the College of Veterinary Medicine is to enable students to assume vital roles in society as productive health care providers and biomedical scientists. Such an education provides students with general learning, communication, and problem solving abilities; veterinary medical practice and research skills; and professional and ethical values.

The curriculum incorporates basic biomedical and clinical principles, clinical decision making skills, and exceptional clinical experience in small animal medicine and surgery, equine medicine and surgery, food animal medicine and surgery, and production animal medicine. Companion animal medicine and surgery are provided within the regionally recognized referral hospital through the community practice unit and equine field services. The college is located in one of the most intensive livestock-producing areas in the United States. Because of this, students engage in extensive food supply veterinary medicine experiences and numerous diagnostic cases.

The professional curriculum is a four-year course of study leading to the doctor of veterinary medicine degree. Each of the first three years of the curriculum consists of two semesters while the fourth year has three semesters. Students are admitted into the professional curriculum after completing a minimum of 60 semester credits of required undergraduate coursework.

A strong and reputable basic science education during the first two years of the professional curriculum prepares veterinary students for a wide range of clinical experience during the last two years of the educational program. Fourth year students may choose to enhance their education by earning clinical elective credits at approved government agencies, research laboratories, veterinary practices and other university hospitals. Outstanding research programs in infectious diseases, food safety, neuroscience, immunoparasitology, evidence-based medicine, and many other areas provide opportunities for qualified students to participate in research.

Concurrent D.V.M./M.S., D.V.M./Ph.D., D.V.M./M.P.H. programs are available for qualified students who wish to obtain both veterinary and graduate degrees. Students must have a bachelor’s degree or a minimum of 128 semester credits in undergraduate and professional curricula in order to participate in the concurrent DVM/graduate degree program. Admission to the concurrent degree program is subject to the approval of the deans of the College of Veterinary Medicine and the Graduate College.

The college is an important recruiting center for employers seeking veterinarians for private practice; industry; educational institutions; international agencies; federal, state and local governments; the armed forces; departments of public health; zoological gardens; and other related fields of professional activity. Graduates are highly sought after and typically have multiple employment offers upon graduation. Career services and an online job board are available for students.

Pre-veterinary Medicine Preparation
Admission Requirements
The College of Veterinary Medicine seeks students with diverse backgrounds and encourages students to enroll in baccalaureate programs in the college of their choice.

Undergraduate students are strongly encouraged to complete a bachelor’s degree before applying to the College of Veterinary Medicine. Because veterinarians have varied career options, when deciding on an undergraduate major, the student should consider the area of veterinary medicine which interests them. For example, those who desire a career in clinical practice may wish to pursue a degree in biological science, animal science, agricultural economics, business, social science or humanities. Students with an interest in zoo or wildlife veterinary medicine may want to look at animal ecology, environmental studies or zoology. Future researchers may wish to consider genetics, molecular biology, microbiology, or biochemistry. Students who desire a career in public health (USDA, FDA, etc) or government (legislative/policy) may find benefits in any of the biological sciences or in political science. A degree in education may be valuable to those who envision themselves as educators in a College of Veterinary Medicine. These examples are only suggestions and are but a few of the many possibilities.

For the most current information regarding applications and admission to the College of Veterinary Medicine, please refer to the College web site at www.vetmed.iastate.edu/.

Applicants for admission to the College of Veterinary Medicine must have attended an accredited college or university, have completed 40 semester credits prior to the deadline for filing an application for admission, and have completed 80 semester credits prior to the end of the spring term of the year in which the applicant seeks to be admitted to the College of Veterinary Medicine.

All science requirements should be fulfilled by the time of application or scheduled for completion by the end of the fall term in which the applicant applies. However, if necessary, the applicant may complete up to two required science courses during the spring term prior to matriculation.

Any required science courses taken the spring term prior to matriculation requires a grade of B (3.00) or better to fulfill the requirement. Remaining non-science required courses must be completed by the end of spring term prior to matriculation with a grade of C (2.00) or better. Required courses may not be taken during the summer prior to entering the program.

Credits earned must include the following Iowa State semester course offerings or their equivalents:

English Composition One year of composition or writing emphasis courses. May include business or technical writing.
Engl 150, 250, 302, 309, or 314 6 cr.

Oral Communications May include public speaking, interpersonal communication, group or organizational communication or speaking emphasis courses.
Sp Cm 212, 223, or 312 or ComSt 214 or Ag Ed 311 3 cr.

General Chemistry with Laboratory* One year series for biological science majors with one semester lab.
Chem 177-177L, 178 7 cr.

Organic Chemistry with Laboratory* One year series with one semester lab.
Chem 331, 331L, 332 7 cr.

Biochemistry* One semester (no lab required)
BBMB 301 3 cr.

General Physics with Laboratory* First semester of a two-semester series with lab. Must include mechanics, fluids, heat and thermodynamics, vibrations, waves and sound.
Phys 111 4 cr.

General Biology with Laboratory* Two semester series with lab each semester. A Bachelor’s degree in Biology fulfills this requirement.
Biol 211, 211L, 212, 212L 8 cr.
Applicants must apply using the Veterinary Medical College Application Service (VMCAS). The VMCAS application may be found online at the VMCAS website (www.aavmc.org under VMCAS). Those applying through VMCAS also need to complete the ISU Supplementary Application found at the College of Veterinary Medicine website. The deadline for filing the VMCAS application, evaluations and transcripts is October 1. The supplemental application, and processing fee are due to the College of Veterinary Medicine on Admissions.

For further information on these programs and contracts, please visit the College of Veterinary Medicine at www.vetmed.iastate.edu and click on Admissions.

Curriculum in Veterinary Medicine

Graduation Requirements

To be awarded the degree doctor of veterinary medicine, candidates must have passed all required courses in the curriculum in veterinary medicine, have earned at least 4 elective credits on a graded basis of A, B, C, D while enrolled in the College of Veterinary Medicine, and have at least a 2.0 grade-point average in the veterinary medicine curriculum.

Required Courses in the Professional Program

BBMB 420—Physiological Chemistry
BMS 330—Principles of Morphology I
BMS 331—Principles of Morphology II
BMS 333—Biomedical Sciences I
BMS 334—Biomedical Sciences II
BMS 337—Neurobiology
BMS/VCS 339—Clinical Foundations I
BMS 345—Case Study I
BMS 346—Case Study II
BMS 354—General Pharmacology
BMS 443—Pharmacology and Therapeutics
VCS 311—Veterinarian in Society I
VCS 312—Veterinarian in Society II
VCS 313—Veterinarian in Society III
VCS 314—Veterinarian in Society IV
VCS 315—Veterinarian in Society V
VCS 385—Seminar
VCS 391—Clinical Imaging
VCS 393—Principles of Surgery
VCS 394—Principles of Surgery Lab
VCS 395—Small Animal Surgery
VCS 396—Anesthesiology
VCS 399—Ophthalmology
VCS 436—Small Animal Internal Medicine
VCS/VPAM 440—Introduction to Clinics
VCS 444—Small Animal Medicine
VCS 445—Equine Medicine
VCS 448—Diagnostic Imaging and Radiobiology
VCS 449—Junior Surgery Laboratory
VCS/VPAM 450—Disturbances of Reproduction
VPAM/V PTH 426—Veterinary Toxicology
VPAM 445—Clinical Medicine
V MPM 378—Case Study IV
V MPM 380—Veterinary Immunology
V MPM 396—Veterinary Microbiology
V MPM 387—Veterinary Virology
V MPM 388—Public Health and the role of the Veterinary Profession
V MPM 437—Infectious Diseases and Preventive Medicine
V PTH 342—Anatomic Pathology I
V PTH 372—Anatomic Pathology II
V PTH 376—Veterinary Parasitology
V PTH 377—Case Study III
V PTH 409—Introduction to Veterinary Cytology and Laboratory Techniques
V PTH 425—Clinical Pathology

Fourth Year

The fourth year of the veterinary medical curriculum is designed to be flexible yet provide a broad based clinical education involving all domestic species of animals. All students participate in rotations that are considered fundamental to any species orientation that the student might choose. In addition, students can participate in rotations focused on small animals, horses, or food animals. Students may obtain clinical elective credits by repeating on-campus rotations or participating in approved off-campus preceptorships at government, private or public agencies; other universities; or private veterinary practices.

Students may choose from the following list of clinical rotations.

Anesthesiology
Beef Production Medicine
Cardiology
CDC Epidemiology
Clinical Microbiology
Clinical Pathology
Community Practice
Dairy Production Medicine
Dermatology
Diagnostic Laboratory
Equine Field Services
Equine Medicine
Equine Surgery
Farrier
Food Animal Medicine and Surgery
Food Supply Field Services
Intensive Care/Emergency Medicine
Necropsy
Neurology
Oncology
Ophthalmology
Orthopedic Surgery
Public Health Laboratory
Radiology
Small Animal Medicine
Small Ruminant Production Medicine
Soft Tissue Surgery
Swine Production Medicine
Theriogenology

Reinstatement

Any student who voluntarily withdraws from the College of Veterinary Medicine or who is dismissed from the College of Veterinary Medicine, after having successfully completed one or more semesters forfeits his/her standing and must make written application for reinstatement to this college a minimum of 60 days prior to the opening of the semester for which they seek to re-enter. Any student who voluntarily withdraws from the College of Veterinary Medicine prior to completion of one semester must re-apply for admission to the college in the general applicant pool.
Graduate College

www.grad-college.iastate.edu/

David K. Holger, Dean
George A. Jackson, Assistant Dean
Carolyn Payne, Assistant Dean

The Graduate College and graduate faculty at Iowa State University are responsible for the quality of graduate education, for administering students’ graduate programs, and for promoting research support from various governmental, industrial, and private agencies. The graduate faculty in various programs handle admission and classification of graduate students, establish requirements for advanced degrees, and have charge of instruction and research at the graduate level. Graduate faculty members also teach graduate courses, serve on program of study (POS) committees, and direct work of master’s and doctoral students. All graduate courses offered for major or nonmajor credit are taught by graduate faculty members or graduate lecturers.

Graduate study was offered soon after the university was founded, and the first graduate degree was conferred in 1877. Experimentation and research also started early, first in agriculture and shortly thereafter in home economics, engineering, science, and veterinary medicine. In 1913, the graduate faculty was organized formally and an executive graduate committee was appointed. In 1915, the graduate faculty held its first meeting, and in 1916, it granted the first doctor of philosophy degree.

Graduate education is vital to the quality of university teaching. The creative efforts of graduate faculty members and graduate students result in knowledge necessary to help society solve problems in educational, scientific, technological, and socio-economic areas. The Graduate College encourages educational exchange and contact with undergraduate areas of the university to promote improved teaching on both the undergraduate and graduate levels. A part of this exchange is accomplished by the publication of books and technical articles which are made possible by graduate research.

The degrees master of arts, master of science, master of engineering, master of community and regional planning, master of business administration, master of architecture, master of arts in teaching, master of accountancy, master of agriculture, master of business, and master of public administration, and the master of school mathematics.

The Graduate College Handbook lists policies and procedures of the Graduate College. It is available at the Graduate College’s Web site: www.grad-college.iastate.edu.

Admission

All degree-seeking graduate students must have graduated with a bachelor’s or master’s degree from a regionally accredited U.S. institution or from a recognized foreign institution where the requirements for the bachelor’s degree or its equivalent are similar to those at ISU. Additionally, each applicant must be accepted at ISU by the major program, the Office of Admissions, and the Graduate College. For information concerning graduate study in a particular academic discipline, prospective students should correspond with the chair of the major program in which they wish to study.

Iowa State University has a shared application process, which means certain items are sent (electronically or in print form) to the Office of Admissions and other items are sent to the graduate program to which the prospective student is applying. Detailed instructions are available at https://www.applyweb.com/apply/isu/. Students are also encouraged to check the Program Requirements Web page on the Graduate College Web site at http://www.gradcollege.iastate.edu/programs/APprograms.php for mailing instructions and deadlines for each program.

The nonrefundable application fee is $30 ($70 for international applicants). An electronic application is required to apply to ISU’s graduate programs; the form and necessary instructions are available at https://www.applyweb.com/apply/isu/. The application fee is required of all applicants except those who have attended Iowa State as undergraduates, or those applying for admission in the nondegree admission status. Iowa State requires official academic records and statements of all degrees earned from all institutions attended since secondary school. Faxed, scanned, and notarized copies are not considered official. That each previous college or university attended provide official transcripts of grades and credits earned, and request that the institution from which the degree was granted provide a statement of the degree received and the applicant’s quartile class rank, if available from the institution.

Many programs have very early application deadlines. For more details, check program deadlines at www.grad-college.iastate.edu/programs/APprograms.php.

Categories of Graduate Admission

An applicant pursuing an advanced degree must be recommended by the program in which he/she will be pursuing an advanced degree and must be approved by the Dean of the Graduate College. There are three admission categories for students who wish to pursue an advanced degree:

Full Admission status may be granted to an applicant who either has achieved a grade point average (GPA) of 3.0 or greater (on a 4.0 scale), or ranks in the upper one-half of his or her undergraduate class.

Provisional admission status may be granted to applicants who meet the requirements for full admission (listed above), but have academic or prerequisite deficiencies to remedy.

Transfer from provisional admission to full admission status requires the completion of the graduate English requirement, completion of the coursework prescribed to remedy the background deficiencies with a grade average of B or better, and the written recommendation of the major professor and approval by the Dean of the Graduate College.

Restricted admission status may be granted to an applicant who does not satisfy the formal university requirements for full admission status and/or lacks undergraduate preparation in a field related to the graduate field of study. Restricted admission may also be granted to graduates of non-English-speaking foreign institutions, even if the student meets the university requirements for full admission status. Advancement from restricted to full admission status requires completion of 9 semester credits of graduate level course work as a graduate student with a cumulative grade average of B or better and satisfaction of the Graduate College English requirement. A recommendation is submitted in writing to the Graduate College by the major professor and must be approved by the Dean of the Graduate College.

Graduate Admission Without a Declared Major

Admission without a declared major is a category for graduates of regionally accredited institutions in the United States who do not intend to seek an advanced degree from Iowa State University. Such students usually include:

1. Those who intend to transfer graduate credit earned at Iowa State University to other institutions.
2. Those who intend to use graduate credits earned for professional certification.
3. Those who enroll for personal satisfaction.
4. Those who enroll occasionally in off-campus graduate courses. Students who wish to apply to Iowa State University without a declared major need to contact the Office of Admissions, 100 Enrollment Services Center (1-800-262-3810) for the nondegree application form for students in this category. The application form is also available at the web site at www.admissions.iastate.edu/nondegree/
Applications and schedules for students with an undeclared major are processed directly by the Office of Admissions and the Graduate College office; no program approvals are generally required. (Applications and schedules for students declaring a major require program evaluation and approval.)

A student without a declared major who subsequently seeks full, provisional, or restricted admission must apply to and be accepted by a graduate program and by the Graduate College for degree study. A new application, the application fee (unless the student attended Iowa State University as an undergraduate), and transcripts from all colleges attended are required.

For those students originally admitted to the Graduate College on a nondegree basis, no more than 9 semester hours of graduate credit earned under the nondegree option may be applied if the student later chooses to undertake a graduate degree program. The student’s program of study committee will recommend to the Graduate College which courses (if any) taken on a nondegree basis may be included in the degree program.

**Graduate Admission of International Students**

An applicant who is a graduate of a recognized foreign institution is subject to the same criteria for admission as a graduate from an institution in the United States and may be recommended for the same admission categories described above except that of the nondegree option. International applicants for nondegree status may be recommended for admission at the discretion of the Graduate College dean. Application and admission deadlines for international students can be obtained from the Admissions web site at www.admissions.iastate.edu/apply/.

International students are required to show evidence of financial support and to carry adequate health and accident insurance while in residence.

**Admission Examinations**

Graduate Record Examination. The Graduate Record Examination (GRE) is not a university-wide requirement for all applicants. However, many programs require or recommend submission of GRE scores; individual program statements at www.grad-college.iastate.edu/programs/APprograms.php should be consulted for this information.

**English Requirements for Non-native Speakers**

Applicants whose native language is not English and who have not earned a bachelor’s or master’s in a country where the only official language is English are required to submit Test of English as a Foreign Language (TOEFL) scores as part of the admission process. A minimum score of at least 70 on the TOEFL internet-based test or 550 on the paper-based test is required by the Graduate College. International students may also submit IELTS (International English Language Testing System) scores in lieu of the TOEFL. The ISU Graduate College minimum is 6.5. Because many programs require higher TOEFL and/or IELTS scores, applicants should check directly with the program to which they desire admission or browse the Graduate College Web site at www.grad-college.iastate.edu/programs/APprograms.php.

Graduate students whose native language is not English and who did not graduate from a U.S. institution must take an English Placement Test at the beginning of their first semester of enrollment. This test is administered by the Department of English. A student who does not pass this examination is assigned to one or more courses in the English 99 and 101 series. This course work must be completed during the first year of study. (There is a developmental course fee for the English 99 course.) Non-native English speaking ISU graduate students who meet or exceed the TOEFL scores (640 or above on the paper-based test or 105 on the internet-based test) are exempted from taking the Enlish Placement Test. (Self-enrollment in English 99 or 101 courses remains possible.

A graduate student whose native language is not English but did graduate from a U.S. institution, may bring to the Graduate College the “Request for the Graduate College to Approve the Graduate English Requirement for a Student Whose Native Language is NOT English” form, available from the Graduate College or on the Graduate College’s Web site at www.grad-college.iastate.edu/forms/forms.html. Two conditions must be met: the student must have received a bachelor’s, master’s, or Ph.D. degree from a U.S. college or university and the language of instruction at that college or university must have been in English.

New teaching assistants whose native language is not English are evaluated for their ability to communicate effectively in English before their assistantship assignments are made. Tests of oral proficiency and teaching skills (SPEAK and TEACH) are given before the beginning of each semester. Department offices have a schedule of SPEAK/TEACH testing dates, or browse the SPEAK/TEACH Web site. Registration for the test is held in 1116 Pearson Hall the day before the test is administered. TAs and faculty with questions about SPEAK/ TEACH testing should call 515-294-1958 or 515-294-7996. A prospective teaching assistant who does not pass these tests is required to successfully complete course work and be retested. University Studies 180 is a series of communication courses designed to help new teaching assistants. Students focus upon pronunciation, listening, question-handling, teaching and learning skills, and analyze the culture of U.S. university life. Because enrollment is restricted, TAs cannot register for the courses online through AccessPlus. TAs must go the SPEAK/TEACH Office, 1116 Pearson by the first or second day of classes to obtain permission to enter the course by completing a course add slip.

**Graduate Appointments**

Graduate assistantships, fellowships, and research grants have been established at Iowa State University to encourage graduate study and to promote research. Such appointments and research opportunities are available through the various departments of instruction and the research centers on campus.

Graduate assistantships, the most common form of graduate student support, are available in three categories: the research assistantship, the teaching assistantship, or the administrative assistantship. A half-time graduate assistantship (20 hours per week) permits the holder to enroll for a maximum of 12 semester credits. Recipients of these assistantships are assessed fees at full Iowa resident rates regardless of the number of credits for which they register. These students may also be eligible for tuition scholarship awards (50% of in-state tuition for most master’s students and 100% of in-state tuition for most Ph.D. students and certain terminal masters students). Students who are graduates of a regionally accredited college or university in the United States or of a recognized institution in another country whose requirements for the bachelor’s degree are substantially equivalent to those of Iowa State University, who are admitted in the full or provisional admissions status, and who present the requisite undergraduate or graduate preparation, may apply for these appointments.

Students registered on a restricted basis or those placed on academic probation are eligible for assistantship appointment only on a term by term basis but are not normally eligible for a graduate tuition scholarship. Students admitted without a declared major are not eligible for assistantship appointments. Further information may be obtained by writing to the appropriate graduate program.

The satisfactory completion of one appointment, plus satisfactory academic performance, will ordinarily make a student eligible for reappointment. After a period of three years of full-time study for the master’s degree or five years for the doctorate, the student will normally be continued on assistantship support (shorter periods may be stipulated by the student’s program or department).

**Postdoctoral Study**

Opportunities are provided for postdoctoral study through the extensive research programs of the university. Inquiries should be directed to the appropriate program, institute, or to the Dean of the Graduate College.

**Graduate Study by Staff Members**

Any full-time member of the research, instructional, or extension staff at the rank of instructor, research associate, or assistant scientist may carry up to six course credits per semester and three credits per summer session, subject to the approval of the head of the program or section, and provided it does not interfere with other duties. This privilege may be extended to members of the research, instructional, or extension staffs at the rank of assistant professor with approval of the college dean and the Dean of the Graduate College. Staff members at the rank of professor or associate professor cannot become candidates for graduate degrees from ISU.
Registration

Graduate students are encouraged to register for courses on the ISU web site (www.iastate.edu) via AccessPlus. Students who are unable or who choose not to register through this system may use a walk-through registration procedure. Students who do not register by the published deadline for initiation of a schedule through the AccessPlus systems must use the walk-through procedure. For complete information on registration, see the ISU Schedule of Classes or the Registration Web site at www.iastate.edu/~Registrar/Registration/.

Credit Limits

Registration is limited to a maximum of 15 credits per semester. Schedules for graduate assistants on one-half time appointments are limited to a maximum of 12 credits. For full-time staff members, the limit is 6 credits. (Different credit limits apply during the summer session; see the Graduate College Handbook at www.grad-college.iastate.edu/publications/homepage.html for more details.)

Interim Registration

Registration for special work between semesters and during certain vacation periods cannot exceed one credit for each week that the student is in residence. For more information, consult the Graduate College Handbook.

Distance Education

Iowa State offers many graduate degree and certificate programs off-campus. For a listing of the degree programs, registrations for courses, and more information about distance education, consult the Iowa State University Web site at http://www.distance.iastate.edu/programs/homepage.php.

Other information about graduate requirements is available in the Graduate College Handbook at http://www.grad-college.iastate.edu/publications/ghandbook/homepage.html.

Doctoral Post Prelim (formerly Continuous Registration)

Even when Ph.D. graduate students have completed course work and residency requirements, they are required to register and pay tuition and fees, whether or not university facilities and equipment are used or staff is consulted—either in person or in absentia.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are used, the Ph.D. candidate must register for the appropriate number of credits in the major department or program and pay the appropriate graduate tuition and fees.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are not used, the Ph.D. candidate may register for Gr St 680 (Doctoral Post Prelim Registration) and pay the Doctoral Post Prelim Registration fee.

The Ph.D. candidate must be aware that registration for Gr St 680 is allowed only after the Ph.D. candidate passes the preliminary oral examination; is required only in the fall and spring semesters, and not during the summer term; is not allowed after the completion of the final oral examination; and is not sufficient registration for the term the preliminary or final oral examination is taken; and does not defer student loans.

If students take the final examination during the interim between terms (including the first day of classes), registration can be for the term either before or after the examination is held.

Auditing

Audit registration means taking courses without receiving formal credit. Audit provisions are as follows: Instructors must approve ALL audits; students must register for audits by day 10 of the semester; changes to or from an audit must be made in the first 10 days of the semester; students are assessed tuition and fees as though they were taking the course for credit; and the course DOES NOT count in determining full-time student status.

Audit courses do not appear on the student’s permanent record unless the “Request for Audit(s) to Appear on Transcript” form is completed and signed by the student, course instructor, and major professor. Copies of this form, which are available from the Graduate College or from the Graduate College’s web site at www.grad-college.iastate.edu/forms/forms.html, must be filed with the Graduate College, 1137 Pearson Hall.

After the fifth class day, if a student changes a regular course to an audit, that course will appear on the student’s permanent record as a drop. Audits are not acceptable as registration for loan deferments.

Graduate Courses Taken by Undergraduates

Certain graduate level courses listed in the ISU Catalog may be used in the program of study even though they were taken for graduate credit by the student as an undergraduate at Iowa State University.

The following conditions must be met:

1. The POS committee can request approval from the Dean of the Graduate College that up to nine hours of such credit be applied toward meeting advanced degree requirements (these courses must be clearly marked on the POS).

2. Credits earned in these courses must be in addition to those used to meet requirements for the bachelor’s degree and must have grades of B or better.

3. The student must be classified as an undergraduate and not a nondegree undergraduate (credits taken as a nondegree undergraduate student are not allowed).

4. The Graduation Office (10A Enrollment Services Center) should be contacted to determine that the courses were not taken as Graduation Office (10A Enrollment Services Center) indicating that the courses were not taken as a nondegree undergraduate student, were not used toward fulfillment of the undergraduate degree program and were graded B or better.

Undergraduate Admission to Concurrent Graduate Degree Programs

Several programs provide opportunities for well qualified ISU juniors and seniors majoring in those curricula to apply for admission to both a bachelor’s and master’s degree.

The graduate degree will be awarded only at the same time as, or after, the undergraduate degree is conferred. For complete listing of the concurrent degree programs, consult the table, “Concurrent Bachelor and Master Programs” in this section.

Students interested in a research career may apply for graduate research assistantships during their last two years of study. Students should contact the programs listed below about applying early in their undergraduate careers. Graduate students seeking admission to concurrent graduate degree programs in field other than these, plus any student with an interdisciplinary major, must submit a written proposal for an individualized program, co-signed by their advisers, to the Graduate College for review and approval. For more information about the application process and transferring credits, consult the Graduate College Handbook.

Veterinary Medicine Students in Concurrent Graduate Degree Programs

Students may be concurrently enrolled in the professional curriculum leading to the D.V.M. degree and in a graduate program leading to the M.S. or Ph.D. degree after completion of 90 semester credits. The graduate program may be in the College of Veterinary Medicine or in another college.

Interested students must complete a graduate application, complete a “Concurrent Enrollment Request” form available in the Graduate College office or on the web site at www.grad-college.iastate.edu/forms/forms.html, submit both forms with appropriate transcripts and letters of recommendation to the Office of Admissions (100 Enrollment Services Center).

Students interested in a research career may apply for graduate research assistantships during their last two years of study. Students should contact the programs listed below about applying early in their undergraduate careers. Graduate students seeking admission to concurrent graduate degree programs in field other than these, plus any student with an interdisciplinary major, must submit a written proposal for an individualized program, co-signed by their advisers, to the Graduate College for review and approval. For more information about the application process and transferring credits, consult the Graduate College Handbook.

Graduate Students in Concurrent Undergraduate Programs

Graduate students interested in enrolling in a concurrent undergraduate program should contact the Office of Admissions (100 Enrollment Services Center) to obtain admission information (even if the student has been previously...
admitted as an undergraduatel. A “Concurrent Enrollment Request” form should be obtained from the Graduate College Web site at www.grad-college.iastate.edu/forms/forms.html and circulated for the appropriate approvals. The student must be formally admitted both as a graduate student and as an undergraduate student. Official enrollment and fee payment will be as a graduate student. Credits transferred from the graduate permanent record to the undergraduate permanent record are no longer available for use on a graduate program of study.

Courses Taken as a Nondegree Undergraduate Student

A person classified as a “nondegree undergraduate” student may not use courses taken under that status in a graduate degree program. A student who has received the baccalaureate degree must register as a graduate student if he/she is to receive graduate credit for courses.

Grading

Grades are the permanent official record of a student’s academic performance. Iowa State uses A through F grading for most courses. S, P, and NP grades are given in some courses. The standard four-point scale is used to calculate a grade point average.

Grade Point Average (GPA)

All courses (even if they are undergraduate courses) taken as a graduate student will be calculated into the graduate GPA. The GPA is determined by dividing the number of grade points earned by the total number of ISU cumulative hours. The grade given when an incomplete (I) is resolved is figured into the cumulative grade point average, but not into a particular semester’s average. Marks of I, S, P, NP, T, and X are not counted in the grade point average; a mark of F (even if taken S/F) is counted in the grade point average. Creative Component/Research credits may be calculated in a student’s GPA. In the case of repeated courses, only the grade achieved the last time the course is taken is used in computing the grade point average. (However, grades in courses that are noted as repeatable courses in the catalog, such as certain repeatable seminars, will all be used in calculating the grade point average.)

Grading Research and Creative Component Credits

Creative Component/Research credits may be graded as A, B, C, D, I, S, or F. Plus and minus grades are optional. These credits are not calculated in a student’s GPA.

Pass (P)/Not Pass (NP) Course Credit

Pass/Not Pass courses are those that a student, with the approval of the major professor, may take for personal enrichment, but not for satisfying prerequisites or deficiencies in the undergraduate background. P/NP marks may not be used in a POS, nor do P/NP marks contribute to the student’s GPA. Full credit for P/NP courses is used in calculating tuition assessment and credit load limitations. For more information, see the Graduate College Handbook.

Satisfactory/Fail (S/F) Grading

S/F grading is not the same as P/NP grading. S/F grading is by instructor option; all students in a particular course receive S/F grading. P/NP grading is generally a student option. A P mark is equivalent to at least a D- grade whereas an S mark is equivalent to at least a B grade at the graduate level. No special registration procedures are required for S/F grading. An S mark in a course taken S/F is not counted in the grade point average, but an F mark in a course taken S/F is counted in the grade point average and is equivalent to an F in a regularly graded (A-F) course. No more than 20 percent of the total credits (excluding creative component, thesis or dissertation research) in the program of study may be earned on an S/F basis. S/F grading may be used only for approved courses offered as seminars, symposia, workshops, special topics, and research. Programs must submit requests for S/F grading to the Dean of the Graduate College. The Graduate College Curriculum and Catalog Committee reviews and approves or rejects all S/F courses.

Grievances about Grades

A graduate student who feels that a course grade has been unjustly assigned, and whose attempts to resolve the matter with the instructor have failed, may appeal through the grievance procedures described in the Graduate College Handbook.
If a graduate student does not maintain a cumulative 3.0 grade point average on all course work taken, exclusive of research credit, he or she may be placed on academic probation by the Dean of the Graduate College. Grades earned by graduate students in undergraduate courses are included in the calculation of the grade point average. Academic probation judgments are made on the basis of grades in course work only. New, first-term graduate students who fall below a 3.0 GPA at the end of their first semester will be given a one term grace period to bring their grades back to a 3.0 GPA. These students will receive a warning letter from the Graduate College.

While on academic probation a student will not be admitted to candidacy for a degree and if appointed to a graduate assistantship, the student will not receive a Graduate tuition scholarship unless approval is given by the student’s academic college. If a student is to qualify for a tuition scholarship, he/she must be removed from probation by the tenth class day of the term.

To ensure that registration does not take place without a review by the program, the Graduate College places a hold on future registrations by a student on probation. Before the student registers for each term, the program must review his or her record and recommend in writing if the Graduate College should permit further registration. Before graduation is approved, the student must complete all courses listed on the program of study with a minimum grade of C and have achieved a 3.0 GPA or greater.

**Master’s Degrees**

General requirements for all master’s degrees are as follows:

**General Requirements**

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master’s programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student’s program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

**Appointment of the Student’s Program of Study (POS) Committee**

New graduate students at ISU may be assigned a temporary academic adviser by the major program in the first semester of the student’s residence. This faculty member guides the student in selection of a field of study and in development of a graduate program of study until the major professor and POS committee are selected. After the POS committee has been selected, it guides and evaluates the student during the remainder of graduate study.

A master’s POS committee consists of at least three members of the graduate faculty. It must include two members, including the major professor, from the major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student’s master’s research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for the direction of a program of study. For more information on duties and makeup of the committee as well as changes to the committee makeup, see the Graduate College Handbook.

**Program of Study**

The student and major professor develop the program of study with the consultation and approval of the POS committee. This agreement between the student and the Graduate College should be submitted as early as possible for approval. It is recommended that the committee be formed and the POS form submitted as early as the second semester of graduate study. In no case can the committee be formed later than the term before the final oral examination.

**Residency**

There is no on-campus residency requirement for the master’s degree.

**Credits**

Unless otherwise noted, at least 30 credits of acceptable graduate work must be completed in all master’s programs. At least 22 graduate credits must be earned from Iowa State University unless noted in the descriptions under “Specific Master’s Degrees” in this catalog.

**Transfer Credits**

At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at the institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is the student’s responsibility to provide verification by letter from that institution that these graduate courses were not used to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better. Audits may be listed on the program of study, but do not carry credit.

**Major**

A major is an approved area of study leading to a graduate degree. The exact number of credits in a major is not prescribed.

**Minor**

Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. A student may not minor and major in the same field. Requirements for declared minors are determined by that minor program and the faculty member representing the minor field on the student’s POS committee.

The minor subject area must be tested at the final oral examination and cannot be placed on the transcript after graduation unless it was approved on the program of study, listed on all examination reports, and recorded on the “Application for Graduation” form (diploma slip). A minor cannot be added to a degree that has already been received.

**Department/Program Change, Transferring from One Major/Program/Department to Another**

Students who have been admitted to a graduate program and to the Graduate College may request to transfer at a later date to another department or program. Because graduate students are admitted to particular programs, transfers require the approval of both the receiving program and the Graduate College.

Students seeking transfer to another program or department should first discuss their wishes with the new program DOGE (Director of Graduate Education) to determine requirements and interest by the new program. When a student receives a favorable preliminary response from the new program, he or she should fill out the student portion of the form entitled “Request to Transfer from One/Major/Program/Department to Another” and submit this form to his or her current DOGE. The current DOGE will fill out the Current Program Information adding any comments he or she believes the new program should consider and forward the form to the proposed new program. This form is available from the department, the Graduate College, or the Graduate College web page.

The receiving program will generally give the student the same consideration and employ the same admissions standards that are used for original applications for admission and will expect the same application materials (transcripts, letters of recommendation, test scores, etc). During the process, the new and old programs and the Graduate College are authorized and encouraged to seek and disclose information related to the student's overall fitness for studies in the receiving program. Programs are authorized to inquire into the student's prior conduct at the university, both with the prior department and with the Dean of Students.

Upon departmental action (acceptance or denial), the request to transfer form must be sent to the Graduate College for approval. All parties
will receive a copy of the completed form from the Graduate College.

Students desiring to transfer from a degree-seeking status to a nondegree-seeking status need to fill out the "Request to Transfer from One Major/Program/Department to Non-degree" form and bring it to the Graduate College.

Students desiring to transfer from nondegree-seeking status to a degree-seeking status must be admitted by a program through the regular graduate admission process.

Curriculum Change from Active Graduate to Active Undergraduate Status

Individuals who are in good standing in the Graduate College and who wish to transfer to an undergraduate curriculum must contact the graduate classification officer (1137 Pearson Hall). The classification officer will consult with the student and determine the proper course of action.

Curriculum Change from Inactive Graduate to Active Undergraduate Status

Individuals who were admitted to the Graduate College more than one year previous and who do not have active graduate status but who wish to change their status from inactive graduate to active undergraduate, must follow the same procedures required of reentering undergraduate students and must begin the process by filing a completed "Undergraduate Reentry" form with the Office of the Registrar. When considering reinstatement, the undergraduate college may consider the student's overall fitness for continued studies including information about the student's conduct, employment and education since the student's last enrollment.

Individuals who do not have active graduate status and who first enrolled less than one year previous should first see the classification officer in the Graduate College.

Time Limits. It is expected that work for the master's degree shall be completed within five years. In special circumstances the student's POS committee may recommend that the Dean of the Graduate College extend these degree time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student's POS committee and the Graduate College. The inclusion in the student's program of study of course work that is beyond the time limits ("over-age" courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Application for Graduation. Students planning to graduate must submit an "Application for Graduation" form (diploma slip) to the Graduate Office by the end of the first week of the semester (fall or spring) in which he/she expects to receive the degree, or by the last day of spring semester when wishing to graduate during summer.

Before submitting this form, a student must have submitted and had approved by the Graduate College a "Recommendation for Committee Appointment" form and a "Program of Study" form. Also the student must have been fully admitted to a program and have met the Graduate English requirement if he/she is a non-native English speaker. Graduation may be delayed if the "Application for Graduation" form filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she should call the Graduate College (515-294-4531) and cancel the previously submitted "Application for Graduation" form. The student must then file a new form for the next planned term of graduation.

Thesis. A master's thesis is a scholarly composition that demonstrates the ability of the author to do independent and creative work. A thesis is required in all fields in which a master's degree is awarded, except where specific provision is made for a nonthesis degree program. A minimum of three research credits is required on every program of study for a thesis master's degree.

Responsibility for writing and editing of the thesis rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of theses. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the thesis to assure the highest level of quality when the student presents the thesis to the committee for final approval.

Copies of the thesis must be submitted to the members of the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please browse the Graduate College's web site (http://www.grad-college.iastate.edu/thesis/homepage.html) for requirements, revised fees, and other pertinent information.

Shortly after the submission of the "Application for Graduation" form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar's Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College's cancellation deadline.

Creative Component. Most nonthesis students must present substantial evidence of individual accomplishment (e.g., a special report, capstone course, integrated field experience, annotated bibliography, research project, design, or other creative endeavor). A minimum of two credits of such independent work is required on those programs of study for a nonthesis master's degree. Some programs require more credits. (For more information, contact the individual program or consult the Specific Master's Degrees section in this catalog.) The element of creative independent study must be explicitly identified on the program of study. The format of the creative component is determined in cooperation with the POS committee. As with a thesis, a creative component should be submitted to members of the POS committee two weeks before the final oral examination. However, no final submission of a creative component is turned in to the Graduate College for review and approval.

Final Oral Examination. Most master's candidates must pass final oral examinations. The final oral examination must be held by the final examination deadline date for the semester in which the degree is granted. All coursework in the program of study must either be completed or in progress before the final examination can be scheduled. This examination is oral; it may also include a written component if specified by the student's (POS) committee.

Graduate students must register at Iowa State for the equivalent of two credits, or for the R-credit course GR ST 600 (Examination Only) if no course work is needed, during the semester in which the final examination is taken. (Graduate students who are not required to take a final oral examination should complete all required coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.) Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not acceptable for the term of the final oral examination. If the examination is taken during the interim between terms (including the first day of classes), registration can be for either the term before or the term after the examination is held.

The candidate is responsible for initiating the "Request for Final Oral Examination" form, which must be submitted to the Graduate College at least three weeks before the examination. This form can be obtained only from the student's program/department. The entire POS committee must be convened for the final oral examination. For more information on the final oral examination, see the Graduate College Handbook.

Graduate Student Approval Slip for Graduation. Every candidate for an advanced degree is required to complete a "Graduate Student Approval Slip for Graduation" form. It is sent to the major professor or program to give to the student after the "Request for Final Examination" form is received and approved by the Graduate College. Signatures are required by the major program, the Graduate College Thesis specialist (for those completing a thesis), and the Graduate College. Final clearance for academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. An incomplete or non-report grade that a student receives for the term of graduation will result in removal from that term's graduation list. The student will need to complete a new Application for Graduation and Graduate Student Approval Slip for the new term of graduation. If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.
Specific Master's Degrees

The number of credits in a major for a master's degree will vary according to the degrees listed below. General credit requirements for all major's degrees include: a minimum of 30 graduate credits is required for all master's programs at ISU; at least 22 graduate credits must be earned at ISU unless noted in descriptions; any transfer of graduate credits from another institution must be recommended in the program of study by the POS committee; and graduate credit earned as a graduate student will be approved for transfer only if a B grade or better was earned. A transcript must accompany the POS form.

Master of Arts or Master of Science—Thesis

At least 30 credits of acceptable graduate work must be completed, not less than 22 of which must be earned from ISU. Students are expected to research and write a thesis that demonstrates independent and creative work. A minimum of 3 semester credits is required for thesis research.

Master of Arts or Master of Science—Nonthesis

In certain programs a nonthesis degree program is offered. (For more information on requirements, contact the individual program or department.) This option requires the satisfactory completion of at least 30 graduate credit hours of acceptable work (not including research credit), not less than 22 credits of which must be earned from Iowa State University, and satisfactory completion of a comprehensive final oral examination. In addition, every nonthesis master’s program must present substantial evidence of individual accomplishment (e.g., a special report, capstone course, integrated field experience, annotated bibliography, or other creative endeavor). A minimum of two semester hours of such independent work (referred to as the creative component) is required on every program of study for a nonthesis master’s degree and is applied toward the credit-hour requirement. This element of creative independent study must be explicitly identified on the program of study. Detailed requirements may vary with fields. Reference should be made to the Courses and Programs section in this catalog.

Master of Accounting

The Department of Accounting offers a 30-credit Master of Accounting graduate degree. The program requires 15 credits of graduate accounting courses, at least 9 credits of non-accounting graduate electives, a communications course, an international course from an approved list, and an optional creative component. At least 22 graduate credits must be earned at ISU. The degree is appropriate for any student wanting to pursue a variety of accounting careers. Additionally, the program is designed to help interested candidates meet the 150-hour education requirement for the CPA certification in Iowa. Since no final oral examination is required in the above professional program and its options, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Agriculture

The major in professional agriculture is an off-campus, nonthesis program leading to the master of agriculture degree. It is available to students wishing to pursue graduate study in agriculture without taking formal coursework on campus. The program is considered to be a terminal master’s degree. Students are required to take a minimum of two courses in each of three disciplines and complete 28 semester credits of formal coursework and four credits of creative component experience, resulting in a total of 32 graduate credits of coursework. At least 22 graduate credits must be earned at ISU. Courses are delivered via video-tapes, interactive video, world-wide web, on-and off-campus classes and workshops. Specific courses offered in the program and the location of the off-campus classes may be obtained from the departmental course listings, off-campus course catalog, or by contacting the Professional Agriculture Coordinator, 201 Curtiss Hall.

Master of Architecture

The Department of Architecture offers three master programs: M Arch I, M Arch II and M S A S. M Arch I (100 credits) is a non-thesis accredited professional degree in architecture. Students with an undergraduate degree other than architecture enroll in a 100-credit, seven semester program. Students with a B.A. or B.S. in architecture or other affiliated design fields are considered for advanced standing based on a review of their academic record. Students with advanced standing typically enroll for four semesters. Since no final oral examination is required in the M Arch I program, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Arts in Teaching

The M Arch II (30 credits) is a post-professional degree in architecture with a required graduate thesis. Students with a B Arch, M Arch I or equivalent professional degree in architecture or other affiliated design fields may apply for this degree.

Master of Science (30 credits) is an interdisciplinary research degree in architecture with a required graduate thesis. This degree is for students with bachelor degrees in various fields that are interested in conducting graduate-level research on the built environment. At least 22 graduate credits must be earned at ISU for all the above programs.

Since no final oral examination is required in the above professional program and its options, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Engineering

The M Arch III (30 credits) is a post-professional degree in architecture with a required graduate thesis. Students with a B Arch, M Arch I or equivalent professional degree in architecture or other affiliated design fields may apply for this degree.

Master of Science (30 credits) is an interdisciplinary research degree in architecture with a required graduate thesis. This degree is for students with bachelor degrees in various fields that are interested in conducting graduate-level research on the built environment. At least 22 graduate credits must be earned at ISU for all the above programs.

Since no final oral examination is required in the above professional program and its options, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Family and Consumer Sciences

The College of Human Sciences offers two nonthesis options leading to the degree master of family and consumer sciences. Both options are designed to enhance the skills of those holding the bachelor's degree so that they may meet the requirements of their present jobs or progress in their careers. The comprehensive option can be followed on- or off-campus and requires 36 graduate credits covering a variety of family and consumer sciences subject matter. The specialization option requires 36 credits and is offered on-campus from the following departments and programs: Dietetics, Family Financial Planning, Foodservice and Lodging Management, Gerontology, Human Development and Family Studies, Nutritional Sciences, and Textiles and Clothing. At least 22 graduate credit hours must be earned at ISU.

Master of Business Administration

The College of Business offers a 48 graduate credit-hour program leading to a nonthesis master of business administration degree.

At least 22 graduate credits must be earned at ISU. Students may select courses in the traditional business disciplines or choose areas of specialization in accounting, agribusiness, family financial planning, information systems, international business, marketing, and supply chain management.

Since no final oral examination is required, M.B.A. students should complete all required coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Community and Regional Planning

The master of community and regional planning degree requires a minimum of 48 graduate semester credits of coursework. At least 22 graduate credits must be earned at ISU. This degree is available as a thesis or nonthesis option.

Master of Education

For the master of education degree, a range of 30 to 40 graduate credits are required. At least 22 graduate credits must be earned at ISU. The student demonstrates an ability to perform independent study through the completion of a creative component or a field-based activity.

Master of Engineering

The academic standards and the general level of attainment are the same for the master of engineering and master of science degrees. Master of engineering programs are offered to meet the needs for professionally oriented programs on campus and for off-campus professionally oriented programs at locations with adequate library and laboratory facilities. An appropriate number of credit hours in design, laboratory work, computation, or independent study is required as evidence of individual accomplishment. Of the minimum 30 graduate credits required, 22 graduate credit hours must be earned at ISU. For those Master of Engineering programs that do not require a final oral examination, students should complete all coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.

Master of Family and Consumer Sciences

The College of Human Sciences offers two nonthesis options leading to the degree master of family and consumer sciences. Both options are designed to enhance the skills of those holding the bachelor's degree so that they may meet the requirements of their present jobs or progress in their careers. The comprehensive option can be followed on- or off-campus and requires 36 graduate credits covering a variety of family and consumer sciences subject matter. The specialization option requires 36 credits and is offered on-campus from the following departments and programs: Dietetics, Family Financial Planning, Foodservice and Lodging Management, Gerontology, Human Development and Family Studies, Nutritional Sciences, and Textiles and Clothing. At least 22 graduate credit hours must be earned at ISU.
Master of Fine Arts. For this degree a minimum of 54-61 graduate credits is required, including the completion of a thesis-exhibition or a thesis. At least 22 graduate credits must be earned at ISU.

Master of Landscape Architecture. The master of landscape architecture degree requires a minimum of 36 graduate credits and the satisfactory completion of a thesis or a creative component. At least 22 graduate credits must be earned at ISU.

Master of Public Administration. This is a professional degree program designed to provide training necessary for an administrator in a public or quasi-public bureaucracy. The MPA degree requires 37 graduate credit hours, which includes (a) 12 credit hours in Core Competency, (b) 12 credit hours in one of the Concentration areas, (c) 4 credit hours in other required courses, (d) up to 7 credit hours of electives, (e) 3 credit hours of Creative Component (a Capstone Project) or a minimum of 3 credit hours of research (thesis). Pre-service students are encouraged to obtain an internship for 3 credit hours. At least 22 graduate credits must be earned at ISU.

Master of School Mathematics. This degree is designed primarily for in-service secondary mathematics teachers. Its prescribed program of study requires 33 graduate credits, two of which come from the writing of an approved creative component. 15 from courses offered for graduate credit, and 13 from courses offered for nonmajor graduate credit. At least 22 credit hours must be earned at ISU.

Master’s Double Degree Programs

A double degree requires fulfillment of the requirements for two graduate majors for which two differently named master’s degrees and two diplomas are granted at the same time. For double degrees the final project (thesis or creative component) must integrate subject areas from both departments. One final oral examination must be held covering the combined thesis or creative component. Students planning to pursue double degrees must complete a double degree request form and submit it to the Dean of Graduate College for approval. Just one “Recommendation for Committee Approval” form and one “Program of Study (POS)” form need to be submitted for the two degrees. However, two “Application for Graduation” forms, one for each degree, will need to be submitted. All forms should show clearly that the student is enrolled in a double-degree program.

Like other master’s programs, three graduate faculty members can constitute a POS committee; however, POS committees for double degrees must include co-major professors from each of the majors. Although specific degree programs may require more, the program of study must include at least 44 hours of non-overlapping credit (22 for each major) in the two degrees.

Several such combinations are currently available: (1) Master of Architecture/Master of Business Administration; (2) Master of Architecture/Master of Community and Regional Planning; (3) Master of Community and Regional Planning/Master of Business Administration; (4) Master of Landscape Architecture/Master of Community and Regional Planning; (5) Master of Public Administration/Master of Community and Regional Planning; (6) Master of Public Administration/Master of Science in Information Assurance; (7) Master of Science in Statistics/Master of Business Administration; and (8) Master of Science in Information Systems/Master of Business Administration.

If a student outside one of the named areas is interested in an individually-developed double degree program, a written proposal for a double degree to serve those interests and needs must be submitted to the Dean of the Graduate College for review. See the Graduate College Handbook for more information.

Drake University Law School/ Iowa State University Combined Degree

To provide training in the complementary fields of law, political science, and economics with a minimum amount of academic duplication, special arrangements for combined degree programs have been approved with the Drake University Law School. ISU and Drake offer a combined J.D.-M.A. in political science and J.D.-Ph.D. in economics. Drake Law School students are permitted to transfer the equivalent of nine semester credits of specified law courses to ISU for nonmajor graduate credit. Because of the difference in grading systems, the Law School grades are transferred as passes, provided the student has achieved a grade of C or better in those courses at Drake for the political science program or a grade of B or better for the economics program.

Applicants for either of the combined programs must meet the regular entrance requirements of, and be admitted to, both the Drake Law School and the ISU Graduate College.

Doctor of Philosophy

General Requirements

The degree doctor of philosophy is strongly research oriented. The primary requirements for the degree are: (1) high attainment and proficiency of the candidate in his or her chosen field, (2) development of a dissertation which is a significant contribution to knowledge and which shows independent and creative thought and work, and (3) successful passing of detailed examinations over the field of the candidate's major work, with a satisfactory showing of preparation in related courses. General requirements for Ph.D. candidates follow.

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master’s or Ph.D. programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student’s program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student’s Program of Study (POS) Committee. The POS committee for a doctoral program consists of at least five members of the graduate faculty. It must include at least three members, including the major professor, from within the student’s major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student's dissertation research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for direction of the dissertation.

Changes to POS committee. Recommendations for changes in the POS committee must have the approval of the student, major professor, DOGE, and all committee members involved in the change (committee members who are on Faculty Professional Development Assignments, retired, or resigned do not have to sign) before seeking approval of the Graduate College. A form to seek approval is available in program offices or on the web at www.grad-college.iastate.edu/forms/forms.html. These changes must be approved by the Dean of the Graduate College before the preliminary or final oral examination is held. For more information on changes to the committee and to the Program of Study, see the Graduate College Handbook.

Program of Study. The student and the major professor develop the program of study with the consultation and approval of the POS committee. Early selection of a major professor, appointment of a POS committee, and development of a program of study are very important. It is recommended that the committee be formed as early as the second semester of graduate study. In no case can the committee be formed later than the term before the preliminary oral examination.

Credits. A minimum of 72 graduate credits must be earned for a Ph.D. degree. At least 36 graduate credits, including all dissertation research credits, must be earned at Iowa State University. At least 24 of these credits must be earned during two consecutive semesters or during a continuous period including two semesters and a summer session while in residence at the university. (This requirement does not apply to doctoral students who are employed more than half time at ISU). There is no specific university requirement regarding the number of credits to be taken inside or outside the major/program.
Transfer Credits. At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at that institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is that student’s responsibility to provide verification by letter from that institution that those graduate courses were not taken to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better.

Residency. At least 24 semester credits must be earned during two consecutive semesters or during a continuous period including two semesters and a summer session. This requirement does not apply to doctoral students who are employed at least half-time by Iowa State University and government laboratories located in Ames. Of the 72 graduate credits required for a Ph.D. at least 36 credits, including all dissertation research credits, must be earned under the supervision of the student’s POS committee.

Major. A major is the area of study or academic concentration in which a student chooses to qualify for the award of a graduate degree. Majors are listed at the end of this section of the bulletin. Opportunities also exist for majoring in more than one area of study (co-major or joint major programs).

Minor. Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student’s POS committee. The minor subject area must be tested at the preliminary oral and final oral examinations. A minor cannot be added to a program of study after the preliminary oral examination has been taken, nor can a minor be placed on the transcript after graduation, unless it was approved on the program of study, listed on all examination reports, and recorded on the “Application for Graduation” form (diploma slip). A student may not minor and major in the same field. A minor cannot be added to a degree that has already been awarded.

Time Limits. A student beginning a Ph.D. degree program at Iowa State with a master’s degree from another institution is expected to complete the Ph.D. within five years, while a student beginning a Ph.D. degree program without the master’s degree is expected to complete the program within seven years. If warranted, the Program of Study (POS) Committee may request by letter that the Dean of the Graduate College extend these time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student’s program of study committee and the Graduate College. The inclusion in the program of study of coursework that is beyond the time limits (“over-age” courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Preliminary Examination. The Graduate College requires a preliminary oral examination of Ph.D. degree students; most programs add a written portion to the preliminary oral examination. The Ph.D. degree preliminary oral examination rigorously tests a graduate student’s knowledge of major, minor, and supporting subject areas as well as the student’s ability to analyze, organize, and present subject matter relevant to the field. A “Request for Preliminary Examination” form must be submitted to the Graduate College by the major professor at least two weeks before the proposed date of the examination.

The following conditions should be met before the “Request for Preliminary Examination” form is submitted to the Graduate College: admitted to full admission status in a Ph.D. granting program, approved “Recommendation for Committee Appointment” form, approved POS form, English requirement met, not on probation, time limit not exceeded, qualifying examination (if required by program) passed, and registration for at least the equivalent of 2 credits, or for the R-credit course GR ST 600 (Examination Only) if no course work is needed, during the term in which the preliminary oral examination is taken. (Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not acceptable for the term of the preliminary oral examination.) A preliminary oral examination will not be scheduled for a student on provisional or restricted admission or on academic probation. Upon successful completion of the preliminary oral examination, the student is admitted to candidacy for the Ph.D. degree. If the graduate student fails all or part of the preliminary oral examination, the committee provides two options: gives a not pass and allows the student to retake the examination after six months or gives a not pass and does not allow the student to retake the examination. Six months must elapse between the first attempt and the next. The entire POS committee must be convened for the preliminary oral examination. The preliminary oral examination must be passed at least six months prior to the final oral examination. An exception to the rule is allowed if a request signed by the major professor(s) and the program’s DOG is approved by the Dean of the Graduate College.

Application for Graduation. Application for graduation should be made by the end of the first week of the semester (fall or spring) in which the student expects to receive the degree, or by the last day of the spring semester if graduation is planned during summer session. To apply for graduation, the student is required to submit to the Graduate College a signed “Application for Graduation” form, available in the program office or on the web at www.grad-college.iastate.edu/forms/forms.html. Before submitting this form, a student must have submitted and had approved by the Graduate College a “Recommendation for Committee Appointment” form and a “Program of Study” form. Also the student must have been fully admitted to a program and have met the Graduate English requirement. Graduation may be delayed if the “Application for Graduation” form filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she should call the Graduate College (515-294-4531) and cancel the previously submitted “Application for Graduation” form. The student must then file a new form for the next planned term of graduation.

Dissertation. A doctoral dissertation must demonstrate conclusively the ability of the author to conceive, design, conduct, and interpret independent, original, and creative research. It must attempt to describe significant original contributions to the advancement of knowledge and must demonstrate the ability to organize, analyze, and interpret data. In most instances, a dissertation includes a statement of purpose, a review of pertinent literature, a presentation of methodology and results obtained, and a critical interpretation of conclusions in relation to the findings of others. When appropriate, it involves a defense of objectives, design, and analytical procedures. Dissertation research should be worthy of publication and should appear in appropriate professional journals or in book form.

Responsibility for writing and editing of the dissertation rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of dissertations. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the dissertation, so as to assure the highest level of quality when the student presents the dissertation to the committee for final approval. Copies of the dissertation must be submitted to the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please browse the Graduate College’s web site (http://www.grad-college.iastate.edu/thesis/homepage.html) for new requirements, revised fees, and other pertinent information.

Shortly after the submission of the “Application for Graduation” form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar’s Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College’s cancellation deadline.
Graduate Majors

More information on each major can be found in the Courses and Programs section of this catalog under the department or program listed in parentheses after the degree information.

Accounting: M.Acc. (see Accounting)
Aerospace Engineering: M.Eng., M.S., Ph.D. (see Aerospace Engineering)
Agricultural Economics: M.S., Ph.D. (see Economics)
Agricultural Education: M.S., Ph.D. (see Agricultural Education and Studies)
Agricultural Engineering: M.Eng., M.S., Ph.D. (see Agricultural Engineering)
Agricultural History and Rural Studies: Ph.D. (see History)
Agricultural Meteorology: M.S., Ph.D. (see Agronomy)
Agronomy: M.S. (see Agronomy)
Analytical Chemistry: M.S., Ph.D. (see Chemistry)

Animal Breeding and Genetics: M.S., Ph.D. (see Animal Science)
Animal Ecology: M.S., Ph.D. (see Natural Resource Ecology and Management)
Animal Physiology: M.S., Ph.D. (see Animal Science)
Animal Science: M.S., Ph.D. (see Animal Science)
Anthropology: M.A. (see Anthropology)
Applied Linguistics and Technology: Ph.D. (see English)
Applied Mathematics: M.S., Ph.D. (see Mathematics)
Applied Physics: M.S., Ph.D. (see Physics and Astronomy)
Architectural Studies: M.S. (see Architecture)
Architecture: M. Arch., M. Arch./M.B.A., M. Arch./M.C.R.P. (see Architecture)
Art and Design: M.A. (see Art and Design)
Astrophysics: M.S., Ph.D. (see Physics and Astronomy)
Biochemistry: M.S., Ph.D. (see Biochemistry, Biophysics and Molecular Biology)
Bioinformatics and Computational Biology: M.S., Ph.D. (see Bioinformatics and Computational Biology)
Biomedical Sciences: M.S., Ph.D. (see Biomedical Sciences)
Biophysics: M.S., Ph.D. (see Biochemistry, Biophysics and Molecular Biology)
Biorenewable Resources and Technology: M.S., Ph.D. (see Biorenewable Resources and Technology)
Botany: M.S., Ph.D. (see Botany)
Business: M.S. (see Business Administration)
Business and Technology: Ph.D. (see Business and Technology)
Chemical Engineering: M. Engr., M.S., Ph.D. (see Chemical and Biological Engineering)
Chemistry: M.S., Ph.D. (see Chemistry)
Civil Engineering: M.S., Ph.D. (see Civil Engineering)
Computer Engineering: M.S., Ph.D. (see Computer Engineering)
Computer Science: M.S., Ph.D. (see Computer Science)
Condensed Matter Physics: M.S., Ph.D. (see Physics and Astronomy)
Creative Writing and Environment: M.F.A. (see English)
Crop Production and Physiology: M.S., Ph.D. (see Agronomy)
Diet and Exercise: B.S./M.S. only (see Food Science and Human Nutrition or Health and Human Performance)

Earth Science: M.S., Ph.D. (see Geological and Atmospheric Sciences)
Ecology and Evolutionary Biology: M.S., Ph.D. (see Ecology and Evolutionary Biology)
Economics: M.S., Ph.D. (see Economics)
Education: M.Ed., M.Ed. Practitioner, M.S., Ph.D. (see Curriculum and Instruction, Educational Leadership and Policy Studies)
Electrical Engineering: M.S., Ph.D. (see Electrical Engineering)
English: M.A. (see English)
Entomology: M.S., Ph.D. (see Entomology)
Environmental Science: M.S., Ph.D. (see Environmental Science)
Family and Consumer Sciences: M.F.C.S. (see Family and Consumer Sciences, Master of)
Family and Consumer Sciences Education: M.Ed., M.S., Ph.D (see Family and Consumer Sciences Education and Studies)
Fisheries Biology: M.S., Ph.D. (see Natural Resource Ecology and Management)
Food Science and Technology: M.S., Ph.D. (see Food Science and Human Nutrition)
Foodservice and Lodging Management: M.S., Ph.D. (see Hotel, Restaurant, and Institution Management)
Forestry: M.S., Ph.D. (see Natural Resource Ecology and Management)
Genetics: M.S., Ph.D. (see Genetics—Interdisciplinary)
Geology: M.S., Ph.D. (see Geological and Atmospheric Sciences)
Graphic Design: M.F.A. (see Art and Design)
High Energy Physics: M.S., Ph.D. (see Physics and Astronomy)
History: M.A. (see History)
History of Technology and Science: M.A., Ph.D. (see History)
Horticulture: M.S., Ph.D. (see Horticulture)
Human Computer Interaction: M.S., Ph.D. (see Human Computer Interaction)
Human Development and Family Studies: M.S., Ph.D. (see Human Development and Family Studies)
Immunobiology: M.S., Ph.D. (see Immunobiology)
Industrial and Agricultural Technology: M.S., Ph.D. (see Technology Systems Management)
Industrial Engineering: M.S., Ph.D. (see Industrial Engineering)
Information Assurance: M.S., M.S./M.P.A. (see Information Assurance)
Information Systems: M.S., M.S./M.B.A. (see Management Information Systems)
Inorganic Chemistry: M.S., Ph.D. (see Chemistry)
Integrated Visual Arts: M.F.A. (see Art and Design)
Interdisciplinary Graduate Studies: M.A., M.S. (see Interdisciplinary Graduate Studies)

Interior Design: M.F.A. (see Art and Design)

Journalism and Mass Communication: M.S. (see Journalism and Communication, Greenlee School of)

Kinesiology: M.S., Ph.D. (see Kinesiology)

Materials Science and Engineering: M.S., Ph.D. (see Materials Science and Engineering)

Mathematics: M.S., Ph.D. (see Mathematics)

 Meat Science: M.S., Ph.D. (see Animal Science, Food Science and Human Nutrition (offered as Ph.D. only jointly with Animal Science))

Mechanical Engineering: M.S., Ph.D. (see Mechanical Engineering)

Meteorology: M.S., Ph.D. (see Geological and Atmospheric Sciences)

Microbiology: M.S., Ph.D. (see Microbiology)

Molecular, Cellular, and Developmental Biology: M.S., Ph.D. (see Molecular, Cellular, and Developmental Biology)

Neuroscience: M.S., Ph.D. (see Neuroscience)

 Nuclear Physics: M.S., Ph.D. (see Physics and Astronomy)

Nutritional Sciences: M.S., Ph.D. (see Nutritional Sciences)

Operations Research (must be a joint major with Statistics): M.S. (see Industrial Engineering/Statistics)

Organic Chemistry: M.S., Ph.D. (see Chemistry)

Physical Chemistry: M.S., Ph.D. (see Chemistry)

Physics: M.S., Ph.D. (see Physics and Astronomy)

Plant Breeding: M.S., Ph.D. (see Agronomy)

Plant Pathology: M.S., Ph.D. (see Plant Pathology)

Plant Biology: M.S., Ph.D. (see Plant Physiology)

Political Science: M.A., (see Political Science)

Professional Agriculture: M.Ag. (see Professional Agriculture)

Psychology: M.S., Ph.D. (see Psychology)

Rhetoric and Professional Communication: Ph.D. (see English)

Rhetoric, Composition, and Professional Communication: M.A. (see English)

Rural Sociology: M.S., Ph.D. (see Sociology)

School Mathematics: M.S.M. (see Mathematics)

Science Education: M.A.T. (see Curriculum and Instruction)

Seed Technology and Business: M.S. (see Seed Technology and Business)

Sociology: M.S., Ph.D. (see Sociology)

Soil Science: M.S., Ph.D. (see Agronomy)

Statistics: M.S., M.B.A./M.S., Ph.D. (see Statistics)

Sustainable Agriculture: M.S., Ph.D. (see Sustainable Agriculture)

Systems Engineering: M.Engr. (see Systems Engineering)

Teaching English as a Second Language/Applied Linguistics: M.A. (see English)

Textiles and Clothing: M.S., Ph.D. (see Textiles and Clothing)

Toxicology: M.S., Ph.D. (see Toxicology)

Transportation: M.S. (see Transportation)

Veterinary Clinical Sciences: M.S. (see Veterinary Clinical Science)

Veterinary Microbiology: M.S., Ph.D. (see Veterinary Microbiology and Preventive Medicine)

Veterinary Pathology: M.S., Ph.D. (see Veterinary Pathology)

Veterinary Preventive Medicine: M.S. (see Veterinary Diagnostic and Animal Production Medicine)

Wildlife Biology: M.S., Ph.D. (see Natural Resource Ecology and Management)

Zoology: M.S., Ph.D (see Zoology)

Declared Minors

(in addition to the majors above which can also be minors)

Graduate Certificate Programs

A graduate certificate provides a mechanism for bestowing formal recognition of focused graduate study in a specialized area that is less comprehensive than required for a master’s degree. At Iowa State University, a graduate certificate may be earned either before, after, or concurrently with the master’s or doctoral degree. For more detailed information on certificate programs, browse the Graduate College web site at: www.grad-college.iastate.edu/publications/gchandbook/appendixd.html.

Advanced Medical Nutrition Therapy Certificate (see http://www.fshn.hs.iastate.edu/grad/certificate.php)

Biorenewable Resources and Technology Certificate (see http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/BRT-GradCert.html)

Community College Leadership Certification (see www.cclp.hs.iastate.edu)

Community College Teaching (see http://www.cclp.hs.iastate.edu/teaching_learning.html)

Dietetics Communication and Counseling Certificate (see http://www.fshn.hs.iastate.edu/grad/certificate.php)

Dietetics Management Certificate (see http://www.fshn.hs.iastate.edu/Graduate-Certificates/Grad-Cert/)

Environmental Engineering Certificate (see http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/environmental.html)

Family Financial Planning Certificate (see http://www.hs.iastate.edu/online/mfcs/ffp/homepage.php)

Food Safety and Defense Graduate Certificate (see http://www.fshn.hs.iastate.edu/grad/foodsafetycert.php)

Forensic Sciences Certificate (see http://www.chem.iastate.edu/certificate/)

Gerontology Certificate (see http://www.hs.iastate.edu/online/mfcs/gerontology/homepage.php)

Geographic Information Systems Certificate (see www.design.iastate.edu/GIS)

Graduate Student Teaching Certificate (see http://www.celt.iastate.edu/gstc/homepage.html)

Human Computer Interaction (see http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/hci.html)

Information Assurance Certificate (see http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/infas.html)

Power Systems Engineering Certificate (see http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/powersystems.html)

Principal Licensure (Pre-LEAD) (see http://wwwelps.hs.iastate.edu/edadm/edadmrmhp3-prelead.php)

Public Management Certificate (see www.pols.iastate.edu/mpa.shtml)

Seed Business Management (see http://www.seeds.iastate.edu/class/certificates.html)

Seed Science and Technology (see http://www.seeds.iastate.edu/class/certificates.html)

Special Education Certificate (see http://www.teacher.hs.iastate.edu/addtnl_endorsements.php)

Superintendent Licensure (see http://wwwelps.hs.iastate.edu/edadm/edadmrmhp3-acad.php)

Systems Engineering (see http://www.ede.iastate.edu/Graduate-Certificates/Grad-Cert/syscert.html)

TESL (Teaching English as a Second Language) Certificate (see http://www.public.iastate.edu/~apling/TESL_cert.html)
Courses and Programs

Information About Courses

Course Numbers
The courses in each department are numbered from 1 to 699, according to the following groups:

- 1-99 Courses not carrying credit toward a degree (zero credit).
- 100-299 Courses primarily for freshman and sophomore students.
- 300-499 Courses primarily for junior and senior students.
- 500-599 Courses primarily for graduate students, but open to qualified undergraduates.
- 600-699 Courses for graduate students.

Credits and Contact Hours
The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture or recitation per week for the entire semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes.

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture or recitation class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures and recitations. For example, Com S 103 is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

The term “Cr. an.” means that the amount of credit it is arranged in advance between the student and the instructor. The credit to be earned depends on the amount of work expected of the student, in accordance with the policy that some combination of teacher-student contact and outside work by the student involving at least three hours per week for the semester is required for each credit.

The term “Cr. R.” means that the course is required in a certain curriculum or as cognate to one or more other courses. It is also used for cooperative education courses and for some optional inspection trips, study tours, and professional development courses for which numerical credit is not granted. An R credit course does not carry numerical credit toward a student’s degree, but it does apply toward the degree. The R credit course is generally listed on the degree program as a requirement for a specific curriculum/major that must be completed prior to graduation. R credit courses may be graded using the A-F grading scale or the satisfactory/fail grading scale. All R credit courses are assigned a numerical value for purposes of enrollment certification. Requests by students to drop an R credit course will be processed as an administrative drop during period 2 and thus will not be counted against the student’s drop limit and will not appear on the student’s transcript. (See Index, Schedule Changes.)

Semester of Offering
Within each course description may be found one or more of the following letters: F. S. SS., indicating which term—fall, spring, summer session—of the academic year the course is offered. “Alt.” is the abbreviation for alternate. If there is sufficient demand, courses may be offered more frequently than announced. Insufficient demand or unforeseen staffing problems may result in the cancellation of announced offerings. Students are advised to refer to the Schedule of Classes or consult with departments for up-to-date course schedule information.

Course Prerequisite
A prerequisite indicates the specific academic background or general academic maturity considered necessary for the student to be ready to undertake the course. Prerequisites are usually stated in terms of specific courses, but equivalent preparation is usually acceptable. An instructor may, however, direct a student whose background does not meet the stated prerequisite, or its equivalent, to drop the course. Conversely, an instructor may waive the prerequisite for a course for which he or she is responsible. Thus, permission of the instructor is understood to be an alternate to the stated prerequisites in all courses.

It is university policy that the instructor shall inform the student at the beginning of each course if students who have not met the prerequisite requirements must drop the course. Course prerequisites are listed in the Schedule of Classes as well as in the Courses and Programs section of this publication.

Cross-listed Courses
A course, including its complete description, may be listed in two or more departments. The participating department or departments are noted in parentheses. Credit for the course may be obtained through any of the cross-listed departments.

Designators/Course Abbreviations
For abbreviations designating departments and programs See Index, Designators.

Dual-listed Courses
Dual-listed courses permit undergraduate and graduate students to be in the same class but to receive credit under different course numbers. Credit in the graduate course is not available to students who have received credit in the corresponding undergraduate course. Both graduates and undergraduates receive the same amount of credit for the course, but additional work is required of all graduate students taking the course under the graduate-level course number. This extra work may take the form of additional reading, projects, examinations, or other assignments as determined by the instructor. The instructor must be a member of the Graduate Faculty or a Graduate Lecturer. Each dual-listed course is designated in the catalog with the phrase “Dual-listed with,” although the student’s official transcript of credits, both graduate and undergraduate, does not identify dual-listed courses as such. There is a limit to the number of dual-listed course credits that may be used to meet the requirement for an advanced degree. (For information about procedures for requesting permission to offer dual-listed courses, faculty should consult the Graduate Faculty Handbook.)

Off-campus courses—Residential Credit
Iowa State University offers distance education courses over the Iowa Communications Network (ICN), by videotape and on the World Wide Web. These courses are the same as those offered on campus, carry residential credit, and are taught by ISU faculty members. Credit earned in off-campus courses becomes a part of the student’s academic record at Iowa State University and may be used to meet degree requirements in the same manner as credit earned on campus.

Priority Enrollment
High demand for courses in certain areas has necessitated enrollment management for some courses. When enrollment priority is established for a course, first consideration is given to students whose curriculum/major explicitly requires the course.

Special Course Fees
Courses for which special course fees are assessed are designated in the Schedule of Classes. Special course fees may be assessed for such extraordinary costs as materials fees (which may include consumable materials or equipment replacement), field trip expenses, developmental Math fees, and camp fees. In some cases, special course fee amounts vary from term to term. Additional information on camp fees and the developmental Math fee may be found in the fees and expenses section. See Index, Fees.

Graduate Programs

Graduate Major
A major in the Graduate College is the area of academic professional concentration, approved by the Board of Regents, in which the student chooses to qualify for the award of a graduate degree.

Graduate Area of Specialization
Areas of specialization are indicated in the graduate statements of some departments. This is a subdivision of a major in which a strong graduate-level program is available. When approved by the Graduate College, such areas of specialization are shown parenthetically after the major on official records, including transcripts and thesis/dissertation title pages.

Interdepartmental Programs
Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.

Nonmajor Graduate Credit
All courses included on the Program of Study of a graduate student must be approved by the student’s program of study committee. Usually courses in the major are selected from 500- and 600-level courses in the major. Courses outside of the major can be selected from other 500- and 600-level courses and from 300- and 400-level courses which have been approved for nonmajor graduate credit. In the catalog, the approved 300- and 400-level courses are indicated by the words “Nonmajor graduate credit” in the course description.

Interdepartmental Programs

Handbook
Accounting

Marvin L. Bouillon, Chair of Department

Professors: Hira, Ravenscroft

Professors (Emeritus): Brown, Elvik, Handy

Associate Professors: Bouillon, Dilla, Doran, Jeffrey, Kutenbach

Assistant Professors (Emeritus): Murphy

Assistant Professors: Denisor, Gary, Janvrin, No, Terando

Assistant Professors (Adjunct): Curtis

Instructors (Adjunct): Duffy, Mazzei

Senior Lecturer: Clem

Lecturer: Christensen, Hashmi, Whittle

Undergraduate Study

For undergraduate curriculum in business, major in accounting, see College of Business, Curricula. The primary purpose of accounting is to provide relevant information to both internal users (management) and external users such as investors, creditors, government, and the general public. Accounting is an integral part of the management of business and public organizations. Accountants, therefore, participate in planning, evaluating, and controlling the activities of the firm. Accounting is needed by external users in order to make investment decisions, grant or withhold credit, and, in the case of government, to collect revenue and gather statistical information. In order to provide useful information, accountants collect, analyze, synthesize, and report data in an understandable manner.

The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with: (1) a mastery of basic accounting concepts; (2) an ability to think critically and creatively about accounting problems; (3) an ability to communicate effectively and work with others as a member of a team; (4) an awareness and sensitivity for dealing with ethical concerns.

The major in accounting is designed to give students a conceptual foundation as well as to provide a wide range of basic skills and analytical tools for use in reporting for both public and private concerns. Students who complete the accounting major are well prepared to accept positions in industry, government, and the public accounting profession. The requirements for the accounting major are met by successful completion of the following courses: Acct 383, 384, 386, 387, 485, and 497. See the CPA note below for the 150-hour education requirement for CPA certification in Iowa.

In addition, it is highly recommended that an accounting major include Business Law II (Acct 316). The Department of Accounting should be consulted for information on specific alternative plans of study.

The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, of which 9 credits need to be stand alone.

CPA Note: In addition to the 18 credits of accounting required for the accounting major, candidates for the CPA exam must complete two additional accounting courses to sit for the CPA exam, for a total of 24 hours beyond principles. Students may use the electives shown above or petition to take graduate courses to fulfill the additional six hours. Business Law II (Accounting 316) is also highly recommended; please note this class does not count towards the aforementioned 24 hours required to sit for the exam. In order to be certified or licensed to practice in Iowa, students must complete 150 credits. Qualified students should consider taking the Master of Accounting to satisfy this requirement. Juniors and seniors in accounting who are interested in graduate study should contact the Coordinator of the MAcc Program so you may complete your graduate degree in an efficient manner. For states outside Iowa, be sure to check local rules, as each state determines its own licensing requirements.

Graduate Study

The department offers work for a graduate degree - the masters of accounting (M.Acc.). This is a 30-hour degree, with an optional creative component. The program requires 15 hours of graduate accounting courses, at least 9 hours of naccounting graduate electives, a communications course and an international course from an approved list. Students who choose the creative component option may replace two required hours of accounting with the creative component. Included in the 15 required hours of graduate accounting courses is a 3-credit required course, Acct 598. The M.Acc. is appropriate for any student wanting to pursue a variety of accounting careers. The M.Acc. program is an efficient way for qualified candidates to meet the 150-hour education requirement for CPA certification in Iowa.

The department participates in the M.B.A. full-time and part-time programs. The M.B.A. program is a 48-credit, nonthesis, ncreative component curriculum. Twenty four of the 46 credits are core courses and the remaining 24 are graduate electives.

Within the M.B.A. program, students may develop an area of specialization in accounting. This specialization requires that 12 of the 24 credits of graduate electives be from accounting. The specialization in accounting is designed to help meet the 150 hour education requirement for CPA certification in Iowa.

Courses primarily for undergraduate students

Acct 215. Legal Environment of Business. (3-0) Cr. 3. F.S.S. Prereq: Sophomore classification. General history, structure, and principles of law. The legal system, as an agency of social control; good business practices, and tool for change. The court systems, Constitution, torts, contracts, administrative agencies, and agency law.

Acct 284. Financial Accounting. (3-0) Cr. 3. F.S.S. Prereq: 15 hours of credit at ISU or sophomore standing. Introduction to the basic concepts and procedures of financial accounting from a user perspective. The course examines the accounting cycle, business terminology, basic control procedures, and the preparation and evaluation of financial reports, with an emphasis on financial statement analysis.

Acct 383. Intermediate Managerial Accounting. (3-0) Cr. 3. F.S. Preq: 288 or 386. Generation, communication and use of information to assist management with planning, control, and decision making in manufacturing and service organizations.

Includes traditional and contemporary models of cost estimation, assignement, and control, responsibility accounting, and nonrecurring decisions. Emphasis on developing written and oral communication skills, as well as spreadsheet capabilities.

Acct 384. Accounting Information Systems. (3-0) Cr. 3. Prereq: 288. Analysis of concepts and procedures underlying the automated accumulation and processing of accounting data. EDP internal control and audit techniques. Trends in accounting information systems.

Acct 483. Advanced Managerial Accounting. (Dual-listed with 583). (3-0) Cr. 3. Preq: 283 or 581. Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills.

Acct 486. Volunteer Income Tax Assistance. (0-2) Cr. 1. Repeatable. S. Preq: 284. Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency Status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

Acct 488. Governmental and Non-profit Institution Accounting. (3-0) Cr. 3. F.S. Preq: 387. Budgeting, accounting, auditing, and financial reporting principles associated with private and non-profit organizations. Includes survey of state, local, municipal, and federal government accounting, as well as accounting for colleges, universities, public schools, health care facilities, voluntary health and welfare organizations and other not for profit entities. Nonmajor graduate credit.

Acct 495. Advanced Accounting Problems. (Dual-listed with 595). (3-0) Cr. 3. F.S. Preq: 387 Partnerships, branch operations, accounting for business combinations and affiliated companies, consolidated financial statements; reporting for multinational operations. Nonmajor graduate credit.

Acct 497. Introduction to Auditing. (3-0) Cr. 3. F.S. Preq: 384, 387 and Stat 326. The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of Statistical sampling in auditing. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

topics covered include the use and analysis of financial information, the regulatory environment, and the use of the internet and electronic spreadsheets as a means of accessing and analyzing financial data.

Acct 533. Data Management for Decision Makers. (Cross-listed with MIS). (3-0) Cr. 3. Prereq: MIS 503. Addresses data needs of functions such as marketing, finance, and production. Advanced skills needed to design, develop and use database, database warehousing and data mining systems for effective decision support. Emphasis on importance of contemporary technologies.

Acct 582. Corporate Governance and Leadership. (Cross-listed with Mgmt) (3-0) Cr. 3. Prereq: Mgmt 502 or permission. Examination of top managers and corporate boards of directors in terms of roles, responsibilities, and tasks. Examination of corporate governance structure and functioning. Topics include CEO tenure and compensation, board monitoring and composition, board responsibility and accountability, board structure and performance, CEO and board roles in strategic management, shareholder and stakeholder representation, corporate social responsibility, ethics and corporate governance, international governance, and executive leadership style.

Acct 583. Advanced Managerial Accounting. (Dual-listed with 483). (3-0) Cr. 3. Prereq: 382 or 581. Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills.

Acct 588. Governmental and Non-profit Institution Accounting. (3-0) Cr. 3. Prereq: 387 or 592. Budgeting, accounting, auditing, and financial reporting principles associated with private and public nonprofit organizations. Includes survey of state, local, municipal and federal government accounting, as well as accounting for colleges, universities, public schools, health care facilities, voluntary health and welfare organizations and other not for profit entities.

Acct 590. Special Topics. Cr. arr. Repeatable. F.S.S. Prereq: Permission of instructor. For students wishing to do individual research in a particular area of accounting.

Acct 591. Fraud Examination and Prevention. (3-0) Cr. 3. Prereq: 497 or 508. Principles and methodology of fraud detection and deterrence. Addresses the following: Causes and elements of fraud, costs to society, asset theft, financial statement representation, internal controls for fraud prevention, evidence gathering, and legal aspects of fraud.

Acct 592. Financial Statement Analysis. (3-0) Cr. 3. Prereq: 284 or 508. The presentation and analysis of financial statement information from the point of view of the primary users of such data: owners and creditors. Topics covered will include the financial reporting system, the primary financial statements, and effects of accounting method choice on reported financial data, and firm valuation.

Acct 594. Business Valuation. (3-0) Cr. 3. Prereq: 387 or 592. Using financial statement analysis to value the firm. Topics covered include assessing how well a firm's financial statements reflect the economic effects of its resource management strategies and constructing pro forma financial information that will serve as inputs to valuation models.

Acct 595. Advanced Accounting Problems. (Dual-listed with 495). (3-0) Cr. 3. Prereq: 387 Partnerships, branch operations, accounting for business combinations and affiliated companies, consolidated financial statements, reporting for multinational operations.

Acct 596. International Accounting. (3-0) Cr. 3. Prereq: 386 or 508. Accounting and reporting requirements and managerial issues faced by multinational corporations. The international environment of standard setting will be examined. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

Acct 597. Advanced Auditing and Assurance Services. (3-0) Cr. 3. Prereq: 497. A study of advanced auditing and assurance issues. Topics include risk analysis, internal control, fraud detection, analytical procedures, evaluating operational and strategic objectives, and reporting and implementing audit findings.

Acct 598. Financial Accounting: Theory and Contemporary Issues. (3-0) Cr. 3. F. Prereq: 387 or 592. Theoretical discussion of the financial accounting and reporting environment. The usefulness of financial accounting information for decision making will be examined. A number of current financial accounting issues and the financial accounting standard setting process will be discussed and examined. MAcc students should take this course during their last semester.

Acct 599. Creative Component. Cr. 2. Prereq: Admission to the Master of Accounting Program. This course prepares students to complete their creative component project option in the Master of Accounting degree.

Aerospace Engineering

Thomas Shih, Chair of Department

Distinguished Professors: Soukoulis, R. B. Thompson

Distinguished Professors (Emeritus): D. Thompson, Young

Professors: Chandra, Chimento, Durbin, Holger, Kelkar, Levitas, Lu, Oliver, Rajagopalan, Roether, Rudolph, Sarak, Schmer, Shih, Talek, Wang, Wie, Zachary

Professors (Emeritus): Akers, Greer, Inger, Iversen, Jenison, McConnell, McDaniel, Munson, Pierson, Rizzo, Rogge, Rohach, Tannenh, Tsai, Weiss, Wilson

Professors (Adjunct): Hsu, Nakagawa

Associate Professors: Bastawros, Bryden, Dayal, Hilliard, Hindman, Mitra, Sherman, Sturges

Associate Professors (Emeritus): Hermann, Seversiske, Trulin, Vogel

Associate Professors (Adjunct): Biner, Cox, Roberts

Associate Professors (Collaborators): Flatau

Assistant Professors: Chung, Holland, Hong, Hu, Jacobson

Assistant Professors (Adjunct): Byrd, Gray

Assistant Professors (Collaborators): Chavez

Senior Lecturers: Deam, Haugli, Schaefer

Lecturers: Boylan

Aerospace Engineering

Undergraduate Study

For undergraduate curriculum in aerospace engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

The aerospace engineer is primarily concerned with the design, analysis, testing, and overall operation of vehicles which operate in air, water, and space. The curriculum is designed to provide the student with an education in the fundamental principles of aerodynamics, flight dynamics, propulsion, structural mechanics, flight controls, design, testing, and space technologies. A wide variety of opportunities awaits the aerospace engineering graduate in research, development, design, production, sales, and management in the aerospace industry, and in many related industries in which fluid flow, control, and transportation problems play major roles.

A cooperative education program in aerospace engineering is available in cooperation with government agencies and industry. The usual four-year curriculum is extended over a five-year span to permit alternating industrial experience periods and academic periods. This arrangement offers valuable practical experience and financial assistance during the college years. See College of Engineering, Cooperative Programs.

Undergraduate Mission and Educational Objectives

The Department of Aerospace Engineering maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of continuous academic improvement to provide the best possible education for our students.

Mission statement: The mission of the aerospace engineering program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.

Program Educational Objectives:

Graduates should be actively contributing, valued members in their chosen profession showing continued professional growth.

Graduates should use their strong foundation in science, mathematics, and engineering to create innovative practices and/or technologies.

Graduates should demonstrate teamwork, leadership, planning, and initiative in advancing organizational goals.

Graduates should act with integrity, based on an awareness of the impact of their work –economic, environmental, and Societal impact – and work to maintain high levels of cultural adaptability.

Graduates should demonstrate critical thinking and effective, multi-modal communication skills.

Graduates should strive to live continuously through professional improvement opportunities and self study.

Graduates should work to ensure superior quality, customer satisfaction, and safety outcomes in their work.
Aer E 101H. Engineering Honors Orientation. CR. R. F. Prereq: Membership in the Freshman Honors Program. Introduction to the College of Engineering and the Aerospace Engineering profession. Information concerning university, college, and department policies, procedures and resources with emphasis on the Freshman Honors Program. Topics include experiential education study abroad opportunities, and department mentorships.

Aer E 112. Orientation to Learning and Productive Team Membership. (Cross-listed with FS NN, Hort, TSM, NREML) (2-0) CR. 2. F. Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

Aer E 161. Numerical, Graphical and Laboratory Techniques for Aerospace Engineering. (3-2) CR. 4. FS. Prereq: 160 or equivalent course. Computer solutions to aerospace engineering problems using the FORTRAN language and MATLAB(R), with emphasis on numerical methods. Introduction to computing environments including UNIX/Linux. Graphical description of geometrical objects with emphasis on aerospace design. Solutions to problems using computer graphics software. Develop proficiency with basic instrumentation utilized in subsequent Aerospace Engineering laboratory courses. Computational and Statistical analysis of lab results. Written and oral technical reports, team projects. H. Honors. S.

Aer E 192. Aerospace Seminar. CR. R. S. (1-0) Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities, specifically experiential learning and study abroad. Academic program planning, departmental symposium participation. H. Honors.

Aer E 243L. Aerodynamics Laboratory I. (0-3) CR. 0.5 FS. Prereq: Enrollment in 243. Introduction to fluid dynamic principles and instruments in aerodynamics through laboratory studies and experiments. Report writing.

Aer E 261. Introduction to Performance and Design, CR. R. 4. CR. Math 166, Physy 211. Introduction to aerospace disciplinary topics, including: aerodynamics, structures, propulsion, and flight dynamics with emphasis on performance.

A. Flight ground instruction
B. In-flight training (Prereq: 301.)
C. Other

Aer E 291. Aerospace Seminar. CR. R. F. (1-0) Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, departmental symposium participation. H. Honors.

Aer E 292. Aerospace Seminar. CR. R. S. (1-0) Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activities. Academic program planning, departmental symposium participation. Satisfactory-only.

Aer E 298. Cooperative Education, CR. R. FS.SS. Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course prior to commencing work. Satisfactory-only.

Aer E 301. Flight Experience. CR. R. F. Prereq: Credit or enrollment in 358. Two hours of in-flight training and necessary ground instruction. Course content prescribed by the Aerospace Engineering Department. Six hours of flight training certified in a pilot's log book can be considered by the course instructor as evidence of satisfactory performance in the course. Satisfactory-only.

Aer E 311L. Gas Dynamics Laboratory. (0-3) CR. 0.5. S. Prereq: 243, 243L, enrollment in 311L. Introduction to experimental compressible flow and propulsion principles, techniques and measurements through laboratory studies and experiments. Report writing.

Aer E 321. Flight Structures Analysis and Laboratory. (2-5-1) CR. 3. S. Prereq: E M 324. 3 hours of lecture weekly and laboratory alternating weeks. Determination of flight loads. Materials selection for flight applications. Analysis of flight structures including trusses, beams, frames, and shear panels employing classical and finite element methods. Laboratory experiments on flight structures. Nonmajor graduate credit.

Aer E 343. Aerodynamics II. (3-0) CR. 3. S. Prereq: Credit or enrollment in 311 and enrollment in 343L. Incompressible, subsonic, supersonic, hypersonic flow over airfoils and wings. Viscous flow theory. Laminar boundary layers. Transition and turbulent flow. Nonmajor graduate credit.

Aer E 361. Computational Techniques for Aero-
Space Design. (2-2) Cr. 3. F. Prereq: 243, Math 267, E M 324, E M 345. Advanced programming, worksta-
tion environment, and development of computational tools for aerospace analysis and design. Nonmajor graduate credit.

Aer E 391. Aerospace Seminar. Cr. R. F. (1-0) Professional skills development activities including: interviewing, program of study specialization consid-
erations, post baccalaureate study options, career planning. Nonmajor graduate credit.

Aer E 392. Aerospace Seminar. Cr. R. S. (1-0) Profes-
sional skills development activities including: program of study specialization considerations, post bac-
calaureate study options, career planning. Preliminary senior design project planning and mentor selection.

Aer E 396. Summer Internship. Cr. R. Repeatable. SS. Prereq. Permission of department and Engineer-
ing Career Services. Summer professional work period. Students must register for this course prior to commencing work. Satisfactory-fail only.

Aer E 397. Engineering Internship. Cr. R. Repeat-
able. F.S. Prereq. Permission of department and En-
gineering Career Services. Professional work period, one semester maximum per academic year. Students must register for this course prior to commencing work. Satisfactory-fail only.

Aer E 398. Cooperative Education. Cr. R. F.S.SS. Prereq: 298, permission of department and Engineer-
ing Career Services. Second professional work period in the cooperative education program. Students must register for this course prior to commencing work. Satisfactory-fail only.

Aer E 411. Aerospace Vehicle Propulsion I. (3-0) Cr. 3. F. Prereq: 311. Atmospheric propulsion system performance and cycle analysis. Momentum theorem, thrust and propulsive efficiency. Thermodynamics of compressible flow with heat and work addition. Components analysis and design of turbojets and turbo-
fans. Rocket engines and ramjet principles. Nonmajor graduate credit.

Aer E 412. Aerospace Vehicle Propulsion II. (3-0) Cr. 3. Cr. 3. Prereq: 342, 411. Electricity and magnetism. Plasma physics. Ion engine performance. Introduction to advanced electromagnetic propulsion systems. En-
ergy sources and nuclear propulsion. Low thrust mis-
sion analysis. Space mission requirements. Nonmajor graduate credit.

ing deformation, strain and stress for practical engi-
neering problems. Strain gage theory and application. Selected laboratory experiments. Nonmajor graduate credit.

Aer E 421. Advanced Flight Structures. (2-5-1) Cr. 3. S. Prereq: 321, Math 266 or 267. Analysis of indeterminate flight structures including finite ele-
ment laboratory. Static analysis of complex structural components subject to thermal and aerodynamic loads. Analytical and finite element solutions for stresses and displacements of membrane, plane stress, plate structures. Buckling of beams, frames, and plate structures. Introduction to vibration of flight structures. Steady state and transient structural response using normal mode analysis. Nonmajor graduate credit.

Aer E 422. Aeroelasticity. (3-0) Cr. 3. Alt. F., offered 2010. Prereq: 421 or E M 450 or E M 450. Vibration theory. Steady and unsteady flows. Mathematical foundations of aeroelasticity, static and dynamic aeroelasticity. Linear unsteady aerodynamics, non-
steady aeroelasticity of lifting surfaces. Stall flutter. Aeroelastic problems in civil engineering structures. Aeroelastic stability of rotocraft. Experimental aeroelasticity. Selected wind tunnel laboratory experi-
ments. Nonmajor graduate credit.

Aer E 423. Composite Flight Structures. (2-2) Cr. Prereq: E M 324, Mat E 272. Fabrication, testing and analysis of composite materials used in flight struc-
tures. Basic laminate theory of beams, plates and shells. Manufacturing and machining considerations of various types of composites. Testing of composites for material properties, strength and defects. Student projects required. Nonmajor graduate credit.

Aer E 426. Design of Aerospace Structures. (1-6) Cr. 3. Prereq: E M 324. Detailed design and analysis of aerospace vehicle structures. Material selection, strength, durability and damage tolerance, and valida-
tion analysis. Design for manufacturability. Nonmajor graduate credit.

Aer E 432. Flight Control Systems II. (3-0) Cr. Prere-
q. 331. Aircraft lateral directional stability augmen-

Aer E 442. VSTOL Aerodynamics and Perfor-
mane. (3-0) Cr. 3. Prereq: 353. Introduction to the aerodynamics, performance, stability, control and criti-
cal maneuvering of VSTOL vehicles. Topics include hoveringcrafts, jet flaps, ducted fans and thrust vectored engines. Nonmajor graduate credit.

Aer E 446. Computational Fluid Dynamics. (3-0) Cr. 3. Prereq: 342. Introduction to modern computa-
tional fluid dynamics. Finite difference and finite volume methods. Explicit, implicit, and iterative tech-

Aer E 448. Fluid Dynamics of Turbomachinery. (Cross-listed with M E). (3-0) Cr. 3. S. Prereq: M E 335 or equivalent. Applications of principles of fluid me-
chanics and thermodynamics to turbomachinery analysis and design of turbomachines and related fluid system components. Nonmajor graduate credit.

Aer E 451. Astrodynamics II. (3-0) Cr. 3. Prereq: 351. Simple orbit determination and prediction. Advanced orbit maneuvers, single-, double-, and triple-impulse, fixed-impulse, finite-duration. 3-D rigid-body dynam-
ics, Euler’s equations, satellite stabilization and attitude control. Earth gravity field models and gravity harmonics, orbit perturbations, variational methods, relative orbital mechanics, Clohessy-Wiltshire equa-
tions. Nonmajor graduate credit.

Aer E 461. Modern Design Methodology with Aerop-
space Applications. (2-2) Cr. 3. F. Prereq: 361, 311, 321, 351, 355. Introduction to modern engineer-
ing design methodology. Computational constrained optimal design approach including selection of objec-
tive function, characterization of constraint system, materials and strength considerations, and sensitivity analyses. Nonmajor graduate credit.

Aer E 464. Spacecraft Systems. (3-0) Cr. 3. Prereq: 351. An examination of spacecraft systems including atti-
dance control, communications, propulsion, guidance, navigation, command and data handling, and me-
chanisms. Explanation of space and operational environ-
ments as they impact spacecraft design. Includes discussion of safety, reliability, quality, maintainability, testing, cost, legal, and logistics issues. Nonmajor graduate credit.

Aer E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, Cpr E, E E, Engr E, Mat E, M E). (1-4) Cr. 3. Repeatable. F.S. Prereq: Student must be within two semesters of graduation and receive permission of department head. Design concepts to projects of a multidisciplinary na-
ture. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design method-
ologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

Aer E 491. Aerospace Seminar. Cr. R. F.S. (1-0) Professional skills development activities. Designed to encourage involvement in a variety of aerospace engineering activities and related professional activi-
ties. Engineering ethics case studies and discussions. Academic program planning, departmental sympo-
sium participation.

Aer E 492. Aerospace Seminar. Cr. R. F.S. (1-0) Professional skills development activities. Writing and presentation of a technical paper at the department’s Aerospace Symposium or at a recognized student or professional meeting of the American Institute of Aeronautics and Astronautics (AIAA). Satisfactory-fail only.

Aer E 498. Cooperative Education. Cr. R. Repeat-
able. F.S.SS. Prereq: 398, permission of department and Engineering Career Services. Third and subse-
quent professional work periods in the cooperative education program. Students must register for this course before commencing work. Satisfactory-fail only.

Aer E 499. Senior Project. Cr. arr. Repeatable. F.S. Prereq: Senior classification, credit or enrollment in 491. Development of aerospace principles and concepts through individual research and projects. Written report.

Courses primarily for graduate students, open to qualified undergraduate students

rium, compatibility equations. Airy stress functions. Membrane stresses in shells, thick-walled cylinders.

Aer E 517. Experimental Mechanics. (Cross-listed with E M 513). (3-0) Cr. 4. Alt. S., offered 2010. Prereq: E M 510 or 514 or 516. Fundamental concepts for Force, displacement, stress, and strain measure-
ments. Strain gages. Full field deformation measure-
ments with laser interferometry and digital image processing. Advanced experimental concepts at the micro and nano scale regimes.

Aer E 521. Airframe Analysis. (3-0) Cr. 3. F. Prereq: 421 or E M 424. Analysis of Static stresses and deformation in continuous aircraft structures. Various analytical and approximate methods of analysis of isotropic and anisotropic plates and shells.

Aer E 522. Design and Analysis of Composite Materials. (Cross-listed with F E 525). (3-0) Cr. 3. F. Prereq: E M 324. Composite constituent materials, micro-mechanics, laminate analysis, hygro-thermal analysis, composite failure, joining of composites, design of composite beams and plates, honeycomb core, manufacturing of com-
posites, short fiber composites, and demonstration laboratory.

Aer E 545. Advance Experimental Technique for Thermal-Fluid Studies. (3-0) Cr. 3. S. Prereq: 343 or M E 335 or M E 378. Introduction of various experimental techniques widely used for fluid mechanics, aerodynamics, heat transfer, and combustion studies. Pressure gauges, Pitot tubes, hot wire anemometry; shadowgraph and Schlieren Photography; laser Doppler velocimetry; particle image velocimetry (PIV); advanced PIV techniques (stereo PIV, 3-D PIV, hologram PIV, microscopic PIV); laser induced fluorescence; pressure sensitive painting, temperature sensitive painting; molecular tagging velocimetry; molecular tagging thermometry. Extensive application and demonstration laboratory experiments will be included.

Aer E 546. Computational Fluid Mechanics and Heat Transfer I. (Cross-listed with M E). (3-0) Cr. 3. S. Prereq: Credit or enrollment in 541 or ME 638. Introduction to finite difference and finite volume methods used in modern engineering. Basic concepts of discretization, consistency, and stability. Applications of numerical methods to selected model partial differential equations.

Aer E 547. Computational Fluid Mechanics and Heat Transfer II. (Cross-listed with M E). (3-0) Cr. 3. S. Prereq: E M 548. Application of computational methods to current problems in fluid mechanics and heat transfer. Method for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulence modeling.

Aer E 565. Systems Engineering and Analysis. (Cross-listed with E E, E I). (3-0) Cr. 3. Prereq: Coursework in basic Statistics. Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life-cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

Aer E 570. Wind Engineering. (Cross-listed with E M). (3-0) Cr. 3. F. Prereq: E M 378, 345. Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

Aer E 591. Graduate Student Seminar Series. Cr. R. Repeatable. Presentation of professional topics by department graduate students. Development of presentation skills used in a professional conference setting involving question and answer format.

Aer E 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students

African and African American Studies

www.las.iastate.edu/AfricanAmericanStudies/

Interdepartmental Undergraduate Program

Undergraduate Study

African and African American Studies, a cross-disciplinary program in the College of Liberal Arts and Sciences, offers students the opportunity to explore the African Americans’ experience and African American contributions to American culture. Students in the program analyze and learn about African American experiences through the study of history, literature, art, religion, and society. They gain knowledge and develop skills and sensitivities to help them function effectively in today’s diverse society. African and African American Studies at Iowa State University is an expanding program. Most of the courses in the program satisfy general education requirements in the College of Liberal Arts and Sciences, the human relations requirement for teachers, and the university’s diversity requirement. Students can minor or design their own interdisciplinary Studies major with an emphasis in African American Studies. Relevant courses are offered through other departments.

A minor in African and African American Studies requires six courses in the program with a minimum of 18 credits, including Introduction to African American Studies (Af Am 201) and Seminar in African American Culture (Af Am 460). The remaining credits must come from at least two departments, with at least two courses taken at the junior level or above. Independent study and internship opportunities are available for credit, but do not count in the minimum requirements for the minor.

Graduate Study

Several courses are open for nonmajor graduate credit. See individual listings for more information.

Courses primarily for undergraduate students

Af Am 201. Introduction to African American Studies. (3-0) Cr. 3. F.S. An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience.

Af Am 325. Peoples and Cultures of Africa. (Cross-listed with Anthl.) (3-0) Cr. 3. S. Prereq: Anthl 201 or 308 recommended. Origins and distribution of peoples of Africa; geographical characteristics as related to culture types, including early civilizations; a comparative examination of economic, subsistence, language, social and political organization, and religious systems throughout the continent; change processes, the impact of colonialism, and the nature of contemporary African Societies.

Af Am 330. Ethnic and Race Relations. (Cross-listed with Soc.) (3-0) Cr. 3. F.S.S. Prereq: Soc 130 or 134. Analysis of ethnic and race relations, particularly in America; emphasis on the Sociology and psychology of race and ethnic relations.

Af Am 334. African American Religious Experience. (Cross-listed with Relig.) (3-0) Cr. 3. F. Prereq: Prior course work in Religious Studies or African American Studies required. Examination of the African American experience from the perspective of black religion and the black church, with attention to political, economic, and social, as well as spiritual, concerns. Nonmajor graduate credit.

Af Am 347. African American Literature to 1960. (Cross-listed with Engl.) (3-0) Cr. 3. Prereq: Engl 250. Intensive study of African American writing, possibly including slave narratives, Harlem Renaissance, works, literature of social protest, and Forerunners of contemporary works that reveal key thematic, stylistic, and historical range of the literature. Nonmajor graduate credit.

Af Am 350. African American Women. (Cross-listed with W St.) (3-0) Cr. 3. S. Prereq: 3 credits in Womens’ Studies or African American Studies. Economic, social, political and cultural roles of African American women in the U.S. Includes literary, philosophical, and artistic expressions. Myths and realities explored. Nonmajor graduate credit.

Af Am 353. History of African Americans I. (Cross-listed with Hist.) (3-0) Cr. 3. S. Prereq: Sophomore classification. Examines African roots of black culture and the African American experience in the United States from the colonial period through the Civil War. Topics include Atlantic Slave Trade, slavery and American identity, abolition, the emergence of Black Nationalism, and black participation in the Civil War.

Af Am 354. History of African Americans II. (Cross-listed with Hist.) (3-0) Cr. 3. S. Prereq: Sophomore classification. Explores African American political thought and political action from Reconstruction to the present. Topics include rise of Jim Crow segregation, urban migration, Garvey movement, Harlem Renaissance, Depression and world wars, Pan-Africanism, civil rights, Black Power, and black feminism.

Af Am 460. Seminar in African American Culture. (3-0) Cr. 3. S. Intensive study of a selected topic in African-American Studies in one or more disciplines. Selected readings of various authors, movements, eras, or genres. Primary and secondary source materials. Nonmajor graduate credit.

Courses offered by other departments

Engl 349. Topics in Multicultural Literatures of the United States. (3-0) Cr. 3. See English.

Relig 475. Seminar: Issues in the Study of Religion. (3-0) Cr. 3. See Philosophy and Religious Studies

Agricultural Education and Studies

Robert Martin, Chair of Department

University Professors (Emeritus): Williams

Professors: Acker, Honeyman, Martin, G. Miller, W. Miller

Professors (Emeritus): Carter, Crawford, Gannon, Gauger, Hoerner, Lawrence, Parsons, Tred

Associate Professors: Grudens-Schuck, McEwen

Associate Professors (Emeritus): Brune, Jones

Assistant Professors: Dollisso, Esters, Morris, Polito, Retallick, Steiner

Lecturers: Brown, Paulsen

Agricultural Education and Studies

Undergraduate Study

For undergraduate curricula in agricultural education and agricultural studies leading to the degree of bachelor of science, see College of Agriculture, Curriculum.

The department offers two curricula for students desiring center careers in agricultural-related fields. These curricula are: agricultural education and agricultural studies. The agricultural education curriculum prepares persons for careers as agricultural education instructors and educational specialists for industry and governmental agencies. The agricultural education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decision making, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs will meet the university, college, and departmental outcomes in the following nine areas: 1) professional, interpersonal, and cross-cultural communications; 2) Problem-solving/critical thinking; 3) leadership; 4) entrepreneurship; 5) life-long learning; 6) ethics; 7) environmental awareness; 8) U.S. diversity; and 9) international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/assessment/agedsindex.htm.

The department offers a minor in agricultural education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 400 level. Courses that can be taken for a minor are 211, 310, 311, 315, 412 or 418, 414, 450, 490, 496, and 499.

Visit the departmental website at www.AgEds.iastate.edu/
Courses and workshops are offered, both on and off campus, for extension educators, teachers, and industry personnel.

**Courses primarily for undergraduate students**

**AgEds 110. Orientation.** (1-0) Cr. 0.5. Orientation to the department. Careers in agriculture.
- A. Agricultural Education
- B. Agricultural Studies
- C. General Agriculture

**AgEds 111. Orientation for Agricultural Excellence Scholars.** (1-0) Cr. Repeatable. F. Prereq: Enrollment as an agricultural excellence scholar. The roles of professionals in agriculture, academic preparation for assuming the role of a professional in agriculture, and meeting the demands of the scholar's curriculum.

**AgEds 112. Agriculture Biotechnology Colloquium.** (1-0) Cr. 1. S. Prereq: Admission to the professional program in agricultural education. The scientific basis of biological and social sciences in agriculture.

**AgEds 211. Early Field Based Experience.** (1-0) Cr. 1. Repeatable. F.S.S. Prereq: 110. Five days on-site in an agricultural setting observing competencies and issues in problem solving, decision-making, initiative-taking, teamwork, leadership, written and oral communications, critical thinking and creativity. When students register it is their responsibility to make an appointment with the departmental coordinator (very early in the semester) to plan their experience.
- A. High School Agriculture Program
- B. Extension
- C. Agricultural Industries and Agencies

**AgEds 290. Special Problems in Agricultural Education and Studies.** Cr. arr. Repeatable. F.S.S. Prereq: Permission of the department cooperative education coordinator; sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

**AgEds 310. Foundations of Agricultural Education Programs.** (2-0) Cr. 2. S. Historical development of agricultural education programs. Philosophic premises, program goals and objectives. Educational and social issues impacting the implementation of agricultural education programs.

**AgEds 311. Presentation and Sales Strategies for Agricultural Audiences.** (3-0) Cr. 3. S. Prereq: Utilizing instructional methods, techniques, and problem solving, presentation and sales strategies with agricultural audiences.

**AgEds 312. Science With Practice.** (1-3) Cr. 2. S. Prereq: College of Agriculture and Life Sciences majors only. A blended learning experience wherein each student and faculty mentor develops a learning agreement that encompasses specific activities and expectations. Students are engaged in reflective activities that include micro-lessons, formal presentations, and a comprehensive portfolio. Students will be able to recognize and articulate what is learned through the experience and transfer what is learned to future experiences.

**AgEds 315. Personal and Professional Leadership in Agriculture.** (3-0) Cr. 3. S. Prereq: Leadership theories and group facilitation skills for personal and professional applications in agricultural education, industry, and communities.

**AgEds 398. Cooperative Education.** Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

**AgEds 401. Planning Agriculture and Life Sciences Education Programs.** (Dual-listed with 501). (3-0) Cr. 3. S. Prereq: 310. Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

**AgEds 402. Methods of Teaching in Agriculture and Life Sciences.** (Dual-listed with 502). (3-0) Cr. 3. S. Prereq: Concurrent enrollment in 401. Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

**AgEds 412. Internship in Agricultural Education and Studies.** Cr. arr. Repeatable. F.S.S. Prereq: 211, junior classification in AgEds and permission of instructor. A supervised two to twelve week learning experience in an approved learning setting with application to educational, agricultural and/or environmental practices and principles. Nonmajor graduate credit.

**AgEds 414. Developing Agricultural Education Programs in Non-formal Settings.** (2-0) Cr. 2. S. Prereq: 211 and permission of instructor. Basic concepts in planning, conducting, and evaluating educational programs in non-formal settings. Includes programming for youth and adults in Extension, agricultural industry, and related agencies. Nonmajor graduate credit.

**AgEds 416. Pre-Student Teaching Experience in Agricultural Education.** Cr. 1. F.S. Prereq: 211, 402 and admission to teacher education program. A one-week field-based experience in an approved secondary agricultural education program. Concurrent enrollment in 417 is required.

**AgEds 417. Supervised Teaching in Agriculture and Life Sciences.** Cr. arr. Repeatable. F.S.S. Prereq: 211, junior classification, permission of instructor. Supervised professional experience in an approved county, area or State Cooperative Extension Service office. Nonmajor graduate credit.

**AgEds 450. Farm Management and Operation.** (1-8) Cr. 3. Repeatable. F.S.S. Prereq: Econ 325, Econ 330, junior classification. Participation in the management and operation of a diversified Iowa farm. The class is responsible for the plans, records, and decisions for buying and selling the farm’s livestock, crops, and equipment. Special speakers on current topics. May be taken for credit 3 times at different times of the year with permission of the instructor. Nonmajor graduate credit.

**AgEds 451. Agricultural Law.** (3-2) Cr. 4. S. Prereq: Senior classification. The legal framework impinging upon decision-making by firms, families, and individuals, real and personal property, contracts, secured transactions, negotiable instruments, debt-corporate relations, bankruptcy, farm income tax organization of firms, intergenerational property transfers, trusts and farm estate planning, civil and criminal liabilities, environmental law, federal and state regulatory powers. Nonmajor graduate credit.

**AgEds 488. Methods of Teaching Agricultural Mechanics.** (2-3) Cr. 3. S. Prereq: Methods and management techniques in agricultural mechanics laboratories. Emphasis will be on safety, mechanical skills development and management of students, facilities, equipment, and materials.

**AgEds 490. Independent Study in Agricultural Education and Studies.** Cr. arr. Repeatable. F.S.S. Prereq: Junior or senior classification, permission of instructor.
- A. Philosophy, Curriculum, and Methods
- B. Leadership, Evaluation, and Administration
- C. Business, Industry, and Production Agriculture
- D. Extension and International Agriculture
- E. Instructional Technology
- F. Environmental Issues
- G. Entrepreneurship
- H. Honors
- I. Communications

**AgEds 496. Agricultural Travel Course.** Cr. arr. Repeatable. F.S.S. Prereq: Permission of instructor. Limited enrollment. Extended field trips to study agriculture and education related topics. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Nonmajor graduate credit.
- A. International
- B. Domestic

**AgEds 498. Cooperative Education.** Cr. R. F.S.S. Prereq: Permission of the department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

**AgEds 499. Undergraduate Research.** Cr. F.S.S. Prereq: Permission of instructor, adviser, and departmental chair. Research experience in agricultural education and studies with application to selected problems.

**Courses primarily for graduate students, open to qualified undergraduate students**

**AgEds 501. Planning Agriculture and Life Sciences Education Programs.** (Dual-listed with 401). (3-0) Cr. 3. S. Prereq: 310. Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

**AgEds 502. Methods of Teaching in Agriculture and Life Sciences.** (Dual-listed with 402). (3-0) Cr. 3. S. Prereq: Concurrent enrollment in 501. Topics include principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

**AgEds 510. Introduction to Research in Agricultural Education.** (3-0) Cr. 3. S. Prereq: Graduate classification. Determining your research focus; developing research problems and objectives; reviewing the literature and establishing a theoretical framework; establishing procedures for data collection and analysis; ethical issues.

**AgEds 514. Organizing Agricultural Information for Professional and Scientific Meetings.** (1-2) Cr. 2. F. Prereq: Graduate classification in agriculture. Concepts and practices in planning, preparing, and presenting materials used in professional meetings and scientific papers by agriculturalists with special emphasis on computerized delivery methods.

**AgEds 520. Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources.** (3-0) Cr. 3. F. Prereq: Graduate classification. Theory and practice of adult education. Teaching and learning in formal and non-formal instructional programs for adult learners.

**AgEds 524. Program Development and Evaluation in Agricultural and Extension Education.** (3-0) Cr. 3. F. Prereq: Graduate classification. Theories and practices of program planning for nonformal education. Addresses use of program logic modeling and considers critical theories of planning to address power and interests in program development, needs assessment, and evaluation.

**AgEds 533. Introduction to Learning Theory in Agricultural Education.** (3-0) Cr. 3. S. Prereq: Graduate classification. Introduction to a variety of theoretical perspectives of learning and how they may be used within the classroom. Emphasis will be on the major domains of learning, developmental considerations, basic assumptions, concepts, and principles of various learning theories; understanding how each theoretical perspective may be used in both formal and non-formal educational settings.

**AgEds 550. Foundations of Agricultural Education.** (3-0) Cr. 3. F. Prereq: Graduate classification. Philosophical premises, ethical principles, historical development, contextual applications, and knowledge bases for agricultural education.
\textbf{AgEds 552. Data Analysis and Interpretation.} (2-0) Cr. 2. F. Prereq: 510. Strategies for analyzing, interpreting, and reporting quantitative research data in the social and behavioral sciences.

\textbf{AgEds 561. Technology Transfer and the Role of Agricultural and Extension Education.} (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Graduate classification. The impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs.

\textbf{AgEds 590. Special Topics in Agricultural Education.} Cr. arr. Repeatable. F.S.SS. Pre_req: 12 credits in agricultural education. 
- A. Curriculum
- B. Methods
- C. Philosophy
- D. Evaluation
- E. Administration
- F. Leadership
- G. Guidance
- I. Instructional Technology
- J. Extension
- K. International Agriculture
- L. Program Planning

\textbf{AgEds 593. Workshop in Agricultural Education.} Cr. arr. Repeatable. F.S.SS. Pre_req: 12 credits in agricultural education. 
- A. Curriculum
- B. Methods
- C. Evaluation
- D. Administration
- E. Leadership
- F. Extension
- G. Program Planning
- H. Instructional Technology
- M. Biotechnology Workshop

\textbf{AgEds 599. Creative Component.} Cr. arr. Repeatable. F.S.SS. For nonthesis M.S. degree programs.

\textbf{Courses for graduate students}

\textbf{AgEds 615. Seminar in Agricultural Education.} (1-0) Cr. 1. Repeatable. F.S.SS. Satisfactory-fail only.
- A. Writing for publication
- B. Ethics
- C. Grant writing
- D. Career planning
- E. Contemporary issues

\textbf{AgEds 617. Professional Internship for Agricultural Educators.} Cr. arr. Repeatable. F.S.SS. Pre_req: Permission of instructor. Analysis of the roles and activities of professionals in agricultural education. Supervised professional field-based experience in public and private settings. Satisfactory-fail only.

\textbf{AgEds 625. Leadership, Administration, Supervision and Management of Agricultural Education Programs.} (3-0) Cr. 3. Alt. F. offered 2010. Pre_req: Graduate classification. Principles and best practices for leading, administering, supervising, and managing agricultural education programs. Analyzing selected case studies that apply theory to practice in agricultural situations.

\textbf{AgEds 699. Research.} Cr. arr. Repeatable.

\textbf{Agricultural Engineering} (Administered by the Department of Agricultural and Biosystems Engineering)

\textbf{Rameshwar Kanwar, Chair of Department}

\textbf{Distinguished Professor: Brown}

\textbf{Distinguished Professors (Emeritus): H. Johnson}

\textbf{University Professors: Bern}

\textbf{University Professors (Emeritus): Baker}

Professors: Chen, Downing, Glanville, Harmon, Hoff, Hurburgh, L. Johnson, Kanwar, Misra, Schwab, Van Leeuwen, Xin

Professors (Collaborators): Lafien

Associate Professors: Anex, Bhandari, Birrell, Bundy, Hazen, Hoerner, Keeney, Lovely, Maney, Mandgold, Marley, Melvin, Miller, Pedersen, Riley, R. Smith

Professors (Collaborators): Habenicht, H. Johnson

Assistant Professors: Darr, Grewell, Helmers, Kaleita-Forbes, Keren, Kim, Soupir, Tang, Yu

Assistant Professors (Emeritus): Boyd, Bradshaw

Assistant Professors (Adjunct): Inyang, Shahar, Tong

Assistant Professors (Collaborators): Dunn, Malone

Lecturer: Snell

\textbf{Undergraduate Study}

For the undergraduate curriculum in agricultural engineering leading to the degree of bachelor of science, see \textit{College of Engineering, Curricula}. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

\textbf{Agricultural Engineering Curriculum Curriculum Educational Goal, Objectives, and Learning Outcomes:}
The goal of the curriculum in agricultural engineering is to train students to integrate basic physical and biological sciences with engineering design principles to solve problems related to production, processing, storage, handling, distribution, and use of food, feed, fiber and other biomaterials, and the management of related natural resources worldwide.

The agricultural engineering bachelor of science degree program has the following educational objectives for its graduates. Two to five years after graduation, through the professional practice of engineering, graduates should:

1. Have demonstrated competence in methods of analysis involving use of Mathematics, fundamental physical and biological sciences, engineering sciences, and computation needed for the practice of biological systems engineering in food, fiber, energy and environmental companies and agencies.
2. Have developed skills necessary to the design process; including the abilities to think critically, to formulate problem statements, to communicate effectively, to synthesize information, and to evaluate and implement problem solutions.
3. Be capable of addressing issues of ethics, safety, professionalism, cultural diversity, globalization, environmental impact, and social and economic impact in engineering practice.
4. Have demonstrated continuous professional and technical growth, with practical experience, so as to be licensed as a professional engineer or achieve that level of expertise

5. Demonstrated the ability to:
   a. be a successful leader of multi-disciplinary teams,
   b. efficiently manage multiple simultaneous projects,
   c. work collaboratively,
   d. implement multi-disciplinary systems-based solutions,
   e. apply innovative solutions to problems through the use of new methods or technologies,
   f. contribute to the business success of their employer, and
   g. build community

The agricultural engineering degree program outcomes are statements that describe what our students are expected to know and be able to do by the time of graduation. To meet the established agricultural engineering program educational objectives, the expected outcomes for agricultural engineering bachelor of science graduates are:

a) an ability to apply knowledge of mathematics, science, and engineering
b) an ability to design and conduct experiments, as well as to analyze and interpret data
c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
d) an ability to function on multi-disciplinary teams
e) an ability to identify, formulate, and solve engineering problems
f) an understanding of professional and ethical responsibility
g) an ability to communicate effectively
h) achievement of the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
i) a recognition of the need for, and an ability to engage in life-long learning
j) a knowledge of contemporary issues
k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice
l) proficiency in mathematics through differential equations
m) proficiency in biological and engineering sciences
n) competence in the application of engineering to agriculture, aquaculture, food, Forestry, human, natural resource, or other biological systems.

Graduates find employment in diverse ag- and bio-related industries and government agencies dealing with agricultural machines and buildings, animal and environmental control, grain processing and handling, soil and water resources, food, and biotechnology. Their work involves engineering design, development, testing, research, manufacturing, consulting, sales, and service. The department has cooperative programs established for interested and qualified students. The four-year curriculum is extended over a five-year period and interspersed with work periods at cooperating organizations. This plan offers valuable practical experience and financial assistance during the years in college.

The department also offers a bachelor of science curriculum in biological systems engineering. See College of Engineering, Curricula. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology. See College of Agriculture and Life Sciences, Curricula.
The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with a major in agricultural engineering, and offers minor work for students in other majors. Within the agricultural engineering major the student may specialize in:
- advanced machinery engineering (agricultural
  safety and health, sensors and artificial intelli-
  gence, controls and automation, precision
  agriculture, and biorenewables)
- animal and plant production engineering (air
  emissions measurement and abatement, animal
  welfare, environmental control in animal housing,
  manure treatment, crop modeling, plant stress
  physiology, precision agriculture, and decision
  support systems)
- environmental stewardship engineering (erosion
  control, drainage/water management, pollut-
  ant fate and transport, nutrients management,
  wetlands, vegetated filter/buffer strips, hydro-
  logical/water quality/crop modeling, geographic
  information science (GIS))
- remote sensing, water quality, and watershed
  management, or
- process engineering for food safety and value
  addition (processing technologies and systems
  for adding value, quality management systems,
  agricultural product, marketing practices and stan-
  dards, instrumentation for grain, seed, and food
  quality enhancement).

A prerequisite to graduate work is the comple-
tion of an undergraduate curriculum substantially
equivalent to that required of agricultural engineer-
ing undergraduate students at this institution.
However, because of the diversity of interests
within the graduate programs in agricultural engi-
eering, a student may qualify for graduate study
even though the undergraduate training has been
in a discipline other than agricultural engineering.
Supporting work will be required depending on
the student’s background and area of interest with
requirements defined by departmental graduate
student guidelines: www.iastate.edu/grad_students.asp

Agricultural Engineering

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Gradu-
ate College to simultaneously pursue a bachelor of
science degree in agricultural engineering and a
master of science degree in agricultural engineer-
ing. Under concurrent enrollment, students are
eligible for assistantships and simultaneously take
undergraduate and graduate courses.

For the master of science program, at least 30
credits of acceptable graduate work must be com-
pleted with a minimum of 22 credits of course work; concurrency students for the master of engineering program are 32 and 27. For the doctor of
philosophy degree, at least 72 credits of ac-
ceptable graduate work must be completed with
a minimum of 42 credits of course work. All Ph.D.
students must complete a teaching/extension
experience prior to graduation.

The department also offers both master of
science and doctor of philosophy degrees in in-
dustrial and agricultural technology (see Graduate
Majors).

The department also participates in interdepart-
mental majors in environmental science, sustain-
able agriculture, biorenewable resources and
technology, human and computer interaction, and
toxicology (see Index).

**Courses primarily for undergraduate students**

A E 110. Experiencing Agricultural and Biosystems
Engineering, (0-2) Cr. 1. S. Laboratory-based, team-
oriented experiences in a spectrum of topics common
to the practice of agricultural and biosystems engi-
neering. Report writing, co-ops, internships, careers,
registration planning.

A E 201. Entrepreneurship and Internship Seminar.
(Cross-listed with BSE, TSM). (1-0) Cr. 1. F. Prereq:
Sophomore classification in A E, AST, BSE or TEC.
8 week course. Overview of the entrepreneurial
process and its importance in the economy and the
engineering/technical workplace. Preparation for
internship experiences. Relationship of workplace
competencies to entrepreneurship, intrapreneurship,
and internships; portfolios.

A E 216. Fundamentals of Agricultural and
Biosystems Engineering (Cross-listed with BSE).
(2-2) Cr. 3. S. Prereq: 110. Engr 160, credit or enroll-
ment in Math 166. Application of Mathematics and
engineering sciences to mass and energy balances in
agricultural and biological systems. Emphasis is on
solving engineering problems in the areas of heat and
mass transfer, air and water vapor systems; animal
production systems, grain systems; food systems,
hydrologic systems, and bioprocessing.

A E 271. Engineering Applications of Parametric
Solid Modeling, (1-2) Cr. 1. F. S. Prereq: Engr 170 or
TSM 116 or equivalent. 8 week-course. Creating,
editing, and documenting part and assembly models
using SolidWorks.

A E 272. Parametric Solid Models, Drawings, and
Assemblies Using Pro/ENGINEER. (1-2) Cr. 1. F.
S. Prereq: Engr 170 or TSM 116 or equivalent. 8 week-
course. Applications of Pro/ENGINEER software.
Create solid models of parts and assemblies. Utilize
the solid models to create design documentation:
standard drawing views, dimensions, and notes.

A E 298. Cooperative Education. Cr. R. FS/SS.
Prereq: Permission of department and Engineering
CAREER Services. First professional work period in the
cooperative education program. Students must regis-
ter for this course before commencing work.

A E 301. Leadership and Ethics Seminar. (Cross-
listed with BSE, TSM). (1-0) Cr. 1. F. S. Prereq: 201.
8 week course. Leadership and ethics experiences
through case studies and seminar presentations by
practitioners. Relationship of workplace competencies
to leadership and ethics; portfolio.

A E 316. Applied Numerical Methods for Agricul-
tural and Biosystems Engineering, (Cross-listed with
BSE). (2-2) Cr. 3. F. S. Prereq: Engr 160, Math 266.
Computer aided solution of agricultural engineering
problems by use of numerical techniques and Math-
ematical models. Focus on algorithmic and problem
solving applicable to agricultural and biological systems.

A E 325. Biorenewable Systems. (Cross-listed with
Agron, An S, BusAd, Econ, TSM). (3-0) Cr. 3. F. S.
Prereq: Econ 101, Chem 155 or higher, Math 140 or higher.
Converting biorenewable resources into bioenergy
and biobased products. Biorenewable concepts as
they relate to drivers of change, feedback produc-
tion, processes, products, co-products, economics,
transportation/logistics, and marketing.

A E 340. Functional Analysis and Design of Agri-
cultural Field Machinery. (2-2) Cr. 3. S. Prereq: 110,
203, 216. Principles of operation, design, selection,
testing and evaluation of agricultural field machinery
and systems. Functional and mechanical perform-
estes. Crop and soil interaction with machines. Machine
systems, including land preparation, crop establish-
ment, crop protection, harvesting and post-harvest,
materials handling systems.

A E 342. Agricultural Tractor Power. (2-3) Cr. 3.
S. Prereq: M E 330 or Ch 381 or M E 231. Thermody-
namic principles and construction of tractor engines.
Fuels, combustion, and lubrication. Kinematics and
dynamics of tractor power applications; drawbar,
power take-off and traction mechanisms. Nonmajor
graduate credit.

A E 363. Agri-Industrial Applications of Electric
Power and Electronics, (3-2) Cr. 4. F. S. Prereq: Phys
222. Single phase and three phase circuit design.
Electrical safety. Electric motors and controls.
Programmable logic controllers. Digital logic, instru-
mation and sensors. Nonmajor graduate credit.

A E 388. Sustainable Engineering and International
Development. (Cross-listed with C E, E E, M E,
Mat E). (2-2) Cr. 3. F. S. Prereq: Junior classification in
engineering. Multi-disciplinary approach to sustain-
able engineering and international development,
sustainable engineering and design, sustainable
career aspects of sustainable engineering and deci-
ding projects from problem formulation through
implementation. Interactions with partner community
organizations or international partners such as non-
government organizations (NGOs). Course readings,
final project/design report.

SS. Prereq: Permission of department and Engineering
CAREER Services. Summer professional work period.

S. Prereq: Permission of department and Engineer-
ing CAREER Services. One semester maximum per
academic year professional work period.

A E 398. Cooperative Education. Cr. R. FS/SS.
Prereq: 298, permission of department and Engineering
CAREER Services. Second professional work period in the
cooperative education program. Students must regis-
ter for this course before commencing work.

A E 401. Professionalism Seminar. (Cross-
listed with BSE, TSM). (1-0) Cr. 1. F. S. Prereq: 301. 8 week
course. Examination of professionalism in the context of
engineering and technology. Time, project and personnel
management. Communications and profes-
sional portfolios. Professional licensure. Transition to
professional careers.

A E 403. Modeling and Controls for Agricultural
Systems. (Dual-listed with 503). (2-2) Cr. 3. Alt.
S., offered 2011. Prereq: 363, Math 267 Modeling
dynamic systems with ordinary differential equations.
Introduction to state variable methods of system
analysis. Analysis of mechanical, electrical, and fluid
power systems. Analytical and numerical solutions of
differential equations. Introduction to classical
control theory. Feedback and stability examined in the
state domain. Frequent use of a computer and
analytical and experimental tool. MATLAB will be used throughout
the course for modeling.

A E 404. Instrumentation for Agricultural and Bio-
systems Engineering. (Dual-listed with 504). (2-2)
Cr. 3. F. S. Prereq: 363 or Cpr E 281. Interfacing tech-
niques for computer and control systems. Basic interfacing
components including A/O and D/A conversion, signal filtering, multiplexing,
and process control. Sensors and theory of operation
applied to practical monitoring and control problems.

A E 406. Applied Computational Intelligence for
Agricultural and Biological Systems. (Dual-listed with
SB). (2-2) Cr. 3. Alt. S. Prereq: 216 or equivalent, Math
166, Stat 305. Applications of bio-
logically inspired computational intelligence tools to
solve problems in agricultural and biological systems.
Introduction to Artificial Neural Networks, Support
Vector Machines, Fuzzy Logic, Genetic Algorithms,
Bayesian and Decision Tree Learning. Fundamental
machine vision techniques will be introduced in the
first part of course and integrated into the lab exer-
cises for learning different computational intelligence
techniques. MATLAB will be used throughout
the course for algorithm implementation.
A E 408. GIS and Natural Resources Management. (Dual-listed with 508). (Cross-listed with EnSci). (2-2) Cr. 3. F. Freq: Working knowledge of computers and Windows environment. Introduction to fundamental concepts and applications of GIS in natural resource management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS. In addition to other assignments, graduate students will complete research literature reviews on topics covered in class and develop enterprise applications.

A E 411. Bioprocessing and Bioproducts. (Dual-listed with 511). (Cross-listed with BioE, BSE, C E). (3-0) Cr. 3. F. Freq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation, membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

A E 416. Agricultural Engineering Design II. (Cross-listed with BSE). (1-2) Cr. 2. F S. Prereq: 415. Selection of promising solutions identified in 415 for development by design teams. Presentation of designs through oral and written reports and prototypes. Nonmajor graduate credit.

A E 424. Air Pollution. (Dual-listed with 524). (Cross-listed with C E, EnSci). (1-0) Cr. 1. Freq: Either Phys 221 or Chem 176 and either Math 166 or 3 credits in statistics. Senior classification or above. 1 cr. per module. Module A prereq for all modules; Module B prereq for D and E.

A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology
E. Agricultural solutions of pollution

A E 431. Design and Evaluation of Soil and Water Conservation Systems. (Dual-listed with 531). (2-2) Cr. 3. F. Freq: E M 378 or Ch E 386. Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; introduction of current design problems identified in 415 for development by design teams. Presentation of designs through oral and written reports, and prototypes. Nonmajor graduate credit.

A E 451. Food and Bioprocess Engineering. (Dual-listed with 551). (3-0) Cr. 3. F. Freq: 218 and M E 436 or Ch E 357 or FS HN 351 and Math 266 or 267. Application of engineering principles and Mathematically modeling to the quantitative analysis of food and bioprocess systems. Application of chemophysical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes.

A E 466. Multidisciplinary Engineering Design. (Cross-listed with Aer E, Cpr E, E E, E Engr, I E, Mat E, M E) (1-4) Cr. 3. Repeatable. FS. Freq. Student must be within two semesters of graduation and receive permission of the instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as AutoCAD, Inventor, ANSYS, and MATLAB. Project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, computer models and engineering drawings.

A E 498. Cooperative Education. Cr. R. Repeatable. F S S S. Prereq: 388; permission of department and Engineering Career Services. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

A E 504. Instrumentation for Agricultural and Biosystems Engineering. (Dual-listed with 404). (2-2) Cr. 3. F. Freq: 363 or Cpr E 281. Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal conditioning, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A E 506. Applied Computational Intelligence for Agricultural and Biological Systems. (Dual-listed with 408). (2-2) Cr. 3. Alt. F., offered 2010. Prereq: 216 or equivalent, Math 186, Stat 305. Applications of biologically inspired computational intelligence tools to solve problems in agricultural and biological systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree Learning. Fundamental machine vision techniques will be introduced in the first part of course and integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation. Individual and/or group projects required for graduate credit.

A E 508. GIS and Natural Resources Management. (Dual-listed with 408). (Cross-listed with EnSci). (2-2) Cr. 3. Freq: Working knowledge of computers and Windows environment. Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS. In addition to other assignments, graduate students will prepare research literature reviews on topics covered in class and develop enterprise applications.

A E 511. Bioprocessing and Bioproducts. (Dual-listed with 411). (Cross-listed with BSE, BRT, C E). (3-0) Cr. 3. F. Freq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation, membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

A E 515. Integrated Crop and Livestock Production Systems. (Cross-listed with Agron, An S, SusAg). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: SusAg 509. Methods to maintain production levels to minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

A E 524. Air Pollution. (Dual-listed with 424). (Cross-listed with C E, EnSci). (1-0) Cr. 1. Freq: Either Phys 221 or Chem 176 and either Math 166 or 3 credits in statistics. Senior classification or above. 1 cr. per module. Module A prereq for all modules; Module B prereq for D and E.

A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation constraints
D. Off-gas treatment technology
E. Agricultural solutions of pollution

relationship of topography, soils, crops, climate, and
cultural practices in conservation and quality preserva-
tion of soil and water for agriculture. Small watershed
hydrology, water movement and utilization in the soil-
plant-atmosphere system, agricultural water manage-
ment, best management practices, and agricultural
water quality. Graduate students will prepare several
research literature reviews on topics covered in the
class in addition to the other assignments.

A E 533. Erosion and Sediment Transport. (Cross-
listed with EnSci.) (3-0) Cr. 3. Alt. offered 2009.
Prereq: 422 or C or above in 426. Soil erosion and
sedimentation processes, modified universal soil loss equation and its application to conservation planning, sediment
properties, initiation of sediment motion and over land
flow, flow in alluvial channels and theory of sediment
transport, channel plans, causes sedimentation, wind erosion, BMPs for controlling erosion.

A E 536. Design and Evaluation of Soil and Water
Monitoring Systems. (Dual-listed with 436). (2-3)
Cr. 3. Alt. S., offered 2011. Prereq: E 437/531. Development
of monitoring systems that support effective planning, performance evaluation, modeling, or
environmental impact assessment of soil, water,
and waste-management systems. Typical soil and
water pollutants and physical, chemical, and biological
characteristics that affect sample location and timing. Sample collection, chain of custody,
and quality assurance procedures. In addition to other
assignments, graduate students will prepare several
research literature reviews on topics covered in the
class and develop monitoring plans.

A E 581. Food and Bioprocess Engineering. (Dual-
listed with 451). (3-0) Cr. 3. F. Prereq: 216 and M E 438 or Ch E 437, or FS HN 361 and Math 266 or 267.
Application of engineering principles and Mathemati-
cal modeling to the quantitative analysis of food and
bioprocessing systems. Physical/chemical characteristics of foods and bioprocessing systems, flow processes,
thermodynamic processes and separation processes. Term
paper required for graduate credit.

A E 569. Grain Processing and Handling. (Dual-
grain and oilseed preservation, quality measurement,
and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soy-
bean oil extraction. Grain handling systems. Individual
and group projects required for graduate credit.

A E 572. Design of Environmental Modification
Systems for Animal Housing. (Dual-listed with 472).
Principles and design of environmental control systems. Insulation, heat and mass transfer, fans,
ventilation, air distribution, heating and cooling equip-
m ent, duct design, and controls. Individual and group
projects required for graduate credit.

A E 578. Wood Frame Structural Design. (Dual-
listed with 478). (3-0) Cr. 3. Alt. S., offered 2011.
Prereq: 216, E M 324. Design of light-framed wood
structures. Includes analysis of wind, snow, dead, and
live loads. Applications include animal housing and
machine storage. Fasteners, laminated posts, truss
structures, and use of design specifications. Individual
project required for graduate credit.

A E 590. Special Topics. Cr. arr. Repeatable.
B. Biosystems Engineering
F. Food Engineering
O. Occupational Safety
P. Power and Machinery Engineering
Q. Structures and Environment
R. Process Engineering
S. Environment and Natural Resources
U. Waste Management

Agronomy

Kendall Lamkey, Chair of Department

Distinguished Professors: Fehr, Horton

Distinguished Professors (Emeritus): Frey, Hallauer, Peake, Russell, Shaw

Professors: P Anderson, Arritt, Barnhart, Beavis, Burras, Chen, Ciancio, Cruse, Elmore, Fales, Gallus, Goltowski, Hartzler, Killorn, Lamkey, Lee, Liebman, Loyachan, Mallarino, Miller, Moore, Mulllen, Oxen, P. Peterson, T. Peterson, Sandor, Sawyer, Schnable, Taba-
tabi, Takle, Taylor, Thompson, Wang, Westgate, Walt

Professors (Emeritus): M. Anderson, Atkins, Benson, Burris, Campbell, I. Carlson, R. Carlson, Fenton, Green, Hodges, Imsande, Keeney, Larson, Pearce, Schafer, Schaller, A. Scott, Shibbles, Shrader, Skrdla, Stritzel, H. Thompson, L. Thompson, Troeh, Voss, Wedin, Whigham, Woolley, Yarger

Professors (Collaborators): Hatfield, Jaynes, Karlen, Kaspar, Laird, Logsdon, Masters, Palmer, Shoemaker

Associate Professors: Al-Kaisi, Bercraft, Bhattachara-
rya, Dekker, Delate, Knapp, Lubberstedt, Manu, Wiedenhoft

Associate Professors (Collaborators): Cambardella, Grant, Kover, Moorman, Pollak, Sauer, M. Scott

Assistant Professors: Goggi, Heaton, Henning, Hornbuckle, Pedersen, Politio, Salas-Fernandez

Assistant Professor (Adjunct): Fu

Assistant Professors (Collaborators): Blanco, Cannon, Edwards, Gardner, Graham, Guan, Singer, Widrlechner

Lecturers: Christensen, Cia, Dobill, McAndrews, Siegh, Zdortkowski

Undergraduate Study

For undergraduate curriculum in Agronomy, see College of Agriculture, Curricula.

The Department of Agronomy has a curriculum noted for its scientific rigor and breadth in crop science, soil science, agricultural meteorology, and plant breeding. It prepares students for science-based professional positions, graduate study, or research careers across the spectrum of Agronomy. The curriculum provides both flexibility and direc-
tion for students by offering four in-depth options: crop management and business, agroecology, soil and environmental science, quality and plant breeding and biotechnology. A minimum of 15 credits of Agronomy courses must be earned at Iowa State for students transferring from other institutions. The program also has many opportuni-
ties for undergraduate students to be involved in cutting edge research and international agriculture.

Graduates have the theoretical and practical knowledge needed for efficient and sustainable production of food, feed, fuel, and fiber. Graduates are skilled in communications, critical thinking, problem solving, and working effectively with others. They understand the ethical, cultural, and environ-
mental dimensions of issues facing professionals in agriculture and natural resources.

An Agronomy major prepares students for employment in agricultural business and industry, agricultural service organizations, crop production and soil management, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field Agron-
omists, crop and soil management specialists, research technicians, sales and marketing special-
ists, and production managers. State and federal agencies employ Agronomists as extension specialists, county extension directors, environ-
mental and natural resource specialists, research associates, soil surveyors, soil conservationists, and in regulatory agencies as plant, food, and grain inspectors. Additional areas of work open to Agronomists include international pest manage-
ment, land appraisal, agricultural finance, turfgrass management, and the home lawn care industry.

The department offers an international scholar pro-
gram leading to a credentialed title of "Agronomy International Scholar" for agronomy majors who have distinguished themselves in global under-
standing and international experience. Contact the department for requirements.
Graduate Study
The department offers programs that lead to the degrees master of science and doctor of philosophy, with majors in agricultural meteorology; crop production and physiology with optional specializations in seed science and weed science; plant breeding; and soil science with specialization in soil chemistry, soil fertility, soil management, soil microbiology and biochemistry, soil morphology and genesis, or soil physics. Minor work is offered for students with majors in other departments. A M.S. nonthesis option is available for students desiring a general degree program with additional coursework and a written creative component substituting for thesis research.

Graduates have a broad knowledge base germane to their area of study. They are trained to integrate and apply knowledge to different situations. Students develop skills in scientific reasoning, organization, and logical presentation of ideas.

The department offers a Master of Science degree in Agronomy designed for the continuing education of professional Agronomists. The Program is taught at a distance using computer-based instructional media. It is a nonthesis degree requiring completion of a written creative component.

The department cooperates in the interdepartmental program in professional agriculture; interdepartmental majors in ecology and evolutionary biology; genetics; MCDB (molecular, cellular, and developmental biology); plant physiology; sustainable agriculture; and environmental science.

Prerequisite to major work in this department is completion of an undergraduate degree program with emphasis on Agronomic, biological, and physical sciences.

Courses primarily for undergraduate students

Agron 105. Leadership Experience. Cr. R. F.S.SS. A participatory educational experience in activities or completion of a course that enhances the development of leadership and group-dynamic skills. See adviser for departmental requirements.

Agron 110. Professional Development in Agronomy: Orientation. (0.5-0) Cr. O. F. Orientation to college life, the profession of Agronomy, and the Agronomy curriculum.

Agron 120. Introduction to Renewable Resources. (Cross-listed with Env S, NREM). (3-0) Cr. 3. F.S. Over view of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

Agron 154. Fundamentals of Soil Science. (2-2) Cr. 3. F.S. Prereq: Chem 163. Manu. Introduction to physical, chemical, and biological properties of soils, their formation, classification, and distribution. Use of soil survey and computer databank information in balancing Agronomic, economic, and environmental concerns in soil management. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

Agron 155. Soils for Horticultural Scientists. (2-2) Cr. 3. F.S. Prereq: Chem 163. Restricted to students in Horticulture. Manu. Physical, chemical and biological properties of natural and manufactured soils. Use of soil information when producing plants on natural and manufactured soil only. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

Agron 156. Soils for Urban Use. (2-2) Cr. 3. F.S. Restricted to students outside the College of Agriculture. Manu. Fundamental properties of soils and their application to urban Settings. Development of a site plan for area of land survey and computerized database information. Field trip. Credit for only one of Agron 154, 155 or 156 may be applied toward graduation.

Agron 206. Introduction to Meteorology. (Cross-listed with Meteo). (3-0) Cr. 3. F.S. Basic concepts in meteorology, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety. Subsequent assignments utilize interactive computerized exercises, worksheets and computerized real-time forecasting. Self-study section may be available to distant education students.

Agron 283. Pesticide Application Certification. (Cross-listed with Ent, For, Hort). (2-0) Cr. 2. S. Holscher. Core background and specialty topics in agricultural and Horticultural pesticide applicator certification. Students can Select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

Agron 298. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department cooperative education coordinator, sophomore classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Agron 311. Professional Internship in Agronomy. (1-0) Cr. 1. Repeatable. F.S. Prereq: Agron 110. Agronomy majors only. permission of instructor before internship begins. A supervised learning experience in a professional setting related to crop production, plant breeding, soil science or environmental science.

Agron 320. Genetics, Agriculture and Biotechnol- ogy. (Cross-listed with Gen). (3-0) Cr. 3. F.S. Prereq: Biol 212. Transmission genetics with an emphasis on applications in agriculture, the structure and expres- sion of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313.

Agron 325. Biorenewable Systems. (Cross-listed with E, An, S, BusAd, Econ, TSM). (3-0) Cr. 3. F.S. Prereq: Econ 101, Chem 155 or higher, Math 140 or higher. Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processing, products, co-products, economics, transportation/logistics, and marketing.

Agron 331. Intercollegiate Crops Team. (0-6) Cr. 2. F.S. Prereq: Permission of instructor. Intensive train- ing in preparation for intercollegiate competition in national crops contests.

Agron 334. Forage Crop Management. (3-0) Cr. 3. F.S. Prereq: 114. Barnhart. Production and manage- ment of forage crops; concepts applied to yield, quality, and stand persistence; systems of forage utilization including grazing, hay, and silage. Students enrolling for graduate credit will be expected to complete an additional class project. Nonmajor graduate credit.

H. Honors Section. (Honors Program students only.)

Agron 351. Turfgrass Establishment and Manage- ment. (Cross-listed with Hort). (3-0) Cr. 3. F.S. Prereq: Hort 221 or Agron 114 or Biol 211. Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadways, and seed and sod production. The biology and control of turfgrass pests. Nonmajor graduate credit.
Agron 351L. Turfgrass Establishment and Management Laboratory. (Cross-listed with Hort.) (0-0) Cr. 1. F. Prereq: Credit or enrollment in 351. Those enrolled in the Horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor. Nonmajor graduate credit.

Agron 354. Soils and Plant Growth. (Cross-listed with Hort.) (3-0) Cr. 3. F. Prereq: Agron 164 and Biol 101 or 211, Killion or Lohnanch. Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development. Nonmajor graduate credit.

Agron 354L. Soils and Plant Growth Laboratory. (Cross-listed with Hort.) (0-3) Cr. 1. F. Prereq: Credit or enrollment in 354. Henning. Laboratory exercises in soil testing that assess a soil’s ability to support nutritive requirements for plant growth.

Agron 360. Environmental Soil Science. (Cross-listed with EnSci). (2-3) Cr. 3. S. Prereq: Agron 260 or Geol 100 or 201. Burras and Killorn. Application of soil science to environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

Agron 370. Field Experience in Soil Description and Interpretation. (0-3) Cr. 1. Repeatable. F. S. Prereq: Agron 154 and permission of instructor. Sandor. Description and interpretation of soils in the field and laboratory, emphasizing hands-on experience. Evaluation of soil information for land use. Students may participate in intercollege judging contests.

Agron 392. Systems Analysis in Crop and Soil Management. (3-0) Cr. 3. F. Prereq: Agron 316 and 354. Wie- denhoft. Management strategies at the level of the farm field. Emphasis will be on participatory learning activities.

Agron 398. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Agron 402. Watershed Hydrology. (Cross-listed with EnSci, Geol, Mteor, NREM). (3-0) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering. junior standing. Examination of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.

Agron 402L. Watershed Hydrology and Surficial Processes. (Cross-listed with la LL, EnSci). Cr. 4. SS. Prereq: Four courses in physical or biological sciences or engineering. Effects of geomorphology, soils, and land use on water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed. Nonmajor graduate credit.

Agron 404. Global Change. (Dual-listed with 504). (Cross-listed with EnSci, Env S, Mteor). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing. Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Nonmajor graduate credit.

Agron 405. Environmental Biophysics. (Dual-listed with 505). (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. S. Prereq: Agron 316 and permission of instructor. Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water and carbon) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind, heat, mass, and radiative transport. Applications to animals, plants, and plant communities. Nonmajor graduate credit.

Agron 406. World Climates. (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. F. Prereq: Agron/Mteor 206. Arritt. Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including Society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Nonmajor graduate credit.

Agron 417. Evolutionary Ecology of Weeds. (Dual-listed with 517). (3-0) Cr. 3. S. Prereq: 317 Dekker. Ecology and evolution of invasive plants and weeds in habitats disturbed by humans. Life history traits and occurrence of invasive species and their management opportunities and the consequent processes of invasion, coloniza- tion, enduring occupation and population shifts. Roles played by mating systems and biodiversity, soil seed pools and community assembly, competitive interac- tions with neighbors and fitness.

Agron 421. Introduction to Plant Breeding. (Cross-listed with Hort). (3-0) Cr. 3. F. Prereq: Gen 320 or Biol 313. Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and asexually reproducing Agronomic and Horticultural crops. Applications of biotechnology techniques in the development of improved cultivars. Nonmajor graduate credit.

Agron 446. International Issues and Challenges in Sustainable Development. (Cross-listed with Globe, IntSt). Cr. 4. S. Prereq: 4-credit biology course, Sophomore or three classification, permission of Instructor: Mullen. Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociologi- cal, economic, political, and historical factors affect- ing sustainable development of communities and countries from an art and science perspectives. Interna- tional field experience with foreign language training required. A program fee is charged to students. Nonmajor graduate credit.

Agron 452. GIS for Geoscientists. (Dual-listed with 552). (Cross-listed with Geol, EnSci). (2-2) Cr. 3. F. Prereq: Geol 100, Geol 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses. Nonmajor graduate credit.

Agron 459. Environmental Soil and Water Chem- istry. (Dual-listed with 559). (Cross-listed with EnSci). (3-0) Cr. 3. F. Prereq: Agron 354 or EnSci 260; Chem 164, 165, or 178; Math 140, Chem 211 or 231 recom- mended. Thompson. An introduction to the chemical properties of soils, chemical reactions and transforma- tions in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues. Nonmajor graduate credit.

Agron 463. Soil formation and Landscape Relationships. (Dual-listed with 563). (Cross-listed with EnSci). (2-4) Cr. 4. S. Prereq: Agron 154 or 260. Sander. Relations between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of Agron 463 or 463L may be applied for graduation. Nonmajor graduate credit.

Agron 490. Independent Study. Cr. 1-3. Repeatable maximum of 4 credits. F.S.S. Prereq: Junior or senior classification with at least 8 credits in Agronomy; permission of instructor in specialty area after consul- tation. Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

Agron 491. Seed Science Internship Experience. (Cross-listed with TSM, Hort). Cr. art. Repealable. F.S.S. Prereq: Agron 338, advanced approval and participation of employer and instructor. A profes- sional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

Agron 495. Agricultural Travel Course Preparation. Cr. R. Repeatable. F.S. Prereq: Permission of instructor. Limited enrollment. Students enrolled in this course intend to register for Agron 496 the following term. Topics will include the agricultural industries, climate, crops, culture, economics, geography, history, livestock, marketing, soils, and preparation for travel to locations to be visited.

Agron 496. Agricultural Travel Course. Cr. R. Repeatable. Prereq: Permission of instructor. Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production will vary. Tour expenses paid by students. Check with department for current offerings.

A. International Tour
B. Domestic Tour

Agron 497. Agroecology Field Course. (3-0) Cr. 3. F. Prereq: J or Sr. classification with at least 8 credits in Agronomy. A one-week intensive class, offered off-campus. Student will visit farms within the Midwest and analyze the sustainability of each farm.

Agron 498. Cooperative Education. Cr. R. F.S. Prereq: Permission of department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduate students

Agron 500. Orientation Seminar. (2-0) Cr. 1. F. Prereq: International Agronomy graduate students only. Loyanachan. An introduction to Iowa and U.S. agriculture for international students in Agronomic majors. Field trips to cooperatives student role in the functioning of research, teaching, and extension in fulfilling the charge given the land-grant university.

Agron 502. Chemistry, Physics, and Biology of Soils. (3-0) Cr. 3. F. Prereq: 114, 154, Biol 101. Soil chemical, physical, and biological properties that control processes within the soil, their influence on plant-soil interactions, and soil classification. Basic concepts in soil science and their applications. Required course for the Master of Science in Agronomy degree program.

Agron 503. Climate and Crop Growth. (3-0) Cr. 3. F. Prereq: 114 and Math 140. Applied concepts in climate and agricultural meteorology with emphasis on the climate-agriculture interaction and the micro-climate-agriculture interaction. Basic meteorological principles are also presented to support these applied concepts. Required course for the Master of Science in Agronomy degree program.

Agron 504. Global Change. (Dual-listed with 404). (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; Junior; senior; or graduate standing. Recent changes in global biochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

Agron 505. Environmental Biophysics. (Dual-listed with 488). (Cross-listed with Mteor, EnSci). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Math 166 or equivalent. Hornbuckle. The physical microenvironment in which organisms live, with an emphasis on the processes of energy and mass (water and carbon) exchange between organisms and their environment and the quantitative models that are used to represent these processes. Temperature, water, and wind. Heat, mass, and radon transport. Applications to animals, plants, and plant communities. Semester project required.

Agron 509. Agroeosystem Analysis. (Cross-listed with Anth, Soc, SusAgl). (3-4) Cr. 3. F. Prereq: Senior or above classification. Experimental, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc), and scales of operation.

Agron 510. Crop Improvement. (Cross-listed with STB). (3-0) Cr. 3. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. A study of the basic principles and methods in the genetic improvement of crop plants. Methods used in manipulating genomes through the use of biotechnology. Methods of cultivar development. Courses for describing the response to selection. Analysis of the relationship of reproductive characters and growth characteristics to response to selection.

Agron 512. Soil-Plant Environment. (3-0) Cr. 3. S. Prereq: 502. Recommended 501. Loyanachan. Soil properties and their impact on soil/plant relationships. Soil structure, aerotropic and nutrient will be discussed in the context of soil fertility and environmental quality management. Required course for the Master of Science in Agronomy degree program.

Agron 513. Quantitative Methods for Agronomy. (3-0) Cr. 3. S. Prereq: 114, Math 140, Stat 104. Quantitative methods for analyzing and interpreting Agromon data. Principles of experimental design, hypothesis testing, analysis of variance, regression, correlation, and graphical representation of data. Use of JMP for organization, analyzing, and presenting data. Required course for the Master of Science in Agronomy degree program.

Agron 515. Integrated Crop and Livestock Production Systems. (Cross-listed with A E, SusAgl, An S). (3-0) Cr. 3. F. Prereq: 509. Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

Agron 516. Crop Physiology. (3-0) Cr. 3. S. Westgate. Investigation of Molecular, whole plant, and plant community processes essential to biomass production and seed formation, and analysis of molecular approaches to overcome the limitations imposed on these processes by the environment.

Agron 517. Evolutionary Ecology of Weeds. (Dual-listed with 417). (3-0) Cr. 3. S. Prereq: 317 Dekker. Evolution and ecology of invasive plants and weeds in habitats disturbed by humans. Life history trait evolution and adaptation to agricultural opportunities and the consequent processes of invasion, colonization, enduring occupation and population shifts. Roles played by mating systems and biodiversity, soil seed pools and community assembly, competitive interactions with neighbors and fitness.

Agron 518. Microwave Remote Sensing. (Cross-listed with E E, Mteor). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Math 265 or equivalent or permission of instructor. Hornbuckle. Microwave remote sensing of Earth’s surface and atmosphere. Overview of relevant electromagnetic theory and antenna theory. Planck emission and the radiative transfer equation. The electrical properties of natural materials at microwave frequencies. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, and soil and vegetation water content.

Agron 521. Principles of Cultivar Development. (3-0) Cr. 3. F. Prereq: 421. Stat 401. Theoretical and practical analysis of alternative breeding methods to improve crop plants. Strategies to incorporate germplasm resources, develop populations, maximize genetic gain, use marker-assisted selection. Relationship of breeding methods to commercial seed production.

Agron 522. Field Methods in Plant Breeding. (6-0) Cr. 2. SS. Prereq: 521. Field experience in planning and conducting plant breeding research for germplasm and cultivar development. Satisfactory-fail only.

Agron 527. Plant Genetics. (3-0) Cr. 3. S. Prereq: Gen 410. Bhattacharyya. Fundamental genetic and cytogenetic concepts from plant perspective including recombination, linkage analysis, genetic and molecular mapping, male sterility, self incompatibility, apomixis, and polyploid evolution.

Agron 529. Publishing in Plant Science Journals. (Cross-listed with Hort, NRRL). (2-0) Cr. 2. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data. Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

Agron 530. Ecologically Based Pest Management Strategies. (Cross-listed with SusAg, Ent, PI Pl). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: SusAg 509. Dutt, Attri. The least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

and interactions. Emphasis on the ecology of row and forage crops common to the Midwest. Required course for the Master of Science in Agronomy degree program.

Agron 532. Soil Management. (3-0) Cr. 3. F. Prereq: 501, 503, 512. Recommended 513. Evaluates the impact of various soil management practices on soil and water resources. Combines and applies basic information gained in Agron 502 and Agron 512. Emphasizes the Agronomic, economic, and environmental effects of soil management strategies. Required course for the Master of Science in Agronomy degree program.

Agron 533. Crop Protection. (3-0) Cr. 3. F. Prereq: 514. Integrated management systems for important crop pests. Cultural, biological and chemical management strategies applicable to major crops grown in the Midwest. Required course for the Master of Science in Agronomy degree program.

Agron 534. Seed and Variety, Testing and Technology. (Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. The components of seed quality and how they are assessed in the laboratory, including traits derived from modern biotechnology. The impact of new technologies on seed quality testing. Variety maintenance procedures and breeder seed. Variety identification: phenotype and grow-out traits, isozyme testing, and DNA marker testing. Procedures for evaluating variabilities. The variance components appropriate for fixed effects and analysis of variance. Statistical inference and stratification for yield trials. Use of strip plot splitting.

Agron 535. Introduction to the Seed Industry. (Cross-listed with STB). Cr. 1. F. Prereq: Curriculum requires undergraduate specialization in a business or biological science. An analysis of the defining characteristics of the seed industry and introduction to the Master in Seed Technology and Business curriculum. The tasks of crop improvement and seed production will be analytically related to basic management functions and classifications of management activities that are used in the study of business administration. Management tasks and roles will be analyzed in related to the public policy issues that shape the seed industry, including ethical and economical approaches to biotechnology, intellectual property, and corporate responsibility.

Agron 536. Quantitative Methods for Seed. (Cross-listed with STB). (1-0) Cr. 1. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. Quantitative Methods for interpreting Agronomic and business information for the seed industry. Principles of experimental design and hypothesis testing, regression, correlation and graphical representation of data. Use of spreadsheets for manipulating, analyzing and presenting data.

Agron 539. Seed Conditioning and Storage. (Cross-listed with STB). (2-0) Cr. 2. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor. The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as focal points within the overall operations of a seed company.

Agron 541. Applied Agricultural Meteorology. Cr. 2-3. F.S.SS. Prereq: 206 or upper division Biological Science. Taylor. Applied concepts in agricultural meteorology. Basic concepts of weather and of crop-climate relationships. Analysis of data from field trials that influence seed, yield and associated production risk factors. Self study sections are available to resident and to distant education students all semesters. Credit for only one of Agron 503 or 541 may be applied toward graduation.

Agron 546. Organizational Strategies for Diversified Farming Systems. (Cross-listed with Soils Hort, SusAg). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Sus-Ag 509. Examination of the organization and operation of complex, diversified farming systems using tools and perspectives drawn from ecology, Agronomy, and Sociology. The course includes a significant field component focused on an Iowa farm.

Agron 547. Seed Production. (Cross-listed with STB). (2-0) Cr. 2. Alt. F., offered 2010. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of instructor. Survey of the major production elements of seed fertility, planting dates, populations, weed control, and insect control. Analysis of the principles of seed multiplication and the key practices which are used to ensure high quality in the products. Field inspection procedures, and production aspects that differ from other crop production. Foundation seed production. Analysis of the typical organization of field production tasks. Resources and capabilities required. Survey of differences in seed production strategies between crops and impact of differences on management of seed production.

Agron 551. Growth and Development of Perennial Grasses. (Cross-listed with Hort). (2-0) Cr. 2. Alt. S., offered 2010. Prereq: Junior or senior or graduate classification or permission of instructor. The grass plant. Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.

Agron 552. GIS for Geoscientists. (Dual-listed with Geol). (4-2) Cr. 2. F. Prereq: Geol 100, Geol 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscience data. Uses ESRI's ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

Agron 555. Soil Clay Mineralogy. (Cross-listed with Geol). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Agron 472; Chem 178 or Chem 311 Structure and behavior of clay minerals in soil environments, with emphasis on layer silicates and on Fe, Mn, and Al oxides.

Agron 558. Laboratory Methods in Soil Chemistry. (Cross-listed with En Sci). (2-3) Cr. 3. F. Prereq: Agron 354 and Chem 178 or 211. Tabatabai. Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic and molecular absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

Agron 559. Environmental Soil and Water Chemistry. (Cross-listed with Geol). (3-0) Cr. 3. Prereq: Agron 354 or EnSci 260 or 261; Math 164, 165, or 178; Math 140. Chem 211 or 231 recommended. Thompson. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, chemical-equilibrium speciation programs, and applications to contemporary environmental issues.

Agron 563. Soil formation and Landscape Relationships. (Dual-listed with 463). (Cross-listed with EnSci). 3-4 Cr. 3-4. Prereq: Agron 154 or 260. Burrus. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for only Agron 563 or 563I may be applied for graduation.

Courses for graduate students

Agron 609. Agricultural Meteorology Conference. (1-0) Cr. 1. Repeatable. F.S.S. Prereq: Permission of instructor. Literature reviews and conferences with instructor on special problem relating to agricultural meteorology, beyond the scope of current courses offered.

Agron 610. Foundations of Sustainable Agriculture. (Cross-listed with SusAg, A E, Anthr, Soc). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

Agron 625. Genetic Strategies in Plant Breeding. (3-0) Cr. 3. S. Prereq: 541, 542, 546, 561; Gen 410. Lee. Evaluation of genetic, molecular, and cellular approaches to crop improvement; gene transfer methods. Application and role of basic plant biology in breeding programs and processes; genome structure and function, gene isolation, expression, regulation, and modification. Integration of molecular and cellular methods in breeding strategies; analysis of alternative breeding methods, regulatory and ethical issues.

Agron 698. Agronomy Teaching Practicum. Cr. arr. Repeatable. F.S.S. Prereq: Graduate classification in Agronomy and permission of instructor. Graduate student experience in Agronomy's teaching program. Satisfactory-fail only.

Air Force Aerospace Studies

The objectives of the Department of Air Force Aerospace Studies are to provide qualified students the opportunity to earn a commission as an officer in the active duty Air Force, and to build better citizens for those not interested in joining the Air Force.

The curriculum is divided into two basic phases, the general military course (GMC) and the professional officer course (POC). The GMC is introductory and consists of four consecutive 1-hour courses normally taken during the freshman and sophomore years. GCM completion is not a prerequisite for entry into the POC, although it is recommended by the department.

Prior to entry into the POC, most students complete field training at an Air Force base. Students who have completed the GMC participate in a 4-week program, which provides a concentrated experience in the Air Force environment. The training program includes junior officer training, aircraft and aircrew orientation, career orientation, survival training, an introduction to typical base functions, and physical training. A 6-week training program is provided for those students entering the POC who did not complete the GMC. This program includes all that is offered in the 4-week program, plus academic and leadership laboratory experiences included in the on-campus GMC courses.

Selection for the professional officer course is on a competitive basis, and cadets enrolling in this course must meet certain academic, mental, physical, and moral standards. Qualified cadets may be selected as flight candidates and receive flight instruction prior to attending Undergraduate Pilot Training (UPT) or Undergraduate Navigator Training (UNT). Upon enrollment in the POC, all cadets are required to complete a contractual agreement with the Air Force, which obligates them to 4 years of active duty as an officer in the United States Air Force. Air Force active duty commitment is 10 years for pilots and 6 years for navigators. Uniforms and AFROTC texts are supplied to the cadets, and those in the POC receive a subsistence allowance between $450-500 per month.

Students who fail to observe the contract terms may be called to active duty in an enlisted grade or be required to repay monies received from the Air Force.

Air Force ROTC scholarships are available and provide payment of full tuition and fees. In addition, Scholarship cadets receive between $3300-5000 monthly subsistence allowance and $900 per year book allowance. Upon acceptance of a scholarship, the student executes a contract with the Air Force. Scholarships can be awarded for periods of 2, 3, or 4 years, with up to 1 additional year for qualified applicants in selected majors. To determine eligibility and initiate application procedures for the scholarship program, interested students should contact the department.
Entry into the program is not dependent on departmental major or year in the university. The AFROTC program is open to both male and female students.

The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credits must be in courses numbered 300 or above.

Courses primarily for undergraduate students

AFAS 101. Leadership Laboratory I. (0-2) Cr. 1. F. Instructions on Air Force customs and courtesies; drill and ceremonies, issuing military commands, physical training, studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 102. Leadership Laboratory II. (0-2) Cr. 1. S. Continuation of AFAS 101. Air Force customs and courtesies; drill and ceremonies, issuing military commands, leadership and team building, further study of interpersonal communication, the Oath of Office and Commissioning. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. Satisfactory-fail only.

AFAS 141. Foundations of the United States Air Force. (1-0) Cr. 1. F. Basic introduction to the United States Air Force and Air Force Reserve Officer Training Corps. Mission and organization of the Air Force, officer professionalism, military customs and courtesies, Air Force officer opportunities, and communication skills. Leadership Laboratory is mandatory for AFROTC cadets complements this course by providing cadets with followership experiences.

AFAS 142. Foundations of the United States Air Force. (1-0) Cr. 1. S. A continuation of 141. Topics include Air Force installations, Air Force core values, leadership and team building, further study of interpersonal communication, the Oath of Office and Commissioning. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 151. Air Force Physical Training. (0-2) Cr. 1. Repeatable. S. F. Prerequisite: Enrollment as a cadet in an Air Force Aerospace Studies Class. Use of basic military training skills and instruction to develop confidence, leadership, communication skills and physical fitness. The team approach is utilized in the instruction and application of Air Force physical fitness requirements. Students will learn various Air Force physical fitness techniques as well as how to conduct physical fitness sessions. Full participation in all events will be determined based on student's physical and medical eligibility. Satisfactory-fail only.

AFAS 201. Leadership Laboratory I. (0-2) Cr. 1. F. Instruction for junior cadets on Air Force customs and courtesies, drill and ceremonies, issuing military commands, leadership and team building, directing, and evaluating the preceding skills, the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Continued military training related to wearing the uniform, engaging in military customs and courtesies, and participating in military ceremonies. This laboratory is required if applying for the POC. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 202. Leadership Laboratory II. (0-2) Cr. 1. S. A continuation of AFAS 201, instructing junior cadets on Air Force customs and courtesies, drill and ceremonies, issuing military commands, instructing, physical training, directing, and evaluating the preceding skills, the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Continued military training related to wearing the uniform, engaging in military customs and courtesies, and participating in military ceremonies. This laboratory is required if applying for the POC. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 241. The Evolution of USAF Air & Space Power I. (1-0) Cr. 1. F. Examines the general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the Korean War. Historical examples are provided to illustrate the development of Air Force capabilities (competencies), and missions (functions) to demonstrate the evolution of what has become today’s USAF air and space power. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 242. The Evolution of USAF Air & Space Power II. (1-0) Cr. 1. S. Examines the general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the Korean War. Historical examples are provided to illustrate the development of Air Force capabilities (competencies), and missions (functions) to demonstrate the evolution of what has become today’s USAF air and space power. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 301. Leadership Laboratory I. (0-3) Cr. 1. F. Mid-level management of leadership experiences involving the planning and controlling of the military activities of the AFROTC cadet corps, physical training, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This lab is required if taking AFAS 341 and pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 302. Leadership Laboratory II. (0-3) Cr. 1. S. Continuation of AFAS 301, mid-level management of leadership experiences involving the planning and controlling of the military activities of the AFROTC cadet corps, physical training, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This lab is required if pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 341. Air Force Leadership Studies I. (3-0) Cr. 3. S. Prerequisites: AFAS 141, 142, 241, and 242. Continuation of the study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and assessing practical application of the concepts being studied. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 342. Air Force Leadership Studies II. (3-0) Cr. 3. S. Prerequisite: AFAS 341. A continuation of the study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and assessing practical application of the concepts being studied. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 401. Leadership Laboratory I. (0-3) Cr. 1. S. Advanced leadership experiences involving the planning and controlling of the military activities of the AFROTC cadet corps, physical training, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This lab is required if taking AFAS 441 and pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 402. Leadership Laboratory II. (0-3) Cr. 1. S. Advanced leadership experiences involving the planning and controlling of the military activities of the AFROTC cadet corps, physical training, the preparation and presentation of briefings and other oral and written communications, and the providing of interviews, guidance, and information that will increase the understanding, motivation, and performance of other cadets. This lab is required if taking AFAS 442 and pursuing a commission. Leadership Laboratory is open to students who are members of the Reserve Officer Training Corps or are eligible to pursue a commission as determined by the professor of aerospace studies. Satisfactory-fail only.

AFAS 441. National Security Affairs & Prepara- tion for Active Duty II. (3-0) Cr. 3. F. Prerequisite: AFAS 342. Examines the national security process to include the development of U.S. Policy and strategy; structure of the Department of Defense: advanced study of Joint and Air Force Doctrine; and, advanced study of joint operations. Examines administrative actions and military law as they pertain to force management. Includes a regional studies component with focus on Africa, Latin America, South Asia and East Asia. Begins preparation for active duty through emphasis on current issues affecting professional military officers. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AFAS 442. National Security Affairs & Prepara- tion for Active Duty II. (3-0) Cr. 3. S. Prerequisite: AFAS 342. Examines the national security process to include the development of U.S. Policy and strategy; structure of the Department of Defense: advanced study of Joint and Air Force Doctrine; and, advanced study of joint operations. Examines administrative actions and military law as they pertain to force management. Includes a regional studies component with focus on Europe, Russia and the Middle East. Continues preparation for active duty through emphasis on current issues affecting professional military officers. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

American Indian Studies

(Interdepartmental Undergraduate Minor)

Program Director: Sidner Larson

The American Indian Studies Program is a cross-disciplinary program in the College of Liberal Arts and Sciences that embraces the humanities from American Indian Studies, Anthropology, art, history, literature, political science and Sociology. The primary goal of the American Indian Studies program is to conduct interdisciplinary investigations of the intellectual practices, lived history, values, political status, rights, and responsibilities of tribal nations. Students have the opportunity to learn about the cultural heritage of American Indians, their historical relationship with non-Indians, and their participation in contemporary American
specific historical, political and economic contexts; contemporary Latin American social dynamics within

Exploration of
(Cross-listed with Anthr). (3-0) Cr. 3. An introduction to the beliefs and rituals of Native American religious traditions, with attention to cultural and historical contexts and implications. Nonmajor graduate credit.

Am In 328. American Indian Religions. (Cross-listed with Relig). (3-0) Cr. 3. An introduction to the beliefs and rituals of Native American religious traditions, with attention to cultural and historical contexts and implications. Nonmajor graduate credit.

Am In 342. American Indian Women Writers. (Cross-listed with W.S). (3-0) Cr. 3. Prereq: Engl 250 Literature of American Indian women writers which examines their social, political, and cultural roles in the United States. Exploration of American Indian women's literary, philosophical, and artistic works aimed at recovering elements of identity, redescribing stereotypes, resisting colonization, and constructing femininity. Nonmajor graduate credit.

Am In 346. American Indian Literature. (Cross-listed with Engl). (3-0) Cr. 3. S. Prereq: Engl 250. Survey of literature by Native Americans from pre-Columbian tales and songs to contemporary novels and poetry. Nonmajor graduate credit.

Am In 420. Cultural Continuity and Change on the Prairie-Plains. (Cross-listed with Anthr). (3-0) Cr. 3. F. Prereq: Anthr 315 or 322. Ecological adaptations, sociocultural changes, and continuities of traditions among Prairie and Plains Indian groups through time; impacts of Euro-American Society and technology on Indians of the Great Plains; perspectives from ecology, archaeology, ethnology, history, and contemporary literary sources.

Am In 426. Topics in Native American Architecture. (Cross-listed with Dsn S, Arch). (3-0) Cr. 3. Repeatable. F. Prereq: Junior classification. History, theory, and principles of Native American/Indian American architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 426 may be applied to degree program. Nonmajor graduate credit.

Am In 432. Current Issues in Native North America. (Cross-listed with Anthr). (3-0) Cr. 3. S. Prereq: Anthr 201 or 302, 322 or Am In 210 in 210 recommended. Conditions and issues of contemporary Native Americans; historical background of eighteenth and nineteenth century Indian-White relationships; examination of legal Status, the reservation system, treaty violations, Indian militaryty, education and urbanization, self-determination, social and impact of resource development, and other current concerns.

Am In 490. Independent Study. Cr. arr. Repeatable. Prereq: 6 credits in American Indian Studies; permission of instructor. Designed to meet the needs of students who wish to study in areas other than those in which courses are offered. No more than 9 credits in Am In 490 may be counted toward graduation.

Courses offered by other departments

Anthr 426. Topics in Archaeological Laboratory Methods and Techniques. See Anthropology.

Anthr 429. Archaeological Field School. See Anthropology.

Pol S 312. Minicourse in American Government and Politics. See Political Science. Acceptable only when offered as a course in American Indian tribal government and political theory.

Animal Science

Animal Science

www.ans.iastate.edu/

Maynard Hogberg, Chair of Department

Distinguished Professors: Anderson, Beitz, Lamont, Rothschild, Sebranek

Distinguished Professors (Emeritus): Freeman, Jacobson, Seil, Trenkle, Willham

University Professors: Kenealy

University Professors (Emeritus): Parrish

Professors: Ann, Baas, Berger, Brant, Cordray, Dekker, Dickson, Fernando, Garrick, Harris, Hoffman, Hogberg, Honeyman, Kilmer, E. Lonergan, S. Lonergan, Loy, Mabry, Morical, Nissen, Olson, Pluta, Robson, Russell, Spike, M. Spurlock, Strohbehn, Tuggle, Xin

Professors (Collaborators): Clutter, Horst, Kehrl, Nonnecke, Quigley, Reinhardt, Scanes

Associate Professors: Auverda, Cunnick, Huiatt, Jeffinina, Patience, Reecy, Skaar, Spurlock, Stalder, Timms, Tyler, Youngs

Associate Professors (Collaborators): Frye, Gunsett, Kerr, Mahanna, Sosnicky

Assistant Professors: Butters-Johnson, Ellinwood, Gabler, Ross, Selbys

Assistant Professors (Collaborators): Bonner, Campbell, Lippolis, McVicker, Pta, Rathmader

Senior Lecturer: Boury

Lecturers: Ferwerda, Olsen, Thayne

Clinician: Leuschen

Undergraduate Study

The Department of Animal Science Undergraduate Program intends for its graduates to be able to detail the symbiotic relationship of animals and humans, to solve the complex problems of animal enterprise management, and to apply their knowledge and skills in a technically demanding global community. To enable learners to pursue a wide array of career interests, the department offers learning experiences ranging from the basic to the applied sciences. The department’s undergraduate degree program has 10 major program goals. They are to provide a comprehensive animal science education in (1) science, (2) animal management, and (3) agri-business. In addition, our program strives to create an environment developing: (4) effective communication skills, (5) skills enabling students to gather and integrate information to solve problems, (6) self learners, (7) leaders and team builders, and (8) awareness of domestic and global issues driving changes in the animal industries. Our program also works to (9) provide career skills appropriate to job market needs, and (10) provide superior counseling for fulfilling individual student objectives.

Learner outcomes for each of these goals, for each of our courses, and other information defining the program can be found at our web site: www.ans.iastate.edu/.

The department offers the degrees bachelor of science in animal science and bachelor of science in dairy science, as well as complementary work toward admission to schools of law, medicine, and veterinary medicine which may be done while satisfying requirements for the degree bachelor of science degree (see Index). A minimum of 15 credits of animal science coursework must be
An S 115. Horsemanship and Equitation. (0-4) Cr. 1. Repeatable. F.S. An S 115 can be taken for a maximum of three times for credit. Satisfactory-fail only.
   A. Beginner Hunt Seat Equitation.
   B. Beginner Jumping. Prereq: 115C, or able to walk, trot, and canter.
   C. Intermediate Hunt Seat Equitation. Prereq: 115A or able to walk, trot, and canter.
   D. Intermediate Jumping. Prereq: 115C or jumped a course up to 18”
   E. Beginner Western Horsemanship.
   F. Intermediate Western Horsemanship. Prereq: 115 E or able to walk, jog and lope.

An S 211. Issues Facing Animal Science. (0-2) Cr. 1. F.S. Prereq: 114, sophomore classification. Overview of the factors that influence the ethical, scientific, and scientifically based issues facing animal agriculture. Life skill development (including interactive skills, communication ability, organization, information gathering, and leadership skills) emphasized in context of issues study. Satisfactory-fail only.

An S 214. Domestic Animal Physiology. (3-0) Cr. 3. F.S. Prereq: Biol 212, Chem 163 or 177 Introduction to anatomy and physiology of the nervous, circulatory, respiratory, immune, endocrine, reproductive, and digestive systems of domestic animals.

An S 216. Equine Science. (2-2) Cr. 3. F.S. Prereq: 101 or 114, one course in biology. Introduction to contemporary concepts, and basic practices and decisions necessary when managing horses through stages of their lives.

An S 217. Equine Farm Practicum. (2-2) Cr. 2. F. Prereq: 101 or 114. Student majoring in Animal Science, An S 115 or riding experience, An S 216 or concurrent. Intensified management of the equine farm. Provide students with experiential learning in all phases of horse production and management. Students assist with general farm management, preparing horses for sale, marketing techniques and web design.

An S 223. Poultry Science. (2-2) Cr. 3. F.S. Prereq: 101, 114. Introduction to principles, practices and decisions necessary when raising poultry through their production cycle.

An S 224. Companion Animal Science. (2-2) Cr. 3. S. Prereq: Course in biology. Introduction of students to contemporary concepts, and basic practices and decisions necessary when caring for the companion animal through stages of its life.

An S 225. Swine Science. (2-2) Cr. 3. F.S. Prereq: 101, 114. Introduction to principles, practices and decisions necessary when raising swine through the vertically integrated production cycle.

An S 226. Beef Cattle Science. (2-2) Cr. 3. F.S. Prereq: 101, 114. Introduction to principles, practices and decisions necessary when raising beef cattle through the vertically integrated production cycle.

An S 229. Sheep Science. (2-2) Cr. 3. F.S. Prereq: 101, 114. Introduction to principles, practices and decisions necessary when raising sheep through the vertically integrated production cycle.

An S 305. Livestock Evaluation. (0-6) Cr. 3. F.S. Prereq: Junior classification; An S 270 recommended. Fall semester leads to 475A or D. Breeding animal and market animal evaluation of beef, swine and sheep using contemporary techniques and tools. Communication and decision-making skills are practiced in the context of making selection decisions.

An S 306. Equine Evaluation. (0-6) Cr. 3. S. Prereq: sophomore classification or permission of instructor. Detailed visual evaluation of conformation and performance of the equine athlete. Decision-making skills practiced in the context of making selection choices. Development of written and oral communication skills as students defend their judgments. Industry trends will be addressed.

An S 316. Training the Horse. (0-6) Cr. 3. F. Prereq: 116, or ability to walk, trot and canter. Modifying the behavior of the horse for performance objectives through bitting, longeing, saddling, and riding.

An S 325. Biorenewable Systems. (Cross-listed with A.E, Agron, BusAd, Econ, TSM). (3-0) Cr. 3. F. Prereq: Econ 101, Chem 165 or higher, Math 140 or higher. Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing.

An S 332. Laboratory Methods in Animal Reproduction. (0-4) Cr. 2. F.S. Prereq: Credit or enrollment in An S 331. Comparative reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and manipulate reproductive processes; principles of artificial insemination in farm animals; and selected laboratory exercises with written report.

An S 334. Embryo Transfer Laboratory. (0-3) Cr. 1. F. Prereq: Credit or concurrent enrollment in An S 333. An S 332 or VOPM 4130 permission of instructor. Select- ed laboratory exercises related to embryo transfer such as synchronization of estrus, superovulation, detection of estrus, artificial insemination, embryo collection, embryo evaluation, microscopy, embryo cryopreservation, in vitro fertilization, and embryo sexing will be demonstrated and/or performed. Nonmajor graduate credit.

An S 345. Growth and Development of Domestic Animals. (3-0) Cr. 3. S. Prereq: An S 214; Biol 313 or Gen 320. Basic principles of animal growth and development covered at the tissue, cellular and molecular level. Emphasis placed on skeletal muscle, adipose, bone, and immune system growth and development. The effects of genetics, nutrition, and pharmaceuticals on growth.

An S 352. Genetic Improvement of Domestic Animals. (2-2) Cr. 3. S. Prereq: One course in genetics, Biol 211, course in genetics. Principles of qualitative and quantitative genetics applied to creating change in domestic animals. Impact of selection and mating schemes in achieving breeding program goals. Applications and impacts of biotechnological advancements in genetic manipulation. Nonmajor graduate credit.

An S 353. Animal Breeding Programs Design. (0-4) Cr. 2. S. Prereq: 352. Evaluation of alternate breeding programs and genetic improvement techniques in the context of case study. Experiential and cooperative learning techniques employed. Nonmajor graduate credit.

An S 360. Fresh Meats. (2-2) Cr. 3. F. Prereq: 270; a course in organic or biochemistry. Impact of muscle structure, composition, rigor mortis, inspection, fabrication, handling, packaging and cooking on the palatability, nutritional value, yields, market value, and safety of fresh meat. Nonmajor graduate credit.

B. Supervised Internship Experience. Cr. R. Prereq: Permission of internship coordinator. Supervised learning activity consisting of work period in production agriculture or the agriculture-related industry.

An S 411. Addressing Issues in Animal Science. (2-0) Cr. 1. F. Prereq: Senior classification in An S. Life skill development emphasized in the context of exploring one’s perspective of the most pressing moral and scientific issues facing animal agriculture. Clarification of personal views on current societal and institutional issues through exploration of counter arguments in small and large group settings expected.

An S 417. Equine Reproductive Management. (2-2) Cr. 3. S. Prereq: 216, 331, 415 or concurrent and permission of instructor. Practical application of managing a breeding farm including servicing the mare, handling stallions, breeding problems, foaling mares, and marketing techniques.

An S 435. Applied Dairy Farm Evaluation. (2-2) Cr. 3. S. Prereq: An S 434; Econ 330. Evaluate nutrition, reproduction, milk quality, breeding, and related management practices of commercial dairy herds in a case study format. Students will apply knowledge gained in the classroom to commercial dairy farm situations and develop skills in information gathering, decision making, problem solving, and interpersonal communications. Nonmajor graduate credit.

An S 460. Processed Meats. (Dual-listed with 560). (2-2) Cr. 3. S. Prereq: 270. Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and dry-salted sausages products. Nonmajor graduate credit.

An S 480. Animal Industry Leadership Fellows. Cr. 1. Repeatable, F. S. Prereq: A. An S 226, permission of instructor. C. An S 226; permission of instructor. Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and co-operative experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Satisfactory-fail only. A. Beef B. Pork

An S 489. Issues in Food Safety. (Cross-listed with FS HN, HRI, VDFAM). (1-0) Cr. 1. A. S., offered. 2010. Prereq: Credit or enrollment in FS HN 101 or 272 or HRI 233; FS HN 419 or 420; FS HN 403. Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

An S 490. Independent Study. Cr. arr. Repeatable. F.S.S.S. Prereq: Permission of the instructor. Open to juniors and seniors in animal science and dairy science showing satisfactory preparation for problems chosen. Individual topic conference and preparation of report. A maximum of 6 credits of An S 490 may be applied toward the total credits required for graduation.

An S 492. Undergraduate Teaching Experiences in Animal Science. Cr. 2 to 6. Prereq: Senior classification in An S. For food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

An S 494. Agricultural Travel Course Preparation. Cr. R. Repeatable. F. Prereq: Permission of instructor. Limited enrollment. Students enrolled in this course will also register for Agron 496 and intend to register in Agron 496 and An S 496 the following term. Topics will include the agricultural industries, climate, crops, culture, history, livestock, marketing, soils, and preparation for travel to locations to be visited. Information normally available 9 months before departure.

An S 496. Agricultural Travel Course. Cr. arr. Repeatable. F. Prereq: Permission of instructor. Limited enrollment. Students enrolled in both An S 496 and Agron 496. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on livestock and crop production. Locations and duration of tours will vary. Summer tour will usually visit a northern location and winter tour will usually visit a southern location. Information usually available 9 months before departure. Tour expenses paid by students.

A. International tour
B. Domestic tour

An S 497. Graduate Teaching Experiences in Animal Science. Cr. arr. Repeatable. F.S.S.S. Prereq: Permission of instructor. Development of oral and written communication skills of technical concepts in animal science. Emphasis on organizational skills, conducting activities and interpersonal communication skills. Responsibilities in a class under direct supervision of a faculty member. A maximum of 4 credits of An S 497 may be applied toward graduation.

Courses primarily for graduate students, open to qualified undergraduate students

An S 500. Computer Techniques for Biological Research. (2-0) Cr. 1. F. Prereq: Intro to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

A. (1st half of semester) UNIX and SAS
B. (2nd half of semester) Problem solving using matrix algebra

B. Computational Strategies for Genetic Parameter Estimation

An S 658. Seminar in Animal Breeding and Genetics. (1-0) Cr. 1. Repeatable. F.S. Presentation of current research related to animal breeding and genetics.

An S 684. Seminar in Meat Science. (1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor. Discussion and evaluation of current topics in research publications in meat science.

An S 685. Seminar in Muscle Biology. (1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor. Reports and discussion of recent literature and current investigations.

An S 695. Seminar in Animal Science. (1-0) Cr. 1. Repeatable. S. Prereq: 306 and discussion of current issues and research in animal science. One credit is required for all M.S. degree candidates with graduate majors in the Department of Animal Science, and two credits are required for all Ph.D. candidates with graduate majors in the Department of Animal Science. Satisfactory-fail only.

An S 699. Research, Cr. art. Repeatable.
A. Animal Breeding
B. Animal Nutrition
C. Meat Animal Production
D. Dairy Production
E. Meat Science F. Physiology of Reproduction
G. Muscle Biology
H. Poultry Nutrition
I. Poultry Products
J. Animal Ethology

R. Paul Lasley, Chair of Department

Professors: Lasley, Whiteford

Professors (Emeritus): Bower, Butler, Gradwohl, Huang

Associate Professors: Coimian, Iliane, Pruetz

Associate Professors (Emeritus): Wolff

Assistant Professors: Arndt, Dusselier, Hill, Moutatsos, Vatorri

Lecturers: Folinsee, Johnsen

Undergraduate Study

An undergraduate major in Anthropology can Serve as the nucleus for a general liberal education, or as the prerequisite for graduate training qualifying a person for positions in (1) college and university teaching, (2) research, and (3) administrative and applied positions in government, development organizations, museums, and private businesses or corporations.

Anthropology graduates develop a well-rounded professional education in four fields of anthropology: cultural anthropology, linguistic anthropology, archaeology, and biological anthropology. They learn what it means to be human through the study of culture and social relations, human biology and evolution, languages, music, art, architecture, and through the study of past human communities. Graduates learn the important historical and contemporary issues of our sub-disciplines, and they learn what it means to be a “modern” Anthropologist and a citizen in an international and global community. Graduates develop an appreciation of the value of cultural diversity at the local, national and international level. They acquire a particular holistic vision that requires using an interdisciplinary approach in order to forge a deeper understanding of cultural contexts, both past and present. Undergraduate students may obtain experience in archaeological, ethnological and biological research.

Anthropology majors may choose either a bachelor of arts or a bachelor of science degree, both of which require 33 credits in anthropology. A bachelor of science degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Groups I, II, and/or IV. A bachelor of science degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Group III.

Undergraduate students with majors in anthropology are required to take the following anthropological core courses: 306, 307, 308, 309 and 450. One course in statistics is required.

Undergraduates majoring in anthropology are required to have a minor or a second major. A minor usually consists of 15 credits minimum. A minor in anthropology consists of at least 15 credits and must include 306 or 307 and 308, and at least 3 other credits in courses numbered 300 or above.

Communication Proficiency requirement: The department requires that a student earn a grade of C or better in Engl 250 and either English 302 or 309 or 314.

The principal sub-disciplines of anthropology are represented by the following:

1. General cultural anthropology and ethnology:
3. Linguistic Anthropology: 309, 451D, 490D.

Graduate Study

The department offers work for the degree master of arts with a major in anthropology. Graduate courses are offered in the areas of biological anthropology, archaeological, cultural anthropology, linguistic anthropology, history and theory, and methodology. Competence in one foreign language and in statistics must be demonstrated. A thesis, generally based on original fieldwork, is required.

Courses primarily for undergraduate students

Anth 201. Introduction to Cultural Anthropology. (3-0) Cr. 3. F.S.S.S. Comparative study of culture as a key to understanding human behaviors in different societies. Using a global, cross-cultural perspective, patterns of family life, economic and political activities, religious beliefs, and the ways in which cultures change are examined.

Anth 202. Introduction to Biological Anthropology and Archaeology. (3-0) Cr. 3. F.S. Human biological and cultural evolution; survey of the evidence from fossil forms and archaeology, as well as living primates and traditional cultures; introduction to methods of study in archaeology and biological anthropology.

Anth 230. Globalization and the Human Condition. (3-0) Cr. 3. F.S. An introduction to understanding key global issues in the contemporary world. Focuses on social relations, cultural practices and political-economic linkages among Africa Africa, the Americas, Asia, Europe and the Pacific.

Anth 250. Contemporary Muslim Societies. (3-0) Cr. 3. S. An introduction to understanding key local and global issues facing Muslim Society. Focus on cultural, political, religious, and environmental forces shaping contemporary Muslim Societies and linkages with the non-Muslim world.

Anth 304. Cultural Anthropology. (2-2) Cr. 3. S. Prereq: 201. Survey of the major theoretical, methodological and empirical foundations of cultural anthropology. Participatory lab: focus on ethnographic methods through individual research projects.

Anth 308. Archaeology. (2-2) Cr. 3. S. Prereq: 202. Methods and techniques for the recovery and interpretation of archaeological evidence, its role in reconstructing human behavior and past environments. Laboratory sessions include experience in the interpretation of archaeological evidence, the use of classification systems, and prehistoric technologies such as ceramics and stone tools. Field trips.

Anth 309. Linguistic Anthropology. (Cross-listed with Ling). (2-2) Cr. 3. F. Prereq: 201. Language as a human attribute; language versus animal communication; human communication in cultural context; paralanguage, kinesics, proxemics, artifacts as communication; language and culture; cross-cultural Sociolinguistics; ethnoscience; and language policies. Participatory lab: focus on analysis of a non-Western language and communication system.

Anth 313. The Family and Kinship in Cross-Cultural Perspective. (Dual-listed with 513). (3-0) Cr. 3. S. Prereq: 201 recommended. Comparative and historical overview of family, marriage and kinship cross-culturally; discussion of differences in the structure, cycle, and functioning of family and kin relations through ethnographic readings, including Euro-American examples; current critical and theoretical issues in kinship studies, especially integrating work on gender, sexuality and representation.

Anth 315. Archaeology of North America. (Dual-listed with 515). (Cross-listed with Am In). (3-0) Cr. 3. S. Prereq: 202 or 308. Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnographically known Native American groups.

Anth 319. Skeletal Biology. (Dual-listed with 519). (2-2) Cr. 3. F. Prereq: 307 or college level biology. Comprehensive study of the skeletal anatomy, physiology, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paleopathology and bioarchaeology are introduced.

Anth 321. World Prehistory. (Dual-listed with 521). (3-0) Cr. 3. S. Prereq: 202 recommended. An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material cultural remains in reconstructing past Societies.
Anthr 322. Peoples and Cultures of Native North America. (Dual-listed with 522). (Cross-listed with Am Ind). (3-0) Cr. 3. F. S.S. Prereq: 201 or Am Ind 210. Origins, distribution, and traditional life of native peoples of North America. Survey of culture areas; ecology; subsistence, language, kinship, life cycle, political, economic, and religious systems; impact of European contact.

Anthr 323. Topics in Latin American Anthropology. (Dual-listed with 523). (Cross-listed with Am Ind). (3-0) Cr. 3. Repeatable. S. Prereq: Anthr 201 or 306 recommended. Exploration of contemporary Latin American social dynamics within specific historical, political and economic contexts; discussion of current ethnographic approaches to studying key Sociocultural issues in Latin America. Topics vary each time offered.

Anthr 325. Peoples and Cultures of Africa. (Dual-listed with 525). (Cross-listed with Af Am). (3-0) Cr. 3. S. Prereq: 201 or 306 recommended. Origins and distribution of peoples of Africa; geographical characteristics as related to culture types, including early civilizations; a comparative examination of economic, subsistence, language, social and political organization, and religious systems throughout the continent; change processes, the impact of colonialism, and the nature of contemporary African Societies.

Anthr 335. Peoples and Cultures of the Middle East. (Dual-listed with 535). (3-0) Cr. 3. F. Prereq: 201 or 306 recommended. Anthropological approaches to the study of Middle East cultures. Survey of major culture areas, discussion of economic, political, and social and religious issues and systems. Examination of contemporary social movements.

Anthr 337. Andean Archaeology. (Dual-listed with 537). (3-0) Cr. 3. F. Prereq: 202 or 321 recommended. Survey of prehistoric Andean cultures of Peru, Bolivia and Ecuador; the archaeology of the Incas and their ancestors. Emphasis on prehistoric economic, religious, and political organization, the rich material culture recovered through archaeological records; and the use of ethnographic and modern ethnographic materials to reconstruct the prehistory of Andean Societies.

Anthr 340. Magic, Witchcraft, and Religion. (Dual-listed with 540). (Cross-listed with Relig). (3-0) Cr. 3. S. Prereq: 201 or 306. Origin and development of indigenous magico-religious systems; myth and ritual; therapeutic aspects; symbols and meanings; religion and Sociocultural change, including acculturation, nativistic, and revitalization movements.

Anthr 350. Primate Behavior. (Dual-listed with 550). (2-2) Cr. 3. F.S.S. Prereq: Anthr 202 and/or basic biology course recommended. An introduction to the Order Primates with a focus on their behavior. Biological and social adaptations of monkeys, apes, and primates; basic evolutionary concepts, current trends and theories in the field of Primatology and issues related to primate conservation.

Anthr 411. Culture Change and Applied Anthropology. (Dual-listed with 511). (3-0) Cr. 3. F. Prereq: 201 or 306. Theoretical and practical considerations of human cultural development. Examination of theories of cultural change, culture contact and acculturation. Dynamics of directed change in contemporary world cultures. Principles, theories, and ethics of international development projects from a sociocultural perspective.

Anthr 412. Psychological Anthropology. (Dual-listed with 512). (3-0) Cr. 3. F. Prereq: 201 or 306. Relationship of cultural, social and personality factors in human behavior. Cross-cultural comparisons of child rearing practices, cognitive development, mental health, deviancy, ethno-psychiatry, altered states of consciousness, and psychological dimensions of culture change.

Anthr 414. Southwestern Archaeology. (Dual-listed with 514). (3-0) Cr. 3. F. Prereq: 308 or 318 or 321. Prehistoric archaeology of the American Southwest, including the Paleo-indian and Archaic periods; the adoption of agriculture; the emergence of pueblo Societies; relationships with contemporary Southwest cultures.

Anthr 418. Global Culture, Consumption and Modernity. (Dual-listed with 518). (3-0) Cr. 3. F. Prereq: Anthr 201 or 306 recommended. Cross-cultural study of the impact of globalization, with an emphasis on the impact of New World agriculture and consumption of goods, ideas, and peoples across cultural and national boundaries.

Anthr 420. Cultural Continuity and Change in the Prairie-Plains. (Dual-listed with 520). (Cross-listed with Am Ind). (3-0) Cr. 3. F. Prereq. 315 or 322. Ecological adaptations, sociocultural changes, and continuities of traditions among Prairie and Plains Indians through time; impacts of Euro-American Society and technology on Indians of the Great Plains; perspectives from ecology, archaeology, ethnology, history, and contemporary literary sources.

Anthr 424. Forensic Anthropology. (Dual-listed with 524). (2-2) Cr. 3. S. Prereq: 319. Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identifications from extremely fragmentary, cremated, and incomplete skeletal remains. All parameters of forensic study are included as they pertain to anthropology, including human variation, taphonomy, entomology, archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

Anthr 427I. Archaeology. (Cross-listed with La LL). Cr. 4. S. Nature of cultural and environmental evidence in archaeology and how they are used to model past human behavior and land use; emphasis on Iowa prehistory; basic research techniques and excavation techniques. Nonmajor graduate credit.

Anthr 428. Topics in Archaeological Laboratory Methods and Techniques. (Dual-listed with 528). (2-2) Cr. 3. Repeatable. S. Prereq: 308. Laboratory processing, analysis, and interpretation of archaeological materials such as lichics, ceramics, and faunal remains. Laboratory sessions emphasize analytical techniques including classification, data acquisition and organization, and computer applications. A. Lithics B. Ceramics C. Faunal remains D. General.

Anthr 429. Archaeological Field School. (Dual-listed with 529). Cr. arr. S. Prereq: 202 or 308. Summer field school for training in archaeological reconnaisance and excavation techniques; documentation and interpretation of archaeological evidence.

Anthr 431. Ethnographic Field School. (Dual-listed with 531). Cr. S. SS. 4 or 6 weeks. Summer field school for training in ethnographic field methods; students will carry out research projects in social anthropology, learning a variety of investigative research techniques commonly used in social sciences.

Anthr 432. Current Issues in Native North America. (Dual-listed with 532). (Cross-listed with Am Ind). (3-0) Cr. 3. S. Prereq: 201 or 306; 322 or Am Ind 210 recommended. Conditions and issues of contemporary Native Americans; historical background of eighteenth and nineteenth century Indian-White relationships; evaluation of Indian status, the reservation system, treaty violations, Indian military, education and urbanization, self-determination, social impact of resource development, and other current concerns.

Anthr 434. Internship. Cr. arr. Repeatable. F.S.S. Prereq: Junior or senior standing. Supervised practice in government agencies, museums, and business organizations. Not more than 6 credits of internship experience may count towards the major. No credits in Anthr 434 may be used to satisfy anthropology core courses for majors or for the anthropology minor. Satisfactory-fail only.

Anthr 437. Methods and Techniques. (Dual-listed with 537). (3-0) Cr. 3. S. Prereq: Anthr 201 or 306. Historical and theoretical basis of the practices of development, applied and economic anthropology. Covers a wide range of topics such as the role of aid, institutions of development, indigenous knowledge, rural development projects, organization of production, migration, health and environment.

Anthr 438. Primate Evolutionary Ecology and Behavior. (Dual-listed with 538). Cr. 3. S. Prereq. Anthr 201 or 306. Primate behavior and ecology in evolutionary perspective: biological and social adaptations of primates, and primate systems through time. Primate behavior and evolution in the context of the order Primates, basic evolutionary concepts, and techniques of behavioral observation. Focus on theory and methods current in Primateology, including applied conservation biology.

Anthr 439. Medical Anthropology. (Dual-listed with 539). Cr. 3. S. Prereq: Anthr 201 or 302 or 306. Study of human health in cultural and environmental context; comparison of health and disease patterns of western and non-western populations; healing systems; use of epidemiological models in understanding illness and disease etiologies cross-culturally; interrelationship between diet and culture.

Anthr 444. Sex and Gender in Cross-cultural Perspective. (Dual-listed with 544). (Cross-listed with W S). (3-0) Cr. 3. S. Prereq. Anthr 201; Anthr 306 recommended. Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western Societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.

Anthr 450. Historical and Theoretical Approaches in Anthropology. (3-0) Cr. 3. F. Prereq: 306. Survey of the historical foundations of anthropology and its interrelated four sub-fields; key figures in 19th and 20th century anthropology with a focus on major theoretical contributions.

Anthr 451. Practicum in Anthropology. Cr. arr. Repeatable. F.S.S. Prereq: 201 or 202 or 308. Application of field and laboratory skills and field conditions, including basic data management, synthesis, and analysis. A. Archaeology B. Cultural Anthropology C. Biological Anthropology D. Linguistic Anthropology

Anthr 482. Topics in Biological Anthropology. (Dual-listed with 582). (3-0) Cr. 3. Repeatable. F. Prereq: Anthr 307 In-depth study of current topics in biological Anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates. A. Paleoanthropology B. Primate Cognition C. Population Conservation D. Population Genetics and Human Evolution

Anthr 490. Independent Study. Cr. arr. Repeatable. Prereq: 9 credits in anthropology. No more than 9 credits of Anthr 490 may be counted toward graduation.

Anthr 512. Psychological Anthropology. (Dual-listed with 521). (3-0) Cr. 3. F. Prereq: 201 or 306. Relationship of cultural, social and personality factors in human behavior. Cross-cultural comparisons of child rearing practices, cognitive development, mental health, deviancy, ethno-psychiatry, altered states of consciousness, and psychological dimensions of culture change.
Courses primarily for graduate students, open to qualified undergraduate students

Anth 500. Language and Culture. (Cross-listed with Ling). (3-0) Cr. 3. S. Prereq: Anthr 309 or 510. Approaches to the study of the relationship between language structure, world view, and cognition; social and structural linguistics; cross-cultural aspects of verbal and non-verbal communication; linguistic change; contemporary applications of linguistic anthropology.

Anth 503. Biological Anthropology. (3-0) Cr. 3. F. Prereq: 307 Survey of the history of biological anthropology, current developments and theoretical issues in evolution and subsistence, population studies, primates and primate behavior, and Paleanthropology.

Anth 509. Agroecosystems Analysis. (Cross-listed with Agron, Soc, SusAg). (3-4) Cr. 3. F. Prereq: Senior or above classification. Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (Agronomic, economic, ecologic, social, etc.) and scales of operation.

Anth 511. Culture Change and Applied Anthropology. (Dual-listed with 411). (3-0) Cr. 3. F. Prereq: 6 credits in anthropology, 201 or 306. Theoretical and practical considerations of cultural development. Examination of theories, cultural change, cultural contact and acculturation. Dynamics of directed change in contemporary world cultures. Principles, theories, and ethics of international development projects from a sociocultural perspective.

Anth 512. Psychological Anthropology. (Dual-listed with 412). (3-0) Cr. 3. F. Prereq: 201 or 306. Relationship of cultural, social and personality factors in human behavior. Cross-cultural comparisons of child rearing practices, cognitive development, mental health, deviancy, ethno-psychiatry, altered states of consciousness, and psychological dimensions of culture change.

Anth 513. The Family and Kinship in Cross-cultural Perspective. (Dual-listed with 313). (3-0) Cr. 3. S. Prereq: 6 credits in anthropology, 201 or 306. Recommended. Comparative and historical overview of family, marriage and kinship cross-culturally; discussion of differences in the structure, cycle, and functioning of family and kin relations through ethnographic readings, including Euro-American examples; current critical and theoretical issues in kinship studies, especially integrating work on gender, sexuality and representation.

Anth 514. Southwestern Archaeology. (Dual-listed with 414). (3-0) Cr. 3. F. Prereq: 308 or 315 or 321. Prehistoric archaeology of the American Southwest, including the Paleo-indian and Archaic periods; the adoption of agriculture; the emergence of pueblo Societies; relationships with contemporary Southwest cultures.

Anth 515. Archaeology of North America. (Dual-listed with 315). (3-0) Cr. 3. S. Prereq: 202 or 308. Prehistory and early history of North America as reconstructed from archaeological evidence; peopling of the New World; culture-historical sequences of major culture areas; linkages of archaeological traditions with selected ethnohistorically known Native American groups.

Anth 518. Global Culture, Consumption and Modernity. (Dual-listed with 418). (3-0) Cr. 3. F. Prereq: Anthr 201 or 306 recommended. Cross-cultural study of the impact of globalization, with an emphasis on economic consumption and the movement of goods, ideas, and peoples across cultural and national boundaries.

Anth 519. Skeletal Biology. (Dual-listed with 319). (2-2) Cr. 3. F. Prereq: 307 or college level biology recommended. Comprehensive study of the skeletal anatomy, genetics, growth, development and population variation of the human skeleton. Applications to forensic anthropology, paeopathology, and bioarchaeology are introduced.

Anth 520. Cultural Continuity and Change in the Prairie-Plains. (Dual-listed with 420). (3-0) Cr. 3. F. Prereq: 315 or 320. Ecological adaptations, sociocultural changes, and continuities of traditions among Prairie and Plains Indian groups through time; impacts of Euro-American Society and technology on Indians of the Great Plains; perspectives from ecology, archaeology, ethnology, history, and contemporary literary sources.

Anth 521. World Prehistory. (Dual-listed with 321). (3-0) Cr. 3. S. Prereq: 202 recommended. An introduction to archaeological sites from around the world including the Near East, Africa, Europe, Mesoamerica, and North and South America. Emphasis is on the interpretation of material culture remains in reconstructing past Societies.

Anth 522. Peoples and Cultures of Native North America. (Dual-listed with 322). (3-0) Cr. 3. F. Prereq: 201 or Am In 210. Origin, distribution, and traditional life of native peoples of North America. Survey of culture areas; economic subsistence, language, kinship, life cycle, political, economic and religious systems; impact of European contact.

Anth 523. Topics in Latin American Anthropology. (Dual-listed with 323). (3-0) Cr. 3. Repeatable. S. Prereq: 6 credits in anthropology, 201 or 306 recommended. Examination of particular topics in Latin American social dynamics within specific historical, political and economic contexts; discussion of current ethnographic approaches to studying key Sociocultural issues in Latin America. Topics vary each time offered.

Anth 524. Forensic Anthropology. (Dual-listed with 424). (3-0) Cr. 3. S. Prereq: 319. Comprehensive study of forensic anthropology, a specialized subfield of biological anthropology. Emphasis is placed on personal identification from extremely fragmentary, commingled, burnt, cremated and incomplete skeletal remains. All parameters of forensic study are included as they pertain to studying human variation, taphonomy, entomology archaeology, pathology, epidemiology; genetics and the non-biological forensic disciplines. An appreciation for the wide range of medicolegal and bioethical issues will also be gained.

Anth 525. Peoples and Cultures of Africa. (Dual-listed with 325). (3-0) Cr. 3. S. Prereq: 201 or 306 recommended. Origins and distribution of peoples of Africa; geographical characteristics as related to culture types, including early civilizations; a comparative examination of contemporary subsistence, language, social and political organization, and religious systems throughout the continent; change processes, the impact of colonialism, and the nature of contemporary African Societies.

Anth 528. Topics in Archaeological Laboratory Methods and Techniques. (Dual-listed with 428). (2-2) Cr. 3. Prereq: 308, Laboratory skills of measurement, processing, analysis, and interpretation of archaeological materials such as lithics, ceramics, and faunal remains. Laboratory sessions emphasize analytical techniques including classification, data acquisition organization, and computer applications

A. Lithics
B. Ceramics
C. Faunal remains
D. General.

Anth 529. Archaeological Field School. (Dual-listed with 429). Cr. arr. SS. Prereq: 202 or 308. Summer field school for training in archaeological reconnaissance and excavation techniques; documentation and interpretation of archaeological evidence.

Anth 530. Ethnographic Field Methods. Cr. 3. F. Prereq: 6 credits in anthropology, permission of instructor. Field training in current ethnographic techniques. Problems emphasizing field studies in the contemporary Societies of the world. Focus on techniques of data gathering and analysis.

Anth 531. Ethnographic Field School. (Dual-listed with 431). Cr. arr. SS. 4 or 6 weeks. Summer field school for training in ethnographic field methods; students will carry out research projects in social anthropology, learning a variety of investigative research techniques commonly used in social sciences.

Anth 532. Current Issues in Native North America. (Dual-listed with 432). (3-0) Cr. 3. S. Prereq: 6 credits in anthropology, 201 or 306, 322 or Am In 210 recommended. Conditions and issues of contemporary Native Americans; historical background of eighteenth and nineteenth century Indian-White relationships; examination of legal Status, the reservation system, treaty violations, Indian assimilation, urbanization, self-determination, social impact of resource development, and other current concerns.

Anth 535. Peoples and Cultures of the Middle East. (Dual-listed with 335). (3-0) Cr. 3. F. Prereq: 201 or 306 recommended. Anthropological approaches to the study of Middle East cultures. Survey of major cultural areas; discussion of economics, political, and social and religious issues and systems. Examination of contemporary social movements.

Anth 536. Development Anthropology. (Dual-listed with 438). (3-0) Cr. 3. S. Prereq: Anthr 201 or 306. Historical and theoretical basis of the practice of development; applied anthropological approaches. Covers a wide range of topics such as the role of aid, institutions of development, indigenous knowledge, rural development projects, organization of production, migration, health and environment.

Anth 537. Andean Archaeology. (Dual-listed with 337). (3-0) Cr. 3. F. Prereq: 202 or 321 recommended. Survey of prehistoric Andean cultures of Peru, Bolivia and Ecuador; the archaeology of the Incas and their ancestors. Emphasis on prehistoric economics, religious, and political organization, the rich material culture recovered through archaeological records; and the use of ethnohistoric texts and modern ethnographies to reconstruct the prehistory of Andean societies.

Anth 538. Primate Evolutionary Ecology and Behavior. (Dual-listed with 438). (3-0) Cr. 3. S. Prereq: Anthr 201 or 306. Historical and theoretical basis of the practice of development; applied anthropological approaches. Covers a wide range of topics such as the role of aid, institutions of development, indigenous knowledge, rural development projects, organization of production, migration, health and environment.

Anth 539. Medical Anthropology. (Dual-listed with 439). (3-0) Cr. 3. S. Prereq: 6 credits in anthropology, 201 or 306 recommended. Study of human health in cultural and environmental context; comparison of health and disease patterns of western and non-western populations; healing systems; use of epidemiological models in understanding illness and disease etiologies cross-culturally; interrelationship between diet and culture.

Anth 540. Magic, Witchcraft, and Religion. (Dual-listed with 340). (3-0) Cr. 3. S. Prereq: 6 credits in anthropology, 201 or 306 recommended. Origins and development of indigenous magical-religious systems; myth and ritual; therapeutic aspects; symbols and meanings; religion and socio-cultural change, including acculturation, nativistic, and revitalization movements.
Anthr 544. Sex and Gender in Cross-cultural Perspective. (Dual-listed with 444). (Cross-listed with W S). (3-0) Cr. 3. S. Prereq: 201, 306 recommended. Cross-cultural examination of the social construction of genders out of the biological fact of sex. Emphasis on non-western Societies. Topics, presented through examination of ethnographic data, will include the range of gender variation, status and roles, the institution of marriage, and symbols of gender valuation.

Anthr 545. Biological Field School. (Dual-listed with 445). Cr. arr. SS. Prereq: Anthr 202 or Biol 101 and permission of instructor. Summer field school for training in behavioral and ecological methods for primatologists. Proposal, data collection and analyses, and presentation of research topic in primatology.

Anthr 550. Primate Behavior. (Dual-listed with 350). (2-2) Cr. 3. F. S.S. Prereq: Anthr 202 and/or basic biology course recommended. An introduction to the Order Primates with a focus on their behavior. Biological and social adaptations of monkeys, apes, and prosimians; basic evolutionary concepts, current trends and theories in the field of Primatology and issues related to primate conservation.

Anthr 555. Seminar in Archaeology. (3-0) Cr. 3. S. Prereq: 308 or 429. Examination of the history of Anthropological archaeology and current issues and debates concerning methods, theories and the ethics of modern archaeology.

Anthr 582. Topics in Biological Anthropology. (Dual-listed with 482). (3-0) Cr. 3. Repeatable. F. Prereq: Anth 307. In-depth study of current topics in biological anthropology, such as new fossil specimens, research on the evolution of cognition, the emergence of applied primatology, and the dynamic field of population genetics as each relates to the Order Primates. A. Paleoanthropology B. Primate Cognition C. Population Conservation D. Population Genetics and Human Evolution

Anthr 590. Graduate Independent Study. (Cross-listed with la LL, A Ec, EEOB). Cr. arr. Repeatable. SS. Prereq. Graduate classification and permission of instructor. I. Iowa Lakeside Laboratory (Same as la LL 590)

Anthr 591. Orientation to Anthropology. (1-0) Cr. 1. F. Prereq: Admission to the Anthropology Graduate Program. Introduction to the Anthropology program, including the requirements for successful degree completion, departmental administrative procedures, ethics in anthropology and current trends in the four subfields of anthropology. Required of graduate students. Satisfactory-fail only.

Courses for graduate students

Anthr 610. Foundations of Sustainable Agriculture. (Cross-listed with Agron, SusAg, Soc, A E). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging systems of agriculture in terms of core concepts of sustainability and their theoretical contexts.

Anthr 699. Research. Cr. arr. Repeatable. I. Iowa Lakeside Laboratory (Same as la LL 699.)

Apparel, Educational Studies, and Hospitality Management

www.aeshm.hs.iastate.edu/

Robert Bosselman, Chair of Department

Distinguished Professors (Emeritus): Fanslow, Moyer, Winakor

University Professors (Emeritus): Farrell-Beck

Professors: Bosselman, Damhorst, Fiore, Kadalp

Professors (Emeritus): Anderson, Beavers, Brun, Burnet, Cowan, Crabtree, Gilmore, Smith, Stone, Williams

Associate Professors: Baltzer, Hausafus, Niehm, Parsons

Associate Professors (Emeritus): Amos, Brackelsberg, Brown, Ebert, Huss, Kundel, Kunz, Walsh

Associate Professors (Adjunct): Strohbehn

Assistant Professors: Barker, Hurst, Karpova, Keino, Y. Lee, Marketti, Rajagopal, Wohldorf-Arendt, Zheng

Assistant Professors (Adjunct): Glock

Instructors (Adjunct): Fratze

Lecturers: Ackerman, Burger, Christensen, Fihir, Fitzpatrick, Kramer, M. Lee, Sanger, Trost, Wirth, Wise

The department offers courses that provide opportunities for students to learn about interdisciplinary areas including aesthetics, leadership, event planning, entrepreneurship, and multi-channel retailing at both undergraduate and graduate levels. AESHM courses serve to complement the student’s major area of study whether it be Apparel Merchandising, Design, and Production; Family and Consumer Sciences Education; and Institutional Management; and textiles and Clothing.

Courses primarily for undergraduate students

AESHM 111. Professional Development for AESHM. (2-2) Cr. 3. F. S. Prereq: Career exploration, presentation and professional skills, teamwork and leadership, creativity, critical thinking, technology, and service learning components. Some WWW lectures.

AESHM 271. Public Relations and Event Management I. (2-2) Cr. arr. Repeatable. S. Prereq. Permission of instructor. Overview of public relations and event management in the apparel and hospitality industries. Production of an event including developing budgets, publicity, advertising, fund raising, choreography, staging, lighting, and food. Course must be taken for 3 credits first time, can be repeated for 1 credit.

AESHM 275. Merchandising. (3-0) Cr. 3. S. Prereq: 3 credits in Math. Merchandising as applied to human science-related businesses, such as retailing, service, hospitality, and manufacturing. Study of planning, development, and presentation of apparel- and hospitality-related product lines.

AESHM 287. Principles of Management in Human Sciences. (3-0) Cr. 3. F. S. Introduction to management concepts and principles with application to the human Sciences organizations. Includes service quality management, professionalism, and social responsibility.

AESHM 311. Seminar on Careers and Internships. (1-0) Cr. 1. F. Prereq: Sophomore classification. Good academic standing. Internship and career planning, professional expectations and responsibilities. Resume development, cover letters, portfolio planning, interviewing techniques, and business etiquette.

AESHM 342. Aesthetics of Everyday Experience. (3-0) Cr. 3. F. S. Design principles, aesthetic concepts, and Philosophies applied to multi-sensory consumer environments. Influence of individual differences and cultural patterns on aesthetic preferences.

AESHM 379. Community Leadership: Examination of social issues. (3-0) Cr. 3. F. Study of family and community social issues from diverse perspectives. Application of critical thinking and reflection to issues with a focus on leadership within the community.

AESHM 421. Developing Global Leadership: Maximizing Human Potential. (3-0) Cr. 3. S. Development of leadership in a global hospitality setting. Focus on the contributions of women in enhancing the well-being of others. Strategies for working with individuals, families and communities in other countries and cultures. Taking local action on global issues. Student participation in cultural activities.

AESHM 424. International Study Abroad Seminar. Cr. arr. Repeatable. F.S.SS. Orientation to study abroad program considering topics related to country and location; travel arrangements and preparation for study abroad; on-site fieldwork and academic experiences in an international setting.

AESHM 471. Public Relations and Event Management II. (2-2) Cr. arr. Repeatable. S. Prereq. Permission of instructor. Advanced application of public relations and event management in the apparel and hospitality industries. Provide leadership and communicate direction for production of an event including developing budgets, publicity, advertising, fund raising, choreography, staging, lighting, and food. Course must be taken for 3 credits first time, can be repeated for 1 credit.

AESHM 474. Entrepreneurship in Human Sciences. (3-0) Cr. 3. S. Prereq: junior or senior Status. Entrepreneurship concepts of innovation, creativity, opportunity assessment, business planning. Focus on human Sciences-related businesses: retail, service, hospitality, family, home-based, rural, women and minority-owned businesses. Project applications include market research, feasibility analysis, and new business proposals.

AESHM 477. Multi-channel Retailing. (3-0) Cr. 3. F. Prereq: 3 credits in marketing or AESHM 275 or 287. Strategies used by retailers to market products through store formats, e-commerce, catalog, TV, mobile, direct sales. Emphasis on integration of e-commerce with other channels.

Courses primarily for graduate students, open to qualified undergraduate students

AESHM 545. Consumer Aesthetics and Retail Branding. (3-0) Cr. 3. S. Prereq. offered 2010. Prereq: One course in design elements and principles, psychology, consumer behavior, or marketing. Examination of the hedonic nature of consumer experience and its application to experiential design and branding of retail/hospitality establishments. Focus on consumer behavior, design, environmental psychology, and marketing literature.

AESHM 574. Entrepreneurship in Human Sciences. (Dual-listed with 478). (3-0) Cr. 3. S. Prereq. offered 2010. Prereq: One course in marketing or permission of instructor. Entrepreneurship concepts of innovation, creativity, opportunity assessment, business planning. Focus on human Sciences-related businesses: retail, service, hospitality, family, home-based, rural, women and minority-owned businesses. Project applications include market research, feasibility analysis, and business proposals.

AESHM 577. E-Commerce for Apparel and Hospitality Companies. (3-0) Cr. 3. S. Prereq. offered 2011. Prereq: Course in marketing or permission of instructor. Technology and consumer trends, industry practices, and marketing strategies for e-commerce. Evaluation and development of apparel or hospitality
The Department highly recommends purchase or the architectural profession in Society.

The development of their ideas; and that they have underpinnings of the discipline of architecture, they understand architectural history, that they are able to reference architectural which they are environmentally tempered; that exploration and to represent their design ideas. It is our intent: that our students develop the multiple buildings, the spaces within them, and landscape we inhabit. It involves individual and social enterprise of designing and fabricating the building design - construction, space, material, form and use. Architecture arises from the assumption and cultural exchange is a prerequisite to meaningful architectural design. For the most part, the built environment is designed by people who do not consider the consequences of their actions broadly. Therefore, our program demands engagement with contemporary issues and a commitment to lifelong learning. We encourage students to examine the relationships between local, regional and global contexts with a particular emphasis on the dynamics of the contemporary American Midwest. The domain of the architect’s action is limited, but the range of information needed to make intelligent and responsible design decisions is vast. We expect our graduates to value the necessity of research, interdisciplinary collaboration and teamwork.

The Department is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effect are enfolded with the subject matter of building design - construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment; and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

It is our intent: that our students develop the skills with which to critically assess and research architectural questions and to invent architectural designs that address those questions; that they develop a working method for designing and that they have the communication, graphic, modeling and computational skills to support design exploration and to represent their design ideas to others; that they gain knowledge of architectural technologies through which buildings are given form, of which they are constructed and by which they are environmentally tempered; that they understand architectural history, that they understand the theoretical and diverse cultural underpinnings of the discipline of architecture, that they are able to reference architectural precedents and know how to utilize all of these in the development of their ideas; and that they have grounding in the ethical and practical aspects of the architectural profession in Society.

For students entering the professional program, the department highly recommends purchase or lease of a laptop/notebook computer and appropriate software. See the Undergraduate Academic Advising Handbook in the departmental office or the departmental web pages for hardware and software specifications.

For a more complete undergraduate program description, see College of Design, Curricula.

Graduate Study

The Department of Architecture offers professional, post-professional and research-oriented degree for graduate students. The M. Arch. I and M. Arch. II emphasize the relationship between professional education and research. The M.S.A.S. is for students with non-professional degrees who want to pursue graduate-level research on the built environment. All the programs encourage interdisciplinary work within the College of Design and across related fields within the university.

Objectives:
The graduate program assumes the following: the built environment is an active agent in a global ecosystem and the setting for most forms of cultural exchange; the built environment can make positive and negative contributions to the vitality of local and global communities; understanding the dynamics of social production, material consumption and culture is a prerequisite to meaningful architectural design. For the most part, the built environment is designed by people who do not consider the consequences of their actions broadly. Therefore, our program demands engagement with contemporary issues and a commitment to lifelong learning. We encourage students to examine the relationships between local, regional and global contexts with a particular emphasis on the dynamics of the contemporary American Midwest. The domain of the architect’s action is limited, but the range of information needed to make intelligent and responsible design decisions is vast. We expect our graduates to value the necessity of research, interdisciplinary collaboration and teamwork.

The M.Arch. I is an accredited first professional degree in architecture. Students with an undergraduate degree other than architecture enroll in a 100-credit, seven semester program. The curriculum starts with an intensive three-semester course sequence that equal emphasis on architectural design, science and technology, and social and historical seminars on the built environment. The remaining four semesters have an open structure that allows students to explore architecture with an interdisciplinary context. These four semesters include a series of thematic and option studios, as well as various elective offerings. Students with a B.A. or B.S. in architecture or other affiliated design fields are considered for advanced standing based on a review of their academic record.

The M.Arch. II is a 30-credit post-professional degree in architecture for students with a B.Arch. or equivalent professional degree in architecture. The program is not subject to NAAB accreditation. The M.Arch. II program offers designers with a professional degree an opportunity to pursue advanced research in design. The program of study is expected to explore architectural design within interdisciplinary fields and requires completion of a thesis project. As a precondition for acceptance, applicants are required to submit a statement of purpose that defines the research they want to pursue in architectural design. Upon admission, students partner with a faculty member to select courses from across the university to determine their program of study. A minimum of two semesters should be devoted to the program; due to teaching assistantship and research needs, students often take longer to finish. The M.S.A.S. is a 30-credit interdisciplinary research degree in architectural studies. This degree is for students with bachelor degrees in various fields and interests in graduate-level research on the built environment. The M.S.A.S program is not subject to NAAB accreditation and is not intended, on its own, to lead to a career as a licensed architect. The program of study is expected to explore architecture within interdisciplinary fields and requires completion of a thesis project. As a precondition for acceptance, applicants are required to submit a thesis proposal. Upon admission, students partner with a faculty member to serve as a thesis adviser and to determine their program of study. A minimum of two semesters should be devoted to the program; due to teaching assistantship and research needs, students often take longer to finish. Areas of specialization include, but are not limited to: accessibility, architectural education, architectural history, building technology, energy and sustainability, environmental and social change, globalization and the built environment, historic preservation, housing, light and sound, politics and architecture and professional ethics.

Double-degree programs are currently offered with the Department of Community and Regional Planning (M.Arch./M.C.R.P.) and the College of Business (M.Arch./M.B.A.).

Financial support in the form of teaching and research assistantships is available.

Contact the department office for specific curricula.

Courses primarily for undergraduate students

Arch 102. Pre-Architecture Design. (1-6) Cr. 4. F.S. Three-dimensional design and drawing, with emphasis on creative conceptualization, exploration of materials, and analytical thinking. Includes study of architectural precedents and exercises to develop ability to communicate about form and space.

Arch 132. Two-Dimensional Studio. (0-6) Cr. 2. F.S. Prereq: Enrollment in the preprofessional program. Introduction to free-hand drawing concepts and practices. Exploration of the sketch as a means of inquiry, conceptualization and representation of form and space. Exercises focus on acquiring proficiency in the perceptual and experiential aspects of drawing. Various media, subjects and environmental contexts.

Arch 182. An Introduction to Architecture. (3-0) Cr. 3. S. Prereq: Open to non-majors. Through the study of architects, buildings, and theories, an introduction to the discipline of architecture, presenting architectural process and architectural works as culturally grounded events and artefacts.

Arch 201. Architectural Design I. (1-15) Cr. 6. F. Prereq: Completion of the preprofessional program and admission into the professional program. Introduction to architectural design. Introduction to architectural design, including precedent research, drawing conventions, model making, and diagramming. Studio projects focus on investigating the impact of specific site conditions on design, threshold conditions, and small-scale domestic space. Students will learn skills in problem solving, visualization, and written, oral, and graphic communication. Field trips to relevant architectural sites.

Arch 202. Architectural Design II. (1-15) Cr. 6. S. Prereq: 201; Math 142; Physics 117. Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban Spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in...
groups and individually. Representational methods expand on architectural conventions through experimentation. Fieldtrips to relevant architectural sites.

Arch 221. History of Western Architecture I. (Cross-listed with Dan S). (3-0) Cr. 3. F. 3. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Ancient through Renaissance.

Arch 222. History of Western Architecture II. (Cross-listed with Dan S). (3-0) Cr. 3. S. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Renaissance to present.

Arch 230. Design Communications I. (2-2) Cr. 3. F. Prereq: Admission to the professional program. Investigations of various design media—including computer graphics and freehand drawing—and their applications to design, specifically to the course work in 201. Exercises to develop manual skill and perceptual sensitivity.

Arch 240. Materials and Assemblies I. (3-0) Cr. 3. F. Prereq: Completion of the preprofessional program and admission into the professional program. Introduction to common architectural materials, their physical properties, and integration into light construction subsystems. Model building codes, gravitational and climatic forces, and simplified methods of analysis for the preliminary design of building systems.

Arch 242. Architectural Structures I. (3-1) Cr. 3. S. Prereq: 240; Math 142; Phys 111. Structural performance and design of residential scale wood frame members and systems; principles of equilibrium and material behavior.

Arch 271. Human Behavior and Environmental Theory. (3-0) Cr. 3. F. Prereq: Completion of the preprofessional program and admission into the professional program. Exploration of theories that describe social structure and order and the manner in which individuals and societies organize themselves and structure their environment.

Arch 301. Architectural Design III. (1-15) Cr. 6. F. Prereq: 202. Consideration of landscape as a constructed, cultural artifact. Projects address the perceptual aspects and strategies of situation and location; examination of environmental phenomena and patterns of use and settlement as revealed and affected by the architectural artifact. Development of a critical design process is stressed.

Arch 302. Architectural Design IV. (1-15) Cr. 6. S. Prereq: 301 and 2.0 GPA in previous studio courses. Continuation of 301, examining housing in the urban Situation; diverse scales of use and occupation within the city as shaped by cultural tendencies. Projects examine collective and individual identities related by the content and efficiency, the ability to consider varieties of scale within a project, and a further development of critical and technical methods.

Arch 310. Practical Experience. Cr. R. Prereq: Permission of department chair. Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less.

Arch 335. Three-Dimensional Studio. (Cross-listed with Art 351) (3-0) Cr. 2. Repeatable. F. This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means of three dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructivist techniques.

Arch 344. Architectural Structures II. (3-0) Cr. 3. F. Prereq: 242. Structural performance and preliminary design of low to medium rise steel frame members and systems, long span steel systems, and masonry walls and systems. Principles of equilibrium and material behavior.

Arch 346. Architectural Structures III. (3-0) Cr. 3. S. Prereq: 344. Structural performance and preliminary design of low- to medium- rise reinforced concrete and prestressed concrete members and systems. Wind and seismic lateral forces and the principles of equilibrium and material behavior.

Arch 357. Environmental Forces in Architecture. (3-0) Cr. 3. S. Prereq: Completion of the preprofessional program and admission into the professional program; Math 142; Phys 111. Introduction to environmental forces that describe the function of buildings in terms of human comfort and patterns of occupancy. Emphasis on analytical rules of thumb and calculation methods that contribute to design synthesis. A design process is developed utilizing building climatology, control of thermal, luminous, and acoustic environments.

Arch 402. Architectural Design VI. (1-15) Cr. 6. S. Prereq: 401 and minimum 2.0 GPA in previous studio courses. An examination of the relationship between architecture and the city. Studio projects stress analysis and interpretation of the diverse forces and conditions that impact and inform architecture in the urban environment. Urban design project. Study abroad option.

Arch 403. Architectural Design VII. (1-15) Cr. 6. F. Prereq: 402. Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation are encouraged. Dan S 446/446, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

Arch 404. Architectural Design VIII. (1-15) Cr. 6. S. Prereq: 403. Advanced forum for architectural research and/or design. Choice of thematic studios or student initiated research and design. Experimentation and innovation. Dan S 446/446, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

Arch 420. Topics in American Architecture. (3-0) Cr. 3. Repeatable. F.S. Prereq: Junior classification. History, theory, and principles of American architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 420 may be applied to degree program. Nonmajor graduate credit.

Arch 421. Topics in Nineteenth Century Architecture. (3-0) Cr. 3. Repeatable. F. Prereq: Junior classification. History, theory, and principles of nineteenth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 421 may be applied to degree program. Nonmajor graduate credit.

Arch 425. Topics in Twentieth Century Architecture. (3-0) Cr. 3. Repeatable. F.S. Prereq: Junior classification. History, theory, and principles of twentieth century architecture and urban design considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 425 may be applied to degree program. Nonmajor graduate credit.

Arch 426. Topics in Native American Architecture. (Cross-listed with Am In, Dan S). (3-0) Cr. 3. Repeatable. F.S. Prereq: Junior classification. History, theory, and principles of Native American/Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 426 may be applied to degree program. Nonmajor graduate credit.

Arch 448. Materials and Assemblies II. (3-0) Cr. 3. S. Prereq: 346. Investigation of the materials and integrated systems used in complex construction assemblies. Emphasis on determination and utilization of appropriate forms of material assemblies and structural systems for large scale construction.

Arch 458. Environmental Control Systems. (3-0) Cr. 3. F. Prereq: 357. Overview of architectural environmental control systems to occupant comfort, patterns of use, health, and safety regulations. Emphasis on the analytical rules of thumb and calculation methods necessary to provide integrated
Courses primarily for graduate students, open to qualified undergraduate students

Arch 505. Architectural Design I. (0-10) Cr. 3. F. S. Prereq: Admission to the M.Arch program. Concurrent enrollment in 506, 595. An introduction to comprehensive architectural design projects (individual and collaborative) with coordinated studies in design, media, history, theory, culture, science, and technology. Projects establish a framework for designing buildings as aspects of dynamic circumstances such as environmental forces, construction methods, economic and political regulations, social relationships, and cultural values. Course content and assignments coordinated with 506 and 596.

Arch 506. Architectural Design II. (0-10) Cr. 3. S. Prereq: 505; 583; 541. Coreq: 596; 542. Continuation of 505. More challenging comprehensive architectural design projects (individual and collaborative) with coordinated studies in design, media, history, theory, culture, science, and technology. Projects establish a framework for designing buildings as aspects of dynamic circumstances such as environmental forces, construction methods, economic and political regulations, social relationships, and cultural values. Course content and assignments coordinated with 506 and 596.

Arch 507. Architectural Design and Media III. (0-10) Cr. 5. S. Prereq: 506; 596. Coreq: 542. Arch 543. Design projects that examine the relationship between architectural concepts and the reality of built form. Emphasis is placed on the multi-faceted role of the architectural detail in the design process. Assignments involve the study of contemporary and historic construction documentation, research into architectural materials and the use of representational media appropriate to the varying scales. Projects also demand engagement with the cultural and technological issues explored in previous and concurrent courses.

Arch 510. Practical Experience. Cr. R. Repeatable. F.S.S. Prereq: Graduate standing and permission of department DOGE. Students must register for this course prior to completing each period. Available only to students taking course loads of 8 credits or less.

Arch 519. Middle Eastern Cities. (3-0) Cr. 3. F. S. Prereq: Graduate or senior standing. Middle Eastern cities introduce a particular continuity between history and contemporary life in which in some cases the latter is about re-defining the former. Introduction to basic academic writings on Middle Eastern cities in addition to other contemporary cultural productions of the region. Study of various aspects of Middle Eastern life and the built environments that this life produces.

Arch 527. History, Theory, and Criticism of Chinese Architecture. (Dual-listed with 4271) (3-0) Cr. 3. F. S. Prereq: Senior classification or graduate standing. The history and theoretical concept of Chinese built environment with emphasis on the morphology of built form and its relationship to art, landscape design, and urban structure. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Arch 528. Topical Studies in Architecture. (Cross-listed with Dsn S. (3-0) Cr. arr. Repeatable. F.S.S. Prereq: Arch 221, 222 or senior classification or graduate standing. A. Studies in Architecture and Culture B. Technology C. Communications D. Design E. Practice

Arch 529. Spatial Diacritics in the American Midwest. (3-0) Cr. 3. S. Prereq: Graduate or senior standing. The American Midwest has experienced a major transformation during the last two centuries which impacted its physical, environmental, economic and social characteristics. This course is an interdisciplinary study of the evolution and sustainability of Midwestern space and relationships to forces of wind shaped by the mobility of bodies, products, meanings, and symbols that are enforced, incorporated, reproduced or destroyed.

Arch 535. Advanced Three-Dimensional Studio. (0-5) Cr. 2. Repeatable. F. Prereq: 335 or graduate standing. Advanced investigation of sculptural expression with emphasis on individual projects.

Arch 541, Science and Technology for Architects I. (4-2) Cr. 5. F. Prereq: 221, 222, 505, 595. Coreq: 506, 542. First of a four-course series in building science and technologies. Introduction to Human Factors, Descriptive Geometry, Basic Building Materials, and Small-Scale Building Envelopes. Theory and case studies, stressing the connectivity of technical issues to broader formal, social, and cultural spheres. Course content and assignments coordinated with 505 and 596.

Arch 542. Science and Technology for Architects II. (4-2) Cr. 5. S. Prereq: 505; 541; 596. Coreq: 506; 596. Second of a four-course series in building science and technologies. Elementary Statics and Beam Theory, Basic Construction Materials, and Site and Building Circulation. Theory and case studies stressing the connectivity of technical issues to broader formal, social, and cultural spheres. Course content and assignments coordinated with 505 and 596.

Arch 558. Sustainability and Green Architecture. (Cross-listed with Dsn S) (3-0) Cr. 3. F. S. Prereq: Graduate standing. Issues of Sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources. Course content and assignments coordinated with 505 and 596.

Arch 559. Sustainability and Green Architecture. (Cross-listed with Dsn S) (3-0) Cr. 3. F. S. Prereq: Graduate or senior standing. Issues of Sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources. Course content and assignments coordinated with 505 and 596.

Arch 567. Preservation, Restoration, and Rehabilitation. (Cross-listed with Dsn S) (3-0) Cr. 3. S. Prereq. Senior classification. Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Arch 571. Design for All People. (Cross-listed with Dsn S. Geron). (3-0) Cr. 3. S. Prereq. Senior classification or graduate standing. Principles and procedures of universal design in relation to the diversity level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, hearing impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Arch 575. Contemporary Urban Design Theory. (Cross-listed with Dsn S) (3-0) Cr. 3. S. Prereq. Senior classification or graduate standing. Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Arch 576. Study Abroad Options. (3-0) Cr. 3. Repeatable. SS. Special topics in environmental design, architectural history and contemporary practice. Travel to relevant countries. General cultural and historical studies, topical projects and individual inquiry. Courses may be taught by departmental faculty. Course faculty from approved Iowa State Study Abroad programs. See current offerings for detailed syllabus.

Arch 581. Service Learning. (1-12) Cr. 3. SS. Prereq: 506, 586; 542. Planning and construction of a fullscale project serving a community need. Learning occurs through both theory and active involvement in construction work. Projects connect previous coursework to practical applications and community involvement.

Arch 582. Professional Practice. (Dual-listed with 482). (3-0) Cr. 3. F. Prereq: Graduate standing. Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

Arch 583. Research in Practice. (3-0) Cr. 3. S. Prereq. Senior or graduate standing. Foundational course in the methods and conceptual tools of design research in the context of practice. Through team and individual guidance, projects, student presentations, and research projects, students represent knowledge in design-related communications and contexts. Alternative models of practice, client groups and communities are addressed within projects that produce, feed, follow, or overlap with architectural contracts.

Arch 590. Special Topics. Cr. arr. Repeatable. F.S.S. Prereq: Written approval of instructor and department chair on approved form. Investigation of architectural issues having a specialized nature.

Arch 595. Seminar on the Built Environment I: History. (5-0) Cr. 5. F. Prereq: Admission to the M.Arch I program. Coreq: 505, 541. Introduction to architectural history and its role in shaping the contemporary practice of architecture. Students learn skills in critical thinking, visual analysis, and research methods. Course sessions develop thematically with interdisciplinary readings and topical discussions, student presentations, and research projects. Course content and assignments coordinated with 505 and 541.

Arch 596. Seminar on the Built Environment II: Landscape and Society. (5-0) Cr. 5. S. Prereq: 505; 541; SS. Coreq: 506; 542. Introduction to landscape as artifact and multi-disciplinary knowledge-base for design thinking. Literature, methods and environment, psychological, cultural geography, landscape and architectural history and theory, site and circulation design as intersection of built infrastructural, natural, and social systems. Emphasis on sensory perception, sense and movement, investigations of climate, environmental conditions, and values toward consumption and sustainability in everyday experience of the built environment. Course content and assignments coordinated with 506 and 542.

Arch 597. Seminar on the Built Environment III: Multidisciplinary. (3-0) Cr. 3. S. Prereq: Senior or graduate standing. Multidisciplinary overview of contemporary theories concerned with the production of the built environment. Particular attention to urbanism as a discourse that relates social interactions and power structures to the minimal space. Coursework includes readings, seminar discussions and a research paper.

Arch 598. Seminar in the Built Environment IV: Topical Study. (3-0) Cr. 3. S. Prereq. Senior or graduate standing. A research seminar that takes an in-depth look at a topic within contemporary discourses on architecture and urbanism. The topic will be considered from multiple points of view including its historical, theoretical, behavioral and cultural aspects.
Courses for graduate students
Arch 601. Architecture and Landscape Design. (0-12) Cr. 6. F.S. Prereq: 507; 542; 596 Coreq: 643. Design projects that explore the relationships among architecture, cultural landscapes, and biological issues. Emphasis on regional sites and Socio-economic conditions. Projects stress engagement with local circumstances and stakeholders, and the application of interdisciplinary research, new materials and systems. Course content and assignments coordinated with 643.

Arch 602. Design Studio Options. (0-12) Cr. 6. Repeatable. S. Prereq: 601. Design studio electives include, but are not limited to: independent and interdisciplinary projects, study abroad, and design-build. Dow S 449/546, for 6 cr. each time taken, can be substituted for this class and be taken up to a maximum of 12 credits.

Arch 603. Comprehensive Design. (0-12) Cr. 6. F. Prereq: 601. Rigorous examination of architecture’s relationship with culture and technology. Studio projects stress the interpretation of contextual and historical considerations, as well as structural, environmental, mechanical, electrical and plumbing systems, in a comprehensive design proposal. This course fulfills the Graduate College Creative Component Requirement.

Arch 644. Science and Technology for Architects IV. (2-2) Cr. 3. S. Preq: 643 or graduate standing. Fourth of a four-course series in building science and technologies. Building Enclosures, Interior Construction and Sensory Qualities, Fabrication and Construction. Theory and case studies stressing the connectivity of technical issues to broader formal, social and cultural spheres. Summative Student Project.

Arch 690. Independent Design Study. (1-15) Cr. 6. Repeatable. F.S.S. Preq: Admission to MSAS or MArch 30 credit program. Independent architectural design projects commensurate with student interests requiring approval of Architecture Graduate Advisory Committee.

Art and Design
Roger Baer, Chair of Department
Distinguished Professors (Emeritus): Heggen, Miller
Professors: Baer, Herrnstadt, Lilligren
Professors (Emeritus): Allen, Bro, Dake, Evans, Fowles, Held, Picket, Singer, Smith, Sontag, Steiglitz, Tartakov
Associate Professors: Akkurt, Caldwell, Chidister, Crayle, Cunnally, Curran, Fontaine, Gibbs, Gould, Jones, Kang, Katz, Malven, Martin, Mickelson, Muench, Paschke, Richards, Satterfield, Stout, Walton, Warne
Associate Professors (Emeritus): Bruene, Lehner, McIarlath, Polster, Sage, Sreenivasan
Associate Professors (Adjunct): Demartino, Pokrantan
Associate Professor (Collaborator): Sandor
Assistant Professors: Brunnier, Bruski, Call, Campbell, Eisman, Faber, Godbey, Golec, Holland, Iasevoli, Sobiech-Munson, Song

Assistant Professor (Collaborator); Schneider
Senior Lecturers: Boehmer, Harris, Mikovec, Pappenheimer, Ure
Lecturers: Biechler, Morgan

Undergraduate Study
The department offers the degree Bachelor of Fine Arts (B.F.A.) in three curricular areas: Graphic Design, Integrated Studio Arts, and Interior Design. The department also offers the degree Bachelor of Arts (B.A.) in Art and Design. Each of these curricula affords excellent preparation for a variety of career opportunities or as a foundation for graduate study.

B.F.A. Graphic Design. Emphasis is on creative problem solving, design process, and the visual organization of communication media. Graphic design graduates effectively integrate abstract thinking skills; communication design theory, history, and methodology; and technology. Components of visual communication including typography, semiotics, and image creation are integrated with an understanding of professional practice.

B.F.A. Integrated Studio Arts. Students select from a variety of studio options in order to build a portfolio and prepare for a professional practice in the visual arts. This concentration emphasizes aesthetics, visual problem solving, critical thinking, and skill development in a variety of media employing contemporary, historical, and cultural theory and practices.

B.F.A. Interior Design. Emphasis is on the student’s application of design processes to creatively solve problems of the interior environment based on knowledge of human Safety, functional utility, physical, psychological, and contextual fit. Graduates in interior design are competent in visual communication (sketching, drafting and computer aided design), design problem solving, space planning, lighting and color specification for interiors, finish and furniture selection, detailing interior construction and application of human factors. The curriculum is accredited by the Foundation for Interior Design Education Research (FIDER) as providing professional level education.

Students entering the Graphic Design, Interior Design, or Integrated Studio Arts programs involving computer aided design or animation are strongly encouraged to purchase or lease a laptop computer and appropriate software. Contact the department or see the College of Design website for hardware and software specification.

B.A. Art and Design. This curriculum offers two concentrations: Art and Culture, and Visual Cultural Studies. Art and Culture has a greater emphasis on studio components, and Visual Cultural Studies on humanities and liberal arts components.

Both concentrations are combined with an applied career minor or approved program.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

The department offers no minor but participates in the undergraduate minor in design studies.

Graduate Study
The department offers the degrees of Master of Fine Arts (M.F.A.) in Graphic Design, Integrated Visual Arts, and Interior Design, and Master of Arts (M.A.) in Art and Design, with degree specialization in interior design, graphic design, and environmental graphic design. Graduates have a broad understanding of visual communication, problem solving, and interdisciplinary studies.

The M.F.A. curricula in Graphic Design and Interior Design require a minimum of 60 credits. The M.F.A. curriculum in Integrated Visual Arts requires a minimum of 61. These programs include an art and design seminar, a studio concentration, history and criticism courses, a teaching seminar, elective courses outside the department or area of study, and the completion of a thesis-exhibition or thesis.

M.F.A. graduates in Graphic Design are skilled in communication design, problem solving, and are adept in the use of visual language and symbolology. Graduates are proficient in the design of communications and the use of technologies that incorporate human interaction with environments, objects, and electronic and traditional publications. The M.F.A. is recognized as the terminal degree in the graphic design field. The degree requires completion of a written thesis integrating theory, research, and design problem solving.

M.F.A. graduates in Interior Design are proficient in visual communication skills, design theory, human factors, and space planning. The M.F.A. degree is considered a terminal degree in the interior design field. The degree requires completion of a written thesis comprise of original research.

M.F.A. graduates in Integrated Visual Arts have skills that link traditional studio disciplines with emerging technologies. Graduates are prepared as visual artists to enter studio research, business, higher education or new interdisciplinary fields. The MFA is recognized as the terminal degree. A required thesis-exhibition is composed of two parts, a substantial exhibition and a written statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A thesis may be an appropriate alternative, but some portion of the work should entail an element of design problem solving in the form of a visual product.

The M.A. in Art and Design with specialization in interior design requires a minimum of 34 credits including a studio concentration and work in research methods and human factors. Candidates focus on research in an area of specialization culminating in a written thesis comprised of original research. Graduates have a broad understanding of current interior design issues and design research, preparing them for special analytical aspects of design practice and further studies leading to the Ph.D. Applicants without a degree in interior design may be required to complete up to 40 additional credits of coursework.

The M.A. in Art and Design with specialization in graphic design requires a minimum of 30 credits including seminar courses in art and design, a studio concentration, a history course, a business practice course, courses outside of graphic design, and the completion of a capstone course in graphic design. Graduate students selecting the M.A. in graphic design will focus on a first professional degree. Applicants without a degree in graphic design may be required to complete up to 17 additional credits of coursework.

The M.A. in Art and Design with specialization in environmental graphic design requires a minimum of 34 credits including a seminar course in art and
design, a studio concentration, a history courses, courses in design methods, and the completion of a capstone course in environmental graphic design.

Graduate students selecting the M.A. in environmental graphic design will focus on a first professional degree. Applicants without a degree in background in environmental graphic design may be required to complete up to 15 additional credits of coursework.

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the master of fine arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a slide or digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student’s undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students’ progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Art and Design, College of Design, Iowa State University, Ames, Iowa 50011-3092.

Art (Art)
Courses primarily for undergraduate students

Art 110. Orientation to Artand Design. Cr. R. F.S. Overview of the department and university with special emphasis on curricula, program planning, and study skills. Advising, policy and procedures, student services.

Art 130. Drawing I. (1-4) Cr. 3. F.S.SS. The introductory course in drawing, focusing on the fundamentals of drawing from observation. Subject matter may include working from the still life, architectural settings, landscape and the human figure. Line, shape, perspective and value studies are explored through a variety of drawing media.

Art 230. Drawing II. (0-6) Cr. 3. F.S. Prereq: Art 108 or Dan S 102, 183, and 131. A continuation of Dsn S 131 (Design Representation). Further development of perceptual drawing skills from a variety of subject matter. Continued practice with drawing materials and techniques with emphasis on tonal and color media.

Art 292. Introduction to Visual Culture Studies. (Cross-listed with Dan S). (3-0) Cr. 3. F.S. Prereq: Open to all majors. An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related topics. (1-0) Cr. 1. Prereq: Permission of instructor and planned enrollment in 495. Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Satisfactory-fail only.

Art 495. Art and Design in Europe. (Dual-listed with 595.) Cr. 3. F.S.SS. Prereq: 494, permission of instructor. International study abroad program in Western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Travel and tour expenses to be paid by the student.

Art 496. Art and Design Field Study. Cr. R. Repeatable. Prereq: Enrollment in an art and design studio or art history course, permission of instructor. Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art and design. Satisfactory-fail only.

Art 501. Issues in Visual and Material Culture Seminar. (3-0) Cr. 3. F.S. Prereq: Permission of instructor. Issues and debates that pertain to the study of visual objects and material artifacts in their cultural context. Examination of the role of visual and material culture studies as both related to allied disciplines including, but not limited to: anthropology, art history, design history, design studies, and new media studies.

Art 595. Art and Design in Europe. (Dual-listed with 495.) Cr. 3. F.S. Prereq: Graduate classification, 494 or equivalent, permission of instructor. International study abroad program in Western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Tour and travel expenses to be paid by the student.

Art 598. Museum/Gallery Internship. Cr. arr. Repeatable. F.S.SS. Prereq: Graduate classification and permission of instructor. Written approval in advance of semester of enrollment. Supervised experience with a cooperating museum or gallery or art center. Satisfactory-fail only.

Courses for graduate students

Art 605. Research Methods. (3-0) Cr. 3. Prereq: Permission of instructor. Research strategies related to fine art and technology. Application of selected methods to specific issues.

Art 697. Studio Internship. Cr. arr. F.S.SS. Prereq: Graduate classification and approval of POS committee. Supervised off-campus learning experience with a prominent artist, designer, or firm.

Art Education (ArtEd)
Courses primarily for undergraduate students

ArtEd 211. Introduction to Art Education. (0-6) Cr. 3. F.S. Design experiences for the K-12 classroom. Hands-on discipline-specific and integrated art activities; emphasis on creativity and thinking skills.

Graphic Design (ArtGr)
Courses primarily for undergraduate students

ArtGr 270. Graphic Design Studio I. (0-6) Cr. 3. F. Prereq: Dan S 102 and Dan S 131, enrollment in 278; admission to the graphic design program through department review. Basic design concepts and color principles used for visual communication.

ArtGr 275. Graphic Technology I. (0-4) Cr. 2. F. Prereq: enrollment in 270. Basic computer skills for graphic design.

ArtGr 276. Graphic Technology II. (1-2) Cr. 2. S. Prereq: enrollment in 275. Color management, color theory and applications skills for graphic design.

ArtGr 370. Graphic Design Studio III. (0-6) Cr. 3. F. Prereq: 271, 278, enrollment in a 2-credit option; credit or enrollment in 387. Creation and design of images and symbols for communication. Application and integration of typography with images and symbols.

ArtGr 371. Graphic Design Studio IV. (0-6) Cr. 3. S. Prereq: 370, 397, enrollment in a 2-credit option. Development and preparation of design concepts for application to the printing and electronic publishing process. Creative problem-solving skills, introduction to systems design.

ArtGr 372. Graphic Design Materials and Processes. (2-0) Cr. 2. S. Prereq: Credit or enrollment in 370. Lecture about the processes and materials involved in graphic design arts reproduction. Course covers press, paper selection and specification, ink systems, type systems and fonts, output technology, printing presses and bindery operations.

ArtGr 378. Graphic Design Internship Seminar. (1-0) Cr. 1. F. Prereq: Credit or enrollment in 370 or 371. Procedural and ethical concerns related to the graphic design internship. Personal goals, preparation of resume and plans for internship. Study and tours of areas of interest within the graphic design profession.

ArtGr 378. Critical Issues in Graphic Design. (2-0) Cr. 2. Prereq: Credit or enrollment in 370. Lecture, discussion and writing about the critical issues facing the communications field today and in the future.

ArtGr 387. Graphic Design History/Theory/ Criticism I. (Dual-listed with 587). (3-0) Cr. 3. F. Prereq: Art H 280, 281, Dan S 183. Late nineteenth century to the 1990s. This course will explore the cultural, social,
ArtGr 391. Graphic Design Field Study. (0-1) Cr. 1. Repeatable. Prereq: Enrollment in 300 or 400 level graphic design studio course. Travel, study, and tours of areas of interest within the graphic design profession such as print production companies, design studios, and museums. Satisfactory-fail only.

ArtGr 470. Graphic Design Studio V. (0-6) Cr. 3. F Prereq: 371; enrollment in a 2-credit option. Advanced design systems as applied to corporate identity and environmental graphic design. Symbology as an integrated component of communication systems.

ArtGr 472. Photographic Art Direction. (Dual-listed with 572). (0-6) Cr. 3. F Prereq: 471, 482; enrollment in 370 or 371, or 470 or 471. Photography as a graphic design component. Compositional and conceptual elements in photographic images. Must have a camera with adjustable shutter speeds and lens openings.

ArtGr 473. Time Based Multi-Media. (Dual-listed with 573). (0-6) Cr. 3. F Prereq: Enrollment in 370 or 371, or 470 or 472. The design of visual, aural and written communication for electronic media.

ArtGr 474. Exhibition Design. (Dual-listed with 574). (0-6) Cr. 3. F, S Prereq: Enrollment in 370 or 371 or 470 or 482. Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ArtGr 475. Advanced Typography. (Dual-listed with 575). (0-6) Cr. 3. F, S Prereq: Enrollment in 370 or 371 or 470 or 482; portfolio review and permission of instructor. Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ArtGr 476. Graphic Design Methodology. (Dual-listed with 576). (0-6) Cr. 3. F, S Prereq: Enrollment in 370 or 371 or 470 or 482. Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ArtGr 477. Graphic Design Practicum. (0-6) Cr. 3. F, S Prereq: Enrollment in 370 or 371 or 470 or 482; portfolio review and permission of instructor. Graphic design outreach and problem solving. Individual and group projects for non-profit clients selected by the instructor.

ArtGr 478. Web Design for E-Commerce/Graphic Applications. (Dual-listed with 578). (0-6) Cr. 3. S Prereq: Enrollment in 370 or 371 or 470 or 482. The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ArtGr 479. Wayfinding Design. (Dual-listed with 579). (0-6) Cr. 3. Prereq: Enrollment in 370 or 371 or 470 or 482. Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of spatial plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ArtGr 480. Graphic Design Internship. (3-0) Cr. 3. SS Prereq: 377, 12 credits in graphic design; permission of instructor; registration in advance of enrollment. Graphic design experience in an off-campus professional environment.

ArtGr 481. Graphic Design Professional Practices. (3-0) Cr. 3. S Prereq: Credit or enrollment in 470. Professional design management: ethics, setting up a new business, client/designer relationships, contractual options, billing practices, and effective operating procedures.

ArtGr 482. Professional Presentation. (0-6) Cr. 3. S Prereq: 470; enrollment in a 2-credit option. Exploration and development of the graphic design portfolio and resume in electronic, print, and photographic form.

ArtGr 484. Selected Studies in Graphic Design. (Dual-listed with 584). Cr. arr. Repeatable. Prereq: Permission of instructor. Courses primarily for graduate students, open to qualified undergraduate students.

ArtGr 490. Independent Study. Cr. arr. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed related graphic design coursework appropriate to planned independent study. Prereq: On a graded basis or a satisfactory-fail basis.

A. Theory, Criticism, and Methodology
B. Two-Dimensional Design
C. Three-Dimensional Design
H. Honors
I. Internship (Cooperative-in-depth experience other than ArtGr 480)

ArtGr 491. Publication Design: Magazines. (Dual-listed with 591). (0-6) Cr. 3. F Prereq: Credit or enrollment in 370. The Philosophy, concepts and structures of magazine design.

ArtGr 492. Publication Design: Books. (Dual-listed with 592). (0-6) Cr. 3. S Prereq: Credit or enrollment in 370 or 371. The Philosophy, concepts and structures of book design.

Courses primarily for graduate students, open to qualified undergraduate students.

ArtGr 570. Advanced Studies in Visual Communication. (0-6) Cr. 3. F Prereq: Graduate admission to College of Design. Theory and investigation of systems, structures, principles of visual organization, and typography for communication. Studio problems will be influenced by social, cultural, environmental, or technological factors.

ArtGr 571. Signs, Symbols, Images. (0-6) Cr. 3. S, Prereq: Graduate Classification in College of Design. Investigation and application of signs, symbols and semiotic theory for communication. Studio problems influenced by social, cultural, environmental, or technological factors.

ArtGr 572. Photographic Art Direction. (Dual-listed with 472). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design. Photography as a graphic design component. Compositional and conceptual elements in photographic images. Must have a camera with adjustable shutter speeds and lens openings.

ArtGr 573. Time Based Multi-Media. (Dual-listed with 473). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design. Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ArtGr 574. Exhibition Design. (Dual-listed with 474). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design. Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ArtGr 575. Advanced Typography. (Dual-listed with 475). (0-6) Cr. 3. Prereq: Graduate classification in College of Design. Typographic theory exploring traditional and non-traditional forms.

ArtGr 576. Graphic Design Methodology. (Dual-listed with 476). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design. Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ArtGr 578. Design for E-Commerce/Graphic Applications. (Dual-listed with 478). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design. The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ArtGr 579. Wayfinding Design. (Dual-listed with 479). (0-6) Cr. 3. Prereq: Graduate enrollment in College of Design. Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ArtGr 584. Selected Studies in Graphic Design. (Dual-listed with 484). Cr. arr. Repeatable. Prereq: Graduate classification in the College of Design. Topics vary each time offered.

ArtGr 587. Graphic Design History/Theory/ Criticism I. (Dual-listed with 387). (3-0) Cr. 3. F Prereq: Graduate classification. Late nineteenth century to the 1990’s, this course will explore the cultural social, political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics.

ArtGr 588. Graphic Design History/Theory/ Criticism II. (Dual-listed with 388). (3-0) Cr. 3. S Prereq: Graduate classification. Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice.

ArtGr 590. Special Topics. Cr. arr. Prereq: Bachelor’s degree in graphic design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment.

ArtGr 591. Publication Design: Magazines. (Dual-listed with 491). (0-6) Cr. 3. F Prereq: Graduate enrollment in College of Design. The Philosophy, concepts and structures of magazine design.

ArtGr 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students.

ArtGr 672. Graphic Design and Human Interaction. (0-6) Cr. 3. F, S Prereq: 570, 571, and graduate enrollment in College of Design or permission of instructor. The theory and investigation of experience design as it applies to human interactions in contemporary society and culture. Studio problems may involve such areas as: exhibition design, electronic interface design, wayfinding, package design, and publication design.

A) Usability. The exploration and design of interface/interaction with products, systems, and technologies
B) Design for Behavioral Change. The exploration and design of educational experiences and artifacts as they relate to the social, emotional, and behavioral aspects of society.
C) Consumer Experience Design and Branding. The exploration and design of identity systems and consumer brand experiences.
Art History (Art H)

Courses primarily for undergraduate students

Art H 181. Origins and Evolution of Modern Design. (Cross-listed with Dsn S). (3-0) Cr. 3. S. F.S. History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

Art H 280. History of Art I. (Cross-listed with Dsn S). (3-0) Cr. 3. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. H. Honors. Cr. 4.

Art H 281. History of Art II. (Cross-listed with Dsn S). (3-0) Cr. 3. S. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. H. Honors. Cr. 4.

Art H 378. Poes and Caesars: 2000 Years of Art History in Rome. (3-0) Cr. 3. S.S. Prereq: Permission of instructor. Survey of Italian art and architecture from the Etruscans to Bernini, including lectures and tours of museums and historical sites. Study abroad course taught in Rome, with travel to other Italian cities. Tour and travel expenses to be paid by student.

Art H 382. Art and Architecture of Asia. (Dual-listed with 582). (Cross-listed with Dsn S). (3-0) Cr. 3. Introduction to the history of art and architecture in China, Korea, and Japan before the modern era. Visual materials selected based on important themes that are critical in understanding Asian culture and art tradition. Museum field trip expenses to be paid by students. Nonmajor graduate credit.

Art H 383. Greek and Roman Art. (Dual-listed with 583). (Cross-listed with Dsn S, Cl St). (3-0) Cr. 3. Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

Art H 384. Art of Islam. (3-0) Cr. 3. Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world.

Art H 385. Renaissance Art. (Dual-listed with 585). (Cross-listed with Dsn S). (3-0) Cr. 3. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries. Nonmajor graduate credit.

Art H 394. Women/Gender in Art. (Dual-listed with 594). (Cross-listed with Dsn S). (3-0) Cr. 3. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

Art H 489. Sequential Art. (Dual-listed with 589). (Cross-listed with Dsn S). Cr. 3. An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present. Nonmajor graduate credit.

Art H 490. Independent Study. Cr. art. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Students must have completed Art History coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

Art H 495. Modern and Contemporary Art and Theory II. (Dual-listed with 595). (Cross-listed with Dsn S). (3-0) Cr. 3. Visual arts and critical theory from Abstract Expressionism to the present. Nonmajor graduate credit.

Art H 496. History of Photography. (Dual-listed with 596). (Cross-listed with Dsn S). (3-0) Cr. 3. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an Art Historical perspective, emphasizing causative factors, cultural influences, and major masters and schools. Nonmajor graduate credit.

Art H 498. Selected Topics in Art History. (Dual-listed with 598). (Cross-listed with Dsn S). (3-0) Cr. 3. Repeatable. Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Courses primarily for graduate students, open to qualified undergraduate students

Art H 581. Art and Architecture of India. (Dual-listed with 481). (Cross-listed with Dsn S). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Survey of Indian art and architecture through history. Examination of the architecture developed in the Indian subcontinent to cover the historical, religiously, culturally, socially, and politically.

Art H 582. Art and Architecture of Asia. (Dual-listed with 583). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Survey of Indian art and architecture through history. Examination of the architecture developed in the Indian subcontinent to cover the historical, religiously, culturally, socially, and politically.

Art H 583. Greek and Roman Art. (Dual-listed with 583). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

Art H 585. Renaissance Art. (Dual-listed with 385). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

Art H 587. Nineteenth Century Art. (Dual-listed with 487). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

Art H 590. Sequential Art. (Dual-listed with 489). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. An Art History survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present.

Art H 590. Special Topics. Cr. art. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment.

Art H 594. Women/Gender in Art. (Dual-listed with 594). (Cross-listed with Dsn S, W S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

Art H 595. Modern and Contemporary Art and Theory II. (Dual-listed with 498). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an Art Historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

Art H 598. Selected Topics in Art History. (Dual-listed with 498). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Graduate classification, permission of instructor. Specialized study in the history or criticism of art and/or design.

Interior Design (ArtID)

Courses primarily for undergraduate students

ArtID 250. Fundamentals of Interior Design. (2-0) Cr. 2. F. The profession, issues, and role of interior design.

ArtID 251. Human Factors in Interior Design. (2-0) Cr. 2. S. Overview of issues related to health and safety, ergonomic factors, anthropometrics, perception, psycho-behavioral response, physiology, physical ability and universal design. Emphasis on application of human factors to analysis and solution of interior design problems.

ArtID 255. Forces That Shape Interior Space. (3-0) Cr. 3. F. Prereq: Open to non-majors. A survey of variables influencing the form and function of interior environments. Review of professional, geo-political, utilitarian, social-cultural, economic, humanistic, historical, technological, and other factors as generators of form.

ArtID 259. Sophomore Field Study. Cr. R. Prereq: Enrollment in interior design studio course. Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Satisfactory-fail only.

ArtID 261. Graphic Communication for Interior Design I. (0-4) Cr. 2. F. Prereq: Admission to the interior design program through program review and enrollment in 265. Proficiency in the development of technical conventions, and design drawing with drafting instruments. Emphasis on drawing layout, line quality, and lettering. Site and structure measurements, dimensioning, single and multi-view drawings, sections and axonometrics.

ArtID 262. Graphic Communication for Interior Design II. (0-4) Cr. 2. F. Prereq: Admission to the interior design program through program review and enrollment in 265. Perspective drawing, design sketching, presentation drawings, shades, shadows, and reflections. Use of various rendering media and techniques.

ArtID 263. Graphic Communication for Interior Design III. (0-4) Cr. 2. S. Prereq: 261, enrollment in 267. Computer visualization techniques and applications; projects employing computer graphic methods.
ArtID 265. Interior Design Studio I. (1-6) Cr. 4. F. Prereq: Credit or enrollment in 250, 261, 262, and 350; admission to the interior design program through program review. Exploration of concepts, materials, and assemblies associated with development of planar interior elements including floors, walls, ceiling, windows, and finishes. Fiber, plastic, sheet metal, and other materials. Emphasis on human factors, testing, codes, detailing, specifications, and other issues related to design and end use.

ArtID 351. Interior Materials Systems and Details I. (2-2) Cr. 3. F. Prereq: Admission to the interior design program through program review. Exploration of concepts, materials, and assemblies associated with development of planar interior elements including ergonomics, human behavior and the requirements of special groups. Color theories related to interior spaces. Residential interior design and medium scale projects. Detail drawings, and expansion of visualization techniques.

ArtID 350. Interior Materials Systems and Details II. (2-2) Cr. 3. S. Prereq: 265, 261, 262, 265, 350, enrollment in 251, 259, and 351. Human factors issues including ergonomics, human behavior and the requirements of special groups. Color theories related to interior spaces. Residential interior design and medium scale projects. Detail drawings, and expansion of visualization techniques.

ArtID 368. International Study Orientation Seminar. (1) Cr. 1. F. Prereq: permission of instructor and planned enrollment in Rome study option. Historical and contemporary architecture and interior design, customs and traditions of Rome and related travel itinerary locations. Required of students participating in the interior design international study option.

ArtID 459. Senior Field Study. Cr. R. Prereq: Enrollment in fourth year interior design studio courses and travel study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Satisfactory-fail only.

ArtID 460. Interior Design Internship. Cr. 3. S. Prereq: Completion of 350, 365. Professional interior design off-campus course experience.

ArtID 461. Interior Design Professional Practices. (3-0) Cr. 3. S. Prereq: supervision and general management of the interior design office: agree-
ments, business procedures, and professional ethics. Professional interior design issues and concerns.

ArtID 463. Environments for the Aging. (Cross-listed with HD FS, Geron). (3-0) Cr. 3. S. Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies. Emphasis on independent living within residential settings including specialized shelter, supportive services, and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities.

ArtID 467. Interior Design Studio VI. (Dual-listed with 567). (1-6) Cr. 4. S. Prereq: 465, credit in 469 and all required interior systems and history/theory/criticism courses or permission of instructor. Refinement of technical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design. Nonmajor graduate credit.

ArtID 488. Interior Design in an Urban Setting. (1-4) Cr. 3. S. Prereq: Enrollment or credit in third year studio course. Study design projects and designers practicing in an urban Setting. Studio project examining issues related to interior design in an urban context.

ArtID 498. Advanced Studies in Interior Design. (Dual-listed with 598). Cr. 3. Repeatable. Prereq: 12 credits in interior design or permission of instructor. Examination of special issues with emphasis on the translation into design application. Topics vary each time offered. Nonmajor graduate credit.

ArtID 499. Independent Study. Cr. arr. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

H. Honors

Courses primarily for graduate students, open to qualified undergraduate students

ArtID 551. Design Humanities. (3-0) Cr. 3. Repeatable. F.S. Prereq: Instructor permission. An exploration of human nature as broadly defined and as applied to the design of the built environment. Consideration of human characteristics, responses and performance, at varying scales, as sources of design insight. Topics vary each time offered.

A: Micro-Scale Humanics-Issues related to the nature, performance and accommodation of the individual organism, including sensation and perception, physical requirements, anthropometrics, personal safety and other issues connecting human needs and built environmental responses.

B: Meso-Scale Humanics-Issues related to human performance in small to moderate scale settings, including psychological and behavioral dimensions, social factors, interpersonal safety, etc. C: Macro-Scale Humanics-Cultural and Societal influences on human performance and well being in the moderate to large scale built environment, including the impact of political, economic, cultural, geographic, design cultural and other Societal factors.

ArtID 552. Design Methods. (2-0) Cr. 2. Repeatable. F.S. Prereq: Permission of instructor. Survey of methodologies and methodological tools for varied end uses and drawn from wide ranging sources. Emphasis on their organization and application to design of the human environment. Topics vary each time offered.

A: Investigation & Analysis - Methods of design research, analysis, programming and theory formulation.

B: Synthesis - Methods of synthesizing design concepts and solutions

C: Communication - Methods of managing, translating, communicating and otherwise utilizing text, image, abstract and other forms of information.

D: Procedural Alternatives - New and specialized methodological trends, including subject or setting-specific methods.

ArtID 554. Interior Design Teaching Practicum. Cr. arr. Repeatable. F.S.SS. Prereq: Completion of ArtID 667 or permission of instructor. Supervised practical application of interior design theory, materials, and practice to the educational process.

ArtID 559. Graduate Interior Design Field Study. Cr. R. Repeatable. Prereq: Graduate enrollment or permission of instructor. Study and tours of places of interest within the interior design-related interest such as manufacturers, design studios, related professional offices, showrooms, museums, and historical sites.

ArtID 560. Interior Design Internship. (3-0) Cr. 3. S. Prereq: Completion of a graduate interior design studio or permission of instructor. Applied, off campus, professional interior design-related experience.

ArtIS 205. Studio Fundamentals I. (I-6) Cr. 3. F. Prereq: Graduation classification and concurrent enrollment in 598 or permission of instructor. Introduction to studio fundamentals and crossover between media. Emphasis on ceramics and fibers as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

ArtIS 207. Studio Fundamentals II. (I-6) Cr. 3. F. Prereq: Graduation classification and concurrent enrollment in 598. Introduction to studio fundamentals and crossover between media. Emphasis on metals and wet darkroom photography as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

ArtIS 208. Color. (I-6) Cr. 3. F. S. Prereq: Dan S 102, 131, and 183. Required of all ISA BFA students. The impact of changing visual relationships emphasizing physical and psychological color concepts. Additive and subtractive mixing and color interaction exercises using various color media.

ArtIS 209. Studio Fundamentals III. (I-6) Cr. 3. F. Prereq: Acceptance into the BFA ISA program. Introduction to studio fundamentals and crossover between media. Emphasis on printmaking and wood as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

ArtIS 211. Studio Fundamentals IV. (I-6) Cr. 3. F. S. Prereq: Graduation classification and concurrent enrollment in 598. Introduction to studio fundamentals and crossover between media. Emphasis on computers and painting as tools of expression and communication. Required of all ISA BFA students. Must register for both sections.

ArtIS 222. Introduction to Creative Digital Photography. (I-6) Cr. 3. F. S. Prereq: Dan S 102, 131, and 183. The course will include camera operation, scanning, image manipulation, color management and printing. Must have access to 35 mm camera or 4 megapixel (minimum resolution) digital camera. Cameras must have manual override. Digital photography as a medium of design, expression and communication.

ArtIS 225. Introduction to Darkroom Photography. (I-6) Cr. 3. F. S. Prereq: Dan S 102, 131 and 183. Photography as a creative medium of design, expression and communication. Camera techniques and black and white wet lab processing taught. Alternative processes explored as time permits. 35 mm camera with manual exposure controls is required.

ArtIS 233. Watercolor Painting. (I-6) Cr. 3. F. Prereq: Art 230. Fundamentals of painting using water-based media applied to painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.

ArtIS 238. Painting I. (I-6) Cr. 3. F. S. Prereq: Art 230. Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form.

ArtIS 305. Integrative Media. (Dual-listed with 505) (I-6) Cr. 3. S. Prereq. Dan S 102, 131 and 183 and 8 credits of additional ISA studio at 200+ level. Exploration and application of materials and methods that combine and integrate traditional approaches, alternative/new materials and alternative approaches, and new media.

ArtIS 308. Computer Modeling, Rendering and Virtual Photography. (I-6) Cr. 3. F. S. Prereq: Art 230 or permission of instructor. Introduction to 3D modeling using available software. Introduction to lighting, rendering and media exploration with respect to 3D object and still scene creation.

ArtIS 310. Sources of Visual Design. (I-6) Cr. 3. F. S. Prereq: Art 230. Required of all ISA BFA students. Studio exercises to develop awareness of external and internal sources for design.

ArtIS 311. Contemporary Issues in Studio Art. (I-6) Cr. 3. F. S. Prereq: 310. Studio based exploration of issues and directions in current art. Readings, discussions, and studio research projects to build an understanding and applied knowledge base for understanding each student's place in the contemporary art world.

ArtIS 320. Introduction to Furniture Design. (I-6) Cr. 3. F. S. Prereq: ArtIS 209 or permission of instructor. Design and creation of basic furniture forms in wood. Introduction to power tools. Develop an individual project process including an understanding of scale and proportion. Develop sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

ArtIS 322. Ceramics II. (I-6) Cr. 3. F. S. Prereq: 222 or 205. Further investigation of concepts and techniques in ceramics; introduction to glaze research and kiln firing.

ArtIS 323. Scientific Illustration Principles and Techniques. (Cross-listed with BPM II) (I-6) Cr. 3. Repeatable. F. Prereq: 6 credits in art and design and 3 credits in biological sciences. Studio basics and professional techniques in black & white, continuous tone, and color. Emphasis on tools, materials, and rendering.

ArtIS 324. Jewelry/Metalsmithing II. (I-6) Cr. 3. F. S. Prereq: 207 or permission of instructor. Continued study of traditional and contemporary metal fabrication techniques applied to concept based construction, including container forms. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ArtIS 325. Integrated Studio Arts Seminar. (2-0) Cr. 2. Repeatable. Prereq: Any 3-0 studio. Contemporary issues in studio arts explored through lectures and presentations.

ArtIS 327. Illustration as Communication. (Cross-listed with BPM I) (I-6) Cr. 3. F. Prereq: 326. Studio problems in illustration emphasizing composition and communication. Problem solving methodologies.

ArtIS 329. Creative Photography. (I-6) Cr. 3. Repeatable. F. S. Prereq: 207 or 229. Continuation and expansion of concepts and processes covered in ArtIS 207 and ArtIS 229. Individual thematic expression further enhanced through photographic history and criticism.

ArtIS 333. Three-Dimensional Studio. (Cross-listed with Arch) (I-6) Cr. 2. Repeatable. F. S. This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means for three dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructivistic techniques.

ArtIS 337. Application of Scientific Illustration Techniques. (Cross-listed with BPM II) (I-6) Cr. 3. S. Prereq: 323. Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

ArtIS 345. Woven Structures. (I-6) Cr. 3. Repeatable. Prereq: Dan S 102, 131, 183, and ArtIS 205 or equivalent. Introduction to a variety of textile techniques including on-loom and off-loom woven construction using both traditional and non-traditional materials and approaches. Techniques may include basketry, tapestry weaving, papermaking, and 4-harness
weaving. Emphasis placed on technical development, exploration and experimentation with a variety of fiber media, development of problem solving and critical thinking skills.

ArtIS 346. Textile Surface Design. (0-6) Cr. 3. Repeatable. Prereq: Dan S 102, 131, 183 and ArtIS 205, or equivalent. Introduction to surface design using dyes and discharging agents, as well as mechanical and liquid resists to create complex surfaces. Other surface embellishment techniques, such as direct application of pigments and stitching, will be explored. Emphasis on technical development and research, as well as conceptual exploration and visual problem solving.

ArtIS 347. Printed Textile Design. (0-6) Cr. 3. Repeatable. Prereq: Dan S 102, 131, 183, and ArtIS 205 or equivalent, or permission of instructor. Textile printing methods; block, stencil, screen-printing using dyes, discharging agents, and pigments. Digital printing on fabric will be introduced. Experimental printing methods will also be explored. Research and development of surface design techniques as a means for personal expression.

ArtIS 356. Relief Printmaking. (Dual-listed with 556). (0-6) Cr. 3. Repeatable. F. Prereq: Art 230. Explore the techniques and aesthetic qualities of black and white and color relief printmaking primarily through woodcuts and polymer plate techniques. Emphasis is on experimental and creative use of printmaking for artistic expression.

ArtIS 357. Intaglio and Monotype Printmaking. (Dual-listed with 557). (0-6) Cr. 3. Repeatable. F. Prereq: Art 230. Examine the techniques and aesthetic qualities of black and white intaglio printmaking primarily through etching, aquatint, photographic intaglio and collagraph processes. Unique, one-of-a-kind prints in black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.

ArtIS 358. Lithography. (Dual-listed with 558). (0-6) Cr. 3. Repeatable. S. Prereq: Credit or enrollment in Art 230. Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color.

ArtIS 399. BFA Professional Practice. (2-0) Cr. 2. S. Prereq: Junior classification in Art and Design BFA curriculum. Required of all ISA BFA students. Introduction to professional practices including development of portfolio (visual and written components). Lecture and presentation topics include applying to graduate school, grants/funding opportunities, professional networking, exhibition opportunities, and best practices for studio artists. Half semester course.

ArtIS 409. Computer/Video Game Design and Development. (Dual-listed with 509). (Cross-listed with HCI). (0-6) Cr. 3. Repeatable. F. S. Prereq: Permission of instructor. Programming emphasis: Cm Sc 227, 228, 229 or equivalent in Engineering; art or graphics emphasis: Art 230 and ArtIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: junior classification. Independent project based creation and development of “frivolous and non-frivolous” computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of indie development and computer/video game history will be discussed. Nonmajor graduate credit.

ArtIS 420. Advanced Furniture Design. (Dual-listed with 520). (0-6) Cr. 3. Repeatable. F. S. Prereq: 320. Design and creation of advanced furniture forms in wood with consideration of precedents and innovative approaches. An individual project is a unique personal approach to the design and making of furniture. Refine sensitivity to wood and the social and environmental implications of materials used for furniture design and production. Nonmajor graduate credit.

ArtIS 422. Ceramics Studio. (Dual-listed with 522). (0-6) Cr. 3. Repeatable. F. S. Prereq: 324 or permission of instructor. Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes, including raising, forming, and antiscat shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development. Nonmajor graduate credit.

ArtIS 424. Jewelry/Metalsmismithing III. (Dual-listed with 524). (0-6) Cr. 3. Repeatable. F. S. Prereq: 324 or permission of instructor. Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes, including raising, forming, and antiscat shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development. Nonmajor graduate credit.

ArtIS 429. Advanced Photography. (Dual-listed with 529). (0-6) Cr. 3. Repeatable. F. S. Prereq: 329. Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unique body of work and research into contemporary photographers and aesthetic concerns. Nonmajor graduate credit.

ArtIS 430. Drawing IV. (Dual-listed with 530). (0-6) Cr. 3. Repeatable. F. S. Prereq: Art 330. Figurative and/or non-figurative drawing with advanced work in media, composition, and theory. Nonmajor graduate credit.

ArtIS 447. Advanced Printed Textile Design. (Dual-listed with 547). (0-6) Cr. 3. Repeatable. F. S. Prereq: 348 or 347. Advanced techniques that include screen-printing with dyes, discharging agents, and pigments, and digital printing on fabric. Experimental printing methods will also be explored. Emphasis is on research and development of surface design techniques as a means for personal expression. Nonmajor graduate credit.

ArtIS 458. Advanced Printmaking. (0-6) Cr. 3. Repeatable. F. S. Prereq: 358, 357 or 358, and permission of instructor. Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists.

ArtIS 482. Selected Topics in Studio Art. (Dual-listed with 582). (0-6) Cr. 3. Repeatable. F. S. Prereq: Permission of instructor. Special issues related to studio art. Topics vary each time offered.

ArtIS 490. Independent Study. Cr. arr. Repeatable. F. S. Prereq: Written approval of instructor and department chair on required form in advance of semester enrollment. Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ArtIS 500. BFA Exhibition. (1-0) Cr. 1. S. Prereq: 399 and senior classification in the Art and Design BFA Curriculum. Capstone experience for the BFA degree; includes the creation and refinement of a final portfolio both visual and written components. Students give a portfolio presentation to the ISA faculty. Course culminates in the planning and installation of the BFA group exhibition in a formal gallery setting. Required of all ISA BFA students. Half semester course.

Courses primarily for graduate students, open to qualified undergraduate students

ArtIS 502. Integrative Media. (Dual-listed with 505). (0-6) Cr. 3. Repeatable. F. S. Prereq: Graduate classification and permission of instructor. Exploration and application of materials and methods that combine and integrate traditional approaches, alternative/new materials, alternative approaches and new media.

ArtIS 508. Computer Aided Animation and Visualization. (0-6) Cr. 3. Repeatable. S. Prereq: 408 or graduate Status and permission of instructor. Further investigations begun in ArtIS 408. Attention given to the workflow and management of creating animation and visualizations.

ArtIS 509. Computer/Video Game Design and Development. (Dual-listed with 409). (Cross-listed with HCI). (0-6) Cr. 3. Repeatable. F. S. Prereq: Permission of instructor. Independent project based creation and development of “frivolous and non-frivolous” computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of indie development and computer/video game history will be discussed.

ArtIS 520. Advanced Furniture Design. (Dual-listed with 420). (0-6) Cr. 3. Repeatable. F. S. Prereq: Graduate classification and permission of instructor. Design and creation of advanced furniture forms in wood with consideration of precedents and innovative approaches. Develop a unique personal approach to the design and making of furniture. Refine sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

ArtIS 522. Ceramics Studio. (Dual-listed with 422). (0-6) Cr. 3. Repeatable. F. S. Prereq: Graduate classification and permission of instructor. Independent project based creation and development of ceramic forms and surfaces with an emphasis on personal art expression in the medium of ceramics, kiln firings, research into contemporary artists and development of a body of work are emphasized.

ArtIS 524. Jewellery and Decorative Metalsmithing III. (Dual-listed with 424). (0-6) Cr. 3. Repeatable. F. S. Prereq: Graduate classification and permission of instructor. Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including...
raising, forming, and anticlastic shell forming tech-
niques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development.

ArtIS 529. Advanced Photography. (Dual-listed with 429). (0-6) Cr. 3. Repeatable. F. Prereq: Graduate classification and permission of instructor. Independent, advanced work in traditional and/or
digital photographic processes. Emphasis is on develop-
ment of a unified body of work and research into
contemporary photographers and aesthetic concerns.

ArtIS 530. Drawing. (Dual-listed with 430). (0-6) Cr. 3. Repeatable. F. Prereq: Graduate classification and permission of instructor. Figurative and
non-figurative drawing with advanced work in media,
compositon, and theory.

ArtIS 538. Advanced Painting. (Dual-listed with 438). (0-6) Cr. 3. Repeatable. F. Prereq: Graduate clas-
sification and permission of instructor. Figurative and
non-figurative painting with advanced work in media,
compositon, and theory.

ArtIS 547. Advanced Printed Textile Design. (Dual-
listed with 447). (0-6) Cr. 3. Repeatable. Prereq: Graduate classification. Advanced textile printing tech-
niques that include screen-printing with dyes, discharging agents, and pigments, and digital printing on fabric. Experimental printing methods will also be
explored. Emphasis is on research and development
of surface design techniques as a means for personal
expression.

ArtIS 555. Relief Printmaking. (Dual-listed with 358). (0-6) Cr. 3. Repeatable. F. Prereq: Graduate classification and permission of instructor. Examine the techniques and aesthetic qualities of black and white relief printmaking primarily through
woodcuts and photopolymer plates. Emphasis is on
experimental and creative use of printmaking for
artistic expression.

ArtIS 557. Intaglio and Montotype Printmaking. (Dual-listed with 357). (0-6) Cr. 3. Repeatable. F. Prereq: Graduate classification and permission of instruc-
tor. Examine the techniques and aesthetic qualities of
intaglio and relief printmaking. Unique, one-of-a-kind
black and white prints are created. Emphasis is
on experimental and creative printmaking.

ArtIS 558. Lithography. (Dual-listed with 358). (0-6) Cr. 3. Repeatable. F. Prereq: Graduate classification and permission of instructor. Examine the techniques and aesthetic qualities of lithography primarily through
drawn and photographic plates. Emphasis is on
experimental and creative use of printmaking for
artistic expression. Experimental lithography students may focus on stone lithography and increased work
with color.

ArtIS 582. Selected Topics in Studio Art. (Dual-listed with 482). Cr. arr. Repeatable. F. Prereq: Permission of Instructor. Special issues related to studio art. Top-
ics vary each time offered.

ArtIS 590. Special Topics. Cr. arr. Prereq: Bachelor degree in art and/or design; or evidence of satisfac-
tory equivalency in specialized area. Written approval of instructor and department chair on required form in
advance of semester of enrollment.

Aragula Gururaj Rao, Chair of Department

Distinguished Professors: Beitz, Fromm

Distinguished Professors (Emeritus): Graves, Metzler

University Professor: Girtion

University Professors (Emeritus): Hammond, Horowitz, White

Professors: Andreotti, Honatzik, Jerimigan, R. Johansen, K. Johansen, Miller, Myers, Nikouli,
Nilsen-Hamilton, Rao, Robson, Robyt, Shin, Thornburg

Professors (Emeritus): Applequist, Athery, Buss, Stromer, Thomas, Tipton

Professor (Collaborator): Meyer, Tabatabai

Associate Professors: Ambrosio, Bobik, Dispirito, Hargrove, Huiatt, Peters

Associate Professors (Adjunct): James

Assistant Professors: Amaraningshe, Macintosh, Shogren-Knaak, Yu, Zabotina

Lecturer: Fulton, Girtion

Undergraduate Study

The department offers majors in biochemistry or biophysics in the College of Liberal Arts and Sci-
ences and a major in agricultural biochemistry in the College of Agriculture.

Biochemists and biophysicists seek to understand
life processes in terms of chemical and physical
principles. They conduct research in the frontiers
of biology such as metabolic networking; structure and function of enzymes, membranes, and
hormones; computational approaches; genomic and proteomic technology; protein engineering;
plant biotechnology; muscle structure and func-
tion; and the design and evaluation of drugs for
the treatment of disease. Biochemistry, biophys-
ics and molecular biology provide the basis for
much of modern biotechnology. Graduates have
opportunities in industrial biotechnology, the biotechnol-
ogy sector, in universities, veterinary medical, and
medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their
studies in graduate school, medical school, or
veterinary medical school.

Graduates of biochemistry, agricultural biochem-
istry and biophysics understand the chemical prin-
ciples of biological systems including molecular
biology. They have developed laboratory expertise in
modern biochemical techniques, including the
ability to analyze data and prepare scientific
reports. Most have participated in undergraduate research and have developed the skills neces-
sary for both written and oral presentations at a
level that will serve the student both within the
university and in postgraduate professional life. Graduates have the experience of interacting
with persons of different disciplines and cultures.
Students have the training in mathematics and
physics to solve problems of broad scope in
biological, biomedical and environmental sciences
and to provide leadership in diverse scientific and
technological areas.

Agricultural Biochemistry Major in the College of Agriculture

For the undergraduate curriculum leading to
the degree bachelor of science, see College of
Agriculture, Curricula. Agricultural biochemistry is
recommended to students interested in the areas
of agriculture requiring strong preparation in
biochemistry, chemistry, physics, and mathemat-
ics, or in preparation for the study of veterinary
medicine. Employment opportunities exist in
agrochemical industries, and animal and plant
biotechnology.

Biochemistry or Biophysics Majors in the College of Liberal Arts and Sciences

For the undergraduate curriculum leading to
the degree of bachelor of science, see Liberal Arts and Sciences, Curriculum. Biochemistry and
biophysics are recommended to students whose career interests involve advanced study or employ-
ment in biochemistry or biophysics, or in related areas of the biological or medical sciences.

Undergraduate majors in the College of Liberal Arts and Sciences in biochemistry usually have the following basic courses or their equivalents in their programs: BBMB 101, 102, 201, 404 (or 501), 405 (or 502), 411, 461 (or 551); Chem 201 (or 210), 211, 311L, 322L, 324, 325, 331, 332, 332L (or 332L), 334L (or 332L); Math 165, 166, 265 (or 266 or 267); Phys 211, 221, Biol 211, 211L (or 212L or 313L or 314), 212, 313, 314, and a minimum of 4 additional cred-
its of biological science courses from biology, ge-
netics, and microbiology. Undergraduate research, BBMB 499, is strongly recommended.

Undergraduate majors in biochemistry usually include the following basic courses in their programs: BBMB 101, 102, 404, 411, 461 (or 551); Chem 201 (or 210, 217, 778, 177N or 177L), 231L, 324, 325, 331, 332, Math 165, 166, 265, 266, 307 (or 317), 471; Phys 221, 222, Com S 207; Stat 305 or 231; Biol 211, 211L (or 212L), 212; Chem 211 and 211L; and 9 additional credits in 300 or higher level courses in biochemistry, biophysics, biological sciences, chemistry, or physics.

These lists of courses should not be regarded as statements of fixed requirements or as complete
outlines of the work necessary for the major. They
are given solely for the convenience of students or
advisers who wish to estimate the amount of
basic study that may be needed.

Biochemistry and biophysics majors are advised to meet the College of Liberal Arts and Sciences foreign language requirement with courses in
French, German, or Russian.

See also the B.S./M.S. program under Graduate Study.
The department offers minors in biochemistry in both the College of Agriculture and the College of Liberal Arts and Sciences, which may be earned by credit in BBMB 404, 405, 311 (or 411), and 451 (or Chem 325), plus additional supporting 300 level courses in chemistry or biochemistry for a total of 15 credits.

Communication Proficiency requirement: Majors in agricultural biochemistry must complete Eng 150 and 250 and one course in speech fundamentals with a grade of C or better in each of these courses. Majors in the College of Liberal Arts and Sciences must complete Eng 150 and 250 and one of the following with a grade of C- or better: (a) Eng 305, 308, or 314; (b) a written report in BBMB 411, or 499.

Interdepartmental Majors

The department participates along with other biological science departments including GDCB and EEOB in offering interdepartmental majors in Biology and Genetics. Biology courses that are staffed in part by department faculty members include Biol 101, 313, 314, and 313L (See Biology).

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in biochemistry and biophysics and with interdepartmental majors in genetics, immunobiology, MCD (molecular, cellular, and development biology), plant physiology, and toxicology. Minor work is offered to students taking major work in other departments.

Prerequisite to graduate work is a sound undergraduate background in biology, chemistry, mathematics, and physics.

All graduate students are required by the department to teach as part of their training for an advanced degree.

The department offers a B.S./M.S. program in biochemistry that allows students to obtain both the B.S. and M.S. degrees in five years. The program is open to students in the College of Liberal Arts and Sciences and in the College of Agriculture. Students interested in this program should contact the department office for details. Application for admission to the Graduate College should be made near the end of the junior undergraduate (third) year. Students will begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships.

Courses primarily for undergraduate students

BBMB 101. Introduction to Biochemistry. (1-0) Cr. 1. F. Research activities, career opportunities in biochemistry and biophysics, and an introduction to the structure of biologically important compounds. Credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 201. Chemical Principles in Biological Systems. (2-0) Cr. 2. S. Prereq: Credit or enrollment in Chem 331. Survey of chemical principles as they apply in biochemistry including: water, organic chemistry of functional groups in biomolecules and biochemical cofactors, weak bonds and their contribution to biomolecular structure, oxidation-reduction reactions and redox potential, thermodynamic laws and bioenergetics, chemical equilibria and kinetics, inorganic chemistry in biological systems, data presentation. The subject will be taught using molecules from biological systems as examples. Intended for majors in biochemistry, biophysics, or agricultural biochemistry.

BBMB 221. Structure and Reactions in Biochemical Processes. (3-0) Cr. 3. F. Prereq: Chem 213, 167 or 177. Fundamentals necessary for an understanding of biochemical processes. Primarily for students in agriculture. Not acceptable for credit toward a major in biochemistry or biophysics. Credit for both BBMB 221 and Chem 231 may not be applied toward graduation.

BBMB 301. Survey of Biochemistry. (3-0) Cr. 3. F.S.S. Prereq: Chem 231 or 331. A survey of biochemistry: structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymology; metabolism; biosynthesis; and selected topics. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 311. Biochemistry Laboratory. (1-3) Cr. 2. S. Prereq: Credit or enrollment in 301 or Biol 314. Emphasis on isolation, characterization, and quantification of biological substances. Only one of BBMB 311 or Biol 314 can be counted toward graduation. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 403. Microbial Biochemistry and Biotechnology. (3-0) Cr. 3. Alt. S. Off. 2010. Prereq: Chem 332, BBMB 301. Fundamental principles of microbial biochemistry, physiology, and genetics, and their application to microbial biotechnology. Topics will include biorenewable resources, metabolic pathway engineering, enzyme engineering, bioremediation, microbial diversity genomics, metagenomics. Nonmajor graduate credit.

BBMB 404. Biochemistry I. (3-0) Cr. 3. F. Prereq: Chem 332. A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical, and nutritional sciences. Chemistry of amino acids, proteins, carbohydrates, and lipids, vitamins; protein structure; enzymology; carbohydrate metabolism. Credit for both BBMB 420 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.

BBMB 405. Biochemistry II. (3-0) Cr. 3 S. S. Prereq: 404. A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical, and nutritional sciences. Metabolism of carbohydrates, amino acids and lipids, formation, turnover, and molecular relationships among DNA, RNA, and proteins; genetic code; regulation of gene expression; selected topics in the molecular physiology of plants and animals. Credit for both BBMB 420 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.

BBMB 411. Techniques in Biochemical Research. (1-0) Cr. 3. F. Prereq: Credit or enrollment in Chem 177 and 177L. Topics in the scientific background of biochemistry, such as macromolecules, metabolism, and catalysis. May include laboratory experiments as well as literature readings and discussion. A significant component is practice in scientific communication. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BBMB 420. Physiological Chemistry. (3-0) Cr. 3. F. Prereq: Chem 332, BBMB 301 or Biol 314. Structure and function of proteins in physiological systems: biological oxidation; chemistry and metabolism of carbohydrates, lipids, amino acids and nucleic acids; protein synthesis and the genetic code; relationship of biochemistry to selected animal diseases. Biochemistry of higher animals emphasized. Not acceptable for credit toward a major in agricultural biochemistry, biochemistry or biophysics. Credit for both BBMB 420 and the 404, 405 sequence may not be applied toward graduation. Nonmajor graduate credit.

BBMB 430. Procrayotic Diversity and Ecology. (Dual-listed with 530). (Cross-listed with Micr.) (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Micro 302, Micro 302L. Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 440. Laboratory in Microbial Physiology, Diversity, and Genetics. (Cross-listed with Micro.). (1-7) Cr. 3. F. Prereq: Micro 302, 302L, Chem 332, Biol 313L. Study of the fundamental techniques and theory of studying the diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments. Also included are techniques for the phylogenetic characterization, and genetic manipulation of diverse species of bacteria.

BBMB 451. Physical Biochemistry. (2-0) Cr. 2. F. Prereq: Chem 331, Phys 112 or 222; a previous course in calculus is helpful but not required. Selected topics in physical chemistry in the context of applications to problems in biology, biochemistry and food sciences. Not acceptable for credit toward a major in biochemistry or biophysics. Nonmajor graduate credit.

BBMB 461. Topics in Biophysics. (2-0) Cr. 2. S. Prereq: 451 or Chem 321 or Phys 304. Biological phenomena viewed as problems in physics, with a focus on structure determinations and macromolecular characterization. Nonmajor graduate credit.

BBMB 490. Independent Study. Cr. arr. F.S.S. Prereq: College of Agriculture: junior or senior classification and permission of faculty member in the Department of Liberal Arts and Sciences: permission of instructor. College of Agriculture: a minimum of 9 credits of 490 may be applied toward graduation. H. Honors

BBMB 499. Undergraduate Research. Cr. arr. Repeatable. F.S.S. Prereq: Permission of staff member with whom student proposes to work. Research under senior staff guidance.

Courses primarily for graduate students, open to qualified undergraduate students

BBMB 501. Comprehensive Biochemistry I. (4-0) Cr. 4. F. Prereq: Chem 210 or 211, 322, and 332; a previous course in biochemistry is strongly recommended. Chemical composition of living matter and the chemistry of life processes: characterizations of amino acids, proteins, carbohydrates and lipids; enzyme coenzymes; metabolism of carbohydrates; biological oxidations.

BBMB 502. Comprehensive Biochemistry II. (4-0) Cr. 4. S. Prereq: 501. Chemical composition of living matter and the chemistry of life processes: Metabolism of lipids, nucleotides; membrane biochemistry; biosynthesis of DNA, RNA, and proteins; gene regulation; selected topics.

BBMB 530. Procrayotic Diversity and Ecology. (Dual-listed with 430). (Cross-listed with Micr.) (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Micro 302, Micro 302L. Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.
BBMB 531. Structure and Reactivity of Biomolecules. (3-0) Cr. 1 F. Prereq: Chem 332. Five weeks. Special properties of reactive groups prevalent in biomolecules and reactions commonly encountered in biochemical studies. A study of reaction types and mechanisms in biochemistry.

BBMB 541. Computational Biochemistry. (1-0) Cr. 1 F. Prereq: A previous course in biochemistry is recommended. Computer applications in biochemical research.

BBMB 542. Introduction to Molecular Biology Techniques. (Cross-listed with GDCB, BCB, BMS, FS HN, Hort, Nutres, VPM). (3-0) Cr. 1 F. Prereq: Graduate classification. Workshops in basic molecular biology techniques and related procedures. Satisfactory-fail only.

A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.S.) B. Protein Technology. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. (S)

E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F)

BBMB 551. Molecular Biophysics. (3-0) Cr. 3 F. Prereq: Chem 322. An examination of physical methods for the study of molecular structure and organization of biological materials, with emphasis on applications. Spectroscopy, hydrodynamic methods, nuclear magnetic resonance, and X-ray diffraction.

BBMB 552. Biomolecular NMR Spectroscopy. (2-0) Cr. 2 Alt. S. Prereq: Chem 325 or permission of instructor. Advanced solution state Nuclear Magnetic Resonance spectroscopy as applied to biological systems. Topics include theoretical principles of NMR, practical aspects of experimental NMR, methodologies for protein structure determination, NMR relaxation, recent advances in NMR spectroscopy.

BBMB 581. Seminar. (1-0) Cr. 1 F. Prereq: Permission of instructor. Short presentations by students and discussion on assigned topics. For entering graduate students.

BBMB 590. Special Topics. Cr. arr.

BBMB 593. Workshop in Biochemistry and Biophysics. Cr. 1 Repeatable. Prereq: Permission of instructor. Graduate workshops in selected topics in biochemistry and biophysics. Credit in this course does not meet the requirement for advanced graduate electives in Biochemistry.

Courses for graduate students

BBMB 615. Molecular Immunology. (Cross-listed with Micro, V MPM). (3-0) Cr. 3 Alt. F, offered 2009. Prereq: BBMB 405 or 502. Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

BBMB 622. Carbohydrate Chemistry. (2-0) Cr. 2 Alt. S., offered 2010. Prereq: 404 or 501. Structure, occurrence, properties, function, and chemical and enzymatic modifications of monosaccharides, oligosaccharides, polysaccharides, and glycoproteins.

BBMB 645. Molecular Signaling. (2-0) Cr. 2 Alt. S., offered 2011. Prereq: 405, 420, or 502. Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, and nuclear receptors. Discussion includes a variety of cell surface receptors and their hormone: growth factor and extracellular matrix activators; protein kinases; caspase and transcription factor downstream signals; lipids, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and research proposal writing.

BBMB 661. Current Topics in Neurobiology. (Cross-listed with Neuro, GDCB). Cr. 1 Repeatable. Prereq: Permission of instructor. Topics may include communication, neurotransmitters, neuropeptide interactions, synaptic transmission, membrane receptors, neurotransmitters, neuromodulation and neuropharmacology.

BBMB 675. Nucleic Acid Structure and Function. (2-0) Cr. Pr. 405 or 502. In-depth discussion of nucleic acid properties, structures and structure/ function relationships. Interactions between nucleic acids and proteins will be emphasized.

BBMB 676. Biochemistry of Gene Expression in Eucaryotes. (Cross-listed with MCD). (2-0) Cr. 2 Alt. S., offered 2010. Prereq: 404 or 501, 405 or 502 or GDCB 511. Analysis of the biochemical processes involved in expression of eucaryotic genes and the regulation thereof, including RNA polymerase, transcriptional regulatory proteins, enhancers and silencers, chromosome structure, termination, RNA processing, RNA transport, RNA turnover, small RNAs, translational regulation, protein turnover.

BBMB 681. Advanced Seminar. (1-0) Repeatable. F.S. Prereq: Permission of instructor. Student presentations.

BBMB 682. Departmental Seminar. Cr. R. FS. Prereq: Permission of instructor. Staff and visitor research.

BBMB 696. Research Seminar. (Cross-listed with Agron, GDCB, PigBio, Hort, Forl. Cr. 1 Repeatable. Research seminars by faculty and graduate students. Satisfactory-fail only.

BBMB 698. Seminar in Molecular, Cellular, and Developmental Biology. (Cross-listed with MCBDB, GDCB, Micro, V MPM). (2-0) Cr. 1 arr. Repeatable. F.S. and Student and faculty presentations.

Bioengineering

http://www.eng.iastate.edu/bioengineering/

Minor administered by the College of Engineering

Supervisory Committee: P. Reilly (Chair), A. Bastavros, T. Kim, H. van Leeuwen, S. Pandey, G. Mirka, L. Genalo, P. Shrotriya

The bioengineering minor at Iowa State University is an interdisciplinary program that complements a student’s major discipline by providing additional insight into the interactions between various engineering disciplines and biological systems, emphasizing new ways of solving biological problems. The program provides students with unique educational experiences to apply engineering skills and create new biobased products and devices.

Undergraduate Study

The program is open to all undergraduate engineering students at Iowa State University. This minor will provide students with a foundation of core Bioengineering knowledge, on which tracks will be superimposed to provide in-depth exposure to targeted areas of specialization. In addition to the core courses—BioE 201 and 202—students will complete coursework identified in the following tracks:

Bioinformatics and Systems Biology: BioE 325, BCB 211, 401, 402, and 442.

Biomaterials and Biomechanics: BioE 352, Ch E 440, Ex Sp 355, and Mat E 456.

Courses primarily for undergraduate students

Undergraduate engineering students can satisfy the minor in bioengineering by completing a total of 15 credits: 6 from the core curriculum and 9 from the specialized tracks. Students can either choose to specialize in a particular track shown above or use courses from all tracks from which to draw their set of courses. The minor must include at least nine credits which will be used to meet curriculum requirements for the bachelors of science degree in engineering.
Students are strongly encouraged to consult either their undergraduate academic advisor or a member of the supervisory committee for assistance during the application process.

BioE 201. Introduction to Bioengineering I. (3-0) Cr. 3. Prereq: Chem 167 An exploration of cell structure and function, cellular metabolism, types of life forms, energy transport and use, biomolecule structure and function, and genetics, with strong Mathematical emphasis.

BioE 341. BioMEMs and Nanotechnology. (3-0) Cr. 3. Prereq: 202 Overview of Micro-Electro-Mechanical-System (MEMS) technologies for bioengineering, fundamentals of microfluidic device design, fabrication, and characterization, survey of microfluidic functional building blocks for lab-on-a-chip applications including mixers, valves, channels, and chambers. Topics of nanotechnology in bioengineering, nanoscale building block technologies for bioengineering including self-assembling, surface chemical treatment, nano-imprinting, nano-particles, nano-tubes, nano-wires, and stimuli-responsive biomaterials.

BioE 352. Molecular, Cellular and Tissue Biomechanics. (3-0) Cr. 3. Prereq: 201, E M 324, Mat E 272. Introduction to the anatomy of the musculoskeletal system and connective tissue. Range of movement, joint dislocation, bone deformity and fracture. Application of continuum mechanics to both living and non-living systems. Free-body diagrams and simple force analysis of musculoskeletal system, biomechanical response of soft and hard tissues with emphasis on microstructure and mechanical properties. Applications to bioengineering design.

BioE 411. Bioprocessing and Bioprocesses. (Cross-listed with A E, BSE, C E, (3-0) Cr. 3. F. Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner or graduate classification. The lowest grade acceptable in Engl 150, 250 or 250H, and an additional English requirement of the LAS college are met by participation in this field that requires students to achieve a high level of competence not only in biology, but also in mathematics, computer science, and statistics. As a result, the program includes a number of different disciplines. Graduates demonstrate an above-average ability to synthesize methods from these different disciplines to solve problems.

In addition to basic degree requirements listed in the Curriculum in Liberal Arts and Sciences (www.las.iastate.edu/academics/generaleducation), the lowest grade acceptable in Engl 150, 250 or 250H is C.

Courses primarily for undergraduate students

BCBio 110. BCBio Orientation. (1-0) Cr. 0.5. F. First 8 weeks. Introduction to the area of bioinformatics and computational biology. For students considering a major in BCBio. Specializations and career opportunities. Satisfactory-fail only.

BCBio 211. Introduction to Bioinformatics and Computational Biology. (3-0) Cr. 3. S. Overview of bioinformatics and computational biology. Database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

BCBio 490. Independent Study. Cr. arr. Repeatable. F.S.S. Prereq: BCBio 211, junior or senior classification, permission of instructor. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBio 490 and 491 toward graduation.

BCBio 491. Team Research Projects.. Cr. arr. Repeatable. Prereq: BCBio 211, junior or senior classification, permission of instructor. Research projects in bioinformatics and computational biology. Database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics. Students in the College of Liberal Arts and Sciences may use no more than 9 credits of BCBio 490 and 491 toward graduation.

Bioinformatics and Computational Biology

www.bcb.iastate.edu/bcb/

Chair: C. Tuggle

Associate Chair: V. Brendel

Supervisory Committee: C. Tuggle, V. Brendel, J. Dickerson, D. Dobbs, X. Huang, Z. Wu, R. Kernig (ex-officio), S. Aluru (former chair)

3-9 credits to be chosen from the following list:

BC 495, 539, 542, 548, 549, 550, 551, 593, 594, 596, 597; Phys 227; BMB 404, 405; Bio 315, 423, 462, 465, 472; Gen 340, 410; Stat 342, 402, 416, 432; Com S and Cpr E courses at the 300 level and above; Math (266 or 267), 304, 314, 385, 471, 481.

D. The communications and English proficiency requirements of the LAS college are met by Engl 150, 250 or 250H, and an additional English writing course chosen from Engl 309 or Engl 314. The lowest grade acceptable in Engl 150, 250 or 250H is C.
Undergraduate Study

Undergraduates seeking a B.S. in Bioinformatics and Computational Biology should enroll in the undergraduate major BCBio, which is described in a separate section of this catalog. See Index: BCBio.

Undergraduates wishing to prepare for graduate study in Bioinformatics and Computational Biology should consider the undergraduate major in BCBio. They should also elect courses in basic biology, basic transmission and molecular genetics, chemistry, physics, mathematics at least through calculus, statistics, and computer programming.

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Bioinformatics and Computational Biology (BCB). Faculty are drawn from several departments: Agronomy and Animal Sciences; Astronomy and Physics; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Computer Science; Ecology, Evolution, and Organismal Biology; Electrical and Computer Engineering; Genetics, Development and Cell Biology; Industrial Manufacturing and Systems Engineering; Materials Science and Engineering; Mathematics; Plant Pathology; Statistics; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The BCB program emphasizes interdisciplinary training in nine related areas of focus: Bioinformatics, Computational Molecular Biology, Structural and Functional Genomics, Macromolecular Structure and Function, Metabolic and Developmental Networks, Integrative Systems Biology, information Integration and Data Mining, Biological Statistics, and Mathematical Biology. Additional information about research areas and individual faculty members is available at: www.bcb.iastate.edu.

BCB students are trained to develop an independent and creative approach to science through an integrative curriculum and thesis research projects that include both computational and biological components. First year students are appointed as research assistants and participate in BCB 697 (Graduate Research Rotation), working with three or more different research groups to gain exposure in both “wet” (biological) and “dry” (computer) laboratory environments. In the second year, students initiate a thesis research project under the joint mentorship of two BCB faculty mentors, one from the biological sciences and one from the quantitative/computational sciences. The M.S. and Ph.D. degrees are usually completed in two and five years, respectively.

Before entering the graduate BCB program, prospective BCB students should have taken courses in mathematics, statistics, computer science, biology, and chemistry. A well-prepared student will have taken calculus (through multivariable calculus, such as Math 265), a calculus-based introduction to probability and Statistics (like Stat 341), two semesters of computer programming (like Com S 207 and 208), one semester of discrete structures (like Com S 330 or Cpr E 310), some physical and organic chemistry (like Chem 163 and 221), biochemistry (like BBMB 501), genetics (like Biol 313), and evolution (like Biol 315).

During the first year, BCB students are required to address any background deficiencies in calculus, molecular genetics, computer science, statistics and discrete structures, with specific courses determined by prior training. Among the total course requirements for Ph.D. students are four core courses in Bioinformatics (BCB 567, 568, 569, and 570), one core course in Molecular Genetics (GDCB 511), and background courses in statistics and computer science. Students make research presentations (BCB 690), attend faculty research seminars (BCB 691), and participate in work shops/symposia (BCB 590). M.S. students take the above-mentioned core courses, take at least 12 credits of advanced coursework, and may elect to participate in fewer seminars and workshops. Additional coursework may be selected to satisfy individual interests or recommendations of the Program of Study Committee. All graduate students are encouraged to teach as part of their training for an advanced degree. (For curriculum details and sample programs of study, see: www.bcb.iastate.edu.)

Courses primarily for undergraduate students

BCB 444. Introduction to Bioinformatics. (Dual-listed with 544.) (Cross-listed with Com S, Cpr E, Gen, Biol). (4-0) Cr. 4. F. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics. Nonmajor graduate credit.

BCB 495. Molecular Biology for Computational Scientists. (Cross-listed with Gen). (3-0) Cr. 3. F. Survey of molecular cell biology and molecular genetics for nonbiologists, especially those interested in bioinformatics and related fields. Basic cell structure and function; principles of molecular genetics; biosynthesis, structure, and function of DNA, RNA, and proteins; regulation of gene expression; selected topics. Provides biological background for BCB 594. Credit for graduation will not be allowed for more than one of Gen 411 and Gen/BCB 495. Nonmajor graduate credit.

Courses primarily for graduate students, open to qualified undergraduate students

BCB 538. Computational Genomics and Evolution. (Cross-listed with GDCB). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: Biol 313. Introduction to evolutionary sequence analysis at the genome level. Topics include sequence alignment, phylogenetic inference, molecular clock analysis, ancestral state inference, sequence/structure relation, functional divergence and prediction, evolutionary development, genome duplication, and comparative genomics. Focus will be on data analysis and biological interpretation.

B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. (S.S.)

C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)

D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transfor mants. (S.)

E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F)

BCB 544. Introduction to Bioinformatics. (Dual-listed with 444.) (Cross-listed with Com S, Cpr E, GDCB). (4-0) Cr. 4. F. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

BCB 549. Advanced Algorithms in Computational Biology. (Cross-listed with Cpr E, Com S). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Com S 311 and either 208 or 228. Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

BCB 550. Evolutionary Problems for Computational Biologists. (Cross-listed with Com S). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Com S 311 and some knowledge of programming. Discussion and analysis of basic evolutionary principles and the necessary knowledge in computational biology to solve real world problems. Topics include character and distance based methods, phylogenetic tree distances, and consensus methods, and approaches to extract the necessary information from sequence-databases to build phylogenetic trees.

BCB 551. Computational Techniques for Genome Assembly and Analysis. (Cross-listed with Com S). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Com S 311 and some knowledge of programming. Huang. Introduction to practical sequence assembly and comparison techniques to solve the global alignment, local alignment, overlapping alignment, banded alignment, linear-space alignment, word hashing, DNA-protein alignment, DNA-cDNA alignment, comparison of two sets of sequences, construction of contexts, and generation of consensus sequences. Focus on development of sequence assembly and comparison programs.

BCB 590, Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor.

BCB 593, Workshop in Bioinformatics and Computational Biology. (1-0) Cr. 1. Repeatable. F.S. Current topics in bioinformatics and computational biology research. Lectures by off-campus experts. Students read background literature, attend preparatory seminars, attend all lectures, meet with lecturers.

BCB 596, Genomic Data Processing. (Cross-listed with Com S, GDCB). (3-0) Cr. 3. S. S. Prereq: Some knowledge of programming. Study the practical aspects of genomic data processing with an emphasis on hand-on projects. Students will carry out major data processing steps using bioinformatics tools. Topics include base-calling, raw sequence cleaning and contamination removal, shotgun assembly procedures and EST clustering methods, genome closure strategies and practices; sequence homology search and function prediction; annotation and submission of GenBank records; and data collection and dissemination through the Internet. Useful post-genomic topics like microarray design and data analysis will also be covered.

BCB 597, Introductory Computational Structural Biology. (Cross-listed with Math). (3-0) Cr. 3. S. S. Prereq: Math 561 and 562. Mathematical and computational approaches to protein structure prediction and determination. Topics include molecular distance geometry, potential energy minimization, and molecular dynamics simulation.

BCB 599, Creative Component. Cr. arr.

Courses for graduate students

BCB 690, Student Seminar in Bioinformatics and Computational Biology. Cr. 1. Repeatable. S. Student research presentations.

BCB 691H, Faculty Seminar in Bioinformatics and Computational Biology. (Cross-listed with GDCB). (1-0) Cr. 1. Repeatable. Faculty research series.

H. Bioinformatics and Computational Biology. (Same as GDCB 691H).

BCB 697, Graduate Research Rotation. Cr. arr. F.S.SS. Graduate research projects performed under the supervision of selected faculty members in the Bioinformatics and Computational Biology major.

BCB 699, Research. Cr. arr. Repeatable.

Biological/ Preclinical Illustration

www.bpmi.iastate.edu

(Interdepartmental Undergraduate Program)

Program Committee: Lynn G. Clark, Chair; Dean Biehler, John Dorn, Stanley W. Harpole, Steven M. Herrnstadt, Harry Horner, Don Sakaguchi.

Undergraduate Study

The interdepartmental undergraduate BCI I major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of “communicating science through art,” the major prepares students for careers in biological illustration or for graduate education in medical illustration elsewhere. Graduates enter fields such as biocommunications, environmental display design, free-lance illustration, museum display design, and various careers in the publishing industry.

Entrance into the BCI I program is by application to the BCI I Advisory Committee. Eligibility is based on an academic standard of at least 2.00 CGPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or other art work. Freshmen and transfer students usually declare pre-BCI I as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

To earn the B.A. degree offered by the College of Liberal Arts and Sciences, students must complete the general education requirements in that college and take at least 41 credits in design and 32 credits in the biological sciences. Design courses include: Dan S 131 and Art 239, ArtS 231, 308, and 330, BCI I 233, 236, 237, 337, and 497 plus 12 credits chosen from a list of approved upper level courses in art and design. Biological science courses include: LAS 101, Biol 211, 211L, 212L, 255, 256, 351, Biol 356 or 366 or 454, and at least 9 credits chosen from a list of approved biological science courses. Chemistry and Mathematics are also required as supporting courses. Students must earn a grade of C- or better in all art and science courses included in the major and must earn a cumulative GPA of 2.00 in both categories. A brochure is available in 102 Catt Hall that gives a detailed listing of the requirements.

Communication Proficiency Requirement. Students must earn a minimum of C in both English 150 and 250 or equivalent composition courses and in one advanced writing course numbered Engl 302 through 316.

Students in BCI I must complete a senior project or an internship experience (BCI I 497) in which they design and produce artwork that is suitable for publication or public display.

A minor in biological illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological sciences courses and 9 credits in art and design courses. The biological sciences must include Biol 211, 211L, 212, and 212L. The art and design courses must include BCI I 323 and 337, and an advanced drawing, illustration, electronic media, or painting course. For more information, contact the BCI I advisor in 102 Catt Hall or view the website listed above.

Courses primarily for undergraduate students

BCB 132, Scientific Illustration Principles and Techniques. (Cross-listed with ArtIS). (0-4) Cr. 3. Repeatable. F. Prereq: 6 credits in art and design and 3 credits in biological sciences. Studio basics and professional techniques in black & white, continuous tone, and color. Emphasis on tools, materials, and rendering.

BCB 137, Illustration as Communication. (Cross-listed with ArtIS). (0-4) Cr. 3. F. S. S. Prereq: 326. Studio problems in illustration emphasizing composition and communication. Problem solving methodologies.

BCB 137, Application of Scientific Illustration Techniques. (Cross-listed with ArtIS). (0-4) Cr. 3. Repeatable. S. Prereq: 327 Rendering techniques applied to different types of biological and scientific subjects emphasizing communication. The use of traditional and digital media. Term project required.

BCB 139, Field Illustration. Cr. arr. Repeatable. S.S. Prereq: Permission of instructor. A combination seminar and field trip course emphasizing nature interpretation, field sketching techniques and preparation of a final illustration based on field experience.

BCB 139, Cooperative Education. Cr. R. F. S. S. Prereq: Permission of the program cooperative education coordinator, junior classification. Required of all cooperative education students. Students must register for these courses prior to commencing each work period.

BCB 143LI, Illustrating Nature I Sketching. (Cross-listed with la LL). Cr. 2. S. S. Sketching plants, animals and terrain. Visual communication, development of a personal style, and integration of typographic and visual elements on a page will be emphasized.

BCB 143LI, Illustrating Nature II Photography. (Cross-listed with la LL). Cr. 2. S. S. Beginning to intermediate technical and compositional aspects of color photography of natural areas and their plants and animals.

BCB 1490, Independent Study. Cr. arr. Repeatable. Prereq: Written approval of instructor and advisory committee chair on required form in advance of semester of enrollment.

BCB 1494, Special Topics in Illustration. Cr. arr. Repeatable. Intensive exploration of illustration techniques in a studio or field setting.

BCB 1497, Illustration Internship. Cr. arr. Repeatable. Prereq: Junior or senior classification in BCI I, written approval of supervising instructor and advisory committee chair on required form in advance of semester of enrollment. Satisfactory-fail only.

Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering

Rameshwar Kanwar, Chair of Department

Distinguished Professor: Brown

Distinguished Professor (Emeritus): H. Johnson

University Professor: Bern

University Professor (Emeritus): Baker

Professors: Chen, Downing, Glanville, Harmon, Hoff, Hurburgh, L. Johnson, Kanwar, Misra, Schwab, Van Leeuwen, Xin

Professors (Emeritus): Beer, Bekkum, Buchele, Bundy, Hazen, Hoerner, Kenney, Lovely, Maney, Mangold, Marley, Melvin, Miller, Pedersen, Riley, R. Smith
Courses primarily for undergraduate students

BSE 110. Experiencing Biological Systems Engineering. (0-2) Cr. 1. S. Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of biological systems engineering. Report writing, co-op or internship, careers, registration planning.

BSE 216. Fundamentals of Agricultural and Biosystems Engineering. (Cross-listed with A E). (2-2) Cr. 3. S. Prereq: A E 110, Engr 160, credit or enrollment in Math 166. Application of mathematics and engineering sciences to mass and energy balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of heat and mass transfer, air and water vapor systems; animal production systems, grain systems; food systems, hydrologic systems, and bioprocessing.

BSE 301. Leadership and Ethics Seminar. (Cross-listed with A E, TSM). (1-0) Cr. 1. F. Prereq: 201. 8 week course. Leadership and ethics experiences, through case studies and seminar presentations by practitioners. Relationship of workplace competencies to leadership and ethics; portfolios.

BSE 380. Principles of Biological Systems Engineering. (3-0) Cr. 3. S. Prereq: 216, Ch 357 or M E 436. Unit operation analysis of biological systems, through the study of mass, energy, and information transport in bioreactor production and conversion systems. Quantification and modeling of biomass production, ecological interactions, and bioreactor operations.

BSE 411. Bioprocessing and Bioproducts. (Dual-listed with 511). (Cross-listed with A E, BioE, C E). (3-0) Cr. 3. F. Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production, Taxonomy; kinetics, metabolism, aerobic and anaerobic fermentation, biofuels, bioenergy and coproducts. Mass-energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

BSE 416. Agricultural Engineering Design II. (Cross-listed with A E). (1-2) Cr. F. Prereq: 415. Selection of promising solutions to design problems identified in 415 for development by design teams. Presentation of designs through oral and written reports and prototypes. Nonmajor graduate credit.

BSE 480. Engineering Analysis of Biological Systems. (Dual-listed with 580). (Cross-listed with EnSc). (2-2) Cr. 3. F. Prereq: 216; Math 266; Biol 211 or 212; M E 330. Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues.

BSE 511. Bioprocessing and Bioproducts. (Dual-listed with 411). (Cross-listed with A E, BRT, C E). (3-0) Cr. 3. F. Prereq: A E 216 or equivalent, Math 160 or 165, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production, Taxonomy; kinetics, metabolism, aerobic and anaerobic fermentation, biofuels, bioenergy and coproducts. Mass-energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

BSE 580. Engineering Analysis of Biological Systems. (Dual-listed with 480). (Cross-listed with EnSc). (2-2) Cr. 3. F. Prereq: 216; Math 266; Biol 211 or 212; M E 330. Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues. Students enrolled in A E 580 will be required to answer additional exam questions and report on two journal articles.

BSE 585. Engineering Design of Biological Systems. (Dual-listed with 480). (Cross-listed with EnSc). (2-2) Cr. 3. F. Prereq: 216; Math 266; Biol 211 or 212; M E 330. Systems-level engineering design of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Prototypes. Nonmajor graduate credit.

BSE 597. Special Topics. (1-2) Cr. 2. S. F. Prereq: 585 or 580. Topics of current interest. Nonmajor graduate credit.

BSE 598. Research. (1-2) Cr. 2. F. S. Prereq: 585 or 580. Research in areas of particular interest to the student. Nonmajor graduate credit.
the biology major. Courses in field and aquatic biology are offered at the Iowa Lakeside Laboratory. Courses in marine biology can be taken at the Gulf Coast Research Laboratory in Mississippi. Iowa State University is a member of the Organization for Tropical Studies, and students may take courses at the organization’s field station in Costa Rica. Courses taught at field stations associated with other universities throughout the country may also be applied to the degree. Attending a summer field station adds an important component to an undergraduate program of study.

**Courses Offered at Iowa Lakeside Laboratory at Milford, Iowa**

Iowa Lakeside Lab is an Iowa Regents facility located at Lake Okoboji in northwest Iowa where various summer courses in field and aquatic biology are offered. Any of the following courses taken at the lab are directly applicable to the degree program in Biology. See the Iowa Lakeside Laboratory entry elsewhere in the catalog for a full description of the courses.

**Courses offered at Gulf Coast Research Laboratory**

The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number Biol 480. Written permission of the Biology Program Director is required for this arrangement. Courses that are available each summer may be viewed at www.coms.usm.edu.

**Courses offered at Summer Biological Field Stations**

Courses taken at summer field stations may be transferred to Iowa State University as credit in Biol 481. Such Stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu for links to field Stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts.

**Courses offered by the Organization for Tropical Studies**

Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as Biology 482. For further information check www.ots.duke.edu or inquire in the Biology Program Office.

**Undergraduate research.** Students who have interest in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in Biol 490. Internship experiences are often available at other universities and at industrial or government laboratories. Students participating in such projects may receive internship credit in Biol 494. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education.

**International experience.** Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in Biol 394 or similar courses in other departmental courses. Students interested in studying abroad, attending a university in another country for up to a year as an exchange student. Minors in Emerging Global Disease, International Studies, or a foreign language can add an international emphasis to a degree in biology. Biology advisers are eager to help plan and arrange such experiences with interested students.

**Supporting course requirements.** Understanding the modern biological sciences requires an understanding of the physical and Mathematical sciences. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics are required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take: two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Students in the College of Liberal Arts and Sciences, must fulfill the foreign language and general education requirements listed elsewhere in this catalog for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college as listed elsewhere in the catalog.

Given the important role of writing in the modern sciences, biology majors must demonstrate English competency by earning a minimum of C in both English 150 and 250 or equivalent composition courses and in one advanced writing course numbered English 302 through 316, or BI MC 347.

**Customizing a degree.**

The advantage of choosing a biology major is the flexibility it allows in customizing a program of study to individual goals. That said, the faculty recognizes that many students studying biology have common goals. Consequently, the faculty has developed specific recommendations for students interested in pursuing the following areas of study:

**Teacher Licensure.** Biology majors seeking licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

**Premedical and Prehealth Professions Studies.** Biology majors who will go on to medical or health professional schools are urged to determine the entrance requirements for the institutions where they might study. A list of courses recommended for those who wish to pursue a pre-med curriculum is available in the Biology Program Office.

**Preveterinary Studies.** Many students whose goal is to attend a veterinary school require discussions about the biological sciences as their major. The requirements for entrance to the Iowa State Veterinary College are listed elsewhere in this bulletin and should be consulted as programs of study are planned.

**Preparation for Graduate Studies.** Students who are considering graduate school to further their education in a biological sciences should identify a faculty member who has similar interests. Faculty can mentor students as undergraduates providing a smooth transition to graduate school.

**Minor**

A minor in Biology is offered by the Biology Program. The minor requires 15 credits in Biology, and includes the completion of the specific courses listed below: Biol 211 and 211L, 212 and 212L, 7 and credits in biology courses numbered 300 or above. Nine (9) credits of the required courses must only apply to the minor. For more information, see the Biology Program Web Site, or contact the Biology, Environmental Science, and Genetics Student Services Office in 103 Bessey Hall.

**Graduate Study**

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neurosciences; Plant Physiology; Toxicology; Immunobiology; and Environmental Science are also available. (See Index.)

A non-thesis master’s degree in interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

**Courses primarily for undergraduate students**

Biol 101. Introductory Biology. (3-0) Cr. 3. F.S.S.S. Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Non-majors only. Only one of Biol 101 or 211 may count toward graduation.

Biol 110. Introduction to Biology. Cr. 0.5. F. Orientation to the scope of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Satisfactory-fail only.

Biol 111. Opportunities in Biology. (1-0) Cr. 0.5. S. Introduction to biological science disciplines and professional opportunities through faculty presentations which examine a variety of current research topics. Satisfactory-fail only.

Biol 155. Human Biology. (3-0) Cr. 3. F.S. A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science.

Biol 165. Field Botany. (2-4) Cr. 2. F.S.S. 8 weeks. Field and laboratory studies of plants in various local habitats. Includes trees, shrubs, flowering plants and other green plants, lichens and fungi. Not recommended for students with professional interest in plant science.

Biol 173. Environmental Biology. (Cross-listed with Env Sl. (3-0) Cr. 3. F.S. An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and the environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Non-majors only.

Biol 211. Principles of Biology I. (3-0) Cr. 3. F.S. Prereq: High school biology and chemistry or credit or enrollment in Chem 163 or 177. Introduction to the nature of life, including the cellular basis of life; the nature of heredity, evolution; diversity of microbial, plant, and animal life; and principles of ecology. Intended for life science majors. Only one of Biol 101 or 211 may count toward graduation.

---

**Index**
2009-2011
Biol 211L. Principles of Biology Laboratory I. (0-3)
Cr. 1. F.S. Prereq: Credit or enrollment in 211. Laboratory to accompany 211.
Biol 212. Principles of Biology II. (3-0) Cr. 3. F.S.
Prereq: 211. Introduction to the nature of life, including
the cellular basis of life; energy relationships; the
nature of heredity; evolution; form and function of
microbial, plant, and animal life.
Biol 212L. Principles of Biology Laboratory II. (0-3)
Cr. 1. F.S. Prereq: credit or enrollment in 212. Laboratory to accompany 212.
Biol 255. Fundamentals of Human Anatomy. (3-0)
Cr. 3. F. Prereq: high school biology and chemistry,
or Biol 101. An introduction to human anatomy,
beginning with cells and tissues, surveying all body
systems, relating form to function. Systems covered
include: integumentary, bones and joints, muscles,
nervous, sensory, endocrine, circulatory, lymphatic,
respiratory, digestive, urinary, and reproductive. PreMedical students should consider Biol 351 for their
anatomy background. Not intended for major credit
in biology.
Biol 255L. Fundamentals of Human Anatomy
Laboratory. (0-3) Cr. 1. F. Prereq: Credit or enrollment
in 255. Investigation of human anatomy using models
and dissections of preserved organs and model
mammals. Pre-Medical students should consider 351
for their anatomy background. Not intended for major
credit in biology.
Biol 256. Fundamentals of Human Physiology. (3-0)
Cr. 3. S. Prereq: high school biology and chemistry, or
Biol 101, or 255 (recommended). An introduction to
human physiology, studying the function of all body
systems. Systems covered include: integumentary,
bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic and immune, respiratory,
digestive, urinary, and reproductive. Pre-Medical
students should consider 335 for their physiology
background. Not intended for major credit in biology.
Biol 256L. Fundamentals of Human Physiology
Laboratory. (0-3) Cr. 1. S. Prereq: Credit or enrollment
in 256. Student-conducted experiments investigating
concepts of human physiology with computer data
acquisition and analysis. Interpretation of experimental results and preparation of lab reports. Pre-Medical
students should consider 335 for their anatomy and
physiology background. Not intended for major credit
in biology.
Biol 258. Human Reproduction. (Cross-listed with
W S). (3-0) Cr. 3. F. Prereq: Biol 101, or 155, or 211.
Anatomy and physiology of human reproductive systems, including fertility, pregnancy, and delivery.
Biol 305. Embryology. (2-0) Cr. 2. S. Prereq: 212. Basic principles and processes of development. Course
will cover classical as well as current aspects of developmental biology. Emphasis will be on vertebrate
model systems. Not acceptable for credit in the major
for Biology or Genetics major.
Biol 305L. Embryology Laboratory. (0-3) Cr. 1. S.
Prereq: Credit or enrollment in 305. Selected experiments demonstrating basic concepts in development.
Mixture of live embryo experiments and vertebrate
developmental anatomy.
Biol 306. Metabolic Physiology of Mammals.
Cr. 3. Prereq: 211, 212. Introduction to physiology of
metabolic function in mammals and other animals.
Metabolic processes and their interactions with
various subsystems, approached form an organismal
perspective. Integration of cellular, gastrointestinal,
cardiovascular, respiratory, and renal processes,
relevant to their control and integration at the nervous
and endocrine system levels. Functional aspects of
organismal physiology; energy and water balances,
physiology of rest exercise, and environmental stress.
Students cannot receive credit for both Biol 306 and
Biol 335
(Cross-listed with W S). (3-0) Cr. 3. F. Prereq: a 200
level course in science, engineering or women’s studies; Engl 250. The interrelationships of women and

Biology
science and engineering examined from historical,
sociological, philosophical, and biological perspectives. Factors contributing to underrepresentation;
feminist critiques of science; examination of successful strategies.
(3-3) Cr. 4. F.SS. Prereq: 211L and 212L. Fundamental
concepts and principles of ecology dealing with organisms, populations, communities and ecosystems.
Laboratory and field exercises examine ecological
principles and methods as well as illustrate habitats.
Biol 313. Principles of Genetics. (Cross-listed with
Gen). (3-0) Cr. 3. F.S. Prereq: 211, 211L, 212, and 212L.
Introduction to the principles of transmission and
molecular genetics of plants, animals, and bacteria.
Recombination, structure and replication of DNA,
gene expression, cloning, quantitative and population
genetics. Students may receive graduation credit for
no more than one of the following: Gen 260, Gen 313
and 313L, Gen 320, Biol 313 and 313L, and Agron
320.
Biol 313L. Genetics Laboratory. (Cross-listed with
Gen). (0-3) Cr. 1. F.S. Prereq: Credit or enrollment in
313. Laboratory to accompany 313. Students may
receive graduation credit for no more than one of the
following: Biol 313 and 313L, Gen 260, Gen 313, Gen
320, and Agron 320.
Biol 314. Principles of Molecular Cell Biology. (3-0)
Cr. 3. F.S. Prereq: Biol 313. Integration of elementary
principles of metabolism, bioenergetics, cell structure
and function to develop a molecular view of how the
cell works.
Biol 314L. Molecular Cell Biology Laboratory. (0-3)
Cr. 1. F.S. Prereq: Credit or enrollment in 314. Laboratory to accompany Biology 314.
Biol 315. Biological Evolution. (3-0) Cr. 3. F.S.
Prereq: 313. The mechanisms of evolution. Topics in
microevolution: population genetics, natural selection,
genetic variation, and adaptation. Macroevolution:
speciation, extinction, phylogeny, and major evolutionary patterns.
Biology 328. Cell Physiology of Human Diseases. (3-0)
Cr. 3. Prereq: 212. Survey of macromolecular and ultrastructural organization of animal cell and membrane
structures, including recent molecular discoveries in
areas of genomics and proteomics involved with cell
growth and cell interactions. Emphasis on selected
topics of cellular functions with known human
disease states.
Biol 330. Principles of Plant Physiology. (3-0)
Cr. 3. Prereq: Biol 313 or Gen 320; Biol 314 or BBMB
301; Chem 231 or 332; Phys 106 or 111. An overview
of classical and current concepts, principles and
approaches regarding the basic mechanisms of plant
function underlying growth, development and survival
of plants. Topics covered include environmental and
developmental signals, plant hormone action, signal
transduction, mineral nutrition, water relations, metabolism and photosynthesis..
Biol 330L. Principles of Plant Physiology Laboratory. (0-3) Cr. 1. Prereq: Credit or enrollment in 330.
Laboratory to accompany Biol 330. Experiments and
explorations illustrating fundamental principles of
plant physiology. Nonmajor graduate credit.
Biol 335. Principles of Animal Physiology. (3-3)
Cr. 4. F.S. Prereq: Biol 314. Introduction to systemic
functions with emphasis on mammals. Nonmajor
graduate credit.
Biology 336. Ecological and Evolutionary Animal
Physiology. (3-0) Cr. 3. Prereq: 211, 212. Study of
mechanisms by which animals perform life-sustaining
functions; the evolution and adaptive significance of
physiology traits, the diversity of physiological mechanisms, and how physiology and ecology interact.
Biol 351. Comparative Chordate Anatomy. (3-4)
Cr. 5. S. Prereq: 212, junior classification. The evolution of chordates as reflected in the anatomy of
extinct and living forms. Lecture topics include the
history and diversity of chordates; comparisons of

157

anatomic structures among major groups, the adaptive significance of anatomic structures. Laboratory
involves dissection of representative species.
Biol 352. Vertebrate Histology. (3-3) Cr. 4. S. Prereq:
212. Microscopic structure of vertebrate tissues and
organs, with an introduction to histological techniques.
Biol 353. Introductory Parasitology. (Cross-listed
with Micro). (3-3) Cr. 4. F. Prereq: Biol 212. Biology
and host-parasite relationships of major groups of
animal parasites, and techniques of diagnosing and
studying parasites.
Biol 354. Animal Behavior. (3-0) Cr. 3. F. Prereq:
212. Ethological and Sociobiological approaches to
animal behavior. Genetic and developmental aspects
of behavior, biological rhythms, orientation (including
navigation, migration), communication, and social
behavior (mating, aggression, parental care).
Biol 354L. Laboratory in Animal Behavior. (0-3)
Cr. 1. F. Prereq: Credit or enrollment in Biol 354. Laboratory techniques for observation, description and
analysis of animal activities; independent projects.
Biol 355. Plants and People. (3-0) Cr. 3. S. Prereq:
Credit in 211 and 211L. Uses of plants and fungi by
humans and the importance of plants in the past,
present and future. Discussion of fruits, vegetables,
grains, herbs, spices, beverages, oils, fibers, wood,
medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern Societies. Emphasis on origins and worldwide diversity of
culturally important plants, their characteristics, and
uses.
Biol 356. Dendrology. (Cross-listed with For). (2-4)
Cr. 4. F. Prereq: Biol 211. Identification and ecology of
North American woody plant species. Importance of
woody plants in timber production and wildlife habitat.
Natural disturbances, human impacts, management
and restoration concerns for major North American
forest regions will be addressed. Nonmajor graduate
credit.
Biol 364. Invertebrate Biology. Cr. arr. F. Prereq:
Biol 212. Emphasis on diversity, development,
physiology and behavior of invertebrate organismsthe “spineless wonders” of the world. Laboratory
involves hands-on study and investigation of living
invertebrates.
Biol 365. Vertebrate Biology. (Cross-listed with
A Ecl). (3-2) Cr. 4. F. Prereq: 212, 212L. Evolution,
biology, and classification of fish, amphibians, reptiles,
birds, and mammals. Emphasis on a comparative
analysis of the structure and function of organ Systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.
Biol 366. Plant Systematics. (2-4) Cr. 4. S. Prereq:
211. Introduction to plant phylogenetic systematics,
plant classification, survey of flowering plant families,
identification and field study of local plants.
Biol 371. Ecological Methods. (Cross-listed with
A Ecl). (2-2) Cr. 3. F. Prereq: 312; Stat 101 or 104.
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations. Nonmajor
graduate credit.
Biol 381. Environmental Systems I: Introduction
to Environmental Systems. (Cross-listed with
EnSci, Env S, Micro). (2-4) Cr. 4. F. Prereq: 12 credits
of natural science including Biology and chemistry.
Introduction to the structure and function of natural
environmental systems. Systems approach to the
analysis of material and energy flows in natural environmental systems and the primary environmental
factors controlling these systems. Nonmajor graduate
credit.
Biol 382. Environmental Systems II: Analysis of
Environmental Systems. (Cross-listed with EnSci).
(2-4) Cr. 4. S. Prereq: EnSci 381. Continuation of EnSci
381. Systems approach to the analysis of material and
energy flows in natural environmental systems and
the primary environmental factors controlling these
systems. Nonmajor graduate credit.



A. Pre-trip Seminar. Cr. 1. Discussion of relevant biological and cultural topics during semester preceding trip.
B. Field trip. Cr. 1 to 3. Trip to North American location under supervision of faculty member. Report required.

Biol 394. International Field Trips in Biology. Cr. arr. Repeatable. Prereq: Two courses in the biological sciences and by approval of application. Extended field trips, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.

A. Pre-trip Seminar. Cr. 1. Discussion of relevant biological and cultural topics during semester preceding trip.
B. Field trip. Cr. 1 to 3. Trip to international location under supervision of faculty member. Report required. Offered on a satisfactory-fail grading basis only.

Biol 423. Developmental Biology. (3-0) Cr. 3. S. Prereq: Biol 313. Principles of embryogenesis and animal development. Establishment of body axes, organ and limb development, and specification of cell fates. Emphasis on cell signaling and the control of gene expression within the context of a developing organism. Medically relevant subjects will be discussed, including stem cells, cancer biology, fertilization, and cloning.

Biol 423L. Developmental Biology Laboratory. (0-0) Cr. 1. S. Prereq: Credit or enrollment in 423. Experiments and explorations illustrating fundamental principles of multicellular development.

Biol 426. Topics in Cell Biology. (3-0) Cr. 3. S. Prereq: 314. Selected topics on biological organization and function at the cellular level. Emphasis on biomembranes. Nonmajor graduate credit.

Biol 436. Neurobiology. (3-0) Cr. arr. F. Prereq: Biol 335 or Psych 310; physics recommended; permission of instructor to enroll in lab. (3-0) for 4 cr. Integration, coding, plasticity, and development in nervous systems. Nonmajor graduate credit.

Biol 436L. Neurobiology Laboratory. (0-0) Cr. 1. F. Prereq: Credit or enrollment in 436; permission of instructor to enroll in lab. Laboratory experimentation and demonstrations on integration, coding plasticity, and development in nervous systems. Nonmajor graduate credit.

Biol 444. Introduction to Bioinformatics. (Cross-listed with BCB, Com S, Cpr E, Gen.) (4-0) Cr. 4. F. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological topics. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics. Nonmajor graduate credit.

Biol 457. Herpetology. (Cross-listed with A Ecl.) (2-3) Cr. 3. F. Prereq: A Ecl 365 or Biol 351. Dual-listed with EEB 557. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuataras, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

Biol 458. Ornithology. (Cross-listed with A Ecl.) (2-3) Cr. 3. S. Prereq: A Ecl 365 or Biol 351. Dual-listed with EEB 558. Biology, ecology, evolution, and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

Biol 462. Evolutionary Genetics. (Cross-listed with Gen.) (3-0) Cr. 3. S. Prereq: Biol 315. The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change. Nonmajor graduate credit.

Biol 471. Introductory Conservation Biology. (3-0) Cr. 3. Prereq: Biol 312. Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

Biol 472. Community Ecology. (2-2) Cr. 3. S. Prereq: Biol 312. The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertibrates, and vertebrates. Nonmajor graduate credit.

Biol 480. Studies in Marine Biology. Cr. arr. Repeatable. Courses taken at Gulf Coast Research Laboratory and other marine biological Stations are transferred to Iowa State University under this number.

Biol 481. Summer Field Studies. Cr. arr. Repeatable. Courses taken at summer biological field Stations are transferred to Iowa State University under this number. See www.biology.iastate.edu for links to field Stations located in different biomes: coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mountains.

Biol 482. Tropical Biology. Cr. arr. Repeatable. Prereq: One year of college biology; knowledge of Spanish desirable but not required. Students registering for courses taught by the Organization for Tropical Studies will receive credit for this ISU course when requesting a transfer of credits.

Biol 486L. Aquatic Ecology Laboratory. (Cross-listed with A Ecl, EnSci.) (0-0) Cr. 1. F. Prereq: Concurrent enrollment in 486. Dual-listed with EEB 586L. Field trips and laboratory exercises to accompany 496. Hands-on experience with aquatic research and monitoring techniques and concepts. Nonmajor graduate credit.

Biol 487. Microbial Ecology. (Cross-listed with EnSci, Micro.) (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

Biol 490. Independent Study. Cr. arr. Repeatable. Prereq: $8 credits in biology and permission of instructor. Research opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and of those, only 6 credits may be applied to the major.

I. Iowa Lakeside Laboratory. (Same as La LL 490) Cr. 1 to 4 each time taken. See Iowa Lakeside Laboratory.

R. Biological research. Cr. 1 to 6 each time taken. For students registering to work on an independent research project under the direction of a faculty member.

Biol 491. Laboratory Teaching Experience. Cr. arr. Repeatable. Prereq: Permission of supervising staff. For students registering to be undergraduate laboratory assistants. Satisfactory-fail only.
Biol 494. Biology Internship. Cr. arr. Repeatable. Prereq: 8 credits in biology and permission of instructor. Intended to provide credit for significant professional experiences in biological sciences. A written proposal is required prior to registration. Intended for Biology majors.

Biol 495. Undergraduate Seminar. Cr. arr. Repeatable. F.S. Prereq: 15 credits in biological science. permission of instructor. Content varies from year to year and may include detailed discussion of special topics in biology, current issues in biology, or careers in biology.

Biol 498. Cooperative Education. Cr. R. Repeatable. F.S.SS. Prereq: Junior classification and permission of the department cooperative education coordinator. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

**Biomedical Sciences**

James Bloedel, Chair of Department

Distinguished Professors: Anderson, Kanthasamy

Distinguished Professors (Emeritus): Christensen, Dillmann

University Professor: Draper

University Professors (Emeritus): Adams, Reece

Professors: Bloedel, Evans, Franke, Goff, Hsu, King, Lin, Martin, Nara, Riedesel, Sharp, Umemura, Ware

Professors (Emeritus): Ahrens, Bal, Carithers, Dyer, Engen, Ghoshal, Randic

Associate Professors: Bracha, Carlson, Day, Jef tinia, Millman, Sakaguchi, Singh

Associate Professors (Collaborators): Hamouche, Kangas, Richt

Assistant Professors: M. Greenlee, Kanthasamy, Kimber, Palic, Rowe

Assistant Professor (Adjunct): Singh

Assistant Professors (Collaborators): Barton, J. Greenlee, Kes, Kwon

Senior Lecturer: Bolser

Lecturer: Kibbel

**Professional Program of Study**

For professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum. A good foundation in anatomy, physiology, and pharmacology of animals is necessary to understand the mechanisms of animal disease processes and their treatment. Study of mammalian anatomy and physiology prepares students with a background in the structural and functional activities of cells, tissues, organs, and body systems relevant to veterinary medicine.

An understanding of drug action is essential for rational drug therapy. The general pharmacology courses provide students with a background in basic pharmacodynamics, toxicology, and the clinical application of drugs. Special emphasis is placed on chemical agents and therapeutic practices specific to veterinary medicine.

**Graduate Programs**

The department offers Master of Science and Doctor of Philosophy degrees with a major in Biomedical Sciences and specializations in Anatomy, Physiology, Pharmacology, and Cell Biology. Up to 10 credits of dual-listed veterinary courses may be applied for major graduate credit. Departmental research facilities allow for training in experimental anatomy, pharmacology, and physiology. Graduate studies are supervised by faculty members recognized in their areas of expertise. Current areas of research include: Alzheimer’s disease, aquatic animal health, calcium and mineral homeostasis, diabetes mellitus, glia-neuron signaling, neurophysiology of pain, neurotoxicology, physiology and pharmacology of nematicide ion-channels, Parkinson’s disease, physiology of schizophrenia, pharmacology of salamellnosis, physiology and pharmacology of thalamic neurons, physiology of the retina, Spinal Muscular Atrophy, and study of neural stem cells. The objective of the department is to prepare graduate students for successful careers in biomedical research and professional service. The department is part of interdepartmental programs in neuroscience, toxicology, and molecular, cellular, and developmental biology. The combined Ph.D./DVM program is an option offered by the department.

**Courses primarily for undergraduate students**

B M S 329. Anatomy and Physiology of Domestic Animals. (3-0) Cr. 3. S. Prereq: Biol 212, 212L. Survey of body systems of domestic animals. Provides a medical science orientation particularly useful to students in a preveterinary medicine curriculum.

**Courses primarily for professional curriculum students**

B M S 333. Biomedical Sciences I, (5-3) Cr. 6. F. S. Prereq: First-year classification in veterinary medicine. Microscopic anatomy and physiology of cells, tissues, cardiovascular system, respiratory system, and urinary system.

B M S 334. Biomedical Sciences II. (5-3) Cr. 6. S. Prereq: First-year classification in veterinary medicine. Microscopic anatomy of the immune system and integument. Microscopic anatomy and physiology of the digestive system, endocrine system, and reproductive system.

B M S 346. Case Study II. (0-1) Cr. 1. S. Prereq: First-year classification in veterinary medicine. Clinical application of basic sciences taught concurrently in the spring semester of the first year curriculum in veterinary medicine.

B M S 355. Topics in Molecular Veterinary Medicine. (Dual-listed with 555). (1-0) Cr. 1. S. Prereq: Enrollment in or completion of 354. Receptor and signal transduction anomalies and their diagnosis in veterinary medicine.

B M S 401. Intro to Aquatic Animal Medicine. (Cross-listed with A Ecl). (1-2) Cr. 1. S. 8 week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, and current research. Field trip to aquaculture facility.

B M S 421. Special and Applied Anatomy of the Horse. (1-3) Cr. 2. F. Prereq: 330 or 331 or Art S 316 or 415, classification in veterinary medicine. Special and applied anatomy of the horse. Nonmajor graduate credit.

B M S 443. Pharmacology and Therapeutics. (Dual-listed with 543). (3-0) Cr. 3. F. Prereq: 354. Pharmacology and therapeutic uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions.

B M S 496. International Preceptorship. (0-40) Cr. arr. Repeatable. S. Prereq: Second-year classification in veterinary medicine. International Preceptorships and Study Abroad Group programs. This course will provide opportunities for students to be involved in applied clinical, production, and/or research experiences in international locations. The course consists of 40 hour per week experiential learning opportunities.

**Courses primarily for graduate students, open to qualified undergraduate students**

B M S 501. Selected Research Methods in Biomedical Sciences. (0-6) Cr. 3. F.S.SS. Prereq: Graduate classification, permission of a BMS faculty member. Experience in biomedical techniques in selected BMS laboratories that include but is not limited to cytochemistry, immunohistochemistry, extracellular and intracellular unit recording, microiontophoresis, microinjection, spectropho-fluorometric analysis of chemicals, use of radiotopes, radioimmunoassay, Ca2+ imaging, confocal microscopy, fluorescence microscopy, and immunocytochemistry.

B M S 530. Principles of Morphology I. (Dual-listed with 330). (3-6) Cr. 3. F. Prereq: 10 credits in biological science and permission of the instructor. Anatomy of the dog.

B M S 537. Neuroanatomy. (Dual-listed with 337). (2-2) Cr. 3. S. Prereq: 10 credits in biological science and permission of the instructor. Neuroanatomy of domestic animals.

A. DNA Techniques. Includes genetic engineering procedures, sequencing, PCR, and genotyping. (F.S.S.S.)

B. Protein Techniques. Includes fermentation, protein isolation, protein purification, SDS-PAGE, Western blotting, NMR, confocal microscopy and laser microdissection, immunophenotyping, and monoclonal antibody production. (S.S.)

C. Cell Techniques. Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, and image analysis. (F.S.)

D. Plant Transformation. Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. (S.)

E. Proteomics. Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. (F)

B M S 543. Pharmacology and Therapeutics. (Dual-listed with 443). (3-0) Cr. 3. F. Prereq: 564. Pharmacology and therapeutics includes uses of fluids, antimicrobial and antiparasitic drugs, clinical use of veterinary drugs, and adverse drug reactions.

B M S 549. Advanced Vertebrate Physiology I. (Cross-listed with An S, Kin). (3-0) Cr. 3. F. Prereq: Biol 335, credit or enrollment in BBMB 404 or 420. Neurophysiology, sensory systems, muscle, neuroendocrinology, and endocrinology.

B M S 552. Advanced Vertebrate Physiology II. (Cross-listed with An S, Kin, NutrS). (3-0) Cr. 3. S. Prereq: Biol 335, credit or enrollment in BBMB 404 or 420. Cardiovascular, renal, respiratory, and digestive physiology.

B M S 554. General Pharmacology. (Dual-listed with 554). (Cross-listed with Tox). (3-0) Cr. 3. S. Prereq: 549 and 562; BBMB 404, 406. General principles; drug disposition; drugs acting on the nervous, cardiovascular, renal, gastrointestinal, and endocrine systems.

B M S 555. Topics in Molecular Veterinary Medicine. (Dual-listed with 355). (1-0) Cr. 1. S. Prereq: Enrollment in or completion of 554 and graduate classification. Receptor and signal transduction anomalies and their diagnostic impact.

B M S 556. Cellular, Molecular and Developmental Neuroscience. (Cross-listed with GDCB, Neuro). Cr. arr. F. Prereq: Biol 335 or Biol 436; physics recommended. Fundamental principles of neurosciences including cellular and molecular neuroscience, nervous system development, sensory, motor and regulatory systems.

B M S 575. Cell Biology. (Cross-listed with Tox). (3-0) Cr. 3. F. Prereq: 10 credits in biological science and permission of instructor. A multi-instructor course covering major topics in cell structure and function, including: universal features of prokaryotic and eukaryotic cells, types of utilization and conversion of energy, genetic control of cell shape and functionality, internal organization of cells, communication between cells and their environment, development of multicellular systems. Students have to write a term paper.

A. Anatomy

B. Physiology

C. Pharmacology

D. Cell biology

B M S 599. Creative Component. Cr. arr. F.S.S. Prereq: Enrollment in BMS graduate program, and permission of instructor. Creative component for nonthesis Master of Science degree.

Courses for graduate students

A. Anatomy

B. Physiology

C. Pharmacology

D. Cell biology

B. Attendance required. B. Cr. 1 each time taken. F.

B. Attendance and presentation required. Offered on a satisfactory-fail grading basis only.

Bioboreal Resources and Technology

www.biorenew.iastate.edu

(Interdepartmental Graduate Program)

D. R. Raman, Chair

Program Coordinating Committee: R. Anex, R.C. Brown, L. Johnson, G. Kraus, M. Liebman, B. Nikolau, B. Shanks

Over 60 Iowa State University faculty members from 16 academic departments and five colleges are affiliated with the Bioboreal Resources and Technology (BRT) graduate program; a complete and up-to-date listing is maintained at: www.biorenew.iastate.edu.

Graduate Study

The graduate program in Bioboreal Resources and Technology (BRT) offers students advanced study in the use of plant and crop-based resources in the production of biobased products (fuels, chemicals, materials, and energy). The BRT program was the first graduate program in bioboreal resources established in the United States. This multi-disciplinary program offers the degrees of master of science and doctor of philosophy in Bioboreal Resources and Technology, and a minor to students taking major work in other departments. The curriculum is designed to encourage students to obtain co-major degrees in Bioboreal Resources and Technology and a more traditional science or engineering discipline. A thesis is required for the master of science degree.

Prerequisite to major graduate work is a bachelor’s degree or prior graduate training in engineering or physical or biological discipline or degrees in agriculture or economics. Introduction to the science and engineering of converting bioboreal resources into bioenergy and biobased products. Survey of bioboreal resource base and properties; description of biobased products; methods of bioboreal resource production; processing technologies for fuels, chemicals, materials, and energy; environmental impacts; economics of biobased products and bioenergy.

BRT 506. Biobased Products Seminar. Cr. arr. F. Prereq: Undergraduate training in an engineering or physical or biological discipline or degrees in agriculture or economics. Introduces to the science and engineering of converting bioboreal resource into bioenergy and biobased products. Survey of bioboreal resource base and properties; description of biobased products; methods of bioboreal resource production; processing technologies for fuels, chemicals, materials, and energy; environmental impacts; economics of biobased products and bioenergy.

BRT 507. Biobased Products Seminar. Cr. arr. F. Prereq: Undergraduate training in an engineering or physical or biological discipline or degrees in agriculture or economics. Introduces to the science and engineering of converting bioboreal resource into bioenergy and biobased products. Survey of bioboreal resource base and properties; description of biobased products; methods of bioboreal resource production; processing technologies for fuels, chemicals, materials, and energy; environmental impacts; economics of biobased products and bioenergy.

BRT 590. Special Topics. Cr. arr. Repeatable. F.S.S. Prereq: Permission of instructor. Investigation of an approved topic on an individual basis. Course content and requirements to be designed and developed in consultation with the student’s major professor or instructor, but in all cases a formal report should be written.

BRT 591L. Bioboreal Resources Laboratory. (0-30) Cr. 1. F, S. Prereq: Permission of student’s major professor and instructor. A laboratory report is required. For student in the BRT program, BRT 591L may be taken twice. For student in the BRT program, BRT 591L may be taken twice.

Courses for graduate students

Botany

http://www.eeeb.iastate.edu

Interdepartmental Graduate Major

Robert S. Wallace, Director of Graduate Education

Undergraduate Study

Students wishing to pursue an undergraduate degree in the basic plant sciences are encouraged to investigate the numerous possibilities available to them at Iowa State University. The undergraduate Biology Program, jointly administered by faculties of the departments of Ecology, Evolution, and Organismal Biology (EEOB) and Genetics, Cell and Developmental Biology (GDCB), includes a wide spectrum of opportunities for students to develop their academic interests through the study of plant biology. Students can major in Biology in the College of Liberal Arts and Sciences or in the College of Agriculture. Contact the Biology Student Services office in 103 Bessey Hall for general information about the Biology Program. For those students interested in applied plant sciences, undergraduate majors in Agronomy, Horticulture, and Forestry are also available through the College of Agriculture.

Graduate Study

The Botany Graduate Program offers work for the degrees Master of Science and Doctor of Philosophy with a graduate major in Botany, and minor work for students majoring in other departments or graduate programs. Within the Botany Graduate Major, one of the following areas of specialization may be designated: aquatic and wetland ecology, cytology, ecology, morphology, mycology, physiology and molecular biology, or systematics and evolution. Relevant graduate courses that may be counted toward completion of these degrees are offered by the Departments of EEOB and GDCB, and by other departments and programs. The specific requirements for each student’s course distribution and research activities are set by the Program of Study Committee established for each student individually, and must satisfy all requirements of the Graduate College (See Index, GRE (and if necessary, TOEFL) scores are required of all applicants; students are encouraged to contact faculty prior to application.

Related interdepartmental graduate majors in Ecology and Evolutionary Biology (EEOB); Environmental Science (EnSci); Genetics (IG); Molecular, Cellular and Developmental Biology (MCDDB); Plant Physiology (IPPM); and Toxicology should also be investigated as possible graduate programs with specific disciplinary focus.

At present, the Botany Graduate Program is under review and may change Status in the near future. Before applying for admission to the Botany Graduate Major, prospective students should contact the Botany Graduate Program Director of Graduate Education Dr. Robert Wallace (rvallace@iastate.edu) for specific details about the program's Status and application procedures.

Business Administration

Labh S. Hira, Dean

Undergraduate Study

Kay M. Palan, Professor in charge, Undergraduate Programs in Business.

For undergraduate curriculum leading to the degree bachelor of science, majors in accounting, business economics, finance, management, management information systems, marketing, operations, supply chain management, and systematics and supply chain management, and a secondary major in international business, see College of Business, Curricula.

The department of Business Administration supports the undergraduate programs in the departments of Accounting, Finance, Logistics, Operations, and Management Information Systems, Management, and Marketing by providing specialized coursework in orientation to business, and cooperative education opportunities.

Graduate Study

Michael Crum, Professor in Charge, Graduate Programs in Business

The College of Business offers work towards two graduate programs in business administration: the master of business administration (MBA) and the master of science in business (M.S.B.), which are described below. The college also has two specialized master degree programs: the master of accounting (M.Acc.), which is described under the Department of Accounting and the master of science in information systems (M.S.I.S.) which is described under Management Information Systems. The college also offers a Ph.D. in business and technology, with specialization in customer management, supply chain management, and management of information technology. Finally, the College of Business is a participating member of the following interdepartmental programs: master of science in transportation, master of science in seed technology and business, master of science and Ph.D. in human computer interaction, and master of science in information assurance.

Master of Business Administration (M.B.A.)

The College of Business offers a 48 credit program leading to a nonthesis master of business administration degree with a specialization in accounting, agribusiness, family financial management, finance, information systems, international business, marketing, or supply chain management. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The M.B.A. is the professional management education program for those pursuing careers in business. Students working toward the M.B.A. are required to complete a series of core courses in the basic functional areas of business (accounting, economics, statistics, finance, supply chain management, organizational behavior, management information systems, marketing, international business, ethics and social responsibility, strategic management), and advanced elective coursework. Courses for the M.B.A. are provided by the departments of Accounting, Economics, Finance, Logistics, Operations and Management Information Systems, Management, Marketing, and Statistics. Courses from other departments may also be chosen to meet specific student interests.

A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in civil, computer, electrical, industrial, or mechanical engineering. The College of Business and the College of Veterinary Medicine offer a concurrent M.B.A./D.V.M. degree.

Double master’s degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.P.A./M.C.R.P.), information systems (M.B.A./M.S.I.S.) and Statistics (M.B.A./M.S.-Statistics).

Students may enroll in the M.B.A. on either a full-time or part-time basis. The part-time M.B.A. is designed for employed professionals. Part-time MBA classes are held in the evenings in Ames and Des Moines.

The M.B.A. program is open to all individuals with a baccalaureate degree. Undergraduates from liberal arts, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit Graduate Management Admission Test (GMAT) scores, official transcripts of previous academic work, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores.

Applicants are considered for fall semester entry only into the full-time M.B.A. Although applications will be considered after this date, candidates are encouraged to submit their application materials by June 1 (March 1 for international students). Part-time M.B.A. applications are considered for fall, spring, or summer entry.

Master of Science (M.S.) in Business

The College of Business offers graduate work leading to the master of science degree with a major in business. All the departments in the college, (Accounting, Finance, Logistics, Operations and Management Information Systems, Management, and Marketing), and the departments of Economics and Statistics cooperate in providing coursework toward this degree. The program is designed to serve those students who desire specialized study of an area within business at the master’s level. It also serves to develop their research capabilities.

The M.S. degree is best suited for students with degrees or academic backgrounds in business as they may complete the program within the 30 credit minimum. Students without business backgrounds are required to fulfill pre-requisites and common body of knowledge coursework in accounting, finance, management information systems, marketing, organizational behavior, supply chain management, global business, business ethics, and strategy. The program is composed of 7 credits of required courses in economics and Statistics plus 3 to 6 credits of thesis and 17 to 20 credits of coursework in an area of emphasis. The student, with the help of a program of study committee, designs an educational program in specialized functional or industry areas within business.

Application deadline for the M.S. program is May 1 for fall admission and November 1 for spring admission. Applicants must submit official transcripts of previous educational coursework and degrees, the Graduate Management Admission Test (GMAT) scores, personal essays, resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) scores.
Each student must complete advanced courses in their area of specialization, a minor area that supports the major area, and research methods. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

Application deadline for the Ph.D. program is February 1 for fall admission. Applicants must submit official transcripts of previous educational coursework and Graduate Management Admission Test (GMAT) scores, personal essays, resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

Courses primarily for undergraduate students

BusAd 101. Orientation. (1-0) Cr. 0.5. F.S. First 8 weeks. A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Either BusAd 101 or 102 may be counted towards graduation. Satisfactory-fail only.

BusAd 101H. Orientation. (1-0) Cr. 0.5. F. Prereq: Membership in the Freshman Honors Program. Designed to supplement the Freshman Honors orientation (Hon 121) with college specific information, to facilitate the development of Honors programs of study in business, and to acquaint students with university policies and procedures. Either BusAd 101 or 102 may be counted towards graduation. Satisfactory-fail only.

BusAd 102. Expanded Orientation. (1-0) Cr. 1. F.S. A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. Either BusAd 101 or 102 may be counted towards graduation. Satisfactory-fail only.

BusAd 150. Computer Competencies for Business. Cr. R. Students will demonstrate proficiency in MS Word, Excel, and PowerPoint, as well as the ability to conduct research using the Internet, use WebCT, and communicate via e-mail. Self-paced instruction available for students who are unable to demonstrate appropriate proficiency. Satisfactory-fail only.

BusAd 201. Career Issues in Business. (1-0) Cr. 0.5. F.S. Prereq: 101. Eight-week course designed to provide students with knowledge of careers in business and issues relevant to any workplace. Presentations by business professionals, current students who have previously interned, and faculty and staff with knowledge of careers in the various majors. Includes coverage of diversity and ethics issues in the workplace. Satisfactory-fail only.

BusAd 250. Introduction to Business. (3-0) Cr. 3. Prereq: 101, 150 or Com S 103. Introduction to the functional areas of business and how the functional areas are integrated for the purpose of implementing business strategy. Introduces students to decision making tools (spreadsheets and databases) that are integral to business decision making. Includes application exercises to all functional areas of business.

Courses primarily for graduate students, open to qualified undergraduate students

BusAd 292. Entrepreneurship & Innovation Learning Community (ELC) Seminar. (1-0) Cr. 1. Prereq: Current member of or have applied to be a member of Entrepreneurship and Innovation Learning Community (see www.supcenter.org/ELC for more information). Topics related to entrepreneurship and entrepreneurial thinking. Presentations by entrepreneurs and faculty, field trips, business concept development.

BusAd 301. Professional Employment Preparation. (1-0) Cr. 0.5. D.S. Prereq: 201. Eight-week course designed to provide students with the skills to develop and implement a professional job search and to function professionally in a workplace setting. Topics include resume and professional correspondence, interviewing, working a career fair, the comprehensive job search, evaluating offers, business etiquette, networking, and transitioning to employee. Satisfactory-fail only.

BusAd 325. Biorenewable Systems. (Cross-listed with A E, Agron, An S, Econ, TSM). (3-0) Cr. 3. F. Prereq: Econ 101, Chem 155 or higher, Math 140 or higher. Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedback production, processes, products, co-products, economics, transportation/logistics, and marketing.

BusAd 398. Cooperative Education. Cr. R. Repeatable. Prereq: Permission of department. Required of all cooperative students. Students must register for this course prior to commencing each work period. No more than three credits may be taken in addition to BusAd 398 during any given semester. Satisfactory-fail only.

BusAd 490. Independent Study. Cr. arr. Repeatable. Prereq: 490A; Mgmt 414, Mkt 418, LSM 466 or Fin 380; senior classification, permission of instructor; for 490H: Admission to the Business Honors program. A. International Business B. Entrepreneurship H. Honors

BusAd 491. Professional Experiential Learning. Cr. arr. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experiences in a business related discipline. Satisfactory-fail only.

A. Domestic Internship B. International Internship C. Domestic Travel and Study D. International Travel and Study E. Other Experiential Learning Experience

Courses primarily for graduate students

BusAd 501. Strategy and Planning. (2-0) Cr. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor; Critical analysis of current practices and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

BusAd 503. Information Systems. (2-0) Cr. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Introduction to a broad variety of information systems (IS) topics, including current and emerging developments in information technology (IT); IT strategy in the context of corporate strategy; and IS planning and development of enterprise architectures. Cases and discussions highlight the techniques and tactics used by managers to cope with strategic
issues within an increasingly technical competitive environment.

BusAd 504. Marketing and Logistics. (3-0) Cr. 3. Prereq. Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

BusAd 507. Organizational Behavior. (2-0) Cr. 2. Prereq. Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

BusAd 508. Accounting and Finance. (3-0) Cr. 3. Prereq. Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

BusAd 509. Seed Trade, Policy and Regulation. (3-0) Cr. 3. Prereq. Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Cultural, financial, economic, political, legal/regulatory environments shaping an organization's international business strategy. Topics include entry and competition (s) of people, firms, goods, services, and capital. Special attention to the institutions of seed regulation and policy. Ethical issues facing managers operating in an international context.

BusAd 533. Economic and Business Decision Tools. (Cross-listed with Econ). (3-0) Cr. 3. Prereq: Econ 501 or Econ 532. Team taught by faculty in the Department of Economics and the College of Business, this course focuses on applied economic and business tools for decision making. The topics covered include: Monte Carlo analysis with applications to option pricing and insurance mechanism design, portfolio analysis using existing standard spreadsheet software and add-ons, dynamic programming tools for inventory management and sequential decisions, discrete choice modeling and Statistical bootstrapping, and financial performance evaluation using commercially available software.

BusAd 591. Professional Experiential Learning. Cr. arr. Repeatable. Prereq: Graduate standing; written approval of supervising instructor and department chair on required form prior to the learning experience. Academic and travel/field work experiences in a business related discipline.

BusAd 592. MBA Professional Skills Development. Cr. R. Prereq. Admission to Full-time MBA Program. Provides first-year MBA students with tools necessary to develop and implement a successful internship and career search, and to develop professional skills critical to success in the competitive business environment. Topics include career search strategy, resume and cover letter development, interviewing, strategic networking, salary negotiation, impression management, team skills development, presentation skills development, and business etiquette. Required for all full-time MBA students. Satisfactory-fail only.

BusAd 598. Cooperative Education. Cr. R. Prereq: Permission of instructor. Professional work experience. Students must register for this course prior to commencing work. Satisfactory-fail only.
12 within Ch E and 2 outside). The master of engineering requirements are the same for credits and include a special project rather than research thesis. The doctor of philosophy degree requires a minimum of 72 graduate credits (minimum of 30 for coursework; 19 inside Ch E and a minimum of 8 credits taken outside of Ch E). Candidates for the doctor of philosophy degree must refer to the department’s home page and/or the department’s Graduate Student Handbook for degree options and credit requirements.

Courses primarily for undergraduate students
Ch E 104. Chemical Engineering Learning Community. Cr. R. F.S. Prereq: Enrollment in Chemical Engineering Learning Team. (1-0) Curriculum in career planning and academic course support for Freshmen learning team.

Ch E 204. Chemical Engineering Continuing Learning Community. Cr. R. F.S. Prereq: Corequisite-enrollment in Chemical Engineering Learning Team. (1-0) Curriculum and career planning, academic course support for learning community.

Ch E 298. Cooperative Education. Cr. R. F.S. Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work.

Ch E 302. Seminar. (1-0) Cr. 1. F. Prereq: Junior classification in chemical engineering.

Ch E 325. Chemical Engineering Laboratory I. (4-0) Cr. 2. F.S. Prereq: 257, credit or enrollment in 291. Experiments covering fundamental material and energy balances and process industries. Computer applications. Nonmajor graduate credit.

Ch E 356. Transport Phenomena I. (3-0) Cr. 3. F.S. Prereq: 210, Phys 221, credit or enrollment in Math 267. Momentum and mechanical energy balances. Incompressible and compressible fluid flow. Applications to fluid drag, piping system design, filtration, packed beds and settling. Nonmajor graduate credit.

Ch E 357. Transport Phenomena II. (3-0) Cr. 3. F.S. Prereq. Credit or enrollment in 310, 356. Conduction and diffusion, convective heat and mass transfer, boiling and condensation, radiation, and design of heat exchange equipment. Introduction to diffusion. Nonmajor graduate credit.

Ch E 358. Separations. (3-0) Cr. 3. F.S. Prereq: 310, 357. Diffusion and mass transfer in fluids. Analysis and design of continuous contacting and multistage separation processes. Binary and multicomponent distillation, absorption, extraction, evaporation, membrane processes, and simultaneous heat and mass transfer. Nonmajor graduate credit.

Ch E 381. Chemical Engineering Thermodynamics. (3-0) Cr. 3. F.S. Prereq: Credit or enrollment in 310, Math 267, Phys 222, Chem 325. Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of fluids, phase equilibria, and chemical reaction equilibria. Nonmajor graduate credit.

Ch E 382. Chemical Reaction Engineering. (3-0) Cr. 3. F.S. Prereq. Credit in 310, 381, credit or enrollment in 357. Kinetics of chemical reactions. Design of homogeneous and heterogeneous chemical reactors. Nonmajor graduate credit.

Ch E 391. Foreign Study Orientation. Cr. ann. Prereq. Credit or enrollment in 381 and permission of instructor. Students must register for this course prior to commencing work.

Ch E 397. Engineering Internship. Cr. R. Prereq: Permission of department and Engineering Career Services. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Ch E 508. Surface and Colloid Chemistry. (Dual-listed with 508). (3-0) Cr. 3. F.S. Prereq: 381 or equivalent. Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application of basic chemical engineering principles to movement of chemicals in the environment. Nonmajor graduate credit.

Ch E 542. Polymeric Biomaterials. (3-0) Cr. 3. F.S. Prereq: 331 or a polymers class. Polymeric biomaterials, overview of biomaterial requirements, different classes of polymers used as biomaterials, specific bioapplications of polymers. Nonmajor graduate credit.

Ch E 554. Integrated Transport Phenomena. (4-0) Cr. 4. F. Prereq. 297, credit or enrollment in 545. Conservation equations governing diffusive and convective transport of momentum, thermal energy and chemical species. Transport through laminar flow in conduits, boundary layer flow, creeping flow. Heat and mass transport coupled with chemical reactions and phase change. Scaling and approxima-
for heat and mass transfer; scaling and approxima-
tion techniques; fundamentals of fluid mechanics;
unidirectional flow; creeping flow; laminar flow at high
Reynolds number; forced-convection heat and mass
transfer in confined and unconfined laminar flows.
Ch E 562. Bioseparations. (3-0) Cr. 3. Prereq: 357 or
advanced standing in a science major. Principles and
techniques for separation and recovery of biologically-
produced molecules, especially proteins. Relationship
between the chemistry of biological molecules and
efficient separation and preservation of biological ac-
tivity. Includes chromatographic and filtration, membrane
processing, extraction, precipitation and crystalliza-
tion, chromatography, and electrophoresis.
Ch E 572. Turbulence. (Cross-listed with Aer E). (3-0)
Cr. 3. Alt. S., offered 2010. Prereq: Aer E 543 or M E
538. Qualitative features of turbulence. Statistical and
spectral representation of turbulent velocity fields:
averages, moments, correlations, length and time
scales and the energy cascade. Averaged equations of
motion, closure requirements, Reynolds stress, dissipation rate. Isotropic turbulence, homogeneous
shear flows, free shear flows, wall bounded flows.
Scalar transport, particulate transport.
Ch E 583. Advanced Thermodynamics. (3-0) Cr. 3. F.
Prereq. 381. Application of thermodynamic principles
to chemical engineering problems. Thermodynamic
properties of non-ideal fluids and solutions; phase and
chemical-reaction equilibria/stability.
Ch E 587. Advanced Chemical Reactor Design. (3-0)
Cr. 3. S. Prereq: 382. Analysis of complex reactions and
kinetics. Fixed bed, fluidized bed, and other industrial reactors. Analysis and design of non-ideal
flow mixing, and residence times. Heterogeneous
reactors.
Ch E 590. Special Topics. Cr. arr. Repeatable. Investi-
gation of an approved topic on an individual basis.
Ch E 595. Special Topics. Cr. arr. Repeatable. A Separations
B. Advanced Control Theory
C. Crystallization
D. Thermodynamics
G. Biological Engineering
I. Materials & Biomaterials
J. Protein Engineering/Bioseparations
K. Surfaces
L. Combinatorial Design
Ch E 599. Creative Component. Cr. arr. Repeatable.
Courses for graduate students
Ch E 601. Seminar. Cr. R. Repeatable. F.S. Satisfac-
tory-fail only.
Ch E 625. Metabolic Engineering. (3-0) Cr. 3. Prereq:
Emphasis on emerging examples in biorenewables
and plant metabolic engineering. Overview of bio-
chemical pathways, determination of flux distributions by
stoichiometric and labeling techniques; kinetics and
thermodynamics of metabolic networks; meta-
bolic control analysis; genetic engineering for over-
expression, derepression, or inhibition of enzymes;
directed evolution; application of bioinformatics,
genomics, and proteomics.
(3-0) Cr. 3. Alt. S., offered 2011. Prereq: M E
538. Single particle, multiparticle and two-phase fluid
flow phenomena (gas-solid, liquid-solid and gas-liquid
mixtures); particle interactions, transport phenomena,
wall effects; bubbling and annular flow of multiple-phase
flow. Dense phase (fluidized and packed beds) and ducted
flows; momentum, heat and mass transfer. Computer
solutions.
Ch E 642. Principles and Applications of Molecu-
lar Simulation. (3-0) Cr. 3. Prereq: 545. Principles
of Statistical physics. General features of molecular
simulations including Monte Carlo (MC) methods,
molecular mechanics (MM), and molecular dynamics
(MD). Overview of intermolecular and interatomic
potentials. Evaluation of phase equilibria, free energies,
and surface/interfacial properties. Coarse-grained
methods.
Ch E 652. Advanced Transport. (3-0) Cr. 3. Prereq:
552 and 553. Advanced topics in momentum trans-
port, fluid mechanics, and mass transport including
study of recent literature.
Ch E 688. Catalysis and Catalytic Processes. (3-0)
Cr. 3. Prereq: 382. Principles and applications of het-
erogeneous and homogeneous catalysis. Adsorption.
Reactor kinetics; reactor design; reactor effects, Catalyst
catalyzer characterization. Industrial catalytic processes.
Ch E 690. Advanced Topics. Cr. arr. Repeatable.
A. Separations
B. Advanced Statistical Modeling and Control
C. Crystallization
D. Thermodynamics
E. Protein Engineering/Bioseparations
F. Biological Engineering
G. Materials & Biomaterials
H. Surfaces
I. Combinatorial Design
Ch E 697. Engineering Internship. Cr. R. Repeat-
able. F.S.S. Prereq. Permission of major professor; graduate classification. One semester and one sum-
mer maximum per academic year professional work
period.
Chemistry
www.chem.iastate.edu
Jacob Petrich, Chair of Department
Distinguished Professors: Barton, Corbett, Gordon, Larock, Thiel
Distinguished Professors (Emeritus): Angelici, Espenson, Fritz, Johnson, Ruedenberg, Yeung
University Professors: Hoffman, Kraus, Verkade
Professors: Geoffroy, Greenbowe, Holme, Hong, Hous, Jenkins, Lin, Miller, Petrich, Schmidt-Rohr, Shin, Tranahovsky, Windus, Woi
Professors (Emeritus): Franzen, Gerstein, Hutton, Jacobson, McCarley, Powell, Russell, Struve
Professor (Adjunct): Bakac, Pruski
Professor (Adjunct Emeritus): Tranahovsky
Professor (Collaborator): Porter
Associate Professors: Hillier, Pohl, Song, Zhao
Assistant Professors: Fang, Jeffries-El, Lee, Sadow, Smith, Stauffer
Senior Lecturers: Burnett
Lecturers: Bonaccorsi, Kingston
Undergraduate Study
For undergraduate curricula in liberal arts and sciences leading to the degrees bachelor of sci-
cence and bachelor of arts, see Liberal Arts and
Sciences, Curriculum.
Graduates holding the B.S. degree in chemistry qualify in many fields: as teachers of chemistry,
as supervisors in industry, as technical sales
personnel, and as research chemists in federal,
state, municipal, academic, or industrial laborato-
ries. Students with high scholastic standing often
continue with graduate work, where they can
explore more thoroughly the specialized areas of
chemistry in which they are interested.
The B.A. degree is useful for students who intend
to pursue studies in parallel areas, such as sec-
ard school teaching, or to obtain joint majors or
strong minors. The B.A. degree does not prepare
students as well for graduate study or professional
employment in chemistry.
Graduates have firm foundations in the fundamen-
tals and application of current chemical theories.
They are able to design, carry-out, record, and ana-
lyze the results of chemical experiments. They are
able to use modern instrumentation and classical
techniques to identify and solve chemical prob-
lems as well as explore new areas of research.
Graduates are able to communicate the results
of their work to chemists, as well as non-chemists.
They understand the ethical and environmen-
tal dimensions of problems and issues facing
chemists. They follow the proper procedures and
regulations for safe storage, labeling, use of
chemicals, and disposal of chemicals. Graduates
are skilled in problem solving, critical thinking, and
analytical reasoning. These skills can be applied to
careers in education and industry and professions
such as law, medicine, environmental sciences,
and forensic sciences. The curriculum in chemistry
are approved by the American Chemical Society
(ACS). Students who complete the program obtain
an ACS certified baccalaureate degree provided they
also take one Biochemistry course, typically
BBMB 301 or 404.
Liberal arts majors who wish to transfer into
chemistry at the end of their second year may still
complete all degree requirements and graduate
within five years.
Undergraduate students seeking the B.S. degree in
chemistry usually take courses essential to the
degree program according to the following schedule:
First year: Chem 177 and 178, or 201; 177L or
201L; 211, 211L; Math 165, 166; Eng 150; Lib 160.
Second year: Chem 331, 332, 333L, 334L; Math
265; Phys 221, 222.
Third year: Chem 324, 325, 322L, 316, 316L, 301;
Eng 250 or 250H; Foreign language requirement.
Fourth year: Chem 402, 401L, 2 advanced chem-
istry courses (minimum 4 credits). Chem 399 or
499 is strongly recommended. Credits earned
in 399/499 can only be used to meet one of the
advanced course requirements.
Chemistry majors seeking certification to teach
chemistry in secondary schools must meet the
requirements of the College of Human Sciences
as well as those of the chemistry program. In
addition, they must apply formally for admission to
the teacher education program.
Undergraduate students seeking the B.A. degree in
chemistry have the following courses in their
degree programs as minimum requirements:
177, 178, and 217L or 201 and 177L or 201L; 211,
211L, 301, 316, 316L, 324, 321L or 322L, 325,
331, 331L, 332, 332L. Math 165, 166 and Phys
221, 222 are required as supporting work.
The Department offers a minor in chemistry which
may be earned by credit in Chem 177, 177L (or 167
and 167L), 178, 211, 211L, 324, 331, 331L and one
of the following: Chem 301; 316 and 316L or 325
and 321L, or 332 and 332L. The total minimum
credits in chemistry thus will be 20 to 23 depend-
ing on which advanced courses are selected.
Communication Proficiency Requirement: The De-
partment requires a grade of C- or better in each of
English 150 and 250 or 250H.
Graduate Study
The Department offers work for the degrees
master of science and doctor of philosophy with
majors in chemistry areas: inorganic, organic, and
physical chemistry. Co-majors may be taken
between areas within chemistry or between one of
the areas in chemistry and another department.
Courses in other areas of chemistry as well as
courses in other departments may be used to
satisfy the requirement for coursework outside
the major field. A Ph.D. student in chemistry may
choose an additional specialty in one of the six
areas: Materials Chemistry, Industrial Chemistry,
Courses primarily for undergraduate students

Chem 500. Preparation for College Chemistry. (3-0) F. Prereq: 1 year high school algebra. An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on Mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school college preparatory chemistry course. Credit for Chem 500 does not count toward graduation.

Chem 155. Foundations of Chemistry for Engineers. (3-0) Cr. 3. F. Prereq: Math 140 or the high school equivalent. The first semester of a two-semester sequence covering principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Chem 155 may not be credited for credit toward graduation in any engineering curriculum.

Chem 160. Chemistry in Modern Society. (3-0) Cr. 3. At. S., offered 2010. Aspects of chemistry visible to a nonscientist in our Society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity.

Chem 163. College Chemistry. (4-0) Cr. 4. F. Prereq: 1 year of high school algebra and geometry and either Chem 50 or 155 or 1 year of high school chemistry; and credit or enrollment in 163L. The first semester of a two-semester sequence. A general survey of chemistry and properties of an emphasis on conceptual problems. Stoichiometry, atomic structure, chemical bonding, states of matter, energy relations, acid-base theory and oxidation-reduction reactions. The 163, 164 sequence does not meet the prerequisite for 331. Credit for examination (test-out exams) for 163 is available only to students who are not currently enrolled in the course. Only one of Chem 163, 165, 167, 177, or 201 may count toward graduation.

Chem 163L. Laboratory in College Chemistry. (4-0) Cr. 1. F.S.SS. Prereq: Credit or enrollment in credit for 163. Laboratory to accompany 163. Must be taken with 163. Only one of Chem 163L, 167L, and 177L may count toward graduation.

Chem 165. Foundations of Chemistry for Engineers. (4-0) Cr. 4. S. Prereq: 155. Continuation of 165. Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Chem 165 and 167 satisfies the chemistry requirement in engineering curricula. Only one of Chem 163, 165, 167, 177, or 201 may be counted.

Chem 167. General Chemistry for Engineering Students. (4-0) Cr. 1. F.S. Prereq: Math 140 or the high school equivalent and one year of traditional college prep chemistry or Chem 50. Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. This is an accelerated course designed for students with an excellent preparation in Math and science and is a terminal course intended for engineering students who do not plan to take additional chemistry. Credit by examination (test-out exams) for 167 is available only to students who are not currently enrolled in the course. Only one of Chem 165, 165, 167, 177, or 201 may count toward graduation.

Chem 167L. Laboratory in General Chemistry for Engineering. (4-0) Cr. 1. F.S. Prereq: Credit or enrollment for credit in 167 or 167L. Laboratory to accompany 167. Only one of Chem 163L, 167L, and 177L may count toward graduation.

Chem 177. General Chemistry I. (4-0) Cr. 4. F.S.SS. Prereq: Math 140 or high school equivalent and 163, 167 or 1 year high school chemistry and credit or enrollment in 177L. Chemistry and biochemistry may be considered 201. The first semester of a two-semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 163-164. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base and thermodynamics, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Credit by examination (test-out exams) for 177 is available only to students who are not currently enrolled in the course. Only one of Chem 165, 163, 167, 177, or 201 may count toward graduation.

Chem 177L. Laboratory in General Chemistry I. (4-0) Cr. 1. F.S.SS. Prereq: Credit or enrollment for credit in 177L Laboratory to accompany 177. Only one of Chem 163L, 167L, and 177L may count toward graduation.

Chem 177N. Laboratory in General Chemistry I. (4-0) Cr. 1. F.S.SS. Prereq: Credit or enrollment for credit in 177N Laboratory to accompany 177. Only one of Chem 163L, 167L, and 177L may count toward graduation.

Chem 231. Elementary Organic Chemistry. (3-0) Cr. 3. F.S.SS. Prereq: 163, 163L, or 177, 177L, credit or enrollment in 231L. A survey of modern organic chemistry including naming, structure and bonding, and reactions of hydrocarbons and important classes of natural and synthetic organic compounds. For students desiring only an elementary course in organic chemistry. Students in physical or biological sciences and premedical or prevetinary curricula should take the full year sequence 331 and 332 (with the accompanying laboratories 331L and 332L). Only one of Chem 231 and 331 or 332 may count toward graduation.

Chem 231L. Laboratory in Elementary Organic Chemistry. (3-0) Cr. 1. F.S.SS. Prereq: Credit or enrollment for credit in 231, 163L, and 177L. Laboratory to accompany 231. Only one of Chem 231L and 331L may count toward graduation.

Chem 298. Cooperative Education. Cr. F. Prereq: Permission of staff member with whom student proposes to work.

Chem 301. Inorganic Chemistry. (2-0) Cr. 2. S. Prereq: 324. Atomic and molecular structure and bonding principles; molecular shapes and symmetry; acids and bases; solid-state structures and properties; inorganic chemistry of H, C, N. Nonmajor graduate credit.

Chem 316L. Instrumental Analysis Laboratory. (2-0) Cr. 2. F. Prereq: Credit or enrollment in Chem 316. Advanced laboratory experience in UV-visible spectrophotometry, atomic absorption and emission spectroscopy, mass spectrometry, gas and liquid chromatography, spectroscopy, electron microscopy, and other instrumental methods. Nonmajor graduate credit.
Chem 321L. Laboratory in Physical Chemistry. (1-3) Cr. 2. S. Prereq: Credit or enrollment for credit in 324 or 325. Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, infrared and optical spectroscopy, lasers. Not applicable towards the B.S. degree in Chemistry. Only one of Chem 321L and 322L may count toward graduation. Nonmajor graduate credit.

Chem 322L. Laboratory in Physical Chemistry. (1-6) Cr. 3. S. Prereq: Chem 324. Error analysis; use of computers for interfacing to experiments and for data analysis; thermodynamics, surface science, infrared and optical spectroscopy, lasers. Only one of Chem 321L and 322L may count toward graduation. Nonmajor graduate credit.

Chem 324. Introductory Quantum Mechanics. (3-0) Cr. 3. F. Prereq: 178, Math 166, Phys 222 recommended. Quantum mechanics, atomic and molecular structure, spectroscopy, kinetic theory of gases, chemical kinetics. Nonmajor graduate credit.

Chem 325. Chemical Thermodynamics. (3-0) Cr. 3. F.S. Prereq: 178, Math 166, Phys 222 recommended. Classical thermodynamics 1st, 2nd, and 3rd laws with applications to gases and interfacial systems, multicomponent, multiphase equilibrium of reacting systems, surface chemistry, and electrochemical systems. Students taking a two-semester physical chemistry sequence are advised to take 324 first; in the spring semester, a molecular-based section of this course, stressing Statistical thermodynamics, is offered for which knowledge of 324 is useful. Nonmajor graduate credit.

Chem 331. Organic Chemistry I. (3-0) Cr. 3. F.S. Prereq: 178 or 201, enrollment in 331L highly recommended. The first half of a two semester sequence. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms. For students majoring in physical and biological sciences, premedical and prevetinary curricula, chemistry and biochemistry. Students desiring only one semester of organic chemistry should take 231 and 231L, not 331. Only one of Chem 231 and 331 may count toward graduation. Nonmajor graduate credit.

Chem 331L. Laboratory in Organic Chemistry I. (0-3) Cr. 1. F. S. Prereq: Credit or enrollment for credit in 331, 177L. Laboratory to accompany 331. Chemistry and biochemistry majors are encouraged to take 331L. Only one of Chem 231L and 331L may count toward graduation.

Chem 332. Organic Chemistry II. (3-0) Cr. 3. F.S. Prereq: 331L, enrollment in 332L highly recommended. Continuation of 331. Modern organic chemistry including nomenclature, synthesis, structure and bonding, reaction mechanisms, natural products, carbohydrates and proteins. For students majoring in physical and biological sciences, premedical and preveterinary curricula, chemistry and biochemistry. Nonmajor graduate credit.

Chem 332L. Laboratory in Organic Chemistry II. (0-3) Cr. 1. F. S. Prereq: 331L, credit or enrollment for credit in 332L. Laboratory to accompany 332. Chemistry and biochemistry majors are encouraged to take 334L.

Chem 333L. Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors). (0-6) Cr. 2. F. Prereq: Credit or enrollment for credit in 331L. Laboratory to accompany 331 for chemistry and biochemistry majors.

Chem 334L. Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors). (0-6) Cr. 2. S. Prereq: 333L, credit or enrollment for credit in 332L. Laboratory to accompany 332 for chemistry and biochemistry majors.

Chem 398. Cooperative Education. Cr. F. F.S.S. Prereq: Permission of the Department cooperative education coordinator; junior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Chem 399. Undergraduate Research. Cr. arr. Prereq: Permission of instructor with whom student proposes to work and junior or senior classification. No more than Six total credits of Chem 399 and Chem 499 may count toward graduation.

Chem 401L. Inorganic Chemistry Laboratory. (0-3) Cr. 1. F. Prereq: 301. Preparation and characterization of inorganic and organometallic compounds by modern techniques. For students majors in chemistry or biochemistry. Nonmajor graduate credit.

Chem 490. Independent Study. Cr. arr. Prereq: Completion of 6 credits in chemistry at the 300 level or higher and permission of instructor. No more than 9 credits of Chem 490 may count toward graduation.

Chem 498. Cooperative Education. Cr. F. F.S.S. Prereq: Permission of the Department cooperative education coordinator; senior classification. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Chem 499. Senior Research. Cr. arr. Repeatable. Prereq: Permission of instructor with whom student proposes to work. Preparation and characterization of inorganic and organometallic compounds by modern research techniques.

Chem 503. Bioorganic Chemistry. (Cross-listed with BBMB). (2-0) Cr. 2. Alt. S., offered 2010. Prereq: 402 or BBMB 405. Essential elements: transport and storage ions and proteins; the structure and function of all chemistries, physics, and mathematics courses. Research in chosen area of chemistry, with final written report as senior thesis. This course should be elected for two consecutive semesters. For students majoring in chemistry. No more than Six total credits for Chem 399 and 499 may count toward graduation.

Courses primarily for graduate students, open to qualified undergraduate students

Chem 505. Physical Inorganic Chemistry. (3-0) Cr. 3. S. Prereq: 402 or 502 and 324. Elements group theory and molecular orbital theory applied to inorganic chemistry. Spectroscopic methods of characterization of inorganic compounds and organometallic compounds.

Chem 511. Advanced Quantitative Analysis. (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 318 and 316L. General methods of quantitative inorganic and organic analysis. Aqueous and nonaqueous titrimetry; selective reagents; sampling and sample dissolution; modern instrumentation; sensors; atomic and molecular microscopy; bioanalytical methods; data evaluation; chemometrics; and analytical literature.

Chem 516. Analytical Separations. (3-0) Cr. 3. F. Prereq: 316 and 316L, 324, 322L. Principles and examples of inorganic and organic separation methods applied to analytical chemistry. Solvent extraction, volatilization, ion exchange, liquid and gas chromatography, and electrophoresis.

Chem 538. Physical Organic Chemistry II. (3-0) Cr. 3. F. Prereq: 537. Surface intermediates including cations, anions, carbones, and radicals.

Chem 561. Fundamentals of Quantum Mechanics. (4-0) Cr. 4. F. Prereq: 402. Schroedinger equation and exact solutions; square wells and barriers; harmonic oscillator; the hydrogen atom; atomic orbitals; orbitals including angular momenta; time-independent and time-dependent perturbation theory; Schrödinger and Heisenberg representations; unitary operators; interaction picture, density matrix.

Chem 562. Fundamentals of Atomic and Molecular Quantum Mechanics. (4-0) Cr. 3. S. Prereq: 561. credit or enrollment in 583. Variational method, many electron atoms; addition of angular momentum, self-consistent field method; atomic orbitals in closed shells, linear combinations of atomic orbitals, origin of chemical bonding, many-electron diatomic and polyatomic molecules, treatments of electron correlation, approximation methods.

Chem 563. Statistical Mechanics. (3-0) Cr. 3. S. Prereq: 325. Microscopic and macroscopic properties, laws of thermodynamics, ensembles and distribution functions, applications to gases, solids, and chemical equilibrium.
168

2009-2011

Chemistry

(3-0) Cr. 3. Alt. S., offered 2010. Prereq: 505 or 562.
Maxwell’s field equations, interaction of light with
matter including time-dependent perturbation theory,
microwave, vibrational (infra-red, Raman) and electronic spectroscopies, symmetry derived selection
rules, special lineshapes and introduction to nonlinear
and coherent laser spectroscopies.
Chem 571. Solid-State Chemistry. (2-0) Cr. 2. Alt. S.,
offered 2011. Prereq: 301, 324. A study of solid state
materials including structures, bonding, defects, disorder, phase transitions, ionic mobility, metal-insulator
transitions, band theory, synthesis and intercalation.
Chem 572. Spectrometric Identification of Organic
Compounds. (2-3) Cr. 3. F. Prereq: 332. Principles of
infrared, ultraviolet, nuclear magnetic resonance, and
mass spectroscopy as applied to organic chemistry.
Chem 574. Organometallic Chemistry of the Transition Metals. (2-0) Cr. 2. Alt. S., offered 2010. Prereq:
301, 332. Transition metal complexes of ligands such
as cyclopentadienyl, olefins, acetylenes, benzenes,
and carbon monoxide. Homogeneous catalysis.
Chem 576. Surface Chemistry. (3-0) Cr. 3. Alt. F.,
and techniques of characterization. Idealized surface
lattices, surface tension, Wulff plots, work function,
adsorbate-adsorbate interactions, 2D phase diagrams,
diffusion, thin film growth, adsorption and desorption
mechanisms/energetics/kinetics, adsorption isotherms, vacuum techniques, electron- and ion-based
spectroscopies for surface analysis (including AES,
FIM, XPS, UPS, EXAFS, EELS, SIMS, LEED and STM).
Chem 577. Mass Spectrometry. (3-0) Cr. 3. S. Prereq:
Permission of instructor. Basic physics, instrumentation, chemical and biological applications of mass
spectrometry.
(2-0) Cr. 2. Alt. F., offered 2010. Prereq: 324. Rates and
mechanisms; reversible, consecutive, and competing
reactions; chain mechanisms; kinetic isotope effects;
very rapid reactions; acid-base catalysis, theories of
unimolecular reactions; transition State and Marcus
theories.
Chem 579. Introduction to Research in Chemistry.
(1-0) Cr. R. F.S. Introduction to the various areas of
research in chemistry at Iowa State University.
Chem 580. Introduction to Computational Quantum Chemistry. (3-0) Cr. 3. Alt. F., offered 2009.
Prereq: 324. Basic principles of quantum mechanics,
schrodinger equation. Hartree-Fock/molecular orbital
theory, introduction to group theory, introduction to
modern methods of computational chemistry; applications include molecular structure, potential energy
surfaces and their relation to chemical reactions; molecular spectroscopy, photochemistry, solvent effects
and surface chemistry.
Chem 581. Principles of Lasers and Optics. (3-0)
Students with weak background should take Chem
580. For students working with lasers and optics;
stimulated adsorption and emission based on the
classical electron oscillator model; population inversion, laser amplification; laser pumping; oscillation
and cavity modes; laser beam characterization; linear
propagation; design of laser resonators, ray and wave
optics; nonlinear optics.
Chem 583. Chemical Group Theory. (1-0) Cr. 1. F.
Prereq: 324. Basic concepts and theorems, representation theory; point groups, molecular orbitals,
molecular states, molecular vibrations, rotation group
and angular momenta; space groups and crystals;
permutation group, antisymmetry, and spin states.
Chem 589. Current Topics in Chemistry. (1-0)
Cr. R. F.S. Presentation of recent literature and chemical problems under current investigation.
Chem 599. Nonthesis Research. Cr. arr. Prereq:
Permission of instructor concerned.

Courses for graduate students
Chem 501L. Inorganic Preparations. (0-3) Cr. 1.
F. Prereq: 402. Preparation and characterization of
inorganic and organometallic compounds by modern
research techniques.
(Dual-listed with 402). (3-0) Cr. 3. F. Prereq: 301; 331
recommended. Chemistry of the d and f metals.
Structure, bonding, electronic spectra, and reaction
mechanisms. Aspects of organometallic, solid state,
and bioinorganic chemistry.
Chem 503. Bioinorganic Chemistry. (Cross-listed
with BBMB). (2-0) Cr. 2. Alt. S., offered 2010. Prereq:
402 or BBMB 405. Essential elements: transport and
storage of ions and of oxygen; metalloenzymes and
metallocoenzymes; electron-transfer processes in
respiration and photosynthesis; metabolism of nonmetals and redox processes involved in it; medicinal
aspects of inorganic chemistry.
Chem 505. Physical Inorganic Chemistry. (3-0)
Cr. 3. S. Prereq: 402 or 502 and 324. Elementary
group theory and molecular orbital theory applied
to inorganic chemistry. Spectroscopic methods of
characterization of inorganic compounds and organometallic compounds.
Chem 511. Advanced Quantitative Analysis. (3-0)
Cr. 3. Alt. S., offered 2010. Prereq: 316 and 316L.
General methods of quantitative inorganic and organic
analysis. Aqueous and nonaqueous titrimetry; selective reagents; sampling and sample dissolution; modern instrumentation; sensors; atomic and molecular
microscopy; bioanalytical methods; data evaluation;
chemometrics; and analytical literature.
(3-0) Cr. 3. F. Prereq: 316 and 316L, 324, and 322L.
Principles of convective-diffusional mass transport in
electroanalysis. Applications of potentiometry, voltammetry, and coulometry. Introduction to heterogeneous and homogeneous kinetics in electroanalysis.
Analog and digital circuitry. Interfacing.
Chem 513. Analytical Molecular and Atomic
Spectroscopy. (3-0) Cr. 3. S. Prereq: 316 and 316L,
324, 322L. Introduction to physical optics and design
of photometric instruments. Principles of absorption,
emission, fluorescence, and Raman Spectroscopy.
Error and precision of optical methods. Ultraviolet,
visible, and infrared methods of qualitative and quantitative organic and inorganic analysis.
Chem 516. Analytical Separations. (3-0) Cr. 3. F.
Prereq: 316 and 316L, 324, 322L. Principles and examples of inorganic and organic separation methods
applied to analytical chemistry. Solvent extraction,
volatilization, ion exchange, liquid and gas chromatography, and electrophoresis.
Chem 531. Organic Synthesis I. (2-0) Cr. 2. S. Prereq:
Chem 532. Organic Synthesis II. (2-0) Cr. 2. F. Prereq: 531. Synthesis of complex organic compounds
including natural products.
Chem 537. Physical Organic Chemistry I. (3-0) Cr. 3.
F. Prereq: 332. Molecular structure, stereochemistry,
introduction to reaction mechanisms, thermodynamic
and kinetic data, linear free energy relationships,
isotope effects, orbital symmetry.
Chem 538. Physical Organic Chemistry II. (3-0)
Cr. 3. S. Prereq: 537. Survey of reactive intermediates
including cations, anions, carbenes, and radicals.
Chem 540. Seminar in Forensic Sciences. (1-0)
Cr. 1. Repeatable. S. Prereq: Chem 231 or graduate
enrollment. Seminars by professional criminalists, research scientists, Certificate students, and educators.
Emphasis on opportunities for research and development, citizen involvement, and educational outreach
related to forensic science. Weekly report required.
Chem 542. Independent Research and Presentation
in Forensic Science. (1-0) Cr. 1. S. Prereq: Enrollment
in the Graduate Certificate in Forensic Sciences.

Research topic approved by course instructor. Written
and oral reports required. Oral report given in forensics seminar, Chem 540.
Chem 550. Safety in the Chemical Laboratory.
(1-0) Cr. 1. S. Prereq: 332L. Introduction to laboratory
safety and chemical hygiene. Use of engineering
controls and personal protective equipment. Chemical
Satisfactory-fail only.
Chem 555. Teaching College Chemistry. (2-0)
Cr. 2. Alt. S., offered 2010. Prereq: Graduate or senior
classification.. Methods of instruction, strategies and
techniques for effective teaching and learning along
with practice teaching in undergraduate chemistry recitation and laboratory courses. Cooperative
learning, guided-inquiry, learning cycles, conceptual
change, models and modeling, concept maps, visualization, computer simulations, web-based delivery
systems, and learning theories.
(4-0) Cr. 4. F. Prereq: 324. Schroedinger equation and
exact solutions; square wells and barriers; harmonic
oscillator; the hydrogen atom; atomic orbitals; operators including angular momenta; time-independent
and time-dependent perturbation theory; Schroedinger and Heisenberg representations; unitary operators;
interaction picture, density matrix.
Chem 562. Fundamentals of Atomic and Molecular
Quantum Mechanics. (3-0) Cr. 3. S. Prereq: 561,
credit or enrollment in 583. Variational method, many
electron atoms; addition of angular momentum,
self-consistent field method for open and closed
shells, linear combinations of atomic orbitals, origin of
chemical bonding, many-electron diatomic and polyatomic molecules, treatments of electron correlation,
approximation methods.
Chem 563. Statistical Mechanics. (3-0) Cr. 3. S.
Prereq: 325. Microscopic and macroscopic properties,
laws of thermodynamics, ensembles and distribution
functions, applications to gases, solids, and chemical
equilibrium.
(3-0) Cr. 3. Alt. S., offered 2010. Prereq: 505 or 562.
Maxwell’s field equations, interaction of light with
matter including time-dependent perturbation theory,
microwave, vibrational (infra-red, Raman) and electronic spectroscopies, symmetry derived selection
rules, special lineshapes and introduction to nonlinear
and coherent laser spectroscopies.
Chem 571. Solid-State Chemistry. (2-0) Cr. 2. Alt. S.,
offered 2011. Prereq: 301, 324. A study of solid state
materials including structures, bonding, defects, disorder, phase transitions, ionic mobility, metal-insulator
transitions, band theory, synthesis and intercalation.
Chem 572. Spectrometric Identification of Organic
Compounds. (2-3) Cr. 3. F. Prereq: 332. Principles of
infrared, ultraviolet, nuclear magnetic resonance, and
mass spectroscopy as applied to organic chemistry.
Chem 574. Organometallic Chemistry of the Transition Metals. (2-0) Cr. 2. Alt. S., offered 2010. Prereq:
301, 332. Transition metal complexes of ligands such
as cyclopentadienyl, olefins, acetylenes, benzenes,
and carbon monoxide. Homogeneous catalysis.
Chem 576. Surface Chemistry. (3-0) Cr. 3. Alt. F.,
and techniques of characterization. Idealized surface
lattices, surface tension, Wulff plots, work function,
adsorbate-adsorbate interactions, 2D phase diagrams,
diffusion, thin film growth, adsorption and desorption
mechanisms/energetics/kinetics, adsorption isotherms, vacuum techniques, electron- and ion-based
spectroscopies for surface analysis (including AES,
FIM, XPS, UPS, EXAFS, EELS, SIMS, LEED and STM).
Chem 577. Mass Spectrometry. (3-0) Cr. 3. S. Prereq:
Permission of instructor. Basic physics, instrumentation, chemical and biological applications of mass
spectrometry.



Chem 579. Introduction to Research in Chemistry. (1-0) Cr. R. F.S. Introduction to the various areas of research in chemistry at Iowa State University.

Chem 580. Introduction to Computational Quantum Chemistry. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 324. Basic principles of quantum mechanics, schrodinger equation, Hartree-Fock/molecular orbital theory, introduction to group theory, introduction to modern methods of computational chemistry; applications include molecular structure, potential energy surfaces and their relation to chemical reactions; molecular spectroscopy, photochemistry, solvent effects and surface chemistry.

Chem 581. Principles of Lasers and Optics. (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 324, Phys 222. Students with weak background should take Chem 580. For students working with lasers and optics; stimulated adorption and emission based on the classical electron oscillator model; population inversion, laser amplification, laser pumping; oscillation and cavity modes; laser beam characterization; linear propagation; design of laser resonators, ray and wave optics; nonlinear optics.

Chem 583. Chemical Group Theory. (1-0) Cr. 1. F. Prereq: 324. Basic concepts and theorems, representation theory; point groups, molecular orbitals, molecular states, molecular vibrations, rotation group and angular momenta; space groups and crystals; permutation group, antisymmetry, and spin states.

Chem 589. Current Topics in Chemistry. (1-0) Cr. R. F.S. Present recent literature and chemical problems under current investigation.

Chem 600. Seminar in Inorganic Chemistry. (1-0) Cr. 1. Repeatable. F.S. Prereq: Permission of instructor.

Chem 601. Selected Topics in Inorganic Chemistry. (2-0) Cr. arr. F.S. Prereq: Permission of instructor. Topics such as molecular structure and bonding; organometallic compounds; physical techniques of structure determination; nonaqueous solutions; Zintl phases; transition-metal oxides; free-radical reactions; electron transfer reactions; metal-metal bonding; and bioinorganic chemistry of nucleic acids.

Chem 611. Seminar in Analytical Chemistry. (1-0) Cr. 1. Repeatable. F.S. Prereq: Permission of instructor.

Chem 619. Special Topics in Analytical Chemistry. (2-0) Cr. arr. Repeatable. F.S. Prereq: Permission of instructor. Raman Spectroscopy, sensors, spectro-electrochemistry, capillary electrophoresis, analytical plasmas, chromometrics and bioanalytical chemistry.

Chem 632. Selected Topics in Organic Chemistry. (2-0) Cr. arr. Repeatable. F.S. Prereq: 527. Topics of current interest in organic chemistry such as spectroscopy, physical organic chemistry, photochemistry, organometallic chemistry, mechanisms of oxidation and reductions, modern organic synthesis, reactive intermediates, bioorganic chemistry, and polymers.

Chem 660. Seminar in Physical Chemistry. (1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor.

Chem 667. Special Topics in Physical Chemistry. (2-0) Cr. arr. F.S. Prereq: Permission of instructor. Advanced and recent developments in physical chemistry are selected for each offering.

Civil Engineering

(Assigned by the Department of Civil, Construction and Environmental Engineering)

James Alleman, Chair of Department

Distinguished Professors: Klaiber

Distinguished Professors (Emeritus): Baumann, Cleasby, Handy

University Professors (Emeritus): Loehne

Professors: Allemann, Fanous, Jaselski, Kannel, Maze, Nambisan, Ong, Pommet, Porter, Sarkar, Schaefer, Souleyrette, Van Leeuwen, Wipf

Professors (Emeritus): Bergeson, Brewer, Carstens, Greimann, Hardy, Jellinger, Kao, Lee, Mashaw, Mickel, Morgan, Northup, Oulman, Sanders

Professors (Collaborators): Surampalli

Associate Professors: Abendroth, Baenziger, Bhandari, Ellis, Gu, Hallmark, Jahren, Koziel, Rehmann, Siritan, Strong, Sun, Wang, White, Williams

Associate Professors (Emeritus): Chase, Mercier, Sheeler, Ward

Assistant Professors: Aslroch, Bolluyt, Ceylan, Gkritza, Grewel, Kandil, Rouse, Shane

Assistant Professors (Adjunct): Phares, Plazak, Schollroth, Smadi, Taylor

Instructors (Adjunct): Amenson, Gaunt

Senior Lecturers: Cormicle, Jones, Sirotiak, Walton

Lecturers: Baker, Cackler, Hawkins, Hunacek, Mescher, Perkins, Smith, Stout

Clinician: Gopalakrishnan

Undergraduate Study

For undergraduate curriculum in civil engineering leading to the degree bachelor of science, see College of Engineering, Curriculum. This curriculum is accredited by the Engineering Accreditation Commission of the ABET.

Civil engineering consists of the application of the laws, forces, and materials of nature to the planning, design, construction, maintenance, and operation of public and private facilities, subject to economic, social, and environmental constraints. Commonly included are transportation systems; bridges and buildings; water supply, pollution control, irrigation, and drainage systems; river and harbor improvements; dams and reservoirs. Civil engineering also includes the planning, design, and responsible execution of surveying operations, and the location, delimitation, and delineation of physical and cultural features on the surface of the earth. Research, testing, sales, management, and related functions are also a part of civil engineering. Work on the campus is supplemented by inspection trips which furnish an opportunity for firsthand study of engineering systems in operation, as well as projects under construction.

Environmental engineering, as a specialty area in civil engineering, is concerned with protecting the public and natural health; providing safe, palatable and ample water supply; management of solid and hazardous waste; proper treatment and disposal of domestic and industrial wastewaters and waste; resource recovery; providing adequate drainage of urban and rural areas for sanitation; and the control of water quality, soil contamination, and air pollution. At the undergraduate level, the study of various environmental and water resource engineering topics is part of the course of study leading to the Bachelor's degree in civil engineering.

Program Goal

Consultation with an industrial advisory board of employers of civil engineers, with a broad base of civil engineering educators, and with students and alumni has yielded a continuous process of program planning, program assessment, curriculum development, and instructional development to produce an integrated, learning-based curriculum. The curriculum listed in this catalog has the academic program goal of developing an effective program that fulfills student educational needs and that equips and empowers qualified students for a successful career in civil or environmental engineering.

Program Objectives

To achieve the program goal, the Department has developed objectives intended to result in the following outcomes such that graduates:

1. have a comprehensive education in the fundamentals of civil engineering,
2. are prepared to undertake civil engineering design tasks,
3. demonstrate effective communication skills and teamwork in multidisciplinary projects,
4. play a constructive role to address the needs of Society and the environment, and
5. are motivated to continue their professional development.

The faculty encourages the development of the student's professional skills through participation in cooperative education, internships, or progressive summer engineering employment. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue the bachelor degree and a master of science in Civil Engineering or a master of business administration in the College of Business Administration.

Graduate Study

The Department of Civil, Construction and Environmental Engineering offers work for the master of science and doctor of philosophy degrees with a major in civil engineering with areas of specialization in structural engineering, environmental engineering, construction engineering and management, geotechnical engineering, civil engineering materials, and transportation engineering. The department also offers minor work to students from other engineering departments.

Candidates for the degree master of science are required to satisfactorily complete 30 credits of acceptable graduate work, including preparation of a thesis or creative component.

Candidates for the doctor of philosophy degree refer to the department’s home page and/or the department’s Graduate Handbook for degree options and credit requirements. The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of engineering students at this university. However, because of the diversity of interests within the graduate programs in civil engineering, a student may qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering. Supporting work will be required depending upon the student’s background and area of interest. A prospective graduate student is urged to specify the degree program and area of specialization in which he or she is interested on the application for admission. The department participates in the interdepartmental majors in transportation (master of science only), environmental science, and bio-renewable resources and technology (see Index).
The Department of Civil, Construction and Environmental Engineering offers a graduate certificate in environmental engineering. Completion of the certificate requires at least twelve credits including 520, 521, 591 (R) seminar, and any two courses related to environmental engineering from those available from the departments of Civil, Construction and Environmental Engineering, Agricultural and Biosystems Engineering, and Chemical and Biological Engineering.

Courses primarily for undergraduate students

C E 101. Technical Lecture. Cr. R. F.S. (1-0) Discussion of various phases of civil engineering. For transfer students only. Evaluation of transfer credits and discussion of graduation requirements. Satisfactory-fail only.

C E 105. Introduction to the Civil Engineering Profession. (1-0) Cr. 1. F.S. Overview of the nature and scope of the civil engineering profession. Exploration of the various specialty areas within civil engineering. Bloom's Taxonomy and creativity. Departmental rules, student services operations, degree requirements, educational objectives, program of study planning, career options, and student organizations.

C E 120. Civil Engineering Learning Community. Cr. R. Repeatable. Introduction of first-year students into the Civil Engineering program. Assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the Civil Engineering profession. Completed both individually and in learning teams under the direction of faculty and peer mentors. Satisfactory-fail only.

C E 160. Engineering Problems with Computational Laboratory. (2-2) Cr. 3. F.S. Prereq: Math 141, 142 or satisfactory scores on mathematics placement assessments; credit or enrollment in Math 165. Formulation of engineering problems using spreadsheets and Visual Basic for Application for solution. Presenting results using word processing, tables, and graphs. Introduction to engineering economics and statistics. Civil engineering examples.

C E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services. First professional work period in the cooperative education program. Students must register for this course before commencing work. Satisfactory-fail only.

C E 305. Professional Issues in Civil Engineering. (3-0) Cr. 3. F.S. Prereq: 205. Civil engineering history and heritage. Professionalism, licensure, liability, ethics, leadership, teamwork, critical thinking, and social responsibility in the practice of civil engineering.

Engineering business management principles, including organizational structures and business economics. Applications and impacts of regulations in civil engineering. Written and oral technical presentations.

C E 306. Project Management for Civil Engineers. (2-3) Cr. 3. F.S. Prereq: 305. Project management, including work breakdown structures, cost estimating, and scheduling. Civil engineering project life cycle, including planning, design, construction, and maintenance processes. Techniques in interpretation of contract documents and in estimating quantities.

C E 326. Principles of Environmental Engineering. (2-3) Cr. 3. F.S. Prereq: 166, credit or enrollment in E M 378. Introduction to environmental problems, water quality indicators and requirements, potable water quality and quantity objectives, water sources and treatment methods; water pollution control objectives and treatment methods; survey of solid and hazardous waste management and air pollution control. Nonmajor graduate credit.

C E 350. Introduction to Transportation Planning. (3-0) Cr. 3. S. Prereq: 3 credits in statistics, junior classification. An introductory course for planning urban and regional transportation systems within government. Applications of economic theories of transportation demand, travel behavior, modeling and project control. Civil engineering applications. Trafﬁc engineering, land use, travel demand modeling and capacity analysis.

C E 360. Geotechnical Engineering. (2-3) Cr. 3. F.S. Prereq: E M 324, credit or enrollment in Geol 201. Introduction to soil engineering and testing. Identification and classification tests, soil water systems, principles of settlement, stresses in soils, and shear strength testing; slope stability, retaining walls, bearing capacity. Nonmajor graduate credit.

C E 382. Design of Concretes. (2-3) Cr. 3. F.S. Prereq: Credit or enrollment in 360. Physical and chemical properties of bituminous, portland, and other cements; aggregate properties and blending; mix design and testing of concretes, admixtures, mixing, handling, placing and curing. Principles of pavement thickness design. Nonmajor graduate credit.

C E 383. Design of Portland Cement Concrete. (0-2) Cr. 1. F.S. Prereq: Credit or enrollment in 360. For Con E students only. Physical and chemical properties of portland cement and p.c. concrete. Mix design and testing of p.c. concrete.

C E 388. Sustainable Engineering and International Development. (Cross-listed with A E, E E, E M, Mat E). (2-2) Cr. 3. F.S. Prereq: Junior classification in engineering. Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, ecology analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as non-government organizations (NGOs). Course readings, final project/design report.

C E 396. Summer Internship. Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services, completion of two terms in residence in civil engineering or related field. Summer professional work period. Students must register for this course prior to commencing work. Satisfactory-fail only.

C E 398. Cooperative Education. Cr. R. F.S.S. Prereq: 298, permission of department and Engineering Career Services. Second professional work period in the cooperative education program. Students must register for this course prior to commencing work. Satisfactory-fail only.

C E 403. Program and Outcome Assessment. Cr. R. F.S. Prereq: Verification of undergraduate application for graduation by the end of the first week of civil engineering senior year. Applications of statistics from the approved departmental list. Assessment of learning outcomes. Course evaluation. Not available for graduation credit for students in civil engineering.

C E 411. Bioprocessing and Bioproducts. (Dual-listed with 511). (Cross-listed with A E, BioE, BSE). (3-0) Cr. 3. F.S. Prereq: A E 218 or equivalent; Math 160 or 168, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production. Taxonomy, kinetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

C E 417. Land Surveying. (2-3) Cr. 3. S. Prereq: 111. Legal principles affecting the determination of land boundaries, public domain survey systems. Locating sequential and simultaneous conveyances. Record research, plat preparation, and land description. Study of selected court cases. Nonmajor graduate credit.

C E 420. Environmental Engineering Chemistry. (Dual-listed with 520). (2-3) Cr. 3. F.S. Prereq: 326, Chem 175 and 177, Math 166, credit or enrollment in Chem 413 or physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

C E 424. Air Pollution. (Dual-listed with 524). (Cross-listed with EnSci, A E). (1-0) Cr. 1. F. Prereq: Either Phys 221 or Chem 178 and either Math 166 or 3 credits in statistics. Senior classification or above. 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
A. Air quality and effects of pollutants
B. Climate change and causes
C. Transportation controls
D. Off-gas treatment technology
E. Agricultural sources of pollution

C E 428. Water and Wastewater Treatment Plant Design. (2-2) Cr. 3. S. Prereq: 326. Physical, chemical and biological processes for the treatment of water and wastewater including coagulation and flocculation, sedimentation, filtration, adsorption, chemical oxidation/disinfection, fixed film and suspended growth biological processes and sludge management.

C E 483. Pavement Analysis and Design. (Dual-listed with 583). (3-0) Cr. 3. F. Prereq: 360 and 382. Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life-cycles of pavements, and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of traffic loads, and their application on pavement performance and economic evaluation of pavement systems. Nonmajor graduate credit.

C E 486. Civil Engineering Design II. (1-4) Cr. 3. F.S. Prereq: 326, 332 or 334, 382; credit or enrollment in 428 or 453, and 485. The engineering design computations, case histories of design inadequacies, environmental impact, safety and health in the workplace, ethics, contract documents, design plans and specifications, teamwork, synthesis of previous coursework in a group project, oral presentations.

C E 498. Cooperative Education. Cr. R. Repeatable. F.S.S. Prereq: 398; permission of department and Engineering Career Services. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work. Satisfactory-fail only.

Courses primarily for graduate students, open to qualified undergraduate students

C E 501. Preconstruction Process Engineering and Management. (3-0) Cr. 3. F. Prereq: Con E 221 and 421. Application of engineering and management control techniques to construction project development from conceptualization to notice to proceed. Determinants of construction project success, conceptual estimating, design and engineering planning for automated construction techniques, constructability review procedures, planning for safety, value engineering.

C E 502. Construction Project Engineering and Management. (3-0) Cr. 3. F. Prereq: Con E 221 and 421. Application of engineering and management control techniques to construction projects. Construction project control techniques, equipment selection and utilization, project administration, construction process simulation, Quality Management, and productivity improvement programs.

C E 503. Construction Management Functions and Processes. (3-0) Cr. 3. F. Prereq: Con E 421. Analysis of critical construction management skills. Analysis of organizational systems related to construction management. Case studies. Analysis of theories of motivation, planning, leadership, organizational change, etc., as they relate to field construction operations.

C E 506. Case Histories in Construction Docu- ments. (3-0) Cr. 3. Prereq: Con E 221, credit or enrollment in Con E 421. Study of cases involving disputes, claims, and responsibilities encountered by manage ment in construction projects. Analysis of methods of resolving differences among the owner, architect, engineer, and construction contractor for a project.

C E 510. Information Technologies for Construc tion. (3-0) Cr. 3. Prereq: Con E 421, Engr 160 or C E 160 or equivalent. Information technologies including microcomputer based systems, management information systems, automation technologies, computer- aided design, and expert systems and their application in the construction industry. Overview of systems acquisition, communications, and networking.

C E 511. Bioprocessing and Bioprod ucts. (Dual-listed with 411). (Cross-listed with A E, BRT, BSE). (3-0) Cr. 3. F. Prereq: A E 216 or equivalent, Math 160 or 161, one of Chem 167 or higher, Biol 173 or 211 or higher or BRT 501, senior or graduate classification. Sustainability, cleaner production. Taxonomy, genetics, metabolism, aerobic and anaerobic fermentation. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis. Term paper for graduate level only.

C E 520. Environmental Engineering Chemistry. (Dual-listed with 420). (Cross-listed with EnSci). (3-0) Cr. 3. Prereq: Chem 173 or 178. Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions and mass transfer principles. Finding and analyzing laboratory practicals and group projects required. Term paper and oral presentation for graduate level only.

C E 523. Physical-Chemical Treatment Process. (Cross-listed with EnSci). (2-2) Cr. 3. Prereq: 520. Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection. Recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

C E 524. Air Pollution. (Dual-listed with 424). (Cross-listed with A E, EnSci). (1-0) Cr. 1. Prereq: Either Phys 221 or Chem 178 and either Math 166 or 3 credits in statistics. Senior classification or above. 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
A. Air quality and effects of pollutants
B. Climate change and disasters
C. Transportation constraints
D. Off-gas treatment technology
E. Agricultural sources of pollution

(Cross-listed with EnSci. (3-0) Cr. 3. Prereq: 4 courses in natural, biological or engineering sciences and senior or above classification. Review of federal and state requirements for environmental impact assessment, requirements of the National Environmental Policy Act and Council on Environmental Quality, methods of evaluating the environmental impacts on the physical, biological, socioeconomic, cultural/historical, human health and psychological environments, public participation in EIS, review and evaluate project environmental impact statements. An environmental impact assessment of a proposed project will be completed in small teams.)

C E 576. Environmental Flows. (3-0) Cr. 3. Prereq: EM 376 or equivalent. Analysis and applications of flows in civil engineering, environmental engineering, and water resources. Primary topics include conservation laws, laminar flow, turbulence, mixing, diffusion, dispersion, water waves, and boundary layers. Associated applications include particle settling, transfer at air-water and water-sediment boundaries, flow and friction in pipes and open channels, contaminant transport, waves in lakes, jets, plumes, and salt wedges.

C E 583. Pavement Analysis and Design. (Dual-listed with ABE 493). (3-0) Cr. 3. Prereq: 360 and 382. Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems.

C E 587. Advanced Portland Cement Concretes. (2-3) Cr. 3. Prereq: 382 or 383. Hydraulic cements, aggregates, admixtures, and mix design; concrete production, quality control, early-age properties and durability. Concrete distress examination, identification, prevention, and nondestructive testing; advanced concrete technology; high-strength and high performance concrete.

C E 594. Special Topics in Construction Engineering and Management. Cr. arr. Repeatable. Prereq: Con E 322, Con E 338, and permission of instructor. Some topics have a set number of credits and some topics may have a variable number of credits. Emphasis for a particular offering will be selected from the following topics:
A. Planning and Scheduling
B. Computer Applications for Planning and Scheduling
C. Cost Estimating
D. Computer Applications for Cost Estimating
E. Project Controls
F. Computer Applications for Project Controls
G. Integration of Planning, Scheduling and Project Controls
H. Trenchless Technologies
K. Electrical and Mechanical Construction
L. Advanced Building Construction Topics
M. Design Build Construction
N. Industrial Construction
O. Highway and Heavy Construction
P. Advanced Technologies
Q. Construction Quality Control
R. Risk Management
S. Building Information Modeling

C E 595. Research Methods in Construction Engineering and Management. (0-0) Cr. 1. Prereq: Credit or enrollment in 501, 502, 503, or 569. Assigned readings and reports on research methods to solve construction engineering and management problems such as robotics, project controls, automation, etc. Identification of research methods and priorities, selection and development of research design, and critique of research in construction engineering and management.

Courses for graduate students
C E 622. Advanced Topics in Environmental Engineering. (2-0) Cr. 2. Repeatable. Prereq: Permission of environmental engineering graduate faculty. Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics:
A. Water Pollution Control
B. Water Treatment
C. Solid and Hazardous Waste
D. Water Resources

C E 649. Advanced Topics in Structural Engineering. (3-0) Cr. 3. Repeatable. Prereq: Permission of structural engineering graduate faculty. Advanced concepts in structural engineering topics. Emphasis for a particular offering will be selected from the following topics:
A. Behavior of Metal Structures
B. Design of Concrete Shells
C. Advanced Matrix Analysis of Structures
D. Dynamic Design of Structures
E. Reliability Assessment of Structures.

C E 697. Engineering Internship. Cr. R. Repeatable. Prereq: Permission of coop advisor, graduate classification. One semester and one summer maximum per academic year professional work period. Satisfactory-fail only.

Classical Studies
www.iastate.edu/~classics

(Interdepartmental Undergraduate Program)
Program Committee: M. Henry, Chair; G. Betcher, T. Butler, J. Cunnally, J. Goodman, M. Graham, J. Jagge, D. Holland, R. Meyer, M. Mook

The Classical Studies program is a cross-disciplinary program in the College of Liberal Arts and Sciences which offers an integrated curriculum of courses in the languages, literatures, history, and thought of ancient Greece and Rome from prehistoric times to the reign of the Emperor Constantine. Complete and current information about the Program may be found on-line at: www.iastate.edu/~classics/

Courses in Classical Studies provide background for students whose major fields of study or career interests include Anthropology, English, World Languages and Cultures, History, Music, Philosophy, Women's Studies, law, medicine, material culture, political science, the life sciences and related fields. Students who wish to pursue an interdisciplinary major in Classical Studies should consult the Program Chair.

A student who wishes to declare a minor must successfully complete the following requirements: (a) Greek 102 or Latin 102; (b) Cl St 273 or 275; (c) Three additional courses in the courses listed below (primary or departmental), or as approved by the program committee

Courses primarily for undergraduate students
Cl St 273. Greek and Roman Mythology. (3-0) Cr. 3. F.S. Survey of the legends, myths of the classical world with an emphasis on the principal gods, and heroes, and their relation to ancient social, psychological, and religious practices; some attention may be given to important modern theories.

H. Honors (4-0) Cr. 4.

Cl St 275. The Ancient City. (3-0) Cr. 3. S. Examination of ancient urban life, including historical context, physical space, material culture, religion, literature, and art; examination of civic identity (the “polis”). Contrast between the concepts of urban and rural. Examples drawn from specific ancient cities; some attention to modern methods of recovering the conditions of ancient urban life and the fundamental concept of the city in European history.

H. Honors. (4-0) Cr. 4.

Cl St 304. Cultural Heritage of the Ancient World. (Cross-listed with Hist). (3-0) Cr. 3. Pr. Prereq: Sophomore classification. Historical examination of art, literature, thought, and religious beliefs of major civilizations of the ancient Mediterranean countries until the end of the 8th century.

Cl St 310. Ancient Philosophy. (Cross-listed with Phil). (3-0) Cr. 3. F. Prereq: Phil 201. Survey of ancient Greek philosophy, focusing on the pre-Socratics, Plato, and Aristotle. Questions concerning being, knowledge, language, and the good life are treated in depth. Nonmajor graduate credit.

Cl St 350. Rhetorical Theories and Issues in Context. (Cross-listed with Eng, Sp Cmt). (3-0) Cr. 3. S. Prereq: Eng 250. Ideas about the relationship between rhetoric and society in contemporary and historical contexts. An exploration of classical and contemporary rhetorical theories in relation to selected topics that may include politics, gender, race, ethics, education, science, or technology.

Cl St 353. World Literature: Western Foundations through Renaissance. (Cross-listed with Engl). (3-0) Cr. 3. F. Prereq: Eng 250. Representative works from the drama, epic, poetry, and prose of the Ancient World through the late sixteenth century. May include Homer, Aeschylus, Sappho, Catullus, Dante, Marie de France, Boccaccio, Christine de Pizan, Cervantes, and others.

Cl St 367. Christianity in the Roman Empire. (Cross-listed with Relig). (3-0) Cr. 3. An historical introduction to the rise of Christianity in the Roman empire, with special attention to the impact of Greco-Roman culture on the thought and practice of Christians and the interaction of early Christians with their contemporaries. Nonmajor graduate credit.

Cl St 372. Greek and Roman Tragedy and Comedy. (3-0) Cr. 3. S. Prereq: 273 or 275 or one course in Latin or Greek or English 250. Greek and Roman drama from the beginnings until today. Readings in English from authors such as Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence, Seneca. Course may cover performance, theories of comedy and tragedy, recent and current expressions of the comic and tragic in film and other media.

H. Honors (4-0) Cr. 4.
CI St 373. Heroes of Greece, Rome, and Today. (3-0) Cr. 3. F. Prereq: 273 or 275 or one course in Latin or Greek or English 250. Cultural and political significance of ancient epic, especially in Greece and Rome. Course may include study of the heroic code in antiquity and its modern expressions including in film. Readings in English from authors such as Homer and Vergil.

H. Honors (4-0) Cr. 4.

CI St 374. Women in the Ancient Mediterranean World. (Cross-listed with Hist, W S). (3-0) Cr. 3. Repeatable. S. Prereq: Any one course in CI St, W S, Latin, or Greek. Chronological and topical survey of the status of women in the Ancient Mediterranean world; study of constructs of the female and the feminine. Readings from ancient and modern sources. Emphasis on either the Greek world and Hellenistic Egypt, or Hellenistic Egypt and Rome.

A. Hellenic World and Hellenistic Egypt
B. Roman World including Roman Egypt

CI St 376. Classical Archaeology. (Cross-listed with Hist, Relig). (3-0) Cr. 3. Repeatable. S. Chronological survey of the material culture of the ancient Greeks-Roman world and the role of archaeological context in understanding the varied aspects of ancient Greek or Roman culture. Among other topics, economy, architecture, arts and crafts, trade and exchange, religion and burial customs will be explored.

A. Bronze Age (Minoan and Mycenaean palatial cultures) and Early Iron Age Greece (ca 3000-700 BCE).
B. Archaic through Hellenistic Greece (ca 700-30 BCE).

CI St 383. Greek and Roman Art. (Cross-listed with Art H, Dan St). (3-0) Cr. 3. Greek art from Neolithic through Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

CI St 394. The Archaeology of Greece: An Introduction. (2-2) Cr. 2. S. Introduction to the topography, history, archaeology, monuments and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece, preparatory to study abroad in Greece (CI St 395).

CI St 395. Study Abroad: The Archaeology of Greece. Cr. arr. SS. Prereq: 394. Supervised on-site instruction in the archaeology, monuments, and art of Greece from the Bronze Age through the Ottoman period; attention given to the culture of modern Greece.

CI St 402. Greek Civilization. (Cross-listed with Hist). (3-0) Cr. 3. Prereq: Sophomore classification. Ancient Greece from the Bronze Age to the Hellenistic period; evolution of the Greek polis and its cultural contributions with a particular emphasis on the writings of Herodotus and Thucydides.

CI St 403. Roman Civilization. (Cross-listed with Hist). (3-0) Cr. 3. Prereq: Sophomore classification. Ancient Rome from the Regal Period to the Fall of the Western Empire; evolution of Roman institutions and Rome's cultural contributions studied through original sources. Nonmajor graduate credit.

CI St 404. Roman Social History. (Cross-listed with Hist). (3-0) Cr. 3. Prereq: Sophomore classification. Examines major topics in Roman social history during the late Republic and early Empire such as class, family, slavery, religion and the economy. Nonmajor graduate credit.

CI St 430. Western Political Thought: Plato to Machiavelli. (Cross-listed with Pol S). (3-0) Cr. 3. Prereq: 6 credits in political science, philosophy, or European History. Major concepts in original texts of classical, medieval, and renaissance authors: justice, community, moral nature, natural law, forests; Society outside the political order. Nonmajor graduate credit.

CI St 480. Seminar in Classical Studies. (3-0) Cr. 3. Prereq: 30 credits in Classical Studies or related courses. Permission of Program Chair. Advanced study of a selected topic in Classical Studies. Research paper or project selected by the student.

CI St 490. Independent Study. Cr. arr. Repeatable. Prereq: 7 credits in classical studies at the 300 level or higher; permission of the Program Chair. Designed to meet the needs of students who wish to study specific topics in classical civilization in areas where courses are not offered, or to pursue such study beyond the limits of existing courses.

Courses for graduate students, major or minor, open to qualified undergraduates

CI St 512. Proseminar in Ancient European History. (Cross-listed with Hist). (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Readings in European History.

A. Ancient (Same as Hist 512A)
B. CI St 594. Seminar in Ancient European History. (Cross-listed with Hist). (3-0) Cr. 3. Repeatable. Prereq: Permission of instructor. Topics vary each time offered.

A. Ancient (Same as Hist 594A)

Primary Courses (Offered by Other Departments)

Art H 383. Greek and Roman Art, See Art and Design.

Greek 101. Elementary Ancient Greek I. See World Languages and Cultures.

Greek 102. Elementary Ancient Greek II. See World Languages and Cultures.

Greek 201. Intermediate Classical Greek. See World Languages and Cultures.

Greek 332. Introduction to Classical Greek Literature. See World Languages and Cultures.

Greek 441. Advanced Readings in Greek Literature. See World Languages and Cultures.

Greek 442. Advanced Topics in Greek Literature. See World Languages and Cultures.

Greek 490. Independent Study. See Foreign Language and Literature website. (www.language.iastate.edu)

Hist 280. Introduction to History of Science I. See History.

Latin 101. Elementary Latin I. See World Languages and Cultures.

Latin 102. Elementary Latin II. See World Languages and Cultures.

Latin 201. Intermediate Latin. See World Languages and Cultures.

Latin 322. Introduction to Latin Literature. See World Languages and Cultures.

Latin 441. Advanced Readings in Latin Literature. See World Languages and Cultures.

Latin 442. Advanced Topics in Latin Literature. See World Languages and Cultures.

Latin 490. Independent Study. See World Languages and Cultures website. (www.language.iastate.edu)

Communication Studies

(Administered by the College of Liberal Arts and Sciences)

The Communication Studies Major

The communication studies major prepares students for careers in business and industry and graduate education. Students majoring in Communication Studies will find their career opportunities enhanced in fields requiring applied communication expertise, e.g., human resource management, personnel, public relations, training and development, sales, management, organizational development, business communication, law, and international and intercultural relations.

Communication Studies Majors must master a focused course of inquiry into the contemporary study of human communication. The Communication Studies major provides this focus through emphasis in applied communication theory and research in interpersonal, small group, organizational, and intercultural communication.

Communication Proficiency Requirement:

To meet the University's Communication Proficiency requirement, students are required to take Eng 302, 309, 314, or 415. An average of C is required in English 150, 250 (or 250H), and this additional writing course.

The Communication Studies Major

Core Introduction courses (15 credits)

1 Introduction to Communication Studies, ComSt 101
2 Introduction to Interpersonal Communication, ComSt 102
3 Introduction to Communication Research Methods, ComSt 203
4 Human Communication Theory, ComSt 301

Select one of these courses:

1 Professional Communication, ComSt 214
2 Conflict Management, ComSt 218
3 Fundamentals of Public Speaking, SpCm 212

Upper Division Requirements (Select five courses/15 credits)

1 Language, Thought and Action, ComSt 305
2 Intercultural Communication, ComSt 310
3 Relational Communication, ComSt 311
4 Organizational Communication, ComSt 314
5 Small Group Communication, ComSt 317
6 Nonverbal Communication, ComSt 325
7 Computer Mediated Communication, ComSt 330
8 Semantics, SpCm 305
9 Gender and Communication, ComSt 323

Select one of these seminars:

1 Communication Theory or Research, ComSt 404A
2 Interpersonal Communication, ComSt 404B
3 Small Group Communication, ComSt 404C
4 Organizational Communication, ComSt 404D
5 Intercultural Communication, ComSt 404E
6 Nonverbal Communication, ComSt 404F
7 Training and Development, ComSt 404G
8 Computer Mediated Communication, ComSt 404H

33 Total

3 Enhancement Requirement (4 credits)

Computer Applications, Com S 103

Recommended: Stat 101 or equivalent

Communication Studies. The requirements for a minor in ComSt may be fulfilled by credit in ComSt 101, ComSt 203, ComSt 301 plus at least 9 additional hours of communication studies, of which 6 credits are in courses numbered 300 or above. Students must earn a grade of C or better in all courses taken for the minor. No credits in 490, 499, or 590 may apply toward the minor.

Communication Studies (ComSt)

Courses primarily for undergraduate students

ComSt 101. Introduction to Communication Studies. (3-0) Cr. 3. An introduction to communication theory, the development and functions of communication, and a survey of interpersonal, small group, organizational, and intercultural communication.
ComSt 102. Introduction to Interpersonal Communication. (3-0) Cr. 3. Application of communication principles, theory, and research to the process of interpersonal communication; includes verbal, nonverbal, listening, conflict management, and communication skills most relevant to a broad range of interpersonal settings.

ComSt 203. Introduction to Communication Research Methods. (3-0) Cr. 3. An introduction to analyzing and conducting communication research. Includes theory development, statistics, and methodologies.

ComSt 214. Professional Communication. (3-0) Cr. 3. Communication theory and skill development in organizational settings. Emphasis on: interpersonal skill development, team and meeting facilitation, informational interviewing, and team presentations and self-assessment.

ComSt 218. Conflict Management. (3-0) Cr. 3. Explo- ration of communication theories, principles, and methods associated with effective conflict management.

ComSt 301. Human Communication Theory. (3-0) Cr. 3. Prereq: 101. Examination of the major theories related to human communication; with particular emphasis on theories underlying interpersonal, small group, organizational, and intercultural communication.

ComSt 305. Language, Thought and Action. (Cross-listed with Sp Cm, Ling). (3-0) Cr. 3. F.S.S. Prereq: Engl 250. The study of symbolic processes and how meaning is conveyed in words, sentences, and utterances; discussion of modern theories of meaning; and an exploration of relationships among language, thought and action. Nonmajor graduate credit.

ComSt 310. Intercultural Communication. (3-0) Cr. 3. Prereq: 101 or 102, 203, 301. Examines the theo- ries, principles and research on intercultural communica- tion to enhance cultural sensitivity and to recognize, accept, and adapt to cultural diversity. Interactive assignments.

ComSt 311. Relational Communication. (3-0) Cr. 3. Prereq: 102, 203, 301. A study of contemporary interpersonal communication theories and research. Emphasis on relational development research including initiation, maintenance, conflict management, and dissolution.

ComSt 314. Organizational Communication. (3-0) Cr. 3. Preq: 101 or 102, 203, 301. Theory and research in organizational communication; strategies for as- sessing and improving individual and organizational communication effectiveness; an understanding of how organizational meaning is created and sustained through human communication.

ComSt 317. Small Group Communication. (3-0) Cr. 3. Preq: 101 or 102, 203, 301. Theory and research in small group communication; application to group decision-making and leadership. Includes communica- tion analyses of groups and teams.

ComSt 323. Gender and Communication. (Cross-listed with Sp Cm, W Sl). (3-0) Cr. 3. F. Prereq: Sp Cm 212. The rhetorical strategies women and men use to succeed in oral communication; the theory, principles, and practice of effective gender communication in a variety of settings. Nonmajor graduate credit.

ComSt 325. Nonverbal Communication. (Cross-listed with Sp Cm). (3-0) Cr. 3. Preq: ComSt 101 or 102, 203, 301. Theory and research in nonverbal communica- tion; exploration of nonverbal subcodes; function of nonverbal communication in various contexts; student-designed investigation.

ComSt 330. Computer Mediated Communication. (3-0) Cr. 3. Preq: 101 or 102, 203, 301. Theories and perspectives related to mediated communication in interpersonal and organizational settings. Focus on how new technology will impact human interaction with computers as well as between and among humans.

ComSt 404. Seminar in Communication Studies. (Dual-listed with 504). (3-0) Cr. 3. Repeatable. Preq: ComSt 301 plus 9 additional hours of 300 level ComSt courses. A. Communication Theory or Research B. Interpersonal Communication C. Small Group Communication D. Organizational Communication E. Intercultural Communication F. Nonverbal Communication G. Training and Development I. Computer Mediated Communication

ComSt 490. Independent Study. Cr. arr. Repeatable. Prereq: 9 credits in communication studies and junior classification. Application must be submitted for ap- proval the semester prior to the independent study.

ComSt 499. Professional Internship. Cr. arr. Repeat- able. Four hundred hours of on-site work is required for 3 hours credit. Registration by application only. Application must be submitted to Communication Studies faculty adviser for approval the semester prior to the internship.

Courses primarily for graduate students, open to qualified undergraduate students

ComSt 590. Special Topics. Cr. arr. Repeatable. Ap- plication must be submitted for approval the semester prior to the independent study.

Community Development

www.gpide.org

(Interinstitutional Graduate Program)

Participating Institutions:
- Iowa State University
- Kansas State University
- University of Nebraska
- North Dakota State University
- South Dakota State University

Community Development is an interinstitutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the six universities: Iowa State University, Kansas State University, University of Nebraska, North Dakota State University, and South Dakota State University.

At Iowa State University, Community Development is an optional area of specialization within the Interdisciplinary Graduate Studies degree program which consists of 37 semester credits for completion of the program. A thesis or creative component is required. A computer with mini- mum specifications, Web access, and an email address are required for completing the program.

Registration

Students choosing to receive their degree from Iowa State University complete all the admis- sions, registration and fee payment processes through ISU.

C Dev 502. Community and Natural Resource Management. (3-0) Cr. 3. Detailed introduction to community resource management. Theoretical frameworks, methodological investigation, applied practices. Enhancement of ability of community re-
development professionals to work with communities to plan, develop and monitor conversation and develop- ment of natural resources with multiple functions.

C Dev 503. Community Development I: Principles and Strategies of Community Change. (3-0) Cr. 3. Analysis of principles and practices of community change and development. Use of case studies to relate community development approaches to con- ceptual models from diverse disciplines. Exploration of professional practice principles, and student con- struction of their personal framework for practicing community development.

C Dev 504. Community Analysis: Introduction to Methods. (3-0) Cr. 3. Introduction to research meth- ods relevant to community development. Formulate and begin a research effort, methods of data collect- tion and how conceptual frameworks are used to develop the questions and analyze data. Emphasis on strategies for reporting findings and applying findings in community action and methods of evaluating the entire research process. Significant attention paid to issues of research ethics and inclusiveness.

C Dev 505. Community Development II: Organizing for Community Change. (3-0) Cr. 3. Examines role of civil Society in community planning efforts. Comparisa- tive approach to planning theories and approaches. Focus on change within communities and the roles of government, planners, and citizens in reacting to or shaping change. Dimensions of social capital and the context of change covered.

C Dev 506. Community and Regional Economic Analysis. (3-0) Cr. 3. Introduction to concepts of com- munities and regions, theories of economic growth, drivers of economic growth, the economic base of a community, sources of growth or decline in the com- munity, roles of local government and institutions, and analytical tools. Strategies for local economic Development will also be explored.

C Dev 507. Introduction to Native Communities. (3-0) Cr. 3. A base knowledge course. For students currently working within, in partnership with, or considering working with Native communities and federal and Indian relations, and governance and cultural issues.

C Dev 508. Ecological Economics. (3-0) Cr. 3. Ap- proaches economy and community by looking at the inherent interdependence, jointness, and potential complementarity between ecology and economy (util- ity) of a place.

C Dev 509. Building Native Community and Eco- nomic Capacity. (3-0) Cr. 3. Focus on non-western approaches to helping Native communities build their capacity. Students will learn to take a participatory, culture-centered, and strength-based approach to development.

C Dev 510. Indian Country Agriculture and Natural Resources. (3-0) Cr. 3. Introduction to the historical and contemporary issues related to natural resource management on Native American lands. Philosophical and economic arguments concerning natural resource conservation, preservation and extraction will be explored.

C Dev 512. Sustainable Communities. (3-0) Cr. 3. Students will learn the conceptual relationships among Community and Sustainable Development and Sustainable Communities and examine the social, environmental, and economic aspects of sustainable communities. The course includes analysis of public policy impacts on community sustainability, practical actions for enhancing sustainability, and changing power dynamics and reward structures involved in incorporating sustainability into Community Development.

C Dev 513. Economic Development Strategies and Programs. (3-0) Cr. 3. Course explores theories of local economic development and addresses the development issues faced by communities in the 21st century. Students will understand and apply concepts from economic Development planning, economic analysis, business development, human resource development, community-based development, and high-technology development.
Community and Regional Planning

Graduate Study

The Department offers work for the Master of Community and Regional Planning degree with areas of concentration in land use and transportation, community design and development, and rural and environmental planning. In addition, students can create an area of concentration if it does not fit in any of the three areas, with the assistance of their major professor. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning, thus providing the student with an education which, when combined with an education which, when combined with

Undergraduate Study

For undergraduate curriculum in community and regional planning leading to the degree bachelor of science, see College of Design, Curricula.

Community and regional planning is a professional field of study aimed at understanding the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to understand and solve problems. Most planners work in the local level, but they are concerned with issues that affect the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunity; and the management of growth and change of all kinds.

Planning has its roots in landscape architecture, architecture, engineering, law, economics, and public administration. Most contemporary planners are trained in the physical and social sciences so they can understand the society and economy in which plans must be implemented. Planning demands technical competence as well as creativity, plus pragmatism and an ability to envision alternative to the physical and social environments in which we live.

Graduates of the Community and Regional Planning Department will be capable of performing in entry level positions in public planning agencies or with planning consulting firms. Graduates are able to integrate planning knowledge and skills in practical applications to current planning issues, and to communicate in written and oral form.

Graduates of the Community and Regional Planning Department are expected to have knowledge of the structure and functions of urban settlements, the history of planning, and aspects of plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written and oral communication, collaborative approaches to these, and in synthesizing and applying knowledge to practice. Graduates are expected to assess the impact of values in terms of equity and social justice, economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning, thus providing the student with an education which, when combined with experience, supports the individual’s eligibility for membership in the American Institute of Certified Planners.

The department cooperates in the undergraduate minors in design studies and environmental studies.

Courses primarily for undergraduate students

C R P 253. Survey of Community and Regional Planning. (3-0) Cr. 3. A historical survey of planning, the nature and problems of urban areas, and the goals, procedures, and results of urban planning.

C R P 270. Forces Shaping Our Metropolitan Environment. (Cross-listed with Dsn S). (3-0) Cr. 3. Must be taken prior to completing 9 credits in C R P Introduction to the social, political, physical, and economic forces as they shape metropolitan areas. A comprehensive picture of metropolitan development showing important roles other urban disciplines play in the planning process and the interrelationships of the disciplines.

C R P 272. Planning Analysis and Techniques I. (2-2) Cr. 3. F. Existing and emerging techniques for preparation of community planning studies. Sources of planning information and data. Survey techniques including survey instruments, sampling methods, map data, and demographic studies. Land use surveys for comprehensive and transportation planning. Student’s oral and graphic presentation of analytical results. Laboratory emphasizes practical uses and computer applications for data analysis.

C R P 274. Planning Analysis and Techniques II. (2-2) Cr. 3. S. Prereq. 272. Use of quantitative methods for analysis of population, land use, economic and transportation make-up of a community; activities and location, intensity, and timing of land uses and public services. Student’s oral and graphic presentation of analytical results. Laboratory emphasizes practical uses and computer applications for data analysis.

C R P 291. World Cities and Globalization. (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. F., offered 2010. Prereq: Sophomore classification. World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity.

C R P 293. Environmental Planning. (Cross-listed with Dsn S, Env S). (3-0) Cr. 3. F. Prereq: Sophomore classification. Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

C R P 320. Urban form. (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 253 or 270, or permission of instructor. Examines how urban form is shaped, what constitutes good urban form, and what the trends in emerging urban forms. Descriptive, explanatory and normative theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.

M.B.A., public administration (M.C.R.P/M.P.A.), and landscape architecture (M.C.R.P/M.L.A.). The department also participates in the interdepartmental major in transportation. The department also offers a 13-credit graduate certificate in Geographic Information Systems (GIS) in spatial analysis, GIS applications and program management. The program is open to graduate students in all disciplines of the University. Information guides for the graduate degree and certificate may be obtained from the department office at the department’s web page at: http://www.design.iastate.edu/CRP/

C R P 331. Professional Practice Seminar. (Dual-listed with 531). (1-0) Cr. 1. S. Prereq: Major in community and regional planning. Preparation for working in a planning office; expectation of employer; presentations from planning professionals, and discussion of differences/similarities between public and private planning offices. Satisfactory-fail only.

C R P 332. Community Planning Studio I. (2-4) Cr. 4. F. Prereq: 253, 272. Application of planning methods and skills to issue identification and investigation. Introduction to problem formulation, study, and analysis in a community setting.

C R P 376. Rural, Urban and Regional Economics. (Cross-listed with Econ). (3-0) Cr. 3. F. Prereq: Econ 101. Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime. Nonmajor graduate credit.

C R P 383. Theory of the Planning Process. (3-0) Cr. 3. S. Prereq: 253, junior. Understanding the nature of planning and its relation to social and economic planning: levels of planning, place of planning in decision making; steps in the planning process, uses and limitation of knowledge in planning, relation of facts and values.

C R P 391. FieldTravel. Cr. art. Repeatable. F.S.S. Prereq: CRP major and permission of instructor. Observation of professional practice and community or regional problems and issues. Satisfactory-fail only.

C R P 416. Urban Design and Practice. (Dual-listed with 516). (3-6) Cr. 6. S. Prereq: 253 or 270. Principles of urban design and application to residential and commercial development in studio projects.

C R P 417. Urban Revitalization. (Dual-listed with 517). (Cross-listed with 522). (3-0) Cr. 3. Alt. S. offered 2010. Prereq: 253 or 270. Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 425. Growth Management. (Dual-listed with 525). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Junior classification. Review of techniques used to manage growth-related change and to implement urban investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

C R P 429. International Planning. (Dual-listed with 529). (Cross-listed with Dsn S). (3-0) Cr. 3. Prereq: Junior classification. Issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

C R P 442. Site Development. (Dual-listed with 542). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 253, 272. Introduction to site analysis using landscape architecture and environmental principles, design and current research concepts. Work will evolve from analysis to land development design.

C R P 445. Transportation Policy Planning. (Dual-listed with 545). (3-0) Cr. 3. F. Prereq: C E 350 or equivalent. Comprehensive overview of key policy issues related to transportation planning and investment. The role of the land use decision in the planning process. Issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

C R P 451. Introduction to Geographic Information Systems. (Dual-listed with 551). (2-3) Cr. 2-3. F.S. Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data presentation, analytical and simulation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 452. Geographic Data Management and Planning Analysis. (Dual-listed with 552). (2-3) Cr. 3. F. Prereq: C R P 451 or equivalent. Extensive coverage of geo-relation database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 475. Grant Writing. (Dual-listed with 575). (1-0) Cr. 1. F. Prereq: 253 or 270 and junior classification. A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 481. Regional and State Planning. (Dual-listed with 581). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: 253 or 270. Analysis of theories, policies, and functions at the metropolitan, regional, and state levels with emphasis on area-wide governance structures and strategies for guiding development.

C R P 491. Environmental Law and Planning. (Dual-listed with 591). (Cross-listed with 591). (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences. Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 492. Planning Law, Administration and Implementation. (3-0) Cr. 3. F. Prereq: 383. The basis in constitutional, common, and Statutory law for the powers and role of planning agencies in balancing public and private interests as revealed in the study of leading court cases. Administration of planning agencies and programs.

C R P 494. Senior Seminar in Planning. Cr. art. Repeatable. F.S.S. Prereq: Senior classification, 332 should be taken prior to or concurrently. An advanced forum for seniors that focuses on upon recent trends and important issues affecting planning today. Topics addressed will vary. A demonstration of understanding current issues and their effects upon planning applications is expected.

C R P 498. Portfolio Development and Review. (1-0) Cr. 1. F. S. Should be taken in the final semester of the planning program. Preparation of a portfolio of student work that represents student learning throughout the entire planning program.

Courses primarily for graduate students, open to qualified undergraduate students

C R P 502. Methods II. (3-0) Cr. 3. S. Prereq: Graduate classification and Stat 401. Applications of quantitative methods in planning with emphasis on the collection, description, analysis, presentation, and interpretation of planning data. Primary data collection using survey techniques. Secondary data types and sources of planning information for population projection and demographic analysis.

C R P 517. Urban Revitalization. (Cross-listed with 517). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Graduate classification. Introduction to a range of approaches to justifying innovations, changes, and interventions proposed by designers, planners, and artists. Reasons for change and their bases in social, philosophical, and design reasoning; and their usefulness in justifying change to different audiences. Investigation of fallacies, ideologies, and contemporary problems in justifications.

C R P 511. Introduction to Community and Regional Planning. (3-0) Cr. 3. F. Prereq: Graduate classification. Development of planning in the United States; history and evolution of the planning profession and its role in contemporary planning practice. I.

C R P 516. Urban Design Practice. (Dual-listed with 416). (3-6) Cr. 6. S. Prereq: Graduate classification. Principles of urban design and their application to residential and commercial development in studio project.

C R P 517. Urban Revitalization. (Dual-listed with 417). (Cross-listed with Dsn S). (3-0) Cr. 3. Alt. S., offered 2009. Prereq: Graduate classification. Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 519. Middle Eastern Cities. (3-0) Cr. 3. F. Prereq: Graduate or senior standing. Middle Eastern cities introduce a particular continuity between history and contemporary life where in some cases the latter is about re-defining the former. Introduction to basic academic writings on Middle Eastern cities in addition to other contemporary cultural productions of the region. Study of various aspects of Middle Eastern life that shed light on the nature of planning in the Middle East.
C R P 551. Introduction to Geographic Information Systems. (Dual-listed with 451). (2-2) Cr. 3. F.S.S.
Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 552. Geographic Data Management and Planning Analysis. (Dual-listed with 452). (2-2) Cr. 3. F.S. Prereq: 551. Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 553. Analytical Planning/GIS. (2-2) Cr. 3. S. Prereq: 451/551. Integration of exploratory, participatory and predictive spatial analyses and 3D visualization into the planning process. GIS tools and techniques are used to automate decision analysis and facilitate future planning in analyzing and visualizing planning actions. Laboratory emphasizes practical uses of GIS tools and techniques.

C R P 556. Seminar in Planning Theory. (3-0) Cr. 3. S. Prereq: graduate classification. Current planning theories: comprehensive land use, advocacy, participatory, radical, and transactive planning models. Decision making and organization models as they affect planning practice. Value conflicts and conflict resolution.

C R P 557. Grant Writing. (Dual-listed with 475). (1-0) Cr. 1. F. Prereq: Graduate classification. A short introduction to effective grant writing for the public and nonprofit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 591. Environmental Law and Planning. (Dual-listed with 491). (Cross-listed with Dsn S). (2-2) Cr. 3. L. A. Prereq: Graduate classification. Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 592. Land Use and Development Regulation Law. (3-0) Cr. 3. F. Prereq: Graduate classification. An in-depth analysis of the legal constructs that shape the practice of planning and plan implementation in the United States. An exploration of how land use regulations are applied to reconcile the competing needs and diverse uses of land. The positive and negative consequences of developing and implementing regulatory controls will be addressed.

C R P 599. Professional Planning Report. Cr. arr. Repeatable. F.S.S. Independent student research on planning topic. The course will serve as a capstone experience for the student, demonstrating ability to integrate planning knowledge and skills in the practical application of the student's abilities on a current planning issue. The completed report must be submitted to and approved by the POS committee as evidence of the mastery of the principles of community and regional planning.

Courses for graduate students

Complex Adaptive Systems (Interdepartmental Graduate Minor)
Program Co-chairs: K.M. Bryden and J. E. Mayfield
The Complex Adaptive Systems (CAS) minor provides graduate students with an understanding of the interrelationships among the various methodologies often collectively referred to as Artificial Life. Of special importance in the program is the interplay of biological principles and computer simulations in various fields including Economics, Engineering, Mathematic, and Biology.
Graduates understand the ways in which artificial life techniques may be an important field of study. They have an appreciation and understanding of the cross-disciplinary aspects of artificial life techniques. Students who complete a minor in this graduate program are able to describe and report on various artificial life techniques as applied to many fields, even outside their own field of application. Work in the CAS minor is offered for students pursuing any graduate degree. The primary cooperating departments are Economics; Computer Science; Electrical and Computer Engineering; Mechanical Engineering; Mathematics; Psychology; Ecology; Evolution, and Organismal Biology; and Genetics.
Each student’s Masters Program of Study (POS) must include at least 9 CAS relevant course credits chosen in consultation with the student's POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503 (see below). Each student's Ph.D. POS must include at least 12 CAS relevant course credits chosen in consultation with the student’s POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503. Ph.D. students who also minor in CAS at the master's level must take one additional CAS relevant course (3 cr.) and two additional credits of CAS seminar. Courses that satisfy CAS requirements may also be used to satisfy major requirements if such “double counting” is acceptable to the major program.
Interested students may contact the chairperson of the advisory committee for complete lists of courses and of CAS faculty members.

Courses primarily for graduate students, open to qualified undergraduate students
CAS 502. Complex Adaptive Systems Seminar. (Cross-listed with Com S). (1-0) Cr. 1. F.S. Prereq: Admission to CAS minor. Understanding core techniques in artificial life is based on basic readings in
complex adaptive systems. Techniques of complex system analysis methods including: evolutionary computation, neural nets, agent based simulations (agent based computational economics). Large-scale simulations are to be emphasized, e.g. power grids, whole ecosystems.

CAS 503. Complex-Adaptive Systems Concepts and Techniques. (Cross-listed with Com S) (3-0) Cr. 3. S. Prereq: Admission to CAS minor or related field. Survey of complex systems and their analysis. Examples are drawn from engineering, computer science, biology, economics and physics.

Computer Engineering

(Administered by the Department of Electrical and Computer Engineering)

Arun Somani, Chair of Department

Distinguished Professors: Somani, Soukoulis

Distinguished Professors (Emeritus): Brown, Fouda, Lord, Nilsson, Pohm

University Professor: Jacobson

University Professor (Emeritus): Jones

Professors: Aijarapu, Aluru, J. Bowler, Dalal, Geiger, Kamal, Kothari, Kumar, Kushner, Liu, Luecke, McAuliffe, Oliver, Rover, Shinar, Weber

Professors (Emeritus): Anderson, Basart, Breareley, Brockman, Comstock, Fanslow, Hale, Horton, Hsieh, Kopplin, Melia, Potter, Read, Sheble, Smay, Stewart, Swift, Townsend, Venkata

Professor (Adjunct): Shinar

Professor (Emeritus Adjunct): Hillesland

Professors (Collaborators): Jiles, Lee

Associate Professors: N. Bowler, Chang, Chen, Chu, Davidson, Davis, Dickerson, Dogandzic, Elia, Govindarasu, Guan, S. Kim, Song, Tirthapura, Tuttle, Tyagi, Z. Wang

Associate Professors (Emeritus): Bond, Carlson, Coady, Mercie, Pavlat, Scott, Stephenson

Associate Professors (Adjunct): Biswas, Sosonkina

Professors (Collaborators): Ashlock, Salapaka

Assistant Professors: Allprantis, Bigelow, Chaudhary, Chung, Daniels, Dong, Nayef, Hornbuckle, Jones, J. Kim, Ma, Nenhart, Nguyen, Pandey, Qiao, Ramamoorthy, Stoytchev, Vaidya, Vyaswanii, L. Wang, Ying, Zambrone, Zhang

Assistant Professor (Adjunct): Amin, Bode

Assistant Professor (Collaborators): Balasubramaniam

Senior Lecturer: Mina, Wiersema

Undergraduate Study

For the undergraduate curriculum in computer engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

The Electrical and Computer Engineering (ECPE) Department at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, to study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of computer engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The computer engineering curriculum offers focus areas in software, software systems, embedded systems, networking, information security, computer architecture, and VLSI. Students may also take elective courses in control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing.

The objective of the computer engineering program at ISU is that its graduates should demonstrate expertise, engagement, learning, leadership, and teamwork within five years after graduation.

Expertise: Graduates should establish peer-recognized expertise together with the ability to articulate that expertise and use it for problem solving in the analysis, design, and evaluation of computer and software systems, including system integration and implementation, using contemporary practices.

Engagement: Graduates should be engaged in the engineering profession, locally and globally, contributing through the ethical, competent, and creative practice of computer engineering in industry, academia, or the public sector, or graduates may use the program as a foundation for interdisciplinary careers in business, law, medicine, or public service.

Learning: Graduates should demonstrate sustained learning through graduate work or professional improvement opportunities and through self-study, and they should demonstrate the ability to adapt in a constantly changing field.

Leadership: Graduates should exhibit leadership and initiative to advance professional and organizational goals, facilitate the achievements of others, and obtain results.

Teamwork: Graduates should demonstrate effective teaming and commitment to working with others of diverse cultural and interdisciplinary backgrounds by applying engineering abilities, communication skills, and knowledge of contemporary and global issues.

As a complement to the instructional activity, the ECPE Department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. See College of Engineering, Cooperative Programs. Students have the opportunity to participate in advanced research activities; and through international exchange programs, students learn about engineering practices in other parts of the world.

Well qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both bachelor of science and master of science or the bachelor of science and master of business administration degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's web site.

Courses primarily for undergraduate students

Cpr E 185. Introduction to Computer Engineering and Problem Solving I. (2-2) Cr. 3. S. Prereq: Credit or enrollment in Math 141. Introduction to Computer Engineering. Project based examples from computer engineering. Individual interactive skills for small and large groups. Computer-based projects. Solving engineering problems and presenting solutions through technical reports. Solution of engineering problems using the C language.

Cpr E 186. Introduction to Computer Engineering and Problem Solving II. (0-2) Cr. 1. S. Prereq: 185. Project based examples from computer engineering. Group skills needed to work effectively in teams.

from a wide range of courses outside computer engineering.

The degree master of science with thesis is recommended for students who intend to continue toward the doctor of philosophy degree or to undertake a career in research and development. The nonthesis master of science degree requires a creative component.

The normal prerequisite to major work in computer engineering is the completion of undergraduate work substantially equivalent to that required of computer engineering students at this university. It is possible for a student to qualify for graduate study in computer engineering even though the student's undergraduate or prior graduate training has been in a discipline other than computer engineering. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than computer engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the doctor of philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental master of science and doctor of philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

The Department of Electrical and Computer Engineering is also a participating department in the interdepartmental master of science in information assurance program. Students interested in studying information assurance topics may earn a degree in computer engineering or in information assurance. (See catalog section on Information Assurance.)

Well qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both bachelor of science and master of science or bachelor of science and master of business administration degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's web site.
Group problem solving. Computer based projects. Technical reports and presentations. Students will work on 2 or 3 self-directed team based projects that are representative of problems faced by computer engineers.

Cpr E 281. Digital Logic. (3-2) Cr. 4. F. Prereq: sophomore classification. Number systems and representation of data, Boolean algebra and logic minimization, Combinational and sequential logic design. Arithmetic circuits and finite state machines. Use of programmable logic devices. Introduction to computer-aided schematic capture systems, simulation tools, and hardware description languages. Design of a simple digital systems.

Cpr E 294. Program Discovery. (Cross-listed with E E 294). Cr. 4. F. The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today’s world. Satisfactory-fail only.

Cpr E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services. Students will work in the cooperative education program. Students must register for this course before commencing work.

Cpr E 310. Theoretical Foundations of Computer Engineering. (3-0) Cr. 3. F. Prereq: Credit or enrollment in Cpr E 288, Com S 229. Propositional logic and methods of proof, set theory and its applications; Mathematical induction and recurrence relations; functions and relations; and counting; trees and graphs; applications in computer engineering.

Cpr E 330. Integrated Electronics. (Cross-listed with E E). (3-0) Cr. 4. Prereq: E E 201, credit or enrollment in E E 230, or equivalent. Introduction to technology for integrated circuits. Modeling of integrated devices including diodes, BJTs, and MOSFETs. Physical layout. Circuit simulation. Digital building blocks and digital circuit synthesis. Analysis and design of analog building blocks. Laboratory exercises and design projects with CAD tools and standard cells. Nonmajor graduate credit.

Cpr E 370. Toying with Technology. (Cross-listed with Mat E). (2-2) Cr. 3. F. Prereq: C 1201, junior standing in non-engineering major. A project-based, hands-on learning course. Technology literacy appreciation for technological innovations, principles behind many technological innovations, hands-on laboratory experiences based upon simple systems constructed out of LEGO's and controlled by small microcomputers. Future K-12 teachers will leave the course with complete lesson plans for use in their upcoming careers.

Cpr E 394. Program Exploration. (Cross-listed with E E). Cr. R. Prereq: 294 or E E 294. Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competency based skills. Introduction to professional portfolio development and construction. Satisfactory-fail only.

Cpr E 398. Cooperative Education. Cr. R. F.S.S. Prereq: 298, permission of department and Engineering Career Services. Second professional work period in the cooperative education program. Students must register for this course before commencing work.

Cpr E 425. High Performance Computing for Scientific and Engineering Applications. (Cross-listed with Com S). (3-1) Cr. 3. S. Prereq: Com S 311, Com S 330, Engi 250. Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports. Nonmajor graduate credit.

Cpr E 426. Introduction to Parallel Algorithms and Programming. (Dual-listed with 526). (Cross-listed with Com S). (3-0) Cr. 4. F. Prereq: E E 308 or Com S 321. Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms. Nonmajor graduate credit.

Cpr E 431. Basics of Information System Security. (3-0) Cr. S. Prereq: credit or enrollment in Cpr E 489 or Com S 454. Introduction to and application of basic mechanisms for protecting information systems from accidental and intentional threats. Basic cryptography use and practice. Computer security issues including authentication, access control, and malicious code. Network security mechanisms such as intrusion detection, firewalls, IPSEC, and related protocols. Ethics and legal issues in information security. Other selected topics. Programming and system configuration assignments. Nonmajor graduate credit.

Cpr E 435. Analog VLSI Circuit Design. (Cross-listed with E E). (3-3) Cr. 4. S. Prereq: 330, E E 322, 324, and either E E 322 or Stat 330. Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters. Nonmajor graduate credit.

Cpr E 444. Introduction to Bioinformatics. (Dual-listed with 544). (Cross-listed with BCB, Com S, Biol, Gen). (4-0) Cr. 4. F. Prereq: Math 185 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic tree, comparative and functional genomics. Nonmajor graduate credit.

Cpr E 450. Distributed Systems and Middleware. (Dual-listed with 550). (3-0) Cr. 3. Prereq: 308 or Com S 382. Fundamentals of distributed computing, software agents, naming services, distributed transactions, security mechanisms. Distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and internet applications. Nonmajor graduate credit.

Cpr E 454. Distributed and Network Operating Systems. (Dual-listed with 524). (Cross-listed with Com S). (3-1) Cr. 3. S. Prereq: 294 or E E 294. Advanced distributed systems, networked operating systems, programming for distributed computing environments. Advanced distributed object models, distributed file systems, distributed system design and implementation. Nonmajor graduate credit.

Cpr E 465. Digital VLSI Design. (Cross-listed with E E). (3-3) Cr. 4. S. Prereq: E E 330. Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages. CMOS logic design styles, area-energy-delay design.
space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (SoC) considerations. VLSI chip hardware design project. Nonmajor graduate credit.

Cpr E 466. Multidisciplinary Engineering Design. (Cross-listed with A E, A E, E E, E E, E E, E E, Mat E, M E). (1-4) Cr. 3. Repeatable. F.S. Prereq: Student must be within two semesters of graduation and receive permission of instructor. Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufactur- ing and life cycle concepts. Ames. Application of design tools such as CAD, CAM, and FEM. Design methodology, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, presentations, computer models and engineering drawings.

Cpr E 488. Embedded Systems Design. (3-3) Cr. 4. Prereq: 381 or Com S 321. Embedded microprocessors, embedded memory and I/O devices, component interfaces, embedded software, program development, basic compiler techniques, platform-based FPGA technology, hardware synthesis, design methodology, real-time operating system concepts, performance analysis and optimizations. Nonmajor graduate credit.

Cpr E 489. Computer Networking and Data Communications. (3-2) Cr. 4. F. S. Prereq: 381 or E E 324. Modern computer networking and data communications concepts. TCP/IP, OSI protocols, client server programming, data link protocols, local area networks, and routing protocols. Nonmajor graduate credit.

Cpr E 491. Senior Design Project I and Professionalism. (Cross-listed with E E). (2-3) Cr. 3. F. S. Prereq: 308 or E E 322, completion of 24 credits in the E E core professional program or 29 credits in the Cpr E core professional program, Engr 314. Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

Cpr E 492. Senior Design Project II. (Cross-listed with E E). (1-3) Cr. 2. F. S. Prereq: 491 or E E 491. Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or Cpr E 491 and the evaluation of project results. Techni- cal writing of final report; oral presentation of project achievements; project poster.

Cpr E 494. Portfolio Assessment. (Cross-listed with E E). Cr. R. Prereq: Credit or enrollment in 491. Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

Cpr E 498. Cooperative Education. Cr. R. Repeat- able. F.S.SS. Prereq: 398, permission of department and Engineering. Third and subse- quent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduate students

Cpr E 507. VLSI Communication Circuits. (Cross- listed with E E). (3-0) Cr. 3. Art. S., offered 2011. Prereq: 330 or 501. Phase-locked loops, frequency synthesis, clocked asynchronous circuits, theory and implementation of adaptive filters, low-noise amplifiers, mixers, power amplifiers, transmitter and receiver architectures.

Cpr E 511. Design and Analysis of Algorithms. (Cross-listed with Com S). (3-0) Cr. 3. F. Prereq: Com S 311. A study of basic algorithm design and analysis of techniques, data structures, amortized analysis and randomized algorithms. Applications to sorting, graphs, and geometry. NP-completeness and approximation algorithms.

Cpr E 526. Introduction to Parallel Algorithms and Programming. (Cross-listed with Com S). (3-0) Cr. 3. Prereq Math 301 or Math 302. A study of parallel processing techniques. Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

Cpr E 528. Probabilistic Methods in Computer Engineering. (3-0) Cr. 3. Com. Prereq: Com S 311. The application of randomization and probabilistic methods in the design of computer algorithms, and their efficient implementation. Discrete random variables in modeling algorithm behavior, with applications to sorting, selection, graph algorithms, hashing, pattern matching, cryptography, distributed systems, and massive data sets.

Cpr E 530. Advanced Protocols and Network Security. (Cross-listed with InfAs). (3-0) Cr. 3. Prereq: 499 or 530 or Com S 386 or MIS 335. Computer and network security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

Cpr E 532. Information Warfare. (Cross-listed with InfAs). (3-0) Cr. 3. Prereq: 531. The use of information technology as an expandable service for warfare. Development and deployment of computing technology in a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

Cpr E 536. Computer and Network Forensics. (Cross-listed with InfAs). (3-0) Cr. 3. Prereq: 381 and 489 or 530. Fundamentals of computer and network forensics, forensic duplication and analysis, network surveillance, intrusion detection and response, incident response, anonymity and pseudonymity, privacy-protection techniques, cyber law, computer security policies and guidelines, court testimony and report writing, and case studies. Emphasis on hands-on experiments.

Cpr E 537. Wireless Network Security. (3-0) Cr. 3. S. Prereq: Credit or enrollment in 489 or 530. Intro- duction to the physical issues associated with security of the air interface. Communication system modeling, wireless networking, base Stations, mobile Stations, airline multiple access, jamming, spoofing, signal intercept, wireless LANs and modern, cellular, position location, spread spectrum, signal modeling, propagation modeling, wireless security terminology.

Cpr E 541. High-Performance Communication Networks. (3-0) Cr. 3. Prereq: 489 or 530. Selected topics from recent advances in high performance networks. Next generation systems and associated issues associated with security of the air interface.

Cpr E 542. Optical Communication Networks. (3-0) Cr. 3. S. Prereq: 489. Optical components and interfaces; optical transmission and reception techniques; wavelength division multiplexing; network architectures and protocol for first generation, single and multihop optical network; routing and wavelength assignment in second generation wavelength routing networks; traffic grooming, optical network control, access networks; metro networks.

Cpr E 543. Wireless Network Architecture. (3-0) Cr. 3. Prereq: Credit enrollment in 489 or 530. Introdu- ction to the protocol architecture of the data link layer, network layer and transport layer for wireless networking. Operation and management of Medium Access Control in wireless local area networks; re- cent developments in 802.11 and Bluetooth; wireless ATM; Mobile Internet Protocol; Mobile Transmission Control Protocol; wireless application protocol; ad-hoc wireless networks.

Cpr E 544. Introduction to Bioinformatics. (Dual- listed with 444). (Cross-listed with BCB, Com S, GDCB). (3-0) Cr. 4. F. Prereq: Math 160 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological topics. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

Cpr E 545. Fault-Tolerant Systems. (3-0) Cr. 3. Prereq: 381. Faults and their manifestations, errors, and failures; fault detection, location and reconfigura- tion techniques; time, space, information (coding) redundancy management; design for testability; self-checking and fail-safe circuits; system-level fault diagnosis; Byzantine agreement; stable storage and RAID; fault-tolerant network protocols in real- time systems; reliable software design; checkpoint- ing and rollback recovery; and reliability evaluation techniques and tools.
Cpr E 546. Wireless Sensor Networks. (3-0) Cr. 3. Prereq: Cpr E 489 or 530. Selected topics from recent advances in wireless sensor networks, including data-centric routing, query, and storage; data fusion and aggregation; coverage, connectivity, and lifetime of wireless sensor networks; sensor network deployment and management; security issues; energy-efficiency issues; radio and link characteristics in wireless sensor networks; medium access control protocols and link layer techniques; tracking and localization; geolocation; robust routing; time synchronization; wireless sensor networks applications. Introduction to TinyOS and the necs language. Hands-on experiments with Crossbow Motes.

Cpr E 549. Advanced Algorithms in Computational Biology. (Cross-listed with Com S, BCB). (3-0) Cr. 3. Alt. S., offered 2009-11. Prereq: Cpr E 371 and either Cpr E 228 or Cpr E 208. Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

Cpr E 550. Distributed Systems and Middleware. (Dual-listed with 450). (3-0) Cr. 3. Prereq: 308 or Com S 352. Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web services, component-based middleware, application design and development, case studies of middleware and internet applications.

Cpr E 554. Distributed and Network Operating Systems. (Dual-listed with 454). (3-0) Cr. 3. Prereq: Com S 311. Study of methods, techniques, design strategies, development and evolution of complex software, aspect-oriented programming, domain-specific software technologies, automation for reliable and scalable software engineering, program analysis, comprehension, and program transformations.

Cpr E 555. Scalable Software Engineering. (3-0) Cr. 3. Prereq: Com S 309. Study of methods, techniques, design strategies, development and evolution of complex software, aspect-oriented programming, domain-specific software technologies, automation for reliable and scalable software engineering, program analysis, comprehension, and program transformations.

Cpr E 564. Synthesis and Optimization of Digital Circuits. (3-0) Cr. 3. Prereq: 381. Algorithms and techniques to generate application-specific VLSI circuits from high-level behavioral modeling in hardware description languages. Boolean logic representation, two-level and multi-level logic synthesis, sequential circuit optimization, hardware models, architectural-level synthesis and optimization, scheduling algorithms, resource sharing and binding.

Cpr E 575. Computational Perception. (Cross-listed with Com S, HCI). (3-0) Cr. 3. S. Prereq: Graduate standing or permission of instructor. This course covers statistical and algorithmic methods for sensing, recognizing, and interpreting the attributes of objects perceived by a computer. This semester we will focus on machine perception techniques that facilitate and augment human-computer interaction. The main goal of the course is to introduce computational perception research on the two-year level. You will work in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

Cpr E 581. Computer Systems Architecture. (Cross-listed with Com S). (3-0) Cr. 3. F. Prereq: 381. Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, cache coherence, cache coherency, interconnection networks and message routing, I/O devices and peripherals.

Cpr E 582. Computer Systems Performance. (3-0) Cr. 3. Preq: 381, 310 and Stat 330. Review of probability and stochastic processes concepts; Markovian processes; event-driven simulation; renewal theory; semi-Markovian queues; queueing networks, multiprocessor architectures; computer networks; switching systems; case studies.

Cpr E 583. Reconfigurable Computing Systems. (Cross-listed with Com S). (3-0) Cr. 3. Prereq: Background in computer architecture, design, and organization. Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing algorithms and data structures such as bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurability.

Cpr E 587. Text Mining, Text Processing, and the Internet. (3-0) Cr. 3. Prereq: Com S 309 or Com S 311. Mining, retrieval, and other processing of text, including text and hypermedia on the world wide web. Human computer interaction in the context of text and hyper media. Topics of particular interest to enrolled students.

Cpr E 589. Multimedia Systems. (3-0) Cr. 3. S. Prereq: 308 or Com S 352. Fundamentals concepts in multimedia systems. Resource management issues in distributed/networked multimedia systems, QoS routing and multicasting, traffic shaping, Task and message scheduling, Internet QoS. Adaptive multimedia applications over the Internet. Operating system support for multimedia. Storage architecture and scalable media servers. Compression techniques, synchronization techniques, processor architectures for multimedia.

Cpr E 590. Special Topics. Cr. arr. Repeatable. Formulation and solution of theoretical or practical problems in computer engineering.

Cpr E 594. Selected Topics in Computer Engineer- ing. (3-0) Cr. 3. Repeatable.

Cpr E 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students

Cpr E 632. Information Assurance Capstone Design. (Cross-listed with InFAs). (3-0) Cr. 3. Preq: 537, 532, 534. Capstone design course which integrates the security design process. Design of a security policy. Creation of a security plan. Implementation of the security plan. The students will attach each other's secure environments in an effort to defeat the security systems. Students evaluate the security plans and the performance of the plans. Social, political and ethics issues. Student self-evaluation, journaling, final written report, and an oral report.

Cpr E 697. Engineering Internship. (Cross-listed with E E I). Cr. R. Repeatable. Prereq: Permission of department chair and Engineering Career Services, graduate classification. One semester and one summer maximum per academic year professional work period. Satisfactory/fail only.
Computer Science

www.cs.iastate.edu

Undergraduate Study

Carl Chang, Chair of Department

Professors: Aluru, Bergman, C. Chang, Fernandez-Baca, Honavar, Huang, Kothari, J. Lutz, R. Lutz, Mad-dux, Miller, Slutzki, Wong

Professors (Emeritus): Brearley, Oldehoeft, Stewart, Thomas

Associate Professors: Aduri, J. Chang , Chaudhuri, Chou, Eulenstein, Gadia, Jia, Miner, Prabhu, Tavana- pong, Yiagi, Zhu

Associate Professor (Collaborators): Mayordome

Assistant Professors: Basu, Cai, Harding, Margaritis, Rajan, Ruan, Song, Stoytchev, Tian, T. Zhang, W. Zhang

Senior Lecturers: Lathrop, Mitra

Lecturers: S. Chang, Johnson, Kautz

Undergraduate Study

The curriculum leading to the baccalaureate de- gree in computer science is designed to prepare students for positions as computer scientists with business, industry, or government, or for graduate study in computer science. The main objectives are to impart to students an understanding of the basics of computer science, to develop proficien- cy in the practice of computing, and to prepare them for continued professional development. The following are intended learning outcomes for computer science majors. Seniors will assess these outcomes in a survey conducted before they graduate and feedback thus obtained will be used to improve the curriculum.

A. Impart an understanding of the basics of the discipline. Each graduate will know

A.1 Fundamental principles of computing.
A.2 Basic foundations of Mathematics, Statistics, and physical sciences
A.3 Design and implementation of programs
B. Develop proficiency in the practice of computing. The graduated student will be able to
B.1 formulate and solve problems in computing,
B.2 Understand design and performance require- ments of software systems,
B.3 Apply sound principles to the synthesis and analysis of computer systems
C. Prepare for continued professional develop- ment. Our students will
C.1 Engage in lifelong learning and expect to embrace change,
C.2 Communicate effectively and think critically and creatively, both independently and with others,
C.3 Be aware of social and ethical issues of com- puters and society
Students must earn at least a C- in each course taken to fulfill the Degree Program.

B. Students must earn at least 45 credits at the 300 level or higher at Iowa State University.

To complete an undergraduate degree in Com- puter Science, a student must satisfy the require- ments of the College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum) and include the following courses within the group requirements: Phil 343, Sp Cm 212, 14 credits of Math and Statistics including Math 165, Math 166, one Statistics course from Stat 105, 231, 305, 330, 333, or 341, and at least one Math course from Math 256, 266, 304, 307, 314, or 317; a minimum of 13 credits of natural science including Phys 221, 222, and at least one additional natural science course from the following list: A Ecl 312, Anthr 202, 207, BM&M 221, Biol 312, Biol 355, Chem 163-231, Ent 370, Env S 324, Env S 330, FS HN 167, Gen 260, Geol 100-108, 201, 311, 451, 475, Mat E 207, 211, Mteor 206, 301, Psych 310. Communication Proficiency requirement: Eng 150, 250 and one of Eng 302, 305, 309 or 314. The minimum grade accepted in each of the three required English courses is a C-.

Students wishing to pursue the B.S. degree in computer science must successfully complete the premajor program consisting of the fol- lowing courses and minimum grade requirements:

<table>
<thead>
<tr>
<th>Course</th>
<th>Minimum Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cpr E 485</td>
<td>C-</td>
</tr>
<tr>
<td>Cpr E 489</td>
<td>C-</td>
</tr>
<tr>
<td>Math 165</td>
<td>C-</td>
</tr>
</tbody>
</table>

Students majoring in computer science must successfully complete this premajor program prior to taking any other courses in the Department. Thus, for computer science majors, this premajor serves as a necessary prerequisite to all the other courses offered by the Department.

Computer science majors transferring from other institutions must take at least 15 of their credits at the 300-level or above in our department while in residence at Iowa State.

To graduate with a major in the Computer Science Department, a student must earn at least a C- in each of the courses taken to fulfill the program of study.

A minimum of 44 credits is required for the B.S. degree in computer science. The required courses are: Com S 101, 203, Cpr E 281, Com S 227, 228, 229, 309, 311, 321, 330, 331, 342, 352, 362 or 363. In addition, two advanced-level courses must be selected from the following groups:

Group W: 426, 440, 454, 477, 486
Group B: 401, 409, 416, 417, 425, 430, 455, 461, 472, 474
Group N: 412, 418, Math 421, 471, 481, 426; Cpr E 485, Cpr E 489, M E 557

Courses in Group W require written reports and those in Group B require both oral and written re- ports. Students must take one course from Group B and one course from any group.

Students must earn a C- or better in each course in the department which is a prerequisite to a course listed in the student’s degree program.

Undergraduate Minor. The Computer Science Department offers an undergraduate minor in Computer Science. The minor requires at least 19 credits in computer science courses. Com S 227, 228, and 229, adding up to 10 credits are required. In addition, at least 9 credits should be taken in courses at the 300 level or above.

Undergraduate Curriculum in Software Engi- neering. The Department of Computer Science together with the Department of Electrical and Computer Engineering also offer a curriculum leading to an undergraduate degree in software engineering. The software engineering curriculum offers emphasis areas in software engineering principles, process, and practice. Students may also take elective courses in computer engineer- ing and computer science.

See Index, Software Engineering. For curriculum information, see also College of Engineering and College of Liberal Arts and Sciences.

Graduate Study

The department offers work for the degrees Mas- ter of Science and Doctor of Philosophy with a major in Computer Science. The Doctor of Philoso- phy degree may also be earned with computer science as a co-major with some other discipline. Additionally, the department offers a minor to students majoring in other departments.

Established research areas include algorithms, artificial intelligence, computational complexity, computer architecture, bioinformatics, computa- tional biology, computer networks, database systems, formal methods, information assurance, machine learning and neural networks, multime- dia, operating systems, parallel and distributed computing, programming languages, robotics, and software engineering. There are also numerous opportunities for interdisciplinary research.

Typically, students beginning graduate work in Computer Science have completed a bachelor’s degree or equivalent in Computer Science. How- ever, some students with undergraduate majors in other areas, such as Mathematical, physical, or biological science or engineering become suc- cessful graduate students in Computer Science. For the degree Master of Science, a minimum of 30 semester credits is required. A thesis demonstrat- ing research and the ability to organize and express significant ideas in computer science is required.

The purpose of the doctoral program is to train students to do original research in Computer Science. Each student is also required to attain knowledge and proficiency commensurate with a leadership role in the field. The Ph.D. require- ments are governed by the student’s program of study committee within established guidelines of the department and the graduate college. They include coursework, demonstrated proficiency in four areas of Computer Science, a research skills requirement, a preliminary examination, and a doctoral dissertation and final oral examination. The department recommends that all graduate students majoring in Computer Science teach as part of their training for an advanced degree.

Courses primarily for undergraduate students

Com S 101. Orientation. Cr. R. F.S. Introduction to the procedures and policies of Iowa State University and the Department of Computer Science, test-outs, honorary Societies, etc. Issues relevant to student adjustment to college life will also be discussed. Satisfactory-fail only.

Com S 103. Computer Applications. Cr. 4. F.S.SS. Introduction to computer literacy and applications. Applications: Windows, Internet browser/HTML, word processing, spreadsheets, database manage- ment and presentation software. Literacy: history of computing, structure of computers, telecom- munications, computer ethics, computer crime, and history of programming languages. No prior computer experience necessary. Course is offered online only. Students must attend an orientation session the first week of class.

Com S 104. Introduction to Computers. (1.5-1)
Cr. 2. F.S. Offered first 8 weeks and last 8 weeks. Use of personal computer and workstation operating systems and beginning programming. Project-oriented approach to computer operation and programming, including use of tools to aid in programming. Topics from computer history, using basic Windows and Unix tools, program structure, expression, variables, decision and logic, and iteration. No prior computer experience necessary.
Com S 107. Applied Computer Programming. (3-0) Cr. 3. F. S. Introduction to computer programming for non-majors using a language such as the Visual Basic language. Basics of good programming and algorithm development. Graphical user interfaces.

Com S 201. Computer Programming in COBOL. (3-0) Cr. 3. S. S. Prereq: 107 or 207 or 227. Computer programming in programming languages with emphasis on design, writing, debugging, and testing of business applications programs in a transaction-oriented environment.

Com S 203. Careers in Computer Science. Cr. R. F. S. Computer science as a profession. Introduction to career fields open to computer science majors. Relations of careers available to computer science professionals. Satisfactory-fail only.

Com S 207. Programming I. (3-1) Cr. 3. S. Prereq: Math 150 or placement into Math 140/141/142 or higher. An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. Exceptions/error-handling. This course is designed for nonmajors. Credit may be applied toward graduation for both Com S 207 and 227.

Com S 208. Programming II. (3-1) Cr. 3. S. Prereq: 207 or enrollment in Math 151, 160, or 165. Intermediate-level programming techniques. Emphasis on design, writing, testing, debugging, and documenting medium-sized programs. Data structures and their uses. Dynamic memory allocation and polymorphism. Algorithm design and efficiency; recursion, searching, and sorting. Event-driven and GUI programming. The software development process. This course is designed for nonmajors. Credit may not be applied toward graduation for both Com S 207 and 227.

Com S 227. Introduction to Object-oriented Programming. (3-2) Cr. 4. F. S. An introduction to object-oriented design and programming techniques. Symbolic and numerical computation. Recursion and iteration. Modularity procedural and data abstraction, specifications and subtyping. Object-oriented techniques. Imperative programming. Emphasis on principles of programming and object-oriented design through extensive practice in design, writing, running, debugging, and reasoning about programs. This course is designed for majors. Credit may not be applied toward graduation for both Com S 207 and 227.

Com S 228. Introduction to Data Structures. (3-1) Cr. 3. S. Prereq: C- or better in 227, credit or enrollment in Math 165. An object-oriented approach to data structures and algorithms. Object-oriented analysis, design, and implementation, with emphasis on data abstraction, inheritance and subtype polymorphism. Abstract data type specification and correctness. Collections and associated algorithms, such as stacks, queues, lists, trees. Searching and sorting algorithms. Graphs. Data on objects, objects, methods. Analysis of algorithms. Emphasis on object-oriented design, writing and documenting medium-sized programs. This course is designed for majors.

Com S 229. Advanced Programming Techniques. (3-0) Cr. 3. S. F. Prereq: 228, credit or enrollment in Math 166. Advanced programming experience using a language suitable for exploring advanced topics in programming. Topics include memory management, parameter passing, inheritance, compiling, debugging, and maintaining programs. Significant programming projects.

Com S 252. Linux Operating System Essentials. (2-2) Cr. 3. S. Prereq: 103 or 207 or 227 Selected topics include: Linux Distributions, installation, configuration, and management of a Linux based computer system, shell programming, network accessing technologies, package management systems, system security, user, file sharing techniques, cooperation with other computers on the network, and open-source software. This is a hands-on course designed to demonstrate the installation and utilization of the Linux operating system for a personal computer.

Com S 290. Independent Study. Cr. arr. F. S. Prereq: Permission of instructor. Satisfactory-fail only. H. Honors

Com S 309. Software Development Practices. (3-1) Cr. 3. F. S. Prereq: Com S 228 with C- or better, Com S 229 or Cpr E 211, Engl 250. A practical introduction to methods for managing software development. Project models, requirements analysis, structured and object-oriented design, coding, testing, maintenance, cost and schedule estimation, metrics. Programming projects. Nonmajor graduate credit.

Com S 311. Design and Analysis of Algorithms. (3-1) Cr. 3. F. S. Prereq: 228 with C- or better, Math 186, Engl 250. Analysis and design of algorithms. Emphasis on design and analysis of efficient algorithms. Sorting, searching, graph algorithms, computational geometry, string processing and NP-completeness. Design techniques such as dynamic programming and the greedy method. Asymptotic, worst-case, average-case and amortized analyses. Data structures including heaps, hash tables, binary search trees and red-black trees. Programming projects. Credit may not be applied toward graduation for both Com S 311 and 381. Nonmajor graduate credit.

Com S 321. Introduction to Computer Architecture and Machine-Level Programming. (3-1) Cr. 3. F. S. Prereq: C- or higher in 228, Cpr E 281 and Engl 250. Introduction to computer architecture and organization. Emphasis on evaluation of performance, instruction set architecture, datapath and control, memory-hierarchy design, and pipelining. Assembly language on a simulator. Nonmajor graduate credit.

Com S 330. Discrete Computational Structures. (3-1) Cr. 3. S. F. Prereq: C- or higher in 228, C- or higher in 186 and Cpr E 250. Concepts in discrete Mathematics as applied to computer science. Logic, proof techniques, set theory, relations, graphs, combinatorics, discrete probability and number theory. Nonmajor graduate credit.

Com S 331. Theory of Computing. (Cross-listed with S E). (3-1) Cr. 3. F. S. Prereq: C- or higher in 228, C- or higher in 186 and Cpr E 250. Languages and automata. Limits of digital computation, unsolvability and undecidability. Introduction to computational problems that are undecidable. Nonmajor graduate credit.

Com S 352. Introduction to Operating Systems. (3-1) Cr. 3. S. Prereq: Math 250. Survey of operating system issues. Introduction to hardware and software components including: processors, peripherals, interrupts, management of processes, threads and memory, deadlocks, file systems, protection, virtual machines and system organization, and introduction to distributed operating systems. Programming projects. Nonmajor graduate credit.

Com S 362. Object-Oriented Analysis and Design. (3-0) Cr. 3. S. F. Prereq: 228 with C- or better, Engl 250. Object-oriented requirements analysis and systems design. Design notations such as the Unified Modeling Language. Design Patterns. Group design and programming with large programming projects. Nonmajor graduate credit.

Com S 363. Introduction to Database Management Systems. (3-0) Cr. 3. S. F. Prereq: 228 with C- or better, Engl 250. Database concepts, and semistructured data models and query languages. SQL, ODMG, and XML standards. Database design using entity-relationship model, data dependencies and object definition language. Application development in SQL-like languages and general purpose host languages with application program interfaces. Information integration using data warehouses, mediators and wrappers. Programming Projects. Nonmajor graduate credit.

Com S 398. Cooperative Education. Cr. R. S. Prereq: Permission of department chair. Requires of all cooperative students. Students must register for this course prior to commencing each work period.

Com S 401. Projects in Computing and Business Applications. (2-2) Cr. 3. S. F. Prereq: Engl 250, Sp Cm 212, Com S 309, and either 382 or 383. Applications of software development methods (requirements collection and analysis, project management, documentation and testing), programming techniques, database designs and administration, network application programming to solve computing needs in business settings. A study of practical applications of emerging technologies in computing. Emphasis on semester-long team programming projects. Lab assignments. Oral and written reports. Nonmajor graduate credit.

Com S 409. Software Requirements Engineering. (Dual-listed with 509). (Cross-listed with S E). (3-0) Cr. 3. F. S. Prereq: Com S 309, Engl 260, Sp Cm 212. The requirements engineering process, including identification of stakeholders, requirements elicitation techniques such as interviews and prototyping, analysis fundamentals, requirements specification, and verification. Use of Models: State-oriented, Function-oriented, and Object-oriented. Documentation for Software Requirements. Informal, semi-formal, and formal representations. Structural, informational, and behavioral requirements and functional requirements. Use of requirements repositories to manage and track requirements through the life cycle. Case studies, software projects, written reports, and oral presentations will be required. Nonmajor graduate credit.

Com S 417. Software Testing. (Cross-listed with S E). (3-0) Cr. 3. S. Prereq: Com S 309, 319, Engl 260, Sp Cm 212. Comprehensive study of software testing, principles, methodologies, management strategies and techniques. Test models, test design techniques (black box and white box testing techniques), integration, regression, system testing methods, and software testing tools. Nonmajor graduate credit.

Com S 418. Introduction to Computational Geometry. (Dual-listed with 518). (3-0) Cr. 3. S. Prereq: Permission of instructor. Introduction to computational geometry, and analysis techniques for computational problems that involve geometry. Line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality, Voronoi diagrams, Primal Delaunay triangulation, convex hulls, robot motion.
planning, visibility graphs. Other selected topics. Programming assignments. Nonmajor graduate credit.

Com S 421. Logic for Mathematics and Computer Science. (Cross-listed with Math.) (3-0) Cr. 3. S. Prereq: Math 301 or 307 or 317 or Com S 330. Propositional and predicate logic. Topics selected from Horn logic, equational logic, resolution and unification, foundations of logic programming, reasoning about programs, program specification and verification, model checking and binary decision diagrams. Nonmajor graduate credit.

Com S 425. High Performance Computing for Scientific and Engineering Applications. (Cross-listed with Cpr E). (3-1) Cr. 3. F. Prereq: Cpr E 330, Engl 250, Sp Cm 212. Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports. Nonmajor graduate credit.

Com S 426. Introduction to Parallel Algorithms and Programming. (Dual-listed with 526). (Cross-listed with Cpr E). (3-2) Cr. 4. F. Prereq: Cpr E 308 or Com S 321, Com S 311, Models of parallel computation, performance measures, basic parallel constructs and communication, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, and graph problems, fast Fourier transforms. Nonmajor graduate credit.

Com S 430. Advanced Programming Tools. (3-1) Cr. 3. F. Prereq: 311, 362 or 363, Engl 250, Sp Cm 212. Topics in advanced programming techniques and tools widely used by industry (e.g., event-driven programming and graphical user interfaces, standard libraries, client/server architectures and techniques for distributed applications). Emphasis on programming projects in a modern integrated development environment. Oral and written reports. Nonmajor graduate credit.

Com S 433. Computational Models of Nanoscale Self-Assembly. (Dual-listed with 533). (3-0) Cr. 3. S. Prereq: C- or higher in 331 or consent of the instructor. Modeling and analysis of natural and engineered systems that assemble themselves from small components. Topics include biomolecular self-assembly, tile assembly models, construction via self-assembly, distributed folding, origami models, and self-assembly. Mathematical and algorithmic methods of describing, simulating, programming, and verifying the behaviors of self-assembling systems. Graduate credit requires a written or oral report on current research. Nonmajor graduate credit.

Com S 440. Principles and Practice of Compiling. (Dual-listed with 540). (3-0) Cr. 3. S. Prereq: C- or higher in 331 or consent of the instructor. Modeling and analysis of natural and engineered systems that assemble themselves from small components. Topics include biomolecular self-assembly, tile assembly models, construction via self-assembly, distributed folding, origami models, and self-assembly. Mathematical and algorithmic methods of describing, simulating, programming, and verifying the behaviors of self-assembling systems. Graduate credit requires a written or oral report on current research. Nonmajor graduate credit.

Com S 444. Introduction to Bioinformatics. (Dual-listed with 544). (Cross-listed with BCB, Biol, Cpr E, Gen). (4-0) Cr. 4. F. Prereq: Math 165 or Stat 401 or equivalent. Bioinformatics is a field with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics. Nonmajor graduate credit.

Com S 454. Distributed and Network Operating Systems. (Dual-listed with 554). (Cross-listed with Cpr E). (3-1) Cr. 3. S. Prereq: Cpr E 311, Engl 250, Sp Cm 212. Laboratory course dealing with practical issues of design and implementation of distributed and network operating systems and distributed computing environments (DCE). The client server paradigm, inter-process communications, layered communication protocols, synchronization and communication mechanisms, and distributed systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports. Nonmajor graduate credit.

Com S 455. Simulation: Algorithms and Implementation. (Dual-listed with 555). (3-0) Cr. 3. Alt. F. Prereq: 301, 330, Math 170, Sp Cm 212. Introduction to discrete-event simulation with a focus on computer science applications, including performance evaluation of networks and distributed systems. Overview of algorithms and data structures necessary to implement simulation software. Discrete and continuous stochastic models, random number generation, elementary Statistics, simulation of queuing and inventory systems, Monte Carlo simulation, point and interval parameter estimation. Graduate credit requires additional in-depth study of concepts. Oral and written reports. Nonmajor graduate credit.

Com S 471. Computational Linear Algebra and Fixed Point Iteration. (Cross-listed with Mathi. (3-0) Cr. 3. F. Prereq: Math 265 and either Math 266, or 267; knowledge of a programming language. Computational error, solutions of linear systems, least squares, similarity methods for eigenvalues, solution of nonlinear equations in one and several variables. Nonmajor graduate credit.

Com S 474. Elements of Neural Computation. (3-1) Cr. 3. Alt. F. Prereq: 301, 330, Sp Cm 212 or Math 266. Com S 342 or comparable programming experience. Introduction to theory and applications of neural computation and computational neuroscience. Computational models of neurons and networks, of neurons. Neural architectures for associative memory, knowledge representation, inference, pattern classification, function approximation, stochastic search, decision making, and behavior. Neural architectures and computational models of perception, support vector machines, kernel methods, bayesian learning, instance based learning, reinforcement learning, unsupervised learning, and related techniques. Applications to Artificial Intelligence and cognitive and neural modeling. Hands-on experience is emphasized through the use of simulation tools and laboratory projects. Oral and written reports. Nonmajor graduate credit.

Com S 477. Problem Solving Techniques for Applied Computer Science. (Dual-listed with 577). (3-0) Cr. 3. Alt. F. Prereq: 220, 330 or Cpr E 310, Math 166, Math 307 or Math 312 or consent of the instructor. Selected topics in applied Mathematics and modern heuristics that have found applications in areas such as geometric modeling, graphics, robotics, vision, human machine interface, speech recognition, computer animation, etc. Polynomial interpolation, roots of polynomials, reduction of linear and nonlinear equations, approximation, data fitting, fast Fourier transform, linear programming, nonlinear optimization, Lagrange multipliers, genetic algorithms, integration of ODEs, curves, curvature, Frenet formulas, cubic splines, Programming components. Written report for graduate credit. Nonmajor graduate credit.

Com S 486. Fundamental Concepts in Computer Networking. (3-0) Cr. 3. S. Prereq: 362. An introduction to fundamental concepts in the design and implementation of computer communication in both the wired and wireless networks, their protocols, and applications. Layered network architecture in the Internet, applications, and protocols. Multilayer view and the link layers and their protocols, multimedia networking, and network security. Nonmajor graduate credit.

Com S 490. Independent Study. Cr. arr. Repeatable. F.S. Prereq: 6 credits in computer science, permission of instructor. No more than 9 credits of Com S 490 may be counted toward graduation. Satisfactory-fail only. H. Hour.

Courses primarily for graduate students, open to qualified undergraduate students

Com S 502. Complex Adaptive Systems Seminar. (Cross-listed with CAS). (3-0) Cr. 3. F. Prereq: Admission to CAS. Admis- sions to CAS minor. Understanding core techniques in artificial life are based on basic readings in complex adaptive systems. Understand techniques of complex system analysis methods including: Evolutionary computation, Neural nets, Agent based simulations (Agent based Computational Economics). Large-scale simulations are to be emphasized, e.g. power grids, whole ecosystems.

Com S 503. Complex Adaptive Systems Concepts and Techniques. (Cross-listed with CAS). (3-0) Cr. 3. S. Prereq: Admission to CAS. Admissions to CAS minor. Understanding core techniques in artificial life are based on basic readings in complex adaptive systems. Understand techniques of complex system analysis methods including: Evolutionary computation, Neural nets, Agent based simulations (Agent based Computational Economics). Large-scale simulations are to be emphasized, e.g. power grids, whole ecosystems.

Com S 509. Software Requirements Engineering. (Dual-listed with 409). (3-0) Cr. 3. S. Prereq: 309. The requirements engineering including identification of stakeholders requirements elicitation techniques such as interviews and prototyping, analysis fundamen- tals, requirements specification, and validation. Use of Models: State-oriented, Function-oriented, and Object- oriented. Documentation for Software Requirements. Informal, semi-formal, and formal representations. Structural, informational, and behavioral requirements. Non-functional requirements. Use of requirements repositories to manage and track requirements through the life cycle. Case studies, software projects, written reports, and oral presentations will be required.

Com S 511. Design and Analysis of Algorithms. (Cross-listed with Cpr E). (3-0) Cr. 3. F. Prereq: Com S 311. A study of basic algorithm design and analy- sis techniques. Advanced data structures, amortized analysis and randomized algorithms. Applications to sorting, graphs, and geometry. NP-completeness and approximation algorithms.

Com S 512. Formal Methods in Software Engineer- ing. (Dual-listed with 412). Cr. 3. S. Prereq: 311, 330. A study of formal techniques for specification and verification of software systems. Topics include temporal logic, propositional and predicate logic, model checking, process algebra, theorem proving. Tools providing automated support for these techniques will also be discussed.
Com S 515. Software System Safety. (3-0) Cr. 3. F. Prereq: 309 or 311, 342. An introduction to the analysis, design, and testing of software for safety-critical and high-integrity systems. Analysis techniques, formal verification, fault identification and recovery, model checking, and certification issues. Emphasizes a case-based and systematic approach to software’s role in safe systems.

Com S 518. Introduction to Computational Geometry. (Dual-listed with 418). (3-0) Cr. 3. Alt. S., offered 2011. Prereq: 311 or permission of instructor. Introduction to algorithms, computational geometry, and analysis techniques for computational problems that involve geometry. Line segment intersection, polygon triangulation, 2D linear programming, range queries, point location, arrangements and duality, Voronoï diagrams and Delaunay triangulation, convex hulls, robot motion planning, visibility graphs. Other selected topics. Programming assignments. A scholarly report must be submitted for graduate credit.

Com S 525. Numerical Analysis of High Performance Computing. (Cross-listed with Cpr E, Math). (3-0) Cr. 3. S. Prereq: Cpr E 308, or one of Math 471, 481; experience in scientific programming; knowledge of FORTRAN or C. Development, analysis, and testing of efficient numerical methods for use on current state-of-the-art high performance computers. Applications of the methods to the students’ areas of research.

Com S 526. Introduction to Parallel Algorithms and Programming. (Dual-listed with 426). (Cross-listed with Cpr E). (3-2) Cr. 4. F. Prereq: Cpr E 308 or Com S 321, Com S 311. Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

Com S 531. Theory of Computation. (3-0) Cr. 3. S. Prereq: 337. A systematic study of the fundamental models and underlying principles of theoretical computer science. Computability, the Church-Turing thesis, decidable and undecidable problems, and the elements of recursive function theory. Time complexity, logic, Boolean circuits, and NP-completeness. Role of randomness in computation.

Com S 533. Computational Models of Nanoscale Self-Assembly. (Dual-listed with 433). (3-0) Cr. 3. S. Prereq: C- or higher in 331 or consent of the instructor. Modeling and analysis of natural and engineered systems that spontaneously assemble themselves from small components. Topics include biomolecular self-assembly, tile assembly models, computation via self-assembly, distributed folding, origami models, and self-repair. Emphasis on Mathematical methods of describing, simulating, programming, and verifying the behaviors of self-assembling systems. Graduate credit requires a written or oral report on current research.

Com S 541. Programming Languages. (3-1) Cr. 3. F. Prereq: 342 or 440. Survey of the goals and problems of language design. Formal and informal studies of a wide variety of programming language features including type systems. Creative use of functional and declarative programming paradigms.

Com S 544. Introduction to Bioinformatics. (Dual-listed with 444). (Cross-listed with BCB, Cpr E, GDCB). (4-0) Cr. 4. F. Prereq: Math 165 or Stat 401 or equivalent. Broad overview of bioinformatics with a significant problem-solving component, including hands-on practical exercises using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics.

Com S 549. Advanced Algorithms in Computational Biology. (Cross-listed with BCB, Cpr E). (3-0) Cr. 3. S., offered spring. Prereq: 311 and either 208 or 208. Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, substring search algorithms, suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

Com S 550. Evolutionary Problems for Computational Visualization. (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Com S 311 and some knowledge of programming. Discussion and analysis of basic evolutionary principles and the necessary knowledge in computational biology to solve real world problems. Topics include character and distance based methods, phylogenetic tree distances, and consensus methods, and approaches to extract the necessary information from sequence-databases to build phylogenetic trees.

Com S 551. Computational Techniques for Genome Assembly and Analysis. (Cross-listed with BCB). (3-0) Cr. 3. Alt. F., offered 2009. Prereq: 311 and some knowledge of programming. Huang. Introduction to practical sequence assembly and comparison techniques. Topics include global alignment, local alignment, overlapping alignment, banded alignment, linear-space alignment, word hashing, DNA-protein alignment, DNA-cDNA alignment, comparison of two sets of sequences, construction of contigs, and generation of consensus sequences. Focus on development of sequence assembly and comparison programs.

Com S 554. Distributed and Network Operating Systems. (Dual-listed with 454). (Cross-listed with Cpr E). (3-1) Cr. 3. Alt. S., offered 2011. Prereq: 311, 352. Laboratory course dealing with practical issues of design and implementation of distributed and network operating systems, including fault tolerance, resource allocation, security, performance, and transaction processing. Professional level exposure to networking environments (DCE). The client server paradigm, inter-process communications, layered communication protocols, synchronization and concurrency control, and distributed file systems. Graduate credit requires additional independent study of advanced operating systems. Written reports.

Com S 558. Introduction to the 3D Visualization of Scientific Data. (Cross-listed with Geol, HCI). (2-2) Cr. 3. Alt. S., offered 2011. Prereq: Graduate-student standing in the Mathematical or natural sciences. Introduction to visualization techniques and examples of 3D visualization projects from different disciplines (natural sciences, medicine, engineering). Class project in interactive 3D visualization using the OpenDX, VTK or a similar system.

Com S 562. Implementation of Database Systems. (3-0) Cr. 3. F. Prereq: 461 or 561. Implementation topics and projects are chosen from the following: Storage architecture, building database and caching, access methods, design, parsing and compilation of query languages and update operations, application programming interfaces (APIs), user interfaces, query optimization and processing, and transaction management for relational, object-oriented, semistructured (XML), and special purpose database models; client-server architectures, metadata and middleware for database integration, web databases.

Com S 570. Bioinformatics IV (Computational Functional Genomics and Systems Biology). (Cross-listed with BCB, GDCB, Stat, Cpr E). (3-0) Cr. 3. S. Prereq: BCB 567, Biol 315, Com S 311 and either 208 or 228, Gen 411, Stat 430. Algorithmic and

Com S 575. Computational Perception. (Cross-listed with Cpr E, HCI). (3-0) Cr. 3. S. Preereg: Graduate standing or permission of instructor. Statistical and algorithmic methods for seeing, recognizing, and interpreting the activities of people by a computer. Focuses on machine perception techniques that facilitate and augment human-computer interaction. Introduce computational perception on both theoretical and practical levels. You will work in small groups to design, implement, and evaluate a prototype of a human-computer system that uses one or more of the techniques covered in the lectures.

Com S 577. Problem Solving Techniques for Applied Computer Science. (Double-listed with 477). (3-0) Cr. 3. Alt. F. offered 2010. Preereg: 228, 330 or Cpr E 310, Math 166, Math 307 or Math 317, or consent of the instructor. Decision making in applied Mathematics and modern heuristics that have found applications in areas such as geometric modeling, graphics, robotics, vision, human machine interface, speech recognition, computer animation, etc. Homogeneous coordinates and transformations, perspective projection, quadrilaterals and rotations, polynomial interpolation, roots of polynomials, resultants, solution of linear and non-linear equations, approximation, data fitting, Fourier series and fast Fourier transform, linear programming, non-linear optimization, Lagrange multipliers, parametric and algebraic curves, curvature, Frenet formulas, Bezier curves. Programming components. A scholarly report is required for graduate credit.

Com S 581. Computer Systems Architecture. (Cross-listed with Cpr E, 3-0) Cr. 3. F. Preereg, Cpr E 381. Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory, memory coherence, interconnection networks and message routing, I/O devices and peripherals.

Com S 583. Reconfigurable Computing Systems. (Cross-listed with Cpr E). (3-0) Cr. 3. Preereg. Background in computer architecture, design, and organization. Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurability.

Com S 590. Special Topics. Cr. arr. Repeatable. Prereq: Permission of instructor. Satisfactory-fail only.

Com S 596. Genomic Data Processing. (Cross-listed with BCB, GDCB). (3-0) Cr. 3. F. Preereg. Some knowledge of programming. Study the practical aspects of genome data analysis with an emphasis on hands-on projects. Students will carry out major data processing steps using bioinformatics tools. Topics include base-calling, raw sequence cleaning and contaminant remembrance procedures and EST clustering methods; genome closure strategies and practices; sequence homology search and function prediction; annotation and submission of GenBank reports; and data collection and dissemination through the Internet. Genomic topics like microarray design and data analysis will also be covered.

Com S 598. Graduate Internship. Cr. R. Repeatable. F.S.S. Preereg. Graduate Classification. Supervised internship working in professional settings appropriating to the student’s undergraduate program. Academic work under faculty supervision.

Com S 599. Creative Component. Cr. arr. Creative component for nonthesis option of Master of Science degree. Satisfactory-fail only.

Com S 661. Advanced Topics in Database Systems. (3-0) Cr. 3. Repeatable. Alt. F, offered 2010. Prereq: 467 or 561. Advanced topics chosen from the following: database design, data models, query systems, query optimization, incomplete information, logic and databases, multimedia databases, temporal, spatial and belief databases, semistructured data, concurrency control, parallel and distributed databases, information retrieval, data warehouses, wrappers, mediators, and data mining.

Com S 761. Advanced Topics in Database Systems. (3-0) Cr. 3. Repeatable. Alt. F, offered 2010. Prereq: 467 or 561. Advanced topics chosen from the following: database design, data models, query systems, query optimization, incomplete information, logic and databases, multimedia databases, temporal, spatial and belief databases, semistructured data, concurrency control, parallel and distributed databases, information retrieval, data warehouses, wrappers, mediators, and data mining.

Construction Engineering

(Administered by the Department of Civil, Construction and Environmental Engineering)

James Alleman, Chair of Department

Distinguished Professor: Klaiber

Distinguished Professors (Emeritus): Baumann, Cleasby, Handy

University Professor (Emeritus): Lohnes

Professors: Alleman, Fanous, Jaselskis, Kannel, Maze, Nambisan, Ong, Pommet, Porter, Sarkar, Schaefer, Souleyrette, Van Leeuwen, Wipf

Professors (Emeritus): Bergeson, Brewer, Carstens, Greimann, Hardy, Jellinger, Kao, Lee, Mashaw, Nickle, Morgan, Northup, Oulman, Sander

Professor (Collaborator): Surampalli

Associate Professors: Abendroth, Baenziger, Bhandari, Ellis, Gu, Hallmark, Jahren, Koziel, Rehmann, Sritharan, Strong, Sung, Wang, White, Williams

Associate Professors (Emeritus): Chase, Mercier, Sheeler, Ward

Assistant Professors: Asloch, Bolluyt, Ceylan, Gitnitz, Grewell, Kandi, Rouse, Shane

Assistant Professors (Adjunct): Phares, Schlorholtz, Smadi, Taylor

Assistant Professors (Collaborators): Boyle, Kanhal, Ozasy

Instructors (Adjunct): Amenson, Gaunt

Senior Lecturers: Cornicile, Sirotiak, Walton

Lecturers: Baker, Cackler, Hawkins, Hunacek, Mescher, Perkins, Smith, Stout

Clinician: Gopalakrishnan

Undergraduate Study

For undergraduate curriculum in construction engineering leading to the degree bachelor of science, see College of Engineering, Curricula. This curriculum is accredited by the Engineering Accreditation Commission of ABET.

Construction engineering is a curriculum administered by the Department of Civil, Construction and Environmental Engineering. For details of the curriculum in construction engineering leading to the degree bachelor of science, see the College of Engineering, Objectives of Curricula in Engineering. The curriculum in construction engineering is designed with the objective to prepare students for life-long careers in the constantly changing technical and managerial environment of the construction industry.

Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may elect to engage in design of temporary structures, co-operative education program or internship in study-abroad programs. Interested and qualified students have the opportunity to participate in the cooperative education program or internship in study abroad.

The construction industry is becoming increasingly diverse as far as the work environment is concerned with building.
Introduction to the materials and methods for construction engineering: integration of significant topics including interdisciplinary teamwork, skills for academic preparation, and study skills. Teamwork development of construction process designs and submit bids. Offered in the following specialities:

- A. Heavy and Highway
- B. Building
- C. Mechanical
- D. Electrical
- E. Mechanical and Electrical
- F. Miscellaneous

Con E 352. Mechanical Systems in Buildings. (3-0) Cr. 3. F.S. Prereq. 251, Phys 222. Comprehensive coverage of mechanical systems, plumbing, fire protection, vertical transportation. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

Con E 353. Electrical Systems in Buildings. (2-0) Cr. 2. F.S. Prereq. Phys 222 and credit or enrollment in 352. Comprehensive coverage of building electrical systems including power, lighting, fire alarm, security and communications. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

Con E 381. Bidding Construction Projects I. (0-3) Cr. 1. F. Prereq. Permission from the instructor. Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialties: A. Heavy and Highway, B. Building, C. Mechanical, D. Electrical, E. Mechanical and Electrical, F. Miscellaneous

Con E 396. Summer Internship. Cr. R. Repeatable. SS. Prereq. Permission of department and Engineering Career Services. Summer professional work period. Students must register for this course before commencing work.

Con E 397. Engineering Internship. Cr. R. Repeatable. F.S. Prereq. Permission of department and Engineering Career Services. Professional work period, one semester maximum per academic year. Students must register for this course before commencing work.

Con E 441. Construction Planning, Scheduling, and Control. (2-2) Cr. 3. F.S. Prereq. Credit or enrollment in 421. Integration of previous construction coursework into the planning, scheduling, and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer project management applications. Nonmajor graduate credit.

Con E 487. Construction Engineering Design I. (1-2) Cr. 2. F.S. Prereq. Con E 340 (B, H), 352 (B, E, M), 353 (B, E, M), 421, 441. Student must be within two semesters of graduation. The integrated delivery of project services including preliminary engineering design process, constructability review, interaction with the client, identification of engineering problems, developments of a proposal, identification of design criteria, cost estimating, planning and scheduling, application of codes and standards, development of feasible alternatives, selection of best alternative, and delivery of oral presentations.

Con E 498. Cooperative Education. Cr. R. Repeatable. F.S.S. Prereq. 398. permission of department and Engineering Career Services. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.
Courses primarily for undergraduate students

CJ St 240. Introduction to the U.S. Criminal Justice System. (3-0) Cr. 3. F. Provides systematic overview of law, police organization and behavior, prosecution and defense, sentencing, the judiciary, community corrections, penology, and capital punishment. The course demonstrates the role of discretion in all of these agencies as well as the sociological influences of age, race, gender, and social class on criminal justice system processes.

CJ St 241. Youth and Crime. (Cross-listed with Soc.) (3-0) Cr. 3. F. Prereq: Soc 130 or 134. An examination of delinquency that focuses on the relationship between youth and crime and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents’ rights, and traditional and alternative ways of dealing with juvenile crime.

CJ St 320. American Judicial Process. (Cross-listed with Pol.) (3-0) Cr. 3. S. S. Prereq: Pol S 215. An overview of the American judicial process. Emphasis on specific topics such as application of constitutional rights to the states (particularly the Fourth, Fifth, Sixth, and Fourteenth Amendments), mechanics of judicial opinions, constitutional Philosophies of Suprem e Court Justices, decisions of first impression, and the value and scope of precedent.

CJ St 332. Philosophy of Law. (Cross-listed with Phil.) (3-0) Cr. 3. F. Prereq: Phil 201 or 230. Extent of our obligation to obey the law; what constitutes just punishment; how much of the immoral should be made illegal? Relation of these questions to major theories of law and the state. Discussion of such concepts as coercion, equality, and responsibility. Nonmajor graduate credit.

CJ St 340. Deviant and Criminal Behavior. (Cross-listed with Soc.) (3-0) Cr. 3. S.SS. Prereq: Soc 130 or 134. Theory and research on the etiology and types of deviant behavior; issues relating to crime, antisocial behavior and social policies designed to control deviant behavior.

CJ St 341. Criminology. (Cross-listed with Soc.) (3-0) Cr. 3. F. Prereq: Soc 130 or 134. The nature of crime and criminology; the concept of crime; Statistics and theories of criminality; major forms of crime; official responses to crime and control of crime.

CJ St 351. Police and Society. (Cross-listed with Soc.) (3-0) Cr. 3. F.S.SS. Prereq: Soc 241 or CJ St 240. Introduction and overview of law enforcement in the United States. Theory and research on police history, function, and organization; constitutional issues of policing; and critical topics, such as community policing, officer discretion and decision-making, corruption, use of force, and racial profiling. The course illustrates the interconnections between communities, police organizations, citizens, and criminal offenders.

CJ St 352. Punishment, Corrections, and Society. (Cross-listed with Soc.) (3-0) Cr. 3. F.S.SS. Prereq: Soc 241 or CJ St 240. Introduction and overview of corrections in the United States. Theory and research on probation, parole, intermediate sanctions, prison, inmate sociology, behavior and misconduct, capital punishment, recidivism, correctional treatment, rehabilitation, and offender reintegration into Society.

CJ St 402. White-Collar Crime. (Cross-listed with Soc.) (3-0) Cr. 3. S.SS. Prereq: Soc 241 or CJ St 240. Introduction and overview of white-collar crime as a form of deviance. Theory and research on occupational, corporate, and organizational offending; prevalence, costs, and consequences of white-collar crime; predictors and correlates of white-collar crime; and political, business, and public policy responses to white-collar crime.

CJ St 403. Criminal Offenders. (3-0) Cr. 3. F. Prereq: 240 or 241. Introduction and overview of criminal offenders. Theory and research on epidemiology, offender typologies, etiology of violence, recidivism, societal costs, correctional supervision, treatment, and prevention of serious antisocial behavior.

CJ St 460. Criminal and Juvenile Justice Practicum. (Cross-listed with Soc.) Cr. arr. Repeatable. F.S.SS. Prereq. Junior or senior classification; permission of criminal justice studies coordinator; major or minor in Sociology, or criminal justice studies minor. Study of the criminal and juvenile justice systems and social control processes. Supervised placement in a police department, prosecutor’s office, court, probation and parole department, penitentiary, juvenile correctional institution, community-based rehabilitation program, or related agency.

Cross Disciplinary Studies

The College of Liberal Arts and Sciences administers a number of Cross Disciplinary Studies. Interdepartmental Studies, and Certificate Programs which enable students to develop individual programs of study toward majors and minors in a range of disciplines. Information on the requirements for these programs is available in the Academic Advising Office, College of Liberal Arts and Sciences, located in Catt Hall. (See Index, Liberal Arts and Sciences Cross Disciplinary Studies)

Curriculum and Instruction

www.edu.ci.his.iastate.edu

Carl Smith, Interim Chair of Department

Distinguished Professors (Emeritus): Moyer, Rasmussen

University Professor: Thompson

University Professors (Emeritus): Brown, D. Williams

Professors: Abelson, Andre, Blount, Greenhowe, Martin, G. Miller, W. Miller, Mokhtari, Owen, Phye, Smith, Stuart, Whaley

Professors (Emeritus): Barnhart, Bath, Baum, Breiter, Brun, Burkhalter, Carter, Charles, Coulson, Daly, Dits, Downs, Duffelmeyer, Henney, Hoerner, Hunter, Keller, McCormick, Rudolph, Schneider, Shloker, Libson, Tanner, Thomas, Volker, Williams, Zbaracki

Associate Professors: Allen, Bloom, Caldwell, Carlson, Clough, Foegen, Fuhler, Gentzler, Hargrave, Hausafus, Leigh, Munsen, Niederhauser, Olsen, Payne, Schilling, Torrie

Associate Professors (Emeritus): Amos, Ebert

Associate Professor (Adjunct): Rosenbusch

Assistant Professors: Bang, Blumenfeld, Bruna, Coreia, Drake, Esters, Lee, Horton-Meier, Schmidt, Seymour

Assistant Professors (Emeritus): Chartiel, Tartakov

Assistant Professors (Adjunct): Andreotti, McGay

Goals and Missions

The mission of the Department of Curriculum and Instruction is to serve the people of Iowa, the Nation, and the World through discovery, learning, and engagement efforts that enhance and develop human potential and equity through education and that promote understanding of learning, teaching, and education as disciplines. In our discovery mission, we strive to

• to conduct the highest quality research and scholarship that significantly contribute to educational theory and practice and
• to be known locally, nationally, and internationally as a department of distinction.

In our learning mission, we strive to be a recognized high quality teacher preparation department that

• prepares highly effective teachers and educational leaders;

• prepares graduate students and post doctoral professionals who become leaders in their respective fields; and

• conducts significant ongoing research and evaluation on the process of effective teacher preparation.

In our engagement mission, we strive to develop partnerships within and beyond the university that

• enhance the quality and effectiveness of education in practice and

• serve our discovery and learning missions.

Undergraduate Study

The Department of Curriculum and Instruction provides the professional education coursework that leads to licensure of pre-service teachers. Students major in early childhood education - birth through third grade or elementary education - K-6. Students who are interested in teaching at the secondary level (5-12) major in a specific discipline and complete the courses necessary for their teaching license. Early childhood education and elementary education majors must complete a professional course sequence: C 1 201, 204, 322, and Sp Ed 250. Secondary education students must complete a professional course sequence: C 1 202, 204, 333, 406 and Sp Ed 450. Some secondary licensure areas also require C 1 426.

The department offers a minor in digital learning that may be earned by completing the following courses: C 1 201 or 202; Com S 107 or Com S 207 or Cpr E/Mat E 370; C 1 280A; 280B; 302; 403; and 407.

The Department of Curriculum and Instruction offers courses that can lead to a reading endorsement for grades K-8 or grades S-12. Students seeking a K-8 endorsement should see a Curriculum and Instruction academic adviser. The 5-12 endorsement is offered collaboratively with the English Department. Students seeking this endorsement should see an adviser in the English Department. Copies of transcript(s) can also be sent to the Licensure Analyst in the Student Services Office to receive a list of courses needed for an Iowa State University Reading endorsement. Prerequisites for the reading endorsement courses are listed in the catalog course descriptions.

Early Childhood Education

The curriculum in Early Childhood Education is planned for students preparing to teach young children and work with their families. This program leads to careers in working with young children who are typically developing and those with special needs from birth through age eight. Graduates in this curriculum may teach in early childhood (preschool and primary) classrooms or home based programs, with emphasis on inclusive services. Graduates may be employed by either public or private agencies or schools. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is an interdepartmental major administered by the Department of Curriculum and Instruction and the Department of Human Development and Family Studies within the College of Human Sciences.

Early Childhood Education majors must satisfy a world language requirement for graduation. For detailed information, see College of Human Sciences - Curriculum in Early Childhood Education. Students who enroll in Early Childhood Education must make application to and be accepted into the teacher education program prior to enrolling.
in advanced courses. All early childhood education students, including those seeking a double major, must meet general education requirements for teacher licensure. Iowa State University is in compliance with the Iowa Department of Education’s mandate for a performance based system of teacher training. Following this same type of system, the State of Iowa has developed and implemented a competency system to evaluate the performance of all teachers. A detailed list of the eleven Iowa State University Teacher Education Standards and the eight State of Iowa Teaching Standards, along with other information about the University’s system, can be found at www.teacher.hs.iastate.edu, the teacher education website. Information is also available from the student’s academic advisor.

Students in early childhood education must meet the performance outcome standards for teacher licensure. Standards are assessed in coursework through designated performance indicators such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsement 100 in the State of Iowa. These include competencies in (1) child growth, development, and learning, (2) developmentally appropriate learning environment and curriculum implementation, (3) family, health, safety, and nutrition, (4) family and community collaboration, and (5) professionalism. Pre-student teaching field experiences and student teaching experience in at least two different settings is required. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at Iowa State University.

Elementary Education

For the undergraduate curriculum in elementary education, leading to the degree bachelor of science, see College of Human Sciences.

The curriculum in elementary education is planned for students preparing to teach at the elementary school level. This program leads to careers in working with school-aged children, kindergarten through sixth grade. Graduates in this curriculum may teach in elementary classrooms in either public or private school districts. Endorsements in art, English/language arts, English as a Second Language (ESL), health, history, mathematics, science or special education (Instructional Strategist I: General, mild/moderate disabilities) are available. Information about the minors can be found on the web at http://www.cs.hs.iastate.edu/prspstud/grad/Grad2Degrees.php.

A Master of Arts in Teaching degree program leading to teacher licensure (science only) is available to students who currently have a bachelor’s degree in education or a related field. A teacher licensure program in mathematics education is also available to graduate students (Department of Curriculum and Instruction). Teacher licensure at the graduate level is also offered in agricultural education (College of Agriculture and Life Sciences) and family and consumer sciences (College of Human Sciences). The Department of Curriculum and Instruction provides the professional education coursework. Students in a graduate teacher licensure program must complete Sp Ed 501, C I 505, 506, 529, and HPC 504. Mathematics licensure students also take C I 526. Graduate level teaching endorsements are offered through the Department of Curriculum and Instruction. Graduate students who seek a teaching endorsement in special education, but do not wish to pursue a master’s degree, may complete those courses from a professional certificate program. Endorsement programs include Instructional Strategist I: Mild/Moderate Disabilities (K-8) or Instructional Strategist II: Learning Disabilities, and special education consultant. A graduate level reading endorsement is also available.

Prerequisite to major graduate work in education is preparation substantially equivalent to the completion of one of the undergraduate curricula in education offered at Iowa State University, or graduate preparation in a discipline to be used as a teaching field in a community college or university, and adequate proof that the student ranks above average in scholastic ability and promise of professional competence.

The world language requirement, if any, for the Ph.D. degree will be determined by the student’s program of study committee. If no world language is required, the total program must consist of a minimum of 78 semester credits, at least 12 of which must be earned outside the education major, and at least 16 of which must be earned outside the area of specialization. Statistics and research methods may not be included in the 16 credits.

Making connections between educational practice and learning. The special education specialization is designed to prepare candidates as practitioners and researchers in the field of mild/moderate disabilities or behavioral disorders/learning disabilities. The specialization in curriculum and instructional technology is designed to prepare candidates as researchers in the fields of curriculum and instructional technology. Students may also opt not to select an area of specialization. These students are asked to select a focus area for their graduate study. Focus areas include educational psychology, world language education, literacy education, mathematics education, multicultural education and international curriculum studies, and science education. See the Curriculum and Instruction web site at http://www.cs.hs.iastate.edu for more information on these focus areas.
in English. All applicants for the Ph.D. must submit Graduate Record Examination (GRE) scores. Other graduate programs related to education (including General Graduate Studies) may be planned for students on the basis of previous education and experiences as well as future plans and needs. Students should refer to Agricultural Education and Studies, Family and Consumer Sciences Education, Kinesiology, Educational Leadership and Policy Studies, and General Graduate Studies or to graduate level course offerings within other departments.

**Curriculum and Instruction (C)**

**Courses primarily for undergraduate students**

**C 115. First Year Orientation.** Cr. R. F. Overview of elementary education curricular opportunities, transitions to college and community life, and university procedures. Required of all first-semester freshmen majoring in early education.

**C 201. Digital Learning in the PK-6 Classroom.** (2-2) Cr. 3. F.S. Alt. SS., offered 2011. Overview of ways to use instructional technologies to support instruction in PK-6 classrooms. Focus on pedagogical approaches that integrate technologies to support learning in the content areas. Laboratory experiences include development of activities to use tool software, interactive multimedia, webpage development, digital video and other technologies to facilitate learning and teaching.

**C 202. Digital Learning in the 7-12 Classroom.** (2-2) Cr. 3. F.S. Alt. SS., offered 2010. Overview of ways to use instructional technologies to support instruction in 7-12 settings. Focus on pedagogical approaches that integrate technologies to support learning in the content areas. Laboratory experiences include development of activities to use tool software, interactive multimedia, webpage development, digital video and other technologies to facilitate learning and teaching.

**C 204. Social Foundations of American Education.** (3-0) Cr. 3. F.S.S.S. Goals of schooling, including the roles of teachers today; historical development of schools; educational reforms and alternative forms; and current Philosophical issues. Human relations aspects of teaching and discussions about teaching as a career.

**C 208. Early Childhood Education Orientation.** (Cross-listed with HD F5). Cr. 1. F.S. Overview of early childhood education (birth-grade 3) teacher licensure requirements. Program planning and university procedures. Required of all students majoring in early childhood education-fall only.

**C 215. Sophomore Orientation.** Cr. R. F. Review of elementary education requirements. Program planning. Required of all sophomores majoring in elementary education.

**C 219. Orientation to Teacher Education for Mathematics, Science and History/Social Sciences Majors.** Cr. R. F. Prereq: Students seeking teacher licensure in mathematics, science or history/social sciences in grades 7-12. Overview of Mathematics, science, and history/social sciences secondary education (grades 7-12), teacher licensure requirements in Iowa and other states. Program and career planning.

**C 245. Strategies in Teaching.** (2-0) Cr. 2. F.S. Prereq: 204; HD FS 220 or 221 or 226 (or concurrent enrollment in one of these courses); concurrent enrollment in C 268; eligibility for admittance to teacher education program. Introduction to elementary education teaching strategies, classroom management, and curriculum organization. Open to students in the elementary education curriculum or the early childhood education curriculum.

**C 268. Strategies Practicum.** (0-2) Cr. 1. F.S. Prereq: 204. Clinical experience, to be taken concurrently with 245. Satisfactory-fail only.

**C 280. Pre-StudentTeaching Experience.** (1-0) Cr. arr. Repeatable. F.S. Prereq: 280A may be taken alone. For enrollment in 280B+1, 280B must be either a prerequisite or taken concurrently. Field experience in area educational settings. 2-12-hour blocks of time needed for field experience. C 280B may be taken more than once for credit toward graduation.

A. Teacher Aide. Cr. 1 or 2

B. Educational Computing. Cr. 1 or 2 (2 credits by permission only)

C. Infant/Toddler Tutoring. Cr. 1

D. Museum Education. Cr. 1

E. Multicultural/Youth Experience. Cr. 1 or 2

F. International Student. Cr. 1 or 2 (Permission of instructor required)

G. Mild/Moderate Disabilities. Cr. 1 (concurrent with Sp Ed 330)

H. Early Field Experience. Cr. 1

I. Secondary Science. Cr. 1 or 2

J. N. Co-Field Experience. Cr. 1 (permission of department required)

K. Art Education Field Experience. Cr. 1 (Permission of department required)

**C 290. Independent Study.** Cr. arr. Prereq: 6 credits in education, permission of department chair.

**C 302. Principles and Practices of Digital Learn- ing.** (2-2) Cr. 3. F.S. Prereq: 201 or 202, 245, 268. Advanced integration of instructional technology into K-12 teaching and learning; designing classroom ap- plications for tool software; implementing technology- based lessons with K-12 students; issues and trends in classroom technology use.

**C 315. Transfer Orientation.** Cr. 1. F.S. Overview of elementary education requirements, curricular opportunities, and university procedures. Program planning. Required of all transfer students majoring in early education. Satisfactory-fail only.

**C 332. Educational Psychology of Young Learners.** (3-0) Cr. 3. F.S. Prereq: Psych 230 or HD FS 102, open only to majors in Early Childhood Education or Early Childhood Education-Preschool. Psychological theory relevant to classroom learning, cognition, motivation, classroom management and assessment for children from birth to grade 6. Implications of theory for teaching children and for assessing learning in educational settings with young and grade school aged children.

**C 333. Educational Psychology.** (Cross-listed with Psych). (3-0) Cr. 3. F.S. Prereq: Psych 230 or HD FS 102, application to the teacher education program or major in psychology. Classroom learning with emphasis on theories of learning and cognition, and instructional techniques. Major emphasis on measurement theory and the classroom assessment of learning outcomes.

**C 347. Nature of Science.** (Dual-listed with 547). (3-0) Cr. 3. Prereq: 280M; concurrent enrollment in 418 or instructor permission. The intersection of issues in the history, philosophy Sociology, and psychology of science and their application to and impact on science teaching and learning, science teacher education, and science education research.

**C 377. The Teaching of Reading and Language Arts in the Primary Grades (K-3).** (4-0) Cr. 4. F.S.S.S. Prereq: admission to teacher education program, C 245, Sp Ed 250, or Ed Biol maj or 221 (ECE majors); concurrent enrollment in 448, 468A, 468C (Ed Biol majors) or 438, 468F, 468G, Sp Ed 368, HD FS 343 (ECE majors). Theories, teaching strategies, and instructional materials pertinent to teaching reading, writing, listening, and speaking to children in kindergarten through third grade.

**C 378. The Teaching of Reading and Language Arts in the Intermediate Grades (4-6).** (4-0) Cr. 4. F.S. Prereq: 377; concurrent enrollment in 449, 468B, 468D. Theories and processes of literacy. Application through reading and writing across the cur- riculum, integration of language arts, literature-based instruction, and metacognitive strategies.

**C 395. Teaching Reading in Middle and Secondary Schools.** (Dual-listed with 595). (3-0) Cr. 3. F.S. Prereq: 204 and junior standing. Analysis and application of strategies to enhance students’ literacy development in middle and secondary school settings.

**C 401. Middle School Student Growth and Devel- opment.** (3-0) Cr. 3. Prereq: Psych 230. Study of the physical, emotional, intellectual, and social develop- ment of 10 to 15 year old middle school students, with emphasis on implications for schools and teach- ers. Includes strategies for classroom management and working with parents. Issues of risk, resiliency, substance abuse, suicide, and sexuality will also be examined.

**C 402. Middle School Curriculum Design.** (3-0) Cr. 3. Prereq: 401; admission to teacher education. Emphasis on the middle school components of interdisciplinary teaming, curriculum frameworks, teacher-based guidance and assessment.

**C 404. Multicultural Foundations of School and Society: Introduction.** (3-3) Cr. 3. F.S. Prereq: 201 or 202, 393, 402. Junior classification, admission to teacher education program. Awareness and nature of cultural pluralism; need for multicultural education; multicultural concepts and theories; cultural groups - their perceptions, needs, and contributions, problems and issues regarding ethnic prejudice, and discrimination based on race, ethnicity, socioeco- nomic class, sex/gender, sexual identity, and language in the school environment; curriculum infusion and transformation, multicultural interaction, design and execution of teaching strategies.

**C 407. Principles and Practices of Distance Learn- ing.** (Dual-listed with 507). (2-2) Cr. 3. F.S. Prereq: 201 or 202; convenient access to the Web. Review of flexible and distance learning (FDL) cases in a variety of contexts and pedagogic styles, research into relevant topics. Identification of principles and frameworks for best practice in this field. Offered in FDL modes, utilizing telecommunications and the Internet.

**C 416. Supervised StudentTeaching - Elementary.** Cr. arr. F.S. Prereq: GPA 2.5; full admission to teacher education, senior classification: 372, 443, 448, 449, 450. Reservation required. Supervised teaching experience in the elementary grades.

A. Primary grades (K-3)

B. Intermediate grades (4-6)

C. World Language

D. International Student Teaching - Primary grades.

E. International Student Teaching - Intermediate grades.

**C 417. StudentTeaching.** (Dual-listed with 517). (Cross-listed with Eng, WLC, Music). Cr. arr. F.S. Prereq: GPA 2.5; Admission to teacher education, approval of coordinator during semester before student teaching. Evaluation of instruction, lesson planning, and teaching in the liberal arts and sciences.

A. Social Studies-Middle School

B. World Languages

C. Mathematics

D. Biological Sciences

E. English and Literature (Same as Eng 417E)

G. World Language (Same as WLC 417G)

J. Earth Sciences

K. Music-Secondary (Same as Music 417K)

L. Music-Elementary (Same as Music 417L)

M. Science-Basic

N. International Student Teaching

P. Social Studies-High School

**C 418. Secondary Science Methods I: A Research-Based Framework for Teaching Science.** (Dual-listed with 518). (2-0) Cr. 2. F.S. Prereq: 280M; concurrent enrollment in 347 and 468J. Development of a research-based framework for teaching science that includes student goals, congruent student actions, the character and role of science inquiry, teaching
behaviors and strategies, contemporary learning theories, and self-evaluation.

C 1418. Secondary Science Methods II. (Dual-listed with 519). (2-0) Cr. 2. S. Prereq: 418 or 518. Undergraduate students must register concurrently for 468K. Advancing a research-based framework for teaching science in a variety of school settings, emphasizes the role of research, the development and revision of science curriculum, exceptional learners, and curriculum development strategies, technology and student assessment.

C 1420. Bilingualism, Bilingual Education, and U.S. Mexican Youth. (Dual-listed with 520). (3-0) Cr. 3. F. Prereq: 406. Introduction to research on bilingualism and examination of the social, historical, and political contexts of bilingual education in U.S. schools. Attention to policy environment, school program structure, mode of classroom instruction, family and community context, and attunement of bilingualism and biculturalism for U.S. Mexican youth.

C 1426. Principles of Secondary Education. (Dual-listed with 526). (3-0) Cr. 3. F.S.S.S. Prereq: 202, senior classification, admission to teacher education program. The curriculum, human relations, student evaluation, curriculum, classroom management, organization of schools, legal aspects of schools, professionalism, and career planning.

C 1443. The Teaching of social Studies. (3-0) Cr. 3. F.S.S.S. Prereq: 377 Study, development, and application of current methods, curriculum materials, and assessment strategies for providing appropriate social studies learning experiences for primary and intermediate grade children.

C 1452. Corrective Reading. (Dual-listed with 552). (3-0) Cr. 3. F.S.S.S. Prereq: 378 or equivalent; undergraduate students must register concurrently for Sp Ed 365, 436; graduate students must have a teaching license. Identification, analysis and correction of reading problems in five areas: print knowledge, integration of print knowledge, oral reading fluency, vocabulary, and comprehension.

C 1456. Integrating Technology into the Reading and Language Arts Curriculum. (Dual-listed with 556). (3-0) Cr. 3. F.S.S. Prereq: 201 or 202, 377. Methods and strategies used to integrate technology into the reading and language arts curriculum. Use and evaluation of reading and language arts software for elementary classrooms.

C 1468. Supervised Practicum in Teaching. Cr. arr. F.S.S.S. Prereq: Admission to teacher education program. Observation, application of current methods, and processes for primary grade children in a supervised elementary classroom while engaged in other elementary methods courses.

C 1480. Field Experience for Secondary Teaching Preparation. (Cross-listed with MUSC). Cr. arr. Repeatability. F.S. Prereq: Permission of area coordinator required prior to enrollment. Observation and participation in a variety of school settings after admission to the teacher preparation program. (S/F grading may be used in some offerings of some sections.)

C 1490. Independent Study. Cr. arr. F.S.S.S. Prereq: GPA of 2.5 or more for preceding semester.

C 1504. Evaluating Digital Learning Environments. (3-0) Cr. 3. F. Prereq: 504. Introduction to educational theories and models of instructional design. Design decision-making based on the analysis of performance problems and instructional inputs. Practical experience with the design and development of instructional strategies and evaluation principles.

C 1507. Principles and Practices of Distance Learning. (Dual-listed with 407). (2-0) Cr. 3. F.S.S. Prereq: 501, convenient access to the Web, Review of flexible and distance learning (FDL) cases in a variety of contexts and pedagogical and technical relevant topics. Identification of underlying principles and frameworks for best practice in this field. Offered in FDL modes, utilizing telecommunications and the Internet.
C I 508. Algebra in the K-12 Classrooms. (3-0) Cr. 3. F. Prereq: 448, 497, or graduate Status. Focus on Algebraic concept explorations and associated procedures. Use of research-based strategies and appropriate technologies to apply fundamental ideas of patterning, the concept of order and relationships among variables into K-12 classrooms. Additional top- ics facilitate critical examination of K-12 curriculum, pedagogy, and assessment.

C I 509. Geometry in the K-12 Classrooms. (3-0) Cr. 3. S. Prereq: 448, 497, or graduate Status. Euclidian and modern exploration with a focus on pedagogical issues in the K-12 classroom. Use of research-based strategies and appropriate technologies to teach geometry in K-12 classrooms. Additional topics from discrete Mathematics, history and Philosophy of geometry and fractal geometries.

C I 511. Technology Diffusion, Leadership and Change. (3-0) Cr. 3. S. Prereq: Admission to gradu- ate study, 501 or equivalent and 505 or equivalent. Introduction to practices and principles of technology diffusion, leadership and strategic change in educa- tion. Frameworks and strategies for professional de- velopment and organizational change; current issues such as the digital divide.

C I 512. Research Trends in Digital Learning. (3-0) Cr. 3. F. Prereq: Admission to graduate study and at least two courses in research and foundations of instructional technology. Critical review of current research trends and underlying educational technology. Engagement with current projects' tech- niques and analyses for qualitative and quantitative approaches, including the application of technology for the dissemination of scholarship. Designed as a capstone course to consolidate graduate students' knowledge of current research in curriculum and instructional technology for students in M.S. and Ph.D. programs.

C I 513. Mathematical Problem Solving in K-12 Classrooms. (3-0) Cr. 3. F. Prereq: 6 credits of Math- ematics, 448 or 497 or 597 or permission of instruc- tor. Strategies for improving problem solving skills across all strands of Mathematics (e.g., geometry, algebra, number theory) will be emphasized. Issues surrounding the appropriate role of problem solving in K-12 Mathematics classrooms will also be discussed, including distinctions among teaching “about,” “for,” and “through” problem solving.

C I 514. Introduction to the Purposes and Com- plexities of Science Teaching. (1-2) Cr. 2. S. Prereq: Admission to M.A.T. program. Introduction to critical issues facing science educators, science education goals reflecting contemporary purposes of schooling, and how people learn science.

C I 515. Action Research in Education. (3-0) Cr. 3. S. Prereq: Admission to graduate study, one course in research methods, educational inquiry, statistics, educational psychology, or instructional design. Philo- sophy and methods of conducting and communicating action research. Current issues in action research. Use of action research to improve education. De- signed primarily for individuals involved in teaching or development of educational materials or student in M.Ed. programs.

C I 516. Antiracist Curriculum Development and Implementation. (2-2) Cr. 3. S. Prereq. 9 credits in education. Introduction to historical, sociological, philosophical and pedagogical founda- tions of antiracist/multicultural education. Examination of causes of racism in different forms of discrimination, and intergroup conflict from different theoretical perspectives and experiential exercises.

C I 517. StudentTeaching. (Dual-listed with 417). Cr. arr. F.S. Prereq. Full admission to teacher educa- tion, approval of coordinator during semester before student teaching. Supervised student teaching in the liberal arts at the secondary level.

B. Physical Sciences
C. Mathematics
D. Biological Sciences
J. Earth Sciences
M. Science - Basic

C I 518. Science Methods I: A Research-Based Framework for Teaching Science. (Dual-listed with 418). (2-0) Cr. 2. F. Prereq: 514; concurrent enrollment in 547 and 591D. Development of a research-based framework for teaching science that includes student goals and outcomes, instructional character- and role of science inquiry, teaching behaviors and strategies, contemporary learning theories, and self- evaluation.

C I 519. Secondary Science Methods II. (Dual-listed with 419). (2-0) Cr. 2. S. Prereq: 418 or 518, concur- rent enrollment in 546. This research-based framework for teaching science in a variety of school settings; emphasizing the teacher’s role, the develop- ment and revision of science curriculum, exceptional learners, content area reading strategies, manage- ment strategies, technology, and student assess- ment.

C I 520. Bilingualism, Bilingual Education, and U.S. Mexican Youth. (Dual-listed with 420). (3-0) Cr. 3. F. Prereq: 506. Introduction to research on bilingualism and examination of the social, historical, and political contexts of bilingual education in U.S. schools. Atten- tion to policy environment, school program structure, mode of classroom instruction, family and community context, and attainment of bilingualism and bicultural- ism for U.S. Mexican youth.

C I 523. Teaching Mathematics to Struggling Ele- mentary Learners. (3-0) Cr. 3. S. Prereq. 438 or 448. Instructional strategies and assessment techniques for elementary students struggling to learn Mathematics. Emphasis on current research and practices for at-risk students and students with disabilities.

C I 524. Design and Development of Media. (2-0) Cr. 2. S. Prereq: 501; graduate classification. Principles of the design and production of instructional media, visual development and the creation of various tradi- tional media and emerging technologies. Laboratory experiences in the production of several instructional media.

C I 526. Principles of Secondary Education. (Dual- listed with 426). (3-0) Cr. 3. S. S.S. Prereq. 6 credits in education. The correlations, student evaluation, support services, classroom management, organization of schools, legal aspects of schools, professionalism and career planning.

C I 529. Educational Psychology and the Second- ary Classroom. (3-0) Cr. 3. S. Prereq. Bachelor's degree, admission into an advanced level teacher licensure program. Analysis of psychological research theory related to learning, cognition, motivation, indi- vidual differences, and teaching techniques. Student and classroom assessment to facilitate positive learn- ing outcomes. Adaptation and differentiation of instruc- tion to meet individual learners’ needs. This course can only be used for teacher licensure programs. It is not acceptable for use in meeting the non-licensure M.Ed., M.S. or Ph.D. requirements.

C I 533. Educational Psychology of Learning, Cognition, and Memory. (Cross-listed with Psych). (3-0) Cr. 3. S. Pr. Pre-requisite: Leveraging, cognition, and memory in educational/training settings.

C I 541. How People Learn: Implications for Teach- ing Science. (3-0) Cr. 3. Prereq. Bachelor's degree. Current learning theories within science education and their application to science classrooms. Examina- tion of models which assist the implementation of these theories of learning.

C I 547. Nature of Science. (Dual-listed with 347). (3-0) Cr. 3. F. Prereq: Concurrent enrollment in 518 or permission of instructor. The intersection of issues in the history, philosophy, sociology, and psychology of science and their application to and impact on science teaching and learning, science teacher education, and science education research.

C I 548. Restructuring Science Activities. (3-0) Cr. 3. S.S.S. Prereq: Admission to teacher education or teaching license. Modification of laboratory activi- ties and other everyday science activities so they are more congruent with how students learn, the nature of science, and the National Science Education Standards.

C I 552. Corrective Reading. (Dual-listed with 452). (3-0) Cr. 3. S.F.S. Prereq. 378 or equivalent; under- graduate students must register concurrently for Sp Ed 385, 436; graduate students must have a teach- ing license. Identification, analysis, and correction of reading problems in Knowledge, integration of print knowledge, oral reading fluency, vocabulary, and comprehension.

C I 553. Reading for Adolescents with Mild/Moderate Disabilities. (3-0) Cr. 3. S. Prereq. Teaching license. Instructional strategies for enhancing the comprehension and retention of students with mild/moderate disabilities, in conjunction with content-area reading material.

C I 554. Reading and Responding to Children’s Literature. (3-0) Cr. 3. Alt. F. offered 2010. Prereq: Senior Status or teaching license. Research and discussion of issues surrounding the classroom use of literature for children and young adults including censorship, diversity, selection, and the influences of technology.

C I 555. Integrating Technology into the Reading and Language Arts Curriculum. (Dual-listed with 456b). (3-0) Cr. 3. S.F.S. Prereq. Teaching license. Meth- ods and strategies used to integrate technology into the reading and language arts curriculum. Use and evaluation of reading and language arts software for elementary classrooms.

C I 567 Teaching Mathematics to Struggling Sec- ondary Learners. (Cross-listed with Sp Ed). (3-0) Cr. 3. Prereq. Secondary teaching experience. Instructional methods and assessment techniques for secondary students struggling to learn Mathematics. Particular emphasis on current research, practices, and trends in mathematics interventions for at-risk students and students with disabilities.

C I 570. Tying with Technology for Practicing Teachers. (Cross-listed with M S E.). (2-0) Cr. 2. S. Prereq: C I 201 or 202, non-engineering major. A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on experiences based on simple systems constructed out of LEGO’s and controlled by small microcomputers. Other technological advances with K-12 applications will be explored. K-12 teachers will leave the course with complete lesson plans for use in their classrooms.

C I 578. Pedagogy, Equality of Opportunity, and the Education of Blacks in the United States. (3-0) Cr. 3. Prereq. Graduate or senior level Status or permission of instructor. This course takes a nonlinear, reflective view of the historical, social, economic, political, and legal conditions of the Black Americans in the U.S. Educational theories and Philosophies, Critical Race Theory and Black Feminist Thought form the framework for investigating broad-based, multiple issues of education for African Americans in the U.S. as they are situated in the prevailing dominant views.

C I 588. Supervised Tutoring in Reading. (2-2) Cr. 3. F.S.S. Prereq. Graduate Status, teaching license and concurrent enrollment in or completion of one course
Courses for graduate students

C I 503. Advanced Learning Environments Design. (Cross-listed with HCI). (3-0) Cr. 3. S. Prereq: 502. Exploration of advanced aspects of the instructional design process. Application of analysis, design, development and production, evaluation, and project management principles. Focus on the production and use of instructional technology with an emphasis on the instructional design consulting process. Theory and research in instructional technology provides the foundation for design decisions.

C I 610. Digital Learning in Teacher Education. (2-0) Cr. 2. F. Prereq: 505. Research on using technology in teacher education programs. Application examples studied. Field component involving relating material from class to a teacher education situation.

C I 611. Philosophical Foundations of Digital Learning. (3-0) Cr. 3. Prereq: 12 graduate credits in curriculum and instruction. Exploration of Philosophes of science that serve as foundations for research and practice in instructional technology, including positivism, post-positivism, interpretivism/constructivism, and critical theory. The roles of language, nature of truth and reality, and acceptable ways of knowing are explored in terms of their implications for instructional technology design, delivery, research, and scholarship.

C I 612. Socio-psychological Foundations of Digital Learning. (3-0) Cr. 3. Prereq: 12 graduate credits in curriculum and instruction. Exploration of theories of learning and associated instructional models that are the foundation for research and practice in education and educational technology, including behaviorism, information processing theory, and cognitive science. Emphasis on cognitive and social constructivist paradigms and the creation and use of constructivist learning environments supported by technology.

C I 615. Seminar. (0-2) Cr. 1 F. Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research. A. Curriculum B. Instructional Technology C. Science Education D. Secondary Education E. Multicultural Education F. Mathematics Education I. Elementary Education J. World Language Education K. Educational Psychology L. Social Studies Education M. Literacy Education

Courses for graduate students

C I 503. Advanced Learning Environments Design. (Cross-listed with HCI). (3-0) Cr. 3. S. Prereq: 502. Exploration of advanced aspects of the instructional design process. Application of analysis, design, development and production, evaluation, implementation, and project management principles. Focus on the production and use of instructional technology with an emphasis on the instructional design consulting process. Theory and research in instructional technology provides the foundation for design decisions.

C I 610. Digital Learning in Teacher Education. (2-0) Cr. 2. F. Prereq: 505. Research on using technology in teacher education programs. Application examples studied. Field component involving relating material from class to a teacher education situation.

C I 611. Philosophical Foundations of Digital Learning. (3-0) Cr. 3. Prereq: 12 graduate credits in curriculum and instruction. Exploration of Philosophes of science that serve as foundations for research and practice in instructional technology, including positivism, post-positivism, interpretivism/constructivism, and critical theory. The roles of language, nature of truth and reality, and acceptable ways of knowing are explored in terms of their implications for instructional technology design, delivery, research, and scholarship.

C I 612. Socio-psychological Foundations of Digital Learning. (3-0) Cr. 3. Prereq: 12 graduate credits in curriculum and instruction. Exploration of theories of learning and associated instructional models that are the foundation for research and practice in education and educational technology, including behaviorism, information processing theory, and cognitive science. Emphasis on cognitive and social constructivist paradigms and the creation and use of constructivist learning environments supported by technology.

C I 615. Seminar. (0-2) Cr. 1 F. Selected topics in curriculum and instruction; an analysis of research potential; evaluation of impact upon the profession; implications for additional research.
Special Education (Sp Ed)
Courses primarily for undergraduate students

Sp Ed 250. Education of the Exceptional Learner in a Diverse Society. (3-0) Cr. 3. F. Prereq: C I 204. An overview of students with diverse learning needs. Emphasis on early identification, educational services and strategies in inclusive settings, and preparation for community living in a heterogeneous society.

Sp Ed 339. Collaborative Partnerships in Special Education. (3-0) Cr. 3. F. Prereq: Concurrent enrollment in 330. Collaborative skills used in education of students with mild/moderate disabilities. Includes collaboration between general and special education teachers, parents, paraeducators, and other education professionals and agencies.

Sp Ed 355. Classroom Assessment in Inclusive Primary Settings. (2-0) Cr. 2. F. Prereq: Concurrent enrollment in 355; C I 433, 438, 439, 468D, 468F. Examination and application of strategies for determining educational needs, planning and evaluating instructional programs, and monitoring student progress.

Sp Ed 436. Instructional Methods for Students with Mild/Moderate Disabilities. (3-0) Cr. 3. S. Prereq: C I 206H, 330, 365. Evidence-based instructional strategies/techniques in academic areas and materials for individual instruction and classroom management for elementary students with mild/moderate disabilities.

Sp Ed 450. Teaching Secondary Students with Exceptionalities in the General Education Classroom. (2-0) Cr. 3. F. S. Overview of characteristics and needs of exceptional youth and appropriate service delivery options. Legal foundations for special education. Emphasis on co-teaching models, differentiated instruction, accommodations for instruction and assessment, and collaboration among professionals and parents.

Sp Ed 455. Instructional Methods for Inclusive Primary Settings. (2-0) Cr. 2. F. S. Prereq: Concurrent enrollment in 355; C I 433, 438, 439, 468D, 468F. Evidence-based instructional strategies and techniques in academic areas that support the learning of students with diverse learning needs. Emphasis on accommodations and alternative teaching strategies to meet individual student needs.

Sp Ed 460. Special Education Capstone. (1-0) Cr. 1. F. Prereq: 436, concurrent enrollment in 459. Discussion and application of evidence-based instructional strategies/techniques in academic and behavioral areas with students who have mild/moderate disabilities. Discussion of issues related to education of students with mild/moderate disabilities.

Sp Ed 480. Independent Study. Cr. arr. F. S. Prereq: 12 credits in elementary education, permission of department chair.

Courses primarily for graduate students, open to qualified undergraduate students

Sp Ed 501. Teaching Students with Exceptionalities in General Education. (3-0) Cr. 3. S. S. Prereq: Baccalaureate degree. Overview of characteristics and needs of exceptional children/youth and appropriate service delivery options. Emphasis on accommodations and modifications for instruction and assessment and collaboration among professionals and parents.

Sp Ed 510. Foundations in Mild/Moderate Disabilities. (3-0) Cr. 3. S. Prereq: 501 or equivalent. Historical and legal foundations for special education. Characteristics, prevalence, and etiology of mild/moderate disabilities. Historical and contemporary models of programming for students with disabilities.

Sp Ed 511. Foundations of Behavioral Disorders and Learning Disabilities. (3-0) Cr. 3. S. Study of theory, interventions and special education service delivery models to students with moderate/severe behavioral/learning disabilities in the public schools and residential settings.

Sp Ed 517. Research in Special Education. (2-0) Cr. 2. S.S. Prereq: 510, 515. Critical review of recent literature in education and related behavioral sciences as applied to education of students with disabilities.

Sp Ed 520. Instructional Methods for Mild/Moderate Disabilities. (3-0) Cr. 3. Prereq: 510, 515. Evidence-based instructional methods for meeting the academic and behavioral needs of students with mild/moderate disabilities. Includes methods, strategies, and behavior management techniques appropriate for students with mild/moderate disabilities.

Sp Ed 530. Evidence-based Practices in Behavior Disorders. (3-0) Cr. 3. Prereq: 511, 515. Current research on evidence-based interventions designed to improve the behavior and social skills of students with moderate/severe behavior disorders. Particular emphasis on positive behavioral supports and behavior change strategies.

Sp Ed 553. Reading for Adolescents with Mild/Moderate Disabilities. (Cross-listed with C I 501) Cr. 3. S. Prereq: Teaching license. Instructional strategies for enhancing the comprehension and retention of students with mild/moderate disabilities, in conjunction with content-area reading material.

Sp Ed 555. Career Education and Transition for Youth with Disabilities. (2-0) Cr. 2. S. Prereq: 510 or 511. Examination of the academic, personal, social, employability, and daily living skills needed for a satisfactory adult life. Exploration of curricula, programs, and services to meet these needs.

Sp Ed 560. Classroom Management/Behavioral Support. (3-0) Cr. 3. F. Prereq: Teaching license. Emphasis on positive behavioral supports and understanding behavior and its context through a functional behavioral approach. Design and development of carefully planned behavioral intervention programs for groups and individual students in general and special education settings.

Sp Ed 564. Collaborative Consultation. (3-0) Cr. 3. F. Prereq: 510, 515, 520 or 530 or 540. Models of consultation. Characteristics and methods to promote effective collaboration with families, paraprofessionals, other school personnel, and representatives of other agencies. Includes specific attention to IEP development as a collaborative process.

Sp Ed 565. Role of the Consultant. (1-0) Cr. 1. Prereq: 564. Explore role of the educational consultant in different settings (State department, area education agency, school district, private). Examine roles in relationship to models (mental health, collaborative, organizational).

Sp Ed 570. Systems-Level Services for Youth with Behavioral and Learning Disabilities. (3-0) Cr. 3. S. Prereq: 517. Overview of systems (education, juvenile justice, mental health, families, communities) that serve students with special education needs. Emphasis on how these systems work to provide needed programs and services for youth with behavioral and learning disabilities.

Sp Ed 590. Special Topics. Cr. arr. F. S. Prereq: 15 credits in education, permission of department chair.

Sp Ed 591. Supervised Field Experience. (0-2) Cr. arr. F. S. Prereq: 15 graduate credits in special area, admission to the graduate program in special education. Supervised on-the-job field experience in special areas. G. Mild/Moderate Disabilities, K-6; H. Mild/Moderate Disabilities, 7-12; K. Behavior Disorders/Learning Disabilities, K-12

Courses for graduate students

Sp Ed 615. Seminar. (1-0) Cr. 1. Repeatable. Selected topics in special education. Analysis of current special education research potential. Evaluation of impact upon the profession. Implications for additional research.

Design Studies
(Interdepartmental Undergraduate Program)
Kate Schwensen, Program Coordinator
The Design Studies program brings together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design fields. Students in any college may elect to take a minor in Design Studies.

Core Design Program
Several Design Studies courses are part of the Core Design Program, which is required for all undergraduate students in the College of Design.

Minor—Design Studies
The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

Additional information is available in the Student Programs and Services Office, 297 College of Design.

Minor—Digital Media
To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open only to undergraduate students in the College of Design.

Detailed information is available in the Student Programs and Services Office, 297 College of Design.

Courses primarily for undergraduate students
Dan S 102. Design Studio I. (1-4) Cr. 4. F. A core design studio course exploring the interaction of two- and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Investigation of creative process, visual order and materials, and development of critical thinking through studio projects and lectures. Includes study of precedents, core design practices and disciplines in their cultural contexts.

Dan S 111. Design Exchange Seminar II. (0-2) Cr. 1. S. Prereq: Member of the Design Exchange Learning Community. Development and clarification of career and academic plans. Satisfactory-fail only.

Dan S 115. Design Collaborative Seminar. (1-0) Cr. 0.5. S. Prereq: Member of Design Collaborative Learning Community. Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Satisfactory-fail only.

Dan S 131. Design Representation. (1-4) Cr. 4. F. An introduction to drawing through lecture and studio experiences. Focus on creative problem solving and communication in order to give visual form to ideas. Emphasis on perceptual, conceptual, and evaluative abilities through experiences that build eye, brain, and hand coordination. Explorations include drawing from observation and memory, working at various scales and duration, and using a variety of media and processes.

Dan S 181. Origins and Evolution of Modern Design. (Cross-listed with Art H). (3-0) Cr. 3. F. History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

Dan S 183. Design Cultures. (3-0) Cr. 3. F. A broad-based exploration of the dynamic relationship between design and culture, employing case study method to investigate particular examples of cultural production in contemporary Society. Design processes and design as presented as culturally, economically, environmentally, historically, ideologically, politically, and socially grounded events and artifacts.

Dan S 221. History of Western Architecture I. (Cross-listed with Arch). (3-0) Cr. 3. F. Introductory survey with emphasis on the cultural, visual, rational, and constructed context. Ancient through Renaissance.

Dan S 222. History of Western Architecture II. (Cross-listed with Arch). (3-0) Cr. 3. S. Introductory survey with emphasis on the cultural, visual, natural, and constructed context. Renaissance to present.

Dan S 270. Forces Shaping Our Metropolitan Environment. (Cross-listed with C R P). (3-0) Cr. 3. S. Must be taken prior to completing 9 credits in C R P introduction to the social, political, physical, and economic forces as they shape metropolitan areas. A comprehensive picture of metropolitan development showing important roles other urban disciplines play in the planning process and the interrelationships of the disciplines.

Dan S 274. The Social and Behavioral Landscape. (Cross-listed with L A). (3-0) Cr. 3. S. Exploration of social and behavioral factors pertinent to design of the domestic, civic, and commercial landscape. Focus on working familiarity with design principles as they relate to the behavior and activities of people across a broad demographic and cultural spectrum; application of these principles to design of outdoor environments. Lectures and discussions, including group exercises and field trips.

Dan S 280. History of Art I. (Cross-listed with Art H). (3-0) Cr. 3. F. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. H. Honors. Cr. 4.

Dan S 281. History of Art II. (Cross-listed with Art H). (3-0) Cr. 3. S. Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. H. Honors. Cr. 4.

Dan S 291. World Cities and Globalization. (Cross-listed with C R P). (3-0) Cr. 3. F. Art., offered 2010. Prereq: Sophomore classification. World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity.

Dan S 292. Introduction to Visual Culture Studies. (Cross-listed with ART). (3-0) Cr. 3. F. Prereq: Open to all majors. An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary influences of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields.

Dan S 293. Environmental Planning. (Cross-listed with C R P Env) (3-0) Cr. 3. F. Prereq: Sophomore classification. Comprehensive overview of the field of environmental design and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

Dan S 301. Study Abroad Preparation Seminar. (1-0) Cr. 1. Repeatable. F. S. Cultural introduction to host country, introduction to faculty sponsor and program of study, the particularities of traveling and living abroad, and financial and logistical preparations. Guest lectures. Required of all students planning to participate in a College of Design study abroad program for 8 or more credits. Satisfactory-fail only.

Dan S 302. Design Leadership Seminar. (1-2) Cr. 2. Repeatable. Prereq: Selection as a peer mentor for the Core Design Program or for students serving as peer mentors for the Core Design Program, under faculty supervision. Development of teaching and leadership skills within the context of design education experiences. Satisfactory-fail only.

Dan S 303. Design Ambassadors. (1-2) Cr. 2. Repeatable. Prereq: Admission into one of the professional programs in the College of Design. Opportunity to strengthen leadership, communication and presentation skills. Introduction to student development theory. Students participate in collaborative projects focused on prospective design students. Satisfactory-fail only.

Dan S 310. Practical Experience. Cr. R. Prereq: Permission of advisor or Coordinator of Design Studies. Independent educational enrichment through practical experience. Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less.

Dan S 320. Urban form. (Cross-listed with C R P). (3-0) Cr. S. Alt. S., offered 2011. Prereq: C R P 252 or 270, or permission of instructor. Examines how urban form is shaped, what constitutes good urban form, and what are the trends in emerging urban forms. Descriptive, explanatory theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.

Dan S 351. Solar Home Design. (Cross-listed with Arch). (3-0) Cr. 3. S. Prereq: Arch 202. Architectural design and technical analysis of residential structures with emphasis on energy construction and solar energy utilization.

Dan S 371. Landscape Architectural History: 1750 to Present. (Cross-listed with L A). (3-0) Cr. 3. S. Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

Dan S 373. Landscape Architectural History: Prehistory to 1750. (Cross-listed with L A). (3-0) Cr. 3. F. Investigation of international landscape design concepts and trends as observed over time, from pre-history to the mid 18th century. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.

Dan S 382. Art and Architecture of Asia. (Dual-listed with 582). (Cross-listed with Art H). (3-0) Cr. 3. Introduction to the history of art and architecture in China, Korea, and Japan before the modern era. Visual materials selected based on important themes that are critical in understanding East Asian culture and art tradition. Museum field trip expenses to be paid by students. Nonmajor graduate credit.

Dan S 383. Greek and Roman Art. (Dual-listed with 583). (Cross-listed with Art H, Cl St). (3-0) Cr. 3. Greek art from Neolithic and Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Nonmajor graduate credit.

Dan S 385. Renaissance Art. (Dual-listed with 585). (Cross-listed with Art H). (3-0) Cr. 3. European art including painting, sculpture, architecture, and crafts;
Design Courses

198

2009-2011

Design Studies

thirteenth through sixteenth centuries. Nonmajor graduate credit.

Dsn S 394. Women/Gender in Art. (Dual-listed with 594). (Cross-listed with Art H, VS). (3-0) Cr. 3. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture. Nonmajor graduate credit.

Dsn S 397. Internship Search Seminar. (1-0) Cr. 1. F. Prereq: Sophomore classification or above in one of the College of Design degree programs. A structured environment to set realistic learning goals, research potential sites, develop a strategy, develop essential job search materials and skills for finding an internship. Successfully obtaining an internship either for credit or non credit is encouraged but not required. Satisfactory/Fail only.

Dsn S 417. Urban Revitalization. (Dual-listed with 517). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: C R P 253 or 270. Planning methods available to further revitalize and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

Dsn S 425. Growth Management. (Dual-listed with 525). (Cross-listed with C R P). (3-0) Cr. 3. F. Prereq: Junior classification. Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

Dsn S 426. Topics in Native American Architecture. (Cross-listed with Am In, Arch). (3-0) Cr. 3. Repeatable. F.S. Prereq: Junior classification. History, theory, and principles of Native American/Indian Architecture, landscape Architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. A maximum of 6 credits of Arch 426 may be applied to degree program. Nonmajor graduate credit.

Dsn S 429. International Planning. (Dual-listed with 529). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Junior classification. Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

Dsn S 442. Site Development. (Dual-listed with 542). (Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: C R P 253, 272. Introduction to site analysis using landscape Architecture and environmental principles, drawing also on basic engineering concepts. Work will evolve from analysis to land development design.

Dsn S 446. Interdisciplinary Design Studio. (Dual-listed with 546). (0-12) Cr. Repeatable. Prereq: Junior classification in a curriculum in the College of Design and permission of instructor. Advanced interdisciplinary design projects.

Dsn S 478. Topical Studies in Landscape Architecture. (Dual-listed with 578). (Cross-listed with L A). Cr. arr. Repeatable. F.S.S. Prereq: L A 371 or senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

A. Landscape Design

B. Planting Design

C. Construction

D. History, Theory, Criticism

E. Landscape Planning

F. Urban Design

G. Graphics

H. Honors

I. Interdisciplinary Studies

J. International Studies

K. Computer Applications

L. Ecological Design

M. Social, Behavioral

N. Natural Resources

Dsn S 481. Art and Architecture of India. (Dual-listed with 581). (Cross-listed with Art H). (3-0) Cr. 3. Survey of Indian-style art and Architecture through history. Examine how art and Architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically. Nonmajor graduate credit.

Dsn S 487. Nineteenth Century Art. (Dual-listed with 587). (Cross-listed with Art H). (3-0) Cr. 3. European and American art and Architecture from 1780 to 1900 focusing on the major European movements: Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism. Nonmajor graduate credit.

Dsn S 488. Modern and Contemporary Art and Theory I. (Dual-listed with 588). (Cross-listed with Art H). (3-0) Cr. 3. F. Visual arts and critical theory from Impressionism to Abstract Expressionism. Nonmajor graduate credit.

Dsn S 489. Sequential Art. (Dual-listed with 589). (Cross-listed with Art H). (3-0) Cr. 3. S.F.S. An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present.

Dsn S 490. Independent Study. Cr. arr. Repeatable. F.S.S. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

A. History

B. Technology

C. Communications

D. Design

E. Entrepreneurship

F. Social/Behavioral

H. Honors

Dsn S 491. Environmental Law and Planning. (Dual-listed with 591). (Cross-listed with C R P. Env S). (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences. Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Dsn S 492. Special Topics: Italian Culture. Cr. 1. Repeatable. F.S.S. Prereq: Enrollment in the College of Design Rome Study Abroad Program or in Dsn S 301. Introduction to Italian contemporary culture, including language, fashion, politics, media, and social mores. Taught the semester prior and during study in Rome for students in the College of Design Rome program.

Dsn S 495. Modern and Contemporary Art and Theory II. (Cross-listed with 595). (Cross-listed with Art H). (3-0) Cr. 3. Visual arts and critical theory from Abstract Expressionism to the present. Nonmajor graduate credit.

Dsn S 496. History of Photography. (Dual-listed with 596). (Cross-listed with Art H). (3-0) Cr. 3. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an Art Historical perspective, emphasizing causative factors, cultural influences, and major masters and schools. Nonmajor graduate credit.

Dsn S 498. Selected Topics in Art History. (Dual-listed with 598). (Cross-listed with Art H). (3-0) Cr. 3. Repeatable. Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Courses primarily for graduate students, open to qualified undergraduate students

Dsn S 504. Why Change Anything?. (Cross-listed with C R P) (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Graduate Classification. Introduction to a range of approaches to justifying innovations, changes, and interventions proposed by designers, planners, and artists. Reasons for change and their bases in social, philosophical, and design reasoning, and their usefulness in justifying change to different audiences. Investigation of fallacies, ideologies, and contemporary problems in justifications.

Dsn S 517. Urban Revitalization. (Dual-listed with 417). (Cross-listed with C R P) (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Graduate Classification. Planning methods available to further revitalize and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

Dsn S 525. Growth Management. (Dual-listed with 425). (Cross-listed with C R P) (3-0) Cr. 3. Alt. F., offered 2009. Prereq: Graduate classification. Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban, rural relationships; and land preservation.

Dsn S 528. Topical Studies in Architecture. (Dual-listed with Arch). (3-0) Cr. arr. Repeatable. F.S.S. Prereq: Arch 221, 222 or senior classification or graduate standing.

A. Studies in Architecture and Culture

B. Technology

C. Communications

D. Design

E. Practice

Dsn S 529. International Planning. (Dual-listed with 429). (Cross-listed with C R P) (3-0) Cr. 3. S. Prereq: Graduate classification. Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development and housing.

Dsn S 542. Site Development. (Dual-listed with 442). (Cross-listed with C R P) (3-0) Cr. 3. S. Prereq: Graduation classification. Introduction to site analysis using landscape Architecture and environmental principles, but drawing also on basic engineering concepts. Work will evolve from analysis to land development design based on that analysis.

Dsn S 546. Interdisciplinary Design Studio. (Dual-listed with 446). (0-12) Cr. Repeatable. Prereq: Admission to a graduate program in the College of Design and permission of instructor. Advanced interdisciplinary design projects.

Dsn S 558. Sustainability and Green Architecture. (Cross-listed with Arch) (3-0) Cr. F. Prereq: Graduation classification. Issues of sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment; Issues of Green Architecture as it relates to building materials selection, systems of building materials, the environment of the United States and the World, Architects and examples of buildings with green or sustainable designations.

Dsn S 567. Preservation, Restoration, and Rehabilitation. (Cross-listed with Arch) (3-0) Cr. 3. S. Prereq: Senior classification. Construction standards and procedures for preserving, restoring, reconstructing and rehabilitating existing buildings following the guidelines of the National Park Service and the
National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Dan S 571. Design for All People. (Cross-listed with Arch, Geront). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Dan S 575. Contemporary Urban Design Theory. (Cross-listed with Arch). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Dan S 578. Topical Studies in Landscape Architecture. (Dual-listed with 478). (Cross-listed with L.Ai). (3-0) Cr. 3. S. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

A. Landscape Design
B. Planting Design
C. Construction
D. History, Theory, Criticism
E. Landscape Planning
F. Urban Design
G. Graphics
H. Honors
I. Interdisciplinary Studies
J. International Studies
K. Computer Applications
L. Ecological Design
M. Social/Behavioral
N. Natural Resources

Dan S 581. Art and Architecture of India. (Dual-listed with 481). (Cross-listed with Art H). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Survey of Indian-style art and Architecture through history. Examine how art and Architecture developed depending on number of credits. 

Dan S 582. Art and Architecture of Asia. (Dual-listed with 382). (Cross-listed with Art H). (3-0) Cr. 3. S. Prereq: Graduate classification, permission of instructor. Introduction to the history of art and Architecture in China, Korea, and Japan before the modern era. Visual materials selected based on important themes that are critical in understanding East Asian culture and art tradition. Museum field trip expenses to be paid by students.

Dan S 583. Greek and Roman Art. (Dual-listed with 383). (Cross-listed with Art H). (3-0) Cr. 3. S. Prereq: Graduate classification, permission of instructor. Greek art from Neolithic to Hellenistic epochs. Roman art from the traditional founding to the end of the empire in the West.

Dan S 585. Renaissance Art. (Dual-listed with 385). (Cross-listed with Art Hl). (3-0) Cr. 3. S. Prereq: Graduate classification, permission of instructor. European art including painting, sculpture, Architecture, and crafts; thirteenth through sixteenth centuries.

Dan S 587. Nineteenth Century Art. (Dual-listed with 487). (Cross-listed with Art Hl). (3-0) Cr. 3. S. Prereq: Graduate classification, permission of instructor. European and American art and Architecture from 1780 to 1900, focusing on the major movements of western Europe. Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

Dan S 588. Modern and Contemporary Art and Theory I. (Dual-listed with 488). (Cross-listed with Art Hl). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Visual arts and critical theory from Impressionism to Abstract Expressionism.

Dan S 589. Sequential Art. (Dual-listed with 489). (Cross-listed with Art Hl). (3-0) Cr. 3. S. Prereq: Graduate classification, permission of instructor. An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to the present.

Dan S 590. Special Topics, Cr. ar. Repeatable. F.S.SS. Prereq: Written approval of instructor and department chair on required form prior to semester of enrollment. Independent investigation of a topic of special interest to the student.

Dan S 591. Environmental Law and Planning. (Dual-listed with 491). (Cross-listed with C R P L A). (3-0) Cr. S. Prereq: Graduate classification, Environmental law and policy as applied in planning at the local and State levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Dan S 594. Women/Gender in Art. (Dual-listed with 394). (Cross-listed with Art H W S). (3-0) Cr. S. Prereq: Graduate classification, permission of instructor. Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.

Dan S 595. Modern and Contemporary Art and Theory II. (Dual-listed with 495). (Cross-listed with Art Hl). (3-0) Cr. 3. S. Prereq: Graduate classification, permission of instructor. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an Art Historical perspecive. Critical factors, cultural influences, and major masters and schools.

Dan S 598. Selected Topics in Art History. (Dual-listed with 498). (Cross-listed with Art Hl). (3-0) Cr. 3. S. Prereq: Graduate classification, permission of instructor. Specialized study in the history or criticism of art and/or design.

Dietetics

(Interinstitution Graduate program)
Participating faculty:
Iowa State University: Deborah P. Caner
Colorado State University: Mary Harris
Kansas State University: Linda Griffith
Michigan State University: Shonra
Montana State University: Christina Campbell
North Dakota State University: Ardis Brunt
Oklahoma State University: Nancy Betts
South Dakota State University: Kendra Kattelman
University of Kansas Medical Center: Marilyn Schnepf

“Dietetics” is an interinstitutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the ten institutions: Iowa State University, Colorado State University, Kansas State University, Michigan State University, Montana State University, North Dakota State University, Oklahoma State University, South Dakota State University: Kendra Kattelman, University of Kansas Medical Center, and University of Nebraska.

At Iowa State University, Dietetics is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-Diet) that consists of 36 credits. This is a non-thesis option and a special project or creative component is required. Students typically complete the program in 6-8 semesters while employed full-time.

Admission is limited to those who are Registered Dietitians or Registration-eligible Dietitians. A computer with minimum specifications, web access, and an email address are required for completing the program.

Admission procedures: Admission to the MFCS-Diet program requires exactly the same procedures as admission to the Graduate College. See. Graduate College section of this catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee processes through ISU.

The department cooperates in the interinstitution Master of Family and Consumer Sciences program to offer a specialization in Dietetics. The Master of Family and Consumer Sciences-Dietetics is designed for the Registered Dietitian or Registration-eligible Dietian. The 36 credit program is non-thesis and seeks to develop research skills, stimulate independent thought, and provide up-to-date knowledge in foods, nutrition, and foodservice/ business management. This program prepares individuals to integrate and apply the principles from the biosocial sciences, human behavior, and management to design and lead effective food and nutrition programs in a variety of settings. Students may build a program of study from offerings of the partner institutions such as human nutrition, nutrient metabolism, biostatistics, health promotion/disease prevention, foodservice systems management, food science, lifespan nutrition, wellness, entrepreneurship, nutrition education, nutritional assessment and food safety. The online program is tailored for credentialed, practicing dietetics professionals who seek to enhance their knowledge in a specific area of dietetics practice or retool for new career opportunities in dietetics practice.

Diet 511. Research Methods. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. www only. Only one of Diet 511 or FCEEd 511 may count toward graduation.

Diet 530. Nutrition in Wellness. (3-0) Cr. 3. S. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Addresses wellness promotion through nutrition. Nutritional risk and protective factors will be examined in relation to public health and individual nutrition. www only.

Diet 532. Maternal and Child Nutrition. (3-0) Cr. 3. S. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Critical examination of behavioral, physiological, and public health issues impacting dietary and nutritional factors that support normal growth and development. Content focuses on early stages of the life cycle: gestation, lactation, infancy, preschool, school age, and adolescence. www only.

Diet 534. Nutrition Education in the Community. (3-0) Cr. 3. S. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Principles and practices of teaching individual and groups to translate nutrition knowledge into action. Emphasis on research in evaluation of nutrition education. www only.
Diet 538. Nutrition: A Focus on Life Stages. (3-0) Cr. 3. SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Explores influence of normal physiological stresses on nutritional needs throughout the life span. Evaluates dietary intake and identification of appropriate consultation services in online discussions. Specific considerations, such as the influence of age and cultural heritage, are incorporated. www only.

Diet 540. Nutrition and Physical Activity in Aging. (Cross-listed with Geront). (3-0) Cr. 3. Alt. F, offered 2010. Prereq: enrollment in GP-IDEA MFCS in Dietetics. WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

Diet 544. Pediatric Clinical Nutrition. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Examines the physiological, biochemical and nutritional aspects of disease processes relevant to infants and children up to 18 years of age. Discussion of medical nutrition therapy for a variety of medical conditions in this population including inborn errors of metabolism, food hypersensitivity, obesity, and diseases of the major organ Systems. www only.

Diet 546. Phytochemicals. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Overview of phytochemicals (non-nutritive biologically active compounds) found in fruits, vegetables, cereals and oilseeds. Covers recent findings of chemistry, physiological functions, and potential health implications of phytochemicals. www only.

Diet 548. Professional Development Assessment. (Cross-listed with FS HN). (1-0) Cr. 1. F.S.SS. Prereq: Enrollment in GPIDEA MFCS in Dietetics. Web-based course providing information and practice for student to assess and evaluate own professional development and continuing professional education needs. Completion of professional 5-year plan. Satisfactory-fail only.

Diet 550. Finance and Cost Controls. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Over view of the fundamental knowledge of hospital financial managerial accounting, cost controls, and financial management. Important topics include financial statement analysis, cost concepts, value-volume-profit analysis, calculating and controlling food and beverage costs, pricing, and cost of operations. www only.

Diet 554. Statistics. (3-0) Cr. 3. S.SS. Prereq: enrollment in GPIDEA MFCS in Dietetics. Tools used to make statistical decisions. Major emphasis on explanation and understanding of important concepts involved; basic theme is understanding of data and methods used to analyze such data. www only. Only one of Diet 554 or Stat 401, 495, 542 may count toward graduation.

Diet 556. Advanced Nutrition: Micronutrients. (3-0) Cr. 3. S. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GPIDEA MFCS in Dietetics. Integration of the molecular, cellular and physiological aspects of vitamins and minerals in mammalian systems. Interactions among nutrients, metabolic consequences of deficiencies or excesses, relevant polymorphisms, major research methodologies, and current topics related to micronutrients and non-nutrient components. www only. Only one of Diet 556 or NutrS 502 may count toward graduation.

Diet 558. Advanced Nutrition: Macronutrients. (3-0) Cr. 3. F. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GPIDEA MFCS in Dietetics. Integration of the molecular, cellular and physiological aspects of macronutrients and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, their interactions, metabolic consequences, and major research methodologies. www only. Only one of Diet 558 or NutrS 501 may count toward graduation.

Diet 560. Medical Nutrition and Disease. (3-0) Cr. 3. F.S.SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention directed to medical nutrition needs of patients in the treatment of each disease state. www only. Only two of Diet 560 or NutrS 561, 564 may count toward graduation.

Diet 565. Malnutrition in Low-Income Countries. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Identification and assessment of malnutrition in low-income countries. Social, cultural, political, economic, and geographic determinants of malnutrition. Protein-energy malnutrition, vitamin and mineral deficiencies. Intervention approaches, international efforts and local sustainability. www only.

Diet 567. Nutrition for Dietitians. (Cross-listed with FS HN). (3-0) Cr. 3. Alt. F, offered 2009. Prereq: 460; BBMB 301, undergraduate course in physiologiology enrollment in GP-IDEA MFCS in Dietetics. Study of the current scientific literature to evaluate current trends and issues in nutrition science and Dietetic practice. Emerging areas of research investigating the role of nutrients in health and disease in humans will be explored. Emphasis on the impact of emerging research on nutrition recommendations and interventions designed to promote human health. www only.

Diet 568. Entrepreneurship in Dietetics. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Definition and discussion of entrepreneurship and its importance to economic and business environment. www only.

Diet 570. Nutrition and Human Performance. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Develop an understanding of nutrition based on knowledge of the biochemical and physiological process and functions of specific nutrients in meeting nutritional requirements. Emphasis on the relationship of optimal nutrition and physical efficiency and performance. www only.

Diet 572. Environmental Scanning and Analysis of Current Issues in Dietetics. (3-0) Cr. 3. S. Prereq: enrollment in GPIDEA MFCS in Dietetics. Overview of current topics, issues, and trends in Dietetics practice. www only.

Diet 573. Administration of Health Care Organizations. (3-0) Cr. 3. S. Prereq: enrollment in GPIDEA MFCS in Dietetics. A comprehensive review of today's health care institutions and their response to the economic, social, ethical, political, legal, technological, and environmental influences. www only.

Ecology and Evolutionary Biology
www.grad-college.iastate.edu/EEB/

(b) Award of Graduate Degree

(2) Plan B: Master of Science in Ecology and Evolutionary Biology. A plan B degree is awarded to students who desire to pursue intensive study in an area of research that is not addressed by the plan A degree. Plan B students are required to complete a minimum of 18 credits beyond the core courses included in the plan A degree, with at least 12 credits being at the 600 level or above. The plan B degree requires a written comprehensive examination and the preparation of a thesis. The thesis must be approved by the student's advisory committee and must be presented at the EEB symposium.

Ecology and Evolutionary Biology

www.grad-college.iastate.edu/EEB/

(interdepartmental Graduate Major)

Supervisory Committee: G. Courtney, Chair; A. Bronikowski; J. Dekker; J. Downing; J. Nason; D. Otte

The ecology and evolutionary biology (EEB) interdepartmental major is offered through a faculty housed in ten departments of the university: Faculty from the departments of Agronomy, Anthropology, Ecology, Evolution and Organismal Biology; Entomology; Geologic and Atmospheric Sciences; Horticulture; Mathematics; Natural Resource Ecology and Management; Plant Pathology; and Statistics cooperate to offer courses and research opportunities leading to the M.S. and Ph.D. degrees in a major in ecology and evolutionary biology.

Applicants should have completed an undergraduate or master of science or arts degree in one of the biological, physical, or Mathematical sciences. Applicants also should have taken undergraduate courses in both basic ecology and evolution.

The EEB major is designed for students interested in the study of mechanisms controlling the composition, structure, and functional processes of ecological systems and the mechanisms that regulate the pattern and rate of evolutionary change within and among species.

Cooperating departments offer courses and research opportunities in population, community, and ecosystems ecology; landscape ecology, modeling, and spatial dynamics; systematics, biodiversity, and bieogeography; physiological and behavioral ecology; conservation and restoration ecology; agroecology; natural resources ecology and management; evolutionary ecology; population, quantitative and evolutionary genetics; and environmental Statistics, stochastic modeling, and quantitative ecology and evolution. In addition, interdisciplinary courses in ecology and evolution are offered, including a special topics course, a seminar, and an extended field trip.

Students majoring in EEB may prepare themselves for careers focused on basic or applied ecology and evolutionary biology in a variety of settings, including academia, government, industry, and private organizations. Graduates have a broad understanding of ecology and evolution, and the knowledge and research skills to determine the scientific questions in biology and frame hypotheses and experimentally test those hypotheses. Graduates have a broad understanding of ecology and evolution, and the knowledge and research skills to determine the scientific questions in biology and frame hypotheses and experimentally test those hypotheses. Graduates have a broad understanding of ecology and evolution, and the knowledge and research skills to determine the scientific questions in biology and frame hypotheses and experimentally test those hypotheses. Graduates have a broad understanding of ecology and evolution, and the knowledge and research skills to determine the scientific questions in biology and frame hypotheses and experimentally test those hypotheses. Graduates have a broad understanding of ecology and evolution, and the knowledge and research skills to determine the scientific questions in biology and frame hypotheses and experimentally test those hypotheses. Graduates have a broad understanding of ecology and evolution, and the knowledge and research skills to determine the scientific questions in biology and frame hypotheses and experimentally test those hypotheses. Graduates have a broad understanding of ecology and evolution, and the knowledge and research skills to determine the scientific questions in biology and frame hypotheses and experimentally test those hypotheses. Graduates have a broad understanding of ecology and evolution, and the knowledge and research skills to determine the scientific questions in biology and frame hypotheses and experimentally test those hypotheses. Graduates have a broad understanding of ecology and evolution, and the knowledge and research skills to determine the scientific questions in biology and frame hypotheses and experimentally test those hypotheses.

Information on application procedures, research interests of the faculty, and specific requirements of the major may be obtained from the EEB web site www.grad-college.iastate.edu/EEB/ or by contacting eboffice@iastate.edu.

Courses for graduate students

EEB 511. Conceptual Foundations in Ecology and Evolutionary Biology. (2-3) Cr. 4. F. Prereq: Graduate classification. Introduction to key figures and ideas that have shaped the development of ecology and evolutionary biology. Covers major developments in ecology and evolutionary biology at five levels of biological organization: Genome, Organism, Population, Community, and Ecosystem. Impacts of these developments on current approaches to fascinating and exciting new directions. Students will learn about the major advances in the field and will be introduced to the major debates in the field. Students will also learn about the major research methods and experimental designs used to study ecological and evolutionary processes.

EEB 585. Extended Field Trip. (0-6) Cr. 2. Repeat-able. S. Prereq: Graduate classification. Annual field trip to a region of North America to study the major terrestrial and aquatic ecosystem types of the region. Report required.

EEB 590. Special Topics. Cr. arr. Repeatable. F.S.SS. Prereq: Graduate classification and permission of instructor. For students wishing to conduct in-depth study of a particular topic in ecology and evolutionary biology.
Students who are enrolled in the interdepartmental graduate majors with EEOB affiliation are required to participate in departmental seminars, to participate in research activities, and to show adequate progress and professional development while pursuing their degree. For both the M.S. and Ph.D. degrees, it is expected that research conducted by the student will culminate in the writing and presentation of a thesis or dissertation. Requirements and guidelines for study are provided by the Graduate College, the EEOB faculty, and the individual student’s major professor and Program of Study Committee. General information about graduate study requirements can be found at the web site for the Graduate College and requirements for the interdepartmental majors can be found by following the links from the EEOB web site above. Although not a formal requirement, the EEOB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Courses primarily for graduate students, open to qualified undergraduate students

EEOB 591. Freshwater Algae. (Cross-listed with EnSc, NREM). Structure of freshwater algae based on field collected material; emphasis on genus-level identifications, habitats visited include lakes, fens, streams, and rivers; algal ecology.

EEOB 507. Advanced Animal Behavior. (3-0) Cr. 3. Prereq: Grad student. Analysis of research on animal behavior. Topics covered may include behavioral ecology, mechanisms of behavior, evolution of behavior, applications of animal behavior to conservation biology, and applications of animal behavior to wild animals in captivity.

EEOB 514. Evolutionary Ecology. (3-0) Cr. 3. Prereq: 598. Biol 315; graduate standing. Evolution of ecological adaptations at the individual, population, community and landscape levels. Emphasis is on evolutionary mechanisms and adaptive strategies; units and mechanisms of evolution, life history strategies, species interactions and organization of communities, behavior, and patterns of distribution, speciation and macroevolution.

EEOB 531. Conservation Biology. (Cross-listed with A Ecl). (3-0) Cr. 3. Alt. S., offered 2010. Prereq: Biol 312; Biol 313 or graduate standing. Examination of conservation issues from both a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

EEOB 535. Restoration Ecology. (Cross-listed with EnSc, NREM). (2-3) Cr. 3. Prereq: Biol 366 or 474 or graduate standing. Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.
Behavior, communication, navigation, reproduction, taxonomy of birds. Emphasis on structure, physiology, and evolution of mammals. Laboratory focus on survey methods, identification and distribution of mammals in ecosystems, and conservation. Field trips.

EEOB 559. Mammalogy. (Cross-listed with A Ecl 365 or A Ecl 366. Dual-listed with Biol 459. Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, reproduction, and conservation. Laboratory exercises complement lecture topics, emphasize identification and distribution of Midwest birds, and include field trips.

EEOB 561. Plant Diversity and Evolution. (2-4) Cr. 6. Emphasis on the origins of life on Earth, with an emphasis on how plant diversity has evolved over time. Laboratory focus on survey methods, identification and distribution of plants and animals; sources and interpretation of systematic data; speciation; fundamentals of phylogenetic systematics. (Cross-listed with A Ecl 573H)

EEOB 565. Morphometric Analysis. (2-4) Cr. 6. Emphasis on the role of different factors influencing wetland biodiversity and ecosystem function. Laboratory focus on the analysis of material and energy flows in wetland systems. Emphasis on the role of different factors influencing wetland biodiversity and ecosystem function.

EEOB 568. Advanced Systematics. (Cross-listed with EnSci 365 or EnSci 365S. Alt. S., offered 2010. Prereq: Combined 12 credits in biology and chemistry. Introduction to the study of ecological and evolutionary processes within a spatial context with emphasis on behavior, population, and community dynamics.

EEOB 573. Techniques for Biology Teaching. (Cross-listed with EnSci 312, EnSci 312S. Alt. S., offered 2010. Prereq: Permis-
sion of instructor; EEOB 588, a course in calculus. The study of ecological and evolutionary processes within a spatial context with emphasis on behavior, population, and community dynamics.

EEOB 575. Field Mycology. (2-6) Cr. 4. Repeat-
able. SS. Prereq: 5 credits in biology. Collection and identification of fungi and relation of their occurrence to environmental factors. Field trips.

sion of instructor. Principles underlying the adaptation of organisms to different environments. Emphasis on the role of different factors influencing wetland biodiversity and ecosystem function. Laboratory focus on the analysis of material and energy flows in wetland systems. Emphasis on the role of different factors influencing wetland biodiversity and ecosystem function.

and the structure and function of communities in space and time. Relationships between species diversity and ecosystem process rates and community stability.

EEOB 586. Aquatic Ecology. (Cross-listed with EnSci.) (3-0) Cr. 3. F. Prereq: EnSci 301 or 312 or 381 or 402. (Dual-listed with Biol 486.) Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine and wetland ecology.

EEOB 586L. Aquatic Ecology Laboratory. (Cross-listed with EnSci.) (0-3) Cr. 1. F. Prereq: Concurrent enrollment in 586. (Dual-listed with Biol 486L.) Field trips and laboratory exercises to accompany 586L. Hands-on experience with aquatic research and monitoring techniques and concepts.

EEOB 587. Microbial Ecology. (Cross-listed with EnSci, Micro.) (3-0) Cr. 3. Prereq: 6 credits in biology and six credits in chemistry. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

EEOB 589. Population Ecology. (Cross-listed with A Ecl) (2-2) Cr. 3. F. Prereq: Biol 312, Stat 101 or 104, a course in calculus, or graduate standing. (Dual-listed with Biol 489.) Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

EEOB 596. Ecology and Society. (Cross-listed with Phil.) (3-4) Cr. 3. Prereq. Graduate classification in biological or environmental sciences/studies with at least one course in ecology. Analysis of conceptual and methodological debates in ecology. Historical development of competing research traditions and Philosophies. Topics include i) methodological issues in ecological science, ii) conceptual issues in theoretical ecology, iii) conceptual issues in applied ecology, iv) relation of ecology to environmental and social issues.

EEOB 599. Creative Component. Cr. arr. Research toward nontechnical master’s degree.

Courses for graduate students

EEOB 611. Analysis of Populations. (Cross-listed with A Ecl) (2-2) Cr. 3. Alt. F, offered 2009. Prereq: Biol 312, Stat 401, a course in calculus; Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on Statistical inference and computing.

EEOB 641. General Mycology. (2-6) Cr. 4. F. Prereq: PI P 407 First semester of a full-year course. Taxonomy, morphology, ecology, and phylogeny of slime molds and fungi (basidiomycetes, zygomycetes, ascomycetes, basidioscymycetes, and fungi imperfecti).

EEOB 698. Seminar. Cr. 1. Repeatable. Meetings of graduate students and faculty to discuss recent literature and problems under investigation.

J. Arne Hallam, Chair of Department

Distinguished Professor: W. Huffman

Distinguished Professors (Emeritus): Baumel, Fuller, Hart, Johnson, Ladd, Luckett

University Professors: Lapan, Orazem

University Professor (Emeritus): Wisner

Associate Professors: Bhattacharya, Bunzel, Frankel, Gallagher, Kreider, Quirmbach, Singh, Weninger, Zheng

Associate Professor ( Emeritus): Doak

Assistant Professors: Hart, Oviedo, Zhiyeyevsky

Assistant Professors (Adjunct): H. Hennessy, S. Huffman

Senior Lecturers: Alexander, Luvaga

Lecturers: McCullough, Rajan, Roy, Wohlgemuth

Undergraduate Study

The department offers work for the degrees of bachelor of science with a major in agricultural business, bachelor of science with a major in business economics, and bachelor of science with a major in economics. For further discussion of programs in agricultural business, see the statement below under College of Agriculture. For programs in business economics, see the statement below under College of Business and Economics. For programs in economics, see the statement below under College of Liberal Arts and Sciences.

For the undergraduate curriculum in agricultural business, see College of Agriculture, Curricula.

The agricultural business curriculum prepares students for advanced studies, and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, and the public service positions. Graduates also have solid preparation for graduate studies in law, economics, and in Master of Business Administration (MBA) programs.

For the undergraduate curriculum in business economics, see College of Business, Curricula.

For the undergraduate curriculum in agricultural sciences, see College of Agriculture, Curricula.

For the undergraduate curriculum in business, see College of Business, Curricula.

Economics 203
Optimal progress for an economics major would be to complete the principles sequence, Econ 101 and 102, in the freshman year. Math 165, 166, or Math 165, Econ 207, or Math 160, Econ 207 should also be completed in the freshman year, followed by the intermediate theory sequence, Econ 301 and 302, in the sophomore year. Stat 226 and 226 are recommended in the sophomore year.

A minor in economics is offered. Courses to be included in the minimum of 15 hours are Econ 101, 102, and 301.

Communication Proficiency Requirement: The major in economics requires a grade of C or better in each of the following English courses: 150, 250 (or 250H), and 314.

The department participates in the interdepartmental programs in international studies and women’s studies.

**Learner Outcome Goals**

In general, our goal is that all Department of Economics graduates at Iowa State are able to use economic reasoning to think critically, to make decisions and to communicate effectively; to be ethical; to respect the environment, and to be multi-culturally and internationally aware.

Specifically, with respect to:

1. **Critical Thinking**, all graduates of the Department of Economics are able to:

   a) distinguish factual statements from opinions or value judgements
   b) use scientific methods to analyze and interpret data
   c) distinguish causal relationships from correlations
   d) determine the accuracy of statements
   e) understand the usefulness of abstractions and models
   f) distinguish simplifying and critical assumptions from unnecessary details
   g) objectively critique competing viewpoints to make reasoned judgements

2. **Economic Reasoning:**

   a) distinguish positive (what is) and normative (what should be) economics
   b) determine the opportunity cost of alternatives
   c) apply the concepts of comparative advantage, specialization, and exchange to analyze resource allocation issues
   d) identify the conditions under which markets allocate resources efficiently or markets fail
   e) apply marginal economic analysis to solve problems
   f) conduct comparative static analyses
   g) pose and test hypotheses

3. **Decision Making/Problem Solving:**

   a) work effectively alone and in teams to solve problems
   b) use scientific methods to identify optimal choices among economic alternatives
   c) identify decision-makers, objectives, choice variables, incentives, and constraints
   d) identify and apply the solution technique best suited for the specific problem
   e) understand how conclusions depend on assumptions

4. **Communications:**

   a) communicate economic and business concepts to professionals, organizations, governments, and the general public
   b) obtain information by accessing electronic or traditional media, listening, or by observation
   c) use computer and statistical methods to organize and analyze data
   d) write clearly and effectively
   e) speak clearly and persuasively
   f) prepare and present visual information effectively

5. **Ethics:**

   a) develop ethical perspectives and sense of moral responsibility and values
   b) discuss contemporary ethical and moral issues in professional and private life
   c) critically evaluate their own arguments and those of others

6. **Environment Awareness:**

   a) understand the physical and biological properties of the environment and ecological systems
   b) understand how economic activity, such as business or agriculture, impacts the environment

7. **International/Multi-Cultural Awareness:**

   a) understand cultural diversity within our own nation
   b) understand cultural diversity around the world
   c) know the different economic or agricultural systems in other countries
   d) have human relation skills essential in the work place and the community

**Graduate Study**

The department offers work toward the degrees master of science and doctor of philosophy with majors in economics and agricultural economics. The department also offers minors to students with majors in other departments.

Students do not need to have an undergraduate major in economics or agricultural economics in order to qualify for graduate work in the department. However, students must have completed undergraduate coursework in macroeconomics, microeconomics, statistics, calculus, and matrix algebra. Some background in Math courses emphasizing logic and proofs is preferred, particularly for the Ph.D.

Candidates for the degree master of science (thesis option) are required to complete satisfactorily 30 credits of acceptable graduate work, including preparation of a thesis.
