Microbiology
Interdepartmental Undergraduate Major

Undergraduate Study

Undergraduate study for the bachelor of science degree with a major in microbiology. In the Microbiology curriculum, principal emphasis is placed on understanding microorganisms and their interrelationships with other organisms in nature, the application of microbiology in medicine, agriculture and industry, and the study of fundamental life processes as exemplified by microorganisms. Some fields of microbiology, especially advanced research, may require further training. Undergraduate work in the program is designed to provide sound preparation for graduate study, training for bachelors-level employment, and admission to professional programs such as medicine, veterinary medicine and dentistry.

Graduates of the Interdepartmental Undergraduate Microbiology Program will learn about the diversity and complexity of microbial life represented by procaryotes, eucaryotes and viruses. In addition to being able to explain fundamental principles of microbial growth, physiology, genetics, biochemistry, and ecology, students will be able to evaluate the impact that the microbial world has on human, animal and plant health, as well as on environmental quality, industry and biotechnology. Graduates are able to design and implement experimental approaches to address specific questions. In addition, graduates are able to communicate scientifically, using a variety of media.

Students graduating in microbiology find career opportunities in a wide variety of areas including: hospital and clinical laboratories; federal, state, and local government agencies; research and development; dairy and food processing industries; and the pharmaceutical and fermentation industries.

Preveterinary preparation may be accomplished through the curriculum major in this program (see College of Veterinary Medicine, Admission Requirements).

Minor

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses.

Graduate Study

The program offers work for the degrees master of science and doctor of philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology. Faculty coordinate graduate education and research in a wide range of topics fundamental to the discipline of microbiology. Specific information about individual faculty and their research areas is available at www.micro.iastate.edu.

Prerequisites to graduate study include a sound undergraduate background in chemistry, mathematics and biology, including microbiology and genetics.

Graduates in the Microbiology Graduate program have a broad-based knowledge in the fundamentals of microbiology as well as advanced knowledge in specific areas as determined by their areas of research focus. Students completing the thesis have the technical, research, critical-thinking, problem-solving, and computer skills to design, implement, and conduct research using a variety of current techniques and equipment. They are also able to communicate research results effectively with scientific peer groups in both oral and written formats.

Curriculum in Microbiology

www.micro.iastate.edu

Administered by an interdepartmental committee.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.
Electives: 7-12

Communications Proficiency:

English composition - with a C or better 6
Speech fundamentals - with a C or better 3

Communication/Library:

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
SP CM 212 Fundamentals of Public Speaking 3
One course from the following:

ENGL 302 Business Communication
ENGL 309 Report and Proposal Writing
ENGL 312 Biological Communication
ENGL 314 Technical Communication
LIB 160 Information Literacy 1

Total Credits 13

Humanities and Social Sciences:

Approved Humanities list 3
Approved Social Science list 3

Ethics: 3 cr.
3 cr. from approved list.

Mathematical Sciences:

One of the following: 7-8

MATH 142 Trigonometry and Analytic Geometry
MATH 160 and Survey of Calculus

MATH 165
MATH 166
Calculus I
and Calculus II

MATH 181
MATH 182
Calculus and Mathematical Modeling for the Life
Sciences I
and Calculus and Mathematical Modeling for the Life
Sciences II

One of the following: 3-4

STAT 101 Principles of Statistics
STAT 104 Introduction to Statistics

Total Credits 10-12

Physical Sciences:

CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3

PHYS 111 General Physics 5
PHYS 112 General Physics 5

CHEM 331 Organic Chemistry I 3
CHEM 331L Laboratory in Organic Chemistry I 1
CHEM 332 Organic Chemistry II 3

One of the following: 3-6

BBMB 404 Biochemistry I
BBMB 405 Biochemistry II
or BBMB 301 Survey of Biochemistry

Total Credits 28-31

Biological Sciences:

BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 313 Principles of Genetics 3
BIOL 313L Genetics Laboratory 1
BIOL 314 Principles of Molecular Cell Biology 3

Total Credits 15

Microbiology elective - only 3 cr. lab courses allowed

Total Credits: 30.5

Courses primarily for undergraduates:

**MICRO 101. Microbial World.**

(3-0) Cr. 3. F. Prereq: High school biology or equivalent
Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology, and microbial impact on the biosphere.

**MICRO 110. Orientation in Microbiology.**

(1-0) Cr. 0.5. F.
Orientation to the discipline of microbiology, the curriculum in microbiology, and educational research opportunities within the department. Offered on a satisfactory-fail basis only.

**MICRO 201. Introduction to Microbiology.**

(2-0) Cr. 2. F.S. Prereq: One semester of college-level biology
Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisory committee, students who obtain a grade of B or better may substitute 201 for 302 in advanced courses.

**MICRO 201L. Introductory Microbiology Laboratory.**

(0-2) Cr. 1. F.S. Prereq: Credit or enrollment in MICRO 201 or MICRO 302
Basic microbiology laboratory techniques for non-microbiology majors. Credit for either MICRO 201L or 302L, but not both, may be applied toward graduation.

**MICRO 302. Biology of Microorganisms.**

(3-0) Cr. 3. F.S. Prereq: BIOL 211, credit or enrollment in BIOL 212; 1 semester of chemistry
Basic cell biology, physiology, metabolism, genetics and ecology of microorganisms, with an emphasis on procaryotes and viruses, as well as the roles of microorganisms in the environment, disease, agriculture, and industry.

**MICRO 302L. Microbiology Laboratory.**

(0-3) Cr. 1. F.S. Prereq: Credit or enrollment in MICRO 302
Basic microbiology laboratory techniques for majors in microbiology, biological sciences and related fields. Credit for either MICRO 201L or 302L, but not both, may be applied toward graduation.

**MICRO 310. Medical Microbiology.**

(3-0) Cr. 3. F. Prereq: MICRO 302 (or MICRO 201 if a B or better was obtained)
Study of infection and immunity by bacterial and viral pathogenic agents of humans. Nonmajor graduate credit.

**MICRO 310L. Medical Microbiology Laboratory.**

(0-3) Cr. 1. F. Prereq: MICRO 301 or MICRO 302; MICRO 201L or MICRO 302L, credit or enrollment in MICRO 310
Isolation and identification of human bacterial pathogens using basic staining techniques and biochemical tests. Brief introduction to techniques in cell culture and virology.

**MICRO 320. Molecular and Cellular Bacteriology.**

(4-0) Cr. 4. S. Prereq: MICRO 302, BIOL 313, credit or enrollment in CHEM 332
Introductory course integrating physiological and genetic principles influencing bacterial growth, survival, and cellular differentiation. Emphasis is on prokaryotes although unicellular eukaryotes are also discussed. Topics include the structure, function, and assembly of cell components, bioenergetics and metabolism, regulation of gene expression, genetic adaptation, stress tolerance, biofilms, and cell-cell interactions and communication.

**MICRO 353. Introductory Parasitology.**

(Cross-listed with BIOL, V PTH). (3-0) Cr. 3. S. Prereq: BIOL 212
Biology and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

**MICRO 374. Insects and Our Health.**

(Cross-listed with ENT). (3-0) Cr. 3. S. Prereq: 3 credits in biological sciences
Bartholomay. Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Nonmajor graduate credit.

**MICRO 374L. Insects and Our Health Laboratory.**

(Cross-listed with ENT). (3-0) Cr. 1. Alt. S., offered 2014. Prereq: Credit or enrollment in ENT 374
Bartholomay. Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

**MICRO 381. Environmental Systems I: Introduction to Environmental Systems.**

(Dual-listed with MICRO 581). (Cross-listed with BIOL, ENV S, ENSCI). Cr. 3-4. F. Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems. Nonmajor graduate credit.

**MICRO 402. Microbiological Safety of Foods of Animal Origins.**

(Dual-listed with MICRO 502). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: MICRO 302, BIOL 313
The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.

**MICRO 407. Microbiological Safety of Foods of Animal Origins.**

(Dual-listed with MICRO 507). (Cross-listed with FS HN). (3-0) Cr. 3. S. Prereq: MICRO 420
Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

**MICRO 408. Virology.**

(Dual-listed with MICRO 508). (3-0) Cr. 3. F. Prereq: BIOL 313 or BBMB 301, BIOL 314 recommended
The molecular virology and epidemiology of human, animal, plant and insect viruses.
Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

MICRO 419. Foodborne Hazards. (Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. S., offered 2012. Prereq: MICRO 201 or MICRO 302, a course in biochemistry
Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxins in the food supply, governmental regulation of foodborne hazards. Nonmajor graduate credit. Only one of FS HN 419 and FS HN 519 may count toward graduation.

MICRO 420. Food Microbiology. (Cross-listed with FS HN, TOX). (3-0) Cr. 3. F. Prereq: MICRO 201 or MICRO 302 Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications.
Nonmajor graduate credit.

MICRO 421. Food Microbiology Laboratory. (Cross-listed with FS HN). (0-6) Cr. 3. F. Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L. Credit or enrollment in FS HN/MICRO 420
Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction.
Nonmajor graduate credit.

MICRO 430. Procaryotic Diversity and Ecology. (Dual-listed with MICRO 530). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 440. Laboratory in Microbial Physiology, Diversity, and Genomics. (Cross-listed with BBMB). (2-6) Cr. 4. F. Prereq: MICRO 302, MICRO 302L
CHEM 332, BIOL 313L
Study of the fundamental techniques and theory of studying the cellular mechanisms and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments. Also included are techniques for the phylogenetic characterization, and genetic manipulation of diverse species of bacteria.

MICRO 450. Undergraduate Seminar. (2-0) Cr. 2. S. Prereq: SP CM 212 and senior standing in Microbiology
Required of all undergraduate majors in microbiology. Discussion of current papers in microbiology and immunology, issues in scientific conduct, and bioethics in microbiology. Students present current papers in a journal club format and gain experience in writing grant proposals.

MICRO 451. Senior Survey in Microbiology. Cr. R. F. Prereq: Junior or Senior standing in Microbiology
Preparations for graduation. Topics include job search strategies, career information, mock interviews, graduate and professional school application processes and guidelines as well as outcomes assessment activities.

MICRO 456. Principles of Mycology. (Cross-listed with BIOL). (2-3) Cr. 3. F. Prereq: 10 credits in biological sciences Morphology, diversity, and ecology of fungi; their relation to agriculture, industry, and human health. Nonmajor graduate credit.

MICRO 475. Immunology. (Cross-listed with V MPM). (3-0) Cr. 3. S. Prereq: MICRO 310
An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Micro 475L optional. Credit for either Micro 475 or V MPM 520, but not both, may be applied to graduation.

MICRO 475L. Immunology Laboratory. (1-4) Cr. 1. S. Prereq Credit or enrollment in MICRO 475 or MICRO 575 Techniques in primary culture and tumor cell growth, measures of lymphocyte function, and flow cytometry. Half semester course.

MICRO 477. Bacterial-Plant Interactions. (Dual-listed with MICRO 577). (Cross-listed with PL P). (3-0) Cr. 3. Alt. S., offered 2014. Prereq: 3 credits in microbiology or plant pathology
Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth promotion, and biological control.

MICRO 478. Medical Protozoology. (Dual-listed with MICRO 578). (Cross-listed with ENT, V PTH). (2-1) Cr. 3. F. Prereq: MICRO 302 or BIOL 314, or equivalent
Medically important protozoa: their ecology and biology and the diseases they cause in humans and animals. Emphasis is on the protozoa, with some consideration of parasitic nematodes. Topics include: infection and immunity, computational biology/bioinformatics, unique/subcellular systems (pathways and organelles), vector-parasite-host interactions, disease prevention/treatment strategies, developmental biology. Nonmajor graduate credit.

MICRO 485. Soil and Environmental Microbiology. (Dual-listed with MICRO 585). (Cross-listed with ENSCI, AGRON). (2-3) Cr. 3. F. Prereq: AGRON 154 or AGRON 402, MICRO 201 (MICRO 201L recommended) Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues. Nonmajor graduate credit.

MICRO 487. Microbial Ecology. (Dual-listed with MICRO 587). (Cross-listed with ENSCI, BIOL). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry
Dual-listed with EEOB 587. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems. Nonmajor graduate credit.

MICRO 490. Independent Study. Cr. 1-5. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 490H. Independent Study, Honors. Cr. 1-5. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor
A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 495. Internship. Cr. 1-2. F. S. Prereq: At least 6 credits of 300-level or above coursework in microbiology, approval of academic adviser
Participation in the Cooperative Extension Intern Program or an equivalent work experience. Written report of activities required. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

MICRO 502. Microbial Genetics and Genomics. (Dual-listed with MICRO 402). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: MICRO 302, BIOL 313
The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.

MICRO 507. Microbiological Safety of Foods of Animal Origins. (Dual-listed with MICRO 407). (Cross-listed with FS HN). (3-0) Cr. 3. S. Prereq: MICRO 420
Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

MICRO 508. Virology. (Dual-listed with MICRO 408). (3-0) Cr. 3. F. Prereq: BIOL 313 or BBMB 301, BIOL 314 recommended
The molecular virology and epidemiology of human, animal, plant, and insect viruses.
(Cross-listed with PL P). (2-6) Cr. 4. Alt. S., offered 2013. Prereq: PL P 408, BIOL 454, BBMB 405, CHEM 211  
Hill. Plant viruses and the diseases they cause. Emphasis on epidemiology and control. Structure, function, and biochemical-biophysical properties of plant viruses.

MICRO 510. Insect-Virus Interactions: a Molecular Perspective.  
(Dual-listed with MICRO 410). (Cross-listed with ENT). (3-0) Cr. 3. Alt. F., offered 2013. Prereq: Permission of an instructor  
Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

MICRO 530. Procaroytic Diversity and Ecology.  
(Dual-listed with MICRO 430). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: MICRO 302, MICRO 302L  
Survey of the diverse groups of procaroytes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 540. Livestock Immunogenetics.  
(Cross-listed with AN S, V MPM). (2-0) Cr. 2. Alt. S., offered 2013. Prereq: AN S 561 or MICRO 575 or V MPM 520  
Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

MICRO 551. Microbial Diversity and Phylogeny.  
(1-0) Cr. 1. F. Prereq: MICRO 302, BIOL 313  
Comparisons among the three kingdoms of life (Bacteria, Archaea, and Eukarya). Topics will include metabolism, adaptation, methods of phylogenetic analysis, and comparative genomics.

MICRO 552. Bacterial Molecular Genetics and Physiology.  
(1-0) Cr. 1. F. Prereq: MICRO 302, BIOL 313  
Review of the molecular genetics and physiology of model organisms.

MICRO 553. Pathogenic Microorganisms.  
(1-0) Cr. 1. F. Prereq: MICRO 302, BIOL 313  
Review and contrast/comparison of common bacterial pathogens of plants and animals and their mechanisms of virulence, including toxins, protein secretion, host invasion and iron acquisition strategies. An overview of eukaryotic cell biology that is relevant to pathogenesis will also be included.

MICRO 554. Virology.  
(1-0) Cr. 1. S. Prereq: MICRO 302, BIOL 313  
Introduction to virus life cycles including entry, gene expression strategies, replication, and mechanisms to modify and overcome host defenses. The roles of specific viruses and sub-viral agents in animal and plant disease will also be included.

MICRO 555. Fungal Biology.  
(1-0) Cr. 1. S. Prereq: MICRO 302, BIOL 313  
Ecology, genetics, physiology and diversity of fungi, from yeasts to mushrooms, and their importance in human affairs.

MICRO 556. Microbial Ecology and Environmental Monitoring.  
(1-0) Cr. 1. S. Prereq: MICRO 302, BIOL 313  
Examination of microorganisms in their natural habitats, including aquatic, terrestrial and extreme environments, community and biofilm development, microbe-microbe interactions, and current and traditional methods of microbial analysis in natural environments.

MICRO 575. Immunology.  
(3-0) Cr. 3. S. Prereq: MICRO 310  
An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Micro 475L optional. Credit for either Micro 575 or V MPM 520, but not both, may be applied toward graduation.

MICRO 577. Bacterial-Plant Interactions.  
(Dual-listed with MICRO 477). (Cross-listed with PL P). (3-1) Cr. 3. Alt. S., offered 2014. Prereq: 3 credits in microbiology or plant pathology  
Focuses on plant-associated bacteria in terms of their ecology, diversity, and the physiological and molecular mechanisms involved in their interaction with plants; covers symbiotic nitrogen fixation, plant pathogenesis, plant growth and biological control.

MICRO 578. Medical Protozoology.  
(Dual-listed with MICRO 478). (Cross-listed with ENT, V PTH). (2-1) Cr. 3. F. Prereq: MICRO 302 or BIOL 314, or equivalent  
Medically important protozoa: their ecology and biology and the diseases they cause in humans and animals. Emphasis is on the protozoa, with some consideration of parasitic nematodes. Topics include: infection and immunity, computational biology/ bioinformatics, unique/special subcellular systems (pathways and organelles), vector-parasite-host interactions, disease prevention/ treatment strategies, developmental biology. Nonmajor graduate credit.

(Dual-listed with MICRO 381). (Cross-listed with BIOL, ENV S, ENSCI). Cr. 3-4. F. Prereq: 12 credits of natural science including biology and chemistry  
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

MICRO 585. Soil and Environmental Microbiology.  
(Dual-listed with MICRO 485). (Cross-listed with ENSCI, AGRON). (2-3) Cr. 3. F. Prereq: AGRON 154 or AGRON 402. MICRO 201 (MICRO 201L recommended) Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

MICRO 586. Medical Bacteriology.  
(Cross-listed with V MPM). (4-0) Cr. 4. F. Prereq: Permission of instructor  
Bacteria associated with diseases of vertebrates, including virulence factors and interaction of host responses.

MICRO 587. Microbial Ecology.  
(Dual-listed with MICRO 487). (Cross-listed with ENSCI, EECOB). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry  
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

MICRO 590. Special Topics.  
Cr. 1-5. Repeatable. F.S.SS. Prereq: Permission of instructor  

Courses for graduate students:

MICRO 604. Seminar.  
(1-0) Cr. 1. Repeatable. F.S.  
Course will expose students to the breadth of subdisciplines within microbiology, offer opportunities for direct interaction between the students and the faculty members within the Interdepartmental Microbiology Graduate Program, and promote interactions among the students within the program. Offered on a satisfactory-fail basis only.

MICRO 608. Molecular Virology.  
(Cross-listed with V MPM, PL P). (3-0) Cr. 3. Alt. F., offered 2014. Prereq: BBMB 405 or GDGB 511  
Advanced study of virus host-cell interactions. Molecular mechanisms of viral replication and pathogenesis.

MICRO 615. Molecular Immunology.  
(Cross-listed with BBMB, V MPM). (3-0) Cr. 3. Alt. F., offered 2013. Prereq: BBMB 405 or BBMB 502  
Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

MICRO 625. Mechanisms of Bacterial Pathogenesis.  
(Cross-listed with V MPM). (4-0) Cr. 4. Alt. S., offered 2013. Prereq: Credit in Biochemistry and Microbiology  
Review of current concepts in specific areas of microbial pathogenesis including the genetic basis for bacterial disease, genetic regulation and control of virulence factors and their mechanisms of action, and host-pathogen interactions at the cellular and molecular levels. The application of microbial genetics to understanding pathogenesis will be included.

MICRO 626. Advanced Food Microbiology.  
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. S., offered 2013. Prereq: FS HN 420 or FS HN 421 or FS HN 504  
Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.
MICRO 627. Rapid Methods in Food Microbiology.  
(Cross-listed with FS HN, TOX). (2-0) Cr. 2. Alt. S., offered 2012. Prereq: FS HN 420 or FS HN 421 or FS HN 504  
Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and "next generation" testing formats now in development.

MICRO 679. Light Microscopy.  
(Cross-listed with GDCB, EEOB). (2-9) Cr. 5. Prereq: Permission of instructor  
Current theories encompassing light optics and their applications for specimen preservation, paraffin and resin sectioning, general staining, histochemistry, cytophotometry, immunocytochemistry, autoradiography, image digitization, processing and presentation, and digital macro- and micrography. Limit of 10 students.

(Cross-listed with GDCB, EEOB). (2-9) Cr. 5. Prereq: Permission of instructor  
Current theories encompassing scanning electron optics and their applications for high and low vacuum microscopy, specimen chemical and cryopreservation methods, x-ray microanalysis, backscattered and topographic imaging, image digitization, processing and presentation. Limit of 10 students.

(Cross-listed with GDCB, EEOB). (2-9) Cr. 5. Prereq: GDCB 679 and permission of instructor  
Current theories encompassing electron optics and their applications for chemical and physical specimen preservation, ultramicrotomy, general staining and cytochemistry, immunocytochemistry, autoradiography, negative staining and shadowing, x-ray microanalysis, image digitization, processing and presentation.

MICRO 685. Advanced Soil Biochemistry.  
(Cross-listed with AGRON, ENSCI). (2-0) Cr. 2. Alt. S., offered 2012. Prereq: AGRON 585  
Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

MICRO 690. Current Topics.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor  
Colloquia or advanced study of specific topics in a specialized field.

MICRO 690A. Current Topics: Microbiology.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor  
Colloquia or advanced study of specific topics in a specialized field.

MICRO 690B. Current Topics: Immunology.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor  
Colloquia or advanced study of specific topics in a specialized field.

MICRO 690C. Current Topics: Infectious Diseases.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor  
Colloquia or advanced study of specific topics in a specialized field.

(Cross-listed with PL P). (3-0) Cr. 3. Alt. F., offered 2012. Prereq: PL P 506 or BBMB 405 or GEN 411 or MICRO 402 or strong background in molecular biology  
Bogdanove, Whitham. Seminal and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete an interinstitutional research proposal writing and peer review exercise.

MICRO 697. Graduate Research Rotation.  
Cr. arr. Repeatable. F.S.  
Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Microbiology major.

MICRO 698. Seminar in Molecular, Cellular, and Developmental Biology.  
(Cross-listed with BBMB, GDCB, MCDB, V MPM). (2-0) Cr. 1-2. Repeatable. F.S.  
Student and faculty presentations.

MICRO 699. Research.  
Cr. arr. Repeatable.
