The Iowa State University Catalog

The Iowa State University Catalog is a one-year publication which lists all academic policies, and procedures.

The catalog also includes the following: information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses developed and offered since catalog publication can be found on the Web at http://www.registrar.iastate.edu/faculty-staff/courses/explistings.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

About the Catalog

The Iowa State University Catalog is a one-year publication, which lists all academic policies, and procedures. Versions prior to 2011 were two-year publications and available in hard copy as well as online.

The catalog also includes information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses and programs take effect in the fall term. New courses developed and offered since catalog publication are called experimental courses. A list can be found on the Web at www.registrar.iastate.edu/faculty-staff/courses/explistings.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Updates to the Catalog

The curriculum process is governed by the Faculty Senate. The ad hoc committee, Faculty Senate Curriculum Committee (http://www.facsen.iastate.edu/councils/academicaffairs/curriculum) considers new curricula proposals, changes and discontinuations to the catalog. Additional information may be in the college governance documents.

The curriculum approval process generally consists of a proposal from the department/program level, approved by the department/program curriculum committee (if applicable), college curriculum committee, and the dean. Additional approvals are needed from the Graduate College if the program proposal is a graduate program. The program proposal is submitted to the Faculty Senate Curriculum committee for review. The Academic Affairs Committee reviews the proposal before passing it onto the Faculty Senate. The Board of Regents, State of Iowa approves all new programs and majors. For additional information about the approval process, see the link to Faculty Senate/Faculty Handbook Curriculum Approvals – Section 10.8. See the Office of the Provost (http://www.provost.iastate.edu) web site for more information.

Catalog updates are generally processed with approvals from department, college, and Faculty Senate Curriculum Committee (http://www.facsen.iastate.edu/councils/academicaffairs/curriculum) representatives. Editing begins in late February with course changes due to the Office of the Registrar by June 1. Curriculum and other general information is due to the Office of the Registrar by December 1. Publication is the following February.

See the catalog editing web site (http://www.registrar.iastate.edu/catalog-editing) for more details on how to make changes to the catalog.

Board of Regents, State of Iowa
www.regents.iowa.gov

The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Urbandale.

Pamela Anthony, Ph.D.
Dean of Students
Academic Life

Progressing Toward a Degree Classification

Classification (year in school) is determined by the number of credits completed and reported to the registrar, and is based on credit hours earned, not merely credit hours attempted. The grades F and NP and the marks I and X do not contribute toward credit hours earned and thus are not considered in determining year in school. Classification in all colleges except Veterinary Medicine is as follows:

Sophomore: 30 credit hours earned
Junior: 60 credit hours earned
Senior: 90 credit hours earned

Students who have a bachelor’s degree and are working toward another undergraduate degree, licensure, or admission to a specific graduate or professional program, are typically classified as a senior.

Transfer students without a degree are classified on the basis of credits accepted by Iowa State University.

Veterinary medicine students are promoted from the first- to the second-, third-, and fourth-year classes based upon satisfactory completion of the required courses for each year. To be promoted to the second-year class, students must have a cumulative grade-point average of at least 1.67 for all courses in the first year of the veterinary medicine curriculum. To be promoted to the third- and fourth-year classes, students must have a cumulative grade point average of at least 2.00 for all courses in the professional curriculum.

A student, who is attending Iowa State and decides not work toward an undergraduate degree, will be classified as a special (nondegree) student.

Admission requirements and academic standards regulations are the same as regular students. Credits taken as a special (nondegree) student are applicable for undergraduate degree purposes if the student is admitted later as a regular undergraduate. Credits obtained as an undergraduate special student may not, however, be applied toward a graduate degree.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as special (nondegree) students in the College of Liberal Arts and Sciences and usually are not permitted to enroll in academic courses until they have satisfied requirements for admission as regular students. Permission to enroll in one academic course may be granted under special circumstances.

Policies for Graduate Students

The Graduate College has specific policies approved by the Graduate College body. The Graduate College Handbook is the official source for all policies related to graduate students. See http://www.grad-college.iastate.edu/publications/gchandbook/ for the latest updated information.

Transfer of Credits

Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable for transfer credit. In addition, credits applied toward a particular degree will be determined by the student’s college, based on relevance to the students’ program requirements as well as the level of performance deemed necessary for successful progress in that program. For example, courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University and to new transfer students. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student’s Iowa State cumulative grade point average.

A student who is admitted as a transfer from another college or university is required to have at least a 2.00 cumulative grade-point average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student will have a transfer quality-point deficiency.

This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any quality-point deficiency, including a transfer quality-point deficiency.

Students should consult with their academic advisers and the Office of Admissions before taking coursework at other colleges and universities to be certain the credits will transfer and will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic adviser and with the Office of Admissions. Questions concerning how transfer credits are applied toward a degree program should be referred to the academic adviser and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits before receiving a degree from Iowa State University must be completed at Iowa State University.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average, even if the credits are included in the last 32 semester credits. For information on applying to the program see Index, Regent Universities Student Exchange Program.

AccessPlus Information System
accessplus.iastate.edu

AccessPlus is a secure and confidential campus information system that is available via the World Wide Web. Students, employees, and affiliates view personalized menus from campus and home workstations. For public convenience, AccessPlus stations are available in the Memorial Union and at the Visitors Information Center. Students can use AccessPlus to register for classes, obtain transcripts or enrollment certifications, submit emergency contact information, view and print current term schedules, view class meeting rooms, class instructors, academic records, final grades, financial aid status, current university bill, academic adviser assignment and projected date of graduation. University employees use the system to view personal information such as pay history and insurance. Some employees also perform business-related functions. Information about and access to AccessPlus may be found at www.registrar.iastate.edu/info/access.html.

Third Party Access on AccessPlus

Third party access is an option in AccessPlus that allows students to grant access to selected personal information to a trusted third party. For example, Third Party Access allows a student to set up a special account for a parent or family member to view their grades and/or pay their university bill. More information on creating third party accounts is available from Help after signing onto AccessPlus at https://accessplus.iastate.edu/frontdoor/tpa-info.jsp

Academic Advising

Academic advising and advisers are an intentional, collaborative relationship based on trust and mutual respect that promotes the student’s development of competence, autonomy, and sound decision making skills. Adviser-student interactions are grounded in teaching and learning and are vital in promoting student growth and personal development through learning, discovery, and engagement. Academic advising supports the mission of the University.

Academic Advising Process

All undergraduate students are assigned an academic adviser based on their major/curriculum. A new adviser assignment is made when a student changes majors/curricula. Advisers serve as a primary resource for students, connecting them with the wide variety of services and academic opportunities available to them. The advising experience begins during the prospective student stage and continues through graduation. The goal of academic advising is an individualized academic experience for each student developed through a mentoring relationship.

Academic Advising Responsibilities

A successful academic advising relationship involves fulfillment of responsibilities on the part of both the student and the academic adviser.

Student responsibilities include:

• knowing Iowa State University policies and procedures
• knowing graduation requirements for degree program
• understanding and accepting the consequences of their academic decisions
• seeking, evaluating, and acting upon advising assistance
• taking responsibility for accomplishing his/her degree plan

Academic Adviser responsibilities include:

• assisting students in achieving the learning outcomes of their academic program, their college, and the university
• referring students to appropriate campus resources
• empowering students to develop an academic plan appropriate to the student’s abilities, interests, academic and career goals
• communicating university policies and procedures accurately

Scholastic Recognition
The university recognizes those students who are doing exceptionally well in several ways, including the following.

1. Dean's List. Each semester the university issues a dean’s list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean’s list is issued for summer school. The list can be viewed from the Office of the Registrar web site (http://www.registrar.iastate.edu).

2. Top 2 Percent. Each spring semester, undergraduate students in the top 2% of their class (freshman, sophomore, junior, and senior) within their college, based on cumulative grade point average, are recognized. In addition to a congratulatory letter from the university president, a notation of the accomplishment is recorded on the student's permanent record.

3. Graduation with Distinction. Undergraduates who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are eligible to graduate “with distinction” provided they have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits. Students who graduate with a cumulative grade point average of 3.90 or higher will graduate Summa Cum Laude; those who graduate with a cumulative grade point average of 3.70 to 3.89 will graduate Magna Cum Laude; and those who graduate with a cumulative grade point average of 3.50 to 3.69 will graduate Cum Laude. This recognition appears on the student’s official transcript and diploma and in the commencement program. Candidates for the bachelor of liberal studies degree may be graduated with distinction providing that they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.

4. Honors Program. Students who are full members of the University Honors Program prior to Fall Semester 2011 must have a cumulative grade point average of 3.35 or higher at the beginning of their final term. Students becoming full members during Fall Semester 2011 or later need a cumulative grade point average of 3.5 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student’s permanent record and diploma, and in the commencement program.

Learning Communities
www.lc.iastate.edu

Learning communities are a university-wide initiative providing students the opportunity to connect with peers who have similar academic goals. Students in learning communities typically take one to three courses together and may live together (or near each other) in the same residence hall.

Although many of the learning communities are focused on first-year students, opportunities are available for sophomores, juniors, seniors, and transfer students.

In addition to developing academic and social networks, advantages of joining a learning community include: getting to know people and making friends in your major or area of interest, getting to know faculty and staff members, making a smooth transition from high school to college, making connections between in-class and out-of-class learning, applying classroom learning to real world situations through hands-on experiences, exploring career opportunities, and having fun! Most learning communities employ an upper-division student as a peer mentor who organizes various activities for the students, ranging from study groups to social events. We have found that students in learning communities are more satisfied with their overall experience at Iowa State, are more engaged, are more likely to remain enrolled at Iowa State after one year, and are more likely to graduate.

First-year students are offered the opportunity to sign up for learning community courses during summer orientation. For learning communities that offer a residential living environment the sign up takes place online with the housing contract.
Admissions and Registrar

Office of Admissions
Interim Director
Darin Wohlgemuth, Ph.D.

Admission

When to Apply

Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted well in advance of the desired entry date.

Application deadlines are available at www.admissions.iastate.edu.

Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See College of Veterinary Medicine, Application and Admission.

How to Apply

Applications for admission are available online at www.admissions.iastate.edu. Iowa State University operates on a rolling admissions basis. Admission of applicants for fall semester begins in July of the preceding year. Admission for other terms begins approximately 12 months prior to the beginning of the term. Admission offers are issued for a specific term and are valid only for the term specified.

Visits to the Campus

Visitors to Iowa State University are always welcome! The Soults Family Visitor Center, located in the Memorial Union, is open Monday through Friday from 8 a.m. until 5 p.m., and most Saturday mornings from 9 a.m. until 1 p.m. when classes are in session. Counselors are available to speak with prospective students and their families about admission, financial aid, housing, student life, academic programs, and other opportunities. Visitors are offered student-guided walking tours of campus and the residence halls along with a Preview of Iowa State presentation and an academic information session.

Prospective students and parents are encouraged to visit the campus and the Soults Family Visitor Center. Arrangements for a campus visit or registration for "Experience Iowa State" or "Transfer Visit Days" open house programs can be made at www.admissions.iastate.edu or by contacting the Soults Family Visitor Center at 800-262-3810 or locally at 515-294-5836.

Undergraduate Admission Directly from High School

Admission decisions are made by admissions officers in accordance with the entrance requirements as set forth in the Iowa Administrative Code as well as the admission policies established by the Faculty Senate.

Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.

Applicants must submit an application for admission and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). In addition, applicants must have their secondary school provide an official final transcript of their academic record, including cumulative grade point average, rank in class, and certification of graduation.

Applicants must arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizens and immigrant applicants who will not graduate from an approved U.S. high school and whose primary language is not English must meet university communication proficiency requirements.

This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the SAT. Contact the Office of Admissions for minimum score requirements for each examination.

Applicants may be required to submit additional information or data to support their applications.

A. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve a Regents Admission Index (RAI) score of at least 245 will be offered admission. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve less than a 245 RAI score will be considered for admission on an individual basis.

The RAI score will be calculated for each applicant based on the following equation:

\[
\text{RAI Score} = (2 \times \text{ACT composite score}) + (1 \times \text{percentile class rank}) + (20 \times \text{high school GPA}) + (5 \times \text{number of years of high school core courses completed})
\]

Note: For purposes of calculating the RAI, SAT scores will be converted to ACT composite equivalents; high school rank is expressed as a percentile with 99% as the top value; high school GPA is expressed on a 4-point scale; and number of high school courses completed in the core subject areas is expressed in terms of years or fractions of years of study.

Applicants from high schools that do not present all four of the factors required for calculation of the RAI score will be considered for admission on an individual basis.

Those applicants who are not offered unconditional admission will either be given the opportunity to enroll for a trial period during the preceding summer session or be denied admission.

B. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.

C. Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.

D. Applications may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.

E. Students with satisfactory academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

F. Exceptional students may be admitted as full-time students before completing high school. Early admission is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for college-level study.

High School Preparation

Graduation from an approved high school shall ordinarily precede entrance into Iowa State University.

Students who wish to enter Iowa State University directly from high school (or transfer from another college or university with less than 24 semester hours of graded transferable college credit) must meet the level of academic performance described above and show evidence of the following high school preparation:

English/Language Arts

Four years, emphasizing writing, speaking, and reading, as well as an understanding and appreciation of literature

Mathematics

Three years, including one year each of algebra, geometry, and advanced algebra

Science

Three years, including one year each of courses from two of the following fields: biology, chemistry, and physics

Social Studies

Two years

Additional Requirements for the College of Liberal Arts and Sciences and the College of Engineering

In addition to the high school preparation requirements described above, students applying to the College of Liberal Arts and Sciences must have completed an additional year of social studies, for a total of three years, and two years of a single foreign language. Students applying to the College of Engineering must have completed two years of a single foreign language.
Students who do not meet the high school course preparation requirements listed here, but who are otherwise well qualified, may be admitted after individual review of their applications.

**Undergraduate Admission - Nondegree Undergraduate**

Students who wish to attend Iowa State University to take undergraduate courses but who do not plan to seek an undergraduate degree from Iowa State University should apply as nondegree undergraduate students. Credit taken under the nondegree undergraduate classification is applicable for undergraduate degree purposes for those who are later admitted as degree-seeking undergraduate students. Nondegree undergraduates who have already earned an undergraduate degree should not enroll in graduate credits. To take courses listed as available for graduate credit, a student must enroll as a nondegree graduate and pay graduate fees. Credit obtained under the nondegree undergraduate classification may not be applied toward a graduate degree.

Nondegree applicants are held to the same standards of admission as degree-seeking applicants, including English language proficiency.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree undergraduate students in the College of Liberal Arts and Sciences. Permission to enroll in one academic course in addition to full-time intensive English study may be granted under special circumstances.

**Reentering Students - Undergraduate and Graduate**

Reentering students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. See Index, Reentry Students (https://nextcatalog.registrar.iastate.edu/azindex).

International students need to reapply after an absence of one full semester, exclusive of summer session. International reentries must also contact the International Students and Scholars office to request the necessary visa application forms.

Reentering graduate students do not need to complete a reentry form but should notify their department and the Office of the Registrar of their intent to reenter Iowa State University. See Index, Reentry Students (https://nextcatalog.registrar.iastate.edu/azindex) for more information.

**Destination Iowa State**

The Destination Iowa State program is held for all new freshman and transfer students on the Thursday, Friday, and Saturday before classes begin fall semester; and on the Friday before classes begin spring semester. The program helps new students develop academic and social strategies to ensure a successful transition to Iowa State University.

**New Student Programs Office**

**Orientation**

Orientation assists new undergraduates with the transition to Iowa State University. At orientation, students plan their academic programs, register for classes, learn about university policies and procedures, and prepare for personal and social adjustments to the university. The university Orientation Committee, composed of Iowa State University faculty, and staff, is responsible for the orientation programs; the undergraduate colleges of the university, in cooperation with the Office of New Student Programs, have responsibility for the implementation of orientation programs for new students and their families.

The Orientation Committee conducts an extensive orientation program during the summer, with additional programs held prior to each term. Special orientation sessions are conducted for transfer students entering in the fall and spring semester. New students receive an invitation to attend an orientation program before their first semester at the university.

**Summer Orientation**

Summer orientation for freshmen is a two-day program scheduled throughout June. As early as January, new freshman students and their family members are asked to select a convenient time from among a number of orientation sessions that are scheduled during June. In addition to preparing their class schedules for fall semester, new students with their family members participate in informational activities about policies and procedures at the university, and meet formally and informally with faculty, staff, and other new students and their families.

These sessions, held in a comfortable, informative atmosphere, lessen existing anxieties, assist in the development of a clearer understanding of the university environment, and make it possible for new students—with support from their family members—to begin to make the academic and social decisions that are faced by all students at the university.

Housing and meals are available at campus residence halls for a nominal fee during June freshman orientation.

**Undergraduate Admission by Transfer from Other Educational Institutions**

Students who seek admission must meet the following requirements and also any special requirements for the college and curriculum of their choice.

Applicants must submit an application for admission, and the appropriate application fee (see www.admissions.iastate.edu for current application fee information). Applicants must also request that each college they have attended send an official transcript of record to the Office of Admissions. Failure to provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable college credit is completed prior to entry at Iowa State University, applicants must also request that their official high school transcript and ACT or SAT scores be sent to the Office of Admissions. Other transfer applicants are encouraged to provide high school academic information. Students who do not do so may be asked to take course placement examinations during orientation.

U.S. citizen and immigrant applicants who have not graduated from an approved U.S. high school and whose primary language is not English must meet the university’s English communication requirement. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or the SAT. Contact the Office of Admissions for minimum score requirements for each examination.

A. Transfer applicants with a minimum of 24 semester hours of graded transferable credit from regionally accredited colleges or universities, who have achieved for all college work previously attempted the grade point average required by Iowa State for specific programs, will be admitted. A 2.00 grade point average (on a 4.00 grading scale) is the minimum transfer grade point average requirement. Some programs may require a transfer grade point average higher than this minimum. Higher academic standards may be required of students who are not residents of Iowa, including international students.

Applicants who have not maintained the grade point average required by Iowa State University for specific programs or who are under academic suspension from the last college attended generally will be denied admission.

B. In addition to meeting the minimum transfer grade point average requirement described above, applicants who have completed fewer than 24 semester hours of graded transferable college credit prior to their enrollment at Iowa State must also meet the admission requirements for students entering directly from high school.

C. Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

D. Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis, taking into account all available academic information.

**Transfer Credit Practices**

Iowa State University endorses the Joint Statement on Transfer and Award of Academic Credit approved by the American Council on Education (ACE) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). The current issue of Transfer Credit Practices of Designated Educational Institutions, published by AACRAO is an example of a reference used in determining transfer credit.

The acceptance and use of transfer credit are subject to limitations in accordance with the educational policies of Iowa State University.

**A. Students from regionally accredited colleges and universities.**

Credit earned at regionally accredited colleges and universities is acceptable for transfer, except for the following, which may not be accepted, or may be accepted to a limited extent:

---credit in courses determined by Iowa State University to be of a developmental, vocational, or technical nature

---credit in courses or programs in which the institution granting the credit is not directly involved.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. While there is no
limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State University.

B. Students from colleges and universities which have candidate status.
Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor’s degree at Iowa State University.

Credit earned at the junior and senior classification from an accredited two-year college which has received approval by a regional accrediting association for change to a four-year college may be accepted by Iowa State University.

C. Students from colleges and universities not regionally accredited.
Courses completed at colleges and universities that are not regionally accredited will be evaluated according to the recommendations made by the American Association of Collegiate Registrars and Admissions Offices or the American Council on Education.

In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the Regent Committee on Educational Relations, upon request from such institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories.

In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Designated Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

D. Students from foreign colleges and universities.
Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved, its recognition by the educational authorities of the foreign country, and an evaluation of the content, level, and comparability of the study to courses and programs at Iowa State University.

Credit may be granted in specific courses or assigned to general areas of study. Extensive use is made of professional journals and references which describe the educational systems and programs of individual countries.

Additional Transfer Credit Policies
A. Students with credit obtained during military service.
Credit will be awarded for successful completion of technical or specialized schools attended while on active duty with the armed forces to the extent that the material is applicable toward degree requirements at Iowa State University.

Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication A Guide to the Evaluation of Educational Experiences in the Armed Services.

B. Students with credit obtained through non-college sponsored instruction.
Credit will be awarded for successful completion of learning acquired from participation in formal courses sponsored by associations, business, government, industry, and unions to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication The National Guide to Educational Credit for Training Programs.

C. Students with credit obtained through correspondence courses.
Although Iowa State does not offer correspondence courses, college level courses taken by correspondence from accredited colleges or universities are acceptable for transfer at the undergraduate level if the courses taken are those that do not require laboratory study.

D. College Level Examination Program (CLEP).
Iowa State University will award credit for each of the following 15 examinations: Financial Accounting, Principles of Accounting, American Government, Biology, Calculus, French Language, German Language, Humanities, Principles of Microeconomics, Principles of Microeconomics, Natural Sciences, Introductory Psychology, Social Sciences and History, Introductory Sociology, Spanish Language.

Application of CLEP credit to a degree program varies with the department, so students should consult with their department before they register for CLEP examinations. Additional information is available at www.admissions.iastate.edu/cbe/cbe_clep.php.

E. Students with "test-out" credit.
Students who have earned credit at other colleges or universities through Advanced Placement (AP), College Level Examination Program (CLEP), or International Baccalaureate (IB) examinations may qualify for credit at Iowa State University. Scores from these examinations should be sent directly to the Office of Admissions; credit will be awarded provided the scores satisfy Iowa State’s requirements.

Credit earned at another college through locally designed test-out examinations may transfer to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at that institution.

Articulation/Transfer Agreements
A. Iowa Regent Universities General Education Articulation Agreement.
Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa may transfer to Iowa State’s College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language and library requirements).

B. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.
Students who plan to enter the College of Liberal Arts and Sciences or the College of Business at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of that college. College of Business students will still be required to take an ethics and a global course to satisfy general education requirements unless they are taken as part of the associate of arts degree.

C. Associate of Science (A.S.) Articulation Agreement with Iowa public community colleges.
Students who plan to enter the College of Liberal Arts and Sciences at Iowa State University with an associate of science degree from an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be enrolled at junior level status upon entry to Iowa State University. College of Liberal Arts and Sciences. Transfer students with AS degrees will have their transfer credits evaluated course-by-course to determine how the courses will be applied to their intended Iowa State major/degree program requirements.

D. Career-technical credit from Iowa public community colleges.
Iowa State University will accept up to 16 semester (24 quarter) credits earned in career-technical courses where the sending Iowa public community college will accept such courses toward its associate of arts or associate in science degree. Certain career-technical courses at Iowa community colleges may be articulated to Iowa State University as academic credit. The credit hours earned in these articulated courses would transfer in addition to the 16 semester hour career-technical maximum. Please refer to the course equivalency guides on the Web (www.admissions.iastate.edu/deqiv) or contact the Office of Admissions for more information.

E. AP and CLEP credit from Iowa public colleges and universities.
Iowa State University has an agreement with the Iowa public colleges and universities which allows credit earned through AP and CLEP examinations to transfer directly to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at the sending institution.

On-line Transfer Articulation System (TRANSIT)
TRANSIT is Iowa State’s online system, which displays how credits from a community college or another university may transfer to a degree program at Iowa State. In TRANSIT, prospective or current students can generate a transfer credit evaluation showing how their courses and degrees from a community college or university transfer to Iowa State University. In addition, students can request an unofficial degree audit, which will display how their transfer courses are applied within a particular Iowa State major/degree program. TRANSIT is easy to use and can be accessed by going to http://transit.iastate.edu.

Credit by Examination (CBE)
It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin. Credit is awarded primarily in the introductory level classes in mathematics, natural sciences, the liberal arts, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.
Types of Credit by Examination Programs (CBE)

Students may earn academic credit in any of four ways and have that credit recorded on their academic record when they enroll. Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, departmental examinations, and the College Level Examination Program (CLEP). Iowa State’s policies for awarding credit for each of these programs may be found at www.admissions.iastate.edu/cbe.

Advanced Placement (AP) Program of the College Board

This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement (AP) credit through the Advanced Placement Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, geography, government and politics, history, mathematics, music, physics, psychology and statistics. High school counselors and teachers will assist with testing arrangements.

Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Correspondence concerning the Advanced Placement Program should be addressed to the College Board Advanced Placement Examinations, P.O. Box 977-IS, Princeton, New Jersey 08541, or visit their website at www.collegeboard.com/student/testing/ap/about.html (http://www.collegeboard.com/student/testing/ap/about.html).

International Baccalaureate Examinations

The International Baccalaureate (IB) Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments require higher scores. Official IB examination results must be sent directly to the Office of Admissions from the International Baccalaureate Americas Office. Results listed on high school transcripts are not considered official.

Correspondence concerning the IB Program should be addressed to IB Americas Global Centre, 7501 Wisconsin Ave., Suite 200 West, Bethesda, MD 20814, iba@ibo.org, or visit their website at http://ibo.org/iba/.

Departmental Examinations

Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental (or CLEP) examinations should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested. If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. T grades are not used in computing students’ grade point averages; however, the credit does become part of their official academic record and may be applied toward their graduation requirements. For a listing of common departmental test-out exams, refer to http://counseling.iastate.edu/testing-services/test-outs. Most examinations for credit are prepared by the departments offering the courses. In some cases, the examination used is part of the College Level Examination Program (CLEP), where the content of the CLEP test has been judged to be an equivalent to the content of the course.

College Level Examination Program

CLEP is available on computer only and Iowa State University only accepts the CLEP tests listed in this section, and does not accept College Mathematics, College Algebra, Precalculus, College Composition, College Composition Modular, American Literature, Analyzing and Interpreting Literature, or English Literature. Up to six semester credit hours in each of these three CLEP general tests is awarded: Social Sciences and History, Humanities, and Natural Sciences. In addition, the College of Engineering does not allow credit earned from CLEP Social Sciences and History, Humanities, and Natural Sciences tests to be used in their students’ degree programs.

CLEP tests accepted at Iowa State University include American Government (Pol S 215); Financial Accounting (Acct 284); engineering majors should consult with their academic adviser before registering for this examination; Biology (Biol 101, not for biology or engineering majors); Calculus (Math 165); Introductory Psychology (Psych 101); Introductory Sociology (Soc 134); Principles of Macroeconomics (Econ 102); and Principles of Microeconomics (Econ 101). Current Iowa State University students should not take the economics CLEP exams; they are required to take the departmental exam instead.

In addition, Iowa State University will award up to 16 semester credit hours for CLEP French Language, up to 16 semester credit hours for CLEP German Language, and up to 16 semester credit hours for CLEP Spanish Language. Please note that native or near native speakers of French, German, or Spanish may not test out of the beginning or intermediate levels in these languages.

A nonrefundable fee is charged for each CLEP test requested, and all requests should be made one week prior to the test date. CLEP tests are administered by the Student Counseling Service Testing Office Monday through Friday. For information on whether to take any of the CLEP tests, contact your academic adviser. To obtain information on any of the CLEP tests, contact the SCS Testing Office, Rm. 2062 Student Services Building, Iowa State University, Ames, Iowa 50011, or send e-mail to scscepl@iastate.edu. To print a copy of the institutional CLEP registration form, go to http://www.counseling.iastate.edu/testing-services.

Policies and Procedures Governing CBE Tests

1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).

2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.

3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a retest may be taken upon approval of the department in which the course is offered.

4. Credit by examination will not be granted if it duplicates courses previously passed or failed.

5. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.

6. There is a nonrefundable fee for all departmental and CLEP tests. The fee is set by the Board of Regents, State of Iowa, and is subject to change.

7. Departmental examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should contact the department that offers the class. CLEP tests are given throughout the year.

8. Credit for the CLEP examinations Social Sciences and History, Humanities, and Natural Sciences is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow these CLEP credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisers to determine whether such credit is to their benefit.

9. Listed below are policies for transferring CBE from another college or university to Iowa State University:

   a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is earned at any other college or university may not be transferred directly to Iowa State. However, the scores from these examinations may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State’s AP and CLEP policies.

   b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State’s IB policies.

   c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University provided...
it is accompanied by at least 12 semester credits earned in residence at the
sending institution.

10. Credit earned from CBE will be posted to the student’s academic record at the
end of the term. CBE credits will be counted toward the projected year in school
classification used to establish registration start dates.

11. Some professional programs do not accept T (test-out) credit in
preprofessional courses. Students who anticipate applying to such programs
should inquire about the acceptability of such credit before registering for such
CBE tests.

12. Credit established at Iowa State University will usually transfer to other
colleges and universities; however, the final decision rests with the institution
reviewing the transcript.
Career Preparation

Additional information is available within the college student information offices and through the Office of Admissions.

Teacher Education

http://www.teacher.hs.iastate.edu/

A student seeking admission to the Iowa State University Teacher Education Program must be accepted by a selection committee for the specific licensure area which the student seeks to enter. Factors considered in evaluating applications (in addition to the requirements listed below) may include scholarship, interest in teaching, character, interpersonal skills, and physical and mental health. Recommendations by selection committees must be confirmed by the Educator Preparation Coordinating Council (http://www.teacher.hs.iastate.edu/committee.php) before admission is granted.

See the Teacher Information page in this section for more detailed information.

Preprofessional Study

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor’s degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor’s degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

See the Preprofessional Study page in this section for more detailed information.

Teacher Education Opportunities

Ralph Reynolds, Director of the School of Education

Teacher Education is a shared responsibility that spans three colleges. For most licensure areas, students major in a content area while taking additional education courses. All students who are recommended by Iowa State University for teacher licensure must meet the requirements of Teacher Education and be recommended by their department, college, and the ISU recommending official. Students who successfully complete the requirements for any of the endorsement areas offered at ISU must demonstrate the skills and knowledge required of beginning teachers.

Undergraduate Teacher Licensure Areas

An undergraduate student seeking a bachelor’s degree must be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and college.

Currently, there are fifteen undergraduate teacher licensure areas offered at Iowa State University. These areas and their corresponding grade levels are listed below:

- Agricultural Education (grades 5-12)
- Biology (grades 5-12)
- Chemistry (grades 5-12)
- Early Childhood Education (birth-grade 3, including special education) and Early Childhood Special Education (PK)
- Earth Science (grades 5-12)
- Elementary Education (grades K-6)
- English (grades 5-12)
- Family and Consumer Sciences (grades 5-12)
- Health Education (grades 5-12)
- History-Social Sciences (grades 5-12)
- Mathematics (grades 5-12)
- Music (grades K-12)
- Physical Education (grades K-12)
- Physics (grades 5-12)
- World Languages and Cultures (French, German, and Spanish) (grades 5-12)

Additional Endorsements

Students must fulfill the requirements for one of the licensure areas listed above to add the endorsements below.

- Art (K-8)
- Basic Science (K-8)
- Coaching Interscholastic Athletics (grades K-12)
- English and Language Arts (K-8)
- English as a Second Language (grades K-12)
- General Science (grades 5-12)
- Health (K-8)
- History (K-8)
- Instructional Strategist I: Mild/Moderate Disabilities (grades K-8 or 5-12)
- Instructional Strategist II: Behavior Disorders/Learning Disabilities (K-12)
- Mathematics (K-8)
- Physical Science (grades K-12)
- Reading (grades K-8 or 5-12)
- Social Sciences (K-8)
- Speech Communication (grades 5-12)
- World Languages and Cultures (Chinese, French, German, Latin, Russian, and Spanish) (grades K-8 and 5-12)

Post-Bachelor’s Teacher Licensure Areas

Students already holding an appropriate bachelor’s degree may pursue teacher licensure in any of the undergraduate licensure areas listed above. Interested students should consult with the coordinator of the area in which they plan to specialize so that an individualized program of study can be developed.

Graduate Teacher Licensure Areas

Currently, there are five graduate initial teacher licensure programs. These programs are designed for students who do not currently hold a teaching license. The programs are listed below:

- Agricultural Education (M.S.)
- Family and Consumer Sciences Education (M.Ed. or M.S.)
- Mathematics Education (M.Ed.)
- Physical Education (M.S.)
- Secondary Sciences Education (M.A.T.)

Iowa State University also offers Master’s programs for practicing teachers. The Mathematics Department offers a Masters in School Mathematics. (See Mathematics in Courses and Programs section of this catalog.) The Curriculum and Instruction Department offers a Master’s degree program and a certificate program that lead to a special education endorsement. (See Curriculum and Instruction in Courses and Programs section of this catalog.)

Graduate programs are also available for those who seek licensure in Educational Leadership and Policy Studies as PK-12 school principals or PK-12 superintendents. (See Educational Leadership and Policy Studies in Courses and Programs section of this catalog.)

Master’s Programs that Lead to Initial Teacher Licensure

Agricultural Education

The Agricultural Education and Studies Department offers a Master’s of Science program that prepares Agricultural Education teachers for grades 5-12

See coordinator for program requirements.

Mathematics

The School of Education offers a Master’s of Education program that prepares Mathematics teachers for grades 5-12

See coordinator for program requirements.

Physical Education

The Department of Kinesiology offers a Master’s of Science program that prepares Physical Education teachers for grades K-12.

See coordinator for program requirements.

Secondary Sciences

The School of Education offers a Master’s of Arts in Teaching program that prepares Secondary Science teachers for grades 5-12

See coordinator for program requirements.

Iowa Teacher Intern License Pathway

The Iowa Teacher Intern License Pathway is a Regent’s collaborative designed for adult learners holding a baccalaureate degree who are seeking 5-12 licensure in a high needs area. For more information: http://www.iowateacherintern.org/
The General Education Requirement

All prospective teachers are required to meet general education requirements as a part of their preparation.

Undergraduate Students

Undergraduate students must complete studies in the following general education groups. General education courses may be found in many departments. Credits listed are minimum requirements. Specific departments and/or colleges may require additional credits. Credits used to satisfy these general education requirements typically satisfy department and college general education requirements. (See licensure area coordinator for more information.)

- Cr.
- 6 - Natural sciences
- 3 - Mathematics or Statistics
- 9 - Social Sciences
- 6 - Humanities
- 9 - Communication Skills
- 1.0 - Information Literacy (Lib 160)

34.0 Total

The above requirements must include:

1. Engl 150 and ENGL 250 or equivalent
2. One course that develops interpersonal or group presentation
3. HD FS 102 or PSYCH 230
4. One course in American history or government

Post-Bachelor’s Students

Students holding an appropriate bachelor's degree who wish to pursue teacher licensure must have at least one course in each of the following five general education groups identified for undergraduate students in the preceding section: Natural Sciences, Mathematics or Statistics, Social Sciences, Humanities, and Communication Skills. Individual departments preparing teachers may require additional credits in general education. (See licensure area coordinator for more information.)

Master’s Students

Each Master’s program will determine what, if any, general education requirements Master’s students must fulfill beyond a bachelor’s degree from a regionally accredited institution. (See licensure area coordinator for more information.)

Standards

Teacher Education has a rigorous standards-based curriculum. Two sets of standards are used in the program, one that is targeted for pre-service teachers (Teacher Education Standards which originates from the Iowa Administrative Code, Chapter 79, Standards for Practitioner Preparation Programs) and the other set that is targeted for in-service teachers (the Iowa Teaching Standards and Model Criteria adopted by the State Board of Education), the latter is emphasized during student teaching. Both are listed below in full.

Teacher Education Standards

1. Content/subject matter specialization.
   The candidate demonstrates an understanding of the central concepts, tools of inquiry, and structure of the discipline(s) the candidate teaches, and creates learning experiences that make these aspects of the subject matter meaningful for students. This is evidenced by a completion of a 30-semester-hour teaching major which, at a minimum, must include the requirements for at least one of the basic endorsement areas, special education teaching endorsements, or secondary level occupational endorsements. Each elementary candidate must also complete a field of specialization in a single discipline or a formal interdisciplinary program of at least twelve semester hours.

2. Student learning.
   The candidate demonstrates an understanding of human growth and development and of how students learn, and receives learning opportunities that support intellectual, career, social and personal development.

3. Diverse learners.

   The candidate demonstrates an understanding of how students differ in their approaches to learning and creates instructional opportunities that are equitable and adaptable to diverse learners.

4. Instructional planning.
   The candidate plans instruction based upon knowledge of subject matter, students, the community, curriculum goals, and state curriculum models.

5. Instructional strategies.
   The candidate demonstrates an understanding and use of a variety of instructional strategies to encourage student development of critical and creative thinking, problem-solving, and performance skills.

   The candidate uses an understanding of individual and group motivation and behavior; creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation; maintains effective classroom management; and is prepared to address behaviors related to substance abuse and other high-risk behaviors.

7. Communication.
   The candidate uses knowledge of effective verbal, nonverbal, and media communication techniques, and other forms of symbolic representation, to foster active inquiry, collaboration, and support interaction in the classroom.

8. Assessment.
   The candidate understands and uses formal and informal assessment strategies to evaluate the continuous intellectual, social, and physical development of the student, and effectively uses both formative and summative assessment of students, including student achievement data, to determine appropriate instruction.

   The candidate develops knowledge of the social, historical, and philosophical foundations of education. The candidate continually evaluates the effects of the candidate’s choices and actions on students, parents, and other professionals in the learning community; actively seeks out opportunities to grow professionally; and demonstrates an understanding of teachers as consumers of research and as researchers in the classroom.

10. Collaboration, ethics and relationships.
    The candidate fosters relationships with parents, school colleagues, and organizations in the larger community to support student learning and development; demonstrates an understanding of educational law and policy, ethics, and the profession of teaching, including the role of boards of education and education agencies; and demonstrates knowledge and dispositions for cooperation with other educators, especially in collaborative/co-teaching as well as in other educational team situations.

11. Technology.
    The candidate effectively integrates technology into instruction to support student learning.

12. Methods of teaching.
    Methods of teaching have an emphasis on the subject and grade level endorsement desired.

Iowa Teaching Standards and Criteria

Standard 1:

Demonstrates ability to enhance academic performance and support for implementation of the school district student achievement goals.

The teacher:

a. Provides multiple forms of evidence of student learning and growth to students, families, and staff.

b. Implements strategies supporting student, building, and district goals.

c. Uses student performance data as a guide for decision-making.

d. Accepts and demonstrates responsibility for creating a classroom culture that supports the learning of every student.

e. Creates an environment of mutual respect, rapport, and fairness.

f. Participates in and contributes to a school culture that focuses on improved student learning.

g. Communicates with students, families, colleagues, and communities effectively and accurately.
Standard 2:
Demonstrates competence in content knowledge appropriate to the teaching position.
The teacher:
- a. Understands and uses key concepts, underlying themes, relationships, and different perspectives related to the content area.
- b. Uses knowledge of student development to make learning experiences in the content area meaningful and accessible for every student.
- c. Relates ideas and information within and across content areas.
- d. Understands and uses instructional strategies that are appropriate to the content area.

Standard 3:
Demonstrates competence in planning and preparing for instruction.
The teacher:
- a. Uses student achievement data, local standards, and the district curriculum in planning for instruction.
- b. Sets and communicates high expectations for social, behavioral, and academic success of all students.
- c. Uses student developmental needs, background, and interests in planning for instruction.
- d. Selects strategies to engage all students in learning.
- e. Uses available resources, including technologies, in the development and sequencing of instruction.

Standard 4:
Uses strategies to deliver instruction that meet the multiple learning needs of students.
The teacher:
- a. Aligns classroom instruction with local standards and district curriculum.
- b. Uses research-based instructional strategies that address the full range of cognitive levels.
- c. Demonstrates flexibility and responsiveness in adjusting instruction to meet student needs.
- d. Engages students in varied experiences that meet diverse needs and promote social, emotional, and academic growth.
- e. Connects students' prior knowledge, life experiences, and interests in the instructional process.
- f. Uses available resources, including technologies, in the delivery of instruction.

Standard 5:
Uses a variety of methods to monitor student learning.
The teacher:
- a. Aligns classroom assessment with instruction.
- b. Communicates assessment criteria and standards to all students and parents.
- c. Understands and uses the results of multiple assessments to guide planning and instruction.
- d. Guides students in goal setting and assessing their own learning.
- e. Provides substantive, timely, and constructive feedback to students and parents.
- f. Works with other staff and building and district leadership in analysis of student progress.

Standard 6:
Demonstrates competence in classroom management.
The teacher:
- a. Creates a learning community that encourages positive social interaction, active engagement, and self-regulation for every student.
- b. Establishes, communicates, models, and maintains standards of responsible student behavior.
- c. Develops and implements classroom procedures and routines that support high expectations for student learning.
- d. Uses instructional time effectively to maximize student achievement.
- e. Creates a safe and purposeful learning environment.

Standard 7:
Engages in professional growth.
The teacher:
- a. Demonstrates habits and skills of continuous inquiry and learning.
- b. Works collaboratively to improve professional practice and student learning.
- c. Applies research, knowledge, and skills from professional development opportunities to improve practice.
- d. Establishes and implements professional development plans based upon the teacher's needs aligned to the Iowa Teaching Standards and district/building student achievement goals.
- e. Provides an analysis of student learning and growth based on teacher created tests and authentic measures as well as any standardized and district-wide tests.

Standard 8:
Fulfills professional responsibilities established by the school district.
The teacher:
- a. Adheres to board policies, district procedures, and contractual obligations.
- b. Demonstrates professional and ethical conduct as defined by state law and individual district policy.
- c. Contributes to efforts to achieve district and building goals.
- d. Demonstrates an understanding of and respect for all learners and staff.
- e. Collaborates with students, families, colleagues, and communities to enhance student learning.

Electronic Portfolio
Each teacher candidate is required to demonstrate acquisition of the knowledge, skills, and dispositions designated by the standards above for an Iowa teaching license at a level appropriate for a novice teacher. The e-portfolio allows Teacher Education to demonstrate to the Iowa Department of Education that each student recommended for an initial teaching license has an understanding of these standards.

At decision point 1, before signing off on admission materials for the student, the adviser/coordinator will check to see if the student started their e-portfolio with a minimum of one graded artifact uploaded.

At decision point 2, before signing off on student teaching materials for the student, the adviser/coordinator will check to see if the student has one graded artifact uploaded for each of the 12 standards.

At decision point 3, before signing off on licensure materials for the student, the coordinator will check to see if the student has 2 graded artifacts uploaded for each of the 12 standards. All artifacts must be graded by an instructor except for the artifacts for the content standard and the artifacts from student teaching.

At decision point 3, prior to recommendation for licensure, students will be required to write a synthesis of evidence assignment which would address all twelve teacher education standards. While the writing mechanics (punctuation, word usage, etc.) will be considered, the focus on the synthesis of evidence will be on whether or not the student has convinced the evaluator that s/he has met each standard. Students will receive notification from evaluators regarding their performance on the synthesis of evidence. A ‘not proficient’ rating on the synthesis of evidence will result in a recommendation to deny licensure. Departments may have additional requirements (see licensure area coordinator for more information). See the following webpage for more information on the electronic portfolio: http://www.teacher.hs.iastate.edu/eportfolio.php

The Professional Teacher Education Requirement (Professional Core)

Undergraduate Students
Prospective teachers must complete certain studies related directly to the profession of teaching. All undergraduate students in teacher education must take the following courses prior to student teaching, unless the student’s licensure area has an approved content-area course deemed to be equivalent (see specific Licensure Area Requirements section below for details.)
Early Childhood Education and Elementary Education:

14-16 weeks: Student Teaching (Minimum 14 weeks) See Teacher Licensure Area Coordinator for more information.

Students in K-12 licensure areas and secondary (grades 5-12) licensure areas must complete the courses listed above unless the student’s licensure area has an approved equivalent. Areas with approved equivalents include: Agricultural Education (for CI 426), Physical Education (for CI 333, CI 401, CI 426 ) and all Secondary Sciences (for CI 426). (See licensure area coordinator for more information).

Post-Bachelor’s Students

Students who hold an appropriate bachelor’s degree and seek a teaching license must complete the professional education requirements listed above through course work or examination.

Master’s Students

Prospective teachers must complete certain studies related directly to the profession of teaching. All students enrolled in Master’s programs that lead to initial licensure must take the following courses prior to student teaching, unless the student’s licensure area has an approved content area course deemed to be equivalent. (See Master’s Programs section below for details.)

14-16 Weeks: Student Teaching (Minimum 14 Weeks) See Teacher Licensure Area Coordinator for more information.

Clinical Experiences

The Standards for Practitioner and Administrator Preparation Programs (chapter 79.13(1)) requires that “candidates admitted to a teacher preparation program participate in field experiences including both observation and participation in teaching activities in a variety of school settings and totaling at least 80 hours’ duration, with at least 10 hours occurring prior to acceptance into the program.” This requirement may be met through pre-student teaching courses (e.g., C 1 280, C 1 480, CI 468, C 1 580) or, in certain endorsement areas, a course designated to provide an equivalent experience. For most licensure areas, there are four levels for clinical experiences. Level 1 involves observation in local schools. Level 2 involves actively teaching in the classroom with one lesson, at minimum. Level 3 involves actively teaching in the classroom with two lessons, at minimum. Level 4 is student teaching and involves actively teaching for a minimum of 14 weeks where the student teacher bears primary responsibility for planning and instruction within the classroom for a minimum of two weeks (10 days). Level 2, 3 and 4 involve a course fee, which range from $25.00 to $328.00 and are assessed to cover the costs of supervision and placement with a cooperating teacher. Course fees are increased when student teaching nationally or internationally. For current course fees, consult the Schedule of Classes. For level 2, 3 and 4, the student needs access to transportation because the placement may be within 60 miles of the university. The time commitment for clinical experiences ranges from 1/2 day for level 2 and 3 to the full day for level 4. Students complete a background check before initial placement in schools and other appropriate locations.

Admission to Teacher Education (Decision Point 1)

Teacher Education Services (located in 133 MacKay) monitors the progress of teacher education students. Admission to Teacher Education is the first of three decision points. At this time, the requirements listed below will be checked. Students will not be able to progress to Student Teaching (decision point 2) and Licensure (decision point 3) without full admission to Teacher Education (decision point 1). Departments may have higher eligibility requirements for each decision point (see licensure area coordinator for more information).

Students transferring from other institutions with a minimum of 2.50 GPA or above may be admitted tentatively; full admission may be granted upon completion of nine semester credits averaging 2.50 or above at Iowa State University. Students who receive tentative admission are required to address concerns and submit an email message conveying how the concern was resolved and that they now meet all admission requirements to the Teacher Licensure Analyst. A minimum of 20 semester credits averaging 2.50 or above must be earned at Iowa State University to receive institution licensure approval (nine of the required 20 semester hours must precede student teaching).

A student seeking admission to Teacher Education must be accepted by a selection committee for the specific licensure area which the student seeks to enter. Factors considered in evaluating applications (in addition to the requirements listed below) may include professional dispositions, scholarship, interest in teaching, character, interpersonal skills, results from the background check, and physical and mental health. Recommendations by selection committees must be confirmed by the Educator Preparation Coordinating Council before admission is granted.

Requirements for full admission to Teacher Education as an undergraduate:

1. A minimum 2.5 cumulative grade point average.
2. Successful completion of one of the following basic skills tests:
   a. A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics).
   b. Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online: www.teacher.hs.iastate.edu.
3. Documented completion of ISU approved 10 hours of pre-student teaching clinical experience.
4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).
5. An acceptable Iowa criminal background check report initiated by ISU’s recommending official.
6. E-portfolio contains a minimum of one graded artifact (that received a proficient rating).

Requirements for full admission to Teacher Education as a post-bachelor’s student:

1. A bachelor’s degree from a regionally accredited institution and a minimum 2.5 cumulative grade point average from that institution.
2. Successful completion of one of the following basic skills tests:
   a. —Minimum GRE scores (400 on each of the Verbal and Quantitative sections.) Some licensure areas require higher GRE scores.
   b. —A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics.) Some licensure areas may require higher Praxis I scores.
Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online:
www.teacher.hs.iastate.edu

3. Documented completion of ISU approved 10 hours of pre-student teaching clinical experience.

4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).

5. An acceptable Iowa criminal background check report initiated by ISU’s recommending official.

6. E-portfolio contains a minimum of one graded artifact (that received a proficient rating).

Requirements for full admission to University Teacher Education as a Master’s student:

1. Full admission to an appropriate Master’s degree program.

2. Successful completion of one of the following basic skills tests:
   a. —Minimum GRE scores (400 on each of the Verbal and Quantitative sections.) Some licensure areas require higher GRE scores. 
   b. —A composite Praxis I (PPST) score of 522, with a minimum of 170 for each test (reading, writing, and mathematics.) Some licensure areas may require higher Praxis I scores.

Minimum scores for the basic skills tests may be subject to change. Details regarding the scores, dates and fees for these tests are available online:
www.teacher.hs.iastate.edu

3. Documented completion of ISU approved 10 hours of pre-student teaching clinical experience.

4. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).

5. An acceptable Iowa criminal background check report initiated by ISU’s recommending official.

6. E-portfolio contains a minimum of one graded artifact (that received a proficient rating).

Maintaining Program Eligibility

GPA:
At all three decision points, GPA will be checked for a minimum of a 2.5 cumulative grade point average.

Grades:
For teacher education students, all Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C. Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C-. Note: Individual departments preparing teachers may have higher eligibility requirements (see teacher licensure area coordinator for more information). Please note, for all three decision points (admission, student teaching and licensure) incomplete grades are NOT considered acceptable passing grades.

Electronic Portfolio:
In order to be recommended for licensure, all students must have demonstrated satisfactory performance across the teacher education competencies, as defined by their specific area. (See the teacher licensure area coordinator for more information.) Students’ progress is monitored throughout the program and standards are assessed multiple times. More information is available online:

Factors considered in maintaining program eligibility may include professional dispositions, scholarship, interest in teaching, character, interpersonal skills, results from the background check, and physical and mental health. Throughout the program, a commendation/concern form may be completed by an adviser, coordinator, faculty member, cooperating teacher, or supervisor to document a teacher education student’s knowledge, skills and dispositions worthy of commendation or concern. Significant concerns will result in removal from Teacher Education.

Background Checks
Two background checks (at minimum) will be completed on each student. First, prior to any clinical experiences taking place, students are required to undergo a state of Iowa background check through the Iowa Division of Criminal Investigation. Second, prior to receiving an initial Iowa teaching license, all candidates will undergo a national criminal history background check. The state background check costs $18.00 and the national background check costs $65.00, prices are subject to change.

At the time of a background check, students will also be required to report any prior criminal convictions or pending criminal charges. Any criminal misconduct charge other than parking or speeding violations must be reported. This includes all deferred judgments. In some cases, this will include criminal activity which occurred while a minor. Failure to accurately self-disclose to the appropriate ISU personnel may prevent the student from engaging in a clinical experience or the removal of the student if already placed in a clinical experience.

Students are required to report criminal activity in order to maintain program eligibility. Any criminal misconduct charge a student receives after the first background check is completed must be reported immediately to the Teacher Licensure Analyst located in Teacher Education Services in 133 MacKay. Failure to do so may result in the discharge of the student from Teacher Education. Please note, on occasion, a more stringent background check may be conducted by a school or other appropriate location, which may lead to a denial of a placement. More information on the Student Self-Reporting of Alleged Criminal Misconduct Policy is located online: www.teacher.hs.iastate.edu.

Appeals
Students who do not meet the requirements for decision points may choose to appeal to the Educator Preparation Coordinating Council. The description of the appeals process is available online: www.teacher.hs.iastate.edu.

Student Teaching (Decision Point 2)
Student teaching is the culminating experience to the practitioner preparation program at Iowa State University. Depending on the licensure area pursued, student teaching varies in length for a minimum of 14 weeks. A supervisor will make frequent visits to the classroom to ensure success in this experience. Sites for student teachers are within driving distance of campus or at approved in-state, national, and international locations. More information can be found online: www.teacher.hs.iastate.edu. Course fees are assessed to cover the costs of supervision and placement with a cooperating teacher. To ensure that students are prepared for this experience, the following requirements must be met prior to submitting your “Request for Student Teaching Placement” form:

1. Completion of the “Request for Student Teaching Placement” by the deadline in the fall semester for spring student teaching and by the deadline in the spring semester for fall student teaching. The deadline for students is the end of the third week of the semester. Details regarding this application are available in Teacher Education Services located in 133 MacKay.

2. A minimum 2.5 cumulative grade point average.

3. A passing grade as determined by the licensure area must have been earned in all required professional teacher education requirement courses and selected courses in the student’s licensure area. All Curriculum and Instruction (C I), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework).

4. Complete (or concurrently completing) 80 hours of pre-student teaching field experience.

5. Report any criminal misconduct charge. Please note: When the student is enrolled in any field experience or anticipates commencing a field experience within 30 days, any criminal misconduct charge a student receives after the background check is completed must be reported immediately to Teacher Education Services. When the student is not enrolled in any field experience, the charge must be reported as soon as possible but no later than five working days after the incident. Failure to do so may result in the discharge of the student from Teacher Education. The faculty coordinator and the content major department chair will be notified. A committee will meet to review the self-reporting letter and make a decision on the student’s progress.

6. E-portfolio has one graded artifact (that received a proficient rating) uploaded for each of the 12 standards.

Teacher Licensure (Decision Point 3)
The Iowa Board of Educational Examiners issues teaching licenses that are valid for specific ages or grades (e.g., Birth-3 for early childhood teachers, K-6 for elementary teachers and 5-12 for secondary teachers). Endorsements on a teaching license indicate which subject areas a teacher is qualified to teach. An initial teaching license costs $85, price is subject to change. Completion of student
teaching and required coursework does NOT guarantee recommendation for a teaching license. The Iowa License may be recommended for students who hold a bachelor's degree from Iowa State University or another regionally accredited institution and who have completed the following:

1. All requirements for an approved licensure area as designated by Iowa State University and the State of Iowa, including, but not limited to, the general education requirement, the professional teacher education requirement and clinical experiences. Note: Specific courses to be used for licensure may not be taken pass/not pass.

2. A minimum 2.5 cumulative grade point average.

3. All Curriculum and Instruction (CI), Human Development and Family Studies (HD FS) and Special Education (Sp Ed) courses required for licensure have a minimum grade requirement of a C (pedagogy coursework). Courses in the department of the major specifically required for teacher licensure have a minimum grade requirement of a C- (content coursework)

4. A national background check initiated by the Iowa Board of Educational Examiners.

5. Completion of the Iowa Application for Licensure form.

6. Documentation from the student teaching supervisor that the student has successfully completed the final assessment documenting the student's mastery of the skills and knowledge included in the Iowa Teaching Standards.

7. Department approval by TE coordinator.

8. Registrar approval (at this time, graduation is confirmed and holds on records are reviewed).

9. Passing scores on Praxis II.

10. E-portfolio has 2 graded artifacts (that received a proficient rating) uploaded for each of the 12 standards. Also, a proficient rating is earned on the synthesis of evidence.

Undergraduate and Post-Bachelor’s (non-Master’s) Teacher Licensure Area Requirements

Certain competencies are required of those who plan to teach at the early childhood, elementary or secondary level. For full-time teaching in secondary schools a major in an endorsement area or an approved subject matter concentration of at least 30 semester hours is required. Students interested in adding an additional endorsement area should consult with the coordinator or adviser of the additional area. Persons interested in teaching in one of the following endorsement areas should also consult with the appropriate adviser or coordinator. Specific requirements for each teacher licensure area are described below (these requirements are in addition to the General Education Requirements and the Professional Teacher Education Requirements that were listed earlier). For the most current list of required courses, consult with the coordinator or adviser who works with students on teacher licensure (see the following website for the contact information of these advisers or coordinators: www.teacher.hs.iastate.edu).

Agriculture

The Department of Agricultural Education and Studies is responsible for preparing Agricultural Education teachers for grades 5-12.

For specific content area requirements see Curriculum in Agricultural Education and Studies (Teacher Certification Option).

Required professional courses are:

Additional courses to obtain a total of 18 credits at the 300 level or above in a basic biological science from approved program list. One semester length course in introductory/general chemistry with lab. One semester length course in introductory organic chemistry with lab. One semester length course in biochemistry. Two semester length courses in physics with labs. Six semester hours of mathematics and/or statistics.

Chemistry

The Department of Chemistry and the School of Education share the responsibility of preparing Chemistry teachers for grades 5-12.

The Department of Geological and Atmospheric Sciences and the School of Earth Science share the responsibility for preparing Earth Science teachers for grades 5-12.

**Early Childhood Education**

The School of Education and the Department of Human Development and Family Studies in the College of Human Sciences share the responsibility for preparing teachers to work with children from birth to age 8 (PK-3 including special education). Students receive two endorsements: Early Childhood Education (grades K-3, including special education) and Early Childhood Special Education (birth—grade 3, including special education) and Early Childhood Special Education (PK).

For specific course requirements, see College of Human Sciences, Curriculum in Early Childhood Education.

**Earth Science**

The Department of Geological and Atmospheric Sciences and the School of Education share the responsibility of preparing Earth Science teachers for grades 5-12.

Required professional courses are:

- CHEM 316 Instrumental Methods of Chemical Analysis 2
- CHEM 316L Instrumental Analysis Laboratory 2
- CHEM 324 Introductory Quantum Mechanics 3
- CHEM 325 Chemical Thermodynamics 3
- CHEM 321L Laboratory in Physical Chemistry 2
- CHEM 331 Organic Chemistry I 3
- CHEM 331L Laboratory in Organic Chemistry I 1
- CHEM 332 Organic Chemistry II 3
- CHEM 332L Laboratory in Organic Chemistry II 1
- PHYS 221 Introduction to Classical Physics I 10
- PHYS 222 and Introduction to Classical Physics II
- or
- PHYS 111 General Physics 10
- MATH 165 Calculus I 4
- MATH 166 Calculus II 4
- Minimum of one course in BIOL is required
- BIOL 211 and BIOL 211L are recommended

Students with an endorsement in a natural science who seek approval to teach chemistry as an additional subject area must earn credits in the following courses (15 minimum credits):

- CHEM 177 General Chemistry I 4
- CHEM 178 General Chemistry II 3
- CHEM 178L Laboratory in College Chemistry II 1
- CHEM 211 Quantitative and Environmental Analysis 2
- CHEM 231 Organic Chemistry I 3
- CHEM 331L Laboratory in Organic Chemistry I 1
- CHEM 332 Organic Chemistry II 3
- CHEM 332L Laboratory in Organic Chemistry II 1
- or
- CHEM 163 College Chemistry 4
- CHEM 163L Laboratory in College Chemistry 1
- CHEM 211 Quantitative and Environmental Analysis 2
- CHEM 231 Elementary Organic Chemistry 3
- CHEM 231L Laboratory in Elementary Organic Chemistry 1

Students with no natural science endorsement who seek approval to teach chemistry as an additional subject area must complete one of the two sets of courses listed above plus sufficient additional courses to total 24 chemistry credits chosen from:

- CHEM 316 Instrumental Methods of Chemical Analysis 2
- CHEM 316L Instrumental Analysis Laboratory 2
- CHEM 324 Introductory Quantum Mechanics 3
- CHEM 325 Chemical Thermodynamics 3
- CHEM 322L Laboratory in Physical Chemistry 3
- BBMB 301 Survey of Biochemistry 3

**Early Childhood Education**

The School of Education and the Department of Human Development and Family Studies in the College of Human Sciences share the responsibility for preparing teachers to work with children from birth to age 8 (PK-3 including special education). Students receive two endorsements: Early Childhood Education (birth—grade 3, including special education) and Early Childhood Special Education (PK).

For specific course requirements, see College of Human Sciences, Curriculum in Early Childhood Education.

**Earth Science**

The Department of Geological and Atmospheric Sciences and the School of Education share the responsibility of preparing Earth Science teachers for grades 5-12.

Required professional courses are:

- CHEM 177 General Chemistry I 4
- CHEM 178 General Chemistry II 3
- CHEM 178L Laboratory in College Chemistry II 1
- CHEM 211 Quantitative and Environmental Analysis 2
- CHEM 231 Organic Chemistry I 3
- CHEM 331L Laboratory in Organic Chemistry I 1
- CHEM 332 Organic Chemistry II 3
- CHEM 332L Laboratory in Organic Chemistry II 1
- or
- CHEM 163 College Chemistry 4
- CHEM 163L Laboratory in College Chemistry 1
- CHEM 211 Quantitative and Environmental Analysis 2
- CHEM 231 Elementary Organic Chemistry 3
- CHEM 231L Laboratory in Elementary Organic Chemistry 1

Students with no natural science endorsement who seek approval to teach chemistry as an additional subject area must complete one of the two sets of courses listed above plus sufficient additional courses to total 24 chemistry credits chosen from:

- CHEM 316 Instrumental Methods of Chemical Analysis 2
- CHEM 316L Instrumental Analysis Laboratory 2
- CHEM 324 Introductory Quantum Mechanics 3
- CHEM 325 Chemical Thermodynamics 3
- CHEM 322L Laboratory in Physical Chemistry 3
- BBMB 301 Survey of Biochemistry 3

**Early Childhood Education**

The School of Education and the Department of Human Development and Family Studies in the College of Human Sciences share the responsibility for preparing teachers to work with children from birth to age 8 (PK-3 including special education). Students receive two endorsements: Early Childhood Education (birth—grade 3, including special education) and Early Childhood Special Education (PK).

For specific course requirements, see College of Human Sciences, Curriculum in Early Childhood Education.

**Earth Science**

The Department of Geological and Atmospheric Sciences and the School of Education share the responsibility of preparing Earth Science teachers for grades 5-12.

Required professional courses are:
ASTRO 120  The Sky and the Solar System 3
ASTRO 150  Stars, Galaxies, and Cosmology 3
Additional Earth Science courses 300-level or above. 24
See licensure area coordinator for approval prior to taking courses.

Elementary Education
The School of Education in the College of Human Sciences is responsible for preparing elementary (K-6) teachers.
For specific course requirements, see College of Human Sciences, Curriculum in Curriculum and Instruction. Several endorsements may be added to a K-6 teaching license. See an adviser for the most current list and the necessary additional requirements.

English Education
The Department of English prepares English teachers for grades 5-12.
Required professional courses are:
- C I 280A  Pre-Student Teaching Experience I: Core Experience 1-2
- C I 395  Teaching Reading in Middle and Secondary Schools 3
- ENGL 396  Teaching the Reading of Young Adult Literature 3
- ENGL 397  Practice and Theory of Teaching Writing in the Secondary Schools 3
- ENGL 494  Practice and Theory of Teaching Literature in the Secondary Schools 3
- ENGL 417E  Student Teaching: English and Literature arr
† Arranged with instructor.

Students seeking to add English as an additional endorsement area must earn 46 credits in the following courses:

Advanced Writing (one of the following):
- ENGL 302  Business Communication 3
- ENGL 303  Free-Lance Writing for Popular Magazines 3
- ENGL 304  Creative Writing: Fiction 3
- ENGL 305  Creative Writing: Nonfiction 3
- ENGL 306  Creative Writing: Poetry 3
- ENGL 309  Report and Proposal Writing 3
- ENGL 314  Technical Communication 3
- ENGL 315  Writing: Screenplays 3
- ENGL 316  Creative Writing: Playwriting 3
- Rhetoric (one of the following):
  - ENGL 310  Rhetorical Analysis 3
  - ENGL 339  Literary Theory and Criticism 3
- Speech Communication course at the 300 or 400 level Language
  - ENGL 220  Descriptive English Grammar 3
  - ENGL 225  Survey of British Literature to 1800 3
  - ENGL 226  Survey of British Literature since 1800 3
  - ENGL 227  Survey of American Literature to 1865 3
  - ENGL 228  Survey of American Literature since 1865 3
  - ENGL 260  Introduction to Literary Study 3
  - ENGL 340  Women’s Literature 3
  - ENGL 353  World Literature: Western Foundations through Renaissance
    or
  - ENGL 354  World Literature: Seventeenth Century to the Present

English Education
- C I 395  Teaching Reading in Middle and Secondary Schools 3
- ENGL 396  Teaching the Reading of Young Adult Literature 3
- ENGL 397  Practice and Theory of Teaching Writing in the Secondary Schools and Pre-Student Teaching Experience I: Core Experience 4-5
- ENGL 494  Practice and Theory of Teaching Literature in the Secondary Schools and Pre-Student Teaching Experience I: Core Experience 4-5
- SP ED 401  Teaching Secondary Students with Exceptionalities in General Education 3

Students must earn grades of C or better in all of the above courses.

Family and Consumer Sciences
The Family and Consumer Sciences Program in the Department of Apparel, Educational Studies and Hospitality Management prepares Family and Consumer Sciences teachers for grades 5-12.
For specific course requirements, see Curriculum, Family and Consumer Sciences Education and Studies.
Required professional courses are:
- FCEDS 306  Educational Principles for Family and Consumer Sciences 4
- FCEDS 206  Professional Roles in Family and Consumer Sciences 2
- FCEDS 418  Occupational, Career and Technical Programs 3
- FCEDS 413  Planning and Assessment for Family and Consumer Sciences and Family Life Education 4
- FCEDS 417A  Supervised Teaching in Family and Consumer Sciences: 3-8 Vocational family and consumer sciences.
- FCEDS 417B  Supervised Teaching in Family and Consumer Sciences: 3-8 Family and consumer sciences.
- FCEDS 480A  Pre-Student Teaching Experience in FCS Education: Practicum in FCS Labs (24 hours) 1
- FCEDS 480B  Pre-Student Teaching Experience in FCS Education: Practicum in Diverse Settings (24 hours) 1

For specific content area course requirements, see Curriculum, in Family and Consumer Sciences Education and Studies.

Health Education
The Department of Kinesiology prepares Health teachers for grades 5-12.
Required professional courses are:
- H S 375  Teaching-Learning Process in Health Education 3
- H S 417  Supervised Teaching in Health Education in the Secondary School 12

Required content courses are:
- KIN 288  Physical Fitness and Conditioning 2
- H S 310  Community and Public Health 3
- H S 350  Human Diseases 3
- H S 390  Administration of the School Health Program 3
- FS HN 167  Introduction to Human Nutrition 3
- HD FS 276  Human Sexuality 3
- HD FS 373  Death as a Part of Living 3
- or HD FS 377  Aging and the Family
- BIOI 155  or BIOI 255  Fundamentals of Human Anatomy
- BIOI 255L  Fundamentals of Human Anatomy Laboratory 1
- BIOI 256  Fundamentals of Human Physiology 3
- BIOI 256L  Fundamentals of Human Physiology Laboratory 1

Students seeking approval for health education as an additional endorsement area must earn credits in the following courses:
- FS HN 167  Introduction to Human Nutrition 3
- HD FS 276  Human Sexuality 3
- H S 110  Personal and Consumer Health 3
- H S 215  Drug Education 3
- H S 305  Instructor’s First Aid and Cardio-pulmonary Resuscitation 2
students must take the following:

Required content courses are:

- MATH 341
- MATH 301
- MATH 201
- MATH 166
- MATH 165

or:

- BIOL 255
- BIOL 255L
- BIOL 256
- BIOL 256L

History-Social Sciences

The Curriculum and Instruction Department and the History Department share the responsibility for preparing History-Social Sciences teachers for grades 5-12. The department has specific class distribution requirements for the U.S. and world history endorsements.

Contact the History Department for specific information.

History-Social Sciences Education students must earn grades of B- or better in all content courses (with a minimum of a 2.75 GPA), as well as a C or better in pedagogical coursework required for teacher licensure.

Mathematics

The Mathematics Department and the School of Education share responsibility for the preparation of Mathematics teachers for grades 5-12.

For specific content area course requirements, contact the School of Education.

Required professional courses are:

- C I 219 Orientation to Teacher Education: Math, Science, FCS Education, and History/Social Science Majors 1
- C I 280A Pre-Student Teaching Experience I: Core Experience 1-2
- C I 280L Pre-Student Teaching Experience I: Secondary Education 0.5
- C I 480C Pre-Student Teaching Experience III: Mathematics 0.5-2
- C I 497 Teaching Secondary School Mathematics 3
- C I 417C Student Teaching: Mathematics arr

† Arranged with instructor.

Required content courses are:

- MATH 165 Calculus I 4
- MATH 166 Calculus II 4
- MATH 201 Introduction to Proofs 3
- MATH 265 Calculus III 4
- MATH 266 Elementary Differential Equations 3
- or MATH 267 Elementary Differential Equations and Laplace Transforms
- MATH 301 Abstract Algebra I 3
- MATH 317 Theory of Linear Algebra 4
- MATH 341 Introduction to the Theory of Probability and Statistics I 3
- MATH 397 Teaching Secondary Mathematics Using University Mathematics 3
- MATH 345 Geometry I 3
- MATH 346 Geometry II 3
- STAT 101 Principles of Statistics 4

One of the following:

- COM S 107 Applied Computer Programming 3
- COM S 207 Fundamentals of Computer Programming 3
- COM S 227 Introduction to Object-oriented Programming 4

Music

The Music Department prepares Music teachers for grades K-12.

For specific content area course requirements, see Curriculum, in Music.

Required professional courses are:

- MUSIC 248 Technology in Music Instruction 2
- MUSIC 266 Introduction to Music Education 2
- MUSIC 366 Methods of Music Education 2

One of the following:

- MUSIC 367 Choral Literature 2
- MUSIC 368 Marching Band and Jazz Ensemble Techniques 2
- MUSIC 417R Student Teaching: Music-Elementary arr
- MUSIC 417S Student Teaching: Music-Secondary arr

For required content courses are see Curriculum, in Music.

Physical Education

The Kinesiology Department prepares Physical Education teachers for grades K-12.

Kinesiology and Health

Required professional courses:

- KIN 280 Directed Field Experience in Elementary Physical Education 1
- KIN 281 Directed Field Experience in Secondary Physical Education 1
- KIN 312 Movement Education in Elementary School Physical Education 3
- KIN 313 Teaching Secondary Physical Education 3
- KIN 395 Adapted Physical Education 3
- KIN 418 Supervised Teaching in Physical Education in the Elementary School 8
- KIN 417 Supervised Teaching in Physical Education in the Secondary School arr
- KIN 471 Measurement in Physical Education 3
- KIN 475 Physical Education Curriculum Design and Program Organization 3

† Arranged with instructor.

Required content courses are: see Curriculum, Kinesiology and Health

Physics

The Physics and Astronomy Department and the School of Education share the responsibility for preparing Physics teachers for grades 5-12.

Required professional courses:

- C I 280M Pre-Student Teaching Experience I: Secondary Science 1-2
- C I 347 Nature of Science 3
- C I 417B Student Teaching: Physical Sciences arr
Students with no other natural science endorsement who seek approval to teach physics as an additional endorsement area must complete one of the two sets of courses listed above plus sufficient additional credits from the following list of courses to total 24 credits:

- PHYS 302: The Challenge of Contemporary Physics
- PHYS 304: Thermal Physics
- PHYS 306: Physics of Wave Motion
- PHYS 310: Electronic Instrumentation for Experimental Physics
- PHYS 321: Introduction to Modern Physics I
- PHYS 321L: Introductory Laboratory in Modern Physics I
- PHYS 322: Introduction to Modern Physics II
- PHYS 322L: Introductory Laboratory in Modern Physics II
- ASTRO 342: Introduction to Solar System Astronomy
- ASTRO 344L: Astronomy Laboratory
- ASTRO 346: Introduction to Astrophysics
- CHEM 324: Introductory Quantum Mechanics
- CHEM 325: Chemical Thermodynamics
- E E 442: Introduction to Circuits and Instruments
- E M 274: Statics of Engineering
- E M 345: Dynamics
- E M 378: Mechanics of Fluids
- M E 332: Engineering Thermodynamics II

### World Languages

The Department of World Languages and Cultures prepares World Language teachers for grades 5-12. World Language teachers can earn an endorsement in French, German or Spanish.

For specific content area course requirements, see Curriculum, World Languages and Cultures.

**Required professional courses are:**

- **C I 280A:** Pre-Student Teaching Experience I: Core Experience 1-2
- **C I 280L:** Pre-Student Teaching Experience I: Secondary Education 0.5
- **WLC 417G:** Student Teaching: World Language arr
- **WLC 487:** Methods in Secondary School World Language Instruction 3

† Arranged with instructor.

**Requirements for Additional Endorsements**

Students may elect to add additional endorsements to their teaching license by completing the necessary requirements. All “Undergraduate Teacher Licensure Areas” listed above can be pursued as an additional endorsement. Below are the additional endorsements only options that require students to pursue one of the undergraduate, post-bachelor’s or graduate teacher licensure areas listed above. Detailed requirements for any endorsement may be obtained from Teacher Education Services (located in 133 MacKay).

**Art (grades K-8)**

Students seeking an additional endorsement in Art (K-8) should see an advisor in the School of Education.

**Basic Science (grades K-8)**

Students seeking an additional endorsement in Basic Science (K-8) should see an advisor in the School of Education.

**Coaching Interscholastic Athletics (grades K-12)**

The Department of Kinesiology offers courses that can lead to a K-12 athletic coach endorsement. Students seeking approval for the Iowa State University endorsement to coach interscholastic athletics must satisfy the requirements of
an endorsement area listed above and earn credits in the following (to meet state minimum requirements).

**Biological Sciences (grades 5-12)**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 155</td>
<td>Human Biology</td>
<td>3</td>

</tr>
</tbody>
</table>

**Chinese (grades K-8)**

Students seeking an additional endorsement in Chinese (K-8) should see an adviser in the School of Education.

**Chinese (grades 5-12)**

Students seeking an additional endorsement in Chinese (5-12) should see the coordinator in the Department of World Languages and Cultures.

**English and Language Arts (grades K-8)**

Students seeking an additional endorsement in English and Language Arts (K-8) should see an adviser in the School of Education.

**English as a Second Language (grades 5-12)**

The Department of English offers courses that can lead to a K-12 ESL Teacher endorsement.

To add a K-12 teaching endorsement in English as a Second Language, students must fulfill the requirements of an endorsement area listed above and earn credits in the following courses. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 219 or ENGL 511</td>
<td>Introduction to Linguistics or Introduction to Linguistic Analysis</td>
<td>3</td>

<td>Supervised Practice Teaching in Teaching English as a Second Language</td>
<td>3</td>
</tr>
</tbody>
</table>

**Basic Science (grades 5-12)**

Basic Science is an interdepartmental additional area of endorsement for grades 5-12.

Students seeking approval to teach general science must earn credits in the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 211 or BIOL 211L or BIOL 212 or BIOL 212L</td>
<td>Principles of Biology I or Principles of Biology Laboratory I or Principles of Biology or Principles of Biology Laboratory</td>
<td>1</td>
</tr>
<tr>

<td>Introduction to Classical Physics I and Introduction to Classical Physics II</td>
<td>10</td>
</tr>
</tbody>
</table>

One of the following:

**Mathematics (grades K-8)**

Students seeking an additional endorsement in mathematics (K-8) should see an adviser in the School of Education.

**Reading (grades K-8, 5-12)**

The School of Education offers courses that can lead to a reading endorsement for grades K-8. This department collaborates with the English Department to offer the necessary coursework for a 5-12 reading endorsement.

Students seeking an additional endorsement to teach elementary reading (K-8) should see a School of Education adviser.

Students seeking endorsement to teach reading (5-12) as an additional endorsement must earn credits in the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>C 1395 or C 1551</td>
<td>Foundations of Reading and Language Arts or C 1494</td>

<td>Teaching the Reading of Young Adult Literature or Teaching Struggling Adolescent Readers</td>
<td>3</td>
</tr>
<tr>
<td>C I 456</td>
<td>Integrating Technology into the Reading and Language Arts Curriculum</td>
<td>3</td>
</tr>
</tbody>
</table>

**Social Sciences (grades K-8)**

Students seeking an additional endorsement in Social Sciences (K-8) should see an adviser in the School of Education.

**Special Education (grades K-8, 5-12, ages 5-21)**

The School of Education offers courses that can lead to special education endorsements (Instructional Strategist I: Mild/Moderate Disabilities (grades K-8 and grades 5-12) and Instructional Strategist II: Behavior Disorders/Learning Disabilities I).
Disabilities (ages 5-21). Students seeking special education endorsements at the graduate level must have a current teaching license.

Elementary Education students seeking an additional K-8 endorsement to teach special education should see an adviser in the School of Education.

Speech/Theatre (grades 5-12)

The Department of Speech Communication offers courses that can lead to 5-12 speech/theatre endorsement.

Students seeking endorsement to teach speech as an additional area must earn credits in the following courses:

- SP CM 110 Listening 3
- or COMST 102 Introduction to Interpersonal Communication 3
- SP CM 212 Fundamentals of Public Speaking 3
- SP CM 313 Communication in Classrooms and Workshops 3
- SP CM 322 Argumentation, Debate, and Critical Thinking 3
- SP CM 412 Rhetorical Criticism 3
- SP CM 495A Independent Study; Directing Speech Activities 1
- SP CM 495B Independent Study; Teaching Speech 3
- THTRE 255 Introduction to Theatrical Production 4
- THTRE 358 Oral Interpretation 3
- THTRE 360 Stagecraft 4

World Languages and Cultures (French, German, Latin, Russian, and Spanish) (grades K-8)

Students seeking an additional endorsement World Languages and Cultures (K-8) should see an adviser in the School of Education.

Opportunities for Preprofessional Study

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor’s degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor’s degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

Students who have not declared a major upon entry should enter as preprofessional students, i.e., premedical, prelaw, PHP (preprofessional health programs), or GENPV (General Undergraduate Studies Pre Vet), until they choose a major or transfer to a professional school. All students, whether they have selected a major or not, are encouraged to identify their interest in a professional career by designating it on their application.

Information about preprofessional program admissions requirements and career opportunities in human health or law may be obtained in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities may be obtained from the coordinator of the prevetary program in the Office of the Dean of the College of Veterinary Medicine.

Clinical Laboratory Science/Medical Technology

Clinical laboratory scientists, still commonly referred to as medical technologists, are important members of health-care teams. They perform the chemical, microscopic, radio-assay, and microbiological tests that are necessary in disease diagnosis, and they type and cross-match blood samples to facilitate blood transfusions. They usually work under the supervision of a physician in a hospital or clinic laboratory, but may also be employed by a pharmaceutical company or by manufacturers of analytical instruments. The professional training requires 12 months in a hospital-based CLS/MT program following at least 3 years of college study that emphasizes chemistry and the biological sciences. Students may earn a bachelor’s degree in specific ISU majors, by completing the admissions requirements of the CLS/MT program and most of the degree requirements in 3 years on campus, then spending their fourth year in one of the hospital programs that are affiliated with Iowa State University. Before beginning the off-campus studies, students must earn at least 88 credits; the 32 most recent credits must have been earned in residence at ISU. A maximum of 32 semester credits earned in pro-fessional CLS/MT school can be used to partially fulfill the requirements for the bachelor’s degree. Students who complete all degree requirements in residence at the university may apply to any school of medical technology for which the admission requirements have been met.

The following CLS/MT program is affiliated with Iowa State University:

St. Luke’s Methodist Hospital, Cedar Rapids, Iowa. Program Director: Carol Collingsworth. Medical Director: Lileah Harris, MD

Dentistry

Dentists diagnose, treat, and try to prevent diseases and injuries of the teeth, jaws, and mouth. Usually a general practitioner will have spent 3 or 4 years taking preprofessional courses at the undergraduate level and 4 years in dental school earning the degree of doctor of dental surgery (D.D.S.) or doctor of dental medicine (D.M.D.). Learning a specialty requires at least 2 more years. The courses necessary for admission to most dental schools include English, biology, general and organic chemistry, and physics. Students may earn a degree in any major that Iowa State University offers as they meet the admission requirements; they should choose their major to reflect their own interests and abilities. Highly qualified students may be accepted into dental school after 3 years of preprofessional study without earning a baccalaureate degree.

Health Information Management

Health information managers serve as supervisors of medical records departments in hospitals, clinics, nursing homes, and other healthcare institutions. Certified registered record administrators (R.R.A.) must have completed a program leading to a bachelor’s degree in medical record administration. Most professional programs are 2 years in length and follow 2 years of college study in chemistry, biology, the humanities, social sciences, languages, and philosophy. Students may take the preprofessional courses at Iowa State University and then transfer to a university offering the professional program or they may earn a bachelor’s degree at Iowa State University before entering a health information management program.

Hospital and Health Administration

Administrators of health care organizations manage and guide the varied activities in hospitals, clinics, nursing homes, and mental health facilities. The professional requirement may be for a master’s degree or a bachelor’s degree, depending upon the size of the institution and whether an upper or middle entry-level position is desired. Students at Iowa State may take general education courses for two or more years and then transfer to a university offering a bachelor’s degree in health administration, or they may spend four years earning a bachelor’s degree in any department before entering a master’s degree program at the University of Iowa or other university. Courses required for admission to master’s degree programs in hospital and health administration vary, but may include introductory accounting, management, statistics, and economics.

Human Medicine

Physicians study, diagnoses, and treat illness and injury. They may work in offices, clinics, hospitals, or laboratories, in private practice or for government or industry. Their professional training usually consists of 4 years of study in a college of medicine to earn the doctor of medicine (M.D.) degree, and then 3 or more years in hospital residency learning a specialty such as family medicine, pediatrics, surgery, obstetrics, or psychiatry. A degree of doctor of osteopathy (D.O.) is awarded to those students who complete 4 years in a college of osteopathic medicine before their residency. All medical schools recommend a broad preprofessional education that includes courses in biology, chemistry, physics, mathematics, English, the social sciences, arts, and humanities. The degree of a premedical student can be from any college and in any curriculum or major offered by the university. The major should reflect the student’s interests and provide appropriate preparation for an alternative career.

Law

An attorney offers assistance, often where a third-party neutral arbiter is required to resolve conflicts. Many attorneys work in private practice, but others secure positions in the public sector, e.g., federal or state governmental agencies. A minimum of three years from an American Bar Approved (ABA) law school is required to earn a Doctor of Jurisprudence (J.D.) degree. A bachelor’s degree is required for admission to all accredited law schools. A student planning to enter law school may pursue an undergraduate degree in any discipline. The
choice of the bachelor’s degree should reflect a student’s passion and personal interests and not be perceived as being the best degree to help them be admitted into law school. Appropriate courses should be completed that will enhance a student’s development of critical thinking skills, including analytical written and oral skills. An understanding of business, social sciences, and humanities is necessary to comprehend the pluralistic society within and outside of the United States. These courses should include accounting, management, political science, psychology, criminal justice, economics, philosophy, English literature, and history. The completion of these courses will provide students with a knowledge base and skill sets that will assist them with their preparation for law school. Courses in mathematics and statistics are also helpful in developing analytical skills. Advanced writing courses and speech communication courses will also serve students well.

Library and Information Science

Librarians and information science specialists select, organize, preserve and promote information resources as well as advocate and teach information literacy skills. Professional opportunities include work for libraries in academic institutions, public education, city and county municipalities, medical facilities, government agencies, and corporate settings. They also have work opportunities in the publishing and information technology professions. Master’s degree programs in library and information science provide the professional preparation. Iowa State students may earn a bachelor’s degree in any department before entering a professional master’s degree program. They may choose majors that reflect their interests and provide a foundation for working in the library and information science field.

Occupational Therapy

Occupational therapists provide purposeful activities to help those who have been disabled by physical illness or injury, birth defects, emotional disorder, aging, drug abuse, or other problems to learn to cope with everyday living. Therapists treat patients in hospitals, school systems, and rehabilitation centers. Students may complete a bachelor’s degree in any major at Iowa State University, and then enter a master’s or doctoral degree program at another university.

Optometry

Optometrists examine, diagnose, treat and manage diseases of the visual system, the eye and associated structures. Treatment may include corrective glasses or contacts, vision therapy and therapeutic drugs. Optometrists usually set up their own offices or work in group practice. Professional study requires 4 years in a school or college of optometry and leads to the doctor of optometry (O.D.) degree. All optometry schools require at least 90 semester credits of preprofessional courses, including biology, chemistry, physics, mathematics, and English. Certain optometry schools require a bachelor’s degree. Students wishing to earn the bachelor’s degree from Iowa State University may choose any major and take the courses required for graduation with that major as they take the courses required for admission to a professional optometry program.

Pharmacy

Pharmacists prepare and dispense therapeutic drugs; educate health care professionals, patients and the general public about the appropriate use of drugs; conduct pharmaceutical research and work in industrial settings which involve the manufacture, marketing and advertising of pharmaceutical. Students may complete prepharmacy courses at Iowa State University. Many schools do not require a bachelor’s degree for admission, however most students complete at least 3 years of college before admission to pharmacy schools. Upon admission, the student will then transfer to a Pharm. D. program of study which will entail four years of study.

Physical Therapy

Physical therapists work with people who have been disabled by injury, illness, or birth defects. They assist in evaluating the physical problems and administer therapeutic agents such as massage and exercise, heat, baths, ultrasonics, and electricity; they work in hospitals, clinics, nursing homes, schools, rehabilitation centers, and private practice. Usually, students earn a bachelor’s degree at ISU before entering professional school to earn a doctoral degree. The bachelor’s degree from ISU may be earned in any department, provided that the physical therapy prerequisites are completed. Courses required for admission to a professional program include biology, chemistry, physics, psychology, mathematics, and statistics.

Physician Assistant

A physician assistant provides medical services under the supervision of a licensed physician. PAs conduct physical examinations, order and interpret laboratory tests, make diagnostic and treatment decisions, and are allowed to prescribe medication in most states. Certification as a physician assistant requires at least 2 years in a professional program at the master’s degree level. Applicants must have had health-care experience with direct patient contact experience. Students must have earned a bachelor’s degree before entering a PA program. The degree can be in any area but the student must complete the pre-requisite courses for the PA program. These usually include courses in biology, chemistry, psychology, and statistics.

Podiatry

Podiatrists diagnose, and treat diseases and disorders of the human foot and ankle. They treat patients in private and group practice, hospitals, and, increasingly, in industrial and sports-related positions. Professional training requires 4 years in a college of podiatric medicine and leads to the degree of doctor of podiatric medicine (D.P.M.). This is usually followed by 1 to 3 years in a hospital residency. All podiatric colleges require at least 3 years of preprofessional study, including courses in biology, general and organic chemistry, physics, and English. Most entrants have a bachelor’s degree, which may be in any major. A few students may complete the admission requirements and most of the bachelor’s degree requirements in 3 years. If so, a maximum of 32 semester credits may be transferred to Iowa State University from the first year in an accredited podiatric college in order to complete the requirements for the bachelor’s degree.

Theology or Religious Studies

The professional education of a student of religion can follow one of two paths. The path to a profession as a pastor, priest, rabbi or other leadership position in a religious tradition usually requires 3 years in a program leading to the master of divinity (M.Div.) offered at a school of divinity or of theology. The path to a profession as a teacher of religious studies at the college level requires 4-7 years in a program leading to the Ph.D. at a graduate school of Religious Studies. Both seminars and graduate schools require a bachelor’s degree for admission. The American Association of Theological Schools recommends the following areas of study as the best preparation for theological studies: English language and literature; history, including non-Western culture; philosophy; natural sciences, social sciences, especially psychology, sociology and anthropology; the fine arts; Biblical and modern languages; and religion, both Western and Eastern. Although students in a variety of major fields may qualify for admission to a theological school, interested persons are advised to review their proposed programs with a representative of the Religious Studies Program in the Department of Philosophy and Religious Studies.

Veterinary Medicine

About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinary practice may also choose public and corporate practice (e.g., public health, education, research, food safety, industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine).

The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.). Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Veterinary Medicine, Admission Requirements; for most recent information, consult the College of Veterinary Medicine Web site: www.vetmed.iastate.edu.)

Students may pursue their pre-veterinary preparation in any college at Iowa State University. A major (pre-veterinary medicine is not a major) should be selected that is allied to each student’s vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor’s degree; the most effective progress toward a bachelor’s degree is made when the major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the pre-veterinary program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill pre-veterinary course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning,
the opportunity for a student to earn the bachelor’s degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.
Plan of Study-4 year plans

Four Year Graduation Program

Iowa State University’s Soar in 4: Four-Year Graduation Program provides the opportunity for students to take a proactive approach towards completing their undergraduate degree in four years (or eight semesters). Through careful planning with their academic advisers, students can complete their undergraduate degree with experiences such as study abroad, internship, and service learning. By graduating in four years, students can reduce their tuition costs and accelerate their entry into the job market or advanced education compared to students who take more than eight semesters to graduate. The program encourages students to work collaboratively with their academic adviser to make strategic academic decisions about which courses to take each semester.

Students participating in the Soar in 4: Four-Year Graduation Program are expected to:

- Keep in close contact with their Iowa State academic adviser, who will guide students’ academic decisions and keep students up-to-date with university policies and procedures.
- Take required courses at the times they are available.
- Maintain student registration at ISU during off-campus experiences.
- Register for classes promptly and monitor academic progress on a regular basis by reviewing the degree audit and with his/her adviser.

Iowa State University will provide the academic advising services and degree-credit mechanisms to assist students in accurately monitoring progress toward graduation. ISU is also responsible for providing class space in the courses required for the student’s respective major in order to complete a bachelor’s degree within eight consecutive semesters.

Four-year (eight-semester) templates for ISU programs of study

Iowa State University offers over 100 majors in six undergraduate colleges. All but two programs, architecture and landscape architecture, may be completed in four years. ISU’s bachelor degree programs require from 120 to 143 credits; therefore, students must average between 15 and 18 credits per semester. To assist students in creating their own personal four-year academic plans, eight-semester templates are provided for all programs of studies covered by the Soar in 4 program.

To participate in the program

Students can sign up to participate in Soar in 4: Four-Year Graduation Program after consulting with their academic adviser either during orientation or their first-year at Iowa State. A student’s decision on whether to participate is often based on a variety of factors including academic preparation, academic interests, and outside of class commitments. Additional information and the Soar in 4 Four-Year Graduation Plan application form are available from:

http://www.provost.iastate.edu/what-we-do/undergrad-initiatives/soarin4

Agriculture and Life Sciences, 4 Year Plans

- Animal Science, B.S. - pre-veterinary medicine
- Agricultural and Life Sciences Education, B.S. - communications option
- Agricultural and Life Sciences Education, B.S. - teacher certification option
- Agricultural Biochemistry, B.S. - option 1
- Agricultural Biochemistry, B.S. - option 2
- Agricultural Business, B.S.
- Agricultural Studies, B.S.
- Agricultural Systems Technology, B.S. - Agricultural and biosystems management option
- Agricultural Systems Technology, B.S. - machine systems option
- Agronomy, B.S.
- Animal Ecology, B.S. - fisheries and aquatic sciences
- Animal Ecology, B.S. - interpretation of natural resources option
- Animal Ecology, B.S. - Pre-vet wildlife care option
- Animal Ecology, B.S. - wildlife option
- Animal Science, B.S. - general
- Biology, B.S., College of Agriculture and Life Sciences
- Culinary Science, B.S.
- Dairy Science, B.S. - general
- Dairy Science, B.S. - pre-veterinary medicine option
- Diet and Exercise, B.S./M.S., College of Agriculture and Life Sciences
- Dietetics, B.S., College of Agriculture and Life Sciences

- Food Science, B.S. - consumer food science option
- Food Science, B.S. - Food Science and industry option
- Food Science, B.S. - Food Science and technology option
- Forestry, B.S. - forest ecosystem management option
- Genetics, B.S.
- Global Resource Systems, B.S.
- Horticulture, B.S. - horticulture food crop production and management option
- Horticulture, B.S. - landscape design, installation, and management
- Horticulture, B.S. - public horticulture option
- Horticulture, B.S. - science option
- Horticulture, B.S. - turfgrass management option
- Horticulture, B.S. ornamental plant production and garden center and management option
- Industrial Technology, B.S. - manufacturing option
- Industrial Technology, B.S. - occupational safety option
- Microbiology, B.S.
- Nutritional Science, B.S. - nutritional and wellness option
- Nutritional Science, B.S. - pre-health professional research option
- Public Service and Administration in Agriculture, B.S.

Business, Plan of Study

- Accounting, B.S.
- Business Economics, B.S.
- Finance, B.S.
- Management, B.S.
- Management Information Systems, B.S.
- Marketing, B.S.
- Supply Chain Management, B.S.

Design, Plan of Study

- Architecture, B.Arch.
- Art and Design, B.A., Art and Culture Concentration
- Art and Design, B.A., Visual Culture Studies Concentration
- Community and Regional Planning, B.S.
- Design, B.Design
- Graphic Design, B.F.A.
- Industrial Design, Bachelor of
- Integrated Studio Arts, B.F.A.
- Interior Design, B.F.A.
- Landscape Architecture, B.L.A.

Engineering, Plan of Study

- Aerospace Engineering, B.S.
- Agricultural Engineering, B.S. - ag power and machinery option
- Agricultural Engineering, B.S. - animal production systems engineering option
- Agricultural Engineering, B.S. - land and water resources engineering option
- Biological Systems Engineering, B.S. - bioenvironmental engnr option
- Biological Systems Engineering, B.S. - biorenewable resources engnr option
- Biological Systems Engineering, B.S. - Pre-prof. and pre-graduate Option
- Biological Systems Engineering, B.S. Food Engineering Option
- Chemical Engineering, B.S.
- Civil Engineering, B.S. - environmental specialization
- Civil Engineering, B.S. - GENERAL Program
- Computer Engineering, B.S.
- Construction Engineering, B.S. building emphasis
• Construction Engineering, B.S. electrical emphasis
• Construction Engineering, B.S. heavy/highway emphasis
• Construction Engineering, B.S. mechanical emphasis
• Electrical Engineering, B.S.
• Industrial Engineering, B.S.
• Materials Engineering, B.S.
• Mechanical Engineering, B.S.
• Software Engineering, B.S.

Human Sciences, Plan of Study

• Family and Consumer Sciences Education and Studies, B.S.-teacher licensure option
• Family Finance, Housing, and Policy, B.S.-financial counseling emphasis
• Food Science, B.S. - food science technology option
• Apparel Merchandising, Design B.S. - creative design option
• Apparel Merchandising, Design B.S. - merchandising option
• Apparel Merchandising, Design B.S. - production development option
• Apparel Merchandising, Design B.S. - production sourcing option
• Apparel Merchandising, Design B.S. - technical design option
• Athletic Training
• Child, Adult, and Family Services, B.S.-adult and family program option
• Child, Adult, and Family Services, B.S.-child program option
• Child, Adult, and Family Services, B.S.-youth program option
• Culinary Science, B.S.
• Diet and Exercise, B.S./M.S., College of Human Sciences
• Dietetics, B.S., College of Human Sciences
• Early Childhood Education, B.S.
• Elementary Education, B.S.
• Event Management, B.S.
• Family and Consumer Sciences Education and Studies, B.S.-communications option
• Family and Consumer Sciences Education and Studies, B.S.-professional studies option
• Family Finance, Housing and Policy, B.S.-family finances and housing studies emphasis
• Family Finance, Housing and policy, B.S.-financial planning emphasis
• Food Science, B.S. - Consumer food science option
• Food Science, B.S. - food science industry option
• Hospitality Management, B.S.
• Kinesiology and Health, B.S. - athletic training
• Kinesiology and Health, B.S. - community/public health
• Kinesiology and Health, B.S. - exercise science
• Kinesiology and Health, B.S. - physical education for teacher education
• Kinesiology and Health, B.S. - pre-health - pre-chiropractic
• Kinesiology and Health, B.S. - pre-health - pre-medicine
• Kinesiology and Health, B.S. - pre-health - pre-physical therapy
• Kinesiology and Health, B.S. - pre-health - pre-physical assistant
• Nutritional Science, B.S. - Nutrition wellness option
• Nutritional Science, B.S. - Pre-health professional research option

Liberal Arts and Sciences

• Advertising, B.A.

• Women’s Studies, B.A., B.S. (1)
• World Languages and Cultures B.A-French/German/Spanish

Information About Courses

Course Numbers
The courses in each department are numbered from 1 to 699, according to the following groups:

• 1-99 Courses not carrying credit toward a degree (zero credit).
• 100-299 Courses primarily for freshman and sophomore students.
• 300-499 Courses primarily for junior and senior students.
• 500-599 Courses primarily for graduate students, but open to qualified undergraduates.
• 600-699 Courses for graduate students.

Credits and Contact Hours
The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture or recitation per week for the entire semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes.

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number
of lecture or recitation class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures and recitations. For example, COM S 227 Introduction to Object-oriented Programming is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

The term “Cr. arr.” means that the amount of credit is arranged in advance between the student and the instructor. The credit to be earned depends on the amount of work expected of the student, in accordance with the policy that some combination of teacher-student contact and outside work by the student involving at least three hours per week for the semester is required for each credit.

The term “Cr. R.” means that the course is required in a certain curriculum or as a co-requisite to one or more other courses. It is also used for cooperative education courses and for some optional inspection trips, study tours, and professional development courses for which numerical credit is not granted. An R credit course does not carry numerical credit toward a student’s degree, but it does apply toward the degree. The R credit course is generally listed on the degree program as a requirement for a specific curriculum/major that must be completed prior to graduation. R credit courses may be graded using the A-F grading scale or the satisfactory/fail grading scale. All R credit courses are assigned a numerical value for purposes of enrollment certification. Requests by students to drop an R credit course will be processed as an administrative drop during period 2 and thus will not be counted against the student’s drop limit and will not appear on the student’s transcript. (See Index, Schedule Changes.)

Semester of Offering

Within each course description may be found one or more of the following letters: F, S, SS, indicating which term—fall, spring, summer session—of the academic year the course is offered. “Alt.” is the abbreviation for alternate. If there is sufficient demand, courses may be offered more frequently than announced. Insufficient demand or unforeseen staffing problems may result in the cancellation of announced offerings. Students are advised to refer to the Schedule of Classes or consult with departments for up-to-date course schedule information.

Course Prerequisite

A prerequisite indicates the specific academic background or general academic maturity considered necessary for the student to be ready to undertake the course. Prerequisites are usually stated in terms of specific courses, but equivalent preparation is usually acceptable. An instructor may, however, direct a student whose background does not meet the stated prerequisite, or its equivalent, to drop the course. Conversely, an instructor may waive the prerequisite for a course for which he or she is responsible. Thus, permission of the instructor is understood to be an alternate to the stated prerequisites in all courses.

It is university policy that the instructor shall inform the students at the beginning of each course if students who have not met the prerequisite requirements must drop the course. Course prerequisites are listed in the Schedule of Classes as well as in the Courses and Programs section of this publication.

Cross-listed Courses

A course, including its complete description, may be listed in two or more departments. The participating department or departments are noted in parentheses. Credit for the course may be obtained through any of the cross-listed departments.

Dual-listed Courses

Dual-listed courses permit undergraduate and graduate students to be in the same class while receiving credit for either undergraduate or graduate level work.

Credit in the graduate course is not available to students who have received credit in the corresponding undergraduate course. Both graduates and undergraduates receive the same amount of credit for the course, but additional work is required of all graduate students taking the course under the graduate-level course number. This extra work may take the form of additional reading, projects, examinations, or other assignments as determined by the instructor. The instructor must be a member of the Graduate Faculty or a Graduate Lecturer. Each dual-listed course is designated in the catalog with the phrase “Dual-listed with,” although the student’s official transcript of credits, both graduate and undergraduate, does not identify dual-listed courses as such. There is a limit to the number of dual-listed course credits that may be used to meet the requirement for an advanced degree. (For information about procedures for requesting permission to offer dual-listed courses, faculty should consult the Graduate Faculty Handbook.)

Off-campus courses-Residential Credit

Iowa State University faculty teach distance learning courses online, by video conferencing, streaming media, and CD/DVD. Courses are the same as those offered on campus, carry residential credit, and are taught by Iowa State faculty. Credit earned becomes a part of the academic record at Iowa State University and may be used to meet degree requirements the same as credit earned on campus.

Priority Enrollment

High demand for courses in certain areas has necessitated enrollment management for some courses. When enrollment priority is established for a course, first consideration is given to students whose curriculum/major explicitly requires the course.

Special Course Fees

Courses for which special course fees are assessed are designated in the Schedule of Classes. Special course fees may be assessed for such extraordinary costs as materials fees (which may include consumable materials or equipment replacement), field trip expenses, developmental Math fees, and camp fees. In some cases, special course fee amounts vary from term to term. Additional information on camp fees and the developmental Math fee may be found in the fees and expenses section. See Index, Fees.

Graduate Programs

Graduate Major

A major in the Graduate College is the area of academic professional concentration, approved by the Board of Regents, in which the student chooses to qualify for the award of a graduate degree.

Graduate Area of Specialization

Areas of specialization are indicated in the graduate statements of some departments. This is a subdivision of a major in which a strong graduate-level program is available. When approved by the Graduate College, such areas of specialization are shown parenthetically after the major on official records, including transcripts and thesis/dissertation title pages.
Distance Education

Online and Distance Learning

www.distance.iastate.edu

Iowa State University remains true to the land-grant tradition of extending knowledge far beyond campus borders. Faculty members provide cutting-edge information that helps people continue to learn and meet the demands of careers and society. Annually thousands of students enroll in Iowa State courses without setting foot in Ames. In addition to the traditional method of instructors traveling to classrooms off campus, Iowa State University faculty teach distance learning courses online, by video conferencing, streaming media, and CD/DVD.

Courses are the same as those offered on campus, carry residential credit, and are taught by Iowa State faculty. Credit earned becomes a part of the academic record at Iowa State University and may be used to meet degree requirements the same as credit earned on campus. In addition, distance education staff provide leadership in helping faculty identify the needs of Iowans and methods to reach adult learners. They also help student’s access services and information at the university.

For a complete list of available degrees and programs visit http://www.distance.iastate.edu/programs. Information on registering for distance education courses is available at http://www.distance.iastate.edu/apply-enroll or from the Office of Registrar at 515-294-1889 (8am-4:30pm CT).

Registration Services

www.cpm.iastate.edu/event

Registration Services supports Iowa State University’s outreach mission and to facilitate access to excellence in education for a diverse community of adult learners within Iowa and beyond by utilizing technologies that expand access. Registration Services offers both Continuing Education Units (CEUs) and non-CEU courses, workshops, conferences and other educational activities sponsored by Iowa State University. While these programs do not carry academic credit, they are designed to ensure that a student’s continuing education and professional needs are met.

For a list of courses and programs, visit www.cpm.iastate.edu/event or call (515) 294-6222.
Financial Aid

The Office of Student Financial Aid helps families afford Iowa State University. Grants, scholarships, loans, and part-time employment opportunities are available to assist students and families in meeting their college expenses. Eligibility for financial aid is determined by the Free Application for Federal Student Aid (FAFSA). Students can apply online at www.fafsa.gov beginning January 1 for the coming academic year. Students should submit the FAFSA before to March 1 to receive consideration for most grants and scholarships. A new application must be completed each academic year.

The priority deadline for financial aid is March 1. Students who apply after this date will be considered for the Federal Pell Grant and student loans. New students enrolling spring semester or summer session should complete the current year’s aid application to apply for any available financial aid.

To be eligible for most financial aid programs, a student must be a U.S. citizen or permanent resident, enrolled at least half-time, and making satisfactory academic progress toward a degree.

Students may use their financial aid for study in other countries if they have clearance for the transfer of credit to their degree programs and have made financial aid arrangements prior to departure. For further information, contact the Study Abroad Center, 3224 Memorial Union, or the Office of Student Financial Aid, 0210 Beardshear Hall.

There are three general types of financial aid programs: gift aid (scholarships and grants), loans, and part-time employment. Laws, regulations, and policies governing these programs are subject to change.

I. Gift Aid

A. Scholarships

1. ISU Scholarships. Scholarships are awarded on the basis of achievement, although many also require demonstrated financial need. Find out more about scholarships at www.financialaid.iastate.edu/scholarships.

2. Military Officer Education (ROTC) Scholarships:
   - Army. The Military Science Department offers 2-, 3-, and 4-year Army ROTC scholarships to qualified students on a competitive basis in virtually any academic discipline. These scholarships provide monies for tuition, all required fees (except student health), books and supplies allowance, and a monthly cash subsistence allowance. For applications or additional information, contact the Military Science Department at 132 Armory or call 515-294-1852.
   - Navy. The Naval Science Department offers several scholarship programs to qualified students. The scholarships cover payment of tuition, fees, books, and a monthly stipend. Information is available from the Naval Science Department, 3 Armory, or by calling 515-294-6050.

   Air Force. The Air Force offers Air Force ROTC scholarships for periods of 2, 3, or 4 years, with up to 1 additional year for qualified applicants in selected majors. The scholarships provide payment of tuition and fees. In addition, scholarship cadets receive between $250-$400 monthly subsistence allowance and $510 per year book allowance. Express scholarships are also available to students qualified in certain technical academic majors. Details on scholarship qualification, application procedures, and eligibility are available from the Department of Air Force Aerospace Studies, 515-294-1716.

3. Other Scholarship Sources: Students are encouraged to pursue scholarship opportunities from outside agencies and private organizations. Check the financial aid web site for current postings and additional resources.

B. Grants

1. Federal Pell Grant. This federal grant is for undergraduates working toward their first bachelor’s degree. The amount of Pell Grant is based on the Estimated Family Contribution (EFC) using a federal calculation from the data supplied on the FAFSA application. Students may receive Pell Grants up to 100% of cost of attendance. For example, a student enrolled full-time in fall and spring semester will use 100% Pell for a given aid year.

2. Federal Supplemental Educational Opportunity Grant. This federal grant is for undergraduates working toward their first bachelor’s degree and is awarded to high-need students who also qualify for the Pell Grant. Students who file their FAFSA prior to March 1 are considered for this award.

3. ISU Grant. This university grant is for undergraduate students who show financial need. The FAFSA must be filed prior to March 1 to be considered for this award.

4. Officer Education (ROTC) Financial Assistance Grants. All students enrolled in Advanced ROTC (third and fourth years) in the Army, Navy, and Air Force programs are provided a monthly stipend. For further information, contact the appropriate ROTC department in the Armony.

5. Tuition Assistance Grant for Undergraduate International Students. Undergraduate international students who have been at Iowa State University for at least a year and are faced with financial hardship resulting from unforeseen circumstances may apply for this grant. Apply via the International Students and Scholars web site (www.isso.iastate.edu).

6. International Student Financial Aid. International students raise money through cross-cultural activities toward a scholarship fund. These monies will be used to assist international students who have unforeseen financial emergencies. For further information, contact the International Student Council at www.stuorg.iastate.edu/isic.

II. Loans

A. William D. Ford Federal Direct Loan Program. These student loans are obtained through the U.S. Department of Education by filing the FAFSA.

1. Federal Direct Subsidized Loan. This federal student loan is for undergraduate students only. The interest on this need-based loan is paid by the federal government as long as the student remains in school at least half-time. Borrower repayment begins six months after graduation or less than half-time enrollment. Interest charges begin accruing after graduation or less than half-time enrollment. Interest is based on the 10-Year Treasury Note Index as of June 30 prior to the aid year in question plus 2.05%, not to exceed 8.25%. New Direct Stafford Loan borrowers as of July 1, 2013, may only borrow up to 150% of their published program length. For example, a student enrolled in a program with a length of 4 years may receive Subsidized Stafford Loans for up to 6 years.

2. Federal Direct Unsubsidized Stafford Loan. The interest on this non-need based loan is charged to the borrower from the time the loan is disbursed until paid in full. Interest may be paid while you are in school or added to the principal balance of the loan. Borrower repayment begins six months after graduation or less than half-time enrollment. Undergraduate interest is based on the 10-Year Treasury Note Index as of June 30 prior to the aid year in question plus 2.05%, not to exceed 8.25%. Graduate interest based on the 10-Year Treasury Note Index as of June 30 prior to the aid year in question plus 3.60%, not to exceed 9.50%.

B. Federal Perkins Loan Program. The interest on this need-based loan is paid by the federal government as long as the student remains in school at least half-time. Borrower repayment begins nine months after graduation or less than half-time enrollment. The interest rate is fixed at 5 percent.

C. Federal Health Professions Loans. This student loan is limited to students enrolled in the College of Veterinary Medicine. The FAFSA must be filed by March 1 to be considered for this loan, and parental information must be provided, regardless of age or dependency of the student. The interest rate is fixed at 5 percent, and interest does not accrue while the student is enrolled full-time. Borrower repayment begins twelve months after graduation or less than half-time enrollment.

D. Federal Direct PLUS (Parent Loan for Undergraduate Students). This loan is for parents of a dependent student and the loan is subject to credit analysis. A parent may borrow up to the cost of attendance less any other financial aid. Interest is based on the 10-Year Treasury Note Index as of June 30 prior to the aid year in question plus 4.60%, not to exceed 10.50%. Interest on this loan is charged to the borrower from the time the loan is disbursed until paid in full. Borrower repayment begins 60 days after the loan has been disbursed in full unless the parent requests a deferment after the student graduates. This loan is not need-based, and requires filing the FAFSA.

E. Federal Direct PLUS Loan for Graduate & Professional Students ( Vet Med). This loan is for Graduate and Professional Students (such as Vet Med students) and is subject to credit analysis. Students may borrow up to the cost of attendance less any other financial aid. Grad PLUS - Interest is based on the 10-Year Treasury Note Index as of June 30 prior to the aid year in question plus 4.60%, not to exceed 10.50%. Interest on this loan is charged to the borrower from the time the loan is disbursed until paid in full. Borrower repayment can be deferred as long as the student is enrolled at least half-time.

F. Private Loan Options. Private loans supplement the federal loan programs and are subject to credit analysis. These loan programs do not require filing the FAFSA.

III. Part-time Employment

There are many part-time employment opportunities available for students, both on campus and off campus. Students who secure part-time jobs gain valuable
Financial Aid

experience to aid in job placement after graduation. Part-time employment can also help reduce loan indebtedness.

A. Federal College Work-Study. Work-study positions provide hourly employment for students with financial need, as determined by filing the FAFSA. Students with work-study eligibility are able to view work-study positions on the Student Job Board on AccessPLUS.

B. Other Part-Time Employment. The Student Job Board on AccessPLUS lists positions which do not require filing the FAFSA. All students can view these listings for current job openings.

IV. Other Financial Aid

Many other forms of financial aid are available to students who qualify, including Vocational Rehabilitation, Veterans Benefits, and Department of Human Services programs. For further information on these programs, contact the appropriate government office.
Housing & Dining

Department of Residence (DOR)
- Pete Englin, Director
- Rachel Wagner, Associate Director for Residence Life
- Roger Graden, Associate Director for Facilities Operations
- Lynn Larsen, Assistant Director for Business Operations
- Lisa Ludovico, Assistant Director for Administrative Services

ISU Dining
- Nancy Levandowski, Director
- Jill Arroyo, Associate Director for Residential Dining
- Jamie Lenz, Assistant Director for Food Stores / Vending
- Kristi Patel, Assistant Director for Retail Operations
- TBD, Business Manager
- Jeffrey Miller, Catering Manager
- TBD, Executive Chef

The university provides housing for over 11,000 students in University owned on-campus residence halls and on-campus apartments, as well as University operated off-campus apartments. Housing is available for undergraduate and graduate students; single students and families. Questions concerning on-campus housing and dining should be directed to the DOR Administrative Services Office:
- 2419 Friley Hall, Iowa State University, Ames, Iowa 50012
- E-mail: housing@iastate.edu
- Phone: (515) 294-2900.
- Additional information may be obtained at http://housing.iastate.edu/.

Contracts and Rates

Once admitted, all ISU students are eligible to submit a housing contract on-line using AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp). Housing priority for new students is based upon the date the completed contract is received in the DOR Administrative Services Office.

Academic Year (fall and spring). Spring only, and Summer only contracts are available. While fall only contracts are not offered, housing and dining contracts are "academically friendly." Students who leave the University as the result of graduation, withdrawal, dismissal, or participation in a University approved study-abroad, internship, co-op, or student teaching program may cancel their contract without penalty.

For reasons other than those listed, students who cancel their contract after the cancellation deadline (March 1 for current ISU students, May 1 for newly admitted ISU students) will receive a cancellation penalty equal to 80% of the remaining value of their entire contract, both housing and dining. For additional information, students should contact the Administrative Services Office.

For a complete listing of rates, please visit the following web sites:
- Housing Rates - http://housing.iastate.edu/data/rates
- Dining Rates - http://dining.iastate.edu/rates

Residence Halls

The residence halls are organized geographically into neighborhoods:
- Buchanan Hall
- Richardson Court
- Union Drive
- Wallace-Wilson
- Richardson Court

With the exception of Buchanan, Eaton, and Martin halls, all residence halls are "traditional style" meaning most residents live in double occupancy rooms and share a common, hallway bathroom. A limited number of triple and single occupancy rooms are also available. Buchanan, Eaton and Martin halls offer a "suite-style" set-up with two rooms joined by a private bathroom. Typical residence hall furnishings include:
- Bedroom - one resident
- Bed frame and mattress - extra long twin (36" x 80""). Beds may be lofted, bunked or "on the floor." Refer to the DOR web site for specific hall details.
- Desk and chair
- Wardrobe / Closet
- Wastebasket
- One per room
- Dresser (only in rooms without wardrobes)
- Shower curtain (suite rooms only)
- Window drapes / blinds
- Micro fridge (Wallace & Wilson only)
- Students may prefer single-gender or coed houses. Coed houses have male and female students living at opposite ends or on separate levels of the house. They have separate bathrooms, but share common area space and house activities. Single gender building options are also available.

Of the 19 residence halls on the ISU campus, only seven are air-conditioned. As such, the vast majority of new students are assigned to non-air-conditioned housing. In buildings that are air-conditioned, due to the relatively mild temperatures in Ames, air-conditioning is typically only turned on through the first four weeks of fall classes and the last two weeks of spring classes. In times of high heat, there are air-conditioned common area spaces available in each building.

Additional services include house dens for informal gatherings and relaxation; lounge areas for meeting and entertaining guests; vending areas for snacks; hall desks with recreation/entertainment items, recreational equipment, and mail delivery; laundry facilities; study areas; meeting rooms and offices for student organizations; computer labs; and parking lots assigned to the residence halls.

Residence Hall Meal Plan Requirement - All residents of Buchanan Hall, Richardson Court or Union Drive are required to purchase one of five Semester meal plans. Wallace and Wilson residents are not required to purchase a meal plan. However, many residents in these areas opt to purchase some combination of meals and Dining Dollars so they can make purchases in one of the many Dining Centers, Cafes, Restaurants and C-Stores. For information about On-Campus Dining options, please see below.

Winter Break Housing - All Richardson Court and Union Drive residence halls close during Winter Break. Buchanan, Wallace, and Wilson halls remain open during Winter Break at no additional charge.

Residential Learning Communities (RLC) - Located throughout Richardson Court and Union Drive, RLCs are small groups of students who live together on designated houses or floors. Students share academic interests, classes, living spaces and develop friendships as part of an innovative program in cooperative learning. As such, most RLCs are limited to students in certain majors. Not all academic programs offer RLCs. Refer to the Learning Communities Website (http://www.lc.iastate.edu/) for more detailed information about learning communities including college contacts, mentor information, and research reports.

Theme Houses - Theme houses provide opportunities for students with common interests to live together and pursue those interests through organized programs and activities. Currently, the following Theme Houses are available: Air Force ROTC, Army ROTC and Cross Cultural. While there are no academic or major requirements, ROTC Theme Houses requires military affiliation and Cross Cultural Theme House requires residents to live with a roommate from a different country.

House Cabinets - The House System is one of Iowa State's great traditions. Houses of 40 to 60 residents elect a group of officers, called the Cabinet. The 135 House Cabinets take the lead in developing house policies and initiating house activities relevant to the needs and interests of house members.

Residence Hall and Apartment Community Councils - Each residence hall and apartment community has a student government, typically comprised of an executive board and representatives from each house/community. Councils fund and coordinate programs and committees that supplement the total social and educational development of the individual residents.

Inter Residence Hall Association - The Inter Residence Hall Association (IRHA) is composed of representatives from each hall, five Government of the Student Body (GSB) representatives, four at-large representatives, and an executive council. IRHA allocates funds and implements a variety of programs to meet the needs and requests of students in the residence hall system. In addition, IRHA acts as the voice of residence hall students to the university administrative personnel concerning policies, proposals, and regulations. IRHA meets weekly throughout the academic year. IRHA plans and sponsors Fall Fest, Residence Hall Week, the newspaper readership program, leadership conferences, and many other events/activities.

On-Campus Apartments

The on-campus apartments are divided into three communities which remain open year round:
the beginning of an academic year. Typically, they continue living there throughout

Men who join a fraternity with a facility may move directly into a fraternity house at

house is $3,700 per semester. This cost includes room, board and membership
den, laundry, and study area. The average cost of living in a fraternity or sorority

chapter facilities provide the same scholastic, service and social opportunities for

approximately 1,800 undergraduate students call home. The organizations without

in more than 55 chapters. 40 of these organizations have houses which

The Greek Community is comprised of over 3,550 undergraduate students

Fraternities and Sororities
The Greek Community is comprised of over 3,550 undergraduate students

in more than 55 chapters. 40 of these organizations have houses which

approximately 1,800 undergraduate students call home. The organizations without

chapter facilities provide the same scholastic, service and social opportunities for

their members. Greek Community houses are an excellent living option. These

houses are similar to that of a private residence and include a living room, kitchen, den, laundry, and study area. The average cost of living in a fraternity or sorority

house is $3,700 per semester. This cost includes room, board and membership
dues.

Men who join a fraternity with a facility may move directly into a fraternity house at

the beginning of an academic year. Typically, they continue living there throughout

their collegiate career. Women pledging a sorority through the formal recruitment

process generally live in the residence halls for the academic year and move into

the chapter during the second or third year of their membership.

The staff in the Office of Greek Affairs, a department in the Dean of Students

Office, provides advising, programs, and services for Greek organizations. Local

alumni work with each fraternity and sorority to ensure that the chapter structure

meets all the state and local building, safety, and fire codes that are required with

incorporation under the State Law of Iowa and City of Ames.

Off-Campus Student Housing
Off-campus housing information may be obtained through real estate agents, local

newspapers, or by contacting individual property managers / owners. Additionally,

the DOR has developed the following on-line resource to assist ISU students in

their search for off-campus housing: http://housing.iastate.edu/places/offcampus.

On-Campus Dining Options
ISU Dining has worked with students to develop a variety of convenient, flexible
dining options that fit with the ISU student lifestyle. ISU Dining Semester Meal

Plans, Meal Blocks and Dining Dollar$ (DD$) plans are available to students who

live both on and off campus.

On-Campus Apartment Meal Plan Requirement - Residents of Frederiksen

Court, UV, and SV are not required to purchase a meal plan. However many

residents in these areas opt to purchase some combination of meals and Dining

Dollar$ so they can make purchases in one of the many Dining Centers, Cafes,

Restaurants and C-Stores. For information about On-Campus Dining options,

please see below.

University Operated Off-Campus

Apartments
The DOR desires to provide a residential living experience for all ISU students

who wish to live in University provided housing. Due to increasing enrollment,

the demand for housing has exceeded the availability of existing on-campus

space. As such the University has entered into lease agreements with property

managers in the off-campus community. The leased spaces are solely occupied

by contracted ISU students and are completely managed and staffed by the DOR.

Students assigned to these locations will continue to receive the same student

centered, academically focused services and programs that are expected of the

on-campus housing experience at ISU. Staffing includes student Community

Advisers and live-in, professional Apartment Community Managers. All residents

are held to the same policies, procedures, and standards as residents in other

DOR housing. Apartments are fully furnished and rates, billed directly to student

Ubills, include all utilities.
Library

Undergraduate Study

A foundation of library instruction is the LIB 160 Information Literacy course, which is a requirement for undergraduate graduation. Library faculty also offer course-related instruction for undergraduate students in the effective use of library resources in all fields of study. Offered F.S.SS. For more information, call the Library at 294-3642.

Graduate Study

Library faculty offer course-related instruction for graduate students in the effective use of library resources. These sessions cover sources of information in all fields of study. Offered F.S.SS. For more information, call the Library at 294-3642.

Courses primarily for undergraduates:

LIB 160. Information Literacy.
(1-0) Cr. 1. F.S.SS. Prereq: For students whose native language is not English: Completion of ENGL 101 requirement.
Eight-week course required for undergraduate degree. Provides a solid understanding of information literacy and the research process with emphases on finding, evaluating, and using scholarly information; the ethical and legal framework related to information use; and utilization of library discovery tools. To be taken as early as possible in the student’s undergraduate career. See course descriptions of ENGL 150 and ENGL 250 for requirements related to LIB 160. Offered on a satisfactory-fail basis only.
Registration

Registration is a process by which students become officially enrolled in classes for a given term. The process involves consultation between the student and the student’s academic adviser. All undergraduate students are assigned an academic adviser based on their major/curriculum. A new adviser assignment is made when a student changes majors/curricula. See Index, Academic Advising.

Students who attend classes must complete registration and pay their assessed fees. Registration is not complete until all fees are paid, including board and room fees for those living in residence halls. See Index, Fees and Expenses.

Disabled students who need assistance with any phase of registration should contact Disability Resources. See Index, Disability Resources.

Dates and Deadlines

Dates for registration are published in the university calendar (http://www.registrar.iastate.edu/calendar/). Students are assigned a registration start date and time, which is the first day and time they can use the registration system. Registration start dates are assigned based on projected year in school classification (computed by combining total credits, current term credits, and current term test out credits). Then specific start dates within projected year in school are established by using the sum of total credits and current term test out credits.

Students may choose to delay their registration until a later date; however, courses will begin to fill on the first day of registration. Any delay in registration may reduce course selection options. A list of start dates by classification is available at http://www.registrar.iastate.edu/calendar/registration-start-dates.

Continuing students register for the following term during the middle of the current term. For example, registration for spring term begins the middle of fall term; registration for summer session is completed during the previous spring at the same time as registration for fall semester.

A late registration fee is assessed for registration initiated on or after the first day of classes for fall and spring terms. This fee is not charged for the summer term. If registration is not initiated by the end of the fifth day of classes, students must obtain written permission from their advisers, the instructors for the courses they plan to take, as well as approval from the dean of the college in which they are registered. During the summer session, these approvals must be obtained in order to register after the third day of classes.

Students may not enroll in courses with time conflicts without the approval of the instructors concerned.

Students who participate in off-campus experiences for which they receive Iowa State University credit must register for that credit during the term when the experience is taking place, whether or not they are taking courses on campus during that term.

Registration Responsibilities

The registration process includes advising, enrollment in courses, and schedule changes. In addition to the student, this process may involve the student’s adviser; the student services staff of the student’s college; and the dean of the college. Each is responsible for knowing and following the academic policies and procedures.

Student

• knowing and adhering to university policies and procedures that apply to registration and schedule changes
• checking the accuracy of his/her schedule on AccessPlus, including schedule adjustments (i.e., adds, drops, section changes)
• knowing the degree requirements of his or her major and/or curriculum
• planning course schedules to meet those requirements; and monitoring the accuracy of the degree audit.

Adviser

• consulting with advisees during the advising/registration period
• providing information about student’s major and curriculum requirements
• providing guidance in the student’s course selection
• assisting in monitoring the degree audit for accuracy
• notifying the college student services office with corrections to the degree audit.

College Student Services Staff

• assisting new and reentering students with the registration process
• resolving unusual scheduling problems
• updating the degree audit or solving problems concerning the degree audit.

Dean

• making decisions with respect to requests for deviations from university policies, deadlines, etc.

Students and staff should check with the college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Class Schedule Planner

The Class Schedule Planner is an application that allows students to plan their schedules using courses displayed in the Schedule of Classes. Students can select courses and sections they want to take for a particular term, as well as block out unavailable class days and times. Based on those selections, Class Schedule Planner can return all possible schedules to the student in a color coded grid format.

Though it is a Web-based application, the Class Schedule Planner does not require authentication (no user ID, PIN, or password). Therefore, it is essential that students understand this is a planner and as such, it does not register them in courses and cannot be used to complete their registration. The application requires that the user have Java on their computer. The first screen of the Planner provides information about how to use the planner and simple instructions for downloading the Java application. A useful Help link also has been provided. The Class Schedule Planner is available at http://planner.iastate.edu.

Using AccessPlus Registration

Students enter the system via AccessPlus by using university ID and password. A registration access number (RAN) also is needed, if required by their college.

The registration system provides messages after each entry indicating whether each request has been processed. Students also may review their current schedules at any time during registration. Students are held accountable for all changes made to their schedules.

All students are encouraged to register for courses through the AccessPlus registration system. However, students who are unable to use the system may register in person by processing their signed Registration Worksheet in the Registrar’s Student Scheduling Office, 10 Enrollment Services Center.

Registration System Abuse

Using the AccessPlus registration system is a privilege, which may be revoked if abuse is detected. Abuse includes, but is not limited to, creating and using an automated program to search for course openings and/or enrolling in a section with the intent of reserving space in that particular section for another student. The Office of the Registrar, college office, and/or advisers have the right to determine abuse and revoke privileges for any type of registration system abuse.

Course Information

Prerequisite. A prerequisite indicates the specific academic background or general academic maturity considered necessary by the faculty for the student to be ready for maximum success in the course. For more information, see Information About Courses (http://catalog.iastate.edu/informationaboutcourses), Course Prerequisite.

Permission Required courses/sections. To register for these sections, students must obtain authorization on a Request for Schedule Change or Restriction Waiver form and process the approved form in the Registrar’s Student Scheduling Office, 10 Enrollment Services Center.

Restricted courses/sections. Some courses or sections are restricted to students who meet specified criteria including curriculum/major, college, and/or year in school. In addition, some sections may be restricted to new students to ensure that sufficient spaces are available when new students register during summer orientation. A department may waive a restriction for a student who has extenuating circumstances. The student must obtain the authorization from the department on a Request for Schedule Change or Restriction Waiver form. The form is processed in the Registrar’s Student Scheduling Office, 10 Enrollment Services Center.

Classrooms are listed for each course in the Online Schedule of Classes at http://classes.iastate.edu/ and on the student’s class schedule on AccessPlus, beginning approximately 3 weeks prior to the start of the term.

Cancelled courses/sections. In some cases, courses or sections may be cancelled due to low enrollment or departmental staffing considerations. Students who are registered for a cancelled course or section will be notified by the Office of the Registrar, the department, and/or on their AccessPlus schedule.
Textbook information. A link to textbook information, including the ISBN and retail price for assigned textbooks, is available from the Schedule of Classes. Textbook information for Iowa State University courses is posted as close to the start of registration as possible. Students may purchase textbooks from any source they choose.

Credit Limits
For fall and spring semesters, the credit limit is 18 credits for undergraduates and 15 credits for graduate students. For summer session, the limits are 12 credits for undergraduates and 10 credits for graduate students. A student may be required to drop credits before adding another course. In some cases, the college dean may approve a higher or lower credit limit for individual students. Students may request a change in their credit limit by contacting their adviser. Advisers should notify the student's college student services office if the credit limit needs to be changed.

Registration Holds
Students with holds on their registration will not have access to registration until the initiating offices have released the holds. Those who attempt to register before the holds have been released will receive a message indicating which offices have placed holds on their registration. Prior to their registration, students may check for holds on AccessPlus.

Drop Limit
Students are limited in the number of courses they may drop during their academic career. (This refers to drops processed after the fifth day of classes of each semester.) Students who entered Iowa State University as freshmen are allowed to drop a maximum of five courses during their undergraduate career. If they entered at a level above freshman classification or in the College of Veterinary Medicine, they are allowed to drop a maximum of four courses. Courses dropped during their first term at Iowa State are not included in this limit, nor does the summer count for this purpose. Students who enroll at Iowa State University as undergraduates after receiving a bachelor's degree are permitted four drops.

Exceptions to the drop limit may be made for courses that must be dropped for reasons beyond the student's control. These exceptions are granted only by the dean or other authorized person in the student's college.

The number of drops students have left is indicated on their grade report (available on AccessPlus) each term. Students are responsible for not exceeding the limit without special permission by the dean of the student's college.

The number of drops students have left is indicated on their grade report (available on AccessPlus) each term. Students are responsible for not exceeding their limit. At the instructor's discretion, students who attempt to drop a course beyond the limit without special permission by the dean of the student's college will continue to be enrolled in the course and will receive a grade at the end of the term.

Validating Enrollment
To validate their enrollment in each course at the beginning of the semester, students must attend the first or second meeting (first meeting if the class meets only once a week). Students who add a course after the term begins must attend the next class meeting. The instructor has the option to offer a registered place in the course to another student when a registered student fails to attend and has not obtained prior approval of the instructor. Students who do not validate their enrollment must drop the course or they will receive an F grade.

Registration Process
To register for classes, students need the following materials and information:

- Registration Worksheet, available for download at www.registrar.iastate.edu/forms.
- A RAN (registration access number) if required by their college.
- Course information from the Online Schedule of Classes at http://classes.iastate.edu.
- Other departmental information applicable to their curriculum, available from their adviser.

Students are expected to do the following in the advising and registration process:

1. Meet with their adviser, who will provide the following:
   a. degree audit
   b. guidance in course selection
   c. Registration Authorization form, with RAN, if applicable.

2. Choose specific sections of each course. Students are responsible for choosing their course sections. In most cases advisers will not be involved in selecting meeting times.

3. Review their registration start date/time information and any registration hold information on AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp), under Current Information. Students in those colleges which require a four-digit registration access number (RAN) should meet with their adviser in advance of their start date, to obtain their Registration Authorization Card on which the RAN is printed.

4. Register for courses using the AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp) registration system.

Making Schedule Changes
Students may make most schedule changes through the first five days of class using the AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp) registration system.

Procedures for schedule changes vary by the time period of the semester. The effective date of a schedule change is the date when the change is entered into the registration system.

Schedule change periods for full term courses are as follows:

Period 1 ends on the fifth day of classes in the fall and spring semesters. Schedule changes during period 1 are free and do not require adviser signatures. Instructor or departmental approval may be required for adds or section changes for some courses during period 1. Course drops during this period do not count toward a student's ISU course drop limit, and will not appear on a student's permanent record. Schedule changes during period 1 may be processed through the AccessPlus registration system or by presenting a Schedule Change form to the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Period 2 ends the Friday of week 10 in the fall and spring semesters. During this period, schedule changes require signatures of adviser and instructor and are processed on a Schedule Change form. A schedule change fee is assessed for adds, drops, and section changes during this period. Course drops after period 1 count toward a student's ISU drop limit and appear as an X on the permanent record. A section change does not require a drop.

Drops and other schedule changes that are judged to be beyond the student's control may be processed as administrative actions if approved by the college dean. There is no schedule change fee for administrative schedule changes. Administrative drops do not count toward a student's ISU drop limit and do not appear as an X on the permanent record. The effective date of an administrative action is the date it is approved by the college dean or authorized representative.

Period 3 is anytime after period 2. Schedule changes during this period are permitted only for extenuating circumstances, may require a written statement of support from the instructor and the student, and must be approved by the dean of the student's college or authorized representative.

Half-Semester and Partial Term Courses
Specific deadlines for adding and dropping half-semester courses are published in the university calendar. Prorated adjustments to add and drop deadlines are made for other partial term courses. To find out specific deadlines for partial term courses, contact the Registrar's Student Scheduling Office, 10 Enrollment Services Center, 294-2331.

R-Credit Courses (required courses)
Processing a scheduling change for a required course is usually considered administrative. There is no fee for administrative schedule changes. Administrative drops do not count toward a student's ISU drop limit and do not appear as an X on the permanent record. To make a Period 3 R-credit drop administrative requires approval of the college dean.

Cancellation/Withdrawal
Students who decide not to attend classes before the date class work begins must cancel their registration to avoid tuition and fees assessment. Students who decide not to attend classes beginning the first day of class or later must withdraw from the university.

Registration Cancellation
A cancellation is processed when a student notifies the Office of the Registrar, prior to the day class work begins, of the decision not to attend classes for the current semester. All courses are removed and no tuition and fees are assessed. Students may cancel their registration by contacting the Office of the Registrar at 319-153-1535 or 800-252-7529. Students who call should request the name of the person taking the call and record the name as well as the time and date called.
Withdrawal

Students who decide not to attend classes beginning the first day of class or later, must process a withdrawal form. Per the student’s request, the "Request for Withdrawal" form is initiated and submitted by the College to the Office of the Registrar. The student is withdrawn from all courses based on the withdrawal date on the form, and tuition and fees are adjusted, if appropriate according to established policies approved by the Board of Regents, State of Iowa. See http://www.registrar.iastate.edu/fees/tuition-adj.

Withdrawal procedures must be followed otherwise instructors of the courses involved will assign grades or marks they consider appropriate. Since these grades may be Fs, students are warned that failure to follow the prescribed withdrawal procedures may adversely affect a later application for reenrollment or transfer to another institution.

Students who are considering withdrawal from the university should immediately consult their academic adviser to discuss reasons for the withdrawal and alternatives.

A request for withdrawal during period 3, (i.e., after the last day to drop a course without extenuating circumstances) will not be approved except for circumstances that are beyond the student’s control. The dean of the student’s college or his or her designee, must approve such requests. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Students should not expect to withdraw during or after the final examination week. In a situation beyond a student’s control, when examinations cannot be completed, arrangements should be made for incompletes rather than withdrawal during final exam week. Students who are on academic probation (P) and withdraw during period 3 will not be permitted to enroll the following term, except under extenuating circumstances.

Withdrawal Procedures

To withdraw from the university, students must do the following:

1. Complete a Request for Withdrawal form, with adviser’s signature.
2. Request the approval and obtain the signature of the college in which they are enrolled. (If the request is approved, the withdrawal form will be forwarded to the Office of the Registrar where it will be recorded; the information is then sent to the appropriate offices.)

The effective date of the withdrawal is the date on which it is approved by the college dean, or his or her designee. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

If students complete the withdrawal procedure, the courses they are taking will not be included on the permanent record nor counted as part of their drop allowance. Half semester courses completed prior to withdrawal will be included on their permanent record. Incompletes will not be accepted for any courses taken during the term the student withdraws.

Interim or Medical Withdrawal

The University may order involuntary withdrawal of a student if it is determined that the student is suffering from a mental disorder as defined by the current American Psychiatric Association Diagnostic Manual such that the disorder causes, or threatens to cause, the student to engage in behavior which poses a significant danger of causing imminent harm to the student, to others or to substantial property rights, or renders the student unable to engage in basic required activities necessary to obtain an education.

Status of Conduct Proceedings

If the student has been charged with violation of the Uniform Rules of Conduct, but it appears that medical reasons exist for the objectionable behavior, the withdrawal policy may be activated prior to issuance of a determination in the conduct process. If the student is ordered medically withdrawn from the university, such action terminates the pending disciplinary action. If the student is found not to be subject to medical withdrawal under this section, conduct proceedings may be reinstated.

Interim Action

The OJA (Office of Judicial Affairs) Administrator or the Dean of students may order interim medical suspension of a student where there appears to be an imminent threat of harm to self or others. If the student is suspended, within 48 hours of ordering interim medical suspension, the Dean of Students will schedule an interim hearing before the Medical Withdrawal Committee, consisting of the Director of Student Health (or designee), the Director of the Student Counseling Service (or designee), and the Dean of Students. The student and the OJA Administrator will have an opportunity to present information as to whether interim medical suspension should be continued or modified, and whether medical withdrawal should be considered.

The Medical Withdrawal Committee may order the student to be referred for an evaluation by a licensed mental health professional of the university’s choosing if there is adequate reason to believe that a basis for medical withdrawal exists. The order of referral must be sent to the student and notify the student of the scheduled evaluation to occur no later than seven days from the date of the referral letter. The University will cover the cost of the evaluation. If a student fails to complete the evaluation, the university may continue interim medical suspension and may order restrictions on campus access until the evaluation is completed and reviewed by the university. The decision to continue interim medical suspension and for referral may be appealed within 48 hours, in writing, to the Vice President for Student Affairs. The student may be assisted by any two individuals of his or her choice in any hearing or appeal.

Involuntary Medical Withdrawal

If the medical evaluation supports medical withdrawal, a hearing will be scheduled before the Dean of Students, the Director of Student Health and a member of the Student Counseling staff. The student will have at least 48 hours to independently review the psychological or psychiatric evaluation prior to the hearing. The student and the OJA Administrator may present arguments for or against involuntary Medical Withdrawal. A written decision shall be rendered by the Medical Withdrawal Committee stating the reasons for its determination. The decision may be appealed, in writing to the Vice President for Student Affairs. A student who has undergone involuntary medical withdrawal must reapply and may not reenter the university without providing competent medical evidence that the medical condition no longer exists, or is sufficiently under treatment so as to remove any substantial likelihood of recurrence of the condition which caused medical withdrawal. The University may require the student, at the student’s cost, to undergo a medical evaluation by a licensed mental health professional of the university’s choosing. A medical withdrawal is not considered a disciplinary action, though a prior medical withdrawal may be considered in subsequent conduct hearings involving the student.

Tuition and Fees Adjustments for Withdrawals

Tuition and fees adjustments are made for withdrawals according to the schedule for full term courses (appropriate adjustments will be made when partial term courses are involved).

Students may appeal a tuition and fees assessment for withdrawals. Determinations will be made for instances beyond the control of the student. The results will be sent to the student in writing.

Returning/Reentry to the University

U.S. students who have been absent from Iowa State University less than 12 months may be admitted as a returning student. If more than 12 months have elapsed since last enrolled, a U.S. student must apply for reentry to the university. All international students must apply for reentry regardless of the time away from the university.

Returning Students

U.S. undergraduate and U.S. non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months do not complete a reentry form; however, international undergraduate and international non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months must complete a reentry form. Returning U.S. students and graduate students should contact the Office of the Registrar to have their records updated and registration access created. Students should contact their advisers or major professor to select courses and begin the registration process. Returning students who want to change their curricula should follow the same procedure as in-school students. Students who were dropped from enrollment at Iowa State University must obtain reinstatement by the Academic Standards Committee of the college that initiated the drop. (See below for policies that apply to requests for reinstatement.)

Reentry Students

Undergraduate and nondegree undergraduate (special) students who plan to attend Iowa State University after an absence of twelve months or more must complete a reentry form. Forms are available from http://www.registrar.iastate.edu/forms/.
Students with a bachelor’s degree who plan to take supporting graduate level coursework prior to applying for graduate degree admission should request a nondegree graduate admission application.

Students who have previously attended Iowa State University only as nondegree (special) students and who now seek to earn an undergraduate degree should request an undergraduate application.

International students must complete a reentry form. Forms are available from http://www.registrar.iastate.edu/forms/. Financial certification of ability to cover all educational and living expenses will be required.

The reentry form should be completed and returned to the Office of the Registrar, 0460 Beardshear Hall, well in advance of the term of reentry. Students who have attended another college or university since reentry must have an official transcript(s) of all course work attempted sent to the Office of Admissions, 100 Enrollment Services Center.

Reentering students must also contact their departmental office/adviser to prepare a class schedule. Reentry must be approved prior to registration.

Iowa State University requests the information on the reentry form for the purpose of making a reentry decision. The university reserves the right not to approve reentry if the student fails to provide the required information.

Reentry Approval Process

Generally, a request to reenter Iowa State University will be approved within the Office of the Registrar. However, the Office of the Registrar will refer the reentry form to the college to which a student plans to return if the student: (a) desires to change curriculum; (b) has a previous Iowa State University cumulative grade point average below 2.00; (c) was dropped from the university for unsatisfactory academic progress or was not otherwise in good standing; or (d) since leaving Iowa State University, has completed additional college study with less than a 2.00 grade point average. See Index, Reinstatement.

Academic Renewal

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations. See Index, Academic Renewal/Reinstatement.
Research and Extension

Research

Research is an important activity at Iowa State University. Students play significant roles in Iowa State’s research mission. Graduate students and some undergraduates work alongside top-notch faculty and staff who are exploring new ideas and finding solutions to real problems.

Getting involved in a research activity complements your coursework and adds another dimension to your Iowa State experience. There are many opportunities for graduate and undergraduate students to get involved in research at Iowa State University. The Undergraduate Research (http://www.undergradresearch.iastate.edu) website offers a list of the latest research and presentation opportunities for undergrads. Research opportunities for prospective and current graduate students may be found within each college, at the U.S. Department of Energy’s Ames Laboratory (http://www.ameslab.gov/education/graduate-fellowship), and within the many centers and institutes (http://www.vpresearch.iastate.edu/en/centers__institutes) at Iowa State.

Support for research at Iowa State University comes from state and federal appropriations as well as from contracts and grants involving the federal government and nonfederal organizations. As part of its total program, the university also operates extension services, special laboratories, and centers and institutes.

Iowa State University Extension and Outreach

Iowa State University Extension and Outreach helps carry Iowa State University’s land-grant mission beyond the borders of campus.

Extension and Outreach’s core purpose is to provide research-based educational programs by monitoring the needs of Iowans and developing educational programs and resources to address those needs, including emerging needs such as emergency response.

Our core programs are organized around four signature issues:

- **Economic Development** # Economic development programming focuses on actions to help the Iowa economy prosper and grow – enhancing the health of communities, growing businesses, and increasing the wealth and the quality of life for all Iowans.
- **Health and Well-being** # Health and well-being programming focuses on activities and projects to help Iowans live healthier lives through improved healthy behavior, physical health, and enhanced family, work, and community environments.
- **K-12 Youth Outreach** # K-12 outreach programming connects Iowa children and youth with Iowa State University’s knowledge and research base to help them reach their full potential. Education and positive youth development experiences are offered on campus, within counties, and out of state. K-12 outreach includes 4-H Youth Development programs, outreach partnerships through the Iowa State colleges, and science, technology, engineering, and math initiatives.
- **Food and the Environment** # Global food security programming focuses on local actions to produce a safe, sustainable, accessible, and affordable food supply for Iowa, the nation, and the world.

Our educators, specialists, and volunteers live and work in all 99 counties, giving Iowa State University a presence in every county and personal connection to Iowans.
Student Activities

Memorial Union Activities and Services

The Memorial Union is an historic building that is regarded as the heart of campus life and the center of informal education at Iowa State University.
515-296-6848; www.mu.iastate.edu

Arts, Entertainment, Recreation:
- Underground (bowling, billiards, video arcade, Nintendo Wii)
- Maintenance Shop: live music
- Student Union Board: weekly films, comedy, hypnotists, special events, much more
- Art exhibits and art-for-rent
- Workspace (art and crafts classes for fun, studios for work in wood, photo, pottery; button maker, screen printing, die cut machine)
- Big screen TVs; pianos to play
- Lectures

Student Organizations
- Student organization offices and meeting space: recognition process.

Dining & Shopping
- Food Court & MU Market & Café
- University Book Store

Study Spots
- Browsing Library & Computer Lab; Chapel; Multicultural Center
- Lounges: Main, West, Pride, Commons & more

Services
- Hotel, meeting rooms, catering
- Parking ramp
- Copy Center
- Souls Family Visitor Center
- ATMs, Ticket Office, Lockers
- U.S. Post Office – full service
- Student Legal Service

Distinctive Feature
- Gold Star Hall, an active memorial to Iowa State service personnel lost in the nation’s conflicts

Student Activities Center
Director of Student Activities, Asst. Director - Memorial Union
George Micalone

Coordinator for Leadership and Service
Kevin Merrill

Coordinator for Art Programs
Letitia Kenemer

Coordinator for Entertainment Programs
Jim Brockpahler

Coordinator for Student Organizations
John Taylor

Underground Recreation Center Manager
Doug Swanson

The Student Activities Center includes: the Workspace (arts studio), the Maintenance Shop (entertainment venue), the Underground (recreation center/bowling alley), leadership and service programs, art galleries in the MU, Multicultural Center, and management of the recognition of over 700 campus and student organizations. For a complete list of recognized organizations visit www.stuorg.iastate.edu.

The staff provides assistance to student and campus organization leaders, members and advisers on an individual or group basis. This office produces Newsline, an online newsletter distributed twice a month to officers and advisers of recognized student and campus organizations. Available on the SAC website are resources for student and campus organizations including the event authorization process, publicity and promotion ideas, constitution writing guidelines, and officer transition information. The Student Activities Center is home to the Leadership and Service Center which provides hands on support for students interested in leadership and service opportunities and student organization officers looking to better their clubs. In addition the SAC offers a 2-credit course called Leadership ISU, where students learn leadership skills through a series of activities and seminars, as well as many other leadership conferences and retreats.

Annual SAC events include: ClubFest I & II (organization involvement fair), WelcomeFest (Ames and ISU opportunity fair), Coach Talks (hear from Men’s and Women’s head basketball coaches), Iowa State Leadership Experience (one-day leadership conference), Social Justice Summit, and Winterfest (celebration of all things winter). Student Activities Center staff advise key student organizations including: Student Union Board, ISU AfterDark, Dance Marathon, Freshmen Council, Student Volunteer Services, CyServe Council, and VEISHEA.

More information is available at the Student Activities Center, located in the East Student Office Space in the Memorial Union (across from Panda Express); online at www.sac.iastate.edu; or by calling (515) 294-8081.

Lectures
www.lectures.iastate.edu/

Throughout the academic year, the Committee on Lectures brings to the campus a number of speakers eminent in national and international affairs, the sciences, and the arts. In addition to giving formal lectures, a number of these speakers meet with students informally for discussions. Through these lectures and discussions the students are given a well-rounded presentation on subjects and areas affecting their culture, educational and economic philosophy, and scientific development. Past speakers include scholars E.O. Wilson and Stephen J. Gould; activists Gloria Steinem and Anita Hill; actor and comedian Bill Cosby; poet Maya Angelou; and astronaut Sally Ride.

The Institute on World Affairs is an annual series of speakers and on a topic of international interest held in the fall. Spring semester, the Institute on National Affairs is held with a topic of national concern as its focus. Focus, an annual fine arts festival with emphasis on student creativity in the arts, is held in the spring. The Committee on Lectures also sponsors or co-sponsors dramatic, dance, and musical events.

Students are encouraged to contact the lectures program office and become involved in the planning of these events.

Honor Societies

Honor societies at Iowa State University provide opportunities for students who excel in the classroom and want to network with others in their major. Below is a list of honor societies followed by a brief description.

Members of these honor societies are eligible for transcript recognition through the Office of the Registrar. More information, including the complete list of honor societies, can be found on the student organization website at https://sodb-stuorg.sws.iastate.edu/list-type.php?id=12.
Dean of Students Office

www.dso.iastate.edu
Dean of Students: Pamela Anthony, Ph.D.
Associate Dean of Students: Keith Robinder, Ph.D.

The Dean of Students Office (DSO) at Iowa State University uses an integrated approach to support student-centered learning through personal, community and academic development culminating in a transformative experience. Reporting through the Division of Student Affairs, the DSO provides numerous opportunities for students to engage in learning beyond the classroom.

The departments that comprise the DSO are grouped within four intersecting spheres of influence: Student Success and Retention, Wellness, Social Justice and Inclusion, and Student Life. Within this context, the following concepts apply broadly across all four spheres.

- **Community** – The DSO creates an environment that encourages connectedness, belonging and positive interpersonal relationships.
- **Advocacy** – The DSO works on behalf of students to help them navigate the University community, and encourages them to find their own voice such that they can advocate for themselves.
- **Action-oriented** – The DSO provide a wide range of resources and services, and encourages students to use them to maximize their experience at Iowa State University.
- **Outcomes-oriented** – The DSO regularly assess our programs, resources and services to ensure they provide opportunities for holistic learning.

Although the individual departments are situated within a specific sphere, resources and services are provided across all dimensions of the DSO mission. This collaborative model illustrates the dynamic synergy with which all DSO departments merge to create and support a common community experience for Iowa State University Students.

Student Success and Retention Sphere
Academic Success Center; Hixson Opportunity Awards; National Student Exchange; Student Disability Resources; and Writing and Media Center

- Engage students in the learning process both inside and outside of the classroom.
- Provide resources and support to empower students to achieve their academic and personal goals.
- Collaborate with campus partners to encourage students in their persistence to graduation.

Wellness Sphere
Recreational Services (Facilities, Fitness and Wellness, Intramurals, Outdoor Recreation, Sport Clubs)

- Promote healthy practices across all dimensions of personal wellness.
- Encourage reflection to develop self-efficacy.
- Provide opportunities for renewal and positive change.

Social Justice and Inclusion Sphere
Lesbian, Gay, Bisexual, Transgender Student Services; Margaret Sloss Women’s Center; Multicultural Student Affairs

- Create an environment that is safe, welcoming, inclusive, and respectful.
- Provide programs, services, and support for all students to support equity and access.
- Engage in intentional dialogue among diverse perspectives to foster personal development and social change.
- Advance a broadly-defined conceptualization of diversity that incorporates multiple (visible and invisible) identities.

Student Life Sphere
Greek Affairs; Judicial Affairs; Parents’ Association; Student Assistance and Outreach; Student Legal Services

- Communicate expectations and explain how individual and group behavior impacts the community.
- Provide formal and informal leadership opportunities.
- Equip students with knowledge and skills to succeed in college and beyond through employment and involvement.
- Encourage students’ participation in social activities and traditions associated with the Cyclone experience.

Academic Success Center

www.dso.iastate.edu/asc
Director: Susan Rhoades, Ph.D.
1060 Hixson-Lied Student Success Center
(515) 294-6624

The Academic Success Center (ASC) is a collection of services and programs designed to help students achieve academic goals. The services available at the ASC include the following: course-specific group Tutoring services and Supplemental Instruction; individual Academic Coaching for students needing to improve study skills, time management, or address other academic challenges; and a one-credit academic skills class (Psychology 131). All programs are focused on helping students learn how to learn and achieve their academic goals.

The mission of Tutoring services is to enhance academic growth and success. Students can request tutoring support for any undergraduate course at ISU. Staff members recruit and train qualified peer tutors. Tutors meet twice weekly with their tutoring group (2 to 4 students) to facilitate learning. A minimal per session fee is charged monthly to the student’s U-Bill for tutoring sessions. Students may be eligible to receive financial assistance to aid with tutoring costs.

Supplemental Instruction (SI) is a free academic assistance program for select, traditionally difficult courses. Peer SI leaders who have demonstrated competence in the course attend classes and facilitate at least three group study sessions per week to help students with what to learn and how to learn. A complete schedule of courses and sessions is available on-line at https://apps-dso.sws.iastate.edu/si/.

Academic Coaching provides one-on-one meetings with students seeking help in evaluating and correcting academic challenges. Students at any level are encouraged to seek academic coaching to develop skills such as time management, note taking, study skills, and test taking.

Psychology 131 is a one-credit “Academic Learning Skills” seminar designed to facilitate development of academic skills, behaviors, and attitudes. Content covers time management, goal setting and motivation, learning skills and strategies, the campus environment, and campus relationships. Class size is limited to allow for group interaction as well as individual attention.

Greek Affairs

www.greek.iastate.edu
Assistant Dean of Students and Director: Billy Boulden, M.A.
Assistant Director: Katy Cran, M.Ed.
B0355 Memorial Union
(515) 294-1023

Greek Affairs provides advising, consultation, and educational services to the fraternities and sororities at ISU. Professional staff and graduate assistants work with student leaders, members, and chapter advisers to provide support to the chapters and to advise Collegiate Panhellenic Council, Interfraternity Council, Multicultural Greek Council, National Pan-Hellenic Council, Greek Week, Order of Omega, Rho Lambda, Emerging Greek Leadership Council, Greek Relations Executive Council, Greek Alternative Spring Break, and other student organizations and activities affiliated with the Greek Community.

Fraternities and sororities have been active at ISU since 1875. The 55 fraternities and sororities at ISU have more than 3,800 student members and represent almost 13 percent of the undergraduate student population. The Greek Affairs staff and local alumni work with each fraternity and sorority to ensure that the chapter is meeting the educational objectives of the university, their national affiliations, and the developmental needs of members.

Hixson Opportunity Awards

www.do.iastate.edu/hixson
Director: Debra Sanborn, Ph.D.
Assistant Director: Allison Severson-Haban, M.S.
1080 Hixson-Lied Student Success Center
(515) 294-6479

The activities and programs offered to Hixson Scholars are designed to promote the retention and success of these students. These programs and resources aim to develop a community of students and friends within the larger Iowa State community. Programs include the Hixson Seminar (University Studies 101), monthly activities, community service, Hixson Peer Mentors, and the Hixson Leadership Seminars (University Studies 311 & 312).

Judicial Affairs

www.dso.iastate.edu/ja
Assistant Dean of Students and Director: Michelle Boettcher, Ph.D.

For more information see the individual DSO Department web sites.
The Margaret Sloss Women’s Center promotes gender equity at Iowa State University for students, faculty, and staff. Through a feminist lens, the center advocates for individuals and groups, provides support, referrals, community, and programming; and maintains a safe space in the Sloss House.

The Margaret Sloss Women’s Center provides:

- Programming on the topics of gender equity (Women’s Equality Day, Margaret Sloss Gender Equity Award, Gender Pay Wage Gap, International Women’s Day).
- Education and support for victims, survivors, and friends and family of victims and survivors of power-based violence including sexual assault, domestic violence, and stalking (Violence Leaves an Empty Chair at the Table display, The Clothesline Project, offer referrals).
- Advocacy for students, faculty, and staff (Lactation locations, non-traditional and adult student scholarships, Secret Agents Board).
- Leadership and activism opportunities (Society for the Advancement of Gender Equity (SAGE) student organization, internship and practicum credits, volunteer experience, Women’s Leadership Retreat, Womyn of Colour Network, The Vagina Monologues, Take Back the Night, and "Who Needs Feminism?" Campaign).
- A welcoming space with comfortable seating, computer and printing, television and DVD player, lockers, kitchen facilities that also serves as an art exhibit showcasing local women artists.

Multicultural Student Affairs (MSA)

www.dso.iastate.edu/msa
Assistant Dean of Students and Director: Kenyatta Shamburger, M.S.
2080 Student Services Building
(515) 294-6338

The Office of Multicultural Student Affairs (MSA) advocates for and supports Iowa State University’s domestic students who self-identify as African American, American Indian / Alaskan Native, Asian American, Hawaiian / Pacific Islander, Latina/o, and/or Multiracial.

MSA provides leadership through the development of programs and services that enhance the recruitment, transition, retention, and graduation of multicultural students. Working in collaboration with University partners, the office assists in fostering a campus climate that recognizes, appreciates, and shares a mutual understanding and respect for all cultures in addition to supporting students’ academic, cultural, personal, and social development.

Working with university departments and related organizations, MSA achieves its goals through the following programs:

Academic success for first year multicultural students through early outreach programs
- Academic Program for Excellence (APEX and APEX^E) – An intensive eight week academic excellence summer program for entering first year multicultural students that prepares them for the collegiate environment.
- Multicultural Visits – Meetings and presentations scheduled with prospective students/families visiting campus, at high schools, and community colleges

Retention of multicultural students through academic intervention and social support programs
- Academic support – Access to free tutoring, study area, and computer labs
- George Washington Carver (GWC) Scholarship – A four year tuition scholarship awarded to incoming multicultural first-year students directly out of high school. The GWC Scholarship program also provides academic support, leadership development, cultural activities, and professional development opportunities.
- Multicultural Vision Program (MVP) Scholarship – A four year tuition scholarship awarded to incoming multicultural first-year students directly out of high school. The MVP Scholarship program also provides academic support, leadership development, cultural activities, and professional development opportunities.
- MLK Emergency Loan Program – An interest-free 30-day loan that addresses extenuating financial situations that may affect a student’s educational goals.
- Professional Development Funding – Funding for multicultural students to attend regional, national, and/or international conferences, support for graduate and professional school admission tests, and student exchange opportunities that strengthen students’ academic pursuits, develops leadership skills, or enhances ethnic/racial identity development.

Development of leadership skills for multicultural students through structured programs
- Black Cultural Center and Multicultural Center – These facilities provide meeting locations for multicultural student organizations, community groups, ISU faculty/staff and targeted multicultural student programming.
- Iowa State Conference on Race and Ethnicity (ISCORE) – A campus-wide event that provides participants with a better understanding of race and ethnicity in higher education; as well as skill development in conducting research and presentations.
- Men of Color Collective – A student-led initiative focused on leadership, support, and the development of multicultural male students at ISU.
- Multicultural Family Reception – A welcome event for multicultural students and their families introducing key ISU staff, faculty, and administrators.
• Multicultural Student Advising Council (MISAC) – A collective of Multicultural Student Organizations that provides an opportunity to learn more about others, increase collaborations, and build sustainable relationships that provide both support and future growth.

• Multicultural Student Programming Advisory Council (MSPAC) – A funding source for registered student organizations implementing programs and events that promote cross cultural collaboration at ISU.

• Welcome and Transition – A welcome event for multicultural students that includes a keynote speaker and sessions focusing on academic success and leadership.

• Multicultural Student Affairs Recognition Programs – Events that recognize multicultural students for their academic achievement, campus leadership, and graduation from ISU.

National Student Exchange (NSE)

www.dso.iastate.edu/nse
Director: Debra Sanborn, Ph.D.
Assistant Director: Allison Severson-Haban, M.S.
1080 Hixson-Lied Student Success Center
(515) 294-6479

Since 1968, National Student Exchange has offered students a domestic alternative to study abroad. What began with three campuses exchanging seven students is now 175 universities placing 3000 students a year. Iowa State University is pleased to offer exchanges in this program.

Since its founding, more than 80,000 students have participated in NSE. The National Student Exchange was founded as a counterpart to study abroad programs, recognizing that not every student is seeking a study opportunity outside of the United States. NSE offers low-cost options for ISU students to study out-of-state, at culturally diverse campuses, with program compatibility to our campus.

Features of the National Student Exchange include:
• Access to additional courses and programs
• Exchange among university honors programs
• Multicultural opportunities
• Resident assistant exchange options
• Credits applied toward degree
• Tuition reciprocity across the United States

Exchange features and requirements:
• NSE campuses in 49 states, three U.S. territories, and seven Canadian provinces
• Duration of exchange can range from one semester to one calendar year
• Exchanges can occur in different academic and calendar years
• Students must be full-time during application and exchange
• GPA of 2.5 on a 4.00 scale required

Parents’ Association (ISUPA)

www.dso.iastate.edu/pa
Advisor: Keith Robinder, Ph.D.
1010 Student Services Building
(515) 294-6054

The Iowa State University Parents’ Association (ISUPA) serves all Cyclone families by promoting parent programs and communicating university resources to enhance students’ experiences and success at Iowa State. Informational resources and services sponsored by ISUPA are open to all parents and families of students enrolled at Iowa State. ISUPA is an auxiliary organization of the university, affiliated with the Dean of Students Office. ISUPA is governed by a volunteer Board of Directors comprised of parents of current Iowa State students.

The ISUPA Board of Directors, along with members of the Dean of Students Office staff, sponsors several programs to help parents and families stay informed.

• Parents’ Advisory Line (PAL) – Call 1-800-772-8546 or e-mail parents@iastate.edu for advice on how to help your student succeed or for assistance navigating university resources.

• Info for Parents and Families (https://www.parents.sws.iastate.edu) – Website for parents and families that provides a clearinghouse of resources and information, as well as links to various services for Cyclone families.

• Family Handbook – Information on academic and student life provided to all new incoming students and families during summer orientation.

• Relatively Speaking – A monthly e-newsletter for families of ISU students that keeps parents and families informed of timely topics and campus resources.

• ISUPA on Facebook – A social medial opportunity to build community and share pictures or advice with other members of the Cyclone Family.

ISUPA is funded by contributions and fundraisers, such as the annual discounted Football Ticket program for Cyclone Family Weekend. Through its fundraising efforts, the ISU Parents’ Association is proud to sponsor several programs.

• Scholarships – ISUPA provides funding for several scholarships to help students and families finance the cost of higher education.

• Cyclone Family Weekend – ISUPA is a premier sponsor of the university’s annual event for parents and families.

• VEISHEA – ISUPA provides additional funding for professional security services at ISU’s spring celebration.

Parents interested in volunteering or serving on the ISUPA Board of Directors can find information and the application form at the ISUPA web site.

Recreation Services

www.recservices.iastate.edu
Director: Mike Giles, M.S.
Associate Director: Scott White, M.S.
Assistant Director: Garry Greenlee, M.S.
2180 State Gymnasium
(515) 294-4980

Recreation Services strives to provide a holistic and diverse approach to health and wellness that encompasses physical, spiritual, intellectual, environmental, social, and emotional wellness. Recreation Services offers high-quality facilities and a wide variety of programs and services to promote a healthy mind and body and enhance the overall quality of the educational experience at Iowa State University.

Recreation Services offers five indoor facilities: Lied Recreation Athletic Center, Beyer Hall, State Gym, Forker Building, and the Ames/ISU Ice Arena. The Lied Recreation Athletic Center houses two running tracks, multiple basketball, volleyball, and racquetball courts, weight & cardio equipment, and a bouldering wall. Beyer Hall has basketball, volleyball, racquetball, and squash courts and features an indoor pool used for recreational swimming, competitive events, and special activities. State Gym offers basketball, volleyball, and badminton courts, two running tracks, an indoor pool, climbing & bouldering wall, and weight & cardio equipment. Outdoor space encompasses over 100 acres including an 18-hole disc golf course, tennis courts, sand volleyball courts, softball, flag football, and soccer fields that provide the perfect environment for friendly competition.

Iowa State University has one of the largest intramural sports programs in the nation. With more than 40 different programs designed for individual, dual, team, and co-ed competition, the Intramural program has something for everyone! Some of our unique and popular programs include broomball, curling, flag football, dodge ball, euche, volleyball, and badminton. Participate for the opportunity to win one of the most coveted items on campus – an Intramural Champion T-shirt! If you are looking for a higher level of competition, there are over 50 Sport Clubs designed to meet individual interests in a variety of sports such as rugby, soccer, water-ski, lacrosse, ultimate Frisbee, ice hockey, ski and snowboard, martial arts, kayaking, crew, mountaineering, weight lifting, and boxing. The clubs participate in regional and national tournaments, and many have coaches who supervise organized practices.

For those striving to improve overall health and fitness, our fitness program offers activities rich in variety and intensity levels. Certified instructors teach innovative, fun and safe fitness classes, including cardio workouts, kickboxing, cycling, sculpting, Pilates and yoga classes, along with deep and shallow aqua fitness workouts. Personal training sessions can be purchased to provide one-on-one training to enhance individual wellness. To stay interested and involved in a regular exercise, sign up for the Rec Miler program. The program allows you to earn “rec miles” for exercise and healthy habits and earn a variety of progress awards along the way!

The outdoor recreation program provides opportunities to ravel, attend a workshop, rent equipment, or climb the wall! Choose your landscape as you participate in one-day, weekend, or extended trips throughout Iowa and the nation. Trips cover a broad range of activities and locations such as canoeing in Iowa, sea kayaking in Alaska, snowboarding and skiing in Colorado, mountain biking, whitewater rafting, hiking and climbing in Utah and surfing in California. Instructional workshops are also offered on various outdoor recreational skills. Rent equipment for camping, canoeing, skiing, backpacking, mountain biking, kayaking and many other activities.

Finally, part-time jobs in Recreation Services offer students flexible hours, valuable skills, work experience and competitive hourly wages. Over six hundred students are employed as building supervisors, lifeguards, office assistants, trip leaders, climbing wall supervisors, fitness instructors, personal trainers, and intramural officials. Undergraduate and graduate students desiring to work in this
Student Assistance and Outreach

www.dso.iastate.edu/sa
Interim Director: Kipp Van Dyke, M.S.
1010 Student Services Building
(515) 294-1020

Student Assistance is a service in the Dean of Students Office that helps students navigate the challenges they may encounter at Iowa State University. Many students face difficult times during college. Unexpected life events, personal crises, mental health struggles, or academic difficulties are all examples of challenges that can interfere with college success. Student Assistance is an interdisciplinary student development model that supports retention by prioritizing students’ academic and personal success.

The Student Assistance staff supports, but does not replace, the function of other university personnel who serve many similar purposes. Student Assistance staff will often direct students back to the appropriate resources with guidance on whatever process students are trying to understand. Student Assistance helps students understand the University’s systems, explore resolution options, and make informed decisions.

- Informing – Student Assistance provides accurate and timely information on University policies and procedures. Student Assistance can identify the campus and community resources necessary to achieve positive outcomes for students’ concerns.
- Advising – Student Assistance provides advice about how to deal with any situation causing students difficulty. Student assistance offers guidance and coaching to enhance students’ capacity to succeed.
- Referring – Student Assistance provides referrals so students’ concerns are brought to the attention of the appropriate University official.
- Assisting – Student Assistance provides direct assistance navigating any difficult situation. Student Assistance empowers students by focusing on the facts, teaching skills, and offering encouragement.
- Advocating – Student Assistance provides guidance as the “Single Point of Contact” for students who report sexual misconduct, discrimination, harassment, bullying, or similar concerns. Student Assistance staff can expedite changes in housing assignments and course registration; provide emotional support, facilitate the process for filing a formal complaint; and arrange for other services that will provide a safe and secure environment.
- Navigating – Student Assistance identifies the process(es) and provides direction for resolving academic and co-curricular concerns and grievances.
- Notifying – Student Assistance facilitates communication with faculty and staff when students miss classes due to emergencies or other extenuating circumstances.

The primary goal of Student Assistance is to help students succeed. Consultation and assistance is provided with concern for each student’s personal well-being and educational objectives.

Student Disability Resources

www.dso.iastate.edu/sdr
Director: Steve Moats, M.A.
Assistant Director: John Hirshman, M.A., Ed.S.
1076 Student Services Building
(515) 294-7220; TTY (515) 294-6635

Staff members in Student Disability Resources (SDR) coordinate support services that students may need in order to reach their fullest academic potential. SDR staff members coordinate reasonable accommodations and serve as a resource within the university community concerning students who have qualifying disabilities. SDR provides assistance, information, support, counseling, education, referral, and promotes disability awareness for students, faculty, staff, the Ames community, and the state of Iowa.

Vocational Rehabilitation

www.dso.iastate.edu/vr
1076 Student Services Building
(515) 294-5059

The State of Iowa Division of Vocational Rehabilitation Services staff are also located within the Student Disability Resources office. Vocational Rehabilitation provides services to students who, based on a variety of factors, have a disability that is a substantial impediment to employment. Rehabilitation services may include the following: medical assessment; vocational evaluation; counseling and guidance; special adaptive equipment or devices; financial assistance toward training; and job placement assistance. No direct fees are charged, but there may be some costs through involvement with services.

Student Legal Services

www.dso.iastate.edu/sls
Student Legal Adviser: Paul Johnson, J.D.
Student Legal Adviser: Michael Levine, J.D.
Bo367 Memorial Union
(515) 294-0978

Funded entirely by the Government of the Student Body, Student Legal Services (SLS) is a legal aid office for students currently enrolled at Iowa State University and registered Iowa State University student groups. It is staffed by two attorneys who advise and often represent students in a variety of cases and are available for consultation with respect to most legal concerns.

The types of cases most often handled include:
- Family Law and Divorce
- Criminal Law
- Landlord - Tenant Problems
- Off-campus Employment Problems
- Consumer Issues
- Administrative Issues
- Notary Services

The services of SLS are available to students and registered Iowa State University student groups free of charge. Students must pay their own court costs and any out of pocket expenses.

SLS cannot represent students in fee generating cases, controversies involving student vs. student or student vs. ISU, or ISU student judicial matters; and generally does not handle felony defense or cases involving excessive time. However, consultation with an attorney regarding these matters is available.

Writing & Media Center

www.dso.iastate.edu/wmc
Director: Rachel Azima, Ph.D.
Assistant Director: TBD
300 Carver Hall
(515) 294-5411

The Writing & Media Center helps students become stronger, more confident writers and communicators. Trained undergraduate peer tutors offer tailored, one-on-one conferences for undergraduate students working on all forms of written, oral, visual, or electronic communication. Students are welcome to bring work from any discipline at any stage of the process, from brainstorming to polishing a final draft. The WMC does not “fix” or proofread papers; rather, peer tutors help students learn how to proofread, evaluate, and improve the effectiveness of their own work, whether it is a website, oral presentation, essay, or lab report.

Students can walk in to the WMC or sign up for 30- or 60-minute appointments in person, via phone, or online via the WMC’s website. WMC services are free.

Student Counseling Service

Assistant Vice President and Director of Counseling: Terry W. Mason, Ph.D.

The Student Counseling Service (SCS) assists students in enhancing their academic success and personal well-being with a staff of professional psychologists and counselors. Services are available to help students sort through their feelings, strengths, and options to develop new perspectives and coping skills.

Services include:
- One-on-one counseling for any issue of personal concern, such as depression, anxiety, stress management, relationship issues, identity issues, and other forms of personal challenge. Students may also receive therapeutic services to deal with more severe mental health issues.
- Couples counseling for ISU students and their partners during times of relationship difficulty.
- Eating disorders assessment and treatment for students concerned with eating or body image issues. Students receiving treatment for eating disorders might also work with physicians, nutritionists, and personal trainers as their needs require.
- Substance abuse assessments to help students determine the nature and extent of their alcohol or other drug use and the impact of this use on their well being. Counselors offer recommendations and referrals for any concerns identified through the assessment.
• Career counseling to assist students having difficulty choosing a major or making decisions about their future after college.
• Group counseling is offered to facilitate personal growth and social skills learning. A list of the current semester’s groups is available on the SCS web site.
• A variety of outreach programs are also available.

Counseling services are offered at no cost to ISU students. However, a nominal fee for testing may be required. Nominal fees are also charged for uncanceled missed appointments. Counseling is strictly confidential. SCS staff will not release any information to anyone outside of the Student Counseling Service without the written permission of the client unless an imminent harm condition exists.

In addition to providing counseling and outreach services to students, SCS provides training and consultation to faculty and staff to assist them in addressing the psychological needs of students.

SCS hours are Monday through Friday 8 a.m. - 5 p.m. The Student Counseling Service phone number is 515-294-5056.

Student Support Services Program

www.dso.iastate.edu/sssp
Director: Japannah Kellogg, M.S.
2010 Student Services Building
(515) 294-0210

Student Support Services Program (SSSP), a federally funded program, provides academic support to eligible students and is designed to increase the retention and graduation rates of low-income individuals who are first-generation college students or individuals with disabilities. The needs of the students who are accepted into SSSP are thoroughly assessed through testing and counseling. SSSP participants receive personal and career counseling, along with academic advice, tutoring, and assistance in receiving financial aid.

Participants in SSSP are encouraged to work with an SSSP student mentor to become acclimated to the ISU environment. These relationships also encourage participants to fully access ISU resources. Study skills improvement sessions and basic skills instruction are provided in the areas of math and writing. In addition, cultural enrichment (i.e., theatre, dance, and musical events) and educational activities (leadership conferences, graduate/professional, etc.) are planned. These services are provided free of charge to eligible students after they are accepted into the program.

International Students and Scholars

www.issso.iastate.edu
Director: James Dorsett

The International Students and Scholars Office (ISSSO) provides a welcoming and supportive environment for international students and scholars, Iowa State University, and the Ames community. ISSSO staff members orient and advise international students and scholars on university procedures, community resources, U.S. immigration regulations, and nonacademic personal concerns. ISSSO intercultural programs, such as the Culture Corps, Friendships International, and activities developed with the International Student Council and dozens of international student organizations, bring international students and Americans together for mutual learning. We welcome volunteers to join these and other programs to help us maximize the international experience of students and scholars to the successful completion of their academic objectives and enhance their personal growth.

Thielen Student Health Center

Director: Michelle Hendricks

The mission of the Thielen Student Health Center is to promote the health of the university community by providing high quality, accessible, affordable and accountable health care that encompasses prevention, wellness and education. Thielen Student Health Center supports the academic success of Iowa State University students while building healthy habits for a lifetime.

The health center is located on the corner of Sheldon Avenue and Union Drive, just west of Beyer Hall. Clinical Services include illness and injury care, women’s health, physical exams, allergy and travel care, immunizations, mental health care, laboratory and x-ray services, physical therapy, immunizations, pharmacy, and health care referrals. Prevention Services provides campus leadership to help reduce the negative impacts of high risk alcohol use, sexual misconduct and other health issues of importance to the college population.

All students enrolled in five or more credit hours pay the mandatory health fee each semester. The health center receives no funding from the state of Iowa and relies on the health fee for approximately 50% of its operating budget. Please note that the health fee is not health insurance. All students are encouraged to maintain adequate health insurance coverage while enrolled at Iowa State University. The health center will bill your health insurance for charges that apply from your visit if you have provided us with that information. Those taking 4 or fewer credits may still access services by paying the health fee. Spouses/domestic partners of students who opt to pay the health fee also have access to services. International students are required to pay the health fee.

Clinic hours:
Monday, 8 a.m.-6 p.m.; Tuesday, Thursday and Friday, 8 a.m.-5 p.m.; Wednesday, 9 a.m.-5 p.m.; Saturday, 9 a.m.-12 noon.

Hours vary during breaks and summer session. The Thielen Student Health Center is closed during all University Holidays. Patients are seen by appointment. Please call 515-294-5801. Each patient has the option of seeing the provider he/she requests.

Providers: Robin Engstrom, M.D.; Rebecca Fritzschke, M.D.; Malhar Gore, M.D.; Scott Meyer, M.D.; Pauline Miller, M.D.; Robert Nathanson, D.O.; Carver Nebbe, M.D.; Maria Pringle, ARNP; Mary S. Raman, ARNP; Cosette Scallon, M.D.; Marc Shulman, M.D.; Lee Wilkins, M.D.

After hour service is available for urgent or emergency problems at McFarland Urgent Care Clinic or Mary Greeley Medical Center Emergency Room. The cost is the responsibility of the student and/or the student’s insurance plan. The clinic’s after hour phone message includes the option of connecting to a nurse help line called First Nurse. First Nurse provides assistance with urgent health questions, including whether or not it is advisable to seek care through the emergency room.

The University Library

http://www.lib.iastate.edu/info/6000
Dean of the Library: Olivia M. A. Madison, M.L.A.
General Information—(515)-294-3842
Library Hours—(515)-294-4849

The University Library provides extensive research collections, services and information literacy instruction/information for all students. Facilities consist of the main Parks Library, the e-Library, the Veterinary Medical Library, two subject-oriented reading rooms (design and mathematics), and a remote library storage building.

The library’s extensive collections include electronic and print resources that support research and study for all undergraduate and graduate programs. Nationally recognized collections support the basic and applied fields of biological and physical sciences. Library holdings include more than 3,017,893 volumes and approximately 105,628 current serial titles.

The Parks Library includes four public service desks: the Help and Information Desk (H&I), the Circulation Desk, the Media Center (including Maps, Media, Microforms, and Course Reserve collections), and Special Collections. The library’s instruction program includes a required undergraduate information literacy course as well as a wide variety of subject-based seminars on effective use of library resources for undergraduate and graduate students.

The e-Library, accessed through the Internet, provides access to local and Web-based resources including electronic journals and books, local collections, online indexes, electronic course reserves and guides, and a broad range of subject research guides. Assistance in using this vast body of electronic resources is available at the H&I Desk in the Learning Connections Center, on the e-Library through the Ask Us! link, and through individually arranged appointments with subject librarians.

The Parks Library has a limited number of semiprivate study rooms available for faculty, graduate students, and professional and scientific staff. They are intended for research and other scholarly activities that require extensive use of library material. Normally, assignments are made for one year at a time.

Student Answer Center

http://www.registrar.iastate.edu/AnswerCenter/
Students who have questions but are not sure where to find an answer may contact the Student Answer Center located on the ground floor of Beardshear Hall. A staff member will answer campus-related questions on the spot or provide referrals to other university departments as needed. Information may include registration instruction, financial aid status, or classroom directions. Students can pick up forms, information brochures, campus maps, or use one of the computers to log on to AccessPlus or e-mail. Questions can be answered by email at answercenter@iastate.edu or by phone 515-294-4469.

Career Services Offices

Agriculture and Life Sciences: 141 Curtis Hall
Business: 1320 Gerdin Business Building
Career Services is a coordinated network of career services offices offering a broad range of programs and services for undergraduate, professional, and graduate students, faculty, staff, alumni, and employers. These services include career exploration, career development, experiential learning, and professional career search assistance programs. The goal is to provide constituents with life-long skills to assist with career development and exploration.

Programs and services are offered including online registration, position listing and interview scheduling; résumé referral; coordination of co-op and internship programs; workshops and seminars on career exploration, résumé preparation, letter writing, job search techniques, interview skills, applying to graduate and professional schools, and adjusting to the first job.

Each year career services sponsors multiple career fairs, which bring to the ISU campus hundreds of employers. The career services offices also coordinate on-campus interview opportunities. Each college career services office serves as a point of entry for students, alumni, and employers to the entire ISU network of coordinated, decentralized career services.

In addition to the college-based career services offices, the Career Exploration Service provides a variety of services to students who are unsure about their major or future career path. Students can work one-on-one with a trained career counselor, use the many books and electronic resources in the Career Exploration Center, or enroll in LAS 104, Personal Career Choice. All services are free for students and confidential.

Additional information on career services is available at www.career.iastate.edu.

Child Care

Child Care Administration, a unit of Human Resource Services, supports Iowa State University families by linking them with programs and services that can help meet their child care needs. The university child care coordinator is available to assist families in accessing services available both on the campus and in the community.

Child care programs located on campus include:

- Center for Child Care Resources: Assistance in locating campus and community child care services, 100 University Village, Suite 1010, 515-294-8833 or 1-800-437-8599
- University Community Childcare, Family Resource Center, 100 University Village, 515-294-9838
- The Comfort Zone: Childcare for kids who don’t feel so good, 100 University Village, 515-294-3333.
- Flex-Care: Part time care for children of ISU students, 100 University Village, 515-294-9838.
- University Child Care Center at Veterinary Medicine, 1700 Christensen Drive, 515-294-2273.
- ISU Child Development Laboratory School, Palmer HDFS Building, 515-294-3040.

For more information about child care options, contact the university child care coordinator at 515-294-8827.

Veterans Center

Jathan A. Chicoine
Veterans Services Coordinator
3578 Memorial Union
Phone: 515-294-9801
Email: jathan@iastate.edu

The Iowa State University Veterans Center provides a comfortable space for veterans and military personnel to connect and find support for issues related to enrolling at Iowa State University, and also assists with finding resources to help these individuals with adjusting to life as a student. In addition, the center provides assistance to faculty or staff with questions about military protocol. For example, when a veteran deploys, the Veterans Center can provide resources to help explain the process so that faculty and staff can meet the unique needs of students who may have obligations of military service.

Students receiving military educational benefits must work with a Veterans Administration certifying official in the Office of the Registrar in order to be certified for educational benefits. The Veterans Center is not directly involved in the certification process, but works closely as a team with V.A. certifying officials in order to provide the best support possible to veterans and their families attending ISU.
Tuition and Fees

For the most current and complete information see http://www.registrar.iastate.edu/fees/

All tuition, fees, expenses, and policies listed in this publication are effective summer session 2014 and are subject to change without notice by Iowa State University and the Board of Regents, State of Iowa.

Tuition and fees are based on credit load at 5:00 p.m. on the 10th day of class, which is the last day for adjustments downward in tuition and fee assessment.

Tuition

Enrollment is not complete until fees are paid. Tuition is charged based upon the number of credits in which a student is enrolled. Maximum charges start at 12 credits for undergraduate and veterinary medicine students. Maximum charges start at 9 credits for graduate students.

Students who are not residents of Iowa pay a higher tuition rate each semester. Nondegree undergraduate students and noncollegiate students pay the same fees as undergraduates. Tuition and fees are assessed in accordance with regulations of the Board of Regents, State of Iowa. Information about these regulations are found in this catalog under Admissions and Registrar.

Fees

Following are the descriptions of several commonly assessed fees for Iowa State University students. The list is not inclusive. All fees are subject to change without notice.

Account Review Fee (per credit hour): This fee will be assessed to those students who request account research for prior semester periods. The $10 per hour fee (with a minimum of $10) helps defray the costs of personnel time taken to perform the research, which involves gathering information from various sources when the request is made for a prior semester.

Activity, Services, Building and Recreation: The activity, services & building fee is a mandatory fee that supports a variety of activities and services for all students. It is not based on whether or not a student uses an individual activity or service. This fee provides several benefits such as student admission rates to concerts and athletic events and, unlimited use of CyRide, the Ames bus system. In addition, the fee provides support for campus recreation facilities, the Memorial Union, and campus organizations and services as allocated by the Government of the Student Body. All students will be charged a maximum of $320.70 each fall and spring semester, and $161 per summer semester. The activity, services, building and recreation fee includes assessments of the following amounts for each fall and spring semester.

<table>
<thead>
<tr>
<th>Fee Category</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student Activities</td>
<td>36.75</td>
</tr>
<tr>
<td>Student Services</td>
<td>95.60</td>
</tr>
<tr>
<td>Building</td>
<td>27.55</td>
</tr>
<tr>
<td>Recreation</td>
<td>160.80</td>
</tr>
<tr>
<td>Total</td>
<td>320.70</td>
</tr>
</tbody>
</table>

Exemptions are granted for students exclusively registered for the following: distance education courses (sections beginning with X); courses for which no tuition is assessed; continuous registration status courses, and high school students enrolled under the Post-Secondary Enrollment Options Act. Students in exemption categories named above may elect to pay this fee and will be assessed based upon their enrollment status.

For students who withdraw or change to an exempt status as defined above, the tuition adjustment schedule will also be used for the activity fee.

Additional Billing Statement: A student can authorize the ISU Accounts Receivable Office to mail a billing statement to another individual. The cost of the Additional Billing Fee to mail a monthly paper statement is $8 per semester. This remains in effect as long as the student is enrolled or until discontinued by the student.

Application Fees (non-refundable):

Undergraduate Domestic Student and Non-Degree Student - This $40 application fee is charged to individuals in the undergraduate domestic student and non-degree student categories applying for admission to Iowa State University. This fee is charged to cover administrative costs such as IT costs, personnel, and postage.

Graduate Student - This $60 application fee is charged to individuals applying for graduate admission to Iowa State University. This fee is charged to cover administrative costs such as IT costs, personnel, and postage. These individuals are charged a higher rate because of the additional costs associated with the evaluation of foreign academic records, the need to maintain certain resource materials and immigration forms, and increased postage for overseas mailings.

Graduate International Student - This $100 application fee is charged to non-immigrants applying for graduate admission to Iowa State University. This fee is charged to cover administrative costs such as IT costs, personnel, and postage. These individuals are charged a higher rate because of additional costs associated with the evaluation of foreign academic records, the need to maintain certain resource materials and immigration forms, and increased postage for overseas mailings.

Veterinary Medicine Student - This $75 application fee is charged to individuals applying for admission to the Veterinary Medicine College at Iowa State University for their first degree-seeking enrollment. This fee is charged to cover administrative costs such as IT costs, personnel, and postage.

Applied Music Fees (range of $100 - $290): The music fee is charged to students receiving private music instruction and is in addition to regular tuition. The fee offsets the costs of one-on-one instruction. Revenue generated from this fee is returned to students through music scholarships.

Continuing Education (per credit hour): A special tuition rate is assessed to students participating in these programs. The undergraduate assessment is $278 per credit and the graduate rate is $444 per credit. Summer camp programs entitled to the special rate are Anthropology and Geology. Students will be charged other fees in addition to tuition for enrolling in these programs. To obtain total fee information, students should contact the director of the individual program.

Diploma Replacement Fee: This $100 fee partially covers the expenses of creating or purchasing, administering, and scoring special examinations to determine whether students may receive test-out credit for a course in which they are not formally enrolled.

Developmental: A developmental course fee is charged in addition to the tuition charged for other courses on the student’s schedule. For example: A student taking 12 credits plus a developmental course will pay full-time tuition for the 12 credits, plus the developmental course fee(s). Developmental course fees range from $160 - $530. These fees are intended to cover the direct costs of offering these developmental courses.

Departmental Exam for Credit Fee (per exam): This $100 fee partially covers the expenses of creating or purchasing, administering, and scoring special examinations to determine whether students may receive test-out credit for a course in which they are not formally enrolled.

Doctoral Post Comprehensive or Prelim: Doctoral students who have passed the Ph.D. preliminary examination must register and pay appropriate fees. Students who are not on assistantship, and do not use the facilities, equipment, or staff time may pay this minimum fee of $70 in lieu of registration for credit. By so registering, they certify their continuing intention to complete their degree program.

FAX Fee (for sending official documents): A $7 FAX fee is charged for sending official documents, such as transcripts, certifications, and statement of account, using FAX technology. The fee covers the phone charges and personnel costs associated with preparing and sending the document.
Graduate College Fees - Copyright Fees – Doctoral Dissertation and Master’s Thesis (Optional): PhD and Master’s candidates may pay an optional fee of $55 for copyright services offered through ProQuest/UMI. The copyright fee covers the U.S. copyright fee as well as the costs to ProQuest of the copies required by the Copyright Office. The student will authorize this on-line with a credit card when submitting the electronic thesis.

Graduate College Fees - Open Access Publication Fees (Optional): Graduate students may choose Open Access Publishing PLUS from ProQuest, which ensures the widest possible exposure of the scholarship in the author’s thesis or dissertation. There is a fee of $85 for this optional service. The student authorizes this charge on line with a credit card when the electronic thesis or dissertation is submitted. Alternatively, ProQuest offers Traditional Publishing, for which no fee is charged.

Graduation and Degree Application Fee: This $75 fee is assessed to students when they submit an application for graduation. This fee partially covers costs associated with degree audits, senior degree evaluation, and the commencement ceremony. Additional costs include IT costs, personnel, postage/mailing of diplomas, and various supplies such as diploma paper, diploma covers, and honor cords. This fee also supports commencement ceremonies (including honorariums, facility costs, personnel, and the commencement program), and the University’s degree audit system, which provides both students and their advisers comprehensive, timely, and frequent information about progress towards degree. This fee is non-refundable.

Late Fee for Applying After Deadline (Graduate College students only) - A late fee of $20 will be assessed to Graduate College students applying for graduation after the graduation application deadline for a specific semester.

Health Facility: All students are charged an $8 Health Facility Fee each semester except for students exclusively registered for the following: distance education courses (courses with sections beginning with X); courses for which no tuition is assessed; continuous registration status courses; and high school students enrolled under the Postsecondary Enrollment Options Act. These exceptions do not apply to international students (except where noted) or graduate students on graduate assistantships. For students who withdraw or change to an exempt status as defined above, the refund schedule for tuition will be used for the health facility fee.

Students who carry the ISU sponsored student health insurance must also be assessed the health facility fee.

Health (Student Health): A $98 student health fee, which partially finances the services of the Thiellen Student Health Center, is charged to all students each semester. This fee is not assessed to students enrolled for four or fewer credits or students exclusively registered for the following: distance education courses (courses with sections beginning with X); courses for which no tuition is assessed; continuous registration status courses; Lakeside Laboratory courses; ISU employees whose primary role at the university is as an employee; and high school students enrolled under the Postsecondary Enrollment Options Act. These exceptions do not apply to international students or to graduate students on graduate assistantships. Students who are exempt from the mandatory health fee may use the services of the Thiellen Student Health Center on a fee for service basis, or may elect to pay the $98 Health Fee and $8 Health Facility Fee, which allows participants to receive services at the Thiellen Student Health Center for the same rate as students who pay the mandatory health fees. Spouses/domestic partners of students who wish to use the Thiellen Student Health Center must pay the $98 Health Fee and $8 Health Facility Fee.

Students who withdraw or change to an exempt status as defined above will receive a credit adjustment of 100 percent through the 10th day of classes, with no credit adjustment after the 10th day of classes. Students who add courses at any time during the semester will be assessed the student health fee if applicable according to the guidelines stated above. Students who carry the ISU sponsored insurance must also be assessed the student health fee. If spouse or domestic partner is covered under the insurance plan, the spouse (domestic partner) must also be covered under the Health Fee and Health Facility Fee.

Health Insurance: All international students and their accompanying dependents must enroll in the ISU Student and Scholar Health Insurance Program. ISU requires nonimmigrant international students and their dependents to purchase and maintain coverage through the ISU health insurance plan for the duration of their tenure at the university. Insurance plans purchased outside the university may be used for supplemental coverage, but cannot be substituted for the ISU plan. Students not assessed the mandatory Student Health Fee and spouses of students should contact the Student Health Insurance Office at 515-294-4820 for more information.

Identification Card (ISUCard) Replacement Fee: All students receive their first identification card free of charge. Those cardholders who have lost or misplaced their identification cards are assessed a $25 fee to cover the cost of replacement which includes the cost of materials, processing, and personnel associated with the replacement process.

International Student Orientation Fee: This $120 fee is charged to all new graduate, professional, and undergraduate degree-seeking students in a nonimmigrant status. This fee will support the international student orientation program as well as provide other transitional programs and activities unique to the international student population.

Lakeside Lab: Iowa Lakeside Laboratory is a field station of Iowa’s state universities that provides summer classes and research opportunities for students. The mission of Lakeside Lab is twofold: 1) to provide science classes and research opportunities for university students and 2) to offer public programs and provide services through the state universities. Lakeside Lab offers students a unique educational experience through small full-immersion, field-oriented courses. This fee ($278 undergraduate; $436 graduate) helps to cover program costs. More information can be found at Iowa Lakeside Laboratory (http://catalog.iastate.edu/interdisciplinaryprograms/lowlakesidelaboratory).

Late Payment of Fees or Charges: The finance charge is a penalty charged to discourage late payment of bills, as well as to make up for the university’s lost opportunity for investment income. The up to 1% per month finance charge also helps defray the costs of extra IT costs, handling, and mailing involved with the record keeping and collection of charges over a longer period of time. This fee is assessed to students and non-students.

Late Registration: This fee is assessed to students who do not register for classes before the first day of class. This fee is an administrative charge to encourage students to register for classes in a timely manner so as to provide enrollment management data to administrative areas who can make decisions on how to best utilize university resources. The stepped up fee for graduate students is necessary because ISU provides tuition scholarships for students on assistantship appointments. Students who do not register by the end of the second week may create significant payroll, fee assessment, and scholarship problems that will take excess staff time to resolve.

Undergraduate Students - $20
Graduate Students, Day 1-5 - $30
Graduate Students, Day 6-10 - $60
Graduate Students, Day 11 onward - $100

New Student Programs/Matriculation Fees: The New Student Programs/Matriculation fee of $195 will be assessed to all new degree seeking undergraduates. The fee covers costs associated with orientation and Destination Iowa State programming, including math assessment, publications, mailings, programming, and student assistants who provide services to students and their families during orientation and Destination Iowa State. For those students entering in the fall semester, the New Student Programs/Matriculation fee is refundable prior to May 1 (minus a $25 administrative charge).

Administrative Fee: This $25 fee is the nonrefundable portion of the New Student Programs/Matriculation Fee, and is assessed to defray administrative costs if the student chooses not to enroll prior to May 1 for fall and summer semesters and November 1 for spring semester.

Reissue Check Fee/Returned Check/Debit Fee

Reissue Check Fee: This fee will be assessed to those individuals who request the issuance of a duplicate check. This $30 charge helps defray the personnel time involved in researching the check, the cost of printing a new check, as well as the bank costs.

Returned Check - This $30 fee is a surcharge against the maker of a dishonored check. According to Section 554.3512, subsection 1, Code 2003 of the State of Iowa, a fee of $30 may be assessed against the maker of a dishonored payment instrument.

Debit Fee: This $30 fee is a surcharge against the person who authorizes a direct debit to an account that has been closed or has insufficient funds. According to Section 554.3512, subsection 1, Code 2003 of the State of Iowa, a fee of $30 may be assessed against the maker of a dishonored payment instrument.

Required Enrollment Fee - Graduate Students: Graduate students, who are in their graduation term and have no coursework left, are assessed a fee of $88. Students are charged this miscellaneous fee rather than tuition because there is no coursework involved. Graduate students on assistantship and international students, who must register and/or pay university fees to maintain their visa, are not eligible for this fee.
Schedule Change Fee (Drop/Add/Change - day six of classes and later): Students may drop or add a course through the fifth day of classes at no charge. On day six of classes and later, an administrative fee of $12 is charged for each form processed to partially cover the processing and personnel costs. This fee also encourages students to process course changes early in the term so other students may utilize course spaces.

Senior Fee (optional): This is a $3 optional fee for graduating seniors. The funds generated by the fee go to the Senior Class Council that sponsors a variety of activities for seniors. Events include the Senior Send-off, spring and fall commencement receptions, international graduation reception, graduation breakfast, senior week, and the solicitation of pledges for the senior class gift.

Special Course: Some courses have expenses above the cost of tuition that enhance the instruction. These fees may cover the cost of field trips, use of equipment, materials or supplies, or professional support. Applicable special course fees are listed with the specific course in the Schedule of Classes available at http://classes.iastate.edu/. Special course fees also appear on each student’s schedule detail available on AccessPlus.

Sponsored International Student Fee: The sponsored international student fee (5% of fees) is assessed to the sponsor of international students as a way to compensate for the special record keeping, billing requirements, correspondence, and the deferred payment option extended to sponsoring agencies.

Study Abroad Fees - Administrative Fee: This $105 fee is assessed to students participating in a group study abroad program. This fee is in addition to the program fee they must pay. It covers various administrative costs associated with these programs, such as registration and special processing, which creates additional workload.

Study Abroad Fees - Tuition: Assessment for study abroad credits up to a maximum of 12 credits is above and beyond tuition for other courses taken during the same term.

Study Abroad Fees - Program Fee – Fall Semester, Spring Semester and Summer Session: This study abroad program fee of $600 (fall and spring semesters) or $350 (summer session) will be used to partially finance the cost of administering university-wide study abroad programs. The fee will also be used for promotional efforts to increase campus awareness of these opportunities and to assist in the development of new programs. Finally, the fee will be used to assist in the cost of site visits and be of great value in the evaluation of programs and in advising Iowa State University students interested in these programs.

Summer Session: Tuition assessment is based on per credit as indicated in the fee schedule.

Technology: All students will be charged a technology fee each semester.

Full-time graduate and undergraduate students enrolled in the College of Engineering (including Systems Engineering, Agricultural Systems Technology, and Industrial Technology) are charged $223 per semester.

Full-time graduate and undergraduate students majoring in Computer Science are charged $223 per semester.

Full-time undergraduate students enrolled in the College of Business are charged $135 per semester, while full-time graduate students are charged $112 per semester.

All other full-time undergraduate students are charged the standard technology fee of $115 per semester. Full-time graduate students are charged a $92 per semester technology fee.

Students enrolled less than full-time are assessed prorated technology fees according to the number of credits for which they are enrolled.

High school students enrolled under the Postsecondary Enrollment Options Act; or students enrolled exclusively in courses for which no tuition is assessed are not assessed a technology fee.

For students who withdraw, technology fee adjustments will be made according to the tuition adjustment schedule. Adjustments for a reduction in credits below a full time load is 100 percent through the 10th day of classes, with no refunds after the 10th day of classes. Students who change their major will be charged the full technology fee for the major into which they transfer if the change occurs before the 10th day of classes. If the change occurs after the 10th day of classes, then no change in the technology fee assessment will occur.

Thesis Fee - Masters/Doctorate: This $145 nonrefundable fee is charged to any student who submits a master’s degree thesis or doctoral dissertation to the Graduate College. This fee helps defray costs associated with providing part-time support for the thesis office, electronic thesis administration, and the salary of the thesis reviewer.

Transcript Fee:

First and Additional Copies - This $16 fee is charged to anyone ordering a transcript. The fee covers IT costs, forms, mailing, and personnel costs.

Special Handling Charge (early transcript; partial transcript) - An additional $5 special handling charge will be assessed for same day transcript service or other requests that require immediate or special handling.

Veterinary Medicine Advance Payment: Student applicants to the College of Veterinary Medicine who have accepted an offer for a position to enroll in that college may subsequently change their mind and withdraw, sometimes as late as the first day of classes. These late withdrawals can result in unfilled spaces, or the need to ask an alternate candidate to make a hasty move to Ames with little time to make arrangements for financial aid, housing, or books. To reduce the incidence of late withdrawals, admitted students are assessed a non-refundable payment toward tuition of $500.

Veterinary Medicine Career Services Fee (one time): Veterinarian Medicine students are charged a $15 senior career services fee to help support the development and maintenance of an on-line job board for DVM students. Funds are used to help defray staffing, maintenance, data entry, archiving and other costs associated with offering this service.

Veterinary Medicine Mobile Computing Fee: This $2,550 fee is charged to all entering first year veterinary medicine students to support the college’s mobile computing initiative. The fee covers tablet PC and required software. This initiative ensures that students 1) have the most effective and efficient learning experience possible and 2) enter the workforce prepared to use current technologies continuing education and professional practice.

Workshops: The fee for one-credit workshops, with no other course enrollments, is $278 for undergraduate students and $444 for graduate students.

Fee Payment

The Accounts Receivable Office bills students for tuition, room, meal plan, and various other university charges. A statement of new charges is available on the first of each month on Access Plus and each student will receive an email message at that time at their Iowa State e-mail address telling them that their bill is available. It is the student’s responsibility to ensure that the university has a correct e-mail address and to regularly check their Iowa State e-mail account. Students who do not receive a billing statement before the term begins or are unable to use AccessPlus to view their bill, should contact the Accounts Receivable Office to learn the amount of their account balance due. Failure to receive a billing statement or view their account on AccessPlus will not exempt students from late penalties or from having a hold placed on their registration.

Payments for fall semester are due August 20. Payments for spring semester are due January 20. Payments for summer semester are due May 20.

Students may pay their university bill by direct debit through AccessPlus. They may also pay by mail by sending a check or money order (along with the bottom portion of the billing statement printed from AccessPlus) to Iowa State University, Treasurer’s Office, 1220 Beardshear Hall, Ames, IA 50011-2044. Payments may also be made in person by taking the personal check or certified funds to the drop box that is located behind the Student Answer Center on the ground floor of Beardshear Hall.

Credit Type - Audits and zero credit courses: Assessed according to contact hours; maximum charge for zero credit courses is three credit hours.

Credit Type - Partial credits: (.5) assessed on the next larger whole number of credits, e.g., .65 credits is assessed as 7 credits.

Credit Type - R credit: Assessed for the minimum fee only if no other credits are taken.

Deferred Billing Plan (payment over three months): This $20 administrative charge (fall, spring, and summer) is assessed to those students who do not pay their full tuition, room and board charges on or before August 20 for fall semester, January 20 for spring semester, and May 20 for summer semester. This permits students to spread payment over three installments. The administrative fee helps defray the extra IT and mailing costs involved in carrying and billing the charges over a longer period of time, as well as the extra personnel required in the Treasurer’s Office to handle the traffic involved with three tuition payments per semester instead of one.

Employer Reimbursement Payment Option: Iowa State is proud to offer a deferment option which is beneficial to employees of companies that offer tuition reimbursement plans. With a completed benefit certification form (http://www.public.iastate.edu/~u-bill/forms/Employer%20Reimbursement%20Def %20Payment%20Agreement.pdf) you may defer all allowable charges to become due 30 days after grades are presented. The benefit certification form must be
renewed each academic year, beginning with the summer semester. There is a $35 per semester fee for this deferment option.

For ISU Employees, you will need only complete the "Employee" portion of the form. The Accounts Receivable Office will complete the "Employer" certification provided you have submitted the Employee Tuition Grant request through AccessPlus and have had it approved through the Human Resource Services Office.

For more information contact Jaye Anderson at (515) 294-9455 or jjander@iastate.edu.

**Installment Payment Plan:** This administrative charge is assessed to those who elect the Iowa State University Installment Plan. This plan will allow students to pay tuition, room, board, fees, and accounts receivable costs in twelve equal monthly installments. The $50 annual application fee will defray the extra IT and mailing costs associated with carrying the charges over a longer period of time, as well as the bank fees associated with the direct debit of payments.

**Past Due Accounts:** If students have past due accounts receivable charges prior to the beginning of classes, they may be dropped from enrollment if these past due charges are not paid by the Friday before the first day of class. Students that are subject to being dropped will be notified via their Iowa State e-mail account.

**Refunds:** Refunds are available for students who cancel or withdraw their registration within the appropriate time period. To cancel their registration, students must notify the Office of the Registrar before the first day of the semester to avoid tuition assessment. Beginning on the first day of the semester, it will be necessary for students to formally withdraw from the university to terminate their registration. More information about canceling registration and withdrawing from classes can be found at http://www.registrar.iastate.edu/registration/responsibilities.shtml.

Tuition adjustments for all students are made for withdrawals of registration according to the following schedule:

**Withdrawal Date/Student Pays**
- Before first day of classes: 0%
- During class days 1-5: 10%
- During class days 6-10: 25%
- During class days 11-15: 50%
- During class days 16-20: 75%
- After the twentieth day of classes: 100%

Students who wish to appeal tuition and fee assessment for withdrawals should contact the tuition and fees area of the Office of the Registrar. Decisions of the Office of the Registrar will be based on the existence of extenuating circumstances beyond the control of the student.

Students who wish to appeal the decision of the Office of the Registrar must do so in writing within 10 calendar days after receiving the decision. Such appeals will then be reviewed by the Tuition Appeals Review Committee. Students who wish to appeal the decision of the Tuition Appeals Review Committee may make a request to do so in writing to the Office of the Provost.

**Fee refund for students with a reduction in credits below full-time:** 100 percent if change is made through the 10th day of classes. No adjustment is made after the 10th day of classes. Prorated adjustments in the tuition adjustment schedule are made for summer session courses, or any courses which are less than one semester in length (79 days).

**Workshop and Short Courses Refunds:** Students who drop workshops or short courses of one or two weeks on or before the first class meeting receive a 100% tuition adjustment for the course. No tuition adjustment will be made after the first day of classes. Students who drop three-week courses receive a 100% adjustment if they drop on or before the first day of classes, a 90% adjustment if they drop on the second day of classes, and no adjustment after the second day of classes.

**Tuition Schedule Per Semester**
In effect for Summer 2014. Subject to change without notice.

For students enrolled for less than a full course load and for the most current and complete information, see the Fee Schedule Per Credit list at http://www.registrar.iastate.edu/fees/.

For students enrolled for less than a full course load and for the most current and complete information, see the Fee Schedule Per Credit list at http://www.registrar.iastate.edu/fees/.
Undergraduate and Professional Degree Programs

The university is organized into eight colleges, including the Graduate College. Six colleges offer undergraduate degree programs, and the College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree. For a listing of the more than 100 majors offered by the Graduate College, see the summary at the end of the Graduate College section of this publication.

Iowa State University is accredited by the Higher Learning Commission of the North Central Association.

Bachelor’s Degree Requirements

To receive a degree, a student must meet the requirements of the curriculum in which the degree is to be awarded. Verification that the student has met these requirements is made by the dean of the college, who also has the authority to waive a requirement under exceptional circumstances.

A cumulative grade point average of at least 2.00 in all work taken at Iowa State University is required for graduation.

A student admitted as a transfer from another college or university is normally required to have a 2.00 cumulative average at the time of entrance. A student may, however, be admitted with a quality-point deficiency, but will be required to earn sufficient quality-points above a 2.00 at Iowa State to offset the quality-point deficiency at the time of entrance.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor’s degree from Iowa State University. There is no limit to the number of credits that may be transferred from a four-year institution.

A student who takes work at another college or university after having been enrolled at Iowa State must submit transcripts of all work attempted to the Office of Admissions at Iowa State. This work must average a 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such transcripts will be grounds for dismissal.

In unusual circumstances, the Academic Standards Committees of the respective colleges may review and give further consideration to the records of students who, except for grade-point average, have satisfactorily completed all graduation requirements. If the appropriate college Academic Standards Committee considers that the educational and professional needs of such a student have been satisfactorily met, or can be satisfactorily met by imposing further conditions, the committee may recommend to the dean of the college that the student be graduated or that a supplemental program be accepted in place of the fully unqualified grade point average. The college Academic Standards Committee chairperson reports such exceptional actions to the Faculty Senate Committee on Academic Standards and Admissions.

To qualify for a bachelor’s degree, a student must take a minimum of 32 credits in residence at Iowa State University. Also required is that the last 32 credits must be taken in residence, although under special circumstances, with prior written approval of the student’s major department, six of the last 32 credits may be transferred and applied toward a degree at Iowa State University.

A student may receive two bachelor’s degrees if he or she meets the requirements of each curriculum and earns at least 30 credits beyond the requirements of the curriculum requiring the greater number of credits. Each degree program must be approved by the appropriate department chair or head.

A student fulfilling the requirements of two separate curricula in different colleges may, in certain cases, receive a degree from one of the colleges with double majors crossing college lines. The permission of both deans must be obtained and each degree program must be approved by the appropriate department and dean.

Undergraduate Certificates

All undergraduate certificates require at least 20 credits, including at least 12 credits taken at Iowa State University. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above. The undergraduate certificate must include at least 9 credits that are not used to meet any other department, college, or university requirement except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses taken for an undergraduate certificate may not be taken on a pass–no pass basis. A cumulative grade point average of at least 2.00 is required in courses taken at Iowa State University for an undergraduate certificate. Specific requirements and/or restrictions are available from the department or program offering the undergraduate certificate (see Index or individual colleges for information).

Communication Proficiency Policy

Basic Principles: The faculty of Iowa State University believe that all educated people should be able to communicate effectively in a variety of settings and media, including electronic. Consequently, Iowa State University graduates are expected to develop competence in three interrelated areas of communication: written, oral, and visual.

This communication competence can best be achieved through the following five principles:

- Communication instruction and practice are distributed over the student’s entire undergraduate experience, both in and out of the classroom, from the first year through the senior year.
- Communication instruction and practice are distributed across the curriculum, both in communication courses and in courses in the student’s major.
- Active learning and higher-order thinking are fostered through communication.
- Faculty across the university share responsibility for the student’s progress in communication practices.
- Both faculty and students engage in ongoing assessment for continuous improvement of the student’s communication practices.

Iowa State University’s communication curriculum, based on these five principles, seeks to enrich the student’s understanding of the various subjects studied as well as prepare the student to communicate successfully in professional, civic, and private life.

Foundation Courses

To ensure that broad communication competence is addressed and developed at the beginning of a university career, all students will earn six credits in the two-course introductory sequence (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition), normally taken in the first and second years. Students will focus on writing and critical reading, with complementary instruction in visual, oral, and electronic communication; they will concentrate on civic and cultural themes; and they will enter work in a communication portfolio to document their current level of proficiency.

Upper-Level Curricula

Continuing development of communication skills will be directed by the student’s major department. Using the university’s basic principles as a guide, each department will specify a set of intended learning outcomes and design communication experiences by which students in the major can achieve the desired level of communication proficiency.

Departments may select from or combine a variety of communication options that best match their faculty, students, and curriculum:

- designated communication-intensive courses that integrate written, oral, and visual communication into a course in the major;
- a sequence of courses within the major that incorporates communication tasks of increasing complexity;
- linked courses—one in communication, one in the major—that integrate readings and assignments;
- advanced composition course(s) appropriate to the student’s major and offering instruction in written, oral, and visual communication;
- communication-intensive activities within or beyond course work, such as communication portfolios, discipline- or course- specific student tutoring, community service projects, internships, electronic presentations, informational fairs, juried competitions, entrepreneurial projects, newsletters, Web sites.

Departments will retain the authority for regularly assessing the degree to which their students achieve the specified learning outcomes and for making curricular improvements based on departmental assessment data.

Non-Native Speakers of English: Students admitted to the university who are graduates from non-U.S. high schools and whose first language is not English are required to take the English Placement Test before the beginning of their first semester of enrollment as students at Iowa State. This requirement includes freshmen as well as those who have transferred credit from other institutions. The test is administered by the English Department and is offered before the beginning of each semester. Students whose performance on this placement examination is satisfactory will follow the regular university communication proficiency requirements. Students who have deficiencies will enroll in special English classes, as determined by the test results.
Library Study
Independent study and investigation through the use of books, journals, and libraries enable students to grow intellectually and professionally in college and afterward. For this reason, all students receive instruction in the use of the University Library, including practice in how to locate the published literature of their respective fields of study.

U.S. Diversity and International Perspective Requirements
One of Iowa State University’s goals is to prepare its students to meet the challenges of responsible citizenship and effective professional roles in a culturally diverse global community. To help achieve this goal, all undergraduate students must fulfill graduation requirements in two areas: U.S. Diversity and International Perspectives. The specific standards used to certify students’ fulfillment of these requirements vary from major to major, but all require three credits of course work (or the equivalent in some alternative academic experience) for each of the requirements. In most cases, courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements of the student’s college or requirements of the student’s major. Students should consult with advisers for details of the requirements in particular majors.

The focus of the U.S. Diversity requirement is the multicultural society of the United States. Courses or alternative academic work used to meet the requirement address significant manifestations of human diversity and provide students with insights that enhance their understanding of diversity among people in the U.S.

Through completion of the U.S. Diversity requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

- articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
- analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
- analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
- analyze the perspectives of groups and individuals affected by discrimination
- analyze how cultural diversity and cooperation among social groups affect U.S. society.

The focus of the International Perspectives requirement is the global community. Its objective is to promote students’ understanding of cultural diversity and interdependence on a global scale. A period of immersion in a foreign culture is often a particularly effective way of meeting these objectives, so Iowa State University encourages the use of study-abroad experiences as a means of fulfilling the International Perspectives requirement. International students, because they are “studying abroad” from their home country’s perspective, are normally deemed to have met the International Perspectives requirement. The International Perspective requirement shall be waived for U.S. military veterans who have completed at least three months of service stationed outside of the United States.

Through completion of the International Perspectives requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

- analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
- describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
- analyze and evaluate the influence of global issues in their own lives.
- describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events.
- communicate competently in a second language.

Curriculum Requirements
The curriculum requirements, both in number of credit hours and specific courses, are guidelines for the student and his or her adviser in planning an academic program. The curriculum is subject to change and because of these changes, adjustments may need to be made.

Catalog in Effect
A student may choose to graduate under the catalog in effect at the time of graduation or a catalog for the previous five years, provided it covers a period of his or her enrollment. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed.

Special Programs
Honors Program
The Iowa State University Honors Program is designed for students who have demonstrated the ability and motivation to assume more than the usual responsibility for their undergraduate education. The program enables honors students to gain the maximum benefit from their undergraduate education. Students who graduate in the Honors Program receive the honors designation on their transcripts and diplomas.

Special educational opportunities. Students in the Honors Program determine their educational objectives and devise an individualized program of study to meet them. An honors program may include substitutions for required courses, a combination of courses from several departments to form a new major or minor, Honors courses or seminars, independent study and research, and other forms of innovation. Information about honors courses and seminars for the current academic year can be obtained from the Honors Program Office, 2130 Jischke Honors Building.

Other benefits. Members of the Honors Program have 24-hour access to the Jischke Honors Building as a quiet place to study, use the computers, and visit with other honors students. Students also have off-campus opportunities such as attending honors seminars and conferences. Members receive extended loan privileges at the Library, priority scheduling, and the opportunity to apply for research funds.

ISU students who have a cumulative grade-point average of at least 3.5 become eligible to apply for admission to the Honors Program during their second semester in residence and continue to be eligible as long as they have at least 48 semester credits remaining before graduation. Transfer students with a G.P.A. of 3.5 or higher and more than 60 credits remaining are also eligible to apply.

First-Year Honors Program
Entering first-year students with outstanding high school records and academic ability may be eligible to participate in the First-Year Honors Program (FHP). The FHP, which introduces students to an honors education, consists of honors sections of English 250 and Library 160, an FHP seminar, and honors advisers. Students may also choose to participate in the Honors Mentor Program, which introduces students to scholarship and research. Participants are matched with faculty members conducting research in an areas of mutual interest. Admission to the FHP is limited, and is based on past academic achievement, potential, and interest in an honors education.

Further information concerning the University Honors Program and the First-Year Honors Program can be obtained from the Honors Program Office, 2130 Jischke Honors Building or www.honors.iastate.edu.

Dual-degree Programs
Students who complete the first three years in certain curricula at Iowa State and who satisfactorily complete the first year in a recognized medical, dental, veterinary medical, or law curriculum may then be awarded a bachelor’s degree from Iowa State. (See Index, Preprofessional Study.)

Iowa Lakeside Laboratory
Iowa Lakeside Laboratory is an off-campus teaching and research facility situated on a 140-acre campus on West Okoboji Lake in Northwest Iowa. It is run cooperatively by Iowa State University, the University of Iowa, the University of Northern Iowa, and Drake University. Each summer Iowa State University students can take up to three undergraduate and/or graduate courses in archaeology, biology, ecology, environmental science, and/or geology for credit at Lakeside (see course listings under Iowa Lakeside Laboratory). All Lakeside courses are small, full-immersion, field-oriented courses that run for 1-4 weeks. Lakeside also offers a variety of short courses for teachers and a series of nontechnical short courses on various aspects of the natural history of Iowa. Information about Lakeside courses as well as registration and housing information can be obtained from the Biology Program Office, 103 Bessey Hall or on the Lakeside Web site, www.continuetelearn.uiowa.edu/lakesidelab (http://www.continuetelearn.uiowa.edu/lakesidelab).
Regent Universities Student Exchange Program
Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)
Iowa State University is a member of National Student Exchange. The NSE Consortium has 200 colleges and universities throughout North America providing academic and experiential exchange opportunities. Iowa State students with a cumulative GPA of at least 2.50 are eligible to apply. Credits earned as an NSE participant will be recorded on the students Iowa State transcript. Approval for credit in the NSE program should be sought from a student’s academic adviser in advance of application. Detailed information and applications forms are available from:

Study Abroad
Our planet is in a constant state of change, and occurrences in remote corners of the globe can profoundly impact our lives. It is clear from the effects of global warming, international trade, terrorism, and pandemics of one nature or the other that we cannot ignore what is happening beyond our shores and borders. Students who graduate without an understanding of other cultures, languages, business practices, and political systems are disadvantaged both educationally and professionally. Studying abroad helps prepare students to meet the challenges of an increasingly interdependent global community. Further, study abroad is an adventure that challenges the student academically and provides real opportunities to interact with other cultures, languages, and lifestyles.

As a leading international university, Iowa State has a major commitment to study abroad, and the Study Abroad Center is the central administrative office responsible for providing these opportunities. We offer advising on study abroad, international internships, work, volunteer opportunities, and service-learning, and scholarships. The Center’s library has a fine selection of travel books, information on international careers, cross-cultural orientation, social and business customs around the world, and travel bargains. The International Student ID Card and passport photographs can also be obtained at the Center.

With over 250 study abroad programs available, from one week to an academic year in length and in nearly every major, students are able to find a program that meets their needs and interests so they can discover for themselves why study abroad is the most exciting academic adventure.

Exchange Programs offer students the opportunity to study abroad at a partner university while paying Iowa State tuition.

Semester in Australia, Canada, Greece, Ireland, Italy, New Zealand, or UK offers unlimited placement opportunities for students to study at some of our most popular destinations for the fall, spring, and in some cases summer.

Intensive Language Programs offer students a total immersion experience in French, German, Russian, or Spanish by studying in Québec, Canada (French), France, Germany, Russia, Mexico, Peru, or Spain. Summer and semester programs are available.

Group Programs led by our faculty offer Iowa State courses around the world. Short-term options can take you from the Antarctic to England and to more than 40 other destinations.

www.studyabroad.iastate.edu

The main undergraduate academic programs of each college are listed below, together with the degrees awarded upon completion. In many cases certain majors, minors, options, or electives allow for increased specialization within the programs. Programs which are administered jointly by two colleges are listed within both colleges.

College of Agriculture and Life Sciences
- Agricultural Biochemistry, B.S.
- Agricultural Business, B.S.
- Agricultural and Life Sciences Education, B.S.
- Agricultural Studies, B.S.
- Agricultural Systems Technology, B.S.
- Agronomy, B.S.
- Animal Ecology, B.S.
- Animal Science, B.S.
- Biology, B.S.
- Culinary Science, B.S.
- Dairy Science, B.S.
- Diet and Exercise, B.S./M.S.
- Dietetics, B.S.
- Environmental Science, B.S.
- Environmental Studies, B.S.*
- Food Science, B.S.
- Forestry, B.S.
- Genetics, B.S.
- Global Resource Systems, B.S.
- Horticulture, B.S.
- Industrial Technology, B.S.
- Insect Science, B.S.
- International Agriculture, B.S.*
- Microbiology, B.S.
- Nutritional Science, B.S.
- Public Service and Administration in Agriculture, B.S.
- Seed Science, B.S.*

* A secondary major must be taken in conjunction with a primary major.

College of Liberal Arts and Sciences
- Advertising, B.A.
- Anthropology, B.A., B.S.
- Biochemistry, B.S.
- Bioinformatics and Computational Biology B.S.
- Biological/Pre-Medical Illustration, B.A.
- Biology, B.S.
- Biophysics, B.S.
- Chemistry, B.A., B.S.
- Communication Studies, B.A.
- Computer Science, B.S.
- Earth Science, B.A., B.S.
- Economics, B.S.
- English, B.A., B.S.
- Environmental Science, B.S.
- Environmental Studies, B.A., B.S.*
- French (see World Languages and Cultures, below)
- Genetics, B.S.
- Geology, B.S.
- German (see World Languages and Cultures, below)
- History, B.A., B.S.
- Interdisciplinary Studies, B.A., B.S.
- International Studies, B.A., B.S.*
- Journalism and Mass Communication, B.A., B.S.
- Liberal Studies, B.L.S.(a general studies degree)
- Linguistics, B.A.
- Mathematics, B.S.
- Meteorology, B.S.
- Music, B.A., B.Mus.
- Performing Arts, B.A.
- Philosophy, B.A.
• Physics, B.S.
• Political Science, B.A.
• Psychology, B.A., B.S.
• Public Relations, B.S.
• Religious Studies, B.A.
• Sociology, B.A., B.S.
• Software Engineering, B.S.
• Spanish (See World Languages and Cultures, below)
• Speech Communication, B.A., B.S.
• Statistics, B.S.
• Technical Communication, B.S.
• Women’s Studies, B.A., B.S.
• World Languages and Cultures B.A.:
  • French
  • German
  • Spanish

College of Business
• Accounting, B.S.
• Finance, B.S.
• Business Economics, B.S.
• Management, B.S.
• Management Information Systems, B.S.
• Marketing, B.S.
• Supply Chain Management, B.S.

College of Design
• Architecture, B.Arch.
• Community and Regional Planning, B.S.
• Design, B Des
• Graphic Design, B.F.A.
• Industrial Design, B.I.D.
• Integrated Studio Arts, B.F.A.
• Interior Design, B.F.A.
• Landscape Architecture, B.L.A.

College of Engineering
• Aerospace Engineering, B.S.
• Agricultural Engineering, B.S.
• Biological Systems Engineering, B.S.
• Chemical Engineering, B.S.
• Civil Engineering, B.S.
• Computer Engineering, B.S.
• Construction Engineering, B.S.
• Electrical Engineering, B.S.
• Industrial Engineering, B.S.
• Materials Engineering, B.S.
• Mechanical Engineering, B.S.
• Software Engineering, B.S.

College of Human Sciences
• Apparel Merchandising, Design B.S.
• Athletic Training
• Child, Adult, and Family Services, B.S.
• Culinary Science, B.S.
• Diet and Exercise, B.S./M.S.
• Dietetics, B.S.
• Early Childhood Education, B.S.
• Elementary Education, B.S.
• Event Management, B.S.
• Family Finance, Housing, and Policy, B.S.
• Food Science, B.S.
• Hospitality Management, B.S.
• Kinesiology and Health, B.S.
• Nutritional Science, B.S.

College of Veterinary Medicine
• Veterinary Medicine, D.V.M.

Minors
Requirements for an undergraduate minor are specified by many departments and programs in the university; a record of completion of such requirements appears on a student’s transcript. Lists of undergraduate minors offered by each college appear in the college description. Credits used to meet the minor requirements may also be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Some students may have to exceed the graduation credit requirement set by their college in order to meet the requirements of both the minor and the curriculum/major.

All minors require at least 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement. Courses taken for a minor may not be taken on a pass-not pass basis. Specific requirements and/or restrictions are available from the department or program offering the minor.

Minors by College
This list may not be inclusive. Check the college web sites for more information.

Agriculture and Life Sciences
• Agricultural Biochemistry
• Agricultural Business
• Agricultural Education and Studies
• Agricultural Systems Technology
• Agronomy
• Animal Ecology
• Animal Science
• Biology
• Emerging Global Diseases* (http://www.ent.iastate.edu/dept/undergrad/egd)
• Entrepreneurial Studies*
• Environmental Studies
• Food Safety*
• Food Science
• Forestry
• Genetics
• Horticulture
• Industrial Technology
• Insect Science
• International Agriculture
• Meat Science
• Microbiology
• Nutrition
• Sustainability* (http://www.las.iastate.edu/sustainability)

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

Liberal Arts and Sciences:
• Advertising
• African American Studies
• American Indian Studies
• Anthropology
• Astronomy
• Biochemistry
• Biological Illustration
• Biology
• Chemistry
• Chinese Studies
• Classical Studies
• Communication Studies
For Engineering Majors:

- Computer Science
- Criminal Justice Studies
- Economics
- Emerging Global Disease*
- English
- Entrepreneurial Studies*
- Environmental Studies
- French
- Genetics
- Geology
- German
- Gerontology
- History
- International Studies
- Journalism and Mass Communication
- Latin
- Linguistics
- Mathematics
- Meteorology
- Military Studies (Army Reserve Officers’ Training Corps)
- Music
- Music Technology
- Performing Arts
- Philosophy
- Physics
- Political Science
- Psychology
- Religious Studies
- Russian Studies
- Sociology
- Spanish
- Speech Communication
- Statistics
- Sustainability* (http://www.las.iastate.edu/sustainability)
- Technical Communication
- Technology and Social Change
- Women’s Studies

*The College of Liberal Arts and Sciences participates in these interdepartmental minors.

Human Sciences

- Apparel Merchandising, Design, and Production
- Athletic Coaching (http://www.kin.hs.iastate.edu/programs/minors)
- Child, Adult, and Family Services
- Culinary Science
- Dance (http://www.kin.hs.iastate.edu/programs/dance/minor)
- Family and Consumer Sciences Education
- Family Finance, Housing, and Policy
- Food Science
- Food Safety (interdepartmental minor)
- Gerontology (interdisciplinary minor)
- Hotel, Restaurant, and Institution Management
- Nutrition

College of Agriculture and Life Sciences

Wendy Wintersteen, Dean
Joe Colletti, Senior Associate Dean
David Acker, Associate Dean
John Lawrence, Associate Dean
www.ag.iastate.edu

Students enrolled in the College of Agriculture and Life Sciences are provided a broad-based education that includes coursework in communications; biological, physical, and social sciences; humanities; and technical subject matter.

Upon graduation students find diverse career opportunities because of the well balanced education they have received as undergraduates. Opportunities for graduates include production agriculture, business and industry, public agencies, education, biological and environmental sciences, value-added processing, natural resource management, rural development, animal and human health professions, and graduate studies.

High School Preparation

Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of Biology and chemistry, or Biology and physics, or chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.

College of Agriculture and Life Sciences Core Curriculum and Electives

All curricula in the College of Agriculture and Life Sciences lead to a bachelor of science degree. To graduate with a degree from the College of Agriculture and Life Sciences a student must complete while at Iowa State University a minimum of 18 credits from the College’s departmental offerings, program offerings, and cross-listed program offerings. Twelve or more of those 18 credits must be 300-level or above. Some curricula within the College may have more restrictive requirements.

Each major has specific degree requirements for graduation based on department and college student learning outcomes. College of Agriculture and Life Sciences core curriculum requirements for the four areas listed below are established to provide the foundation for successful accomplishment of both departmental and college level learning outcomes.

Students pursuing a primary major in another college and taking a second major in the College of Agriculture and Life Sciences must fulfill the core curriculum requirements of the College of Agriculture and Life Sciences, and all the requirements of the second major. The College of Agriculture and Life Sciences core curriculum follows.
Minimum Credits | Subject Area
10 Interpersonal and public communication skills
6 English composition with grades of C or better
3 Speech fundamentals with grades of C or better
1 credit in Lib 160
17 Mathematical, physical, and life sciences
3 credits of mathematics;
3 credits of statistics;
5 credits of physical science (e.g., chemistry, geological and atmospheric sciences, physics);
6 credits of life sciences including BIOL 101 Introductory Biology, or BIOL 211 Principles of Biology I, or BIOL 212 Principles of Biology II and 3 credits of life sciences from a college-approved list: (http://www.ag.iastate.edu/student/student_services.php)
15 Personal Development
3 credits of ethics from a college-approved list
3 credits of humanities from a college-approved list
3 credits of social sciences from a college-approved list
3 credits of U.S. diversity from an approved list
3 credits of international perspectives from an approved list

All students graduating with majors within the College of Agriculture and Life Sciences are expected to be proficient in the following college-level outcomes:

**Professional, Interpersonal and Cross-cultural Communications**
- Speak and write clearly and persuasively.
- Prepare effective visual, oral, written and electronic presentations.
- Effectively read, listen, observe and reflect.

**Problem-Solving/Critical Thinking**
- Apply a holistic approach to solving complex issue-laden problems.
- Apply a rational and objective process to:
  - Distinguish verifiable facts from value claims,
  - Determine the accuracy of statements,
  - Identify assumptions and detect bias,
  - Distinguish relevant from irrelevant information,
  - Prioritize needs.
- Summarize, analyze, and interpret simple research data and policy issues.

**Leadership**
- Organize, facilitate, and participate effectively in a group, team, or organization.
- Define a problem or opportunity, implement an action planning process, work towards a goal and justify actions taken.

**Entrepreneurship**
- Demonstrate innovativeness and creativity regardless of context.
- Identify and pursue opportunities that produce value.
- Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

**Life-long learning**
- Articulate how continued learning after graduation will enrich their lives.
- Identify and participate in new areas for learning beyond the classroom and after graduation.

**Ethics**
- Define and assess their ethical perspective, moral responsibility, and values.
- Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

**Environmental Awareness**
- Explain the physical and Biological interactions within ecosystems
- Explain how human activities impact the environment and how societies are affected by environmental change.

**International/Multi-Cultural Awareness**
- **U.S. Diversity** – Students should achieve two of the following outcomes. They should be able to:
  - Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues,
  - Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.,
  - Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.,
  - Analyze the perspectives of groups and individuals affected by discrimination,
  - Analyze how cultural diversity and cooperation among social groups affect U.S. society.

- **International Perspectives** – Students should achieve two of the following outcomes. They should be able to:
  - Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview,
  - Describe and analyze how cultures and societies around the world are formed, sustained, and evolve,
  - Analyze and evaluate the influence of global issues in their own lives,
  - Describe the values and perspectives of cultures other than their own and discuss how they influence individuals’ perceptions of global issues and/or events.
  - Communicate competently in a second language.

In addition to the College level learning outcomes, each department within the college has additional discipline-specific outcomes that apply to graduates of that department.

**Electives**
Students use electives to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog). Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the curriculum in which they expect to graduate. Students in ROTC may apply ROTC credits toward elective requirements. No more than 9 credits of 490 coursework from any Iowa State University curriculum may be applied toward graduation, although some individual curricula may establish a more restrictive use of 490 credits toward fulfillment of graduation requirements.

**Advising**
Each student in the College of Agriculture and Life Sciences works closely with an academic adviser who is associated with the major in which the student is enrolled.

All entering students are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisers in planning their first semester schedule of classes.

The advisers also assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information on career choices. Advisers make a special effort to adjust course schedules in accordance with students’ interests and capabilities.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture and Life Sciences. This may be accomplished through several majors; however, it is recommended that the student work closely with an academic adviser.

Each department prepares a guide to help students chart their long-term programs and to specify the exact requirements for graduation. Visit the college web site www.ag.iastate.edu.

**Graduate Study**
Graduate study in agriculture is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdepartmental offerings:
- Biorenewable Resources and Technology
- Ecology and Evolutionary Biology
- Environmental Science
- Genetics
A secondary major must be taken in conjunction with a primary major.

Seed Science
International Agriculture
Environmental Studies

Secondary Majors*
Public Service and Administration in Agriculture
Nutritional Science
Microbiology
Insect Science
Industrial Technology
Horticulture
Global Resource Systems
Genetics
Forestry
Food Science
Environmental Science
Dietetics
Dairy Science

Departments of the College

- Agricultural Education and Studies
- Agricultural and Biosystems Engineering
- Agronomy
- Animal Science
- Biochemistry, Biophysics, and Molecular Biology
- Ecology, Evolution, and Organismal Biology
- Economics
- Entomology
- Food Science and Human Nutrition
- Genetics, Development and Cell Biology
- Horticulture
- Natural Resource Ecology and Management
- Plant Pathology and Microbiology
- Sociology

Majors in the College of Agriculture and Life Sciences

A student has many majors from which to choose. Each major is unique although many courses are common. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits. Options and areas of specialization further define the majors and required coursework within some majors. In all cases, majors are designed to help students succeed in their chosen professions. Majors in agriculture and life sciences are:

Primary Majors

Agricultural Biochemistry
Agricultural Business
Agricultural and Life Sciences Education
Agricultural Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biochemistry
Biology
Culinary Science
Dairy Science
Dietetics
Diet and Exercise
Environmental Science
Food Science
Forestry
Genetics
Global Resource Systems
Horticulture
Industrial Technology
Insect Science
Microbiology
Nutritional Science
Public Service and Administration in Agriculture

Secondary Majors*

Environmental Studies
International Agriculture
Seed Science

*A secondary major must be taken in conjunction with a primary major.

Minors

Agricultural Biochemistry
Agricultural Business
Agricultural Education and Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biology
Culinary Science
Emerging Global Diseases*
Entrepreneurial Studies*
Environmental Studies
Food Safety*
Food Science
Forestry
Genetics
Horticulture
Industrial Technology
Insect Science
International Agriculture
Meat Science
Microbiology
Nutrition
Sustainability*

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

Certificate

Occupational Safety

See statement on minors in the Colleges and Curricula section of this catalog.

Special Programs

Agriculture Exploration

Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the Student Services Office until they select their majors.

Preventive Veterinary Medicine

Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with preventive veterinary medicine (see College of Veterinary Medicine section of this catalog for specific admissions requirements). Students who are undecided about the major they may take in general preveterinary studies (Gen PV). These students will also enroll in an orientation course, which describes the various college majors. A Gen PV student has up to 1.5 semesters to select a major. Preventive veterinary medicine students also have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission to the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an individual major. Students also may meet degree requirements of an individual major through the College of Agriculture and Life Sciences Honors Program. Further details are available from an academic adviser or from members of the College of Agriculture and Life Sciences Honors Committee.

Honors Program

The College of Agriculture and Life Sciences Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

Off-Campus Programs

Coursework leading to a master of science degree in agricultural education, master of agriculture degree in professional agriculture and a master of science
Agricultural Business

Administered by the Department of Economics. The major in agricultural business prepares students for advanced studies and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A major in agricultural business with a minor in economics is not permitted; however, a double major in agricultural business and economics is permitted.

Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture and Life Sciences, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service.

Curriculum in Agricultural Business

The major in agricultural business requires a minimum of 120 credits and a 2.00 minimum GPA. Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits. In addition, at most 9 P-NP credits of free electives can be applied toward the degree, and a minimum of 15 credits must be earned from courses taught by the Department of Economics at ISU.

International Perspective: 3 cr.
3 cr. from approved list.

U.S. Diversity: 3 cr.
3 cr. from approved list.

Communication/Library: 12.5 cr.
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
One of the following 3
ENGL 302 Business Communication
ENGL 309 Report and Proposal Writing
ENGL 314 Technical Communication
One of the following 3
SP CM 212 Fundamentals of Public Speaking
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
LIB 160 Information Literacy 1
A grade of C or better must be earned in two of the English composition courses (ENGL 150, ENGL 250, and (ENGL 302 or ENGL 309 or ENGL 314)) and the speech fundamentals course (SP CM 212 or AGEDS 311).

Total Credits 13

Humans and Social Sciences: 6 cr.
ECON 102 Principles of Macroeconomics 3
Three credits from approved course list. 3
Total Credits 6

Ethics: 3 cr. from approved list.

Life Sciences: 6 cr.
One of the following:
BIOL 101 Introductory Biology
BIOL 211 Principles of Biology I
Three credits from approved list of courses 3
Total Credits 6

Mathematics 12-14 cr.
One of the following: 4
MATH 160 Survey of Calculus
MATH 165 Calculus I
One of the following: 3-4
ECON 207 Applied Economic Optimization
MATH 166 Calculus II
STAT 226 Introduction to Business Statistics I 3
STAT 326 Introduction to Business Statistics II 3

Physical Sciences: 5 cr.
CHEM 163 College Chemistry 5
& 163L & 163L and Laboratory in College Chemistry or PHYS 111 General Physics
Total Credits 5

Agricultural, Food, or Natural Resources Sciences: 6 cr. from approved course list.

General Economics 9-10 cr.
ECON 101 Principles of Microeconomics 3
ECON 301 Intermediate Microeconomics 3-4
One of the following: 3
ECON 302 Intermediate Macroeconomics
ECON 353 Money, Banking, and Financial Institutions
ECON 492 Graduating Senior Survey R
Total Credits 9-10

Business and Agricultural Business 28.5 cr.
ACCT 284 Financial Accounting 3
FIN 301 Principles of Finance 3
Six credits from ACCT 285 or any 300-489 ACCT, FIN, MKT, MGMT, MIS, or SCM courses. 6
ECON 110 Orientation in Agricultural Business 0.5
ECON 235 Introduction to Agricultural Markets 3
ECON 292 Career Seminar 1
Nine credits of ECON courses from approved department list. 9
Three credits of 400-489 level ECON courses. 3
Total Credits 28.5

Electives 32-35 cr.
Agricultural business majors seeking a double major in economics must take a minimum of 42 credits in economics. These include all of the economics courses required for the economics major. To double major in economics, agricultural business majors must also earn an average grade of C or higher in ECON 101 Principles of Microeconomics, ECON 102 Principles of Macroeconomics, ECON 301 Intermediate Microeconomics, and ECON 302 Intermediate Macroeconomics, with no grade lower than a C#.

Agricultural Education and Studies
Undergraduate Study

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decisionmaking, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics
7. environmental awareness
8. U.S. diversity
9. international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/.

Minor - Agriculture and Life Sciences Education

The department offers a minor in agriculture and life sciences education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 400 level. Courses that can be taken for a minor are:

Graduate Study

The department offers the degrees of master of science and doctor of philosophy, with a major in agricultural education; a specialization in agricultural extension education; opportunities for emphasis in international agricultural education; and a minor for students majoring in other curricula. Graduate students who have earned a bachelor’s degree in an agricultural discipline may plan a course of study that leads to teacher certification. Candidates pursuing the master of science degree may do so by completing either a thesis or nonthesis program of study.

Students have an opportunity to develop competence in disciplinary foundations and ethics, program planning, learning theory, instructional methods, program leadership and administration, program evaluation, research methodologies, data analysis and interpretation, writing for publication, and grant proposal writing.

The department also cooperates in the international development studies option of the General Graduate Studies Program. Courses and workshops are offered, both on and off campus, for extension educators, teachers, and industry and government personnel.

Curriculum in Agricultural and Life Sciences Education

Administered by the Department of Agricultural Education and Studies. Students majoring in Agricultural Education choose between two options: Teacher Certification or Communications.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. Teacher certification requires 2.5 GPA at particular points in the program of study, and a minimum grade of C- in selected courses.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Interpersonal and Public Communication 10 cr.:

Total Credits 19

Agricultural Sciences and Economics: 31 cr.

All courses minimum grade C- is required.
Interpersonal and Public Communication 13 cr.:

- ENGL 150  Critical Thinking and Communication  3
- ENGL 250  Written, Oral, Visual, and Electronic Composition  3
- AGEDS 311  Presentation and Sales Strategies for Agricultural Audiences  3
- LIB 160  Information Literacy  1

One of the following:

- ENGL 302  Business Communication  3
- ENGL 309  Report and Proposal Writing  3
- ENGL 314  Technical Communication  3
- AGEDS 327  Advanced Communications for Agriculture and Life Sciences  3

Total Credits 10

Humanities and Social Sciences: 9 cr.

- ECON 101  Principles of Microeconomics  3
- or ECON 102  Principles of Macroeconomics  3

Psychology elective  3

Approved humanities elective  3

Ethics: 3 cr.

From approved list.

Math, Physical and Life Sciences: 20 cr.

- CHEM 163  College Chemistry  4
- or CHEM 177  General Chemistry I  3
- CHEM 163L  Laboratory in College Chemistry  1
- or CHEM 177L  Laboratory in General Chemistry I  1
- MATH 104  Introduction to Probability  3
- or MATH 150  Discrete Mathematics for Business and Social Sciences  3
- BIOL 211  Principles of Biology I  3
- BIOL 212  Principles of Biology II  3
- STAT 101  Principles of Statistics  3
- or STAT 104  Introduction to Statistics  3

Life science elective  1

Agricultural Sciences and Economics: 32 cr.

10 credits in a selected area of agricultural sciences and economics including 6 credits at the 300-400 level; 6 credits each in two additional areas of agricultural sciences and economics; 10 credits agricultural sciences and economics electives.

Professional Communications: 33 cr.

- AGEDS 110A  Agriculture and Life Sciences Education (Fall only)  1
- AGEDS 211A  High School Agriculture Programs  1
- AGEDS 310  Foundations of Agricultural Education Programs  3
- AGEDS 401  Planning Agriculture and Life Sciences Education Programs  3
- AGEDS 402  Methods of Teaching in Agriculture and Life Sciences  3
- AGEDS 416  Pre-Student Teaching Experience in Agricultural Education  1
- AGEDS 417  Supervised Teaching in Agriculture and Life Sciences  1-16
- C I 202  Learning Technologies in the 7-12 Classroom  3
- C I 204  Social Foundations of Education in the United States  3
- C I 333  Educational Psychology  3
- C I 406  Multicultural Foundations of School and Society: Introduction  3
- SP ED 401  Teaching Secondary Students with Exceptionalities in General Education  3

Total Credits 28-43

Electives: 12-13 cr.

Curriculum in Agricultural Studies

Administered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective:

3 cr. from approved list.

U.S. Diversity: 3 cr.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Interpersonal and Public Communication 13 cr.:

- ENGL 150  Critical Thinking and Communication  3
- ENGL 250  Written, Oral, Visual, and Electronic Composition  3
- AGEDS 311  Presentation and Sales Strategies for Agricultural Audiences  3
- LIB 160  Information Literacy  1

One of the following:

- ENGL 302  Business Communication  3
- ENGL 309  Report and Proposal Writing  3
- ENGL 314  Technical Communication  3
- AGEDS 327  Advanced Communications for Agriculture and Life Sciences  3

Total Credits 10

Electives: 12-13 cr.

Communication/Library 13 cr.:

- ENGL 150  Critical Thinking and Communication  3
- ENGL 250  Written, Oral, Visual, and Electronic Composition  3
- AGEDS 311  Presentation and Sales Strategies for Agricultural Audiences  3
- AGEDS 327  Advanced Communications for Agriculture and Life Sciences  3
- LIB 160  Information Literacy  1

Total Credits 13
Humanities and Social Sciences: 6 cr.
- ECON 101 Principles of Microeconomics: 3
- Plus 3 credit hours from approved humanities list: 3

Total Credits: 6

Ethics: 3 cr.
3 cr. from approved list.

Math Physical and Life Sciences: 17 crs.
- BIOL 101 Introductory Biology: 3
- BBMB 221 Structure and Reactions in Biochemical Processes: 3
- or PHYS 101 Physics for the Nonscientist: 3
- CHEM 163 College Chemistry: 4
- or CHEM 177 General Chemistry I: 1
- CHEM 163L Laboratory in College Chemistry: 1
- or CHEM 177L Laboratory in General Chemistry I: 1
- MATH 104 Introduction to Probability: 3
- or MATH 150 Discrete Mathematics for Business and Social Sciences: 3
- STAT 104 Introduction to Statistics: 3

Total Credits: 17

Agricultural Sciences and Economics: 44 cr.
- AGEDS 110B Agricultural Studies (Fall only): 1
- AGEDS 215 Career Seminar: 1
- AGEDS 315 Personal, Professional, and Entrepreneurial Leadership in Agriculture: 3
- AGEDS 450 Farm Management and Operation: 3
- AGEDS 451 Agricultural Law: 4
- AGRON 114 Principles of Agronomy: 3
- AGRON 154 Fundamentals of Soil Science: 3
- AGRON 212 Crop Growth, Productivity and Management: 3
- AGRON 212L Field Application and Problem Solving in Crop Production: 1
- AN S 101 Working with Animals: 2
- AN S 114 Survey of the Animal Industry: 2
- ECON 230 Farm Business Management: 3
- ECON 235 Introduction to Agricultural Markets: 3
- ECON 334 Entrepreneurship in Agriculture: 3
- NREM 120 Introduction to Renewable Resources: 3
- or NREM 130 Natural Resources and Agriculture: 3

And 6 credit hours from AN S, any level: 6

Total Credits: 44

Other Required Course:
Electives:
No more than 4 cr. of or 397 may count toward graduation.

Pre-veterinary Studies
Preparation for admission to veterinary medicine may be accomplished through the agricultural studies curriculum.

Courses primarily for undergraduates:
- AGEDS 110. Orientation.
  (1-0) Cr. 1. F.S.
  Orientation to the department. Careers in agriculture.
- AGEDS 110A. Agriculture and Life Sciences Education (Fall only).
  (1-0) Cr. 1. F.S.
  Orientation to the department. Careers in agriculture.
- AGEDS 110B. Agricultural Studies (Fall only).
  (1-0) Cr. 1. F.S.
  Orientation to the department. Careers in agriculture.
- AGEDS 110C. Agricultural and Life Sciences exploration (Spring only).
  (1-0) Cr. 1. F.S.
  Orientation to the department. Careers in agriculture.

AGEDS 111. Dean's Leadership Seminar.
(1-0) Cr. 1. F. Prereq: Permission of the Associate Dean for Academic Programs, College of Agriculture and Life Sciences
Introduction to leadership in agriculture and the life sciences, problem solving applied to current case studies, global perspective required by leaders, and designing programs to respond to societal needs in the agricultural and life sciences.

AGEDS 112. Agriculture Biotechnology Colloquium.
(1-0) Cr. 1. S. Prereq: Enrollment as an agricultural excellence scholar
The scientific basis of biological and social sciences in agriculture.

AGEDS 113. Access to Success Seminar I.
(1-0) Cr. Repeatable. F.S.
Course provides career skills, learning strategies and social and academic integration techniques to student members of Step Forward Learning Community. Utilization of campus resources, encouragement of self-exploration, and development of academic skills. Offered on a satisfactory-fail basis only.

AGEDS 116. Initial Field Experience in Agricultural Education.
(1-2) Cr. 1. F. Prereq: AGEDS majors only.
Field experience in a formal education setting designed to explore teaching as a career through guided observation and interviews, reflection, and on-campus dialogue.

AGEDS 211. Early Field Based Experience.
(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.S.S. Prereq: AGEDS 110
Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

AGEDS 211A. High School Agriculture Programs.
(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.S.S. Prereq: AGEDS 110
Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

AGEDS 211C. Agricultural Industries and Agencies.
(1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S.S.S. Prereq: AGEDS 110
Forty hours on-site in an agricultural setting. Students will have an opportunity outside the classroom for career guidance, role modeling, and reflection on their observations that they can apply to their courses and other educational experiences.

(1-0) Cr. 1. F.S. Prereq: Sophomore classification

AGEDS 310. Foundations of Agricultural Education Programs.
(3-0) Cr. 3. F.S.
Historical development of agricultural education programs. Philosophic premises, program goals and objectives, Educational and social issues impacting the implementation of agricultural education programs.

AGEDS 311. Presentation and Sales Strategies for Agricultural Audiences.
(3-0) Cr. 3. F.S.
Utilizing instructional methods, techniques, and problem solving, presentation and sales strategies with agricultural audiences.

AGEDS 312. Science With Practice.
(1-6) Cr. 3. Repeatable. F.S. Prereq: College of Agriculture and Life Sciences majors only
A planned learning experience wherein each student and faculty mentor develops a learning agreement that encompasses specific activities and expectations. Students are engaged in reflective activities that include journals, micro-reflections, formal presentations, and a comprehensive portfolio.

AGEDS 315. Personal, Professional, and Entrepreneurial Leadership in Agriculture.
(3-0) Cr. 3. F.S.
Leadership principles and strategies to influence and motivate team members to achieve personal, professional, and entrepreneurial goals in production agriculture, agricultural education, and agricultural organizations.
AGEDS 387. Advanced Communications for Agriculture and Life Sciences. (2-2) Cr. 3. F.S. Prereq: ENGL 250 or equivalent. Development of written, oral, visual and electronic communications relevant to agriculture and life sciences. Students develop skills and perspectives consistent with the application of agricultural education, natural resource, and life science issues. Provide explanations of scientific and technical concepts to rural, industry, and urban audiences. Field trips.

AGEDS 388. Agricultural Mechanics Applications. (2-3) Cr. 3. Repeatable, maximum of 2 times. F.S.S.S. Introduction to SMAW (Arc), GMAW (Mig), GTAW (Tig), Oxy-Fuel welding, Oxy-Fuel cutting, and Plasma cutting theories and applications. Emphasis will be on theoretical foundation of welding, safety, welding skill development, and management of equipment, and materials. Introduction to small engines and applications. Emphasis will be on theory of operating systems, maintenance, troubleshooting, failure analysis, and safety.

AGEDS 398. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of the department cooperative education instructor. Required of all cooperative education students. Students must register for this course prior to commencing each work period.

AGEDS 401. Planning Agriculture and Life Sciences Education Programs. (Dual-listed with AGEDS 501). (3-3) Cr. 3. F. Prereq: AGEDS 310 Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAE, and assessment and maintenance of program quality.

AGEDS 402. Methods of Teaching in Agriculture and Life Sciences. (Dual-listed with AGEDS 502). (3-0) Cr. 3. F. Prereq: Concurrent enrollment in AGEDS 401 Topics include: principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AGEDS 412. Internship in Agricultural Education and Studies. Cr. 2-6. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Junior classification in AGEDS and permission of instructor A supervised two to twelve week learning experience in an approved learning setting with application to educational, agricultural and/or environmental practices and principles.

AGEDS 414. Developing Agricultural Education Programs in Non-Formal Settings. (2-6) Cr. 2. S. Prereq: Permission of instructor Basic concepts in planning, conducting, and evaluating educational programs in non-formal settings. Includes programming for youth and adults in Extension, agricultural industry, and related agencies.

AGEDS 416. Pre-Student Teaching Experience in Agricultural Education. Cr. 1. F.S. Prereq: AGEDS 211, AGEDS 402 and admission to teacher education program A forty hour field-based experience in an approved secondary agricultural education program. Concurrent enrollment in 417 is required.

AGEDS 450. Farm Management and Operation. (2-4) Cr. 3. Repeatable, maximum of 9 credits. F.S.S.S. Prereq: Econ 235, Econ 230, junior classification Participation in the management and operation of a diversified Iowa farm. The class is responsible for the plans, records, and decisions for buying and selling the farm’s livestock, crops, and equipment. Special speakers on current topics. May be taken for credit 3 times at different times of the year with permission of the instructor.

AGEDS 451. Agricultural Law. (3-2) Cr. 4. S. Prereq: Senior classification The legal framework impinging upon decision-making by farmers, families, and individuals, real and personal property, contracts, secured transactions, negotiable instruments, debtor-creditor relations, bankruptcy, farm income tax organization of farms, intergenerational property transfers, trusts and farm estate planning, civil and criminal liabilities, environmental law, federal and state regulatory powers.

AGEDS 461. Technology Transfer and the Role of Agricultural and Extension Education. (Dual-listed with AGEDS 561). (3-0) Cr. 3. S. Impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs. Meets International Perspectives Requirement.

AGEDS 465. Horticulture Enterprise Management. (Cross-listed with HORT). (1-6) Cr. 3. F. Prereq: Econ 230, 6 credits of horticulture, and jr classification Participation in the management and operation of fruit and vegetable enterprises for local markets. The class is responsible for the plans, records, and decisions for planting, operating, harvesting, and marketing fruit and vegetables. AGEDS 465A. Horticulture Enterprise Management - Planting. (Cross-listed with HORT). (1-6) Cr. 3. S. Prereq: Econ 230, 6 credits of horticulture, and jr classification Participation in the management and operation of fruit and vegetable enterprises for local markets. Principles and practices of harvesting and developing a commercial business plan associated with the Hort 465 class. Laboratory work includes development of a horticulture enterprise business plan, high tunnel site preparation and planting, development of summer crop protocols, seedling production for the summer crop and seedling production for this crop (if applicable). Additionally, the class will be responsible for all crop maintenance decisions and record keeping during the season.

AGEDS 465B. Horticulture Enterprise Management: Harvesting. (Cross-listed with HORT). (1-6) Cr. 3. S. Prereq: Econ 230, 6 credits of horticulture, and jr classification Participation in the management and operation of fruit and vegetable enterprises for local markets. Principles and practices of harvesting and developing a commercial horticulture enterprise market plan associated with the Hort 465 class. Laboratory work includes completing the summer crop harvest, development of a horticulture marketing plan, high tunnel site preparation and planting, development of spring high tunnel crop protocols and all crop maintenance decisions and the record keeping for the fall high tunnel crop.

AGEDS 475. Agri-Marketing and Communications Competition. (2-0) Cr. 1-2. Repeatable, maximum of 6 credits. F.S. Prereq: Admission by invitation. Specialized training in communication and agricultural marketing knowledge and skills in preparation for intercollegiate competition. Maximum of 6 credits can be applied toward graduation.

AGEDS 488. Methods of Teaching Agricultural Mechanics. (2-3) Cr. 3. F.S. Methods and management techniques in agricultural mechanics laboratories. Emphasis will be on safety, mechanical skills development and management of students, facilities, equipment, and materials.

AGEDS 490. Independent Study in Agricultural Education and Studies. Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Junior or senior classification, permission of instructor

AGEDS 490A. Philosophy, Curriculum, and Methods. Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Junior or senior classification, permission of instructor

AGEDS 490B. Leadership, Evaluation, and Administration. Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Junior or senior classification, permission of instructor

AGEDS 490C. Business, Industry, and Production Agriculture. Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Junior or senior classification, permission of instructor
AGEDS 490D. Extension and International Agriculture. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor

AGEDS 490E. Instructional Technology. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor

AGEDS 490F. Environmental Issues. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor

AGEDS 490G. Entrepreneurship. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor

AGEDS 490H. Independent Study in Agricultural Education and Studies, Honors. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor

AGEDS 490I. Communications. 
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, permission of instructor

AGEDS 496. Agricultural Travel Course. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor

AGEDS 496A. International. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor

AGEDS 499. Undergraduate Research.
Cr. arr. F.S.SS. Prereq: Permission of instructor, adviser, and departmental chair

Courses primarily for graduate students, open to qualified undergraduates:

AGEDS 501. Planning Agriculture and Life Sciences Education Programs. 
(Dual-listed with AGEDS 401). (3-0) Cr. 3. F. Prereq: AGEDS 310 Responsibilities of an agricultural education teacher, curriculum development, experiential learning opportunities including FFA and SAЕ, and assessment and maintenance of program quality.

AGEDS 502. Methods of Teaching in Agriculture and Life Sciences. 
(Dual-listed with AGEDS 402). (3-0) Cr. 3. F. Prereq: Concurrent enrollment in AGEDS 501 Topics include principles of teaching and learning, individualized and group methods, application of learning, instructional management, special populations, and evaluation.

AGEDS 510. Introduction to Research in Agricultural Education. 
(3-0) Cr. 3. S. Prereq: Graduate classification Determining your research focus; developing research problems and objectives; reviewing the literature and establishing a theoretical framework; establishing procedures for data collection and analysis; ethical issues.

AGEDS 511. Professional Agricultural Presentation Practices. 
(3-0) Cr. 3. F.SS. Prereq: Graduate Classification The identification and use of key planning, delivery and evaluation of presentations using audience engagement techniques focused on research-based principles and field-based practices of professional presenters in agriculture and the life sciences.

AGEDS 514. Organizing Agricultural Information for Professional and Scientific Meetings. 
(1-2) Cr. 2. F. Prereq: Graduate classification in agriculture Concepts and practices in planning, preparing, and presenting materials used in professional meetings and scientific papers by agriculturalists with special emphasis on computerized delivery methods.

AGEDS 520. Instructional Methods for Adult and Higher Education in Agriculture and Natural Resources. 
(3-0) Cr. 3. S. Prereq: Graduate classification Theory and practice of adult education. Teaching and learning in formal and non-formal instructional programs for adult learners.

AGEDS 524. Program Development and Evaluation in Agricultural and Extension Education. 
(3-0) Cr. 3. F. Prereq: Graduate classification Theories and practice of program planning for nonformal education. Addresses use of program logic modeling and considers critical theories of planning to address power and interests in program development, needs assessment, and evaluation.

AGEDS 533. Introduction to Learning Theory in Agricultural Education. 
(3-0) Cr. 3. S. Prereq: Graduate classification Introduction to a variety of theoretical perspectives of learning and how they may be used within the context of agricultural education. Emphasis will be on the major domains of learning, developmental considerations, basic assumptions, concepts, and principles of various learning theories; understanding how each theoretical perspective may be used in both formal and non-formal educational settings.

AGEDS 550. Foundations of Agricultural Education. 
(3-0) Cr. 3. F. Prereq: Graduate classification Philosophical premises, ethical principles, historical development, contextual applications, and knowledge bases for agricultural education.

AGEDS 552. Data Analysis and Interpretation. 
(2-0) Cr. 2. F. Prereq: AGEDS 510 Strategies for analyzing, interpreting, and reporting quantitative research data in the social and behavioral sciences.

AGEDS 561. Technology Transfer and the Role of Agricultural and Extension Education. 
(Dual-listed with AGEDS 461). (3-0) Cr. 3. S. Impact of agricultural and extension education processes on development and their role in the transfer of agricultural technology. Utilizing situational analysis techniques to analyze and solve problems in international agricultural education programs. Meets International Perspectives Requirement.

AGEDS 590. Special Topics in Agricultural Education. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590A. Curriculum. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590B. Methods. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590C. Philosophy. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590D. Evaluation. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590E. Administration. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590F. Leadership. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590G. Guidance. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590I. Instructional Technology. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590J. Extension. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590K. International Agriculture. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 590L. Program Planning. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593. Workshop in Agricultural Education. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593A. Curriculum. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593B. Methods. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education

AGEDS 593C. Evaluation. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: 12 credits in agricultural education
AGEDS 593D. Administration.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: 12 credits in agricultural education

AGEDS 593E. Leadership.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: 12 credits in agricultural education

AGEDS 593F. Extension.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: 12 credits in agricultural education

AGEDS 593G. Program Planning.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: 12 credits in agricultural education

AGEDS 593H. Instructional Technology.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: 12 credits in agricultural education

AGEDS 593M. Biotechnology Workshop.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: 12 credits in agricultural education

AGEDS 599. Creative Component.
Cr. arr. Repeatable. F.S.S.S. For nonthesis masters degree programs.

Courses for graduate students:

AGEDS 615. Seminar in Agricultural Education.
(1-0) Cr. 1. Repeatable. F.S.S.S. Offered on a satisfactory-fail basis only.

AGEDS 615A. Writing for publication.
(1-0) Cr. 1. Repeatable. F.S.S.S. Offered on a satisfactory-fail basis only.

AGEDS 615B. Ethics.
(1-0) Cr. 1. Repeatable. F.S.S.S. Offered on a satisfactory-fail basis only.

AGEDS 615C. Writing for publication.
(1-0) Cr. 1. Repeatable. F.S.S.S. Offered on a satisfactory-fail basis only.

AGEDS 615D. Career planning.
(1-0) Cr. 1. Repeatable. F.S.S.S. Offered on a satisfactory-fail basis only.

AGEDS 615E. Contemporary issues.
(1-0) Cr. 1. Repeatable. F.S.S.S. Offered on a satisfactory-fail basis only.

AGEDS 617. Professional Internship for Agricultural Educators.
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of instructor
Analysis of the roles and activities of professionals in agricultural education. Supervised professional field-based experience in public and private settings. Offered on a satisfactory-fail basis only.

AGEDS 625. Leadership, Administration, Supervision and Management of Agricultural Education Programs.
(3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: Graduate classification Principles and best practices for leading, administering, supervising, and managing agricultural education programs. Analyzing selected case studies that apply theory to practice in agricultural situations.

AGEDS 699. Research.
Cr. arr. Repeatable.

Agricultural Systems Technology

Curriculum in Agricultural Systems Technology

Administered by the Department of Agricultural and Biosystems Engineering. A minor in agricultural systems technology is available; the requirements appear under Technology Systems Management, Courses and Programs.

Minor in agricultural systems technology

The Department of Agricultural and Biosystems Engineering offers a minor in agricultural systems technology which may be earned by completing a minimum of 15 credits of technology systems management courses, which includes:

<table>

</tr>
</tbody>
</table>

Total Credits 15

Students majoring in Agricultural Systems Technology choose between two options: Agricultural and Biosystems Management or Machine Systems.

Total Degree Requirement: 120 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:
6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library: 13 cr.

### Courses primarily for undergraduates:

**TSM 110. Introduction to Technology.**  
(1-0) Cr. 1. F. Prereq: AST and I Tec majors only or permission of instructor  
Team-oriented introduction to agricultural systems technology and industrial technology. Internships, careers, competencies, academic success strategies, industry visits, transition to academic life.

**TSM 111. Experiencing Technology.**  
(0-2) Cr. 1. S. Prereq: AST or I Tec majors only or permission of instructor  
Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of technology. Report writing, internships, competencies, industry visits.

**TSM 115. Solving Technology Problems.**  
(2-2) Cr. 3. S. Prereq: MATH 140 or higher (can be taken concurrently)  
Solving technology problems and presenting solutions through technical reports. Unit conversions, unit factor method, SI units, significant digits, graphing and curve fitting. Use of spreadsheet programs to solve and present technology problems. Solution of technology problems using computer programming languages.

**TSM 116. Introduction to Design in Technology.**  
(2-2) Cr. 3. F.S.  
2D projections and 3D representations of objects, national and international standards for documentation, manufacturing processes, design projects, and teamwork. Free-hand sketching techniques and parametric solid modeling will be covered.

**TSM 201. Preparing for Workplace Seminar.**  
(Cross-listed with A B E.) (1-0) Cr. 1. F.S. Prereq: Prereq: Sophomore classification in AE, AST, BSE, or I Tec  

**TSM 210. Fundamentals of Technology.**  
(3-0) Cr. 3. F.S. Prereq: TSM 115 or equivalent, MATH 140 or higher  
Introduction to problem solving related to fundamental agricultural and/or industrial technology systems and mathematical tools needed for data analysis. Basic laws of energy, force, and mass applied to technology systems such as: mechanical power transmission; heating, ventilation and air conditioning; electrical circuits. Introduction to engineering economics: using the time value of money to make economic decisions.

**TSM 216. Advanced Technical Graphics, Interpretation, and CAD.**  
(2-2) Cr. 3. F.S. Prereq: TSM 116  
Advanced design systems incorporating 2D and 3D design and productivity tools for use in manufacturing settings. Topics include: Geometric Dimensioning and Tolerancing, 3D models, weld symbols, advanced visualization, design modeling of parts and assemblies, feature based design. Use of AutoCAD and parametric modeling software.

**TSM 240. Introduction to Manufacturing Processes.**  
(1-4) Cr. 3. F.S.  
A study of selected materials and related processes used in manufacturing. Lecture and laboratory activities focus on materials, properties, and processes. This includes plastics and metals.

**TSM 270. Principles of Injury Prevention.**  
(3-0) Cr. 3. F.  
Basic foundations of injury causation and prevention in home, motor vehicle, public, and work environments.

**TSM 310. Total Quality Improvement.**  
(3-0) Cr. 3. S. Prereq: STAT 101 or STAT 104, junior classification  
Introduction to the fundamental concepts of TQM - Deming style of management, statistical studies to understand the behavior of products, processes, or services, and how to define and document processes and customer focus. Introduction to continuous improvement tools and methods - DMAIC, SPC, and Lean, Six Sigma, and JIT; emphasis on team work and problem solving skills.

**TSM 322. Preservation of Grain Quality.**  
(2-0) Cr. 2. S. Prereq: MATH 140 or higher  
Principles and management for grain quality preservation. Quality measurement. Drying and storage. Fans and airflow through grain. Handling methods.

**TSM 322L. Preservation of Grain Quality Laboratory.**  
(0-3) Cr. 1. S. Prereq: Credit or enrollment for credit in TSM 322  

**TSM 324. Soil and Water Conservation Management.**  
(2-2) Cr. 3. S. Prereq: MATH 140 or MATH 151  
Introduction to engineering and conservation principles applied to the planning of erosion control systems, water control structures, water quality management, and drainage and irrigation systems.

**TSM 325. Biorenewable Systems.**  
(Cross-listed with A B E, AGRON, AN S, BUSAD, ECON). (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher  
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedback production, processes, products, co-products, economics, and transportation/logistics.

**TSM 327. Animal Production Systems.**  
(3-0) Cr. 3. F. Prereq: TSM 210  
Advanced animal feeding operations. Environmental controls for animal production. Response of animals to the environment. Heat and moisture balance in animal housing. Ventilation, water, feed handling, air pollution, odor and waste management systems.

**TSM 330. Agricultural Machinery and Power Management.**  
(2-3) Cr. 3. S. Prereq: TSM 210, MATH 142 or MATH 151  
Selection, sizing, and operational principles of tractors and machinery systems. Cost analysis and computer techniques applied to planning and management of agricultural machine systems. Principles, operation, and application of agricultural machinery.

**TSM 333. Precision Farming Systems.**  
(2-2) Cr. 3. F. Prereq: MATH 140 or higher, junior or senior classification  

**TSM 335. Tractor Power.**  
(3-3) Cr. 4. F. Prereq: TSM 210, MATH 145X  
Theory and construction of tractor engines, mechanical power trains and hydraulic systems. Introduction to traction, chassis mechanics, and hydraulic power.

**TSM 371. Fluid Power Systems Technology.**  
(2-2) Cr. 3. S. Prereq: TSM 210  
Fundamental fluid power principles. Fluid properties. Function and performance of components such as pumps, valves, actuators, hydrostatic transmission. Analysis of fluid power circuits and systems. Introduction to electrohydraulics. Course includes lab using fluid power trainers.
TSM 340. Advanced Automated Manufacturing Processes. (2-2) Cr. 3. F. Prereq: TSM 216, TSM 240, MATH 151
NC programming operations for CNC mills and lathes. Transfer of parts descriptions into detailed process plans, tool selection, and NC codes. Computer assisted CAD/CAM NC programming for 2D/3D machining.

TSM 363. Electric Power and Electronics for Agriculture and Industry. (3-3) Cr. 4. F. Prereq: TSM 210
Basic electricity. Electrical safety, wiring, 3-phase service, controls, and motors for agricultural and industrial applications. Planning building lighting and electrical systems. Electronics to sense, monitor, and control mechanical processes.

TSM 370. Occupational Safety. (3-0) Cr. 3. S. Prereq: TSM 270, junior standing
Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing a safe workplace for their employees. Includes the identification and remediation of workplace hazards.

TSM 371. Occupational Safety Management. (2-0) Cr. 2. S.
Introduction to occupational safety and health administration and management. Focus on development and management of safety programs and obtaining employee involvement in occupational safety programs.

TSM 372. Legal Aspects of Occupational Safety and Health. (2-0) Cr. 2. Alt. F., offered odd-numbered years. Prereq: TSM 371
A review of the common legal issues facing safety practitioners in the workplace. Includes OSHA, EPA and DOT regulations; workers' compensation, as well as common liability issues.

TSM 376. Fire Protection and Prevention. (3-0) Cr. 3. Alt. F., offered even-numbered years.
An overview of the current problems and technology in the fields of fire protection and fire prevention, with emphasis on industrial needs, focusing on the individual with industrial safety responsibilities.

TSM 393. Topics in Technology. Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393A. Topics in Technology: Agriculture and Biosystems Management. Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

Offered as demand warrants. Web-based instruction.

TSM 393C. Topics in Technology: Manufacturing. Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

Offered as demand warrants. Web-based instruction.

Offered as demand warrants. Web-based instruction.

Offered as demand warrants. Web-based instruction.

TSM 393G. Topics in Technology: Electronic Integration for Agriculture and Production Systems. Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

Offered as demand warrants. Web-based instruction.

TSM 397. Internship in Technology. Cr. R. F.S.S.S. Prereq: At least 45 credits of coursework, in AST or I Tec major, and approval of internship coordinator
A supervised work experience in an approved learning setting with application to technology practices and principles. Reporting during work experience and self and employer evaluation required. Minimum GPA requirement.

TSM 399. Work Experience in Technology. Cr. 2. Repeatable, maximum of 4 credits. F.S.S.S. Prereq: TSM 397 the preceding semester and approval of internship coordinator
Written reports and reflection on work experience. A maximum of 4 credits of TSM 399 maybe be used toward the total credits required for graduation.

TSM 415. Technology Capstone I. (0-2) Cr. 1. F.S. Prereq: senior classification with less than 32 credits remaining
Identification and proposal development of a current technological problem in agricultural or industrial systems. Formation of project teams and selection of faculty project mentor in preparation to complete project.

TSM 416. Technology Capstone II. (1-6) Cr. S. F.S. Prereq: TSM 415 in previous semester
Continued team development, communications, and responsibilities. Development of alternate solutions using creativity, critical analysis, and planning techniques. Selection of promising potential solutions to technology problems identified in TSM 415 for development and analysis by student teams. Presentation of project through oral presentations, written reports, and working prototypes.

TSM 440. Cellular Lean Manufacturing Systems. (2-2) Cr. 3. F. Prereq: TSM 310
Introduction to lean tools and techniques that reduce costs and improve business performance: JIT, VSM, SMED, Kaizen, Standard Work, Cycle Time Reduction, Takt Time, A3, etc. Emphasis on lean thinking and competency development through application: simulations, case studies, industry guests and mentors, teamwork and industry-related lean projects.

TSM 443. Statics and Strength of Materials for Technology. (2-2) Cr. 3. S. Prereq: PHYS 111, MATH 142 or MATH 151
Application of standard analytic and computer based techniques of solving problems related to force and moments. The properties of materials and how to select appropriate materials for a particular design is reviewed.

TSM 444. Facility Planning. (3-0) Cr. 3. F. Prereq: TSM 216 and TSM 240; STAT 101 or STAT 104
Principles and practices in designing, evaluating, and organizing existing facilities or creating new facilities. Emphasis on AutoCAD-based new facility design project - product design, production flow analysis, activity relationship analysis, layout deployment, materials handling, office and other service requirement design, and the necessary cost analysis for the new facility.

TSM 465. Automation Systems. (2-2) Cr. 3. S. Prereq: TSM 363
Theory and applications of automation systems. Emphasizes features, capabilities, design and programming skills of Programmable Logic Controller (PLC) based industrial control systems. Introduction to industrial robots and sensors.

TSM 470. Industrial Hygiene: Physical, Chemical, and Biological Hazards. (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: MATH 151 or higher
A qualitative and quantitative introduction to health effects of chemical, biological, and physical hazards in a workplace.

TSM 471. Safety Laboratory. (0-2) Cr. 1. Alt. S., offered even-numbered years. Prereq: TSM 470 (can be taken concurrently)
Introduction to equipment, methods, and strategies to measure, evaluate, control, and research hazards and risk in the workplaces.

TSM 477. Risk Analysis and Management. (Dual-listed with TSM 577). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: MATH 151, STAT 101 or STAT 104
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today's complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 490. Independent Study. Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490H. Independent Study: Honors. Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.
TSM 490I. Independent Study: Manufacturing.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490J. Independent Study: Agriculture and Biosystems Management.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490O. Independent Study: Occupational Safety.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 493. Workshop in Technology.
Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493A. Workshop in Technology: Agriculture and Biosystems Management.
Cr. 1-4. Repeatable.
Offered as demand warrants.

Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 493C. Workshop in Technology: Manufacturing.
Cr. 1-4. Repeatable.
Offered as demand warrants.

Cr. 1-4. Repeatable.
Offered as demand warrants.

TSM 496. Technology Travel Course.
Cr. 1-4. Repeatable. F.S.SS. Prereq: Permission of instructor
Limited enrollment. Tour and study of international industrial technology and/or agricultural systems technology industries. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C; or option D.
Meets International Perspectives Requirement.

TSM 496A. Technology Travel Course: Pre-departure.
Cr. 1-4. Repeatable. F.S.SS. Prereq: Permission of instructor
Limited enrollment. Tour and study of international industrial technology and/or agricultural systems technology industries. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C; or option D.
Meets International Perspectives Requirement.

TSM 496B. Technology Travel Course: Travel.
Cr. R. Repeatable. F.S.SS. Prereq: Permission of instructor
Limited enrollment. Tour and study of international industrial technology and/or agricultural systems technology industries. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C; or option D.
Meets International Perspectives Requirement.

TSM 496C. Technology Travel Course: Post-travel.
Cr. 1-4. Repeatable. F.S.SS. Prereq: Permission of instructor
Limited enrollment. Tour and study of international industrial technology and/or agricultural systems technology industries. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C; or option D.
Meets International Perspectives Requirement.
TSM 601. Graduate Seminar. (Cross-listed with A B E) (1-0) Cr. 1. F.
- Keys to writing a good MS thesis or PhD dissertation. How to begin formulating research problems. Discussion of research problems and broader impacts, review of literature, identifying knowledge gaps and needs, long-term goals, research hypotheses, objectives, rationale and significance, methods, procedures, data analysis, and reporting results. Presentation of research proposal in different formats. Using peer review and responding to feedback.

TSM 652. Program and Learner Evaluation. (3-0) Cr. 3. Prereq: STAT 401 or equivalent
- Techniques for evaluating learners, facilities, programs, and staff utilizing theories for developing measurement instruments. Outcomes assessment is emphasized.

TSM 655. Academic Leadership in Technology and Engineering. (3-0) Cr. 3. Prereq: Permission of instructor
- A definition of the faculty role in technology and engineering disciplines, including strategies for dealing with programs, personnel, and constituencies are presented. Leadership skills involving team formation, team operation, and conflict resolution are addressed.

TSM 657. Curriculum Development in Technology and Engineering. (3-0) Cr. 3. Prereq: Permission of instructor
- Basic concepts, trends, practices, and factors influencing curriculum development, techniques, organization and procedures. Emphasis will be given to program and course development.

TSM 694. Teaching Practicum. (Cross-listed with A B E), Cr. 1-3. Repeatable. F.S.S.
- Prereq: Graduate classification and permission of instructor
- Graduate student experience in the agricultural and biosystems engineering departmental teaching program.

TSM 697. Internship in Technology. Cr. R. Prereq: permission of major professor and approval by department chair, graduate classification
- One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

TSM 698. Technical Communications for a Doctoral Degree. (Cross-listed with A B E), Cr. 1, F.S.S.
- A technical paper draft based on the dissertation is required of all Ph.D. students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on the dissertation is required of all Ph.D. students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

TSM 699. Research.
- Cr. arr.

Agronomy Undergraduate Study

The Department of Agronomy offers a degree of Bachelor of Science (B.S.) in agronomy. The department has a curriculum designed to provide a strong foundation in crop science, soil science, agricultural meteorology, and plant breeding. It prepares students for science-based professional positions, graduate study, or research careers across the spectrum of agronomy.

The curriculum provides both flexibility and direction for students by offering four in-depth options: agroecology, crop management and business, plant breeding and biotechnology, and soil and environmental quality. There are many opportunities for undergraduate students to be involved in progressive research and international agriculture.

Graduates have the theoretical and practical knowledge needed for efficient and sustainable production of food, feed, fuel, and fiber. Graduates are skilled in critical thinking, problem solving, and communicating and working effectively with others. They understand the ethical, cultural, and environmental dimensions of issues facing professionals in agriculture and natural resources.

An agronomy major prepares students for employment in agricultural business and industry, agricultural service organizations, crop production and soil management, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, and in regulatory agencies as plant, food, and grain inspectors. Additional areas of work open to agronomists include integrated pest management, land appraisal, agricultural finance, turfgrass management, and the home lawn care industry.

The department offers an international scholar program leading to a credentialed title of “Agronomy International Scholar” for agronomy majors who have distinguished themselves in global understanding and international experience. Contact the department for requirements.

Department of Agronomy website - http://www.agron.iastate.edu/index.aspx

4-year plan

Graduate Study

The department offers programs that lead to the degrees master of science (M.S.) and doctor of philosophy (Ph.D.), with majors in agricultural meteorology; crop production and physiology with optional specialization in seed science or weed science; plant breeding; and soil science with specialization in soil chemistry, soil fertility, soil management, soil microbiology and biochemistry, soil morphology and genesis, or soil physics. Minor work is offered for students with majors in other departments. A dissertation is required for the Ph.D., and a thesis is normally required for the M.S. An M.S. nonthesis option is available for students desiring a general degree program, with additional coursework and a written creative component substituting for thesis research.

Graduates have a broad knowledge base germane to their area of study. They are trained to integrate and apply knowledge to different situations. Students develop skills in scientific reasoning, organization, and logical presentation of ideas.

The department offers an M.S. in agronomy that is designed for students who are currently employed full-time. This program is taught at a distance using computer-based instructional media. The M.S. in agronomy is nonthesis only. The M.S. degree in plant breeding is offered both on-campus or at a distance.

The department cooperates in interdepartmental majors in bioinformatics and computational biology; ecology and evolutionary biology; environmental science; genetics; microbiology; molecular, cellular, and developmental biology; plant biology; and sustainable agriculture.

Prerequisite to major work in this department is completion of an undergraduate degree program with emphasis on agronomic, biological, and physical sciences.

Curriculum in Agronomy

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. A minimum of 15 credits of agronomy courses must be earned at Iowa State and not transferred from other institutions.

International Perspective: 3 cr.

3 cr. http://www.registrar.iastate.edu/students/div-ig-guide/IntlPerspectives-current

U.S. Diversity: 3 cr.

3 cr. http://www.registrar.iastate.edu/students/div-ig-guide/usdiversity-courses

Communication/Library: 13 cr.

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
SP CM 212 Fundamentals of Public Speaking 3
or AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3
LIB 160 Information Literacy 1
One of the following: 3
ENGL 302 Business Communication 3
ENGL 309 Report and Proposal Writing 3
ENGL 314 Technical Communication 3

Humanities and Social Sciences: 6 cr.

3 cr. from approved humanities list http://www.agstudent.iastate.edu/agriculturestudentservices/humanities.htm
ECON 101 Principles of Microeconomics 3
Ethics: 3 cr.
3 cr. from approved list - http://www.agstudent.iastate.edu/agriculturestudentservices/ethicalist.html

Mathematical Sciences: 6-7 cr.
STAT 104 Introduction to Statistics 3
One of the following: 3-4
MATH 140 College Algebra 3
MATH 150 Discrete Mathematics for Business and Social Sciences 3
MATH 160 Survey of Calculus 4
MATH 165 Calculus I 4
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I 4

Physical Sciences: 15-17 cr.
CHEM 163 College Chemistry 5
& 163L and Laboratory in College Chemistry or
CHEM 177 General Chemistry I 5
& 177L and Laboratory in General Chemistry I
PHYS 111 General Physics 5
or PHYS 115 Physics for the Life Sciences
GEOL 100 The Earth 3
One of the following: 3
AGRON 259 Organic Compounds in Plant and Soils 3
BBMB 221 Structure and Reactions in Biochemical Processes 3
CHEM 231 Elementary Organic Chemistry 4
& 231L and Laboratory in Elementary Organic Chemistry

Life and Biological Sciences: 11 cr.
BIOL 211 Principles of Biology I 4
& 211L and Principles of Biology Laboratory I
AGRON 320 Genetics, Agriculture and Biotechnology 3
or
BIOL 313 Principles of Genetics 4
& 313L and Genetics Laboratory

Agronomy Core:
AGRON 105 Leadership Experience R
AGRON 110 Professional Development in Agronomy: Orientation 0.5
AGRON 114 Principles of Agronomy 3
AGRON 154 Fundamentals of Soil Science 3
AGRON 206 Introduction to Weather and Climate 3
AGRON 210 Professional Development in Agronomy: Career Planning 1
AGRON 310 Professional Development in Agronomy: Work Experience R
or AGRON 311 Professional Internship in Agronomy
AGRON 316 Crop Structure-Function Relationships 3
AGRON 354 Soils and Plant Growth 4
& 354L and Soils and Plant Growth Laboratory
AGRON 410 Professional Development in Agronomy: Senior Forum 1
Agricultural Issues - 1 course from agriculture issues list - http://www.agron.iastate.edu/academic/undergraduate/ag_issues.aspx 3

Total Credits 21.5

Advising Option Choice
Complete 24 cr. including 16 cr. from 300 level courses or above from approved list; no more than 4 cr. of AGRON 490G or AGRON 490H may count toward graduation.

Electives:
27 credits, student choice

Advising Options

Agroecology
The Agroecology option provides the scientific foundation for understanding and managing agricultural systems with ecological and environmental perspectives. Students may pursue graduate study or careers in sustainable agriculture.
AGRON 311 Professional Internship in Agronomy 1
AGRON 392 Systems Analysis in Crop and Soil Management 3
AGRON 450 Issues in Sustainable Agriculture 3
AGRON 497 Agroecology Field Course 3
Biological Science Choices: (Choose at least 2) 6 credits
AGRON 217 Weed Identification 1
AGRON 317 Principles of Weed Science 3
AGRON 334 Forage Crop Management 3
AGRON 485 Soil and Environmental Microbiology 3
ENT 376 Fundamentals of Entomology and Pest Management 3
ENT 471 Insect Ecology 3
HRT 424 Sustainable and Environmental Horticulture Systems 3
HRT 484 Organic Agricultural Theory and Practice 3
PL P 408 Principles of Plant Pathology 3
Physical Science Choices: (Choose 2)
AGRON 360 Environmental Soil Science 3
ENSCI 402 Watershed Hydrology 4
AGRON 404 Global Change 3
AGRON 405 Environmental Biophysics 3
AGRON 406 World Climates 3
AGRON 407 Mesoscale Meteorology 3
AGRON 452 GIS for Geoscientists 3
Social Science Choices: (Choose 1)
AGRON 342 World Food Issues: Past and Present 3
ENSCI 484 Ecosystem Ecology 3
SOC 325 Transition in Agriculture 3

Crop Management and Business
The Crop Management and Business option is designed for those individuals who seek employment as agronomists working in agribusinesses such as cooperatives, seed companies, herbicide and fertilizer dealers, or crop consulting firms.
AGRON 212 Crop Growth, Productivity and Management 3
AGRON 212L Field Application and Problem Solving in Crop Production 1
ENT 376 Fundamentals of Entomology and Pest Management 3
PL P 408 Principles of Plant Pathology 3
AGRON 217 Weed Identification 1
AGRON 317 Principles of Weed Science 3
Problem Solving:
AGRON 392 Systems Analysis in Crop and Soil Management 3
Business Choices: (Choose 3)
ACCT 284 Financial Accounting 3
ECON 102 Principles of Macroeconomics 3
ECON 230 Farm Business Management 3
ECON 325 Introduction to Agricultural Markets 3
Agronomic Choices: (Choose 2)
AGRON 260 Soils and Environmental Quality 3
AGRON 325 Biorenewable Systems 3
AGRON 334 Forage Crop Management 3
AGRON 338 Seed Science and Technology 3
AGRON 360 Environmental Soil Science 3
AGRON 421 Introduction to Plant Breeding 3
AGRON 463 Soil Formation and Landscape Relationships 4

Plant Breeding and Biotechnology
The Plant Breeding and Biotechnology option is for those who would like to work in plant breeding or plant biotechnology.
MATH 165 Calculus I 4
or MATH 181 Calculus and Mathematical Modeling for the Life Sciences I 4
MATH 166 Calculus II 4
or MATH 182 Calculus and Mathematical Modeling for the Life Sciences II 4
CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
CHEM 178L Laboratory in College Chemistry II 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 314 Principles of Molecular Cell Biology 3
STAT 401 Statistical Methods for Research Workers 4
AGRON 421 Introduction to Plant Breeding 3

Computer Science Choices: (Choose 1)

GEN 444 Introduction to Bioinformatics 4
COM S 207 Fundamentals of Computer Programming 3

Problem Solving:
AGRON 392 Systems Analysis in Crop and Soil Management 3
Agronomic Choices: (Choose 1)
AGRON 212 Crop Growth, Productivity and Management 3
AGRON 338 Seed Science and Technology 3
Interest Choices: (Choose 1)
BBMB 404 Biochemistry I 3
BIO 315 Biological Evolution 3
GEN 410 Analytical Genetics 3

Soil and Environmental Quality

The Soil and Environmental Quality option is designed for those individuals interested in careers in environmental science, soil science, or natural resource management.

AGRON 260 Soils and Environmental Quality 3
Problem Solving Choices: (Choose 1)
AGRON 360 Environmental Soil Science 3
AGRON 392 Systems Analysis in Crop and Soil Management 3
GIS Choices: (Choose 1)
ENSCI 345 Natural Resource Photogrammetry and Geographic Information Systems 3
C R P 451 Introduction to Geographic Information Systems 3
AGRON 452 GIS for Geoscientists 3
Interest Choices: (Choose 3)
AGRON 459 Environmental Soil and Water Chemistry 4
AGRON 463 Soil Formation and Landscape Relationships 4
AGRON 477 Soil Physics 3
AGRON 485 Soil and Environmental Microbiology 3
Interest Choices: (Choose 2)
ENSCI 301 Natural Resource Ecology and Soils 4
ENSCI 402 Watershed Hydrology 4
AGRON 404 Global Change 3
AGRON 405 Environmental Biophysics 3
AGRON 406 World Climates 3
AGRON 407 Mesoscale Meteorology 3

Minor - Agronomy

The department offers a minor in Agronomy that may be earned by taking 18 credits in these agronomy courses: AGRON 114, AGRON 154, AGRON 212 & AGRON 354 and 6 credits from approved agronomy courses, with a minimum of 3 of the 6 credits from courses at the 300 level or higher. At least 6 credits must be taken at Iowa State University in courses numbered 300 or above. At least 9 credits must be unique to the requirements for the minor and not used to fulfill specified requirements from the student’s major.

Courses Required For a Minor:

AGRON 114 Principles of Agronomy
AGRON 154 Fundamentals of Soil Science
AGRON 212 Crop Growth, Productivity and Management

AGRON 354 Soils and Plant Growth

Approved Elective Courses for Minor Credit (6 credits minimum, 3 credits at 300+ level)

CROP SCIENCE
AGRON 212L Field Application and Problem Solving in Crop Production
AGRON 217 Weed Identification
AGRON 316 Crop Structure-Function Relationships
AGRON 317 Principles of Weed Science
AGRON 320 Genetics, Agriculture and Biotechnology
AGRON 334 Forage Crop Management
AGRON 338 Seed Science and Technology
AGRON 351 Turfgrass Establishment and Management
AGRON 421 Introduction to Plant Breeding

SOIL SCIENCE
AGRON 260 Soils and Environmental Quality
AGRON 354L Soils and Plant Growth Laboratory
AGRON 360 Environmental Soil Science
ENSCI 402 Watershed Hydrology
AGRON 452 GIS for Geoscientists
AGRON 459 Environmental Soil and Water Chemistry
AGRON 463 Soil Formation and Landscape Relationships
AGRON 477 Soil Physics
AGRON 485 Soil and Environmental Microbiology

AGRICULTURAL METEOROLOGY
AGRON 206 Introduction to Weather and Climate
AGRON 404 Global Change
AGRON 405 Environmental Biophysics
AGRON 406 World Climates
AGRON 407 Mesoscale Meteorology

GENERAL AGRONOMY COURSES
AGRON 342 World Food Issues: Past and Present
AGRON 392 Systems Analysis in Crop and Soil Management
AGRON 450 Issues in Sustainable Agriculture
AGRON 497 Agroecology Field Course

Students minoring in Agronomy can take the following courses: AGRON 331, AGRON 370, AGRON 490, AGRON 491, and AGRON 496; but only one (1) credit from these courses can be used in the minor program

*Substitution of AGRON 155 may be allowed for students in Horticulture and AGRON 156 for students in Landscape Architecture.

Courses primarily for undergraduates:

AGRON 105 Leadership Experience.
Cr. R. F.S.S.
A participatory experience in activities or completion of a course that enhances the development of leadership and group-dynamic skills. See adviser for departmental requirements.

AGRON 110, Professional Development in Agronomy: Orientation.
(0.5-0) Cr. 0.5 F.
Orientation to college life, the profession of agronomy, and the agronomy curriculum.

AGRON 114, Principles of Agronomy.
(2-3) Cr. 3. F.S.
A foundation course in agronomy applying crop, soil, and environmental sciences in understanding agricultural systems in the world. Includes introductory concepts of plant, soil, tillage, pest, environmental, and sustainable aspects of crop production. Off-campus version offered through internet by interactive computer courseware.

AGRON 120, Introduction to Renewable Resources.
(Cross-listed with ENV S, NREM). (3-0) Cr. 3. F.S.
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.
AGRON 154, Fundamentals of Soil Science.
(2-2) Cr. 3. F.S. Prereq: CHEM 163
Introduction to physical, chemical, and biological properties of soils, their
formation, classification, and distribution. Use of soil survey and computer
databank information in balancing agronomic, economic, and environmental
concerns in soil management. Credit for only one of Agron 154, 155, or 156 may
be applied toward graduation.

AGRON 155. Soils for Horticultural Scientists.
(2-2) Cr. 3. F.S. Prereq: CHEM 163, enrollment in horticulture major
Physical, chemical and biological properties of natural and manufactured soils.
Use of soil information when producing plants on natural and manufactured soils.
Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

AGRON 156. Soils for Urban Use.
(2-2) Cr. 3. F.S.
Restricted to students outside the College of Agriculture. Fundamental properties of
soils and their application to urban settings. Development of a site plan for
area of land using data from soil survey and computerized data bank information.
Field trip. Credit for only one of Agron 154, 155 or 156 may be applied toward
graduation.

(Cross-listed with ENV S, GEOL, MTEOR). (3-0) Cr. 3. S.
Study of the occurrence, history, development, and management of world
water resources. Basic hydrologic principles including climate, surface water,
groundwater, and water quality. Historical and current perspectives on water
policy, use, and the role of water in society and the environment.

AGRON 206. Introduction to Weather and Climate.
(Cross-listed with MTEOR), (3-0) Cr. 3. F.S.
Basic concepts in weather and climate, including atmospheric measurements,
radiation, stability, precipitation, winds, fronts, forecasting, and severe weather.
Applied topics include global warming, ozone depletion, world climates and
weather safety.

(1-0) Cr. 1. F. Prereq: Sophomore classification
Career planning, résumé and cover letter preparation, and interviewing
techniques. Career orientation through invited speakers.

AGRON 212. Crop Growth, Productivity and Management.
(3-0) Cr. 3. F.S. Prereq: AGRON 114
Production and management practices for corn, soybean, small grain, and
forage crops common to Midwestern U.S. agriculture. Emphasis on growth and
development, plant characteristics, management practices, crop use, quality, and
problem-solving.

AGRON 212L. Field Application and Problem Solving in Crop Production.
(0-2) Cr. 1. F.S. Prereq: AGRON 154, credit or enrollment in AGRON 212
Problem solving in crop production. Integration and application of concepts
introduced in Agron 212. Agronomic field skills such as crop and pest
identification, integrated management strategies, staging crop growth, agricultural
math and site specific management related to crop production will be emphasized.

AGRON 217. Weed Identification.
(0-3) Cr. 1. F.S. Prereq: BIOL 101 or equivalent
Identification of important weeds of agricultural, horticultural and native

(3-0) Cr. 3. S. Prereq: CHEM 163, 167, or 177; BIOL 211; AGRON 154 or AGRON 260;
Math 140
Structure, function, and transformations of organic compounds significant in plant
and soil environments.

AGRON 260. Soils and Environmental Quality.
(Cross-listed with ENV S). (3-0) Cr. 3. F.S.
Role of soils in environmental quality and natural resources management.
Emphasis on soil erosion and conservation, water quality, and environmental
planning. Saturday field trip.

AGRON 283. Pesticide Application Certification.
(Cross-listed with ENT, FOR, HORT). (2-0) Cr. 2. S.
Core background and specialty topics in agricultural, and horticultural pesticide
applicator certification. Students can select certification categories and have the
opportunity to obtain pesticide applicator certification at the completion of the
course. Commercial pesticide applicator certification is emphasized.

AGRON 288. Cooperative Education.
Cr. R. F.S.SS, Prereq: Permission of department cooperative education
cooridnator, sophomore classification
Required of all cooperative education students. Students must register for this
course prior to commencing each work period.
AGRON 351. Turfgrass Establishment and Management.  
(Cross-listed with HORT). (3-0) Cr. 3. F. Prereq: HORT 221 or AGRON 114 or BIOL 211  
Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadides, and seed and sod production. The biology and control of turfgrass pests.  
AGRON 351L. Turfgrass Establishment and Management Laboratory.  
(Cross-listed with HORT). (0-3) Cr. 1. F. Prereq: Credit or enrollment in HORT 351  
Those enrolled in the horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor.  
AGRON 354. Soils and Plant Growth.  
(Cross-listed with HORT). (3-0) Cr. 3. F.S. Prereq: AGRON 154 and BIOL 101 or BIOL 211  
Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutrient elements, pH, organic matter maintenance, and rooting development.  
AGRON 354L. Soils and Plant Growth Laboratory.  
(Cross-listed with HORT). (0-3) Cr. 1. F.S. Prereq: Agron or Hort major with credit or enrollment in AGRON 354  
Laboratory exercises in soil testing that assess a soil's ability to support nutritive requirements for plant growth.  
AGRON 356. Site-Specific Crop and Soil Management.  
(3-3) Cr. 4. F. Prereq: AGRON 114 and AGRON 354  
Development of solutions to crop and soil management problems in consultation with a producer-client. Identification of client needs, gathering technical information, and use of geographic information systems as a tool for making crop and soil management decisions. Development and presentation of solutions for crop and soil management issues confronting the client. Emphasis will be placed on identifying and solving complex problems that require integration of biological, physical, chemical, and economic components within a crop and soil management system.  
AGRON 360. Environmental Soil Science.  
(Cross-listed with ENSCI). (2-3) Cr. 3. S. Prereq: AGRON 154 or ENSCI 250 or GEOL 201  
Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.  
AGRON 370. Field Experience in Soil Description and Interpretation.  
(0-3) Cr. 1. Repeatable, maximum of 4 times. F.S. Prereq: AGRON 154 and permission of instructor  
Description and interpretation of soils in the field and laboratory, emphasizing hands-on experience. Evaluation of soil information for land use. Students may participate in intercollegiate judging contests.  
AGRON 388. Agronomic Sciences in Theory and Practice.  
(1-0) Cr. 1. F. Prereq: Junior or senior classification  
Scientific methodologies and ethics. Preparation for writing an optional undergraduate thesis.  
(2-3) Cr. 3. F.S. Prereq: AGRON 316 and AGRON 354  
Management strategies at the level of the farm field. Emphasis will be on participatory learning activities.  
AGRON 398. Cooperative Education.  
Cr. R. F.S.SS. Prereq: Permission of department cooperative education coordinator; junior classification  
Required of all cooperative education students. Students must register for this course prior to commencing each work period.  
AGRON 402I. Watershed Hydrology and Surficial Processes.  
(Cross-listed with ENSCI, IA LL). Cr. 4. SS. Prereq: Four courses in physical or biological sciences or engineering  
Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed.  
AGRON 404. Global Change.  
(Dual-listed with AGRON 504). (Cross-listed with ENSCI, ENV S, MTEOR). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing  
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.  
AGRON 405. Environmental Biophysics.  
(Dual-listed with AGRON 505). (Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. Alt. S.. offered odd-numbered years. Prereq: MATH 165 or MATH 182 or equivalent and some computer programming experience (any language)  
A description of the physical microenvironment in which organisms live. Emphasis on the movement of energy (heat and radiation) and mass (water and carbon) among organisms, the soil, and atmosphere. Applications to humans, other animals, plants, and plant communities.  
AGRON 406. World Climates.  
(Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. F. Prereq: AGRON 206/MTEOR 206  
Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required.  
Meets International Perspectives Requirement.  
(Dual-listed with AGRON 507). (Cross-listed with MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: Math 166 and Mteor 443  
(1-0) Cr. 1. F. Prereq: Senior classification  
Development of an appropriate content for professionalism. Topics include professional certification, ethics, and maintaining an active network of information sources and professional contacts in support of lifelong learning. Student interpretation, writings, presentations, and discussions.  
(Dual-listed with AGRON 517). (3-0) Cr. 3. S. Prereq: AGRON 317  
Ecology and evolution of invasive plants and weeds in habitats disturbed by humans. Life history trait evolution and adaptation to agricultural opportunities and the consequent processes of invasion, colonization, enduring occupation and population shifts. Roles played by mating systems and biodiversity, soil seed pools and community assembly, competitive interactions with neighbors and fitness.  
AGRON 421. Introduction to Plant Breeding.  
(Cross-listed with HORT). (3-0) Cr. 3. F. Prereq: GEN 320 or BIOL 313  
Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and asexually reproducing agronomic and horticultural crops. Applications of biotechnology techniques in the development of improved cultivars.  
AGRON 446. International Issues and Challenges in Sustainable Development.  
(Cross-listed with GLOBE, INTST). Cr. 4. S. Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor  
Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economical, political, and historical factors affecting sustainable development of communities and countries from art and science perspectives. International field experience with foreign language training required. A program fee is charged to students for international study abroad.  
Meets International Perspectives Requirement.  
AGRON 450. Issues in Sustainable Agriculture.  
(Cross-listed with ENV S). (3-0) Cr. 3. F.  
Agricultural science as a human activity; contemporary agricultural issues from agroecological perspective. Comparative analysis of intended and actual consequences of development of industrial agricultural practices.  
Meets International Perspectives Requirement.  
AGRON 452. GIS for Geoscientists.  
(Dual-listed with AGRON 552). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. F. Prereq: GEOL 100, GEOL 201 or equivalent  
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI's ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.
AGRON 459. Environmental Soil and Water Chemistry.
(Dual-listed with AGRON 559). (Cross-listed with ENSCI). (3-3) Cr. 4. F. Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 154 or AGRON 360; GEOL 100 and AGRON 354 recommended. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

AGRON 463. Soil Formation and Landscape Relationships.
(Dual-listed with AGRON 563). (Cross-listed with ENSCI). (2-4) Cr. 4. S. Prereq: AGRON 154 or AGRON 260 Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

AGRON 463I. Soil Formation and Landscape Relationships.
(Dual-listed with AGRON 563I). (Cross-listed with ENSCI, IA LL). Cr. 4. Alt. SS., offered even-numbered years. Prereq: AGRON 154 or AGRON 260 Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use.

AGRON 477. Soil Physics.
(Dual-listed with AGRON 577). (Cross-listed with ENSCI). (3-0) Cr. 3. S. Prereq: Recommended: AGRON 154 MATH 166 The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

AGRON 484. Organic Agricultural Theory and Practice.
(Dual-listed with AGRON 584). (Cross-listed with HORT). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: 9 cr. in biological or physical sciences Understanding of the historical origins and ecological theories underlying the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

AGRON 485. Soil and Environmental Microbiology.
(Dual-listed with AGRON 585). (Cross-listed with ENSCI, MICRO). (2-3) Cr. 3. F. Prereq: AGRON 154 or AGRON 402, MICRO 201 (MICRO 201L recommended) The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

AGRON 488. GIS for Geoscientists II.
(Dual-listed with AGRON 588). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years. Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

AGRON 490. Independent Study.
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.SS. Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490E. Entrepreneurship.
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.SS. Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490G. General.
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.SS. Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490H. Independent Study, Honors.
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.SS. Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 490Z. Service Learning.
Cr. 1-3. Repeatable, maximum of 4 credits. F.S.SS. Prereq: Junior or senior classification with at least 8 credits in agronomy; permission of instructor in specialty area after consultation Selected studies in crops, soils, or agricultural meteorology according to the needs and interests of the student.

AGRON 491. Seed Science Internship Experience.
(Cross-listed with HORT). Cr. 1-2. Repeatable, maximum of 1 times. F.S.SS. Prereq: Agron 338, advanced approval and participation of employer and instructor A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

AGRON 493. Workshop in Agronomy.
Cr. arr. Repeatable, maximum of 4 times. Prereq: Permission of instructor Workshop experience in crops, soils, or agricultural meteorology.

AGRON 495. Agricultural Travel Course Preparation.
Cr. R. Repeatable. F. S.SS. Prereq: Permission of instructor Limited enrollment. Students enrolled in this course intend to register for Agron 496 the following term. Topics will include the agricultural industries, climate, crops, culture, economics, geography, history, livestock, marketing, soils, and preparation for travel to locations to be visited.

AGRON 496. Agricultural Travel Course.
Cr. arr. Repeatable. Prereq: Permission of instructor Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.

AGRON 496A. International Tour.

AGRON 496B. Domestic Tour.
Cr. arr. Repeatable. Prereq: Permission of instructor Limited enrollment. Tour and study of production methods in major crop and livestock regions of the world. Influence of climate, economics, geography, soils, landscapes, markets, and other factors on crop and livestock production. Location and duration of tours will vary. Tour expenses paid by students. Check with department for current offerings.

AGRON 497. Agroecology Field Course.
(3-0) Cr. 3. F. Prereq: Jr. or Sr. classification with at least 8 credits in Agronomy A one-week intensive class, offered off-campus. Student will visit farms within the Midwest and analyze the sustainability of each farm.

AGRON 498. Cooperative Education.
Cr. R. F.S.SS. Prereq: Permission of department cooperation education coordinator; senior classification Required of all cooperative education students. Students must register for this course prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:

AGRON 500. Orientation Seminar.
(2-0) Cr. 1. F. Prereq: International agronomy graduate students only An introduction to Iowa and U.S. agriculture for international scholars in agronomic majors. Field trips when possible. Departmental role in the functioning of research, teaching, and extension in fulfilling the charge given to the land-grant university.

AGRON 501. Crop Growth and Development.
(3-0) Cr. 3. F.S. Prereq: AGRON 114, MATH 140, CHEM 163, BIOL 101 Physiological processes in crop growth, development and yield: photosynthesis, respiration, water relations, mineral nutrition, assimilate partitioning, seedling vigor, light interception and canopy growth, root growth, reproduction and yield. Required course for the Master of Science in Agronomy degree program.

AGRON 502. Chemistry, Physics, and Biology of Soils.
(3-0) Cr. 3. F. Prereq: AGRON 114, AGRON 154, BIOL 101, CHEM 163, and MATH 140 Soil chemical, physical, and biological properties that control processes within the soil, their influence on plant/soil interactions, and soil classification. Basic concepts in soil science and their applications. Required course for the Master of Science in Agronomy degree program.
AGRON 503. Climate and Crop Growth.
(3-0) Cr. 3. F.S.SS. Prereq: AGRON 114 and MATH 140
Applied concepts in climate and agricultural meteorology with emphasis on the climate-agriculture relationship and the microclimate-agriculture interaction. Basic meteorological principles are also presented to support these applied concepts. Required course for the Master of Science in Agronomy degree program.

AGRON 504. Global Change.
(Dual-listed with AGRON 404). (Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior, senior, or graduate standing
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

AGRON 505. Environmental Biophysics.
(Dual-listed with AGRON 405). (Cross-listed with ENSCI, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: MATH 165 or MATH 182 or equivalent and some computer programming experience (any language)
A description of the physical microenvironment in which organisms live. Emphasis on the movement of energy (heat and radiation) and mass (water and carbon) among organisms, the soil, and atmosphere. Applications to humans, other animals, plants, and plant communities.

AGRON 506. Crop Genetics.
Cr. 3. F.
Introduction to genetics of reproductive systems, recombination, segregation and linkage analysis, inbreeding, quantitative inheritance, fertility regulation, and polyploidy to prepare students for subsequent courses in crop improvement. Enrollment is restricted to off-campus MS in Plant Breeding students.

AGRON 507. Mesoscale Meteorology.
(Dual-listed with AGRON 407). (Cross-listed with MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: Math 166 and MTEOR 443
Gallus. The physical nature and practical consequences of mesoscale atmospheric phenomena. Mesoscale convective systems, fronts, terrain-forced circulations. Observation, analysis, and prediction of mesoscale atmospheric structure. Semester project and in-class presentation required.

(3-0) Cr. 3. F. Prereq: AGRON 505

AGRON 509. Agroecosystems Analysis.
(Cross-listed with SOC, SUSAG). (3-4) Cr. 4. F. Prereq: Senior or above classification
Experimental, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc.), and scales of operation.

AGRON 510. Crop Improvement.
(Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to the Seed Technology and Business Master's Degree Program or approval of the instructor

AGRON 511. Crop Improvement.
(3-0) Cr. 3. S. Prereq: AGRON 114, MATH 140, CHEM 163, BIOL 101
Basic principles in the genetic improvement of crop plants. Methods of cultivar development in self-pollinated and cross-pollinated crop species. Required course for the Master of Science in Agronomy degree program.

AGRON 512. Soil-Plant Environment.
(3-0) Cr. 3. S. Prereq: AGRON 502. Recommended AGRON 501
Soil properties and their impact on soil/plant relationships. Soil structure, aeration, moisture, and nutrients will be discussed in the context of soil fertility and environmental quality management. Required course for the Master of Science in Agronomy degree program.

AGRON 513. Quantitative Methods for Agronomy.
(3-0) Cr. 3. F.S. Prereq: AGRON 114, MATH 140, STAT 104
Quantitative methods for analyzing and interpreting agronomic information. Principles of experimental design, hypothesis testing, analysis of variance, regression, correlation, and graphical representation of data. Use of SAS and Excel for organization, analyzing, and presenting data. Required course for the Master of Science in Agronomy degree program.

AGRON 514. Integrated Pest Management.
(3-0) Cr. 3. SS. Prereq: AGRON 114, 501, MATH 140, CHEM 163, BIOL 101
Recommended: AGRON 502, AGRON 503
Principles and practices of weed science, entomology, and plant pathology applied to crop production systems. Biology, ecology and principles of integrated crop pest management. Required course for the Master of Science in Agronomy degree program.

AGRON 515. Integrated Crop and Livestock Production Systems.
(Cross-listed with A B E, AN S, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

AGRON 516. Crop Physiology.
(3-0) Cr. 3. S.
Investigation of Molecular, whole plant, and plant community processes essential to biomass production and seed formation, and analysis of molecular approaches to overcome the limitations imposed on these processes by the environment.

(Dual-listed with AGRON 417). (3-0) Cr. 3. S. Prereq: AGRON 317
Ecology and evolution of invasive plants and weeds in habitats disturbed by humans. Life history trait evolution and adaptation to agricultural opportunities and the consequent processes of invasion, colonization, enduring occupation and population shifts. Roles played by mating systems and biodiversity, soil seed pools and community assembly, competitive interactions with neighbors and fitness.

(Cross-listed with E E, MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: Math 265 or equivalent
Microwave remote sensing of Earth's surface and atmosphere using satellite-based or ground-based instruments. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, ocean salinity, and soil moisture.

AGRON 519. Herbicide Physiology and Biochemistry.
(2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: AGRON 317; BIOL 330
Herbicide mechanisms of action, selectivity, uptake, and translocation. Specific sites of herbicide action as they affect plant physiology. Herbicide resistance in weeds and crops. Implications of herbicides on weed management.

AGRON 520. Plant Breeding Methods.
Cr. 3. S. Prereq: Agron 527 or Agron 506
Breedng methods used in the genetic improvement of self-pollinated, cross-pollinated and asexually reproducing agronomic and horticultural crops. Application of biotechnology techniques in the development of improved cultivars.

AGRON 521. Principles of Cultivar Development.
(3-0) Cr. 3. F. Prereq: AGRON 421; STAT 401
Theoretical and practical analysis of alternative breeding methods to improve crop plants. Strategies to incorporate germplasm resources, develop populations, maximize genetic gain, and use marker-assisted selection. Relationship of breeding methods to commercial seed production.

AGRON 522. Field Methods in Plant Breeding.
(0-6) Cr. 1-2. Alt. S., offered even-numbered years. Prereq: AGRON 521
Field experience in planning and conducting plant breeding research for germplasm and cultivar development. Offered on a satisfactory-fail basis only.

AGRON 523. Molecular Plant Breeding.
(2-2) Cr. 3. S. Prereq: AGRON 421 or AGRON 521, GDCB 542A
Plant breeding in the era of sequenced genomes and transformation. High throughput genomic technologies will be presented in relation to various applications in plant breeding.
AGRON 524. Applied Plant Molecular Genetics & Biotechnology.
Cr. 3. F. Prereq: Agron 527 or Agron 506
Basic principles and applied techniques used in the genetic improvement of crop plants. Discussion of structure and function of genes that control traits of value. Types of molecular markers, analysis of quantitatively inherited traits, genome mapping, analyses of databases.

AGRON 526. Field Plot Technique.
(3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: STAT 401
Planning experiments for agricultural research, analysis of data, and concepts in data interpretation.

AGRON 527. Plant Genetics.
(3-0) Cr. 3. S. Prereq: GEN 410
Fundamental genetic and cytogenetic concepts from plant perspective including recombination, linkage analysis, genetic and molecular mapping, male sterility, self incompatibility, apomixis, and polyploid evolution.

AGRON 529. Publishing in Biological Sciences Journals.
(Cross-listed with HORT, NREM). (3-0) Cr. 3. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data
Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

AGRON 530. Ecologically Based Pest Management Strategies.
(Cross-listed with ENT, PL P, SUSAG). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

(3-0) Cr. 3. F. Prereq: AGRON 501, AGRON 502, AGRON 503. Recommended: AGRON 512, AGRON 514
Ecological principles underlying crop production systems. Crop production in the context of management approaches, system resources and constraints, and interactions. Emphasis on the ecology of row and forage crops common to the Midwest. Required course for the Master of Science in Agronomy degree program.

AGRON 533. Soil Management.
(3-0) Cr. 3. F. Prereq: AGRON 501, AGRON 503, AGRON 512. Recommended AGRON 513
Evaluates the impact of various soil management practices on soil and water resources. Combines and applies basic information gained in Agron 502 and Agron 512. Emphasizes the agronomic, economic, and environmental effects of soil management strategies. Required course for the Master of Science in Agronomy degree program.

AGRON 535. Introduction to the Seed Industry.
(Cross-listed with STB). Cr. 1. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor
An analysis of the defining characteristics of the seed industry and introduction to the Master in Seed Technology and Business curriculum. The tasks of crop improvement and seed production will be analytically related to basic management functions and classifications of management activities that are used in the study of business administration. Management tasks and roles will be analyzed in related to the public policy issues that shape the seed industry, including ethical and economical approaches to biotechnology, intellectual property, and corporate responsibility.

AGRON 536. Quantitative Methods for Seed.
(Cross-listed with STB). (1-0) Cr. 1. F. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor
Quantitative Methods for analyzing and interpreting agronomic and business information for the seed industry. Principles of experimental design and hypothesis testing, regression, correlation and graphical representation of data. Use of spreadsheets for manipulating, analyzing and presenting data.

AGRON 538. Seed Physiology.
(2-0) Cr. 2. Alt. F., offered even-numbered years. Prereq: AGRON 316, CHEM 231 or CHEM 331
Physiological aspects of seed development, maturation, longevity, dormancy, and germination. Emphasis on current literature and advanced methodology.

AGRON 539. Seed Conditioning and Storage.
(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor
The technical operations which may be carried out on a seed lot from harvest until it is ready for marketing and use. The opportunities for quality improvement and the risks of deterioration which are present during that time. Analysis of the costs of and benefits of operations. Evaluation of equipment based on benefits to the customer and producer. Interpretation of the role of the conditioning plant and store as a focal points within the overall operations of a seed company.

AGRON 541. Applied Agricultural Meteorology.
Cr. 2-3. F.S.SS. Prereq: AGRON 206 or upper division Biological Science
Applied concepts in agricultural meteorology. Basic concepts of weather and of crop/climate relationships influencing production, protection, yield and associated production risk factors. Self study sections are available to resident and to distant education students all semesters. Credit for only one of Agron 503 or 541 may be applied toward graduation.

AGRON 544. Host-Pest Interactions.
Cr. 3. F.
Incorporation of the principles of integrated pest management and crop protection. Management systems (biological, cultural, chemical) and strategies which practice principles of weed science, plant pathology, and entomology. Enrollment is restricted to off-campus students in Agronomy MS in Plant Breeding.

AGRON 546. Strategies for Diversified Food and Farming Systems.
(Cross-listed with HORT, SUSAG). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: SUSAG 509
Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.

AGRON 547. Seed Production.
(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to the Seed Technology and Business Master’s Degree Program or approval of the instructor
Survey of crop production; including management of soil fertility, planting dates, populations, weed control, and insect control. Analysis of the principles of seed multiplication and the key practices which are used to ensure high quality in the products. Field inspection procedures and production aspects that differ from other crop production. Foundation seed production. Analysis of the typical organization of field production tasks. Resources and capabilities required. Survey of differences in seed production strategies between crops and impact of differences on management of seed production.

(Cross-listed with HORT). (2-0) Cr. 2. Alt. S., offered even-numbered years.
Prereq: Junior or senior or graduate classification or permission of instructor
Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.

AGRON 552. GIS for Geoscientists.
(Dual-listed with AGRON 452). (Cross-listed with ENSCI, GEOL). (2-2) Cr. 3. F. Prereq: GEOL 100, GEOL 201 or equivalent
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

AGRON 553. Soil-Plant Relationships.
(Cross-listed with ENSCI). (3-0) Cr. 3. F. Prereq: AGRON 354
Composition and properties of soils in relation to the nutrition and growth of plants.

AGRON 554. Advanced Soil Management.
(2-0) Cr. 2. Alt. F., offered odd-numbered years. Prereq: AGRON 354; MATH 165
Implications of soil management on the soil environment and root activity. Effect of soil physical properties on soil erosion.
AGRON 555. Environmental Soil Mineralogy. (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: AGRON 473, CHEM 178. Recommend: GEOL 311 Structure and behavior of clay minerals, humic substances and biochor in soil environments, with emphasis on reactions and environmental implications.

AGRON 555L. Soil Clay Mineralogy Laboratory. (Cross-listed with GEOL). (0-3) Cr. 1. Alt. S., offered odd-numbered years. Prereq: Credit or enrollment in AGRON 555 Application of X-ray diffraction, thermal analysis, infrared spectroscopy, and chemical analyses to identification and behavior of clay minerals in soils.

AGRON 558. Laboratory Methods in Soil Chemistry. (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: AGRON 354 and CHEM 211 Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic and molecular absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

AGRON 559. Environmental Soil and Water Chemistry. (Dual-listed with AGRON 459). (Cross-listed with ENSCI). (3-3) Cr. 4. F. Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 154 or AGRON 360; GEOL 100 and AGRON 354 recommended. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

AGRON 561. Population and Quantitative Genetics for Breeding. (Cross-listed with AN S). (4-0) Cr. 4. F. Prereq: STAT 401 Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.

AGRON 563. Soil Formation and Landscape Relationships. (Dual-listed with AGRON 483). (Cross-listed with ENSCI). (2-4) Cr. 4. S. Prereq: AGRON 154 or AGRON 260 Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

AGRON 563I. Soil Formation and Landscape Relationships. (Dual-listed with AGRON 463I). (Cross-listed with ENSCI, IA LL). Cr. 4. Alt. SS., offered even-numbered years. Prereq: AGRON 154 or AGRON 260 Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only AGRON 563 or 563I may be applied for graduation.

AGRON 570. Risk Assessment for Food, Agriculture and Veterinary Medicine. (Cross-listed with TOX, VDPAM). (3-0) Cr. 3. F. Prereq: STAT 104 or consent of instructor Risk assessment principles as applied to biological systems. Exposure and effects characterization in human and animal health and ecological risk assessment. Risk analysis frameworks and regulatory decision-making. Introduction to quantitative methods for risk assessment using epidemiological and distributional analysis. Uncertainty analysis. This course is available only by distance.

AGRON 575. Soil Formation and Transformation. (Cross-listed with ENSCI). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: AGRON 463 or equivalent Advanced study of soil formation, emphasizing relationships among soils, landscapes, environment, humans, and land use.

AGRON 577. Soil Physics. (Dual-listed with AGRON 477). (Cross-listed with ENSCI). (3-0) Cr. 3. S. Prereq: Recommended: AGRON 154 MATH 166 The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

AGRON 578. Laboratory Methods in Soil Physics. (Cross-listed with ENSCI). (0-3) Cr. 1. S. Prereq: concurrent enrollment in AGRON 477 or 577 Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.
AGRON 599. Creative Component.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599A. Agricultural Meteorology.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599B. Crop Production and Physiology.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599C. Plant Breeding.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599D. Soil Chemistry.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599E. Soil Fertility.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599F. Soil Management.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599G. Soil Microbiology and Biochemistry.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599H. Soil Morphology and Genesis.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599I. Seed Science.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599J. Weed Science.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AGRON 599M. Agronomy.  
Cr. arr. Prereq: Nonthesis M.S. option only  
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

Courses for graduate students:

AGRON 600. Seminar.  
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.  
Reports and discussion of recent literature and research.

AGRON 600A. Plant Breeding.  
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.  
Reports and discussion of recent literature and research.

AGRON 600B. Soils. F.S..  
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.  
Reports and discussion of recent literature and research.

AGRON 600C. Crop Production and Physiology. F.S..  
(1-0) Cr. 1. Repeatable, maximum of 6 times. F.S.  
Reports and discussion of recent literature and research.

AGRON 601. Agronomic Science Presentations.  
(3-0) Cr. 2. S. Prereq: graduate status in agronomic science, permission of instructor.  
Experience in critical communications in exchange of ideas through oral and poster presentations and scientific questioning/evaluation.

AGRON 609. Agricultural Meteorology Conference.  
(1-0) Cr. 1. Repeatable. F.S.SS. Prereq: Permission of instructor  
Literature reviews and conferences with instructor on special problems relating to agricultural meteorology, beyond the scope of current courses offered.

AGRON 610. Foundations of Sustainable Agriculture.  
(Cross-listed with A B E, ANTHR, SOC, SUSAG). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor  
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

AGRON 616. Advanced Topics in Plant Physiology and Biochemistry.  
(4-0) Cr. 4. Alt. S., offered even-numbered years. Prereq: Graduate classification; permission of instructor  
An in-depth treatment of physiological, biochemical and molecular processes regulating plant growth and development. Emphasis on individual study followed by in-class presentations and discussion.

AGRON 621. Advanced Plant Breeding.  
(3-0) Cr. 3. F. Prereq: AGRON 521, AGRON 526, AGRON 561; GEN 410  
Estimation and interpretation of genetic effects and variances of plant breeding populations, analysis of mating designs, estimation of combining ability and heritability, best linear unbiased prediction, selection indices with and without molecular information, inbreeding and heterosis.

AGRON 625. Genetic Strategies in Plant Breeding.  
(3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: AGRON 521, GEN 510  
Evaluation of genetic, molecular, and cellular approaches to crop improvement; gene transfer methods. Application and role of basic plant biology in breeding programs and processes; genome structure and function, gene isolation, expression, regulation, and modification. Integration of molecular and cellular methods in breeding strategies; analysis of alternative breeding methods, regulatory and ethical issues.

AGRON 655. Advanced Soil Fertility.  
(2-0) Cr. 2. Alt. S., offered odd-numbered years. Prereq: AGRON 553  
Evaluation of soil fertility and fertilizers; theory and applications.

AGRON 677. Advanced Soil Physics.  
(2-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: AGRON 577; MATH 266, MATH 267. Recommended: COM S 207  
The flow and distribution of water, chemicals, and heat in soils. Physical principles and applications.

AGRON 685. Advanced Soil Biochemistry.  
(Cross-listed with ENSCI, MICRO). (2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: AGRON 585  
Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

AGRON 696. Research Seminar.  
(Cross-listed with BBMB, FOR, GDCB, HORT, PLBIO). Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification in agronomy and permission of instructor  
Graduate student experience in the agronomy teaching program. Offered on a satisfactory-fail basis only.

AGRON 698. Agronomy Teaching Practicum.  
Cr. 1-2. Repeatable. F.S.SS. Prereq: Graduate classification in agronomy and permission of instructor  
Graduate student experience in the agronomy teaching program. Offered on a satisfactory-fail basis only.

AGRON 699. Research.  
Cr. arr. Repeatable.

AGRON 699A. Agricultural Meteorology.  
Cr. arr. Repeatable.
The department offers a minor in Animal Science. The minor requires:

- Minor Production
- Swine Science
- Poultry Science
- Dairy Science

Within the animal science major, specialized options in animal products, companion animal management, equine management, livestock management, pre-professional studies, and pre-veterinary medicine are available. The department offers a minor in Animal Science and a minor in Meat Science. Both the animal science curricula and dairy science curricula allow complementary work toward admission to veterinary medical school and other professional schools, which may be done while satisfying requirements for the bachelor of science degree. A program that combines bachelor of science and master of science in animal science is offered. In addition, a program that combines a bachelor of science and master of business administration is offered. The Department facilitates student participation in the Midwest Poultry Consortium and the Swine Science Online program to offer additional training in poultry and swine production, respectively.

Minor

The department offers a minor in Animal Science. The minor requires:

- One course from the following:
  - AN S 216 Equine Science
  - AN S 223 Poultry Science
  - AN S 224 Companion Animal Science
  - AN S 225 Swine Science
  - AN S 226 Beef Cattle Science
  - AN S 229 Sheep Science
  - AN S 235 Dairy Cattle Science
  - AN S 270 Foods of Animal Origin
  - AN S 270L and Foods of Animal Origin Laboratory

Total Credits 16-17

A total of 9 credits must be earned at Iowa State University in animal science coursework that meets a degree requirement for the B.S. degree in animal science. Students interested in the Animal Science minor should contact an Animal Science adviser.

Minor - Meat Science

The department offers a minor in Meat Science. The minor requires:

- One course from the following:
  - AN S 489 Issues in Food Safety
  - AN S 490C Independent Study; Meat Science

Total Credits 15-16

Students majoring in Animal Science will not be allowed to count the 9 required credits (270, 270L, 360, 460) toward their Animal Science degree. Students interested in the Meat Science minor should contact an Animal Science adviser.
Graduate Study
The department offers work for the degrees master of science and doctor of philosophy with majors in animal breeding and genetics; meat science; animal physiology; animal science; and an interdepartmental program in nutritional sciences which has an option in animal nutrition. Minor work is offered in these areas to students taking major work in other departments.

A strong undergraduate program is required for students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate programs in animal science include supporting work in areas such as agricultural engineering, agronomy; anatomy; biochemistry; chemistry; economics; environmental science; food science and human nutrition; genetics; microbiology; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas. Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, microbiology, MCDB (molecular, cellular, and developmental biology), neuroscience, nutritional sciences, and toxicology (see Index).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

Curriculum in Animal Science
Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science from Iowa State University a minimum of 15 credits in Animal Science must be earned from courses taught in the Animal Science department at ISU. A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

See Also: A 4-year plan of study grid showing course template by semester.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspectives
Approved International Perspectives course 3

U.S. Diversity
Approved U. S. Diversity course 3

Communications Proficiency (with a C or better)
English composition 6
Speech fundamentals 3
Total Credits 9

Communication/Library
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Information Literacy 1
One of
SP CM 212 Fundamentals of Public Speaking 3
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3
COMST 214 Professional Communication 3
Total Credits 13

Humanities and Social Sciences
Approved Humanities course 3
Approved Social Science course 3
Total Credits 6

Ethics
Approved Ethics course 3

Mathematical Sciences
Note: The Pre-Graduate/Pre-Professional Studies Option requires MATH 160, MATH 165, or MATH 181

One course from the following: 3-4
MATH 140 College Algebra
MATH 150 Discrete Mathematics for Business and Social Sciences
MATH 160 Survey of Calculus
MATH 165 Calculus I
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I

One course from the following: 3-4
STAT 101 Principles of Statistics
STAT 104 Introduction to Statistics
STAT 226 Introduction to Business Statistics I

Total Credits 6-8

Physical Sciences
A minimum of 8 credits are required. These requirements are specific to option and are listed with each option below.

Biological Sciences
Note: The Livestock Management Option requires ACCT 284

BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 313 Principles of Genetics 3
or GEN 320 Genetics, Agriculture and Biotechnology

MICRO 201 Introduction to Microbiology 3-4
& 201L and Introductory Microbiology Laboratory
or MICRO 302 Introduction to Microbiology 3-4
& 302L and Microbiology Laboratory

Total Credits 14-15

Business
One course from the following: 3
Note: The Livestock Management Option requires ACCT 284
ACCT 284 Financial Accounting 3
ECON 101 Principles of Microeconomics 3
ECON 102 Principles of Macroeconomics 3

Total Credits 3

Animal Science Core (required in every option)

AN S 101 Working with Animals 2
AN S 110 Orientation in Animal Science and ISU 1
AN S 114 Survey of the Animal Industry 2
AN S 210 Career Preparation in Animal Science 1
AN S 211 Issues Facing Animal Science 1
AN S 214 Domestic Animal Physiology 3
AN S 214L Domestic Animal Physiology Laboratory 1
AN S 319 Animal Nutrition 3
AN S 320 Animal Feeds and Feeding 3
AN S 331 Domestic Animal Reproduction 3
AN S 352 Genetic Improvement of Domestic Animals 3
AN S 411 Addressing Issues in Animal Science 1

Total Credits 24

General Animal Science Option
CHEM 163 & 163L College Chemistry 5
CHEM 177 & 177L General Chemistry I and Laboratory in General Chemistry I
CHEM 331 Organic Chemistry I 3
or BBMB 221 Structure and Reactions in Biochemical Processes 3
### Pre-Veterinary Medicine Option

Three courses from the following: 9
- AN S 216 Equine Science
- AN S 223 Poultry Science
- AN S 224 Companion Animal Science
- AN S 225 Swine Science
- AN S 226 Beef Cattle Science
- AN S 229 Sheep Science
- AN S 235 Dairy Cattle Science
- AN S 270 Foods of Animal Origin
- AN S 270L Foods of Animal Origin Laboratory

One course from the following: 2-4
- AN S 313 Exercise Physiology of Animals
- AN S 336 Domestic Animal Behavior and Well-Being
- AN S 337 Lactation
- AN S 345 Growth and Development of Domestic Animals
- AN S 360 Fresh Meats

**Total Credits** 23-29

### Livestock Management Option

**Total Credits** 39-42

Additional free electives required for the Pre-veterinary Medicine Option 8-14

* The Iowa State University College of Veterinary Medicine academic requirements are met by completion of this option (http://vetmed.iastate.edu/academics/prospective-students/admissions/academic-requirements).

### Accounting Option

- ACCT 284 Financial Accounting 3
- AGEDS 451 Agricultural Law 4
- AN S 270 Foods of Animal Origin 3
- AN S 270L Foods of Animal Origin Laboratory 3

**Total Credits** 23-29

### Pre-Veterinary Medicine Option

- BBMB 301 Survey of Biochemistry 3
- CHEM 177 General Chemistry I 4
- CHEM 177L Laboratory in General Chemistry I 1
- CHEM 178 General Chemistry II 3
- CHEM 331 Organic Chemistry I 3
- CHEM 331L Laboratory in Organic Chemistry I 1
- CHEM 332 Organic Chemistry II 3
- PHYS 111 General Physics 5

Three courses from the following: 9
- AN S 216 Equine Science
- AN S 223 Poultry Science
- AN S 224 Companion Animal Science
- AN S 225 Swine Science
- AN S 226 Beef Cattle Science
- AN S 229 Sheep Science
- AN S 235 Dairy Cattle Science
- AN S 270 Foods of Animal Origin
- AN S 270L Foods of Animal Origin Laboratory

One course from the following: 3
- AN S 415 Equine Systems Management
- AN S 419 Advanced Animal Nutrition
- AN S 424 Companion Animal Systems Management
- AN S 425 Swine Systems Management
- AN S 426 Beef Cattle Systems Management
- AN S 429 Sheep Systems Management
- AN S 434 Dairy Systems Management

### Livestock Management Option

- ACCT 284 Financial Accounting 3
- AGEDS 451 Agricultural Law 4
- AN S 270 Foods of Animal Origin 3
- AN S 270L Foods of Animal Origin Laboratory 3
- CHEM 163 College Chemistry or CHEM 177 & 177L General Chemistry I and Laboratory in General Chemistry I 5
- CHEM 331 Organic Chemistry I or BBMB 221 Structure and Reactions in Biochemical Processes 3
- ECON 230 Farm Business Management 3
- ECON 334 Entrepreneurship in Agriculture 3
- VDPAM 487 Livestock Disease Prevention 3

Two courses from the following: 6
- AN S 223 Poultry Science
- AN S 225 Swine Science
- AN S 226 Beef Cattle Science
- AN S 229 Sheep Science
- AN S 235 Dairy Cattle Science

One course from the following: 3
- AN S 336 Domestic Animal Behavior and Well-Being
- AN S 337 Lactation

- AN S 217 Equine Farm Practicum
- AN S 306 Equine Evaluation

---

**Curriculum in Dairy Science**

Students majoring in Dairy Science will complete the degree requirements listed below. If desired, a student may also include the specialized option in pre-veterinary medicine. A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

See Also: A 4-year plan of study grid showing course template by semester

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.
International Perspectives
Approved International Perspectives course 3

U.S. Diversity
Approved U.S. Diversity course 3

Communications Proficiency
English composition 6
Speech fundamentals 3
Total Credits 9

Communication/Library
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Information Literacy 1
One course from the following:
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3
COMST 214 Professional Communication
SP CM 212 Fundamentals of Public Speaking
Total Credits 10

Humanities and Social Sciences
Approved Humanities course 3
Approved Social Science course 3
Total Credits 6

Ethics
Approved Ethics course 3

Mathematics and Business
ECON 101 Principles of Microeconomics 3
One course from the following: 3-4
STAT 101 Principles of Statistics
STAT 104 Introduction to Statistics
STAT 226 Introduction to Business Statistics I
One course from the following: 3-4
MATH 140 College Algebra
MATH 150 Discrete Mathematics for Business and Social Sciences
MATH 160 Survey of Calculus
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
Total Credits 9-11

Biological Sciences
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 313 Principles of Genetics 3
or GEN 320 Genetics, Agriculture and Biotechnology
MICRO 201 Introduction to Microbiology 3-4
& 201L and Introductory Microbiology Laboratory
or MICRO 302 & 302L Biology of Microorganisms
and Microbiology Laboratory
Total Credits 14-15

Physical Sciences
A minimum of 8 credits are required. These requirements are specific to option and are listed with each option below.

Dairy Sciences Option
AN S 101 Working with Animals 2
AN S 110 Orientation in Animal Science and ISU 1
AN S 114 Survey of the Animal Industry 2
AN S 210 Career Preparation in Animal Science 1
AN S 211 Issues Facing Animal Science 1
AN S 214 Domestic Animal Physiology 3
AN S 214L Domestic Animal Anatomy and Physiology Lab 1
AN S 235 Dairy Cattle Science 3
AN S 270 Foods of Animal Origin 3
& 270L and Foods of Animal Origin Laboratory
or FS HN 101 Food and the Consumer
Total Credits 26-29

Pre-Veterinary Medicine Option
AN S 101 Working with Animals 2
AN S 110 Orientation in Animal Science and ISU 1
AN S 114 Survey of the Animal Industry 2
AN S 210 Career Preparation in Animal Science 1
AN S 211 Issues Facing Animal Science 1
AN S 214 Domestic Animal Physiology 3
AN S 214L Domestic Animal Anatomy and Physiology Lab 1
AN S 235 Dairy Cattle Science 3
AN S 270 Foods of Animal Origin 3
& 270L and Foods of Animal Origin Laboratory
or FS HN 101 Food and the Consumer
Total Credits 51
**AN S 110. Orientation in Animal Science and ISU.**

(2-0) Cr. 1. F.S.

Orientation to the university and Department of Animal Science. Challenges and opportunities available to the professional animal agriculturalist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science.

Total Credits 66

Additional free electives for the Pre-Veterinary Medicine Option 11-14

* The Iowa State University College of Veterinary Medicine academic requirements are met by completion of this option (http://vetmed.iastate.edu/academics/prospective-students/admissions/academic-requirements).

Courses primarily for undergraduates:

**AN S 101. Working with Animals.**

(1-2) Cr. 2. F.S.

A hands-on introductory course in skills for proper care and management of domestic animals. Husbandry skills including health observation, animal movement, identification, management procedures, and environmental assessment are covered.

**AN S 114. Survey of the Animal Industry.**

(2-0) Cr. 2. F.S.

Ways domestic animals serve the basic needs of humans for food, shelter, protection, fuel, and emotional well-being. Terminology, basic structures of the industries surrounding the production, care, and marketing of domestic animals in the U.S.

**AN S 116. Practicum in Safe Equine Handling and Welfare.**

(0-3) Cr. 1. F.S.S.

Development of best practices for safe horse handling and practical equine health care tasks. Course will focus on equine welfare and human safety as well as provide training in necessary every day skills needed to own a horse or to work at a horse farm. Certificate of Safe Equine Handling and Welfare available upon course completion. Offered on satisfactory - fail grading basis only. Offered on a satisfactory-fail basis only.

**AN S 199. Marketing and Management of Livestock Events.**

(0-2) Cr. 1. Repeatable. F.S. Prereq: Credit or enrollment in AN S 101 or AN S 114

Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. For section E students are expected to take the fall and spring courses consecutively. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

**AN S 199A. Marketing and Management of Livestock Events: Beef.**

(0-2) Cr. 1. Repeatable. F.S. Prereq: Credit or enrollment in AN S 101 or AN S 114

Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. For section E students are expected to take the fall and spring courses consecutively. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

**AN S 199E. Marketing and Management of Livestock Events: Horses.**

(0-2) Cr. 1. Repeatable. F.S. Prereq: Credit or enrollment in AN S 101 or AN S 114

Management and coordination of livestock shows, sales and events, including program planning, staff and volunteer management, time management, publicity and promotion for fairs, shows, clinics, expos, and other events. For section E students are expected to take the fall and spring courses consecutively. Offered on a satisfactory-fail basis only. A maximum of two credits of AnS 199 may be applied toward the total credits required for graduation.

**AN S 210. Career Preparation in Animal Science.**

(0-2) Cr. 1. F.S. Prereq: Sophomore classification in An S

Life skill development emphasized in the context of career preparation. Assist students with career goal clarification, interview skills, resume and cover letter preparation. Internship development, job shadowing, and exploration of career option.

**AN S 211. Issues Facing Animal Science.**

(0-2) Cr. 1. F.S. Prereq: AN S 114, sophomore classification

Overview of the factors that define contemporary ethical and scientifically based issues facing animal agriculture. Life skill development (including interactive skills, communication ability, organization, information gathering, and leadership skills) emphasized in the context of issues study. Offered on a satisfactory-fail basis only.

**AN S 214. Domestic Animal Physiology.**

(3-0) Cr. 3. F.S. Prereq: BIOL 212, CHEM 163 or CHEM 177

Introduction to anatomy and physiology of the muscular, renal, skeletal, neural, mammary, cardiovascular, respiratory, immune, endocrine, reproductive, and digestive systems of domestic animals.

**AN S 214L. Domestic Animal Anatomy and Physiology Lab.**

(2-1) Cr. 1. F.S. Prereq: AN S 214

Basic anatomy of domestic animals.

**AN S 216. Equine Science.**

(2-2) Cr. 3. F.S.S.S. Prereq: AN S 101 or AN S 114; one course in biology

Introduction to contemporary concepts, and basic practices and decisions necessary when managing horses through stages of their lives.

**AN S 217. Equine Farm Practicum.**

(1-2) Cr. 2. F. Prereq: Student majoring in Animal Science, riding experience An S, credit or concurrent enrollment in AN S 216

Intensified management of the equine farm. Provide students with experiential learning in all phases of horse production and management. Students assist with general farm management, preparing horses for sale, marketing techniques and web design.
AN S 223. Poultry Science.  
(2-0) Cr. 3. F. Prereq: AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising poultry through their production cycle.

(2-2) Cr. 3. S. Prereq: Course in biology  
Introduction of students to contemporary concepts, and basic practices and decisions necessary when caring for the companion animal through stages of its life.

AN S 225. Swine Science.  
(2-2) Cr. 3. F.S. Prereq: AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising swine through the vertically integrated production cycle.

(2-2) Cr. 3. F.S. Prereq: AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising beef cattle through the vertically integrated production cycle.

AN S 229. Sheep Science.  
(2-2) Cr. 3. S. Prereq: AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising sheep through their production cycle.

AN S 235. Dairy Cattle Science.  
(2-2) Cr. 3. F. Prereq: AN S 101, AN S 114  
Introduction to principles, practices and decisions necessary when raising dairy cattle through the vertically integrated production cycle.

(2-0) Cr. 2. F.S.S.S. Prereq: BIOL 212, CHEM 163 or CHEM 177  
Principles, practices and issues impacting the production, processing and preservation of safe, wholesome, nutritious, and palatable meat, dairy, and egg products. Product evaluation, classification, value, and utilization.

AN S 270L. Foods of Animal Origin Laboratory.  
(0-2) Cr. 1. F.S. Prereq: Credit or current enrollment in AN S 270  
Determination of composition and quality of meat, eggs and milk based on industry and USDA standards. Fundamentals of processing foods of animal origin to add value, maintain quality and ensure safety.

AN S 305. Livestock Evaluation.  
(0-6) Cr. 3. F. Prereq: Junior classification; AN S 270L recommended  
Fall semester leads to 475A or D. Breeding animal and market animal evaluation of beef, swine and sheep using contemporary techniques and tools. Communication and decision-making skills are practiced in the context of making selection decisions.

(0-6) Cr. 3. S. Prereq: sophomore classification or permission of instructor  
Detailed visual evaluation of conformation and performance of the equine athlete. Decision-making skills are practiced in the context of making selection choices. Development of written and oral communication skills as students defend their judgments. Industry trends will be addressed.

AN S 313. Exercise Physiology of Animals.  
(2-0) Cr. 2. F.S. Prereq: AN S 214, BIOL 211, one course in chemistry  
Interaction of physiological development relative to athletic performance in domestic animals, primarily equine performance.

(0-6) Cr. 1.3.  
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

(0-6) Cr. 1-3. F.  
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

(0-6) Cr. 3. Prereq: Permission of instructor  
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

AN S 317C. Fundamentals of Equine Behavior and Training: Two-year olds and older.  
(0-6) Cr. 3.  
Modifying the behavior of the horse using systematic approaches to horse training emphasizing the psychology of training horses. Equipment and its use and preparation of horses for competition. A maximum of 4 credits of An S 317 may be applied toward graduation.

(3-0) Cr. 3. F.S. Prereq: AN S 214, course in organic chemistry or biochemistry  
Structure and function of organic and inorganic nutrients. Digestion, absorption, metabolism and utilization of nutrients for maintenance and productive functions. Essential nutrient requirements of domestic livestock, poultry, and companion animals. Sources of nutrients, application of energy systems and concepts, and regulation of feed intake in animals.

AN S 320. Animal Feeds and Feeding.  
(2-2) Cr. 3. F.S. Prereq: AN S 319  
Composition, physical properties, and storage and processing of feedstuffs. Nutrient requirements of and diet formulation, and preparation systems for food and companion animal species at varying stages of age, activity or production. Manual and computer methodologies for diet formulation.

AN S 325. Biorenewable Systems.  
(Cross-listed with A B E, AGRON, BUSAD, ECON, TSM). (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher  
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

AN S 331. Domestic Animal Reproduction.  
(3-0) Cr. 3. F.S. Prereq: Course in physiology  
Comparative anatomy, physiology, and endocrinology of domestic mammalian animal reproduction. Techniques for the control and manipulation of reproductive processes.

AN S 332. Laboratory Methods in Animal Reproduction.  
(0-2) Cr. 1. F.S. Prereq: Credit or enrollment in AN S 331  
Comparative reproductive anatomy with emphasis on the physiology of normal reproductive function; ways to control and improve reproduction; principles of artificial insemination in farm animals; pregnancy testing; selected laboratory exercises with written report.

AN S 333. Embryo Transfer and Related Technologies.  
(3-0) Cr. 3. F. Prereq: AN S 331 or AN S 332  
Application of embryo transfer and related technologies to genetic improvement of mammalian livestock. Techniques for control of female reproduction, embryo collection and transfer, embryo cryopreservation, and embryo manipulation. Gender selection. Economic and genetic aspects of embryo transfer.

AN S 334. Embryo Transfer Laboratory.  
(0-3) Cr. 1. F. Prereq: Credit or concurrent enrollment in AN S 333; AN S 332 or VDPAM 416; permission of instructor  
Selected laboratory exercises related to embryo transfer such as synchronization of estrus, superovulation, detection of estrus, artificial insemination, embryo collection, embryo evaluation, microscopy, embryo cryopreservation, in vitro fertilization, embryo sexing, rectal palpation, and ultrasonography will be demonstrated and/or performed.

AN S 335. Dairy Cattle Evaluation.  
(0-6) Cr. 3. S. Prereq: Sophomore classification  
Evaluation of breeding animals for dairy herds. Comparative terminology, decision making, and presentation of oral reasons. Trips to dairy cattle farms. Livestock handling.

(2-2) Cr. 3. F. Prereq: One course in physiology  
Principles of behavior relative to animal care, management and environmental design to ensure animal well-being. Examination of basic neural-endocrine mechanisms involved in the animal’s response to its environment. Awareness of animal protection, law and legislation. Methods to objectively assess animal well-being.

AN S 337. Lactation.  
(3-0) Cr. 3. S. Prereq: AN S 214  
AN S 345. Growth and Development of Domestic Animals.
(3-0) Cr. 3. S. Prereq: AN S 214, BIOL 313 or GEN 320
Basic principles of animal growth and development covered at the tissue, cellular and molecular level. Emphasis placed on skeletal muscle, adipose tissue, and immune system growth and development. The effects of genetics, nutrition, and pharmaceuticals on growth.

AN S 352. Genetic Improvement of Domestic Animals.
(2-3) Cr. 3. F.S. Prereq: One course in statistics, BIOL 211, course in genetics Principles of qualitative and quantitative genetics applied to creating change in domestic animals. Impact of selection and mating schemes in achieving breeding program goals. Applications and impacts of biotechnological advancements in genetic manipulation.

AN S 360. Fresh Meats.
(2-3) Cr. 3. F. Prereq: AN S 270; a course in organic or biochemistry Impact of muscle structure, composition, rigor mortis, inspection, fabrication, handling, packaging and cooking on the palatability, nutritional value, yields, market value, and safety of fresh meat.

AN S 399. Animal Science Internship.
Cr. arr. Repeatable. F.S.S.

AN S 399A. Animal Science Internship: Graded Internship Experience.
Cr. 2-6. Repeatable. F.S.S. Prereq: Permission of the instructor Learning experience focused on professional development for a career related to animal science. Journal, presentation, and creative component.

AN S 399B. Animal Science Internship: Supervised Internship Experience.
Cr. R. Repeatable. F.S.S.S. Prereq: Permission of the instructor Learning experience focused on professional development for a career related to animal science. Journal, presentation, and creative component.

(0-2) Cr. 1. F. Prereq: Senior classification in Animal Science Life skill development emphasized in the context of exploring one's perspective of the most pressing moral and scientific issues facing animal agriculture. Clarification and communication of personal conclusions in small and large group settings expected.

AN S 415. Equine Systems Management.

(2-0) Cr. 2. F. Prereq: AN S 214, AN S 319, AN S 320 Detailed consideration of digestion, metabolism, and assimilation of nutrients. Recent advances and developments in basic nutrition.

(2-3) Cr. 3. S. Prereq: AN S 224, AN S 319, AN S 320, AN S 331, AN S 352 Decisions facing the administrator of a companion animal enterprise. Financial and business goal identification, problem clarification, and resource allocation to manage the companion animal system.

AN S 425. Swine Systems Management.
(2-3) Cr. 3. F. Prereq: AN S 225, AN S 270, AN S 270L, AN S 319, AN S 320, AN S 331, AN S 352; ECON 230 or equivalent recommended Decisions facing the administrator of a swine enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the swine enterprise. Computer aided study.

AN S 426. Beef Cattle Systems Management.
(2-3) Cr. 3. F.S. Prereq: AN S 226, AN S 270, AN S 270L, AN S 319, AN S 320, AN S 331, AN S 352; ECON 230 or equivalent recommended Decisions facing the administrator of a beef cow-calf or feedlot enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the beef enterprise. Computer aided study.

AN S 429. Sheep Systems Management.
(2-3) Cr. 3. S. Prereq: AN S 229, AN S 319, AN S 320, AN S 331, AN S 352; AGRON 334 recommended; ECON 230 or equivalent recommended Decisions facing the administrator of a sheep enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the sheep enterprise. Computer aided study.

AN S 434. Dairy Systems Management.
(3-0) Cr. 3. F. Prereq: AN S 235, AN S 319, AN S 331, AN S 320, AN S 337, AN S 352; ECON 230 or equivalent recommended Decisions facing the administrator of a dairy enterprise. Financial and production goal identification, problem clarification, and resource allocation to manage the dairy enterprise. Computer aided study.

(2-2) Cr. 3. S. Prereq: AN S 434; ECON 230 Evaluate nutrition, reproduction, milk-quality, breeding, and related management practices of commercial dairy herds in a case study format. Students will apply knowledge gained in the classroom to commercial dairy farm situations and develop skills in information gathering, decision making, problem solving, and interpersonal communications.

AN S 460. Processed Meats.
(Dual-listed with AN S 560). (2-2) Cr. 3. S. Prereq: AN S 270 and AN S 270L Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

AN S 475. Intercollegiate Judging Training and Competition.
(0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

(0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475B. Intercollegiate Judging Training and Competition: Dairy Cattle.
(0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475C. Intercollegiate Judging Training and Competition: Meats.
(0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

(0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 475E. Intercollegiate Judging Training and Competition: Horses.
(0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

(0-4) Cr. 1-2. Repeatable. F.S. Prereq: permission of instructor Specialized training in evaluation and grading of livestock, livestock products, and livestock production management plans. Maximum of 6 credits may be applied toward graduation.

AN S 480. Animal Industry Leadership Fellows.
Cr. 1. Repeatable. F.S. Prereq: A. AN S 226; permission of instructor C. AN S 225; permission of instructor Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

AN S 480A. Animal Industry Leadership Fellows: Beef.
Cr. 1. Repeatable. F.S. Prereq: AN S 226; permission of instructor Students broaden their perspective of the livestock industry through site visits, case-study (Fellows) projects, and cooperative learning experiences that capitalize on interaction skills in the context of studying the structure of the U.S. livestock industry. This for-credit offering represents the central academic focus of the Iowa State University Animal Industry Leadership Fellows Program. Study is species specific, and enrollment is limited. Offered on a satisfactory-fail basis only.
AN S 480C. Animal Industry Leadership Fellows: Pork.  
Cr. 1. Repeatable. F.S. Prereq: AN S 225; permission of instructor  
Students broaden their perspective of the livestock industry through site visits,  
case-study (Fellows) projects, and cooperative learning experiences that capitalize  
on interaction skills in the context of studying the structure of the U.S. livestock  
industry. This for-credit offering represents the central academic focus of the Iowa  
State University Animal Industry Leadership Fellows Program. Study is species  
specific, and enrollment is limited. Offered on a satisfactory-fail basis only.

Cr. 1. Repeatable. F.S. Prereq: AN S 223; permission of instructor  
Students broaden their perspective of the livestock industry through site visits,  
case-study (Fellows) projects, and cooperative learning experiences that capitalize  
on interaction skills in the context of studying the structure of the U.S. livestock  
industry. Central academic focus of the Iowa State University Animal Industry  
Leadership Fellows Program. Study is species specific, and enrollment is limited.  
Offered on a satisfactory-fail basis only.

AN S 489. Issues in Food Safety.  
(Cross-listed with FS HN, HRI, VDPAM). (1-0) Cr. 1. S. Prereq: Credit or  
enrollment in FS HN 101 or FS HN 272 or HRI 233; FS HN 419 or FS HN 420; FS  
HN 403  
Capstone seminar for the food safety minor. Case discussions and independent  
projects about safety issues in the food system from a multidisciplinary  
perspective.

AN S 490. Independent Study.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of the  
instructor  
Open to juniors and seniors in animal science and dairy science showing  
satisfactory preparation for problems chosen. Individual topic conference and  
preparation of report. A maximum of 6 credits of An S 490 may be applied toward  
the total credits required for graduation.

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of the  
instructor  
Open to juniors and seniors in animal science and dairy science showing  
satisfactory preparation for problems chosen. Individual topic conference and  
preparation of report. A maximum of 6 credits of An S 490 may be applied toward  
the total credits required for graduation.

AN S 490B. Independent Study: Dairy Science.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of the  
instructor  
Open to juniors and seniors in animal science and dairy science showing  
satisfactory preparation for problems chosen. Individual topic conference and  
preparation of report. A maximum of 6 credits of An S 490 may be applied toward  
the total credits required for graduation.

AN S 490C. Independent Study: Meat Science.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of the  
instructor  
Open to juniors and seniors in animal science and dairy science showing  
satisfactory preparation for problems chosen. Individual topic conference and  
preparation of report. A maximum of 6 credits of An S 490 may be applied toward  
the total credits required for graduation.

AN S 490D. Independent Study: Companion Animal Science.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of the  
instructor  
Open to juniors and seniors in animal science and dairy science showing  
satisfactory preparation for problems chosen. Individual topic conference and  
preparation of report. A maximum of 6 credits of An S 490 may be applied toward  
the total credits required for graduation.

AN S 490E. Independent Study: Equine Science.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of the  
instructor  
Open to juniors and seniors in animal science and dairy science showing  
satisfactory preparation for problems chosen. Individual topic conference and  
preparation of report. A maximum of 6 credits of An S 490 may be applied toward  
the total credits required for graduation.

AN S 490F. Independent Study: Honors.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of the  
instructor  
Open to juniors and seniors in animal science and dairy science showing  
satisfactory preparation for problems chosen. Individual topic conference and  
preparation of report. A maximum of 6 credits of An S 490 may be applied toward  
the total credits required for graduation.

AN S 490I. Independent Study: Entrepreneurship.  
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of the  
instructor  
Open to juniors and seniors in animal science and dairy science showing  
satisfactory preparation for problems chosen. Individual topic conference and  
preparation of report. A maximum of 6 credits of An S 490 may be applied toward  
the total credits required for graduation.

AN S 493. Workshop in Animal Science.  
Cr. 1-3. Repeatable. Prereq: Permission of instructor  
Workshop in livestock production. Includes current concepts in breeding, nutrition,  
reproduction, meats, and technologies that impact the animal industry.

AN S 495. Agricultural Travel Course Preparation.  
Cr. R. Repeatable. F.S. Prereq: Permission of instructor  
Limited enrollment. Students enrolled in this course will also register for Agron  
495 and intend to register in Agron 496 and An S 496 the following term. Topics  
will include the agricultural industries, climate, crops, culture, history, livestock,  
marketing, soils, and preparation for travel to locations to be visited. Information  
normally available 9 months before departure.

AN S 496. Agricultural Travel Course.  
Cr. arr. Repeatable. Prereq: Permission of instructor, 30 college credits  
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and  
study of production methods in major crop and livestock regions of the world.  
Influence of climate, economics, geography, soils, landscapes, markets, and other  
factors on livestock and crop production. Locations and duration of tours will vary.  
Summer tour will usually visit a northern location and winter tour will usually visit a  
southern location. Information usually available 9 months before departure. Tour  
expenses paid by students.

AN S 496A. Agricultural Travel Course: International tour.  
Cr. arr. Repeatable. Prereq: Permission of instructor, 30 college credits  
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and  
study of production methods in major crop and livestock regions of the world.  
Influence of climate, economics, geography, soils, landscapes, markets, and other  
factors on livestock and crop production. Locations and duration of tours will vary.  
Summer tour will usually visit a northern location and winter tour will usually visit a  
southern location. Information usually available 9 months before departure. Tour  
expenses paid by students.  
Meets International Perspectives Requirement.

AN S 496B. Agricultural Travel Course: Domestic tour.  
Cr. arr. Repeatable. Prereq: Permission of instructor, 30 college credits  
Limited enrollment. Students enroll in both An S 496 and Agron 496. Tour and  
study of production methods in major crop and livestock regions of the world.  
Influence of climate, economics, geography, soils, landscapes, markets, and other  
factors on livestock and crop production. Locations and duration of tours will vary.  
Summer tour will usually visit a northern location and winter tour will usually visit a  
southern location. Information usually available 9 months before departure. Tour  
expenses paid by students.

AN S 497. Undergraduate Teaching Experiences in Animal Science.  
Cr. 1-2. Repeatable, maximum of 4 times. F.S.SS. Prereq: Permission of instructor  
Development of oral and written communication skills of technical concepts in  
animal science. Emphasis on organizational skills, conducting activities and  
interpersonal communication skills. Responsibilities in a class under direct  
supervision of a faculty member. A maximum of 4 credits of An S 497 may be  
applied toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

AN S 500. Computer Techniques for Biological Research.  
(2-0) Cr. 1. F.  
Introduction to UNIX and SAS for solving research problems, including  
organization of data files, transfer of files between workstations, developing  
models, and techniques for analysis of designed experiments. Introduction to  
matrix algebra for solving animal breeding problems using MATLAB and computer  
simulation.
AN S 500A. Computer Techniques for Biological Research: UNIX and SAS. (2-0) Cr. 1. F.
First half semester course. Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

AN S 500B. Computer Techniques for Biological Research: Problem solving using matrix algebra. (2-0) Cr. 1. F.
Second half semester course. Introduction to UNIX and SAS for solving research problems, including organization of data files, transfer of files between workstations, developing models, and techniques for analysis of designed experiments. Introduction to matrix algebra for solving animal breeding problems using MATLAB and computer simulation.

AN S 501. Survey of Animal Disciplines. (1-0) Cr. 1. F.
Required for Animal Science graduate students. Orientation to departmental and graduate school policies and procedures. Discussion of programs of research and outreach in Animal Science. Issues impacting the animal industry. Offered on a satisfactory-fail basis only.

AN S 503. Seminar in Animal Production. (1-0) Cr. 1. Repeatable. F. Prereq: Permission of instructor Discussion and evaluation of current topics in animal production and management.

AN S 515. Integrated Crop and Livestock Production Systems. (Cross-listed with A B E, AGRON, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

AN S 518. Digestive Physiology and Metabolism of Non Ruminants. (Cross-listed with NUTRS). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: AN S 419 or NUTRS 501
Digestion and metabolism of nutrients. Nutritional requirements and current research and feeding programs for poultry and swine.

AN S 520. Digestive Physiology and Metabolism of Ruminants. (Cross-listed with NUTRS). (2-2) Cr. 3. Alt. S., offered even-numbered years. Prereq: AN S 419 or NUTRS 501
Digestive physiology and nutrient metabolism in ruminant and preruminant animals.

AN S 533. Physiology and Endocrinology of Animal Reproduction. (2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: General physiology course
Development of structure and function of the reproductive system. Physiologic and endocrine aspects including puberty, gametogenesis, estrous cycle, pregnancy, maternal recognition, fertilization and early embryonic development.

AN S 536. Perinatology. (2-0) Cr. 2. S. Prereq: One course in physiology; one course in biochemistry
Regulation of metabolism and development in the mammalian fetus and neonate is explored in a comparative manner. Emphasis will be on the dynamic changes in these relationships occurring at birth.

AN S 537. Topics in Farm Animal Environmental Physiology, Behavior, Stress, and Welfare. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537A. Animal rights and philosophies. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537B. Brain mechanisms of stress. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537C. Measuring behavior and welfare. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537D. Environmental stressors. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537E. Stress and the immune system. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 537F. Other related topics. (3-0) Cr. 3. Repeatable, maximum of 6 times. F.S. Prereq: permission of instructor; M.S. or Ph.D. student
Each semester students focus on different topics related to farm animal environmental physiology, behavior, stress, and welfare. Each topic is separate and distinct, and students may enroll in multiple topics. This is an on-line cooperative course involving instructors at Iowa State University, Texas Tech University, and the University of Illinois. Each topic may be taken only one time.

AN S 540. Livestock Immunogenetics. (Cross-listed with MICRO, V MPM). (2-0) Cr. 2. Alt. S., offered odd-numbered years. Prereq: AN S 561 or MICRO 575 or V MPM 520
Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

AN S 549. Advanced Vertebrate Physiology I. (Cross-listed with KIN, NUTRS). (4-0) Cr. 4. F. Prereq: Biol 335; credit or enrollment in BBMB 404 or BBMB 420
Overview of mammalian physiology. Cell biology, endocrinology, cardiovascular, respiratory, immune, digestive, skeletal muscle and reproductive systems.

AN S 552. Advanced Vertebrate Physiology II. (Cross-listed with KIN, NUTRS). (3-0) Cr. 3. S. Prereq: BIOL 335; credit or enrollment in BBMB 404 or BBMB 420
Cardiovascular, renal, respiratory, and digestive physiology.

AN S 556. Current Topics in Genome Analysis. (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: BBMB 405 or GDCB 510
Introduction to principles and methodology of molecular genetics useful in analyzing and modifying large genomes.

AN S 560. Processed Meats. (Dual-listed with AN S 460). (2-2) Cr. 3. S. Prereq: AN S 270
Physical, chemical and biological properties of meat important to processed meat product characteristics. Ingredients, technology and equipment used for cured meats, loaf products and fresh, cooked, dry and semi-dry sausage products.

AN S 561. Population and Quantitative Genetics for Breeding. (Cross-listed with AGRON). (4-0) Cr. 4. F. Prereq: STAT 401
Population and quantitative genetics for plant and animal genetics. Study of the genetic basis and analysis of variation in quantitative traits in domestic or experimental populations using phenotypic and molecular marker data, including estimation of heritability and other genetic parameters, linkage analysis and mapping of quantitative trait loci, and the impact of inbreeding, heterosis, and genotype-by-environment interaction.
AN S 562A. Methodologies for Population/Quantitative Genetics: Linear Models and Genetic Prediction.
(2-0) Cr. 2. S. Prereq: AN S 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

(2-0) Cr. 2. S. Prereq: AN S 561, STAT 402
Basic theory for genetic analysis of animal breeding data. Course A (1st half semester) covers linear models, selection index methods, and basic theory for best linear unbiased prediction. Course B (2nd half semester) best linear unbiased prediction, including genetic groups, environmental adjustment, repeated records, multiple trait models, maternal effects models, and theory for maximum likelihood estimation of genetic parameters.

(2-2) Cr. 3. S. Prereq: AN S 460
Preparation of meat products, chemical relationships during processing. Effects of modern technology, non-meat additives and preservation techniques on quality and safety of processed meat. Laboratory demonstration of principles and technology.

AN S 590. Special Topics.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590A. Special Topics: Animal Breeding.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590B. Special Topics: Animal Nutrition.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590C. Special Topics: Meat Animal Production.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590D. Special Topics: Dairy Production.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590E. Special Topics: Meat Science.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590F. Special Topics: Physiology of Reproduction.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590G. Special Topics: Muscle Biology.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590H. Special Topics: Poultry Nutrition.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590L. Special Topics: Experimental Surgery.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590M. Special Topics: Experimental Surgery.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 590N. Special Topics: Ethology.
Cr. 1-3. Repeatable. F.S.S. Prereq: Permission of instructor
Special topics in the animal sciences, offered on demand and may be conducted by guest professors.

AN S 599. Creative Component.
Cr. 1-8. F.S.S. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AN S 599A. Creative Component: Animal Breeding and Genetics.
Cr. 1-8. F.S.S. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

Cr. 1-8. F.S.S. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AN S 599C. Creative Component: Animal Physiology.
Cr. 1-8. F.S.S. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AN S 599D. Creative Component: Animal Science.
Cr. 1-8. F.S.S. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

AN S 599E. Creative Component: Meat Science.
Cr. 1-8. F.S.S. Prereq: Nonthesis M.S
A written report based on research, library readings, or topics related to the student’s area of specialization and approved by the student’s advisory committee.

Courses for graduate students:

(1-0) Cr. 1. Repeatable. F.S. Prereq: Permission of instructor
Discussion of current literature; preparation and submission of abstracts.

AN S 618. Vitamins and Minerals.
(Cross-listed with NUTRS). Cr. 2. Alt., S. Offered even-numbered years. Prereq: Biochemistry, physiology, basic nutrition
Understanding molecular aspects of vitamin and mineral metabolism and homeostasis in humans and animals. An in-depth examination of the chemistry of vitamins and minerals, including genetic mutations, proteins involved in absorption and excretion, and their necessity in biological processes.
AN S 619. Advanced Nutrition and Metabolism - Protein.  
(Cross-listed with NUTR S). (2-0) Cr. 2. F. Prereq: BBMB 405 
Digestion, absorption, and intermediary metabolism of amino acids and protein. Regulation of protein synthesis and degradation. Integration of cellular biochemistry and physiology of mammalian protein metabolism.

(Cross-listed with NUTR S). (2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: BBMB 405 
Energy constituents of feedstuffs and energy needs of animals as related to cellular biochemistry and physiology. Interpretations of classical and current research and reviews.

(1-0) Cr. 1. Repeatable. F. Prereq: Permission of instructor 
Discussion of current literature and preparation of reports on selected topics concerning physiology of reproduction.

(2-0) Cr. 2. Prereq: AN S 561 
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

AN S 652A. Animal Breeding Strategies: Breeding Goals and Response to Selection.  
(2-0) Cr. 2. Prereq: AN S 561 
Basic concepts and methods for design and evaluation of genetic improvement programs for livestock. Topic A. (1st half semester) Prediction of response to selection, selection index theory, multiple trait selection, inbreeding, crossbreeding, and marker-assisted selection. Topic B. (2nd half semester) Advanced concepts in design and evaluation of animal breeding programs, including modeling and optimization, derivation of economic values, gene-flow, and predicting rates of inbreeding. Each topic may be taken only one time for academic credit.

(2-0) Cr. 2. F. Prereq: AN S 561 recommended 
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

(2-0) Cr. 2. F. Prereq: AN S 561 recommended 
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

(2-0) Cr. 2. F. Prereq: AN S 561 recommended 
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

(2-0) Cr. 2. F. Prereq: AN S 561 recommended 
Industrial applications of breeding systems, selection methods, and new genetic technologies. One or more field trips to an industry breeding company.

(3-1) Cr. 2. Alt. F., offered odd-numbered years. Prereq: AN S 500, AN S 562, COM S 207 
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.

AN S 655A. Computational Strategies for Predicting Breeding Values.  
(3-1) Cr. 2. Alt. F., offered odd-numbered years. Prereq: AN S 500, AN S 562, COM S 207 
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.

AN S 655B. Computational Strategies for Genetic Parameter Estimation.  
(3-1) Cr. 2. Alt. F., offered even-numbered years. Prereq: AN S 500, AN S 562, COM S 207 
Computational methods and strategies for analysis of large data sets with animal breeding data for use in research and industry applications. Course A (1st half semester) Strategies for handling large sets and for prediction using best linear unbiased prediction using a formal language and utility programs. Course B (2nd half semester) Strategies for estimation of genetic parameters and for use of non-linear models for genetic analysis of categorical and survival type data.

(2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: AN S 562, STAT 447 
Statistical methods for mapping quantitative trait loci in out-bred populations. Methods based on modeling covariances between relatives. Likelihood based methods using half-sib and full-sib families and extended pedigrees. Bayesian methods applied.

AN S 656. Seminar in Animal Breeding and Genetics.  
(1-0) Cr. 1. Repeatable. F.S. 
Presentation of current research related to animal breeding and genetics.

(3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: BBMB 405, BBMB 420, or BBMB 502 
Ultrastructure of muscle; chemistry, structure, function, and molecular biology of muscle proteins. Molecular aspects of muscle contraction, development and turnover. Cytoskeletal proteins and dynamics.

AN S 684. Seminar in Meat Science.  
(1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor 
Discussion and evaluation of current topics in research publications in meat science.

AN S 685. Seminar in Muscle Biology.  
(1-0) Cr. 1. Repeatable. S. Prereq: Permission of instructor 
Reports and discussion of recent literature and current investigations.

AN S 695. Seminar in Animal Science.  
(1-0) Cr. 1. Repeatable. S. 
Reports and discussion of current issues and research in animal science. One credit is required for all M.S. degree candidates with graduate majors in the Department of Animal Science, and two credits are required for all Ph.D. candidates with graduate majors in the Department of Animal Science. Offered on a satisfactory-fail basis only.

AN S 699. Research.  
Cr. arr. Repeatable.

AN S 699A. Research: Animal Breeding.  
Cr. arr. Repeatable.

Cr. arr. Repeatable.

Cr. arr. Repeatable.

AN S 699D. Research: Dairy Production.  
Cr. arr. Repeatable.

Cr. arr. Repeatable.

AN S 699F. Research: Physiology of Reproduction.  
Cr. arr. Repeatable.

AN S 699G. Research: Muscle Biology.  
Cr. arr. Repeatable.

Cr. arr. Repeatable.

AN S 699I. Research: Poultry Products.  
Cr. arr. Repeatable.

Cr. arr. Repeatable.
Biochemistry, Biophysics, and Molecular Biology

Undergraduate Study

The department offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in agricultural biochemistry in the College of Agriculture and Life Sciences.

Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches; genomic and proteomic technology; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease.

Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their education to pursue advanced degrees in graduate school, medicine, pharmacy or veterinary medicine.

Graduates of biochemistry, agricultural biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biochemical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have developed the skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life. Graduates have the experience of interacting with persons of different disciplines and cultures. Students have the training in biological and physical science and mathematics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in biochemistry and biophysics and with interdepartmental majors in genetics, immunobiology, MCD (molecular, cellular, and developmental biology), plant physiology, and toxicology. Minor work is offered to students taking majors in genetics, immunobiology, MCD (molecular, cellular, and developmental biology), plant physiology, and toxicology. Minor work is offered to students taking majors in genetics, immunobiology, MCD (molecular, cellular, and developmental biology), plant physiology, and toxicology.

All graduate students are required by the department to teach as part of their training for an advanced degree.

The department offers a B.S./M.S. program in biochemistry that allows students to obtain both the B.S. and M.S. degrees in five years. The program is open to students in the College of Liberal Arts and Sciences and in the College of Agriculture. Students interested in this program should contact the department office for details. Application for admission to the Graduate College should be made near the end of the junior undergraduate (third) year. Students would begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships.

Agricultural Biochemistry Major in the College of Agriculture and Life Sciences

For the undergraduate curriculum leading to the degree bachelor of science, see College of Agriculture, Curricula. Agricultural biochemistry is recommended to students interested in the areas of agriculture requiring strong preparation in biochemistry, chemistry, physics, and mathematics, or in preparation for the study of veterinary medicine. Employment opportunities exist in agrochemical industries, and animal and plant biotechnology.

Total Credits: 6

**Agricultural Sciences**

Courses from an approved list

9

**Curriculum in Agricultural Biochemistry**

Administered by the Department of Biochemistry, Biophysics and Molecular Biology.
Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency:
6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

ENGL 150  Critical Thinking and Communication  3
ENGL 250  Written, Oral, Visual, and Electronic Composition  3
SP CM 212  Fundamentals of Public Speaking  3
LIB 160  Information Literacy  1

Total Credits  10

Ethics: 3 cr.
3 cr. from approved list.

Humanities and Social Sciences: 6 cr.
3 cr. from approved humanities list; 3 cr. from approved social science list.

Mathematical Sciences: 12 cr.

MATH 165  Calculus I  4
MATH 166  Calculus II  4
MATH 265  Calculus III  4
or MATH 266  Elementary Differential Equations  4

Total Credits  12

Physical Sciences: 38 cr.

CHEM 177  General Chemistry I  4
or CHEM 201  Advanced General Chemistry  4
CHEM 177L  Laboratory in General Chemistry I  1
or CHEM 201L  Laboratory in Advanced General Chemistry  1
CHEM 178  General Chemistry II  3
CHEM 211  Quantitative and Environmental Analysis  2
CHEM 211L  Quantitative and Environmental Analysis Laboratory  2
CHEM 324  Introductory Quantum Mechanics  3
CHEM 325  Chemical Thermodynamics  3
CHEM 322L  Laboratory in Physical Chemistry  3
CHEM 331  Organic Chemistry I  3
CHEM 331L  Laboratory in Organic Chemistry I  1
CHEM 332  Organic Chemistry II  3
PHYS 221  Introduction to Classical Physics I  5
PHYS 222  Introduction to Classical Physics II  5

Total Credits  38

Life Sciences: 13 cr.

BIOL 211  Principles of Biology I  3
BIOL 212  Principles of Biology II  3
BIOL 211L  Principles of Biology Laboratory I  1
or BIOL 212L  Principles of Biology Laboratory II  1
BIOL 313  Principles of Genetics  3
BIOL 314  Principles of Molecular Cell Biology  3

Total Credits  13

Agricultural Biochemistry: 13 cr.

BBMB 101  Introduction to Biochemistry  1
BBMB 102  Introduction to Biochemistry Laboratory  1
BBMB 201  Chemical Principles in Biological Systems  2
BBMB 404  Biochemistry I  3
or BBMB 501  Comprehensive Biochemistry I  3
BBMB 405  Biochemistry II  3
or BBMB 502  Comprehensive Biochemistry II  3
BBMB 411  Techniques in Biochemical Research  4

Total Credits  14

Agricultural Sciences: 9 cr.
Complete 9 cr. from approved list.
See also the B.S./M.S. program under Graduate Study.

Courses primarily for undergraduates:

BBMB 101. Introduction to Biochemistry.
(1-0) Cr. 1, F.
Research activities, career opportunities in biochemistry and biophysics, and an introduction to the structure of biologically important compounds. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BBMB 102. Introduction to Biochemistry Laboratory.
(0-2) Cr. 1. S. Prereq: Credit or enrollment in CHEM 177 and CHEM 177L or CHEM 201 and CHEM 201L
Topics in the scientific background of biochemistry, such as macromolecules, metabolism, and catalysis. Laboratory experimentation covers biochemical concepts and the study of bio-molecules including proteins, lipids and nucleic acids. A significant component is practice in scientific communication. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BBMB 201. Chemical Principles in Biological Systems.
(2-0) Cr. 2. S. Prereq: Credit or enrollment in CHEM 332
Survey of chemical principles as they apply in biological systems including: water, organic chemistry of functional groups in biomolecules and biochemical cofactors, weak bonds and their contribution to biomolecular structure, oxidation-reduction reactions and redox potential, thermodynamic laws and bioenergetics, chemical equilibria and kinetics, inorganic chemistry in biological systems, data presentation. The subjects will be taught using molecules from biological systems as examples. Intended for majors in biochemistry, biophysics or agricultural biochemistry.

BBMB 221. Structure and Reactions in Biochemical Processes.
(3-0) Cr. 3. F. Prereq: CHEM 163, CHEM 167, or CHEM 177
Fundamentals necessary for an understanding of biochemical processes. Primarily for students in agriculture. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry. Credit for both BBMB 221 and Chem 231 may not be applied toward graduation.

BBMB 301. Survey of Biochemistry.
(3-0) Cr. 3. F.S.SS. Prereq: CHEM 231 or CHEM 331
A survey of biochemistry; structure and function of amino acids, proteins, carbohydrates, lipids, and nucleic acids; enzymology; metabolism; biosynthesis; and selected topics. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

(3-0) Cr. 3. F. Prereq: CHEM 231 or CHEM 331; BIOL 212
Understanding biological systems at the molecular level; chemistry of biological macromolecules, enzyme function and regulation, metabolic pathways; integration of metabolism in diverse living systems. For students in biology and related majors who do not require the more rigorous treatment of biochemistry found in BBMB 404/405. Not acceptable for credit toward a major in biochemistry, biophysics, or agricultural biochemistry.

BBMB 404. Biochemistry I.
(3-0) Cr. 3. F. Prereq: CHEM 332
A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical and nutritional sciences. Chemistry of amino acids, proteins, carbohydrates, and lipids, vitamins; protein structure; enzymology; carbohydrate metabolism. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.

BBMB 405. Biochemistry II.
(3-0) Cr. 3. S. Prereq: BBMB 404
A general overview for graduate and advanced undergraduate students in agricultural, biological, chemical, and nutritional sciences. Metabolism of carbohydrates, amino acids, nucleotides and lipids; formation, turnover, and molecular relationships among DNA, RNA, and proteins; genetic code; regulation of gene expression; selected topics in the molecular physiology of plants and animals. Credit for both BBMB 420 and the BBMB 404 - BBMB 405 sequence may not be applied toward graduation.

BBMB 411. Techniques in Biochemical Research.
(2-8) Cr. 4. F. Prereq: Credit or enrollment in BBMB 404 or BBMB 501; CHEM 211 Laboratory experimentation and techniques for studying biochemistry, including: chromatographic methods; electrophoresis; spectrophotometry; enzyme purification; enzyme kinetics; and characterization of carbohydrates, proteins, lipids, and nucleic acids.
BBMB 420. Physiological Chemistry. 
(3-0) Cr. 3. F. Prereq: CHEM 332, BBMB 301 or BIOL 314
Structure and function of proteins; enzymology; biological oxidation; chemistry and metabolism of carbohydrates, lipids, amino acids and nucleic acids; protein synthesis and the genetic code; relationship of biochemistry to selected animal diseases. Biochemistry of higher animals emphasized. Not acceptable for credit toward a major in agricultural biochemistry or biochemistry. Acceptable for credit toward a major in biochemistry. Credit for both BBMB 420 and the BBMB 404 - 405 sequence may not be applied toward graduation.

(Dual-listed with BBMB 530). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 440. Laboratory in Microbial Physiology, Diversity, and Genetics. 
(Cross-listed with MICRO). (2-6) Cr. 4. F. Prereq: MICRO 302, MICRO 302L, CHEM 332, BIOL 313L
Fundamental techniques and theory for studying the cellular mechanisms and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments. Also included are techniques for phylogenetic characterization, measuring gene expression, and genetic manipulation of diverse species of bacteria. Essential components for the effective communication of scientific results are also emphasized.

BBMB 461. Molecular Biophysics. 
(Dual-listed with BBMB 561). (2-0) Cr. 2. S. Prereq: Credit or enrollment in CHEM 324 and CHEM 325
Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for the graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions.

BBMB 490. Independent Study. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor
Independent study with a faculty mentor. No more than 9 credits of BBMB 490 may count toward graduation.

BBMB 490H. Independent Study, Honors. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: College of Agriculture: junior or senior classification and permission of instructor; College of Liberal Arts and Sciences: permission of instructor
Independent study with a faculty mentor. No more than 9 credits of BBMB 490 may count toward graduation.

BBMB 499. Undergraduate Research. 
Cr. 1-5. Repeatable. F.S.SS. Prereq: Permission of faculty member with whom student proposes to work
Independent research under faculty guidance.

Courses primarily for graduate students, open to qualified undergraduates:

BBMB 501. Comprehensive Biochemistry I. 
(4-0) Cr. 4. F. Prereq: CHEM 211, CHEM 332; a previous course in biochemistry is strongly recommended
Chemical composition of living matter and the chemistry of life processes. Chemical characterization of amino acids, proteins, carbohydrates and lipids; enzymology and co-enzymes; metabolism of carbohydrates; biological oxidations.

BBMB 502. Comprehensive Biochemistry II. 
(4-0) Cr. 4. S. Prereq: BBMB 501
Chemical composition of living matter and the chemistry of life processes. Metabolism of lipids, amino acids, and nucleotides; membrane biochemistry; biosynthesis of DNA, RNA, and proteins; gene regulation; selected topics.

BBMB 503. Bioorganic Chemistry. 
(Cross-listed with CHEM). (2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: CHEM 402 or BBMB 405
Essential elements: transport and storage of ions and of oxygen; metalloenzymes and metalloenzymes; electron-transfer processes in respiration and photosynthesis; metabolism of nonmetals and redox processes involved in it; medicinal aspects of inorganic chemistry.

BBMB 520. Genetic Engineering. 
(Cross-listed with GDCB, MCB). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: GEN 411 or BBMB 405
Strategies and rationale of recombinant DNA technologies. The methodology of genetic engineering in basic research and implications for applied research will be considered. Topics include: basic tools of molecular cloning, targeted mutagenesis, fluorescent proteins, protein expression systems, and transgenic model systems.

BBMB 530. Procaroytic Diversity and Ecology. 
(Dual-listed with BBMB 430). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

BBMB 542. Introduction to Molecular Biology Techniques. 
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

BBMB 542A. Introduction to Molecular Biology Techniques: DNA Techniques. 
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

BBMB 542C. Introduction to Molecular Biology Techniques: Cell Techniques. 
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.SS. Prereq: Graduate classification
Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

BBMB 542E. Introduction to Molecular Biology Techniques: Proteomics. 
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F. Prereq: Graduate classification
Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

BBMB 542F. Introduction to Molecular Biology Techniques: Metabolomics. 
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F. Prereq: Graduate classification
Includes metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

BBMB 542G. Genomic Techniques. 
(Cross-listed with B M S, EEOB, FS HN, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F. Prereq: Graduate classification
Advanced solution state Nuclear Magnetic Resonance spectroscopy as applied to biological systems. Topics include theoretical principles of NMR, practical aspects of experimental NMR, methodologies for protein structure determination, NMR relaxation, recent advances in NMR spectroscopy.

BBMB 561. Molecular Biophysics. 
(Dual-listed with BBMB 461). (2-0) Cr. 2. S. Prereq: Credit or enrollment in CHEM 324 and CHEM 325
Physical methods for the study of molecular structure and organization of biological materials. X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy. Registration for graduate credit commits the student to graduate-level examinations, which differ from undergraduate-level examinations in the number and/or difficulty of questions.
BBMB 561L. Laboratory in Molecular Biophysics. (1-3) Cr. 2. S. Prereq: Credit or enrollment in BBMB 461/BBMB 561. Practice in methods of X-ray diffraction, nuclear magnetic resonance, hydrodynamics and fluorescence spectroscopy as applied to macromolecules.

BBMB 559. Bioinformatics III (Structural Genome Informatics). (Cross-listed with BCB, COM S, CPR E). (3-0) Cr. 3. F. Prereq: BCB 567, GEN 411, STAT 430

BBMB 590. Special Topics. Cr. arr. By arrangement.

BBMB 593. Workshop in Biochemistry and Biophysics. Cr. 1. Repeatable. F.S. Prereq: Permission and signature of course administrator required.
Workshops in selected topics in biochemistry and biophysics. Credit in this course does not meet the requirement for advanced graduate electives in Biochemistry. Spring only; BBMB Undergraduate Research Symposium participation. Scheduled class meetings are required in addition to attending the symposium.

Courses for graduate students:

BBMB 607. Plant Biochemistry. (2-0) Cr. 2. Alt. F., offered even-numbered years. Prereq: BBMB 405 or BBMB 502
Description of unique aspects of plant biochemistry including lipid metabolism, cell wall structure, secondary metabolism, phytotoxin biosynthesis, and plant defenses.

BBMB 615. Molecular Immunology. (Cross-listed with MICR O, V MPH). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: BBMB 405 or BBMB 502
Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

BBMB 622. Carbohydrate Chemistry. (2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: BBMB 404 or BBMB 501
Structure, occurrence, properties, function, and chemical and enzymatic modifications of monosaccharides, oligosaccharides, polysaccharides, and glycoproteins.

Fundamental and advanced enzyme kinetics. Topics include integrated rate equations, methods for deriving initial-rate equations, inhibition, product effects, methods for verifying kinetic mechanisms, allosterism, hysteresis, isotope effects, and complex kinetic mechanisms.

BBMB 642. Mechanisms of Enzymatic Catalysis. (2-0) Cr. 2. Alt. S., offered odd-numbered years. Prereq: BBMB 404, BBMB 420, or BBMB 501
The chemical basis of enzymatic catalysis with emphasis on mechanisms of substrate recognition, general acid-base catalysis and stereo-electronic factors.

BBMB 645. Molecular Signaling. (2-0) Cr. 2. Alt. S., offered odd-numbered years. Prereq: BBMB 405, BBMB 420, or BBMB 502
Molecular mechanisms of cellular signaling including receptor activation, desensitization and cross talk, signal transduction pathways, and nuclear receptors. Discussion includes a variety of cell surface receptors and their hormone; growth factor and extracellular matrix activators; protein kinases; caspase and transcription factor downstream signals; ligands, gases and cyclic nucleotides as regulators of cell signaling. Course content includes current literature, student and instructor presentations and research proposal writing.

BBMB 652. Protein Chemistry - Chemical Methods. (2-0) Cr. 1. Alt. F., offered odd-numbered years. Prereq: BBMB 404 or BBMB 501
First 8 weeks. Chemical reactions as a means of determining protein structure and biological function.

BBMB 653. Protein Chemistry - Physical Methods. (2-0) Cr. 1. Alt. F., offered odd-numbered years. Prereq: BBMB 404 or BBMB 501
Second 8 weeks. Protein structure determination as a means of understanding biological function.

BBMB 660. Membrane Biochemistry. (2-0) Cr. 2. Alt. F., offered even-numbered years. Prereq: BBMB 405 or BBMB 502
Protein and lipid constituents of biological membranes. Structure and topography of membrane proteins. Selected topics concerning the membrane proteins involved in diverse biochemical processes, such as energy transduction transport across membranes, neurotransmission and signal transduction.

BBMB 661. Current Topics in Neuroscience. (Cross-listed with GDCB, NEURO). (2-0) Cr. 2-3. Repeatable. Alt. S., offered even-numbered years. Prereq: NEURO 556 (or comparable course) or permission of instructor
Topics may include molecular and cellular neuroscience, neurodevelopment, neuroplasticity, neurodegenerative diseases, cognitive neuroscience, sensory biology, neural integration, membrane biophysics, neuroethology, techniques in neurobiology and behavior.

BBMB 675. Nucleic Acid Structure and Function. (2-0) Cr. 2. Alt. F., offered even-numbered years. Prereq: BBMB 405 or BBMB 502
In-depth discussion of nucleic acid properties, structures and structure/function relationships. Interactions between nucleic acids and proteins will be emphasized.

BBMB 676. Biochemistry of Gene Expression in Eucaryotes. (Cross-listed with MCD, GDCB). (2-0) Cr. 2. Alt. S., offered odd-numbered years. Prereq: BBMB 404 or BBMB 501, BBMB 405 or BBMB 502 or GDCB 511
Analysis of the biochemical processes involved in expression of eucaryotic genes and the regulation thereof, including RNA polymerase, transcriptional regulatory proteins, enhancers and silencers, chromosome structure, termination, RNA processing, RNA transport, RNA turnover, small RNAs translational regulation, protein turnover.

BBMB 681. Advanced Seminar. Cr. 1. Repeatable. F.S. Prereq: Permission of instructor
Student presentations.

BBMB 682. Departmental Seminar. Cr. R. F.S. Prereq: Permission of instructor
Faculty, staff and invited guest research seminar.

BBMB 699. Research. Cr. arr. Repeatable. F.S. Prereq: Permission of instructor

Biology (Interdepartmental Undergraduate Program)

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation’s leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State’s Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution and Organismal Biology and the Department of Genetics, Development and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university’s strengths in science and technology. A bachelor’s degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry,
environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Customizing a degree

Biological studies encompass an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The Biology major offers a rich variety of coursework addressing most of the areas of biology. The major’s curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student’s career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the Biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides five advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the Biology web site. The areas are:

Pre-medical and Human Health Professions —This area emphasizes preparation for further study in medical school or allied human health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.

Pre-veterinary —An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But, pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

Molecular and Cellular Biology —Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

Ecology and Conservation Biology —Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth’s biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Evolutional Biodiversity —This area provides students with a sound understanding of evolutionary principles and the biological patterns that result from evolutionary change. Students have the opportunity to explore, in depth, the biodiversity found within a wide range of groups of organisms. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Other opportunities

Teacher licensure—Biology majors seeking licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Undergraduate research—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 499 Undergraduate Research Experience. Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and at industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship.

Field trip courses —The Biology Program offers two field trip courses: BIOL 393 (North American Field Trips in Biology) and BIOL 394 (International Field Trips in Biology). In recent years field trip opportunities to the Boundary Waters area of Minnesota, Honduras, and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience —Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 394 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

Courses offered at other locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major. Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory—The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement. Courses that are available each summer are listed at www.coms.usm.edu.

Summer Biological Field Stations—Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g. marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies—Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information see www.oats.duke.edu or contact the Biology Student Services Office in 103 Bessey Hall.

General requirements

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding different general education and course requirements that are specific to these colleges.

Supporting course requirements —Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in both ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316, or JL MC 347, or SP CM 212.

Undergraduate Study

Biology majors start their studies in the biological sciences by taking a unified biology core curriculum consisting of six integrated courses, including four with labs. The first year provides a broad introduction to the nature of life.

BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the Biology major take BIOL 112 in place of BIOL 110. Students then explore concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of biological science at the 300 level, or above, from an approved list of courses. Of these, at least 9 credits must be taken as BIOL courses, and a minimum of two BIOL laboratory or field courses must also be included. Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced courses above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program’s web site has a complete listing of acceptable upper-level life science courses. Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

Graduate Study

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neuroscience; Plant Biology; Toxicology; Immunobiology; and Environmental Science are also available. See the Index for information.

A non-thesis master’s degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Curriculum in Biology

College of Liberal Arts and Sciences

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better)

English composition

Speech fundamentals

Total Credits

Communication/Library

ENGL 150 Critical Thinking and Communication

ENGL 250 Written, Oral, Visual, and Electronic Composition

LIB 160 Information Literacy

One of the following:

SP CM 212 Fundamentals of Public Speaking

ENGL 312X Biological Communications (3 cr.)

Total Credits

Humanities and Social Sciences

Humanities course

Social Science course

Total Credits

Mathematical Sciences 7 cr.

MATH 160 or MATH 181 Survey of Calculus

and Calculus and Mathematical Modeling for the Life Sciences I

MATH 165 or STAT 101 Calculus I and Principles of Statistics

or STAT 104 Introduction to Statistics

MATH 165 & MATH 166 Calculus I and II

MATH 181 & MATH 182 Calculus and Mathematical Modeling for the Life Sciences I

and II

or STAT 101 Principles of Statistics

or STAT 104 Introduction to Statistics

and Statistical Methods for Research Workers

Iowa State University – 2014-2015

Total Credits 23.5

Advanced Biology: 21 cr.

All graded courses minimum C; 2.00 GPA average required. See the Biology Program web site for list of approved Advanced Biology courses, or consult an adviser in the Biology Student Services office, 103 Bessey Hall.

Two Advanced BIOL courses with lab or field components (from approved list)

- Biology advanced courses (from approved list) 9
- Additional approved biology advanced courses 12

Total Credits 21

Courses primarily for undergraduates:

BIOL 101. Introductory Biology.

(3-0) Cr. 3. F.S.SS.

Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Does not satisfy biology major requirements.

BIOL 110. Introduction to Biology.

Cr. 1. F.

Orientation to the scope of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Offered on a satisfactory-fail basis only.

BIOL 111. Opportunities in Biology.

(1-0) Cr. 0.5. S.

Introduction to biological science disciplines and professional opportunities through faculty presentations which examine a variety of current research topics. Offered on a satisfactory-fail basis only.

BIOL 112. Transfer Student Orientation.

Cr. R. F.S.

Orientation to opportunities in Biology. Review of degree requirements and other information needed by students that have not participated in the first year Biology orientation courses. Offered on a satisfactory-fail basis only.

BIOL 155. Human Biology.

(3-0) Cr. 3. F.S.

A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science. Does not satisfy biology major requirements.

BIOL 173. Environmental Biology.

(Cross-listed with ENV S). (3-0) Cr. 3. F.S.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

BIOL 201. Introduction to Environmental Issues.

(Cross-listed with ENSCI, ENV S). (2-0) Cr. 2. S.

Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

BIOL 204. Biodiversity.

(Cross-listed with ENV S). (4-0) Cr. 2. S. Prereq: One course in life sciences

Survey of the major groups of organisms and biological systems. Definition, measurements, and patterns of distribution of organisms. Sources of information about biodiversity. Does not satisfy biology major requirements. Half semester course.

BIOL 211. Principles of Biology I.

(3-0) Cr. 3. F.S. Prereq: High school biology

Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors.

BIOL 211L. Principles of Biology Laboratory I.

(0-3) Cr. 1. F.S. Prereq: Credit or enrollment in BIOL 211 Laboratory to accompany 211.

BIOL 212. Principles of Biology II.

(3-0) Cr. 3. F.S. Prereq: High School Biology; high school chemistry or credit or enrollment in CHEM 163 or CHEM 177

Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors.

BIOL 212L. Principles of Biology Laboratory II.

(0-3) Cr. 1. F.S. Prereq: credit or enrollment in BIOL 212 Laboratory to accompany 212.

(Cross-listed with ENSCI). (3-0) Cr. 3. S.

Plant and microbial processes in environmental systems including their interactions with human activities.

BIOL 255. Fundamentals of Human Anatomy.

(3-0) Cr. 3. F. Prereq: High School Biology and Chemistry, or BIOL 101

An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider BIOL 351 for their anatomy background. Does not satisfy biology major requirements.
BIOL 255L. Fundamentals of Human Anatomy Laboratory.
(0-3) Cr. 1. F. Prereq: Credit or enrollment in BIOL 255
Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider 351 for their anatomy background. Does not satisfy biology major requirements.

BIOL 256. Fundamentals of Human Physiology.
(3-0) Cr. 3. S. Prereq: High School Biology and Chemistry, or BIOL 101, or BIOL 255 (recommended)
Introduction to human physiology, studying the function of all body systems. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic and immune, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider 335 for their physiology background. Does not satisfy biology major requirements.

BIOL 256L. Fundamentals of Human Physiology Laboratory.
(0-3) Cr. 1. S. Prereq: Credit or enrollment in BIOL 256
Student-conducted experiments investigating concepts of human physiology with computer data acquisition and analysis. Interpretation of experimental results and preparation of lab reports. Pre-Medical students should consider 335 for their anatomy and physiology background. Does not satisfy biology major requirements.

(Cross-listed with W S). (3-0) Cr. 3. F. Prereq: BIOL 101, or BIOL 155, or BIOL 211
Anatomy and physiology of human reproductive systems, including fertility, pregnancy, and delivery. Does not satisfy biology major requirements.

BIOL 306. Metabolic Physiology of Mammals.
Cr. 3. Prereq: BIOL 211, BIOL 212
Introduction to physiology of metabolic function in mammals and other animals. Metabolic processes and their interactions with various subsystems, approached from an organismal perspective. Integration of cellular, gastrointestinal, cardiovascular, respiratory, and renal processes, relevant to their control and integration at the nervous and endocrine system levels. Functional aspects of organismal physiology; energy and water balances, physiology of rest exercise, and environmental stress. Students cannot receive credit for both BIOL 306 and BIOL 335.

(Cross-listed with W S). (3-0) Cr. 3. F. Prereq: a 200 level course in science, engineering or women's studies; ENGL 250
The interrelationships of women and science and engineering examined from historical, sociological, philosophical, and biological perspectives. Factors contributing to under-representation; feminist critiques of science; examination of successful strategies. Does not satisfy biology major advanced credit requirements.

Meets U.S. Diversity Requirement

BIOL 312. Ecology.
(Cross-listed with A ECL, ENSCI). (3-3) Cr. 4. F.S.S. Prereq: BIOL 211L and BIOL 212L
Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

(Cross-listed with GEN). (3-0) Cr. 3. F.S.S. Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L
Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative and population genetics. Students may receive graduation credit for no more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.

BIOL 313L. Genetics Laboratory.
(Cross-listed with GEN). (0-3) Cr. 1. F.S. Prereq: Credit or enrollment in BIOL 313 Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.

(3-0) Cr. 3. F.S.S. Prereq: BIOL 211, 211L, 212, 212L
Integration of elementary principles of metabolism, bioenergetics, cell structure and function to develop a molecular view of how the cell works.

BIOL 315. Biological Evolution.
(3-0) Cr. 3. F.S. Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L. Biol 313 recommended
The mechanisms of evolution. Topics in microevolution: population genetics, natural selection, genetic variation, and adaptation. Macroevolution: speciation, extinction, phylogeny, and major evolutionary patterns.

BIOL 320. Molecular and Cellular Biology of Human Diseases.
Cr. 3. Prereq: BIOL 212
Survey of molecular, genetic and cellular aspects of human diseases. Fundamental concepts of cell biology and how they are linked to the pathologies of different classes of human diseases. Recent scientific advances with an emphasis on new methods of diagnosis and treatment.

(3-0) Cr. 3. Prereq: BIOL 313 or GEN 320; BIOL 314 or BBMB 301; CHEM 231 or CHEM 332; PHYS 106 or PHYS 111
An overview of classical and current concepts, principles and approaches regarding the basic mechanisms of plant function underlying growth, development and survival of plants. Topics covered include environmental and developmental signals, plant hormone action, signal transduction, mineral nutrition, water relations, metabolism and photosynthesis.

BIOL 330L. Principles of Plant Physiology Laboratory.
(0-3) Cr. 1. Prereq: Credit or enrollment in BIOL 330
Laboratory to accompany BIOL 330. Experiments and explorations illustrating fundamental principles of plant physiology.

BIOL 335. Principles of Human and Other Animal Physiology.
(3-0) Cr. 4. F.S. Prereq: BIOL 314
Introduction to systemic functions with emphasis on mammals.

BIOL 336. Ecological and Evolutionary Animal Physiology.
Cr. 3. Prereq: BIOL 211, BIOL 212
Study of mechanisms by which animals perform life-sustaining functions; the evolution and adaptive significance of physiology traits, the diversity of physiological mechanisms, and how physiology and ecology interact.

BIOL 350. Comprehensive Human Anatomy.
(3-0) Cr. 3. F. Prereq: Credit in BIOL 211 and BIOL 212
Comprehensive survey of human anatomy, emphasizing structural and functional relationships of major organ systems. Compartmental study of normal anatomy; practical clinical application of anatomical regions.

BIOL 351. Comparative Chordate Anatomy.
(3-4) Cr. 5. S. Prereq: BIOL 212, junior classification
The evolution of chordates as reflected in the anatomy of extinct and living forms. Lecture topics include the history and diversity of chordates; comparisons of anatomical structures among major groups, the adaptive significance of anatomical structures. Laboratory involves dissection of representative species.

BIOL 352. Vertebrate Histology.
(3-3) Cr. 4. S. Prereq: BIOL 212
Microscopic structure of vertebrate tissues and organs, with an introduction to histological techniques.

BIOL 353. Introductory Parasitology.
(Cross-listed with MICRO, V PTH). (3-0) Cr. 3. S. Prereq: BIOL 212
Biological and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

(3-0) Cr. 3. F. Prereq: BIOL 212
Ethological and sociobiological approaches to animal behavior. Genetic and developmental aspects of behavior, biological rhythms, orientation (including navigation, migration), communication, and social behavior (mating, aggression, parental care).

BIOL 354L. Laboratory in Animal Behavior.
(0-3) Cr. 1. F. Prereq: Credit or enrollment in BIOL 354
Laboratory techniques for observation, description and analysis of animal activities; independent projects.

BIOL 355. Plants and People.
(3-0) Cr. 3. S. Prereq: Credit in BIOL 211 and BIOL 211L
Uses of plants and fungi by humans and the importance of plants in the past, present and future. Discussion of fruits, vegetables, grains, herbs, spices, beverages, oils, fibers, wood, medicines, and drugs, in the context of their agricultural, cultural, and economic roles in modern societies. Emphasis on origins and worldwide diversity of culturally important plants, their characteristics, and uses.

BIOL 356. Dendrology.
(Cross-listed with FOR). (2-4) Cr. 4. F.S. Prereq: BIOL 211
Identification and ecology of North American woody plant species. Importance of woody plants in timber production and wildlife habitat. Natural disturbances, human impacts, management and restoration concerns for major North American forest regions will be addressed.
BIOL 364. Invertebrate Biology.
Cr. 3-4. F. Prereq: BIOL 212
Emphasis on diversity, development, physiology and behavior of invertebrate organisms- the "spineless wonders" of the world. Laboratory involves hands-on study and investigation of living invertebrates.

BIOL 365. Vertebrate Biology.
(Cross-listed with A ECL). (3-2) Cr. 4. F. Prereq: BIOL 212, BIOL 212L
Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

(2-4) Cr. 4. S. Prereq: BIOL 211
Introduction to plant phylogenetic systematics, plant classification, survey of flowering plant families, identification and field study of local plants.

(Cross-listed with A ECL). (2-3) Cr. 3. F. Prereq: A ECL 312; STAT 101 or STAT 104
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations.

BIOL 381. Environmental Systems I: Introduction to Environmental Systems.
(Dual-listed with EEOB 581). (Cross-listed with ENSCI, ENV S, MICRO). Cr. 3-4. F. Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

BIOL 382. Environmental Systems II: Analysis of Environmental Systems.
(Dual-listed with EEOB 582). (Cross-listed with ENSCI). (2-2) Cr. 3. S. Prereq: ENSCI 381
Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

BIOL 393. North American Field Trips in Biology.
Cr. 1-4. Repeatable. Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule.

BIOL 393A. North American Field Trips in Biology: Pre-trip Seminar.
(1-0) Cr. 1. Repeatable. Prereq: Two courses in the biological sciences and by approval of application
Discussion of relevant biological and cultural topics during semester preceding extended field trips to North American locations of interest to biologists.

BIOL 393B. North American Field Trips in Biology: North American Field trip.
Cr. 1-3. Repeatable. Prereq: Two courses in the biological sciences and by approval of application
Extended field trip to North American location under supervision of faculty member, usually during break periods, to North American locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule. Report required.

BIOL 394. International Field Trips in Biology.
Cr. 1-4. Repeatable. Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule. Meets International Perspectives Requirement.

BIOL 394A. International Field Trips in Biology: Pre-trip Seminar.
(1-0) Cr. 1. Repeatable. Prereq: Two courses in the biological sciences and by approval of application
Discussion of relevant biological and cultural topics during semester preceding extended field trip to international locations of interest to biologists.

BIOL 394B. International Field Trips in Biology: Field Trip to International Location.
Cr. 1-3. Repeatable. Prereq: Two courses in the biological sciences and by approval of application
Extended field trips, under supervision of faculty member, usually during break periods, to international locations of interest to biologists. Inquire in the Biology Program Office, 103 Bessey Hall, for trip schedule. Offered on a satisfactory-fail basis only.

BIOL 402. Introduction to Pathology.
(Cross-listed with V PTH). (3-0) Cr. 3. S. Prereq: BIOL 211 and BIOL 212 with labs
Introductory exploration of pathology as a medical discipline. This includes study of disease mechanisms via an introduction to general pathology topics (cell degeneration, necrosis, disturbances of growth, disturbances of blood flow, inflammation, neoplasia) and organ system-specific response to injury.

BIOL 414. Life History and Reproductive Strategies.
(Dual-listed with EEOB 514). (3-0) Cr. 3. F. Prereq: BIOL 315 or equivalent; course in population ecology suggested
Evolution of ecological adaptations at the individual, population, community and landscape levels. Emphasis is on evolutionary mechanisms and adaptive strategies; units and mechanisms of evolution, life history strategies, species interactions and organization of communities, behavior, and patterns of distribution, speciation and macroevolution.

BIOL 423. Developmental Biology.
(3-0) Cr. 3. S. Prereq: BIOL 313
Principles of embryogenesis and animal development. Establishment of body axes, organ and limb development, and specification of cell fates. Emphasis on cell signaling and the control of gene expression within the context of a developing organism. Medically relevant subjects will be discussed, including stem cells, cancer biology, fertilization, and cloning.

BIOL 423L. Developmental Biology Laboratory.
(0-3) Cr. 1. S. Prereq: Credit or enrollment in BIOL 423
Experiments and explorations illustrating fundamental principles of multicellular development.

BIOL 428. Topics in Cell Biology.
(3-0) Cr. 3. S. Prereq: BIOL 314
Selected topics on biological organization and function at the cellular level. Emphasis on biomembranes.

BIOL 434. Endocrinology.
(Dual-listed with EEOB 534). (3-0) Cr. 3. S. Prereq: BIOL 211, BIOL 212
Chemical integration of vertebrate organisms. The structure, development, and evolution of the endocrine glands and the function and structure of their hormones.

BIOL 436. Neurobiology.
(3-0) Cr. 3. F. Prereq: BIOL 212
Basic principles of brain function and development. Signaling of nerve cells, synaptic transmission, structure/function of ion channels and receptors, memory and synaptic plasticity, movement and central control, sensation and sensory processing, construction of neural circuits, early brain development, complex brain functions in health and disease.

BIOL 439. Environmental Physiology.
(Dual-listed with EEOB 539). Cr. 3-4. Alt. S., offered even-numbered years.
Prereq: BIOL 395; physics recommended
Physiological adaptations to the environment with an emphasis on vertebrates.

BIOL 444. Introduction to Bioinformatics.
(Dual-listed with EEOB 544). (Cross-listed with BCB, BCBIO, COM S, CPR E, GEN). (4-0) Cr. 4. F. Prereq: MATH 165 or STAT 401 or equivalent
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics, systems biology.

(Dual-listed with EEOB 551). (3-3) Cr. 4. F. Prereq: BIOL 315 or equivalent.
Survey of land plant evolution; phylogenetic comparison of anatomical, reproductive, and life history specializations. Relationships among bryophytes, lycophytes, pteridophytes, gymnosperms, and angiosperms emphasizing significant evolutionary changes documented by paleobotanical, morphological, and molecular studies.

BIOL 454. Plant Anatomy.
(3-3) Cr. 4. F. Prereq: BIOL 212L; BIOL 366 recommended
Characteristics of cell and tissue types in vascular plants. Anatomy of developing and mature stems, roots, and leaves, including secondary (woody) growth. Introduction to the special anatomy of flowers and seeds.

BIOL 455. Bryophyte and Lichen Biodiversity.
(Dual-listed with EEOB 555). Cr. 3. Prereq: BIOL 211, BIOL 211L
Introduction to the biology and ecology of mosses, liverworts, and lichens. Emphasis on identification and diversity of local representatives of these three groups of organisms. Required field trips and service-learning.

BIOL 457. Herpetology. (Cross-listed with A ECL). (2-0) Cr. 2. F. Prereq: BIOL 351 or BIOL 365. Biology, ecology, and evolution of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuataras, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

BIOL 457L. Herpetology Laboratory. (Cross-listed with A ECL). (0-3) Cr. 1. F. Prereq: BIOL 351 or BIOL/A ECL 365; concurrent registration in BIOL 457 or A ECL 457. Laboratory to accompany Biology/Animal Ecology 457. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

BIOL 458. Ornithology. (Cross-listed with A ECL). (2-0) Cr. 2. S. Prereq: A ECL 365 or BIOL 351. Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation.

BIOL 458L. Ornithology Laboratory. (Cross-listed with A ECL). (0-3) Cr. 1. S. Prereq: BIOL 351 or AECL/BIOL 365. Concurrent enrollment in AECL/Biol 458 is required. Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips.

BIOL 459. Mammalogy. (Dual-listed with EEOB 559). (Cross-listed with A ECL). (2-0) Cr. 2. S. Prereq: BIOL 351 or A ECL 365. Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

BIOL 459L. Mammalogy Laboratory. (Cross-listed with A ECL). (0-3) Cr. 1. S. Prereq: BIOL 351 or BIOL/AECL 365; concurrent enrollment in AECL/459 or BIOL 459 required. Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips.

BIOL 462. Evolutionary Genetics. (Cross-listed with GEN). (3-0) Cr. 3. F. Prereq: BIOL 315. The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change.

BIOL 465. Morphometric Analysis. (Dual-listed with EEOB 565). (3-2) Cr. 4. Alt. S., offered even-numbered years. Prereq: STAT 401. A comprehensive overview of the theory and methods for the analysis of biological shape with emphasis on data acquisition, standardization, statistical analysis, and visualization of results. Methods for both landmark and outline data will be discussed.

BIOL 471. Introductory Conservation Biology. Cr. 3. Prereq: BIOL 312. Examination of conservation issues from a population and community perspective. The role of genetics, demography, and environment in determining population viability, habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

BIOL 472. Community Ecology. (2-2) Cr. 3. S. Prereq: BIOL 312. The effect of interspecific interactions on the structure and dynamics of natural and managed communities; including concepts of guild structure and trophic web dynamics and their importance to the productivity, diversity, stability, and sustainability of communities. The implications of interspecific interactions in the management of wild species will be emphasized with illustrative case histories of interactions between plants, invertebrates, and vertebrates.

BIOL 480. Studies in Marine Biology. Cr. 1-8. Repeatable. Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

BIOL 481. Summer Field Studies. Cr. 1-8. Repeatable. Courses taken at summer biological field stations are transferred to Iowa State University under this number. See www.biology.iastate.edu for links to field stations located in different biomes: coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mountains.

BIOL 482. Tropical Biology. Cr. 1-4. Repeatable, maximum of 8 credits. Prereq: One year of college biology; knowledge of Spanish desirable but not required. Students registering for courses taught by the Organization for Tropical Studies will receive credit for this ISU course when requesting a transfer of credits.

BIOL 484. Ecosystem Ecology. (Cross-listed with ENSCI). (3-0) Cr. 3. F. Prereq: BIOL 312 or EnSci 381 or EnSci 402 or NREM 301. Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

BIOL 485L. Aquatic Ecology Laboratory. (Cross-listed with A ECL, ENSCI). (0-3) Cr. 1. F. Prereq: Concurrent enrollment in BIOL 486. Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

BIOL 487. Microbial Ecology. (Cross-listed with ENSCI, MICRO). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry. Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

BIOL 490. Population Ecology. (Dual-listed with EEOB 589). (2-2) Cr. 3. F. Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing. Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

BIOL 490. Independent Study. Cr. 1-6. Repeatable, maximum of 9 credits. F.S.SS. Prereq: Permission of instructor. Independent study opportunities for undergraduate students in the biological sciences. No more than 9 credits in Biol 490 may be counted toward graduation and of those, only 6 credits may be applied to the major.

BIOL 491. Undergraduate Teaching Experience. Cr. 1-2. Repeatable. Prereq: Permission of supervising staff. For students registering to be undergraduate teaching assistants. Satisfactory-Fail grading only. Offered on a satisfactory-fail basis only.
Courses primarily for graduate students, open to qualified undergraduates:

For students considering pursuing a graduate degree in the biological sciences. Professional development topics include the defining of academic and career areas of interest, finding and evaluating appropriate programs of graduate study, the graduate school application process, and developing a curriculum vita. Exploration of learning opportunities at field stations, research internships, and independent research activities.

BIOL 494. Biology Internship.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
Intended to provide credit for significant professional experiences in biological sciences. A written proposal is required prior to registration. Intended for Biology majors.

BIOL 495. Undergraduate Seminar.
Cr. 1-3. Repeatable. F.S. Prereq: Permission of instructor
Content varies from year to year and may include detailed discussion of special topics in biology, current issues in biology, or careers in biology.

BIOL 498. Cooperative Education.
Cr. R. Repeatable. F.S.S.S. Prereq: Permission of the Biology Program cooperative education coordinator
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

BIOL 499. Undergraduate Research Experience.
Cr. 1-6. Repeatable, maximum of 9 credits. F.S.S.S. Prereq: Permission of instructor
Research opportunities for undergraduate students in the biological sciences. No more than 9 credits in Bio 499 may be counted toward graduation and of those, only 6 credits may be applied to the major.

Community Development
Interinstitutional Graduate Program
http://www.gpdxedu.org/

Participating Institutions:
- Iowa State University
- Kansas State University
- University of Nebraska
- North Dakota State University
- South Dakota State University

Community Development deals with challenges faced by communities in the United States and other countries, particularly those in rural areas. Global economic restructuring and the devolution of government services have produced an environment in which Community Developers are called on to think and act in innovative ways.

Community Development is a progressive field, actively promoting positive social, economic, cultural and environmental change. It encourages people to see the “whole picture,” engaging citizens in democratic decision making and action.

Community Development is an inter-institutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the six institutions: Iowa State University, Kansas State University, University of Nebraska, North Dakota State University, and South Dakota State University.

At Iowa State University, Community Development is an optional area of specialization within the Interdisciplinary Graduate Studies degree program that consists of 37 semester credits for completion of the program. A thesis or creative component is required. A computer with minimum specifications, Web access, and an email address are required for completing the program.

Registration

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

Courses primarily for graduate students, open to qualified undergraduates:

(3-0) Cr. 3.
Detailed introduction to community resource management. Theoretical frameworks, methodological investigation, applied practices. Enhancement of ability of community development professionals to work with communities to plan, develop and monitor conversation and development of natural resources with multiple functions.

C DEV 503. Community Development I: Principles and Strategies of Community Change.
(3-0) Cr. 3.
Analysis of principles and practices of community change and development. Use of case studies to relate community development approaches to conceptual models from diverse disciplines. Exploration of professional practice principles, and student construction of their personal framework for practicing community development.

(3-0) Cr. 3.
Introduction to research methods relevant to community development. Formulate and begin a research effort, methods of data collection and how conceptual frameworks are used to develop the questions and analyze data. Emphasis on strategies for reporting findings and applying findings in community action and methods of evaluating the entire research process. Significant attention paid to issues of research ethics and inclusiveness.

C DEV 505. Community Development II: Organizing for Community Change.
(3-0) Cr. 3.
Examines role of civil society in community planning efforts. Comparative approach to planning theories and approaches. Focus on change within communities and the roles of government, planners, and citizens in reacting to or shaping change. Dimensions of social capital and the context of change covered.

C DEV 506. Community and Regional Economic Analysis I.
(3-0) Cr. 3.
Introduction to concepts of communities and regions, theories of economic growth, drivers of economic growth, the economic base of a community, sources of growth or decline in the community, roles of local government and institutions, and analytical tools. Strategies for local economic development will also be explored.

C DEV 507. Introduction to Native Communities.
(3-0) Cr. 3.
A base knowledge course. For students currently working within, in partnership with, or considering working with Native communities. Basic understanding within the context of community development of the diversity of the tribal structures and cultures and the unique history and jurisdictional considerations of these nations. Working with tribes, Federal and Indian relations, and governance and cultural issues.

C DEV 508. Ecological Economics.
(3-0) Cr. 3.
Approaches economy and community by looking at the inherent interdependence, jointness, and potential complimentarity between ecology and economy (utility) of a place.

C DEV 509. Building Native Community and Economic Capacity.
(3-0) Cr. 3.
Focus on non-western approaches to helping Native communities build their capacity. Students will learn to take a participatory, culture-centered, and strength-based approach to development.

C DEV 510. Indian Country Agriculture and Natural Resources.
(3-0) Cr. 3.
Introduction to the historical and contemporary issues related to natural resource management on Native American lands. Philosophical and economic arguments concerning natural resource conservation, preservation and extraction will be explored.

C DEV 512. Sustainable Communities.
(3-0) Cr. 3.
Students will learn the conceptual relationships among Community and Sustainable Development and Sustainable Communities and examine the social, environmental, and economic aspects of sustainable communities. The course includes analysis of public policy impacts on community sustainability, practical actions for enhancing sustainability, and changing power dynamics and reward structures involved in incorporating sustainability into Community Development.
(3-0) Cr. 3.
Course explores theories of local economic development and addresses the development issues faced by communities in the 21st century. Students will understand and apply concepts from economic development planning, economic analysis, business development, human resource development, community-based development, and high-technology development.

C DEV 520. Orientation in Community Development.
(1-0) Cr. 1.
Introduction to the Community Development program. Focus on on-line delivery methods, graduate level research and writing, technology skills.

C DEV 521. Housing and Development.
Cr. 3-5. Prereq: None.
Review and evaluation of historical and current housing issues, production, and financial systems, including consideration of racial, ethnic, income, and gender issues as they relate to the role of housing developments and programs in community development.

(3-0) Cr. 3.
Defining leadership and applying it to the workplace. Understanding of potential link between leadership and community capacity. Identifying strategies for leadership development in communities.

C DEV 523. Grantwriting for Community Development Professionals.
(3-0) Cr. 3.
Basic Grant Development and Management will introduce students to the grant-getting process and provide an overview of what happens after a project is funded. The following topics will be covered: researching funding sources, generating cutting edge ideas, assessing needs, planning a project, establishing credibility, formulating a sustainable budget, designing an evaluation plan, managing the funded project, and disseminating project results.

C DEV 524. Non-Profit Management in Community Development.
(3-0) Cr. 3.
Understanding of how non-profit organizations are run in order that they may participate more fully in community development efforts. Learning skills necessary to assist organizations to manage community development projects and programs, such as, budgeting, planning, personnel, facilities, volunteer management, and fundraising.

C DEV 525. Role of Tribal Colleges in Economic Development.
(3-0) Cr. 3.
Focus on role of tribally-chartered colleges and universities in economic development within Native communities. Social capital analytic framework to examine and evaluate tribal college model of economic development.

C DEV 526. Immigration and Community Inclusion.
(3-0) Cr. 3.
Mechanisms for community inclusion and exclusion in relation to immigration will be examined. Aspects of ethnicity, religion, occupation and transnationalism are addressed in terms of community mechanism for incorporating immigrants as community assets.

C DEV 527. Public and Non-Profit Budgeting.
Cr. 3-5.
Introduction to the fundamental theories and practices of budgeting in the public and non-profit sectors. Topics covered include overview of budgeting and budget reform, taxation, expenditures, budget preparation and adoption, budget implementation, and performance budgeting.

C DEV 528. Evaluation of Organizations and Programs.
(3-0) Cr. 3. Prereq: C DEV 504 with grade of C or better
Introduction to the philosophy, techniques, and methodologies of organizational and program evaluation. Overview of program evaluation and theory, techniques to evaluate program processes and performance, evaluation designs, assessing program efficiency, models to diagnose organizations, and methods to assess organizational performance.

C DEV 530. Toward Ethical Engagement.
(3-0) Cr. 3.
Understanding what ethics are and identify ethical dimensions of a problem. Ability to employ ethical analysis and engagement strategies in public problem-solving.

C DEV 532. Community and Regional Economic Analysis II.
(3-0) Cr. 3. Prereq: C DEV 506
Substantive grounding in the theories and practice of measuring community economic dynamics; build solid foundation skills for applied community economic analysis.

C DEV 542. The Policy and Politics of Coastal Areas.
(Cross-listed with POL 5). (3-0) Cr. 3.
Exploration of political implications of coastal policy. Issues include: “Carrying capacity,” zoning, regulation of human development activities, tradeoffs between conservation and jobs, the quality of coastal lifestyle, ways in which citizens participate in policy for coastal areas.

C DEV 590. Special Topics in Community Development.
Cr. 1-3. F.S.SS.
Special topics in Community Development. Independent Study, must get instructor approval.

C DEV 599. Creative Component.
Cr. arr.
Students work with major professor to conduct research and carry out work on their creative component. Instructor permission required.

Courses for graduate students:
Cr. 1-6. F.S.SS.
Thesis Research.

Culinary Science (AGLS)
Curriculum in Culinary Science
Administered by the Department of Food Science and Human Nutrition

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2:00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Communications and Library: 10 cr.
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Information Literacy 1
SP CM 212 Fundamentals of Public Speaking 3
Total Credits 10

Humanities and Social Sciences: 6-12 cr.
Select Humanities course from approved list 3
If H Sci student, select: 6
Additional Humanities course
Additional Humanities or Social Science course
ECON 101 Principles of Microeconomics 3

Ethics and Environmental: 3-6 cr.
FS HN 342 World Food Issues: Past and Present 3
If AgLS student, select from:
ENV S 120 Introduction to Renewable Resources 2-3
ENV S 201 Introduction to Environmental Issues

Mathematical Sciences: 6-8 cr.
Select at least 3 credits from:
MATH 140 College Algebra 3-4
MATH 142 Trigonometry and Analytic Geometry
MATH 160 Survey of Calculus
MATH 165 Calculus I
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
Select at least 3 credits from:
STAT 101 Principles of Statistics 3-4
STAT 104 Introduction to Statistics

Total Credits 6-8
Food Science and Human Nutrition: 41 cr.
- FS HN 101: Food and the Consumer 3
- FS HN 104: Introduction to Professional Skills in Culinary Science 1
- FS HN 110: Professional and Educational Preparation 1
- FS HN 167: Introduction to Human Nutrition 3
- FS HN 203: Contemporary Issues in Food Science and Human Nutrition 1
- FS HN 214: Scientific Study of Food 3
- FS HN 215: Advanced Food Preparation Laboratory 2
- FS HN 265: Nutrition for Active and Healthy Lifestyles 3
- FS HN 311: Food Chemistry 3
- FS HN 311L: Food Chemistry Laboratory 1
- FS HN 314: Foundations of Culinary Science 1
- FS HN 405: Food Quality Assurance 3
- FS HN 406: Sensory Evaluation of Food 3
- FS HN 411: Food Ingredient Interactions and Formulations 2
- FS HN 412: Food Product Development 3
- FS HN 420: Food Microbiology 3
- FS HN 480: Professional Communication in Food Science and Human Nutrition 1
- Take one of the following courses for 2 credits:
  - FS HN 491B: Supervised Work Experience: Food Science 2
  - or FS HN 491D: Supervised Work Experience: Culinary Science 2

Total Credits: 41

Physical Sciences: 9 cr.
- CHEM 163: College Chemistry 4
  - or CHEM 177: General Chemistry I 1
- CHEM 163L: Laboratory in College Chemistry 1
  - or CHEM 177L: Laboratory in General Chemistry I 1
- CHEM 231: Organic Chemistry 3
  - or CHEM 231L: Laboratory in Organic Chemistry 1

Total Credits: 9

Biological Sciences: 12-13 cr.
- BBMB 301: Survey of Biochemistry 3
- BIOL 211: Principles of Biology I 3
- BIOL 212: Principles of Biology II 3
- MICRO 201: Introduction to Microbiology 2-3
  - or MICRO 302: Biology of Microorganisms 3
- MICRO 201L: Introductory Microbiology Laboratory 1
  - or MICRO 302L: Microbiology Laboratory 1

Total Credits: 12-13

Animal Science Coursework: 6 cr.
- AN S 270: Foods of Animal Origin 2
- AN S 270L: Foods of Animal Origin Laboratory 1
- AN S 460: Processed Meats 3

Total Credits: 6

Diet and Exercise (AGLS)
Curriculum in Diet and Exercise B.S./M.S.
Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology
This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a $30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Health Fitness Instructor.

Total Degree Requirements: 124 cr. for bachelor’s degree and 34-41 cr. for master’s degree
Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Communications and Library: 10 cr.
- ENGL 150: Critical Thinking and Communication 3
- ENGL 250: Written, Oral, Visual, and Electronic Composition 3
- LIB 160: Information Literacy 1
- SP CM 212: Fundamentals of Public Speaking 3

Total Credits: 10

Social Sciences: 6 cr.
- PSYCH 101: Introduction to Psychology 3
- PSYCH 230: Developmental Psychology 3

Total Credits: 6

Mathematical Sciences: 6-8 cr.
Select at least 3 credits from:
- MATH 140: College Algebra 3
- MATH 142: Trigonometry and Analytic Geometry 3
- MATH 160: Survey of Calculus 3
- MATH 165: Calculus I 3
- MATH 181: Calculus and Mathematical Modeling for the Life Sciences I 3

Total Credits: 6-8

Physical Sciences: 13-17 cr.
Select from:
- CHEM 163: College Chemistry 5-8
  - or CHEM 163L: Laboratory in College Chemistry 4
- CHEM 177: General Chemistry I 5-8
  - or CHEM 177L: Laboratory in General Chemistry I 4
- CHEM 231: Organic Chemistry 3
- CHEM 231L: Laboratory in Organic Chemistry 3
- PHYS 115: Principles of Physics 4-5
  - or PHYS 111: General Physics 4

Total Credits: 13-17

Dietetics - Undergraduate Program (AGLS)

Curriculum in Dietetics

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetic internships. There is a $30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Information Literacy 1
SP CM 212 Fundamentals of Public Speaking 3

Total Credits 10

Humanities and Social Sciences: 6-12 cr.

Select Humanities course from approved list 3
PSYCH 101 Introduction to Psychology 3

If H Sci student, select: 6
### Ethics and Environmental: 3-6 cr.
- **FS HN 342**: World Food Issues: Past and Present (3 cr.)
- If AgLS student, select from:
  - ENV S 120: Introduction to Renewable Resources (2-3 cr.)
  - ENV S 201: Introduction to Environmental Issues (2-3 cr.)

### Mathematical Sciences: 6-8 cr.
Select at least 3 credits from:
- **MATH 140**: College Algebra (3 cr.)
- **MATH 142**: Trigonometry and Analytic Geometry (3 cr.)
- **MATH 160**: Survey of Calculus (3 cr.)
- **MATH 165**: Calculus I (5 cr.)
- **MATH 181**: Calculus and Mathematical Modeling for the Life Sciences I (5 cr.)
Select at least 3 credits from:
- **STAT 101**: Principles of Statistics (3 cr.)
- **STAT 104**: Introduction to Statistics (3 cr.)

### Physical Sciences: 9-12 cr.
Select from:
- **CHEM 163**: College Chemistry and Laboratory in College Chemistry (5 cr.)
- **CHEM 177**: General Chemistry I and Laboratory in General Chemistry I (5 cr.)
- **CHEM 177L**: General Chemistry I Laboratory (2 cr.)
- **CHEM 178**: General Chemistry II and Laboratory in General Chemistry II (5 cr.)
- **CHEM 231**: Elementary Organic Chemistry (3 cr.)
- **CHEM 231L**: Laboratory in Elementary Organic Chemistry (1 cr.)

### Biological Sciences: 20-21 cr.
- **BBMB 301**: Survey of Biochemistry (3 cr.)
- **BIOL 211**: Principles of Biology I (3 cr.)
- **BIOL 212**: Principles of Biology II (3 cr.)
- **BIOL 212L**: Principles of Biology Laboratory II (1 cr.)
- **BIOL 255**: Fundamentals of Human Anatomy (3 cr.)
- **BIOL 255L**: Fundamentals of Human Anatomy Laboratory (1 cr.)
Select from:
- **BIOL 256**: Fundamentals of Human Physiology and Laboratory (3 cr.)
- **BIOL 256L**: Fundamentals of Human Physiology Laboratory (2 cr.)
- **BIOL 306**: Metabolic Physiology of Mammals (3 cr.)
- **BIOL 335**: Principles of Human and Other Animal Physiology (3 cr.)
- **MICRO 201**: Introduction to Microbiology (2 cr.)
- **MICRO 201L**: Introductory Microbiology Laboratory (1 cr.)

### Food Science and Human Nutrition: 40-41 cr.
- **FS HN 110**: Professional and Educational Preparation (1 cr.)
- **FS HN 167**: Introduction to Human Nutrition (3 cr.)
- **FS HN 203**: Contemporary Issues in Food Science and Human Nutrition (1 cr.)
- **FS HN 214**: Scientific Study of Food (3 cr.)
- **FS HN 115**: Food Preparation Laboratory (1-2 cr.)
- **FS HN 265**: Nutrition for Active and Healthy Lifestyles (3 cr.)
- **FS HN 340**: Foundations of Dietetic Practice (1 cr.)
- **FS HN 360**: Advanced Human Nutrition and Metabolism (3 cr.)
- **FS HN 361**: Nutrition and Health Assessment (2 cr.)
- **FS HN 362**: Nutrition in Growth and Development (3 cr.)
- **FS HN 367**: Medical Terminology for Health Professionals (1 cr.)
- **FS HN 403**: Food Laws, Regulations, and the Regulatory Process (2 cr.)
- **FS HN 411**: Food Ingredient Interactions and Formulations (2 cr.)
- **FS HN 461**: Medical Nutrition and Disease I (4 cr.)
- **FS HN 463**: Community Nutrition (3 cr.)
- **FS HN 464**: Medical Nutrition and Disease II (3 cr.)
- **FS HN 466**: Nutrition Counseling and Education Methods (3 cr.)
- **FS HN 480**: Professional Communication in Food Science and Human Nutrition (1 cr.)

### Total Credits: 40-41

### Management: 11 cr.
- **HRI 380**: Quantity Food Production Management (3 cr.)
- **HRI 380L**: Quantity Food Production and Service Management Experience (2 cr.)
- **HRI 391**: Foodservice Systems Management I (3 cr.)
- **HRI 392**: Foodservice Systems Management II (3 cr.)

### Electives: 0-13 cr.
Select from any university coursework to earn at least 120 total credits.

**Admission to the dietetics program:** Students enter the university designated as pre-dietetics. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, and completion of the application with interest in becoming a registered dietitian. Students then progress toward earning a Bachelor of Science degree in Dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship.

Go to FS HN Courses.

**Courses primarily for graduate students, open to qualified undergraduates:**

**DIET 511. Research Methods.**
An overview of diverse research approaches focusing on methods for collecting and analyzing quantitative and qualitative data. www only. Only one of DIET 511 or FCEdS 511 may count toward graduation.

**DIET 524. Financial Management and Cost Controls in Dietetics.**
Overview of the fundamental knowledge of financial management, managerial accounting, and operational cost controls for dietetics professionals. Topics include a review of managerial accounting concepts for not-for-profit organizations and for-profit organizations based on the Uniform System of Accounts, value and risk analysis, budgeting, asset management, franchising and management contracts, cost-volume-profit analyses, and operational applications for financial performance.

**DIET 527. Food Writing.**
Understanding and appreciating how to communicate effectively in writing about food and food-related topics. Hands-on experience in research and writing for various audiences and types of media.

**DIET 530. Nutrition in Wellness.**
Addresses wellness promotion through nutrition. Nutritional risk and protective factors will be examined in relation to public health and individual nutrition. www only.

**DIET 532. Maternal and Child Nutrition.**
Critical examination of behavioral, physiological, and public health issues impacting dietary and nutritional factors that support normal growth and development. Content focuses on early stages of the life cycle: gestation, lactation, infancy, preschool, school age, and adolescence. www only.

**DIET 534. Nutrition Education in the Community.**
Principles and practices of teaching individuals and groups to translate nutrition knowledge into action. Emphasis on research in and evaluation of nutrition education. www only.

**DIET 538. Nutrition: A Focus on Life Stages.**
Explores influence of normal physiological stresses on nutritional needs throughout the life span. Evaluates dietary intake and identification of appropriate community nutrition services in on-line discussions. Specific considerations, such as the influence of age and cultural heritage, are incorporated. www only.
DIET 540. Nutrition and Physical Activity in Aging. (Cross-listed with GERON). (3-0) Cr. 3. Alt. F., offered even-numbered years. WWW only. Basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

DIET 544. Pediatric Clinical Nutrition. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in dietetics. Examines the physiological, biochemical and nutritional aspects of disease processes relevant to infants and children up to 18 years of age. Discussion of medical nutrition therapy for a variety of medical conditions in this population including inborn errors of metabolism, food hypersensitivity, obesity, and diseases of the major organ systems. WWW only.

DIET 546. Phytochemicals. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Overview of phytochemicals (non-nutritive biologically active compounds) from fruits, vegetables, cereals and oilseeds. Covers recent findings of chemistry, physiological functions, and potential health implications of phytochemicals. WWW only.

DIET 548. Professional Development Assessment. (1-0) Cr. 1. F.S.SS. Prereq: Enrollment in GP-IDEA MFCS in Dietetics. Web-based course providing information and practice for student to assess and evaluate own professional development and continuing professional education needs. Completion of professional 5-year plan. Offered on a satisfactory-fail basis only.

DIET 550. Finance and Cost Controls. (3-0) Cr. 3. F. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Overview of the fundamental knowledge of hospitality managerial accounting, cost controls, and financial management. Important topics include financial statement analysis, cost concepts, cost-volume-profit analysis, calculating and controlling food and beverage costs, pricing, and capital budgeting. WWW only.

DIET 554. Statistics. (3-0) Cr. 3. S.SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Tools used to make statistical decisions. Major emphasis on explanation and understanding of important concepts involved; basic theme is understanding of data and methods used to analyze such data. WWW only. Only one of DIET 554 or Stat 401, 495, 542 may count toward graduation by students in the GPIDEA Dietetics program.

DIET 556. Advanced Nutrition: Micronutrients. (3-0) Cr. 3. S. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics. Integration of the molecular, cellular and physiological aspects of vitamins and minerals in mammalian systems. Interactions among nutrients, metabolic consequences of deficiencies or excesses, relevant polymorphisms, major research methodologies, and current topics related to micronutrients and non-nutrient components. WWW only. Only one of DIET 556 or NUTRS 502 may count toward graduation.

DIET 558. Advanced Nutrition: Macronutrients. (3-0) Cr. 3. F. Prereq: BBMB 404 or BBMB 420 or equivalent; enrollment in GP-IDEA MFCS in Dietetics. Integration of the molecular, cellular and physiological aspects of macronutrients and energy metabolism in mammalian systems. Dietary energy, carbohydrates, fiber, lipids, proteins, their interactions, metabolic consequences, and major research methodologies. WWW only. Only one of DIET 558 or NUTRS 501 may count toward graduation.

DIET 560. Medical Nutrition and Disease. (3-0) Cr. 3. S.SS. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention directed to medical nutrition needs of patients in the treatment of each disease state. WWW only. Only two of DIET 560 or NUTRS 561, 564 may count toward graduation.

DIET 565. Malnutrition in Low-Income Countries. (3-0) Cr. 3. S. Prereq: enrollment in GP-IDEA MFCS in Dietetics. Identification and assessment of malnutrition in low-income countries. Social, cultural, political, economic, and geographic determinants of malnutrition. Protein-energy malnutrition, vitamin and mineral deficiencies. Intervention approaches; international efforts and local sustainability. WWW only.

entomology is required to take:

Any student receiving the Ph.D. in entomology with an emphasis in molecular
education.

student's POS committee and approved by the Entomology Director of Graduate
courses (500 level and above) for a total of 9 credits to be determined by the
other semester.

Experience. one semester and ENT 590L Special Topics: Extension Internship.
Teaching Experience. both semesters or ENT 590K Special Topics: Teaching
In addition, Ph.D. students majoring either in Entomology or Toxicology shall
must be taken from each of these subgroups: Population (C, D, N); Organismal
(A, B, F, M); and Suborganismal (G, H, I).

Any student receiving the Ph.D. in entomology shall have at least one course in
insect physiology, one course in insect systematics, two courses of ENT 590
Special Topics (selected from topics A through D, F, H, I, M and N, inclusive),
and at least 1 credit of ENT 600 Seminar.

Any student receiving the Ph.D. in entomology shall have at least one course in
insect physiology, one course in insect systematics, four additional courses of
ENT 590 Special Topics (selected from topics A through D and F through I, M
through N inclusive), and at least 1 credit of ENT 600 Seminar. At least one 590
must be taken from each of these subgroups: Population (C, D, N); Organismal
(A, B, F, M); and Suborganismal (G, H, I).

In addition, Ph.D. students majoring either in Entomology or Toxicology shall
have two semesters of teaching experience, taken as ENT 590K Special Topics:
Teaching Experience. one semester and ENT 590L Special Topics: Extension Internship.
the other semester.

A student can receive a Ph.D. minor in Entomology by taking 3 Entomology
courses (500 level and above) for a total of 9 credits to be determined by the
student’s POS committee and approved by the Entomology Director of Graduate
Education.

An option for an emphasis in molecular Entomology is available. Any student
receiving the M.S. in entomology with an emphasis in molecular entomology is
required to take:

ENT 555 Insect Physiology 4
ENT 590G Special Topics: Molecular Entomology. 1-3
Plus three other courses of 590 selected from topics A-D, F, H, I, M, N
Plus one additional course in molecular entomology
ENT 600 Seminar 1
BBMB 404 Biochemistry I 3
BBMB 542A Introduction to Molecular Biology Techniques: DNA Techniques 1

And one course from the following:

ENT 576 Systematic Entomology
ENT 525 Aquatic Insects
ENT 568 Advanced Systematics

Any student receiving the Ph.D. in entomology with an emphasis in molecular
entomology is required to take:

ENT 555 Insect Physiology 4
ENT 590G Special Topics: Molecular Entomology. 1-3
Plus three other courses of 590 selected from topics A-D, F, H, I, M, N
Plus one additional course in molecular entomology
ENT 600 Seminar 1
BBMB 404 Biochemistry I 3
BBMB 542A Introduction to Molecular Biology Techniques: DNA Techniques 1

And one course from the following:

ENT 576 Systematic Entomology
ENT 525 Aquatic Insects
ENT 568 Advanced Systematics

Any student receiving the Ph.D. in entomology with an emphasis in molecular
entomology is required to take:

BBMB 542C Introduction to Molecular Biology Techniques: Cell Techniques
BBMB 542D Introduction to Molecular Biology Techniques: Plant Transformation
BBMB 542E Introduction to Molecular Biology Techniques: Proteomics

An additional course with a molecular component 3

Plus one from each of the following:

Systematics

Suggested courses include:

ENT 576 Systematic Entomology
ENT 525 Aquatic Insects
ENT 568 Advanced Systematics

Biochemistry

Suggested courses include:

BBMB 404 Biochemistry I
BBMB 405 Biochemistry II
BBMB 501 Comprehensive Biochemistry I

Entomology participates in the interdepartmental majors in ecology and
evolutionary biology: genetics; Microbiology; and molecular, cellular and
developmental biology; and in the interdepartmental major and minor in toxicology
(see Index).
The Federal Corn Insects and Crop Genetics Research Unit and the North Central
Plant Introduction Station are available for advanced study in certain phases of
entomological research.

Courses primarily for undergraduates:

ENT 201. Introduction to Insects.
(1-0) Cr. 1. F.S.SS.
5 weeks. Classroom section spring only. World Wide Web section of course
offered summer and fall semesters. Biological and ecological aspects of insects.

ENT 211. Insects and Society.
(2-0) Cr. 2. F.S. Prereq: ENT 201
11 weeks. Classroom section spring only. World Wide Web section offered
fall semester. The importance of insects in human well-being. Insect-human
interactions. Primarily for nonscience and nonagriculture majors.

ENT 283. Pesticide Application Certification.
(Cross-listed with AGRON, FOR, HORT). (2-0) Cr. 2. S.
Core background and specialty topics in agricultural, and horticultural pesticide
applicator certification. Students can select certification categories and have the
opportunity to obtain pesticide applicator certification at the completion of the
course. Commercial pesticide applicator certification is emphasized.

ENT 370. Insect Biology.
(2-3) Cr. 3. F. Prereq: BIOL 101 or BIOL 211
Structure, physiology, evolution, behavior, life histories, and recognition of insects.
Collection required.

ENT 371I. Introduction to Insect Ecology.
(Cross-listed with IA LL). (3-3) Cr. 4. Alt. SS., offered odd-numbered years.
Field and laboratory study of insects, their diversity, life history; emphasis on
ecology and behavior.

ENT 372. Livestock Entomology.
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
Classroom and off-campus videotape sections. 12 weeks. Recognition, biology,
behavior, economic importance, and management of insects and other arthropods
affecting livestock and poultry production.
ENT 374. Insects and Our Health. (Cross-listed with MICRO). (3-0) Cr. 3. S. Prereq: 3 credits in biological sciences, identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Meets International Perspectives Requirement.

ENT 374L. Insects and Our Health Laboratory. (Cross-listed with MICRO). (0-3) Cr. 1. Alt. S., offered even-numbered years. Prereq: Credit or enrollment in ENT 374 Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

ENT 375. Plant Protection Using Natural Enemies. (Dual-listed with ENT 575). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: ENT 370 or ENT 376 Overview of the biology, ecology, and classification of insect pathogens, predators, and parasites. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies.

ENT 376. Fundamentals of Entomology and Pest Management. (2-3) Cr. 3. S. Prereq: BIOL 101 or BIOL 211 Introduction to entomology and insect pest management, including life processes, ecology, economics, tactics of population suppression, and ecological backlash.

ENT 410. Insect-Virus Interactions: a Molecular Perspective. (Dual-listed with ENT 510). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. F. offered odd-numbered years. Prereq: Permission of instructor Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

ENT 425. Aquatic Insects. (Dual-listed with ENT 525). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. S., offered odd-numbered years. Prereq: BIOL 312 or equivalent Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

ENT 466. Ecosystem Service Management. (Dual-listed with ENT 566). (Cross-listed with ENSCI, NREM). (2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: permission of instructor Lecture and discussion of land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENT 471. Insect Ecology. (Dual-listed with ENT 571). (2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: 9 credits biological sciences The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

ENT 490. Independent Study. Cr. 1-3. Repeatable, maximum of 6 credits. Prereq: 15 credits in biological sciences, junior or senior classification A maximum of 9 credits of all (university-wide) 490 credits may be applied toward graduation.

ENT 490E. Independent Study: Research or work experience.. Cr. 1-3. Repeatable, maximum of 9 credits. Prereq: 15 credits in biological sciences, junior or senior classification A maximum of 9 of all (university-wide) 490 credits may be used toward graduation.

ENT 490U. Independent Study: Laboratory teaching experience. Cr. 1-3. Repeatable, maximum of 6 credits. Prereq: 15 credits in biological sciences, junior or senior classification. For students registering to be undergraduate laboratory assistants. A maximum of 9 of all (university-wide) 490 credits may be used toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

ENT 510. Insect-Virus Interactions: a Molecular Perspective. (Dual-listed with ENT 410). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: Permission of an instructor Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

ENT 511. Integrated Management of Tropical Crops. (Cross-listed with HORT, PL P). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: PL P 408 or PL P 416 or ENT 370 or ENT 376 or HORT 221 Application of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Meets International Perspectives Requirement.

ENT 525. Aquatic Insects. (Dual-listed with ENT 425). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. S., offered odd-numbered years. Prereq: BIOL 312 or equivalent Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

ENT 530. Ecologically Based Pest Management Strategies. (Cross-listed with AGRON, PL P, SUSAG). (3-0) Cr. 3. Alt. F., offered even-numbered years. Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

ENT 550. Pesticides in the Environment. (Cross-listed with TOX). (2-0) Cr. 2. S. Prereq: 9 credits of biological sciences Fate and significance of pesticides in soil, water, plants, animals, and the atmosphere.

ENT 555. Insect Physiology. (3-0) Cr. 4. S. Prereq: ENT 370 Life processes of the insects, including reviews of current problems in insect physiology.

ENT 566. Ecosystem Service Management. (Dual-listed with ENT 466). (Cross-listed with ENSCI, NREM). (2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: permission of instructor Lecture and discussion of land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENT 568. Advanced Systematics. (Cross-listed with EEOB). (2-3) Cr. 3. Alt. S., offered odd-numbered years. Prereq: Permission of instructor Principles and practice of systematic biology; taxonomy, nomenclature and classification of plants and animals; sources and interpretation of systematic data; speciation; fundamentals of phylogenetic systematics.

ENT 570. Plant-Insect Interaction. (2-0) Cr. 2. Alt. F., offered odd-numbered years. Prereq: ENT 370 or ENT 376 Physiological, behavioral, ecological, and evolutionary factors that govern interactions between insects and plants, applications of this knowledge to agriculture, and important results from the study of natural systems. Additional topics covered during the semester include: tritrophic interactions, biological control of plants by insects, and pollination biology. Student-led discussions and draws on both the primary and secondary literature.

ENT 571. Insect Ecology. (Dual-listed with ENT 471). (2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: 9 credits biological sciences The contribution of insects to ecosystem function is staggering. This course will focus on insect population ecology, predator-prey interaction and chemical ecology. The role of insects in nutrient cycling, pollination and pest management will be discussed with case studies used to highlight the applied nature of insect ecology and its relationship to agriculture.

Iowa State University – 2014-2015
ENT 574. Medical Entomology. (3-3) Cr. 4. Alt. S., offered even-numbered years. Prereq: 9 credits in biological sciences
Identification, biology, and significance of insects and other arthropods that attack people and animals, particularly those that are vectors of disease.

ENT 575. Plant Protection Using Natural Enemies. (Dual-listed with ENT 375). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: ENT 370 or ENT 376 Overview of the biology, ecology, and classification of insect pathogens, predators, and parasitoids. Discussion of the use of these organisms in plant protection, including an emphasis on genetic alteration of natural enemies.

ENT 576. Systematic Entomology. (3-6) Cr. 5. Alt. F., offered even-numbered years. Prereq: ENT 370 Classification, distribution, and natural history of insects, including fundamentals of phylogenetic systematics, biogeography, taxonomic procedures, and insect collection and curation.

ENT 590A. Special Topics: Biological Control and Pathology. Cr. 1-3. Repeatable.
ENT 590F. Special Topics: Medical and Veterinary Entomology. Cr. 1-3. Repeatable.
ENT 590I. Special Topics: Toxicology. Cr. 1-3. Repeatable.

Courses for graduate students:
ENT 600. Seminar. Cr. 1. F.S.SS. Presentation of research results.
ENT 675. Insecticide Toxicology. (Cross-listed with TOX). (2-3) Cr. 3. Alt. F., offered odd-numbered years. Prereq: ENT 555 or TOX 501 Principles of insecticide toxicology; classification, mode of action, metabolism, and environmental effects of insecticides.

Environmental Science

Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following:
1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.
2. 30 credits of course work in the major, including a required core of 15 credits.
A combined average grade of C or higher is required in courses applied in the major.
A complete listing of curriculum requirements and sample 4-year plans can be found on the Environmental Science website: http://www.ensci.iastate.edu/undergrad/degree_info.html

Graduate Study

Environmental Science offers an interdisciplinary graduate program leading to the M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics.

Applicants should have completed an undergraduate or masters degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science graduate program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in Environmental Science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Graduate Study

Environmental Science offers an interdisciplinary graduate program leading to the M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics.

Applicants should have completed an undergraduate or masters degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science graduate program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in Environmental Science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Courses primarily for undergraduates:
ENSCI 110. Orientation to Environmental Science. (1-0) Cr. 1. F. Prereq: Freshman classification in EnSci Overview of Environmental Science curriculum and discussion of professional opportunities. Offered on a satisfactory-fail basis only.
ENSCI 201. Introduction to Environmental Issues. (Cross-listed with BIOL, ENV S). (2-0) Cr. 2. S. Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.
ENSCI 202. Exploration of Environmental and Sustainability Issues. (1-0) Cr. 1. F. Prereq: Credit or enrollment in ENSCI 201
Exploration of specific environmental and sustainability issues; designed to complement ENSCI 201. Offered on a satisfactory-fail basis only.

Continued exploration of specific environmental science issues developed in ENSCI 202. Topics may vary in different years. Offered on a satisfactory-fail basis only.

ENSCI 250. Environmental Geography. (Cross-listed with ENV S). (3-0) Cr. 3. F.
The distribution, origins and functions of the earth’s physical systems and the spatial relationship between human activity and the natural world.

ENSCI 251. Biological Processes in the Environment. (Cross-listed with BIOL). (3-0) Cr. 3. S.
Plant and microbial processes in environmental systems including their interactions with human activities.

ENSCI 301. Natural Resource Ecology and Soils. (Cross-listed with NREM). (3-3) Cr. 4. F. Prereq: BIOL 211, BIOL 211L; FOR 201 or a second course in biology
Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes.

ENSCI 312. Ecology. (Cross-listed with A ECL, BIOL). (3-3) Cr. 4. F.SS. Prereq: BIOL 211L and BIOL 212L
Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

ENSCI 3123. Ecology. (Cross-listed with A ECL, IA LL). Cr. 4. SS.
An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.

ENSCI 324. Energy and the Environment. (Cross-listed with ENV S, GEOL, MTEOR). (3-0) Cr. 3. S.

ENSCI 345. Natural Resource Photogrammetry and Geographic Information Systems. (Cross-listed with NREM). (2-3) Cr. 3. F.
Prereq: Junior classification Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses.

ENSCI 360. Environmental Soil Science. (Cross-listed with AGRON). (2-3) Cr. 3. S. Prereq: AGRON 154 or ENSCI 250 or GEOL 201
Application of soil science to contemporary environmental problems; comparison of the impacts that different management strategies have on short- and long-term environmental quality and land development. Emphasis on participatory learning activities.

ENSCI 381. Environmental Systems I: Introduction to Environmental Systems. (Dual-listed with ENSCI 581). (Cross-listed with BIOL, ENV S, MICRO). Cr. 3-4. F.
Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 391. Apprenticeship. 
Prereq: Approval of the Environmental Science Coordinator
Practical experience in an approved setting such as a research laboratory, government office, or private office. Offered on a satisfactory-fail basis only.

ENSCI 402. Watershed Hydrology. (Dual-listed with ENSCI 502). (Cross-listed with GEOL, MTEOR, NREM). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

ENSCI 402L. Watershed Hydrology and Surficial Processes. (Cross-listed with AGRON, IA LL). Cr. 4. SS. Prereq: Four courses in physical or biological sciences or engineering
Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds. Fieldwork will emphasize investigations of the Iowa Great Lakes watershed.

ENSCI 404. Global Change. (Dual-listed with ENSCI 504). (Cross-listed with AGRON, ENV S, MTEOR). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior standing
Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change. Also offered online Alt. F, even-numbered years.

ENSCI 405. Environmental Biophysics. (Dual-listed with ENSCI 505). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: MATH 165 or MATH 182 or equivalent and some computer programming experience (any language)
A description of the physical microenvironment in which organisms live. Emphasis on the movement of energy (heat and radiation) and mass (water and carbon) among organisms, the soil, and atmosphere. Applications to humans, other animals, plants, and plant communities.

ENSCI 406. World Climates. (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. F. Prereq: AGRON 206/MTEOR 206
Distribution and causes of different climates around the world. Effects of climate and climate variations on human activities including society, economy and agriculture. Current issues such as climate change and international efforts to assess and mitigate the consequences of a changing climate. Semester project and in-class presentation required. Meets International Perspectives Requirement.

ENSCI 407. Watershed Management. (Dual-listed with ENSCI 507). (Cross-listed with ENV S, NREM). (3-3) Cr. 4. S. Prereq: A course in general biology
Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

ENSCI 408. GIS and Natural Resources Management. (Dual-listed with ENSCI 508), (Cross-listed with A B E). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment
Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS.
ENSCI 409. Field Methods in Hydrogeology. (Dual-listed with ENSCI 509). (Cross-listed with GEOL). (0-4) Cr. 3. Alt. S., offered even-numbered years. Prereq: GEOL/ENSCI 402 or GEOL/ENSCI 411 or C 473
Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minie piezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects.

ENSCI 411. Hydrogeology. (Dual-listed with ENSCI 511). (Cross-listed with GEOL). (3-2) Cr. 4. F. Prereq: Four courses in biological or physical sciences
Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.

ENSCI 414. Applied Groundwater Flow Modeling. (Dual-listed with ENSCI 514). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years. Prereq: GEOL 411 or C E 473; MATH 165 or MATH 181
Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course.

ENSCI 415. Paleoclimatology. (Dual-listed with ENSCI 515). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: Four courses in biological or physical science
Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g. tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last ~1 million years).

ENSCI 416. Hydrologic Modeling and Analysis. (Dual-listed with ENSCI 516). (Cross-listed with GEOL, MTEOR). (2-3) Cr. 3. Alt. S., offered odd-numbered years. Prereq: Four courses in Earth science, meteorology, or engineering; junior standing
Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed.

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 419. Environmental Geochemistry. (Dual-listed with ENSCI 519). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: GEOL 402 or GEOL 411 or equivalent
Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

ENSCI 420. Environmental Engineering Chemistry. (Cross-listed with C E). (2-3) Cr. 3. F. Prereq: C E 326; CHEM 177 and CHEM 178
Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

ENSCI 422I. Prairie Ecology. (Cross-listed with IA LL). Cr. 4. SS. Prereq: Familiarity with basic principles in biological sciences and ecology
Basic patterns and underlying physical and biotic causes of both regional and local distributions of plants and animals of North American prairies; field and laboratory analyses and projects.

ENSCI 424. Air Pollution. (Cross-listed with ENSCI 524A). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424A. Air Pollution: Air quality and effects of pollutants. (Cross-listed with ENSCI 524A). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424B. Air Pollution: Climate change and causes. (Cross-listed with ENSCI 524B). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424C. Air Pollution: Transportation constraints. (Cross-listed with ENSCI 524C). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424D. Air Pollution: Off-gas treatment technology. (Cross-listed with ENSCI 524D). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 424E. Air Pollution: Agricultural sources of pollution. (Cross-listed with ENSCI 524E). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 426. Stable Isotopes in the Environment. (Dual-listed with ENSCI 526). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: Four courses in biological or physical science
Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance.

ENSCI 434. Contaminant Hydrogeology. (Dual-listed with ENSCI 534). (Cross-listed with GEOL). (3-0) Cr. 3. S. Prereq: GEOL 411 or equivalent

ENSCI 446. Integrating GPS and GIS for Natural Resource Management. (Dual-listed with ENSCI 546). (Cross-listed with NREM). (2-3) Cr. 3. S. Prereq: 12 credits in student's major at 300 level or above, NREM 345 or equivalent experience with ArcGIS
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

ENSCI 451. Applied and Environmental Geophysics. (Dual-listed with ENSCI 551). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years. Prereq: GEOL 100 or GEOL 201, MATH 181 or equivalent experience
Seismic, gravity, magnetic, resistivity, electromagnetic, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic - and resistivity-imaging systems and radar.

ENSCI 452. GIS for Geoscientists. (Dual-listed with ENSCI 552). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. F. Prereq: GEOL 100, GEOL 201 or equivalent
Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.
ENSCI 458. Environmental Soil and Water Chemistry. (Dual-listed with ENSCI 559). (Cross-listed with AGRON). (3-3) Cr. 4. F. Prereq: Two semesters of college-level chemistry, MATH 140, AGRON 154 or AGRON 360; GEO 100 and AGRON 354 recommended. An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, and applications to contemporary environmental issues.

ENSCI 461. Introduction to GIS. (Cross-listed with ENV S, IA LL, LA). Cr. 4. SS. Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management.

ENSCI 463. Soil Formation and Landscape Relationships. (Dual-listed with ENSCI 563). (Cross-listed with AGRON). (2-4) Cr. 4. S. Prereq: AGRON 154 or AGRON 260 Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of AGRON 463 or AGRON 463I may be applied for graduation.

ENSCI 466. Ecosystem Service Management. (Dual-listed with ENSCI 566). (Cross-listed with ENT, NREM). (2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: permission of instructor Lecture and discussion of land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENSCI 477. Soil Physics. (Dual-listed with ENSCI 577). (Cross-listed with AGRON). (3-0) Cr. 3. S. Prereq: Recommended: AGRON 154 MATH 166 The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

ENSCI 479. Surficial Processes. (Dual-listed with ENSCI 579). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: GEOL 100 or GEOL 201 or equivalent experience The study of physical processes that shape Earth’s surface. Topics include weathering, sediment transport, and landform genesis with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips.

ENSCI 480. Engineering Analysis of Biological Systems. (Cross-listed with A B E). (2-2) Cr. 3. F. Prereq: A B E 380 or permission of the instructor Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues.

ENSCI 485. Soil and Environmental Microbiology. (Dual-listed with ENSCI 585). (Cross-listed with AGRON, MICRO). (2-3) Cr. 3. F. Prereq: AGRON 154 or AGRON 402, MICRO 201 (MICRO 201L recommended) The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

ENSCI 486. Aquatic Ecology. (Cross-listed with A ECL, BIOL). (3-0) Cr. 3. F. Prereq: Biol 312 or EnSci 381 or EnSci 402 or NREM 446 Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.

ENSCI 486L. Aquatic Ecology Laboratory. (Cross-listed with A ECL, BIOL). (0-3) Cr. 1. F. Prereq: Concurrent enrollment in BIOL 486 Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

ENSCI 487. Microbial Ecology. (Cross-listed with BIOL, MICRO). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

ENSCI 488. GIS for Geoscientists II. (Dual-listed with ENSCI 588). (Cross-listed with AGRON, GEOL). (2-2) Cr. 3. Alt. S., offered odd-numbered years. Prereq: GIS course, such as GEOL 452, CRP 451, CRP 452, NREM 345, NREM 446, AE 408 or equivalent GIS course with focus on the spatial analysis and modeling of raster data and triangulated irregular network (TIN) data. Uses ArcGIS and various extensions, such as Spatial Analyst, 3D Analyst, and ArcScene. Includes practical exercises during lectures, lab exercises, homework assignments, and (for GEOL 588) a class project.

ENSCI 490. Independent Study. Cr. arr. Repeatable. F. SS. Prereq: Permission of the instructor and approval of the Environmental Science coordinator

ENSCI 490H. Independent Study: Honors. Cr. arr. Repeatable. F. SS. Permission of instructor and approval of Environmental Science coordinator.

ENSCI 495. Current Topics and Case Studies in Environmental Science. Cr. 1-3. Prereq: Junior classification in Environmental Science, permission of instructor Current topics and case studies related to the analysis and management of environmental systems. Individual and/or group projects.

ENSCI 496. Travel Course. Cr. arr. Repeatable. Prereq: Permission of instructor Extended field trips to study environmental topics in varied locations. Location and duration of trips vary. Trip expenses paid by students. Check with department for current offerings. A. International Tour B. Domestic Tour.

ENSCI 498. Cooperative Education. Cr. R. Repeatable. F. SS. Prereq: Permission of Environmental Science Coordinator Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:

ENSCI 502. Watershed Hydrology. (Dual-listed with ENSCI 402). (Cross-listed with GEOL, MTEOR, NREM). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

ENSCI 504. Global Change. (Dual-listed with ENSCI 494). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. S. Prereq: Four courses in physical or biological sciences or engineering; junior, senior, or graduate standing Recent changes in global biogeochemical cycles and climate; models of future changes in the climate system; impacts of global change on agriculture, water resources and human health; ethical issues of global environmental change.

ENSCI 505. Environmental Biophysics. (Dual-listed with ENSCI 405). (Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: MATH 165 or MATH 182 or equivalent and some computer programming experience (any language) Hornbuckle. A description of the physical microenvironment in which organisms live. Emphasis on the movement of energy (heat and radiation) and mass (water and carbon) among organisms, the soil, and atmosphere. Applications to humans, other animals, plants, and plant communities. Semester project required.

ENSCI 507. Watershed Management. (Dual-listed with ENSCI 407). (Cross-listed with NREM). (3-3) Cr. 4. S. Prereq: A course in general biology Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.
ENSCI 508. GIS and Natural Resources Management.
(Dual-listed with ENSCI 408). (Cross-listed with A B E). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment
Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS. In addition to other assignments, graduate students will prepare research literature reviews on topics covered in class and develop enterprise applications.

ENSCI 508L. Aquatic Ecology.
(Cross-listed with IA LL, NREM). Cr. 4. SS. Prereq: Courses in ecology, chemistry, and physics
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

ENSCI 509. Field Methods in Hydrogeology.
(Dual-listed with ENSCI 409). (Cross-listed with GEOL). (0-4) Cr. 3. Alt. SS., offered even-numbered years. Prereq: MATH 402 or MATH 411 or C E 473
Introduction to field methods used in groundwater investigations. In-field implementation of pumping tests, slug tests, monitoring well installation and drilling techniques, geochemical and water quality sampling, seepage meters, minipiezometers, stream gaging, and electronic instrumentation for data collection. Field trips to investigate water resource, water quality, and remediation projects.

ENSCI 511. Hydrogeology.
(Dual-listed with ENSCI 411). (Cross-listed with GEOL). (3-2) Cr. 4. F. Prereq: Four courses in biological or physical sciences
Physical principles of groundwater flow, nature and origin of aquifers and confining units, well hydraulics, groundwater modeling, and contaminant transport. Lab emphasizes applied field and laboratory methods for hydrogeological investigations.

(Dual-listed with ENSCI 414). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. SS., offered even-numbered years. Prereq: GEO 411 or C E 473; MATH 165 or MATH 181
Introduction to the principles of modeling groundwater flow systems. Finite-difference and analytic-element methods, spreadsheet models, boundary conditions, calibration, sensitivity analysis, parameter estimation, particle tracking, and post-audit analysis. Application of MODFLOW to regional flow-system analysis. Computer laboratory emphasizes assigned problems that illustrate topics discussed in the course.

ENSCI 515. Paleoclimatology.
(Dual-listed with ENSCI 415). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. SS., offered odd-numbered years. Prereq: Four courses in biological or physical science
Introduction to mechanisms that drive climate, including the interplay between oceanic and atmospheric circulation and fluctuation in Earth's orbital parameters. Examination and analysis of past climate records ranging from historical documentation to ecological and geochemical proxies (e.g., tree ring analysis; O and C isotopes of skeletal carbonates and soils). Dating methods used to constrain and correlate climatic periods; utility of computer models to reconstruct past climates and predict future climate change. Emphasis placed on paleoclimatology and paleoecology of the late Quaternary (last 1 million years).

ENSCI 516. Hydrologic Modeling and Analysis.
(Dual-listed with ENSCI 416). (Cross-listed with GEO, MTEOR). (2-3) Cr. 3. Alt. S., offered odd-numbered years. Prereq: Four courses in earth science, meteorology, or engineering; junior standing
Study of the basic principles of hydrologic modeling, including rainfall-runoff analysis, lumped and distributed modeling, conceptual and physical models, parameter estimation and sensitivity analysis, input and validation data, uncertainty analysis, and the use of models in surface water hydrology. A range of common models are applied to study hydrologic topics such as flood forecasting and land use change impacts. Previous experience with Matlab or other programming language is needed.

(Dual-listed with ENSCI 418). (Cross-listed with A ECL). (2-3) Cr. 3. Alt. F., offered odd-numbered years. Prereq: A ECL 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

ENSCI 519. Environmental Geochemistry.
(Dual-listed with ENSCI 419). (Cross-listed with GEOL). (2-2) Cr. 3. F. Prereq: GEOE 511 or equivalent
Geochemistry of natural waters and water-rock interactions. Acid-base equilibria, carbonate chemistry and buffer systems, mineral dissolution and precipitation, sorption, ion exchange, and redox reactions. Introduction to thermodynamics and kinetics. Laboratory emphasizes chemical analysis of waters and computer modeling.

ENSCI 520. Environmental Engineering Chemistry.
(Dual-listed with ENSCI 420). (Cross-listed with C E). (2-3) Cr. 3. F. Prereq: CHEM 177 and CHEM 178, MATH 166
Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions and mass transfer principles. Individual laboratory practicals and group projects required. Term paper and oral presentation.

ENSCI 521. Environmental Biotechnology.
(Cross-listed with C E). (2-2) Cr. 3. F. Prereq: C E 326
Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

ENSCI 522. Water Pollution Control Processes.
(Cross-listed with C E). (2-3) Cr. 3. Prereq: C E 521
Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

ENSCI 523. Physical-Chemical Treatment Process.
(Cross-listed with C E). (2-2) Cr. 3. Prereq: C E 520
Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

ENSCI 524. Air Pollution.
(Dual-listed with ENSCI 424). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics; Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

ENSCI 524A. Air Pollution: Air quality and effects of pollutants.
(Dual-listed with ENSCI 424A). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics; Senior classification or above

ENSCI 524B. Air Pollution: Climate change and causes.
(Dual-listed with ENSCI 424B). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics; Senior classification or above

ENSCI 524C. Air Pollution: Transportation constraints.
(Dual-listed with ENSCI 424C). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics; Senior classification or above

ENSCI 524D. Air Pollution: Off-gas treatment technology.
(Dual-listed with ENSCI 424D). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics; Senior classification or above

ENSCI 524E. Air Pollution: Agricultural sources of pollution.
(Dual-listed with ENSCI 424E). (Cross-listed with A B E, C E). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics; Senior classification or above
(Dual-listed with ENSCI 426). (Cross-listed with GEOL). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: Four courses in biological or physical science. Introduction to the theory, methods and applications of stable isotopes. Primary focus on the origin, natural abundance, and fractionation of carbon, hydrogen, oxygen, nitrogen isotopes. Applications of isotopic occurrence for elucidation of physical, chemical, biological, and environmental processes. Effects of plant physiology, photosynthesis, trophic structure, diffusion, evaporation, chemical precipitation, soil and atmospheric processes, and environmental factors on isotope abundance.

ENSCI 528. Solid and Hazardous Waste Management.  
(Cross-listed with E EEB). (3-0) Cr. 3. F.. Prereq: C E 326 or background courses in both environmental chemistry and microbiology; junior or higher standing. Evaluation, characterization, assessment, planning and design of solid and hazardous waste management systems, regulatory requirements, material characterization and collection, minimization and recycling, energy and materials recovery, composting, off-gas treatment, incineration, stabilization, and landfill design. Design of treatment and disposal systems, including physical, chemical, and biological treatment, solidification, incineration, secure landfill design, and final disposal site closure plus restoration.

(Cross-listed with A B E). (2-3) Cr. 3. F.. Prereq: E M 378 or CH E 356. Hydrology and hydraulics in agricultural and urbanizing watersheds. Design and evaluation of systems for the conservation and quality preservation of soil and water resources. Use and analysis of hydrologic data in engineering design; relationships of topography, soils, crops, climate, and cultural practices in conservation and quality preservation of soil and water for agriculture. Small watershed hydrology, water movement and utilization in the soil-plant-atmosphere system, agricultural water management, best management practices, and agricultural water quality. Graduate students will prepare several research literature reviews on topics covered in the class in addition to the other assignments.

ENSCI 533. Erosion and Sediment Transport.  
(Cross-listed with A B E). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: C E 372. MATH 266. Soil erosion processes, modified universal soil loss equation and its application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reserves sedimentation, wind erosion, BMPs for controlling erosion.

ENSCI 534. Contaminant Hydrogeology.  

(Cross-listed with E EOB, NREM). (2-3) Cr. 3. F.. Prereq: BIOL 368 or BIOL 474 or graduate standing. Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

ENSCI 535I. Restoration Ecology.  
(Cross-listed with A ECL, E EOB, IA LL). Cr. 4. Alt. SS., offered even-numbered years. Prereq: A Course in ecology. Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

ENSCI 546. Integrating GPS and GIS for Natural Resource Management.  
(Dual-listed with ENSCI 446). (Cross-listed with NREM). (2-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above. NREM 345 or equivalent experience with ArcGIS. Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

(Dual-listed with ENSCI 451). (Cross-listed with GEOL). (2-2) Cr. 3. Alt. S., offered even-numbered years. Prereq: GEOL 100 or GEOL 201, MATH 181 or equivalent experience or permission of instructor. Seismic, gravity, magnetic, resistivity, electromagnetics, and ground-penetrating radar techniques for shallow subsurface investigations and imaging. Data interpretation methods. Lab emphasizes computer interpretation packages. Field work with seismic- and resistivity-imaging systems and radar.

ENSCI 552. GIS for Geoscientists.  
(Dual-listed with ENSCI 452). (Cross-listed with AGRON, GEOL). (2-3) Cr. 3. Prereq: GEOL 100, GEOL 201 or equivalent. Introduction to geographic information systems (GIS) with particular emphasis on geoscientific data. Uses ESRI’s ArcGIS Desktop Software and extension modules. Emphasizes typical GIS operations and analyses in the geosciences to prepare students for advanced GIS courses.

ENSCI 553. Soil-Plant Relationships.  
(Cross-listed with AGRON). (3-0) Cr. 3. F.. Prereq: AGRON 354. Composition and properties of soils in relation to the nutrition and growth of plants.

ENSCI 555. Laboratory Methods in Soil Chemistry.  
(Cross-listed with AGRON). (2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: AGRON 354 and CHEM 211. Experimental and descriptive inorganic and organic analyses. Operational theory and principles of applicable instruments, including spectrophotometry, atomic and molecular absorption and emission spectroscopy, mass spectrometry, X-ray diffraction and fluorescence, gas and ion chromatography, and ion-selective electrodes.

ENSCI 559. Environmental Soil and Water Chemistry.  
(Dual-listed with ENSCI 459). (Cross-listed with AGRON). (3-3) Cr. 4. F.. Prereq: AGRON 354 or ENSCI 360; CHEM 178; MATH 140. CHEM 211 or CHEM 231 recommended. Thompson: An introduction to the chemical properties of soils, chemical reactions and transformations in soils and surface waters, and their impact on the environment. Topics include solution chemistry in soils and surface waters, solid-phase composition of soils, reactions at the solid-solution interface, chemical-equilibrium speciation programs, and applications to contemporary environmental issues.

ENSCI 563. Soil Formation and Landscape Relationships.  
(Dual-listed with ENSCI 463). (Cross-listed with AGRON). (2-4) Cr. 4. S. Prereq: AGRON 154 or AGRON 260. Burras: Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Two weekend field trips. Credit for one of Agron 563 or 563I may be applied for graduation.

ENSCI 563I. Soil Formation and Landscape Relationships.  
(Dual-listed with ENSCI 463I). (Cross-listed with AGRON, IA LL). Cr. 4. Alt. SS., offered even-numbered years. Prereq: AGRON 154 or AGRON 260. Relationships between soil formation, geomorphology, and environment. Soil description, classification, geography, mapping, and interpretation for land use. Credit for only Agron 563 or 563I may be applied for graduation.

ENSCI 564. Wetland Ecology.  

ENSCI 564I. Wetland Ecology.  
(Cross-listed with E EOB, IA LL). Cr. 4. SS. Prereq: IA LL 312 I. Ecology, classification, creation, restoration, and management of wetlands. Field studies will examine the composition, structure and functions of local natural wetlands and restored prairie pothole wetlands. Individual or group projects.

ENSCI 566. Ecosystem Service Management.  
(Dual-listed with ENSCI 466). (Cross-listed with ENT, NREM). (2-1) Cr. 3. Alt. S., offered odd-numbered years. Prereq: permission of instructor. Lecture and discussion of land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

ENSCI 571. Surface Water Hydrology.  
(Cross-listed with C E). (3-0) Cr. 3. Prereq: C E 372. Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination. Design project.
ENSCI 572. Analysis and Modeling Aquatic Environments. (Cross-listed with C E), (3-4) Cr. 3. Prereq: C E 372
Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advective, diffusion and dispersion, chemical and biologic kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models.

ENSCI 573. Groundwater Hydrology. (Cross-listed with C E), (3-0) Cr. 3. Prereq: C E 372

ENSCI 575. Soil Formation and Transformation. (Cross-listed with AGRON), (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: AGRON 463 or equivalent
Advanced study of soil formation, emphasizing relationships among soils, landscapes, environment, humans, and land use.

ENSCI 577. Soil Physics. (Dual-listed with ENSCI 477). (Cross-listed with AGRON). (3-0) Cr. 3. S. Prereq: Recommended: AGRON 154 and MATH 168
Horton. The physical soil system: the soil components and their physical interactions; transport processes involving water, air, and heat.

ENSCI 578. Laboratory Methods in Soil Physics. (Cross-listed with AGRON). (0-3) Cr. 1. S. Prereq: concurrent enrollment in AGRON 477 or 577
Methods of measuring soil physical properties such as texture, density, and water content, and transport of heat, water, and gases.

ENSCI 579. Surficial Processes. (Dual-listed with ENSCI 479). (Cross-listed with GEOL). (2-2) Cr. 3. F.
Prereq: GEOL 100 or GEOL 201 or equivalent experience
The study of physical processes that shape Earth’s surface. Topics include weathering, sediment transport, and landscape evolution with emphasis on fluvial, glacial, hillslope, eolian, and coastal processes. Applications to engineering and environmental problems. Laboratory includes topographic map interpretation and local field trips.

ENSCI 581. Environmental Systems I: Introduction to Environmental Systems. (Dual-listed with ENSCI 381). (Cross-listed with EEB). Cr. 3-4. F. Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 582. Environmental Systems II: Analysis of Environmental Systems. (Dual-listed with ENSCI 382). (Cross-listed with EEB). (2-2) Cr. 3. S. Prereq: ENSCI 381
Continuation of EnSci 381. Systems approach to the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

ENSCI 584. Advanced Ecosystem Ecology. (Cross-listed with EEB). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: Combined 12 credits in biology, chemistry, and physics.
Advanced studies of ecosystems and the biological and physical factors that influence their properties and dynamics. Conceptual foundations and modern approaches to ecosystem studies. Interactions among organisms, biological diversity, and ecosystem attributes. Quantitative analyses of accumulations, transformations, and fluxes of nutrients, water, and energy within and among ecosystems. Global change issues.

ENSCI 585. Soil and Environmental Microbiology. (Dual-listed with ENSCI 485). (Cross-listed with AGRON, MICRO). (2-3) Cr. 3. F.
Prereq: AGRON 154 or AGRON 402, MICRO 201 (MICRO 201L recommended) Loynachan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

ENSCI 586. Aquatic Ecology. (Dual-listed with ENSCI 486). (Cross-listed with EEB). (3-0) Cr. 3. F.
Prereq: ENSCI 301 or ENSCI 312 or ENSCI 381 or ENSCI 402
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine and wetland ecology.
### Humanities and Social Sciences: 6-12 cr.
Select Humanities course from approved list  
ECON 101 Principles of Microeconomics 3  
If H Sci student, select:  
Additional Humanities course 6  
Additional Humanities or Social Science course

### Ethics and Environmental: 3-6 cr.
FS HN 342 World Food Issues: Past and Present 3  
If AgLS student, select from:  
ENV S 120 Introduction to Renewable Resources 2-3  
ENV S 201 Introduction to Environmental Issues

### Mathematical Sciences: 7-12 cr.
#### Food science and technology option:
Select from:  
MATH 165 Calculus I 8  
& MATH 166 Calculus II
or  
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I 3-4  
& MATH 182 Calculus and Mathematical Modeling for the Life Sciences II
Select at least 3 credits from:  
STAT 101 Principles of Statistics  
STAT 104 Introduction to Statistics  
STAT 105 Introduction to Statistics for Engineers

Total Credits 11-12

#### Food science and industry option, and consumer food science option:
Select at least 4 credits from:  
MATH 160 Survey of Calculus  
MATH 165 Calculus I  
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
Select at least 3 credits from:  
STAT 101 Principles of Statistics  
STAT 104 Introduction to Statistics  
STAT 105 Introduction to Statistics for Engineers

Total Credits 7-8

### Physical Sciences: 13-25 cr.
#### Food science and technology option:
CHM 177 General Chemistry I 4  
CHM 177L Laboratory in General Chemistry I 1  
CHM 178 General Chemistry II 3  
CHM 331 Organic Chemistry I 3  
CHM 331L Laboratory in Organic Chemistry I 1  
CHM 332 Organic Chemistry II 3  
PHS 111 General Physics 5  
PHS 112 General Physics 5

Total Credits 25

#### Food science and industry option, and consumer food science option:
Select from:  
CHEM 163 College Chemistry  
& 163L and Laboratory in College Chemistry 5-8  
CHEM 177 General Chemistry I  
& 177L and Laboratory in General Chemistry I  
& CHEM 178 General Chemistry II  
CHEM 231 Elementary Organic Chemistry 3  
CHEM 231L Laboratory in Elementary Organic Chemistry 1  
PHS 115 Physics for the Life Sciences 4-5  
or PHYS 111 General Physics 13-17

### Biological Sciences: 12-13 cr.
#### Food science and technology option:
BBMB 301 Survey of Biochemistry 3  
BIOL 211 Principles of Biology I 3  
BIOL 212 Principles of Biology II 3  
MICRO 301 Microbiology Laboratory 1

Total Credits 12-13

#### Food science and industry option, and consumer food science option:
BBMB 301 Survey of Biochemistry 3  
BIOL 211 Principles of Biology I 3  
BIOL 212 Principles of Biology II 3  
MICRO 301 Microbiology Laboratory 1

Total Credits 13

### Food Science and Human Nutrition: 43-44 cr.
FS HN 101 Food and the Consumer 3  
FS HN 110 Professional and Educational Preparation 1  
FS HN 167 Introduction to Human Nutrition 3  
FS HN 203 Contemporary Issues in Food Science and Human Nutrition 1  
FS HN 311 Food Chemistry 3  
FS HN 311L Food Chemistry Laboratory 1  
FS HN 351 Introduction to Food Engineering Concepts 3  
FS HN 403 Food Laws, Regulations, and the Regulatory Process 2  
FS HN 405 Food Quality Assurance 3  
FS HN 406 Sensory Evaluation of Food 3  
FS HN 410 Food Analysis 3  
FS HN 411 Food Ingredient Interactions and Formulations 2  
FS HN 412 Food Product Development 3  
FS HN 420 Food Microbiology 3  
FS HN 471 Food Processing I 3  
FS HN 480 Professional Communication in Food Science and Human Nutrition 1

For technology and industry options, 6 credits from:  
FS HN 421 Food Microbiology Laboratory  
FS HN 472 Food Processing II  
For consumer option, select 5-6 credits from:  
FS HN 214 Scientific Study of Food and Food Preparation Laboratory  
& FS HN 215 and Advanced Food Preparation Laboratory  
FS HN 265 Nutrition for Active and Healthy Lifestyles  
FS HN 421 Food Microbiology Laboratory  
FS HN 472 Food Processing II

Total Credits 43-44

### Food science and technology option:
Select 6 credits from the following business courses: 6  
ACCT 215 Legal Environment of Business  
ACCT 284 Financial Accounting  
ACCT 285 Managerial Accounting  
ECON 301 Intermediate Microeconomics  
ECON 320 Labor Economics  
MGMT 310 Entrepreneurship and Innovation  
MGMT 370 Management of Organizations  
MGMT 371 Organizational Behavior  
MGMT 414 International Management  
MGMT 472 Management of Diversity
the third year, students apply for admission to the BS/MS program. Students not interested in this program enroll as pre-diet and exercise students. In the fall of

Food Science and Human Nutrition (AGLS)
The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These curricula include culinary science, dietetics, diet and exercise, food science, and nutritional science. Visit the department web site at: www.fshn.hs.iastate.edu.
Undergraduate Study
Culinary science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internship experience in the food industry or culinary business is required. Culinary science graduates are qualified to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales.
The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor’s and Master’s degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited dietetics internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian (R.D.) and to practice in the field of dietetics. There is a $30 fee for a statement of verification of completion of the DPD. For information about verification statements provided to non-ISU students or students with degrees from international universities, see the departmental website: www.fshn.hs.iastate.edu.
Students interested in pursuing the dietetics program enter the university designated as pre-dietetics students. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, completion of application and demonstrated interest in becoming a registered dietitian. Upon admission, students progress toward earning a Bachelor of Science degree in dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship. The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs. A program for concurrent Bachelor of Science and Master of Science (BS/MS) degrees in diet and exercise is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as pre-diet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not accepted into the program can continue toward completion of the BS degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of BS/MS degrees in diet and exercise.
Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also work in government regulatory agencies and academic institutions.
Three options are available in food science: food science and technology, food science and industry, and consumer food science. The food science and technology and food science and industry options are approved by the Institute of Food Technologists, the national professional organization of food science. Career options include quality control/assurance; production supervision; management and sales; research careers in the food industry, government, or academia; business; journalism; food product formulation and recipe development; food promotion and communication; and consumer services in government and industry. Students who have an interest in graduate study or research are encouraged to select the food science and technology option. Students who wish to combine education in engineering with food science may select additional courses in chemical or agricultural engineering. Double majors are available and may require an additional year.
Students in food science have the opportunity to pursue a Master of Business Administration (MBA) concurrently with the Bachelor of Science (BS) degree in food science. The program is designed so students can earn both the BS in food science and MBA in five years, to meet the needs of students who are interested in management careers in the food industry. Students apply for admission to the MBA program in the spring of the third year. The program for concurrent BS in food science/MBA degrees is a rigorous 5-year program, and admission is very selective. Visit the MBA web site at: www.business.iastate.edu/masters/mba/collaborative-mba-programs.
Nutritional science offers two options: pre-health professional & research and nutrition & wellness. The pre-health professional & research option can serve as a pre-professional program for medicine, dentistry, veterinary medicine, or for graduate study in nutrition or other biological sciences. Students in the pre-health professional & research option gain a strong basic science education along with the nutrition expertise that enables them to attain the knowledge and skills necessary to work in research laboratories of colleges and universities, government agencies, industries, and foundations. Students in the nutrition & wellness option will learn about the role of nutrition and healthy eating for disease prevention and wellness with an emphasis on nutrition education for the public and community agencies as well as effective program planning and evaluation. Graduates will be prepared for employment opportunities in community and state agencies, nonprofit organizations and health promotion enterprises, or public health and related programs.
Students graduating with degrees in culinary science, dietetics, diet and exercise, food science, or nutritional science will be able to: 1) demonstrate a high level of technical competence in their chosen field, perform successfully in a graduate program, supervised practice program or entry-level professional position; 2) communicate effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 6) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field.
Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.
Minors
The department offers coursework for minors in culinary science, food science, and nutrition and participates in the interdepartmental minor in food safety. See department office or departmental website for more information about minors: http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/.

### Consumer food science option:
Select 6 credits from the following consumer-focused courses:
- FS HN 308 Dairy Products: Current Issues and Controversies
- P R 220 Principles of Public Relations
- P R 305 Publicity Methods
- MKT 340 Principles of Marketing
- MKT 447 Consumer Behavior
- MKT 448 Global Marketing

### Electives:
3-19 cr. Select from any university coursework to earn at least 120 total credits.

### Go to FS HN courses.
The Interdepartmental food safety minor is designed to provide undergraduate students with exposure to the principles of food safety to complement their current major and offer new opportunities for their future careers. Depending on the student’s major, the minor enhances the student’s expertise in food safety issues pertinent to the student’s major. Student learning outcomes include: awareness of food safety issues as they appear in each step of the food chain; ability to analyze a situation, identify food safety problems, use resources to gain additional information; develop a procedure or solution to identified problems; examine proposed solutions for viability and effectiveness; and to be able to speak and write about food safety issues. Graduates with a food safety minor are better prepared for employment in agricultural, medical, and veterinary medical agencies and with state, national, and international businesses. The food safety minor requires 15 credits of coursework with 9 credits from 3 core courses and elective courses to supplement the training in the minor. See approved list for minor courses from departmental website: http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/

Postbaccalaureate Program
The Iowa State University Dietetics Internship (DI) began as an AP4 program in 1989. It meets the performance requirements for experience programs for students who have completed the academic requirements of the Academy of Nutrition and Dietetics. The internship is administered through the Department of Food Science and Human Nutrition. Interns are admitted to Iowa State University as graduate students seeking a “Graduate Certificate in Dietetics Internship” which will be indicated on the final transcript. Successful completion of this program will result in the receipt of the DI Verification Statement which establishes eligibility to sit for the national standardized exam administered by the Commission on Dietetic Registration (CDR). Successful completion of the exam results in the Registered Dietitian (RD) credential. For more information, visit the website at www.dietetics.iastate.edu. There is a nonrefundable application fee of $75.

Graduate Study
The Food Science and Human Nutrition (FSHN) Department offers coursework for the degrees master of science and doctor of philosophy with majors in food science and technology and in nutritional sciences, and minors in food science and technology and in nutrition. Graduate work in meat science is offered as a co-major in animal science and food science and technology. Prerequisite to major work is a baccalaureate degree in business science, nutrition, or other physical or biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Graduate students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The two main departments are FSHN and Animal Science, whereas other departments (such as Kinesiology; Biochemistry, Biophysics, and Molecular Biology; Agronomy; and Statistics) may also be involved. (See Nutritional Sciences interdepartmental graduate major.)

The department offers an online 12-credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students eligible for admission to the food science master’s degree program may be admitted.

The department participates in an online Master of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students who are registered dietitians and are eligible for admission to the FSHN Master’s degree program may be admitted.

The department offers coursework for the degrees master of science and doctor of philosophy that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet or exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis or creative component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to: 1) design, conduct, and interpret research; 2) apply theoretical information to solve practical problems; 3) prepare and communicate discipline-specific information in written and oral forms to scientific and lay audiences; 4) facilitate learning in the classroom; 5) submit a paper for publication in a peer-reviewed journal; and 6) secure professional-level positions in academia, industry, government, or health care.

Courses primarily for undergraduates:
FS HN 101. Food and the Consumer.
(3-0) Cr. 3. F.S. Prereq: High school biology and chemistry or 3 credits each of biology and chemistry

(1-0) Cr. 1. F.S.
Analysis of how the body uses nutrients for energy and how to select a balanced diet to meet specific athletic performance needs. Lecture and activities specific to students’ interest. Offered on a satisfactory-fail basis only.

FS HN 104. Introduction to Professional Skills in Culinary Science.
(0-6) Cr. 1. S.
Introduction to culinary science. Students will develop fundamental culinary skills by arranged on-campus work experience (100 hours). Sessions with instructor arranged.

FS HN 110. Professional and Educational Preparation.
(1-0) Cr. 1. F.S.
Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation, enhancement of communication skills, and portfolio development. Offered on a satisfactory-fail basis only.

FS HN 111. Fundamentals of Food Preparation.
(2-0) Cr. 2. F.S. Prereq: FS HN 101 or FS HN 167; high school chemistry or CHEM 160; concurrent enrollment in FSHN 115.

FS HN 112. Orientation to Learning and Productive Team Membership. (Cross-listed with AER E, CON E, HORT, NREM). (2-0) Cr. 2. F.
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

FS HN 114. Developing Responsible Learners and Effective Leaders. (Cross-listed with CON E, HORT, NREM). (2-0) Cr. 2. S. Prereq: Hort 112 or NREM 112
Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

FS HN 115. Food Preparation Laboratory. (0-3) Cr. 1. F.S. Prereq: Credit or enrollment in FS HN 111 or FS HN 214
Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety.

FS HN 167. Introduction to Human Nutrition. (3-0) Cr. 3. F.S.SS. Prereq: High school biology or 3 credits of biology
Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family.
FS HN 214. Scientific Study of Food. 
(3-0) Cr. 3. F.S. Prereq; FS HN 167 or FS HN 265; CHEM 231 or CHEM 331; plus concurrent enrollment in FS HN 115 or 215 Composition and structure of foods. Principles of preparation of standard quality food products. Behavior and interactions of food constituents.

FS HN 215. Advanced Food Preparation Laboratory. 
(0-6) Cr. 2. F.S. Prereq; Credit or enrollment in FS HN 214 Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety. Development of culinary skills and advanced food preparation.

FS HN 242. Societal Impacts on Food Systems. 
(3-0) Cr. 3. S. Description of food systems from farming practices to global marketing. Exploration of the impacts of food system choices on personal health, the environment and global society.

FS HN 262. Special Topics in Health Professions. 
(1-0) Cr. 1, F. Careers and controversies in nutritional science. Discussion of current topics in health professions involving nutrition, such as "low-carb" diets, supplements for athletic performance, "food and mood," interviews with health professionals on how they use nutrition concepts in practice.

FS HN 264. Fundamentals of Nutritional Biochemistry and Metabolism. 
(3-0) Cr. 3. F. Prereq; FS HN 167; CHEM 163, CHEM 163L; BIOL 211 Digestion, absorption, metabolism, and biochemical functions of nutrients. Biochemical aspects of nutrient deficiencies.

FS HN 265. Nutrition for Active and Healthy Lifestyles. 
(3-0) Cr. 3. S. Prereq; FS HN 167, plus credit or enrollment in BBMB 301 or credit in FS HN 264 Fundamentals of nutrient metabolism and nutrient requirements. Role of macronutrient metabolism in physical performance and disease prevention. Effect of manipulation of macronutrient metabolism on physical performance and disease prevention. Applications of nutrient metabolism principles to dietary recommendations and planning.

(3-0) Cr. 3. S. Course will address milk chemistry, microbiology, handling, processing, regulations, organic production, and nutrition; dispel myths about dairy foods; improve critical thinking and communication skills. Students will participate in structured controversies and debate.

FS HN 311. Food Chemistry. 
(3-0) Cr. 3. F. Prereq; TSM 115, CHEM 231 and CHEM 231L or CHEM 331 and CHEM 331L; credit or enrollment in BBMB 301 The structure, properties, and chemistry of food constituents and animal and plant commodities.

FS HN 311L. Food Chemistry Laboratory. 
(0-3) Cr. 1, F. Prereq; Credit or concurrent enrollment in FSHN 311. The laboratory practices of structure, properties, and chemistry of food constituents.

(1-0) Cr. 1. S. Prereq; FSHN 104 or concurrent enrollment in FSHN 104. Introduction to the roles culinary scientists hold within industry including product development, research, and quality assurance. Discussions focused on professional and educational development, enhancement of communication skills, ethics and emerging issues and trends in culinary science.

(1-0) Cr. 1, F. Prereq; Junior classification Introduction to the profession of dietetics and responsibilities associated with dietetic professional practice. Emphasis on development of a pre-professional portfolio, career options in dietetics and preparation for a dietetic internship. Leadership and professional career development for the dietitian is addressed through self-reflection, creation of materials for post-baccalaureate programs and job shadowing experience. Professional issues related to dietetic practice include Code of Ethics, legal credentialing and standards of professional practice, leadership and future trends in the profession. Offered on a satisfactory-fail basis only.

(Cross-listed with AGRON, ENV S, T SC). (3-0) Cr. 3. F.S. Prereq; Junior classification Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Meets International Perspectives Requirement.

FS HN 342H. World Food Issues: Past and Present (Honors). 
(3-0) Cr. 3. F.S. Prereq; Junior classification Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects. Meets International Perspectives Requirement.

FS HN 351. Introduction to Food Engineering Concepts. 
(3-0) Cr. 3. S. Prereq; A course in calculus and physics (PHYS 111 or PHYS 115) Methodology for solving problems in food processing and introduction to food engineering concepts including food properties, material and energy balances, sources of energy, thermodynamics, fluid flow, heat transfer, and mass transfer. Only one of 351 or A E 451 and CH E 357 allowed toward graduation. Field trip.

FS HN 360. Advanced Human Nutrition and Metabolism. 
(3-0) Cr. 3. F. Prereq; FS HN 265, 3 credits in biochemistry; 3 credits in physiology recommended Physiological and biochemical basis for nutrient needs; assessment of nutrient deficiency and toxicity; examination of nutrient functions and regulation of metabolism; nutrient-gene interactions.

FS HN 361. Nutrition and Health Assessment. 
(1-3) Cr. 2. F.S. Prereq; FS HN 265; 3 credits in statistics; 3 credits in physiology recommended The assessment of nutritional status in healthy individuals. Laboratory experiences in food composition and assessment of dietary intake, body composition, and biochemical indices of nutritional status.

(3-0) Cr. 3. S. Prereq; FS HN 360; credit or enrollment in a course in physiology Nutrient needs throughout the life cycle. Interrelationships of genes, gene expression and nutrients with physiological outcomes during human development and aging.

(3-0) Cr. 3. F. Prereq; BIOL 256, BIOL 256L or BIOL 306 Overview of nutrients, their functions, metabolism, food sources and optimal choices for the promotion of health and wellness. Nutrition strategies for the prevention of chronic disease, including cancer, diabetes and obesity, as they apply to individuals or the wider population will be discussed.

FS HN 365. Obesity and Weight Management. 
(3-0) Cr. 3. S. Prereq; BIOL 256 and BIOL 256L, or BIOL 306 Multifactorial aspects of obesity, maintenance of healthy weight, and the relationship of weight status and chronic disease prevention. Traditional and novel nutrition and exercise theories as well as current popular diet and exercise trends will be discussed.

(3-0) Cr. 3. S. Prereq; FS HN 167 or FS HN 265 Theory and application of adult learning as it relates to the role of nutrition in health promotion and disease prevention. Discussion of nutrition education and interventions relative to the social-ecological model. Factors to consider in developing the nutrition education/intervention practicum experience using the social-ecological model. Focus on communication strategies for providing nutrition messages to diverse community audiences using various forms of media and outreach (print, radio, TV, newspaper, consumer publications, websites, community venues). Development of nutrition messages using various forms of media for a target population.

FS HN 367. Medical Terminology for Health Professionals. 
(1-0) Cr. 1. S. An independent course focused on medical terminology, abbreviations, and simple clinical mathematical calculations.
FS HN 403. Food Laws, Regulations, and the Regulatory Process. (2-0) Cr. 2. S.SS. Prereq: 3 credits in food science coursework at 200 level or above. Review of federal legislative and regulatory processes and documents related to food and food ingredients. Discussion of federal food safety programs, food distribution programs, related programs, and key agencies. Exploration of analogous State of Iowa processes, programs, and agencies.

FS HN 405. Food Quality Assurance. (2-2) Cr. 3. S. Prereq: FS HN 214 or FS HN 311; STAT 101 or STAT 104. Basis of food quality control/assurance programs and establishment of decision-making processes using official (government and industry) instrumental, chemical, and sensory procedures. Statistical process and quality control procedures and their applications to various food systems. Development of hazard analysis procedures, specifications, grades, and standards.

FS HN 406. Sensory Evaluation of Food. (Dual-listed with FS HN 506). (2-3) Cr. 3. F. Prereq: FS HN 214 or FS HN 311 or AN S 360; 3 credits in statistics. Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements of color and texture. Acceptance and preference testing.

FS HN 407. Microbiological Safety of Foods of Animal Origins. (Dual-listed with FS HN 507). (Cross-listed with MICRO). (3-0) Cr. 3. S. Prereq: MICRO 420. Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

FS HN 410. Food Analysis. (2-3) Cr. 3. S. Prereq: FS HN 214 or FS HN 311 or CHEM 211; TSM 115. An introduction to the theory and application of physical and chemical methods for determining the constituents of food. Modern separation and instrumental analysis. Use of food composition data bases.

FS HN 411. Food Ingredient Interactions and Formulations. (1-3) Cr. 2. F.S. Prereq: FSHN 214 or FS HN 311 and FS HN 115, FS HN 215 or FS HN 311L. Application of food science principles to ingredient substitutions in food products. Laboratory procedures for standard formulations and instrumental evaluation, with emphasis on problem-solving and critical thinking.

FS HN 412. Food Product Development. (Dual-listed with FS HN 512). (1-6) Cr. 3. S. Prereq: FS HN 311 or FS HN 411, FSHN 417. Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, microbiology, and processing. Some pilot plant experiences. Electronic communication from web emphasized for class reports, notes and assignments.

FS HN 419. Foodborne Hazards. (Cross-listed with MICRO, TOX). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: MICRO 201 or MICRO 302, a course in biochemistry. Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxins in the food supply, governmental regulation of foodborne hazards. Only one of FS HN 419 and FS HN 519 may count toward graduation.

FS HN 420. Food Microbiology. (Cross-listed with MICRO, TOX). (3-0) Cr. 3. F. Prereq: MICRO 201 or MICRO 302. Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications.

FS HN 421. Food Microbiology Laboratory. (Cross-listed with MICRO). (0-6) Cr. 3. F. Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L. Credit or enrollment in FS HN/MICRO 420. Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction.

FS HN 429. Foodborne Toxictants. (2-0) Cr. 2. Alt. F., offered odd-numbered years. Prereq: A course in biochemistry. Mechanisms of action, metabolism, sources, remediation or detoxification, risk assessment of major foodborne toxicants of current interest, design of HACCP plans for use in food industries targeting foodborne toxicants. Taught online only.

FS HN 461. Medical Nutrition and Disease I. (4-0) Cr. 4. F. Prereq: FS HN 360, FS HN 361, FS HN 367; plus BIOL 256 and 256L or BIOL 306 or BIOL 335. (Dual-listed with NutrS 561) Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

FS HN 463. Community Nutrition. (3-0) Cr. 3. F. Prereq: FS HN 265 or FS HN 360; FS HN 366. Recommended: Dual-listed with NutrS 563. Survey of current public health nutrition problems among nutritionally vulnerable individuals and groups. Discussion of the multidimensional nature of those problems and of community programs addressing them. Grant writing as a means for funding community nutrition program development. Significant emphasis on written and oral communication at the lay and professional level. Field trip. Meets U.S. Diversity Requirement.

FS HN 464. Medical Nutrition and Disease II. (3-0) Cr. 3. S. Prereq: FS HN 360, FS HN 461; plus BIOL 256 and BIOL 256L or BIOL 306 or BIOL 335. (Dual-listed with NutrS 564) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

FS HN 467. Molecular Basis of Nutrition in Disease Prevention. (3-0) Cr. 3. S. Prereq: FS HN 360 or equivalent. Understanding the molecular basis for the role of diet in the development and prevention of common diseases such as diabetes, cancer, and vascular diseases. Translating this understanding into practical approaches for improving the health of individuals and populations.

FS HN 471. Food Processing I. (Dual-listed with FS HN 571). (2-3) Cr. 3. F. Prereq: FS HN 351 or A E 451 or CH E 357; MICRO 201 or MICRO 302; CHEM 263 or CHEM 177. Principles and applications of food processing by application of heat (blanching, pasteurization, canning, extrusion, evaporation and distillation, extrusion and dehydration) and by removal of heat (refrigeration and freezing). Emphasis on solving problems in laboratory and recitation sessions.

FS HN 472. Food Processing II. (Dual-listed with FS HN 572). (2-3) Cr. 3. S. Prereq: FS HN 351 or A E 451 or CH E 357. Principles and applications of food processing by biological (fermentation, enzymes) and nontraditional (high pressure, irradiation, pulsated electric field) preservation methods. Includes packaging, waste water treatment, and sanitation. Emphasis on solving problems in laboratory and recitation sessions.

FS HN 480. Professional Communication in Food Science and Human Nutrition. (1-0) Cr. 1. F.S. Prereq: FS HN 203, senior classification in the department. Presentation of current topics using written and oral communication to a lay audience. Emphasis on communication skills for the profession.

FS HN 489. Issues in Food Safety. (Cross-listed with AN S, HRL, VDPAM). (1-0) Cr. 1. S. Prereq: Credit or enrollment in FS HN 101 or FS HN 272 or HRL 233; FS HN 419 or FS HN 420; FS HN 403. Capstone seminar for the food safety minor. Case discussions and independent projects on safety issues in the food system from a multidisciplinary perspective.

FS HN 490. Independent Study. Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of instructor. Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.
FS HN 490A. Independent Study: Dietetics. 
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490B. Independent Study: Food Science. 
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490C. Independent Study: Nutrition. 
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490D. Independent Study: International Experience. 
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 491. Supervised Work Experience. 
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.S. Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491A. Supervised Work Experience: Dietetics. 
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.S. Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491B. Supervised Work Experience: Food Science. 
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.S. Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.S. Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491D. Supervised Work Experience: Culinary Science. 
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.S. Prereq: Advance approval of instructor and adviser
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

(1-3) Cr. 2. F. Prereq: senior classification or permission of instructor; FS HN 360
Students will develop and implement research projects with faculty supervision, based on knowledge gained from nutrition, biology and chemistry courses. Students will prepare a research proposal, conduct research and report results. Students will gain appreciation for independent research and experience creative and innovative aspects of nutrition research.

FS HN 493. Food Preparation Workshop. 
(1-3) Cr. 1-3.
Selected topics in food preparation including scientific principles, culture and culinary techniques. Variable format may include laboratory, recitation, and lecture. Offered on a satisfactory-fail basis only.

FS HN 495. Practicum. 
(1-3) Cr. 2. F. Prereq: Senior classification in Nutritional Science-Nutrition and Wellness option or permission of instructor; FS HN 366; credit or enrollment in FS HN 463.
Service-learning in community activities. Students will develop, implement and assess a project that engages groups in learning and practicing concepts related to nutrition and wellness.

FS HN 496. Food Science and Human Nutrition Travel Course. 
(Dual-listed with FS HN 596). Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
(One credit per week traveled and 1 credit for pre-departure class, if offered.) Limited enrollment. Tour and study of food industry, culinary science, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 496A. Food Science and Human Nutrition Travel Course: International Travel. 
(Dual-listed with FS HN 596A). Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 496B. Food Science and Human Nutrition Travel Course: Domestic Travel. 
(Dual-listed with FS HN 596B). Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 498. Cooperative Education. 
Cr. R. Repeatable, maximum of 2 times. F.S.S.S. Prereq: Permission of department chair.
Required for students completing professional work periods in a cooperative education program. Students must register prior to commencing each work period. Offered on a satisfactory-fail basis only.

FS HN 499. Undergraduate Research. 
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S. Prereq: Permission of staff member with whom student proposes to work
Research under staff guidance. A maximum of 6 credits of FS HN 499 may be used toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

FS HN 500. Short Course in Food Science. 
Cr. arr. F.S.S.S. Prereq: Permission of instructor

FS HN 506. Sensory Evaluation of Food. 
(Dual-listed with FS HN 406). (2-3) Cr. 3. F. Prereq: FS HN 214 or FS HN 311 or AN S 360; 3 credits in statistics
Sensory test methods and procedures used to evaluate the flavor, color and texture of foods. Relationships between sensory and instrumental measurements of color and texture. Acceptance and preference testing.

(Dual-listed with FS HN 407). (Cross-listed with MICRO). (3-0) Cr. 3. S. Prereq: MICRO 420
Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

FS HN 511. Principles of Food Science-Chemistry. 
(2-0) Cr. 2. S. Prereq: 3 credits in organic chemistry
Key principles and applications in the chemistry of food. This course is designed for graduate students with no previous food chemistry background.

FS HN 512. Food Product Development. 
(Dual-listed with FS HN 412). (1-6) Cr. 3. S. Prereq: FS HN 311 or FS HN 411, FS HN 471
Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, microbiology, and processing. Some pilot plant experiences. Electronic communication from web emphasized for class reports, notes and assignments.
FS HN 513. Principles of Food Science-Processing.
(2-0) Cr. 2. S. Prereq: 3 credits each in physics and mathematics.
Key principles and applications in the processing of food. This course is designed for graduate students with no previous food processing background.

FS HN 514. Principles of Food Science-Microbiology.
(2-0) Cr. 2-1. S. Prereq: 3 credits each in microbiology and organic chemistry
Key principles and applications in the microbiology of food. This course is designed for graduate students with no previous food microbiology background.

FS HN 515. Regulatory Toxicology.
(Cross-listed with TOX). (1-0) Cr. 1. Alt. F., offered even-numbered years. Prereq: BBMB 404 or FSHN 403
Survey of approaches used by toxicologists in government and industry for generating, enforcing and complying with laws and regulations. Examine policies from multiple regulatory agencies and how risk-based decisions are made. Perform simple risk assessments and suggest ways of dealing with data gaps. Explore new types of data used in risk assessments. Taught online only.

FS HN 519. Food Toxicology.
(Cross-listed with NUTRIS, TOX). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: A course in biochemistry
Basic principles of toxicology. Toxicants in the food supply; modes of action, toxicant defense systems, toxicant and nutrient interactions, risk assessment. Only one of FS HN 419 and FS HN 519 may count toward graduation.

FS HN 521. Microbiology of Food.
(2-0) Cr. 2. S. Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
This course deals with the identification, enumeration, and characterization of bacteria, yeasts, and mold associated with foods and food processing. Effects of physical and chemical agents on microorganisms will be studied. Microbiological problems in food spoilage, food preservation, food fermentation, and food-borne disease will be discussed. Offered online only.

FS HN 522. Advanced Food Microbiology and Biotechnology.
(2-0) Cr. 2. Alt. S., offered odd-numbered years. Prereq: Food microbiology, a course in biochemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
This course will cover basic principles in biotechnology and applied food microbiology, including current topics of interest in food biotechnology. Students will be introduced to recombinant DNA techniques and how they are applied to genetically modify microorganisms, the use of nucleic acids as tools of rapid detection of microorganisms in foods, basic enzyme immobilization and downstream processing techniques, and regulatory aspects of food biotechnology. Offered online only.

(2-0) Cr. 2. S. S.S. Prereq: A course in biology or chemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor. Multidisciplinary food safety and security perspectives provided by numerous subject matter experts. Topics include food safety policy, ag bioterrorism, border security, animal ID, food defense and site security, risk analysis, crisis communication, epidemiology, HACCP, and more. Offered online only.

FS HN 524. Food Microbiology.
(3-0) Cr. 3. F. Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Food Microbiology looks at the nature, physiology, and interactions of microorganisms in foods. The course is an introduction to food-borne diseases, the effect of food processing systems on the microflora of foods, principles of food preservation, food spoilage, and foods produced by microorganisms. Additionally, the course looks at food plant sanitation and criteria for establishing microbial standards for food products. Offered online only.

FS HN 525. Principles of HACCP.
(2-0) Cr. 2. S. Prereq: Undergraduate biology and chemistry courses; enrollment in GP-IDEA Food Safety and Defense Certificate or permission of instructor.
A comprehensive study of the Hazard Analysis and Critical Control Point System and its application in the food industry. Offered online only.

(2-0) Cr. 2. S. Prereq: Graduate standing; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Understanding of the various factors that impact safety of ethnic and imported ethnic foods; knowledge about the handling, preparation, processing and storage of ethnic and imported foods and food products; science-based characterization of representative ethnic foods. Offered online only.

FS HN 527. Microbiology of Fermented Foods.
(2-0) Cr. 2. SS. Prereq: Food microbiology; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Microbiology of fermented foods covers the physiology, biochemistry, and genetics of microorganisms important in food fermentations. The course looks at how microorganisms are used in fermentations and the effects of processing and manufacturing conditions on production of fermented foods. Offered online only.

(2-0) Cr. 2. F.S.S.S. Prereq: Enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
This course will provide students with an understanding of the principles required in a food defense program for a food manufacturing, warehousing or distribution center. The topics covered include: defining threats and aggressors; the Bioterrorism Act; food defense teams; vulnerability assessments; security programs; recall and traceability basics; security inspections; crisis management; emergency preparedness; and workplace violence. Offered online only.

FS HN 529. Foodborne Toxins.
(Cross-listed with TOX). (2-0) Cr. 2. F. Prereq: A course in biochemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Mechanisms of action, metabolism, sources, remediation/detoxification, risk assessment of major foodborne toxins of current interest, design of HAACP plans for use in food industries targeting foodborne toxins, discussion of toxins from a food defense perspective. Offered online only.

FS HN 542. Introduction to Molecular Biology Techniques.
(Cross-listed with B M S, EEOB, GDCB, HORT, NREM, NUTRIS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.S. Prereq: Graduate classification
Sessons in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

FS HN 542A. Introduction to Molecular Biology Techniques: DNA Techniques.
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRIS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.S. Prereq: Graduate classification
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRIS, V MPM, VDPAM). Cr. 1. Repeatable. F. Prereq: Graduate classification
Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

(Cross-listed with B M S, EEOB, GDCB, HORT, NREM, NUTRIS, V MPM, VDPAM). Cr. 1. Repeatable. S. Prereq: Graduate classification
Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transformants. Offered on a satisfactory-fail basis only.

(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRIS, V MPM, VDPAM). Cr. 1. Repeatable. F. Prereq: Graduate classification
Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

FS HN 542F. Introduction to Molecular Biology Techniques: Metabolomics.
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRIS, V MPM, VDPAM). Cr. 1. Repeatable. F. Prereq: Graduate classification
Includes metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

FS HN 542G. Introduction to Molecular Biology Techniques: Genomic.
(Cross-listed with B M S, EEOB, GDCB, HORT, NREM, NUTRIS, V MPM, VDPAM). Cr. 1. Repeatable. S. Prereq: Graduate classification
Offered on a satisfactory-fail basis only.

FS HN 546. Classroom Strategies for Nutrition Education.
(2-2) Cr. 3. S. Prereq: HD FS 340 or HD FS 343 or HD FS 344 or KIN 312 or KIN 375 or H S 275 or H S 375 or FCEDS 306
Overview of education theories used in nutrition education. Discussion and skill building exercises to integrate various models and strategies into a variety of pre-K through 12 classroom settings. Discussion of picky eating, role modeling, family meals, and primary prevention efforts relative to eating disorders including body image and cultural criticism. Distance only.
FS HN 554. Dietetic Internship I.
(0-22) Cr. 5. S.S.S.
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Experiences and activities designed to meet accreditation standards.

FS HN 555. Dietetic Internship II.
(0-18) Cr. 4. F.S. Prereq: Concurrent enrollment or successful completion of FS HN 554
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Experiences and activities designed to meet accreditation standards.

FS HN 556. Dietetic Internship III.
(0-22) Cr. 5. F.S.S. Prereq: Concurrent enrollment or successful completion of FS HN 554 and FS HN 555
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Experiences and activities designed to meet accreditation standards.

(Dual-listed with FS HN 466). (Cross-listed with DIET). (2-2) Cr. 3. F.S. Prereq: FS HN 361 and FS HN 362
Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.

FS HN 571. Food Processing I.
(Dual-listed with FS HN 471). (2-3) Cr. 3. F. Prereq: FS HN 351 or A E 451 or CH E 357; MICRO 201 or MICRO 302; CHEM 163 or CHEM 177.
Principles and applications of food processing by application of heat (blanching, pasteurization, canning, extrusion, evaporation and distillation, extrusion and dehydration) and by removal of heat (refrigeration and freezing). Emphasis on solving problems in laboratory and recitation sessions.

FS HN 572. Food Processing II.
(Dual-listed with FS HN 472). (2-3) Cr. 3. S. Prereq: FS HN 351 or A E 451 or CH E 357.
Principles and applications of food processing by biological fermentation, enzymes and nontraditional (high pressure, irradiation, pulsed electric field) preservation methods. Includes packaging, waste water treatment, and sanitation. Emphasis on solving problems in laboratory and recitation sessions.

FS HN 575. Processed Foods.
(3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: FS HN 214 or FS HN 311; a course in nutrition
This course will examine effect of industrial and domestic food processing on the nutrient content of food and risk of developing chronic disease.

FS HN 580. Orientation to Food Science and Nutrition Research.
(1-0) Cr. 1. F.
Orientation to and discussion of research interests in food science and nutrition. Discussion of policy and ethical issues in the conduct of research. Intended for entering students in FS HN and related disciplines. Offered on a satisfactory-fail basis only.

FS HN 581. Seminar.
(1-0) Cr. 1. S.
Discussion and practice of oral presentation of scientific data in a professional setting. Discussion of issues related to data presentation. Offered on a satisfactory-fail basis only.

FS HN 590. Special Topics.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S.

FS HN 590A. Special Topics: Nutrition.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S.

FS HN 590B. Special Topics: Food Science.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S.

FS HN 590C. Special Topics: Teaching.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.S.S.

FS HN 596. Food Science and Human Nutrition Travel Course.
Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 596A. Food Science and Human Nutrition Travel Course: International travel.
(Dual-listed with FS HN 496A). Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement.

FS HN 596B. Food Science and Human Nutrition Travel Course: Domestic travel.
(Dual-listed with FS HN 496B). Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 599. Creative Component.
Cr. arr.
Nonthesis option only.

Courses for graduate students:

FS HN 606. Instrumental Measurement of Food Quality.
(2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: FS HN 311 or FS HN 411 or FS HN 502 or BBMB 404
Principles of instrumental measurements of color, aroma, flavor, texture, and rheology. Techniques and instrumentation for measuring the quality of foods; relationship of these methods to food color, taste, flavor, texture, and rheological quality. Application of methods to various foods and biorenewable materials.

(Cross-listed with BRT). (2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: FS HN 311 or FS HN 411 or FS HN 502 or BBMB 404
Properties and applications of industrial enzymes important in food, feed, and bioprocessing, including biofuels and bioproducts. Characterization of enzyme catalytic mechanisms, kinetics, isolation, mutagenesis, and operating conditions, including evaluation of substrates, products, immobilization, enzyme inhibitors, pH, pressure, and temperature.

FS HN 612. Lipid Chemistry and Applications.
(3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: FS HN 311 or FS HN 411 or FS HN 502 or BBMB 404
Structure and analysis of lipids; glyceride structure; crystal form and texture; autoxidation and chemical modification; extraction, refining and processing; applications of fats and oils in food, biofuel and biobased products.

FS HN 613. Food Proteins.
(3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: FS HN 311 or FS HN 411 or FS HN 502 or BBMB 404
Properties of proteins found in milk, eggs, meat, legumes, and cereal grains. Effect of processing on food proteins.

(3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: FS HN 311 or FS HN 411 or FS HN 502 or BBMB 404
Study of chemical structures and physical properties of carbohydrates, applications of carbohydrates in foods and as biomaterial, and changes they undergo during processing and storage.

FS HN 626. Advanced Food Microbiology.
(Cross-listed with MICRO, TOX). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: FS HN 420 or FS HN 421 or FS HN 504
Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

FS HN 627. Rapid Methods in Food Microbiology.
(Cross-listed with MICRO, TOX). (2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: FS HN 420 or FS HN 421 or FS HN 504
Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and "next generation" testing formats now in development.

FS HN 681. Seminar.
(1-0) Cr. 1. F.S.S.S.
Presentation of thesis or dissertation research. May be taken once for M.S. program and twice for the Ph.D. program.
FS HN 690. Special Problems.
Cr. arr. Repeatable. F.S.S. Prereq: FS HN 502 or FS HN 503 or FS HN 504 or FS HN 553 or FS HN 554

FS HN 695. Grant Proposal Writing.
(Cross-listed with NUTRHS). (1-0) F. Prereq: 3 credits of graduate course work in food science and/or nutrition
Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Formation of grant writing teams in food science and/or nutrition. Offered on a satisfactory-fail basis only.

FS HN 699. Research in Food Science and Technology.
Cr. arr. Repeatable. F.S.S. Offered on a satisfactory-fail basis only.

Genetics - Undergraduate
Alan M. Myers, Chair, Genetics Major Committee
Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

Undergraduate Study
Undergraduate study in genetics is jointly administered by three departments: the Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available. A minor in genetics through the College of Agriculture and Life Sciences is also offered for students majoring in several areas of the life sciences.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, business, and genetic counseling.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, research-related activities in the biological sciences.

The respective communications and communication proficiency requirements of both colleges are met by an average of C or better in:

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors 3
- And one additional English writing course 3

The lowest grade acceptable in any of these courses is C. Students in the College of Agriculture and Life Sciences must also achieve a C or better in an oral communications course.

SP CM 212 Fundamentals of Public Speaking 3
or AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3

A grade of C– or better is required in all biological science courses within the major and a cumulative GPA of at least 2.0 is required for graduation.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, nursing, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements. (See Preprofessional Study.)

Graduate Study
Graduate study in genetics leading to the Master of Science and Doctor of Philosophy degrees is offered at ISU. Graduate study is organized as a separate interdepartmental graduate major from the undergraduate program. For more information on graduate study in genetics see: Genetics - Interdisciplinary.

Curriculum in Genetics - Requirements
In addition to basic degree requirements listed in the Curricula in Agriculture and Life Sciences, genetics majors must satisfy the following requirements:

1. BiOL 211 Principles of Biology I 3
   or BiOL 211L Principles of Biology Laboratory I 1
   or BiOL 212 Principles of Biology II 3
   or BiOL 212L Principles of Biology Laboratory II 1
   or BiOL 312 Ecology 4
   or BiOL 313 Principles of Genetics 3
   or BiOL 313L Genetics Laboratory 1
   or BiOL 314 Principles of Molecular Cell Biology 3
   or BiOL 315 Biological Evolution 3
   or MICRO 302 Biology of Microorganisms 3

2. GEN 110 Genetics Orientation 1
   or GEN 409 Molecular Genetics 3
   or GEN 410 Analytical Genetics 3
   or GEN 491 Undergraduate Seminar 1
   or GEN 462 Evolutionary Genetics 3
   or EEBO 563 Molecular Phylogenetics 3

3. Eleven credits of calculus and Statistics including at least one course in each.
4. Three years of chemistry and biochemistry.
5. Ten credits of general college physics.
6. Six additional credits of biological science support electives chosen from an approved list.

Minor - Genetics
The minor in genetics may be earned by completing:

- GEN 313 Principles of Genetics 3
- GEN 313L Genetics Laboratory 1
- BIOL 314 Principles of Molecular Cell Biology 3
- GEN 410 Analytical Genetics 3
- GEN 409 Molecular Genetics 3

And a minimum of two additional credits in Genetics at the 300 level or above. At least nine of these credits must be used only to fulfill the requirements of the minor.

A Genetics major may not double major or minor in Biology.

Curriculum in Genetics - Undergraduate Study
Undergraduate study in genetics is jointly administered by the Department of Biochemistry, Biophysics, and Molecular Biology, the Department of Genetics, Development, and Cell Biology, and the Department of Ecology, Evolution, and Organismal Biology.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication/Library: C or better required (except for LIB 160).

ENGL 150 Critical Thinking and Communication 3
ENGL 250  Written, Oral, Visual, and Electronic Composition  3  
LIB 160  Information Literacy  1  
SP CM 212  Fundamentals of Public Speaking  3  
or AGEDS 311  Presentation and Sales Strategies for Agricultural Audiences  

**Advanced English Writing:**
Choose 3 credits from the following:

- ENGL 302  Business Communication  3  
- ENGL 303  Free-Lance Writing for Popular Magazines  3  
- ENGL 304  Creative Writing: Fiction  3  
- ENGL 305  Creative Writing: Nonfiction  3  
- ENGL 306  Creative Writing: Poetry  3  
- ENGL 309  Report and Proposal Writing  3  
- ENGL 310  Rhetorical Analysis  3  
- ENGL 312  Biological Communication  3  
- ENGL 313  Rhetorical Website Design  3  
- ENGL 314  Technical Communication  3  
- ENGL 315  Creative Writing: Screenplays  3  
- ENGL 316  Creative Writing: Playwriting  3  
- JL MC 347  Science Communication  3  

**Humanities and Social Sciences: 6 crs**

- Humanities course  3  
- Social Science course  3  

**Ethics: 3 cr.**

3 cr. from approved list.

**Life Sciences: 6 cr.**

- BIOL 211  Principles of Biology I  3  
- Approved Life Sciences course  3  

**Mathematical Sciences: 11-12 cr.**

Complete at least one calculus course from MATH, minimum of 4 credits.

- MATH 160  Survey of Calculus  4  
- MATH 165  Calculus I  3  
- MATH 181  Calculus and Mathematical Modeling for the Life Sciences I  4  

Complete at least one course from STAT, minimum of 3 credits.

- STAT 101  Principles of Statistics  3  
- STAT 104  Introduction to Statistics  3  

Complete at least one additional course from MATH or STAT, minimum of 4 credits.

- MATH 166  Calculus II  4  
- MATH 182  Calculus and Mathematical Modeling for the Life Sciences II  4  
- STAT 401  Statistical Methods for Research Workers  3  

**Total Credits**  11-12  

**Supporting Sciences: 31-32 cr.**

- CHEM 177  General Chemistry I  4  
- CHEM 177L  Laboratory in General Chemistry I  1  
- CHEM 178  General Chemistry II  4  
- CHEM 178L  Laboratory in College Chemistry I  1  
- CHEM 331  Organic Chemistry I  3  
- CHEM 331L  Laboratory in Organic Chemistry I  1  
- CHEM 332  Organic Chemistry II  3  
- CHEM 332L  Laboratory in Organic Chemistry II  1  
- PHYS 111  General Physics  5  
- or PHYS 221  Introduction to Classical Physics I  5  
- PHYS 112  General Physics  5  
- or PHYS 222  Introduction to Classical Physics II  5  

Choose one of the following options:

**Option 1**

- BBMB 404  Biochemistry I  3  
- or PHYS 221  Introduction to Classical Physics I  5  
- or PHYS 222  Introduction to Classical Physics II  5  

**Option 2**

- BBMB 420  Physiological Chemistry  3  
- or CHEM 325  Chemical Thermodynamics  3  

**Total Credits**  33-34  

**Genetics and Life Sciences: 36 cr.**

C- grade minimum; Minimum 2.0 GPA

- GEN 110  Genetics Orientation  1  
- BIOL 211  Principles of Biology I  3  
- BIOL 211L  Principles of Biology Laboratory I  1  
- BIOL 212  Principles of Biology II  3  
- BIOL 212L  Principles of Biology Laboratory II  1  
- BIOL 312  Ecology  4  
- GEN 313  Principles of Genetics  3  
- GEN 313L  Genetics Laboratory  1  
- BIOL 314  Principles of Molecular Cell Biology  3  
- BIOL 315  Biological Evolution  3  
- GEN 409  Molecular Genetics  3  
- GEN 410  Analytical Genetics  3  
- GEN 491  Undergraduate Seminar  1  
- GEN 462  Evolutionary Genetics  3  
- or EEOB 563  Molecular Phylogenetics  3  
- MICRO 302  Biology of Microorganisms  3  

**Total Credits**  36  

**Advanced Sciences Electives: 6 cr.**

C- minimum grade; 6 cr. of advanced science electives from approved department list.

**Courses primarily for undergraduates:**

- GEN 110  Genetics Orientation.  
  (1-0) Cr. 1. F.  
  This course is intended for first year students and others new to the genetics major. Discussion of university policies and resources, requirements of the major, career opportunities, and other topics related to the first year experience.  
- GEN 298  Cooperative Education.  
  Cr. R. F.S.S. Prereq: Permission of department cooperative education coordinator; sophomore classification  
  Required of all cooperative education students. Students must register for this course prior to commencing each work period.  
- GEN 313  Principles of Genetics.  
  (Cross-listed with BIOL). (3-0) Cr. 3. F.S.SS. Prereq: BIOL 211, BIOL 211L, BIOL 212, and BIOL 212L  
  Introduction to the principles of transmission and molecular genetics of plants, animals, and bacteria. Recombination, structure and replication of DNA, gene expression, cloning, quantitative and population genetics. Students may receive graduation credit for no more than one of the following: Gen 260, Gen 313 and 313L, Gen 320, Biol 313 and 313L, and Agron 320.  
- GEN 313L  Genetics Laboratory.  
  (Cross-listed with BIOL). (0-3) Cr. 1. F.S. Prereq: Credit or enrollment in BIOL 313 Laboratory to accompany 313. Students may receive graduation credit for no more than one of the following: Biol 313 and 313L, Gen 260, Gen 313, Gen 320, and Agron 320.
GEN 320. Genetics, Agriculture and Biotechnology. (Cross-listed with AGRON). (3-0) Cr. 3; F.S. Prereq: BIOL 212
Transmission genetics with an emphasis on applications in agriculture, the structure and expression of the gene, how genes behave in populations and how recombinant DNA technology can be used to improve agriculture. Credit for graduation will not be allowed for more than one of the following: Gen 260, 313, 320 and Biol 313 and 313L.

GEN 340. Human Genetics. (3-0) Cr. 3. F.S.SS. Prereq: BIOL 313 or GEN 313
Fundamental concepts and current issues of human genetics. Human chromosome analysis, pedigree analysis, gene mapping, the human genome project, sex determination, genetics of the immune system, genetics of cancer, gene therapy, the genetic basis of human diversity, eugenics.

GEN 398. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department cooperative education coordinator; junior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

GEN 409. Molecular Genetics. (3-0) Cr. 3. F. Prereq: BIOL 313
The principles of molecular genetics; gene structure and function at the molecular level, including regulation of gene expression, genetic rearrangement, and the organization of genetic information in prokaryotes and eukaryotes.

GEN 410. Analytical Genetics. (3-0) Cr. 3. S. Prereq: GEN 409

GEN 444. Introduction to Bioinformatics. (Cross-listed with BCB, BCBIO, BIOL, COM S, CPR E). (4-0) Cr. 4. F. Prereq: MATH 165 or STAT 401 or equivalent
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics, systems biology.

GEN 462. Evolutionary Genetics. (Cross-listed with BIOL). (3-0) Cr. 3. F. Prereq: BIOL 315
The genetic basis of evolutionary processes in higher organisms. The role of genetic variation in adaptation, natural selection, adaptive processes, and the influence of random processes on evolutionary change.

GEN 490. Independent Study. Cr. 1-5. Repeatable, maximum of 9 credits. Prereq: GEN 313, junior or senior classification, permission of instructor
Independent study in any area of genetics. Students may use no more than 9 credits of university-wide 490 or 499 credits (including Gen 490H) toward the total of 120 credits required for graduation.

GEN 490S. Independent Study: Attendance and Critique of Genetics Seminars. Cr. 1. Repeatable, maximum of 9 credits. F.S.SS. Prereq: GEN 313, junior or senior classification, permission of instructor
Attendance and critique of departmental seminars in BBMB, GDCB, or EEOB. Offered on a satisfactory-fail basis only. Students may use no more than 9 credits of university-wide 490 or 499 credits (including Gen 490S) toward the total of 120 credits required for graduation.

GEN 490U. Independent Study: Laboratory teaching experience. Cr. 1-2. Repeatable, maximum of 9 credits. F.S.SS. Prereq: GEN 313, junior or senior classification, permission of instructor
For students registering to be undergraduate laboratory assistants. Offered on a satisfactory-fail basis only. Students may use no more than 9 credits of university-wide 490 or 499 credits (including Gen 490U) toward the total of 120 credits required for graduation.

GEN 491. Undergraduate Seminar. (1-0) Cr. 1. F. S.S. Prereq: Gen 409
Communication within the discipline based on comprehension, discussion, presentation, and critical evaluation of original research literature; survey of career paths within the genetics disciplines and approaches to obtaining positions; exposure to research publication and grantsmanship processes; ethical issues in genetics research; outcomes assessment activities.

GEN 498. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department cooperative education coordinator; senior classification
Required of all cooperative education students. Students must register for this course prior to commencing each work period.

GEN 499. Genetics research. Cr. 1-5. Repeatable, maximum of 9 credits. Prereq: GEN 313, junior or senior classification, permission of instructor
Independent research in any area of genetics. Students may use no more than 9 credits of university-wide 490 or 499 credits (including Gen 490R) toward the total of 120 credits required for graduation.

GEN 499H. Genetics research for Honors. Cr. 1-5. Repeatable, F.S.SS. Prereq: GEN 313, junior or senior classification, permission of instructor
Independent research in any area of genetics; for Honors students only. Students may use no more than 9 credits of university-wide 490 or 499 credits (including Gen 490H) toward the total of 120 credits required for graduation.

Global Resource Systems

Global Resource Systems is an interdisciplinary, College of Agriculture and Life Sciences major that prepares students to make a difference in the world. The major emphasizes global engagement while equipping students with a strong technical competency in a resource area of their choice. The interdisciplinary program prepares students to work on complex global resource issues through leadership positions in global businesses, governmental agencies engaged in international trade and development, non-governmental organizations and globally engaged foundations, educational institutions, and volunteer organizations. It produces systemic thinkers and problem solvers with a global perspective who are trained in resource issues and able to lead teams representing high levels of cultural diversity. Students interested in this major are encouraged to contact the Faculty Coordinator at globe@iastate.edu.

Undergraduate Study

The Global Resource Systems undergraduate major employs a truly interdisciplinary and systematic approach to understanding complex global resource issues. Students develop a core set of technical competencies in a resource area selected from among the majors, minors and certificates offered by the College of Agriculture and Life Sciences. Students choose a world region in which to specialize, develop competency in a relevant world language, and participate in a significant cross-cultural immersion experience. They carry out a senior project related to their resource specialization within the context of the world region.

Multidisciplinary themes are developed in the context of the physical, biological and sociological factors affecting global resource systems. In this context, resource systems include agricultural (including crops, livestock and aquaculture), food, fuel, natural, environmental, biological, financial, governmental, institutional, human, knowledge, and other resources. Graduates of this program have transnational leadership skills and are successful integrators of various specializations on a team. They are skilled in applying a systemic perspective and developing solutions to complex global resource systems problems using innovativeness and creativity. Future professionals communicate effectively and demonstrate environmental awareness, exhibit an ethical perspective, and display clear analysis of how cultural diversity impacts work both here and abroad. They also recognize opportunities for learning after graduation.

A degree in Global Resource Systems opens the door to employment opportunities in the many businesses and organizations that require globally competent employees.

Curriculum in Global Resource Systems

Administered by a supervisory committee in the College of Agriculture and Life Sciences. Students choose a region of the world to develop an expertise; they choose a language to learn and develop proficiency through the intermediate level; they choose and possess an area of technical expertise by completing a minor or certificate program in the College of Agriculture and Life Sciences; they complete a required internship in an international setting; and they select and complete a senior research project with faculty mentoring.

Total Degree Requirement: 129 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.
### International Perspective: 3 cr.
### U.S. Diversity: 3 cr.
### Communications Proficiency:
- English composition: 6 cr.
- Speech fundamentals: 3 cr.
### Communication/Library: 13 cr.
- ENGL 150: Critical Thinking and Communication (3 cr.)
- ENGL 250: Written, Oral, Visual, and Electronic Composition (3 cr.)
- SP CM 212: Fundamentals of Public Speaking (3 cr.)
- or AGEDS 311: Presentation and Sales Strategies for Agricultural Audiences (3 cr.)
- or ENGL 302: Business Communication (3 cr.)
- or ENGL 309: Report and Proposal Writing (3 cr.)
- or ENGL 314: Technical Communication (3 cr.)
- LIB 160: Information Literacy (1 cr.)
- Total Credits 13 cr.
### Humanities and Social Sciences: 6 cr.
- ECON 101: Principles of Microeconomics (3 cr.)
- or ECON 102: Principles of Macroeconomics (3 cr.)
- Plus three credit hours from approved humanities list (3 cr.)
- Total Credits 6 cr.
### Ethics: 3 cr.
- 3 cr. from approved list.
### Life Sciences: 7 cr.
- BIOL 211: Principles of Biology I & 211L and Principles of Biology Laboratory I (4 cr.)
- Plus 3 cr. from approved life sciences list at 300-level or higher (3 cr.)
- Total Credits 7 cr.
### Mathematical Sciences: 6 cr.
- MATH 140: College Algebra (or higher) (3 cr.)
- or STAT 101: Principles of Statistics (3-4 cr.)
- or STAT 104: Introduction to Statistics (3 cr.)
- Total Credits 6-7 cr.
### Global Competency 15-31 cr.
16 cr. of 100 and 200 level of a single WLC language and 15 cr. in global competency courses from an approved list; up to 3 cr. may be earned from a travel course.
### Physical Sciences: 8 cr.
One of the following:
- CHEM 163: College Chemistry and Laboratory in College Chemistry (3 cr.)
- or CHEM 177: General Chemistry I and Laboratory in General Chemistry I (5 cr.)
- One course from the following:
  - AGRON 154: Fundamentals of Soil Science (3 cr.)
  - or AGRON 155: Soils for Horticultural Scientists (3 cr.)
  - AGRON 206: Introduction to Weather and Climate (3 cr.)
  - AGRON 260: Soils and Environmental Quality (3 cr.)
  - AGRON 406: World Climates (3 cr.)
  - GEOL 101: Environmental Geology: Earth in Crisis (3 cr.)
  - GEOL 160: Water Resources of the World (3 cr.)
- Total Credits 8 cr.
### Global Resource Systems: 23 cr.
- GLOBE 110: Orientation (1 cr.)
- GLOBE 201: Global Resource Systems (3 cr.)
- 3 credits:
- GLOBE 211: Issues in Global Resource Systems (1 cr.)
- GLOBE 301: Resource Systems of Industrialized Nations (3 cr.)
- GLOBE 302: Resource Systems of Developing Nations (3 cr.)
- GLOBE 320: Global Resource Systems Internship Preparation (1 cr.)
- GLOBE 401: Senior Project (3 cr.)
- GLOBE 402: Responses to Global Resource System Challenges (3 cr.)
- One of the following:
  - GLOBE 321: Internship - Global (3-6 cr.)
  - GLOBE 322: Internship - United States (3-6 cr.)
- Total Credits 22-25 cr.
### Technical Concentration: 15-18 cr.
Satisfied by any of the College of Agriculture and Life Sciences minors or a certificate offered in the College of Agriculture and Life Sciences.
### Courses primarily for undergraduates:
- **GLOBE 110**: Orientation.
  - (1-0) Cr. 1. F.
- **GLOBE 201**: Global Resource Systems.
  - (3-0) Cr. 3. S.
- A comparative analysis of global resources and the various natural and human systems affecting those resources.
- **GLOBE 211**: Issues in Global Resource Systems.
  - (1-0) Cr. 1. Repeatable, maximum of 3 credits. F.S. Prereq: credit or enrollment in GLOBE 201
- Discussion of topics of current importance in global resource systems. Offered on a satisfactory-fail basis only. A maximum of 3 credits of 211 may be used towards degree requirements.
- **GLOBE 220**: Globalization and Sustainability.
  - (Cross-listed with ANTH, ENV, M E, M A T, S O C, T S C) (3-0) Cr. 3. F.S.
  - An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department.
  - Meets International Perspectives Requirement.
- **GLOBE 221**: Apprenticeship.
  - Cr. R. Repeatable. F.S.S.S. Prereq: Approval by the Global Resource Systems Faculty Coordinator
  - Practical work experience in approved domestic or international settings such as with a company, research laboratory, governmental agency or non-governmental organization. Offered on a satisfactory-fail basis only.
- **GLOBE 290**: Independent Study.
  - Cr. 1-2. Repeatable. F.S.S.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
  - Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for freshmen and sophomores.
- **GLOBE 290H**: Independent Study, Honors.
  - Cr. 1-2. Repeatable. F.S.S.S. Prereq: Permission of the instructor and approval by the Global Resource Systems Faculty Coordinator
  - Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for freshmen and sophomores.
- **GLOBE 301**: Resource Systems of Industrialized Nations.
  - (2-2) Cr. 3. S. Prereq: GLOBE 201, ECON 101 or ECON 102
  - In-depth analysis of the opportunities, constraints and consequences of the resource systems common in industrialized nations. Topics integrate natural resources with land tenure, societal structure, food security, agriculture, shelter, energy and wealth dynamics.
  - (2-2) Cr. 3. F. Prereq: GLOBE 201, ECON 101 or ECON 102
  - In depth appraisal of resource systems common throughout the developing world. Topics integrate natural resources with land tenure, societal structure including gender issues, food security, agriculture, shelter, energy and wealth dynamics and effectiveness of global programs aimed at sustainable development.
GLOBE 300. Global Resource Systems Internship Preparation. (1-0) Cr. 1. S. Prereq: Permission of instructor.
Students enrolled in this course intend to enroll in Globe 321 or 322 in the following term. Topics provide a pre-departure orientation, including logistical, academic, and personal requirements for completion of an experiential supervised work experience.

GLOBE 321. Internship - Global. Cr. 3-6. Repeatable. F.S.SS. Prereq: Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator.
A supervised learning experience including an analysis of an international location’s resource system via immersion in a foreign culture lasting at least five weeks. The experience should focus on the region consistent with the student’s degree track. Course expenses paid by student. A maximum of 12 credits of Globe 321 and 322 may be used for degree requirements.

GLOBE 322. Internship - United States. Cr. 3-6. Repeatable. F.S.SS. Prereq: Junior or Senior and enrollment in Global Resource Systems major; permission of the instructor and approval by the Global Resource Systems Faculty Coordinator.
A supervised learning experience including an analysis of a domestic location’s resource system via immersion in a different culture within the United States lasting at least five weeks. Designed for international students and for students who are not in a position to leave the United States. Course expenses paid by student. A maximum of 12 credits of Globe 321 and 322 may be used for degree requirements.

GLOBE 385. Economic Development. (Cross-listed with ECON; 3-0) Cr. 3. Prereq: ECON 101, ECON 102 or permission of instructor.
Current problems of developing countries, theories of economic development, agriculture, and economic development, measurement and prediction of economic performance of developing countries, alternative policies and reforms required for satisfying basic needs of Third World countries, interrelationships between industrialized countries and the developing countries, including foreign aid. Meets International Perspectives Requirement.

GLOBE 401. Senior Project. Cr. 3. F.S. Prereq: Senior classification in Global Resource Systems.
Research project in collaboration with faculty that complements and furthers a student’s experiences from Globe 321 and 322 while simultaneously bringing into focus entire four-year experience. Student will write a research report and make either an oral or poster presentation.

Research project in collaboration with faculty that complements and furthers a student’s experiences from Globe 321 and 322 while simultaneously bringing into focus entire four-year experience. Student will write a research report and make either an oral or poster presentation.

GLOBE 402. Responses to Global Resource System Challenges. (1-4) Cr. 3-5. S. Capstone analysis of critical challenges facing global resources and, especially, identification of alternative solutions. Interdisciplinary investigations of interconnections among resource issues. Students will investigate specific challenges at a regional scale and prepare a written report proposing solutions.

GLOBE 446. International Issues and Challenges in Sustainable Development. (Cross-listed with AGRON, INTST). Cr. 4. S. Prereq: 3-credit biology course, Sophomore or higher classification, permission of Instructor.
Interdisciplinary study and analysis of agricultural, biophysical, environmental, sociological, economical, political, and historical factors affecting sustainable development of communities and countries from art and science perspectives. International field experience with foreign language training required. A program fee is charged to students for international study abroad. Meets International Perspectives Requirement.

Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 9 credits of all (university-wide) 490 courses may be used for degree requirements.

Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 9 credits of all (university-wide) 490 courses may be used for degree requirements.

Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 9 credits of all (university-wide) 490 courses may be used for degree requirements.

Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 9 credits of all (university-wide) 490 courses may be used for degree requirements.

Independent study on topics of special interest to the student. Comprehensive report required. Intended primarily for juniors and seniors. A maximum of 9 credits of all (university-wide) 490 courses may be used for degree requirements.

Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling a professional ethics and accomplishing student learning goals. Course expenses paid by student.

Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling a professional ethics and accomplishing student learning goals. Course expenses paid by student.

GLOBE 494B. Service Learning: Domestic. Cr. arr. Repeatable, maximum of 12 credits. F.S.SS. Prereq: Permission of instructor.
Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling a professional ethics and accomplishing student learning goals. Course expenses paid by student.

GLOBE 495. Global Resource Systems Study Abroad Course Preparation. (1-0) Cr. 1. Repeatable. F.S. Prereq: Permission of instructor.
Global resource systems topics will include the agricultural industries, climate, crops, culture, economics, food, geography, government, history, livestock, marketing, natural resources, public policies, soils, and preparation for travel to locations to be visited. Students enrolled in this course intend to register for Globe 496 or 497 the following term.

Extended field trips abroad to study global resource systems. Location and duration of trips will vary. Pre-trips sessions arranged through Globe 495. Trip expenses paid by student.

An integrated agricultural and food production and policy program that allows students to assess, analyze and evaluate complex, country-specific situations and to develop their skills, knowledge and abilities via team-oriented projects that involve complex issues such as development of effective foreign food aid and agricultural and food production systems, drivers of world hunger, sustainable resource management and efficacy of policy, and the role of the USA and the United Nations and other development agencies in these systems. International location and duration of program will vary. Pre-trips sessions arranged through Globe 495. Trip expenses paid by students.

GLOBE 499. Undergraduate Research. Cr. arr. F.S. Prereq: Permission of instructor and approval by the Global Resource Systems Faculty Coordinator.
Research projects in collaboration with faculty.

Horticulture Undergraduate Study
To meet the educational needs of a student population with interests ranging from landscape design/installation to fruit and vegetable production to golf course construction and management, considerable flexibility is built into the horticulture curriculum. The diversity of interests and need for flexibility are reflected in the impressive array of horticulture courses.
The Department of Horticulture offers six options within the horticulture major:
1. Landscape Design, Installation, and Management
2. Horticulture Food Crop Production and Management
3. Ornamental Plant Production and Garden Center Management
4. Public Horticulture
5. Science
6. Turfgrass Management

Graduates possess the technical knowledge and skills to become professional horticulturists. They understand principles of life science, plant growth and development, and are familiar with cultural and management principles for a wide assortment of horticultural crops. They are able to work and communicate effectively with fellow horticultural professionals and other citizens who share an interest in horticulture. Graduates also understand the ethical and environmental dimensions of problems and issues facing horticultural professionals.

A degree in horticulture opens the door to employment opportunities with production nurseries, seed companies, interior landscaping firms, greenhouses, garden centers, conservatories, landscape design/installation firms, public gardens and arboreta, orchards and vineyards, food processing companies, vegetable farms, golf courses, sports fields, sod production companies, and lawn care businesses. Several allied plant-science industries also provide employment opportunities in the areas of sales, management, and communication. Opportunities exist for careers in research, teaching, extension, and business after obtaining advanced training in graduate school.

Minor

The Department of Horticulture offers two minors: 1) Horticulture and 2) Landscape Management. The Minor in Horticulture is a broad-based minor that does not focus within a specific area of horticulture. The Landscape Management minor focuses on landscape management including plant selection, landscape installation and management, and turfgrass management. Both minors are earned by taking HORT 221 Principles of Horticulture Science plus 12 additional credits with a maximum of 3 credits at the 200-level and a minimum of 9 credits at the 300-level or above.

Visit our departmental website at www.hort.iastate.edu.

Graduate Study

The graduate major in horticulture leads to the M.S. (thesis required) and Ph.D. A nonthesis master’s degree is offered through the master of agriculture program. Some faculty members of the department serve as major professors for students in interdepartmental graduate majors in plant biology; genetics; molecular, cellular, and developmental biology; ecology and evolutionary biology; sustainable agriculture; and environmental science.

Graduates possess a broad understanding of horticulture and the allied plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and other interested citizens. They are experienced in conducting research and communicating the results from that research. They are capable of addressing and solving complex problems that confront the many horticultural, agricultural, and plant science professions. They also understand the ethical, legal, social, and environmental issues associated with modern agricultural/horticultural practices.

Curriculum in Horticulture

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Specialization Options.

A horticulture minor is available. The requirements appear under Horticulture, Courses and Programs.

Total Degree Requirement: 129 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

3 cr. from approved list

U.S. Diversity: 3 cr.

3 cr. from approved list

Communications Proficiency (with a C or better): 9 cr.

English composition
Speech fundamentals

Total Credits

Communication/Library: 13 cr.
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
One of the following: 3
SP CM 212 Fundamentals of Public Speaking
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences
COMST 214 Professional Communication
ENGL 302 Business Communication or ENGL 314 Technical Communication
LIB 160 Information Literacy 1
Total Credits 13

Humanities and Social Sciences: 6 cr.
Approved Humanities course 3
Approved Social Science course 3
Total Credits 6

Ethics: 3 cr.
3 cr. from approved list

Life Sciences: 6 cr.
BIOL 211 Principles of Biology I 3
Approved Life Sciences course 3
Total Credits 6

Mathematical Sciences: 6 cr.
Select one course from the following: 3
MATH 140 College Algebra
MATH 150 Discrete Mathematics for Business and Social Sciences
MATH 165 Calculus I
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
AND select one of the following: 3
STAT 101 Principles of Statistics
STAT 104 Introduction to Statistics
STAT 226 Introduction to Business Statistics I
STAT 401 Statistical Methods for Research Workers
Total Credits 6

Physical Sciences: Minimum of 10 cr.
Select one complete course from the following: 3-5
CHEM 163 College Chemistry
& 163L and Laboratory in College Chemistry
CHEM 177 General Chemistry I
& 177L and Laboratory in General Chemistry I
AND one complete course from the following: 3-5
CHEM 178 General Chemistry II
& 178L and Laboratory in College Chemistry II
Agron 259X - Organic Compounds in Plant and Soil Environments 3
PHYS 111 General Physics 5
PHYS 115 Physics for the Life Sciences 3-4
or PHYS 101 Physics for the Nonscientist
And ONE complete course from the following group: 4
CHEM 231 Elementary Organic Chemistry
& 231L and Laboratory in Elementary Organic Chemistry
CHEM 331 Organic Chemistry I
& 331L and Laboratory in Organic Chemistry I
BMBB 221 Structure and Reactions in Biochemical Processes
Total Credits 10-14

Biological Sciences: 18 cr.
BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
Select fourteen credit hours from the following: 11

- COM S 107  Applied Computer Programming
- or COM S 207  Fundamentals of Computer Programming
- GEN 410  Analytical Genetics

Ornamental Plant Production and Garden Center Management

The following core courses must be taken to meet Horticulture requirements:
- HORT 240  Trees, Shrubs, and Woody Vines for Landscaping 3
- HORT 322  Plant Propagation 3
- HORT 330  Herbaceous Ornamental Plants 3
- HORT 332  Greenhouse Operation and Management 4
- HORT 342  Landscape Plant Installation, Establishment, and Maintenance 2

Additional required Greenhouse Specialization courses:
- HORT 422  Postharvest Technology

Additional required Greenhouse Specialization courses:
- HORT 341  Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs
- HORT 442  Nursery Production and Garden Center Management

Required for option:
- HORT 330  Herbaceous Ornamental Plants

And select nine credit hours from the following:
- HORT 240  Trees, Shrubs, and Woody Vines for Landscaping 3
- HORT 322  Plant Propagation 3
- HORT 330  Herbaceous Ornamental Plants 3
- HORT 332  Greenhouse Operation and Management 4
- HORT 342  Landscape Plant Installation, Establishment, and Maintenance 2

Turfgrass Management option

The following courses are required to meet the Horticulture requirement:
- HORT 240  Trees, Shrubs, and Woody Vines for Landscaping 3
- HORT 351  Turfgrass Establishment and Management 3
- HORT 351L  Turfgrass Establishment and Management Laboratory 1
- HORT 451  Professional Turfgrass Management 2
- HORT 452  Integrated Management of Diseases and Insect Pests of Turfgrasses 3
- HORT 453  Sports Turf Management 3
- HORT 454  Turf & Landscape Irrigation 3
- HORT 551  Growth and Development of Perennial Grasses 2

Other recommended course is:
- HORT 330  Herbaceous Ornamental Plants

Required for option:
- HORT 340  Principles of Marketing
- HORT 442  Nursery Production and Garden Center Management

And select nine credit hours from the following:
- HORT 240  Trees, Shrubs, and Woody Vines for Landscaping 3
- HORT 322  Plant Propagation 3
- HORT 330  Herbaceous Ornamental Plants 3
- HORT 332  Greenhouse Operation and Management 4
- HORT 342  Landscape Plant Installation, Establishment, and Maintenance 2

Additional required Greenhouse Specialization courses:
- HORT 422  Postharvest Technology

Additional required Greenhouse Specialization courses:
- ENV S 324  Soil and Water Conservation Management
- ENV S 201  Principles of Injury Prevention
MGMT 370 Management of Organizations
MGMT 371 Organizational Behavior
PL P 391 Practical Plant Health
TSM 270 Principles of Injury Prevention
TSM 324 Soil and Water Conservation Management

**Landscape Design, Installation and Management option**

The following courses are required to meet the Horticulture requirement:

- **HORT 240** Trees, Shrubs, and Woody Vines for Landscaping (3)
- **HORT 281** Landscape Graphics (2)
- **HORT 330** Herbaceous Ornamental Plants (3)
- **HORT 341** Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs (2)
- **HORT 342** Landscape Plant Installation, Establishment, and Maintenance (3)
- **HORT 351** Turfgrass Establishment and Management (3)
- **HORT 381** Principles of Garden Composition (2)
- **HORT 381** Beginning Garden Composition Studio (2)
- **HORT 444** Landscape Construction Management (3)
- **HORT 481** Advanced Garden Composition (2)

Other recommended courses are:

- **HORT 322** Plant Propagation
- **HORT 332** Greenhouse Operation and Management

**Required for option:**

- **ACCT 284** Financial Accounting (3)
- **ACCT 215** Legal Environment of Business (4)
- **ACCT 285** Managerial Accounting (3)
- **ACCT 316** Business Law (3)
- **COM S 103** Computer Applications (3)
- **ECON 234** Small Business Management (3)
- **ECON 334** Entrepreneurship in Agriculture
- **MGMT 310** Entrepreneurship and Innovation
- **MGMT 313** Feasibility Analysis and Business Planning
- **MGMT 370** Management of Organizations
- **MGMT 371** Organizational Behavior
- **MKT 340** Principles of Marketing
- **MKT 343** Personal Sales
- **MKT 442** Sales Management
- **MKT 447** Consumer Behavior
- **TSM 324** Soil and Water Conservation Management

**Courses primarily for undergraduates:**

- **HORT 110. Professional and Educational Development in Horticulture.** (1-0) Cr. 1. F. Intended for first-year students and others new to the horticulture curriculum. Introduction to professional and educational development within horticulture. Focus is on university and career acclimation.

- **HORT 112. Orientation to Learning and Productive Team Membership.** (Cross-listed with AER E, CON E, FS HN, NREM). (2-0) Cr. 2. F. Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

- **HORT 114. Developing Responsible Learners and Effective Leaders.** (Cross-listed with CON E, FS HN, NREM). (2-0) Cr. 2. S. Prereq: Hort 112 or NREM 112 Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

- **HORT 121. Home Horticulture.** (2-0) Cr. 2. F.S. Growing plants in and around the home including requirements for growing house plants; plant propagation; designing and maintaining flower, fruit, and vegetable gardens; lawn, tree, and shrub maintenance.

- **HORT 122. Hands-On Home Horticulture.** (1-0) Cr. 1. F.S. Demonstration and activities that illustrate principles of growing plants for the home garden. Topics include plant identification, propagation, selection, and management for indoor and outdoor gardens.

- **HORT 131. Floral Design.** (0-2) Cr. 1. S. Introduces basic geometric design of fresh arrangements, corsages, and holiday arrangements. Includes use of tools and supplies.

- **HORT 193. Topics in Horticulture.** Cr. arr. Repeatable. F.S.SS. Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

- **HORT 193A. Topics in Horticulture: Greenhouse Crops.** Cr. arr. Repeatable. F.S.SS. Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

- **HORT 193B. Topics in Horticulture: Nursery Crops.** Cr. arr. Repeatable. F.S.SS. Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

- **HORT 193C. Topics in Horticulture: Turfgrass.** Cr. arr. Repeatable. F.S.SS. Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

- **HORT 193D. Topics in Horticulture: Fruit Crops.** Cr. arr. Repeatable. F.S.SS. Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

- **HORT 193E. Topics in Horticulture: Vegetable Crops.** Cr. arr. Repeatable. F.S.SS. Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

- **HORT 193F. Topics in Horticulture: Cross-Commodity.** Cr. arr. Repeatable. F.S.SS. Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

- **HORT 193G. Topics in Horticulture: Landscape Horticulture.** Cr. arr. Repeatable. F.S.SS. Practical courses in the field of horticulture. A maximum of 6 credits of Hort 193 may be used toward the total of 128 credits required for graduation.

- **HORT 211. Principles of Horticulture Science.** (2-2) Cr. 3. F.S. Prereq: Biol 211 or concurrent enrollment Biological principles of growing horticultural crops including anatomy, reproduction, light, temperature, water, nutrition, and growth and development. Laboratory exercises emphasize environmental factors and permit detailed observation of plant growth.

- **HORT 225. Spanish for Horticulture.** (3-0) Cr. 3. S. This course provides an introduction to basic conversation and communication skills in Spanish, and cross-cultural skills for working with Spanish speakers in the Horticulture industry, emphasizing the use of vocabulary and expressions common in the workplace.
(3-0) Cr. 3. F.
Identification of trees, shrubs, and woody vines. Factors influencing the horticultural use of woody plants. Field trips outside of regular class time may be required.

HORT 276. Understanding Grape and Wine Science.
(3-0) Cr. 3. S. Prereq: High school biology and chemistry.
A scientific introduction to viticulture (grape-growing) and enology (wine-making). Topics include grape species and varieties, viticulture practices, fruit quality, geography, history, principles of fermentation and aging, wine classification, appreciation, evaluation, storage and service, regulations, wine as food. No wine tasting.

HORT 281. Landscape Graphics.
(0-4) Cr. 2. F.
Introduction to computer and hand rendering techniques of landscape graphics. Students will gain proficiency in plan view and elevation graphics. Intensive studio and computer based instruction.

(2-3) Cr. 3. Alt. S., offered even-numbered years.
Planning, developing, and implementing science-based educational programs in a garden setting. Through hands-on experiences students will learn about horticulture, learning theory, and the application of science principles as they pertain to educating youth.

HORT 283. Pesticide Application Certification.
(Cross-listed with AGRON, ENT, FOR). (2-0) Cr. 2. S.
Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

HORT 321. Horticulture Physiology.
(3-0) Cr. 3. F. Prereq: HORT 221 or BIOL 211
Principles of plant physiology relating to growth and development of horticultural plants including plant water relations, membrane transport, photosynthesis, photomorphogenesis, respiration, and phytohormones. Emphasis on plant’s responses to environmental factors (temperature, water, and light) including cellular and whole-plant physiology under stressful environments.

(2-2) Cr. 3. S. Prereq: HORT 221 or BIOL 211
Fundamental principles underlying sexual and asexual propagation of plants; practice in reproducing plants by use of seeds, leaves, stems, and roots.

HORT 330. Herbaceous Ornamental Plants.
(2-2) Cr. 3. F. Prereq: HORT 221 or by permission of instructor.
Identification, botanical characteristics, origins, propagation, uses and general culture of herbaceous annual and perennial plants for Midwestern gardens and landscapes.

HORT 332. Greenhouse Operation and Management.
(3-3) Cr. 4. S. Prereq: HORT 221
Operation and management of greenhouses and other controlled environment agriculture structures. Methods of monitoring and manipulating environmental, cultural, and management factors such as light, temperature, fertility, substrate, etc., to maximize production efficiency. Emphasis placed on the production of ornamental and food crops. Greenhouse design and specification project required. Field trips outside scheduled class time required.

HORT 338. Seed Science and Technology.
(Cross-listed with AGRON). (2-3) Cr. 3. F. Prereq: AGRON 114 or HORT 221, BIOL 211
Seed production, maturation, dormancy, vigor, deterioration, and related aspects of enhancement, conditioning, storage, and quality evaluation. Aspects of the seed industry and regulation of seed marketing.

(2-0) Cr. 2. S. Prereq: HORT 240 or LA 221 or LA 222
Cultivars of the most prevalent and economically important woody landscape plants will be taught. The importance of cultivars to the nursery and landscaping professions and suggestions for their proper usage will be discussed.

HORT 342. Landscape Plant Installation, Establishment, and Maintenance.
(2-3) Cr. 3. F. Prereq: HORT 240 or LA 221 or LA 222
Principles and practices involved with establishment and maintenance of managed landscapes. Laboratory work involves site evaluation, installation techniques, postplant care, and maintenance of established landscape plants.

HORT 351. Turfgrass Establishment and Management.
(Cross-listed with AGRON). (3-0) Cr. 3. F. Prereq: HORT 221 or AGRON 114 or BIOL 211
Principles and practices of turfgrass propagation, establishment, and management. Specialized practices relative to professional lawn care, golf courses, athletic fields, highway roadways, and seed and sod production. The biology and control of turfgrass pests.

HORT 351L. Turfgrass Establishment and Management Laboratory.
(Cross-listed with AGRON). (0-3) Cr. 1. F. Prereq: Credit or enrollment in HORT 351
Those enrolled in the horticulture curriculum are required to take 351L in conjunction with 351 except by permission of the instructor.

HORT 354. Soils and Plant Growth.
(Cross-listed with AGRON). (3-0) Cr. 3. F.S. Prereq: AGRON 154 and BIOL 101 or BIOL 211
Effects of chemical, physical, and biological properties of soils on plant growth, with emphasis on nutritive elements, pH, organic matter maintenance, and rooting development.

HORT 354L. Soils and Plant Growth Laboratory.
(Cross-listed with AGRON). (0-3) Cr. 1. F.S. Prereq: AGRON or Hort major with credit or enrollment in AGRON 354
Laboratory exercises in soil testing that assess a soil’s ability to support nutritive requirements for plant growth.

(2-0) Cr. 2. S. Prereq: HORT 240
Functional and aesthetic aspects of landscape planning as a basis for design decisions; emphasis on spatial design and plant selection. Includes site analysis, development process, and design principles.

HORT 381. Beginning Garden Composition Studio.
(0-4) Cr. 2. S. Prereq: HORT 240, HORT 330, concurrent enrollment in HORT 380
Introduction to landscape design process. Intensive studio-based projects implementing principles of landscape design, concept development, and graphic communication. Not available as credit for L A majors.

HORT 391. Horticultural Management Experience.
Cr. 1. Repeatable. F.S.SS. Prereq: HORT 221 or permission of instructor
A structured work experience for the student to gain insight into management operations associated with production and management of horticultural crops. A report of 10 or more pages describing the student’s experience is required. One credit is given for each term the student is enrolled in the course. A maximum of two credits may be used toward the horticultural sciences course requirements, and two additional credits may be used toward the 128 credits required for graduation.

HORT 398. Cooperative Education.
Cr. R. Repeatable. F.S.SS. Prereq: Permission of department resource and career center coordinator
Students must register for this course before commencing each work period.

HORT 421. Introduction to Plant Breeding.
(Cross-listed with AGRON). (3-0) Cr. 3. F. Prereq: GEN 320 or BIOL 313
Breeding methods used in the genetic improvement of self-pollinated, cross-pollinated and asexually reproducing agronomic and horticultural crops. Applications of biotechnology techniques in the development of improved cultivars.

HORT 422. Postharvest Technology.
(3-3) Cr. 4. Alt. F., offered even-numbered years. Prereq: HORT 221 and junior or senior classification
Principles, methods, and techniques related to postharvest maintenance of quality of horticultural commodities. Emphasis on the effects of handling, storage facilities and techniques, and quality evaluation. Field trips outside scheduled class time required.

HORT 424. Sustainable and Environmental Horticulture Systems.
(Dual-listed with HORT 524). (Cross-listed with ENV S). (3-0) Cr. 3. Alt. S., offered odd-numbered years.
Inquiry into ethical issues and environmental consequences of horticultural cropping systems, production practices and managed landscapes. Emphasis on systems that are resource efficient, environmentally sound, socially acceptable, and profitable.
HORT 434. Greenhouse Crop Production I.  
(3-6) Cr. 4. Alt. F., offered odd-numbered years. Prereq: HORT 332  
Principles and practices of greenhouse floricultural and food crop production.  
Emphasis is placed on production of foliage, containerized flowering species, and  
food crops produced in greenhouses and other controlled environments. Field  
trips outside scheduled class time required. Greenhouse scheduling and costs of  
production projects are required.

HORT 435. Greenhouse Crop Production II.  
(3-3) Cr. 4. Alt. S., offered even-numbered years. Prereq: HORT 330 and HORT 332  
Principles and practices of greenhouse production of ornamental and food crops  
for the spring garden market. Emphasis placed on the production of several  
ornamental and food crops, along with the complete palette of spring garden  
crops. Greenhouse scheduling and costs of production projects are required. Field trips  
outside scheduled class time required.

HORT 442. Nursery Production and Garden Center Management.  
(2-0) Cr. 2. Alt. F., offered odd-numbered years. Prereq: HORT 221  
Nursery layout, design, and cultural practices important for growing and shipping  
field and container-grown nursery crops. Overview of garden center design and  
retailing and marketing strategies. Field trips outside scheduled class time may  
be required.

HORT 444. Landscape Construction Management.  
(2-3) Cr. 3. F.  
Principles and practices of residential landscape construction. Encompasses  
business and project management, landscape estimating and overview of  
common landscape materials. Laboratory work involves construction project  
management and installation.

(2-0) Cr. 2. F. Prereq: HORT 221 and junior or senior classification  
In-depth presentation and discussion of skills and strategies needed to manage a  
horticultural enterprise. Topics include motivating employees, managing meetings,  
conducting performance appraisals, dealing with conflict, and managing an  
increasingly diverse work force.

(2-0) Cr. 2. Alt. S., offered odd-numbered years. Prereq: HORT 351  
Turfgrass science including the study of (1) specific information on soil chemistry  
and soil modification as they relate to the development and maintenance of  
turfgrass areas, (2) specialized management practices used in athletic field care,  
professional lawn care, and golf course industries, and (3) construction methods  
for golf courses and sports fields.

HORT 452. Integrated Management of Diseases and Insect Pests of Turfgrasses.  
(Dual-listed with HORT 552). (Cross-listed with ENT, PL P). (3-0) Cr. 3. Alt. S.,  
offered even-numbered years. Prereq: HORT 351  
Identification and biology of important diseases and insect pests of turfgrasses.  
Development of integrated pest management programs in various turfgrass  
environments.

(3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: HORT 351  
Management techniques for today’s specialized athletic fields. The horticultural  
and budgetary aspects of football, soccer, baseball, and softball fields will be  
presented. Field trips and laboratory exercises will develop a practical  
understanding of actual principles in field development, construction, and  
management.

HORT 454. Turf & Landscape Irrigation.  
(3-3) Cr. 3. Alt. F., offered odd-numbered years.  
Irrigation systems and principles for turf and landscape environments. Topics  
include design, installation, equipment, management, and trouble shooting of  
irrigation systems, athletic fields, residential lawns and landscapes. Participation  
in practical exercises and local field trips to irrigation sites is required.

HORT 461. Fruit Crop Production and Management.  
(2-2) Cr. 3. Alt. S., offered odd-numbered years. Prereq: HORT 221  
Principles and practices of small fruit, tree fruit, and nut culture and production.  
Morphology, physiology of growth and development, plant establishment, pest  
management, pruning, training, harvesting, storage, and marketing of commercial  
temperate fruit and nut crops. Emphasis on sustainable practices. Participation in  
practical exercises and local field trips is required.

(Cross-listed with AGEDS). (1-6) Cr. 3. F. Prereq: Econ 230, 6 credits of  
horticulture, and jr classification  
Participation in the management and operation of fruit and vegetable enterprises  
for local markets. Principles and practices of researching and developing a  
commercial business plan that will meet industry standards and that will be linked  
to the operations and production associated with the Hort 465 class. Laboratory  
work includes development of a horticulture enterprise business plan, high tunnel  
site preparation and planting, development of summer crop protocols, seeding  
production for the summer crop (if applicable) and land preparation and planting of  
a portion of the summer crop.

HORT 465B. Horticulture Enterprise Management: Harvesting.  
(Cross-listed with AGEDS). (1-6) Cr. 3. SS. Prereq: Econ 230, 6 credits of  
horticulture, and jr classification  
Participation in the management and operation of fruit and vegetable enterprises  
for local markets. Principles and practices of harvesting and marketing high tunnel  
crops and the planting and growing of a variety of summer vegetables in the field.  
Laboratory work includes all operation and production aspects involved with the  
day-to-day running of a horticultural enterprise. The class will be responsible  
for crop selection and crop protocols for the fall high tunnel crop and seedling  
production for this crop (if applicable). Additionally, the class will be responsible for  
all crop maintenance decisions and record keeping during the season.

HORT 465C. Horticulture Enterprise Management: Marketing.  
(Cross-listed with AGEDS). (1-6) Cr. 3. F. Prereq: Econ 230, 6 credits of  
horticulture, and jr classification  
Participation in the management and operation of fruit and vegetable enterprises  
for local markets. Principles and practices of researching and developing a  
commercial horticulture enterprise market plan that could be used by a startup  
business and that will be linked directly to the operations and production  
associated with the Hort 465 class. Laboratory work includes completing the  
summer crop harvest, development of a horticulture marketing plan, high tunnel  
site preparation and planting, development of spring high tunnel crop protocols  
and all crop maintenance decisions and the record keeping for the fall high tunnel  
crop.

HORT 471. Vegetable Production and Management.  
(2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: HORT 221  
Principles of vegetable production with emphasis on sustainable production  
practices, market outlets, business aspects, and risk management. Topics will  
include crop classification and rotation; planting methods; crop climatic conditions,  
physiological growth & development; soil, water, and pest management; cover  
cropping; season extension strategies; harvest and postharvest management and  
marketing. Course involves visits to growers fields to observe/experience their  
production enterprise.

HORT 471L. Vegetable Production and Management Lab.  
(0-3) Cr. 1. Alt. S., offered even-numbered years. Prereq: Junior or Senior status  
and concurrent enrollment in Hort 471 is required.  
Hands-on training in the area of vegetable crop production. Students will have an  
opportunity to grow a variety of vegetables in a heated greenhouse and also  
conduct greenhouse and lab experiments. The lab also involves visits to vegetable  
production sites in Iowa to observe/experience and learn from growers and other  
aricultural professionals.

HORT 475. Urban Forestry.  
(Cross-listed with FOR). (2-3) Cr. 3. F. Prereq: Junior or senior classification, 3  
credits in biology  
Discussion of establishment and management of woody perennials in community-  
owned urban greenspaces, consideration of urban site and soil characteristics,  
plant physiology, plant culture, urban forest valuation, inventory methods, species  
selection, and urban forest maintenance (health care and pest management).

HORT 481. Advanced Garden Composition.  
(0-4) Cr. 2. F. Prereq: HORT 240 and HORT 330 and HORT 380 and HORT 381  
Limited to Landscape Design Installation and Management option students.  
Development of residential landscapes using design principles and the design  
process. Projects encompass site analysis, concept development, preliminary  
design, final design, and graphic presentation techniques. Techniques will include  
hand and computer rendering.

HORT 484. Organic Agricultural Theory and Practice.  
(Dual-listed with HORT 584). (Cross-listed with AGRON). (3-0) Cr. 3. Alt. F.,  
offered even-numbered years. Prereq: 9 cr. in biological or physical sciences  
Understanding of the historical origins and ecological theories underpinning the  
practices involved in organic agriculture. Interdisciplinary examination of crop  
and livestock production and socio-economic processes and policies in organic  
agriculture from researcher and producer perspectives.
HORT 490. Independent Study. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490A. Independent Study: Greenhouse Crops. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490B. Independent Study: Nursery Crops. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490C. Independent Study: Turfgrass. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490D. Independent Study: Fruit Crops. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490E. Independent Study: Vegetable Crops. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490F. Independent Study: Cross-Commodity. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490G. Independent Study: Landscape Horticulture. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490H. Independent Study: Honors. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490I. Independent Study: International Study. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 490J. Independent Study: Entrepreneurship. Cr. arr. Repeatable. Prereq: Junior or Senior classification in horticulture or permission of instructor. Investigation of topic holding special interest to the student. Comprehensive report required. Election of course and topic must be approved by department head. A maximum of 4 credits of Hort 490 and an additional 2 credits of 490 from outside Horticulture may be used toward the total of 128 credits required for graduation.

HORT 491. Seed Science Internship Experience. (Cross-listed with AGRON). Cr. 1-2. Repeatable, maximum of 1 times. F.S.SS. Prereq: Agron 338, advanced approval and participation of employer and instructor. A professional work experience and creative project for seed science secondary majors. The project requires the prior approval and participation of the employer and instructor. The student must submit a written report.

HORT 494. Service Learning. Cr. arr. Repeatable, maximum of 12 credits. F.S.SS. Prereq: Permission of instructor. Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. A maximum of 4 credits of 494 may be used toward the Horticulture credits required for graduation.

HORT 494A. Service Learning: International. Cr. arr. Repeatable, maximum of 12 credits. F.S.SS. Prereq: Permission of instructor. Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. A maximum of 4 credits of 494 may be used toward the Horticulture credits required for graduation.

HORT 494B. Service Learning: Domestic. Cr. arr. Repeatable, maximum of 12 credits. F.S.SS. Prereq: Permission of instructor. Selected projects that result in outcomes benefiting a non-Iowa State University entity while instilling professional ethics and accomplishing student learning goals. Course expenses paid by student. A maximum of 4 credits of 494 may be used toward the Horticulture credits required for graduation.

HORT 495. Horticulture Travel Course Preparation. Cr. R. Repeatable. F.S.SS. Prereq: Permission of instructor. Limited enrollment. Students enrolled in this course also intend to register for Hort 496 the following term. Topics include preparation for safe international travel, the horticultural/agricultural industries, climate, crops, economics, geography, history, marketing, soils, culture, traditions, and horticultural/agricultural development of the country to be visited. Students enroll in this course the term immediately before travel to the foreign country.

Courses primarily for graduate students, open to qualified undergraduates:

HORT 511. Integrated Management of Tropical Crops. (Cross-listed with ENT, PL P). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: PL P 408 or PL P 416 or ENT 370 or ENT 376 or HORT 221 Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Meets International Perspectives Requirement.

HORT 523. Plant Tissue, Cell, and Protoplast Culture. (2-0) Cr. 2. Alt. F., offered odd-numbered years. Prereq: BIOL 313 or HORT 321 or senior classification in a College of Agriculture and Life Sciences major. Theory and techniques of plant tissue culture, including organogenesis, somatic embryogenesis, micropropagation, anther and embryo culture, protoplast isolation and culture, and transformation. Applications to agriculture.
HORT 524A. Sustainable and Environmental Horticulture Systems. (Dual-listed with HORT 424). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Inquiry into ethical issues and environmental consequences of horticultural cropping systems, production practices and managed landscapes. Emphasis on systems that are resource efficient, environmentally sound, socially acceptable, and profitable.

HORT 529. Publishing in Biological Sciences Journals. (Cross-listed with AGRON, NREM). (3-0) Cr. 3. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data. Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

HORT 530. Research Orientation. (1-3) Cr. 2. F.

Instruction in scientific methods and communication skills.

Sessions in basic molecular biology techniques and related procedures. Offered on a satisfactory-fail basis only.

Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

Includes immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

Includes Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transfectants. Offered on a satisfactory-fail basis only.

Includes two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

Includes metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

Offered on a satisfactory-fail basis only.

HORT 543. Seed Physiology. (Cross-listed with STB). (2-0) Cr. 2. Alt. F., offered even-numbered years. Prereq: Admission to the Graduate Seed Technology and Business Program or approval of the instructor Brief introduction to plant physiology. Physiological aspects of seed development, maturation, longevity, dormancy and germination. Links between physiology and seed quality.

HORT 546. Strategies for Diversified Food and Farming Systems. (Cross-listed with AGRON, SUSAG). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: SUSAG 509

Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.

HORT 551. Growth and Development of Perennial Grasses. (Cross-listed with AGRON). (2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: Junior or senior or graduate classification or permission of instructor

Selected topics on anatomy, morphology, and physiology relative to growth and development of perennial grasses. Emphasis on growth and development characteristics peculiar to grasses and variations of such characteristics under natural and managed conditions.

HORT 552. Integrated Management of Diseases and Insect Pests of Turfgrasses.

(Dual-listed with HORT 452). (Cross-listed with ENT, PL P). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: HORT 351

Gleason, D. Lewis. Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

HORT 554. Organic Agricultural Theory and Practice.

(Dual-listed with HORT 484). (Cross-listed with AGRON, SUSAG). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: 9 cr. in biological or physical sciences

Delate. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

HORT 590. Special Topics.

Cr. arr. Repeatable. Prereq: a major or minor in horticulture

HORT 593. Workshop in Horticulture.

Cr. arr. Repeatable. Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593A. Workshop in Horticulture: Greenhouse Crops.

Cr. arr. Repeatable. Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593B. Workshop in Horticulture: Nursery Crops.

Cr. arr. Repeatable. Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593C. Workshop in Horticulture: Turfgrass.

Cr. arr. Repeatable. Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593D. Workshop in Horticulture: Fruit Crops.

Cr. arr. Repeatable. Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593E. Workshop in Horticulture: Vegetable Crops.

Cr. arr. Repeatable. Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593F. Workshop in Horticulture: Cross-Commodity.

Cr. arr. Repeatable. Workshops in horticulture, with emphasis on off-campus instruction.

HORT 593G. Workshop in Horticulture: Landscape Horticulture.

Cr. arr. Repeatable. Workshops in horticulture, with emphasis on off-campus instruction.

HORT 599. Creative Component.

Cr. arr. Repeatable. Courses for graduate students:

HORT 610. Graduate Seminar.

Cr. 1. Graduate Seminar. Offered on a satisfactory-fail basis only.

HORT 690. Advanced Topics.

Cr. arr. Repeatable.

HORT 696. Research Seminar.

(Cross-listed with AGRON, BBMB, FOR, GDCB, PLBIO). Cr. 1. Repeatable. F.S. Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

HORT 698. Horticulture Teaching Practicum.

(1-0) Cr. 1. S. Prereq: Graduate student classification Discussions are intended to foster the development of graduate students as teaching assistants and future horticulture/plant science teachers. Topics include establishing a classroom presence, improving lectures, motivating students, dealing with difficult or disruptive students, and developing a teaching philosophy. Offered on a satisfactory-fail basis only.

Cr. arr. Repeatable.

**Industrial Technology**

**Curriculum in Industrial Technology**

Administered by the Department of Agricultural and Biosystems Engineering.

**Curriculum in Industrial Technology**

Administered by the Department of Agricultural and Biosystems Engineering. An undergraduate certificate in occupational safety is available; the requirements appear under Technology Systems Management courses and programs. A minor in Industrial Technology is available; the requirements appear under Technology Systems Management courses and programs.

Students majoring in Industrial Technology choose between two options: Manufacturing or Occupational Safety.

**Total Degree Requirement: 120 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**Communications Proficiency:**

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

**Communication/Library: 13 cr.**

11 credits of supportive electives: 11

**Total Credits**

33

**Minor - Industrial Technology**

The Department of Agricultural and Biosystems Engineering offers a minor in industrial technology which may be earned by completing a minimum of 18 credits of technology systems management courses, which includes:
For the undergraduate curriculum in agricultural systems technology leading to the degree of bachelor of science or for the undergraduate curriculum in industrial technology leading to the degree of bachelor of science.

The department also offers an undergraduate curricula and courses in agricultural engineering, biological systems engineering.

Courses primarily for undergraduates:

**TSM 110. Introduction to Technology.**
(1-0) Cr. 1. F. Prereq: AST and I Tec majors only or permission of instructor
Team-oriented introduction to agricultural systems technology and industrial technology. Internships, careers, competencies, academic success strategies, industry visits, transition to academic life.

**TSM 115. Solving Technology Problems.**
(2-2) Cr. 3. F.S. Prereq: MATH 140 or higher (can be taken concurrently)
Solving technology problems and presenting solutions through technical reports. Unit conversions, unit factor method, SI units, significant digits, graphing and curve fitting. Use of spreadsheet programs to solve and present technology problems. Solution of technology problems using computer programming languages.

**TSM 116. Introduction to Design in Technology.**
(2-2) Cr. 3. F.S.
2D projections and 3D representations of objects, national and international standards for documentation, manufacturing processes, design projects, and teamwork. Free-hand sketching techniques and parametric solid modeling will be covered.

**TSM 201. Preparing for Workplace Seminar.**

**TSM 210. Fundamentals of Technology.**
(3-0) Cr. 3. F.S. Prereq: TSM 115 or equivalent, MATH 140 or higher
Introduction to problem solving related to fundamental agricultural and/or industrial technology systems and mathematical tools needed for data analysis. Basic laws of energy, force, and mass applied to technology systems such as: mechanical power transmission; heating, ventilation and air conditioning; electrical circuits. Introduction to engineering economics: using the time value of money to make economic decisions.

**TSM 216. Advanced Technical Graphics, Interpretation, and CAD.**
(2-2) Cr. 3. F.S. Prereq: TSM 116
Advanced design systems incorporating 2D and 3D design and productivity tools for use in manufacturing settings. Topics include: Geometric Dimensioning and Tolerancing, 3D models, welding symbols, advanced visualization, design modeling of parts and assemblies, feature based design. Use of AutoCAD and parametric modeling software.

**TSM 240. Introduction to Manufacturing Processes.**
(1-4) Cr. 3. F.S.
A study of selected materials and related processes used in manufacturing. Lecture and laboratory activities focus on materials, properties, and processes. This includes plastics and metals.

**TSM 270. Principles of Injury Prevention.**
(3-0) Cr. 3. F.
Basic foundations of injury causation and prevention in home, motor vehicle, public, and work environments.

**TSM 310. Total Quality Improvement.**
(3-0) Cr. 3. S. Prereq: STAT 101 or STAT 104, junior classification
Introduction to the fundamental concepts of TQM - Deming style of management, statistical studies to understand the behavior of products, processes, or services, and how to define and document processes and customer focus. Introduction to continuous improvement tools and methods - DMAIC, SPC, and Lean, Six Sigma, and JIT; emphasis on team work and problem solving skills.

**TSM 322. Preservation of Grain Quality.**
(2-0) Cr. 2. S. Prereq: MATH 140 or higher
Principles and management for grain quality preservation. Quality measurement. Drying and storage. Fans and airflow through grain. Handling methods.

**TSM 322L. Preservation of Grain Quality Laboratory.**
(0-3) Cr. 1. S. Prereq: Credit or enrollment for credit in TSM 322

**TSM 324. Soil and Water Conservation Management.**
(2-2) Cr. 3. S. Prereq: MATH 140 or MATH 151
Introduction to engineering and conservation principles applied to the planning of erosion control systems, water control structures, water quality management, and drainage and irrigation systems.

**TSM 325. Biorenewable Systems.**
(Cross-listed with A B E, AGRON, AN S, BUSAD, ECON). (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

**TSM 327. Animal Production Systems.**
(3-0) Cr. 3. F. Prereq: TSM 210
Confined animal feeding operations. Environmental controls for animal production. Response of animals to the environment. Heat and moisture balance in animal housing. Ventilation, water, feed handling, air pollution, odor and waste management systems.

**TSM 330. Agricultural Machinery and Power Management.**
(2-3) Cr. 3. S. Prereq: TSM 210, MATH 142 or MATH 151
Selection, sizing, and operational principles of tractors and machinery systems. Cost analysis and computer techniques applied to planning and management of agricultural machinery systems. Principles, operation, and application of agricultural machinery.

**TSM 333. Precision Farming Systems.**
(2-2) Cr. 3. F. Prereq: MATH 140 or higher, junior or senior classification

**TSM 335. Tractor Power.**
(3-3) Cr. 4. F. Prereq: TSM 210, MATH 145X
Theory and construction of tractor engines, mechanical power trains and hydraulic systems. Introduction to traction, chassis mechanics, and hydraulic power.

**TSM 337. Fluid Power Systems Technology.**
(2-2) Cr. 3. S. Prereq: TSM 210
Fundamental fluid power principles. Fluid properties. Function and performance of components such as pumps, valves, actuators, hydrosystem transmission. Analysis of fluid power circuits and systems. Introduction to electrohydraulics. Course includes lab using fluid power trainers.

**TSM 340. Advanced Automated Manufacturing Processes.**
(2-2) Cr. 3. F. Prereq: TSM 216, TSM 240, MATH 151
NC programming operations for CNC mills and lathes. Transfer of parts descriptions into detailed process plans, tool selection, and NC codes. Computer assisted CAD/CAM NC programming for 2D/3D machining.

**TSM 363. Electric Power and Electronics for Agriculture and Industry.**
(3-3) Cr. 4. F. Prereq: TSM 210
Basic electricity. Electrical safety, wiring, 3-phase service, controls, and motors for agricultural and industrial applications. Planning building lighting and electrical systems. Electronics to sense, monitor, and control mechanical processes.

**TSM 370. Occupational Safety.**
(3-0) Cr. 3. S. Prereq: STAT 101, junior standing
Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing a safe workplace for their employees. Includes the identification and remediation of workplace hazards.
(2-0) Cr. 2. S.
Introduction to occupational safety and health administration and management. Focus on development and management of safety programs and obtaining employee involvement in occupational safety programs.

TSM 372. Legal Aspects of Occupational Safety and Health.
(2-0) Cr. 2. Alt. F., offered odd-numbered years. Prereq: TSM 371
A review of the common legal issues facing safety practitioners in the workplace. Includes OSHA, EPA and DOT regulations; workers’ compensation, as well as common liability issues.

(3-0) Cr. 3. Alt. F., offered even-numbered years.
An overview of the current problems and technology in the fields of fire protection and fire prevention, with emphasis on industrial needs, focusing on the individual with industrial safety responsibilities.

TSM 393. Topics in Technology.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393A. Topics in Technology: Agriculture and Biosystems Management.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393C. Topics in Technology: Manufacturing.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393D. Topics in Technology: Occupational Safety.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393E. Topics in Technology: Chemical Application Systems.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393F. Topics in Technology: Agricultural Safety and Health.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393G. Topics in Technology: Electronic Integration for Agriculture and Production Systems.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393I. Topics in Technology: Irrigation Systems Management.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 393J. Topics in Technology: Machinery Management Using Precision Agriculture Technology.
Cr. 1-4. F.S.S.S.
Offered as demand warrants. Web-based instruction.

TSM 397. Internship in Technology.
Cr. R. F.S.S.S.
Prereq: At least 45 credits of coursework, in AST or I Tec major, and approval of internship coordinator. A supervised work experience in an approved learning setting with application to technology practices and principles. Reporting during work experience and self and employer evaluation required. Minimum GPA requirement.

TSM 399. Work Experience in Technology.
Cr. 2. Repeatable, maximum of 4 credits. F.S.S.S.
Prereq: TSM 397 the preceding semester and approval of internship coordinator. Written reports and reflection on work experience. A maximum of 4 credits of TSM 399 may be used toward the total credits required for graduation.

TSM 415. Technology Capstone I.
(0-2) Cr. 1. F.S.
Prereq: senior classification with less than 32 credits remaining and proposal development of a current technological problem in agricultural or industrial systems. Formation of project teams and selection of faculty project mentor in preparation to complete project.

TSM 416. Technology Capstone II.
(1-8) Cr. 5. F.S.
Prereq: TSM 415 in previous semester. Continued team development, communications, and responsibilities. Development of alternate solutions using creativity, critical analysis, and planning techniques. Selection of promising potential solutions to technology problems identified in TSM 415 for development and analysis by student teams. Presentation of project through oral presentations, written reports, and working prototypes.

(2-2) Cr. 3. F.
Prereq: TSM 310
Introduction to lean tools and techniques that reduce costs and improve business performance: JIT, VSM, SMED, Kaizen, Standard Work, Cycle Time Reduction, Takt Time, A3, etc. Emphasis on lean thinking and competency development through application: simulations, case studies, industry guest and mentors, teamwork and industry-related lean projects.

TSM 443. Statics and Strength of Materials for Technology.
(2-2) Cr. 3. S.
Prereq: PHYS 111, MATH 142 or MATH 151
Application of standard analytic and computer based techniques of solving problems related to force and moments. The properties of materials and how to select appropriate materials for a particular design is reviewed.

TSM 444. Facility Planning.
(3-0) Cr. 3. F.
Prereq: TSM 216 and TSM 240; STAT 101 or STAT 104
Principles and practices in designing, evaluating, and organizing existing facilities or creating new facilities. Emphasis on AutoCAD-based new facility design project - product design, production flow analysis, activity relationship analysis, layout deployment, materials handling, office and other service requirement design, and the necessary cost analysis for the new facility.

(2-2) Cr. 3. S.
Prereq: TSM 363
Theory and applications of automation systems. Emphasizes features, capabilities, design and programming skills of Programmable Logic Controller (PLC) based industrial control systems. Introduction to industrial robots and sensors.

TSM 470. Industrial Hygiene: Physical, Chemical, and Biological Hazards.
(3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: MATH 151 or higher
A qualitative and quantitative introduction to health effects of chemical, biological, and physical hazards in a workplace.

TSM 471. Safety Laboratory.
(0-2) Cr. 1. Alt. S., offered even-numbered years. Prereq: TSM 470 (can be taken concurrently)
Introduction to equipment, methods, and strategies to measure, evaluate, control, and research hazards and risk in the workplaces.

TSM 477. Risk Analysis and Management.
(Dual-listed with TSM 577). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: MATH 151, STAT 101 or STAT 104
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today’s complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 490. Independent Study.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490H. Independent Study: Honors.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490L. Independent Study: Manufacturing.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 490J. Independent Study: Agriculture and Biosystems Management.
Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.
TSM 490D. Independent Study: Occupational Safety. Cr. 1-4. Repeatable. Prereq: Junior or senior classification, permission of instructor, and completion of an independent study contract and approval by department
A maximum of 4 credits of TSM 490 may be used toward the total credits required for graduation.

TSM 496. Technology Travel Course. Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
Limited enrollment. Tour and study of international industrial technology and/or agricultural systems technology industries. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C; or option D.
Meets International Perspectives Requirement.

TSM 496A. Technology Travel Course: Pre-departure. Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
Limited enrollment. Tour and study of international industrial technology and/or agricultural systems technology industries. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C; or option D.
Meets International Perspectives Requirement.

TSM 496B. Technology Travel Course: Travel. Cr. R. Repeatable. F.S.S.S. Prereq: Permission of instructor
Limited enrollment. Tour and study of international industrial technology and/or agricultural systems technology industries. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C; or option D.
Meets International Perspectives Requirement.

TSM 496C. Technology Travel Course: Post-travel. Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
Limited enrollment. Tour and study of international industrial technology and/or agricultural systems technology industries. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C; or option D.
Meets International Perspectives Requirement.

TSM 496D. Technology Travel Course: Combination (Pre-departure, Travel, and Post-travel). Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
Limited enrollment. Tour and study of international industrial technology and/or agricultural systems technology industries. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C; or option D.
Meets International Perspectives Requirement.

Courses primarily for graduate students, open to qualified undergraduates:
TSM 540. Advanced Design and Manufacturing. (3-0) Cr. 3. S. Prereq: Permission of instructor
Application of six sigma philosophy to advance product design and process control. Application of value steam mapping to the existing manufacturing system to develop future continuous improvement plans. Application of Taguchi Parameter design methodologies for optimizing the performance of manufacturing processes. Application of Taguchi Tolerance Design methodologies for product design.

TSM 575. Safety and Public Health Issues in Modern Society. (2-0) Cr. 2. Repeatable, maximum of 2 times.
Exploration and analysis of current safety and public health issues impacting society. The focus will be on topics that impact individuals in work, public, and home environments.

TSM 577. Risk Analysis and Management. (Dual-listed with TSM 477). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: MATH 151, STAT 101 or STAT 104
Risk analysis and management focuses on developing a risk oriented pattern of thinking that is appropriate for today’s complex world. The tools that will be gained in this course will be helpful in recognizing, understanding, and analyzing hazards and risks in modern complex systems.

TSM 590. Special Topics in Technology. Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590A. Special Topics in Technology: Agriculture and Biosystems Management. Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590B. Special Topics in Technology: Machine Systems. Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590C. Special Topics in Technology: Manufacturing. Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 590D. Special Topics in Technology: Occupational Safety. Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Graduate classification in industrial and agricultural technology, permission of instructor, and completion of an independent study contract approved by major professor

TSM 598. Technical Communications for a Master’s Degree. (Cross-listed with A B E). Cr. 1. F.S.S.S.
A technical paper draft based on the M.S. thesis or creative component is required of all master’s students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on M.S. thesis or creative component is required of all master’s students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

A discipline-related problem to be identified and completed under the direction of the program adviser. Three credits required for all nonthesis master's degree students.

Courses for graduate students:
TSM 601. Graduate Seminar. (Cross-listed with A B E). (1-0) Cr. 1. F.
Keys to writing a good MS thesis or PhD dissertation. How to begin formulating research problems. Discussion of research problems and broader impacts, review of literature, identifying knowledge gaps and needs, long-term goals, research hypotheses, objectives, rationale and significance, methods, procedures, data analysis, and reporting results. Presentation of research proposal in different formats. Using peer review and responding to feedback.

TSM 652. Program and Learner Evaluation. (3-0) Cr. 3. Prereq: STAT 401 or equivalent
Techniques for evaluating learners, facilities, programs, and staff utilizing theories for developing measurement instruments. Outcomes assessment is emphasized.

TSM 655. Academic Leadership in Technology and Engineering. (3-0) Cr. 3. Prereq: Permission of instructor
A definition of the faculty role in technology and engineering disciplines, including strategies for dealing with programs, personnel, and constituencies are presented. Leadership skills involving team formation, team operation, and conflict resolution are addressed.
Students interested in earning a secondary major in international agriculture must major cannot be used to meet requirements of the major or any other college or university requirements. Fifteen credits of the secondary major includes an emphasis on international internship or study abroad, travel, or language courses or any courses for the secondary major include AGRON 342 World Food Issues: Past and Present; Technical knowledge of a primary major discipline will be strengthened by a global perspective or prepare for international work in agriculture. The technical paper draft based on the dissertation is required of all Ph.D. students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on the dissertation is required of all Ph.D. students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

TSM 698. Technical Communications for a Doctoral Degree. (Cross-listed with A B E). Cr. 1. F.S.S.S. A technical paper draft based on the dissertation is required of all Ph.D. students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on the dissertation is required of all Ph.D. students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

International Agriculture

Interdepartmental Undergraduate Program

The international agriculture program provides opportunities to develop knowledge and skills related to the factors that interact to impact agricultural and environmental issues, production, processes, distribution and utilization worldwide. The program puts emphasis on international experience through structured internships and study abroad. The international agriculture program is appropriate for students seeking positions that require knowledge and experience related to global agricultural issues and their impact on local, regional, national and international policies and practices. Students preparing for careers in the following areas will benefit from the international agriculture program; governmental and non-governmental development agencies, agribusinesses, educational institutions, and non-profit assistance agencies. Outcomes from participation in this program include developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

Secondary Major

International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in an agriculture and life sciences curriculum. Students choosing international agriculture will strengthen their career placement with a business or agency involved in international activities. Technical knowledge of a primary major discipline will be strengthened by a global awareness of agriculture and life sciences. A secondary major in international agriculture will give students practical insight into the role of agriculture in a world of increasing food and fiber needs. It is ideal for those who wish to broaden their international perspective or prepare for international work in agriculture. The secondary major includes an emphasis on international internships or study abroad and/or foreign languages, and selection of appropriate courses (from an approved list) to meet the needs and interests of the student.

Courses for the secondary major include AGRON 342 World Food Issues: Past and Present; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Fifteen credits of the secondary major cannot be used to meet requirements of the major or any other college or university requirement.

Students interested in earning a secondary major in international agriculture must contact a program adviser. The early indication of an interest in international agriculture allows for effective integration of the secondary major course requirements with those of the primary major.

Minor

A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and life sciences and agricultural systems. Courses for the minor include AGRON 342 World Food Issues: Past and Present; 3 to 6 credits of study abroad and/or foreign language and 3 to 6 credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Nine credits of the 15 credit total for the minor can not be used for meeting requirements for the major. For more information about a secondary major or minor in international agriculture, see descriptions in the designated departments or the supervisory committee. For more information about courses for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

Curriculum in International Agriculture

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture and Life Sciences. A minor is available to interested students regardless of their major.

15 cr. of this major cannot be used to meet requirements of the primary major or any other college or university requirements.

6 cr. from Internship in International Agriculture or Study Abroad or World Languages and Cultures; AGRON 342 World Food Issues; Past and Present; credits from approved International Agriculture Courses to total 15 cr.

Microbiology

Interdepartmental Undergraduate Major

Undergraduate Study

Undergraduate study for the bachelor of science degree with a major in microbiology. In the Microbiology curriculum, principal emphasis is placed on understanding microorganisms and their interrelationships with other organisms in nature, the application of microbiology in medicine, agriculture and industry, and the study of fundamental life processes as exemplified by microorganisms. Areas of emphasis include: medical microbiology; environmental and industrial microbiology; and food microbiology. Graduates of the Interdepartmental Undergraduate Microbiology Program will learn about the diversity and complexity of microbial life represented by procaryotes, eucaryotes and viruses. In addition to being able to explain fundamental principles of microbial growth, physiology, genetics, biochemistry, and ecology, students will be able to evaluate the impact that the microbial world has on human, animal and plant health, as well as on environmental quality, industry and biotechnology. Graduates are able to design and implement experimental approaches to address specific questions. In addition, graduates are able to communicate scientifically, using a variety of media. Students graduating in microbiology find career opportunities in a wide variety of areas including: hospital and clinical laboratories; federal, state, and local government agencies; research and development; dairy and food processing industries; and the pharmaceutical and fermentation industries. Some fields of microbiology, especially advanced research, may require further training.

Undergraduate work in the program is designed to provide sound preparation for graduate study, training for bachelors-level employment, and admission to professional programs such as medicine, veterinary medicine and dentistry.

Preprofessional preparation may be accomplished through the curriculum major in this program (see College of Veterinary Medicine, Admission Requirements).

Minor

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses.

Graduate Study

The program offers work for the degrees master of science and doctor of philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry; Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences;
Curriculum in Microbiology

www.micro.iastate.edu

Administered by an interdepartmental committee.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Electives: 7-12

Communications Proficiency:

English composition - with a C or better 6
Speech fundamentals - with a C or better 3

Communication/Library:

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
SP CM 212 Fundamentals of Public Speaking 3
One course from the following: 3
   ENGL 302 Business Communication
   ENGL 309 Report and Proposal Writing
   ENGL 312 Biological Communication
   ENGL 314 Technical Communication
LIB 160 Information Literacy 1

Total Credits 13

Humanities and Social Sciences:

Approved Humanities list 3
Approved Social Science list 3

Ethics: 3 cr.

3 cr. from approved list.

Mathematical Sciences:

One of the following: 7-8
   MATH 142 & MATH 160 Trigonometry and Analytic Geometry and Survey of Calculus
   MATH 155 & MATH 166 Calculus I and Calculus II
   MATH 181 & MATH 182 Calculus and Mathematical Modeling for the Life Sciences I and Calculus and Mathematical Modeling for the Life Sciences II

One of the following: 3-4
   STAT 101 Principles of Statistics
   STAT 104 Introduction to Statistics

Total Credits 10-12

Physical Sciences:

CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1

CHEM 178 General Chemistry II 3
PHYS 111 General Physics 5
PHYS 112 General Physics 5
CHEM 331 Organic Chemistry I 3
CHEM 331L Laboratory in Organic Chemistry I 1
CHEM 332 Organic Chemistry II 3

One of the following: 3-6
   BBMB 404 Biochemistry I
   & BBMB 405 and Biochemistry II
   or BBMB 301 Survey of Biochemistry

Total Credits 28-31

Biological Sciences:

BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 313 Principles of Genetics 3
BIOL 313L Genetics Laboratory 1
BIOL 314 Principles of Molecular Cell Biology 3

Total Credits 15

Microbiology:

Core courses:

MICRO 110 Professional and Educational Preparation in Microbiology 1
MICRO 302 Biology of Microorganisms 3
MICRO 302L Microbiology Laboratory 1
MICRO 310 Medical Microbiology 3
MICRO 310L Medical Microbiology Laboratory 1
MICRO 320 Molecular and Cellular Bacteriology 4
MICRO 440 Laboratory in Microbial Physiology, Diversity, and Genetics 4
MICRO 450 Undergraduate Seminar 2
MICRO 451 Senior Survey in Microbiology R

One of the following: 3
   MICRO 430 Procaryotic Diversity and Ecology
   MICRO 456 Principles of Mycology
   MICRO 477 Bacterial-Plant Interactions

Nine credit hours from the following: 9
   MICRO 374 Insects and Our Health
   MICRO 402 Microbial Genetics and Genomics
   MICRO 407 Microbiological Safety of Foods of Animal Origins
   MICRO 408 Virology
   MICRO 419 Foodborne Hazards
   MICRO 420 Food Microbiology
   MICRO 421 Food Microbiology Laboratory
   MICRO 456 Principles of Mycology
   MICRO 475 Immunology
   MICRO 475L Immunology Laboratory
   MICRO 485 Soil and Environmental Microbiology
   MICRO 487 Microbial Ecology
   MICRO 490 Independent Study

Microbiology elective - only 3 cr. lab courses allowed

Total Credits 31

Courses primarily for undergraduates:

MICRO 101. Microbial World.
(3-0) Cr. 3. F. Prereq: High school biology or equivalent
Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology and microbial impact on the biosphere.
MICRO 110. Professional and Educational Preparation in Microbiology. (1-0) Cr. 1. F.
An introduction to curriculum and research opportunities in microbiology at Iowa State. Topics include: easing the transition to life as a university student, development of specific goals, strengthening interpersonal communication, professional portfolio creation and resume building. Offered on a satisfactory-fail basis only.

MICRO 201L. Introductory Microbiology Laboratory. (0-2) Cr. 1. F.S. Prereq: One semester of college-level biology
Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisor committee, students who obtain a grade of B or better may substitute 201 for Micro 302 in advanced courses.

MICRO 201L. Introductory Microbiology Laboratory. Basic microbiology laboratory techniques for non-microbiology majors. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

MICRO 302. Biology of Microorganisms. (3-0) Cr. 3. F.S.SS. Prereq: BIOL 211, credit or enrollment in BIOL 212; 1 semester of chemistry
Basic cell biology, physiology, metabolism, genetics and ecology of microorganisms, with an emphasis on prokaryotes and viruses, as well as the roles of microorganisms in the environment, disease, agriculture, and industry.

MICRO 302L. Microbiology Laboratory. Basic microbiology laboratory techniques for majors in microbiology, biological sciences, and related fields. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

MICRO 310. Medical Microbiology. (3-0) Cr. 3. F. Prereq: MICRO 302 or MICRO 201 if a B or better was obtained
Study of infection and immunity by bacterial and viral pathogenic agents of humans with an overview of immune responses in controlling disease.

MICRO 302L. Microbiology Laboratory. Basic microbiology laboratory techniques for majors in microbiology, biological sciences and related fields. Credit for either Micro 201L or 302L, but not both, may be applied toward graduation.

MICRO 320. Molecular and Cellular Bacteriology. (4-0) Cr. 4. S. Prereq: MICRO 302, BIOL 313, credit or enrollment in CHEM 332
Introductory course integrating physiological and genetic principles influencing bacterial growth, survival, and cellular differentiation. Emphasis is on prokaryotes although unicellular eukaryotes are also discussed. Topics include the structure, function, and assembly of cell components, bioenergetics and metabolism, regulation of gene expression, genetic adaptation, stress tolerance, biofilms, and cell-cell interactions and communication.

MICRO 353. Introductory Parasitology. (Cross-listed with BIOL, V PTH). (3-0) Cr. 3. S. Prereq: BIOL 212
Biological and host-parasite relationships of major groups of animal parasites, and techniques of diagnosing and studying parasites.

MICRO 374. Insects and Our Health. (Cross-listed with ENT). (3-0) Cr. 3. S. Prereq: 3 credits in biological sciences
Identification, biology, and significance of insects and arthropods that affect the health of humans and animals, particularly those that are vectors of disease. Meets International Perspectives Requirement.

MICRO 374L. Insects and Our Health Laboratory. (Cross-listed with ENT). (0-3) Cr. 1. Alt. S., offered even-numbered years. Prereq: Credit or enrollment in ENT 374
Laboratory and field techniques for studying medical or public health entomology, including: collection, identification and maintenance of medically significant arthropods and experimental design and execution related to the biology of arthropods or arthropod-pathogen interactions.

MICRO 381. Environmental Systems I: Introduction to Environmental Systems. (Cross-listed with BIOL, ENSCI, ENV S). Cr. 3-4. F. Prereq: 12 credits of natural science including biology and chemistry
Introduction to the structure and function of natural environmental systems. Emphasis on the analysis of material and energy flows in natural environmental systems and the primary environmental factors controlling these systems.

MICRO 402. Microbial Genetics and Genomics. (Dual-listed with MICRO 502). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: MICRO 302, BIOL 313
The fundamental concepts of bacterial and bacteriophage genetics including mutagenesis, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.

MICRO 407. Microbiological Safety of Foods of Animal Origins. (Cross-listed with MICRO 507). (Cross-listed with FS HHN). (3-0) Cr. 3. S. Prereq: MICRO 420
Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

MICRO 408. Virology. (Dual-listed with MICRO 508). (3-0) Cr. 3. F. Prereq: BIOL 313 or BBMB 301, BIOL 314 recommended
The molecular virology and epidemiology of human, animal, plant and insect viruses.

MICRO 410. Insect-Virus Interactions: a Molecular Perspective. (Cross-listed with MICRO 510). (Cross-listed with ENT). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: Permission of an instructor.
Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

MICRO 419. Foodborne Hazards. (Cross-listed with FS HHN, TOX). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: MICRO 201 or MICRO 302, a course in biochemistry
Pathogenesis of human microbiological foodborne infections and intoxications, principles of toxicology, major classes of toxicants in the food supply, governmental regulation of foodborne hazards. Only one of FS HHN 419 and FS HHN 519 may count toward graduation.

MICRO 420. Food Microbiology. (Cross-listed with FS HHN, TOX). (3-0) Cr. 3. F. Prereq: MICRO 201 or MICRO 302
Effects of microbial growth in foods. Methods to control, detect, and enumerate microorganisms in food and water. Foodborne infections and intoxications.

MICRO 421. Food Microbiology Laboratory. (Cross-listed with FS HHN). (0-6) Cr. 3. F. Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L, Credit or enrollment in FS HHN/MICRO 420
Standard techniques used for the microbiological examination of foods. Independent and group projects on student-generated questions in food microbiology. Emphasis on oral and written communication and group interaction.

MICRO 430. Procaryotic Diversity and Ecology. (Dual-listed with MICRO 530). (Cross-listed with BBMB). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 440. Laboratory in Microbial Physiology, Diversity, and Genetics. (Cross-listed with BBMB). (2-6) Cr. 4. F. Prereq: MICRO 302, MICRO 302L
Fundamental techniques and theory for studying the cellular mechanisms and diversity of microbial life. Experimental techniques will include isolation and physiological characterization of bacteria that inhabit different environments. Also included are techniques for phylogenetic characterization, measuring gene expression, and genetic manipulation of diverse species of bacteria. Essential components for the effective communication of scientific results are also emphasized.

MICRO 450. Undergraduate Seminar. (2-0) Cr. 2. S. Prereq: SP CM 212 and senior standing in Microbiology
Required of all undergraduate majors in microbiology. Discussion of current papers in microbiology and immunology, issues in scientific conduct, and bioethics in microbiology. Students present current papers in a journal club format and gain experience in writing grant proposals.
MICRO 451. Senior Survey in Microbiology.
Cr. R. F. Prereq: Junior or Senior standing in Microbiology
Preparations for graduation. Topics include job search strategies, career information, mock interviews, graduate and professional school application processes and guidelines as well as outcomes assessment activities.

(Cross-listed with BIOL), (2-3) Cr. 3. F. Prereq: 10 credits in biological sciences Morphology, diversity, and ecology of fungi; their relation to agriculture, industry, and human health.

MICRO 475. Immunology.
(Dual-listed with MICRO 575), (3-0) Cr. 3. S. Prereq: MICRO 310
An examination of humoral and cellular immune function as well as the interaction of the cells and factors of the immune system that result in health and disease. Micro 475L optional. Credit for either Micro 475 or V MPM 520, but not both, may be applied to graduation.

MICRO 475L. Immunology Laboratory.
(1-4) Cr. 1. S. Prereq: Credit or enrollment in MICRO 310 or MICRO 475 or MICRO 575
Techniques in primary culture and tumor cell growth, measures of lymphocyte function, serological techniques and flow cytometry. Half semester course.

MICRO 477. Bacterial-Plant Interactions.
(Dual-listed with MICRO 577), (Cross-listed with PL P), (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: 3 credits in microbiology or plant pathology Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves.

MICRO 485. Soil and Environmental Microbiology.
(Dual-listed with MICRO 585), (Cross-listed with AGRON, ENSCI), (2-3) Cr. 3. F. Prereq: AGRON 154 or AGRON 402, MICRO 201 (MICRO 201L recommended) The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

MICRO 487. Microbial Ecology.
(Cross-listed with BIOL, ENSCI), (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

MICRO 490. Independent Study.
Cr. 1-5. Repeatable, maximum of 6 credits. F.S.SS. Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 490H. Independent Study, Honors.
Cr. 1-5, Repeatable, maximum of 6 credits. F.S.SS. Prereq: A minimum of 6 credits of 300-level or above coursework in microbiology, permission of instructor A maximum of 6 credits of Micro 490 may be used toward the total of 128 credits required for graduation.

MICRO 495. Internship.
Cr. 1-2. F.S. Prereq: At least 6 credits of 300-level or above coursework in microbiology, approval of academic adviser Participation in the Cooperative Extension Intern Program or an equivalent work experience. Written report of activities required. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

MICRO 502. Microbial Genetics and Genomics.
(Dual-listed with MICRO 402), (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: MICRO 302, BIOL 313
The fundamental concepts of bacterial and bacteriophage genetics including mutation, mechanisms of both vertical and horizontal genetic information transfer, gene regulation, and genetic approaches to study complex cellular processes. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics.

(Dual-listed with MICRO 407), (Cross-listed with FS HN), (3-0) Cr. 3. S. Prereq: MICRO 420
Examination of the various factors in the production of foods of animal origin, from animal production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. The two modules of this course will be 1) the procedures and processes which can affect the overall microbiological safety of the food, and 2) the Hazard Analysis Critical Control Point (HACCP) system.

MICRO 508. Virology.
(Dual-listed with MICRO 408), (3-0) Cr. 3. F. Prereq: BIOL 313 or BBMB 301, BIOL 314 recommended
The molecular virology and epidemiology of human, animal, plant, and insect viruses.

(Cross-listed with PL P), (2-6) Cr. 4. Alt. S., offered odd-numbered years. Prereq: PL P 408, BIOL 454, BBMB 405, CHEM 211 Hill. Plant viruses and the diseases they cause. Emphasis on epidemiology and control. Structure, function, and biochemical-biophysical properties of plant viruses.

MICRO 510. Insect-Virus Interactions: a Molecular Perspective.
(Dual-listed with MICRO 410), (Cross-listed with ENT), (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: Permission of an instructor Bonning, Bartholomay. Overview of insect-virus interactions including insect immunity to viruses, genetic enhancement of viral insecticides, transgenic mosquitoes, disruption of virus transmission, and the role of insect and virus genomics in combating viral disease of both human and agricultural importance.

MICRO 525. Intestinal Microbiology.
(Cross-listed with V MPM), Cr. 3. Alt. S., offered even-numbered years. Prereq: Micro 302, BIOL 313
Overview of commensal microbiota in the health and well-being of vertebrates. Topics include diversity of intestinal structure, microbial diversity/function, innate immune development, community interactions and metabolic diseases associated with alterations of the intestinal microbiome.

MICRO 530. Procaryotic Diversity and Ecology.
(Dual-listed with MICRO 430), (Cross-listed with BBMB), (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: MICRO 302, MICRO 302L
Survey of the diverse groups of procaryotes emphasizing important and distinguishing metabolic, phylogenetic, morphological, and ecological features of members of those groups.

MICRO 540. Livestock Immunogenetics.
(Cross-listed with AN S, V MPM), (2-0) Cr. 2. Alt. S., offered odd-numbered years. Prereq: AN S 561 or MICRO 575 or V MPM 520
Basic concepts and contemporary topics in genetic regulation of livestock immune response and disease resistance.

MICRO 551. Microbial Diversity and Phylogeny.
(1-0) Cr. 1. F. Prereq: MICRO 302, BIOL 313
Comparisons among the three kingdoms of life (Bacteria, Archaea, and Eukarya). Topics will include metabolism, adaptation, methods of phylogenetic analysis, and comparative genomics.

MICRO 552. Bacterial Molecular Genetics and Physiology.
(1-0) Cr. 1. F. Prereq: MICRO 302, BIOL 313
Review of genetics and selected physiological topics of model bacteria.

MICRO 553. Pathogenic Microorganisms.
(1-0) Cr. 1. F. Prereq: MICRO 302, BIOL 313
Review and contrast/comparison of common bacterial pathogens of plants and animals and their mechanisms of virulence, including toxins, protein secretion, host invasion and iron acquisition strategies. An overview of eukaryotic cell biology that is relevant to pathogenesis will also be included.

MICRO 554. Virology.
(1-0) Cr. 1. S. Prereq: MICRO 302, BIOL 313
Introduction to virus life cycles including entry, gene expression strategies, replication, and mechanisms to modify and overcome host defenses. The roles of specific viruses and sub-viral agents in animal and plant disease will also be included.

MICRO 555. Fungal Biology.
(1-0) Cr. 1. S. Prereq: MICRO 302, BIOL 313
Ecology, genetics, physiology and diversity of fungi, from yeasts to mushrooms, and their importance in human affairs.
MICRO 556. Ecology of Microorganisms.
(1-0) Cr. 1. S. Prereq: MICRO 302, BIOL 313
The study of microorganisms in their natural environments, with a focus on terrestrial and aquatic ecosystems, including eukaryotic hosts; interactions within biofilms and communities, including intercellular communication and symbioses; microbial adaptations to extreme environments; and metagenomic, genomic, molecular, and microscopy techniques for the study of microbes in natural systems.

MICRO 577. Bacterial-Plant Interactions.
(Dual-listed with MICRO 477). (Cross-listed with PL P). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: 3 credits in microbiology or plant pathology
Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves.

MICRO 586. Medical Bacteriology.
(Cross-listed with MICRO 475). (Cross-listed with V MPM). (3-0) Cr. 3. F. Prereq: BBMB 154 or AGRON 402; MICRO 201 (MICRO 201L recommended) Loyanchan. The living organisms in the soil and what they do. Emphasis on soil biota composition, the carbon cycle and bioremediation, soil-plant-microbial relationships, and environmental issues.

MICRO 585. Soil and Environmental Microbiology.
(Dual-listed with MICRO 487). (Cross-listed with EEOB, ENSCI). (3-0) Cr. 3. F. Prereq: Six credits in biology and 6 credits in chemistry
Introduction to major functional groups of autotrophic and heterotrophic microorganisms and their roles in natural systems.

MICRO 590. Special Topics.
Cr. 1-5. Repeatable. F.S.SS. Prereq: Permission of instructor
Courses for graduate students:
MICRO 604. Seminar.
(1-0) Cr. 1. Repeatable. F.S.
Course will expose students to the breadth of subdisciplines within microbiology, offer opportunities for direct interaction between the students and the faculty members within the Interdepartmental Microbiology Graduate Program, and promote interactions among the students within the program. Offered on a satisfactory-fail basis only.

MICRO 608. Molecular Virology.
(Cross-listed with PL P, V MPM). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: BBMB 405 or GDCB 511
Advanced study of virus host-cell interactions. Molecular mechanisms of viral replication and pathogenesis.

MICRO 615. Molecular Immunology.
(Cross-listed with BBMB, V MPM). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: BBMB 405 or BBMB 502
Current topics in molecular aspects of immunology: T and B cell receptors; major histocompatibility complex; antibody structure; immunosuppressive drugs and viruses; and intracellular signaling pathways leading to expression of genes that control and activate immune function.

MICRO 625. Mechanisms of Bacterial Pathogenesis.
(Cross-listed with V MPM). (4-0) Cr. 4. Alt. S., offered odd-numbered years. Prereq: Credit in Biochemistry and Microbiology
Review of current concepts in specific areas of microbial pathogenesis including the genetic basis for bacterial disease, genetic regulation and control of virulence factors and their mechanisms of action, and host-pathogen interactions at the cellular and molecular levels. The application of microbial genetics to understanding pathogenesis will be included.

MICRO 626. Advanced Food Microbiology.
(Cross-listed with FS HN, TOX). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: FS HN 420 or FS HN 421 or FS HN 504
Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

MICRO 627. Rapid Methods in Food Microbiology.
(Cross-listed with FS HN, TOX). (2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: FS HN 420 or FS HN 421 or FS HN 504
Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and "next generation" testing formats now in development.

MICRO 679. Light Microscopy.
(Cross-listed with EEOB, GDCB). (2-9) Cr. 5. Prereq: Permission of instructor
Current theories encompassing light optics and their applications for specimen preservation, paraffin and resin sectioning, general staining, histochemistry, cytophotometry, immunocytochemistry, autoradiography, image digitization, processing and presentation, and digital macro- and micrography. Limit of 10 students.

(Cross-listed with EEOB, ENSCI). (2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: AGRON 585
Chemistry of soil organic matter and biochemical transformations brought about by microorganisms and enzymes in soils.

MICRO 690. Current Topics.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Colloquia or advanced study of specific topics in a specialized field.

MICRO 690A. Current Topics: Microbiology.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Colloquia or advanced study of specific topics in a specialized field.

MICRO 690B. Current Topics: Immunology.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Colloquia or advanced study of specific topics in a specialized field.

MICRO 690C. Current Topics: Infectious Diseases.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
Colloquia or advanced study of specific topics in a specialized field.

(Cross-listed with PL P). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: PL P 506 or BBMB 405 or GEN 411 or MICRO 402 or strong background in molecular biology
Seminal and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete a research proposal writing and peer review exercise.

MICRO 697. Graduate Research Rotation.
Cr. arr. Repeatable. F.S.
Graduate research projects performed under the supervision of selected faculty members in the Interdepartmental Microbiology major.

MICRO 698. Seminar in Molecular, Cellular, and Developmental Biology.
(Cross-listed with BBMB, GDCB, MCDB, V MPM). (2-0) Cr. 1-2. Repeatable. F.S.
Student and faculty presentations.

MICRO 699. Research.
Cr. arr. Repeatable.
Natural Resource Ecology and Management

The department addresses a broad spectrum of natural resource and environmental issues in a holistic approach to learning, discovery and engagement. Our vision of natural resources is that informed protection and management of natural resources involves an integration of biological, economic, and social considerations. Such an integrated and comprehensive approach to the education of future generations of natural resource managers and scientists is needed in order to sustain viable landscapes, facilitate strong communities, and produce desired goods, services, and functions from our natural resources.

Our educational mission for the undergraduate and graduate programs is to provide those learning experiences and opportunities that will ensure students can learn to function effectively in their chosen fields.

Central to that effective functioning are the abilities to:

• Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.
• Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.
• Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.
• Assess, analyze, synthesize, and evaluate information fairly and objectively.
• Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem solving approaches.
• Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.
• Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.
• Recognize and interpret resource problems and opportunities across spatial scales from local to global.
• Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.
• Exercise leadership skills as professionals and engaged citizens.
• Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.
• Exercise life-long learning skills developed before graduation.

Undergraduate Study

The Department of Natural Resource Ecology and Management offers work for the Bachelor of Science degree with majors in animal ecology or forestry. The department participates in interdisciplinary programs in biology, environmental studies, international studies, and pest management. By proper selection of free and restricted elective courses, students can obtain a minor or a second major in these programs or other disciplines.

The Department provides numerous scholarships; application information is available in the departmental Student Services Center.

Animal Ecology (A Ecl)

The animal ecology curriculum provides its majors with an understanding of ecological principles and processes and their applications to natural resource management. It is oriented toward students desiring a general and flexible program in environmental biology and for those planning graduate study. Students may select from four options: Fisheries and Aquatic Sciences, Interpretation of Natural Resources, Preveterinary and Wildlife Care, or Wildlife. Graduates find employment as aquaculturists, aquatic ecologists, wildlife biologists, fisheries biologists, resource managers, and ecologists for industry, environmental consulting firms, natural resource and environmental agencies and organizations, zoos, and as educators.

Graduates of the Animal Ecology major understand the basic principles of animal biology, ecology and management, and relevant aspects of scientific communication, basic mathematics and sciences, computing applications, and personal and professional development. Four specific options prepare students for careers in interpretation of natural resources, fisheries and aquatic sciences, pre-veterinary and wildlife care, and wildlife. Each option has specific outcome expectations that include (1) the scope of the specialization and its relationships to broader aspects of animal ecology, biotic resource management, and other allied scientific disciplines and professions, (2) career opportunities and requirements, and (3) knowledge and skills appropriate for employment at technical and practitioner levels in each discipline. Graduates are able to communicate and work effectively in the multidisciplinary arena of ecology and natural resource management.

All options require three months (400 hours) of relevant work experience or study at a biological station prior to graduation. The latter may be accomplished at the university’s affiliate field stations: Iowa Lakeside Laboratory at West Lake Okoboji, and Gulf Coast Research Laboratory at Ocean Springs, Mississippi. Information on these laboratories is available from the department’s Student Services Center.

Preveterinary medicine preparation may be achieved while satisfying degree requirements in animal ecology.

Additional education and training can lead to other opportunities in such areas as research and management, natural resources planning and administration, teaching, and environmental consulting, among others. Graduate training is necessary for many specialized positions within the fields of animal ecology. Students preparing for graduate study should consult with their academic adviser concerning appropriate coursework.

Students wishing to be certified by the American Fisheries Society or The Wildlife Society need to consult with their advisors in selecting required courses in their respective programs. The formal application then needs to be completed and submitted for review by their professional societies. Certification in either society has many professional benefits and may be required or recommended for employment by federal and state agencies and private industry.

Students seeking certification to teach biology in secondary schools must meet requirements of the College of Human Sciences as well as those of the Animal Ecology curriculum. In addition, they must apply formally for admission to the teacher education program (see Index, Education Program). Students with interest in careers in outdoor writing are encouraged to obtain a minor or a second major in journalism (see Index, Journalism and Communication, Courses and Programs). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Index, Criminal Justice Studies).

Minor - Animal Ecology

The department offers a minor in animal ecology that may be earned by taking 15 credits in the department including:

- A ECL 312 Ecology 4
- A ECL 365 Vertebrate Biology 4
- NREM 120 Introduction to Renewable Resources 3

Plus four additional credits of Animal Ecology or NREM courses at the 300 level or above.

Forestry (For)

The forestry curriculum offers courses dealing with the management of forest ecosystems for multiple benefits including wood and fiber products, biodiversity, recreation, water, wilderness, and wildlife. Conservation and preservation of natural resources are emphasized. The department offers work for the Bachelor of Science degree with a major in forestry and options in forest ecosystem management, interpretation of natural resources, urban and community forestry, natural resource conservation and restoration, or sustainable materials science and technology. All options lead to a professional degree in forestry (Bachelor of Science). The forestry major has been accredited by the Society of American Foresters (SAF) since 1935. The Council for Higher Education Accreditation recognizes SAF as the specialized accrediting body for forestry education in the United States. The primary goal of the undergraduate curriculum in forestry is to educate foresters to be capable of scientifically managing the nation’s forest lands and related ecosystems - private and public.

Graduates understand and can apply scientific principles associated with forests, forest ecosystem management, and wood and non-wood products. Graduates are able to communicate effectively and work well in teams. They are capable of preparing and delivering effective oral and written communication of scientific and technical decisions to professional and lay audiences. They are proficient in technical skills such as measurements, computer usage, inventory, economic analysis, data and situation analysis, and ecosystem assessment. They recognize the importance of ethics in forestry and are sensitive to cultural diversity and broad environmental concerns.

Graduates of the forest ecosystem management option are skilled at understanding how forests function and how forests can be managed to produce desired goods (wood, fiber, recreation, wildlife habitat) and services (clean water, carbon sequestration, wilderness) in the long-run. They are skilled at interpretation of interactions and effects of abiotic and biotic factors in forests and quantification of bio-physical, social, and economic outputs from forest ecosystems. They are skilled at complex decision-making involving private and public forest resources where ethical, legal, social, economic, and ecological dimensions are explicitly considered.
Graduates of the interpretation of natural resources option are skilled at communicating with the public about the values associated with forest ecosystems and providing educational programs for all ages.

Graduates of the urban and community forestry option are able to combine biological, social, legal, and economic expertise to effectively manage trees or forests in an urban setting. They are skilled at decision-making related to site assessment, and long-term management of urban trees and forests to achieve multiple goals.

Graduates of the natural resource conservation and restoration option are skilled at assessing the natural functions of the environment and human impacts. They are skilled at interpretation of forest and other natural environments and making decisions relating to their conservation and preservation.

Graduates of the sustainable materials science and technology option understand the anatomical, physical, and chemical properties of wood and other bio-renewable materials, and know wood processing operations involved in drying, composite materials manufacturing, and chemical treatment.

In consultation with their adviser, students can select elective courses related to elective courses in the forest ecosystem management option to emphasize forest ecology; wildlife, wilderness, and recreation management; water quality and erosion protection; quantitative-analytical techniques; business and marketing; and other areas related to natural resource management. Elective courses in the urban and community forestry option can be selected to emphasize plant health, policy and planning, ecology, hydrology, sociology, business administration, or horticulture/design. Elective courses related to the natural resource conservation and restoration option can be selected to emphasize, ecology, wildlife, recreation, nature interpretation, landscape design, sociology and ethics of conservation and preservation. Similarly, elective courses in the sustainable materials science and technology option can be selected to emphasize wood production, bio-renewable materials, wood fiber, business and marketing, and quality assurance.

Graduate courses in the interpretation of natural resources option can be selected to emphasize natural history, animal ecology, and environmental education.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resources for commodity and non-commodity multiple benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agroforestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in production, product development, quality control, and marketing.

With advanced graduate study, the range of professional job opportunities for a person with a B.S. in forestry is expanded. Opportunities include research and education as well as more specialized managerial and administrative positions with private firms and public agencies.

During fall semester of the second year of study (sophomore year, typically), forestry students are required to enroll in the department’s integrated forestry modules consisting of:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FOR 201</td>
<td>Forest Biology</td>
<td>2</td>
</tr>
<tr>
<td>FOR 202</td>
<td>Wood Utilization</td>
<td>2</td>
</tr>
<tr>
<td>FOR 203</td>
<td>Resource Measurements/Evaluation</td>
<td>2</td>
</tr>
<tr>
<td>FOR 204</td>
<td>Forest Ecosystem Decision-Making</td>
<td>2</td>
</tr>
<tr>
<td>FOR 205</td>
<td>Integrated Forestry Laboratory</td>
<td>3</td>
</tr>
<tr>
<td>FOR 206</td>
<td>Fall Forestry Camp</td>
<td>4</td>
</tr>
</tbody>
</table>

That semester, consisting entirely of forestry coursework, is designed to give students an early understanding of the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week off-campus fall camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer students should check with the department for counsel on timing their completion of the integrated forestry modules.

**Minor - Forestry**

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FOR 302</td>
<td>Silviculture</td>
<td>3</td>
</tr>
<tr>
<td>FOR 356</td>
<td>Dendrology</td>
<td>4</td>
</tr>
<tr>
<td>FOR 451</td>
<td>Forest Resource Economics and Quantitative Methods</td>
<td>4</td>
</tr>
<tr>
<td>FOR 452</td>

<td>3</td>
</tr>
<tr>
<td>FOR 487</td>
<td>Physical Properties of Wood</td>
<td>4</td>
</tr>
<tr>
<td>NREM 490B</td>
<td>Independent Study: Forestry</td>
<td>1-4</td>
</tr>
</tbody>
</table>

**Graduate Study**

The Department of Natural Resource Ecology and Management offers work for the degrees Master of Science and Doctor of Philosophy with majors in fisheries biology, forestry, and wildlife ecology. A non-thesis masters degree is available for students desiring a general degree program without thesis research. Students may also major in interdepartmental graduate majors in bio-research resources technology, ecology and evolutionary biology, environmental science, genetics, plant physiology, sustainable agriculture, or toxicology (see Index). All students are required to teach and conduct research as part of their training for the Ph.D. degree.

**Fisheries Biology and Wildlife Ecology**

Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings.

Personnel of the U.S. Geological Survey’s Iowa Cooperative Fish and Wildlife Research Unit contribute significantly to the graduate program of the department through teaching and research. Governmental agencies such as the U.S. Fish and Wildlife Service, Natural Resources Conservation Service and the Iowa Department of Natural Resources, and non-governmental agencies such as The Nature Conservancy and the Iowa Natural Heritage Foundation also contribute to the graduate program by funding research, providing in-kind support, and providing numerous formal and informal mentoring relationships.

No more than two dual-listed animal ecology courses may be applied for major graduate credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.

**Forestry**

The department offers programs leading to the degrees of Master of Science and Doctor of Philosophy with a major in forestry and minor work to students taking major work in other departments.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled at communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to, and suitable for, students who have majored in forestry or related natural resource fields. A non-thesis major’s option is available.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry.
Curriculum in Animal Ecology

Total Degree Requirement: 128 cr.

Only 68 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better):

- English composition 6 cr.
- Speech fundamentals 3 cr.

Communication/Library 16 cr.

- ENGL 150 Critical Thinking and Communication 3 cr.
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3 cr.
- SP CM 212 Fundamentals of Public Speaking 3 cr.

Plus 6 credits of the following:

- ENGL 207 Introduction to Creative Writing 3 cr.
- ENGL 302 Business Communication 3 cr.
- ENGL 303 Free-Lance Writing for Popular Magazines 3 cr.
- ENGL 304 Creative Writing: Fiction 3 cr.
- ENGL 305 Creative Writing: Nonfiction 3 cr.
- ENGL 306 Creative Writing: Poetry 3 cr.
- ENGL 309 Report and Proposal Writing 3 cr.
- ENGL 310 Rhetorical Analysis 3 cr.
- ENGL 312 Biological Communication 3 cr.
- ENGL 314 Technical Communication 3 cr.
- AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences 3 cr.
- JL MC 201 Reporting and Writing for the Mass Media 3 cr.
- P R 305 Publicity Methods 3 cr.
- SP CM 312 Business and Professional Speaking 3 cr.
- SP CM 313 Communication in Classrooms and Workshops 3 cr.
- LIB 160 Information Literacy 3 cr.

Total Credits 15 cr.

Humanities and Social Sciences: 6 cr.

- Approved Humanities course 3 cr.
- Approved Social Science course 3 cr.

Total Credits 6 cr.

Ethics: 3 cr.

- 3 cr. from approved ethics list.

Life Sciences: 6 cr.

- BIOL 211 Principles of Biology I 3 cr.
- Approved Life Sciences course 3 cr.

Total Credits 6 cr.

Mathematical Sciences: 9 cr.

- MATH 140 College Algebra 3 cr.
- MATH 142 Trigonometry and Analytic Geometry 3 cr.
- STAT 101 Principles of Statistics 3-4 cr.
- or STAT 104 Introduction to Statistics 3-4 cr.

Total Credits 9-10 cr.

Physical Sciences: 13-14 cr.

- CHEM 163 College Chemistry 4 cr.
- CHEM 163L Laboratory in College Chemistry 1 cr.
- CHEM 177 and CHEM 177L 3 cr.
- CHEM 231 Elementary Organic Chemistry 3 cr.
- CHEM 231L Laboratory in Elementary Organic Chemistry 1 cr.
- CHEM 331L, CHEM 331L, CHEM 332 3 cr.
- PHYS 115 Physics for the Life Sciences 4 cr.
- PHYS 115L Laboratory in Physics for the Life Sciences 1 cr.

or PHYS 111

Total Credits 14 cr.

Biological Sciences: 20 cr.

- NREM 110 Orientation in Natural Resource Ecology and Management 1 cr.
- NREM 120 Introduction to Renewable Resources 3 cr.
- NREM 211 Careers in Natural Resources 1 cr.
- A ECL 312 Ecology 4 cr.
- A ECL 365 Vertebrate Biology 4 cr.
- BIOL 211 Principles of Biology I 3 cr.
- BIOL 211L Principles of Biology Laboratory I 1 cr.
- BIOL 212 Principles of Biology II 3 cr.
- BIOL 212L Principles of Biology Laboratory II 1 cr.

Total Credits 21 cr.

Practical Experience:

Fisheries and Aquatic Sciences option

- A ECL 321 Fish Biology 3 cr.
- A ECL 486 Aquatic Ecology 3 cr.
- A ECL 486L Aquatic Ecology Laboratory 1 cr.

One of the following:

- MATH 160 Survey of Calculus 4 cr.
- MATH 165 Calculus I 3 cr.
- MATH 181 Calculus and Mathematical Modeling for the Life Sciences I 4 cr.

Plus 20 credits from approved list 20 cr.

Total Credits 31 cr.

Interpretation of Natural Resources option

- A ECL 366 Natural History of Iowa Vertebrates 3 cr.
- BIOL 366 Plant Systematics 4 cr.
- ENT 370 Insect Biology 3 cr.

One of the following:

- AGRON 154 Fundamentals of Soil Science 3 cr.
- AGRON 206 Introduction to Weather and Climate 3 cr.
- ASTRO 120 The Sky and the Solar System 3 cr.
- GEOL 100 The Earth 3 cr.
- GEOL 101 Environmental Geology: Earth in Crisis 3 cr.
- GEOL 108 Introduction to Oceanoigraphy 3 cr.

Plus additional credits from approved list to total 33 credit hours.

Total Credits 32-35 cr.

Prevetinary & Wildlife care option

- AN S 214 Domestic Animal Physiology 3 cr.
- or B M S 329 Anatomy and Physiology of Domestic Animals 3 cr.

One of the following:

- A ECL 551 Behavioral Ecology 3 cr.
- AN S 336 Domestic Animal Behavior and Well-Being 3 cr.
- BIOL 354 Animal Behavior 3 cr.
- ANTHR 438 Primate Evolutionary Ecology and Behavior 3 cr.

Three credits from the following:

- A ECL 321 Fish Biology 3 cr.
- A ECL 366 Natural History of Iowa Vertebrates 3 cr.
- A ECL 457 Herpetology 3 cr.
- A ECL 458 Ornithology 3 cr.
- A ECL 458L Ornithology Laboratory 3 cr.
- A ECL 459 Mammalogy 3 cr.
- A ECL 459L Mammalogy Laboratory 3 cr.

One of the following:

- 3 cr.
Wildlife option

Three hours from the following:

- BIOL 335 Principles of Human and Other Animal Physiology
- BIOL 351 Comparative Chordate Anatomy
- BIOL 352 Vertebrate Histology
- BIOL 434 Endocrinology

One of the following:

- AN S 331 Domestic Animal Reproduction
- BIOL 313 Principles of Genetics
- BIOL 423 Developmental Biology
- GEN 320 Genetics, Agriculture and Biotechnology
- NREM 315 Genetics for Natural Resource Managers.

One of the following:

- A ECL 401 Intro to Aquatic Animal Medicine
- A ECL 442 Aquaculture
- A ECL 454 Principles of Wildlife Disease
- AN S 319 Animal Nutrition
- AN S 493 Workshop in Animal Science
- BIOL 353 Introductory Parasitology
- MICRO 201 Introduction to Microbiology
- MICRO 201L Introductory Microbiology Laboratory

3 cr from course level 300-500 from A ECL or NREM

Plus additional credits from approved list to total 33 credit hours.

Total Credits 33

**Wildlife option**

A ECL 371 Ecological Methods

A ECL 451 Wildlife Ecology and Management

BIOL 313 Principles of Genetics

or GEN 320 Genetics, Agriculture and Biotechnology

or NREM 315 Genetics for Natural Resource Managers.

BIOL 366 Plant Systematics

One of the following:

- MATH 160 Survey of Calculus
- MATH 165 Calculus I
- MATH 181 Calculus and Mathematical Modeling for the Life Sciences I

Six hours from the following:

- A ECL 457 Herpetology
- A ECL 458 Ornithology
- A ECL 458L Ornithology Laboratory
- A ECL 459 Mammalogy
- A ECL 459L Mammalogy Laboratory

Six hours from the following:

- A ECL 455 International Wildlife Issues
- ENV S 293 Environmental Planning
- ENV S 383 Environmental Politics and Policies
- NREM 270 Foundations in Natural Resource Policy and History
- NREM 385 Natural Resource Policy
- NREM 452 Ecosystem Management
- NREM 460 Controversies in Natural Resource Management

Three hours from the following:

- A ECL 415 Ecology of Freshwater Invertebrates, Plants, and Algae
- A ECL 454 Principles of Wildlife Disease
- A ECL 516 Avian Ecology
- A ECL 551 Behavioral Ecology
- ANTHR 438 Primate Evolutionary Ecology and Behavior
- BIOL 315 Biological Evolution
- BIOL 336 Ecological and Evolutionary Animal Physiology
- BIOL 354 Animal Behavior
- BIOL 354L Laboratory in Animal Behavior
- BIOL 471 Introductory Conservation Biology
- EEOB 507 Advanced Animal Behavior
- ENT 370 Insect Biology

Five hours from the following:

- A ECL 415 Ecology of Freshwater Invertebrates, Plants, and Algae
- AGRON 317 Principles of Weed Science
- BIOL 355 Plants and People
- BIOL 454 Plant Anatomy
- BIOL 456 Principles of Mycology
- BIOL 474 Plant Ecology
- EEOB 564 Wetland Ecology
- FOR 356 Dendrology

Plus additional credits from approved list to total 42 credit hours.

Total Credits 38

**Curriculum in Forestry**

**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications Proficiency (with a C or better):**

- English composition 6
- Speech fundamentals 3

Total Credits 9

**Communication/Library: 12.5 cr.**

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3

One of the following:

- ENGL 302 Business Communication
- ENGL 309 Report and Proposal Writing
- ENGL 312 Biological Communication
- ENGL 314 Technical Communication
- SP CM 212 Fundamentals of Public Speaking 3
- LIB 160 Information Literacy 1

Total Credits 13

**Humanities and Social Sciences: 6 cr.**

Three credit hours from approved humanities list 3

Total Credits 3

**Ethics: 3 cr.**

3 cr. from approved list.

**Life Sciences: 6 cr.**

- BIOL 211 Principles of Biology I 3

Approved Life Science course 3

Total Credits 6

**Mathematics, Physical and Life Sciences: 22 cr.**

- MATH 140 College Algebra 3
- MATH 150 Discrete Mathematics for Business and Social Sciences 3
- STAT 101 Principles of Statistics 4
- CHEM 163 College Chemistry 4
- CHEM 163L Laboratory in College Chemistry 1
- BIOL 211 Principles of Biology I 3
- BIOL 211L Principles of Biology Laboratory I 1
- AGRON 154 Fundamentals of Soil Science 3

Total Credits 22

**Forestry: 29 cr.**

- NREM 120 Introduction to Renewable Resources 3
- NREM 104 Practical Work Experience R
- NREM 110 Orientation in Natural Resource Ecology and Management 1
- NREM 211 Careers in Natural Resources 1
Natural Resource Conservation and Restoration

Electives: Students majoring in forestry are required to choose one of the following options at the end of their sophomore year: forest ecosystem management; sustainable material science and technology; urban and community forestry; natural resource conservation and restoration; or interpretation of natural resources.

Forest Ecosystem Management

FOR 201 Forest Biology 2
FOR 202 Wood Utilization 2
FOR 203 Resource Measurements/Evaluation 2
FOR 204 Forest Ecosystem Decision-Making 2
FOR 205 Integrated Forestry Laboratory 3
FOR 206 Fall Forestry Camp 4
FOR 302 Silviculture 3
FOR 451 Forest Resource Economics and Quantitative Methods 4
FOR 454 Forestry Practicum 3

Total Credits 30

One course from the following:

FOR 356 Principles of Interpretation 3
NREM 301 Natural Resource Ecology and Soils 4
NREM 330 Principles of Interpretation 3
NREM 390 Fire Ecology and Management 3
NREM 407 Watershed Management 4
MATH 151 Calculus for Business and Social Sciences 3-4
or MATH 181 Calculus and Mathematical Modeling for the Life Sciences I

One course from:

PL P 416 Forest Insect and Disease Ecology 4
NREM 385 Natural Resource Policy 3
NREM 460 Controversies in Natural Resource Management 3

Total Credits 44-45

Sustainable Materials Science and Technology

FOR 280 Wood Properties and Identification 4
FOR 480 Wood Anatomy and Fiber Analysis 3
FOR 481 Conversion of Lignocellulosic Materials 3
FOR 483 Wood Deterioration and Preservation 3
FOR 485 Wood and Natural Fiber Composites 3
FOR 486 Drying Processes for Wood and Other Lignocellulosic Materials 3
FOR 487 Physical Properties of Wood 4
MATH 151 Calculus for Business and Social Sciences 3
MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
TSM 270 Principles of Injury Prevention 3
or TSM 310 Total Quality Improvement 3

Total Credits 29

Urban and Community Forestry

BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
FOR 280 Wood Properties and Identification 4
C R P 201 Making the Metropolis 3
or C R P 301 Planning Methods Studio 3
HORT 342 Landscape Plant Installation, Establishment, and Maintenance 3
FOR 356 Dendrology 4
FOR 452 Ecosystem Management 3
FOR 475 Urban Forestry 3
MATH 151 Calculus for Business and Social Sciences 3-4
or MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
PL P 416 Forest Insect and Disease Ecology 4
SOC 310 Community 3
or SOC 382 Environmental Sociology 3

One course from the following:

NREM 385 Natural Resource Policy 3
NREM 460 Controversies in Natural Resource Management 3

Total Credits 37-38

Courses primarily for undergraduates:

A ECL 312. Ecology.
(Cross-listed with BIOL, ENSCI). (3-3) Cr. 4. F.SS. Prereq: BIOL 211L and BIOL 212L
Fundamental concepts and principles of ecology dealing with organisms, populations, communities and ecosystems. Laboratory and field exercises examine ecological principles and methods as well as illustrate habitats.

A ECL 312L. Ecology.
(Cross-listed with ENSCI, IA LL). Cr. 4. SS.
An introduction to the principles of ecology at the population, community and ecosystem level. Field studies of local lakes, wetlands and prairies are used to examine factors controlling distributions, interactions, and roles of plants and animals in native ecosystems.
A ECL 311. Fish Biology. (2-3) Cr. 3. S. Prereq: A ECL 365.
Biology, ecology, and evolution of fishes. Emphasis on structure, physiology, and behavior, including a focus on the conservation and management of fishes and their habitats. Laboratory focus on fish morphology, survey methods, identification, distribution, habits, and habitats of fishes.

A ECL 326I. Ornithology. (Cross-listed with IA LL). Cr. 4. SS.
The biology, ecology, and behavior of birds with emphasis on field studies of local avifauna. Group projects stress techniques of population analysis and methodology for population studies.

A ECL 365. Vertebrate Biology. (Cross-listed with BIOL). (3-2) Cr. A. F. Prereq: BIOL 212, BIOL 212L.
Evolution, biology, and classification of fish, amphibians, reptiles, birds, and mammals. Emphasis on a comparative analysis of the structure and function of organ systems. Laboratory exercises concentrate on morphology and identification of orders of vertebrates.

A ECL 366. Natural History of Iowa Vertebrates. (2-3) Cr. 3. S. Prereq: BIOL 211, BIOL 211L, BIOL 212, BIOL 212L.
Vertebrate fauna of Iowa, including fishes, amphibians, reptiles, birds, and mammals. Species identification, habitat requirements, community structure and assessment, conservation issues that include historical population changes and value of wild animals to the region's ecological and economic health.

A ECL 371. Ecological Methods. (Cross-listed with BIOL). (2-3) Cr. 3. F. Prereq: A ECL 312; STAT 101 or STAT 104.
Quantitative techniques used in management of natural resources with emphasis on inventory and manipulation of habitat and animal populations.

A ECL 401. Intro to Aquatic Animal Medicine. (Cross-listed with B M S). (1-2) Cr. 1. S.
8 week course. Introductory course with focus on fin fish production, health and medicine. Course content will help define future roles for veterinarians, producers, and service providers. Emphasis will be placed on anatomy, pathology, infectious diseases, nutrition, regulatory constraints in production, food safety, and current research. Field trip to aquaculture facility.

Animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, and parental care will be examined in the field in order to evaluate various ecological and evolutionary theories of animal behavior.

Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphases on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 419I. Vertebrate Ecology and Evolution. (Cross-listed with IA LL). Cr. 4. SS.
Field and laboratory study of representative vertebrates of northwestern Iowa. Observations and experimentation emphasize ecological histories by integrating concepts of functional morphology, behavioral ecology, and evolutionary biology.

A ECL 420I. Amphibians and Reptiles. (Cross-listed with IA LL). Cr. 4. Alt. SS., offered even-numbered years. Prereq: Two semesters of biology.
Ecology, behavior, and conservation biology of amphibians and reptiles with emphasis on their anatomy and morphology; temperature and water regulation; locomotion; life history; reproduction; population and community ecology; and conservation.

A ECL 425. Aquatic Insects. (Dual-listed with A ECL 525). (Cross-listed with ENT). (2-3) Cr. 3. Alt. S., offered odd-numbered years. Prereq: BIOL 312 or equivalent.
Morphology, ecology, diversity, and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 440. Fishery Management. (Dual-listed with A ECL 540). (2-3) Cr. 3. F. Prereq: A ECL 312, A ECL 321, STAT 101 or STAT 104; credit or enrollment in A ECL 486.
Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A ECL 442. Aquaculture. (Dual-listed with A ECL 542). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: credit or enrollment in A ECL 321.
Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.

Ecological theory and practice of wildlife management, including, population ecology, habitat management, and current issues in the field. Course involves a series of case studies addressing actual wildlife issues using field and quantitative methods.

A ECL 454. Principles of Wildlife Disease. (Dual-listed with A ECL 554). (3-0) Cr. 3. S. Prereq: Junior standing and at least 10 credits in biological sciences at the 300+ level.
Ecological and epidemiological aspects of diseases as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationships among wildlife, domestic animal, and human health.

A ECL 455. International Wildlife Issues. (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: A ECL 365, A ECL 312 or graduate standing; NREM 120.
Biological, political, social, and economic factors affecting the management of international wildlife resources.

Meets International Perspectives Requirement.

A ECL 457. Herpetology. (Cross-listed with BIOL). (2-0) Cr. 2. F. Prereq: BIOL 351 or BIOL 365.
Biology, evolution, and ecology of amphibians (salamanders, frogs, caecilians) and reptiles (lizards, snakes, tuatara, turtles, crocodilians). Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of amphibians and reptiles in ecosystems, and conservation. Laboratory focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 457L. Herpetology Laboratory. (Cross-listed with BIOL). (0-3) Cr. 1. F. Prereq: BIOL 351 or BIOL/A ECL 365; concurrent registration in BIOL 457 or A ECL 457.
Laboratory to accompany Biology/Animal Ecology 457. Focus on survey methods, identification, relationships, distribution, habits, and habitats of amphibians and reptiles.

A ECL 458. Ornithology. (Cross-listed with BIOL). (2-0) Cr. 2. S. Prereq: A ECL 365 or BIOL 351.
Biology, evolution, ecology and taxonomy of birds. Emphasis on structure, physiology, behavior, communication, navigation, reproduction, and conservation.

A ECL 458L. Ornithology Laboratory. (Cross-listed with BIOL). (0-3) Cr. 1. S. Prereq: BIOL 351 or AECL/BIOl 365.
Concurrent enrollment in AECL/BIOL 458 is required.

Laboratory complements lecture topics with emphasis on external anatomy, identification and distribution of Midwest birds, and field trips.

A ECL 459. Mammalogy. (Cross-listed with BIOL). (2-0) Cr. 2. S. Prereq: BIOL 351 or A ECL 365.
Biology, ecology, and evolution of mammals. Emphasis on structure, physiological adaptation to different environments, behavior, reproduction, roles of mammals in ecosystems, and conservation.

A ECL 459L. Mammalogy Laboratory. (Cross-listed with BIOL). (0-3) Cr. 1. S. Prereq: BIOL 351 or BIOL/A ECL 365; concurrent enrollment in AECL 459 or BIOL 459 required.
Laboratory focus on identification, survey methods, distribution, habits, and habitats of mammals. Several field trips.

Courses taken at Gulf Coast Research Laboratory and other marine biological stations are transferred to Iowa State University under this number.

A ECL 486. Aquatic Ecology. (Cross-listed with BIOL, ENSCI). (3-0) Cr. 3. F. Prereq: BIOL 312 or EnSci 381 or EnSci 402 or NREM 301.
Structure and function of aquatic ecosystems with application to fishery and pollution problems. Emphasis on lacustrine, riverine, and wetland ecology.
A ECL 486L. Aquatic Ecology Laboratory.
(Cross-listed with BIOL, ENSCI). (0-3) Cr. 1. F. Prereq: Concurrent enrollment in BIOL 486
Field trips and laboratory exercises to accompany 486. Hands-on experience with aquatic research and monitoring techniques and concepts.

Courses primarily for graduate students, open to qualified undergraduates:

A ECL 515. Ecology of Freshwater Invertebrates, Plants, and Algae.
(Dual-listed with A ECL 415). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: A ECL 312
Identification, biology, and ecological requirements of freshwater invertebrates, plants and algae. Additional emphasis on community sampling methods and analysis, and use of organisms as tools for aquatic ecosystem health assessment.

A ECL 516. Avian Ecology.
(3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: A ECL 365, A ECL 312, or graduate standing.
Current topics and theories including avian breeding and foraging ecology, population biology, community structure, habitat selection, field methodologies, and data interpretation.

(Dual-listed with A ECL 418). (Cross-listed with ENSCI). (2-3) Cr. 3. Alt. F., offered odd-numbered years. Prereq: 486
Biological, chemical, physical, and geological processes that determine the structure and function of flowing water ecosystems. Current ecological theories as well as applications to stream management for water quality and fisheries.

A ECL 520. Fisheries Science.
(3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: A ECL 312, A ECL 321
Concepts, approaches, and techniques for assessment of recreational and commercial fisheries. Scope will range from individual fish to entire ecosystems, both freshwater and marine.

A ECL 523L. Fish Ecology.
(Cross-listed with IA LL). Cr. 4. Alt. SS., offered even-numbered years.
Basic principles of fish interaction with the biotic and abiotic environment. Field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa.

A ECL 525. Aquatic Insects.
(Dual-listed with A ECL 425). (Cross-listed with ENTH). (2-3) Cr. 3. Alt. S., offered odd-numbered years. Prereq: BIOL 312 or equivalent
Courtney. Morphology, ecology, diversity and significance of aquatic insects, with emphasis on the collection, curation and identification of taxa in local streams and lakes.

A ECL 526L. Advanced Field Ornithology.
(Cross-listed with IA LL). Cr. 2. SS. Prereq: Concurrent registration in IA LL 326L
Field study of birds of the upper Midwest; extended field trip to Minnesota and Wisconsin; individual or group project.

A ECL 531. Conservation Biology.
(Cross-listed with EEOB). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: BIOL 312; BIOL 313 or graduate standing
Examination of conservation issues from a population and a community perspective. Population-level analysis will focus on the role of genetics, demography, and environment in determining population viability. Community perspectives will focus on topics such as habitat fragmentation, reserve design, biodiversity assessment, and restoration ecology.

A ECL 531L. Conservation Biology.
(Cross-listed with EEOB, IA LL). Cr. 4. Alt. SS., offered even-numbered years.
Prereq: IA LL 312L
Population-and community-level examination of factors influencing the viability of plant and animal populations from both demographic and genetic perspectives; assessment of biodiversity; design and management of preserves.

A ECL 535L. Restoration Ecology.
(Cross-listed with EEOB, ENSCI, IA LL). Cr. 4. Alt. SS., offered even-numbered years. Prereq: A course in ecology
Ecological principles for the restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations. Emphasis on the restoration of prairie and wetland vegetation.

A ECL 540. Fishery Management.
(Dual-listed with A ECL 440). (2-3) Cr. 3. F. Prereq: A ECL 312, A ECL 321, STAT 101 or STAT 104, credit or enrollment in A ECL 486
Biological basis of fishery management, fishery problems, and management practices for freshwater, anadromous, and marine fisheries.

A ECL 542. Aquaculture.
(Dual-listed with A ECL 442). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: credit or enrollment in A ECL 321
Concepts related to the culture of aquatic organisms including culture systems, water quality, nutrition, genetics, diseases, and marketing.

(2-2) Cr. 3. Alt. S., offered even-numbered years. Prereq: a course in ecology or animal behavior
The study of how an animal's behavior affects its ability to survive and reproduce in its environment. Course topics, such as foraging behavior, sexual selection, parental care, etc., represent the interface of ecology, evolution, and behavior.

(Dual-listed with A ECL 454). (3-0) Cr. 3. S. Prereq: Graduate classification Ecological and epidemiological aspects of disease as they relate to wildlife populations. Topics to be covered include: major classes of disease; detection, description, monitoring, and management of disease; characteristics and interactions between disease agents and wildlife hosts; relationship among wildlife, domestic animal, and human health.

A ECL 570. Landscape Ecology.
(Cross-listed with EEOB). (2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: Permission of instructor; EEOB 586; a course in calculus
The study of ecological and evolutionary processes within a spatial context with emphasis on behavior, population, and community dynamics.

A ECL 573. Techniques for Biology Teaching.
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573A. Techniques for Biology Teaching: Animal Biology.
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573G. Techniques for Biology Teaching: Limnology.
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573H. Animal Behavior (Same as IA LL 573H).
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573I. Techniques for Biology Teaching: Insect Ecology.
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

A ECL 573J. Techniques for Biology Teaching: Project WET.
(Cross-listed with EEOB, IA LL). Cr. 1-2. Repeatable. SS.
The development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses. Exercises will be built around common organisms and ecosystems in Iowa. Field trips.

(Cross-listed with EEOB). (2-2) Cr. 3. F. Prereq: BIOL 312, STAT 101 or STAT 104, a course in calculus, or graduate standing
Concepts and theories of population dynamics with emphasis on models of growth, predation, competition, and regulation.

A ECL 590. Graduate Independent Study.
(Cross-listed with ANTH, EEOB, IA LL). Cr. 1-4. Repeatable. SS. Prereq: Graduate classification and permission of instructor

A ECL 590L. Special Topics: Graduate Independent Study.
(Cross-listed with ANTH, EEOB, IA LL). Cr. 1-4. Repeatable. SS. Prereq: Graduate classification and permission of instructor
A ECL 599. Creative Component. 
Cr. arr. Prereq: Nonthesis M.S. option only

Courses for graduate students:

A ECL 611. Analysis of Populations. 
(Cross-listed with EEOB). (2-2) Cr. 3. Alt. F., offered odd-numbered years. Prereq: BIOL 312; STAT 401; a course in calculus Quantitative techniques for analyzing vertebrate population data to estimate parameters such as density and survival. Emphasis on statistical inference and computing.

Cr. 1-3. Repeatable. F.S.S.S. Prereq: Graduate classification in animal ecology and permission of instructor Graduate student experience in the animal ecology teaching program. Offered on a satisfactory-fail basis only.

A ECL 699. Research. 
Cr. arr. Repeatable.

A ECL 699I. Research. 
(Cross-listed with ANTHR, EEOB, GDCB, IA LL). Cr. 1-4. Repeatable.

Courses primarily for undergraduates:

FOR 201. Forest Biology. 
(2-0) Cr. 2. F. Prereq: Concurrent enrollment in FOR 202, FOR 203, FOR 204, FOR 205, and FOR 206 Discussion of ecological concepts, individual tree structure and growth, variation and diversity in tree populations. Physical environment of trees and forests, ecological processes in forest communities, and introduction to different regional forest communities.

(2-0) Cr. 2. F. Prereq: Concurrent enrollment in FOR 201, FOR 203, FOR 204, FOR 205, and FOR 206 Processing of sustainable materials including wood into products and general properties and proper use of these products.

(2-0) Cr. 2. F. Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 204, FOR 205, and FOR 206; MATH 140 Survey techniques involved in quantification, valuation, and evaluation of tree and stand growth and other variables in the forest environment (e.g., recreational use, wildlife habitat value, biomass, and solid wood).

FOR 204. Forest Ecosystem Decision-Making. 
(2-0) Cr. 2. F. Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 205, and FOR 206 Methods of decision-making related to forest ecosystems including communications, teams and conflict resolution. Current issues relating to public, private, and urban forests; quantification of processes, services, and goods produced by the forest and expected by the public such as wildlife, water, range, recreation, wilderness, biodiversity, as well as wood and fiber products.

FOR 205. Integrated Forestry Laboratory. 
(0-8) Cr. 3. F. Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 204, and FOR 206 Field and laboratory exercises integrating the evaluation and management of forest goods, services, and the processing of wood products.

FOR 206. Fall Forestry Camp. 
Cr. 4. F. Prereq: Concurrent enrollment in FOR 201, FOR 202, FOR 203, FOR 204, and FOR 205 Three-week field camp to address topics and issues covered in 201, 202, 203, 204, and 205.

FOR 280. Wood Properties and Identification. 
(3-3) Cr. 4. S. Properties of wood and how they relate to its successful use. Comparative anatomical characteristics, scientific nomenclature, and hand lens identification of commercially important North American woods.

FOR 283. Pesticide Application Certification. 
(Cross-listed with AGRON, ENT, HORT). (2-0) Cr. 2. S. Core background and specialty topics in agricultural, and horticultural pesticide applicator certification. Students can select certification categories and have the opportunity to obtain pesticide applicator certification at the completion of the course. Commercial pesticide applicator certification is emphasized.

FOR 290. Special Problems. 
Cr. 1-4. Repeatable. Prereq: Freshman or Sophomore classification, permission of instructor
FOR 480. Wood Anatomy and Fiber Analysis.
(2-3) Cr. 3. Alt. F., offered odd-numbered years. Prereq: FOR 280 or permission of instructor
Microscopic anatomy and ultrastructure of wood and other industrial lignocellulosic materials. Microscopy techniques for fiber analysis. Comparison of fiber properties.

FOR 481. Conversion of Lignocellulosic Materials.
(2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: FOR 280 or equivalent

FOR 483. Wood Deterioration and Preservation.
(Cross-listed with PL P). (2-3) Cr. 3. Alt. F., offered odd-numbered years. Prereq: FOR 280
Deterioration of wood in use by biological and physical agents. Wood preservation and fire retardant treatments. Environmental impact of wood treating.

FOR 485. Wood and Natural Fiber Composites.
(2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: FOR 280 or TSM 240
Consolidation behavior of wood and other lignocellulosic materials. Principles of adhesion. Manufacturing processes for wood and lignocellulose composites such as plywood, oriented strand products, laminated lumber, particleboard, medium density fiberboard, and bast fiber products. Extrusion processing of natural fiber/ plastic composites.

FOR 486. Drying Processes for Wood and Other Lignocellulosic Materials.
(2-3) Cr. 3. Alt. S., offered even-numbered years. Prereq: FOR 280 or TSM 240
Principles of moisture relations in hygroscopic materials; adsorption, desorption, equilibrium moisture content. Transport processes in natural materials such as wood. Drying processes for wood and other lignocellulosic materials. Influence of moisture on dimensional stability and durability of wood and lignocellulosic composites.

FOR 487. Physical Properties of Wood.
(3-3) Cr. 4. Alt. S., offered even-numbered years. Prereq: FOR 280
Mechanical, thermal, electrical, and acoustical properties of wood. Lumber grading and stress rating, nondestructive evaluation of wood and wood composite products.

Courses primarily for graduate students, open to qualified undergraduates:
FOR 599. Creative Component.
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 599A. Creative Component: Forest Biology.
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 599B. Creative Component: Forest Biometry.
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 599C. Creative Component: Forest and Recreation Economics.
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 599D. Creative Component: Forest Management and Administration.
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 599E. Creative Component: Wood Science.
Cr. 1-12. Repeatable, maximum of 12 credits.

Courses for graduate students:
FOR 696. Research Seminar.
(Cross-listed with AGRON, BBMB, GDCB, HORT, PLBIO). Cr. 1. Repeatable. F.S.
Research seminars by faculty and graduate students. Offered on a satisfactory-fail basis only.

FOR 699. Research.
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699A. Research: Forest Biology - Wood Science.
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699B. Research: Forest Biometry.
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699C. Research: Forest Economics.
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699D. Research: Forest Management and Administration.
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699E. Research: Wood Science.
Cr. 1-12. Repeatable, maximum of 12 credits.
FOR 699F. Research: Plant Physiology.
Cr. 1-12. Repeatable, maximum of 12 credits.

Courses primarily for undergraduates:
NREM 104. Practical Work Experience.
Cr. R.
Three months of relevant work experience in natural resources, animal ecology, or forestry. Study at a summer biological station may be applicable. See adviser for specific requirements and approval process.

Cr. 1. F.
Orientation to the University and to the Department of Natural Resource Ecology and Management. Discussion of departmental learning outcomes, strategies for academic success and academic planning. Offered on a satisfactory-fail basis only.

NREM 111. NREM Transitions Learning Community Seminar.
(1-0) Cr. 1. Repeatable. F.S.
Enrollment limited to members of the NREM Transitions Learning Community. Designed to assist new transfer students and continuing sophomore students with their transition to the academic expectations and professional development aspects of the natural resource program. Offered on a satisfactory-fail basis only.

NREM 112. Orientation to Learning and Productive Team Membership.
(Cross-listed with AER E, CON E, FS HN, HORT). (2-0) Cr. 2. F.
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

NREM 114. Developing Responsible Learners and Effective Leaders.
(Cross-listed with CON E, FS HN, HORT). (2-0) Cr. 2. S. Prereq: Hort 112 or NREM 112
Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

NREM 120. Introduction to Renewable Resources.
(Cross-listed with AGRON, ENV S). (3-0) Cr. 3. F.S.
Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

NREM 130. Natural Resources and Agriculture.
(Cross-listed with ENV S). (3-0) Cr. 3. S.
Survey of the ecology and management of fish, forest, and wildlife resources in areas of intensive agriculture, with emphasis on Iowa. Conservation and management practices for private agricultural lands. Designed for nonmajors.

NREM 211. Careers in Natural Resources.
Cr. 1. F.S. Prereq: Sophomore classification
Career planning exploration in natural resources. Discussion of the job application process, including techniques for successful interviewing and development of an effective resume. Offered on a satisfactory-fail basis only.

NREM 256. Midwestern Prairie Plants.
(1-2) Cr. 1. F.
Offered 1st half semester only. Survey of the major plant families, genera, and representative species of Midwestern prairies with emphasis on plant identification and use of keys. Prairie restoration, conservation, and management issues will also be considered.

(Cross-listed with ENV S, L A). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
The development of natural resource conservation philosophy and policy from the Colonial Era to the present. North American wildlife, forestry, and environmental policy; national parks and other protected lands; federal and state agencies. Relationship to cultural contexts, including urban reform and American planning movement. Discussion of common pool resources, public and private lands.
(Cross-listed with ENSCI), (3-3) Cr. 4. F. Prereq: BIOL 211, BIOL 211L; FOR 201 or a second course in biology
Effects of environmental factors on ecosystem structure and function using forest, prairie and agricultural ecosystems as models. Special emphasis is given to soil-forming factors and the role of soil in nutrient and water cycling and ecosystem dynamics. Additional emphasis is given to human influences on natural ecosystems and the role of perennial plant communities in agricultural landscapes.

NREM 303. Internship.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Permission of department mentor and sophmore standing Placement with county conservation boards, camps, zoos, parks, etc., for experience as interpreters, rangers, and technicians.

NREM 303I. Undergraduate Internships.
(Cross-listed with IA LL), Cr. 1-5. SS. Prereq: Permission of instructor and sophmore standing Placement with county conservation boards, camps, parks, etc, for experience as interpreters, rangers, and technicians.

NREM 305. Seminar.
(2-0) Cr. 1-3. Repeatable. F.S. Prereq: Permission of instructor Current topics in natural resources or related issues.

NREM 315. Genres for Natural Resource Managers..
(3-0) Cr. 3. F. Prereq: BIOL 211 and 212. Introduction into how genetic techniques and technologies can aid the management of the earth's biotic resources. Topics include an overview of DNA structure, function and inheritance; tools and techniques for measuring genetic diversity; genetic management of wild and captive populations; DNA forensics as management tool. The goal of this course is to prepare managers/biologists to interpret genetic data as they relate to natural resource conservation.

(2-3) Cr. 3. S. Prereq: 6 credits in biological sciences History, objectives, forms, and techniques of interpretation in the settings of county, state, national parks, and zoos. Principles of effective communication as they apply to natural resource fields including wildlife management, forestry, and wildlife rehabilitation. Planning and use of effective communications and outreach campaigns to manage and conserve natural resources.

(Cross-listed with ENSCI), (2-3) Cr. 3. F. Prereq: Junior classification Measurement and interpretation of aerial photos in resource management. Introduction to Geographic Information Systems (GIS) using ArcGIS including digitizing, development and query of attribute tables, georeferencing, and use of multiple GIS layers in simple spatial analyses.

NREM 385. Natural Resource Policy.
(Dual-listed with NREM 585), (3-0) Cr. 3. S. Prereq: Junior classification Development, theory and practice of natural resource policy. Integrative approach with topical policy studies in North American wildlife, forestry, and water. Policy formation, the role of science, introduction to federal law compliance. Readings, lectures, projects.

(3-0) Cr. 3. F. Characteristics and role of fire in forest ecosystems. Major topics covered include fuels, fire weather, fire behavior, fire danger rating systems, fire control, prescribed burning, and fire dynamics in major ecosystem types.

NREM 402. Watershed Hydrology.
(Dual-listed with NREM 502), (Cross-listed with ENSCI, GEOL, MTEOR), (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing.
Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

NREM 407. Watershed Management.
(Dual-listed with NREM 507), (Cross-listed with ENSCI, ENV S), (3-3) Cr. 4. S. Prereq: A course in general biology.
Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

NREM 446. Integrating GPS and GIS for Natural Resource Management.
(Dual-listed with NREM 546), (Cross-listed with ENSCI), (3-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS.
Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 452. Ecosystem Management.
(Dual-listed with NREM 552), (Cross-listed with FOR), (3-3) Cr. 3. F. Prereq: Senior classification, and NREM 120 or its equivalent Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints.

(Cross-listed with ENV S), (3-0) Cr. 3. F. Prereq: NREM 120, and A ECL 312 or NREM 501, and Junior classification.
Analysis of controversial natural resource issues using a case approach that considers uncertainty and adequacy of information and scientific understanding. Ecological, social, political, economic, and ethical implications of issues will be analyzed.

NREM 465. Landscape Change and Conservation.
(Dual-listed with NREM 565), (Cross-listed with ENSCI, ENT), (2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: permission of instructor Lecture and discussion of land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

NREM 466. Agroforestry Systems.
(Dual-listed with NREM 571), (2-3) Cr. 3. Alt. S., offered even-numbered years. Prereq: 6 credits in biological science at 300 level or above

NREM 490. Independent Study.
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification, permission of instructor.

Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification, permission of instructor.

NREM 490B. Independent Study: Forestry.
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification, permission of instructor.

NREM 490E. Independent Study: Entrepreneurship.
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification, permission of instructor.

NREM 490H. Independent Study: Honors Program.
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Junior or senior classification, permission of instructor.

NREM 496. Travel Course.
(Dual-listed with NREM 596B), Cr. 1-5. Repeatable, maximum of 3 times. Prereq: Permission of instructor.
Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Meets International Perspectives Requirement.

NREM 496A. Travel Course: International.
(Dual-listed with NREM 596A), Cr. 1-5. Repeatable, maximum of 3 times. Prereq: Permission of instructor.
Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students. Meets International Perspectives Requirement.
NREM 496B. Travel Course: Domestic. (Dual-listed with NREM 596B). Cr. 1-5. Repeatable, maximum of 3 times. Prereq: Permission of instructor Limited enrollment. Extended field trips to study ecological and management topics in varied environments. Location and duration of trips will vary. Pre-trip sessions arranged. Trip expenses paid by students.

NREM 498. Cooperative Education. Cr. 1-3. Prereq: Permission of departmental chair Required of all cooperative education students. Students must register prior to commencing each work period.

Courses primarily for graduate students, open to qualified undergraduates:

NREM 502. Watershed Hydrology. (Dual-listed with NREM 402). (Cross-listed with ENSCI, GEOL, MTEOR). (3-3) Cr. 4. F. Prereq: Four courses in physical or biological sciences or engineering; junior standing Examination of watersheds as systems, emphasizing the surface components of the hydrologic cycle. Combines qualitative understanding of hydrological processes and uncertainty with quantitative representation. Laboratory emphasizes field investigation and measurement of watershed processes.

NREM 504. Forest Landscapes, Wildlife, and Silviculture. (3-3) Cr. 4. F. Prereq: NREM 301 Detailed analysis of factors and processes underlying forest and stand growth and development. Applications of this knowledge to forest culture to support a diversity of use and protection objectives. Discussions of regional silviculture, tropical forests, and experimentation in forest biology.

NREM 505. Seminar. (2-0) Cr. 1-3. Repeatable, maximum of 3 times. F.S. Prereq: Permission of instructor or graduate classification Current topics in natural resources research and management.

NREM 507. Watershed Management. (Dual-listed with NREM 407). (Cross-listed with ENSCI). (3-3) Cr. 4. S. Prereq: A course in general biology Managing human impacts on the hydrologic cycle. Field and watershed level best management practices for modifying the impacts on water quality, quantity and timing are discussed. Field project includes developing a management plan using landscape buffers.

NREM 508I. Aquatic Ecology. (Cross-listed with ENSCI, IA LL). Cr. 4. SS. Prereq: Courses in ecology, chemistry, and physics Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals.

NREM 529. Publishing in Biological Sciences Journals. (Cross-listed with AGRON, HORT). (3-0) Cr. 3. S. Prereq: Permission of instructor; evidence of a publishable unit of the student’s research data Process of preparing a manuscript for submission to a refereed journal in the biological sciences. Emphasis on publishing self-generated data from thesis or dissertation research.

NREM 535. Restoration Ecology. (Cross-listed with EEOB, ENSCI). (2-3) Cr. 3. F. Prereq: BIOL 366 or BIOL 474 or graduate standing Theory and practice of restoring animal and plant diversity, structure and function of disturbed ecosystems. Restored freshwater wetlands, forests, prairies and reintroduced species populations will be used as case studies.

NREM 542F. Introduction to Molecular Biology Techniques: Metabolomics. (Cross-listed with B M S, BBMB, EEOB, FS HN, GDCB, HORT, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F. Prereq: Graduate classification Includes metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.

NREM 546. Integrating GPS and GIS for Natural Resource Management. (Dual-listed with NREM 446). (Cross-listed with ENSCI). (2-3) Cr. 3. S. Prereq: 12 credits in student’s major at 300 level or above, NREM 345 or equivalent experience with ArcGIS Emphasis on the use of GPS as a data collection tool for GIS. Basic theory of GPS. Use of Global Positioning System technology for spatial data collection and navigation. Post-processing and real-time correction of GPS data. GPS data transfer to GIS for mapping applications. Use of GIS to construct waypoints for use in GPS navigation.

NREM 552. Ecosystem Management. (Dual-listed with NREM 452). (2-3) Cr. 3. F. Prereq: Senior classification, and NREM 120 or its equivalent Principles of planning, regulating, and decision-making associated with public and private lands, with consideration of forest, grassland, wetland, and freshwater aquatic ecosystems. Integrated natural resources management within ecological, social, economic and policy constraints.

NREM 565. Landscape Change and Conservation. (Dual-listed with NREM 465). (3-0) Cr. 3. F. Prereq: LA 202 Exploration of issues in landscape ecology and conservation biology relevant to landscape change, design, and planning. Examination of foundational principles and their applications across a continuum of land uses, from wilderness to urban areas.

NREM 566. Ecosystem Service Management. (Dual-listed with NREM 466). (Cross-listed with ENSCI, ENTR). (2-1) Cr. 3. Alt. S., offered odd-numbered years. Prereq: permission of instructor Lecture and discussion of land use and conservation techniques for improving ecosystem services including: pollination of crops, biological control of pests, prevention of erosion and water quality improvement.

NREM 570. Advanced Decision-making in Natural Resource Allocation. (2-2) Cr. 3. Alt. S., offered even-numbered years. Prereq: FOR 451 or two courses in economics Analytical approach to economic aspects of forest resource management problems. Theory and application of economic decision-making criteria to traditional and modern forest resource management issues. Current problems in the allocation of forest resources.

NREM 580. Research Orientation. (2-0) Cr. 2. F. Prereq: 20 credits in biological sciences and a course in statistics Research design, proposal preparation, and technical writing.
NREM 595. Natural Resource Policy.  
(Dual-listed with NREM 385). (3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Prereq: Graduate classification or permission of instructor  
Development, theory and practice of natural resource policy. Integrative approach  
with topical policy studies in North American wildlife, forestry, and water. Policy  
formation, the role of science, introduction to federal law compliance.

NREM 590. Special Topics.  
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Permission of instructor

NREM 590A. Special Topics: Animal Ecology.  
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Permission of instructor

NREM 590B. Special Topics: Forestry.  
Cr. 1-4. Repeatable, maximum of 4 credits. Prereq: Permission of instructor

NREM 593. Workshop.  
Cr. 1-3. Repeatable. Prereq: Graduate classification

NREM 596. Travel Course: Domestic.  
(Dual-listed with NREM 496B). Cr. 1-5. Repeatable, maximum of 3 times. Prereq:  
Permission of instructor  
Limited enrollment. Extended field trips to study ecological and management  
topics in varied environments. Location and duration of trips will vary. Pre-trip  
sessions arranged. Trip expenses paid by students.

NREM 596A. Travel Course: International.  
(Dual-listed with NREM 496A). Cr. 1-5. Repeatable, maximum of 3 times. Prereq:  
Permission of instructor  
Limited enrollment. Extended field trips to study ecological and management  
topics in varied environments. Location and duration of trips will vary. Pre-trip  
sessions arranged. Trip expenses paid by students.

NREM 598. Natural Resource Ecology and Management Teaching Practicum.  
Cr. 1. F.S., Prereq: Graduate classification as M.S. candidate in a NREM major  
and permission of instructor  
Graduate student experience in teaching. Student must plan and present at  
least one unit of subject matter in a course or extension workshop. Teaching  
practicum must be documented by the student and approved by the student’s  
POS committee. Offered on a satisfactory-fail basis only.

NREM 599. Creative Component.  
Cr. arr.

Courses for graduate students:

NREM 600. Seminar.  
Cr. 1. Repeatable. F.S.  
Current topics in natural resources research and management.

Cr. 1. F.S., Prereq: Graduate classification as a Ph.D. candidate in a NREM major  
and permission of instructor  
Graduate student experience in teaching. Student must plan and present  
substantive subject matter for a minimum of three weeks in lecture and/or  
laboratory formats, or a series of extension seminars/workshops. Teaching  
practicum must be documented by the student and approved by the student’s  
POS committee. Offered on a satisfactory-fail basis only.

NREM 699. Research.  
Cr. 1-12. Repeatable, maximum of 12 credits.

Nutritional Science  
Undergraduate Program (AGLS)

Curriculum in Nutritional Science  
Administered by the Department of Food Science and Human Nutrition

Pre-Health Professional and Research Option  
Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements  
by selecting coursework from approved lists. These courses may also be used to  
fulfill other area requirements. Only 65 cr. from a two-year institution may apply to  
the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00  
minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 13 cr.

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
ENGL 314 Technical Communication 3
LIB 160 Information Literacy 1
SP CM 212 Fundamentals of Public Speaking 3

Total Credits 13

Humanities and Social Sciences: 6-12 cr.

Select Humanities courses from approved list 3
Select Social Science course from approved list 3
If H Sci student, select: 6
  Additional Humanities course
  Additional Humanities or Social Science course

Ethics and Environmental: 3-6 cr.

FS HN 342 World Food Issues: Past and Present 3
If AgLS student, select from: 2-3
  ENV S 120 Introduction to Renewable Resources
  ENV S 201 Introduction to Environmental Issues

Mathematical Sciences: 6-12 cr.

Select at least 3 credits from: 3-8
  MATH 140 College Algebra
  MATH 142 Trigonometry and Analytic Geometry
  MATH 160 Survey of Calculus
  MATH 165 Calculus I
  MATH 165 Calculus I & MATH 166 Calculus II
  MATH 181 Calculus and Mathematical Modeling for the Life Sciences I
  MATH 181 & MATH 182 Calculus and Mathematical Modeling for the Life  
    Sciences I & Calculus and Mathematical Modeling for the Life Sciences II

Select at least 3 credits from: 3-4
  STAT 104 Introduction to Statistics

Total Credits 6-12

Physical Sciences: 17 cr.

CHEM 177 General Chemistry I 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
CHEM 178L Laboratory in College Chemistry II 1
CHEM 331 Organic Chemistry I 3
CHEM 331L Laboratory in Organic Chemistry I 1
CHEM 332 Organic Chemistry II 3
CHEM 332L Laboratory in Organic Chemistry II 1

Total Credits 17

Biological Sciences: 24-29 cr.

BIOL 211 Principles of Biology I 3
BIOL 211L Principles of Biology Laboratory I 1
BIOL 212 Principles of Biology II 3
BIOL 212L Principles of Biology Laboratory II 1
BIOL 255 Fundamentals of Human Anatomy 3
BIOL 255L Fundamentals of Human Anatomy Laboratory 1
BIOL 306 Metabolic Physiology of Mammals 3-4
or BIOL 335 Principles of Human and Other Animal Physiology
BIOL 313 Principles of Genetics 3
Nutrition and Wellness Option

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.
U.S. Diversity: 3 cr.

Communications/Library: 10 cr.

Total Credits 19

Electives: 0-12 cr. Select from any university coursework to earn at least 120 total credits. Students planning to apply to health professional programs should review entrance requirements and select appropriate courses as electives.

Concurrent B.S. and M.S. Program: Well-qualified students in Nutritional Science, pre-health professional and research option, who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a Bachelor of Science (B.S.) degree in Nutritional Science and a Master of Science (M.S.) degree in Nutritional Sciences. For more information, refer to [www.fshn.hs.iastate.edu](http://www.fshn.hs.iastate.edu)
Food Systems: 9 cr.
BIOL 173 Environmental Biology 3
or GLOBE 201 Global Resource Systems
FS HN 242 Societal Impacts on Food Systems 3
Select from:
HORT 221 Principles of Horticulture Science 3
AGRON 114 Principles of Agronomy
GLOBE 302 Resource Systems of Developing Nations

Total Credits 9

Food Science and Human Nutrition: 36 cr.
FS HN 101 Food and the Consumer 3
FS HN 110 Professional and Educational Preparation 1
FS HN 111 Fundamentals of Food Preparation 2
FS HN 115 Food Preparation Laboratory 1
FS HN 167 Introduction to Human Nutrition 3
FS HN 203 Contemporary Issues in Food Science and Human Nutrition 1
FS HN 264 Fundamentals of Nutritional Biochemistry and Metabolism 3
or BBMB 301 Survey of Biochemistry
FS HN 265 Nutrition for Active and Healthy Lifestyles 3
FS HN 361 Nutrition and Health Assessment 2
FS HN 364 Nutrition and Prevention of Chronic Disease 3
FS HN 365 Obesity and Weight Management 3
FS HN 366 Communicating Nutrition Messages 3
FS HN 403 Food Laws, Regulations, and the Regulatory Process 2
FS HN 463 Community Nutrition 3
FS HN 480 Professional Communication in Food Science and Human Nutrition 1
FS HN 495 Practicum 2

Total Credits 36

Electives: 9-18 cr. At least 9 credits of electives must be 300-400 level courses. Select from any university coursework to earn at least 120 total credits.

Go to FS HN courses.

Plant Pathology and Microbiology

Undergraduate Study

The department participates in the interdepartmental undergraduate Microbiology major.

Graduate Study

The department offers studies for the degrees master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science nonthesis option is available. The department also participates in the interdepartmental majors in microbiology; toxicology; genetics; plant biology; molecular, cellular, and developmental biology; ecology and evolutionary biology; and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They are skilled in research procedures, communicating research results, and writing concise and persuasive grant proposals.

Courses primarily for undergraduates:

PL P 391. Practical Plant Health.
(0-4) Cr. 2. F. Prereq: 6 credits in biological sciences.
Diagnosis of all types of plant health problems caused by diseases, insects, weeds, nutrient deficiencies and toxicities, herbicide injury, and environmental stress. Emphasis is on acquiring practical skills. Students will gain experience in written and oral communication.

PL P 408. Principles of Plant Pathology.
(Dual-listed with PL P 508). (2-3) Cr. 3. F.S. Prereq: 8 credits in life sciences, including BIOL 211 or BIOL 212.
Braun. Principles underlying the nature, diagnosis, and management of plant diseases. Laboratory complements lecture topics and provides experience in plant disease diagnosis.

(Cross-listed with FOR). (3-3) Cr. 4. F. Prereq: 8 credits in biological sciences, including BIOL 211
Nature of insects and pathogens of forest and shade trees; their role in the dynamics of natural and managed forest ecosystems; and the management of indigenous and exotic pests.

PL P 452. Integrated Management of Diseases and Insect Pests of Turfgrasses.
(Dual-listed with PL P 552). (Cross-listed with ENT, HORT). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: HORT 351
Identification and biology of important diseases and insect pests of turfgrasses. Development of integrated pest management programs in various turfgrass environments.

PL P 477. Bacterial-Plant Interactions.
(Dual-listed with PL P 577). (Cross-listed with MICRO). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: 3 credits in microbiology or plant pathology
Overview of plant-associated bacteria including their ecology, diversity, and the physiological and molecular mechanisms involved with their interactions with plants. The course covers bacterial plant pathogens and pathogenesis, nitrogen fixation and plant symbioses, biological control and plant growth promotion, bacterial disease diagnosis and management, and approaches to the study of microbial communities in the rhizosphere and on leaves.

(Cross-listed with FOR). (2-3) Cr. 3. Alt. F., offered odd-numbered years. Prereq: FOR 260
Deterioration of wood in use by biological and physical agents. Wood preservation and fire retardant treatments. Environmental impact of wood treating.

PL P 490. Independent Study.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, 7 credits in biological sciences, permission of instructor
A maximum of 6 credits of Pl P 490 may be used toward the total of 128 credits required for graduation.

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, 7 credits in biological sciences, permission of instructor
A maximum of 6 credits of Pl P 490 may be used toward the total of 128 credits required for graduation.

PL P 490H. Independent Study: Honors.
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Junior or senior classification, 7 credits in biological sciences, permission of instructor
A maximum of 6 credits of Pl P 490 may be used toward the total of 128 credits required for graduation.

PL P 494. Seed Pathology.
(Dual-listed with PL P 594). (2-0) Cr. 2. Alt. S., offered odd-numbered years. Prereq: PL P 408
Significance of biotic and abiotic diseases that affect the production and utilization of seeds, during each phase of the seed life cycle: growing, harvesting, conditioning, storing, and planting seed. Mechanisms of seed infection and seed-to-seedling transmission are considered for fungi, bacteria, viruses/viroids, and nematodes. Aspects of epidemiology, management, and host-pathogen relationships are discussed. Emphasis includes the role of seed health testing in the global seed industry for quality control and phytosanitary certification, as well as the use of seed treatments to manage seedborne and soilborne pathogens and pests. Concurrent enrollment in Pl P 494/594 (Seed Pathology Laboratory) is strongly encouraged (on-campus students only). Credit may not be obtained for both Pl P 494/594 and STB/PI P 592.

PL P 494L. Seed Pathology Laboratory.
(Dual-listed with PL P 594L). (0-3) Cr. 1. Alt. S., offered odd-numbered years. Prereq: PL P 408
Laboratory in seed pathology.
Courses primarily for graduate students, open to qualified undergraduates:

PL P 506. Plant-Pathogen Interactions.  (2-0) Cr. 2. S. Prereq: PL P 408 or PL P 416, BIOL 313
B. Baum, Whitham. Introduction to mechanisms of plant-parasite interaction. Genetics and molecular genetics of plant disease resistance and pathogenicity.

PL P 508. Principles of Plant Pathology.  (Dual-listed with PL P 408). (2-3) Cr. 3. F.S. Prereq: 8 credits in life sciences, including BIOL 211 or BIOL 212. Braun. Principles underlying the nature, diagnosis, and management of plant diseases. Laboratory complements lecture topics and provides experience in plant disease diagnosis.

PL P 511. Integrated Management of Tropical Crops.  (Cross-listed with ENT, HORT). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: PL P 408 or PL P 416 or ENT 370 or ENT 376 or HORT 221 Applications of Integrated Crop Management principles (including plant pathology, entomology, and horticulture) to tropical cropping systems. Familiarization with a variety of tropical agroecosystems and Costa Rican culture is followed by a 10-day tour of Costa Rican agriculture during spring break, then writeup of individual projects. Meets International Perspectives Requirement.

PL P 520. Ecologically Based Pest Management Strategies.  (Cross-listed with AGRON, ENT, SUSAG). (3-0) Cr. 3. Alt. F., offered even-numbered years. Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on understanding ecological processes.

PL P 543. Ecology and Epidemiology of Plant Diseases.  (3-2) Cr. 4. Alt. F., offered odd-numbered years. Prereq: PL P 408 or PL P 416 Nutter. Theory and practice related to the ecology and epidemiology of plant disease epidemics. Interactions among host and pathogen populations as affected by the environment are quantified with respect to time and space. Analysis of ecological and host and pathogen genetic factors that alter the course of plant disease epidemics. Risk assessment theory, disease forecasting, and modeling the impact of biotic plant stresses on yield and quality are also emphasized.

PL P 574. Plant Nematology.  (2-0) Cr. 2. Alt. SS., offered odd-numbered years. Prereq: 8 credits in biological sciences, including BIOL 211 or equivalent Morphology, anatomy, identification, management, and life cycles of common plant-parasitic nematodes; host parasite interactions; recent advances in plant nematology.

PL P 574L. Laboratory Techniques in Plant Nematology.  (3-3) Cr. 1. Alt. SS., offered odd-numbered years. Prereq: 8 credits in biological sciences, including BIOL 211 or equivalent. Must also be registered for PL P 574. Practical skills of sample collection, processing, extraction, and identification of plant-parasitic nematodes from soil and roots; other techniques will be discussed.

PL P 590. Special Topics.  Cr. 1-3. Repeatable. F.S.S.S. Prereq: 10 credits in biological sciences, permission of instructor

PL P 592. Seed Health Management.  (Cross-listed with STB). (2-0) Cr. 2. Alt. S., offered even-numbered years. Prereq: Admission to the Graduate Program in Seed Technology and Business/Consent of instructor Munkvold. Occurrence and management of diseases during seed production, harvest, conditioning, storage, and planting. Emphasis on epidemiology, disease management in the field, seed treatment, effects of conditioning on seed health, and seed health testing. Credit may not be obtained for both PL P/STB 592 and PL P 594.

PL P 594. Seed Pathology.  (Dual-listed with PL P 494). (2-0) Cr. 2. Alt. S., offered odd-numbered years. Prereq: PL P 408 Significance of biotic and abiotic diseases that affect the production and utilization of seeds, during each phase of the seed life cycle: growing, harvesting, conditioning, storing, and planting seed. Mechanisms of seed infection and seed-to-seedling transmission are considered for fungi, bacteria, viruses/viroids, and nematodes. Aspects of epidemiology, management, and host-pathogen relationships are discussed. Emphases include the role of seed health testing in the global seed industry for quality control and phytosanitary certification, as well as the use of seed treatments to manage seedborne and soilborne pathogens and pests. Concurrent enrollment in PL P 494L/594L (Seed Pathology Laboratory) is strongly encouraged (on-campus students only). Credit may not be obtained for both PL P 494/594 and STB/PL P 592.

PL P 594L. Seed Pathology Laboratory.  (Dual-listed with PL P 494L). (0-3) Cr. 1. Alt. S., offered odd-numbered years. Prereq: PL P 408 Laboratory in seed pathology.

Courses for graduate students:

PL P 691. Field Plant Pathology.  (0-6) Cr. 2. Repeatable. Alt. SS., offered odd-numbered years. Prereq: PL P 408 or PL P 416 Diagnosis of plant diseases, plant disease assessment methods, and the integration of disease management into commercial crop production practices. Objectives are to familiarize students with common diseases of Midwest crops and landscape plants, and to provide experience in disease diagnosis. Field trips include commercial operations, agricultural research facilities, and ornamental plantings.

PL P 692. Molecular Biology of Plant-Pathogen Interactions.  (Cross-listed with MICRO). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: PL P 506 or BBMB 405 or GEN 411 or MICRO 402 or strong background in molecular biology Seminal and current research in molecular and physiological aspects of plant interactions with pathogens, including mechanisms of pathogenesis, host-pathogen recognition and host defense, with an emphasis on critical evaluation of primary literature. Students also complete a research proposal writing and peer review exercise.

PL P 694. Colloquium in Plant Pathology.  (2-0) Cr. 2. Repeatable. F.S. Prereq: PL P 408 or PL P 416, permission of instructor Advanced topics in plant pathology, including biological control, cultural control, resistance gene deployment, genetic engineering for disease resistance, chemical control, integrated pest management, emerging diseases, fungal genetics, insect vector biology, professional communications, etc.

Public Service and Administration in Agriculture

College of Agriculture—Public Service and Administration in Agriculture

The curriculum in public service and administration in agriculture is designed for students who desire an interdisciplinary education to pursue a career with
agriculturally related governmental and nonprofit agencies, or with businesses and industries that are concerned with public services in agriculture, natural resources or rural communities. Students will explore the planning and implementing of rural and agriculturally related programs in organizations, communities (town, city, or county), multicity areas, states, regions, and at the federal level.

The curriculum has a broad base of general education subjects including credits in communications, mathematics, physical and biological sciences, social sciences, and humanities. The technical subjects represent a combination of sociology, economics, public administration and agriculture, with emphases on social and economic change, history of public services, complex organizations, interagency relationships, community leadership, community action, adoption and diffusion, group dynamics, and political and legal behavior as they relate to agriculture and rural areas. For the Interdisciplinary Studies major in Criminology and Criminal Justice, see Liberal Arts and Sciences, Curriculum.

Graduate Study
The department offers work for the degrees master of science and doctor of philosophy with majors in sociology and rural sociology and minor work for students majoring in other departments. For M.S. and Ph.D. departmental requirements, see Program of Graduate Study for Degrees in Sociology and Rural Sociology, available from the department office. The department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; methodology; social change and development; criminality; the economy, organizations and work; and social psychology. The Department of Sociology does not offer a nonthesis master's program.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the department stipulates no language requirement for either the degree master of science or the degree doctor of philosophy, specifying competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in interdepartmental majors in sustainable agriculture, transportation and water sciences, concentration in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; methodology; social change and development; criminality; the economy, organizations and work; and social psychology. The Department of Sociology does not offer a nonthesis master's program.

Curriculum in Public Service and Administration in Agriculture
Administered by the Department of Sociology

Total Degree Requirement: 128 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.
U.S. Diversity: 3 cr.

Communications Proficiency (C or better):
6 credits of English Composition
3 Three credits of Speech Fundamentals

Communication/Library:
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
SP CM 212 Fundamentals of Public Speaking 3
JL MC 305 Publicity Methods 3
LIB 160 Library Instruction 0.5

Humanities and Social Sciences: 6 cr.
3 credits from approved humanities list
3 credits from approved social science list

Ethics: 3 cr.
3 cr. from approved list.

Life Sciences: 6 cr.
BIOL 101 Introductory Biology
or BIOL 211 Principles of Biology I
3 Three credits from approved life sciences list

Mathematical and Physical Sciences: 12 cr.
MATH 150 Discrete Mathematics for Business and Social Sciences 3
STAT 101 Principles of Statistics 4
Five credit hours from:
MTEOR 206 Introduction to Weather and Climate 3
AGRON 206 Introduction to Weather and Climate 3
or ASTRO, CHEM, GEOL, PHYS.

Total Credits 13

Sociology 15 cr.
SOC 110 Orientation to Public Service and Administration in Agriculture R
SOC 130 Rural Institutions and Organizations 3
SOC 325 Transition in Agriculture 3
or SOC 382 Environmental Sociology 3
SOC 415 Dynamics of Social Change 3
SOC 420 Complex Organizations 3
or SOC 380 Sociology of Work 3
SOC 464 Community Action and Leadership 3

Total Credits 15

Economics and Agricultural Education and Studies: 16 cr.
ECON 101 Principles of Microeconomics 3
ECON 102 Principles of Macroeconomics 3
ECON 235 Introduction to Agricultural Markets 3
or ECON 380 Environmental and Resource Economics 3
ECON 344 Public Finance 3
AGEDS 451 Agricultural Law 4

Total Credits 16

Political Sciences: 15 cr.
POLS 215 Introduction to American Government 3
POLS 310 State and Local Government 3
POLS 371 Introduction to Public Administration 3
POLS 475 Management in the Public Sector 3
C R P 455 Community Economic Development 3

Total Credits 15

Additional Pol S, Econ, or Soc at 300 level or above.

Agricultural Sciences: 9 cs.
Complete 9 cr. from MTEOR 206 Introduction to Weather and Climate or Agron, An S, AST, Ent, FS HN, Hort, or NREM.

Area of Concentration: 15 cr.
Complete 15 cr. from approved specialization area.

Sustainable Agriculture
(Interdepartmental Graduate Major)
The graduate program in sustainable agriculture is an interdepartmental major offered through faculty in nineteen participating departments: Agricultural & Biosystems Engineering; Agricultural Education & Studies; Agronomy; Animal Science; Anthropology; Civil, Construction & Environmental Engineering; Community & Regional Planning; Ecology, Evolution & Organismal Biology; Economics; Entomology; Food Science & Human Nutrition; Horticulture; Industrial & Manufacturing Systems Engineering; Natural Resource Ecology & Management; Philosophy & Religious Studies; Plant Pathology; Political Science; Sociology; and Veterinary Diagnostic & Production Animal Medicine.

Master’s students must have a bachelor’s degree in one of the life, social, or engineering sciences, or a bachelor’s degree plus equivalent experience in these areas. Doctoral students must have a master’s degree and either an undergraduate or master’s degree in one of the majors in the College of Agriculture and Life Sciences or its equivalent. Graduates of the program will be able to design and manage agricultural systems that increase food security, enhance human communities, and protect environmental quality. To acquire these abilities, students learn agroecological principles, study social relations underlying sustainable farming and food systems, and gain experience with practical techniques of sustainable agriculture. The program seeks to balance
depth in disciplinary knowledge and perspectives with broader, systems-level thinking. It integrates technical and social sciences through a sequence of team-taught interdisciplinary core courses emphasizing higher-order critical thinking skills and active, collaborative approaches to learning.

Graduates of the program are qualified to work in a variety of settings, including university research, education, extension, agribusiness, governmental and non-governmental organizations, and farming.

Information on applications procedures, research interests of the faculty, and specific requirements of the major may be obtained at http://www.sust.ag.iastate.edu/gpsa/ or by contacting gpsa@iastate.edu.

Courses primarily for graduate students, open to qualified undergraduates:

SUSAG 509. Agroecosystems Analysis.
(Cross-listed with AGRON, SOC). (3-4) Cr. 4. F. Prereq: Senior or above classification
Experiential, interdisciplinary examination of Midwestern agricultural and food systems, emphasizing field visits, with some classroom activities. Focus on understanding multiple elements, perspectives (agronomic, economic, ecological, social, etc), and scales of operation.

SUSAG 515. Integrated Crop and Livestock Production Systems.
(Cross-listed with A B E, AGRON, AN S). (3-0) Cr. 3. Alt. F.; offered odd-numbered years. Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

SUSAG 530. Ecologically Based Pest Management Strategies.
(Cross-listed with AGRON, ENT, PL, P). (3-0) Cr. 3. Alt. F., offered even-numbered years. Durable, least-toxic strategies for managing weeds, pathogens, and insect pests, with emphasis on underlying ecological processes.

SUSAG 546. Strategies for Diversified Food and Farming Systems.
(Cross-listed with AGRON, HORT). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: SUSAG 509
Project-focused engagement in food and farming systems using tools and perspectives drawn from multiple disciplines. Includes a field component.

SUSAG 571. Agroforestry Systems.
(Cross-listed with NREM). (2-3) Cr. 3. Alt. S., offered even-numbered years. Prereq: 6 credits in biological science at 300 level or above

SUSAG 584. Organic Agricultural Theory and Practice.
(Cross-listed with AGRON, HORT). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: 9 cr. in biological or physical sciences
Delate. Understanding of the historical origins and ecological theories underpinning the practices involved in organic agriculture. Interdisciplinary examination of crop and livestock production and socio-economic processes and policies in organic agriculture from researcher and producer perspectives.

SUSAG 590. Special Topics.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification, permission of instructor
For students wishing to conduct in-depth study of a particular topic in sustainable agriculture.

SUSAG 599. Creative Component.
Cr. arr. F.S.SS.
Pre-enrollment contract required. For MS students pursuing the non-thesis degree option. Final product is a creative component.

Courses for graduate students:

SUSAG 600. Sustainable Agriculture Colloquium.
(1-0) Cr. 1. Repeatable. F.S.
Weekly seminar for graduate students in the Sustainable Agriculture program.

SUSAG 610. Foundations of Sustainable Agriculture.
(Cross-listed with A B E, AGRON, ANT HR, SOC). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor
Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

SUSAG 699. Research.
Cr. arr. Repeatable. F.S.SS.
MS and PhD thesis and dissertation research.

College of Business

David Spalding, Dean
Qing Hu, Associate Dean
Danny J. Johnson, Associate Dean
www.business.iastate.edu

Objectives of the Curriculum in Business

The instructional objective of the College of Business is to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the affect of diversity in the work place; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

The curriculum in business is accredited by AACSB International and the Association to Advance Collegiate Schools of Business.

Organization of Curriculum

The undergraduate curriculum in business is divided into three areas: a general education program, a pre-professional business program, and a professional business program. The general education program provides a broad spectrum of liberal arts and social science coursework. The pre-professional business requirements provide a foundation in pre-business coursework. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The seven majors offered for the degree bachelor of science (B.S.) are accounting; finance; management; management information systems; marketing; supply chain management; and business economics. The college also offers a secondary major in international business. Elective courses are part of the curriculum.

Required High School Preparation

Students entering the pre-business curriculum must present evidence of the following high school preparation:

a. Four (4) years of English/Language Arts, emphasizing writing, speaking, and reading as well as an understanding and appreciation of literature.

b. Three (3) years of mathematics, including one year each of algebra, geometry, and advanced algebra.

c. Three (3) years of science, including one year each of courses from two of the following fields: biology, chemistry, and physics;

d. Two (2) years of social studies.

Admission Standards to Professional Programs

All new entering students are enrolled in the pre-business curriculum. To enter the professional program in the College of Business, students must complete any ENGL 101 English for Native Speakers of Other Languages courses, ENGL 150 Critical Thinking and Communication, and the following foundation courses or their approved substitutions:

<table>
<thead>
<tr>
<th>Course</th>

</tbody>
</table>
in addition, all students must achieve an Iowa State University cumulative grade point of 2.5 or a grade-point average of 2.5 in the foundation courses listed above. Admission into the professional program is a prerequisite for pre-business students to gain admission into upper-level business classes. Students who meet the following requirements qualify for early admission to the professional program. First Semester Freshman: ACT score of 30 or higher, or ranked in the top 5% of high school class, or National Merit/Achievement Finalist, or member of the Freshman Honors Program. All other Students: minimum ISU cumulative GPA of 3.50 in at least 12 credits, or full member of the University Honors Program. If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If foundation courses initially taken at Iowa State University need to be repeated, they must be repeated at Iowa State University. With the exception of ACCT 285 Managerial Accounting, pre-business students do not have access to business core classes. To facilitate registration, qualified students may be conditionally admitted during the semester in which they complete the admission requirements. Admission requirements are subject to change. Applications and the current requirements for admission to the College of Business are available on the Web at https://apps.bus.iastate.edu/ProfessionalProgram/ or from the Undergraduate Programs Office in the College of Business.

Academic Standards and Graduation Requirements

Policies for students enrolled in the College of Business may be obtained on the Web at http://www.business.iastate.edu/undergraduate/ or from the Undergraduate Programs Office in the College of Business.

Students are responsible for knowing and adhering to these College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2014-2015 catalog:

1. A minimum of 122 semester credits are required.
2. At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year college.
3. A minimum of 12 credits of the last 32 credits earned in residence must be applied to the business core and/or the major.
4. The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.
5. Students must achieve communication proficiency by earning a grade of C or better in two of the three required English courses.
6. A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.
7. A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution.
8. Business majors may not take business courses Pass-Not Pass (P/NP).
9. General education courses may not be taken P/NP.
10. No more than 9 elective credits may be taken P/NP.
11. The last 32 credits applied for graduation must be taken at ISU. A waiver for Study Abroad and Internship/Co-ops may be granted.

Advising System

The Undergraduate Programs staff, under the leadership of the Director for Undergraduate Programs, facilitates student progress toward graduation while supporting the academic standards of the College of Business and Iowa State University. To accomplish this, the Undergraduate Programs staff provides services for all College of Business students, including academic advising, learning opportunities, and teaching and developmental activities.

Students in the College of Business have advisers located in the Undergraduate Programs Office. The adviser assists students with developing an academic program; accessing pertinent university resources; and meeting their educational objectives.

The college offers an orientation program for entering students. All entering students and family members are encouraged to attend orientation. During orientation the adviser and the student prepare an appropriate schedule and the student registers for courses. Placement assessments may be required in Mathematics and English to assist in placing students in the appropriate level of courses if this cannot be determined by ACT/SAT scores, high school preparation classes or transfer courses.

Honors

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30, or ranked in the top 5% of their high school classes; or selected as a National Merit or National Achievement finalist.

Enrolled students who have completed 12 graded credits at Iowa State University and earned a 3.50 can be admitted as a full member of the Honors Program. To qualify for full membership, students must have declared a major, developed a professional program, and have a minimum of 48 credits remaining before graduation. Special advisers will assist honors students in developing an appropriate program of study.

Internships

Credit and non-credit internships in business may be approved for College of Business students in all majors including pre-business. Credit hours and requirements vary. Arrangements must be made in the college prior to the beginning of the internship. An internship adviser from the Career Services Center will assist students in making these arrangements.

Multiple Majors

Undergraduates pursuing a degree in the College of Business may complete additional majors in the College of Business. Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and agricultural business or economics is not permitted. A major in business economics with a minor in economics is not permitted. Undergraduates with a primary major outside the College of Business who want a second major in business must meet the admission requirements for the professional program as well as complete the following requirements: Foundation, Supporting Courses, Business Core, and major requirements. (Refer to the current Curriculum Guide).

All students pursuing multiple majors or multiple degrees within the College of Business are required to have a minimum of 15 credits of coursework in each major that is not used in the other majors.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Curriculum Changes

Iowa State University students who want to change their curriculum to the College of Business must attend a curriculum change meeting. See Changing Curriculum or Major for more details on this process. Students on Academic Probation will not be allowed to change curriculum to the College of Business during enrollment period three. See Making Schedule Changes.

International Business Secondary Major

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor for Business Students

Students with a major in the College of Business may qualify for a minor specialization in one of the college’s departments by taking at least 15 credit hours in the minor specialization, nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students are limited to three business majors/degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.
Minor for Non-Business Students

The College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 284</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 285</td>
<td>Managerial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>or ACCT 215</td>
<td>Legal Environment of Business</td>
<td>3</td>
</tr>
<tr>
<td>or BUSAD 250</td>
<td>Introduction to Business</td>
<td></td>
</tr>
</tbody>
</table>

Three courses chosen from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN 301</td>
<td>Principles of Finance</td>
</tr>
<tr>
<td>MGMT 370</td>
<td>Management of Organizations</td>
</tr>
<tr>
<td>MIS 301</td>
<td>Management Information Systems</td>
</tr>
<tr>
<td>MKT 340</td>
<td>Principles of Marketing</td>
</tr>
<tr>
<td>SCM 301</td>
<td>Supply Chain Management</td>
</tr>
</tbody>
</table>

The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University. A C average or higher is required in all courses used to satisfy the minor requirements. All requirements for the minor must be taken for a grade. Students with a major outside the College of Business are eligible for a general business minor only—not a specialization in a business department.

Non-Business students may not take more than 9 cr. Of 300 or 400 level Business courses.

Entrepreneurial Studies Cross-Disciplinary Minor

The College of Business participates in a cross-disciplinary minor in Entrepreneurial Studies. This minor is available to any undergraduate student. Requirements for the minor include, MGMT 313 Feasibility Analysis and Business Planning (6 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available in the Undergraduate Programs Office in the College of Business and on the web at http://www.business.iastate.edu/undergraduate/minors/entrepreneurship.

Non-degree Seeking Students

Students who wish to take courses in the College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible to take up to 9 credits in 300-level and above business courses without meeting the college’s admission requirements.

Upper Division Courses for Students Outside the College

Students from outside the College of Business are eligible to take up to 9 credits of 300-level and above business courses without meeting the college’s admission requirements to the professional program, as long as they meet course prerequisites.

Graduate Study

Four programs are offered at the master’s level: a master of business administration (M.B.A.), a master of accounting (M.Acc.), a master of finance (M.Fin.), and a master of science in information systems (M.S.I.S.). These programs are intended to meet distinct sets of educational objectives.

The master of business administration (M.B.A.) is the professional management education program for those pursuing careers in business. The goal of the M.B.A. program is to educate future business leaders preparing them for the challenges of tomorrow by giving them the vision, knowledge, skills, and confidence to make the best decisions for all involved stakeholders. The M.B.A. program consists of a 48-credit curriculum leading to a non-thesis, non-creative component master of business administration. Students may pursue a specialization in accounting, finance, marketing, information systems, or supply chain management. The College of Business also offers a business administration minor to students with majors outside the college.

A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in aerospace, agricultural biosystems, civil, computer, electrical, industrial, or mechanical engineering. A concurrent B.S. or B.A./M.B.A. is available to eligible Chemistry undergraduate students. A concurrent B.S./M.B.A. degree is also available to eligible undergraduate students majoring in Animal Science and Food Science. A concurrent D.V.M./M.B.A. degree is available to eligible Veterinary Medicine students.

Double degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P.), information systems (M.B.A./M.S.I.S.), and statistics (M.B.A./M.S.-Statistics).

The master of accounting (M.Acc.) is designed to meet the needs of accountants in public or private accounting, focusing on interpreting and analyzing accounting information for decision-making. Additionally, the M.Acc. program is designed to help interested candidates meet the 150-hour education requirement for CPA certification in Iowa. The 30 hour program requires 15 hours of graduate accounting courses, an international topics course, and 12 hours of non-accounting graduate credits, including a communications course.

The master of finance (M.Fin.) is designed to provide students with in-depth coverage of financial topics and a strong quantitative skill set. Students will learn financial analysis, valuation, modeling, and risk management techniques. The 40-credit program requires 22 core credits, of which 7 are in economics. 16 credits of electives are required, of which 9 must be in finance.

The master of science in information systems (M.S.I.S.) is designed to provide students with strong technical skills and a broad background in business needed to effectively develop and manage information systems projects. Using the latest software, students will apply information systems theory and concepts to modern information systems development. Program requirements range from 30-42 credits depending upon the student’s background. The M.S.I.S. curriculum includes business foundation courses, information systems core courses and electives, and a research requirement (creative component).

The College of Business participates in the following graduate level interdepartmental programs: Information Assurance, Human Computer Interaction, Seed Technology and Business, and Transportation.

Ph.D in Business and Technology

The College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of four specializations—information systems (IS), management (MGT), marketing (MKT), or supply chain management (SCM). Departments in the college (Management, Marketing, and Supply Chain and Information Systems), and the departments of Statistics, Economics, Psychology, and Sociology cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44 credit course curriculum followed by a 12 credit thesis or dissertation. Students do not need to have an undergraduate degree or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 credit hours of business foundation courses. For more details or application information see the Business Administration Department listing in this catalog.

Departments of the College

- Accounting
- Finance
- Management
- Marketing
- Supply Chain and Information Systems

Curriculum in Business

The college offers programs of study leading to the degree bachelor of science with a major in accounting; finance; management; management information systems; marketing; supply chain management; or business economics. The college also offers a secondary major in international business. Total credits required: 122

See also: A 4-year (8 semester) plan of study for each business degree.

Business Curriculum

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication:

Proficiency met with grade of C or better in 2 of 3 English courses
ENGL 150  Critical Thinking and Communication  3

Total Credits  21  

All above core courses must be complete before .  

**Electives:**

61 cr. must be non-business courses.

1. Acct, Fin, and Bus Econ majors will also take STAT 326 Introduction to Business Statistics II as part of the supporting courses. Bus Econ majors will take MATH 160 Survey of Calculus instead of 150, and ECON 207 Applied Economic Optimization instead of MATH 151 Calculus for Business and Social Sciences. See the Undergraduate Programs Office in the College of Business. Acct majors will take ACCT 301 The Accounting Cycle concurrent with as part of the Supporting Courses. MIS majors will take MIS 207 Fundamentals of Computer Programming as part of the Supporting Courses.

2. Students not adequately prepared in mathematics may have to take remedial courses in addition to courses listed above. Remedial mathematics courses may not be used to satisfy credit requirements for graduation in the business curricula.

3. Students may satisfy the Global Perspectives requirement either by taking six credit hours from the University International Perspectives list, or three credit hours from the International Perspectives list and three credit hours from the College of Business Global Perspectives list. Approved list of courses is available on the web at http://www.business.iastate.edu/undergraduate/majors or from the Undergraduate Programs Office in the College of Business.

4. Courses used for the International Perspectives and U.S. Diversity requirements may also be used to fulfill other curriculum requirements or electives and therefore credits are not included in the sum needed.

**Professional Programs**

The curriculum in accounting is accredited by AACSB International and the Association to Advance Collegiate Schools of Business.

**Accounting major: 23 cr.**

ACCT 383  Intermediate Managerial Accounting  3  
ACCT 384  Accounting Information Systems  3  
ACCT 386  Intermediate Accounting I  3  
ACCT 387  Intermediate Accounting II  3  
ACCT 485  Principles of Federal Income Tax  3  
ACCT 498X Capstone in Accounting  2  
ACCT 497  Introduction to Auditing  3  

One additional course from department approved list  3  
Total Credits  23  

**Business Economics major: 19 cr.**

ECON 301  Intermediate Microeconomics  4  
ECON 353  Money, Banking, and Financial Institutions  3  
ECON 431  Managerial Economics  3  
ECON 492  Graduating Senior Survey  3  

One 300-level ECON course  3  
Two 400-level ECON courses †  6  

Total Credits  19  

* Excluding 397 and 398.  
† Excluding ECON 490.

**Finance major: 21 cr.**

FIN 310  Corporate Finance  3  
FIN 320  Investments  3  

Two 400 level Finance courses from the following:  6  
FIN 415  Business Financing Decisions  
FIN 424  Financial Futures and Options  
FIN 425  Security Analysis and Portfolio Management  
FIN 428  Advanced Fixed Income Analysis and Portfolio Management  
FIN 435  Venture Capital, Private Equity, and Mergers and Acquisitions  
FIN 445  Bank Management Decisions  
FIN 462  Corporate Risk Management and Insurance  
FIN 472  Real Estate Finance  
FIN 480  International Finance  

Two additional finance courses (300 or 400 level) from the department approved list.  6  
One additional course from the department approved list  3  
Total Credits  21  

**Management major: 18 cr.**

MGMT 371  Organizational Behavior  3  
MGMT 377  Competitive Strategy  3  
MGMT 414  International Management  3  
MGMT 471  Personnel and Human Resource Management  3  

Select two management elective courses from the department approved list.  6  
Total Credits  18  

**Management Information Systems major: 18 cr.**

MIS 307  Intermediate Business Programming  3  
MIS 310  Information Systems Analysis  3  
MIS 320  Database Management Systems  3  
MIS 340  Project Management  3  

Select two courses from Department list that complete an Elective Cluster.  6
The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with:

1. a mastery of basic accounting concepts
2. an ability to think critically and creatively about accounting problems
3. an ability to communicate effectively and work with others as a member of a team
4. an awareness and sensitivity for dealing with ethical concerns.

The major in accounting is designed to give students a conceptual foundation as well as to provide a wide range of basic skills and analytical tools for use in reporting for both public and private concerns. Students who complete the accounting major are well prepared to accept positions in industry, government, and the public accounting profession.

Graduate Study

The department offers a graduate degree, the masters of accounting (M.Acc.). This is a 30-hour degree. The program requires 15 hours of graduate accounting courses, ENGL 507 Writing and Analyzing Professional Documents or its equivalent, at least 9 hours of non-accounting graduate electives, and an international course from an approved list. Included in the 15 required hours of graduate accounting courses are two 3-credit required courses, ACCT 583 Advanced Managerial Accounting, and ACCT 598 Financial Accounting: Theory and Contemporary Issues.

The M.Acc. is appropriate for accounting undergraduate students wanting to pursue a variety of accounting careers. The M.Acc. program is an efficient way for qualified candidates to meet the 150-hour education requirement for CPA certification in Iowa. Students without an accounting degree will be required to complete a substantial amount of accounting coursework prior to being considered for admission to the M.Acc. Contact the coordinator of M.Acc. program for details.

The department participates in the full-time and part-time Master of Business Administration (M.B.A.) program. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in accounting. The specialization is designed to help meet the education requirement for CPA certification in Iowa.

The requirements for the accounting major are met by successful completion of the following courses:

- ACCT 383 Intermediate Managerial Accounting
- ACCT 384 Accounting Information Systems
- ACCT 386 Intermediate Accounting I
- ACCT 387 Intermediate Accounting II
- ACCT 485 Principles of Federal Income Tax
- ACCT 497 Introduction to Auditing
- ACCT 498X Capstone in Accounting
- Three credit hours of electives chosen from the following:
  - ACCT 483 Advanced Managerial Accounting
  - ACCT 484 Advanced Accounting Information Systems
  - ACCT 487 Volunteer Income Tax Assistance
  - ACCT 488 Governmental and Non-profit Institution Accounting
  - ACCT 495 Advanced Accounting Problems
  - ACCT 496 International Accounting

See the CPA note below for the 150-hour education requirement for CPA certification in Iowa.

In addition, it is highly recommended that an accounting major include ACCT 316 Business Law. The Department of Accounting should be consulted for information on specific alternative plans of study.

The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, of which 9 credits need to stand alone.

CPA Note: The accounting major requires 24 credits of accounting beyond principles. This satisfies the State of Iowa CPA exam requirement. ACCT 316 Business Law is also highly recommended; please note this class does not count towards the aforementioned 24 hours required to sit for the exam. While students may sit for the CPA exam in Iowa after completing the required accounting course work and earning a bachelors degree, CPA candidates must complete a total of 150 credits in order to be certified or licensed to practice in Iowa. Qualified students should consider taking the Masters of Accounting to satisfy the 150-credit requirement. Juniors and seniors in accounting who are interested in graduate study should contact the Coordinator of the M.Acc. Program as early as possible to complete their graduate degree in an efficient manner. Students planning certification outside Iowa must check local rules, as each state determines its own exam qualification and licensing requirements.
Courses primarily for undergraduates:

ACCT 215. Legal Environment of Business. (3-0) Cr. F.S.SS. Prereq: Sophomore classification. General history, structure, and principles of law. The legal system, as an agency of social control; good business practices, and tool for change. The court systems, Constitution, torts, contracts, administrative agencies, and agency law.

ACCT 284. Financial Accounting. (3-0) Cr. F.S.SS. Prereq: not open to first term freshmen. Introduction to the basic concepts and procedures of financial accounting from a user perspective. The course examines the accounting cycle, business terminology, basic control procedures, and the preparation and evaluation of financial reports, with an emphasis on financial statement analysis.

ACCT 301. The Accounting Cycle. (1-0) Cr. F.S.SS. Prereq: ACCT 284. Interactive computer-based analysis of the accounting cycle including transactions and financial statements. Preparation of journal entries and adjusting entries and completion of the closing process.

ACCT 383. Intermediate Managerial Accounting. (3-0) Cr. F.S. Prereq: ACCT 285 or ACCT 501; and ACCT 301. Generation, communication and use of information to assist management with planning, control, and decision making in manufacturing and service organizations. Includes cost concepts and relevance to decision situations, operational and capital budgeting, and performance evaluation. Emphasis on developing effective teamwork skills as well as spreadsheet capabilities.

ACCT 384. Accounting Information Systems. (3-0) Cr. F.S. Prereq: ACCT 285 or ACCT 501; ACCT 301 and MIS 301. Analysis of concepts and procedures underlying the automated accumulation and processing of accounting data. EDP internal control and audit techniques. Trends in accounting information systems.

ACCT 483. Advanced Managerial Accounting. (Dual-listed with ACCT 583). Cr. 3. Prereq: ACCT 383 or ACCT 581. Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills.

ACCT 484. Advanced Accounting Information Systems. (Dual-listed with ACCT 584). (3-0) Cr. 3. Prereq: ACCT 384. Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in an electronic environment.

ACCT 485. Principles of Federal Income Tax. (3-0) Cr. 3. F.S. Prereq: ACCT 386 or ACCT 501. Introduction to the fundamentals of federal income taxation and concepts applicable to all tax entities. Addresses issues related to the measurement and recognition of income, deductions, gains, and losses, taxation of property transactions, and basis / cost recovery concepts. Includes coverage of tax law policy objectives, tax implications of business and investment decisions, taxes versus financial reporting treatment of common business transactions, and ethical issues related to tax compliance and planning.

ACCT 487. Volunteer Income Tax Assistance. (Dual-listed with ACCT 587). (0-0) Cr. 1. Repeatable, maximum of 3 credits. S. Prereq: ACCT 285 or ACCT 501. Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 488. Governmental and Non-profit Institution Accounting. (Dual-listed with ACCT 588). (3-0) Cr. 3. Prereq: ACCT 387. Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored.

ACCT 495. Advanced Accounting Problems. (Dual-listed with ACCT 595). (3-0) Cr. 3. Prereq: ACCT 387. Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 496. International Accounting. (Dual-listed with ACCT 596). (3-0) Cr. 3. Prereq: ACCT 386 or ACCT 501. Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 497. Introduction to Auditing. (3-0) Cr. 3. F.S. Prereq: ACCT 384, ACCT 387 and STAT 326. The conceptual framework of auditing. Professional ethics. External reporting concepts. Audit methodology including risk analysis, internal control, procedures for gathering evidence and the role of statistical sampling in auditing.

Courses primarily for graduate students, open to qualified undergraduates:

ACCT 501. Financial Accounting. (3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission. A general introduction to financial accounting. Topics covered include the use and analysis of financial information, the regulatory environment, the role of International Financial Reporting Standards (IFRS), and the use of the internet and electronic spreadsheets as a means of accessing and analyzing financial data.

ACCT 582. Corporate Governance and Top Management. (Cross-listed with MGMT). (3-0) Cr. 3. Prereq: MGMT 503 or permission. Duties, structure, and functioning of top management teams and corporate boards of directors, CEO/board tenure and succession planning, top management compensation, board committee composition, assessment of CEO and board performance, theories of corporate governance, management of the corporate strategic agenda, governance codes, international governance, and chairman/CEO duality. Case studies and contemporary issues discussed.

ACCT 583. Advanced Managerial Accounting. (Dual-listed with ACCT 483). Cr. 3. Prereq: ACCT 383 or ACCT 581. Business simulation focusing on generation and communication of information to assist management with financial decision-making. Emphasis on developing teamwork, written communication, and oral presentation skills.

ACCT 584. Advanced Accounting Information Systems. (Dual-listed with ACCT 484). (3-0) Cr. 3. Prereq: ACCT 384. Advanced accounting information systems concepts; database design and information retrieval, internal controls within computerized accounting information systems, financial reporting in an electronic environment.
ACCT 585. Taxes and Business Strategy. (3-0) Cr. 3. Prereq: ACCT 485
Integration of concepts from accounting, finance, and economics to determine how taxes affect business decisions. Provides students with a conceptual framework for thinking about business tax planning and applies it to various common business decisions.

ACCT 586. Advanced Federal Taxation. (3-0) Cr. 3. Prereq: ACCT 485
Advanced coverage of federal taxation including issues related to the taxation of corporations, partnerships, estates and trusts, and their owners. Includes coverage of rules, concepts, background, and planning opportunities related to a number of common transactions involving these entities.

ACCT 587. Volunteer Income Tax Assistance. (Dual-listed with ACCT 487), (0-2) Cr. 1. Repeatable, maximum of 3 credits. S. Prereq: ACCT 285 or ACCT 501
Introduction to and field work in the preparation of individual income tax returns (state and federal). Basic coverage of filing and residency status, taxable income, exemptions, deductions, and credits. Tax software usage and online filing.

ACCT 588. Governmental and Non-profit Institution Accounting. (Dual-listed with ACCT 488), (3-0) Cr. 3. Prereq: ACCT 387
Accounting and financial reporting principles of local and state governments, including universities, schools, and hospitals. In addition, accounting and financial reporting of non-profit organizations will be addressed. Financial statements of local governmental units and the university are explored.

ACCT 590. Special Topics. Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
For students wishing to do individual research in a particular area of accounting.

ACCT 591. Fraud Examination and Prevention. (3-0) Cr. 3. Prereq: ACCT 497 or ACCT 501
Principles and methodology of fraud detection and deterrence. Address the causes and elements of fraud, asset theft, corruption, financial statement misrepresentation, internal controls for fraud prevention, investigative evidence gathering, and legal aspects of fraud.

ACCT 592. Financial Statement Analysis. (3-0) Cr. 3. Prereq: ACCT 284 or ACCT 501
Presentation and analysis of financial statement information from the point of view of the primary users of such data: owners and creditors. Topics include the financial reporting system, the primary financial statements, effects of accounting method choice on reported financial data, and firm valuation.

ACCT 594. Business Valuation. (3-0) Cr. 3. Prereq: ACCT 387 or ACCT 592
Using financial statement analysis to value the firm. Topics covered include assessing how well a firm’s financial statements reflect the economic effects of its resource management strategies and constructing pro forma financial information that will serve as inputs to valuation models.

ACCT 595. Advanced Accounting Problems. (Dual-listed with ACCT 495), (3-0) Cr. 3. Prereq: ACCT 387
Accounting for business combinations and affiliated companies, intercompany transactions, and consolidated financial statements; Partnership accounting; Segment and Interim Reporting; Multinational accounting.

ACCT 596. International Accounting. (Dual-listed with ACCT 496), (3-0) Cr. 3. Prereq: ACCT 386 or ACCT 501
Financial reporting issues in a global environment, including introduction to International Financial Reporting Standards (IFRS) and the potential for the use of IFRS in the U.S. Accounting and managerial issues faced by multinational corporations. Technical issues such as transfer pricing, inflation accounting and taxation will be discussed.

ACCT 597. Advanced Auditing and Assurance Services. (3-0) Cr. 3. Prereq: ACCT 497
A study of advanced auditing and assurance issues. Topics include risk analysis, internal control, fraud detection, analytical procedures, evaluating operational and strategic objectives, and reporting and implementing audit findings.

ACCT 598. Financial Accounting: Theory and Contemporary Issues. (3-0) Cr. 3. F. Prereq: ACCT 386 or ACCT 501

ACCT 599. Creative Component. Cr. 2. Prereq: Admission to the Master of Accounting Program
This course prepares students to complete their creative component project option in the Master of Accounting degree.
Ph.D. in Business and Technology

The College of Business offers graduate work leading to the doctor of philosophy degree in business and technology, with one of four specializations—information technology (IS), management (MGT), marketing (MKT), or supply chain management (SCM). Departments in the college (Management, Marketing, and Supply Chain and Information Systems), and the departments of Statistics, Economics, Psychology and Sociology cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by a 12-credit thesis or dissertation.

Students do not need to have an undergraduate or master’s degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 hours of business foundation requirements. These may include:

- Financial or managerial accounting (min. 3 Cr)
- Corporate finance (min. 3 Cr)
- Management information systems (min. 3 Cr)
- Marketing (min. 3 Cr)
- Supply chain management (min. 3 Cr)
- Economics – micro and macro (min. 6 Cr)

Students can choose one of four areas of specialization—IS, MGT, MKT, or SCM.

The information systems (IS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the IS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

The management (MGT) specialization applies a broad range of theoretical perspectives from the social sciences and diverse research methods to the study of organizational behavior, human resources, strategy, and entrepreneurship. The curriculum takes a multidisciplinary approach to analyze individuals and teams, the formulation and implementation of strategy, the effective use of human resources, social responsibility and ethics, entrepreneurship, innovation and technology, and the challenges of the global business environment. The program emphasizes personalized attention and the development of scholars who can contribute with high-quality theoretical and empirical research in these and related areas.

The marketing (MKT) area focuses on identification and delivery of solutions that help improve the ways in which businesses attract, capture, service and maintain customers. To do these activities well, organizations will need to integrate process goals and activities across different functional areas and across multiple organizational partners. This area of study will examine issues relating to inter-functional and inter-organizational relationships and their management in pursuit of maximizing the lifetime value of a businesses’ customer base.

The supply chain management (SCM) specialization focuses on the design, development, and control of business processes for conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems included as well. However, in today’s world, where competition occurs across supply chain networks, SCM also involves integrating business processes across firms.

Programs of study for the doctoral study are designed for each student in consultation with the major professor and the student’s PhD committee. Each student must complete advanced courses in his/her area of specialization, a minor area that supports the major area, and research methods courses. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

Application deadline for the Ph.D. program is February 1 for fall admission. Applicants must submit official transcripts of previous educational coursework and degrees, Graduate Management Admission Test (GMAT) scores, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

Courses primarily for undergraduates:

- BUSAD 101. Orientation. (1-0) Cr. 0.5. F.S.
  First 8 weeks. A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Offered on a satisfactory-fail basis only. Either BUSAd 101 or 102 may be counted towards graduation.

- BUSAD 101H. Orientation. (1-0) Cr. 0.5. F. Prereq: Membership in the Freshman Honors Program
  Designed to supplement the Freshman Honors orientation (Hon 121) with college specific information, to facilitate the development of Honors programs of study in business, and to acquaint students with university policies and procedures. Offered on a satisfactory-fail basis only. Either BUSAd 101 or 102 may be counted towards graduation.

- BUSAD 102. Expanded Orientation. (1-0) Cr. 1. F.S.
  A required orientation for all College of Business Students involved with a Business Learning Team. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines and registration procedures. Includes a consideration of various business majors and careers, tools for success in college including writing skills and presentations from employers, alumni and current students. Either BUSAd 101 or 102 may be counted towards graduation.

- BUSAD 150. Computer Competencies for Business. Cr. R.
  Students will demonstrate proficiency in MS Word, Excel, and PowerPoint, as well as the ability to conduct research using the Internet, use WebCT, and communicate via e-mail. Self-paced instruction available for students who are unable to demonstrate appropriate proficiency. Offered on a satisfactory-fail basis only.

- BUSAD 201. Career Issues in Business. (1-0) Cr. 0.5. F.S. Prereq: BUSAD 101
  Eight-week course designed to provide students with knowledge of careers in business and issues relevant to any workplace. Presentations by business professionals, current students who have previously interned, and faculty and staff with knowledge of careers in the various majors. Includes coverage of diversity and ethics issues in the workplace. Offered on a satisfactory-fail basis only.

- BUSAD 202. Professional Employment Preparation. (1-0) Cr. 0.5. Prereq: BUSAD 201
  Eight-week course designed to provide students with the skills to develop and implement a professional job search and to function professionally in a workplace setting. Topics include resume and professional correspondence, interviewing, working a career fair, the comprehensive job search, evaluating offers, business etiquette, networking, and transitioning to employee. Offered on a satisfactory-fail basis only.

- BUSAD 250. Introduction to Business. (3-0) Cr. 3. Prereq: COM S 113X
  Introduction to the functional areas of business and how the functional areas are integrated for the purpose of implementing business strategy. Introduces students to decision making tools (spreadsheets and databases) that are integral to business decision making. Includes application exercises to all functional areas of business.

- BUSAD 291. Experiential Learning. Cr. 1-3. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience
  Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.

- BUSAD 291A. Domestic Internship.. Cr. 1-3. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience
  Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.

- BUSAD 291B. International Internship.. Cr. 1-3. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience
  Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.
BUSAD 291C. Domestic Travel and Study.  
Cr. 1-3. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 291D. International Travel and Study.  
Cr. 1-3. Repeatable. Prereq: Written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experience in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 292. Entrepreneurship & Innovation Learning Community (EILC) Seminar.  
(1-0) Cr. 1. Prereq: Current member of or have applied to be a member of Entrepreneurship and Innovation Learning Community (see www.isupicenter.org/EILC for more information). Topics related to entrepreneurship and entrepreneurial thinking. Presentations by entrepreneurs and faculty, field trips, business concept development.

(Cross-listed with A B E, AGRON, AN S, ECON, TSM). (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher. Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

BUSAD 389. Cooperative Education.  
Cr. R. Repeatable. Maximum of 3 times. Prereq: Permission of department. Required of all cooperative students. Students must register for this course prior to commencing each work period. No more than three credits may be taken in addition to BusAd 398 during any given semester. Offered on a satisfactory-fail basis only.

BUSAD 490. Independent Study.  
Cr. 1-3. Repeatable. Prereq: BUSAD 490A, MGMT 414, MKT 448, LSCM 466 or FIN 380; senior classification, permission of instructor; for 490H: Admission to the Business Honors Program.

BUSAD 490A. Independent Study: International Business.  
Cr. 1-3. Repeatable. Prereq: MGMT 414, MKT 448, LSCM 466 or FIN 380; senior classification, permission of instructor.

BUSAD 490E. Independent Study: Entrepreneurship.  
Cr. 1-3. Repeatable. Prereq: senior classification, permission of instructor.

BUSAD 490H. Independent Study: Honors.  
Cr. 1-3. Repeatable. Prereq: Admission to the Business Honors Program.

BUSAD 491. Professional Experiential Learning.  
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 491A. Professional Experiential Learning: Domestic Internship.  
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 491B. Professional Experiential Learning: International Internship.  
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 491C. Professional Experiential Learning: Domestic Travel and Study.  
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 491D. Professional Experiential Learning: International Travel and Study.  
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experiences in a business related discipline. Offered on a satisfactory-fail basis only.

BUSAD 491E. Professional Experiential Learning: Other Experiential Learning Experience.  
Cr. 1-3. Repeatable. Prereq: Professional program, 12 credits from College of Business; written approval of supervising instructor and department chair on required form prior to the learning experience. Supervised travel and/or work experiences in a business related discipline.

BUSAD 492. The Washington Center Experience.  
Cr. 6-12. Prereq: Professional program, written approval of supervising instructor and department chair on required form prior to the learning experience. Participation in The Washington Center seminar/internship program. Includes seminars/forums, work experience, and a portfolio of experiences.

Courses primarily for graduate students, open to qualified undergraduates:

(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Critical analysis of current practice and case studies in strategic management with an emphasis on integrative decision making. Strategy formulation and implementation will be investigated in the context of complex business environments.

(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission. Introduction to the sources and statistical analysis of data as well as optimization models for use in making business decisions. Data collection, descriptive and inferential statistics including hypothesis testing, analysis of variance, multiple regression, linear programming and simulation.

BUSAD 503. Information Systems.  
(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Introduction to a broad variety of information systems (IS) topics, including current and emerging developments in information technology (IT), IS strategy in the context of corporate strategy, and IS planning and development of enterprise architectures. Cases and discussions highlight the techniques and tactics used by managers to cope with strategic issues within an increasingly technical competitive environment.

BUSAD 504. Marketing and Logistics.  
(Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Integration of the business functions concerned with the marketing and movement of goods along the supply chain with the primary goal of creating value for the ultimate customer. Coordination of marketing, production, and logistics activities within the firm and with outside suppliers and customers in the supply chain.

BUSAD 507. Organizational Behavior.  
(Cross-listed with STB). (2-0) Cr. 2. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Understanding human behavior in organizations, and the nature of organizations from a managerial perspective. Special emphasis on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

BUSAD 508. Accounting and Finance.  
(Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Survey of fundamental topics in accounting and finance. Financial statement reporting and analysis for agriculture firms, corporate governance issues related to financial reporting, (e.g., Sarbanes-Oxley). Basic tools and techniques used in financial management, including stock and bond valuation. How to assess and use capital budgeting methods to evaluate proposed firm investments.

BUSAD 509. Seed Trade, Policy and Regulation.  
(Cross-listed with STB). (3-0) Cr. 3. Prereq: Admission to MS in Seed Technology and Business program or by special arrangement with the instructor. Cultural, financial, economic, political, legal/regulatory environments shaping an organization’s international business strategy. Topics include entry (and repatriation) of people, firms, goods, services, and capital. Special attention to the institutions of seed regulation and policy. Ethical issues facing managers operating in an international context.
Undergraduate Study

For undergraduate curriculum in business, major in finance.

In addition to the basic business requirements, finance majors must also complete:

- **FIN 310** Corporate Finance * 3
- **FIN 320** Investments 3

Select four from the following (two must be 400-level):

- **FIN 327** Fixed Income Securities
- **FIN 330** Financial Markets and Institutions
- **FIN 361** Personal Risk Management and Insurance
- **FIN 371** Real Estate Principles
- **FIN 415** Business Financing Decisions
- **FIN 424** Financial Futures and Options
- **FIN 425** Security Analysis and Portfolio Management
- **FIN 428** Advanced Fixed Income Analysis and Portfolio Management
- **FIN 435** Venture Capital, Private Equity, and Mergers and Acquisitions
- **FIN 445** Bank Management Decisions
- **FIN 462** Corporate Risk Management and Insurance
- **FIN 472** Real Estate Finance
- **FIN 480** International Finance

Select one from the following:

- **ACCT 383** Intermediate Managerial Accounting
- **ACCT 386** Intermediate Accounting I
- **ACCT 387** Intermediate Accounting II
  or any 400 level course listed above.

* STAT 326 Introduction to Business Statistics II is highly recommended to be taken as a prerequisite

The courses in finance constitute a broad program of study designed to provide a descriptive, behavioral, and analytical background of financial management to enable students to qualify for opportunities in financial services, insurance, brokerage, government, real estate, and financial management of business enterprises. Finance is also an excellent area for those who wish to become more knowledgeable as consumers, particularly in the fields of investments, insurance, and real estate.

Areas of study in the field of finance include corporate financial management, investments, portfolio management, insurance, real estate, bank, and risk management. Upper-level courses include a review of contemporary literature in the field, case studies, and financial problem analysis integrating finance courses previously taken.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such an education should provide the student with:

1. a mastery of basic financial concepts and methods of analysis
2. an understanding of financial operations in a global setting and of the role of financial institutions in the economy
3. an ability to effectively communicate and work with others as the finance member of a team
4. an ability to demonstrate leadership capabilities in financial analysis and portfolio management.

The department also offers a minor for non-finance majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand-alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Finance department offers a Master of Finance (M.Fin.) degree. The M.Fin. is a non-thesis, non-creative component curriculum designed to provide students with in-depth coverage of finance topics and a strong quantitative skill set. Students will learn financial analysis and valuation, advanced regression techniques and programming approaches for data analysis, time series analysis and forecasting, optimization techniques, modelling of financial and risk variables, simulation techniques, and tools for effective risk management. The 40 credit program requires 22 core credits, seven of which are taught in the economics department. Another 18 credits of electives are required, nine of which must be in finance courses.
The department also participates in the full-time and part-time Master of Business Administration (M.B.A.) program. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in finance.

Courses primarily for undergraduates:

FIN 301. Principles of Finance. (3-0) Cr. 3. F.S.SS. Prereq: ACCT 284, ECON 101, STAT 226
Introduction to financial management with emphasis on corporate financing and investment decision making, time value of money, asset valuation, capital budgeting decision methods, cash budgeting, and financial markets.

FIN 310. Corporate Finance. (3-0) Cr. 3. F.S.SS. Prereq: FIN 301
Theory used in a firm’s investment and financing decisions. Analysis of environment in which financial decisions are made; applications of analytical techniques to financial management problems.

FIN 320. Investments. (3-0) Cr. 3. F.S.SS. Prereq: FIN 301
Introduction to securities and markets from the viewpoint of the individual investor. Emphasis on mechanics of trading, measurement of return and risk, behavior of security prices, valuation of stocks and bonds, mutual funds, portfolio selection techniques, and performance evaluation.

FIN 327. Fixed Income Securities. (3-0) Cr. 3. Prereq: FIN 301
Valuation of fixed income securities, including pricing conventions, term structure of interest rates, default, duration, and hedging of interest rate risk with derivatives. Analysis of bond market sectors, including treasury, agency, corporate, sovereign, municipal, and residential mortgage bonds.

FIN 330. Financial Markets and Institutions. (3-0) Cr. 3. F.S. Prereq: FIN 301
Introduction to the structure and operations of the United States financial system and its markets and institutions. Emphasis on developing an integrated understanding of markets and financial service providers including global linkages.

FIN 361. Personal Risk Management and Insurance. (3-0) Cr. 3. F.S. Prereq: ECON 101
Risk concepts and the use of insurance by individuals and families. Emphasis on the insurance mechanism and methods of dealing with income, property, and liability risks.

FIN 371. Real Estate Principles. (3-0) Cr. 3. S. Prereq: ECON 101
Legal, economic, social and financial aspects of real estate, including property rights, contracts, mortgage instruments, tax factors, brokerage, valuation, risk and return analysis, financing techniques, and investments.

FIN 415. Business Financing Decisions. (3-0) Cr. 3. Prereq: FIN 301 and STAT 326
In depth study of the firm’s external financing decision. Emphasis on the development of cash flow statements, projected financing needs and the selection of the appropriate financing instrument. Focus on case studies and application of developed techniques on actual field project.

FIN 424. Financial Futures and Options. (3-0) Cr. 3. Prereq: FIN 320 and STAT 326
Advanced study of pricing and using derivatives - instruments deriving value from fundamental items such as commodities, currency exchange rates, market indices, equities and bonds. Addresses basic building blocks of derivatives (i.e., forwards, futures, options and swaps) and relevant current topics and issues.

FIN 425. Security Analysis and Portfolio Management. (3-0) Cr. 3. F.S. Prereq: FIN 320, STAT 326 and permission of instructor
Advanced study of security analysis, security selection techniques and portfolio management. Emphasis on the applications of methods learned via the selection and evaluation of a portfolio of actual securities purchased in securities markets in the U.S. or abroad. Tracking and periodic reporting of the portfolio’s performance relative to standard benchmarks is also required.

FIN 428. Advanced Fixed Income Analysis and Portfolio Management. (Dual-listed with FIN 528) (3-0) Cr. 3. Prereq: FIN 327, FIN 320, STAT 326 and permission of the instructor
Advanced analysis of fixed income markets and securities, including valuation and trading of treasury securities, corporate bonds, mortgage backed securities. Analysis of structured financial securities, including CDO, CMBS, and ABS. Analysis of active and passive investment strategies for managing fixed income portfolios. Students are required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active bets taken on market direction, duration, yield curve, and credit spreads.

FIN 435. Venture Capital, Private Equity, and Mergers and Acquisitions. (3-0) Cr. 3. S. Prereq: FIN 310, FIN 320, STAT 326, and permission of instructor
An advanced investments class that focuses on alternative investments. Topics include techniques for valuing public and private firms, venture capital finance, investment banking, private equity finance, leveraged buyouts, hedge funds, the structure and financing of mergers and acquisitions, and divestitures.

FIN 445. Bank Management Decisions. (3-0) Cr. 3. F. Prereq: STAT 326 and FIN 330
Analysis of operations of depository financial institutions from management viewpoint. Emphasis on evaluating performance, policy formation, asset and liability management, the role of capital, and the operating environment.

FIN 462. Corporate Risk Management and Insurance. (3-0) Cr. 3. F. Prereq: FIN 301 and STAT 326
Analysis of an organization’s approaches to the management of price, credit, and pure risk. Emphasis on the consideration and selection of risk control and financing treatments and the decision making framework underlying the alternatives selected. Covers commercial insurance, self-insurance, and alternative financing arrangements.

FIN 472. Real Estate Finance. (3-0) Cr. 3. Prereq: FIN 301 and STAT 326
Introduction to the techniques of assessing the value of real estate and real estate financing instruments.

FIN 480. International Finance. (3-0) Cr. 3. F.S. Prereq: FIN 301 and STAT 326
Advanced study of currency market equilibrium, use and analysis of currency derivatives, hedging currency risk, and additional topics, which could include multinational capital budgeting, taxation, raising capital internationally, international portfolio diversification, international capital market equilibrium, political and country risk, financing international trade, multinational corporate treasury management, and current issues.

FIN 490. Independent Study. Cr. 1-3. Repeatable. Prereq: FIN 301, STAT 326 and permission of instructor

FIN 499. Finance Internship. (3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; FIN 301 plus 3 additional credits in finance and STAT 326
Supervised experience in a private sector banking, insurance, real estate, investments or corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499A. Finance Internship: Banking. (3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; STAT 326
Supervised experience in a private sector banking, insurance, real estate, investments or corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499B. Insurance. (3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; FIN 361 and STAT 326
Supervised experience in a private sector insurance organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499C. Real Estate. (3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; FIN 301 plus 3 additional credits in finance and STAT 326
Supervised experience in a private sector real estate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.
FIN 490D. Investments. (3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; FIN 320 and STAT 326
Supervised experience in a private sector investment organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

FIN 499E. Corporate. (3-0) Cr. 1-3. F.S.SS. Prereq: GPA 2.5; permission of internship coordinator; FIN 310 and STAT 326
Supervised experience in a private sector corporate organization or in a governmental agency that regulates such organizations. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:
FIN 501. Financial Valuation and Corporate Financial Decisions. (3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission.
Shareholder wealth maximization as the goal of the firm within a social responsibility context, financial Math, valuation of securities, the global financial market place as the test of value, estimation of cost of capital, global capital investment decisions, capital structure policy, working capital management.

FIN 510. Advanced Corporate Finance. (3-0) Cr. 3. Prereq: FIN 501
Examines corporate financial decisions, including theory and associated empirical evidence. Topics include agency conflicts, corporate governance, executive compensation, becoming publicly traded, raising capital through public and private offerings, capital structure, financial distress and bankruptcy, leasing, dividend policy, corporate control, restructuring, and risk management.

FIN 515. Case Studies in Financial Decision Making. (3-0) Cr. 3. Prereq: FIN 501
This course focuses on case studies to develop an integrated set of financial decisions. Topic areas include fixed asset, working capital, capital structure, dividend and merger/acquisition decisions. The objective of the course is to examine different firm settings and establish a framework within which to apply financial tools.

FIN 520. Investments. (3-0) Cr. 3. Prereq: FIN 501
Analysis of risk and return for individual securities and portfolios of securities. Topics include the market environment, mechanics of trading, measurement of return and risk, valuation of stocks and bonds, mutual funds, optimal asset allocation, market efficiency, portfolio performance evaluation, and risk management.

FIN 528. Advanced Fixed Income Analysis and Portfolio Management. (Dual-listed with FIN 428). (3-0) Cr. 3. Prereq: FIN 327, FIN 320, STAT 326 and permission of the instructor
Advanced analysis of fixed income markets and securities, including valuation and trading of treasury securities, corporate bonds, mortgage backed securities. Analysis of structured financial securities, including CDO, CMBS, and ABS. Analysis of active and passive investment strategies for managing fixed income portfolios. Students are required to manage a fixed income portfolio for an institutional investor. A top-down approach to portfolio management is assumed, with active bets taken on market direction, duration, yield curve, and credit spreads.

FIN 530. Financial Analysis and Valuation. (3-0) Cr. 3. Prereq: FIN 501
Valuation of public and private firms through analysis of financial statements and other information. Study of drivers of value creation, industry analysis, patterns of growth, models for forecasting and analyzing firm cash flows, estimating and adjusting cost of capital, alternative methods of cash flow valuation, the calculation and use of valuation multiples, and valuing mergers and acquisitions.

FIN 534. Financial Derivatives. (3-0) Cr. 3. F. Prereq: Graduate classification
An applied course in derivative markets. Topics covered include futures and options markets, option pricing, swaps, use and rating of insurance products, and alternative forms of reinsurance. Emphasis will be placed on agricultural commodity markets, but energy, interest, currency and stock index contracts will also be covered.

FIN 535. Venture Capital, Private Equity, and Mergers and Acquisitions. (3-0) Cr. 3. Prereq: FIN 501
Advanced investments class focusing on alternative investments. Topics include the nature and scope of investment banking, techniques for valuing public and private firms, venture capital finance, private equity finance, leveraged buyouts, hedge funds, the structure and financing of mergers and acquisitions, and divestitures.

FIN 550. Financial Econometrics. (3-0) Cr. 3. Prereq: FIN 501, ECON 571
Analysis, modeling, and forecasting of time series data, volatility modeling and forecasting, maximum likelihood estimation, robust standard error computation, specification testing, estimation under alternative distributional assumptions, and Monte Carlo simulation. Applications include tests of asset pricing models, analysis of asset volatility, corporate event studies, and value at risk analysis.

FIN 564. Advanced Derivatives and Risk Management. (3-0) Cr. 3. Prereq: FIN 501, FIN 534
Risk management tools and how they are applied within financial institutions and the corporate enterprise. Focus on measuring exposure to stock market risk, interest rate risk, currency risk, and credit risk and how these exposures may be managed. Topics include bank risk management regulations, volatility modeling, value at risk analysis, extreme value theory, credit default swaps, and portfolio simulation.

FIN 572. Real Estate Finance. (3-0) Cr. 3. Prereq: MBA Core
Survey of techniques for assessing the value of real estate assets. Introduction to real estate financing instruments, their use and appropriateness.

FIN 590. Special Topics. Cr. 1-3. Repeatable. F.S.SS. Prereq: Permission of instructor
For students wishing to do individual research in a particular area of finance.

International Business Interdepartmental Undergraduate Secondary Major
The international business program is designed to provide students with an understanding of the international business environment. Students are expected to develop an understanding of issues associated with international business issues as applied to the different functional areas of business. They will also develop skills to prepare themselves for business positions with international responsibilities. The program is designed to prepare students for employment in multinational companies and for business assignments beyond the United States.

International Business is an undergraduate secondary major that may be taken only in conjunction with a primary major in business. Technical knowledge of international business will strengthen the expertise acquired with the primary major. Business students pursuing this program should strengthen their placement opportunities with companies that are engaged in international business and trade.

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum of 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major must be used for the primary major.

Management Undergraduate Study
For undergraduate curriculum in business, major in management.

The Department of Management offers a major in management. Students will complete the general education requirements (including business foundation courses), and business core requirements for the bachelor of science (B.S.) degree and 18 credits in the major. The instructional objective of the Department of Management is to provide students with knowledge of organizations and management functions within organizations. Management majors will demonstrate an understanding of (1) employee work-related attitudes and behaviors, (2) competitive strategy and advantage, (3) challenges and strategies in international business, and (4) human resource management practices in firms. Students will demonstrate an awareness of the role of diversity, ethics, and technology in business decisions, the impact of external forces and global issues on organizations, and an ability to think critically, to communicate effectively, and to work effectively as a member of a team.

Management is a broadly defined discipline and activity, which is neither industry nor function specific. Management concepts, theories, techniques, and skills are applicable to all business functional areas and are essential components for successful organizations. Management requires sound conceptual, technical, and human skills for the effective utilization of organizational resources. In addition to the basic business foundation and core courses, management majors are required
to complete 18 credits of management or department approved courses. Included in these 18 credits are four required courses:

- **MGMT 371** Organizational Behavior 3
- **MGMT 377** Competitive Strategy 3
- **MGMT 414** International Management 3
- **MGMT 471** Personnel and Human Resource Management 3

The department also offers a minor for non-Majors majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Management majors are encouraged to consider a study abroad program that will complement their academic program. Reasons to study abroad include (1) for the adventure (2) obtain language skills (3) learn about new cultures, and (4) to enhance your resume. While numerous study abroad programs are available for business students can be found at [http://www.business.iastate.edu/undergraduate/studyabroad](http://www.business.iastate.edu/undergraduate/studyabroad), programs that can integrate into the management minor are:

- ESSEC Business School Paris (semester or year)
- CIMBA in Italy (semester)
- Aston Business School in England (year)
- Lorenzo Di Medici (semester or year)
- University of Exeter (semester or year)
- Business and Entrepreneurship in Europe and Italy (Summer)

**Graduate Study**

The Department of Management participates in the full-time and part-time Master of Business Administration (M.B.A) and in the Ph.D. in Business and Technology. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives.

The Ph.D. in Business and Technology with a Management (MGT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on management issues relating to organizational behavior, human resources, strategy, and entrepreneurship.

Courses primarily for undergraduates:

- **MGMT 310. Entrepreneurship and Innovation.**
  (3-0) Cr. 3. F.S. Prereq: Sophomore classification
  Review of the entrepreneurial process with emphasis on starting a new business.
  How to analyze opportunities, develop an innovative product, organize, finance, market, launch, and manage a new venture. Deals with the role of the entrepreneur and the importance of a business plan. Speakers and field project.

- **MGMT 313. Feasibility Analysis and Business Planning.**
  (3-0) Cr. 3. F.S. Prereq: MGMT 310
  Developing an idea for a new business venture, conducting a feasibility study, researching the potential market, analyzing the competition, and writing a formal business plan. Basic business functions are discussed in terms of their application to conducting feasibility analysis and writing a business plan for an entrepreneurial venture.

- **MGMT 367. International Entrepreneurship.**
  (3-0) Cr. 3. Prereq: Junior standing
  The essentials of operating an entrepreneurial firm in an international environment. Topics include understanding the role of entrepreneurship in economic development, starting and developing a business in an international market, financing international ventures, international management issues and exchange rates.
  Meets International Perspectives Requirement.

- **MGMT 370. Management of Organizations.**
  (3-0) Cr. 3. F.S.SS. Prereq: ECON 101 or ECON 102 or equivalent
  A management functions approach is used to explain what managers do in organizations; how they deal with external constituents, how they structure their companies, and how they deal with employees. A contingency approach is used as a framework for understanding how to increase the effectiveness and efficiency of organizations in today’s dynamic, highly competitive business environment.

- **MGMT 371. Organizational Behavior.**
  (3-0) Cr. 3. F.S. Prereq: MGMT 370
  The study of individual attributes, interpersonal relations, and employee attitudes in organizations. Instructional emphasis is placed on how management concepts such as reward systems, job design, leadership, teams, etc., can be used to manage employee attitudes and behavior.

- **MGMT 377. Competitive Strategy.**
  (3-0) Cr. 3. F. Prereq: MGMT 370
  Developing competitive strategy and achieving competitive advantage in firms, including: industry analysis, generic strategies, hypercompetition, competing against time, and building distinctive capabilities.

- **MGMT 410. Social Entrepreneurship.**
  (3-0) Cr. 3. F.S. Prereq: Sophomore classification
  This course will introduce students to issues related to the role of social entrepreneurship in helping to solve social problems, including innovation, opportunity recognition, planning and the launch of new non-profit organizations.

- **MGMT 414. International Management.**
  (3-0) Cr. 3. F.S.
  The nature and economic role of the multinational and entrepreneurial ventures, including the impact of legal, political, and cultural variables upon firm performance and managerial activity; case studies illustrate interdependent nature of functional areas of business projected across national boundaries.

- **MGMT 415. Managing New Ventures.**
  (3-0) Cr. 3. F.S. Prereq: MGMT 370; MKT 340; FIN 301; SCM 301
  Examination of business problems and issues in new and growing firms. Emphasis is on analyzing existing businesses. Includes a field project.

- **MGMT 419. Social Responsibility of Business.**
  (3-0) Cr. 3. S.
  A consideration of the role of business in society. Critical analysis of ethical, managerial, and public issues as they affect the corporation.

- **MGMT 471. Personnel and Human Resource Management.**
  (3-0) Cr. 3. F.S. Prereq: Junior standing
  Recruitment and selection, utilization, and development of people in organizations. Examination of each personnel function; interrelationships among the functions.

- **MGMT 472. Management of Diversity.**
  (3-0) Cr. 3. F.S. Prereq: Junior classification
  One of the most crucial problems in organizations today is the management of diversity. Attempts to define the difference between equal employment opportunity/affirmative action, which has a legal basis, and diversity which has an educational basis. Organized around the concepts of: (1) cultural diversity and cultural unity; (2) development of skills and tools to manage diversity; and (3) structure of diversity development programs in organizations.
  Meets U.S. Diversity Requirement.

- **MGMT 478. Strategic Management.**
  (3-0) Cr. 3. F.S. Prereq: MGMT 370; ACCT 285; FIN 301; MKT 340; SCM 301; graduating senior
  Strategy formulation, implementation, and evaluation and control in today’s organizations. Emphasis is on strategic planning and decision making using the case method and/or projects.

- **MGMT 490. Independent Study.**
  Cr. 1-3. Repeatable. Prereq: MGMT 370, senior classification, permission of instructor
  Courses primarily for graduate students, open to qualified undergraduates:

- **MGMT 502. Organizational Behavior.**
  (3-0) Cr. 3. F. Prereq: Enrollment in MBA program or departmental permission
  Understanding human behavior in organizations and the nature of sustainable organizations from a managerial perspective. Special emphasis is placed on how individual differences, such as perceptions, personality, and motivation, influence individual and group behavior in organizations and on how behavior can be influenced by job design, leadership, groups, and the structure of organizations.

- **MGMT 503. Professional Responsibility in Business and Society.**
  (3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission, ACCT 501, FIN 501, MGMT 502, MKT 501
  Ethical and social responsibilities of top managers in corporations. Topics include stakeholder management, corporate social responsibilities, strategies for sustainable development, pursuit of societal and corporate goals, board and chief executive leadership roles, governance reform and ethics, and executive leadership style and values. The presentation of course concepts is facilitated by the use of cases, discussion scenarios, and ethical dilemmas.

- **MGMT 504. Strategic Management.**
  (3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission, ACCT 501, FIN 501, MGMT 502, MKT 501
  Critical analysis of case studies in strategic management with an emphasis on integrative decision making. Strategy implementation in light of the global, legal, economic, cultural, and political contexts of business.
(3-0) Cr. 3. Prereq: Graduate classification
Commercialization of new technology. Topics covered include market analysis, intellectual property, product development, feasibility analysis, and new business evaluation.

MGMT 566. Entrepreneurship and New Business Creation.
(3-0) Cr. 3. Prereq: Graduate classification or permission of instructor.
The essentials of starting and operating a new business. Topics include current research on entrepreneurial perspective, starting and developing a new business, financing the venture, managing the growing firm, and special issues.

(3-0) Cr. 3.
Essentials of operating an entrepreneurial firm in an international environment. Topics include international entrepreneurship, starting and developing a business in an international market, financing international ventures, international management issues, exchange rates, and culture.

MGMT 569. Technology Entrepreneurship.
(3-0) Cr. 3. Prereq: Graduate standing or instructor's permission
Identification of high-potential, technology-intensive commercial opportunities, resources; gathering, and risk management under environmental uncertainty. Focus on technology ventures and firms that use technology strategically across several industries. Topics include key success factors and forecasting analysis across main value-chain activities.

MGMT 570. Managing Employee Attitudes and Behaviors.
(3-0) Cr. 3. F.S.S. Prereq: MGMT 371 or MGMT 502 or PSYCH 450
Advanced topics germane to the management of individuals and groups over their work lives; sustained work commitment, motivation and job/career satisfaction, absenteeism, turnover, stress, leadership and career development (e.g., career ladders, mentoring).

MGMT 571. Seminar in Personnel and Human Resources Management.
(3-0) Cr. 3. S. Prereq: MGMT 371 or MGMT 502 or SOC 420
Topics and issues in personnel management with a focus on the management of human resources in organizations. Current personnel practices, philosophies, and behavioral science research.

MGMT 572. Personality and Management.
(3-0) Cr. 3. Prereq: Graduate standing or permission of instructor
Personality and individual differences have significant implications for human resource management, organizational behavior and strategic management. Research has shown that these characteristics affect many core management topics including motivation, leadership, and decision making. Surveys the literature relating personality and individual differences to management and organizations. Students will complete a wide variety of personality assessments and get their results, and reflect on how personality and individual differences can be practically relevant in the modern work environment.

(3-0) Cr. 3. F. Prereq: MGMT 504 or permission of instructor
Discussion of concepts and techniques used in long range strategic planning. Examination of planning practices in business and not-for-profit organizations. Topics include environmental scanning, industry analysis, forecasting, corporate and competitive strategies, and tactics.

MGMT 582. Corporate Governance and Top Management.
(Cross-listed with ACCT). (3-0) Cr. 3. Prereq: MGMT 503 or permission of instructor
Duties, structure, and functioning of top management teams and corporate boards of directors. CEO/board tenure and succession planning, top management compensation, board committee composition, assessment of CEO and board performance, theories of corporate governance, management of the corporate strategic agenda, governance codes, international governance, and chairman/CEO duality. Case studies and contemporary issues discussed.

MGMT 583. Strategic Management of Innovation.
(3-0) Cr. 3. Prereq: MGMT 504 or permission of instructor
Critical analysis and discussion of cases focused on strategic management of innovation. Assessment of a firm's innovative capabilities and competitive dynamics to manage innovative processes. Practical applications through emphasis on implementation including internal corporate venturing, management of the corporate R&D function, and institutionalization of innovation.

MGMT 584. Management Consulting.
(3-0) Cr. 3. Prereq: MGMT 504 or permission of instructor
Provides the opportunity for students to understand the role of the professional consultant, the issues facing the management consulting industry, the competencies of various management consulting firms, the nature and form of strategic consulting engagement, and the nature and scope of strategic change in business firms. Students will learn about management consulting functions and will practice the consultant role though cases and field studies.

MGMT 585. Special Topics.
Cr. 1-3. Repeatable. F,S,S. Prereq: Permission of instructor
For students wishing to do individual research in a particular area of management.

Courses for graduate students:

MGMT 601. Philosophy of Science.
(3-0) Cr. 3. Prereq: enrollment in the PhD program
This course provides a philosophical introduction to the theoretical and empirical development of scientific knowledge. It focuses on a variety of basic problems common to the social sciences: the nature of explanation, the structure of theories, forms of knowledge, scientific laws, nature of theory and ethics. The purpose of the course is to help doctoral students define a research context by addressing the purposes, assumptions and primary components of scientific inquiry.

MGMT 602. Organizational Theory.
(3-0) Cr. 3. Prereq: MGMT 601
This seminar involves the examination of the core theories and perspectives in organizational theory, as well as their applications and extensions. This material addresses the fundamental rationale for organizations in modern society, basic processes of organizing and organizational structure, a consideration of inter-organizational relationships and the external environment, and a variety of factors that help determine organizational effectiveness.

MGMT 603. Strategic Management of Technology and Innovation.
(3-0) Cr. 3. Prereq: MGMT 601
This course will offer a critical review of organizational decision making with respect to technology and innovation. Students will learn how technological change can alter the basis of competition; how competitive strategy drives technology investment decisions; how market-orientation should be the other backbone of technological innovation; and best practices of organizing and managing the new product development process to achieve strategic goals.

MGMT 604. Seminar in Organizational Behavior.
(3-0) Cr. 3. Prereq: enrollment in the PhD program
The purpose of this seminar is to introduce behavioral science literature relevant to the study of behavior in organizational settings. The course will focus on the individual's role within organizations and cover topics such as individual differences, motivation, leadership, decision-making, Learning, risk taking, interpersonal relations, etc. Both theoretical and empirical contributions will be examined, with emphasis on integration of diverse theoretical perspectives.

MGMT 650. Research Practicum I.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MGMT 651. Research Practicum.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Cr. 1-12. Prereq: Graduate classification, permission of dissertation supervisor
For students wishing to do individual research in a particular area of management.

Management Information Systems
Undergraduate Study

For undergraduate curriculum in business, major in management information systems (MIS).

The MIS major requires students to take 18 credit hours in the management information systems area, including 12 credit hours of required core courses and 6 credit hours of electives. The required core courses are:

- MIS 307 Intermediate Business Programming 3
- MIS 310 Information Systems Analysis 3
- MIS 320 Database Management Systems 3
- MIS 340 Project Management 3

The remaining 6 credits can be taken from the department approved electives, preferably with the specified clusters that focus on specific IT job related knowledge and skills (application development, IT infrastructure and security, business analytics, and supply chain technology). Students are encouraged to take electives that cover multiple clusters to enhance marketability and career flexibility.
The department also offers a minor for non-management information systems majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. The 15 credits must include MIS 301 Management Information Systems. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study
The Department of Supply Chain and Information Systems participates in the M.S. in Information Systems (M.S.I.S.), the full-time and part-time Master of Business Administration (M.B.A.) and the Ph.D. in Business and Technology programs. The department also participates in an interdepartmental M.S. in Information Assurance as well as in a master’s and Ph.D. program in Human Computer Interaction.

The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core business courses and the remaining 18 credits are elective. Students may obtain a specialization in technology and innovation management within the M.B.A. program.

The M.S.I.S. is a 30-credit (minimum) curriculum designed around three interrelated areas—business foundation, IS core, and electives. All students are expected to be familiar with basic computer skills before entering the program. The M.S.I.S. program will educate students on applying IS theory and concepts to real-world IS development through classes that enable them to learn and use the latest software in application projects. Students graduating from the program will have advanced technical and managerial skills to develop and manage information systems projects.

The Ph.D. in Business and Technology is a 56-credit curriculum (minimum) which includes a 12-credit dissertation designed around four interrelated areas—core, specialization, minor, and research methods—and the dissertation.

The Management of Information Systems (MIS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the MIS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

Courses primarily for undergraduates:
MIS 207. Fundamentals of Computer Programming. (Cross-listed with COM S). (3-1) Cr. 3. F.S. Prereq: MATH 150 or placement into MATH 140/MATH 141/MATH 142 or higher
An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. Exceptions/error-handling. This course is not designed for computer science, software engineering, and computer engineering majors. Credit may not be applied toward graduation for both both Com S 207/MIS 207 and Com S 227.

MIS 301. Management Information Systems. (3-0) Cr. 3. Prereq: COM S 113 or BUSAD 150
The role of information technology in organizations. Overview of methodologies for design and development of systems including decision support systems, expert systems, data bases, end-user computing, etc. Computer applications relate concepts to practice. Lecture and laboratory work emphasizes the enabling role of IT in contemporary organizations.

MIS 307. Intermediate Business Programming. (3-0) Cr. 3. Prereq: MIS 207/COM S 207 or COM S 227; credit or enrollment in MIS 301
Introduction to the concepts and use of data structures, file accesses and object oriented programming methodologies in contemporary business environments. Application development environments will be covered.

MIS 310. Information Systems Analysis. (3-0) Cr. 3. Prereq: credit or enrollment in MIS 301
Critical analysis of business processes, data and process modeling, feasibility studies, CASE tools, and developing system design specifications.

MIS 320. Database Management Systems. (3-0) Cr. 3. Prereq: Credit or enrollment in MIS 301
Database design, development, and implementation. Focus on data models, both classical and object oriented. Uses relational and/or object oriented database management systems.

MIS 340. Project Management. (Cross-listed with SCM). (3-0) Cr. 3. Prereq: credit or enrollment in MIS 301
Equips students to support team activities in the general project management environment and better manage their careers. Practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods.

MIS 407. Advanced Business Programming. (3-0) Cr. 3. Prereq: MIS 307
Advanced software development and topics in contemporary programming languages. Topics include basic syntax, advanced programming techniques, file structures and management, database access, algorithm design, web forms and graphical user interfaces.

MIS 434. Electronic Commerce Strategy. (3-0) Cr. 3. Prereq: MIS 301, MKT 340, SCM 301
Overview of business strategies and technologies used for electronic commerce. Emphasis is on the strategic, operational, and technical issues associated with global electronic commerce using class lecture/discussion and case studies.

MIS 435. Information Systems Infrastructure. (3-0) Cr. 3. Prereq: MIS 301
Overview of Internet and telecommunications technology used in business application. Understand Internet and network protocols, network and application architectures, design, and implementation.

MIS 436. Introduction to Business Analytics. (3-0) Cr. 3. Prereq: STAT 226 and MIS 320 or permission of the instructor
Introduction to the field of business analytics (BA). Students will examine BA processes and techniques used in transforming data to knowledge and creating value for organizations. Business cases, presentations by business professionals, class lectures and discussions on data analysis, design and modeling, and extensive hands-on analytical exercises.

MIS 439. Topics in Management of Information Systems. (3-0) Cr. 3. Repeatable. Prereq: MIS 301, permission of instructor
A variety of topics will be covered and topics may vary between semesters. Some of the topics are information resources management, electronic commerce, decision support systems, and expert systems.

MIS 440. Supply Chain Information Systems. (Cross-listed with SCM). (3-0) Cr. 3. Prereq: MIS 301, SCM 301
Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include: design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

MIS 445. Enterprise Systems and Architecture. (3-0) Cr. 3. Prereq: MIS 435
Contemporary theories, concepts, and practices in network infrastructure, network design, and information security. Design, install, and administer a complex network infrastructure. Study security threats and attacks and countermeasures. Investigate exposure to attacks, firewalls, and development of intrusion detection systems. Other security topics such as risk management, IT audit, and security regulations will also be addressed.

MIS 446. Advanced Business Analytics. (3-0) Cr. 3. Prereq: MIS 436
Projects-based course which provides an in-depth understanding of BA methods of visualization, data mining, text mining, web-mining, and predictions through the use of specific BA tools. For students who are interested in understanding advanced techniques and applications of data analytics and acquiring hands-on skills for making intelligent business decisions in data-rich organizations.

MIS 447. Information Systems Development. (3-0) Cr. 3. Prereq: MIS 401
Design of business systems using contemporary tools and methods such as SQL CASE tools, OOD tools, etc. Focuses on synthesizing concepts from earlier MIS courses.

MIS 450. Enterprise Resource Planning Systems in Supply Chain. (Cross-listed with SCM). (3-0) Cr. 3. Prereq: SCM 301, MIS 301 or IE 148, IE 341
Examination of the role of enterprise resource planning systems (ERP) in the supply chain. Hands-on experience with a major software application in use by many corporations to manage and improve the efficiency of their supply chains and operations. Students will develop a more process-centric perspective about how a supply chain operates and how ERP enables and supports such operations.
Courses primarily for graduate students, open to qualified undergraduates:

(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission.
This course exposes the student to current theories and practices appropriate for understanding the role and application of information systems for individuals, organizations, and society within a globally competitive context. The course focuses on information technology and its uses in improving work practices, products, and tools for individuals and organizations. The course also addresses issues pertaining to current and emerging topics in the development and use of technology, the role of technology in and its alignment with organizational strategy and sustainable business practices, information system planning and the development of enterprise architectures, and human interface and personal characteristics in the design and use of technology.

(3-0) Cr. 3. Prereq: MIS 531 or equivalent
A survey of business-oriented programming languages with emphasis on state-of-the-art development techniques for business software. Topics include object-oriented and Internet programming issues and methods.

MIS 533. Data Management for Decision Makers.
(3-0) Cr. 3. Prereq: MIS 501
Addresses data needs of functions such as marketing, finance, and production. Advanced skills needed to design, develop, and use database, data warehousing and data mining systems for effective decision support. Emphasis on importance of contemporary technologies.

MIS 534. Electronic Commerce.
(3-0) Cr. 3. Prereq: MIS 501
Overview of how modern communication technologies including the internet and world wide web have revolutionized the way we do business. Provides an understanding of various internet technologies and how companies are using the internet for commercial purposes. Explores future scenarios on the use of these technologies and their impact on various industries and the society.

MIS 535. Telecommunications Management.
(3-0) Cr. 3. Prereq: MIS 501
Issues involved in the management of telecommunications function. Overview of communications technology used in various business applications, local area network, wide area network, broad band network, wireless and voice networks. Internet technologies and protocols. Analyzing the strategic impact of these technologies on organizations. Strategic planning for telecommunications, including network planning and analysis.

MIS 537. Project Management.
(3-0) Cr. 3. Prereq: MIS 501
Prepares students to support team activities in the general project management environment and provides them with a working understanding of the full scope of project management activities. Students will also have practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods. The course follows the recommended content areas of the Project Management Institute, and provides students with a recognized foundational training in project management.

(3-0) Cr. 3. Prereq: MIS 501
Examine current and historical perspectives on business process management. Topics include process identification, mapping, and improvement. Additional topics will address business process automation and integration, business process outsourcing. Investigate current and potential tools and methods for business process management. Include process management projects.

MIS 539. Topics in Management of Information Systems.
(3-0) Cr. 3. Repeatable. Prereq: MIS 501
A variety of topics may be offered in different semesters. Topics may include electronic commerce, information resources management, decision support systems, and expert systems.

MIS 590. Special Topics.
Cr. 1-3. Repeatable. Prereq: Permission of instructor
For students wishing to do individual research in a particular area of MIS.

MIS 599. Research Seminar in Management Information Systems.
(3-0) Cr. 3. Prereq: Graduate classification
Examines issues such as the nature and content of information systems research; aspects of starting and pursuing research topics in information systems; exploring and understanding relevant research methods and tools. Develop preliminary research proposals.

(3-0) Cr. 3. Prereq: MIS 501 or equivalent, enrollment in PhD program
Three fundamental areas of Information Systems, namely, infrastructure, management, and processes. Infrastructure studies examine the IT architecture including computing, communication, data, and application. Management focuses on addressing the value-added notion of IT. Finally, processing addresses topics related to enabling role of IT in myriad of areas.

(3-0) Cr. 3. Prereq: MIS 501 or equivalent, enrollment in PhD program
The state of behavioral research in the IS function. MIS activities in an organization span the following three major areas: design and implementation of the MIS, use of the MIS, and management of the MIS function. Each of these processes is carried out at several levels: individual, group, organizational and inter-organizational. Identify behavioral issues of relevance for the cells defined by the process and level dimensions. Reading and discussion of the research literature surrounding the development, use, and implications of information technology.

MIS 602. Seminar on IT Strategy and Structure.
(3-0) Cr. 3. Prereq: MIS 601
Strategic issues in IT management. Address issues such as aligning IT strategy with corporate strategy and functional strategies, IT structure, valuation, governance and control, and related topics. Provide students with research skills related to the boundary between IT and the firm’s external environment.

MIS 607. Telecommunications Management.
(3-0) Cr. 3. Prereq: MIS 501
Preparation and writing of creative component. Cr. 3.
MIS 599. Research Seminar in Management Information Systems.
(3-0) Cr. 3. Prereq: Graduate classification
Examines issues such as the nature and content of information systems research; aspects of starting and pursuing research topics in information systems; exploring and understanding relevant research methods and tools. Develop preliminary research proposals.

MIS 603. Seminar on IT Strategy and Structure.
(3-0) Cr. 3. Prereq: MIS 601
Strategic issues in IT management. Address issues such as aligning IT strategy with corporate strategy and functional strategies, IT structure, valuation, governance and control, and related topics. Provide students with research skills related to the boundary between IT and the firm’s external environment.

MIS 604. Collaboration, Knowledge, and Intelligence in Organizations.
(3-0) Cr. 3. Prereq: MIS 501
Research issues in the emerging areas of collaboration, knowledge management, and enterprise intelligence. Topics will include emerging and contemporary technologies of Data Mining, Knowledge Discovery from Databases, Web Mining, organizational memory, and knowledge management.

MIS 650. Research Practicum I.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MIS 651. Research Practicum II.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

(Cross-listed with HCI). (3-0) Cr. 3. Prereq: Graduate classification
Examine opportunities and implications of information technologies and human computer interaction on social and organizational systems. Explore ethical and social issues appurtenant to human computer interaction, both from a prescriptive and descriptive perspective. Develop informed perspective on human computer interaction. Implications on research and development programs.

MIS 699. Research.
Cr. 3-6. Repeatable. Prereq: Graduate classification, permission of dissertation supervisor
Research.

Marketing
Undergraduate Study

For undergraduate curriculum in business, major in marketing.

The Department of Marketing offers a major in marketing. Students will complete the general education requirements (including business foundation courses), and business core requirements for the bachelor of science (B.S.) degree and 18 credits in the major.

Marketing is concerned with management decisions that deal with the satisfaction of customer needs and wants in the purchase and use of goods and services. The
primary decision areas in marketing involve the identification of market segments and decisions dealing with product design, pricing, promotion (including personal selling and marketing communications), and distribution. A major in marketing prepares the student for careers in selling and sales management, marketing research, marketing management, retail management, marketing communications, promotion management, and/or international marketing. Each area of study may be applied to consumer, business-to-business, and/or services marketing environments in business and nonprofit organizations.

The instructional objective of the Marketing department is to provide knowledge of the marketing process and an understanding of its functions. The students are expected to develop decision-making skills, computational skills, and communication skills with appreciation for global marketplace and ethical concerns. In addition to the basic business foundation and core courses, marketing majors are required to complete 18 credits of marketing or department approved courses. Included in these 18 credits are three required courses:

- **MKT 443** Strategic Marketing Management 3
- **MKT 444** Marketing Research 3
- **MKT 447** Consumer Behavior 3

The department also offers a minor for non-Marketing majors in the College of Business. The minor required 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

### Graduate Study

The Department of Marketing participates in the full-time and part-time Master of Business Administration (M.B.A.) and the Ph.D. in Business and Technology. The M.B.A. program is a 46-credit, nonthesis, noncreative-component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in marketing.

The Ph.D. in Business and Technology with a Marketing (MKT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on marketing issues relating to strategic decision making, understanding consumer preferences and behaviors, and using data analytics for increasing the performance of the firm.

### Courses primarily for undergraduates:

- **MKT 340. Principles of Marketing.**
  (3-0) Cr. 3. F.S.S. Prereq: credit or current enrollment in ECON 101
  The role of marketing in society. Markets, marketing institutions, and marketing functions with emphasis on product, price, marketing communication, and marketing channel decisions.

- **MKT 343. Personal Sales.**
  (3-0) Cr. 3. Prereq: MKT 340
  Analysis of the theory and practice of personal selling with the context of relationship marketing and salesforce automation. Topics include: goal setting, prospecting, time/territory management, questioning, presentations, objections, commitment and customer service; simulations of selling situations.

- **MKT 410. Promotional Strategy.**
  (3-0) Cr. 3. F.S. Prereq: Credit or enrollment in MKT 447
  Principles, concepts, and problems involved in the development and implementation of promotional strategies. Coordination of a variety of promotional elements: advertising, sales promotion, direct marketing, public relations and publicity of web communications, and personal selling.

- **MKT 442. Sales Management.**
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  Functional aspects of sales force management; personal selling methods; procedures for recruiting, selecting, and training new salespeople; compensation and expense control systems; problems of sales force motivation and supervision; methods of territorial and quota assignment; sales department budgets; distributor-dealer relations; other selected topics.

- **MKT 443. Strategic Marketing Management.**
  (3-0) Cr. 3. F.S.S.S. Prereq: MKT 444, MKT 447
  Analysis of major elements of strategic marketing management. May include case studies or business simulations involving decision making using marketing tools from previous courses. (For marketing majors only.).

- **MKT 444. Marketing Research.**
  (3-0) Cr. 3. F.S. Prereq: MKT 340, STAT 226
  Marketing research techniques: problem formulation, research design, questionnaire construction, sampling, data collection procedures, and analysis and interpretation of data related to marketing decisions.

### Graduate Courses

- **MKT 445. Customer Relationship Management.**
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  Examines how customer data can be used to enhance decisions relating to acquisition, development and retention. Topics include customer lifetime value, customer as assets, customer loyalty programs and customization.

- **MKT 446. Retailing.**
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  Basic areas of retail management: buying, merchandising, retail promotion, store location, store layout, credit management, and inventory control. Emphasis on practical application of retail management principles.

- **MKT 447. Consumer Behavior.**
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  Study of how consumers select, purchase, use, and dispose of goods and services. Includes analyses of how markets and others influence these processes. Application of concepts and methods of the behavioral sciences to marketing management decision making.

- **MKT 448. Global Marketing.**
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  Introduction to terms used in international marketing and sources of information on international markets. Development of sensitivity toward foreign business environment and familiarity with operations of multinational corporations.

- **MKT 449. Marketing Seminar.**
  (3-0) Cr. 3. Prereq: MKT 340
  Analysis of current issues and problems in marketing with emphasis on new theoretical and methodological developments. Additional seminars may be offered.

- **MKT 451. Marketing Channels.**
  (3-0) Cr. 3. F.S. Prereq: MKT 340
  Focuses on marketing channels, the downstream part of a value chain, companies that come together to bring products and services from their point of origin to the point of consumption. Topics include channel institutions, channel design, channel coordination and implementation. Highlights international and technological aspects of marketing channels so that students can successfully develop and manage marketing channels in a contemporary business environment.

- **MKT 453. Brand Management.**
  (3-0) Cr. 3. F.S. Prereq: MKT 447
  Examines the role of brands and branding in market environments characterized by intense competition and consumer power. Covers issues relating to why branding is important to firms, what brands represent to consumers, and what should be done to manage them effectively.

- **MKT 490. Independent Study.**
  Cr. 1-3. Repeatable. Prereq: MKT 340, senior classification; permission of instructor.

- **MKT 492. Comparative Marketing.**
  (3-0) Cr. 3. S.S. Prereq: MKT 340
  Provides experience to students in culture, social, economic, and political environment of marketing in a foreign country. Students complete a term project (e.g., a marketing plan) based on information collected in the foreign country. Students attend briefings by experts/officials of private and public organizations.

### Courses primarily for graduate students, open to qualified undergraduates:

- **MKT 501. Marketing.**
  (3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission
  An analytical approach to the study of marketing issues and challenges of business firms and nonprofit organizations. Emphasis on the influence of the global marketplace and the marketing environment on marketing decision making; the determination of the organization’s products, prices, channels and communication strategies; an orientation that ensures sustainability of marketing operations; and the organization’s system for planning and controlling its marketing effort.

- **MKT 540. Advanced Marketing Management.**
  (3-0) Cr. 3. F.S. Prereq: MKT 501
  Strategic marketing and decision making, with emphasis on cases utilizing qualitative and quantitative techniques and marketing models.

- **MKT 541. International Marketing.**
  (3-0) Cr. 3. F. Prereq: MKT 501, MKT 509
  Scope and nature of global marketing operation; the context of international environment in which firms operate. Recent developments of international business activities, and a framework for better understanding of the basic forces driving international business and marketing operations. Development of market entry strategies and global marketing mix policies, as well as export operations. Organizational issues related to the globalization of the firm.
(3-0) Cr. 3. S. Prereq: MKT 501
Principles and concepts of new product development and introduction; decision areas include market definition and structure, idea generation, concept evaluation, test marketing, launch tracking, and global product planning; models and techniques of new product evaluation used by consumer product companies.

MKT 543. Services Marketing. 
(3-0) Cr. 3. Prereq: MKT 501 and instructor permission
In-depth appreciation and understanding of the unique challenges inherent in managing and delivering quality services. Students will be introduced to and have the opportunity to work with tools and strategies that address these challenges.

MKT 544. Marketing Research. 
(3-0) Cr. 3. S. Prereq: MKT 501; BUSAD 502 or STAT 401
Marketing research methods are examined with emphasis on the use of advanced research methods in business research. Application of advanced sampling, measurement, and data analysis methods in research on market segmentation, market structure, consumers’ perceptions and decision processes, marketing communication, new product development, and pricing.

MKT 545. Integrated Marketing Communication. 
(3-0) Cr. 3. Prereq: MKT 501
Introduces the student to the field of marketing communications. Covers a number of topics and areas essential for understanding how to design and evaluate communication strategies necessary for the successful marketing of products and services. An integrated marketing communications (IMC) perspective is employed in covering material, with a corresponding focus on various elements of an IMC strategy, including advertising, promotions, point-of-purchase communications, direct marketing techniques, and other topics.

MKT 546. Customer Relationship and Business-To-Business Marketing. 
(3-0) Cr. 3. Prereq: MKT 501
Core concepts and issues involved in customer relationship strategy and management in consumer and business-to-business markets. Emphasis on customer opportunity analyses, customer relationship management tools and strategies.

MKT 547. Consumer Behavior. 
(3-0) Cr. 3. S. Prereq: MKT 501
The behavior of consumers. Intensive review of literature from relevant disciplines. Applicances of concepts and methods of the behavioral sciences to marketing management decision making.

MKT 549. Global Marketing Planning and Execution. 
(3-0) Cr. 3. Prereq: MKT 501
Allows students to develop the ability to plan and execute a B2B business by integrating aspects of marketing with other business functions in the international context. Product strategy, innovation, foreign market entry, supply strategies for foreign markets, pricing strategy, market research, customer service, international payments, managing international subsidiaries, licensing, distribution strategy, and responding to changing international environmental conditions. Involves a simulation-based instruction in planning and managing an international B2B business.

MKT 551. Marketing Channels. 
(3-0) Cr. 3. Prereq: MKT 501
Design of marketing channels, developing and managing relationships with resellers, and evaluating channel performance. Emphasis on international and technological aspects of marketing channels.

MKT 590. Special Topics. 
Cr. 1-3. Repeatable. Prereq: Permission of instructor
For students wishing to do individual research in a particular area of marketing.

Courses for graduate students:

MKT 601. Seminar in Consumer Behavior. 
(3-0) Cr. 3. Prereq: MGMT 601
A rigorous foundation of the major conceptual and methodological paradigms in the consumer-behavior literature. Seeks to aid students in understanding the psychological, sociological, and anthropological roots of consumer behavior research. Read the latest research in the area reported in leading consumer behavior/psychology journals.

(3-0) Cr. 3. Prereq: MGMT 601
Review major contributions and recent developments in marketing strategy research and practice. Review commonly used modeling approaches and research methods to study strategic interaction between firms seeking to build competitive advantages. Provide an overview of empirical research regarding measurement, level and persistence of business success and implications of findings for theory and strategy development.

(3-0) Cr. 3. Prereq: MKT 601
Addresses key strategy and implementation issues behind customer management. Topics such as typology of CM strategies, antecedents and outcomes; environmental and managerial influences on strategy formation; technology and impact on CM strategy; and value of CM strategy. Examine theories and concepts behind important CM issues such as customer satisfaction, customer loyalty and customer profitability.

MKT 604. Marketing Issues in Inter-Organizational Relations. 
(3-0) Cr. 3. Prereq: MGMT 602
Inter-firm and network competition; relationship among suppliers, distributors, alliance partners, external employees, and internal employees. Theories including agency theory, network theory, relationship marketing, channels of distribution theories on cooperation versus competition, IOS theories.

(3-0) Cr. 3. Prereq: Knowledge of introductory statistics, Stat 401, enrollment in the PhD program
Introduction to methodological issues that arise when addressing a wide variety of research questions in organizational and consumer studies. Address measurement issues (scales, reliability and construct validity), design (for experiments, surveys, or qualitative studies), sampling, and analysis (univariate and multivariate statistical procedures). Measurement issues in cross-cultural and international research will also be covered. It is assumed that students entering the course have knowledge of introductory statistics.

MKT 650. Research Practicum I. 
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

MKT 651. Research Practicum II. 
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Cr. 12. Prereq: Graduate classification, permission of dissertation supervisor
Research.

Supply Chain Management

Undergraduate Study

For undergraduate curriculum in business, major in Supply Chain Management. Supply Chain Management is an integrated program of study concerned with the efficient flow of materials, products, and information within and among organizations. Supply chain management involves the integration of business processes across organizations, from material sources and suppliers through manufacturing and processing to the final customer. The program provides students with the core knowledge related to a wide variety of supply chain activities, including demand planning, purchasing, transportation management, warehousing, inventory control, material handling, product and service support, information technology, and strategic supply chain management. The program offers two concentrations: logistics and operations. The logistics concentration focuses on skills related to transportation, distribution, warehousing, facility location analysis, and packaging. The operations concentration focuses on the analysis, design, implementation, planning, control, and improvement of manufacturing and service processes.

The study of Supply Chain Management prepares students for professional careers with manufacturers, retail distributors, logistics service providers, including carriers and non-asset based 3PLs, and consulting firms. The curriculum provides the required theoretical and conceptual base and analytical methods for making sound operational and strategic business decisions related to all activities in a supply chain.

The Supply Chain Management major requires students to take 18 credit hours in the supply chain management area. This requirement is met by completion of the following common core courses:

- SCM 485 Demand Planning and Management 3
- SCM 486 Principles of Purchasing and Supply Management 3
- SCM 487 Strategic Supply Chain Management 3
- Two core courses in the concentration area 6
- SCM 460 Decision Tools for Logistics and Operations Management 3
  & SCM 461 Principles of Transportation
Students are encouraged to consider meeting the requirement for both concentrations to establish a broader foundation for a successful career in supply chain management.

The department also offers a minor for non-Supply Chain Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

**Graduate Study**

The Department of Supply Chain and Information Systems participates in the full-time and part-time Master of Business Administration (M.B.A.) and in the Ph.D. in Business and Technology programs. The department also participates in the interdepartmental Management within the M.B.A. program.

The Ph.D. in Business and Technology is a 56-credit curriculum (minimum) that culminates in a dissertation. Students may select Supply Chain Management (SCM) as their major area of specialization. The primary objective of the SCM specialization is to prepare students for careers in research universities. The SCM domain is broad and includes the design, development and control of business processes for the conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems also included. However, in today’s world, with competition across supply chain networks, SCM also involves integrating business processes across firms. Research in this area is therefore interdisciplinary in nature and addresses both intra- and inter-organizational issues.

---

**Courses primarily for undergraduates:**

**SCM 301. Supply Chain Management.**

(3-0) Cr. 3. Prereq: ECON 101 and STAT 226

Various supply chain activities and integration of supply chain management with supply and demand, both within and between firms. Exposure to a wide range of supply chain management terminology, analytical tools, and theories related to four key elements of supply chain management: purchasing, operations, distribution, and integration. Specific topics include strategic sourcing, supply management, demand forecasting, resource planning, inventory management, process management, logistics, location analysis, process integration, and performance measurement.

**SCM 340. Project Management.**

(Cross-listed with MIS). (3-0) Cr. 3. Prereq: credit or enrollment in MIS 301

Equips students to support team activities in the general project management environment and better manage their careers. Practical experience using project management techniques and tools. Course topics include project initiation and execution, risk assessment, estimating and contracts, planning, human factors, and standard methods.

**SCM 422. Manufacturing Planning and Control.**

(3-0) Cr. 3. Prereq: SCM 301

Advanced treatment of manufacturing planning and control procedures. Master production scheduling, material requirements planning, enterprise resource planning, capacity planning, shop floor control, just-in-time, and competitive analyses of modern manufacturing systems.

**SCM 424. Process Management, Analysis, and Improvement.**

(3-0) Cr. 3. Prereq: SCM 301

The design, analysis, and management of production processes to improve performance. Performance measures and their relationships; process design and evaluation; and managerial levers for improving and controlling process performance.

**SCM 428. Special Topics in Operations Management.**

(3-0) Cr. 3. Prereq: SCM 301

In-depth analysis of current issues, problems, and systems in operations management with emphasis on new theoretical and methodological developments. Topics may include in different semesters, supply chain management, productivity and quality improvement, management of technology and innovation, information technology in operations management, quick response manufacturing, and service operations management.

**SCM 440. Supply Chain Information Systems.**

(Cross-listed with MIS). (3-0) Cr. 3. Prereq: MIS 301, SCM 301 Internal and inter-organizational information systems necessary for a supply chain to achieve competitive advantage. Topics include: design, development, implementation, and maintenance of supply chain information systems; enterprise resource planning; advanced planning and scheduling, manufacturing execution systems; and the interface between manufacturing planning and control processes, logistics processes, and the information system.

**SCM 450. Enterprise Resource Planning Systems in Supply Chain.**

(3-0) Cr. 3. Prereq: SCM 301, MIS 301 or IE 148, IE 341

Examination of the role of enterprise resource planning systems (ERP) in the supply chain. Hands-on experience with a major software application in use by many corporations to manage and improve the efficiency of their supply chains and operations. Students will develop a more process-centric perspective about how a supply chain operates and how ERP enables and supports such operations.

**SCM 460. Decision Tools for Logistics and Operations Management.**

(3-0) Cr. 3. Prereq: SCM 301

Technical tools and skills required for problem solving and decision making in logistics and operations management. Transportation and network planning, inventory decision making, facility location planning, vehicle routing, scheduling, and production planning. Quantitative tools include linear and integer programming, non-linear programming, and simulation. Emphasis on the use of PC-based spreadsheet programs.

**SCM 461. Principles of Transportation.**

(3-0) Cr. 3. Prereq: SCM 301

Economic, operating, and service characteristics of the various modes of transportation, with a special emphasis on freight transportation. Factors that influence transport demand, costs, market structures, carrier pricing, and carrier operating and service characteristics and their influence on other supply chain costs and supply chain performance.

**SCM 462. Transportation Carrier Management.**

(3-0) Cr. 3. Prereq: Credit or enrollment in SCM 461

Analysis of transport users’ requirements. Carrier management problems involving ownership and mergers, routes, competition, labor, and other decision areas.

**SCM 466. International Transportation and Logistics.**

(3-0) Cr. 3. Prereq: SCM 301

Logistics systems and legal framework for the international movement of goods. Operational characteristics of providers of exporting and importing services. The effects of government trade policies on global logistics.

**SCM 485. Demand Planning and Management.**

(3-0) Cr. 3. Prereq: SCM 301

Demand planning process which synchronizes demand with manufacturing and distribution. Addresses linking business plans and demand forecasts both horizontally and vertically within the organization and collaboratively among supply chain partners. Forecasting, customer relationship management, sales and operations planning, customer service, distribution channels, e-fulfillment, and information systems requirements.

**SCM 486. Principles of Purchasing and Supply Management.**

(3-0) Cr. 3. Prereq: SCM 301

Sourcing strategies, concepts, tools and dynamics in the context of the integrated supply chain. Make or buy decision, supplier evaluation and selection, global sourcing, the total cost of ownership, contracts and legal terms, negotiation, purchasing ethics, and information systems requirements.

**SCM 487. Strategic Supply Chain Management.**

(3-0) Cr. 3. Prereq: SCM 460 or SCM 422 or SCM 424; SCM 485 or SCM 486

Capstone course in supply chain management. Integrating and applying the theories, concepts, and methods covered in the prerequisite courses through the use of readings, case studies, projects, and industry speakers.

**SCM 490. Independent Study.**

Cr. 1-3. Repeatable. Prereq: SCM 301, senior classification, permission of instructor

Courses primarily for graduate students, open to qualified undergraduates:
SCM 501. Supply Chain Management.
(3-0) Cr. 3. Prereq: Enrollment in MBA program or departmental permission
Introduction to supply chain management including aspects of operations, logistics and global supply chain strategy development. Topic areas include lean manufacturing and value stream mapping; supplier development and measurement; sustainable supply chain operations; process measurement, management and improvement; supply chain risk and uncertainty; visibility and integration in the supply chain; and inventory control.

SCM 520. Decision Models for Supply Chain Management.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
The application of decision models for supply chain management. Topics include business applications of decision theory, inventory theory, business forecasting, optimization models, transportation and network models, routing problems, and project management.

SCM 522. Supply Chain Planning and Control Systems.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
An integrated analysis of planning and control systems for supply chains. Master production scheduling, material requirements planning, enterprise resource planning, capacity planning, shop floor control, competitive analyses of modern supply chain systems, and implementation of information technologies related to these topics.

SCM 524. Strategic Process Analysis and Improvement.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
Analysis, management, and improvement of the business processes used to produce and deliver products and services that satisfy customer needs. Process attributes that managers can control to influence the key operational performance measures of throughput time, inventory, cost, quality, and flexibility are discussed. Topics such as theory of constraints, lean production, and six sigma are included.

SCM 560. Strategic Logistics Management.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
Positions logistics vis-a-vis supply chain management (SCM). Presents different perspectives on SCM vs. logistics. Describes primary logistics functions: transportation, warehousing, facility location, customer service, order processing, inventory management and packaging. Benefits of and obstacles to the integration of these functions.

SCM 561. Transportation Management and Policy.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
Analysis of contemporary issues and strategies in transportation management and policy. Emphasis on evaluation of the impacts of transportation policies, new technologies, and strategic carrier and shipper management practices on the freight transportation industry and logistics systems.

SCM 563. Purchasing and Supply Management.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
Mechanics, procedures, and tools used in purchasing. Recruiting, selecting, developing, and managing supply chain partners in order to achieve competitive advantage versus superior supply chain management. Factors and information needs for making supply management decisions.

SCM 585. Strategic Demand Planning.
(3-0) Cr. 3. Prereq: SCM 501 or permission of instructor
Synchronizes demand with manufacturing and distribution. Emphasis on the strategic advantages of linking business plans and demand forecasts, both vertically within the organization and collaboratively among supply chain partners.

SCM 590. Special Topics.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
For students who wish to do individual research in a particular area of supply chain management.

Courses for graduate students:

SCM 601. Theoretical Foundations of Supply Chain Management.
(3-0) Cr. 3. Prereq: MGMT 601 or permission of instructor
An overview of the development of supply chain management (SCM) theory, including review of seminal articles in logistics, operations, and purchasing management and theories from allied disciplines (e.g., economics, marketing, sociology, strategic management). Analysis of trends in SCM research topics and methodologies. Identification of emerging and future areas for research and theory development.

(3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment
Review of research literature on supply chain strategy, including the impact of technology, global economic and social factors, and intra- and inter-organizational integration on supply chain strategy formation. The role of SCM in overall corporate strategy and the impact of SCM on firm performance will also be addressed.

SCM 603. Seminar in Purchasing.
(3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment
Review of classic purchasing theories. Discussion of contemporary supply management strategy; the role of supply management and its relationship with other functional areas; its impact on logistics and transportation issues; management of supply uncertainties.

SCM 604. Seminar in Logistics Management.
(3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment
Integration of network, economic, and systems theory in the design, management, and control of logistics systems in the context of integrated supply chain management. Functional areas addressed include transportation, inventory order fulfillment, distribution, and warehousing. Facility location analysis will also be covered.

SCM 605. Seminar in Operations Management.
(3-0) Cr. 3. Prereq: SCM 601 or concurrent enrollment
Review of the research literature on methods of organizing, planning, controlling, and improving manufacturing systems to achieve the desired performance objectives related to cost, quality, speed, and flexibility. The relationship between the performance of the manufacturing system and the performance of the supply chain system will also be discussed.

SCM 650. Research Practicum I.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a research manuscript to be submitted to a peer-reviewed academic journal. Students will work with a faculty mentor on a research project.

SCM 651. Research Practicum II.
(1-0) Cr. 1. Prereq: enrollment in the PhD program
Preparation of a second research manuscript to be submitted to a peer-reviewed academic journal. Although students work under the supervision of a faculty mentor, the students will take independent responsibility for the research project.

Cr. 12. Prereq: Graduate classification, permission of dissertation supervisor
Research.

College of Design

Luis Rico-Gutierrez-Dean
Tim Borich-Associate Dean for Outreach
Marwan Ghandour-Associate Dean for Academic Programs
Associate Dean for Research and Graduate Education
www.design.iastate.edu/

Objectives of the Curricula in Design

The College of Design is among a small number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college’s programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, industrial designers, interior designers, studio artists, arts administrators and environmental designers.

Organization of Curricula

All undergraduate programs in the College of Design share a common foundational curriculum, the Core Design program, followed by degree-specific curricula. The Core Design Program grounds the undergraduate degree programs and provides a rich, rigorous inclusive base for the college’s professional and non-professional programs. It creates shared language, experience, and community for programs, faculty and students and exposes students to all design disciplines, allowing them to make more informed degree choices, apply to multiple programs, and experiment with interdisciplinary work.

The intense, discipline-specific professional curricula that follow the Core Design Program focus on developing students’ ability and knowledge in their major. Within the major area, students advance creative and professional skills
through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

General education, contained in both the Core Design Program and the degree programs, is composed to ensure that students receive a well-rounded undergraduate education.

**High School Preparation**

Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended though not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements:

- 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication and critical reading/writing ability
- 3 years of mathematics to develop problem solving skills, including 1 year each of algebra, geometry, and advanced algebra
- 3 years of science, including at least two of the following:
  - 1 year of biology, 1 year of chemistry, or 1 year of physics
- 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government.

**Admission Standards to Enrollment Managed Professional Programs**

Admission into the enrollment managed professional programs of Architecture, Community and Regional Planning, Graphic Design, Industrial Design, Integrated Studio Arts, Interior Design, and Landscape Architecture requires a separate application after completing the Core Design Program, depends on available resources, and is subject to review by faculty committee. Applicants are reviewed on the basis of a portfolio of original work, academic performance, and a written essay. Students from a two-year institution may also apply as transfer students to the following programs: B.S. in Community and Regional Planning, B.A. in Art and Design, and Bachelor of Design.

**Advising**

Each student receives personal assistance from an academic advisor within the student’s curriculum area. Students enrolled in the college’s Core Design Program are advised by professional advisors. Once admitted to professional programs, students are assigned to faculty advisors within the student’s curriculum area. Advisors help students develop a program of study, access pertinent university resources and provide information on career choice.

The college’s career services office works with students to develop their career goals as well as prepare and search for employment.

**Honors Program**

The College of Design participates in the Honors Program which provides opportunities for outstanding students to individualize their programs of study. See Honors Program.

**Requirements in the College of Design**

All students in the College of Design are expected to meet the following requirements.

**Core Design Program**

* Students enrolled in the Design Exchange Learning Community take DSNS 110 in place of DSNS 115.

** General education credits in the Core Design Program may count toward the minimum credits.

*** Students who intend to apply to the Architecture program are strongly advised to take MATH 142 Trigonometry and Analytic Geometry and PHYS 111 General Physics during their Core year. While these specific courses are not required to apply to the program, they are required to advance in the B.Arch. program beyond the first semester. Students who intend to apply to the Industrial Design program are advised to take PHYS 101 Physics for the Nonscientist, ECON 101 Principles of Microeconomics Principles of Microeconomics and a math course during their Core year.

**General Education**

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications: 7 cr.**

| ENGL 150 | Critical Thinking and Communication | 3 |
| ENGL 250 | Written, Oral, Visual, and Electronic Composition | 3 |
| LIB 160 | Information Literacy | 1 |

Total Credits: 7

(C- or better grade). Includes courses in the fields of English (composition) and speech communication (interpersonal and rhetorical).

**Mathematics, physical sciences, and biological sciences 6 cr.**

Includes courses in the fields of agronomy, astronomy and astrophysics, biology, botany, chemistry, civil engineering, computer science, geology, mathematics, physics, statistics, and zoology.

**Humanities: 6 cr.**

Includes courses in the fields of classical studies, English (literature), foreign languages, history, philosophy, religious studies, as well as history/theory/literature courses in dance, music, theater, journalism, African American studies, American Indian studies, environmental studies, Latino/a studies, women’s studies, and university studies.

**Social Sciences: 6 cr.**

Includes courses in the fields of African American studies, American Indian studies, anthropology, economics, environmental studies, geography, human development and family studies, Latino/a studies, psychology and sociology, women’s studies, and university studies.

**General Education Electives: 9 cr.**

9 cr. from any of the above areas, 6 cr. of course level 300-400.

**Minor in Critical Studies in Design**

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, media and technology, design in everyday life, and models of professional practice. The minor is open to undergraduates in all university majors.

**Total minor requirements: 15 cr.**

| ART H 292 | Introduction to Visual Culture Studies | 3 |
| DSNS 183 | Design Cultures | 3 |

or another 100-200 level History/theory course offered in the College of Design

Nine credit hours from approved list. 9

Total Credits: 15

At least six of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the 15 credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

**Minor in Design Studies**

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of course work; three credits selected from College of Design history/theory course offerings and twelve additional credits selected from any College of Design course offerings.
At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the fifteen credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses required in their major degree programs or in the Core Design Program to satisfy this minor.

**Minor in Digital Media**

Manipulation of digital media has emerged as an essential skill for design inquiry alongside traditional methods of building models and drawing sketches. To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of coursework from an approved list. At least nine of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above and may not be used to meet the requirements of the major.

**Minor in Entrepreneurial Studies**

The College of Design is an active participant in the Entrepreneurial Studies Minor for undergraduate students.

**Departments of the College**

**Undergraduate Study**

The undergraduate program in architecture is an accredited five-year curriculum leading to the Bachelor of Architecture degree. The program provides opportunities for general education as well as preparation for professional practice and/or graduate study. An optional one-semester foreign study program is offered to fourth year students.

The undergraduate curriculum includes one year of the college’s Core Design Program followed by a four year professional program. Admission to the professional degree program is based on the applicant’s performance in the completed pre-professional curriculum; previous high school record (or transfer record where applicable); portfolio and essay evaluations; and on available departmental resources.

**Objectives of the Bachelor of Architecture program:**

The department is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effect are enfolded with the subject matter of building design - construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment, and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

It is our intent: that our students develop the skills with which to critically assess and research architectural questions and to invent architectural designs that address those questions; that they develop a working method for designing and that they have the communication, graphic, modeling and computational skills to support design exploration and to represent their design ideas to others; that they gain knowledge of architectural technologies through which buildings are given form, of which they are constructed and by which they are environmentally tuned and made sustainable; that they understand architectural history, that they understand the theoretical and diverse cultural underpinnings of the discipline of architecture, that they are able to reference architectural precedents and know
how to utilize all of these in the development of their ideas; and that they have grounding in the ethical and practical aspects of the architectural profession in society.

For students entering the professional program, the department highly recommends purchase or lease of a laptop/notebook computer and appropriate software.

**Graduate Study**

The Department of Architecture offers two graduate degrees in architecture: a three-year accredited professional degree (M.Arch.) and a two-semester to three-semester research degree (M.S. in Arch.). Both degrees encourage interdisciplinary work within the College of Design and across related fields within the university. Double-degree programs are currently offered with the Department of Community and Regional Planning (M.Arch. / M.C.R.P.) and the College of Business (M.Arch. / M.B.A.). Financial support in the form of teaching and research assistantships is available competitively.

**Master in Architecture**

M.Arch. is an accredited professional degree in architecture. It is designed for students with undergraduate degrees in disciplines other than architecture as well as for students who hold four-year pre-professional degree in architecture.

The M.Arch. program demands engagement with contemporary issues and a commitment to lifelong learning. We encourage students to examine the relationships between local, regional and global contexts addressing environmental, social and technological issues. We believe that even though the scale of the architect’s action might be limited, the range of information needed to make creative, intelligent and responsible design decisions is vast. We expect our graduates to value the necessity of research, interdisciplinary learning, and teamwork.

M.Arch. is accredited by the National Architectural Accreditation Board (NAAB) and leads to a professional Master of Architecture degree over three years including the first summer term. The curriculum starts with an intensive three-semester core course sequence that places equal emphasis on three study areas: architectural design and media, science and technology, and theory and history seminars on the built environment. While this learning framework shapes the whole curriculum, the remaining four semesters have a more open structure that allows students to explore architecture within an interdisciplinary context. These four semesters include a number of options, including study abroad, specialized studios with a variety of faculty, and the opportunity to do an independent project.

Students with undergraduate degrees in architecture or other related design fields may be given advanced standing in the program; advanced standing students may waive up to the whole first year. Students admitted to the program hold undergraduate degrees in a broad range of fields such as art history, history, literature, interior design, economics, mathematics, computer science, anthropology, and medicine. These students must complete the full three years of the curriculum.

**Master of Science in Architecture**

M.S. in Arch. is a 30-credit research degree with a required graduate thesis. As a research degree, this program is not subject to NAAB accreditation.

M.S. in Arch. is open for applicants who hold a professional degree in architecture or other related design fields. Applicants are required to submit a research proposal that lies within one of the listed study areas. These study areas are: Sustainability and Green Design, Rural and Urban Studies, Representation and Digital Media, Design Inquiry, Advanced Building Design, Architectural and Construction History, and Building Science and Construction. The degree is also open for applicants with non-professional degrees in various fields depending on the study area proposed by the applicant.

Financial support in the form of teaching and research assistantships is available. Contact the department office for specific curricula.

**Curriculum in Architecture**

The Department offers undergraduate and graduate degree programs:

A 167.5-credit undergraduate professional program, including the 30-credit Core Design Program, leading to the Bachelor of Architecture degree. (B. Arch.)

A 100-credit graduate professional program leading to the Master of Architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in this program. (M.Arch.)

A 30-credit interdisciplinary graduate program leading to the Master of Science in Architecture. (M.S. Arch.)

For more complete graduate program descriptions see Graduate Study under Architecture in the Courses and Programs section.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master’s degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

**Total B. Arch. Requirement: 167.5 cr.**

Only 65 cr from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr of free electives; 2.00 minimum GPA.

**International Perspective: 3 cr.**

**U.S. Diversity: 3 cr.**

**Communications: 10 cr.**

(C- or better grade)

- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition 3
- LIB 160 Information Literacy 1
- Plus three credits from approved list. 3

**Total Credits** 10

**Humanities: 6 cr.**

6 cr. from approved list.

**Social Sciences: 6 cr.**

6 cr. from approved list.

**Math and Physical Sciences: 8 cr.**

- MATH 142 Trigonometry and Analytic Geometry 3
- PHYS 111 General Physics 5

**Total Credits** 8

**Design Core 11.5 cr.**

- DSN S 102 Design Studio I 4
- DSN S 115 Design Collaborative Seminar 0.5
- or DSN S 110 Design Exchange Seminar I
- DSN S 131 Design Representation 4
- DSN S 183 Design Cultures 3

**Total Credits** 11.5

**Design Communications: 3 cr.**

- ARCH 230 Design Communications I 3

**Total Credits** 3

**Design: 48 cr.**

- ARCH 201 Architectural Design I 6
- ARCH 202 Architectural Design II 6
- ARCH 301 Architectural Design III 6
- ARCH 302 Architectural Design IV 6
- ARCH 401 Architectural Design V 6
- ARCH 402 Architectural Design VI 6
- ARCH 403 Architectural Design VII 6
- ARCH 404 Architectural Design VIII 6

**Total Credits** 48

**Building Technologies: 21 cr.**

- ARCH 245 Building Science and Technology I 3
- ARCH 341 Building Science and Technology II 5
- ARCH 342 Building Science and Technology III 5
- ARCH 343 Building Science and Technology IV 5
ARCH 445 Building Science and Technology V 3
Total Credits 21

Studies in Architecture and Culture: 18 cr.
ARCH 221 History of Architecture I 3
ARCH 222 History of Architecture II 3
ARCH 323 Theories of Architecture 3
Nine credits from approved SAC Option list. 9
Total Credits 18

Behavioral Studies/Practice: 6 cr.
ARCH 271 Human Behavior and Environmental Theory 3
ARCH 482 Professional Practice 3
Total Credits 6

Professional Options: 9 cr.
6 cr. 300-500 level Arch; 3 cr. from Arch, Art, Art H, ArtID, ArtGr, ArtIS, C R P, Des, Dsn S, or L A.
Electives: 21 cr.
6 cr. 300-500 level from department list.; 15 cr. from approved list. 2 cr. Kin or Ath allowed; 4 cr. AFAS, M S, or N S allowed; 9 cr. Arch allowed (no P/NP).
See also: A 5-year plan of study grid showing course template by semester.

Courses primarily for undergraduates:
ARCH 201. Architectural Design I.
(1-15) Cr. 6. F. Prereq: Completion of the pre-professional program and admission into the professional program in Architecture
Introduction to architectural design. Introduction to architectural design, including precedent research, drawing conventions, model making, and diagramming. Studio projects focus on investigating the impact of specific site conditions on design, threshold conditions, and small-scale domestic space. Students will learn skills in problem solving, visualization, and written, oral, and graphic communication. Field trips to relevant architectural sites.
ARCH 201H. Architectural Design I, Honors.
(1-15) Cr. 6-7. F. Prereq: Completion of the pre-professional program and admission into the professional program in Architecture
Introduction to architectural design. Introduction to architectural design, including precedent research, drawing conventions, model making, and diagramming. Studio projects focus on investigating the impact of specific site conditions on design, threshold conditions, and small-scale domestic space. Students will learn skills in problem solving, visualization, and written, oral, and graphic communication. Field trips to relevant architectural sites.
ARCH 202. Architectural Design II.
(1-15) Cr. 6. S. Prereq: ARCH 201; MATH 142; PHYS 111
Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Fieldtrips to relevant architectural sites.
(1-15) Cr. 6-7. S. Prereq: ARCH 201, MATH 142 and PHYS 111
Continuation of fundamental architectural design exploration. Studio projects focus on the generation of ideas based on experience and an understanding of urban spaces. Emphasis on systematic analysis of urban culture, scale, materiality, and networks. Students work in groups and individually. Representational methods expand on architectural conventions through experimentation. Fieldtrips to relevant architectural sites.
ARCH 221. History of Architecture I.
(Cross-listed with DSN S). (3-0) Cr. 3. F.
Survey of western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. Ancient through 1750. Meets International Perspectives Requirement.
ARCH 222. History of Architecture II.
(Cross-listed with DSN S). (3-0) Cr. 3. S.
Survey of western architectural ideas and practices in their social, cultural and representational contexts. Comparisons with global examples. 1750 to present. Meets International Perspectives Requirement.
ARCH 335. Three-Dimensional Studio.  
(Cross-listed with ARTIS). (1-4) Cr. 3. Repeatable, maximum of 6 credits.  
This course deals with three dimensional problems in visual invention,  
organization, and expression emphasizing creative manipulation of tools,  
materials, and techniques as means for three dimensional thinking. Projects cover  
the additive (modeling), subtractive (carving), substitutional (casting) as well as  
constructive techniques.

ARCH 341. Building Science and Technology II.  
(3-4) Cr. 5. S. Prereq: ARCH 245, MATH 142 and PHYS 111  
Continued exploration of integrated architectural technology fundamentals in  
three modules: environmental, material, and structural technologies. Topics  
include environmental systems (building envelope systems and heat transfer,  
passive heating and cooling, daylighting, thermal comfort, analytical guidelines  
and calculation methods), materials & assemblies (composite building materials  
and framing systems) and structural systems (exploration relationship between  
applied forces and structural forms).

ARCH 342. Building Science and Technology III.  
(3-4) Cr. 5. F. Prereq: ARCH 341  
In-depth explorations of integrated architectural technology fundamental topics  
in three modules: environmental, material, and structural technologies with  
focus on sustainable concepts and formal/material explorations. Examination of a  
design process that incorporates climate into the control of thermal, luminous,  
and acoustic environments. Introduction to plumbing systems. Complex construction  
assemblies and large-scale construction will be studied. Structural components  
(beams, columns, & slabs) will be designed, computed, and analyzed.

ARCH 343. Building Science and Technology IV.  
(3-4) Cr. 5. S. Prereq: ARCH 342  
In-depth explorations of fundamental integrated architectural technology topics in  
three modules: environmental, material, and structural technologies with a  
focus on sustainable concepts and formal/material explorations. An overview of active  
environmental control systems in response to occupant comfort, patterns of use,  
health, and safety regulations. Use and design of mechanical, electrical, plumbing,  
fire safety, transportation, and conveying systems and subsystems. Structural  
module investigates complex structural systems and behaviors with a focus on  
documentation and integration with other building technologies.

ARCH 351. Whole Building Energy Performance Modeling.  
(Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: ARCH 202, 245, 341. Open to  
non-majors by permission of instructor.  
Architectural design, design evaluation and technical analysis using energy  
performance modeling tools. Emphasis will be given to whole building energy  
efficiency including passive and active systems integration.

ARCH 401. Architectural Design V.  
(1-15) Cr. 6. F. Prereq: ARCH 302  
A rigorous examination of how buildings participate sustainably in socio-political  
and environmental systems. Student projects consider in a comprehensive  
proposal how issues of physical site, socio-economic context, programming,  
structure, form, materiality, and building systems are interconnected through  
the design process and within the built environment. Projects typically focus on  
a smaller scale urban public building that is closely connected to its physical,  
environmental, and social context.

(1-15) Cr. 6-7. F. Prereq: ARCH 302  
A rigorous examination of how buildings participate sustainably in socio-political  
and environmental systems. Student projects consider in a comprehensive  
proposal how issues of physical site, socio-economic context, programming,  
structure, form, materiality, and building systems are interconnected through  
the design process and within the built environment. Projects typically focus on  
a smaller scale urban public building that is closely connected to its physical,  
environmental, and social context.

ARCH 402. Architectural Design VI.  
(1-15) Cr. 6. S. Prereq: ARCH 401 and minimum 2.0 GPA in previous studio courses  
An examination of the relationship between architecture and the city. Studio  
projects stress analysis and interpretation of the diverse forces and conditions that  
impact and inform architecture in the urban environment. Urban design project.  
Study abroad option.  
Meets International Perspectives Requirement.

ARCH 402H. Honors (6-7 cr.).  
(1-15) Cr. 6. S. Prereq: 401 and minimum 2.0 GPA in previous studio courses  
An examination of the relationship between architecture and the city. Studio  
projects stress analysis and interpretation of the diverse forces and conditions that  
impact and inform architecture in the urban environment. Urban design project.  
Study abroad option.  
Meets International Perspectives Requirement.

ARCH 403. Architectural Design VII.  
(1-15) Cr. 6. F. Prereq: ARCH 402  
A rigorous examination of architecture’s relationship with culture and technology.  
Studio projects stress the interpretation and integration of contextual and historical  
considerations, as well as structural, environmental, and communication systems,  
in a comprehensive design proposal.

(1-15) Cr. 6-7. F. Prereq: ARCH 402  
A rigorous examination of architecture’s relationship with culture and technology.  
Studio projects stress the interpretation and integration of contextual and historical  
considerations, as well as structural, environmental, and communication systems,  
in a comprehensive design proposal.

ARCH 404. Architectural Design VIII.  
(1-15) Cr. 6. S. Prereq: ARCH 403  
Advanced forum for architectural research and/or design. Choice of thematic  
studios or student initiated research and design. Experimentation and innovation  
are encouraged. DSN S 446 or DSN S 546, for 6 cr. each time taken, can be  
substituted for this class and be taken up to a maximum of 12 credits.

ARCH 404H. Architectural Design VIII, Honors.  
(1-15) Cr. 6-7. F. Prereq: ARCH 403  
Advanced forum for architectural research and/or design. Choice of thematic  
studios or student initiated research and design. Experimentation and innovation  
are encouraged. DSN S 446 or DSN S 546, for 6 cr. each time taken, can be  
substituted for this class and be taken up to a maximum of 12 credits.

ARCH 420. Topics in American Architecture.  
(3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: Junior classification  
History, theory, and principles of American architecture and urban design  
considering relationships to the culture, visual arts, site, and surroundings. Credit  
counts toward fulfillment of Studies in Architecture and Culture requirements. A  
maximum of 6 credits of ARCH 420 may be applied to degree program.  
Meets U.S. Diversity Requirement.

ARCH 422. Topics in Medieval Architecture.  
(3-0) Cr. 3. Repeatable, maximum of 6 credits. S. Prereq: Junior classification  
History, theory, and principles of medieval architecture and urban design  
considering relationships to the culture, visual arts, site, and surroundings. Credit  
counts toward fulfillment of Studies in Architecture and Culture requirements. A  
maximum of 6 credits of ARCH 422 may be applied to degree program.  
Meets International Perspectives Requirement.

ARCH 423. Topics in Renaissance to Mid-Eighteenth Century Architecture.  
(3-0) Cr. 3. Repeatable, maximum of 6 credits. S. Prereq: Junior classification  
History, theory, and principles of renaissance to mid-eighteenth century  
architecture and urban design considering relationships to the culture, visual arts,  
site, and surroundings. Credit counts toward fulfillment of Studies in Architecture  
and Culture requirements. A maximum of 6 credits of ARCH 423 may be applied  
to degree program.  
Meets International Perspectives Requirement.

ARCH 424. Topics in Nineteenth Century Architecture.  
(3-0) Cr. 3. Repeatable, maximum of 6 credits. F. Prereq: Junior classification  
History, theory, and principles of nineteenth century architecture and urban design  
considering relationships to the culture, visual arts, site, and surroundings. Credit  
counts toward fulfillment of Studies in Architecture and Culture requirements. A  
maximum of 6 credits of ARCH 424 may be applied to degree program.  
Meets International Perspectives Requirement.

(3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: Junior classification  
History, theory, and principles of twentieth century architecture and urban design  
considering relationships to the culture, visual arts, site, and surroundings. Credit  
counts toward fulfillment of Studies in Architecture and Culture requirements. A  
maximum of 6 credits of ARCH 425 may be applied to degree program.  
Meets International Perspectives Requirement.

ARCH 426. Topics in Native American Architecture.  
(Cross-listed with AM IN, DSN S). (3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq:  
Junior classification History, theory, and principles of Native American/American Indian architecture,  
landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit  
counts toward fulfillment of Studies in Architecture and Culture requirements. A  
maximum of 6 credits of ARCH 426 may be applied to degree program.  
Meets U.S. Diversity Requirement.
(Dual-listed with ARCH 527).  (3-0) Cr. 3. F. Prereq: Junior classification.  
The history and theoretical concept of Chinese built environment with emphasis  
on the morphology of built form and its relationship to art, landscape design, and  
urban structure. Credit counts toward fulfillment of Studies in Architecture and  
Culture.  
Meets International Perspectives Requirement.  
ARCH 429. Topics in Italian Architecture and Urbanism.  
(3-0) Cr. 3. S.  
History, theory and principles of Italian architecture and urban design considering  
relationships to the culture, visual arts, site, and surroundings.  
ARCH 431. Analytical Drawing.  
(1-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.  Prereq: ARCH 230 and  
ARCH 302  
Exploration of 2- and 3-dimensional representations. Emphasis on on-site  
freehand sketching, perspective and orthographic drawing, rendering of shadows  
and textures, and use of diverse media.  
ARCH 432. Advanced Computer Lighting and Rendering.  
(3-0) Cr. 3. Repeatable, maximum of 6 credits.  Prereq: ARCH 230 and ARCH 301  
Exploration of the computer as a design and communication tool. Emphasis on  
lighting and rendering techniques.  
ARCH 433. File to Fabrication.  
(3-0) Cr. 3. Repeatable, maximum of 6 credits. F.S.  Prereq: ARCH 230 and ARCH  
301  
Exploration of the computer as a design and manufacturing tool. Emphasis on  
fabrication techniques and rapid prototyping including laser-cutting, 3-D printing  
and CNC routing.  
(1-4) Cr. 3. Prereq: ARCH 334  
Emphasis on application of the computer as a design tool, topical applications and  
computer graphic methods, development of computer software for architectural  
and environmental problem solving.  
ARCH 436. Advanced Design Media.  
(2-2) Cr. 3. Repeatable. F.S.S.  Prereq: ARCH 230  
Special topics in design media applications.  
ARCH 437. Architectural Photography.  
(3-0) Cr. 3. Prereq: ARCH 202  
Emphasis on use of the camera and lighting in photographing drawings and  
interior and exterior building environments.  
ARCH 445. Building Science and Technology V.  
(2-2) Cr. 3. F. Prereq: ARCH 343  
Technical topics which ground architectural design decisions and concepts in  
the physical world and the human perception thereof and have environmental  
sustainability as an emphasis. Synthesis of material, environmental, structural and  
systems design and related design modeling and simulation.  
ARCH 482. Professional Practice.  
(Dual-listed with ARCH 582).  (3-0) Cr. 3. F. Prereq: ARCH 202  
Emphasis on the circumstances and opportunities of the professional practice of  
built environment as an emphasis. Practice as profession, process, organization, business, and evolving  
models of practice.  
ARCH 486. Design: Made in Italy.  
(Cross-listed with DSN S).  (3-0) Cr. 3. S.  
An investigation of the history of Italian design in its contemporary form as part of  
International study abroad program in Rome.  
ARCH 490. Independent Study.  
Cr. 1-9. Repeatable. F.S.SS.  Prereq: Written approval of instructor and  
department chair on required form  
Independent investigation.  
ARCH 490A. Design Communications.  
Cr. 1-9. Repeatable. F.S.SS.  Prereq: Written approval of instructor and  
department chair on required form  
Independent investigation.  
ARCH 490B. Design.  
Cr. 1-9. Repeatable. F.S.SS.  Prereq: Written approval of instructor and  
department chair on required form  
Independent investigation.  
ARCH 490C. Technical Systems.  
Cr. 1-9. Repeatable. F.S.SS.  Prereq: Written approval of instructor and  
department chair on required form  
Independent investigation.  
ARCH 490D. Architectural History.  
Cr. 1-9. Repeatable. F.S.SS.  Prereq: Written approval of instructor and  
department chair on required form  
Independent investigation.  
ARCH 490E. Behavioral Studies.  
Cr. 1-9. Repeatable. F.S.SS.  Prereq: Written approval of instructor and  
department chair on required form  
Independent investigation.  
ARCH 490F. Practice.  
Cr. 1-9. Repeatable. F.S.SS.  Prereq: Written approval of instructor and  
department chair on required form  
Independent investigation.  
ARCH 490H. Independent Study, Honors.  
Cr. 1-9. Repeatable. F.S.SS.  Prereq: Written approval of instructor and  
department chair on required form  
Independent investigation.  

Courses primarily for graduate students, open to qualified undergraduates:  
ARCH 505. Architectural Design and Media I: Mapping, Programming,  
Building.  
(0-10) Cr. 5. F.  Prereq: Admission to the M Arch program. Concurrent enrollment  
in ARCH 541 and ARCH 595  
An introduction to comprehensive architectural design projects that focuses on  
three interrelated design skills: mapping, programming and building. Projects  
establish a framework for designing buildings that considers multiple factors such  
as environmental forces, construction methods, building codes, urban regulations,  
social relationships, and cultural values.  
ARCH 506. Architectural Design and Media II: Materiality and  
Representation.  
(0-10) Cr. 5. S.  Prereq: ARCH 505, ARCH 541, ARCH 595 and concurrent  
enrollment in ARCH 542 and ARCH 596  
Small-scale architectural design projects that investigate design representation  
through analogue and digital means. The projects explore different representation  
strategies to help students develop an understanding of the particular modes of  
arachitectural representation that advance the designer’s knowledge of space as  
a complex interaction between materials with inherent physical characteristics,  
mobile socializing bodies, and changing environmental cycles.  
ARCH 507. Architectural Design and Media III: Design in Detail.  
(0-10) Cr. 5. SS.  Prereq: ARCH 506, ARCH 542, ARCH 596 and concurrent  
enrollment in ARCH 581  
Design projects that emphasize the multi-faceted role of the architectural detail  
in the design process through first, understanding the historical specificity of  
building construction and detailing; second, utilizing working drawing as a  
mode of communication; and third, designing with details. The term-long project  
will consider a set of working drawings of past buildings as a site for design  
intervention.  
ARCH 510. Practical Experience.  
Cr. R. Repeatable. F.S.SS.  Prereq: Graduate standing and permission of  
department DOGE  
Students must register for this course prior to commencing each period. Available  
only to students taking course loads of 8 credits or less.  
ARCH 519. Middle Eastern Cities.  
(Cross-listed with C R P).  (3-0) Cr. 3.  Prereq: Graduate or Senior classification  
Introduction to basic academic writings on Middle Eastern cities in addition to  
other contemporary cultural productions of the region. Study of various aspects of  
Middle Eastern life and the built environments that this life produces.  
Meets International Perspectives Requirement.  
(Dual-listed with ARCH 427).  (3-0) Cr. 3. Prereq: Graduate or Senior classification  
The history and theoretical concept of Chinese built environment with emphasis  
on the morphology of built form and its relationship to art, landscape design, and  
urban structure. Credit counts toward fulfillment of Studies in Architecture and  
Culture requirements.  
Meets International Perspectives Requirement.  
ARCH 528A. Studies in Architecture: Culture.  
(Cross-listed with DSN S).  (3-0) Cr. 2-3. Repeatable, maximum of 6 times.  Prereq:  
ARCH 221, ARCH 222 or senior classification or graduate standing  
ARCH 528B. Studies in Architecture: Culture.  
(Cross-listed with DSN S).  (3-0) Cr. 2-3. Repeatable, maximum of 6 times.  Prereq:  
ARCH 221, ARCH 222 or senior classification or graduate standing
ARCH 528B. Studies in Architecture: Technology. (Cross-listed with DSN S), (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing.

ARCH 528C. Studies in Architecture: Communications. (Cross-listed with DSN S), (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing.

ARCH 528D. Studies in Architecture: Design. (Cross-listed with DSN S), (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing.

ARCH 528E. Studies in Architecture: Practice. (Cross-listed with DSN S), (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing.

ARCH 529. Spatial Dialectics in the American Midwest. (3-0) Cr. 3. Prereq: Graduate or Senior classification. The American Midwest has witnessed dramatic transformation during the last two centuries which impacted its physical, environmental, economic and social characteristics. This course is an interdisciplinary study of the evolution and sustainability of Midwestern space in relationship to forces of flow shaped by the mobility of bodies, products, meanings, and symbols that are enforced, incorporated, reproduced or destroyed. Meets U.S. Diversity Requirement.

ARCH 534. Advanced Computer-aided Architectural Design. (1-4) Cr. 3. Repeatable, maximum of 6 credits. F. Prereq: ARCH 434 and permission of instructor. Emphasis on concepts, algorithms, data structures, advanced modeling, rendering, animation, and virtual reality applications in architectural design.

ARCH 535. Advanced Three-Dimensional Studio. (1-4) Cr. 3. Repeatable, maximum of 6 credits. Prereq: ARCH 335 or Graduate classification. Advanced investigation of sculptural expression with emphasis on individual projects.

ARCH 541. Science and Technology for Architects I. (4-2) Cr. 5. F. Prereq: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and 595. Introduction to Human Factors, Descriptive Geometry, Basic Building Materials, and Small-Scale Building Envelopes. Theory and case studies, stressing the connectivity of technical issues to broader formal, social, and cultural spheres.

ARCH 542. Science and Technology for Architects II. (4-2) Cr. 5. S. Prereq: ARCH 505, ARCH 541, ARCH 595 and concurrent enrollment in ARCH 506 and ARCH 596. Elementary Statics and Beam Theory, Basic Construction Materials, and Site and Building Circulation. Theory and case studies stressing the connectivity of technical issues to broader formal, social, and cultural spheres.

ARCH 558. Sustainability and Green Architecture. (Cross-listed with DSN S), (3-0) Cr. 3. F. Prereq: Graduate classification. Issues of Sustainability as related to living patterns and city design, population, pollution and use and availability of natural resources for the built environment; Issues of Green Architecture as it relates to building material selection, systems of building materials, the environment of the United States and the World, architects and examples of buildings with green or sustainable designations.

ARCH 557. Preservation, Restoration, and Rehabilitation. (Cross-listed with DSN S), (3-0) Cr. 3. S. Prereq: Senior classification. Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

ARCH 571. Design for All People. (Cross-listed with DSN S, GERON), (3-0) Cr. 3. S. Prereq: Graduate or Senior classification. Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements. Meets U.S. Diversity Requirement.

ARCH 575. Contemporary Urban Design Theory. (Cross-listed with DSN S), (3-0) Cr. 3. S. Prereq: Graduate or Senior classification. Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

ARCH 576. Study Abroad Options. Cr. 1-12. Repeatable, maximum of 12 credits. SS. Special topics in environmental design, architectural history and contemporary practice. Travel to relevant countries. General cultural and historical studies, topical projects and individual inquiry. Courses may be taught by departmental faculty or faculty from approved Iowa State Study Abroad programs. See current offerings for detailed syllabus. Meets International Perspectives Requirement.

ARCH 581. Service Learning. (1-12) Cr. 5. S. Prereq: ARCH 506, 542 and ARCH 596. Planning and execution of a project serving a community need. Learning occurs through both theory and active involvement in on-site work. Projects connect previous coursework to practical applications and community involvement.

ARCH 582. Professional Practice. (Dual-listed with ARCH 482), (3-0) Cr. 3. F. Prereq: Graduate classification. Emphasis on the circumstances and opportunities of the professional practice of architecture: practice as profession, process, organization, business, and evolving models of practice.

ARCH 583. Research in Practice. (3-0) Cr. 3. S. Prereq: Graduate or Senior classification. Foundational course in the methods and conceptual tools of design research in the context of practice. Through team and individual guided projects, students generate, analyze and represent knowledge in design-related communications and contexts. Alternative models of practice, client groups and communities are addressed within projects that precede, feed, follow, or overlap with architectural contracts.

ARCH 590. Special Topics. Cr. 1-5. Repeatable. F.S.S. Prereq: Written approval of instructor and department chair on approved form. Investigation of architectural issues having a specialized nature.

ARCH 595. Seminar on the Built Environment I: History. (5-0) Cr. S. F. Prereq: Admission to the M. Arch. program and concurrent enrollment in ARCH 505 and ARCH 542. Introduction to historical canons and traditions of architecture and urbanism. Discussion of the relationship between historical inquiry and contemporary practice. Students learn skills in critical thinking, visual analysis, and research methods. Course sessions develop thematically with interdisciplinary readings, group discussions, student presentations, and research projects.

ARCH 596. Seminar on the Built Environment II: Landscape and Society. (5-0) Cr. S. Prereq: ARCH 505, ARCH 541, ARCH 595 and concurrent enrollment in ARCH 506 and ARCH 542. Introduction to landscape as artifact and multi-disciplinary knowledge-base for design thinking. Literatures and methods of environmental psychology, cultural geography, landscape and architectural history and theory, site and circulation design as intersection of built infrastructural, natural, and social systems. Emphasis on sensory perception, and human movement; investigations of climate, environmental conditions, and values toward consumption and sustainability in everyday experience of the built environment.

ARCH 597. Seminar on the Built Environment III: Theory. (3-0) Cr. 3. F. Prereq: Graduate or Senior classification. Multidisciplinary overview of contemporary theories concerned with the production of the built environment. Particular attention to urbanism as a discourse that relates social interactions and power structures to material space. Meets International Perspectives Requirement.

ARCH 598. Seminar on the Built Environment IV: Topical Study. (3-0) Cr. 3. S. Prereq: Graduate or Senior classification. A research seminar which considers a topic within contemporary discourses on the built environment outside of Europe and North America. The topic will be studied from multiple perspectives highlighting the historical and theoretical relationships between architecture, global cultures, geography, landscape, and urban planning. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

Courses for graduate students:

ARCH 601. Sustainable Building Design. (0-12) Cr. 6. F. Prereq: ARCH 507, ARCH 542, ARCH 596 and concurrent enrollment in ARCH 643. Design projects that are developed through integrative design strategies that explore the relationship between buildings and environmental forces to maximize non-wasteful, efficient use of resources such as energy, water and building materials. Projects will include investigations of the impact of solar energy, airflow, building materials, passive and active systems and wall sections on spatial quality and form making. Design decisions will be quantitatively validated through energy modeling and performance simulation.
(0-12) Cr. 6. S. Prereq: ARCH 601, ARCH 643, ARCH 597 and concurrent enrollment in ARCH 644
Design projects that explore the relationships between architectural, cultural, and environmental landscapes. Emphasis on regional sites, socio-economic conditions, and sustainable design and planning practices at multiple scales. Projects stress engagement with local circumstances and stakeholders; systemic interconnections and strategies; and the application of interdisciplinary research.

ARCH 603. Comprehensive Design.
(0-12) Cr. 6. F. Prereq: ARCH 601
Rigorous examination of architecture’s relationship with culture and technology. Studio projects stress the interpretation of contextual and historical considerations, as well as structural, environmental, mechanical, electrical and plumbing systems, in a comprehensive design proposal. This course fulfills the Graduate College Creative Component Requirement.

ARCH 604. Design Studio Options.
(0-12) Cr. 6. Repeatable, maximum of 12 credits. S. Prereq: ARCH 602
Design studio selected by the students, which may include but is not limited to: independent design study, interdisciplinary design studio, study abroad, and design build. DSN S 546 for 6 cr. may be substituted for this course.

ARCH 643. Science and Technology for Architects III.
(2-2) Cr. 3. F. Prereq: ARCH 507, ARCH 542, ARCH 596, ARCH 581 and concurrent enrollment in ARCH 601 or Graduate classification and concurrent enrollment in ARCH 601
Third in a four-course series in building science and technologies. Structural Elements and Systems, and Building Services. Theory and case studies stressing the connectivity of technical issues to broader formal, social, and cultural spheres.

ARCH 644. Science and Technology for Architects IV.
(2-2) Cr. 3. S. Prereq: ARCH 643 or Graduate classification
Fourth of a four-course series in building science and technologies. Building Enclosures, Interior Construction and Sensory Qualities, Fabrication and Construction. Theory and case studies stressing the connectivity of technical issues to broader formal, social and cultural spheres. Summative Student Project.

ARCH 690. Independent Design Study.
(1-15) Cr. 6. Repeatable. F.S.SS. Prereq: Admission to the M. S. in Arch. program
Independent architectural design projects commensurate with student interests requiring approval of Architecture Graduate Committee.

ARCH 698. Graduate Seminar.
Cr. R. Repeatable. F.S. Prereq: Admission to the M. Arch. or M. S. in Arch. program
Special topics and guest speakers.

ARCH 699. Research.
(1-18) Cr. 3-9. Repeatable. F.S.SS.

Art and Design

Courses primarily for undergraduates:

ART 494. Art and Design in Europe Seminar.
(1-0) Cr. 1. Prereq: Permission of instructor and planned enrollment in ART 495
Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Offered on a satisfactory-fail basis only. Meets International Perspectives Requirement.

ART 494A. Art and Design in Europe Seminar: Integrated Studio Arts.
(1-0) Cr. 1. Prereq: Permission of instructor and planned enrollment in ART 495
Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Offered on a satisfactory-fail basis only. Meets International Perspectives Requirement.

ART 494L. Art and Design in Europe Seminar: Interior Design.
(1-0) Cr. 1. Prereq: Permission of instructor and planned enrollment in ART 495
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

ART 495A. Art and Design in Europe: Integrated Studio Arts.
(Dual-listed with ART 595A). Cr. 3. F.S.SS. Prereq: ART 494, permission of instructor
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

ART 495I. Art and Design in Europe: Interior Design.
(Dual-listed with ART 595I). Cr. 3. F.S.SS. Prereq: ART 494, permission of instructor
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

ART 495N. Art and Design in Europe: Art History.
(Dual-listed with ART 595N). Cr. 3. F.S.SS. Prereq: ART 494, permission of instructor
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

Courses primarily for graduate students, open to qualified undergraduates:

(3-0) Cr. 3. Prereq: Permission of instructor
Issues and debates that pertain to the study of visual objects and material artifacts in their cultural context. Examination of the role of visual and material culture studies as both relate to allied disciplines including, but not limited to: anthropology, art history, design history, design studies, and new media studies.

ART 511. Seminar in Teaching.
(3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: Graduate classification
Readings and discussion of university level design education issues, studio/ classroom observation, development of a teaching philosophy, lesson planning and presentation.

ART 595A. Art and Design in Europe: Integrated Studio Arts.
(Dual-listed with ART 495A). Cr. 3. F.S.SS. Prereq: ART 494, permission of instructor
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

ART 595I. Art and Design in Europe: Interior Design.
(Dual-listed with ART 495I). Cr. 3. F.S.SS. Prereq: ART 494, permission of instructor
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.

ART 595N. Art and Design in Europe: Art History.
(Dual-listed with ART 495N). Cr. 3. F.S.SS. Prereq: ART 494, permission of instructor
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered. Meets International Perspectives Requirement.
ART 598. Museum/Gallery Internship. Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS. Prereq: Graduate classification and permission of instructor
Written approval in advance of semester of enrollment. Supervised experience with a cooperating museum or gallery or art center. Offered on a satisfactory-fail basis only.

Courses for graduate students:

ART 605. Research Methods. (3-0) Cr. 3. Prereq: Permission of instructor
Research strategies related to fine art and technology. Application of selected methods to specific issues.

ART 697. Studio Internship. Cr. arr. F.S.SS. Prereq: Graduate classification and approval of POS committee Supervised off-campus learning experience with a prominent artist, designer, or firm.

Art Education

Courses primarily for undergraduates:

ARTED 211. Introduction to Art Education. (0-6) Cr. 3. F.S.
Teaching methods for K-12 art education. Hands-on discipline-specific and integrated art activities; emphasis on creativity, artistic and human diversity, and thinking skills development.

Art History

Courses primarily for undergraduates:

ART H 181. Origins and Evolution of Modern Design. (Cross-listed with DSN S). (3-0) Cr. 3. F.S.
History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

ART H 280. History of Art I. (Cross-listed with DSN S). (3-0) Cr. 3. F.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. Meets International Perspectives Requirement.

ART H 280H. History of Art I: Honors. (Cross-listed with DSN S). (3-0) Cr. 4. F.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. Meets International Perspectives Requirement.

ART H 281. History of Art II. (Cross-listed with DSN S). (3-0) Cr. 3. S.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. Meets International Perspectives Requirement.

ART H 281H. History of Art II: Honors. (Cross-listed with DSN S). (3-0) Cr. 3. S.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. Meets International Perspectives Requirement.

ART H 292. Introduction to Visual Culture Studies. (Cross-listed with DSN S). (3-0) Cr. 3. F.S.
An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields. Meets U.S. Diversity Requirement

ART H 378. Popes and Caesars: 2000 Years of Art History in Rome. (3-0) Cr. 3. Prereq: Permission of instructor
Survey of Italian art and architecture from the Etruscans to Bernini, including lectures and tours of museums and historical sites. Study abroad course taught in Rome, with travel to other Italian cities.

ART H 382. Art and Architecture of Asia. (Cross-listed with DSN S). (3-0) Cr. 3.
Introduction to the history of art and architecture in Asia. Cultures may include China, Korea, Japan, and India before the modern era. Visual materials selected based on important themes that are critical in understanding Asian culture and art tradition. Meets International Perspectives Requirement.

ART H 383. Greek and Roman Art. (Dual-listed with ART H 583). (Cross-listed with CL ST, DSN S). (3-0) Cr. 3. Prereq: ART H 583: Graduate classification or permission of instructor. Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

ART H 383H. Greek and Roman Art: Honors. (Cross-listed with CL ST, DSN S). (3-0) Cr. 3-4.
Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

ART H 384. Art of Islam. (3-0) Cr. 3.
Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world. Meets International Perspectives Requirement.

ART H 384H. Art of Islam, Honors. (3-0) Cr. 3-4.
Historical survey of the painting, sculpture, crafts, and architecture of the various civilizations of the Islamic world. Meets International Perspectives Requirement.

ART H 385. Renaissance Art. (Dual-listed with ART H 585). (Cross-listed with DSN S). (3-0) Cr. 3.
European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

ART H 385H. Renaissance Art, Honors. (Cross-listed with DSN S). (3-0) Cr. 3.
European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

ART H 386. American Art to 1945. (Cross-listed with DSN S). (3-0) Cr. 3.
Survey of American art from the early colonial period to 1945, with emphasis on historical and cultural issues that underlie art production in the United States.

ART H 388. Modern Art and Theory. (Cross-listed with DSN S). (3-0) Cr. 3.
Visual arts and critical theory of the early 20th century, including Expressionism, Cubism, Futurism, Suprematism, Dada, and Surrealism.

ART H 395. Art and Theory Since 1945. (Cross-listed with DSN S). (3-0) Cr. 3.

ART H 396. History of Photography. (Cross-listed with DSN S). (3-0) Cr. 3.
Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

ART H 481. Art and Architecture of India. (Dual-listed with ART H 581). (Cross-listed with DSN S). (3-0) Cr. 3.
Survey of Indian-style art and architecture through history. Examine how art and architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically. Meets International Perspectives Requirement.

ART H 487. Nineteenth Century Art. (Dual-listed with ART H 587). (Cross-listed with DSN S). (3-0) Cr. 3.
European and American art and architecture from 1780 to 1900 focusing on the major movements of western Europe, including: Neo-Classicicism, Romanticism, Realism, Impressionism, and Post-Impressionism.
ART H 499. History of Comics.
(Dual-listed with ART H 599). (Cross-listed with DSN S). Cr. 3. Prereq: ART H 589: Graduate classification or permission of instructor.
An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ART H 499H. History of Comics: Honors.
(Cross-listed with DSN S). Cr. 3-4.
An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ART H 490. Independent Study.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form before the semester of enrollment
Student must have completed art history coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ART H 490H. Independent Study, Honors.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form before the semester of enrollment
Student must have completed art history coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ART H 494. Women/Gender in Art.
(Dual-listed with ART H 594). (Cross-listed with DSN S, W S). (3-0) Cr. 3. Prereq: Graduate classification or permission of instructor.
Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.
Meets U.S. Diversity Requirement

ART H 498. Selected Topics in Art History.
(Dual-listed with ART H 598). (Cross-listed with DSN S). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Courses primarily for graduate students, open to qualified undergraduates:
ART H 581. Art and Architecture of India.
(Dual-listed with ART H 481). (Cross-listed with DSN S). (3-0) Cr. 3. Prereq: ART H 583: Graduate classification or permission of instructor.
Survey of Indian-style art and architecture through history. Examine how art and architecture developed in the Indian world has come to define the Indian identity religiously, culturally, socially, and politically.
Meets International Perspectives Requirement.

ART H 583. Greek and Roman Art.
(Dual-listed with ART H 383). (Cross-listed with CL ST, DSN S). (3-0) Cr. 3. Prereq: ART H 583: Graduate classification or permission of instructor.
Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

ART H 585. Renaissance Art.
(Dual-listed with ART H 385). (Cross-listed with DSN S). (3-0) Cr. 3. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

(Dual-listed with ART H 487). (Cross-listed with DSN S). (3-0) Cr. 3. European and American art and architecture from 1780 to 1900 focusing on the major movements of western Europe, including: Neo-Classicism, Romanticism, Realism, Impressionism, and Post-Impressionism.

ART H 589. History of Comics.
(Dual-listed with ART H 489). (Cross-listed with DSN S). Cr. 3. Prereq: ART H 589: Graduate classification or permission of instructor.
An art-historical survey of comic strips, comic books, and graphic novels from their origins in the 19th century to present.

ART H 590. Special Topics.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ART H 594. Women/Gender in Art.
(Dual-listed with ART H 494). (Cross-listed with DSN S, W S). (3-0) Cr. 3. Prereq: Graduate classification or permission of instructor.
Issues of gender related to cultural environments from the Middle Ages to contemporary times in Europe and America. Feminist movement beginning in the 1970s and specifically gender issues in art that are becoming widespread in the artistic culture.
Meets U.S. Diversity Requirement

(Cross-listed with DSN S). (3-0) Cr. 3. Prereq: Graduate classification or permission of instructor.
Visual arts and critical theory from Abstract Expressionism to the present.
Meets U.S. Diversity Requirement

ART H 598. Selected Topics in Art History.
(Dual-listed with ART H 498). (Cross-listed with DSN S). (3-0) Cr. 3. Repeatable, maximum of 9 credits.
Specialized study in the history or criticism of art and design. Course primarily for graduate students open to qualified undergraduate students.

Community and Regional Planning

Community and regional planning is a field of study aimed at understanding the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to solve problems. Planners work at multiple levels, and they are concerned with issues that affect every corner of the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunity; and the management of growth and change of all kinds.

Undergraduate Study
www.design.iastate.edu/communityplanning

Graduates of the Community and Regional Planning department are able to integrate planning knowledge and skills in a variety of practical applications, and can communicate effectively in written and oral form. Graduates will be qualified for a variety of entry-level positions. They will also be well prepared for graduate study in a variety of fields, including law, public policy, public health, environmental science, geography, sociology, urban design, and architecture.

Graduates of the Community and Regional Planning Department are expected to understand the structure and functions of urban settlements, including the history of planning and urban development and the processes for plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written/ oral and graphic communications, collaboration, and in synthesizing and applying knowledge to practice. Graduates are expected to be able to assess the impact of plans and alternatives based on equity and social justice, economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning. Our students gain an education that, when combined with experience, supports eligibility for membership in the American Institute of Certified Planners.

The department cooperates in the undergraduate minors in Design Studies, Digital Media, Critical Studies in Design, Environmental Studies, and Sustainability.

Graduate Study

The Department offers the Master of Community and Regional Planning degree with areas of concentration in land use and transportation, community design and development, and rural and environmental planning. Students may design their own area of concentration with the assistance of their major professor. The primary focus of the M.C.R.P. degree is to prepare students with the education and practical skills to be leaders in the practice of planning. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Degree requirements include completion of a 2-year, 48-credit program, including a required core (21 credits), electives (21-23 credits) and one of the following: capstone studio (4 credits), professional report (4 credits), or thesis (6 credits). The required core consists of C R P 532, 561, 563, 564, 566, 588 and 592. Students select electives in consultation with their Program of Study (POS) committee.

C R P 532 Community Planning Studio 3
C R P 561 Planning Theory for Practice 3
C R P 563 Planning the American Metropolis 3
C R P 564 Introduction to Analytical Methods for Planning 3
C R P 566 Values and Decision Making 3
C R P 568 Planning and Development 3
C R P 592 Land Use and Development Regulation Law 3
Admission to the M.C.R.P. program is by application to the department and to the Graduate College. Students with a Bachelor's degree in planning or students who have taken highly relevant coursework may be able to waive up to 9 credits of course requirements. Students must petition the department's Director of Graduate Education (DOGE) in writing prior to the first day class of the student's first semester in the program to have credits waived. Students are encouraged to complete an internship in a planning office. No foreign language is required for the degree master of community and regional planning.

Double degree programs are offered with architecture (M.C.R.P./M.Arch.), business administration (M.C.R.P./M.B.A.), landscape architecture (M.C.R.P./M.L.A.), and sustainable agriculture (M.C.R.P./M.S.). The department also participates in the interdepartmental major in transportation (see Transportation). Information about our programs and how to apply can be obtained from the department's web page at: www.design.iastate.edu/communityplanning, or send an email to crp@iastate.edu.

The department also offers a 13-credit graduate certificate in Geographic Information Systems (GIS) in spatial analysis, GIS applications and program management. The program is open to graduate students in all disciplines of the University. Information about the graduate certificate may be obtained from the department office and from the department’s web page at: www.design.iastate.edu. CRP currently offers several courses via distance learning to graduates and planning professionals interested in expanding their knowledge of planning. Further details of current distance course offerings may be found on the CRP website and on the ISU Continuing Education website. For more information, send an e-mail to crp@iastate.edu.

Curriculum in Community and Regional Planning

The Department of Community and Regional Planning administers the 128 hour credit undergraduate program leading to the Bachelor of Science. Students have the opportunity to work with their faculty advisers to define their own areas of interest, which may include a minor.

The Community and Regional Planning Program can be completed in two to four years. Students may apply for admission to the program at any time during their enrollment at Iowa State University. If applying by transfer from another program or institution, admission is based on the student’s cumulative GPA and departmental review of course work. Transfer applications from students in programs in sociology, political science, history, geography, engineering, and other related disciplines are encouraged. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average; Completion of all requirements listed below.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication: 13 cr.

| (3-0) Cr. 3. F.S. | Examination of the evolution of American urban centers from the colonial era to the present. Considers the demographic changes and social movements underway in urban America and explores how an understanding of the history of cities provides us with knowledge that we can use to improve our cities today.
| C R P 291 | World Cities and Globalization. (Cross-listed with DSN S) | (3-0) Cr. 3. F. | World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity. Meets International Perspectives Requirement.
| C R P 293 | Environmental Planning. (Cross-listed with DSN S, ENV S) | (3-0) Cr. 3. F. | Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.
C R P 301. Planning Methods Studio.
(3-2) Cr. 4. S.
An introduction to the methods and analytical techniques used by planners to study community change. Course includes identification of key sources of planning information and data. Students learn to use quantitative methods for analysis of population, land use, economic and transportation data. Students learn to apply basic analytic methods to community problems and learn the art of effective written, graphic, and oral presentation of data.

C R P 320. Urban Form.
(Cross-listed with DSN S). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: C R P 253 or C R P 270, or permission of instructor. Examines how urban form is shaped, what constitutes good urban form, and what are the trends in emerging urban forms. Descriptive, explanatory and normative theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.

C R P 330. Practicum.
Cr. 1-3. Repeatable. F.S.S.S. Prereq: Major in community and regional planning Structured work experience under close supervision of a professional planner. Practical planning experience; relationships between theory and practice, professional responsibilities, and the scope of various planning roles.

C R P 331. Professional Practice Seminar.
(Dual-listed with C R P 531). (1-0) Cr. 1. S. Prereq: Major in community and regional planning Preparation for working in a planning office; discussion of expectation of employer; presentations from planning professionals, and discussion of differences/similarities between public and private planning offices. Offered on a satisfactory-fail basis only.

C R P 376. Rural, Urban and Regional Economics.
(Cross-listed with ECON). (3-0) Cr. 3. Prereq: ECON 101 Firm location with respect to regional resources, transport, scale economies, externalities, and policies. Measures of local comparative advantage and specialization. Spatial markets. Population location considering jobs, wages, commuting, and local amenities. Business, residential, and farm land use and value. Migration. Other topics may include market failure, regulation, the product cycle, theories of rural and urban development, developmental policy, firm recruiting, local public goods and public finance, schools, poverty, segregation, and crime.

(3-0) Cr. 3. S. Prereq: C R P 253 and Junior classification The nature of planning and its relation to social and economic planning; levels of planning, place of planning in decision making; steps in the planning process, uses and limitation of knowledge in planning, relation of facts and values.

C R P 391. Field Travel.
Cr. 1-2. Repeatable. F.S. Prereq: CRP major and permission of instructor Observation of practical work experience;

C R P 410. Professional Work Experience.
Cr. R. F.S.S.S. Prereq: Permission of department chair Approved professional work experience.

C R P 416. Urban Design and Practice.
(Dual-listed with C R P 516). (3-6) Cr. 6. S. Prereq: C R P 253 or C R P 270 Principles of urban design and their application to residential and commercial development in studio projects.

C R P 417. Urban Revitalization.
(Dual-listed with C R P 517). (Cross-listed with DSN S). (3-0) Cr. 3. S. Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 425. Growth Management.
(Dual-listed with C R P 525). (Cross-listed with DSN S). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: Junior classification Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

C R P 429. Planning in Developing Countries.
(Dual-listed with C R P 529). (Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: Junior classification. Introduction to issues in planning and governance in developing countries. Problems and strategies may include population movement and change, economic globalization, rural development, urban growth, sustainable development, and housing.
C R P 480H. Independent Study: Honors. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: Written approval of instructor and department chair on required form
Investigation of an approved topic commensurate with student's interest and ability. Offered on a satisfactory-fail basis only.

(Dual-listed with C R P 591). (Cross-listed with DSN S, ENV S, L A). (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences
Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 492. Planning Law, Administration and Implementation. 
(3-0) Cr. 3. F. Prereq: C R P 383
The basis in constitutional, common, and statutory law for the powers of plan implementation. Problems of balancing public and private interests as revealed in the study of leading court cases. Administration of planning agencies and programs.

C R P 494. Senior Seminar in Planning. 
Cr. 1-3. Repeatable, maximum of 2 times. F.S. Prereq: Senior classification; C R P 332 should be taken prior to or concurrently.
An advanced forum for seniors that focuses upon recent trends and important issues affecting planning today. Topics addressed will vary. A demonstration of understanding of current issues and their effects upon planning applications is expected.

C R P 498. Portfolio Development and Review. 
(1-0) Cr. 1. F.S. Should be taken in the final semester of the planning program. Preparation of a portfolio of student work that represents student learning throughout the entire planning program.

Courses primarily for graduate students, open to qualified undergraduates:

C R P 510. Professional Work Experience. 
Cr. R. F.S.SS. Prereq: Permission of department chair
Approved professional work experience.

C R P 516. Urban Design Practice. 
(Dual-listed with C R P 416). (3-6) Cr. 6. S. Prereq: Graduate classification
Principles of urban design and their application to residential and commercial development in studio project.

C R P 517. Urban Revitalization. 
(Dual-listed with C R P 417). (Cross-listed with DSN S). (3-0) Cr. 3. S. Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

C R P 519. Middle Eastern Cities. 
(Cross-listed with ARCH). (3-0) Cr. 3. Prereq: Graduate or Senior classification
Introduction to basic academic writings on Middle Eastern cities in addition to other contemporary cultural productions of the region. Study of various aspects of Middle Eastern life and the built environments that this life produces. Meets International Perspectives Requirement.

C R P 525. Growth Management. 
(Dual-listed with C R P 425). (Cross-listed with DSN S). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: Junior classification
Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

C R P 529. Planning in Developing Countries. 
(Dual-listed with C R P 429). (Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: Junior classification
Introduction to issues in planning and governance in developing countries. Problems and strategies may include population movement and change, economic globalization, rural development, urban growth, sustainable development, and housing.

C R P 530. Practicum. 
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification in Community and Regional Planning
Practical planning experience. Structured work in range of tasks under close supervision of a professional planner. Relationships between theory and practice, exposure to variety of roles in functioning specialties. Offered on a satisfactory-fail basis only.

C R P 531. Professional Practice Seminar. 
(Dual-listed with C R P 331). (1-0) Cr. 1. S. Prereq: Graduate classification
Preparation for working in a planning office; discussion of expectations of employer; presentations from planning professionals, and discussion of differences and similarities between public and private planning offices. Offered on a satisfactory-fail basis only.

C R P 532. Community Planning Studio. 
(Cross-listed with DSN S). (1-4) Cr. 3. F. Prereq: C R P 564 or equivalent
Comprehension and analysis of various geographic contexts pertinent to community planning and the use of planning theory, tools and techniques in an applied setting. Process of making a community plan: historical patterns, current conditions and strategies for planning.

(Dual-listed with C R P 435). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: Graduate classification
Contemporary planning problems in small towns and the design of viable strategies to enhance their social and economic position in today's society.

C R P 536. Community Economic Development. 
(Dual-listed with C R P 436). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: Graduate classification
The nature and process of economic development in the context of community development. Recent changes and trends and their implications for local and regional development. Selected case studies and applications. Contemporary community economic development issues.

C R P 542. Site Development. 
(Dual-listed with C R P 442). (Cross-listed with DSN S). (3-0) Cr. 3. S. Introduction to site development including site review. Studio project integrating concept, finance, selection, analysis, and design.

C R P 545. Transportation Policy and Planning. 
(Dual-listed with C R P 445). (3-0) Cr. 3. F. Prereq: C E 350 or equivalent. Note: C R P 545 prerequisite: Graduate Classification
Comprehensive overview of key policy issues related to transportation planning and investment in the United States and abroad. Policy issues explored include safety, environmental impact, sustainable communities, and economic development. Policy analysis and planning are studied in conjunction with each policy issue explored. Issues of concern to state, metropolitan, and local governments.

C R P 551. Introduction to Geographic Information Systems. 
(2-2) Cr. 3. F.S.SS.
Introduction to geographic information systems, including discussions of GIS hardware, software, data structures, data acquisition, data presentation, analytical techniques, and implementation procedures. Laboratory emphasizes practical applications and uses of GIS.

C R P 552. Geographic Data Management and Planning Analysis. 
(Dual-listed with C R P 452). (2-2) Cr. 3. S. Prereq: C R P 551
Extensive coverage of geo-relational database concept and design, GIS database creation and maintenance, geographic data manipulation and analysis. GIS output generation and geographic data presentation. Laboratory emphasizes practical applications and uses of GIS.

C R P 553. Analytical Planning/GIS. 
(2-2) Cr. 3. F. Prereq: C R P 451/C R P 551
Integration of exploratory, participatory and predictive spatial analyses and 3D visualization into the planning process. GIS tools and techniques are used to automate decision analysis and facilitate future planning in analyzing and visualizing planning actions. Laboratory emphasizes practical uses of GIS tools and techniques.

C R P 556. GIS Programming and Automation. 
(Dual-listed with C R P 456). (3-0) Cr. 3. F. Prereq: C R P 451/551 or NREM 345 or NREM 546 or GEOI 552
Introduction to automated geoprocessing in Geographic Information Systems. Focus on learning scripting language and object-oriented programming, automation of custom-designed geoprocessing scripts, and application toward student research and/or interests.

C R P 561. Planning Theory for Practice. 
(3-0) Cr. 3. S.
Use and development of theory/action relationship in planning practice. Competing normative theories of planning and their evolution, key components and fundamental critiques. Exploration of planning frameworks and approaches, including comprehensive planning; incrementalism; advocacy; communicative rationality; and others.
C R P 563. Planning the American Metropolis.  
(Cross-listed with DSN S). (3-0) Cr. 3. F.  
Focus on the historical role of planning in the shaping of American cities and regions, from the beginning of the Republic to the present. Examine the legacy of planning by exploring the intersection of design, politics and policy. Investigate the factors and the processes that produce the built environment.

C R P 564. Introduction to Analytical Methods for Planning.  
(3-0) Cr. 3. F.  
Applications of analytical methods in planning with emphasis on the collection, description, analysis, presentation, and interpretation of planning data. Introduction to descriptive statistics. Sources of planning information and data including primary and secondary data types and sources. Demographic analysis, population projection techniques for planning at local and regional levels.

C R P 566. Values and Decision Making.  
(Cross-listed with DSN S). (3-0) Cr. 3. F.  
Principles and methods for analyzing communities and regions as social, political, economic, and ecological systems. Exploration of relationships between individuals and institutions, the economy and governance. Examination of social values and their manifestation in decision making methods used in planning. Application of decision making tools for planning problems involving economic analysis, power relations, environmental impacts and social impacts. Project evaluation methods.

C R P 568. Planning and Development.  
(3-0) Cr. 3. S. Prereq: C R P 564 or equivalent  
Exploration and evaluation of the techniques, processes, and professional skills required to effectively manage land use change at various scales. Land classification systems, land supply and needs inventory for residential uses and commercial and employment centers; capacity and needs analysis for public infrastructure. Includes land use planning project(s) designed to apply the methods explored in this and other courses.

C R P 575. Grant Writing.  
(Dual-listed with C R P 475). (1-0) Cr. 1. F. Prereq: Graduate classification. A short introduction to effective grant writing for the public and non-profit sectors. Includes identifying appropriate funding sources for an organization, identifying goals and objectives, and budgeting.

C R P 581. Regional and State Planning.  
(Dual-listed with C R P 481). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: Graduate classification. Analysis of theories, policies, and functions at the metropolitan, regional, and state levels with emphasis on area-wide governance structures and strategies for guiding development.

C R P 584. Sustainable Communities.  
(Dual-listed with C R P 484). (Cross-listed with DSN S). (3-0) Cr. 3. S. Prereq: Junior classification. The history and theory of sustainable community planning. Procedural and substantive dimensions. Case studies of communities engaged in sustainability planning. Use and development of indicators.

C R P 590. Special Topics.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590A. Special Topics: Planning Law, Administration and Implementation.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590B. Special Topics: Economic Development.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590C. Special Topics: Urban Design.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590D. Special Topics: Housing and Urban Revitalization.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590H. Special Topics: Environmental Planning.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590I. Special Topics: Land Use and Transportation Planning.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590N. Special Topics: International Planning.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590O. Special Topics: Spatial Analytical Methods.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590P. Special Topics: Planning in Small Towns.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590Q. Special Topics: Diversity and Equity in Planning.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

C R P 590R. Special Topics: Geographic Information Systems.  
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification and written approval of instructor and department chair on required form

(Dual-listed with C R P 491). (Cross-listed with DSN S, L A). (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences. Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

C R P 592. Land Use and Development Regulation Law.  
(3-0) Cr. 3. F. Prereq: Graduate classification. An in-depth analysis of the legal constructs that shape the practice of planning and plan implementation in the United States. An exploration of how land use regulations are applied to reconcile the competing needs and diverse uses of land. The positive and negative consequences of developing and implementing regulatory controls will be addressed.

C R P 595. Seminar in GIS Applications/Research.  
(1-0) Cr. 1. F. S. Prereq: 9 credits in GIS Certificate program. Discussion and demonstration of current GIS applications and research in multiple disciplines. Offered on a satisfactory-fail basis only.

Cr. arr. Repeatable. Independent planning project with practical application, including research element.

Courses for graduate students:

C R P 698. Capstone Studio.  
(1-6) Cr. 4. S. Prereq: Permission of instructor. Synthesis and integration of core planning knowledge into professional work in a team setting.

C R P 699. Research.  
Cr. arr. Repeatable.

Design Studies
Interdepartmental Undergraduate Program

http://design.iastate.edu

The Design Studies programs bring together courses that deal with the integrated study of the conceptualization, production, visible form, uses, and history of artifacts, buildings, and environments as well as the common qualities and connections among the design, art and planning fields.

Core Design Program

Four Design Studies courses constitute the Core Design Program: Design Studio 1 (DsnS 102), Design Representation (DsnS 131), Design Cultures (DsnS 183) and Design Collaborative (Dsn S 115). Full or partial credit of the Core Design program is required for all undergraduate students in the College of Design.

Minor—Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, the built environment, media and technology, design in everyday life, and models of professional practice. The minor is open to all undergraduates at Iowa State University.
Minors—Design Studies
The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for multidisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

Minors—Digital Media
The undergraduate minor in Digital Media covers the knowledge and techniques for applying digital representations to generate designs and art. The body of knowledge specializes in the fields of design, art, and planning. This minor is open to all undergraduate students at Iowa State University. Additional information about minors is available in the Student Programs and Services Office, 297 College of Design.

Bachelor of Design
The Bachelor of Design is a 122.5 credit undergraduate degree program focused on the interdisciplinary nature of design and the power of the design studio as a place and method for generating ideas and solving problems. The core of the degree program is a series of forums and studios intended to connect history, theory and practice, and give students hands-on experience grappling with design challenges that vary in complexity and scale. The Bachelor of Design offers opportunities for students to engage design thinking in a collaborative environment focused on addressing contemporary real-world problems and opportunities. Thematic course modules taught by faculty in multiple design disciplines will incorporate methods that artists, designers, and planners use to creatively address contemporary issues such as sustainable living environments, energy efficiency, water and food systems, transportation networks, climate change, and social entrepreneurship. Graduate of this degree are not design professionals but the curriculum prepares students to work as part of a team in a variety of disciplinary settings from design professions to journalism, business, law, engineering, arts, and public service. To that end, the curriculum allows students to pursue double majors to couple design thinking with other discipline of interest. Upon completion, students may also choose to enter graduate programs in the design professions or other fields in which design thinking and critical analysis are valued.

Design Core Program
Design Core Program: 11.5 cr.

DSN S 102 Design Studio I (https://nextcatalog.registrar.iastate.edu/collegeofdesign/design/) 11.5

DSN S 115 (https://nextcatalog.registrar.iastate.edu/collegeofdesign/design/) Design Collaborative Seminar 0.5

or DSN S 110 Design Exchange Seminar I (https://nextcatalog.registrar.iastate.edu/collegeofdesign/design/) 11.0

DSN S 131 (https://nextcatalog.registrar.iastate.edu/collegeofdesign/design/) Design Representation 4

DSN S 183 (https://nextcatalog.registrar.iastate.edu/collegeofdesign/design/) Design Cultures 3

Total Credits 11.5

Courses primarily for undergraduates:

DSN S 102. Design Studio I. (1-6) Cr. 4.
A core design studio course exploring the interaction of two- and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Investigation of creative process, visual order and materials, and development of critical thinking through studio projects and lectures. Includes study of precedents, contemporary design practices and disciplines in their cultural contexts.

DSN S 110. Design Exchange Seminar I. (0-2) Cr. 1. F. Prereq: Member of Design Exchange Learning Community Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.

DSN S 111. Design Exchange Seminar II. (0-2) Cr. 1. S. Prereq: Member of the Design Exchange Learning Community Development and clarification of career and academic plans. Offered on a satisfactory-fail basis only.

DSN S 115. Design Collaborative Seminar. (1-0) Cr. 0.5. Prereq: Member of Design Collaborative Learning Community Orientation to the College of Design. Introduction to the design disciplines and studio pedagogy. Offered on a satisfactory-fail basis only.

DSN S 131. Design Representation. (1-6) Cr. 4.
An introduction to drawing through lecture and studio experiences. Focus on creative problem solving and communication in order to give visual form to ideas. Emphasis on perceptual, conceptual, and evaluative abilities through experiences that build eye, brain, and hand coordination. Explorations include drawing from observation and memory, working at various scales and duration, and using a variety of media and processes.

DSN S 181. Origins and Evolution of Modern Design. (Cross-listed with ART H). (3-0) Cr. 3. F.S.
History of designed artifacts, their creators, and their cultural environments in Western Europe and America from the beginning of the Industrial Revolution to the present.

DSN S 183. Design Cultures. (3-0) Cr. 3.
A broad-based exploration of the dynamic relationship between design and culture, employing case study method to investigate particular examples of cultural production in contemporary society. Design processes and design works are presented as culturally, economically, environmentally, historically, ideologically, politically, and socially grounded events and artifacts.

DSN S 221. History of Architecture I. (Cross-listed with ARCH). (3-0) Cr. 3. F.
Survey of western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. Ancient through 1750. Meets International Perspectives Requirement.

DSN S 222. History of Architecture II. (Cross-listed with ARCH). (3-0) Cr. 3. S.
Survey of western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. 1750 to present. Meets International Perspectives Requirement.

DSN S 232. Digital Design Communications. (3-0) Cr. 3.
Introductory investigations of various digital design media to develop multidimensional problem solving, digital communication skills and perceptual sensitivity. Open to all university majors.

DSN S 274. The Social and Behavioral Landscape. (Cross-listed with L A). (3-0) Cr. 3. S.
Exploration of social and behavioral factors pertinent to design of the domestic, civic, and commercial landscape. Focus on working familiarity with design principles as they relate to the behavior and activities of people across a broad demographic and cultural spectrum; application of these principles to design of outdoor environments. Lectures and discussions, including group exercises and field trips. Meets U.S. Diversity Requirement

DSN S 280. History of Art I. (Cross-listed with ART H). (3-0) Cr. 3. F.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. Meets International Perspectives Requirement.

DSN S 280H. History of Art I: Honors. (Cross-listed with ART H). (3-0) Cr. 4. F.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from prehistoric through Gothic. Meets International Perspectives Requirement.

DSN S 281. History of Art II. (Cross-listed with ART H). (3-0) Cr. 3. S.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. Meets International Perspectives Requirement.
DSN S 281H. History of Art II: Honors.
(Cross-listed with ART H). (3-0) Cr. 3. S.
Development of the visual arts of western civilization including painting, sculpture, architecture, and crafts; from the Renaissance to the twentieth century. Meets International Perspectives Requirement.

DSN S 291. World Cities and Globalization.
(Cross-listed with C R P). (3-0) Cr. 3. F.
World cities and globalization in developed and developing countries. Topics include globalization, world cities and regions, uneven economic development, the international division of labor, multinational corporations, international environmentalism, tourism, popular culture and place-based identity. Meets International Perspectives Requirement.

DSN S 292. Introduction to Visual Culture Studies.
(Cross-listed with ART H). (3-0) Cr. 3. F.S.
An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields. Meets U.S. Diversity Requirement.

DSN S 293. Environmental Planning.
(Cross-listed with C R P, ENV S). (3-0) Cr. 3. F.
Comprehensive overview of the field of environmental relationships and the efforts being made to organize, control, and coordinate environmental, aesthetic, and cultural characteristics of land, air, and water.

DSN S 301. Study Abroad Preparation Seminar.
(1-0) Cr. 1. Repeatable.
Cultural introduction to host country, introduction to faculty sponsor and program of study, the particulars of traveling and living abroad, and financial and logistical preparations. Guest lectures. Required of all students planning to participate in a College of Design study abroad program for 9 or more credits. Offered on a satisfactory-fail basis only.

(1-2) Cr. 2. Repeatable, maximum of 4 credits. Prereq: Selection as a peer mentor for the Core Design program. For students serving as peer mentors for the Core Design Program, under faculty supervision. Development of teaching and leadership skills within the context of design education experiences. Offered on a satisfactory-fail basis only.

DSN S 303. Design Ambassadors.
(1-2) Cr. 1-2. Repeatable, maximum of 4 credits. Prereq: Admittance into one of the professional programs in the College of Design. Opportunity to strengthen leadership, communication and presentation skills. Introduction to student development theory. Students participate in collaborative projects focused on prospective design students. Offered on a satisfactory-fail basis only.

DSN S 310. Practical Experience.
Cr. R. Prereq: Permission of adviser or Coordinator of Design Studies. Independent educational enrichment through practical experience. Students must register for this course prior to commencing each term. Available only to students taking course loads of eleven credits or less.

DSN S 320. Urban Form.
(Cross-listed with C R P). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: C R P 253 or C R P 270, or permission of instructor. Examines how urban form is shaped, what constitutes good urban form, and what are the trends in emerging urban forms. Descriptive, explanatory and normative theories of urban form, and the relationships between urban form and social, economic, political, cultural, and institutional forms.

DSN S 321. History of the American City.
(Cross-listed with ARCH). (3-0) Cr. 3. Prereq: Sophomore classification. Study of the development of the built environment and urban condition in the United States from the colonial period to today. Through the theme of infrastructure, primary attention is given to urban spatial organization, built form, technological change, regulatory and funding patterns, and social categories such as class, race, and gender. Meets U.S. Diversity Requirement.

DSN S 351. Whole Building Energy Performance Modeling.
(Cross-listed with ARCH). (3-0) Cr. 3. S. Prereq: ARCH 202, 245, 341. Open to non-majors by permission of instructor. Architectural design, design evaluation and technical analysis using energy performance modeling tools. Emphasis will be given to whole building energy efficiency including passive and active systems integration.

DSN S 371. History of Modern Landscapes, 1750 to Present.
(Cross-listed with L A). (3-0) Cr. 3. S.
Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers. Meets International Perspectives Requirement.

DSN S 373. Gardens and Landscapes from Antiquity to 1750.
(Cross-listed with L A). (3-0) Cr. 3. F.
Investigation of international landscape design concepts and trends as observed over time, from pre-history to the mid 18th century. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers. Meets International Perspectives Requirement.

(Cross-listed with ART H). (3-0) Cr. 3.
Introduction to the history of art and architecture in Asia. Cultures may include China, Korea, Japan, and India before the modern era. Visual materials selected based on important themes that are critical in understanding Asian culture and art tradition. Meets International Perspectives Requirement.

DSN S 383. Greek and Roman Art.
(Dual-listed with DSN S 583). (Cross-listed with ART H, CL ST). (3-0) Cr. 3. Prereq: ART H 583: Graduate classification or permission of instructor. Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West. Meets International Perspectives Requirement.

DSN S 383H. Greek and Roman Art: Honors.
(Cross-listed with ART H, CL ST). (3-0) Cr. 3-4. Greek art from Neolithic to Hellenistic periods. Roman art from the traditional founding to the end of the empire in the West.

DSN S 385. Renaissance Art.
(Dual-listed with DSN S 585). (Cross-listed with ART H). (3-0) Cr. 3. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

DSN S 385H. Renaissance Art, Honors.
(Cross-listed with ART H). (3-0) Cr. 3. European art including painting, sculpture, architecture, and crafts; thirteenth through sixteenth centuries.

DSN S 386. American Art to 1945.
(Cross-listed with ART H). (3-0) Cr. 3. Survey of American art from the early colonial period to 1945, with emphasis on historical and cultural issues that underlie art production in the United States.

DSN S 388. Modern Art and Theory.
(Cross-listed with ART H). (3-0) Cr. 3. Visual arts and critical theory of the early 20th century, including Expressionism, Cubism, Futurism, Suprematism, Dada, and Surrealism.

DSN S 396. History of Photography.
(Cross-listed with ART H). (3-0) Cr. 3. Survey of the evolution of photography and photojournalism from the 1830s to the present, seen from an art historical perspective, emphasizing causative factors, cultural influences, and major masters and schools.

DSN S 397. Internship Search Seminar.
(1-0) Cr. 1. F. Prereq: Sophomore classification or above in one of the College of Design degree programs. A structured environment to set realistic learning goals, research potential sites, develop a strategy, develop essential job search materials and skills for finding an internship. Successfully obtaining an internship either for credit or non credit is encouraged but not required. Offered on a satisfactory-fail basis only.
Advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are encouraged.

Advanced forum for the demonstration of sophistication in landscape architectural design. Experimentation and innovation are encouraged.

DSN S 417. Urban Revitalization. (Dual-listed with DSN S 517). (Cross-listed with C R P). (3-0) Cr. 3. S.
Planning methods available to further revitalization and preservation efforts, with particular attention to housing and neighborhoods. Relationship between neighborhood change and urban development process; public policy implications.

DSN S 425. Growth Management. (Dual-listed with DSN S 525). (Cross-listed with C R P). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: Junior classification
Review of techniques used to manage growth-related change and to implement plans. Capital investment strategies; public land acquisition and protection; development impact analysis; impact mitigation, including impact fees; phased growth systems; urban, suburban and rural relationships; and land preservation.

DSN S 426. Topics in Native American Architecture. (Cross-listed with AM IN, ARCH). (3-0) Cr. 3. Repeatable, maximum of 6 credits. Prereq: Junior classification
History, theory, and principles of Native American/American Indian architecture, landscape architecture and planning considering relationships to the culture, visual arts, site, and surroundings. Credit counts toward fulfillment of Studies in Architecture and Culture. A maximum of 6 credits of ARCH 426 may be applied to degree program. Meets U.S. Diversity Requirement

DSN S 429. Planning in Developing Countries. (Dual-listed with DSN S 529). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Junior classification
Introduction to issues in planning and governance in developing countries. Problems and strategies may include population movement and change, economic globalization, rural development, urban growth, sustainable development, and housing.

DSN S 442. Site Development. (Dual-listed with DSN S 542). (Cross-listed with C R P). (3-0) Cr. 3. S.
Introduction to site development including site review. Studio project integrating concept, finance, selection, analysis, and design.

DSN S 445. Public Art/Public Space. (3-0) Cr. 3. Prereq: Junior Standing, DSN S 102, DSN S 131, DSN S 183
Exploration of the history, precedents, and practice of public art and public space with a focus on developments since 1970 in the United States and abroad. Course includes development of a proposal for a site specific work of art. Meets U.S. Diversity Requirement

DSN S 446. Interdisciplinary Design Studio. (0-12) Cr. 4-6. Repeatable, maximum of 18 credits. Prereq: Junior classification in a curriculum in the College of Design and permission of instructor
Advanced interdisciplinary design projects.

DSN S 446H. Interdisciplinary Design Studio: Honors. (0-12) Cr. 5-7. Repeatable, maximum of 18 credits. Prereq: Junior classification in a curriculum in the College of Design and permission of instructor
Advanced interdisciplinary design projects.

DSN S 478. Topical Studies in Landscape Architecture. (Dual-listed with DSN S 578N). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478A. Topical Studies in Landscape Architecture: Landscape Design. (Dual-listed with DSN S 578A). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478B. Topical Studies in Landscape Architecture: Planting Design. (Dual-listed with DSN S 578B). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478C. Topical Studies in Landscape Architecture: Construction. (Dual-listed with DSN S 578C). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478D. Topical Studies in Landscape Architecture: History/Theory/Criticism. (Dual-listed with DSN S 578D). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478E. Topical Studies in Landscape Architecture: Landscape Planning. (Dual-listed with DSN S 578E). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478G. Topical Studies in Landscape Architecture: Graphics. (Dual-listed with DSN S 578G). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478H. Topical Studies in Landscape Architecture: Honors. (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478I. Topical Studies in Landscape Architecture: Interdisciplinary Studies. (Dual-listed with DSN S 578I). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 202 or senior or graduate classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478K. Topical Studies in Landscape Architecture: Computer Applications. (Dual-listed with DSN S 578K). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 371 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 478L. Topical Studies in Landscape Architecture: Ecological Design. (Dual-listed with DSN S 578L). (Cross-listed with L A). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 371 or senior classification or graduate standing
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.
DSN S 529E. Studies in Architecture: Practice.
(Cross-listed with ARCH). (3-0) Cr. 2-3. Repeatable, maximum of 6 times. Prereq: ARCH 221, ARCH 222 or senior classification or graduate standing

DSN S 529. International Planning.
(Dual-listed with DSN S 429). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Graduate classification
Introduction to issues in planning and governance in an international setting. Problems and strategies may include population movement and change, economic globalization, urban growth, rural development, and housing.

DSN S 532. Community Planning Studio.
(Cross-listed with C R P). (1-4) Cr. 3. F. Prereq: C R P 564 or equivalent
Comprehension and analysis of various geographic contexts pertinent to community planning and the use of planning theory, tools and techniques in an applied setting. Process of making a community plan: historical patterns, current conditions and strategies for planning.

DSN S 542. Site Development.
(Dual-listed with DSN S 442). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq: Graduate classification
Introduction to site development, including site review. Studio project integrating concept, finance, selection, analysis, and design.

DSN S 546. Interdisciplinary Design Studio.
(0-12) Cr. 4-6. Repeatable, maximum of 18 credits. Prereq: Graduate or senior standing in the College of Design and permission of instructor
Advanced interdisciplinary design projects.

DSN S 558. Sustainability and Green Architecture.
(Cross-listed with ARCH). (3-0) Cr. 3. F. Prereq: Graduate classification
Issues of Sustainability as related to living patterns and city design, population pollution and use and availability of natural resources for the built environment; issues of Green Architecture as it relates to building material selection, systems of building materials, the environment of the United States and the World, architects and examples of buildings with green or sustainable designations.

DSN S 563. Planning the American Metropolis.
(Cross-listed with C R P). (3-0) Cr. 3. F.
Focus on the historical role of planning in the shaping of American cities and regions, from the beginning of the Republic to the present. Examine the legacy of planning by exploring the intersection of design, politics and policy. Investigate the factors and the processes that produce the built environment.

DSN S 566. Values and Decision Making.
(Cross-listed with C R P). (3-0) Cr. 3. F.
Principles and methods for analyzing communities and regions as social political, economic, and ecological systems. Exploration of relationships between individuals and institutions, the economy and governance. Examination of social values and their manifestation in decision making tools used in planning. Application of decision making tools for planning problems involving economic analysis, power relations, environmental impacts and social impacts. Project evaluation methods.

DSN S 567. Preservation, Restoration, and Rehabilitation.
(Cross-listed with ARCH). (3-0) Cr. 3. S. Prereq: Senior classification
Construction standards and procedures for preserving, restoring, reconstructing, and rehabilitating existing buildings following the guidelines of the National Park Service and the National Trust for Historic Preservation. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

DSN S 571. Design for All People.
(Cross-listed with ARCH, GERON). (3-0) Cr. 3. S. Prereq: Graduate or Senior classification
Principles and procedures of universal design in response to the varying ability level of users. Assessment and analysis of existing buildings and sites with respect to standards and details of accessibility for all people, including visually impaired, mentally impaired, and mobility restricted users. Design is neither a prerequisite nor a required part of the course. Enrollment open to students majoring in related disciplines. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.
Meets U.S. Diversity Requirement

DSN S 575. Contemporary Urban Design Theory.
(Cross-listed with ARCH). (3-0) Cr. 3. S. Prereq: Graduate or Senior classification
Current urban design theory and its application to urban problems. Credit counts toward fulfillment of Studies in Architecture and Culture requirements.

DSN S 578. Topical Studies in Landscape Architecture.
Offerings vary with each term; check with department for available sections.

DSN S 578A. Landscape Architecture: Landscape Design.
(Cross-listed with L A). Cr. 2-3. Repeatable.
F.S.SS. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578B. Topical Studies in Landscape Architecture.
F.S.SS. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578C. Landscape Architecture: Construction.
F.S.SS. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578D. Landscape Architecture: History/Theory/Criticism.
F.S.SS. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578E. Landscape Architecture: Landscape Planning.
F.S.SS. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578F. Landscape Architecture: Urban Design.
F.S.SS. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578G. Landscape Architecture: Graphics.
F.S.SS. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578H. Landscape Architecture: Interdisciplinary Studies.
F.S.SS. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

F.S.SS. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578K. Landscape Architecture: Computer Applications.
F.S.SS. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578L. Landscape Architecture: Ecological Design.
F.S.SS. Prereq: Senior classification or graduate standing
Offerings vary with each term; check with department for available sections.
Course contact hours can range from (2-0) to (3-0) depending on number of credits.
DSN S 578M. Landscape Architecture: Social/Behavioral.  
(Dual-listed with DSN S 478M). (Cross-listed with L A). Cr. 2-3. Repeatable.  
F.S.S.S. Prereq: Senior classification or graduate standing  
Offerings vary with each term; check with department for available sections.  
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 578N. Landscape Architecture: Natural Resources.  
F.S.S.S. Prereq: Senior classification or graduate standing  
Offerings vary with each term; check with department for available sections.  
Course contact hours can range from (2-0) to (3-0) depending on number of credits.

DSN S 581. Art and Architecture of India.  
(Dual-listed with DSN S 481). (Cross-listed with ART H). (3-0) Cr. 3. Prereq:  
Graduate classification or permission of instructor  
Survey of Indian-style art and architecture through history. Examine how art and  
architecture developed in the Indian world has come to define the Indian identity  
religiously, culturally, socially, and politically.  
Meets International Perspectives Requirement.

DSN S 583. Greek and Roman Art.  
(Dual-listed with DSN S 383). (Cross-listed with ART H, CL ST). (3-0) Cr. 3. Prereq:  
Graduate classification and permission of instructor  
Greek art from Neolithic and Hellenistic periods. Roman art from the traditional  
founding to the end of the empire in the West.

DSN S 584. Sustainable Communities.  
(Dual-listed with DSN S 484). (Cross-listed with C R P). (3-0) Cr. 3. S. Prereq:  
Graduate classification  
The history and theory of sustainable community planning. Procedural and  
substantive dimensions. Case studies of communities engaged in sustainability  
planning. Use and development of indicators.

DSN S 585. Renaissance Art.  
(Dual-listed with DSN S 385). (Cross-listed with ART H). (3-0) Cr. 3. Prereq:  
Graduate classification and permission of instructor  
European art including painting, sculpture, architecture, and crafts; thirteenth  
through sixteenth centuries.

(Dual-listed with DSN S 487). (Cross-listed with ART H). (3-0) Cr. 3. Prereq:  
Graduate classification or permission of instructor  
European and American art and architecture from 1780 to 1900, focusing on the  
major movements of western Europe including: Neo-Classicism, Romanticism,  
Realism, Impressionism, and Post-Impressionism.

DSN S 589. History of Comics.  
(Dual-listed with DSN S 489). (Cross-listed with ART H). (3-0) Cr. 3. Prereq:  
Graduate classification and permission of instructor  
An art history survey of comic strips, comic books, and graphic novels from their  
origins in the 19th century to the present.

DSN S 590. Special Topics.  
Cr. 1-4. Repeatable, maximum of 12 credits. F.S.S.S. Prereq: Written approval of  
instructor and department chair on required form prior to semester of enrollment  
Independent investigation of a topic of special interest to the student.

(Dual-listed with DSN S 491). (Cross-listed with C R P, L A). (3-0) Cr. 3. S. Prereq:  
Graduate classification  
Environmental law and policy as applied in planning at the local and state  
levels, Brownfields, environmental justice, water quality, air quality, wetland  
and floodplain management, and local government involvement in ecological  
protection through land use planning and other programs.

DSN S 594. Women/Gender in Art.  
(Dual-listed with DSN S 494). (Cross-listed with ART H, W S). (3-0) Cr. 3. Prereq:  
Graduate classification or permission of instructor  
Issues of gender related to cultural environments from the Middle Ages to  
contemporary times in Europe and America. Feminist movement beginning in the  
1970s and specifically gender issues in art that are becoming widespread in the  
artistic culture.  
Meets U.S. Diversity Requirement

DSN S 595. Art and Theory Since 1945.  
(Cross-listed with ART H). (3-0) Cr. 3. Prereq: Graduate classification or  
permission of instructor  
Visual arts and critical theory from Abstract Expressionism to the present.  
Meets U.S. Diversity Requirement

DSN S 598. Selected Topics in Art History.  
(Dual-listed with DSN S 498). (Cross-listed with ART H). (3-0) Cr. 3. Repeatable,  
maximum of 9 credits. Prereq: Graduate classification or permission of instructor  
Specialized study in the history or criticism of art and/or design.

Graphic Design  
http://www.design.iastate.edu/graphicdesign/index.php

Undergraduate Study  
The department offers the degree Bachelor of Fine Arts (B.F.A.) in Graphic  
design.

B.F.A. Graphic Design. Emphasis is on creative problem solving, design  
process, visual organization and communication media, and interaction design.  
Graphic design graduates effectively integrate abstract thinking skills such as  
communication design theory, history, methodology; and technology. Components  
of visual communication including typography, symbology, time-based media,  
information design, branding, image creation, and other communication systems  
are integrated with an understanding of professional practice.

Graduate Study  
The department offers the degrees of Master of Fine Arts (M.F.A.) in Graphic  
Design, Master of Arts (M.A.) in Graphic Design, and Master of Arts (M.A.) in  
Graphic Design with a specialization in environmental graphic design.

M.F.A. graduates in Graphic Design are skilled in communication design,  
problem solving, and are adept in the use of visual language, symbology, and  
interaction. Graduates are proficient in the design of communications and the use  
of technologies that incorporate human interaction with environments, objects, and  
electronic and traditional publications. The M.F.A. is recognized as the terminal  
degree in the graphic design field. The degree requires completion of a written  
thesis integrating theory, research, and design problem solving.

The M.A. in Art and Design with a specialization in graphic design requires  
a minimum of 34 credits including a seminar course in art and design, a studio  
concentration, a history course, a business practice course, courses outside  
of graphic design, and the completion of a capstone course in graphic design.  
Graduate students selecting the M.A. in graphic design will focus on a first  
professional degree. Applicants without a degree in graphic design may be  
required to complete up to 17 additional credits of coursework.

The M.A. in Art and Design with a specialization in environmental graphic  
design requires a minimum of 34 credits including a seminar course in art and  
design, a studio concentration, a history course, courses in design methods,  
and the completion of a capstone course in environmental graphic design.  
Graduate students selecting the M.A. in environmental graphic design will focus  
on a first professional degree. Applicants without a degree in background in  
environmental graphic design may be required to complete up to 15 additional  
credits of coursework.

Credit earned at Iowa State University or other institution for the Master of Arts  
degree may be applied toward the Master of Fine Arts degree at the discretion of  
the program of study committee.

Applicants to the graduate program should have an undergraduate major in an  
art or design area and demonstrate the ability to do technically competent and  
original work through the presentation of a slide or digital portfolio for faculty  
review. Past academic performance and the quality of studio work are critical  
in the admission process. A minimum 3.0 GPA in the student’s undergraduate  
major is the standard for full admission to the graduate program. Admission is also  
determined by studio space available within the program area, which changes  
yearly due to graduate students’ progress in their programs of study.

Graduate students who have not completed an undergraduate program of study  
substantially equivalent to that required of undergraduates in the department can  
expect that additional supporting coursework, determined by the graduate faculty,  
will be required.

Prospective students are advised to contact the graduate coordinator with specific  
questions about admission procedures and portfolio review. Application and  
additional program information may be obtained from the Department of Graphic  
Design, College of Design, Iowa State University, Ames, IA 50011-3092.

Curriculum in Graphic Design  
The Curriculum in Graphic Design leads to a 123.5 credit undergraduate Bachelor  
of Fine Arts in Graphic Design including the 30 credit core Design Program.  
Admission into the professional program depends upon available resources and  
is subject to the approval of a faculty committee at the completion of the Core
Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 34 graduate credit program is offered leading to the Master of Arts specialized in Environmental Graphic Design for students planning to undertake professional degree. (NOTE: Applicants without a degree in background in environmental graphic design may be required to complete up to 15 additional credits of coursework).

A 30 graduate credit program is offered leading to the Master of Arts specialized in Graphic Design for students planning to undertake professional degree. (NOTE: Applicants without a degree in background in graphic design may be required to complete up to 18 additional credits of coursework).

A 60 graduate credit post-professional graduate program is also offered leading to the degree Master of Fine Arts. For more complete graduate program descriptions see Graduate Study under Graphic Design in the Courses and Programs section.

Total Degree Requirement: 123.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 10 cr.

Total Credits: 52

Iowa State University – 2014-2015
ARTGR 372. Graphic Design Materials and Processes.
(3-0) Cr. 3. S. Prereq: Credit or concurrent enrollment in ARTGR 371
Lecture about the processes and materials involved in graphic design arts reproduction. Course covers pre-press, paper selection and specification, ink systems, type systems and fonts, output technology, printing presses and bindery operations.

(1-0) Cr. 1. S. Prereq: Credit or concurrent enrollment in ARTGR 370 or ARTGR 371
Procedural and ethical concerns related to the graphic design internship. Personal goals, preparation of resume and plans for internship. Study and tours of areas of interest within the graphic design profession.

ARTGR 378. Critical Issues in Graphic Design.
(2-0) Cr. 2. F.S. Prereq: Credit or concurrent enrollment in ARTGR 370
Lecture, discussion and writing about the critical issues facing the communications field today and in the future.

ARTGR 387. Graphic Design History/Theory/ Criticism I.
(Dual-listed with ARTGR 587). (3-0) Cr. 3. F. Prereq: ART H 280, ART H 281 and DSN S 183
Late nineteenth century to the 1990s. This course will explore the cultural, social, political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics.

ARTGR 388. Graphic Design History/Theory/ Criticism II.
(Dual-listed with ARTGR 588). (3-0) Cr. 3. S. Prereq: ARTGR 387 or ART H 281 and DSN S 183
Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice. Meets U.S. Diversity Requirement

ARTGR 391. Graphic Design Field Study.
(0-1) Cr. 1. Repeatable, maximum of 2 credits. F.S.S.S. Prereq: Concurrent enrollment in 300 or 400 level graphic design studio course
Travel, study, and tours of areas of interest within the graphic design profession such as print production companies, design studios, and museums. Offered on a satisfactory-fail basis only.

ARTGR 470. Graphic Design Studio V.
(0-6) Cr. 3. F. Prereq: ARTGR 371
Advanced design systems as applied to corporate identity and environmental graphic design. Symbolology as an integrated component of communication systems.

ARTGR 471. Graphic Design Capstone.
(0-10) Cr. 5. S. Prereq: ARTGR 470 or permission of instructor
Experience design and innovation in a multi-disciplinary design studio. Class will use unique research, design, evaluation, creativity, and innovation methodologies to solve human problems on special topics. Designed solutions will be in the form of products, artifacts, interfaces, information, and human environments.

ARTGR 472. Photography and Narrative Message.
(Dual-listed with ARTGR 572). (0-6) Cr. 3. F.S. Prereq: Enrollment in ARTGR 370, ARTGR 371, ARTGR 470, or ARTGR 471
Photography as a tool for creating conceptually-driven images and metaphors. Emphasis is on photography as an evocative storytelling device for a range of audiences and design applications. Compositional and technical aspects are explored to ensure successful interpretation of the photograph’s intended message.

ARTGR 473. Multimedia Design.
(Dual-listed with ARTGR 573). (0-6) Cr. 3. F.S. Prereq: Graduate enrollment in College of Design
The design of visual, aural and textual communication for electronic media.

ARTGR 474. Exhibition Design.
(Dual-listed with ARTGR 574). (0-6) Cr. 3. F.S. Prereq: Graduate enrollment in College of Design
Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ARTGR 475. Advanced Typography.
(Dual-listed with ARTGR 575). (0-6) Cr. 3. F.S. Prereq: Graduate classification in College of Design
Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ARTGR 476. Graphic Design Methodology.
(Dual-listed with ARTGR 576). (0-6) Cr. 3. F.S. Prereq: Graduate enrollment in College of Design
Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ARTGR 477. Graphic Design Practicum.
(0-6) Cr. 3. S. Prereq: Concurrent enrollment in ARTGR 370, ARTGR 371, ARTGR 470, or ARTGR 482; portfolio review and permission of instructor
Graphic design outreach and problem solving. Individual and group projects for non-profit clients selected by the instructor.

ARTGR 478. Design for E-Commerce/Graphic Applications.
(Dual-listed with ARTGR 578). (0-6) Cr. 3. F.S. Prereq: Graduate enrollment in College of Design
The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ARTGR 479. Wayfinding Design.
(Dual-listed with ARTGR 579). (0-6) Cr. 3. S. Prereq: Graduate enrollment in College of Design
Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ARTGR 480. Graphic Design Internship.
(3-0) Cr. 3. SS. Prereq: ARTGR 377. 12 credits in graphic design; permission of instructor, registration in advance of enrollment
Graphic design experience in an off-campus professional environment.

ARTGR 481. Graphic Design Professional Practices.
(3-0) Cr. 3. S. Prereq: Credit or concurrent enrollment in ARTGR 470
Professional design management: ethics, setting up a new business, client/designer relationships, contractual options, billing practices, and effective operating procedures.

ARTGR 482. Professional Presentation.
(0-6) Cr. 3. S. Prereq: ARTGR 470 and concurrent enrollment in ARTGR 471
Exploration and development of the graphic design portfolio and resume in electronic, print, and photographic form.

ARTGR 484. Selected Studies in Graphic Design.
(Dual-listed with ARTGR 584). Cr. 1-3. Repeatable, maximum of 9 credits. F.S.S.S. Prereq: Graduate classification in the College of Design
Special issues related to graphic design. Topics vary each time offered.

ARTGR 490. Independent Study.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490A. Independent Study: Theory, Criticism, and Methodology.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490B. Independent Study: Two-Dimensional Design.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490C. Independent Study: Three-Dimensional Design.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490H. Independent Study: Honors.
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTGR 490I. Internship/Cooperative (in-depth experience other than ArtGr 480).
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment
Student must have completed related graphic design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.
ARTGR 491. Publication Design: Magazines.  
(Dual-listed with ARTGR 591). (0-6) Cr. 3. F. Prereq: Credit or concurrent enrollment in ARTGR 370  
The philosophy, concepts and structures of magazine design.

(Dual-listed with ARTGR 592). (0-6) Cr. 3. S. Prereq: Credit or concurrent enrollment in ARTGR 370 or ARTGR 371  
The philosophy, concepts and structures of book design.

ARTGR 493. Workshop.  
Cr. 1-3. Repeatable. Prereq: Evidence of satisfactory experience in area of specialization  
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ARTGR 494. Graphic Design in Europe Seminar.  
(1-0) Cr. 1. Prereq: Permission of instructor and planned enrollment in ARTGR 495  
Cultural and historical aspects of art and design in Western Europe in preparation for study abroad. Area of study varies each time offered. Offered on a satisfactory-fail basis only.

ARTGR 495. Graphic Design in Europe.  
(Dual-listed with ARTGR 595). Cr. 3. F.S.SS. Prereq: ARTGR 494, permission of instructor  
International study abroad program in western Europe. Visits to design studios, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered.

ARTGR 496. Graphic Design Field Study.  
Cr. R. Repeatable. Prereq: Concurrent enrollment in a graphic design studio and permission of instructor.  
Study and tours of museums, galleries, artist and/or designer studios and other areas of interest within art and design. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

(0-6) Cr. 3. F. Prereq: Graduate classification in College of Design  
Theory and investigation of systems, structures, principles of visual organization, and typography for communication. Studio problems will be influenced by social, cultural, environmental, or technological factors.

ARTGR 571. Signs, Symbols, Images.  
(0-6) Cr. 3. S. Prereq: Graduate Classification in College of Design  
Investigation and application of signs, symbols and semiotic theory for communication. Studio problems influenced by social, cultural, environmental, or technological factors.

ARTGR 572. Photography and Narrative Message.  
(Dual-listed with ARTGR 472). (0-6) Cr. 3. F.S. Prereq: Enrollment in ARTGR 370, ARTGR 371, ARTGR 470, or ARTGR 471  
Photography as a tool for creating conceptually-driven images and metaphors. Emphasis is on photography as an evocative storytelling device for a range of audiences and design applications. Compositional and technical aspects are explored to ensure successful interpretation of the photograph’s intended message.

ARTGR 573. Multimedia Design.  
(Dual-listed with ARTGR 473). (0-6) Cr. 3. F.S. Prereq: Graduate enrollment in College of Design  
The design of visual, aural and textual communication for electronic media.

ARTGR 574. Exhibition Design.  
(Dual-listed with ARTGR 474). (0-6) Cr. 3. F.S. Prereq: Graduate enrollment in College of Design  
Visual communication applied to exhibition design focusing on educational or interactive museum exhibitions, trade show booth design, and modular unit design for traveling exhibitions. Translation of graphic information to a three-dimensional space.

ARTGR 575. Advanced Typography.  
(Dual-listed with ARTGR 475). (0-6) Cr. 3. F.S. Prereq: Graduate classification in College of Design  
Typographic theory exploring traditional and non-traditional forms, both historical and contemporary typographic achievements.

ARTGR 576. Graphic Design Methodology.  
(Dual-listed with ARTGR 476). (0-6) Cr. 3. F.S. Prereq: Graduate enrollment in College of Design  
Analysis and application of scientific, systematic, and non-traditional problem-solving and problem-seeking techniques.

ARTGR 578. Design for E-Commerce/Graphic Applications.  
(Dual-listed with ARTGR 478). (0-6) Cr. 3. F.S. Prereq: Graduate enrollment in College of Design  
The development of advanced and experimental web design for the applications of e-commerce, education and the communication of visual information.

ARTGR 579. Wayfinding Design.  
(Dual-listed with ARTGR 479). (0-6) Cr. 3. F.S. Prereq: Graduate enrollment in College of Design  
Study of the navigational challenges of built environments and outdoor spaces, including site analysis, development of navigational plans, and design of wayfinding sign systems. Issues of function, accessibility, legibility, and fabrication are considered.

ARTGR 580. Selected Studies in Graphic Design.  
(Dual-listed with ARTGR 480). Cr. 1-3. Repeatable, maximum of 9 credits. F.S.SS. Prereq: Graduate classification in the College of Design  
Special issues related to graphic design. Topics vary each time offered.

ARTGR 587. Graphic Design History/Theory/ Criticism I.  
(Dual-listed with ARTGR 387). (3-0) Cr. 3. F. Prereq: Graduate classification  
Late nineteenth century to the 1990’s, this course will explore the cultural social, political, industrial, and technological forces that have influenced the practice of graphic design in Britain, Europe, and the United States. Students will study the historical issues and problems facing designers, their clients, and their publics.

ARTGR 588. Graphic Design History/Theory/ Criticism II.  
(Dual-listed with ARTGR 388). (3-0) Cr. 3. S. Prereq: Graduate classification  
Critical issues that affect the contemporary practice of graphic design as it relates to the United States. Students will study a variety of issues that include, but are not exclusive to, new media, gender, class, design and the public sphere, design as social action, postmodern design theory, sustainability, and ethical practice.

ARTGR 589. Design and Ethics.  
(Cross-listed with HCI). (3-0) Cr. 3. F.S. Prereq: Graduate classification or permission of instructor  
Issues in ethics and decision-making as they relate to technology, design, design research, HCI, and the design industry.

ARTGR 590. Special Topics.  
Cr. arr. Prereq: Bachelor's degree in graphic design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTGR 590A. Special Topics: Theory, Criticism, and Methodology.  
Cr. arr. Prereq: Bachelor's degree in graphic design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTGR 590B. Special Topics: Two-Dimensional Design.  
Cr. arr. Prereq: Bachelor's degree in graphic design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTGR 590C. Special Topics: Three-Dimensional Design.  
Cr. arr. Prereq: Bachelor's degree in graphic design, or evidence of satisfactory equivalency in specialized area  
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTGR 591. Publication Design: Magazines.  
(Dual-listed with ARTGR 491). (0-6) Cr. 3. F. Prereq: Graduate enrollment in College of Design  
The philosophy, concepts and structures of magazine design.

(Dual-listed with ARTGR 492). (0-6) Cr. 3. S. Prereq: Graduate enrollment in College of Design  
The philosophy, concepts and structures of book design.

ARTGR 593. Workshop.  
Cr. 1-3. Repeatable. Prereq: Graduate classification; evidence of satisfactory experience in area of specialization  
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ARTGR 595. Graphic Design in Europe.  
(Dual-listed with ARTGR 495). Cr. 3. F.S.SS. Prereq: ARTGR 494, permission of instructor  
International study abroad program in western Europe. Visits to design studies, art museums, and educational facilities. Related activities depending on specific area of study which may vary each time offered.
ARTGR 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students:

ARTGR 611. Teaching in Higher Education and Design Practice. (3-0) Cr. 3. Preq: Graduate classification
Introduction to teaching methods, curriculum design, project development, and business strategies for Design Education and Professional Practice.

ARTGR 672. Graphic Design and Human Interaction. (0-6) Cr. 3. F.S. Preq: ARTGR 570, ARTGR 571, and graduate enrollment in College of Design or permission of instructor
The theory and investigation of experience design as it applies to human interactions in contemporary society and culture. Studio problems may involve such areas as: exhibition design, electronic interface design, wayfinding, package design, and publication design.

ARTGR 672A. Usability. (0-6) Cr. 3. F.S. Preq: ARTGR 570, ARTGR 571, and graduate enrollment in College of Design or permission of instructor
The exploration and design of educational experiences and artifacts as they relate to the social, emotional, and behavioral aspects of society.

ARTGR 672B. Design for Behavioral Change. (0-6) Cr. 3. F.S. Preq: ARTGR 570, ARTGR 571, and graduate enrollment in College of Design or permission of instructor
The exploration and design of educational experiences and artifacts as they relate to the social, emotional, and behavioral aspects of society.

ARTGR 672C. Consumer Experience Design and Branding. (0-6) Cr. 3. F.S. Preq: ARTGR 570, ARTGR 571, and graduate enrollment in College of Design or permission of instructor
The theory and investigation of experience design as it applies to human interactions in contemporary society and culture. Studio problems may involve such areas as: exhibition design, electronic interface design, wayfinding, package design, and publication design.

ARTGR 690. Advanced Topics. Cr. arr. Repeatable.

ARTGR 698. Current Issues in Graphic Design. Cr. 1-3. Repeatable, maximum of 9 credits. Preq: Graduate enrollment in College of Design or permission of instructor
Selected issues in contemporary graphic design. Topics and readings vary each time offered.

Industrial Design

http://www.design.iastate.edu/industrialdesign/index.php

Undergraduate Study

B.I.D. Bachelor of Industrial Design Students in this program take a carefully defined sequence of courses developed to give them exposure and practice in the areas of theory and skill required by industrial design. These include drawing, form development, history, creative thinking, engineering principles, research, design methodology, human factors, computer-aided design, manufacturing and commercial factors. In their third year, students will select electives from concentration tracks arranged around specialty areas and current issues in the profession. The upper level studio classes are reserved for study abroad, internships, and sponsored projects with students from other departments and colleges.

Graduate Study

The Master of Industrial Design (M.I.D.) is traditionally recognized as a terminal degree in industrial design for students with or without industrial design degrees or backgrounds. Applicants with an industrial design degree or background will take a minimum of 45 credits. Applicants with no industrial design degree or background will be required to take up to 18 additional credits for successful completion. The graduate program is designed to offer the most relevant mix of skills and experience, including directed research programs, internships, international travel and industry-sponsored coursework. Program faculty will teach courses in design thinking, innovation, product development, project management, system and service design, interaction, eco-design, social responsibility, and entrepreneurship.

ISU’s Master of Industrial Design (M.I.D.) program emphasizes strategy and innovation grounded in the synergy between research and practice. Students may choose to focus on the creation of new knowledge and culminate their graduate studies through a research-based thesis. Or, students may focus on the application of research in solving complex design problems and commercial issues of product realization that culminates in a final project followed by a written report. Students will also be able to explore advanced concepts in such areas as extended manufacturer responsibility, supply chain and logistics, international vendor relations, advanced materials and biopolymers, and alternative business models.

Curriculum in Industrial Design

The Curriculum in Industrial Design leads to a 132.5 credit undergraduate Bachelor of Industrial Design including the 30.5 credit core Design Program. Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 45 graduate credit post-professional graduate program is also offered leading to the degree Master of Industrial Design. (NOTE: Applicants without a degree or background in industrial design may be required to complete up to 18 additional credits of coursework.)

Total Degree Requirements: 132.5 cr.
Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 10 cr.

ENGL 150 Critical Thinking and Communication (*) 3
ENGL 250 Written, Oral, Visual, and Electronic Composition (*) 3
LIB 160 Information Literacy 1

One of the following:

COMST 101 Introduction to Communication Studies 3
COMST 102 Introduction to Interpersonal Communication
CMDIS 286 Communicating with the Deaf
SP CM 110 Listening
SP CM 212 Fundamentals of Public Speaking
THTRE 251 Acting I

Total Credits: 10

* with a C- or better

Humanities: 6 cr.
6 cr. from program curriculum sheet

Social Sciences: 6 cr.
6 cr. from program curriculum sheet

Math/Physics/Biol.Sciences: 6 cr.
6 cr. from program curriculum sheet

General Education Courses: 9 cr.
6 cr. of course level 300-400 from program curriculum sheet; complete 3 cr. from department curriculum sheet.

College of Design Core: 11.5 cr.

DSN S 102 Design Studio I 4
DSN S 115 Design Collaborative Seminar 0.5-1
or DSN S 110 Design Exchange Seminar I
DSN S 131 Design Representation 4
DSN S 183 Design Cultures 3

Total Credits: 11.5-12

History, Theory and Criticism: 15 cr.

IND D 231 Introduction to Industrial Design 3
IND D 387 History of Industrial Design I 3
Industrial Design: 60 cr.

Two courses from the approved course list; must include one 300 level or higher.

Concentration track electives: 9 cr.

Sequence of electives assembled to create a focused area of study.

Courses primarily for undergraduates:

IND D 201. Industrial Design Studio I.
(0-12) Cr. 6. F. Prereq: Admission to the industrial design program, enrollment in IND D 231.

Product scale form development and visual communication.

IND D 202. Industrial Design Studio II.
(0-12) Cr. 6. S. Prereq: IND D 201

Principles of structure and function in products.

IND D 231. Introduction to Industrial Design.
(3-0) Cr. 3. F. Prereq: DSN S 102 and DSN S 131, enrollment in 201; admission to the industrial design program through department review or permission of instructor.

The history, definition, scope, and basic principles of industrial design. Overview of technical, artistic, and sociological context of the profession.

IND D 232. Creative Thinking for Industrial Design.
(3-0) Cr. 3. S. Prereq: IND D 231

Exploration of strategies, methods, and processes associated with creative thinking skills and problem solving. Discussion of the nature of creativity and its implications in different contexts that cross content boundaries.

IND D 301. Industrial Design Studio III.
(0-12) Cr. 6. F. Prereq: IND D 202

Systematic design methodology and integration of creative thinking techniques.

IND D 302. Industrial Design Studio IV.
(0-12) Cr. 6. S. Prereq: IND D 301

Exploration of commercial factors in industrial design.

(3-0) Cr. 3. F. Prereq: IND D 231 or permission of instructor.

Survey of qualitative and quantitative methods with an emphasis on contextual user-centered research. Integration of user data collection, visualization, and synthesis as a source for design. Experience of a small-scale research practice related to industrial design.

IND D 334. Materials and Processes for Industrial Design.
(3-0) Cr. 3. S. Prereq: IND D 201 and IND D 231.

Introduction to materials and manufacturing methods for mass production and distribution of products.

IND D 341. Computer Aided Industrial Design I.
(0-6) Cr. 3. S. Prereq: IND D 301

Emphasis on the computer as an industrial design and visualization tool.

IND D 342. Computer Aided Industrial Design II.
(0-6) Cr. 3. S. Prereq: IND D 341

Advanced concepts in computer to machine interface for manufacture.
IND D 503. Industrial Design Studio I.  
(0-12) Cr. 6. F. Prereq: Admission to the industrial design graduate program or completion of Graduate Intensive Track. Advanced, project-based application of industrial design concepts and techniques.

IND D 504. Industrial Design Studio II.  
(0-12) Cr. 6. S. Prereq: IND D 502. Advanced, project-based application of industrial design concepts and techniques, with an emphasis on service and system design, and its implications for the community.

IND D 507. Industrial Design Practicum.  
(0-12) Cr. 6. F. Prereq: Evidence of satisfactory experience in area of specialization; admitted by application and written permission of instructor only. Studio project focused on topics generated with external partners. Topics vary.

IND D 511. Colloquium.  
(1-0) Cr. 1. F. Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program. Presentation and discussion of creative activity carried out in various design disciplines and their relationship to industrial design. Seminar sessions focusing on exemplary pieces of design research undertaken by faculty and graduate students in the design field.

IND D 532. Design Thinking.  
(3-0) Cr. 3. S. Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program, or permission of instructor. Exploration of problem-solving methods for systems, products, and processes across all contexts. Strategies for problem-solution co-evolution process, with a focus on collaborative and interdisciplinary design to investigate real-world problems and opportunities.

IND D 534. Product Realization for Industrial Design.  
(3-0) Cr. 3. S. Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program. Introduction to materials and manufacturing methods for products. Exploration of emerging materials and new applications.

(0-6) Cr. 3. F. Prereq: Admission into the Graduate Intensive Track or graduate standing in the industrial design program. Exploration of multiple visual communication techniques used in industrial design and product development.

(0-6) Cr. 3. F.S. Prereq: Completion of industrial design studio or permission of instructor. Exploration of the computer as an industrial design and visualization tool. Advanced concepts in computer to machine interface for manufacture.

IND D 543. Portfolio and Professional Practice.  
(1-4) Cr. 3. F.S. Prereq: Senior or Graduate standing in the industrial design program. Discussion of industrial design practice and career planning. Development and preparation of personal promotional materials for a range of media.

IND D 551. Human Factors.  
(3-0) Cr. 3. S. Prereq: IND D 532. Human factors issues and the study of relationships between the user, the product, and the human body and its physical functions. Investigations of bio-mechanics, anthropometry, instrumental displays and control, and their measurement as they relate to the design process.

IND D 590. Special Topics.  
(1-4) Cr. 3. Repeatable. F.S.SS. Prereq: Completion of industrial design studio or permission of instructor. Advanced topics focused on industrial design applications. Topics include theory, criticism, methodology, experimental techniques, three dimensional design, distributed collaboration.

IND D 592. Special Projects.  
Cr. arr. Repeatable. F.S.SS. Prereq: Completion of industrial design studio or permission of instructor. Planned projects in topics related to theory, criticism, methodology, experimental techniques, three dimensional design, distributed collaboration.

IND D 595. Study Abroad Option.  
(0-12) Cr. 6. Repeatable. F.S.SS. Prereq: Completion of industrial design studio or permission of instructor. International study abroad program. Visits to design studios, showrooms, museums and manufacturing facilities.

IND D 597. Internship.  
(0-12) Cr. 6. Repeatable. F.S.SS. Prereq: Completion of Industrial design studio or permission of instructor. Professional industrial design, off-campus experience.

Courses for graduate students:

IND D 601. Graduate Project I.  
(0-12) Cr. 6. F. Prereq: IND D 503, IND D 532, IND D 631 Advanced creative component in specialized area of focus within industrial design. Culminates in a development plan and supporting documentary.

IND D 602. Graduate Project II.  
(0-12) Cr. 6. S. Prereq: IND D 601 Advanced creative component in specialized area of focus within industrial design. Culminates in a physical or digital artifact and supporting documentation.

(3-0) Cr. 3. F. Prereq: Admission into the Graduate Intensive Track, graduate standing in the industrial design program, or permission of instructor. Cross-disciplinary research methods to examine the impact of industrial design on humans, environments, and social contexts. Examination and critique of current research methods employed in the field, and application of a selection of these methods to a variety of research questions.

IND D 632. Thesis Preparation.  
(3-0) Cr. 3. S. Prereq: IND D 631 Exploration and formulation of graduate thesis or project topics, with proposed studies and investigations. Introduction to structuring a design research prospectus and university requirements for graduation. Determine Faculty Committee and Program of Study and file forms with Graduate College.

(0-12) Cr. 6. Repeatable. F.S.SS. Prereq: IND D 503, IND D 532, IND D 631 Advanced research component in specialized area of focus within industrial design. Culminates in a thesis document.

Integrated Studio Arts

The department offers degree programs focused on visual art and visual culture and offers courses in art history, studio arts and art education. Degree offerings include the Bachelor of Arts in Art and Design, Bachelor of Fine Arts in Integrated Studio Arts and the Master of Fine Arts in Integrated Visual Arts.

Undergraduate Study

B.A. in Art and Design

This curriculum offers two concentrations: Art and Culture, and Visual Culture Studies. Art and Culture has a greater emphasis on studio components and Visual Culture Studies on humanities and liberal arts components. Both concentrations are combined with an applied career minor or an approved program of study. Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

The department offers no minor but participates in the undergraduate minors in Classical Studies, Critical Studies in Design, Design Studies and Digital Media.

B.F.A. Integrated Studio Arts

Students select from studio options including ceramics, digital media, drawing, furniture design, illustration, jewelry and metalsmithing, scientific illustration, two- and three-dimensional mixed media, painting, photography, printmaking, textiles, and new technological genres. Over the four-year course of study students will develop a portfolio and prepare for a professional practice in the visual arts. This concentration engages aesthetics, visual problem solving, critical thinking, and skill development, drawing on contemporary developments, historical and cultural theory, and studio practice.

Graduate Study

The department offers the Master of Fine Arts (M.F.A.) in Integrated Visual Arts. The M.F.A. curriculum in Integrated Visual Arts requires a minimum of 60 credits. The program of study includes seminar classes, a studio concentration, history and criticism courses, elective courses outside the department or area of study and the completion of a thesis exhibition or thesis.

M.F.A. graduates in Integrated Visual Arts link traditional studio disciplines with interdisciplinary studies. Graduates are prepared as visual artists to enter studio
practice, business, higher education or new interdisciplinary fields. The M.F.A. is recognized as the terminal degree. A required thesis exhibition is composed of two parts: a substantial exhibition; and a written statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A thesis may be an appropriate alternative, but some portion of the work should entail an element of design problem-solving in the form of a visual product.

Curriculum in Art and Design - B.A.

The curriculum in Art and Design leads to a 120.5 credit undergraduate Bachelor of Arts degree.

This curriculum offers two concentrations: Art and Culture and Visual Culture Studies. Both concentrations are combined with an applied career minor or approved program of study.

Consideration for admission into the B.A. curriculum is based upon department resources and GPA earned in the Core Design Program.

Transfer students with studio credits from other programs, colleges and universities must present for department review a portfolio of work done in those courses in order to have the credits applied toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Total Degree Requirements: 120.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communication: 10 cr.

(C- or better grade)

Total Credits 15

Art and Culture Concentration requires 57 credits distributed as follows:

Art and Culture Concentration: 12 cr.

12 credits from 200 level or above in College of Design courses.

Program of Study: 30 cr.

30 cr. from an approved program of study, including 6 cr. at 300-400 level.

Electives: 15 cr.

Visual Culture Studies Concentration requires 57 credits distributed as follows:

Visual Culture Studies Concentration: 12 cr.

12 cr. in Art H at 300-400 level and Art 498 (Museum/Gallery Internship).

Program of Study: 30 cr.

30 cr. from an approved program of study, including 6 cr. at 300-400 level and 6 cr. foreign language.

Electives: 15 cr.

Curriculum in Integrated Studio Arts -- B.F.A.

The Curriculum in Integrated Studio Arts leads to a 126.5 credit undergraduate Bachelor of Fine Arts in Integrated Studio Arts. Admission into the program requires the completion of at least 30.0 credits, including the following courses: DSN S 102, 110 or 115, 131, and 183; 6 credits of Social Sciences/Humanities; 6 credits Math/Science; ENGL 150 (or test-out credit); LIB 160. Review of the student’s portfolio and essay will also be significant factors.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the College of Design Core Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for department review a portfolio of work done in those courses in order to have the credits applied toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Total Degree Requirement: 126.5 cr.

Courses primarily for undergraduates:

### ARTIS 201. Creative Visual Thinking.

(0-6) Cr. 3. F.S.
Exploration of the nature of visual perception in relation to issues of visual communication, problem solving, envisioning information, and visual thinking. Studio assignments to be digitized and sent to instructor electronically for evaluation and critique.

(0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors
Half-semester course. Introduction to wood's physical properties, its potential as an expressive medium, and basic hand tools and techniques used for working with wood.

### ARTIS 203. Studio Fundamentals: Jewelry/Metalsmithing.

(0-8) Cr. 2. F.S. Prereq: Open to all students; sophomore level and above. Required of all ISA BFA majors
Half semester course. Introduction to basic jewelry/metal design and fabrication. Forming, texturing, and joining techniques will be explored. Additional work required outside of class.

### ARTIS 204. Studio Fundamentals: Ceramics.

(0-8) Cr. 2. F.S. Prereq: Open to all students, sophomore level and above.
Half-semester course which provides an introduction to ceramics including techniques (hand-building, high fire and low fire glaze applications) and conceptual approaches. The emphasis is on creative expression and communication through ceramics. Course is open to all students and required for all Integrated Studio Arts BFA majors.

### ARTIS 205. Studio Fundamentals: Printmaking.

(0-8) Cr. 2. F.S. Prereq: Open to all students, sophomore level and above. Introduction to relief, monoprint, lithographic and intaglio printing as methods for visual communication and expression. Course is open to all students and required for all Integrated Studio Arts BFA majors.

### ARTIS 208. Color.

(0-6) Cr. 3. F.S. Prereq: DSN S 102, DSN S 131, and DSN S 183. Open to all students, sophomore level and above. Required for all ISA BFA students.
The impact of changing visual relationships emphasizing physical and psychological and cultural color concepts. Additive and subtractive mixing and color interaction exercises and assignments using various color media. Required for all Integrated Studio Arts BFA majors.

### ARTIS 210. Studio Fundamentals: Photo.

(0-8) Cr. 2. F.S. Prereq: Open to all students, sophomore level and above. Introduction to camera operation and traditional black and white darkroom methods as means of visual communication and creative expression. Course is open to all students and required for all Integrated Studio Arts BFA majors.

### ARTIS 211. Studio Fundamentals: Computers.

(0-8) Cr. 2. F.S. Prereq: Open to all students, sophomore level and above.
Half-semester course. Introduction to image acquisition, Adobe Photoshop and Illustrator. Course is open to all students and required for all Integrated Studio Arts BFA majors.

### ARTIS 213. Studio Fundamentals: Painting.

(0-8) Cr. 2. F.S. Prereq: Open to all students, sophomore level and above. Half-semester course. Introduction to preparation of painting grounds, color mixing, manipulation of paint and pictorial space as methods for visual communication and expression. Course is open to all students and required for all Integrated Studio Arts BFA majors.

(0-8) Cr. 2. F.S. Prereq: Open to all students, sophomore level and above. Half semester course. Introduction to two-dimensional and three-dimensional textile techniques used for visual communication and expression. Course is open to all students and required for all Integrated Studio Arts BFA majors.

### ARTIS 227. Introduction to Creative Digital Photography.

(0-6) Cr. 3. Prereq: DSN S 102, DSN S 131 and DSN S 183 or permission of instructor.
This course will include the functions and operations of the digital camera, scanning and other image input devices, digital image manipulation, software usage and support, color management and printing, presentation of images, compositional dynamics and the development of "seeing" as a medium of design, expression, and communication. Students should have access to a good or high quality digital camera with the ability to separately adjust shutter speed, f/stop and exposure, a laptop with updated Adobe Photoshop software, and enough digital storage for all class assignments.

### ARTIS 227H. Introduction to Creative Digital Photography: Honors.

(0-6) Cr. 3. Prereq: DSN S 102, DSN S 131 and DSN S 183
This course will include the functions and operations of the digital camera, scanning and other image input devices, digital image manipulation, software usage and support, color management and printing, presentation of images, compositional dynamics and the development of "seeing" as a medium of design, expression, and communication. Students should have access to a good or high quality digital camera with the ability to separately adjust shutter speed, f/stop and exposure, a laptop with updated Adobe Photoshop software, and enough digital storage for all class assignments.

### ARTIS 229. Introduction to Darkroom Photography.

(0-6) Cr. 3. Prereq: DSN S 102, DSN S 131 and DSN S 183 or permission of instructor.
Photography as a creative medium of art, design, expression and communication. Camera techniques and black and white wet lab processing taught. Alternative processes explored as time permits. 35 mm camera with manual exposure controls is required.

### ARTIS 229H. Introduction to Darkroom Photography: Honors.

(0-6) Cr. 3-4. Prereq: DSN S 102, DSN S 131 and DSN S 183 or permission of instructor.
Photography as a creative medium of art, design, expression and communication. Camera techniques and black and white wet lab processing taught. Alternative processes explored as time permits. 35 mm camera with manual exposure controls is required.

### ARTIS 230. Drawing II.

(0-8) Cr. 3. F.S. Prereq: DSN S 102, DSN S 183 and DSN S 131
A continuation of DSN S 131 (Design Representation). Further development of perceptual drawing skills from a variety of subject matter. Continued practice with drawing materials and techniques with emphasis on tonal and color media.
ARTIS 233. Watercolor Painting.  
(0-6) Cr. 3. Prereq: ARTIS 230  
Fundamentals of painting using water-based media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.

ARTIS 233H. Watercolor Painting: Honors.  
(0-6) Cr. 3-4. Prereq: ARTIS 230  
Fundamentals of painting using water-based media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, architectural space, and the human form.

ARTIS 236. Painting I.  
(0-6) Cr. 3. F.S. Prereq: ARTIS 230  
Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form.

ARTIS 236H. Painting I: Honors.  
(0-6) Cr. 3-4. F.S. Prereq: ARTIS 230  
Fundamentals of painting using acrylic and oil media applied to observation-based painting. Subject matter may include working from actual or two-dimensional references of still life, landscape, and the human form.

ARTIS 305. Integrated Media.  
(Dual-listed with ARTIS 505). (0-6) Cr. 3. Repeatable. Prereq: 6 credits of 200 level studio.  
Integration and exploration of materials and methods that combine traditional and innovative approaches. Emphasis on conceptual development.

(0-6) Cr. 3. Prereq: ARTIS 230 or permission of instructor  
Introduction to 3D modeling using computer and available software. Modeling, texturing, lighting, and rendering with respect to 3D object and still scene creation.

(0-6) Cr. 3-4. Prereq: ARTIS 230 or permission of instructor  
Introduction to 3D modeling using computer and available software. Modeling, texturing, lighting, and rendering with respect to 3D object and still scene creation.

ARTIS 310. Sources and Methods of Visual Design.  
(1-4) Cr. 3. Repeatable, maximum of 6 credits.  
Study and application of methods used by contemporary artists for the purpose of generating ideas for new work. Field trip.

Cr. 3.  
Exploration of issues and directions in current art. Readings, discussions, and studio research projects to build an experimental and applied knowledge base for understanding each student’s place in the contemporary art world.

ARTIS 319. Studio Furniture.  
(3-0) Cr. 3. F.  
Overview of American studio furniture since 1940 including noted makers, important examples, and diverse approaches. Discussion of workmanship and the principles of furniture design. Field trip.

ARTIS 320. Introduction to Furniture Design.  
(0-6) Cr. 3. Prereq: ARTIS 202 or permission of instructor.  
Design and production of basic furniture forms in wood. Introduction to power tools. Develop an individual design process including an understanding of scale and proportion. Develop sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

ARTIS 320H. Introduction to Furniture Design: Honors.  
(0-6) Cr. 3-4. Prereq: ARTIS 202 or permission of instructor.  
Design and production of basic furniture forms in wood. Introduction to power tools. Develop an individual design process including an understanding of scale and proportion. Develop sensitivity to wood and the social and environmental implications of materials used for furniture design and production.

ARTIS 322. Intermediate Ceramics Studio.  
(0-6) Cr. 3. Prereq: ARTIS 204  
Further investigation of concepts and techniques in ceramics; introduction to throwing on the wheel, to exploration of utilitarian and sculptural approaches in the medium, and to glaze research and electric kiln firing.

ARTIS 322H. Intermediate Ceramics Studio: Honors.  
(0-6) Cr. 3-4. Prereq: ARTIS 204  
Further investigation of concepts and techniques in ceramics; introduction to throwing on the wheel, to exploration of utilitarian and sculptural approaches in the medium, and to glaze research and electric kiln firing.

ARTIS 333. Scientific Illustration Principles and Techniques.  
(Cross-listed with BPM I). (0-6) Cr. 3. Repeatable. Prereq: 6 credits in art and design and 3 credits in biological sciences  
Studio basics and professional techniques in black & white, continuous tone, and color. Emphasis on tools, materials, and rendering.

ARTIS 334. Jewelry/Metalsmithing II.  
(0-6) Cr. 3. Prereq: ARTIS 203 or permission of instructor  
Continued study of traditional and contemporary metal fabrication techniques applicable to jewelry and object construction, including container forms. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 334H. Jewelry/Metalsmithing II: Honors.  
(0-6) Cr. 3-4. Prereq: ARTIS 203 or permission of instructor  
Continued study of traditional and contemporary metal fabrication techniques applicable to jewelry and object construction, including container forms. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 350. Integrated Studio Arts Seminar.  
(2-0) Cr. 2. Repeatable, maximum of 6 credits. Prereq: Open to ISA BFA majors  
Contemporary issues in studio arts explored through lectures, presentations and critiques.

ARTIS 356. Introduction to Printmaking.  
(1-4) Cr. 3. Repeatable. Prereq: ARTIS 210 or ARTIS 229 or permission of instructor  
Introduction to basic printmaking techniques and materials. Introduction to printmaking processes including block, intaglio, and lithography and their historical context.

ARTIS 357. Painting II.  
(0-6) Cr. 3. Repeatable. Prereq: ARTIS 204 or permission of instructor  
Continued study of traditional and contemporary metal fabrication techniques applicable to jewelry and object construction, including container forms. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 359. Scientific Illustration Techniques.  
(0-6) Cr. 3. Repeatable, maximum of 6 credits. Prereq: ARTIS 210 or ARTIS 229 or permission of instructor  
Application of scientific illustration techniques to communication. Development of technical abilities using illustration software. Digital and print production techniques.

(0-6) Cr. 3. Repeatable, maximum of 6 credits. Prereq: ARTIS 210 or ARTIS 229 or permission of instructor  
Continuation and expansion of concepts and processes from introductory photography. Individual thematic work is enriched by connection to photographic history and pluralist perspectives.

ARTIS 362. Illustration and Illustration Software.  
(Cross-listed with BPM I). (0-6) Cr. 3. Repeatable. Prereq: ARTIS 323  
Application of painting, drawing, and image making techniques to communication. Development of technical abilities using illustration software. Digital and print production techniques.

ARTIS 363. Advanced Drawing.  
(2-0) Cr. 2. Repeatable, maximum of 6 credits. Prereq: ARTS 210  
Problem solving methodologies.

(2-0) Cr. 2. Repeatable, maximum of 6 credits. Prereq: ARTS 210  
Problem solving methodologies.

ARTIS 366. Design and Production of Furniture.  
(2-0) Cr. 2. Repeatable, maximum of 6 credits. Prereq: ARTIS 210 or ARTIS 229 or permission of instructor  
Continuation of design and production of furniture forms in wood. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 367. Advanced Illustration.  
(2-0) Cr. 2. Repeatable, maximum of 6 credits. Prereq: ARTIS 210 or ARTIS 229 or permission of instructor  
Continuation and expansion of concepts and processes from introductory photography. Individual thematic work is enriched by connection to photographic history and pluralist perspectives.

(0-6) Cr. 3. Repeatable. Prereq: ARTIS 230  
Drawing from the human figure.

(0-6) Cr. 3-4. Repeatable. Prereq: ARTIS 230  
Drawing from the human figure.

ARTIS 395. Three-Dimensional Studio.  
(Cross-listed with ARCH). (1-4) Cr. 3. Repeatable, maximum of 6 credits.  
This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means for three dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructive techniques.

(Cross-listed with BPM I). (0-6) Cr. 3. Repeatable, maximum of 6 credits.  
This course deals with three dimensional problems in visual invention, organization, and expression emphasizing creative manipulation of tools, materials, and techniques as means for three dimensional thinking. Projects cover the additive (modeling), subtractive (carving), substitutional (casting) as well as constructive techniques.

ARTIS 399. Independent Study.  
(2-0) Cr. 2. Repeatable, maximum of 6 credits. Prereq: ARTIS 210 or ARTIS 229 or permission of instructor  
Continuation of design and production of furniture forms in wood. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 399H. Independent Study: Honors.  
(2-0) Cr. 2. Repeatable, maximum of 6 credits. Prereq: ARTIS 210 or ARTIS 229 or permission of instructor  
Continuation of design and production of furniture forms in wood. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 399S. Advanced Independent Study.  
(2-0) Cr. 2. Repeatable, maximum of 6 credits. Prereq: ARTIS 210 or ARTIS 229 or permission of instructor  
Continuation of design and production of furniture forms in wood. Emphasis on design, modeling and rendering techniques and progressive skill development. Basic stone setting and lost wax casting introduced.

ARTIS 400. Senior Seminar.  
(4-0) Cr. 4.  
Study and application of methods used by contemporary artists for the purpose of generating ideas for new work. Field trip.

ARTIS 400H. Senior Seminar: Honors.  
(4-0) Cr. 4.  
Study and application of methods used by contemporary artists for the purpose of generating ideas for new work. Field trip.
ARTIS 345. Woven Textile Structures. (0-6) Cr. 3. Repeatable. Prereq: ARTIS 214 or permission of instructor. Introduction to woven textile construction using commercial and hand-dyed yarns. Emphasis on technical development of weaving as a means for personal expression as well as an understanding of its role within the applied arts.

ARTIS 345H. Woven Textile Structures, Honors. (0-6) Cr. 3-4. Repeatable. Prereq: ARTIS 214 or permission of instructor. Introduction to woven textile construction using commercial and hand-dyed yarns. Emphasis on technical development of weaving as a means for personal expression as well as an understanding of its role within the applied arts.

ARTIS 346. Textile Surface Design. (0-6) Cr. 3-4. Repeatable. F.S. Prereq: ARTIS 214 or permission of instructor. Textile hand-dyeing and discharge methods on fabric to create complex surfaces. Other surface embellishment techniques, such as hand and machine stitching and application of textile pigments, will be introduced. Emphasis is on technical skill development and research, as well as creative use of textile surface design techniques for artistic expression.

ARTIS 346H. Textile Surface Design: Honors. (0-6) Cr. 3-4. Repeatable. Prereq: ARTIS 214 or permission of instructor. Textile hand-dyeing and discharge methods on fabric to create complex surfaces. Other surface embellishment techniques, such as hand and machine stitching and application of textile pigments, will be introduced. Emphasis is on technical skill development and research, as well as creative use of textile surface design techniques for artistic expression.

ARTIS 347. Printed Textile Design. (0-6) Cr. 3-4. Repeatable. F.S. Prereq: ARTIS 214 or permission of instructor. Textile hand-printing methods on fabric including block, stencil and screen-printing using dyes, discharging agents and pigments. Digital printing on fabric will be introduced. Experimental printing methods will also be explored. Emphasis on research and development of surface design techniques as a means for personal expression.

ARTIS 347H. Printed Textile Design: Honors. (0-6) Cr. 3-4. Repeatable. F.S. Prereq: ARTIS 214 or permission of instructor. Textile hand-printing methods on fabric including block, stencil and screen-printing using dyes, discharging agents and pigments. Digital printing on fabric will be introduced. Experimental printing methods will also be explored. Emphasis on research and development of surface design techniques as a means for personal expression.

ARTIS 356. Relief Printmaking: Digital/Traditional. (Dual-listed with ARTIS 556). (0-6) Cr. 3-4. Repeatable, maximum of 6 credits. F.S. Prereq: ARTIS 206 and ARTIS 230. Explore the techniques and aesthetic qualities of black and white and color relief printmaking primarily through woodcuts and photopolymer plates. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 356H. Relief Printmaking: Digital/Traditional, Honors. (0-6) Cr. 3-4. Repeatable, maximum of 6 credits. F.S. Prereq: ARTIS 206 and ARTIS 230. Explore the techniques and aesthetic qualities of black and white and color relief printmaking primarily through woodcuts and photopolymer plates. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 357. Intaglio and Monotype Printmaking: Digital/Traditional. (Dual-listed with ARTIS 557). (0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S. Prereq: ARTIS 206 and ARTIS 230. Explore the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, laser-cut plates and collagraph processes. Students will generate imagery through traditional drawing, collage and digital processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 357H. Intaglio and Monotype Printmaking: Digital/Traditional, Honors. (0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S. Prereq: ARTIS 206 and ARTIS 230. Explore the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, laser-cut plates and collagraph processes. Students will generate imagery through traditional drawing, collage and digital processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 358. Lithography: Digital/Traditional. (Dual-listed with ARTIS 558). (0-6) Cr. 3. Repeatable. F.S. Prereq: ARTIS 206 and credit or enrollment in ARTIS 230. Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Students may generate imagery through traditional drawing, collage or digital processes. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color.

ARTIS 358H. Lithography: Digital/Traditional, Honors. (0-6) Cr. 3-4. Repeatable. F.S. Prereq: ARTIS 206 and credit or enrollment in ARTIS 230. Examine the techniques and aesthetic qualities of lithography primarily through hand-drawn and photographic plates. Students may generate imagery through traditional drawing, collage or digital processes. Emphasis is on experimental and creative use of printmaking for artistic expression. For those taking the course for a second semester, focus is on stone lithography and increased work with color.

ARTIS 360. Sustainable Design and Fabrication of Furniture. (0-6) Cr. 3. F.S. An introduction to issues of design and fabrication of furniture focusing on sustainability. Exploration of the effect of consumers on design and how this affects our environment and our global society.

ARTIS 399. BFA Professional Practice. (2-0) Cr. 2. S. Prereq: Junior classification in ISA BFA curriculum. Introduction to professional practices including development of portfolio (visual and written components). Lecture and presentation topics include applying to graduate school, internships, applying for jobs, grants/funding opportunities, professional networking, exhibition opportunities, and best practices for studio artists. Half-semester course. Required of all ISA majors.

ARTIS 409. Computer/Video Game Design and Development. (Dual-listed with ARTIS 509). (0-6) Cr. 3. Repeatable, maximum of 12 credits. Prereq: Permission of instructor. Programming emphasis: COM S 227, COM S 228, COM S 229 or equivalent in engineering; art or graphics emphasis: ARTIS 230 and ARTIS 308; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: Junior classification Independent project based creation and development of "frivolous and non-frivolous" computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed.

ARTIS 420. Advanced Furniture Design. (Dual-listed with ARTIS 520). (0-6) Cr. 3-4. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 320. Design and creation of advanced furniture forms in wood with consideration of precedents and innovative techniques and approaches. Develop a unique personal approach to the design and making of furniture. Refine your sensitivity to wood and understanding the social and environmental implications of using various materials used in furniture design and production.

ARTIS 420H. Advanced Furniture Design: Honors. (0-6) Cr. 3-4. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 320. Design and creation of advanced furniture forms in wood with consideration of precedents and innovative techniques and approaches. Develop a unique personal approach to the design and making of furniture. Refine your sensitivity to wood and understanding the social and environmental implications of using various materials used in furniture design and production.
ARTIS 422. Ceramics Studio.  
(Dual-listed with ARTIS 522). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.  
Prereq: ARTIS 322  
In-depth investigation of ceramic forms and surfaces with an emphasis on personal art expression. Gas kiln firings, research into contemporary ceramic artists and development of increasingly skilled work are emphasized.  

ARTIS 422H. Ceramics Studio: Honors.  
(0-6) Cr. 3-4. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 322  
In-depth investigation of ceramic forms and surfaces with an emphasis on personal art expression. Gas kiln firings, research into contemporary ceramic artists and development of increasingly skilled work are emphasized.  

ARTIS 424. Jewelry/Metalsmithing III.  
(Dual-listed with ARTIS 524). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S.  
Prereq: ARTIS 324 or permission of instructor  
Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development.  

ARTIS 424H. Jewelry/Metalsmithing III: Honors.  
(0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 324 or permission of instructor  
Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development.  

ARTIS 429. Advanced Photography.  
(Dual-listed with ARTIS 529). (0-6) Cr. 3. Repeatable. F.S. Prereq: ARTIS 329  
Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concern.  

(0-6) Cr. 3-4. Repeatable. F.S. Prereq: ARTIS 329  
Independent, advanced work in traditional alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concern.  

ARTIS 430. Drawing IV.  
(Dual-listed with ARTIS 530). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S.  
Prereq: ARTIS 330  
Figurative and/or non-figurative drawing with advanced work in media, composition, and theory.  

ARTIS 430H. Drawing IV: Honors.  
(0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S. Prereq: ARTIS 330  
Figurative and/or non-figurative drawing with advanced work in media, composition, and theory.  

ARTIS 438. Painting III.  
(Dual-listed with ARTIS 538). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S.  
Prereq: ARTIS 338  
Figurative and non-figurative painting with advanced work in media, composition, and theory.  

ARTIS 438H. Painting III: Honors.  
(0-6) Cr. 3-4. Repeatable, maximum of 9 credits. F.S. Prereq: ARTIS 338  
Figurative and non-figurative painting with advanced work in media, composition, and theory.  

ARTIS 447. Printed Textile Design.  
(Dual-listed with ARTIS 547). (0-6) Cr. 3. Repeatable. F.S. Prereq: ARTIS 347 or permission of instructor  
Exploration of hand-printing methods on fabric including block, stencil, and screen-printing using dyes, discharging agents, and pigments. Individualized research and development of surface design techniques as means for personal expression.  

ARTIS 448. Digital Textile Design.  
(Dual-listed with ARTIS 548). (0-6) Cr. 3. Repeatable. F.S. Prereq: Junior classification in either College of Design or Apparel, Merchandising, Design  
This hands-on studio course will allow students to explore digital printing technology and its application to textile design for those working within industry as well as independent studio practitioners. Digital design development includes pattern repeats and photo manipulation to create unique textile designs for fashion, interior and fine art applications.  

ARTIS 458. Advanced Printmaking.  
(0-6) Cr. 3. Repeatable. F.S. Prereq: ARTIS 356, ARTIS 357, or ARTIS 358, and permission of instructor  
Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists.  

ARTIS 458H. Advanced Printmaking: Honors.  
(0-6) Cr. 3-4. Repeatable. F.S. Prereq: ARTIS 356, ARTIS 357, or ARTIS 358, and permission of instructor  
Independent, advanced work in printmaking processes. Emphasis is on development of a unified body of work and research into contemporary artists.  

ARTIS 482. Selected Topics in Studio Art.  
(Dual-listed with ARTIS 582). Cr. 1-3. Repeatable. F.S. Prereq: Permission of instructor  
Special issues related to studio art. Topics vary each time offered.  

ARTIS 490. Independent Study.  
Cr. 1-6. Repeatable. F.S. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed craft design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.  

ARTIS 490B. Independent Study: Ceramics.  
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.  

ARTIS 490C. Independent Study: Computer Art and Design.  
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.  

ARTIS 490D. Independent Study: Drawing.  
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.  

ARTIS 490E. Independent Study: Textiles.  
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.  

ARTIS 490F. Independent Study: Illustration.  
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.  

ARTIS 490G. Independent Study: Metals.  
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.  

ARTIS 490H. Independent Study: Honors.  
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.  

ARTIS 490I. Independent Study: Painting.  
Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment  
Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.
ARTIS 490J. Independent Study: Photography. Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490K. Independent Study: Printmaking. Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490L. Independent Study: Furniture. Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 490M. Independent Study: Mixed Media. Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTIS 493. Workshop. Cr. 1-3. Repeatable. SS. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493B. Workshop: Ceramics. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493C. Workshop: Computer Art and Design. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493D. Workshop: Drawing. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493E. Workshop: Textiles. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493F. Workshop: Illustration. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493G. Workshop: Metals. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493H. Workshop: Honors. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493I. Workshop: Painting. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493J. Workshop: Photography. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493K. Workshop: Printmaking. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493L. Workshop: Furniture. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 493M. Workshop: Mixed Media. Cr. 1-3. Repeatable. Prereq: Permission of instructor. Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 499. BFA Exhibition. (1-0) Cr. 1. Prereq: ARTIS 399 and senior classification in the ISA BFA Curriculum. Capstone experience for the BFA degree, including the refinement of a final portfolio (visual and written components). Guest lecturers cover range of topics relevant to the professional practice of art and design. Course culminates in the planning, design and installation of the BFA group exhibition in a formal gallery setting. Half-semester course. Required of all ISA majors.

Courses primarily for graduate students, open to qualified undergraduates:

ARTIS 505. Integrated Media. (Dual-listed with ARTIS 305). (0-6) Cr. 3. Repeatable. F.S. Prereq: Graduate classification. Integration and exploration of materials and methods that combine traditional and innovative approaches. Emphasis on conceptual development.

ARTIS 508. Computer Aided Animation and Visualization. (0-6) Cr. 3. Repeatable, maximum of 6 credits. Prereq: ARTIS 408 or graduate classification and permission of instructor. Further investigations begun in ARTIS 408. Attention given to the workflow and management of creating animation and visualizations.

ARTIS 509. Computer/Video Game Design and Development. (Dual-listed with ARTIS 409). (0-6) Cr. 3. Repeatable, maximum of 12 credits. Prereq: Permission of instructor. Programming emphasis: COM S 227, COM S 228, COM S 229 or equivalent in engineering; art or graphics emphasis: ARTIS 230 and ARTIS 306; writing emphasis: an English course in creative writing or writing screen plays; business or marketing students: Junior classification Independent project based creation and development of "frivolous and non-frivolous" computer games in a cross-disciplinary team. Projects require cross-disciplinary teams. Aspects of Indie development and computer/video game history will be discussed.

ARTIS 520. Advanced Furniture Design. (Dual-listed with ARTIS 420). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S. Prereq: ARTIS 320. Design and creation of advanced furniture forms in wood with consideration of precedents and innovative techniques and approaches. Develop a unique personal approach to the design and making of furniture. Refine your sensitivity to wood and understanding the social and environmental implications of using various materials used in furniture design and production.

ARTIS 522. Ceramics Studio. (Dual-listed with ARTIS 422). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S. Prereq: Graduate classification and permission of instructor. Graduate students are expected to develop a creative research agenda that will result in a body of increasingly mature art work. This will occur in consultation with the instructor. Participation in the graduate student exhibition and review at the end of each semester is required. Students must know how to fire electric kilns and be willing to learn to fire gas kilns.

ARTIS 524. Jewelry and Decorative Metalsmithing III. (Dual-listed with ARTIS 424). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S. Prereq: Graduate classification and permission of instructor. Emphasis on metal fabrication and hollow construction techniques applicable to jewelry, functional objects and sculptural art forms. As students advance, they learn sheet metal processes including raising, forming, and anticlastic shell forming techniques. Introduction to mechanisms and tool making. Advanced students are encouraged to integrate these topics with alternative materials and technologies. A focus is placed on independent research, professional engagement and portfolio development.

ARTIS 529. Advanced Photography. (Dual-listed with ARTIS 429). (0-6) Cr. 3. Repeatable, maximum of 12 credits. F.S. Prereq: Graduate classification and permission of instructor. Independent, advanced work in traditional, alternative and/or digital photographic processes. Emphasis is on development of a unified body of work and research into contemporary photographers and aesthetic concerns.
ARTIS 530. Drawing.
(Dual-listed with ARTIS 430). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S.
Prereq: Graduate classification and permission of instructor
Figurative and non-figurative drawing with advanced work in media, composition, and theory.

ARTIS 538. Advanced Painting.
(Dual-listed with ARTIS 438). (0-6) Cr. 3. Repeatable, maximum of 9 credits. F.S.
Prereq: Graduate classification and permission of instructor
Figurative and non-figurative painting with advanced work in media, composition, and theory.

ARTIS 547. Printed Textile Design.
(Dual-listed with ARTIS 447). (0-6) Cr. 3. Repeatable. F.S. Prereq: ARTIS 347 or permission of instructor.
Exploration of hand-printing methods on fabric including block, stencil, and screen-printing using dyes, discharging agents, and pigments. Individualized research and development of surface design techniques as means for personal expression.

ARTIS 548. Digital Textile Design.
(Dual-listed with ARTIS 448). (0-6) Cr. 3. Repeatable. F.S. Prereq: Graduate classification and permission of instructor.
This hands-on studio course will allow students to explore digital technology and its application to textile design for those working within industry as well as independent studio practitioners. Digital design development includes pattern repeats and photo manipulation to create unique textile designs for fashion, interior and fine art applications. Graduate research presentation and studio projects required.

ARTIS 556. Relief Printmaking: Digital/Traditional.
(Dual-listed with ARTIS 356). (0-6) Cr. 3-4. Repeatable, maximum of 6 credits.
F.S. Prereq: ARTIS 206 and ARTIS 230
Explore the techniques and aesthetic qualities of black and white and color relief printmaking primarily through woodcuts and photopolymer plates. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 557. Intaglio and Monotype Printmaking: Digital / Traditional.
(Dual-listed with ARTIS 357). (0-6) Cr. 3-4. Repeatable, maximum of 9 credits.
F.S. Prereq: ARTIS 206 and 230
Explore the techniques and aesthetic qualities of black and white and color intaglio printmaking primarily through etching, aquatint, laser-cut plates and collagraph processes. Students will generate imagery through traditional drawing, collage and digital processes. Unique, one-of-a-kind black and white and color prints from Plexiglas will also be introduced. Emphasis is on experimental and creative use of printmaking for artistic expression.

ARTIS 558. Lithography: Digital / Traditional.
(Dual-listed with ARTIS 358). (0-6) Cr. 3. Repeatable. F.S. Prereq: Graduate classification and permission of instructor
Examine the techniques and aesthetic qualities of lithography. Students may generate imagery through traditional drawing, collage or digital processes. Emphasis is on the experimental and creative use of lithography for artistic expression with study of contemporary trends.

ARTIS 582. Selected Topics in Studio Art.
(Dual-listed with ARTIS 482). Cr. 1-3. Repeatable, maximum of 9 credits. F.S.
Prereq: Permission of instructor
Special issues related to studio art. Topics vary each time offered.

ARTIS 590. Special Topics.
Cr. arr. F.S.SS. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590B. Special Topics: Ceramics.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590C. Special Topics: Computer Art and Design.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590D. Special Topics: Drawing.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590E. Special Topics: Textiles.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590F. Special Topics: Illustration.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590G. Special Topics: Metals.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590I. Special Topics: Painting.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590J. Special Topics: Photography.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590K. Special Topics: Printmaking.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590L. Special Topics: Furniture.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 590M. Special Topics: Mixed Media.
Cr. arr. Prereq: Bachelor degree in art and/or design, or evidence of satisfactory equivalency in specialized area
Written approval of instructor and department chair on required form in advance of semester of enrollment.

ARTIS 593. Workshop.
Cr. 1-3. Repeatable. SS. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593B. Workshop: Ceramics.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593C. Workshop: Computer Art and Design.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593D. Workshop: Drawing.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593E. Workshop: Textiles.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593F. Workshop: Illustration.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593G. Workshop: Metals.
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.
ARTIS 593L. Workshop: Painting. 
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor. 
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593J. Workshop: Photography. 
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor. 
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593K. Workshop: Printmaking. 
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor. 
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593L. Workshop: Furniture. 
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor. 
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

ARTIS 593M. Workshop: Mixed Media. 
Cr. 1-3. Repeatable. Prereq: Graduate classification and permission of instructor. 
Intensive 2 to 4 week studio exploration. Topics vary each time offered and may have prerequisites.

Courses for graduate students:

ARTIS 607. Intermedia. 
(0-6) Cr. 3. F.S. Prereq: Graduate classification and permission of instructor. 
Exploration and application of media with various materials, methods and ideas.

Cr. 1-3. Repeatable, maximum of 9 credits. F.S. Prereq: Graduate classification and permission of instructor. 
Selected issues in contemporary studio arts. Topics and readings vary each time offered.

Interior Design

http://www.design.iastate.edu/interiordesign/index.php

Undergraduate Study

The department offers the degree Bachelor of Fine Arts (B.F.A.) in Interior Design, www.design.iastate.edu/interiordesign

B.F.A. Interior Design. Emphasis is on the student’s application of design processes to creatively solve problems of the interior environment based on knowledge of human safety, functional utility, physical, psychological, and contextual fit. Graduates in interior design are competent in visual communication (sketching, drafting and computer aided design), design problem solving, space planning, lighting and color specification for interiors, finish and furniture selection, detailing interior construction and application of human factors. The curriculum is accredited by the Council for Interior Design Accreditation (CIDA) as providing professional level education.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present their portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

The department offers no minor but participates in the undergraduate minors in Critical Studies in Design, Design Studies, and Digital Media.

Graduate Study

The department offers the degrees of Master of Fine Arts (M.F.A.) in Interior Design, and Master of Arts (M.A.) in Art and Design, with degree specialization in interior design.

The M.A. in Art and Design with specialization in interior design requires a minimum of 34 credits including a studio concentration and work in research methods and human factors. Candidates focus on research in an area of specialization culminating in a written thesis comprised of original research. Graduates have a broad understanding of current interior design issues and design research, preparing them for special analytical aspects of design practice and further studies leading to the PhD. Applicants without a degree in interior design may be required to complete up to 40 additional credits of course work.

M.F.A. graduates in Interior Design are proficient in visual communication skills, design theory, human factors, and space planning. The M.F.A. degree is considered a terminal degree in the interior design field. The degree requires completion of a written thesis comprised of original research.

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the Master of Fine Arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a slide or digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student’s undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students’ progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Interior Design, College of Design, Iowa State University, Ames, Iowa, 50011-3092

Curriculum in Interior Design

The Curriculum in Interior Design leads to a 129.5 credit undergraduate Bachelor of Fine Arts in Interior Design including a 30.5 credit Core Design Program. Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance and a portfolio of original work.

A 34 graduate credit program is offered leading to the master of arts, for students planning to undertake professional or design research-oriented pursuits. (NOTE: Applicants without a previous undergraduate degree in interior design may be required to complete up to 40 additional credits of deficiency work).

A 60 graduate credit post-professional graduate program is also offered leading to the degree master of fine arts.

For more complete graduate program descriptions see Graduate Study under Interior Design in the Courses and Programs section. Consideration for admission into the undergraduate Interior Design curriculum requires completion of the 30.5 credit Core Design Program, including the following courses:

<table>

Admission is based on department resources and will be determined by a formal review at the end of the Core Design Program.

Transfer students with studio credits from other programs, colleges, and universities must present a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are advised to present portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Total Degree Requirement: 129.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average; Completion of all requirements listed below.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication: 10 cr.

(C- or better grade)

**Total Credits** 63-65
ARTID 352. Interior Environmental Control Systems. (3-0) Cr. 3. S. Prereq: Completion of the College of Design Core. Exploration of concepts, materials, assemblies associated with building service systems. Overview of electrical, lighting, acoustical, HVAC, plumbing and other non-structural building features. Attention to related human factors, testing, codes, detailing, specifications writing and end-use application.

ARTID 353. Interior Building Systems and Details. (3-0) Cr. 3. F. Prereq: Completion of the College of Design Core. Exploration of building construction concepts, materials, and assemblies and their influence on interior design. Attention to human factors, codes, detailing, and other interior design issues related to buildings.

ARTID 355. Interior Design History/Theory/Criticism I. (3-0) Cr. 3. S. Theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture, from a critical, historical and multicultural perspective. Focus on pre-1850.

ARTID 356. Interior Design History/Theory/Criticism II. (3-0) Cr. 3. F. Prereq: Credit or enrollment in ARTID 355 or permission of instructor. Advanced theoretical approaches to evaluation of interior finishes, furnishings, and decorative arts in relation to parallel developments in art and architecture from a critical, historical, and multicultural perspective. Focus on mid-nineteenth and twentieth century.

ARTID 357. Made in Italy. (2-0) Cr. 2. F. Prereq: Participation in Study Abroad Rome program. An investigation of the 20th century roots of modern Italian design and its contemporary form. Lectures and seminar presentations highlight major Italian designers and internationally significant design in the 20th century. Focus is on innovative design that exhibits a synthesis of formal and social functions. Meets International Perspectives Requirement.

ARTID 359. Junior Field Study. Cr. R. F. Prereq: Enrollment in third year interior design studio course. Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms, and museums. Offered on a satisfactory-fail basis only.

ARTID 360. Interior Design Internship Seminar. (0-1) Cr. 0.5. Repeatable, maximum of 1 credits. Prereq: Enrollment in interior design program. Procedural and ethical concerns relating to interior design internship. Preparation of placement credentials and formulation of personal goals. Internship plans and agreements. Offered on a satisfactory-fail basis only.

ARTID 459. Senior Field Study. Cr. R. Prereq: Enrollment in fourth year interior design studio course. Study and tours of areas of interest within the interior design profession such as manufacturers, design studios, showrooms and museums. Offered on a satisfactory-fail basis only.

ARTID 461. Interior Design Professional Practices. (3-0) Cr. 3-4. S. Prereq: ARTID 460. Organization and general management of the interior design office; agreements, business procedures, and professional ethics. Professional interior design issues and concerns.

ARTID 461H. Interior Design Professional Practices: Honors. (3-0) Cr. 3-4. S. Prereq: ARTID 460. Organization and general management of the interior design office; agreements, business procedures, and professional ethics. Professional interior design issues and concerns.

ARTID 463. Environments for the Aging. (Dual-listed with ARTID 563). (Cross-listed with GERON, HD FS). (3-0) Cr. 3. S. Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies. Emphasis on independent living within residential settings including specialized shelter, supportive services, and housing management. Application of concepts appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. Meets U.S. Diversity Requirement.

ARTID 465. Interior Design Studio V. (Dual-listed with ARTID 565). (1-6) Cr. 4. F. Prereq: ARTID 460, or permission of instructor, and enrollment in ARTID 459. Design research and refined problem solving methods including functional analysis, programming and detailing.

ARTID 468. Interior Design in an Urban Setting. (1-4) Cr. 3. S. Prereq: Enrollment or credit in third year studio courses. Study of selected interior design projects and designers practicing in an urban setting. Studio project examining issues related to interior design in an urban context.

ARTID 468H. Interior Design in an Urban Setting: Honors. (1-4) Cr. 3-4. S. Prereq: Enrollment or credit in third year studio courses. Study of selected interior design projects and designers practicing in an urban setting. Studio project examining issues related to interior design in an urban context.

ARTID 469. Advanced Studies in Interior Design. Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor. Examination of special issues with emphasis on their translation into design application.

ARTID 469A. Advanced Studies in Interior Design: Design Theory. (Dual-listed with ARTID 569A). Cr. 3. Repeatable, maximum of 6 credits. Prereq: Graduate classification or permission of instructor. Examination of special issues with emphasis on their translation into design application.

ARTID 469B. Advanced Studies in Interior Design: Advanced Color. (Dual-listed with ARTID 569B). Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor. Examination of special issues with emphasis on their translation into design application.

ARTID 469C. Advanced Studies in Interior Design: Sustainable Design. (Dual-listed with ARTID 569C). Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor. Examination of special issues with emphasis on their translation into design application.

ARTID 469D. Advanced Studies in Interior Design: Variable Topics. (Dual-listed with ARTID 569D). Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor. Examination of special issues with emphasis on their translation into design application.

ARTID 490. Independent Study. Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.

ARTID 490H. Independent Study, Honors. Cr. 1-6. Repeatable. Prereq: Written approval of instructor and department chair on required form in advance of semester of enrollment. Student must have completed related interior design coursework appropriate to planned independent study. Offered on a graded basis or a satisfactory-fail basis.
ARTID 493. Workshop.
Cr. 1-3. Repeatable, maximum of 3 credits. F.S.SS. Prereq: Evidence of satisfactory experience in area of specialization
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

Courses primarily for graduate students, open to qualified undergraduates:

ARTID 551. Design Humanities.
(3-0) Cr. 3. Repeatable, maximum of 15 credits. F.S. Prereq: Instructor permission
An exploration of human nature as broadly defined and as applied to design of the built environment. Consideration of human characteristics, responses and performance, at varying scales, as sources of design insight. Topics vary each time offered.

ARTID 551A. Design Humanities: Micro-Scale Humanities.
(3-0) Cr. 3. Repeatable. F.S. Prereq: Instructor permission
Issues related to the nature, performance and accommodation of the individual organism, including sensation and perception, physical requirement, individual anthropometrics, personal safety and other issues connecting human needs and built environmental responses.

ARTID 551B. Design Humanities: Meso-Scale Humanities.
(3-0) Cr. 3. Repeatable. F.S. Prereq: Instructor permission
Issues related to human performance in small to moderate scale settings, including psychological and behavioral dimensions, social factors, interpersonal safety, etc.

ARTID 551C. Design Humanities: Macro-Scale Humanities.
(3-0) Cr. 3. Repeatable. F.S. Prereq: Instructor permission
Cultural and societal influences on human performance and well being in the moderate to large scale built environment, including the impact of political, economic, cultural, geographic, design cultural and other societal factors.

ARTID 552. Design Methods: Design Methods.
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S. Prereq: Permission of instructor
Survey of methodologies and methodological tools for varied end uses and drawn from wide ranging sources. Emphasis on their organization and application to design of the human environment. Topics vary each time offered.

ARTID 552A. Design Methods: Investigation Analysis.
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S. Prereq: Permission of instructor
Methods of design research, analysis, programming and theory formulation.

ARTID 552B. Design Methods: Synthesis.
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S. Prereq: Permission of instructor
Methods of synthesizing design concepts and solutions.

ARTID 552C. Design Methods: Communication.
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S. Prereq: Permission of instructor
Methods of managing, translating, communicating and otherwise utilizing text, image, abstract and other forms of information.

ARTID 552D. Design Methods: Procedural Alternatives.
(2-0) Cr. 2. Repeatable, maximum of 10 credits. F.S. Prereq: Permission of instructor
New and specialized methodological trends, including subject or setting-specific methods.

ARTID 554. Interior Design Teaching Practicum.
Cr. 1-3. Repeatable. F.S.SS. Prereq: ARTID 668 and permission of instructor
Supervised practical application of interior design theory, materials, and practice to the educational process.

ARTID 559. Graduate Interior Design Field Study.
Cr. R. Repeatable. Prereq: Graduate enrollment or permission of instructor
Study and tours of places of interior design-related interest such as manufacturers, design studios, related professional offices, showrooms, museums, and historical sites.

ARTID 560. Interior Design Internship.
Cr. 3. F.S.SS. Prereq: Permission of instructor.
Professional interior design off-campus experience.

ARTID 563. Environments for the Aging.
(Dual-listed with ARTID 463). (Cross-listed with GERON, HD FS). (3-0) Cr. 3. S. Prereq: HD FS 360 or 3 credits in housing, architecture, interior design, rehabilitation, psychology, or human development and family studies or permission of instructor
Emphasis on independent living within residential settings including specialized shelter, supportive services and housing management. Application of criteria appropriate for accessibility and functional performance of activities; universal design principles. Creative project provides service learning opportunities. Meets U.S. Diversity Requirement

ARTID 565. Interior Design Studio V.
(Dual-listed with ARTID 465). (1-6) Cr. 4. F. Prereq: Graduate classification and permission of instructor
Design research and refined problem-solving methods including functional analysis, programming and detailing.

ARTID 567. Interior Design Studio VI.
(Dual-listed with ARTID 467). (1-6) Cr. 4. S. Prereq: Graduate classification and permission of instructor
Refinement of technical, analytical and theoretical problem-solving methods and comprehensive design documentation. In-depth development of interior design projects. Current issues in interior design. Open to non-majors.

ARTID 568. Experimental Interior Design.
(0-8) Cr. 4. Repeatable, maximum of 16 credits. F.S. Prereq: Graduate classification and permission of instructor
Examination of special issues with emphasis on their translation into design application.

ARTID 569A. Advanced Studies in Interior Design: Design Theory.
(Dual-listed with ARTID 469A). Cr. 3. Repeatable, maximum of 6 credits. Prereq: Graduate classification or permission of instructor
Examination of special issues with emphasis on their translation into design application.

(Dual-listed with ARTID 469B). Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor
Examination of special issues with emphasis on their translation into design application.

ARTID 569C. Advanced Studies in Interior Design: Sustainable Design.
(Dual-listed with ARTID 469C). Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor
Examination of special issues with emphasis on their translation into design application.

(Dual-listed with ARTID 469D). Cr. 3. Repeatable, maximum of 6 credits. Prereq: 12 credits in interior design related courses or permission of instructor
Examination of special issues with emphasis on their translation into design application.

ARTID 590. Special Topics.
Cr. arr. Prereq: Bachelor's degree in interior design, or evidence of satisfactory equivalency in specialized area. Written approval of instructor and department chair on required form in advance of semester of enrollment

ARTID 593. Workshop.
Cr. 1-3. Repeatable. F.S.SS. Prereq: Graduate classification; evidence of satisfactory experience in area of specialization
Intensive 2 to 4 week studio exploration. Topics vary each time offered.

ARTID 598. Research Forum.
(1-0) Cr. 1-3. Repeatable, maximum of 9 times. F.S. Prereq: Concurrent enrollment in ARTID 565, ARTID 567, ARTID 568, ARTID ARTID 665, or ARTID 668, and permission of instructor
Presentation and discussion of cross-disciplinary design research theory, methods, and application. Focus on the investigation, application, and communication of types of design research.

ARTID 599. Creative Component.
Cr. arr. Repeatable.
Courses for graduate students:

**ARTID 660. Research Methods.**
(3-0) Cr. 3. S. Prereq: Permission of instructor
Research strategies related to design. Application of selected methods to specific issues. Open to non-majors.

**ARTID 668. Advanced Experimental Interior Design.**
(0-8) Cr. 4. Repeatable, maximum of 16 credits. F.S. Prereq: Graduate classification and permission of instructor.
Application of alternative design methods and sources of insight to the solution of human environmental design problems. Focus on the identification, formulation, refinement and application of theory to the design process. Emphasis on the pursuit of new discovery and innovative problem solving. Approaches, settings and scales vary each time offered.

**ARTID 690. Advanced Topics.**
Cr. arr. Repeatable. Prereq: M.F.A classification, permission of instructor

**ARTID 697. Design Practicum.**
Cr. arr. Repeatable, maximum of 9 credits. F.S. Prereq: Approval of POS committee
Applied, off campus, professional interior design-related experience.

**ARTID 699. Research.**
Cr. arr. Repeatable

**ARTID 699A. Thesis.**
Cr. arr. Repeatable

**ARTID 699B. Thesis-Exhibition.**
Cr. arr. Repeatable

### Landscape Architecture

#### Undergraduate Study

Landscape Architecture is an environmental design discipline. Landscape architects actively shape the human environment: they map, interpret, imagine, draw, build, conceptualize, synthesize, and project ideas that transform landscapes. The design process involves creative expression that derives from an understanding of the context of site (or landscape) ecosystems, cultural frameworks, functional systems, and social dynamics. Students in our program learn to change the world around them by re-imagining and re-shaping the landscape to enhance its aesthetic and functional dimensions, ecological health, cultural significance, and social relevance. The profession addresses a broad range of landscapes in urban, suburban, rural, and wilderness settings. The scale of landscape architecture projects varies from broad, regional landscape analysis and planning to detailed, individual site-scale designs. The curriculum at Iowa State prepares students for this challenge as they develop their abilities to design and communicate ideas through a sequence of foundational courses and studios. The program seeks to produce graduates who understand the ethical, social, and environmental(ecological) dimensions of issues involving changes in the landscape.

Graduates are active in a broad range of careers, such as sustainable site design, land development, park management, environmental advocacy, community planning, urban design, and others. In their professional lives, graduates apply their creative and technical skills in the planned arrangement of natural and constructed elements on the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments serve useful, aesthetic, safe, and enjoyable purposes. Graduates are able to communicate effectively with colleagues in the sciences and humanities as well as in the allied professions, and are prepared to work individually and in multidisciplinary teams to address complex problems dealing with the cultural/ecological environment.

The undergraduate curriculum includes one year of the college’s Core Design Program followed by a four-year professional program. Admission to the professional program is subject to the approval of a faculty committee at the completion of the Core Design Program. The department also cooperates in the undergraduate minor in Design Studies, Critical Studies in Design, and Digital Media.

Following admission to the professional program, students embark on the traveling studio during the fall semester of their second year. This studio is a full semester’s credit of integrated departmental courses and involves extensive travel within and beyond the great Midwest region of North America, to study regional natural systems and the cultural responses to those systems.

To enhance the study of landscape architecture in off-campus settings, the department requires students to choose from among the following three options during the spring and summer of their fourth year: a professional internship, an independent study abroad experience, or National Student Exchange. The department assists students with placement, and additional information is provided through the department and the College of Design’s Career Services Office.

Personal laptop/notebooks and appropriate software are regularly used in classes starting with the second year.

### The undergraduate curriculum is fully accredited by the Landscape Architecture Accreditation Board (LAAB) and provides the education which, combined with experience, is necessary for professional license.

#### Graduate Study

The department offers two primary opportunities for professional and post-professional study: the M.L.A. degree, which provides the skills and knowledge for professional practice and the M.S.L.A. degree, which focuses on graduate-level research on the built environment. Minor work is offered to students taking major work in other departments.

The M.L.A. degree is a first professional degree in landscape architecture, for students with undergraduate degrees other than landscape architecture. Students enroll in a six-semester full-time program of coursework, some of which overlaps with the bachelor’s degree curriculum. However, graduate-level work is accomplished by a minimum of 30 credits of advanced courses, both required and elective, completed at the 500-level. This coursework also provides a chance to concentrate study in a topical area of practice, through elective courses and/or an optional thesis. Students’ concentrations—in areas such as history-theory, design art, ecocultural design, or community design, etcetera—are determined by the student in conjunction with his/her major professor and will be designated in a program of study, to be completed by the end of his/her first year. Electives may be selected from within the department and college as well as from other departments across campus.

The M.L.A. program has recently been granted provisional accreditation by LAAB and is undergoing a required 3-year review for initial accreditation. Full accreditation status is expected after 2013. Students who graduate before the program’s full accreditation will be considered by LAAB to have graduated from an accredited program.

The M.S.L.A. is an unaccredited, research degree addressing landscape architecture as a scholarly endeavor. The degree is primarily intended as an advanced professional degree targeted at students already possessing an accredited first professional degree (B.L.A., B.Arch, M.Arch, etc.) and wishing to pursue in-depth, independent research. The M.S.L.A. is granted upon completion of 36 credits (at least 30 of which are completed at the 500-level) and the acceptance of a thesis or creative component. Periodically, students without accredited, first professional design degrees wish to complete an unaccredited master’s degree in landscape architecture. Such students may, in special cases, be allowed to pursue an M.S.L.A., provided they take an additional 12 credits of coursework, at least 6 of which must be an approved design studio, for a total of 48 hours of coursework.

Students may also enter a special program to earn both the M.L.A. and the master of community and regional planning (M.C.R.P.) degrees. Students interested in the double degree M.L.A./M.C.R.P. program should contact the departments to receive a detailed description of requirements. The department also teaches in the Graduate Certificate Program in Geographic Information Systems (GIS), administered by the Department of Community and Regional Planning.

### Curriculum in Landscape Architecture

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five-year curriculum, requiring 149.5 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Program of 30 credits and a four-year professional program of 119.5 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

The BLA from Iowa State University is a LAAB (Landscape Architectural Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional license.

The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first professional degree programs in landscape architecture at the Bachelor’s and Master’s levels.

The department also offers a graduate program leading to the degrees of Master of Landscape Architecture or Master of Science in Landscape Architecture. For
more complete graduate program descriptions, contact the department or go to the Graduate program link on the College of Design web page.

Total Degree Requirement: 149.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 10 cr.

(C- or better grade)

<tbody>
<tr>
<td>L A 202</td>
<td>Studio: Site Design I</td>
<td>6</td>
</tr>
</tbody>
</table>

Fundamental issues of landscape planning and design at a site scale. Projects introduce a variety of (objective and subjective) site inquiry methods, space and place making, and sensitive integration of architecture and landscape for specific land uses. User needs, precedent study, programming, site engineering, planting design, and outdoor space design expressed through a variety of three-dimensional modeling, graphic, and written media.

<td>Introduced Plants of the Midwest</td>
<td>3</td>
</tr>
</tbody>
</table>

Identification, observation, and study of plants introduced to cultivation in the Midwest region. Plant cultural requirements, including adaptions to climate changes, solar exposure, and soil conditions. Investigation of history of plant introduction and use in designed landscape, including consequent impacts of plant introduction such as plant invasion. Introduction to planting design at the site scale, including matching plant cultural requirements to site conditions, functional uses of plants and expressive composition using plant form, texture and color.

<table>

<tbody>
<tr>
<td>L A 272</td>
<td>Cultural Landscape Studies</td>
<td>3</td>
</tr>
</tbody>
</table>

Exploration of cultural landscapes, from broad settlement patterns to individual sites, with an emphasis on the origins and evolution of landscapes. Investigation of relationships between vernacular and designed landscapes. Landscapes considered as modes of cultural production that shape and are shaped by social, political, and economic processes. Exploration of landscapes as persistent (yet ephemeral) repositories of culture. Lectures, reading, field studies, and writing. Meets U.S. Diversity Requirement

<table>

More credits professional electives | 9

Total Credits: 85
L A 201. Investigating Landscape Form, Process, and Detail. (1-6) Cr. 3. F. Prereq: Enrollment in professional program. Exploration of the poetics and principles of landscape construction. Investigation and interpretation of landform and geomorphic processes such as the hydrologic cycle, erosion, and sedimentation. Close observation and representation of detail design, with an emphasis on material types, their connections, and weathering. Readings, field studies, and drawings in analog and digital media.

L A 282. Landscape Dynamics. (2-2) Cr. 3. S. Prereq: Sophomore standing. Understand design implications presented by geotechnical and ecological processes in the landscape including ecology, vegetation, soils and water. Understand the influence of landforms, geology, plants, soils, and water on the creation of landscape designs. Course relates current issues including water quality impairment, erosion, and invasive species with design strategies such as stormwater management, soil quality management, and plant community restoration. Field trips.

L A 301. Site Design II. (1-15) Cr. 6. F. Prereq: L A 202. Development of half-acre to hundred-acre landscape design and planning proposals, potentially in collaboration with students in other programs. Apply critical methodological frameworks to shape site systems while providing appropriate support for diverse user groups and creating culturally meaningful places. Assess and interpret a program of use, organize subjective and objective site inventory and analysis, develop functional and poetic design strategies for infrastructure and natural systems, and craft artistic and functionally explicit landscape architectural proposals. Development of appropriate technique and high level of craft in representations to support design thinking process and final scheme presentation.

L A 302. Ecological Design at the Regional Scale. (1-15) Cr. 6. S. Prereq: L A 282, L A 301, L A 381 and NREM 120. Application of ecological theories and processes in design and planning at the hundred plus-acre scale specifically focusing on urban and urban fringe landscapes. Apply advanced landscape analysis of soil, water, and vegetation utilizing geographic information systems. Particular focus on stream and wetland restoration, mitigation, and regulations and developing design representations for public use.

L A 309. Field Travel. Cr. 1. Repeatable, maximum of 2 times. F.S.S.S. Prereq: Enrollment in the professional program and permission of instructor. Observation of and reflection on professional practice and landscapes in urban, rural, and wilderness areas. Offered on a satisfactory-fail basis only.

L A 322. Fundamentals of Planting Design. (2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: L A 221. The art and techniques of creating planting compositions in the landscape that respond to cultural and biophysical contexts. Investigation of soil properties and plant/soil relationships relevant to the built environment. Methods of site inventory and analysis, developing planting palettes and composing plant assemblages that address expressive and functional needs. Introduction to the techniques of preparing planting plans, including standards for plant selection, plant lists and plant specification.

L A 341. Contemporary Landscape Architecture. (1-0) Cr. 1. S. Prereq: L A 301. Exploration of contemporary landscape architectural practice through individualized research into practicing firms. Preparation of paper and presentation outlining broad framework and specific parameters of a selected area of contemporary practice using specific projects as examples. Work may result in invitation of current practitioner(s) as a lecture series or event. Resume and portfolio preparation in advance of required off-campus semester (L A 444 A, B or C).

L A 371. History of Modern Landscapes, 1750 to Present. (Cross-listed with DSN S). (3-0) Cr. 3. S. Investigation of landscape design concepts and trends as observed over time, from approximately 1750 to the present, with emphasis on the United States and Europe. Examination of significant figures and outstanding works (sites, gardens, landscapes, monuments, subdivisions, city plans, etc.) of varied geographic regions. Analysis of the social, economic, political, and technical forces contributing to the development of landscape design styles, vocabulary, and literature. Lectures, readings, projects, research papers.
(Dual-listed with L A 517). (Cross-listed with ENV S). (2-3) Cr. 3. F. Prereq: Junior classification and 6 credits of natural science
Assessment and reduction of impacts in urban and peri-urban watershed areas. Course prepares students to work with various analysis methods for vegetation, topography, stormwater and stream condition as well as work with data from other disciplines. Emphasis on communicating with the public. Introductory GIS and GPS technologies are utilized. Learning is largely field-based.

L A 421. Advanced Planting Design.
(Dual-listed with L A 521). (2-3) Cr. 3. S. Prereq: L A 322 or permission of instructor
Theory and practice of planting design, with emphasis on the ecological, cultural, and aesthetic factors affecting planting design and vegetation management in the built environment. Three venues for collaborative learning form the basis of the course: topical research inquiry, case history investigation, and completion of one comprehensive project design.

L A 441. Professional Practice.
(2-0) Cr. 2. S. Prereq: L A 481
Studies of conventional and developing forms of public and private practice. Explore relationships between professional life and the culture of the professional design firm; investigate firm identities and structures; understand design projects, their delivery process, and contractual agreements. Lecture and class discussion.

L A 444. Landscape Architecture Independent Educational Enrichment.
Cr. R. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 341 or permission of adviser and chair
Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

L A 444A. Landscape Architecture Independent Educational Enrichment: Professional Internship.
Cr. R. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 341 or permission of adviser and chair
Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

L A 444B. Landscape Architecture Independent Educational Enrichment: Study Abroad.
Cr. R. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 341 or permission of adviser and chair
Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

Cr. R. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 341 or permission of adviser and chair
Independent educational enrichment through exploration of landscape architectural practice in a professional internship, international studies, or out-of-region national study experience.

L A 461I. Introduction to GIS.
(Cross-listed with ENSCI, ENV S, IA LL). Cr. 4. SS.
Descriptive and predictive GIS modeling techniques, spatial statistics, and map algebra. Application of GIS modeling techniques to environmental planning and resource management.

L A 478. Landscape Architecture: Natural Resources.
F.S.SS. Prereq: L A 371 or senior classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478A. Landscape Architecture: Landscape Design.
F.S.SS. Prereq: L A 371 or senior classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 478B. Topical Studies in Landscape Architecture.
F.S.SS. Prereq: L A 371 or senior classification
Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.
LA 470N. Topical Studies in Landscape Architecture: Natural Resources. (Dual-listed with L A 578N). (Cross-listed with DSN S). Cr. 2-3. Repeatable, maximum of 3 times. F.S.SS. Prereq: L A 371 or senior classification or graduate standing

Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

LA 481. Landscape Construction. (1-4) Cr. 3. F. Prereq: L A 381

Development of construction details with emphasis on materials and their aesthetic and functional uses as building materials. Explore characteristics and uses of construction materials and application of wood systems, paving systems, retaining walls, masonry and concrete systems, and metals; investigate structural theory of wood systems. Preliminary preparation of construction documents.

LA 482. Advanced Landscape Construction. (1-4) Cr. 3. S. Prereq: L A 481

Advanced site construction issues, with emphasis on water and irrigation systems, mechanical and electrical systems, site lighting, proposal preparation, project scheduling, project costing and estimating, and master specification editing.

LA 490. Independent Study. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490A. Independent Study: Landscape Design. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490B. Independent Study: Planting Design. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490C. Independent Study: Construction. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490D. Independent Study: History/Theory/Criticism. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490E. Independent Study: Landscape Planning. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490F. Independent Study: Urban Design. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490G. Independent Study: Graphics. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490H. Independent Study: Honors. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490I. Independent Study: Interdisciplinary Studies. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490J. Independent Study: International Studies. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490K. Independent Study: Computer Applications. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490L. Independent Study: Ecological Design. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490M. Independent Study: Social/Behavioral. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 490N. Independent Study: Natural Resources. Cr. 1-6. Repeatable, maximum of 3 times. F.S.SS. Prereq: Written approval of instructor and department chair on required form

Investigation of a topic of special interest to the student.

LA 491. Environmental Law and Planning. (Dual-listed with L A 591). (Cross-listed with C R P, DSN S, ENV S). (3-0) Cr. 3. S. Prereq: 6 credits in natural sciences

Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Courses primarily for graduate students, open to qualified undergraduates:

LA 504. Landworks: Advanced Landscape Architecture. (1-15) Cr. 6. Prereq: Graduate classification

Graduate studio in landscape architectural design working on complex sites involving multiple scales of design. Course emphasizes advanced skills in design research and representation and application of theory, as well as technical competency and teamwork. Development of original ideas, experimentation, and innovation.

LA 517. Urban and Peri-urban Watershed Assessment. (Dual-listed with L A 417). (2-3) Cr. 3. F. Prereq: Junior classification and 6 credits of natural science

Assessment and reduction of impacts in urban and peri-urban watershed areas. Course prepares students to work with various analysis methods for vegetation, topography, stormwater and stream condition as well as work with data from other disciplines. Emphasis on communicating with the public. Introductory GIS and GPS technologies are utilized. Learning is largely field-based.

LA 521. Advanced Planting Design. (Dual-listed with L A 421). (2-3) Cr. 3. S. Prereq: L A 322 or permission of instructor

Theory and practice of planting design, with emphasis on the ecological, cultural, and aesthetic factors affecting planting design and vegetation management in the built environment. Three venues for collaborative learning form the basis of the course: topical research inquiry, case history investigation, and completion of one comprehensive project design.

LA 541. Principles of Research for Landscape Architects. (3-0) Cr. 3. F. Prereq: Graduate standing

Examination of design inquiry and research methods appropriate to landscape architectural projects, including bibliographical, historical, numerical, statistical, survey, and geographical methods. Readings, discussions, and application problems. Preparation of a research proposal.

LA 567. Advanced GIS Landscape Modeling. (0-6) Cr. 3. Prereq: L A 302 or C R P 451/C R P 551

Application of Geographic Information Systems (GIS) modeling techniques to landscape planning and management issues. Selection, acquisition, and conversion of digital landscape data. Modeling applications for studio projects, outreach projects, and research projects.

LA 571. Landscape Architectural Theory I. (3-0) Cr. 3. F. Prereq: graduate classification or permission of instructor

Examination of the development of ideas in landscape architecture in their historical context of social practices and knowledge systems. Emphasis on exposure to key modern and contemporary texts and projects in landscape architecture, architecture, art, and related fields. Readings, discussions, and writings.

LA 573. Landscape Architectural Theory II. (3-0) Cr. 3. S. Prereq: Graduate standing or permission of instructor

Exploration of major theories and emerging practices of landscape architectural design and their relationships to broader, cultural and theoretical perspectives. Emphasis on developing critical ways of analyzing ideas. Lectures, readings, discussion, and writings.
L A 578. Topical Studies in Landscape Architecture. (Dual-listed with L A 478J). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578A. Landscape Architecture: Landscape Design. (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578B. Topical Studies in Landscape Architecture. (Dual-listed with L A 478B). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578C. Landscape Architecture: Construction. (Dual-listed with L A 478C). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578D. Landscape Architecture: History/Theory/Criticism. (Dual-listed with L A 478D). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578E. Landscape Architecture: Landscape Planning. (Dual-listed with L A 478E). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578F. Landscape Architecture: Urban Design. (Dual-listed with L A 478F). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578G. Landscape Architecture: Graphics. (Dual-listed with L A 478G). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578I. Landscape Architecture: Interdisciplinary Studies. (Dual-listed with L A 478I). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578J. Landscape Architecture: International Studies. (Dual-listed with L A 478J). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: Senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578K. Topical Studies in Landscape Architecture: Computer Applications. (Dual-listed with L A 478K). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: L A 371 or senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578L. Topical Studies in Landscape Architecture: Ecological Design. (Dual-listed with L A 478L). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: L A 371 or senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578M. Topical Studies in Landscape Architecture: Landscape Architecture: Social/Behavioral. (Dual-listed with L A 478M). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: L A 371 or senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 578N. Topical Studies in Landscape Architecture: Natural Resources. (Dual-listed with L A 478N). (Cross-listed with DSN S). Cr. 2-3. Repeatable. F.S.SS. Prereq: L A 371 or senior classification or graduate standing. Offerings vary with each term; check with department for available sections. Course contact hours can range from (2-0) to (3-0) depending on number of credits.

L A 590A. Special Topics. Cr. 1-4. Repeatable, maximum of 3 times. F.S.SS. Prereq: graduate standing.

L A 590N. Special Topics: Natural Resources. Cr. 1-4. Repeatable, maximum of 3 times. F.S.SS. Prereq: graduate standing.

L A 591. Environmental Law and Planning. (Dual-listed with L A 491). (Cross-listed with C R P, DSN S). (3-0) Cr. 3. S. Prereq: Graduate classification. Environmental law and policy as applied in planning at the local and state levels. Brownfields, environmental justice, water quality, air quality, wetland and floodplain management, and local government involvement in ecological protection through land use planning and other programs.

Comprehensive study and original development of a project selected by the student and approved by the major professor. Completed project must be submitted to and approved by a graduate faculty committee as evidence of mastery of the principles of landscape architecture.

Courses for graduate students:

College of Engineering
Sarah Rajala, Dean for College of Engineering
Arun Somani, Associate Dean for Research
Ron Cox, Associate Dean for Extension and Outreach
Gary Mirka, Associate Dean for Academic Affairs
www.engineering.iastate.edu

Aligning Education in Engineering with the University Mission

The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students' critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals of Engineering Examination for professional registration as land surveyors.

Concurrent Graduate/ Undergraduate Programs

Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are: aerospace engineering, agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, materials engineering, and mechanical engineering.

Programs offering concurrent bachelor of science/master of business administration degrees are: aerospace engineering, agricultural engineering, biological systems engineering, civil engineering, computer engineering, electrical engineering, industrial engineering and mechanical engineering. For more information, refer to the graduate study sections for each engineering program. Advanced work in engineering is offered in the post-graduate programs. See the Graduate College section of this catalog.

Joint Undergraduate Programs

A bachelor of science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences. This program is jointly administered by the Department of Electrical and Computer Engineering and the Department of Computer Science.

Accreditation

Twelve undergraduate engineering programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. These twelve programs are: aerospace, agricultural, biological systems, chemical, civil, computer, construction, electrical, industrial, materials, mechanical and software engineering. Accreditation status is indicated in the Courses and Programs section for each engineering program.

Organization of Curricula

All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students should complete the requirements of the basic program before proceeding to a professional program.

Preparation for the Engineering Curricula

In addition to the standard university admission requirements, the college also requires 2 years of a foreign language. Other high school credits particularly important to students wishing to study engineering include:

- 2 years of algebra,
- 1 year of geometry
- 1/2 year of trigonometry
- 1/2 year of pre-calculus
- 1 year each of chemistry, biology, and physics
- 3 years of social science
- 4 years of English

See Index for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Requirement for Entry into Professional Program

Students enrolled in the College of Engineering must satisfy the following requirements before enrolling in the professional courses (200-level and above) offered by departments in the Engineering College:

1. Completion of the basic program with a grade point average of 2.00 or better in the basic program courses.
2. A cumulative grade point average of 2.00 or better for all courses taken at Iowa State University.
3. The College of Engineering requires a grade of C or better for any transfer credit course that is applied to the basic program.

The following are the only exceptions to this rule:

a. Students who have completed all of their coursework while enrolled in the College of Engineering, but have not met the three basic program requirements, may enroll for not more than two semesters in 200-level or above courses offered by departments in the College of Engineering.

b. Students transferring to the College of Engineering from another college or university, or from a program outside this college, who have not met the three basic program requirements may also enroll for not more than two semesters in
200-level or above courses offered by departments in the College of Engineering. However, they may be granted an additional semester upon review by the college.

c. Iowa State students not pursuing an engineering degree may generally take engineering courses without restrictions provided they meet the prerequisites and space is available.

d. Only the first two semesters of 200-level and above engineering courses, taken at ISU while a student is not enrolled in the College of Engineering, can be applied toward an engineering degree.

Requirement for Graduation

In order to graduate in a professional engineering curriculum, students must have a minimum GPA of 2.00 in a department-designated group of 200-level and above courses known as the Core. These courses will total no fewer than 24 semester credits.

Engineering Minors

The College of Engineering offers five undergraduate minors which are open only to students in the College of Engineering. These are minors in bioengineering, energy systems, engineering sales, nondestructive evaluation and nuclear engineering. These minors must include at least nine credits which are beyond the total used to meet curriculum requirements.

The bioengineering minor is a 16 credit interdisciplinary program that complements a student’s major discipline by providing additional insight into the interactions between various engineering disciplines and Biological systems. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Bioengineering in Courses and Programs.

The energy systems minor is a 15 credit program that provides engineering students with focused educational opportunities in the broad area of energy systems. Students will understand broad energy perspectives, the language of energy systems and the economic, environmental, and policy issues related to energy. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Energy Systems in Courses and Programs or see http://www.me.iastate.edu/energy-systems-minor/.

The engineering sales minor is a 15 credit minor that complements the technical training in the student’s major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Engineering Sales in Courses and Programs.

The nondestructive evaluation minor (16 credit minimum) open to engineering students who have met the basic program requirements and are not on academic warning or probation. The minor is supervised by an inter-disciplinary Engineering faculty committee. For minor course requirements, refer to Nondestructive Evaluation Engineering in Courses and Programs.

The nuclear engineering minor is a 15 credit minor which enables engineering students to acquire a basic and fundamental knowledge of nuclear sciences and engineering. Courses are provided at Iowa State University and also through an inter-institutional distance education program offered through the Web by four of the Big 12 Engineering Consortium Schools. For minor course requirements, refer to Nuclear Engineering in Courses and Programs.

Engineering Minor (Interdisciplinary)

The College of Engineering offers an undergraduate minor in wind energy which is open to all students at ISU that meet the prerequisites. The wind energy minor is a 15 credit minor which enables students to acquire an interdisciplinary knowledge of the wind energy industry. There are two required courses; the remaining credits are chosen from a list of elective courses that are related to wind energy. The minor is administered by a supervisory faculty committee from several departments. For minor course requirements, refer to Wind Energy Minor in Courses and Program.

Undergraduate Majors and Minors Outside the College of Engineering

In addition to the engineering degree program, students may earn majors or minors in other colleges of the university. A major or minor program must meet all requirements of the offering department or program and its college and contain credits beyond the requirements for a B.S. degree in engineering. A minimum of 15 additional credits is required for each major area of study and an additional 9 credits for each minor.

Advising System

The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic programs and to provide a resource contact person for students during their college careers.

The college offers an orientation program during the spring and summer for students planning to enter in the fall, and during the fall for students planning to enter in the spring. Transfer students may also complete orientation online. All entering students are encouraged to attend orientation which includes meeting with an academic adviser to register for classes. Placement assessments given during the orientation program help determine the student’s current level of proficiency which enables the academic adviser to prepare an appropriate course schedule for the student.

Special Programs

All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will enrich the standard academic experience. Engineering students are also encouraged to take advantage of study abroad opportunities available through the College of Engineering’s International Programs Office.

a. Cooperative Education Program. The College of Engineering offers, through its curricula, an experiential education program. Enrollment in the program allows students to gain practical work experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional year to complete curriculum requirements.

These programs are arranged so that the student alternates academic work with employment periods. The student has the opportunity to assess career paths within her/his chosen curriculum and the employer evaluates the student’s potential as a future full-time employee. Both domestic and international co-op programs are available.

Cooperative education students pay no tuition or fees to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (298, 398, or 498) for each work period and are considered full-time students while enrolled in these courses. For additional information contact your academic adviser and the Office of Engineering Career Services.

b. Internship Program. The College of Engineering offers, through its curricula, an experiential education program. Internships are a mechanism by which a student may work full-time for one semester per academic year while maintaining her/his status as a full-time student. Enrollment in the program allows students to gain practical work experience in their career field while attending college. In general, students enrolled in the internship program will require an additional semester to complete curriculum requirements.

Internship students pay no tuition or fees to the university during their work periods and do not receive credit hours for their work experience. Students who register for the internship course (397) for a fall or spring semester work period or (396) for the summer term are considered to be full-time students. For additional information contact your academic adviser and the Office of Engineering Career Services.

c. Honors Program. The College of Engineering participates in the University Honors Program (see Index). The honors program is designed for students with above average ability who wish to individualize their programs of study. For further details consult the chair of the Engineering College Honors Program Committee or your departmental honors program adviser.

d. Engineering International Engagement. In a world where the sun never sets, engineers must be prepared to understand other cultures and other ways of doing business. Engineers must expand their exportable skills, language and cross-cultural skills.

The College of Engineering has formed worldwide partnerships to create opportunities for students to work and study with leading universities in other countries and multinational corporations. With careful planning, students may earn credit in courses that fulfill their degree requirements. To learn more about work and study abroad, visit the Engineering International Engagement website: http://www.engineering.iastate.edu/studyabroad/

Departments of the College

For information on undergraduate options refer to the following curriculum sections, and for graduate specializations or certificate programs, refer to the Courses and Programs section of the catalog.
Basic Program

be required of students in the College of Engineering. In reading or writing. Satisfactory completion of the recommended course(s) will administer to students whose first language is not English indicates a deficiency in ENGL 101 English for Native Speakers of Other Languages if the placement test.

The Department of English may recommend placement in one or more sections of MATH 166 Calculus II.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing MATH 142 Trigonometry and Analytic Geometry before enrolling in MATH 166 Calculus II.

The Department of English may recommend placement in one or more sections of ENGL 166 Calculus II. The placement test administered to students whose first language is not English indicates a deficiency in ENGL 101 English for Native Speakers of Other Languages if the placement test administered to students whose first language is not English indicates a deficiency in reading or writing. Satisfactory completion of the recommended course(s) will be required of students in the College of Engineering.

Basic Program

MATH 165 Calculus I 4
MATH 166 Calculus II 4
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
CHEM 167 General Chemistry for Engineering Students * 4
or CHEM 177 General Chemistry I 4
PHYS 221 Introduction to Classical Physics I 5
ENGR 101 Engineering Orientation *** R
LIB 160 Information Literacy 1
ENGR 160 Engineering Problems with Computer Applications R

AER E 160 Aerospace Engineering Problems With Computer Applications Laboratory
A B E 160 Systematic Problem Solving and Computer Programming
C E 160 Engineering Problems with Computational Laboratory
CH E 160 Chemical Engineering Problems with Computer Applications Laboratory
CPR E 185 Introduction to Computer Engineering and Problem Solving I
E E 185 Introduction to Electrical Engineering and Problem-Solving I
I E 148 Information Engineering
M E 160 Mechanical Engineering Problem Solving with Computer Applications
S E 185 Problem Solving in Software Engineering

Total Credits 27

ENGL 250 Written, Oral, Visual, and Electronic Composition is normally taken in the second year. However, students who advance place into this course may be able to enroll during their first year. Credit for ENGL 150 Critical Thinking and Communication is earned upon successful completion of ENGL 250 Written, Oral, Visual, and Electronic Composition, but only when ENGL 250 Written, Oral, Visual, and Electronic Composition is completed at Iowa State. In addition to the basic program courses listed above, curriculum designated courses normally taken the first year of each engineering curricula are listed below.

Curriculum Designated Requirements

Aerospace Engineering

AER E 161 Numerical, Graphical and Laboratory Techniques for Aerospace Engineering
AER E 192 Aerospace Seminar
GenEd Electives

Agricultural Engineering

CHEM 167 Laboratory in General Chemistry for Engineering 1
A B E 110 Experiencing Agricultural and Biosystems Engineering 1
A B E 170 Engineering Graphics and Introductory Design 3
SSH Elective

Biological Systems Engineering

CHEM 167 Laboratory in General Chemistry for Engineering 1
A B E 110 Experiencing Agricultural and Biosystems Engineering 1
A B E 170 Engineering Graphics and Introductory Design 3
SSH Elective

Chemical Engineering

CHEM 177 General Chemistry I * 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
CHEM 178L Laboratory in College Chemistry II 1
SSH Elective 3

Civil Engineering

CHEM 177 General Chemistry I * 4
CHEM 177L Laboratory in General Chemistry I 1
C E 105 Introduction to the Civil Engineering Profession 1
C E 170 Graphics for Civil Engineering 2
C E 111 Fundamentals of Surveying I 3
SSH Elective 3

Computer Engineering

COM S 227 Introduction to Object-oriented Programming 4
CPR E 166 Professional Programs Orientation
Gen Ed Elective 3

Minors

Bioengineering
Energy Systems
Engineering Sales
Non-Destructive Evaluation Engineering
Nuclear Engineering
Wind Energy

Materials Science and Engineering
Mechanical Engineering
Software Engineering
Systems Engineering

Basic Program for Professional Engineering Curricula

The first year program is much the same for all professional curricula in the College of Engineering. Students normally enroll in the majority of the basic program courses during their first year. The basic program is a set of courses common to all engineering curricula. Since students may also begin curriculum designated requirements during their first year, they will want to select a curriculum as soon as possible. This will enable them to receive the bachelor’s degree in a minimum time.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing MATH 142 Trigonometry and Analytic Geometry before enrolling in MATH 166 Calculus II.

The Department of English may recommend placement in one or more sections of ENGL 101 English for Native Speakers of Other Languages if the placement test administered to students whose first language is not English indicates a deficiency in reading or writing. Satisfactory completion of the recommended course(s) will be required of students in the College of Engineering.

Engineering Programs

Professional Programs Orientation

Introduction to Electrical Engineering and Problem-Solving I

Introduction to Computer Engineering and Problem Solving I
### Construction Engineering

- CON E 121 | Cornerstone Learning Community: Orientation to Academic Life | 1
- CON E 122 | Cornerstone Learning Community: Orientation to Professional Life | 1

One of the following: 3
- PSYCH 101 | Introduction to Psychology
- PSYCH 230 | Developmental Psychology
- PSYCH 250 | Psychology of the Workplace
- PSYCH 280 | Social Psychology
- SOC 134 | Introduction to Sociology

- C E 170 | Graphics for Civil Engineering | 2
- SSH Elective | 3

### Electrical Engineering

- E E 285 | Problem Solving Methods and Tools for Electrical Engineering | 4
- E E 166 | Professional Programs Orientation | R
- Gen Ed Elective | 3

### Industrial Engineering

- I E 101 | Industrial Engineering Profession | R
- SSH Elective | 6

### Materials Engineering

- CHEM 177 | General Chemistry I | 4
- CHEM 177L | Laboratory in General Chemistry I | 1
- CHEM 178 | General Chemistry II | 3
- CHEM 178L | Laboratory in College Chemistry II | 1
- ENGR 160 | Engineering Problems with Computer Applications Laboratory | 3
- Gen Ed Elective | 3
- PHYS 221 | Introduction to Classical Physics I (scheduled in sophomore year) | 5

### Mechanical Engineering

- CHEM 167L | Laboratory in General Chemistry for Engineering | 1
- M E 170 | Engineering Graphics and Introductory Design | 3
- Gen Ed Elective | 3

### Software Engineering

- S E 166 | Careers in Software Engineering | R
- COM S 227 | Introduction to Object-oriented Programming | 4
- COM S 228 | Introduction to Data Structures | 3

The student’s advisor may require or recommend courses in addition to those specified above if the preparation and progress of the student are such that additional courses are necessary or desirable.

*Students planning to enroll in C E 170, Ch E, or Mat E will find CHEM 177 General Chemistry I to be a better preparation for CHEM 178 General Chemistry II. However, is accepted as a substitute for CHEM 177 General Chemistry I for those students declaring one of these curricula after having completed CHEM 167 General Chemistry for Engineering Students.**

**Recommended choices by program:**
- Credit hours for graduation will be given for any one of the following without increasing a curriculum’s minimum number of credits required for graduation:
  - AER E 160 | Aerospace Engineering Problems With Computer Applications Laboratory | 3
  - A B E 160 | Systematic Problem Solving and Computer Programming | 3
  - C E 160 | Engineering Problems with Computational Laboratory | 3
  - CH E 160 | Chemical Engineering Problems with Computer Applications Laboratory | 3
  - ENGR 160 | Engineering Problems with Computer Applications Laboratory | 3
  - I E 148 | Information Engineering | 3

- CPR E 185 | Introduction to Computer Engineering and Problem Solving I | 3
- E E 185 | Introduction to Electrical Engineering and Problem-Solving I | 3
- M E 160 | Mechanical Engineering Problem Solving with Computer Applications | 3
- S E 185 | Problem Solving in Software Engineering | 3

***Students enrolled in the joint software engineering degree program will take , Honors students in A E R 101H Engineering Honors Orientation. Students in the general emphasis in C E have two chemistry/physics sequence options. The environmental emphasis requires Option 1.***

* Students who opt for PHYS 222 Introduction to Classical Physics II rather than CHEM 178 General Chemistry II, CHEM 178L Laboratory in College Chemistry II will increase the total number of credits required by 1.

### Aerospace Engineering Undergraduate Study

For undergraduate curriculum in aerospace engineering leading to the degree bachelor of science. This curriculum is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

The aerospace engineer is primarily concerned with the design, analysis, testing, and overall operation of vehicles which operate in air and space. The curriculum is designed to provide the student with an education in the fundamental principles of aerodynamics, flight dynamics, propulsion, structural mechanics, flight controls, design, testing, and space technologies. A wide variety of opportunities awaits the aerospace engineering graduate in research, development, design, production, sales, and management in the aerospace industry, and in many related industries in which fluid flow, control, structural, and transportation challenges play major roles.

Make To Innovate (M:2:I) is an exciting new program in the Aerospace Engineering Department that engages students in hands-on projects to augment their understanding of engineering fundamentals.

A cooperative education program in aerospace engineering is available in cooperation with government agencies and industry. The usual four-year curriculum is extended for students who participate in alternating industrial experience periods and academic periods. This arrangement offers valuable practical experience and financial assistance during the college years.

### Undergraduate Mission and Educational Objectives

The Department of Aerospace Engineering maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of continuous academic improvement to provide the best possible education for our students.

#### Mission statement:

The mission of the aerospace engineering program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.
Program Educational Objectives:
Within three to five years after graduation, Aerospace Engineering alumni will have become actively contributing, valued engineers showing professional growth or be actively pursuing an advanced degree in graduate school. They will have achieved this by:
- Utilizing their strong foundation in science, mathematics and engineering.
- Demonstrating teamwork, leadership, and integrity.
- Being aware of the societal, economic and environmental impact of their work.
- Demonstrating critical thinking and effective communication skills.
- Ensuring superior quality, customer satisfaction, and safety outcomes in their work.

Nondestructive Evaluation (NDE)
The NDE Minor (http://catalog.iastate.edu/collegeofengineering/non destructiveevaluationengineering) is multidisciplinary and open to undergraduates in the College of Engineering.

Graduate Study
The department offers graduate programs that lead to the degrees of master of engineering, master of science, and doctor of philosophy with major in aerospace engineering and minor work to students taking major work in other departments. For all graduate degrees, it is possible to establish a co-major program with another graduate degree-granting department. Within the aerospace program, students can specialize in one or more of the following areas: aerospace systems design, atmospheric and space flight dynamics, computational fluid dynamics, control systems, wind engineering, fluid mechanics, optimization, structural analysis, and non-destructive evaluation.

Master of Science and Master of Engineering
The Master of Science degree requires a thesis and has strong research emphasis. The Master of Science degree is recommended for students who anticipate entering a doctoral program later. The Master of Engineering degree does not require either research credits or a thesis and is intended for students who do not anticipate pursuing a doctoral degree. The Master of Engineering degree can be completed with coursework only or with a combination of coursework and creative component. Credits for creative component will be obtained by registering for AER E 599 Creative Component. A written report and an oral presentation will be given to the student’s graduate committee. At least 30 credits of acceptable graduate work are required for both the Master of Science and the Master of Engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (http://www.aere.iastate.edu/wp-content/blogs.dir/13/files/2011/09/Graduate-Handbook-Fall-2011.pdf).

Bachelor of Science/Master of Science Concurrent Degree Program
The department offers concurrent BS/MS and BS/ME degree programs (http://www.aere.iastate.edu/students/concurrent-degrees) and a concurrent BS/MBA degree program which offer an opportunity for well-qualified Iowa State juniors and seniors to begin working on a master’s degree before completing a bachelor’s degree. The concurrent degree programs reduce by one year the normal time period for completing both degrees separately.

Graduate Minor Work
Minor work for aerospace engineering majors is usually selected from mathematics, physics, electrical engineering, engineering mechanics, mechanical engineering, materials science, meteorology, computer science, and computer engineering.

Preparation for Graduate Work
The normal prerequisite for major graduate work in aerospace engineering is the completion of an undergraduate curriculum substantially equivalent to that required of aerospace engineering students at this university. Due to the diversity of interests of aerospace faculty, students whose prior undergraduate or graduate education has been in allied engineering and/or scientific fields may also qualify. In such cases, it may be necessary for the student to take additional work to provide the requisite aerospace background. A prospective graduate student is urged to specify the degree program and the specific field(s) of interest on the application for admission.

Courses are offered at the times stated in the course description. Where no specific time of offering is stated, the course may be offered during any semester provided there is sufficient demand.

Curriculum in Aerospace Engineering
Leading to the degree bachelor of science.

Total credits required: 129.0.
Any transfer credit courses applied to the degree program require a grade of C or better. See also Basic Program and Special Programs.

International Perspectives 1: 3 cr.
U.S. Diversity 1: 3 cr.
Communication Proficiency/Library requirement:

AER E 461: Modern Design Methodology with Aerospace Applications 3
AER E 462: Design of Aerospace Systems 3
E M 324: Mechanics of Materials 3
M E 231: Engineering Thermodynamics I 3

Total Credits: 44

Other Remaining Courses: 30 cr.

E M 274: Statics of Engineering 3
E M 345: Dynamics 3
MAT E 273: Principles of Materials Science and Engineering 3
AER E 161: Numerical, Graphical and Laboratory Techniques for Aerospace Engineering 3
AER E 361: Computational Techniques for Aerospace Design 3
AER E 362: Aerospace Systems Integration 3
3 credits from the following 3

AER E 412: Aerospace Vehicle Propulsion II
AER E 422: Vibrations and Aeroelasticity
AER E 423: Composite Flight Structures
AER E 426: Design of Aerospace Structures
AER E 432: Flight Control Systems II
AER E 442: V/STOL Aerodynamics and Performance
AER E 446: Computational Fluid Mechanics and Heat Transfer I
AER E 448: Fluid Dynamics of Turbomachinery
AER E 451: Astrodynamics II
AER E 464: Spacecraft Systems
AER E 481: Advanced Wind Energy: Technology and Design

Technical Electives (see below) 2 3
Career Electives (see below) 2 6

Total Credits: 30

Technical Electives, 3 cr. and Career Electives, 6 cr. selected from preceding AER E list or departmental-approved 300-level or above courses relevant to technical and career areas.

Seminar/Co-op/Internships/Flight Experience:

AER E 192: Aerospace Seminar R
AER E 291: Aerospace Advising Seminar R
AER E 292: Aerospace Advising Seminar R
AER E 301: Flight Experience R
AER E 391: Aerospace Advising Seminar R
AER E 392: Aerospace Advising Seminar R
AER E 491: Aerospace Advising Seminar R

Co-op and internships are optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list (http://www.aere.iastate.edu/students/undergraduate_program)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. 2.00 required including transfer courses.

See also: A 4-year plan of study grid showing course template by semester.

Courses primarily for undergraduates:

AER E 101H. Engineering Honors Orientation. Cr. R. F. Prereq: Membership in the Freshman Honors Program. Introduction to the College of Engineering and the Aerospace Engineering profession. Information concerning university, college, and department policies, procedures and resources with emphasis on the Freshman Honors Program. Topics include experiential education study abroad opportunities, and department mentorships.

AER E 112. Orientation to Learning and Productive Team Membership. (Cross-listed with CON E, FS HN, HORT, NREM). (2-0) Cr. 2. F.
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

AER E 160. Aerospace Engineering Problems With Computer Applications Laboratory. (2-0) Cr. 3. F.S. Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 142, MATH 165

AER E 160H. Aerospace Engineering Problems With Computer Applications Laboratory: Honors. (2-0) Cr. 3. F.S. Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 142, MATH 165

AER E 161. Numerical, Graphical and Laboratory Techniques for Aerospace Engineering. (2-2) Cr. 3. F.S. Prereq: AER E 160 or equivalent course
Computer solutions to aerospace engineering problems using the FORTRAN language and Matlab(R), with emphasis on numerical methods. Solid modeling with emphasis on aerospace design. Analysis of basic mathematical models and engineering problem solving. Written and oral technical reports, team projects.

AER E 161H. Numerical, Graphical and Laboratory Techniques for Aerospace Engineering: Honors. (2-2) Cr. 3. F.S. Prereq: AER E 160 or equivalent course
Computer solutions to aerospace engineering problems using the FORTRAN language and Matlab(R), with emphasis on numerical methods. Solid modeling with emphasis on aerospace design. Analysis of basic mathematical models and engineering problem solving. Written and oral technical reports, team projects.

AER E 192. Aerospace Seminar. Cr. R. S.
Experimental lab set-up, graphical skills. Academic program planning.

AER E 192H. Aerospace Seminar: Honors. Cr. R. S.
Experimental lab set-up, graphical skills. Academic program planning.

AER E 261. Introduction to Performance and Design. (3-0) Cr. 3. F.S. Prereq: AER E 161, MATH 166, PHYS 221
Introduction to aerospace disciplinary topics, including: aerodynamics, structures, propulsion, and flight dynamics with emphasis on performance. Written technical reports and team projects.

AER E 265. Scientific Balloon Engineering and Operations. (Cross-listed with MTEOR). (0-2) Cr. 1. Repeatable. F
Engineering aspects of scientific balloon flights. Integration of science mission objectives with engineering requirements. Operations team certification. FAA and FCC regulations, communications, and command systems. Flight path prediction and control.

AER E 290B. Aerospace Engineering Independent Study: In-flight training. Cr. 1-2. Repeatable. Prereq: AER E 301

AER E 290C. Aerospace Engineering Independent Study: Other. Cr. 1-2. Repeatable. Prereq: AER E 301

AER E 291. Aerospace Advising Seminar. Cr. R. F.
Academic program planning. Offered on a satisfactory-fail basis only.
AER E 298. Cooperative Education. 
Cr. R. F.S.SS. Prereq: Permission of department and Engineering Career Services
First professional work period in the cooperative education program. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

AER E 301. Flight Experience. 
Cr. R. F. Prereq: Credit or enrollment in AER E 355
Two hours of in-flight training and necessary ground instruction. Course content prescribed by the Aerospace Engineering Department. Ten hours of flight training certified in a pilot log book can be considered by the course instructor as evidence of satisfactory performance in the course. Offered on a satisfactory-fail basis only.

(3-0) Cr. 3. F. Prereq: Grade of C- or better in AER E 261 and MATH 265

(3-0) Cr. 3. S. Prereq: AER E 310, M E 231
Review of thermodynamics, energy equation, compressible flow, isentropic flow, normal and oblique shocks, Mach waves, expansion fans, ducts and nozzles, compressible slender body theory.

(3-0) Cr. 3. F. Prereq: E M 324
Determination of flight loads. Materials selection for flight applications. Analysis of flight structures including trusses, beams, frames, and shear panels employing classical and finite element methods.

AER E 322. Aerospa...
(2-2) Cr. 3. S. Prereq: E M 324; MAT E 273
Fabrication, testing and analysis of composite materials used in flight structures. Basic laminate theory of beams, plates and shells. Manufacturing and machining considerations of various types of composites. Testing of composites for material properties, strength and defects. Student projects required.

(1-6) Cr. 3. S. Prereq: E M 324
Detailed design and analysis of aerospace vehicle structures. Material selection, strength, durability and damage tolerance, and validation analysis. Design for manufacturability.

AER E 432. Flight Control Systems II.
(3-0) Cr. 3. F. Prereq: AER E 321

AER E 442. VSTOL Aerodynamics and Performance.
(3-0) Cr. 3. F. Prereq: AER E 355
Introduction to the aerodynamics, performance, stability, control and critical maneuvering characteristics of VSTOL vehicles. Topics include hovercrafts, jet flaps, ducted fans and thrust vectored engines.

AER E 446. Computational Fluid Mechanics and Heat Transfer I.
(3-0) Cr. 3. F. Prereq: AER E 161, AER E 310

AER E 448. Fluid Dynamics of Turbomachinery.
(Cross-listed with M E). (3-0) Cr. 3. S. Prereq: M E 335 or equivalent
Applications of principles of fluid mechanics and thermodynamics in performance analysis and design of turbomachines. Conceptual and preliminary design of axial and radial flow compressors and turbines using velocity triangles and through-flow approaches.

AER E 451. Astrodynamics II.
(3-0) Cr. 3. F. S. Prereq: AER E 351
Simple orbit determination and prediction. Advanced orbit maneuvers, single-, double-, and triple-impulse; fixed-impulse, finite-duration. 3-D rigid-body dynamics, Euler's equations, satellite stabilization and attitude control. Earth gravity field models and gravity harmonics, orbit perturbations, variational methods, relative orbital mechanics, Clohessy-Wiltshire equations.

AER E 461. Modern Design Methodology with Aerospace Applications.
(2-2) Cr. 3. F. S. Prereq: AER E 361, AER E 311, AER E 321, AER E 351, AER E 365
Introduction to modern engineering design methodology. Computational constrained optimal design approach including selection of objective function, characterization of constraint system, materials and strength considerations, and sensitivity analyses.

(1-4) Cr. 3. S. Prereq: AER E 461
Fundamental principles used in engineering design of aircraft, missile, and space systems. Preliminary design of aerospace vehicles. Engineering Ethics.

(3-0) Cr. 3. S. Prereq: AER E 351
An examination of spacecraft systems including attitude determination and control, power, thermal control, communications, propulsion, guidance, navigation, command and data handling, and mechanisms. Explanation of space and operational environments as they impact spacecraft design. Includes discussion of safety, reliability, quality, maintainability, testing, cost, legal, and logistics issues.

AER E 466. Multidisciplinary Engineering Design.
(Cross-listed with A B E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3.
Repeatable. F.S. Prereq: Student must be within two semesters of graduation and receive permission of instructor
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

AER E 467. Multidisciplinary Engineering Design II.
(Cross-listed with CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable, maximum of 2 times. F.S. Prereq: Student must be within two semesters of graduation or receive permission of instructor.
Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

(3-0) Cr. 3. F. Prereq: AER E 381 or senior classification in engineering or junior in engineering with a course in fluid mechanics
Advanced topics in wind energy, emphasis on current practices. Theoretical foundations for horizontal and vertical axis wind turbine. Design codes for energy conversion systems design, aerodynamic an structural load estimation, wind resource characterization wind farm design, optimization.

AER E 490. Aerospace Engineering Independent Study.
Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

AER E 490A. Aerospace Engineering Independent Study: Aero and/or Gas Dynamics.
Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

AER E 490B. Aerospace Engineering Independent Study: Propulsion.
Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

AER E 490C. Aerospace Engineering Independent Study: Aerospace Structures.
Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

AER E 490I. Aerospace Engineering Independent Study: Design.
Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

AER E 490O. Aerospace Engineering Independent Study: Other.
Cr. 1-6. Repeatable. Prereq: Junior or senior classification, approval of the department

AER E 491. Aerospace Advising Seminar.
Cr. R. F.S.
Academic program planning.
AER E 408. Cooperative Education.
Cr. R. Repeatable. F.S.S.S. Prereq: AER E 398, permission of department and Engineering Career Services
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

AER E 499. Senior Project.
Cr. 1-2. Repeatable. F.S. Prereq: Senior classification, credit or enrollment in AER 491
Development of aerospace principles and concepts through individual research and projects. Written report.

Courses primarily for graduate students, open to qualified undergraduates:

(Cross-listed with E M). (3-0) Cr. 3. F.
Prereq: E M 510 or E M 514 or E M 516

(Cross-listed with E M). (3-2) Cr. 4. Alt., S., offered even-numbered years. Prereq: E M 510 or E M 514 or E M 516
Fundamental concepts for force, displacement, stress, and strain measurements. Strain gages. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro and nano scale regimes.

AER E 521. Airframe Analysis.
(3-0) Cr. 3. F.
Prereq: AER E 421 or E M 424
Analysis of static stresses and deformation in continuous aircraft structures. Various analytical and approximate methods of analysis of isotropic and anisotropic plates and shells.

AER E 522. Design and Analysis of Composite Materials.
(3-0) Cr. 3. F.
Prereq: E M 324
Composite constituent materials, micro-mechanics, laminate analysis, hygrothermal analysis, composite failure, joining of composites, design of composite beams and plates, honeycomb core, manufacturing of composites, short fiber composites, and demonstration laboratory.

(3-0) Cr. 3. Prereq: MATH 385, proficiency in programming
Introduction to modern mesh generation techniques. Structured and unstructured mesh methods, algebraic and PDE methods, elliptic and hyperbolic methods, variational methods, error analysis, Delaunay triangulation, data structures, geometric modeling with B-spline and NURBS surfaces, surface meshing.

AER E 525. Finite Element Analysis.
(Cross-listed with E M). (3-0) Cr. 3. S.
Prereq: E M 425, MATH 385
Variational and weighted residual approach to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

AER E 531. Automatic Control of Flight Vehicles.
(3-0) Cr. 3. S.
Prereq: AER E 331
Applications of classical and modern linear control theory to automatic control of flight vehicles. Spacecraft attitude control. Control of flexible vehicles. Linear-quadratic regulator design applications.

(Cross-listed with M E). (3-0) Cr. 3. Alt., S., offered even-numbered years. Prereq: AER E 311

AER E 541. Incompressible Flow Aerodynamics.
(3-0) Cr. 3. F.
Prereq: AER E 311 or M E 335

AER E 545. Advance Experimental Technique for Thermal-Fluid Studies.
(3-0) Cr. 3. Alt., F., offered odd-numbered years. Prereq: AER E 311 or M E 335 or E M 378
Introduction of various experimental techniques widely used for fluid mechanics, aerodynamics, heat transfer, and combustion studies. Pressure gauge and transducers; Pitot tube; hot wire anemometry; shadowgraph and Schlieren Photography; laser Doppler velocimetry; particle image velocimetry (PIV); advanced PIV techniques (stereo PIV, 3-D PIV, holographic PIV, microscopic PIV); laser induced fluorescence; pressure sensitive painting, temperature sensitive painting; molecular tagging velocimetry; molecular tagging thermometry. Extensive application and demonstration laboratory experiments will be included.

AER E 546. Computational Fluid Mechanics and Heat Transfer I.
(Cross-listed with M E). (3-0) Cr. 3. F.
Prereq: M E 355

AER E 547. Computational Fluid Mechanics and Heat Transfer II.
(Cross-listed with M E). (3-0) Cr. 3. Alt., S., offered odd-numbered years. Prereq: AER E 546
Application of computational methods to current problems in fluid mechanics and heat transfer. Methods for solving the Navier-Stokes and reduced equation sets such as the Euler, boundary layer, and parabolized forms of the conservation equations. Introduction to relevant aspects of grid generation and turbulence modeling.

(3-0) Cr. 3. F.
Prereq: AER E 351

(3-0) Cr. 3. F.
Prereq: AER E 331

AER E 564. Fracture and Fatigue.
(Cross-listed with E M, M E, M S E). (3-0) Cr. 3. Alt., F., offered even-numbered years. Prereq: M E 324 and either MAT E 216 or MAT E 273 or MAT E 392.
Prereq:
Undergraduates: Permission of instructor
Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

AER E 565. Systems Engineering and Analysis.
(Cross-listed with C E, I E). (3-0) Cr. 3. Prereq: Coursework in basic statistics
Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

AER E 566. Avionics Systems Engineering.
(Cross-listed with E E). (3-0) Cr. 3. S.
Prereq: E E 565
Avionics functions. Applications of systems engineering principles to avionics. Top down design of avionics systems. Automated design tools.

(Cross-listed with E M, M S E). (3-0) Cr. 3. Alt., S., offered even-numbered years. Prereq: E M 324

AER E 570. Wind Engineering.
(Cross-listed with E M). (3-0) Cr. 3. Alt., S., offered odd-numbered years. Prereq: E M 378, E M 345
Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.
AER E 572. Turbulence.
(Cross-listed with CH E, (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: AER E 543 or M E 538) Qualitative features of turbulence. Statistical representation of turbulent velocity fields: averages, moments, correlations, length and time scales and the energy cascade. Averaged equations of motion, closure requirements, Reynolds averaged models. Homogeneous shear flows, free shear flows, boundary layers. Numerical simulation of turbulence: DNS, LES, DES.

AER E 574. Optimal Control.

AER E 575. Introduction to Robust Control.

AER E 577. Linear Systems.

AER E 578. Nonlinear Systems.

AER E 590. Aerospace Engineering Independent Study: Special Topics.
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590A. Aerospace Engineering Independent Study: Aero and/or Gas Dynamics.
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590B. Aerospace Engineering Independent Study: Propulsion.
Cr. 1-5. Repeatable, maximum of 3 times.

AER E 590C. Aerospace Engineering Independent Study: Aerospace Structures.
Cr. 1-5. Repeatable, maximum of 3 times.

Cr. 1-5. Repeatable, maximum of 3 times.
AER E 697. Engineering Internship. Cr. R. Repeatable. Prereq: Permission of DOGE (Director of Graduate Education), graduate classification. One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

Agricultural Engineering

Undergraduate Study

For the undergraduate curriculum in agricultural engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Program Criteria for Agricultural Engineering Programs by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

Curriculum Educational Goal, Objectives, and Learning Outcomes:

Goal: To educate students in the analysis and design of machinery, animal housing, and environmental systems for the production, processing, storage, handling, distribution, and use of food, feed, fiber and other biomaterials, and the management of related natural resources, by integrating basic physical and biological sciences with engineering design principles.

Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their agricultural engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Student Outcomes: At graduation, students will have developed and demonstrated these outcomes:

(a) an ability to apply knowledge of mathematics, science, and engineering;
(b) an ability to design and conduct experiments, as well as to analyze and interpret data;
(c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
(d) an ability to function on multidisciplinary teams;
(e) an ability to identify, formulate, and solve engineering problems;
(f) an understanding of professional and ethical responsibility;
(g) an ability to communicate effectively;
(h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
(i) a recognition of the need for, and an ability to engage in life-long learning;
(j) a knowledge of contemporary issues;
(k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Graduates find employment in diverse ag- and bio-related industries and government agencies dealing with agricultural machines and buildings, animal and environmental control, grain processing and handling, soil and water resources, food, biorenewables, and biotechnology. Their work involves engineering design, development, testing, research, manufacturing, consulting, sales, and service. Students are highly encouraged to participate in either cooperative education or internship programs.

The department also offers a bachelor of science curriculum in biological systems engineering. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology.

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. A concurrent bachelor of science and master of business administration program is also offered by the department. Refer to Graduate Study for more information.

Graduate Study

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at http://www.abe.iastate.edu/.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work. Corresponding numbers for the master of engineering program are 32 and 27.

For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human computer interaction, and toxicology (see Index).

Curriculum in Agricultural Engineering

Administered by the Department of Agricultural and Biosystems Engineering. Leading to the degree bachelor of science.

Total credits required: 128 cr. Any transfer credit courses applied to the degree program require a grade of C or better. See also Basic Program and Special Programs.

International Perspectives: 3 cr. 1

U.S. Diversity: 3 cr. 1

Communication Proficiency/Library requirement:

Co-op/Internships (Optional)

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. Diversity, International Perspectives and Social Science/Humanities courses may not be taken Pass/Not Pass.

2. Choose from department approved list. (http://www.abe.iastate.edu/undergraduate-students/agricultural-engineering/ae-curricula)

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

4. 2.00 GPA required including transfer courses.

See also: A 4-year plan of study grid showing course template by semester for an agricultural power and machinery option in Agricultural Engineering. See also: A 4-year plan of study grid showing course template by semester for a land and water resources engineering option in Agricultural Engineering. See also: A 4-year plan of study grid showing course template by semester for an animal production systems engineering option in Agricultural Engineering.

Courses primarily for undergraduates:

A B E 110. Experiencing Agricultural and Biosystems Engineering. (0-2) Cr. 1. S. Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of agricultural and biosystems engineering. Report writing, co-ops, internships, careers, registration planning.

A B E 160. Systematic Problem Solving and Computer Programming. (2-2) Cr. 3. S. Prereq: MATH 165 or enrollment in MATH 142

Engineering approach to problem solution and presentation in the context of real world problems. Introduction to basic principles from statics, projectile motion, conservation of mass and energy and electricity and magnetism. Use of spreadsheet programs and computer programming language(s) to solve and present engineering problems. Introduction to interfacing computer to sensor systems for data collection.

A B E 170. Engineering Graphics and Introductory Design. (2-2) Cr. 3. Prereq: Satisfactory scores in math placement assessments; credit or enrollment in MATH 142.

Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

A B E 201. Preparing for Workplace Seminar. (Cross-listed with TSM). (1-0) Cr. 1. F.S. Prereq: Prereq: Prereq: Sophomore classification in AE, AST, BSE, or I Tec

A B E 216. Fundamentals of Agricultural and Biosystems Engineering. (2-2) Cr. 3. F. Prereq: A B E 160 or permission of the instructor

Application of mathematics and engineering sciences to mass and energy balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of heat and mass transfer, air and water vapor systems; animal production systems, grain systems; food systems, hydrologic systems, and bioprocessing.

A B E 216. Project Management & Design in Agricultural and Biosystems Engineering. (1-2) Cr. 2. S. Prereq: A B E 216

Project management - critical path, Gantt charts, resource allocations, basic project budgeting, and project management software. Engineering design approaches. Open-ended design projects to demonstrate the preceding principles through application of technical concepts taught in prerequisite coursework.

A B E 271. Engineering Applications of Parametric Solid Modeling. (1-2) Cr. 1. F.S. Prereq: A B E 170 or TSM 116 or equivalent

8 week course. Creating, editing, and documenting part and assembly models using Solidworks.

A B E 272. Parametric Solid Models, Drawings, and Assemblies Using Pro/ENGINEER. (1-2) Cr. 1. F.S. Prereq: A B E 170 or TSM 116 or equivalent

8 week-course. Applications of Pro/ENGINEER software. Create solid models of parts and assemblies. Utilize the solid models to create design documentation: standard drawing views, dimensions, and notes.

First professional work period in the cooperative education program. Students must register for this course before commencing work.

A B E 316. Applied Numerical Methods for Agricultural and Biosystems Engineering. (2-2) Cr. 3. F. Prereq: A B E 160, Math 266

Computer aided solution of agricultural engineering problems by use of numerical techniques and mathematical models. Systems analysis and optimization applicable to agricultural and biological systems.

A B E 325. Biorenewable Systems. (Cross-listed with AGRON, AN S, BUSAD, ECON, TSM). (3-0) Cr. 3. F. Prereq: AGRON 101, CHEM 163 or higher, MATH 140 or higher

Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

Principles of operation, design, selection, testing and evaluation of agricultural field machinery and systems. Functional and mechanical performances. Crop and soil interaction with machines. Machine systems, including land preparation, crop establishment, crop protection, harvesting and post-harvest, materials handling systems.
A B E 342. Agricultural Tractor Power. (2-3) Cr. 3. S. Prereq: CH E 381 or M E 231 Thermodynamic principles and construction of tractor engines. Fuels, combustion and lubrication. Kinematics and dynamics of tractor power applications; drawbar, power take-off and traction mechanisms.

A B E 380. Principles of Biological Systems Engineering. (3-0) Cr. 3. S. Prereq: A B E 216 (or equivalent) and MATH 266 or 267 Unit-operation analysis of biological systems, through the study of mass, energy, and information transport in bioresource production and conversion systems. Quantification and modeling of biomass production, ecological interactions, and bioreactor operations.

A B E 388. Sustainable Engineering and International Development. (Cross-listed with C E, E, M, E, MAT, E). (2-2) Cr. 3. F. Prereq: Junior classification in engineering Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement.

A B E 396. Summer Internship. Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services Summer professional work period.

A B E 397. Engineering Internship. Cr. R. Repeatable. F.S. Prereq: A B E 218 and permission of department and Engineering Career Services One semester maximum per academic year professional work period.

A B E 398. Cooperative Education. Cr. R. F.S.SS. Prereq: A B E 298, permission of department and Engineering Career Services Second professional work period in the cooperative education program. Students must register for this course before commencing work.

A B E 403. Modeling and Controls for Agricultural Systems. (Dual-listed with A B E 503). (2-2) Cr. 3. Alt. S., offered odd-numbered years. Prereq: A B E 363, MATH 266 Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A B E 404. Instrumentation for Agricultural and Biosystems Engineering. (Dual-listed with A B E 504). (2-2) Cr. 3. F. Prereq: A B E 363 or CPR E 261 Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A B E 408. GIS and Natural Resources Management. (Dual-listed with A B E 508). (Cross-listed with ENSCI). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS.

A B E 411. Bioprocessing and Bioproducts. (Dual-listed with A B E 511). (Cross-listed with C E). (3-0) Cr. 3. F. Prereq: A B E 216, C E 326 or equivalent, MATH 160 or MATH 165, CHEM 167 or higher, BIOL 173 or BIOL 211 or higher, senior or graduate classification Sustainability, cleaner production. Taxonomy, kinetics, metabolism, microbial cultivation, aerobic and anaerobic fermentation. Antibiotics, food supplements, fermented foods, vitamin production. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

A B E 416. Agricultural & Biosystems Engineering Design II. (1-2) Cr. 2. F.S. Prereq: A B E 415 (majors only) Selection of promising solutions to design problems identified in 415 for development by design teams. Presentation of designs through oral and written reports and prototypes.

A B E 424. Air Pollution. (Dual-listed with A B E 524). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424A. Air Pollution: Air Quality and Effects of Pollutants. (Dual-listed with A B E 524A). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424B. Air Pollution: Climate Change and Causes. (Dual-listed with A B E 524B). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424C. Air Pollution: Transportation Constraints. (Dual-listed with A B E 524C). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424D. Air Pollution: Off-gas Treatment Technology. (Dual-listed with A B E 524D). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424E. Air Pollution: Agricultural Sources of Pollution. (Dual-listed with A B E 524E). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
(Dual-listed with A B E 531). (2-3) Cr. 3. F. Prereq: E M 379 or CH E 356

A B E 432. Nonpoint Source Pollution and Control.
(Dual-listed with A B E 532). (3-0) Cr. 3. F. Prereq: A B E 431 or C E 372
Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

(Dual-listed with A B E 536). (2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A B E 431/A B E 531
Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

A B E 451. Food and Bioprocess Engineering.
(Dual-listed with A B E 551). (3-0) Cr. 3. F. Prereq: A B E 216 and M E 436 or CH E 357, or FS HN 351 and MATH 266 or MATH 267
Application of engineering principles and mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes. Term paper required for graduate credit.

A B E 466. Multidisciplinary Engineering Design.
(Cross-listed with A E R E E, C P R E E, E E, E N G R, I E E, M E E, M A T E E). (1-4) Cr. 3. Repeatable. F.S. Prereq: Student must be within two semesters of graduation and receive permission of the instructor
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, computer models and engineering drawings.

A B E 469. Grain Processing and Handling.
(Dual-listed with A B E 569). (2-3) Cr. 3. S. Prereq: A B E 216
Cereal grain and oilseed properties, quality measurement, processing, and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soybean oil extraction. Grain handling systems.

(Dual-listed with A B E 572). (3-0) Cr. 3. Alternating. S., offered even-numbered years.
Prereq: A B E 216, M E 231
Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual and group projects required for graduate credit.

(Dual-listed with A B E 578). (3-0) Cr. 3. Alternating. S., offered odd-numbered years.
Prereq: A B E 216, E M 324

A B E 480. Engineering Analysis of Biological Systems.
(Cross-listed with ENSECI). (2-2) Cr. 3. F. Prereq: A B E 380 or permission of the instructor
System-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues.

A B E 490. Agricultural Engineering Independent Study.
Cr. 1-4. Repeatable. Independent Study.

A B E 490C. Agricultural Engineering Independent Study: Computer-aided Design.
Cr. 1-4. Repeatable. Guided instruction in computer-aided design.

Cr. 1-4. Repeatable. Guided instruction in agricultural engineering topics for honors students.

A B E 490P. Agricultural Engineering Independent Study: Power and Machinery Engineering.
Cr. 1-4. Repeatable. Guided instruction in power and machinery engineering.

A B E 490Q. Agricultural Engineering Independent Study: Structures.

Cr. 1-4. Repeatable. Independent Study.

A B E 490S. Agricultural Engineering Independent Study: Environmental and Natural Resources Systems.
Cr. 1-4. Repeatable. Guided instruction in environmental and natural resources systems.

Cr. 1-4. Repeatable. Independent Study.

A B E 496. Agricultural and Biosystems Engineering Travel Course.
Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D. Meets International Perspectives Requirement.

A B E 496A. Agricultural and Biosystems Engineering Travel Course: Pre-departure.
Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D. Meets International Perspectives Requirement.

A B E 496B. Agricultural and Biosystems Engineering Travel Course: Travel (R credit).
Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D. Meets International Perspectives Requirement.

A B E 496C. Agricultural and Biosystems Engineering Travel Course: Post-travel.
Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D. Meets International Perspectives Requirement.

A B E 496D. Agricultural and Biosystems Engineering Travel Course: Combination (A/B/C).
Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor
Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D. Meets International Perspectives Requirement.
A B E 498. Cooperative Education.
Cr. R. Repeatable. F.S.S. Prereq: A B E 398, permission of department and Engineering Career Services
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduates:

(Cross-listed with BRT). (3-0) Cr. 3. S. Prereq: Undergraduate training in an engineering or physical or biological discipline or degrees in agriculture or economics
Introduction to the science and engineering of converting biorenewable resources into bioenergy and biobased products. Survey of biorenewable resource base and properties; description of biobased products; methods of biorenewable resource production; processing technologies for fuels, chemicals, materials, and energy; environmental impacts; economics of biobased products and bioenergy.

(Dual-listed with A B E 403). (2-2) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A B E 363, MATH 266
Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A B E 504. Instrumentation for Agricultural and Biosystems Engineering.
(Dual-listed with A B E 404). (2-2) Cr. 3. F. Prereq: A B E 363 or CPR E 281
Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A B E 506. Applied Computational Intelligence.
(2-3) Cr. 3. Alt. F., offered even-numbered years.
Prereq: A B E 316 or equivalent, MATH 166, STAT 305
Applications of biologically inspired computational intelligence tools for data mining, system modeling, and optimization for agricultural, biological and other engineered systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree learning. Fundamental Machine Vision techniques will be introduced in the first part of course and be integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation.

A B E 508. GIS and Natural Resources Management.
(Dual-listed with A B E 408). (Cross-listed with ENSCI). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment
Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS.

(Dual-listed with A B E 410). Cr. 3.
System architecture and design of electronics used in agricultural machinery and production systems. Emphasis on information technology and systems integration for automated agriculture processes. Design of Controller Area Network (CAN BUS) communication systems and discussion of relevant standards (ISO 11883 and SAE J1939). Application of technologies for sensing, distribution control, and automation of agricultural machinery will be emphasized.

A B E 511. Bioprocessing and Bioproducts.
(3-0) Cr. 3. F. Prereq: A B E 216, C E 326 or equivalent, MATH 160 or MATH 165, CHEM 167 or higher, BIOL 173 or BIOL 211 or higher, senior or graduate classification

(Cross-listed with AGRON, AN S, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: SUSAG 509
Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

A B E 524. Air Pollution.
(Dual-listed with A B E 424). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above
1 cr. per module. Module A prerequisite for all modules; module B prerequisite for D and E.

A B E 524A. Air Pollution: Air quality and effects of pollutants.
(Dual-listed with A B E 424A). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above

A B E 524B. Air Pollution: Climate change and causes.
(Dual-listed with A B E 424B). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: C E 524A; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above

A B E 524C. Air Pollution: Transportation constraints.
(Dual-listed with A B E 424C). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: C E 524A; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above

A B E 524D. Air Pollution: Off-gas treatment technology.
(Dual-listed with A B E 424D). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above
1 cr. per module. Module A prerequisite for all modules; module B prerequisite for D and E.

A B E 524E. Air Pollution: Agricultural sources of pollution.
(Dual-listed with A B E 424E). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above
1 cr. per module. Module A prerequisite for all modules; module B prerequisite for D and E.

(Dual-listed with A B E 431). (Cross-listed with ENSCI). (2-3) Cr. 3. F. Prereq: E M 378 or CH E 356

A B E 532. Nonpoint Source Pollution and Control.
(Dual-listed with A B E 432). (3-0) Cr. 3. Prereq: A B E 431 or C E 372
Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds; computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

(Cross-listed with ENSCI). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: C E 372, MATH 266
Soil erosion processes, modified universal soil loss equation and its application to conservation planning, sediment properties, initiation of sediment motion and over land flow, flow in alluvial channels and theory of sediment transport, channel stability, reserves sedimentation, wind erosion, BMPs for controlling erosion.

(Dual-listed with A B E 436). (3-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: A B E 431/A B E 531
Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample collection and testing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.
A B E 537. Total Maximum Daily Load (TMDL) Development and Implementation. (2-2) Cr. 3. Alt. F., offered odd-numbered years. Prereq: CE 372 or equivalent. A project-based course to develop a water quality improvement plan. The legislative and judicial basis of the Total Maximum Daily Load (TMDL) program, different approaches for TMDL development, data needs and sources, SWAT modeling, and principles and techniques for implementation of water quality improvement plans.

A B E 551. Food and Bioprocess Engineering. (Dual-listed with A B E 451). (3-0) Cr. 3. F. Prereq: A B E 216 and M E 436 or CH E 357, or FS HN 351 and MATH 266 or MATH 267. Application of engineering principles and mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes. Term paper required for graduate credit.

A B E 556. Pretreatment of Biomass. (1-2) Cr. 2. S. Prereq: A B E 216 or equivalent. Review of lignocellulosic chemistry; chemical and physical impacts of pretreatment; impact of pretreatment on downstream processing; pretreatment economics. Lab experiments using current and novel pretreatment methods.

A B E 580. Engineering Analysis of Biological Systems. (3-0) Cr. 3. F. Prereq: A B E 216; MATH 286; BIOL 211 or BIOL 212; M E 231. Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues. Students enrolled in ABE 580 will be required to answer additional exam questions and report on two journal articles.

A B E 596. Technical Communications for a Master's Degree. (Cross-listed with TSM). Cr. 1. F.S.SS. A technical paper draft based on the M.S. thesis or creative component is required of all master's students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

Courses for graduate students:

A B E 601. Graduate Seminar. (Cross-listed with TSM). (1-0) Cr. 1. F. Keys to writing a good MS thesis or PhD dissertation. How to begin formulating research problems. Discussion of research problems and broader impacts, review of literature, identifying knowledge gaps and needs, long-term goals, research hypotheses, objectives, rationale and significance, methods, procedures, data analysis, and reporting results. Presentation of research proposal in different formats. Using peer review and responding to feedback.

A B E 610. Foundations of Sustainable Agriculture. (Cross-listed with AGRON, ANTHR, SOC, SUSAG). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor. Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

A B E 697. Engineering Internship. Cr. F. Repeatable. Prereq: Permission of department chair, graduate classification. One semester and one summer maximum per academic year professional work period.

A B E 698. Technical Communications for a Doctoral Degree. (Cross-listed with TSM). Cr. 1. F.S.SS. A technical paper draft based on the dissertation is required of all Ph.D. students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on the dissertation is required of all Ph.D. students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

A B E 699S. Research: Environment and Natural Resources. Cr. arr. Repeatable. Guided graduate research in environment and natural resources.

Bioengineering

http://www.eng.iastate.edu/bioengineering/

Minor supervised by an interdisciplinary faculty committee, administered by Chemical and Biological Engineering.

The Bioengineering minor is a unique opportunity for engineering students to acquire a multi-disciplinary engineering and life sciences background for entering the field of biomedical engineering.

Undergraduate Study

The program is open to all undergraduate engineering students at Iowa State University. This minor will provide students with a foundation of core biology and engineering relevant to further study in biomedical engineering along with an introduction to the application of engineering principles to biomedical problems from a multidisciplinary perspective as well as the applications within the majors of the participating departments. Minor requirements are as follows:

A minimum of 16 cr. meeting the six requirements below with a minimum of 9 of those credits not being used to meet degree requirements and a minimum of 6 cr. at the 300 level or above. For most students this last stipulation will probably result in 16 cr. being taken.

BIOL 212 Principles of Biology II 3
BIOE/CH E 220 Introduction to Biomedical Engineering 3
BIOL 256 Fundamentals of Human Physiology 3
INTRO ENGR ELEC * 3
ADV ENGR ELEC ** 3
PROF ELEC *** 1-3

* A second (Introductory) engineering course from a department other than that of your major that is not duplicative of material in a course taken in your own department. The topic of the course should have ready application to later BME-related electives in that discipline (MATE 273; E M 274 or 324; CH E 210, E E 201 or 230; or other courses approved by Minor Chair).

** 300-500 level engineering course with clear biomedical engineering application (BIOE 325, 341, 341L, 352, 411, 428, 450, 450L, 490; CH E 440, 542; MAT E 468; IE 571; or other courses approved by Minor Chair).

*** 300-500 level engineering or life sciences course with clear biomedical engineering application OR BIOE 490 OR departmental 490 with biomedical engineering topic OR 200+ level life sciences laboratory course (If a 200-level course is chosen here, the student will need to meet the required 6 cr. of 300+ courses by substitution of a higher-level course for the other requirements or by taking an additional course.), OR 300-500 level BME courses, which may be offered on-line from the University of Iowa.

Courses primarily for undergraduates:

BIOE 220. Introduction to Biomedical Engineering.
(Cross-listed with CH E). (3-0) Cr. 3. S. Prereq: BIOE 102, CH E 111 or 112.

BIOE 225. Fundamentals of Human Physiology.
(3-0) Cr. 3. Prereq: BIOE 220, concurrent enrollment in BIOE 225

BIOE 225L. Introduction to Biomedical Engineering.
(3-0) Cr. 3. S. Prereq: E E 201 or 230; or other courses approved by Minor Chair.

BIOE 240. Systems Biology for Engineering.
(Cross-listed with CH E E 201). (3-0) Cr. 1. F, S. Prereq: BIOE 220, concurrent enrollment in BIOE 225

BIOE 256. Fundamentals of Human Physiology.
(3-0) Cr. 3. Prereq: BIOE 220, concurrent enrollment in BIOE 225

BIOE 325. Introduction to Biomedical Engineering II.
(3-0) Cr. 3. Prereq: BIOE 220, concurrent enrollment in BIOE 225

BIOE 325L. Introduction to Biomedical Engineering II.
(3-0) Cr. 3. S. Prereq: E E 201 or 230; or other courses approved by Minor Chair.

BIOE 341. BioMEMS and Nanotechnology.
(3-0) Cr. 3. Prereq: BIOE 220

BIOE 341L. BioMEMS and Nanotechnology Laboratory.
(3-0) Cr. 1. Prereq: BIOE 220, concurrent enrollment in BIOE 341

BIOE 352. Molecular, Cellular and Tissue Biomechanics.
(3-0) Cr. 3. Prereq: BIOE 220, E M 324, MAT E 273

BIOE 367. Bioprocessing and Bioproduccts.
(3-0) Cr. 3. F, S. Prereq: A E 216 or equivalent, MATH 160 or MATH 165, one of CHEM 167 or higher, BIOL 173 or BIOI 211 or higher or BRT 501, senior or graduate classification

BIOE 368. Image Processing with Biomedical Applications.
(3-0) Cr. 3. Prereq: E E 324

BIOE 411. Bioprocessing and Bioproduccts.
(3-0) Cr. 3. Prereq: A E 216 or equivalent, MATH 160 or MATH 165, one of CHEM 167 or higher, BIOL 173 or BIOI 211 or higher or BRT 501, senior or graduate classification

BIOE 428. Image Processing with Biomedical Applications.
(3-0) Cr. 3. Prereq: E E 324

BIOE 440. Biomedical Applications of Chemical Engineering.
(Cross-listed with CH E). (3-0) Cr. 3. S. Prereq: E E 201, MATH 266, PHYS 222

BIOE 428. Image Processing with Biomedical Applications.
(3-0) Cr. 3. Prereq: E E 324

BIOE 450. Biomaterials.
(3-0) Cr. 3. Prereq: BIOE 220

BIOE 450L. Biomaterials Laboratory.
(3-0) Cr. 1. Prereq: BIOE 220, concurrent enrollment in BIOE 450

BIOE 450L. Biomaterials Laboratory.
(3-0) Cr. 1. Prereq: BIOE 220, concurrent enrollment in BIOE 450

BIOE 456. Biomedical Imaging.
(3-0) Cr. 3. Prereq: MAT E 216 or MAT E 273 or MAT E 392

BIOE 490. Independent Study.
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S. Prereq: permission of chair for the bioengineering minor

Investigation of biomedical engineering topics of special interest to student and supervising faculty member with a final written report.

Biological Systems Engineering

Undergraduate Study

For the undergraduate curriculum in biological systems engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Program Criteria for Biological Systems Engineering Programs by the Engineering Accreditation Commission of ABET, http://www.abet.org/.
Curriculum Educational Goal, Objectives, and Learning Outcomes

Biological Systems Engineering integrates life sciences with engineering to solve problems related to, or using, biological systems. These biological systems may include microbes, plants, animals, humans and/or ecosystems. Biological systems engineers have a worldview shaped by an understanding of fundamental principles of engineering and life-sciences. They use their understanding of engineering to analyze organisms or ecosystems, and their knowledge of biological systems to inspire and inform their designs. They approach engineering design from a biological systems perspective, appreciating the complexity of biological systems and developing solutions that accommodate and anticipate the adaptability of biological systems.

Goal: To educate students to solve problems related to biorenewables production and processing, water quality, environmental impacts of the bioeconomy, food processing, and biosensors, and in so doing to prepare students for professional practice and post-graduate educational opportunities.

Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their biological systems engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Student Outcomes: At graduation, students will have developed and demonstrated:
(a) an ability to apply knowledge of mathematics, science, and engineering;
(b) an ability to design and conduct experiments, as well as to analyze and interpret data;
(c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
(d) an ability to function on multidisciplinary teams;
(e) an ability to identify, formulate, and solve engineering problems;
(f) an understanding of professional and ethical responsibility;
(g) an ability to communicate effectively;
(h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
(i) a recognition of the need for, and an ability to engage in life-long learning;
(j) a knowledge of contemporary issues;
(k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Well-qualified juniors and seniors in biological systems engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in biological systems engineering and a master of science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

A concurrent bachelor of science and master of business administration program is also offered by the department.

The department also offers a bachelor of science curriculum in agricultural engineering. See College of Engineering, Curricula. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology. See College of Agriculture and Life Sciences, Curricula.

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human computer interaction, and toxicology (see Index).

Graduate Study

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at http://www.abse.iastate.edu/.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

Curriculum in Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering. Leading to the degree bachelor of science.

Total credits required: 128 cr. Any transfer credit courses applied to the degree program require a grade of C or better. See also Basic Program and Special Programs.

International Perspectives: 3 cr.  
U.S. Diversity: 3 cr.  
Communication Proficiency/Library requirement:  
ENGL 150 Critical Thinking and Communication * 3  
ENGL 250 Written, Oral, Visual, and Electronic Composition * 3  
LIB 160 Information Literacy 1  
One of the following (minimum grade of C) 3  
AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences  
ENGL 309 Report and Proposal Writing  
MKT 343 Personal Sales  
ENGL 314 Technical Communication or SP CM 212 Fundamentals of Public Speaking  
* with a minimum grade of C in each course  
** See Basic Program for credits

Social Sciences and Humanities: 12 cr.  
3 credits from international perspectives-university approved list 3  
3 credits from U.S. diversity-university approved list 3  
6 credits from Social Sciences and Humanities courses-department approved list 6  
Total Credits 12

Basic Program: 27 cr.  
Complete with 2.00 GPA including transfer courses:  
CHEM 167 General Chemistry for Engineering Students 4  
or CHEM 177 and CHEM 178  
ENGL 150 Critical Thinking and Communication * 3  
ENGL 250 Written, Oral, Visual, and Electronic Composition * 3  
ENGR 101 Engineering Orientation R  
A B E 160 Systematic Problem Solving and Computer Programming 3  
LIB 160 Information Literacy 1  
MATH 165 Calculus I 4  
MATH 166 Calculus II 4  
PHYS 221 Introduction to Classical Physics I 5  
Total Credits 27  
* see above for grade requirements

Biological, Math and Physical Science: 20 cr.  
BIOL 212 Principles of Biology II 3  
CHEM 167L Laboratory in General Chemistry for Engineering 1  
or CHEM 177L Laboratory in General Chemistry I  
MATH 267 Elementary Differential Equations and Laplace Transforms 4  
PHYS 222 Introduction to Classical Physics II 5  
MICRO 302 Biology of Microorganisms 3  
MICRO 302L Microbiology Laboratory 1
### Biological Systems Engineering Core: 35 cr. 4

### Co-op/internships (Optional)

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. Diversity, International Perspectives and Social Science/Humanities courses may not be taken Pass/Not Pass.
2. Choose from department approved list. (http://www.abe.iastate.edu/undergraduate-students/biological-systems-engineering/bse-curricula)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. 2.00 GPA required including transfer courses.

See also: A 4-year plan of study grid showing course template by semester for Biological Systems Engineering.

### Courses primarily for undergraduates:

#### A B E 110. Experiencing Agricultural and Biosystems Engineering.

(0-2) Cr. 1. S.

Laboratory-based, team-oriented experiences in a spectrum of topics common to the practice of agricultural and biosystems engineering. Report writing, co-ops, internships, careers, registration planning.

(2-2) Cr. 3. S. Prereq: MATH 165 or enrollment in MATH 142

Engineering approach to problem solution and presentation in the context of real world problems. Introduction to basic principles from statics, projectile motion, conservation of mass and energy and electricity and magnetism. Use of spreadsheet programs and computer programming language(s) to solve and present engineering problems. Introduction to interfacing computers to sensor systems for data collection.

(2-2) Cr. 3. Prereq: Satisfactory scores in math placement assessments; credit or enrollment in MATH 142.

Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

#### A B E 201. Preparing for Workplace Seminar.

(Cross-listed with TSM). (1-0) Cr. 1. F.S. Prereq: Prereq: Sophomore classification in AE, AST, BSE, or I Tec

A B E 216. Fundamentals of Agricultural and Biosystems Engineering. (2-2) Cr. 3. F. Prereq: A B E 160 or permission of the instructor. Application of mathematics and engineering sciences to mass and energy balances in agricultural and biological systems. Emphasis is on solving engineering problems in the areas of heat and mass transfer, air and water vapor systems; animal production systems, grain systems; food systems, hydronic systems, and bioprocessing.

A B E 218. Project Management & Design in Agricultural and Biosystems Engineering. (1-2) Cr. 2. S. Prereq: A B E 216. Project management - critical path, Gantt charts, resource allocations, basic project budgeting, and project management software. Engineering design approaches. Open-ended design projects to demonstrate the preceding principles through application of technical concepts taught in prerequisite coursework.

A B E 272. Parametric Solid Models, Drawings, and Assemblies Using Pro/ENGINEER. (1-2) Cr. 1. F.S. Prereq: A B E 170 or TSM 116 or equivalent 8 week-course. Applications of Pro/ENGINEER software. Create solid models of parts and assemblies. Utilize the solid models to create design documentation: standard drawing views, dimensions, and notes.

A B E 298. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department and Engineering Career Services First professional work period in the cooperative education program. Students must register for this course before commencing work.

A B E 325. Biorenewable Systems. (Cross-listed with AGRON, AN S, BUSAD, ECON, TSM). (3-0) Cr. 3. F. Prereq: ECON 101, CHEM 163 or higher, MATH 140 or higher Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, and transportation/logistics.

A B E 342. Agricultural Tractor Power. (2-3) Cr. 3. S. Prereq: Ch E 381 or M E 231. Thermodynamic principles and construction of tractor engines. Fuels, combustion, and lubrication. Kinematics and dynamics of tractor power applications; drawbar, power take-off and traction mechanisms.

A B E 380. Principles of Biological Systems Engineering. (3-0) Cr. 3. S. Prereq: A B E 216 (or equivalent) and MATH 266 or 267. Unit-operation analysis of biological systems, through the study of mass, energy, and information transport in bioresource production and conversion systems. Quantification and modeling of biomass production, ecological interactions, and bioreactor operations.

A B E 386. Sustainable Engineering and International Development. (Cross-listed with C E, E E, M E, MAT E). (3-2) Cr. 3. F. Prereq: Junior classification in engineering Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement.

A B E 396. Summer Internship. Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services Summer professional work period.

A B E 397. Engineering Internship. Cr. R. Repeatable. F.S. Prereq: A B E 218 and permission of department and Engineering Career Services One semester maximum per academic year professional work period.

A B E 398. Cooperative Education. Cr. R. F.S.SS. Prereq: A B E 298, permission of department and Engineering Career Services Second professional work period in the cooperative education program. Students must register for this course before commencing work.

A B E 403. Modeling and Controls for Agricultural Systems. (Dual-listed with A B E 503). (2-2) Cr. 3. Alt. S., offered odd-numbered years. Prereq: A B E 363, MATH 266 Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A B E 404. Instrumentation for Agricultural and Biosystems Engineering. (Dual-listed with A B E 504). (2-2) Cr. 3. F. Prereq: A B E 363 or CPR E 281. Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A B E 408. GIS and Natural Resources Management. (Dual-listed with A B E 508). (Cross-listed with ÉNSC/I). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment. Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS.

A B E 411. Bioprocessing and Bioprodutcs. (Dual-listed with A B E 511). (Cross-listed with C E). (3-0) Cr. 3. F. Prereq: A B E 216, C E 326 or equivalent, MATH 160 or MATH 165, CHEM 167 or higher, BIOL 173 or BIOL 211 or higher, senior or graduate classification Sustainability, cleaner production. Taxonomy, kinetics, metabolism, microbial cultivation, aerobic and anaerobic fermentation. Antibiotics, food supplements, fermented foods, vitamin production. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.
A B E 413. Fluid Power Engineering. (Cross-listed with M E) (2-2) Cr. 3. F. Prereq: Credit or enrollment in E M 378 or M E 335. A B E 216 or M E 270

A B E 415. Agricultural & Biosystems Engineering Design I. (1-2) Cr. 2. F. S. Prereq: A B E 271 or A B E 272, E M 324 (majors only)
Identification of current design problems in ag & biosystems engineering. Development of alternate solutions using creativity and engineering analysis and synthesis techniques.

A B E 416. Agricultural & Biosystems Engineering Design II. (1-2) Cr. 2. F. S. Prereq: A B E 415 (majors only)
Selection of promising solutions to design problems identified in 415 for development by design teams. Presentation of designs through oral and written reports and prototypes.

A B E 424. Air Pollution. (Dual-listed with A B E 524). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424A. Air Pollution: Air quality and effects of pollutants. (Dual-listed with A B E 524A). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424B. Air Pollution: Climate change and causes. (Dual-listed with A B E 524B). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424C. Air Pollution: Transportation constraints. (Dual-listed with A B E 524C). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424D. Air Pollution: Off-gas treatment technology. (Dual-listed with A B E 524D). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 424E. Air Pollution: Agricultural sources of pollution. (Dual-listed with A B E 524E). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 432. Nonpoint Source Pollution and Control. (Dual-listed with A B E 532). (3-0) Cr. 3. Prereq: A B E 431 or C E 372
Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

A B E 451. Food and Bioprocess Engineering. (Dual-listed with A B E 551). (3-0) Cr. 3. F. Prereq: A B E 216 and M E 436 or CH E 357, or FS HN 351 and MATH 266 or MATH 267
Application of engineering principles and mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes. Term paper required for graduate credit.

A B E 466. Multidisciplinary Engineering Design. (Cross-listed with AER E, CPR E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F. S. Prereq: Student must be within two semesters of graduation and receive permission of the instructor
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, computer models and engineering drawings.

A B E 469. Grain Processing and Handling. (Dual-listed with A B E 569). (2-3) Cr. 3. S. Prereq: A B E 216
Cereal grain and oilseed properties, quality measurement, processing, and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soybean oil extraction. Grain handling systems.

Principles and design of animal environmental control systems. Insulation, heat and mass transfer, fans, ventilation, air distribution, heating and cooling equipment, and controls. Individual and group projects required for graduate credit.

A B E 478. Wood Frame Structural Design. (Dual-listed with A B E 578). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: A B E 216, E M 324

A B E 480. Engineering Analysis of Biological Systems. (Cross-listed with ENSCI). (2-2) Cr. 3. F. Prereq: A B E 380 or permission of the instructor
Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of biosource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues.

A B E 496. Agricultural and Biosystems Engineering Travel Course. Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D. Meets International Perspectives Requirement.

A B E 496A. Agricultural and Biosystems Engineering Travel Course: Pre-departure. Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D. Meets International Perspectives Requirement.

A B E 496B. Agricultural and Biosystems Engineering Travel Course: Travel (R credit). Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D.

A B E 496C. Agricultural and Biosystems Engineering Travel Course: Post-travel. Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D. Meets International Perspectives Requirement.

A B E 496D. Agricultural and Biosystems Engineering Travel Course: Combination (A/B/C). Cr. 1-4. Repeatable. F.S.S.S. Prereq: Permission of instructor Limited enrollment. Tour and study of international agricultural and biosystems engineering as applied to biorenewable and food systems. Location and duration of tours will vary. Travel expenses paid by students. Course requires completion of options A, B, and C or option D. Meets International Perspectives Requirement.

A B E 498. Cooperative Education. Cr. R. Repeatable. F.S.S.S. Prereq: A B E 398, permission of department and Engineering Career Services Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduates:

A B E 501. Fundamentals of Biorenewable Resources. (Cross-listed with BRT). (3-0) Cr. 3. S. Prereq: Undergraduate training in an engineering or physical or biological discipline or degrees in agriculture or economics Introduction to the science and engineering of converting biorenewable resources into bioenergy and biobased products. Survey of biorenewable resource base and properties; description of biobased products; methods of biorenewable resource production; processing technologies for fuels, chemicals, materials, and energy; environmental impacts; economics of biobased products and bioenergy.

A B E 503. Modeling and Controls for Agricultural Systems. (Dual-listed with A B E 403). (2-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: A B E 363, MATH 266 Modeling dynamic systems with ordinary differential equations. Introduction to state variable methods of system analysis. Analysis of mechanical, electrical, and fluid power systems. Analytical and numerical solutions of differential equations. Introduction to classical control theory. Feedback and stability examined in the s domain. Frequency response as an analytical and experimental tool. MATLAB will be used throughout the course for modeling. Individual and/or group projects required for graduate credit.

A B E 504. Instrumentation for Agricultural and Biosystems Engineering. (Dual-listed with A B E 404). (2-2) Cr. 3. F. Prereq: A B E 363 or CPR E 281 Interfacing techniques for computer-based data acquisition and control systems. Basic interfacing components including A/D and D/A conversion, signal filtering, multiplexing, and process control. Sensors and theory of operation applied to practical monitoring and control problems. Individual and group projects required for graduate credit.

A B E 506. Applied Computational Intelligence. (2-2) Cr. 3. Alt. F., offered even-numbered years. Prereq: A B E 316 or equivalent, MATH 166, STAT 305 Applications of biologically inspired computational intelligence tools for data mining, system modeling, and optimization for agricultural, biological and other engineered systems. Introduction to Artificial Neural Networks, Support Vector Machines, Fuzzy Logic, Genetic Algorithms, Bayesian and Decision Tree learning. Fundamental Machine Vision techniques will be introduced in the first part of course and be integrated into the lab exercises for learning different computational intelligence techniques. MATLAB will be used throughout the course for algorithm implementation.

A B E 508. GIS and Natural Resources Management. (Dual-listed with A B E 408). (Cross-listed with ENSCI). (2-2) Cr. 3. F. Prereq: Working knowledge of computers and Windows environment Introduction to fundamental concepts and applications of GIS in natural resources management with specific focus on watersheds. Topics include: basic GIS technology, data structures, database management, spatial analysis, and modeling; visualization and display of natural resource data. Case studies in watershed and natural resource management using ArcView GIS.

A B E 511. Bioprocessing and Bioproducts. (3-0) Cr. 3. F. Prereq: A B E 216, C E 326 or equivalent, MATH 160 or MATH 165, CHEM 167 or higher, BIOL 173 or BIOL 211 or higher, senior or graduate classification Sustainability, cleaner production. Taxonomy, kinetics, metabolism, microbial cultivation, aerobic and anaerobic fermentation. Antibiotics, food supplements, fermented foods, vitamin production. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioelectrolysis, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis. Term paper for graduate level only.

A B E 515. Integrated Crop and Livestock Production Systems. (Cross-listed with AGRON, AN S, SUSAG). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: SUSAG 509 Methods to maintain productivity and minimize the negative ecological effects of agricultural systems by understanding nutrient cycles, managing manure and crop residue, and utilizing multispecies interactions. Crop and livestock production within landscapes and watersheds is also considered. Course includes a significant field component, with student teams analyzing Iowa farms.

A B E 524. Air Pollution. (Dual-listed with A B E 424). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

A B E 524A. Air Pollution: Air quality and effects of pollutants. (Dual-listed with A B E 424A). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above
A B E 524B. Air Pollution: Climate change and causes. (Dual-listed with A B E 424B). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: C E 524A; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

A B E 524C. Air Pollution: Transportation constraints. (Dual-listed with A B E 424C). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: C E 524A; Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

A B E 524D. Air Pollution: Off-gas treatment technology. (Dual-listed with A B E 424D). (Cross-listed with C E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above

A B E 532. Nonpoint Source Pollution and Control. (Dual-listed with A B E 432). (3-0) Cr. 3. Prereq: A B E 431 or C E 372 Characteristics and courses of non-point source (NPS) pollution in agricultural and urban watersheds, computer modeling and NPS pollution for terrestrial and aquatic systems, strategies to control and manage NPS pollution of water bodies, total maximum daily loads (TMDLs) and integrated watershed management. Graduate students are required to review research papers and develop/deliver lecture models on assigned topics.

A B E 536. Design and Evaluation of Soil and Water Monitoring Systems. (Dual-listed with A B E 436). (2-3) Cr. 3. Alt. S. offered odd-numbered years. Prereq: A B E 431/A B E 531 Development of monitoring systems that support effective planning, performance evaluation, modeling, or environmental impact assessment of soil-, water-, and waste-management systems. Typical soil and water pollutants and physical, chemical, and biological characteristics that affect sample location and timing. Sample collection, documentation, chain-of-custody, and quality assurance procedures. In addition to other assignments, graduate students will prepare several research literature reviews on topics covered in the class and develop monitoring plans.

A B E 537. Total Maximum Daily Load (TMDL) Development and Implementation. (2-2) Cr. 3. Alt. F. offered odd-numbered years. Prereq: CE 372 or equivalent A project-based course to develop a water quality improvement plan. The legislative and judicial basis of the Total Maximum Daily Load (TMDL) program, different approaches for TMDL development, data needs and sources, SWAT modeling, and principles and techniques for implementation of water quality improvement plans.

A B E 551. Food and Bioprocess Engineering. (Dual-listed with A B E 451). (3-0) Cr. 3. F. Prereq: A B E 216 and M E 436 or CH E 357, or FS HN 351 and MATH 266 or MATH 267 Application of engineering principles and mathematical modeling to the quantitative analysis of food and bioprocessing systems. Physical/chemical characteristics of foods and biological systems, flow processes, thermal processes and separation processes. Term paper required for graduate credit.

A B E 556. Pretreatment of Biomass. (1-2) Cr. 2. S. Prereq: A B E 216 or equivalent Review of lignocellulosic chemistry; chemical and physical impacts of pretreatment; impact of pretreatment on downstream processing; pretreatment economics. Lab experiments using current and novel pretreatment methods.

A B E 559. Grain Processing and Handling. (Dual-listed with A B E 469). (2-3) Cr. 3. S. Prereq: A B E 216 Cereal grain and oilseed properties, quality measurement, processing, and end-use value. Design of drying systems using computer simulation. Corn wet and dry milling. Soybean oil extraction. Grain handling systems.

A B E 580. Engineering Analysis of Biological Systems. (3-0) Cr. 3. F. Prereq: A B E 216; MATH 266; BIOL 211 or BIOL 212; M E 231 Systems-level engineering analysis of biological systems. Economic and life-cycle analysis of bioresource production and conversion systems. Global energy and resource issues and the role of biologically derived materials in addressing these issues. Students enrolled in ABE 580 will be required to answer additional exam questions and report on two journal articles.

A B E 598. Technical Communications for a Master’s Degree. (Cross-listed with TSM). Cr. 1. F.S.SS. A technical paper draft based on the M.S. thesis or creative component is required of all master’s students. This paper must be in a form that satisfies the requirements of some specific journal and be ready for submission. A technical presentation based on M.S. thesis or creative component is required of all master’s students. This presentation must be in a form that satisfies the normal presentation requirements of a professional society. The presentation itself (oral or poster) may be made at a professional society meeting or at any international, regional, state, or university conference/event as long as the presentation content and form conforms to normal expectations. Offered on a satisfactory-fail basis only.

Courses for graduate students:

A B E 601. Graduate Seminar. (Cross-listed with TSM). (1-0) Cr. 1. F. Keys to writing a good MS thesis or PhD dissertation. How to begin formulating research problems. Discussion of research problems and broader impacts, review of literature, identifying knowledge gaps and needs, long-term goals, research hypotheses, objectives, rationale and significance, methods, procedures, data analysis, and reporting results. Presentation of research proposal in different formats. Using peer review and responding to feedback.

A B E 610. Foundations of Sustainable Agriculture. (Cross-listed with AGRON, ANTHR, SOC, SUSAG). (3-0) Cr. 3. F. Prereq: Graduate classification, permission of instructor Historical, biophysical, socioeconomic, and ethical dimensions of agricultural sustainability. Strategies for evaluating existing and emerging agricultural systems in terms of the core concepts of sustainability and their theoretical contexts.

for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, intermediate and commodity chemicals, high performance fuels, new materials felt the influence of the chemical engineer. From raw materials such as minerals, almost everything of a material nature used by society today has at some point experienced, creativity, and ingenuity to produce these materials economically. Chemical engineering is a profession, which provides a link between scientific and industrial practice.

Chemical engineering is a profession, which provides a link between scientific knowledge and manufactured products. The chemical engineer relies on science, experience, creativity, and ingenuity to produce these materials economically. Almost everything of a material nature used by society today has at some point felt the influence of the chemical engineer. From raw materials such as minerals, coal, petroleum, and agricultural products, chemical engineers create versatile intermediate and commodity chemicals, high performance fuels, new materials for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, plastics, solid state electronic components, and dozens of other engineered materials. The chemical engineer’s influence has been important in the development of catalysts, fuel cells, automatic controls, biochemical processes, artificial kidneys, tissue engineering, nuclear energy, medical instruments and devices, as well as in the development of air and water pollution control systems. Many new and equally exciting challenges await the practicing chemical engineer of the future.

The profession of chemical engineering embraces a wide variety of activities including research, process development, product development, design, manufacturing supervision, technical sales, consulting, and teaching. The engineer can be behind a desk, in a laboratory, in a manufacturing plant, or engaged in nationwide and worldwide travel. Successful chemical engineers find chemistry, mathematics, and physics to be interesting and exciting. Many chemical engineers also have interest in the biological sciences. The curriculum in chemical engineering includes continued study of chemistry, biochemistry, mathematics, and physics as well as intensive study in the engineering sciences such as chemical reaction engineering, thermodynamics, mass transfer, fluid mechanics, heat transfer, system analysis and process synthesis, and design.

The curriculum in chemical engineering is designed to produce graduates that have the ability to apply knowledge of mathematics, science, and engineering; the ability to design, conduct and interpret experiments; and the ability to design a chemical engineering system, component, or process. Graduates should also have the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve chemical engineering problems; and the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

The curriculum should also assure that graduates have the ability to communicate effectively, the broad education necessary to understand the impact of chemical engineering solutions in a global and societal context, and recognition of the need for, and an ability to engage in life-long learning, as well as a knowledge of contemporary issues and an understanding of professional and ethical responsibility.

The curriculum assures that graduates have a thorough grounding in chemistry, along with a working knowledge of advanced chemistry such as organic, inorganic, physical, analytical, materials chemistry, or biochemistry. In addition, a working knowledge, including safety and environmental aspects, of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; process design; and appropriate modern experimental and computing techniques is assured.

Program Educational Objectives

The objectives of the Chemical Engineering Program at Iowa State University are to produce graduates who:

- will excel in careers as professional chemical engineers in the businesses and industries related to chemical engineering; and
- will successfully pursue research and advanced studies in chemical engineering, or in related fields such as chemistry or biology, or in related professional fields such as medicine, law, and business.

Biological Engineering Option

Students may enhance their academic preparation for the growing opportunities in the biologically-related industries by pursuing a selection of courses with a biological emphasis.

Cooperative Education

A cooperative education program is available to students in chemical engineering.

Graduate Study

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in chemical engineering, and minor work to students taking major work in other departments. Prerequisite to major graduate work is a bachelor’s degree in chemical engineering, chemistry, or other related field. Students with undergraduate background other than chemical engineering should contact the department for further details. A thesis is required for the master of science degree. The master of science degree also requires a minimum of 30 graduate credits (minimum of 15 for coursework, 12 within Ch E and 3 outside). The master of engineering degree also requires a minimum of 30 graduate credits (minimum of 15 for coursework, 12 within Ch E and 3 outside). The master of engineering requirements are the same for total credits but include a special project or coursework rather than research thesis. The doctor of philosophy degree requires a minimum of 72 graduate credits (minimum of 30 for coursework, at least 16 inside Ch E and a minimum of 8 credits taken outside of Ch E). Candidates for the doctor of philosophy degree can
Curriculum in Chemical Engineering

Administered by the Department of Chemical and Biological Engineering

Leading to the degree bachelor of science.

Total credits required: 129 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr. ¹

U.S. Diversity: 3 cr. ¹

Biological Engineering Option

The standard Chemical Engineering program may be modified to meet the option requirements for Biological Engineering:

Math and Physical Science – BBMB 404 Biochemistry I or BIOL 313 Principles of Genetics, 3 cr., may be substituted for BBMB 301 Survey of Biochemistry from list above when taken with BBMB 405 Biochemistry II or BIOL 314 Principles of Molecular Cell Biology, respectively. BBMB 420 must be taken in combination with BBMB 301.

Chemical Engineering Core ⁴ – Replace CH E 426 Chemical Engineering Laboratory II, 2 cr. with CH E 427 Biological Engineering Laboratory, 2 cr. in required Core.

Other Remaining Courses for Biological Engineering Option ²

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list (http://www.cbe.iastate.edu/current-students/guides-and-handbooks).
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. 2.00 required including transfer courses.

Note: Transfer students with transfer credits in chemical engineering core courses must earn at least 15 semester credits in ISU courses in this category at the 300-level or above to qualify for the B.S. degree in chemical engineering.

Pass-Not Pass Policy

A maximum of nine Pass-Not Pass semester credits may be used to meet graduation requirements. Courses offered on a Satisfactory-Fail basis may not be taken on a Pass-Not Pass basis. If you pass a course taken under the Pass-Not Pass system, you may not repeat the course on a graded basis. Pass-Not Pass credits can be applied toward requirements for a B.S. degree in chemical engineering only if the course is specified in the curriculum as a social science and humanities elective or is a course not used in the degree program. Pass-Not

refer to the department’s home page and/or the department’s Graduate Student Handbook for degree options and credit requirements.

Well-qualified juniors and seniors in chemical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science.

¹ U.S. diversity and international perspectives courses may not be taken engineering only if the course is specified in the curriculum as a social science and humanities elective or is a course not used in the degree program. Pass-Not Pass system, you may not repeat the course on a graded basis. Pass-Not Pass credits can be applied toward requirements for a B.S. degree in chemical engineering only if the course is specified in the curriculum as a social science and humanities elective or is a course not used in the degree program. Pass-Not

² not BBMB 301 Survey of Biochemistry

³ University requirement added to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

⁴ Chemical Engineering Core – Replace CH E 426 Chemical Engineering Laboratory II, 2 cr. with CH E 427 Biological Engineering Laboratory, 2 cr. in required Core.

* University requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
Pass credits are not acceptable for technical elective courses or for courses used to satisfy the US diversity or international perspectives requirements.

See also: A 4-year plan of study grid showing course template by semester.

Courses primarily for undergraduates:

**CH E 104. Chemical Engineering Learning Community.**
Cr. R. F.S. Prereq: Enrollment in Chemical Engineering Learning Team
(1-0) Curriculum in career planning and academic course support for Freshmen learning team.

**CH E 160. Chemical Engineering Problems with Computer Applications Laboratory.**
(2-2) Cr. 3. F.S. Prereq: MATH 142 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

**CH E 202. Chemical Engineering Seminar.**
(1-0) Cr. 1. F.S. Prereq: Sophomore classification in chemical engineering; credit or enrollment in CH E 210
Professionalism in the context of the engineering/technical workplace. Introduction to chemical engineering career opportunities. Process and workplace safety. Development and demonstration of key workplace competencies: teamwork, professionalism and ethical responsibility, ability to engage in life-long learning, and knowledge of contemporary issues. Resumes; professional portfolios; preparation for internship experiences.

**CH E 204. Chemical Engineering Continuing Learning Community.**
Cr. R. F.S. Prereq: Corequisite-enrollment in Chemical Engineering Learning Team
Curriculum and career planning, academic course support for learning community.

**CH E 210. Material and Energy Balances.**
(3-0) Cr. 3. F.S. Prereq: Chem 178, Math 166
Introduction to chemical processes. Physical behavior of gases, liquids, and solids. Application of material and energy balances to chemical engineering equipment and processes.

**CH E 220. Introduction to Biomedical Engineering.**
(Cross-listed with BIOE). (3-0) Cr. 3. S. Prereq: BIOL 212, ENGR 160 or equiv, MATH 168, CHEM 167 or CHEM 178, PHYS 222
Engineering analysis of basic biology and engineering problems associated with living systems and health care delivery. The course will illustrate biomedical engineering applications in such areas as: biotechnology, biomechanics, biomaterials and tissue engineering, and biosignal and image processing, and will introduce the basic life sciences and engineering concepts associated with these topics.

**CH E 298. Cooperative Education.**
Cr. R. F.S.SS. Prereq: Permission of department and Engineering Career Services
First professional work period in the cooperative education program. Students must register for this course before commencing work.

**CH E 310. Computational Methods in Chemical Engineering.**
(3-0) Cr. 3. F.S. Prereq: CH E 210 and ENGR 160
Numerical methods for solving systems of linear and nonlinear equations, ordinary differential equations, numerical differentiation and integration, and nonlinear regression using chemical engineering examples.

**CH E 325. Chemical Engineering Laboratory I.**
(0-4) Cr. 2. F.S. Prereq: CH E 357, credit or enrollment in CH E 381
Experiments covering fundamental material and energy balances, momentum and energy transport operations, and thermodynamics. Computer applications.

**CH E 356. Transport Phenomena I.**
(3-0) Cr. 3. F.S. Prereq: CH E 210, PHYS 221, credit or enrollment in MATH 267
Momentum and mechanical energy balances. Incompressible and compressible fluid flow. Applications to fluid drag, piping system design, filtration, packed beds and settling.

**CH E 357. Transport Phenomena II.**
(3-0) Cr. 3. F.S. Prereq: Credit or enrollment in CH E 310; CH E 356
Conduction and diffusion, convective heat and mass transfer, boiling and condensation, radiation, and design of heat exchange equipment. Introduction to diffusion.

**CH E 358. Separations.**
(3-0) Cr. 3. F.S. Prereq: CH E 310, CH E 357
Diffusion and mass transfer in fluids. Analysis and design of continuous contacting and multistage separation processes. Binary and multicomponent distillation, absorption, extraction, evaporation, membrane processes, and simultaneous heat and mass transfer.

**CH E 381. Chemical Engineering Thermodynamics.**
(3-0) Cr. 3. F.S. Prereq: Credit or enrollment in CH E 310; MATH 267, PHYS 222, CHEM 325
Application of thermodynamic principles to chemical engineering problems. Thermodynamic properties of fluids, phase equilibria, and chemical reaction equilibria.

**CH E 382. Chemical Reaction Engineering.**
(3-0) Cr. 3. F.S. Prereq: Credit in CH E 310; CH E 381, credit or enrollment in CH E 357
Kinetics of chemical reactions. Design of homogeneous and heterogeneous chemical reactors.

**CH E 391. Foreign Study Orientation.**
(3-0) Cr. 3. F.S. Prereq: Credit in CH E 357 and CH E 381 or permission of instructor
Offered on a satisfactory-fail basis only. Credit for graduation allowable only upon completion of CH E 391.
Meets International Perspectives Requirement.

**CH E 392. Foreign Study Program.**
Cr. 4. SS. Prereq: CH E 391
Study of chemical engineering including laboratories and lectures at University College London or other collaborating international universities. Comparative study of U.S. and international manufacturing facilities. Expenses required.
Meets International Perspectives Requirement.

**CH E 396. Summer Internship.**
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services
Summer professional work period. Students must register for this course prior to commencing work.

**CH E 397. Engineering Internship.**
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services
One semester maximum per academic year professional work period. Students must register for this course prior to commencing work.

**CH E 398. Cooperative Education.**
Cr. R. F.S.SS. Prereq: CH E 298, permission of department and Engineering Career Services
Second professional work period in the cooperative education program. Students must register for this course before commencing work.

**CH E 406. Environmental Chemodynamics.**
(Dual-listed with CH E 506). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: CH E 381, credit or enrollment in CH E 358
Examines the mechanisms and rates of chemical transport across air, water, and soil interfaces. Applications of transport and thermodynamic fundamentals to movement of chemicals in the environment.

**CH E 408. Surface and Colloid Chemistry.**
(Dual-listed with CH E 508). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: CH E 381 or equivalent
Examines the factors underlying interfacial phenomena, with an emphasis on the thermodynamics of surfaces, structural aspects, and electrical phenomena. Application areas include emulsification, foaming, detergent, sedimentation, fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis.

**CH E 415. Biochemical Engineering.**
(Dual-listed with CH E 515). (3-0) Cr. 3. S. Prereq: CH E 357, CH E 382 recommended, CHEM 331
Application of basic chemical engineering principles in biochemical and biological process industries such as enzyme technology and fermentation.

**CH E 420. Chemical Process Safety.**
(3-0) Cr. 3. F.S. Prereq: CH E 357, CH E 381 (or equivalents); junior classification
Application of transport phenomena, thermodynamics, and chemical kinetics to the study of safety, health, and loss prevention. Government regulations, industrial hygiene, relief sizing, runaway reactions, toxic release, and dispersion models will be used. Fires, explosions, risk assessment, hazard identification, case studies, accident investigations, and design considerations will be studied.

**CH E 421. Process Control.**
(3-0) Cr. 3. F.S. Prereq: CH E 358, CH E 382, Math 267
Control of industrial chemical processes. Device applications and limitations. Dynamics of chemical process components and process control systems.
CH E 426. Chemical Engineering Laboratory II.
(0-4) Cr. 2. F.S. Prereq: CH E 325, CH E 358, CH E 382
Experiments in heat and mass transfer, staged operations, chemical reactor
performance, unit processes. Computer applications. Only one of CH E 426 or 427
may count toward graduation.

CH E 427. Biological Engineering Laboratory.
(0-4) Cr. 2. S. Prereq: Credit in CH E 325, CH E 358, CH E 382, and BBMB 301
Experiments on biological applications in chemical engineering. Only one of CH
E 426 or CH E 427 may count toward graduation.

(2-6) Cr. 4. F.S. Prereq: CH E 358, CH E 382
Synthesis of chemical engineering processes, equipment and plants. Cost
estimation and feasibility analysis.

CH E 440. Biomedical Applications of Chemical Engineering.
(Dual-listed with CH E 540). (Cross-listed with BIOE); (3-0) Cr. 3. Alt. F., offered
odd-numbered years. Prereq: CH E 210, MATH 266, PHYS 222
Applications of material and energy balances, transport phenomena, chemical
reaction engineering, and thermodynamics to problems in biomedical engineering
and applied physiology; survey of biomedical engineering; biomaterials;
biomedical imaging.

CH E 447. Polymers and Polymer Engineering.
(Dual-listed with CH E 547). (3-0) Cr. 3. S. Prereq: CH E 382 and CHEM 331 or
MAT E 351
Chemistry of polymers, addition and condensation polymerization. Physical and
mechanical properties, polymer rheology, production methods. Applications of
polymers in the chemical industry.

CH E 490. Undergraduate Research/Independent Study.
(0-18) Cr. 1-6. Repeatable, maximum of 6 credits. Prereq: Permission of
Department
Investigation of topics of special interest to student and faculty with a final written
report. Election of course and topic must be approved in advance by Department with
completion of Study Proposal. No more than 6 credits of CH E 490 may be
counted towards technical electives.

CH E 490H. Undergraduate Research/Independent Study, Honors.
(0-18) Cr. 1-6. Repeatable, maximum of 6 credits. Prereq: Permission of
Department
Investigation of topics of special interest to student and faculty with a final written
report. Election of course and topic must be approved in advance by Department with
completion of Study Proposal. No more than 6 credits of CH E 490 may be
counted towards technical electives.

CH E 498. Cooperative Education.
Cr. R. Repeatable. F.S.S.S. Prereq: CH E 398, permission of department and
Engineering Career Services
Third and subsequent professional work periods in the cooperative education
program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduates:

CH E 506. Environmental Chemodynamics.
(Dual-listed with CH E 406). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: CH E 381, credit or enrollment in CH E 358
Examines the mechanisms and rates of chemical transport across air, water, and
soil interfaces. Applications of transport and thermodynamic fundamentals to
movement of chemicals in the environment.

CH E 508. Surface and Colloid Chemistry.
(Dual-listed with CH E 408). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: CH E 381 or equivalent
Examines the factors underlying interfacial phenomena, with an emphasis on the
thermodynamics of surfaces, structural aspects, and electrical phenomena.
Application areas include emulsification, foaming, detergency, sedimentation,
fluidization, nucleation, wetting, adhesion, flotation, and electrophoresis.

CH E 515. Biochemical Engineering.
(Dual-listed with CH E 415). (3-0) Cr. 3. S. Prereq: CH E 357, CH E 382, CHEM
331
Application of basic chemical engineering principles in biochemical and biological
process industries such as enzyme technology and fermentation. Term project
required for graduate credit.

CH E 540. Biomedical Applications of Chemical Engineering.
(Dual-listed with CH E 440). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: CH E 210, MATH 266, PHYS 222
Applications of material and energy balances, transport phenomena, chemical
reaction engineering, and thermodynamics to problems in biomedical engineering
and applied physiology; survey of biomedical engineering; biomaterials;
biomedical imaging.

CH E 542. Polymeric Biomaterials.
(3-0) Cr. 3. Prereq: CHEM 331 or a polymers class
Polymeric biomaterials, overview of biomaterial requirements, different classes of
polymers used as biomaterials, specific bioapplications of polymers.

CH E 545. Analytical and Numerical Methods.
(3-0) Cr. 3. F. Prereq: CH E 358, MATH 267
Analysis of equipment and processes by analytic and/or numerical solution of
descriptive differential equations. Operational and series techniques,
boundary value problems, numerical interpolation and approximation, integration
techniques.

CH E 547. Polymers and Polymer Engineering.
(Dual-listed with CH E 447). (3-0) Cr. 3. S. Prereq: CH E 382 and CHEM 331 or
MAT E 351
Chemistry of polymers, addition and condensation polymerization. Physical and
mechanical properties, polymer rheology, production methods. Applications of
polymers in the chemical industry.

CH E 554. Integrated Transport Phenomena.
(4-0) Cr. 4. F. Prereq: CH E 357, CH E 381, Math 267, credit or enrollment in CH
E 545
Conservation equations governing diffusive and convective transport of
momentum, thermal energy and chemical species. Transport during laminar flow
in conduits, boundary layer flow, creeping flow. Heat and mass transport coupled
with chemical reactions and phase change. Scaling and approximation methods
for mathematical solution of transport models. Diffusive fluxes; conservation
equations for heat and mass transfer; scaling and approximation techniques;
fundamentals of fluid mechanics; unidirectional flow; creeping flow; laminar flow at
high Reynolds number; forced-convection heat and mass transfer in confined and
unconfined laminar flows.

(3-0) Cr. 3. Prereq: CH E 357 or advanced standing in a science major
Principles and techniques for separation and recovery of biologically-produced
molecules, especially proteins. Relationship between the chemistry of biological
molecules and efficient separation and preservation of biological activity. Includes
centrifugation and filtration, membrane processing, extraction, precipitation and
crystallization, chromatography, and electrophoresis.

CH E 572. Turbulence.
(Cross-listed with AER E). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: AER E 543 or M E 538
Qualitative features of turbulence. Statistical representation of turbulent velocity
fields: averages, moments, correlations, length and time scales and the energy
cascade. Averaged equations of motion, closure requirements, Reynolds
averaged models. Homogeneous shear flows, free shear flows, boundary layers.
Numerical simulation of turbulence: DNS, LES, DES.

CH E 583. Advanced Thermodynamics.
(3-0) Cr. 3. F. Prereq: CH E 381
Application of thermodynamic principles to chemical engineering problems.
Thermodynamic properties of non-ideal fluids and solutions; phase and chemical-
reaction equilibria/stability.

(3-0) Cr. 3. S. Prereq: CH E 382
Analysis of complex reactions and kinetics. Fixed bed, fluidized bed, and other
industrial reactors. Analysis and design of non-ideal flow mixing, and residence
times. Heterogeneous reactors.

CH E 590. Independent Study.
Cr. 2-6. Repeatable.
Investigation of an approved topic on an individual basis.

CH E 595. Special Topics.
Cr. 2-3. Repeatable.

CH E 595A. Special Topics: Separations.
Cr. 2-3. Repeatable.

CH E 595B. Special Topics: Advanced Control Theory.
Cr. 2-3. Repeatable.

CH E 595C. Special Topics: Crystallization.
Cr. 2-3. Repeatable.

CH E 595D. Special Topics: Thermodynamics.
Cr. 2-3. Repeatable.

CH E 595E. Special Topics: Protein Engineering/Bioseparations.
Cr. 2-3. Repeatable.

CH E 595F. Special Topics: Biological Engineering.
Cr. 2-3. Repeatable.
CH E 595G. Special Topics: Materials and Biomaterials. Cr. 2-3. Repeatable.

CH E 599. Creative Component. Cr. arr. Repeatable.

Courses for graduate students:

CH E 601. Seminar. Cr. R. Repeatable. F.S.

CH E 625. Metabolic Engineering. (3-0) Cr. 3. Prereq: CH E 382, CHEM 331
Principles of metabolic engineering. Emphasis on emerging examples in biorenewables and plant metabolic engineering. Overview of biochemical pathways, determination of flux distributions by stoichiometric and labeling techniques; kinetics and thermodynamics of metabolic networks; metabolic control analysis; genetic engineering for overexpression, deregulation, or inhibition of enzymes; directed evolution; application of bioinformatics, genomics, and proteomics.

CH E 632. Multiphase Flow. (Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: M E 538
Single particle, multiparticle and two-phase fluid flow phenomena (gas-solid, liquid-solid and gas-liquid mixtures); particle interactions, transport phenomena, wall effects; bubbles, equations of multiphase flow. Dense phase (fluidized and packed beds) and ducted flows; momentum, heat and mass transfer. Computer solutions.

CH E 642. Principles and Applications of Molecular Simulation. (3-0) Cr. 3. Prereq: CH E 454

CH E 652. Advanced Transport. (3-0) Cr. 3. Prereq: CH E 552 and CH E 553
Advanced topics in momentum transport, fluid mechanics, and mass transport including study of recent literature.

CH E 688. Catalysis and Catalytic Processes. (Cross-listed with BR C). (3-0) Cr. 3. Prereq: CH E 382
Principles and applications of heterogeneous and homogeneous catalysis. Adsorption. Reaction kinetics and mass transfer effects. Catalyst characterization. Industrial catalytic processes.

Investigation of an approved topic on an individual basis. Election of course and topic must be approved in advance by Program of Study Committee.

CH E 695A. Advanced Topics: Separations. Cr. arr. Repeatable.

CH E 695C. Advanced Topics: Crystallization. Cr. arr. Repeatable.

CH E 695E. Advanced Topics: Protein Engineering/Bioseparations. Cr. arr. Repeatable.

CH E 695F. Advanced Topics: Biological Engineering. Cr. arr. Repeatable.

CH E 695G. Advanced Topics: Materials and Biomaterials. Cr. arr. Repeatable.

CH E 697. Engineering Internship. Cr. R. Repeatable. F.S.S. Prereq: Permission of major professor, graduate classification
One semester and one summer maximum per academic year professional work period.

CH E 698. Chemical Engineering Teaching Practicum. (1-0) Cr. 1. F.S. Prereq: Graduate student classification and permission of instructor
Discussions intended to foster the development of graduate students as teaching assistants and future chemical engineering instructors. Topics include classroom and laboratory instruction, grading, and developing a teaching philosophy. Offered on a satisfactory-fail basis only.

Civil Engineering

http://www.ccee.iastate.edu/

Administered by the Department of Civil, Construction and Environmental Engineering

Undergraduate Study

For undergraduate curriculum in civil engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Civil Engineering Program Criteria by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Civil engineers apply principles of motion and materials to plan, design, construct, maintain, and operate public and private facilities, while working under economic, social, and environmental constraints. Commonly included are transportation systems; bridges and buildings; water supply, pollution control, waste management, irrigation, and drainage systems; river and harbor improvements; dams and reservoirs. Civil engineering also includes planning, designing, and executing surveying operations and locating, delineating, and delineating physical and cultural features on the earth’s surface. Research, testing, sales, management, and related functions are also a part of civil engineering. Work on campus is supplemented by inspection trips, which furnish an opportunity for firsthand study of engineering systems in operation, as well as projects under construction.

Environmental engineering, as a specialty area in civil engineering, is concerned with protecting the public and natural health: providing an ample safe water supply; managing solid and hazardous waste; treating and disposing of domestic and industrial waste waters and waste; resource recovery; providing adequate drainage of urban and rural areas for sanitation; and controlling water quality, soil contamination, and air pollution. The environmental option for the civil engineering degree replaces some of the courses and electives in the general curriculum with further courses in chemistry, biology, and microbiology as well as specific topics in environmental engineering and design.

The civil engineering curriculum equips students with a broad education that includes technical skills in analysis and design and professional practices such as communication, teamwork, leadership, and ethics.

By three to five years after graduation, graduates of the civil engineering program will have:

1. Established themselves in successful careers in civil engineering or a related field.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
3. Pursued lifelong learning, professional development, and registration as appropriate for their employers.

The faculty encourages the students to develop their professional skills by participating in cooperative education, internships, or progressive summer engineering employment. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue the bachelor degree and either a master of science in Civil Engineering or a master of business administration in the College of Business Administration. These students would have an opportunity to graduate in five years with both degrees.

Graduate Study

The Department of Civil, Construction and Environmental Engineering offers work for the master of engineering, master of science, and doctor of philosophy
degrees with a major in civil engineering with areas of specialization in structural engineering, environmental engineering, construction engineering and management, geotechnical engineering, civil engineering materials, and transportation engineering. The department also offers graduate minors of 9 to 15 credits of coursework to students from other engineering departments.

Candidates for the degrees of master of engineering and master of science are required to satisfactorily complete a total of 30 credits of acceptable graduate work. The master of engineering degree involves all course work. The master of science degree requires the preparation of a thesis or creative component.

Candidates for the doctor of philosophy degree refer to the department’s home page and/or the department’s Graduate Student Handbook for degree options and credit requirements. The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of engineering students at this university. However, because of the diversity of interests within the graduate programs in civil engineering, a student may qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering. Supporting work will be required depending upon the student’s background and area of interest. A prospective graduate student is urged to specify the degree program and area of specialization in which he or she is interested on the application for admission. The department participates in the interdepartmental majors in transportation (master of science only), environmental science, and biorenewable resources and technology (see Index).

The Department of Civil, Construction and Environmental Engineering (CCEE Department) offers graduate certificates in construction management, environmental engineering, and environmental systems. The construction management certificate requires 12 credits, including nine credits of “core courses” and three credits of “elective courses” from approved CCEE Department lists.

For the environmental engineering and environmental systems certificates, each certificate requires the completion of four courses of three credits each and at least two of these courses shall be from an approved “core course” CCEE Department list and the remaining courses may be selected from an approved “elective courses” CCEE Department list. These courses are offered by different departments at Iowa State University. These two certificates also require the completion of a seminar course, C E 591 Seminar in Environmental Engineering, or any equivalent to be approved by the Environmental Engineering graduate faculty.

For additional requirements for these three certificates, refer to the document that describes each graduate certificate. These documents are available from the Department of Civil, Construction, and Environmental Engineering.

Curriculum in Civil Engineering (General)

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

Total credits required: 128*. Any transfer credit courses applied to the degree program require a grade of C or better. See also Basic Program and Special Programs.

International Perspectives: 3 cr.  
U.S. Diversity: 3 cr.  
Communication Proficiency/Library requirement (minimum grade of C)

Notes.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. Choose from department approved list.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
4. 2.00 required including transfer courses.
5. Students who opt for PHYS 222 Introduction to Classical Physics II rather than CHEM 178 General Chemistry II, CHEM 178L Laboratory in College Chemistry II will complete 18 cr. here which will increase the total number of credits required by 1.
6. Students who transfer in with CHEM 167/CHEM 167L will be able to take CHEM 178/CHEM 178L to complete the program’s Chemistry requirement.

**Curriculum in Civil Engineering with Environmental Option**

C E 120. Civil Engineering Learning Community.
Cr. R. Repeatable.
Integration of first-year students into the Civil Engineering program. Assignments and activities involving teamwork, academic preparation, study skills, and preparation for entry into the Civil Engineering profession. Completed both individually and in learning teams under the direction of faculty and peer mentors. Offered on a satisfactory-fail basis only.

C E 160. Engineering Problems with Computational Laboratory.
(2-3) Cr. 3. F.S. PreReq: MATH 141, MATH 142 or satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 165
Formulation of engineering problems using spreadsheets and Visual Basic for Application for solution. Presenting results using word processing, tables, and graphs. Introduction to engineering economics and statics. Civil engineering examples.

C E 170. Graphics for Civil Engineering.
(0-4) Cr. 2. F.S. PreReq: MATH 165, credit or enrollment in C E 105
Fundamental graphics. Introduction to computer aided drafting and modeling. Civil engineering applications.

(3-0) Cr. 3. F.S. PreReq: MATH 166, ENGL 250; C E 105; ECON 101 recommended
Engineering/managerial analysis of the economic aspects of project proposals. Alternative sources of funds; time value of money; expenditure of capital funds and methods of evaluating alternative projects. Professionalism, licensure, liability, ethics, leadership, social responsibility, creative and critical thinking, and applications/impacts of regulations in civil engineering.

C E 298. Cooperative Education.
Cr. R. F.S.SS. PreReq: Permission of department and Engineering Career Services
First professional work period in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

C E 306. Project Management for Civil Engineers.
(2-3) Cr. 3. F.S. PreReq: C E 206, Credit or enrollment in a technical communication elective from the approved department list
Project management, including work breakdown structures, cost estimating, scheduling, and project control. Civil engineering project life cycle, including planning, design, construction, and maintenance processes. Techniques in interpretation of contract documents, plan reading, and in estimating quantities.

(2-3) Cr. 3. F.S. PreReq: CHEM 177 or CHEM 179, MATH 166, credit or enrollment in E M 378
Introduction to environmental problems, water quality indicators and requirements, potable water quality and quantity objectives, water sources and treatment methods; water pollution control objectives and treatment methods; survey of solid and hazardous waste management and air pollution control.

C E 332. Structural Analysis I.
(2-2) Cr. 3. F.S. PreReq: E M 324

C E 333. Structural Steel Design I.
(2-3) Cr. 3. F.S. PreReq: C E 332, E M 327

C E 334. Reinforced Concrete Design I.
(2-2) Cr. 3. F.S. PreReq: C E 332, E M 327

C E 350. Introduction to Transportation Planning.
(3-0) Cr. 3. S. PreReq: 3 credits in statistics, junior classification
An introductory course for planning urban and regional transportation systems within government. Applications and impacts of legislation, financing, four-step planning process, population trends, land use, societal impacts, public transportation, master plans and traffic impact studies. Organization and coordination of the transportation planning function. Not available for graduation credit for students in civil engineering.

(3-0) Cr. 3. F.S. PreReq: C E 111, C E 206, PHYS 221, a course in statistics from the approved departmental list
Introduction to planning and operations of transportation facilities. Vehicle/operation/infrastructure characteristics. Technological, economic and environmental factors. Travel demand modeling and capacity analysis.

C E 360. Geotechnical Engineering.
(2-3) Cr. 3. F.S. PreReq: E M 324, credit or enrollment in GEOL 201
Introduction to geotechnical engineering and testing. Identification and classification tests, soil water systems, principles of settlement, stresses in soils, and shear strength testing; slope stability, retaining walls, bearing capacity.

(3-0) Cr. 3. F.S. PreReq: E M 378, a course in statistics from the approved department list
The hydrologic cycle: precipitation, infiltration, runoff, evapotranspiration, groundwater, and streamflow. Hydrograph analysis, flood routing, frequency analysis and urban hydrology. Applied hydraulics including pipe and channel flow with design applications in culverts, pumping, water distribution, storm and sanitary sewer systems. Design project required.

C E 382. Design of Concretes.
(2-3) Cr. 3. F.S. PreReq: Credit or enrollment in C E 360
Physical and chemical properties of bituminous, Portland, and other cements; aggregate properties and blending; mix design and testing of concretes; admixtures, mixing, handling, placing and curing; principles of pavement thickness design.

C E 383. Design of Portland Cement Concrete.
(0-2) Cr. 1. F.S. PreReq: Credit or enrollment in C E 360
For Con E students only. Physical and chemical properties of Portland cement and p.c. concrete. Mix design and testing of p.c. concrete.

C E 388. Sustainable Engineering and International Development.
(Cross-listed with A B E, E E, M E, MAT E). (2-2) Cr. 3. F. PreReq: Junior classification in engineering
Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernmental organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement.

C E 396. Summer Internship.
Cr. R. Repeatable. SS. PreReq: Permission of department and Engineering Career Services, completion of two terms in residence in civil engineering, employment in civil engineering or related field
Summer professional work period. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

C E 397. Engineering Internship.
Cr. R. Repeatable. F.S. PreReq: Permission of department and Engineering Career Services
One semester maximum per academic year professional work period. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

C E 398. Cooperative Education.
Cr. R. F.S.SS. PreReq: C E 298, permission of department and Engineering Career Services
Second professional work period in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

C E 403. Program and Outcome Assessment.
Cr. R. F.S. PreReq: Verification of undergraduate application for graduation by the end of the first week of class. Permission of instructor for students who are scheduled for summer graduation
Assessment of C E Curriculum and educational objectives. Assessments to be reviewed by the CE Department to incorporate potential improvements. Offered on a satisfactory-fail basis only.
C E 411. Bioprocessing and Bioproducts.
(Dual-listed with C E 511), (Cross-listed with A B E), (3-0) Cr. 3. F. Prereq: A B E 216, C E 326 or equivalent, MATH 160 or MATH 165, CHEM 167 or higher, BIOL 173 or BIOL 211 or higher, senior or graduate classification.

C E 417. Land Surveying.
(2-3) Cr. S. Prereq: C E 111

Legal principles affecting the determination of land boundaries, public domain survey systems. Locating sequential and simultaneous conveyances. Record research, plat preparation, and land description. Study of selected court cases.

(Dual-listed with C E 520). (Cross-listed with ENSCI), (2-3) Cr. 3. F. Prereq: C E 326, CHEM 177 and CHEM 178, MATH 166

Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters, including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

C E 421. Environmental Biotechnology.
(Dual-listed with C E 521). (2-2) Cr. 3. F. Prereq: C E 326

Fundamentals of biochemical and microbial processes applied to environmental engineering processes, role of microorganisms in wastewater treatment and bioremediation, bioenergetics and kinetics, metabolism of xenobiotic compounds, waterborne pathogens and parasites, and disinfection. Term paper and oral presentation.

C E 424. Air Pollution.
(Dual-listed with C E 524). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 424A. Air Pollution: Air quality and effects of pollutants.
(Dual-listed with C E 524A). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 424B. Air Pollution: Climate change and causes.
(Dual-listed with C E 524B). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 424C. Air Pollution: Transportation constraints.
(Dual-listed with C E 524C). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 424D. Air Pollution: Off-gas treatment technology.
(Dual-listed with C E 524D). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 424E. Air Pollution: Agricultural sources of pollution.
(Dual-listed with C E 524E). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics.
Senior classification or above

1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 428. Water and Wastewater Treatment Plant Design.
(2-2) Cr. 3. S. Prereq: C E 326

Physical, chemical and biological processes for the treatment of water and wastewater including coagulation and flocculation, sedimentation, filtration, adsorption, chemical oxidation/disinfection, fixed film and suspended growth biological processes and sludge management.

C E 436. Masonry and Timber Design.
(Dual-listed with C E 536). (2-2) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: C E 334

Behavior and design of clay and concrete masonry beams, columns, walls, and structural systems. Behavior and design of timber and laminated timber beams, columns, connections, and structural systems.
C E 488. Sustainable Horizontal Civil Infrastructure Systems. (Dual-listed with C E 588). (3-0) Cr. 3. F. Prereq: Junior or higher classification in engineering of science Sustainable planning, life cycle analysis, appropriate engineering design, and overall rating assessment of horizontal civil infrastructure (i.e., versus ‘vertical building’) systems, including highway, bridge, airport, rail, and port facilities. Course readings and final project/design report.

C E 498. Cooperative Education. Cr. R. Repeatable. F.S.S.S. Prereq: C E 398, permission of department and Engineering Career Services Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

C E 501. Preconstruction Project Engineering and Management. (3-0) Cr. 3. Prereq: Credit or enrollment in CON E 421 Application of engineering and management control techniques to construction project development from conceptualization to notice to proceed. Emphasis is on managing complex projects using 5-dimensional project management theory.

C E 502. Construction Project Engineering and Management. (3-0) Cr. 3. Prereq: Credit or enrollment in CON E 421 Application of engineering and management control techniques to complex construction projects. Construction project control techniques, stochastic estimating and scheduling, equipment selection and utilization, project administration, construction process simulation, Quality Management, and productivity improvement programs.

C E 506. Case Histories in Construction Documents. (3-0) Cr. 3. Prereq: CON E 221, credit or enrollment in CON E 421 Study of cases involving disputes, claims, and responsibilities encountered by management in construction contract documents. Analysis of methods of resolving differences among the owner, architect, engineer, and construction contractor for a project.

C E 510. Information Technologies for Construction. (3-0) Cr. 3. Prereq: CON E 421, ENGR 160 or C E 160 or equivalent Information technologies including microcomputer based systems, management information systems, automation technologies, computer-aided design, and expert systems and their application in the construction industry. Overview of systems acquisition, communications, and networking.

C E 511. Bioprocessing and Bioproducts. (Dual-listed with C E 411). (Cross-listed with A B E, BRT). (3-0) Cr. 3. F. Prereq: A B E 216, C E 326 or equivalent, MATH 160 or MATH 165, CHEM 167 or higher, BIOL 173 or BIOL 211 or higher, senior or graduate classification Sustainability, cleaner production. Taxonomy, kinetics, metabolism, microbial cultivation, aerobic and anaerobic fermentation. Antibiotics, food supplements, fermented foods, vitamin production. Biofuels, bioenergy and coproducts. Mass/energy balances, process integration, pretreatment, separation. Membrane reactors, bioremediation, microbial fuel cells, nanotechnology, genetic engineering, mutagenesis.

C E 520. Environmental Engineering Chemistry. (Dual-listed with C E 420). (Cross-listed with ENSCI). (2-3) Cr. 3. F. Prereq: C E 326, CHEM 177 and CHEM 178, MATH 166 Principles of chemical and physical phenomena applicable to the treatment of water and wastewater and natural waters; including chemical equilibria, reaction kinetics, acid-base equilibria, chemical precipitation, redox reactions, and mass transfer principles. Individual laboratory practicals and group projects required.

C E 522. Water Pollution Control Processes. (Cross-listed with ENSCI). (2-2) Cr. 3. Prereq: C E 521 Fundamentals of biochemical processes, aerobic growth in a single CSTR, multiple events in complex systems, and techniques for evaluating kinetic parameters; unit processes of activated sludge system, attached growth systems, stabilization and aerated lagoon systems, biosolids digestion and disposal, nutrient removal, and anaerobic treatment systems.

C E 523. Physical-Chemical Treatment Process. (Cross-listed with ENSCI). (2-2) Cr. 3. Prereq: C E 520 Material and energy balances. Principles and design of physical-chemical unit processes; including screening, coagulation, flocculation, chemical precipitation, sedimentation, filtration, lime softening and stabilization, oxidation, adsorption, membrane processes, ion exchange and disinfection; recovery of resources from residuals and sludges; laboratory exercises and demonstrations; case studies in mineral processing and secondary industries.

C E 524. Air Pollution. (Dual-listed with C E 424). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524A. Air Pollution: Air quality and effects of pollutants. (Dual-listed with C E 424A). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524B. Air Pollution: Climate change and causes. (Dual-listed with C E 424B). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524C. Air Pollution: Transportation constraints. (Dual-listed with C E 424C). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524D. Air Pollution: Off-gas treatment technology. (Dual-listed with C E 424D). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.

C E 524E. Air Pollution: Agricultural sources of pollution. (Dual-listed with C E 424E). (Cross-listed with A B E, ENSCI). (1-0) Cr. 1. Prereq: Either PHYS 221 or CHEM 178 and either MATH 166 or 3 credits in statistics. Senior classification or above 1 cr. per module. Module A prereq for all modules; module B prereq for D and E.
C E 528. Solid and Hazardous Waste Management. (Cross-listed with ENNSCI). (3-0) Cr. 3. Prereq: C E 326 or background courses in both environmental chemistry and microbiology; junior or higher standing. Evaluation, characterization, assessment, planning and design of solid and hazardous waste management systems, regulatory requirements, material characterization and collection, minimization and recycling, energy and materials recovery, composting, off-gas treatment, incineration, stabilization, and landfill design. Design of treatment and disposal systems, including physical, chemical, and biological treatment, solidification, incineration, secure landfill design, and final disposal site closure plus restoration.

C E 532. Structural Analysis II. (3-0) Cr. 3. F. Prereq: C E 332 Analysis of indeterminate structural problems by the consistent deformation and generalized direct displacement methods. Direct stiffness method for 2-D frames, grids, 3-D frames. Special topics for the stiffness method.

C E 535. Prestressed Concrete Structures. (3-0) Cr. 3. Prereq: C E 334 Every third semester, offered S 2014. Design of prestressed concrete structures, review of hardware, stress calculations, prestress losses, section proportioning, flexural design, shear design, deflections, and statically indeterminate structures.

C E 536. Masonry and Timber Design. (Dual-listed with C E 436). (2-2) Cr. 3. Alt. F., offered odd-numbered years. Prereq: C E 334 Behavior and design of clay and concrete masonry beams, columns, walls, and structural systems. Behavior and design of timber and laminated timber beams, columns, connections, and structural systems. Two additional design problems.

C E 547. Analysis and Design of Plate and Slab Structures. (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: C E 334, E M 514, MATH 258 Bending and buckling of thin plate components in structures utilizing classical and energy methods. Analysis of shell roofs by membrane and bending theories.

C E 551. Urban Transportation Planning Models. (Dual-listed with C E 451). (3-0) Cr. 3. F. Prereq: C E 350 or C E 355, STAT 101 or STAT 105 Urban transportation planning context and process. Project planning and programming. Congestion, mitigation, and air quality issues. Transportation data sources. Travel demand and network modeling. Use of popular travel demand software and applications of geographic information systems.

C E 553. Traffic Engineering. (3-0) Cr. 3. F. Prereq: C E 355 Driver, pedestrian, and vehicular characteristics. Traffic characteristics; highway capacity; traffic studies and analyses. Principles of traffic control for improved highway traffic service. Application of appropriate computing software and tools.

C E 555. Transportation Data Analysis. (3-0) Cr. 3. Prereq: C E 355, A Statistics course at the 300 level or higher Analysis of transportation data, identification of data sources and limitations. Static and dynamic data elements such as infrastructure characteristics, flow and operations-related data elements. Spatial and temporal extents data for planning, design, operations, and management of transportation systems. Summarizing, analyzing, modeling, and interpreting data. Use of information technologies for highways, transit, and aviation systems.

C E 557. Transportation Systems Analysis. (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: C E 355, 3 credits in statistics or probability Travel studies and analysis of data. Transportation systems forecasts and analyses. Statewide, regional, and local transportation system planning. Network level systems planning and operations. Optimization of systems.

C E 558. Transportation Systems Development and Management. (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: C E 350 or C E 355 Study of designated problems in traffic engineering, transportation planning, and development. Forecasting and evaluation of social, economic, and environmental impacts of proposed solutions; considerations of alternatives. Formulation of recommendations and publication of a report. Presentation of recommendations in the host community.

C E 559. Transportation Infrastructure/Asset Management. (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: C E 355 or C E 453, C E 382 Engineering management techniques for maintaining and managing infrastructure assets. Systematic approach to management through value engineering, engineering economics, and life cycle cost analysis. Selection and scheduling of maintenance activities. Analysis of network-wide resource needs. Project level analysis.

C E 560. Fundamentals of Soil Mechanics. (3-0) Cr. 3. Prereq: C E 360 Nature of soil deposits, seeage, settlement and secondary compression, consolidation theories and analysis, failure theories, stress paths, introduction to critical state soil mechanics, constitutive models, soil strength under various drainage conditions, liquefaction of soil, pore pressure parameters, selection of soil parameters.

C E 561. Applied Foundation Engineering. (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: C E 460 Analysis and design of shallow and deep foundations, lateral earth pressure theories and retaining structures, field investigations, in-situ testing, and foundations on problematic soils. Foundation engineering reports.
C E 562. Site Evaluations for Civil Engineering Projects. (2-2) Cr. 3. Alt. F., offered even-numbered years. Prereq: C E 360
Identification and mapping of engineering soils from airphotos, maps, and soil surveys. Planning suburface investigations, geomaterials prospecting, geotechnical hazards, geomorphology, in situ testing and sampling, geophysical site characterization, instrumentation and monitoring, interpretation of engineering parameter values for design.

C E 563. Experimental Methods in Geo-Engineering. (2-2) Cr. 3. Alt. F., offered even-numbered years. Prereq: C E 360
Principles of geo-engineering laboratory testing including the conduct, analysis, and interpretation of permeability, consolidation, triaxial, direct and ring shear, and direct simple shear tests. Issues regarding laboratory testing versus field testing and acquisition, transport, storage, and preparation of samples for geotechnical testing. Field and laboratory geotechnical monitoring techniques, including the measurements of deformation, strain, total stress and pore water pressure.

C E 564. Application of Numerical Methods to Geotechnical Design. (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: C E 560
Application of numerical methods to analysis and design of foundations, underground structures, and soil-structure interaction. Application of slope stability software. Layered soils, bearing capacity and settlement for complex geometries, wave equation for piles, and foundation vibrations.

C E 565. Fundamentals of Geomaterials Behavior. (2-3) Cr. 3. S. Prereq: C E 382
Atoms and molecules, chemical crystal, clay minerals, structure of solids, phase transformations and phase equilibria. Surfaces and interfacial phenomena, colloids, chemistry, mechanical properties. Applications to soils and civil engineering materials. Overview of state-of-the-art instrumental techniques for analysis of the physicochemical properties of soils and civil engineering materials.

C E 567. Geomaterials Stabilization. (Dual-listed with C E 467). (2-2) Cr. 3. F. Prereq: C E 360, C E 382 or C E 383
Soil and aggregate physical, chemical and biological stabilization procedures. Stabilization analysis and design. Ground modification and compaction methods. Geosynthetics application and design.

C E 568. Dynamics of Soils and Foundations. (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: C E 360, E M 345

C E 569. Ground Improvement. (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: C E 360
Classification of ground improvement methods. Dynamic compaction, vibrocompaction, preloading using fill surcharge, vacuum or a combination of both and prefabricated vertical drains, vibro replacement or stone columns, dynamic replacement, sand compaction piles, geotextile confined columns, rigid inclusion, column supported embankment, microbial methods, particulate and chemical grouting, lime and cement columns, jet grouting, and deep cement mixing.

C E 570. Applied Hydraulic Design. (2-2) Cr. 3. Prereq: C E 372
Flow characteristics in natural and constructed channels; principles of hydraulic design of culverts, bridge waterway openings, spillways, hydraulic gates and gated structures, pumping stations, and miscellaneous water control structures; pipe networks, mathematical modeling. Design project.

C E 571. Surface Water Hydrology. (Cross-listed with ENSCI). (3-0) Cr. 3. Prereq: C E 372
Analysis of hydrologic data including precipitation, infiltration, evapotranspiration, direct runoff and streamflow; theory and use of frequency analysis; theory of streamflow and reservoir routing; use of deterministic and statistical hydrologic models. Fundamentals of surface water quality modeling, point and non-point sources of contamination. Design project.

C E 572. Analysis and Modeling Aquatic Environments. (Cross-listed with ENSCI). (3-0) Cr. 3. Prereq: C E 372
Principles of surface water flows and mixing. Introduction to hydrologic transport and water quality simulation in natural water systems. Advection, diffusion and dispersion, chemical and biologic kinetics, and water quality dynamics. Applications to temperature, dissolved oxygen, primary productivity, and other water quality problems in rivers, lakes and reservoirs. Deterministic vs. stochastic models.

C E 573. Groundwater Hydrology. (Dual-listed with C E 473). (Cross-listed with ENSCI). (3-0) Cr. 3. F. Prereq: C E 372

C E 576. Environmental Flows. (3-0) Cr. 3. Prereq: E M 378 or equivalent
Analysis and applications of flows in civil engineering, environmental engineering, and water resources. Primary topics include conservation laws, laminar flow, turbulence, mixing, diffusion, dispersion, water waves, and boundary layers. Associated applications include particle settling, transfer at air-water and water-sediment boundaries, flow and friction in pipes and open channels, contaminant transport, waves in lakes, jets, plumes, and salt wedges.

C E 581. Geotechnical and Materials Engineering Seminar. Cr. R. Repeatable. Prereq: Graduate classification (1-0) Students and outside/invited speakers give weekly presentations about the ongoing research work and Geotechnical and Materials Engineering issues. Offered on a satisfactory-fail basis only.

C E 583. Pavement Analysis and Design. (Dual-listed with C E 483). (3-0) Cr. 3. S. Prereq: C E 360 and C E 382
Analysis, behavior, performance, and structural design of pavement systems. Topics include climate factors, rehabilitation, life cycle design economics, material and system response, pavement foundations and traffic loadings. Development of models for and analysis of pavement systems. Use of transfer functions relating pavement response to pavement performance. Evaluation and application of current and evolving pavement design practices and procedures. Mechanistic-based pavement design techniques and concepts. Analysis of the effects of maintenance activities on pavement performance and economic evaluation of pavement systems.

C E 584. Advanced Design of Concretes. (Dual-listed with C E 484). (2-2) Cr. 3. Alt. S., offered even-numbered years. Prereq: C E 382
Asphalt binder characterization, fundamentals of asphalt rheology, asphalt materials behavior under loading and temperature effects. High-strength, light-weight, fiber-reinforced, and self-consolidating portland cement concretes, mix design, properties, advanced performance testing. A term project is required for graduate level only.

C E 586. Advanced Asphalt Materials. (2-3) Cr. 3. Alt. F., offered even-numbered years. Prereq: C E 382

C E 587. Advanced Portland Cement Concretes. (2-3) Cr. 3. Alt. S., offered odd-numbered years. Prereq: C E 382 or C E 383
Hydraulic cements, aggregates, admixtures, and mix design; concrete production, quality control, early-age properties and durability. Concrete distress examination, identification, prevention, and nondestructive testing; advanced concrete technology, high-strength and high performance concrete.

C E 588. Sustainable Horizontal Civil Infrastructure Systems. (Dual-listed with C E 488). (3-0) Cr. 3. F. Prereq: Junior or higher classification in engineering of science Sustainable planning, life cycle analysis, appropriate engineering design, and overall rating assessment of horizontal civil infrastructure (i.e., versus ‘vertical building’) systems, including highway, bridge, airport, rail, and port facilities. Course readings and final project/design report.

C E 590. Special Topics. Cr. 1-5. Repeatable. F.S.SS.
Pre-enrollment contract required.

Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics:...
C E 594A. Special Topics Construction Engineering and Mgt.: Planning and Scheduling. Cr. 1-3. Repeatable. Prereq: CON E 322, CON E 340 or C E 306, and permission of instructor
Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

C E 594B. Special Topics Construction Engineering and Mgt.: Computer Applications for Planning and Scheduling. Cr. 1-3. Repeatable. Prereq: CON E 322, CON E 340 or C E 306, and permission of instructor
Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

C E 594I. Special Topics Construction Engineering and Mgt.: Electrical and Mechanical Construction. Cr. 1-3. Repeatable. Prereq: CON E 322, CON E 340 or C E 306, and permission of instructor
Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

C E 594N. Special Topics Construction Engineering and Mgt.: Industrial Construction. Cr. 1-3. Repeatable. Prereq: CON E 322, CON E 340 or C E 306, and permission of instructor
Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

C E 594O. Special Topics Construction Engineering and Mgt.: Highway and Heavy Construction. Cr. 1-3. Repeatable. Prereq: CON E 322, CON E 340 or C E 306, and permission of instructor
Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

C E 594Q. Special Topics Construction Engineering and Mgt.: Construction Quality Control. Cr. 1-3. Repeatable. Prereq: CON E 322, CON E 340 or C E 306, and permission of instructor
Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

Some topics have a set number of credits and some topics have the number of credits vary. Emphasis for a particular offering will be selected from the following topics.

C E 595. Research Methods in Construction Engineering and Management. (1-0) Cr. 1. Prereq: Credit or enrollment in C E 501, C E 502, C E 503, or C E 505 Assigned readings and reports on research methods to solve construction engineering and management problems such as alternative project delivery methods, asset management, data mining, construction procurement, robotics, project controls, automation, construction visualization, etc. Identification of research methods and priorities, selection and development of research design, and critique of research in construction engineering and management.

C E 595A. Research Methods Seminar in Construction Engineering and Management: Qualitative Methods. (1-0) Cr. 1. Prereq: Credit or enrollment in C E 501, C E 502, C E 503, or C E 505 Assigned readings and reports on research methods to assess and solve qualitative construction engineering and management problems.

C E 595B. Research Methods Seminar in Construction Engineering and Management: Quantitative Methods. (1-0) Cr. 1. Prereq: Credit or enrollment in C E 501, C E 502, C E 503, or C E 505 Assigned readings and reports on research methods to assess and solve quantitative construction engineering and management problems.

C E 595C. Research Methods Seminar in Construction Engineering and Management: Technical Reporting. (1-3) Cr. 1. Prereq: Credit or enrollment in C E 501, C E 502, C E 503, or C E 505 Assigned readings and reports on research methods for planning and preparation of technical reports with construction engineering and management projects.
C E 697. Engineering Internship.
Cr. R. Repeatable. Prereq: Permission of coop advisor, graduate classification
One semester and one summer maximum per academic year professional work
period. Offered on a satisfactory-fail basis only.

C E 699. Research.
Cr. 1-30. Repeatable. Prereq: Pre-enrollment contract required

Computer Engineering

Administered by the Department of Electrical and Computer Engineering

Undergraduate Study

For the undergraduate curriculum in computer engineering leading to the
degree Bachelor of Science. This curriculum is accredited by the Engineering

The Department of Electrical and Computer Engineering (ECpE) at Iowa State
University provides undergraduate students with the opportunity to learn electrical
and computer engineering fundamentals, study applications of the most recent
advances in state-of-the-art technologies, and to prepare for the practice of
computer engineering. The student-faculty interaction necessary to realize this
opportunity occurs within an environment that is motivated by the principle that
excellence in undergraduate education is enhanced by an integrated commitment
to successful, long-term research and outreach programs.

The computer engineering curriculum offers focus areas in software systems,
embedded systems, networking, information security, computer architecture, and
VLSI.

Students also may take elective courses in control systems, electromagnetics,
microwave engineering, VLSI, power systems, and communications and signal
processing.

The program objectives for the computer engineering programs describe
accomplishments that graduates are expected to attain within five years after
graduation. Graduates will have applied their expertise to contemporary problem
solving, be engaged professionally, have continued to learn and adapt, and
have contributed to their organizations through leadership and teamwork. More
specifically, the objectives for expertise, engagement, learning, leadership and
teamwork are defined below for each program.

The objectives of the computer engineering program at Iowa State University are:

- Graduates, within five years of graduation, should demonstrate a commitment
toward exceptionally ethical and professional practice.
- Graduates, within five years of graduation, should demonstrate peer-
recognized expertise together with the ability to articulate that expertise
and use it for contemporary problem solving in the analysis, design, and
evaluation of computer and software systems, including system integration and
implementation.
- Graduates, within five years of graduation, should demonstrate sustained
learning and adapting to a constantly changing field through graduate work,
professional development, and self-study.
- Graduates, within five years of graduation, should demonstrate leadership and
initiative to ethically advance professional and organizational goals, facilitate
the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment
to teamwork while working with others of diverse cultural and interdisciplinary
backgrounds.

As a complement to the instructional activity, the ECpE department provides
opportunities for each student to have experience with broadening activities.
Through the cooperative education and internship program, students have the
opportunity to gain practical industry experience. Students have the opportunity
to participate in advanced research activities, and through international exchange
programs, students learn about engineering practices in other parts of the world.
Well-qualified juniors and seniors in computer engineering who are interested in
graduate study may apply for concurrent enrollment in the Graduate College to
simultaneously pursue both the Bachelor of Science and Master of Science, the
Bachelor of Science and Master of Business Administration, or the Bachelor of
Science and Master of Engineering degrees.

Students are required to prepare and to maintain a portfolio of their technical
and non-technical skills. This portfolio is evaluated for student preparation during
the student’s curriculum planning process. Results of the evaluation are used to
advise students of core strengths and weaknesses.

Courses for graduate students:

C E 596. Special Topics in Transportation Engineering.
Cr. arr. Repeatable. Prereq: C E 355

C E 596A. Special Topics in Transportation Engineering: Intelligent Transportation Systems.
Cr. arr. Repeatable. Prereq: C E 355

C E 596B. Special Topics in Transportation Engineering: Geographic Information Systems in Transportation.
Cr. arr. Repeatable. Prereq: C E 355

Cr. arr. Repeatable. Prereq: C E 355

C E 596D. Special Topics in Transportation Engineering: Transportation and Public Works.
Cr. arr. Repeatable. Prereq: C E 355

C E 596E. Special Topics in Transportation Engineering: Sustainable Transportation.
Cr. arr. Repeatable. Prereq: C E 355

C E 596F. Special Topics in Transportation Engineering: Freight Transportation.
Cr. arr. Repeatable. Prereq: C E 355

C E 599. Creative Component.
Cr. 1-3. Repeatable.
Pre-enrollment contract required. Advanced topic for creative component report in lieu of thesis.

C E 622. Advanced Topics in Environmental Engineering.
(2-0) Cr. 2. Repeatable. Prereq: Permission of environmental engineering graduate faculty
Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics.: 

C E 622A. Advanced Topics in Environmental Engineering: Water Pollution Control.
(2-0) Cr. 2. Repeatable. Prereq: Permission of environmental engineering graduate faculty
Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics.: 

C E 622B. Advanced Topics in Environmental Engineering: Solid and Hazardous Waste.
(2-0) Cr. 2. Repeatable. Prereq: Permission of environmental engineering graduate faculty
Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics.: 

C E 622D. Advanced Topics in Environmental Engineering: Water Resources.
(2-0) Cr. 2. Repeatable. Prereq: Permission of environmental engineering graduate faculty
Advanced concepts in environmental engineering. Emphasis for a particular offering will be selected from the following topics.: 

C E 650. Advanced Topics in Transportation Engineering.
(3-0) Cr. 3. Repeatable. Prereq: Permission of Transportation Engineering graduate faculty

C E 650A. Advanced Topics in Transportation Engineering: Highway Design.
(3-0) Cr. 3. Repeatable. Prereq: Permission of Transportation Engineering graduate faculty

(3-0) Cr. 3. Repeatable. Prereq: Permission of Transportation Engineering graduate faculty

C E 690. Advanced Topics.
Cr. 1-3. Repeatable. F.S.SS.
Pre-enrollment contract required.
Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in computer engineering and minor work to students with other majors. Minor work for computer engineering majors is usually selected from a wide range of courses outside computer engineering.

The Master of Engineering degree is course-work only. It is recommended for off-campus students.

The Master of Science degree with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers three graduate certificate programs in embedded systems, computer networking, and software systems.

The normal prerequisite to graduate major work in computer engineering is the completion of undergraduate work substantially equivalent to that required of computer engineering students at this university. It is possible for a student to qualify for graduate study in computer engineering even though the student’s undergraduate or prior graduate training has been in a discipline other than computer engineering. Supporting work, if required, will depend on the student’s background and area of research interest. Prospective students from a discipline other than computer engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an advisor in electrical and computer engineering.

The Department of Electrical and Computer Engineering also is a participating department in the interdepartmental certificate, Master of Engineering, and Master of Science in Information Assurance programs. Students interested in studying information assurance topics may earn a degree in computer engineering or in information assurance. (See catalog section on Information Assurance.)

Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both Bachelor of Science and Master of Science, or Bachelor of Science and Master of Business Administration, or Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s web site.

Curriculum in Computer Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 127 See also Basic Program and Special Programs.

International Perspectives: 3 cr.  
U.S. Diversity: 3 cr.  

Communication Proficiency/Library requirement:

Co-op or internship is optional.

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include CPR E 491 Senior
Design Project I and Professionalism. CPR E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. degree and international perspectives courses may not be taken Pass/Not Pass, but are used to meet the general education electives.

2. Complete minimum of 6 cr. from Approved General Education Component at 300- or higher level. Complete additional 9 cr. from Approved General Education Component.

3. See Basic Program for Professional Engineering Curriculum for accepted substitutions for curriculum designated courses in the Basic Program.

4. 2.00 required including transfer courses.

5. From department approved lists. (http://www.ece.iastate.edu/academics/bachelors-degree-requirements)

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Courses primarily for undergraduates:

Basic concepts of practical computer and Internet security: passwords, firewalls, antivirus software, malware, social networking, surfing the Internet, phishing, and wireless networks. This class is intended for students with little or no background in information technology or security. Basic knowledge of word processing required. Offered on a satisfactory-fail basis only.

CPR E 166. Professional Programs Orientation. (Cross-listed with E E). Cr. R. F.S.
(1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, advising center operations, degree requirements, program of study planning, career options, and student organizations.

CPR E 185. Introduction to Computer Engineering and Problem Solving I. (2-2) Cr. 3. Prereq: Credit or enrollment in MATH 141

CPR E 186. Introduction to Computer Engineering and Problem Solving II. (0-2) Cr. 1. S. Prereq: CPR E 185
Project based examples from computer engineering. Group skills needed to work effectively in teams. Group problem solving. Computer based projects. Technical reports and presentations. Students will work on 2 or 3 self-directed team based projects that are representative of problems faced by computer engineers.

CPR E 261. Transfer Orientation. (Cross-listed with E E). Cr. R.
Introduction to the College of Engineering and the engineering profession specifically for transfer students. Information concerning university and college policies, procedures, and resources. Offered on a satisfactory-fail basis only.

CPR E 281. Digital Logic. (3-2) Cr. 4. F.S. Prereq: sophmore classification
Number systems and representation. Boolean algebra and logic minimization. Combinational and sequential logic design. Arithmetic circuits and finite state machines. Use of programmable logic devices. Introduction to computer-aided schematic capture systems, simulation tools, and hardware description languages. Design of simple digital systems.

CPR E 288. Embedded Systems I: Introduction. (3-2) Cr. 4. F.S. Prereq: CPR E 281, COM S 207 or COM S 227 or E E 285
Embedded C programming. Interrupt handling. Memory mapped I/O in the context of an application. Elementary embedded design flow/methodology. Timers, scheduling, resource allocation, optimization, state machine based controllers, real time constraints within the context of an application. Applications laboratory exercises with embedded devices.

CPR E 294. Program Discovery. (Cross-listed with E E). Cr. R. Prereq: CPR E 166 or E E 166
The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today’s world. Offered on a satisfactory-fail basis only.

CPR E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services
First professional work period in the cooperative education program. Students must register for this course before commencing work.

CPR E 308. Operating Systems: Principles and Practice. (3-3) Cr. 4. F.S. Prereq: CPR E 381, CPR E 310
Operating system concepts, processes, threads, synchronization between threads, process and thread scheduling, deadlocks, memory management, file systems, I/O systems, security, Linux-based lab experiments.

CPR E 310. Theoretical Foundations of Computer Engineering. (3-0) Cr. 3. F.S. Prereq: Credit or enrollment in CPR E 288, COM S 228
Propositional logic and methods of proof; set theory and its applications; mathematical induction and recurrence relations; functions and relations; and counting; trees and graphs; applications in computer engineering.

CPR E 315. Applications of Algorithms in Computer Engineering. (3-0) Cr. 3. F.S.S. Prereq: CPR E 310
Solving computer engineering problems using algorithms. Emphasis on problems related to the core focus areas in computer engineering. Real world examples of algorithms used in the computer engineering domain. Algorithm engineering. Prototyping of algorithms.

CPR E 329. Software Project Management. (Cross-listed with S E). (3-3) Cr. 3. Prereq: COM S 309

CPR E 330. Integrated Electronics. (Cross-listed with E E). (3-3) Cr. 4. Prereq: E E 201, credit or enrollment in E E 230, CPR E 281
Semiconductor technology for integrated circuits. Modeling of integrated devices, including diodes, BJTs, and MOSFETs. Physical layout. Circuit simulation. Digital building blocks and digital circuit synthesis. Analysis and design of analog building blocks. Laboratory exercises and design projects with CAD tools and standard cells. Credit for only one of E E 330 or 331 may be counted toward graduation.

CPR E 339. Software Architecture and Design. (Cross-listed with S E). (3-0) Cr. 3. Prereq: S E 319

CPR E 370. ToyEng with Technology. (Cross-listed with MAT E). (2-2) Cr. 3. F.S. Prereq: C I 201 or C I 202
A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on laboratory experiences based upon simple systems constructed out of LEGO®s and controlled by small microcomputers. Future K-12 teachers will leave the course with complete lesson plans for use in their upcoming careers.

CPR E 381. Computer Organization and Assembly Level Programming. (3-2) Cr. 4. F.S. Prereq: CPR E 288
Introduction to computer organization, evaluating performance of computer systems, instruction set design. Assembly level programming: arithmetic operations, control flow instructions, procedure calls, stack management. Processor design. Datapath and control, scalar pipelines, introduction to memory and I/O systems.

CPR E 388. Embedded Systems II: Mobile Platforms. (3-2) Cr. 4. Prereq: CPR E 288
Contemporary programming techniques for event driven systems. Mobile platforms and operating systems. Location and motion sensors based user interfaces. Threading and scheduling. Resource management - measurement and control techniques - for memory and energy. Client-server application design. Distributed applications. Laboratory includes exercises based on a mobile platform.
CPR E 394. Program Exploration.  
(Cross-listed with E E). Cr. R. Prereq: CPR E 294 or E E 294  
Examination of academic and career fields for electrical and computer engineers.  
Offered on a satisfactory-fail basis only.

CPR E 396. Summer Internship.  
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services  
Summer professional work period.

CPR E 397. Engineering Internship.  
Cr. R. Repeatable. F.S.SS. Prereq: Permission of department and Engineering Career Services  
One semester maximum per academic year professional work period.

CPR E 398. Cooperative Education.  
Cr. R. F.S.SS. Prereq: CPR E 298, permission of department and Engineering Career Services  
Second professional work period in the cooperative education program. Students must register for this course before commencing work.

(Cross-listed with COM S, S E). (3-0) Cr. 3. S. Prereq: COM S 330 or CPR E 310;  
COM S 311, STAT 330  
A study of formal techniques for model—based specification and verification of software systems. Topics include logics, formalisms, graph theory, numerical computations, algorithms, and tools for automatic analysis of systems.

CPR E 416. Software Evolution and Maintenance.  
(Cross-listed with S E). (3-0) Cr. 3. Prereq: COM S 309  
Practical importance of software evolution and maintenance, systematic defect analysis and debugging techniques, tracing and understanding large software, impact analysis, program migration and transformation, refactoring, tools for software evolution and maintenance, experimental studies and quantitative measurements of software evolution. Written reports and oral presentation.

(Cross-listed with E E). (3-2) Cr. 4. F. Prereq: E E 320 and E E 311  

(Cross-listed with COM S). (3-1) Cr. 3. S. Prereq: COM S 311, COM S 330, ENGL 250, SP CM 212  
Introduction to high performance computing platforms including parallel computers and workstation clusters. Discussion of parallel architectures, performance, programming models, and software development issues. Sample applications from science and engineering. Practical issues in high performance computing will be emphasized via a number of programming projects using a variety of programming models and case studies. Oral and written reports.

CPR E 426. Introduction to Parallel Algorithms and Programming.  
(Dual-listed with CPR E 526). (Cross-listed with COM S). (3-2) Cr. 4. F. Prereq:  
CPR E 308 or COM S 321, CPR E 315 or COM S 311  
Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

(3-0) Cr. 3. S. Prereq: credit or enrollment in CPR E 489 or COM S 454  
Introduction to and application of basic mechanisms for protecting information systems from accidental and intentional threats. Basic cryptography use and practice. Computer security issues including authentication, access control, and malicious code. Network security mechanisms such as intrusion detection, firewalls, IPSEC, and related protocols. Ethics and legal issues in information security. Other selected topics. Programming and system configuration assignments.

CPR E 435. Analog VLSI Circuit Design.  
(Cross-listed with E E). (3-3) Cr. 4. S. Prereq: E E 324, E E 330, E E 332, and either E E 322 or STAT 330  
Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters.

CPR E 444. Introduction to Bioinformatics.  
(Cross-listed with BCB, BCBIO, BIOL, COM S, GEN). (4-0) Cr. 4. F. Prereq:  
MATH 165 or STAT 401 or equivalent  
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative and functional genomics, systems biology.

CPR E 450. Distributed Systems and Middleware.  
(Dual-listed with CPR E 550). (3-0) Cr. 3. Prereq: CPR E 308 or COM S 352  
Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and internet applications.

(Dual-listed with CPR E 554). (Cross-listed with COM S). (3-1) Cr. 3. Alt. S.,  
offered odd-numbered years. Prereq: COM S 311, COM S 352, ENGL 250, SP CM 212  
Laboratory course dealing with practical issues of design and implementation of distributed and network operating systems and distributed computing environments (DCE). The client server paradigm, inter-process communications, layered communication protocols, synchronization and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports.

(Dual-listed with CPR E 558). (3-0) Cr. 3. Prereq: CPR E 308 or COM S 352  
Fundamental concepts in real-time systems. Real time task scheduling paradigms. Real-time management in uniprocessor, multiprocessor, and distributed real-time systems. Fault-tolerance, resource reclaiming, and overload handling. Real-time channel, packet scheduling, and real-time LAN protocols. Case study of real-time operating systems. Laboratory experiments.

(Cross-listed with E E). (3-3) Cr. 4. S. Prereq: E E 330  
Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project.

CPR E 466. Multidisciplinary Engineering Design.  
(Cross-listed with A B E, AER E, E E, ENGR, I E, M E, MAT E). (1-4) Cr. 3.  
Repeatable. F.S. Prereq: Student must be within two semesters of graduation  
and receive permission of instructor  
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

CPR E 467. Multidisciplinary Engineering Design II.  
(Cross-listed with A B E, AER E, ENGR, I E, M E, MAT E). (1-4) Cr. 3.  
Repeatable, maximum of 2 times. F.S. Prereq: Student must be within two semesters of graduation or receive permission of instructor  
Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

(3-3) Cr. 4. S. Prereq: CPR E 381 or COM S 321  
Introduction to hardware architectures for computer graphics and their programming models. System-level view, including framebuffers, video output devices, displays, 2D and 3D graphics acceleration, and device interfacing. Architectural design of GPUs, from 2D and 3Dsprite engines to 3D rendering pipelines to unified shader architectures. Computing models for graphics processors. GPGPU and GPU computing.

CPR E 483. Hardware Software Integration.  
(3-3) Cr. 4. S. Prereq: CPR E 381  
Embedded system design using hardware description language (HDL) and field programmable gate array (FPGA). HDL modeling concepts and styles are introduced; focus on synthesizability, optimality, reusability and portability in hardware design description. Introduction to complex hardware cores for data buffering, data input/output interfacing, data processing. System design with HDL cores and implementation in FPGA. Laboratory-oriented design projects.
CPR E 488. Embedded Systems Design. (3-3) Cr. 4. Prereq: CPR E 381 or COM S 321
Embedded microprocessors, embedded memory and I/O devices, component interfaces, embedded software, program development, basic compiler techniques, platform-based FPGA technology, hardware synthesis, design methodology, real-time operating system concepts, performance analysis and optimizations.

CPR E 489. Computer Networking and Data Communications. (3-2) Cr. 4. F.S. Prereq: CPR E 381 or E E 324
Modern computer networking and data communications concepts. TCP/IP, OSI protocols, client server programming, data link protocols, local area networks, and routing protocols.

CPR E 491. Senior Design Project I and Professionalism. (Cross-listed with E E). (2-3) Cr. 3. F.S. Prereq: E E 322 or CPR E 308, completion of 24 credits in the E E core professional program or 29 credits in the Cpr E core professional program, ENGL 314
Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

CPR E 492. Senior Design Project II. (Cross-listed with E E). (1-3) Cr. 2. F.S. Prereq: CPR E 491 or E E 491
Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or CPR E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

CPR E 494. Portfolio Assessment. (Cross-listed with E E). Cr. R. Prereq: CPR E 394 or E E 394, credit or enrollment in CPR E 491 or E E 491
Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

CPR E 498. Cooperative Education. Cr. R. Repeatable. F.S.S. Prereq: CPR E 398, permission of department and Engineering Career Services
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduates:

CPR E 504. Power Management for VLSI Systems. (Cross-listed with E E). (3-3) Cr. 4. Prereq: E E 435, Credit or Registration for E E 501
Theory, design and applications of power management and regulation circuits (Linear and switching regulators, battery chargers, and reference circuits) including: Architectures, Performance metrics and characterization, Noise and stability analysis, Practical implementation and on-chip integration issues, design considerations for portable, wireless, and RF SoCs.

CPR E 505. CMOS and BiCMOS Data Conversion Circuits. (Cross-listed with E E). (3-3) Cr. 4. Alt. S., offered even-numbered years. Prereq: E E 501
Theory, design and applications of data conversion circuits (A/D and D/A converters) including: architectures, characterization, quantization effects, conversion algorithms, spectral performance, element matching, design for yield, and practical comparators, implementation issues.

CPR E 506. Design of CMOS Phase-Locked Loops. (Cross-listed with E E). (3-3) Cr. 4. Prereq: E E 435 or E E 501 or instructor approval
Analysis and design of phase-locked loops implemented in modern CMOS processes including: architectures, performance metrics, and characterization; noise and stability analysis; and design issues of phase-frequency detectors, charge pumps, loop filters (passive and active), voltage controlled oscillators, and frequency dividers.

CPR E 507. VLSI Communication Circuits. (Cross-listed with E E). (3-3) Cr. 4. Alt. S., offered odd-numbered years. Prereq: CPR E 530 or CPR E 501
Radio frequency integrated circuits for wireless and wired communications with a focus on CMOS implementations. Discussions on fundamental concepts in RF design such as nonlinearity, sensitivity, and dynamic range will be followed with a detailed analysis and design of low-noise amplifiers, mixer, oscillators, and transceivers.

CPR E 511. Design and Analysis of Algorithms. (Cross-listed with COM S). (3-0) Cr. 3. F. Prereq: COM S 311
A study of basic algorithm design and analysis techniques. Advanced data structures, amortized analysis and randomized algorithms. Applications to sorting, graphs, and geometry. NP-completeness and approximation algorithms.

CPR E 525. Numerical Analysis of High Performance Computing. (Cross-listed with COM S, MATH). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: CPR E 308 or MATH 481; experience in scientific programming; knowledge of FORTRAN or C
Introduction to parallelization techniques and numerical methods for state-of-the-art high performance computers. A major component will be a final project in an area related to each student's research interests.

CPR E 526. Introduction to Parallel Algorithms and Programming. (Dual-listed with CPR E 426). (Cross-listed with COM S). (3-2) Cr. 4. F. Prereq: CPR E 308 or COM S 321, CPR E 315 or COM S 311
Models of parallel computation, performance measures, basic parallel constructs and communication primitives, parallel programming using MPI, parallel algorithms for selected problems including sorting, matrix, tree and graph problems, fast Fourier transforms.

CPR E 528. Probabilistic Methods in Computer Engineering. (3-0) Cr. 3. Prereq: CPR E 315 or COM S 311
The application of randomization and probabilistic methods in the design of computer algorithms, and their efficient implementation. Discrete random variables in modeling algorithm behavior, with applications to sorting, selection, graph algorithms, hashing, pattern matching, cryptography, distributed systems, and massive data set algorithms.

CPR E 530. Advanced Protocols and Network Security. (Cross-listed with INFAS). (3-0) Cr. 3. Prereq: CPR E 381
Detailed examination of networking standards, protocols, and their implementation. TCP/IP protocol suite, network application protocols, IP routing, network security issues. Emphasis on laboratory experiments.

CPR E 531. Information System Security. (Cross-listed with INFAS). (3-0) Cr. 3. Prereq: CPR E 489 or CPR E 530 or COM S 586 or MIS 535
Computer and network security: basic cryptography, security policies, multilevel security models, attack and protection mechanisms, legal and ethical issues.

CPR E 532. Information Warfare. (Cross-listed with INFAS). (3-0) Cr. 3. S. Prereq: CPR E 531

CPR E 533. Cryptography. (Cross-listed with INFAS, MATH). (3-0) Cr. 3. S. Prereq: MATH 301 or CPR E 310 or COM S 330
Basic concepts of secure communication, DES and AES, public-key cryptosystems, elliptic curves, hash algorithms, digital signatures, applications. Relevant material on number theory and finite fields.

CPR E 534. Legal and Ethical Issues in Information Assurance. (Cross-listed with INFAS, POL S). (3-0) Cr. 3. S. Prereq: Graduate classification; CPR E 531 or INFAS 531
Legal and ethical issues in computer security. State and local codes and regulations. Privacy issues.
(Cross-listed with INFS, MATH). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: E E 524 or MATH 307 or COM S 330
Basic principles of covert communication, steganalysis, and forensic analysis for digital images. Steganographic security and capacity, matrix embedding, blind attacks, image forensic detection and device identification techniques. Related material on coding theory, statistics, image processing, pattern recognition.

(Cross-listed with INFAS). (3-0) Cr. 3. Prereq: CPR E 381 and CPR E 489 or CPR E 530
Fundamentals of computer and network forensics, forensic duplication and analysis, network surveillance, intrusion detection and response, incident response, anonymity and pseudonymity, privacy-protection techniques, cyber law, computer security policies and guidelines, court testimony and report writing, and case studies. Emphasis on hands-on experiments.

(3-0) Cr. 3. S. Prereq: Credit or enrollment in CPR E 489 or CPR E 530
Introduction to the physical layer and special issues associated with security of the airlink interface. Communication system modeling, wireless networking, base stations, mobile stations, airlink multiple access, jamming, spoofing, signal intercept, wireless LANS and modems, cellular, position location, spread spectrum, signal modeling, propagation modeling, wireless security terminology.

CPR E 541. High-Performance Communication Networks.
(3-0) Cr. 3. Prereq: CPR E 489 or CPR E 530
Selected topics from recent advances in high performance networks; next generation internet; asynchronous transfer mode; traffic management, quality of service; high speed switching.

CPR E 542. Optical Communication Networks.
(3-0) Cr. 3. S. Prereq: CPR E 489
Optical components and interfaces; optical transmission and reception techniques; wavelength division multiplexing; network architectures and protocols for first generation, single and multihop optical network; routing and wavelength assignment in second generation wavelength routing networks; traffic grooming, optical network control; survivability; access networks; metro networks.

(3-0) Cr. 3. Prereq: Credit or enrollment in CPR E 489 or CPR E 530
Introduction to the protocol architecture of the data link layer, network layer and transport layer for wireless networking, Operation and management of Medium Access Control in Wireless Local Area Networks (WLAN) and Wireless Metropolitan Area Networks (WMAN); recent developments in IEEE 802.11 & 802.16 and Bluetooth; Mobile IP; Mobile TCP.

CPR E 544. Introduction to Bioinformatics.
(Cross-listed with BCB, COM S, GDCB). (4-0) Cr. 4. F. Prereq: MATH 165 or STAT 401 or equivalent
Broad overview of bioinformatics with a significant problem-solving component, including hands-on practice using computational tools to solve a variety of biological problems. Topics include: database searching, sequence alignment, gene prediction, RNA and protein structure prediction, construction of phylogenetic trees, comparative, functional genomics, and systems biology.

CPR E 545. Fault-Tolerant Systems.
(3-0) Cr. 3. Prereq: CPR E 381
Faults and their manifestations, errors, and failures; fault detection, location and reconfiguration techniques; time, space, and information (coding) redundancy management; design for testability; self-checking and fail-safe circuits; system-level fault diagnosis; Byzantine agreement; stable storage and RAID; clock synchronization; fault-tolerance in real-time systems; reliable software design; checkpointing and rollback recovery; atomic actions; replica management protocols; and reliability evaluation techniques and tools.

(3-0) Cr. 3. Prereq: CPR E 489 or CPR E 530
Fundamental and well-known protocols for wireless ad hoc and sensor networks at various layers, including physical layer issues, MAC (medium access control) layer protocols, routing protocols for wireless ad hoc and sensor networks, data management in sensor networks, coverage and connectivity, localization and tracking, security and privacy issues. Introduction to TinyOS and the nesC language. Hands-on experiments with Crossbow Mote sensor devices.

(3-0) Cr. 3.
Analytical approach to resource allocation on communication networks (e.g. the Internet, multihop wireless networks, etc.). Network utility maximization and the internet congestion control algorithm. Layering as optimization decomposition: a cross-layer design approach in multihop wireless networks. Capacity of ad hoc wireless networks.

(Cross-listed with COM S). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: COM S 311 and either COM S 228 or COM S 208
Design and analysis of algorithms for applications in computational biology, pairwise and multiple sequence alignments, approximation algorithms, string algorithms including in-depth coverage of suffix trees, semi-numerical string algorithms, algorithms for selected problems in fragment assembly, phylogenetic trees and protein folding. No background in biology is assumed. Also useful as an advanced algorithms course in string processing.

CPR E 550. Distributed Systems and Middleware.
(Dual-listed with CPR E 465). (3-0) Cr. 3. Prereq: CPR E 308 or COM S 352
Fundamentals of distributed computing, software agents, naming services, distributed transactions, security management, distributed object-based systems, web-based systems, middleware-based application design and development, case studies of middleware and internet applications.

CPR E 554. Distributed and Network Operating Systems.
(Dual-listed with CPR E 454). (Cross-listed with COM S). (3-1) Cr. 3. Alt. S., offered odd-numbered years. Prereq: COM S 311, COM S 352
Laboratory course dealing with practical issues of design and implementation of distributed and network operating systems and distributed computing environments (DCE). The client server paradigm, inter-process communications, layered communication protocols, synchronization and concurrency control, and distributed file systems. Graduate credit requires additional in-depth study of advanced operating systems. Written reports.

CPR E 556. Scalable Software Engineering.
(3-0) Cr. 3. Prereq: COM S 309
Design and analysis techniques scalable to large software, project-based learning of problem solving techniques, automation tools for high productivity and reliability of software, analysis-based measurement and estimation techniques for predictable software engineering.

(Cross-listed with COM S, M E). (3-0) Cr. 3. F.S. Prereq: M E 421, programming experience in C

(Dual-listed with CPR E 458). (3-0) Cr. 3. Prereq: CPR E 308 or COM S 352

(3-0) Cr. 3. Prereq: CPR E 465

(Cross-listed with BCB, COM S). (3-0) Cr. 3. F. Prereq: COM S 228; COM S 330; STAT 341; credit or enrollment in BIOL 315, STAT 430

CPR E 569. Bioinformatics II (Structural Genome Informatics).
(Cross-listed with BBMB, BCB, COM S). (3-0) Cr. 3. F. Prereq: BCB 567, GEN 411, STAT 430
CPR E 570. Bioinformatics IV (Computational Functional Genomics and Systems Biology).
(Cross-listed with BCB, COM S, GDCB, STAT). (3-0) Cr. 3. S. Prereq: BCB 567, BIOL 315, COM S 311 and either 208 or 228, GEN 411, STAT 430

CPR E 575. Computational Perception.
(Cross-listed with COM S, HCI). (3-0) Cr. 3. S. Prereq: Graduate standing or permission of instructor
This class covers statistical and algorithmic methods for sensing, recognizing, and interpreting the activities of people by a computer. This semester we will focus on machine perception techniques that facilitate and augment human-computer interaction. The main goal of the class is to introduce computational perception on both theoretical and practical levels. Participation in small groups to design, implement, and evaluate a prototype of a human-computer interaction system that uses one or more of the techniques covered in the lectures.

(Cross-listed with COM S). (3-0) Cr. 3. F. Prereq: CPR E 381
Quantitative principles of computer architecture design, instruction set design, processor architecture: pipelining and superscalar design, instruction level parallelism, memory organization: cache and virtual memory systems, multiprocessor architecture, cache coherency, interconnection networks and message routing, I/O devices and peripherals.

CPR E 582. Computer Systems Performance.
(3-0) Cr. 3. Prereq: CPR E 381, CPR E 310 and STAT 330
Review of probability and stochastic processes concepts; Markovian processes; Markovian queues; renewal theory; semi-Markovian queues, queuing networks, applications to multiprocessor architectures, computer networks, and switching systems.

(Cross-listed with COM S). (3-0) Cr. 3. Prereq: Background in computer architecture, design, and organization
Introduction to reconfigurable computing, FPGA technology and architectures, spatial computing architectures such as systolic and bit serial adaptive network architectures, static and dynamic rearrangeable interconnection architectures, processor architectures incorporating reconfigurability.

(3-0) Cr. 3.
Industry-standard tools and optimization strategies; practical embedded platforms and technology (reconfigurable platforms, multi-core platforms, low-power platforms); instruction augmentation, memory-mapped accelerator design, embedded software optimization. Students will be encouraged to compete as teams in an embedded system design competition.

(Cross-listed with HCI). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: knowledge of C/C++ programming language.
An introduction to the emerging interdisciplinary field of Developmental Robotics, which crosses the boundaries between robotics, artificial intelligence, developmental psychology, and philosophy. The main goal of this field is to create autonomous robots that are more intelligent, more adaptable, and more useful than the robots of today, which can only function in very limited domains and situations.

(3-0) Cr. 3. Prereq: CPR E 489 or CPR E 530
Fundamentals of pervasive computing, including location and context awareness, mobile and location services, ubiquitous data access, low power computing and energy management, middleware, security and privacy issues.

(3-0) Cr. 3. Prereq: CPR E 308

CPR E 590. Special Topics.
Cr. 1-6. Repeatable.
Formulation and solution of theoretical or practical problems in computer engineering.

CPR E 592. Seminar in Computer Engineering.
Cr. 1-4. Repeatable. Prereq: Permission of instructor
Projects or seminar in Computer Engineering.

CPR E 594. Selected Topics in Computer Engineering.
(3-0) Cr. 3. Repeatable.

CPR E 599. Creative Component.
Cr. arr. Repeatable.

Courses for graduate students:

(Cross-listed with COM S). (3-0) Cr. 3. Prereq: CPR E 526
Algorithm design for high-performance computing. Parallel algorithms for multidimensional tree data structures, space-filling curves, random number generation, graph partitioning and load balancing. Applications to grid and particle-based methods and computational biology.

CPR E 632. Information Assurance Capstone Design.
(Cross-listed with INFAS). (3-0) Cr. 3. Prereq: INFAS 531, INFAS 532, INFAS 534
Capstone design course which integrates the security design process. Design of a security policy. Creation of a security plan. Implementation of the security plan. The students will attack each other’s secure environments in an effort to defeat the security systems. Students evaluate the security plans and the performance of the plans. Social, political and ethics issues. Student self-evaluation, journaling, final written report, and an oral report.

(Cross-listed with COM S). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: CPR E 581. Repeatable with Instructor permission
Current topics in computer architecture design and implementation. Advanced pipelining, cache and memory design techniques. Interaction of algorithms with architecture models and implementations. Tradeoffs in architecture models and implementations.

CPR E 697. Engineering Internship.
(Cross-listed with E E). Cr. R. Repeatable.
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

CPR E 699. Research.
Cr. arr. Repeatable.

Construction Engineering
Administered by the Department of Civil, Construction and Environmental Engineering

Undergraduate Study
For curriculum in construction engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Construction Engineering Program Criteria by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Construction engineering is a curriculum administered by the Department of Civil, Construction and Environmental Engineering. For details of the curriculum in construction engineering leading to the degree bachelor of science. By three to five years after graduation, graduates of the construction engineering program will have:

1. Established themselves in successful careers in construction engineering, or a related field.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
3. Pursued lifelong learning, professional development, and registration as appropriate for their employers.

Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of integrated project delivery methods such
as design-build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer’s plans and specifications are converted into physical structures and facilities.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by providing students with opportunities to:

- interact with practicing professionals.
- gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers.
- develop leadership skills by participating in student organizations.
- develop, analyze, and interpret alternative solutions to open-ended problems.
- study abroad.

The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student’s perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study-abroad programs. Interested and qualified students have the opportunity to participate in the cooperative education program or internship program to supplement academic work with work experience.

Construction engineering students are encouraged to participate in life-long learning, continuous professional development, and to achieve professional engineer registration and/or registration as a certified professional constructor. Qualified construction engineering students within 30 credits of completing their degree may apply for concurrent enrollment in the Graduate College. See Civil Engineering Graduate Study for more information.

Graduate Study

An area of specialization in construction engineering and management is offered within the graduate program of the Department of Civil, Construction and Environmental Engineering. See Civil Engineering, Courses and Programs.

A graduate certificate is also available which requires 12 credits:

C E 501 Preconstruction Project Engineering and Management 3
C E 502 Construction Project Engineering and Management 3
C E 503 Construction Finance and Business Management 3
One of the following: 3

C E 505 Design of Construction Systems
C E 506 Case Histories in Construction Documents
C E 510 Information Technologies for Construction
C E 594A Special Topics Construction Engineering and Mgt.: Planning and Scheduling
C E 594C Special Topics Construction Engineering and Mgt.: Cost Estimating
C E 594E Special Topics Construction Engineering and Mgt.: Project Controls
C E 594F Special Topics Construction Engineering and Mgt.: Computer Applications for Project Controls
C E 594L Special Topics Construction Engineering and Mgt.: Advanced Building Construction Topics
C E 594M Special Topics Construction Engineering and Mgt.: Design Build Construction

Total Credits 12

Leading to the degree bachelor of science.

Total credits required: Building Option -125.0, Heavy Option - 125.0, Electrical - 124.0, Mechanical - 125.0 cr.

The Construction Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program.

See also Basic Program and Special Programs.

International Perspectives: 3 cr. 1

U.S. Diversity: 3 cr. 1

Communication Proficiency/Library requirements (minimum grade of C):

ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
LIB 160 Information Literacy 1

Business Communication Elective: one course of the following with a minimum grade of C.

ENGL 302 Business Communication 3
ENGL 309 Report and Proposal Writing 3
ENGL 314 Technical Communication 3

Social Sciences and Humanities: 12 cr.

One of the following 3

PSYCH 101 Introduction to Psychology
PSYCH 230 Developmental Psychology
PSYCH 250 Psychology of the Workplace
PSYCH 280 Social Psychology
SOC 134 Introduction to Sociology
ECON 101 Principles of Microeconomics
or ECON 102 Principles of Macroeconomics International Perspectives 3

U.S. Diversity approved list 3

Total Credits 12

Basic Program: 27 cr. 3

Complete with 2.00 GPA including transfer courses (see above for grade requirements):

CHEM 167 General Chemistry for Engineering Students 4
or CHEM 177 General Chemistry I 4
ENGL 150 Critical Thinking and Communication 3
ENGL 250 Written, Oral, Visual, and Electronic Composition 3
ENGR 101 Engineering Orientation 4
C E 160 Engineering Problems with Computational Laboratory 4 or ECON 102 Principles of Macroeconomics 3
LIB 160 Information Literacy 1
MATH 165 Calculus I 4
MATH 166 Calculus II 4
PHYS 221 Introduction to Classical Physics I 5

Total Credits 27

Math and Physical Science: 11 cr. (B, H); 12 cr. (E, M) 3.

STAT 105 Introduction to Statistics for Engineers 3
MATH 266 Elementary Differential Equations (B, H) 3
MATH 267 Elementary Differential Equations and Laplace Transforms (E, M) 4
PHYS 222 Introduction to Classical Physics II 5

Construction Engineering Core: 27 cr. (B, H); 28 cr. (E, M) 3.

E M 274 Statics of Engineering 3
E M 324 Mechanics of Materials 3
CON E 421 Construction Estimating 3
CON E 441 Construction Planning, Scheduling, and Control 3
E M 378 Mechanics of Fluids 3
C E 332 Structural Analysis I 3

Courses are offered for minor work to students taking major work in other curricula or in interdepartmental programs.

Curriculum in Construction Engineering

Administered by the Department of Civil, Construction, and Environmental Engineering.
### Additional Required Courses: 32 cr. (B, E, H), 33 cr. (M)

**Total Credits**: 27-28

### Engineering Topics Electives

- **Engineering Topics Electives - B**
  - C E 594O Special Topics Construction Engineering and Mgt.: Highway and Heavy Construction
- **Engineering Topics Electives - M**
  - C E 594O Special Topics Construction Engineering and Mgt.: Highway and Heavy Construction

### Electrical Option: Remaining Core courses (10 cr.)

- **Electrical Option: Remaining Core courses (10 cr.)**
  - E E 230 Electronic Circuits and Systems
  - E E 456 Power System Analysis I

**Total Credits**: 16

### Remaining option courses - 13 cr.

- **Remaining option courses - 13 cr.**
  - CON E 352 Mechanical Systems in Buildings
  - CON E 353 Electrical Systems in Buildings
  - E E 201 Electric Circuits
  - E E 457 Power System Analysis II

**Total Credits**: 13

### Mechanical Option: Remaining Core courses (10 cr.)

- **Mechanical Option: Remaining Core courses (10 cr.)**
  - M E 231 Engineering Thermodynamics I
  - M E 436 Heat Transfer
  - M E 441 Fundamentals of Heating, Ventilating, and Air Conditioning

**Total Credits**: 13

### Co-op/Internships - Optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list (http://www.ccee.iastate.edu/academics/advising/construction-engineering-student-forms).
3. 2.00 required including transfer courses
4. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program

### Courses primarily for undergraduates:

- **Special Topics Construction Engineering and Mgt.: Project Controls**
- **Special Topics Construction Engineering and Mgt.: Computer Applications for Project Controls**
- **Design of Construction Systems**
CON E 112. Orientation to Learning and Productive Team Membership. (Cross-listed with AER E, FS HN, HORT, NREM). (2-0) Cr. 2. F.
Introduction to developing intentional learners and worthy team members. Learning as the foundation of human enterprise; intellectual curiosity; ethics as a personal responsibility; everyday leadership; effective team and community interactions including team learning and the effects on individuals; and growth through understanding self, demonstrating ownership of own learning, and internalizing commitment to helping others. Intentional mental processing as a means of enhancing learning. Interconnectedness of the individual, the community, and the world.

CON E 114. Developing Responsible Learners and Effective Leaders. (Cross-listed with FS HN, HORT, NREM). (2-0) Cr. 2. S. Prereq: Hort 112 or NREM 112
Focus on team and community. Application of fundamentals of human learning; evidence of development as a responsible learner; intentional mental processing as a habit of mind; planning and facilitating learning opportunities for others; responsibility of the individual to the community and the world; leading from within; holding self and others accountable for growth and development as learners and leaders.

CON E 121. Cornerstone Learning Community: Orientation to Academic Life. (0-2) Cr. 1. F.
Integration of first-year and transfer students into the engineering profession and the Construction Engineering program. Assignments and activities completed both individually and in learning teams involving teamwork, academic preparation, and study skills. Introduction to construction industry professionals. Teamwork topics include interdisciplinary teamwork, skills for academic success, diversity issues and leadership. Introduction to organization of program, department, college, and university. Overview of faculty, staff, policies, procedures and resources.

CON E 122. Cornerstone Learning Community: Orientation to Professional Life. (0-2) Cr. 1. S.
Continuation of Con E 121. Integration of first-year and transfer students into the engineering profession. Career preparation, professional ethics, research, leadership. Introduction to construction industry professionals including how they interact with engineers in other disciplines. Continued introduction to program, department, college, and university organization. Overview of faculty, staff, policies, procedures and resources.

CON E 222. Contractor Organization and Management of Construction. (3-0) Cr. 3. F.S. Prereq: Completion of basic program
Entry level course for construction engineering; integration of significant engineering and management issues related to construction company operations. Company organization and operations; construction and project administration; construction contracts; delivery systems; insurance and bonding; construction safety; construction labor relations; contract documents.

CON E 241. Construction Materials and Methods. (2-3) Cr. 3. F.S. Prereq: CON E 222
Introduction to materials and methods of building construction and to construction drawings. Foundation, structural framing, floor, roof, and wall systems. Blueprint reading and quantity takeoff techniques.

CON E 251. Mechanical/Electrical Materials and Methods. (0-3) Cr. 1. F.S. Prereq: Credit or enrollment in CON E 241
Introduction to the materials and methods for mechanical and electrical construction systems and drawings. HVAC, water and waste water, power distribution, lighting, and fire protection. Blueprint reading and quantity takeoff.

CON E 298. Cooperative Education. Cr. R. F.S.S.S. Prereq: Permission of department and Engineering Career Services
First professional work period in the cooperative education program. Students must register for this course before commencing work.

CON E 322. Construction Equipment and Heavy Construction Methods. (2-2) Cr. 3. F.S. Prereq: CON E 241 or C E 306
Selection and acquisition of construction equipment. Application of engineering fundamentals and economics to performance characteristics and production of equipment. Heavy construction methods and economic applications.

CON E 340. Concrete and Steel Construction. (2-2) Cr. 3. F.S. Prereq: E M 324, credit or enrollment in CON E 322

CON E 352. Mechanical Systems in Buildings. (2-3) Cr. 3. F.S. Prereq: CON E 251, PHYS 222
Comprehensive coverage of mechanical systems, plumbing, fire protection. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

CON E 353. Electrical Systems in Buildings. (3-0) Cr. 3. F.S. Prereq: PHYS 222 and credit or enrollment in CON E 352
Comprehensive coverage of building electrical systems including power, lighting, fire alarm, security and communications. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

CON E 354. Building Energy Performance. (3-0) Cr. arr. F. Prereq: Junior Classification
Energy performance of buildings, building shells, HVAC, electrical and other building systems. Analysis and evaluation of building performance, energy efficiency, environmental quality, first costs, and operating costs. Strategies to exceed energy code requirements through the ASHRAE Standard 90.1.

CON E 380. Engineering Law. (3-0) Cr. 3. F.S. Prereq: Junior classification
Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding procedures, intellectual property, products liability, risk analysis. Emphasis on development of critical thinking process, abstract problem analysis and evaluation.

CON E 381. Bidding Construction Projects I. (0-3) Cr. 1. F. Prereq: Permission from the instructor
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialties:.

CON E 381A. Bidding Construction Projects I: Heavy and Highway. (0-3) Cr. 1. F. Prereq: Permission from the instructor
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialties:.

CON E 381B. Bidding Construction Projects I: Building. (0-3) Cr. 1. F. Prereq: Permission from the instructor
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialties:.

CON E 381C. Bidding Construction Projects I: Mechanical. (0-3) Cr. 1. F. Prereq: Permission from the instructor
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialties:.

CON E 381D. Bidding Construction Projects I: Electrical. (0-3) Cr. 1. F. Prereq: Permission from the instructor
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialties:.

CON E 381E. Bidding Construction Projects I: Mechanical and Electrical. (0-3) Cr. 1. F. Prereq: Permission from the instructor
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialties:.

CON E 381F. Bidding Construction Projects I: Miscellaneous. (0-3) Cr. 1. F. Prereq: Permission from the instructor
Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids. Offered in the following specialties:.

CON E 396. Summer Internship. Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services
Summer professional work period. Students must register for this course before commencing work.
CON E 397. Engineering Internship.  
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services  
Professional work period, one semester maximum per academic year. Students must register for this course before commencing work.

CON E 398. Cooperative Education.  
Cr. R. F.S.SS. Prereq: CON E 298, permission of department and Engineering Career Services  
Second professional work period in the cooperative education program. Students must register for this course before commencing work.

(2-2) Cr. 3. F.S. Prereq: CON E 241, Junior classification  

CON E 441. Construction Planning, Scheduling, and Control.  
(2-2) Cr. 3. F.S. Prereq: Credit or enrollment in CON E 421  
Integration of previous construction coursework into the planning, scheduling, and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer project management applications.

CON E 481. Bidding Construction Projects II.  
(0-3) Cr. 1. F. Prereq: Permission from the instructor  
Similar to CON E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481A. Bidding Construction Projects II: Heavy and Highway.  
(0-3) Cr. 1. F. Prereq: Permission from the instructor  
Similar to CON E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481B. Bidding Construction Projects II: Building.  
(0-3) Cr. 1. F. Prereq: Permission from the instructor  
Similar to CON E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481C. Bidding Construction Projects II: Mechanical.  
(0-3) Cr. 1. F. Prereq: Permission from the instructor  
Similar to CON E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481D. Bidding Construction Projects II: Electrical.  
(0-3) Cr. 1. F. Prereq: Permission from the instructor  
Similar to CON E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481E. Bidding Construction Projects II: Mechanical and Electrical.  
(0-3) Cr. 1. F. Prereq: Permission from the instructor  
Similar to CON E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 481F. Bidding Construction Projects II: Miscellaneous.  
(0-3) Cr. 1. F. Prereq: Permission from the instructor  
Similar to CON E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

CON E 487. Construction Engineering Design I.  
(2-2) Cr. 3. F.S. Prereq: CON E 340 (B, H), CON E 352 (B, E, M), CON E 353 (B, E, M), CON E 421, CON E 441. Student must be within two semesters of graduation  
The integrated delivery of project services as a team, including preliminary engineering design process, constructability review, interaction with the client, identification of engineering problems, developments of a proposal, identification of design criteria, cost estimating, planning and scheduling, application of codes and standards, development of feasible alternatives, selection of best alternative, and delivery of oral presentations.

CON E 488. Construction Engineering Design II.  
(1-5) Cr. 3. F.S. Prereq: CON E 380. Coreq: CON E 487  
Application of team design concepts to a construction engineering project. Project planning. Advanced construction and project management.

CON E 490. Independent Study.  
Cr. 1.5. Repeatable. F.S.SS. Prereq: Permission of instructor  
Individual study in any phase of construction engineering. Pre-enrollment contract required.

CON E 498. Cooperative Education.  
Cr. R. Repeatable. F.S. Prereq: CON E 398, permission of department and Engineering Career Services  
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Electrical Engineering

Undergraduate Study

For the undergraduate curriculum in electrical engineering leading to the degree Bachelor of Science. This curriculum is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

The Department of Electrical and Computer Engineering (ECPe) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and prepare for the practice of electrical engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The electrical engineering curriculum offers a number of emphasis areas at the undergraduate level, including control systems, electromagnetics and nondestructive evaluation, microelectronics and photonics, VLSI, electric power and energy systems, and communications and signal processing. Students are required to choose at least one course sequence that focuses on one of these areas; therefore graduates have substantial depth in specific areas to complement the breadth obtained in the required curriculum. Students also may take elective courses in computer networking, security, computer architecture, digital systems, and software.

The program objectives for the electrical engineering program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objective of the electrical engineering program at ISU are:

- Graduates, within five years of graduation, should demonstrate peer-recognized expertise together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and evaluation of electrical and electronic devices and systems.
- Graduates, within five years of graduation, should demonstrate engagement in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
- Graduates, within five years of graduation, should demonstrate sustained learning and adapting to a constantly changing field through graduate work, professional development, and self-study.
- Graduates, within five years of graduation, should demonstrate leadership and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to teamwork while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECPe department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience.

Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees.

Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Courses for students who are not in the electrical engineering program: E E 442 Introduction to Circuits and Instruments, E E 448 Introduction to AC Circuits and...
Motors. Credit in these courses may not be counted toward a degree in either electrical engineering or computer engineering.

Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

Master of Engineering degree is coursework only. It is recommended for off-campus students.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers a graduate certificate program in power systems engineering. Completion of the certificate requires at least 12 credits selected from:

- E E 553 Steady State Analysis 3
- E E 554 Power System Dynamics 3
- E E 555 Advanced Energy Distribution Systems 3
- E E 556 Power Electronic Systems 3
- E E 653 Advanced Topics in Electric Power System Engineering 3

E E 653 Advanced Topics in Electric Power System Engineering is a repeatable course and may be used more than once to satisfy the certificate requirement.

The normal prerequisite to major in graduate work in electrical engineering is the completion of undergraduate work substantially equivalent to that required of electrical engineering students at this university. Because of the diversification in the electrical engineering graduate program, however, it is possible for a student to qualify for graduate study in certain areas of electrical engineering even though the student’s undergraduate or prior graduate training has been in a discipline other than electrical engineering. Support will be available as required, and will depend on the student’s background and area of research interest. Prospective students from a discipline other than electrical engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental graduate minor in complex adaptive systems. Students interested in this program should see the Complex Adaptive Systems section of the catalog for requirements.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

Well-qualified juniors or seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science degrees, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department’s website.

Curriculum in Electrical Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 128 See also Basic Program and Special Programs.

International Perspectives: 3 cr. 1

U.S. Diversity: 3 cr. 1

Elective from Math, E E, Cpr E and/or non-E E/Cpr E 6

Total Credits 29
Introduction to statistical significance and its relationship to biological variability.

Fundamental laboratory based course in bio-electrical engineering with an emphasis in teams. Individual interactive skills for small and large groups.

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in electrical engineering. These 30 credits must include E E 491 Senior Design Project I and Professionalism, E E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

2. Complete minimum of 6 cr. from Approved General Education Component at 300 or higher level. Complete additional 9 cr. from Approved General Education Component.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

4. 2.00 required including transfer courses.

5. Note: E E 321 and E E 332 are 3-credit courses, whereas E E 324 and E E 330 are 4-credit courses. The core credit requirement (41 credits) assumes 7 credits taken for these options. Any core credit surplus or deficiency can be used as credits for E E technical electives.

6. From department approved lists.

See also: A 4-year plan of study grid showing course template by semester.

Courses primarily for undergraduates:

E E 166. Professional Programs Orientation. (Cross-listed with CPR E). Cr. R. F.S.
(1-0) Overview of the nature and scope of electrical engineering and computer engineering professions. Overview of portfolios. Departmental rules, advising center operations, degree requirements, program of study planning, career options, and student organizations.

E E 185. Introduction to Electrical Engineering and Problem-Solving I. (2-2) Cr. 3. F.S. Prereq: Credit or enrollment in MATH 142

E E 168. Bio-Electrical Engineering Fundamentals Laboratory. (1-3) Cr. 2. Prereq: E E 185 or equivalent
Fundamental laboratory based course in bio-electrical engineering with an emphasis in acquiring and analyzing biomedical signals to obtain relevant information. Topics covered include an overview of basic medical terminology and anatomy, labs illustrating data acquisition from different body systems, and an introduction to statistical significance and its relationship to biological variability.

E E 201. Electric Circuits. (3-2) Cr. 4. F.S. Prereq: Credit or registration in MATH 267 and PHYS 222
Emphasis on mathematical tools. Circuit elements (resistors, inductors, capacitors) and analysis methods including power and energy relationships. Network theorems, DC, sinusoidal steady-state, and transient analysis. AC power. Frequency response. Two port models. Diodes, PSPICE. Laboratory instrumentation and experimentation. Credit for only E E 201 or 442 may be used towards graduation.

E E 224. Signals and Systems I. (3-3) Cr. 4. F.S. Prereq: E E 201, MATH 267, PHYS 222

E E 230. Electronic Circuits and Systems. (3-3) Cr. 4. F.S. Prereq: E E 201, MATH 267, PHYS 222

E E 261. Transfer Orientation. (Cross-listed with CPR E). Cr. R.
Introduction to the College of Engineering and the engineering profession specifically for transfer students. Information concerning university and college policies, procedures, and resources. Offered on a satisfactory-fail basis only.

E E 294. Program Discovery. (Cross-listed with CPR E). Cr. R. Prereq: CPR E 166 or E E 166
The roles of professionals in computer and electrical engineering. Relationship of coursework to industry and academic careers. Issues relevant to today’s world. Offered on a satisfactory-fail basis only.

E E 298. Cooperative Education. Cr. R. F.S.SS. Prereq: Permission of department and Engineering Career Services
First professional work period in the cooperative education program. Students must register for this course before commencing work.

E E 303. Energy Systems and Power Electronics. (3-0) Cr. 3. F.S. Prereq: MATH 267, PHYS 222. Credit or registration in E E 224 and E E 230

E E 311. Electromagnetic Fields and Waves. (4-0) Cr. 4. F.S. Prereq: E E 201, MATH 265, PHYS 222. Credit or registration in MATH 267

E E 314. Electromagnetics for non Electrical Engineers. (3-0) Cr. 3. Prereq: PHYS 222, PHYS 112, or equivalent
Conceptual study of electromagnetism and its application in engineering and related fields. EM fundamentals, EM spectrum, radiation, radiating systems, wireless, modern concepts of physics, quantum computing, transmission lines, high speed effects, waveguides, GPS and other related phenomena will be discussed and explained with the application in mind.
E E 321. Communication Systems I.  
(3-0) Cr. 3. F. Prereq: E E 224  

E E 322. Probabilistic Methods for Electrical Engineers.  
(Cross-listed with STAT). (3-0) Cr. 3. F.S. Prereq: E E 224  
Introduction to probability with applications to electrical engineering. Sets and events, probability space, conditional probability, total probability and Bayes' rule. Discrete and continuous random variables, cumulative distribution function, probability mass and density functions, expectation, moments, moment generating functions, multiple random variables, functions of random variables. Elements of statistics, hypothesis testing, confidence intervals, least squares. Introduction to random processes.  

E E 323. Introduction to Digital Signal Processing.  
(3-3) Cr. 4. Prereq: E E 224  

E E 324. Signals and Systems II.  
(3-3) Cr. 4. F.S. Prereq: E E 224  

E E 325. Systems Biology for Engineering.  
(Cross-listed with BIOE). (3-0) Cr. 3. Prereq: BIOE 210, MATH 267  

E E 330. Integrated Electronics.  
(Cross-listed with CPR E). (3-3) Cr. 4. Prereq: E E 201, credit or enrollment in E E 230, CPR E 281  
Semiconductor technology for integrated circuits. Modeling of integrated devices including diodes, BJTs, and MOSFETs. Physical layout. Circuit simulation. Digital building blocks and digital circuit synthesis. Analysis and design of analog building blocks. Laboratory exercises and design projects with CAD tools and standard cells. Credit for only one of E E 330 or 331 may be counted toward graduation.  

E E 332. Semiconductor Materials and Devices.  
(Cross-listed with MAT E). (3-0) Cr. 3. S. Prereq: PHYS 222; MAT E majors: MAT E 334; CPR E and E E majors: E E 230  
Introduction to semiconductor material and device physics. Quantum mechanics and band theory of semiconductors. Charge carrier distributions, generation/recombination, transport properties. Physical and electrical properties and fabrication of semiconductor devices such as MOSFETs, bipolar transistors, laser diodes and LED’s.  

(2-2) Cr. 3. Prereq: E E 188, E E 224, E E 230  
Principles and practices of biomedical instrumentation. Topics include: the physics and measurement of biopotentials including electrocardiography (EKG), electromyography (EMG) and electro-occulography (EOG), mechanical and chemical sensors, amplifiers and filters, recording and processing biological signals from nerve cells, muscles and human body, electrode polarization, surface electrodes, power line interference, heart sound sensors, respiratory gas concentration, blood-gas sensors, noninvasive blood-gas sensors.  

(3-0) Cr. 3. Prereq: PHYS 222  

E E 388. Sustainable Engineering and International Development.  
(Cross-listed with A B E, E E, M E, MAT E). (2-2) Cr. 3. F. Prereq: Junior classification in engineering  
Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement.  

E E 394. Program Exploration.  
(Cross-listed with CPR E). Cr. R. Prereq: CPR E 294 or E E 294  
Exploration of academic and career fields for electrical and computer engineers. Examination of professionalism in the context of engineering and technology with competencies based skills. Introduction to professional portfolio development and construction. Offered on a satisfactory-fail basis only.  

E E 396. Summer Internship.  
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services  
Summer professional work period. Students must register for this course before commencing work.  

E E 397. Engineering Internship.  
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services  
Second professional work period in the cooperative education program. Students must register for this course before commencing work.  

E E 398. Cooperative Education.  
Cr. R. F.S.SS. Prereq: E E 298, permission of department and Engineering Career Services  
Second professional work period in the cooperative education program. Students must register for this course before commencing work.  

E E 414. Microwave Engineering.  
(Dual-listed with E E 514). (3-3) Cr. 4. F. Prereq: E E 230, E E 311  
Principles, analyses, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators.  

(Dual-listed with E E 517). (3-3) Cr. 4. S. Prereq: E E 311  

(Cross-listed with CPR E). (3-3) Cr. 4. F. Prereq: E E 230 and E E 311  

E E 422. Communication Systems II.  
(3-0) Cr. 3. Prereq: E E 321 and enrollment in E E 423  
Introduction to probability and random processes; Performance of analog systems with noise; Performance of digital communication with noise; optimum receivers, transmission impairments, and error rates; Introduction to information theory and coding: source coding, channel coding, channel capacity.  

E E 423. Communication Systems Laboratory.  
(0-3) Cr. 1. Prereq: E E 321, enrollment in E E 422  
Construction and evaluation of modulators, demodulators and other components for analog and digital communications. Design, simulate, and evaluate wireless communication systems and their key components. Noise measurement.
E E 432. Microelectronics Fabrication Techniques. (Dual-listed with E E 332, (Cross-listed with MAT E). (2-4) Cr. 4. Prereq: PHYS 222, MATH 267. E E 332 or MAT E 334 recommended

Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electromechanical systems (MEMS).

E E 435. Analog VLSI Circuit Design. (Cross-listed with CPR E). (3-3) Cr. 4. S. Prereq: E E 324, E E 330, E E 332, and either E E 322 or STAT 330

Basic analog integrated circuit and system design including design space exploration, performance enhancement strategies, operational amplifiers, references, integrated filters, and data converters.

E E 438. Optoelectronic Devices and Applications. (Dual-listed with E E 358). (3-0) Cr. 3. S. Prereq: E E 311, E E 332

E E 439. Nanoelectronics. (3-0) Cr. 3. S. Prereq: E E 332/MAT E 332 or MAT E 331

Concepts of quantum mechanics relevant to nanoelectronic devices, including quantization, tunneling, and transport; overview of some of the leading technologies for nanoelectronics, including carbon nanotubes, quantum dots, and molecular transistors; fabrication methods for building nanoelectronic devices.

E E 442. Introduction to Circuits and Instruments. (3-2) Cr. 2. F. Prereq: PHYS 222, MATH 267

Half-semester course. Basic circuit analysis using network theorems with time domain and Laplace transform techniques for resistive, resistive-inductive, resistive-capacitive, and resistive-inductive-capacitive circuits. Transient circuit behavior. Basic operational amplifiers and applications. Familiarization with common E E instrumentation and demonstration of basic principles. Credit for only 200 or 442 may be counted toward graduation; credit for 442 will not count toward graduation for E E or Cpr E majors.

E E 448. Introduction to AC Circuits and Motors. (3-2) Cr. 2. F. Prereq: E E 442

Basics of DC machines, stepper motors, AC induction motors, and synchronous generators. AC steady state analysis, transformers, and three-phase circuit analysis.

E E 451. Engineering Acoustics. (Cross-listed with EM, M E). (2-2) Cr. 3. Alt. S., offered even-numbered years. Prereq: Phys 221 and Math 266 or Math 267

E E 452. Electrical Machines and Power Electronic Drives. (2-3) Cr. 3. S. Prereq: E E 303, E E 324

Basic concepts of electromagnetic energy conversion. DC motors and three-phase induction motors. Basic introduction to power electronics. Adjustable speed drives used for control of DC, induction, and AC motors. Experiments with converter topologies, DC motors, AC motors and adjustable speed drives.

E E 455. Introduction to Energy Distribution Systems. (3-0) Cr. 3. F. Prereq: E E 303. Credit or registration in E E 324

Overhead and underground distribution system descriptions and characteristics, load descriptions and characteristics, overhead line and underground cable models, distribution transformers, power flow and fault analysis, overcurrent protection, power factor correction, system planning and automation, and economics in a deregulated environment.

E E 456. Power System Analysis I. (3-0) Cr. 3. F. Prereq: E E 303, credit or registration in E E 324

Power transmission lines and transformers, synchronous machine modeling, network analysis, power system representation, load flow.

E E 457. Power System Analysis II. (3-0) Cr. 3. S. Prereq: E E 303, credit or registration in E E 324

Power system protection, symmetrical components, faults, stability. Power system operations including the new utility environment.

E E 458. Economic Systems for Electric Power Planning. (Cross-listed with ECON). (3-0) Cr. 3. Prereq: E E 303 or ECON 301

E E 459. Electromechanical Wind Energy Conversion and Grid Integration. (Dual-listed with E E 559). (3-0) Cr. 3. Prereq: Credit or enrollment in E E 452, E E 458

Summary of industry status and expected growth; power extraction from the air stream; operation and modeling of electric machines, and power electronics topologies for wind energy conversion; analysis of machine-grid power electronic circuits, controller interface, and collector (distribution) networks; treatment of harmonics, flicker, over/under-voltages, filters, low-voltage ride-through, and reactive compensation; relaying; effects on transmission expansion, planning and grid operation and coordination including variability, frequency control, reserves, and electricity markets; overview of storage technologies and hybrid configurations.

Digital design of integrated circuits employing very large scale integration (VLSI) methodologies. Technology considerations in design. High level hardware design languages, CMOS logic design styles, area-energy-delay design space characterization, datapath blocks: arithmetic and memory, architectures and systems on a chip (SOC) considerations. VLSI chip hardware design project.

E E 466. Multidisciplinary Engineering Design I. (Cross-listed with A B E, AER E, CPR E, ENGR, E I, M E, MAT E). (1-4) Cr. 3.

Repeatable. F.S. Prereq: Student must be within two semesters of graduation and receive permission of instructor

Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.

E E 467. Multidisciplinary Engineering Design II. (Cross-listed with A B E, AER E, CPR E, ENGR, I E, M E, MAT E). (1-4) Cr. 3.

Repeatable, maximum of 2 times. F.S. Prereq: Student must be within two semesters of graduation or receive permission of instructor

Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

E E 475. Automatic Control Systems. (3-0) Cr. 3. F. Prereq: E E 324

Stability and performance analysis of automatic control systems. The state space, root locus, and frequency response methods for control systems design, PID control and lead-lag compensation. Computer tools for control system analysis and design.

E E 476. Control System Simulation. (2-3) Cr. 3. S. Prereq: E E 475

Computer aided techniques for feedback control system design, simulation, and implementation.

E E 488. Eddy Current Nondestructive Evaluation. (Dual-listed with E E 588). (Cross-listed with MAT E). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: MATH 265 and (MATH 216 or MATH 272 or E E 311 or PHYS 364)

E E 490. Independent Study. Cr. arr. Prereq: Senior classification in electrical engineering

Investigation of an approved topic commensurate with the student’s prerequisites.

E E 490H. Independent Study: Honors. Cr. arr. Prereq: Senior classification in electrical engineering

Investigation of an approved topic commensurate with the student’s prerequisites.
E E 491. Senior Design Project I and Professionalism.
(Cross-listed with CPR E) (2-3) Cr. 3. F.S. Prereq: E E 322 or CPR E 308, completion of 24 credits in the E E core professional program or 29 credits in the Cpr E core professional program, ENGL 314 Preparing for entry to the workplace. Selected professional topics. Use of technical writing skills in developing project plan and design report; design review presentation. First of two-semester team-oriented, project design and implementation experience.

E E 492. Senior Design Project II.
(Cross-listed with CPR E), (1-3) Cr. 2. F.S. Prereq: CPR E 491 or E E 491 Second semester of a team design project experience. Emphasis on the successful implementation and demonstration of the design completed in E E 491 or Cpr E 491 and the evaluation of project results. Technical writing of final project report; oral presentation of project achievements; project poster.

E E 494. Portfolio Assessment.
(Cross-listed with CPR E). Cr. R. Prereq: CPR E 394 or E E 394, credit or enrollment in CPR E 491 or E E 491 Portfolio update and evaluation. Portfolios as a tool to enhance career opportunities.

E E 496. Modern Optics.
(Cross-listed with PHYS). [3-0] Cr. 3. S. Prereq: Credit or enrollment in PHYS 322, PHYS 365, and PHYS 489 Review of wave and electromagnetic theory; topics selected from: reflection/ refraction, interference, geometrical optics, Fourier analysis, dispersion, coherence, Fraunhofer and Fresnel diffraction, holography, quantum optics, nonlinear optics.

E E 498. Cooperative Education.
Cr. R. Repeatable. F.S.S.S. Prereq: E E 398, permission of department and Engineering Career Services
Third and subsequent professional work periods in the cooperative education programs. Students must register for this course before commencing work.

Courses primarily for graduate students, open to qualified undergraduates:

(Cross-listed with CPR E). (3-3) Cr. 3. Prereq: E E 435, Credit or Registration for E E 501 Theory, design and applications of power management and regulation circuits (Linear and switching regulators, battery chargers, and reference circuits) including: Architectures, Performance metrics and characterization, Noise and stability analysis, Practical implementation and on-chip integration issues, design considerations for portable, wireless, and RF SoCs.

E E 505. CMOS and BiCMOS Data Conversion Circuits.
(Cross-listed with CPR E). (3-3) Cr. 4. Alt. S., offered even-numbered years. Prereq: E E 501 Theory, design and applications of data conversion circuits (A/D and D/A converters) including: architectures, characterization, quantization effects, conversion algorithms, spectral performance, element matching, design for yield, and practical comparators, implementation issues.

E E 506. Design of CMOS Phase-Locked Loops.
(Cross-listed with CPR E). (3-3) Cr. 4. Prereq: E E 435 or E E 501 or instructor approval Analysis and design of phase-locked loops implemented in modern CMOS processes including: architectures, performance metrics, and characterization; noise and stability analysis; and design issues of phase-frequency detectors, charge pumps, loop filters (passive and active), voltage controlled oscillators, and frequency dividers.

E E 507. VLSI Communication Circuits.
(Cross-listed with CPR E). (3-3) Cr. 4. Alt. S., offered odd-numbered years. Prereq: CPR E 330 or CPR E 501 Radio frequency integrated circuits for wireless and wired communications with a focus on CMOS implementations. Discussions on fundamental concepts in RF design such as nonlinearity, sensitivity, and dynamic range will be followed with a detailed analysis and design of low-noise amplifiers, mixer, oscillators, and transceivers.

E E 508. Filter Design and Applications.

E E 509. Mixed-Signal IC Testing and Built In Self Test.
(3-0) Cr. 3. Prereq: E E 323 or equivalent and E E 435 or E E 501 Introduction to mixed-signal IC testing; measurement uncertainty and test validity; IEE8 standard test algorithms; high performance test and built-in self test challenges; new mixed-signal test algorithms and techniques to reduce data acquisition to relax instrumentation requirements, to simplify test setup, to improve test validity, and/or to enable co-testing of heterogeneous functions.

E E 510. Topics in Electromagnetics.
Cr. 1-3. Repeatable. Prereq: E E 311

E E 511. Modern Optical Communications.
(3-0) Cr. 3. S. Prereq: E E 311 Propagation in optical media. Optical fibers. Optical sources and detectors. Fiber optic communications systems. DWDM considerations.

E E 512. Advanced Electromagnetic Field Theory I.

E E 513. Advanced Electromagnetic Field Theory II.

E E 514. Microwave Engineering.
(Dual-listed with E E 414). (3-3) Cr. 4. F. Prereq: E E 230, E E 311 Principles, analyses, and instrumentation used in the microwave portion of the electromagnetic spectrum. Wave theory in relation to circuit parameters. S parameters, couplers, discontinuities, and microwave device equivalent circuits. RF amplifier design, microwave sources, optimum noise figure and maximum power designs. Microwave filters and oscillators.

(Cross-listed with AGRON, MTEOR). (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: Math 265 or equivalent Microwave remote sensing of Earth’s surface and atmosphere using satellite-based or ground-based instruments. Specific examples include remote sensing of atmospheric temperature and water vapor, precipitation, ocean salinity, and soil moisture.

E E 520. Selected Topics in Communications and Signal Processing. 
(3-0) Cr. 3. Repeatable. 

E E 521. Advanced Communications. 
(3-0) Cr. 3. Prereq: E E 422, Coreq: E E 523 

(3-0) Cr. 3. Prereq: E E 322, MATH 317 
Axioms of probability; Repeated trials; Functions of a random variable and multiple random variables: covariance matrix, conditional distribution, joint distribution, moments, and joint moment generating function; Mean square estimation; stochastic convergence; Some important stochastic processes: Random walk, Poisson, Wiener, and shot noise; Markov chains; Power spectral analysis; Selected applications.

(3-0) Cr. 3. Prereq: E E 322, E E 424, MATH 317 

(3-0) Cr. 3. S. Prereq: E E 422 

(3-0) Cr. 3. S. Prereq: E E 422, E E 424 
Review of sampling, linear algebra and probability. Classical image processing topics such as image sampling and quantization, image transforms (2D Fourier, KLT, DCT, etc), image enhancement, restoration and filtering. Image analysis topics including edge detection, segmentation, registration and tracking (uses least squares estimation, EM, Kalman filter), Medical image reconstruction from tomographic projections (Radon transform, Fourier slice theorem and reconstruction algorithms using them) and Magnetic Resonance Imaging (MRI). Basic introduction to image and video compression methods.

E E 530. Selected Topics in Electronics, Microelectronics and Photonics. 
(3-0) Cr. 3. Repeatable. Prereq: E E 332 

E E 532. Microelectronics Fabrication Techniques. 
(Dual-listed with E E 432). (2-4) Cr. 4. Prereq: PHYS 222, MATH 267. E E 332 or MAT E 334 recommended 
Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electromechanical systems (MEMS).

(Cross-listed with PHYS). (3-3) Cr. 4. Prereq: E E 311 and E E 332 
Basic elements of quantum theory. Fermi statistics, motion of electrons in periodic structures, crystal structure, energy bands, equilibrium carrier concentration and doping, excess carriers and recombination, carrier transport at low and high fields, space charge limited current, photo-conductivity in solids, phonons, optical properties, amorphous semiconductors, heterostructures, and surface effects. Laboratory experiments on optical properties, carrier lifetimes, mobility, defect density, doping density, photo-conductivity, diffusion length of carriers.

(Cross-listed with PHYS). (3-0) Cr. 3. Prereq: E E 535 
P-n junctions, band-bending theory, tunneling phenomena, Schottky barriers, heterojunctions, bipolar transistors, field-effect transistors, negative-resistance devices and optoelectronic devices.

E E 538. Optoelectronic Devices and Applications. 
(Dual-listed with E E 438). (3-0) Cr. 3. Prereq: E E 311 or E E 332 

(Cross-listed with M S E). (3-0) Cr. 3. Prereq: E E 322 or MAT E 331 or PHYS 322 
Review of classical and quantum mechanical descriptions of electrons in solids, band theory, metallic conduction, lattice vibrations, semiconductors, semiconductor devices, dielectrics, polarization, dielectric relaxation, crystal and ferroelectricity, piezoelectricity, superconductivity, magnetism, device applications.

E E 547. Pattern Recognition. 
(3-0) Cr. 3. F. Prereq: E E 324 

E E 553. Steady State Analysis. 
(3-0) Cr. 3. F. Prereq: E E 456, E E 457 
Power flow, economic dispatch, unit commitment, electricity markets, automatic generation control, sparse matrix techniques, interconnected operation, voltage control.

E E 554. Power System Dynamics. 
(3-0) Cr. 3. S. Prereq: E E 456, E E 457 
Dynamic performance of power systems with emphasis on stability. Modeling of system components and control equipment. Analysis of the dynamic behavior of the system in response to small and large disturbances.

(3-0) Cr. 3. Prereq: E E 455 
Transient models of distribution components. Automated system planning and distribution automation, surge protection, reliability, power quality, power electronics and intelligent systems applications.

(3-0) Cr. 3. Prereq: E E 452 
Converter topologies, AC/DC, DC/DC, DC/AC, AC/AC. Converter applications to do motor drives, power supplies, AC motor drives, power system utility applications (var compensators) and power quality.

E E 559. Electromechanical Wing Energy Conversion and Grid Integration. 
(Dual-listed with E E 459). (3-0) Cr. 3. Prereq: Credit or enrollment in E E 452, E E 456 
Summary of industry status and expected growth; power extraction from the air stream; operation and modeling of electric machines, and power electronics topologies for wind energy conversion; analysis of machine-grid power electronic circuits, controller interface, and collector (distribution) networks; treatment of harmonics, flicker, over/under-voltages, filters, low-voltage ride-through, and reactive compensation; relaying; effects on transmission expansion, planning and grid operation and coordination including variability, frequency control, reserves, and electricity markets; overview of storage technologies and hybrid configurations.

E E 565. Systems Engineering and Analysis. 
(Cross-listed with AER E, I E). (3-0) Cr. 3. Prereq: Coursework in basic statistics 
Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

(Cross-listed with AER E). (3-0) Cr. 3. S. Prereq: E E 565 
Avionics functions. Applications of systems engineering principles to avionics. Top down design of avionics systems. Automated design tools.

E E 570. Systems Engineering Analysis and Design. 
(3-0) Cr. 3. Prereq: E E 475, E E 577 
Selected topics in abstract algebra, linear algebra, real analysis, functional analysis, and optimization methods in electrical engineering.
E E 571. Introduction to Convex Optimization.  
(3-0) Cr. 3.  
Introduction to convex optimization problems emerging in electrical engineering. Efficiently solving convex optimization problems with the use of interior point algorithms software. Review of linear algebra, convex functions, convex sets, convex optimization problems, duality, disciplined convex programming, applications to optimal filtering, estimation, control and resources allocations, sensor network, distributed systems.

(Cross-listed with AER E, M E), (3-0) Cr. 3. F. Prereq: E E 324 or AER E 331 or M E 370 or M E 411 or MATH 341  

E E 574. Optimal Control.  
(Cross-listed with AER E, M E), (3-0) Cr. 3. S. Prereq: E E 577  

E E 575. Introduction to Robust Control.  
(Cross-listed with AER E, M E), (3-0) Cr. 3. Prereq: E E 577  

(Cross-listed with AER E, M E), (3-0) Cr. 3. F. Prereq: E E 475 or AER E 432 or M E 411 or 414 or MATH 415; and MATH 267  

E E 577. Linear Systems.  
(Cross-listed with AER E, M E, MATH), (3-0) Cr. 3. F. Prereq: E E 324 or AER E 331 or MATH 415; and MATH 307  

(Cross-listed with AER E, M E, MATH), (3-0) Cr. 3. S. Prereq: E E 577  

(Dual-listed with E E 488), (Cross-listed with M S E), (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: MATH 265 and (MAT E 216 or MAT E 272 or E E 311 or PHYS 364)  

E E 590. Special Topics.  
Cr. 1-6. Repeatable.  
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590A. Special Topics: Electromagnetic Theory.  
Cr. 1-6. Repeatable.  
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590B. Special Topics: Control Systems.  
Cr. 1-6. Repeatable.  
Formulation and solution of theoretical or practical problems in electrical engineering.

Cr. 1-6. Repeatable.  
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590D. Special Topics: Computer Engineering.  
Cr. 1-6. Repeatable.  
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590E. Special Topics: Electric Power.  
Cr. 1-6. Repeatable.  
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590F. Special Topics: Electrical Materials.  
Cr. 1-6. Repeatable.  
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 590G. Special Topics: Electronic Devices and Circuits.  
Cr. 1-6. Repeatable.  
Formulation and solution of theoretical or practical problems in electrical engineering.

Cr. 1-6. Repeatable.  
Formulation and solution of theoretical or practical problems in electrical engineering.

E E 591. Seminar in Electronics, Microelectronics, and Photonics.  
Cr. 1-3. Repeatable.

Cr. 1-3. Repeatable.

Cr. 1-3. Repeatable.

Cr. 1. Repeatable.  
Offered on a satisfactory-fail basis only.

E E 599. Creative Component.  
Cr. arr. Repeatable.

Courses for graduate students:

E E 621. Coding Theory.  
(3-0) Cr. 3. Prereq: E E 521  

E E 622. Information Theory.  
(3-0) Cr. 3. Prereq: E E 521, E E 523  
Information system overview. Entropy and mutual information. Data Compression and source encoding. Discrete memoryless channel capacity. Noisy channel coding theorem. Rate distortion theory. Waveform channels. Advanced topics in information theory.

E E 653. Advanced Topics in Electric Power System Engineering.  
(3-0) Cr. 3. Repeatable. Prereq: Permission of instructor  
Advanced topics of current interest in electric power system engineering.

E E 674. Advanced Topics in Systems Engineering.  
(3-0) Cr. 3. Repeatable. Prereq: Permission of instructor  
Advanced topics of current interest in the areas of control theory, stochastic processes, digital signal processing, and image processing.

E E 697. Engineering Internship.  
(Cross-listed with CPR E), Cr. R. Repeatable.  
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

E E 699. Research.  
Cr. arr. Repeatable.

Engineering  
Most of the courses with the designator of Engr are broad-based engineering courses applicable to all engineering disciplines. Several of these courses are part of the basic program which is required for engineering students. All courses are administered by the college and with the exception of ENGR 160 Engineering Problems with Computer Applications Laboratory, ENGR 340 Introduction to Wind Energy: System Design & Delivery, ENGR 466 Multidisciplinary Engineering
Courses primarily for undergraduates:

**ENGR 101. Engineering Orientation.**
Cr. R. F.S.
Introduction to the College of Engineering and the engineering profession. Information concerning university and college policies, procedures, and resources. Undeclared sections: Considerations in choosing an engineering curriculum. Opportunities to interact with departments. Declared sections: Introduction to major-specific topics. Offered on a satisfactory-fail basis only.

**ENGR 104. LEAD Program Orientation.**
(1-0) Cr. 1. F.
Orientation for LEAD Learning/Living Community participants. Introduction to college and university resources, tools and techniques to promote academic, professional and social/cultural development and success. Focus on building support networks with peers, faculty, and staff. Introduction to core engineering competencies including but not limited to initiative, communication, teamwork, and cultural adaptability. Offered on a satisfactory-fail basis only.

**ENGR 105. LEAD Program Seminar.**
(1-0) Cr. 1. S.
Seminar for LEAD Learning/Living Community participants. Focus on professional development and exposure to various engineering disciplines through hands-on lab experiences, industry visits and networking opportunities with alumni, faculty, and staff. Development of core competencies: engineering/technical knowledge, communication and teamwork. Offered on a satisfactory-fail basis only.

**ENGR 131. Learning Community Seminar.**
Cr. R. F.S.
Peer-mentored review of course topics in engineering undeclared learning communities. Offered on a satisfactory-fail basis only.

**ENGR 150. Foundations of Leadership Development and Learning.**
(1-0) Cr. 1. F.S. Prereq: ELP students only
Leadership development with focus on global context and awareness of events shaping the context. Exposure to theory of leadership with examples. Necessary characteristics of a leader, and strategies for leadership skills development. Exposure to non-traditional career paths for engineers. Outline of personalized leadership development. Offered on a satisfactory-fail basis only.

**ENGR 160. Engineering Problems with Computer Applications Laboratory.**
(2-2) Cr. 3. F.S.S.S. Prereq: MATH 142 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165
Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics).

**ENGR 160H. Engineering Problems with Computer Applications Laboratory, Honors.**
(2-2) Cr. 3. F.S.S.S. Prereq: Satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 142, MATH 165
Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics).

**ENGR 260. Engineering: Getting from Thought to Thing.**
(3-0) Cr. 3. F.S.
What is engineering, technology and their roles in society? Investigation of engineering methods through case studies of everyday objects. Explore questions about the impact of technology in society. Apply engineering methods to design and failure analysis.

**ENGR 265. Survey of the Impacts of Engineering Activity.**
(3-0) Cr. 3. F.S.
Survey of the economic, environmental, societal, and political benefits and problems resulting from engineering activity. Effects of engineering projects on human health, social structures, and the environment. Examination of improvements in economic opportunities and quality of life resulting from engineering activity. Case studies of the effects of engineering activity.

**ENGR 270. Survey of How Things Work.**
(3-0) Cr. 3. F.S.
Removing mysteries surrounding science and technology. Identify key concepts from applied science and technology to obtain better understanding on how things work. Review and explain the principles behind the technologies which define our modern way of life. A survey of broad range of technology could include: cell phones, GPS, radio, television, computers, ultrasound, microwave ovens, automobile, bioengineering and other industrial and consumer technologies. Common day technology examples illustrating scientific knowledge and applications.

**ENGR 320. International Experience Report.**
Cr. 3. F.S. Prereq: Satisfactory completions of international work experience of at least ten weeks or nine credits of approved course work taken abroad. Permission of student's department prior to departure
Critique of work/study abroad experience as it relates to professional development. Taken the semester after completion of work abroad or study abroad. Written report and presentation. Offered on a satisfactory-fail basis only. Meets International Perspectives Requirement.

**ENGR 327. Voices of Public Policy.**
(3-0) Cr. 3. F. Prereq: Sophomore classification in engineering
Role and impact of legislative process, partisan politics, government, lobbyists, the media, expert testimony and grassroots activism on public policy. Critical analysis of context; of claims, assumptions, premises, and evidence of both sides; represented and disenfranchised populations; the ethical issues to develop personal position and courses of action to impact public policy process.

**ENGR 340. Introduction to Wind Energy: System Design & Delivery.**
(3-0) Cr. 3. F. Prereq: MATH 166, PHYS 222

**ENGR 350. Dean's Leadership Seminar.**
(1-0) Cr. 1. F.S. Prereq: Selection based on demonstrated commitment to leadership development. Sophomore or higher.
Understanding the complexities of leadership in building an organization, decision-making styles, communication, managing change, building trust, shared responsibility leadership, creating legacy, prioritizing, effective use of authority, conflict, ethics, integrity, transparency, accountability. Offered on a satisfactory-fail basis only. May not apply toward a degree in Engineering.

**ENGR 366. Multidisciplinary Engineering Design.**
(Cross-listed with A B E, AER E, CPR E, E E, I E, M E, MAT E). (1-4) Cr. 3. Repeatable. F.S. Prereq: Student must be within two semesters of graduation; permission of instructor.
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing, and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations and computer models and engineering drawings.
ENGR 476. Multidisciplinary Engineering Design II. (Cross-listed with AER E, CPR E, E E, E I, E M, E T, MAT E). (1-4) Cr. 3. Repeatable, maximum of 2 times. F.S. Prereq: Student must be within two semesters of graduation or receive permission of instructor. Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

ENGR 490E. Entrepreneurship. Cr. 1-3. Repeatable, maximum of 3 credits. Prereq: Junior or senior classification in engineering, college approval

Leadership.

Engineering Mechanics

Administered by the Department of Aerospace Engineering

Undergraduate Study

The undergraduate courses in mechanics are intermediate between those in physics and mathematics and the professional and design courses of the several engineering curricula. In these courses the student is expected to acquire an understanding of the basic principles and analysis techniques pertaining to the static and dynamic behavior of rigid media, deformable solids, fluids, and gasses. Physical properties of engineering materials are studied in the classroom and are tested in the laboratory. General physical laws are given mathematical expression and are made suitable for use in the solution of specific problems in machine and structural design, and in the flow and measurement of fluids.

Graduate Study

The department offers graduate programs that lead to the degrees master of science, master of engineering, and doctor of philosophy with major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and has strong research emphasis. The master of science degree is recommended for students who anticipate entering a doctoral program later. The master of engineering degree does not require either research credits or a thesis. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

The master of engineering degree does require a creative component which will be obtained by registering for E M 599 Creative Component. A written report and an oral presentation will be given to the student’s graduate committee.

At least 30 credits of acceptable graduate work are required for both the master of science and the master of engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (http://www.aere.iastate.edu/wp-content/blogs.dir/13/files/2011/09/Graduate-Handbook-Fall-2011.pdf).

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

Courses primarily for undergraduates:

E M 274. Statics of Engineering. (3-0) Cr. 3. F.S.SS. Prereq: Credit or enrollment in MATH 166; credit or enrollment in PHYS 111 or PHYS 221
Vector and scalar treatment of coplanar and noncoplanar force systems. Resultants, equilibrium, friction, centroids, second moments of areas, principal second moments of area, radius of gyration, internal forces, shear and bending moment diagrams.

E M 274H. Statics of Engineering: Honors. (3-0) Cr. 3. F.S.SS. Prereq: Credit or enrollment in MATH 166; credit or enrollment in PHYS 111 or PHYS 221
Vector and scalar treatment of coplanar and noncoplanar force systems. Resultants, equilibrium, friction, centroids, second moments of areas, principal second moments of area, radius of gyration, internal forces, shear and bending moment diagrams.

E M 324. Mechanics of Materials. (3-0) Cr. 3. F.S.SS. Prereq: E M 274
Plane stress, plane strain, stress-strain relationships, and elements of material behavior. Application of stress and deformation analysis to members subject to centric, torsional, flexural, and combined loadings. Elementary considerations of theories of failure, buckling.

E M 327. Mechanics of Materials Laboratory. (0-2) Cr. 1. F.S.SS. Prereq: Credit or enrollment in E M 324
Experimental determination of mechanical properties of selected engineering materials. Experimental verification of assumptions made in 324. Use of strain measuring devices. Preparation of reports.

E M 345. Dynamics. (3-0) Cr. 3. F.S.SS. Prereq: E M 274, credit or enrollment in MATH 268 or MATH 269
Particle and rigid body kinematics. Newton’s laws of motion, kinetics of plane motion, rigid body problems using work-energy, linear, and angular impulse-momentum principles, vibrations.

E M 350. Introduction to Nondestructive Evaluation Engineering. (3-0) Cr. 3. S. Prereq: E M 324, MATH 268 or MATH 269
The physics of ultrasonic, eddy current, and x-ray testing. Introduction to linear system concepts, wave propagation, electromagnetics and radiation. Models of the generation, scattering and reception of waves in ultrasonics, the electrical impedance changes of eddy current testing, and image formation process for x-rays. Pattern recognition methods for the interpretation of measured responses.

E M 362. Principles of Nondestructive Testing. (Cross-listed with MAT E). (3-0) Cr. 3. S. Prereq: PHYS 112 or PHYS 222
Radiography, ultrasonic testing, magnetic particle inspection, eddy current testing, dye penetrant inspection, and other techniques. Physical bases of tests; materials to which applicable; types of defects detectable; calibration standards, and reliability safety precautions.

E M 362L. Nondestructive Testing Laboratory. (Cross-listed with MAT E), (0-3) Cr. 1. S. Prereq: Credit or enrollment in MAT E 362
Application of nondestructive testing techniques to the detection and sizing of flaws in materials and to the characterization of material’s microstructure. Included are experiments in hardness, dye penetrant, magnetic particle, x-ray, ultrasonic and eddy current testing. Field trips to industrial laboratories.

E M 378. Mechanics of Fluids. (2-2) Cr. 3. F.S.SS. Prereq: E M 274

E M 417. Experimental Mechanics. (Cross-listed with AER E), (2-2) Cr. 3. Alt. F., offered even-numbered years. Prereq: E M 324
Introduction of different aspects of measuring deformation, strains, and stress for practical engineering problems. Strain gage theory and application. Selected laboratory experiments.

E M 424. Intermediate Mechanics of Materials. (3-0) Cr. 3. F.S. Prereq: E M 324

E M 425. Introduction to the Finite Element Method. (3-0) Cr. 3. S. Prereq: E M 324
Introduction of finite element analysis through applications to one-dimensional, steady-state problems such as elastic deformation, heat and fluid flow, consolidation, beam bending, and mass transport. Transient heat conduction and wave propagation. Two-dimensional triangular and quadrilateral elements. Plane problems of torsion, thermal and potential flow, stress analysis. Simple computer programs for one- and two-dimensional problems.
E M 451. Engineering Acoustics. (Cross-listed with M E). (2-2) Cr. 3. Alt. S., offered even-numbered years. Prereq: PHYS 221 and MATH 266 or MATH 267

E M 490. Independent Study. Cr. arr. Repeatable. Prereq: Permission of instructor

E M 490H. Independent Study: Honors. Cr. arr. Repeatable. Prereq: Permission of instructor

Courses primarily for graduate students, open to qualified undergraduates:

E M 510. Continuum Mechanics. (3-0) Cr. 3. F. Prereq: MATH 385

E M 514. Advanced Mechanics of Materials. (Cross-listed with AER E). (3-0) Cr. 3. F. Prereq: E M 324

Fundamental mechanics of linear elasticity, formulation and solution of simple elastostatic boundary value problems. Kinematics of small deformations, constitutive equations for isotropic and anisotropic media. Field equations for elastic solids, plane strain/plane stress and some classic analytical solutions such as Boussinesq, Hertz, Kirsch, Lamé, and Mitchell. Stress functions and potential methods and introduction to finite elements.

E M 517. Experimental Mechanics. (Cross-listed with AER E). (3-2) Cr. 4. Alt. S., offered even-numbered years. Prereq: E M 510 or E M 514 or E M 516
Fundamental concepts for force, displacement, stress, and strain measurements. Strain gages. Full field deformation measurements with laser interferometry and digital image processing. Advanced experimental concepts at the micro and nano scale regimes.

E M 518. Waves in Elastic Solids with Applications to Ultrasonic Nondestructive Evaluation. (3-0) Cr. 3. F. Prereq: MATH 385

E M 525. Finite Element Analysis. (Cross-listed with AER E). (3-0) Cr. 3. S. Prereq: E M 425, MATH 385
Variational and weighted residual approaches to finite element equations. Emphasis on two- and three-dimensional problems in solid mechanics. Isoparametric element formulation, higher order elements, numerical integration, imposition of constraints and penalty, convergence, and other more advanced topics. Use of two- and three-dimensional computer programs. Dynamic and vibrational problems, eigenvalues, and time integration. Introduction to geometric and material nonlinearities.

E M 526. Boundary Element Methods in Engineering. (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: E M 514 or E M 516

E M 543. Introduction to Random Vibrations and Nonlinear Dynamics. (Cross-listed with M E). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: 444
Vibrations of continuous systems. Nonlinear vibration phenomena, perturbation expansions; methods of multiple time scales and slowly-varying amplitude and phase. Characteristics of random vibrations; random processes, probability distributions, spectral density and its significance, the normal or Gaussian random process. Transmission of random vibration, response of simple single and two-degree-of-freedom systems to stationary random excitation. Fatigue failure due to random excitation.

E M 548. Advanced Engineering Dynamics. (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: E M 345, MATH 266 or MATH 267
3-D kinematics and dynamics of particles and rigid bodies. Coordinate systems, calculus of variations. Lagrange’s equations with constraints, modified Euler’s equations, torque-free motion of rigid bodies in 3-D, moment equations with constraints.

Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, computed tomography, and thermoelectrics are analyzed. Laboratory experiments on all basic methods: ultrasonics, eddy currents, x-ray, liquid penetrants, magnetic testing, and visual inspection are performed.

E M 552. Advanced Acoustics. (Cross-listed with M E). (3-0) Cr. 3. F. Prereq: E M 451
Theoretical acoustics: wave propagation in fluids; acoustic radiation, diffraction and scattering; nonlinear acoustics; radiation force; cavitation; and ray acoustics.

E M 554. Fracture and Fatigue. (Cross-listed with AER E, M E, M S E). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: E M 324 and either MAT E 216 or MAT E 273 or MAT E 392. Undergraduates: Permission of instructor
Materials and mechanics approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

E M 556. Phase Transformation in Elastic Materials. (Cross-listed with M E). (3-0) Cr. 3. S. Prereq: EM 510 or EM 516 or EM 514

E M 570. Wind Engineering. (Cross-listed with AER E). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: E M 378, E M 345
Atmospheric circulations, atmospheric boundary layer wind, bluff-body aerodynamics, aeroelastic phenomena, wind-tunnel and full-scale testing, wind-load code and standards, effect of tornado and thunderstorm winds, design applications.

Courses for graduate students:
E M 697. Engineering Internship. Cr. R. Repeatable. Prereq: Permission of DOGE (Director of Graduate Education), Graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

Engineering Studies

Interdepartmental minor

The College of Engineering offers an undergraduate minor in engineering studies for non-engineering students designed to improve their understanding of engineering. This minor is not intended to train non-engineering students to do the work of practicing, degree-holding engineers. Rather, students who complete the minor in engineering studies will be able to work more effectively in their primary field by better appreciating the nature, capabilities, and limitations of engineering.

The minor in engineering studies is structured so that no student will be excluded due to insufficient preparation in mathematics or the sciences. The required courses in the minor and many of the elective courses are specifically designed to offer a range of prerequisites, so that students from all curricula will find coursework that supports an accessible and intellectually stimulating program of study.

The minor in engineering studies will be awarded only to students whose degree program is not in engineering.

Twelve additional credits from an approved list of eligible courses. Some of these approved courses are taught by the College of Engineering; additional courses are taught by other colleges. A minimum of six of those 12 credits must be courses that bear the designation "E 50" or are courses offered by engineering departments. Eligible courses will include those 200-level and above courses offered by the departments in the College of Engineering that are expressly designated by that department’s curriculum committee for use in the minor in engineering studies.

A minimum of 6 credits in the minor must be 300-level or above (university requirement)

Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering

Undergraduate Study

For the undergraduate curriculum in industrial engineering leading to the degree of bachelor of science. The Industrial Engineering Program of this curriculum is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

The Industrial Engineering (IE) Program educates its future graduates to accomplish its educational objectives in their early careers. Specifically, the IE curriculum prepares its majors so that, within a few years after graduation, graduates’ attainments are

1. industrial engineering decisions that result in well-reasoned, value-added solutions.
2. communications with stakeholders that are informative, persuasive, and constructive.
3. contributions to team goals through effective team interactions and leadership.
4. new skills and knowledge that advance professional practice and enable career advancement.

Details on industrial engineering program outcomes that foster the attainment of these objectives are available at appropriate sections of: www.imse.iastate.edu

The Industrial engineering undergraduate curriculum provides students with fundamental knowledge in mathematics and science, engineering science, social science, and humanities as well as professional industrial engineering course work. Management electives provide students with an opportunity to become familiar with modern business practices that they will encounter in their career. A senior capstone design course provides students with an opportunity to solve open-ended industrial problems with an industrial partner. The cooperative education program provides students with real world experience in the profession and a good perspective on career choices. Students are encouraged to participate in international experiences through exchange programs and industrial internships.

Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue both B.S. and M.S. or M.Eng. degrees in Industrial Engineering, or B.S. and M.B.A. degrees.

Engineering Sales

The Engineering Sales Minor is multidisciplinary and open to undergraduates in the College of Engineering. The minor is earned by completing 15 credits including:

Total Credits 15

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Graduate Study

The department offers programs for the degrees master of engineering, master of science and doctor of philosophy with a major in industrial engineering. A formal minor is available at the M.S. and Ph.D. levels to graduate students having a major in another department. The M.Eng. degree consists of coursework designed to improve professional expertise in industrial engineering. The M.S. and Ph.D. degrees are designed to improve the student’s capability to conduct research as well as their professional expertise.

The prerequisite to major graduate work is the completion of a curriculum similar to that required of undergraduate students in engineering at this institution. Because of the diversity of industrial engineering topics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering: e.g., mathematics or physics. However, completion of a math sequence of calculus through differential equations is required.

With the help of a program of study committee, a graduate student develops an educational program in areas within industrial engineering. Typical areas of concentration include ergonomics/human factors, engineering management, human computer interfaces, advanced manufacturing systems, operations research, and information engineering.

The department offers a certificate in advanced manufacturing, in collaboration with the mechanical engineering department, which consists of four graduate courses selected from an approved list in both departments.

For additional information about graduate degree programs, admission criteria, and procedures refer to https://www.imse.iastate.edu/graduate-program/.
Curriculum in Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering.

Leading to the degree bachelor of science.

Total credits required: 122 cr. See also Basic Program and Special Programs. Grades of C or better are required for any transfer credit course that is applied to the degree program.

International Perspectives: 3 cr. ¹

U.S. Diversity: 3 cr. ²

Communication Proficiency/Library requirements: 7 cr.

- ENGL 150 Critical Thinking and Communication (C or better in this course) 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition (C or better in this course) 3
- LIB 160 Information Literacy 1

Total Credits 7

Remaining Communication courses: 6 cr.

- ENGL 314 Technical Communication 3
- SP CM 212 Fundamentals of Public Speaking 3

Total Credits 6

Social Sciences and Humanities Electives: 12 cr. ²

Six of twelve credits must be from 200-level or above courses. Six credits must be sequential or related courses.

Basic Program: 27 cr. ³

(A minimum GPA of 2.00 required for this set of courses, including any transfer courses).

- CHEM 167 General Chemistry for Engineering Students 4
- ENGL 150 Critical Thinking and Communication 3
- ENGL 250 Written, Oral, Visual, and Electronic Composition (see above for grade requirements) 3
- ENGR 101 Engineering Orientation R
- I E 148 Information Engineering ³ 3
- LIB 160 Information Literacy 1
- MATH 165 Calculus I 4
- MATH 166 Calculus II 4
- PHYS 221 Introduction to Classical Physics I (see Basic Program rule) 5

Total Credits 27

Math and Physical Science: 17 cr.

- MATH 265 Calculus III 4
- MATH 267 Elementary Differential Equations and Laplace Transforms 4
- PHYS 222 Introduction to Classical Physics II 5
- STAT 231 Probability and Statistical Inference for Engineers 4

Total Credits 17

Industrial Engineering Core: 34 cr.

(A minimum GPA of 2.00 required for this set of courses, including any transfer courses).

- I E 222 Design & Analysis Methods for System Improvements 3
- I E 248 Engineering System Design, Manufacturing Processes and Specifications 3
- I E 271 Applied Ergonomics and Work Design 3
- I E 305 Engineering Economic Analysis 3
- I E 312 Optimization 3
- I E 341 Production Systems 3
- I E 348 Solidification Processes 3
- I E 361 Statistical Quality Assurance 3
- I E 413 Stochastic Modeling, Analysis and Simulation 4
- I E 441 Industrial Engineering Design 3
- I E 448 Manufacturing Systems Engineering 3

Total Credits 34

Other Remaining Courses: 26 cr. ²

- MAT E 273 Principles of Materials Science and Engineering 3
- E M 274 Statics of Engineering 3
- E E 442 Introduction to Circuits and Instruments 2
- M E 231 Engineering Thermodynamics I 3
- Focus Electives 6
- Management Electives 3
- Engineering Topic Electives 6

Total Credits 26

Seminar/Co-op/Internships:

- I E 101 Industrial Engineering Profession R

Optional co-op/internship courses

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also the following grid showing course template by semester: 4-Year Plan of Study for Industrial Engineering.

Courses primarily for undergraduates:

  Cr. R. F.S.
  (1-0) Introduce students to the industrial engineering profession, its scope, industrial engineering tools, and future trends.

- I E 148. Information Engineering.
  (2-2) Cr. 3. F.S. Prereq: Credit or enrollment in MATH 142

  (3-0) Cr. 3. S. Prereq: I E 248; credit or enrollment in I E 271.
  Study of system improvement methods and strategies. Specific areas of lean system improvements include continuous improvement, setup reduction, workplace organization, inventory and waste minimization. Methods and strategies to analyze and quantify the impact of changes.

  (2-2) Cr. 3. F. Prereq: MATH 166 and PHYS 221. Credit or enrollment in I E 101 and MAT E 273.
  Introduction to metrology, engineering drawings and specifications, Engineering methods for designing and improving systems. Theory, applications, and quality issues related to machining processes.

  (3-0) Cr. 3. S. Prereq: PHYS 221
  Basic concepts of ergonomics and work design. Their impact on worker and work place productivity, and cost. Investigations of work physiology, biomechanics, anthropometry, work methods, and their measurement as they relate to the design of human-machine systems.

- I E 298. Cooperative Education.
  Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services
  First professional work period in the cooperative education program. Students must register for this course before commencing work.
I E 305. Engineering Economic Analysis.  
(3-0) Cr. 3. F.S.S.  Prereq: MATH 168  
Economic analysis of engineering decisions under uncertainty. Financial  
engineering basics including time value of money, cash flow estimation, and  
asset evaluation. Make versus buy decisions. Comparison of project alternatives  
accounting for taxation, depreciation, inflation, and risk.  

I E 312. Optimization.  
(3-0) Cr. 3. F.  Prereq: Credit or enrollment in MATH 267.  
Concepts, optimization and analysis techniques, and applications of operations  
research. Formulation of mathematical models for systems, concepts, and  
methods of improving search, linear programming and sensitivity analysis, network  
models, and integer programming.  

I E 341. Production Systems.  
(3-0) Cr. 3. F.  Prereq: STAT 231; credit or enrollment in I E 312  
Introduction of key concepts in the design and analysis of production systems.  
Topics include inventory control, forecasting, material requirement planning,  
project planning and scheduling, operations scheduling, and other production  
systems such as Just-In-Time (JIT), warehousing, and global supply chains.  

I E 348. Solidification Processes.  
(2-2) Cr. 3. S.  Prereq: I E 248 and Mat E 273.  
Theory and applications related to metal casting, welding, polymer processing,  
powder metallurgy, and composites manufacturing.  

(Cross-listed with STAT).  
(2-2) Cr. 3. F.S.  Prereq: STAT 231, STAT 301, STAT 326 or STAT 401  
Statistical methods for process improvement. Simple quality assurance principles  
and tools. Measurement system precision and accuracy assessment. Control  
charts. Process capability assessment. Experimental design and analysis for  
process improvement. Significant external project in process improvement.  

I E 396. Summer Internship.  
Cr. R. Repeatable. SS.  Prereq: Permission of department and Engineering Career  
Services  
Summer professional work period.  

I E 397. Engineering Internship.  
Cr. R. Repeatable. F.S.  Prereq: Permission of department and Engineering Career  
Services  
Professional work period for a maximum of one semester per academic year.  
Offered on a satisfactory-fail basis only.  

I E 398. Cooperative Education.  
Cr. R. F.S.S.  Prereq: I E 298, permission of department and Engineering Career  
Services  
Second professional work period in the cooperative education program. Students  
must register for this course before commencing work. Offered on a satisfactory-  
fail basis only.  

I E 403. Introduction to Sustainable Production Systems.  
(Dual-listed with E 503).  
(3-0) Cr. 3. Alt. S., offered odd-numbered years.  Prereq:  
Credit or enrollment in I E 341  
Quantitative introduction of sustainability concepts in production planning and  
inventory control. Review of material recovery (recycling) and product/component  
recovery (remanufacturing) from productivity perspectives. Sustainability rubrics  
ranging from design and process to systems. Application to multi-echelon  
networks subject to forward/backward flow of material and information. Closed-  
loop supply chains. Comparative study of sustainable vs. traditional models for  
local and global production systems.  

I E 413. Stochastic Modeling, Analysis and Simulation.  
(4-0) Cr. 4. F.  Prereq: MATH 267, STAT 231  
Development and analysis of simulation models using a simulation language.  
Application to various areas of manufacturing and service systems such as  
assembly, material handling, and customer queues. Utilizing model output to  
make important business decisions. Fitting of data to statistical distributions.  
Introduction to Markov processes and other queuing models.  

I E 441. Industrial Engineering Design.  
(1-6) Cr. 3. F.S.  Prereq: I E 248, I E 271, I E 361; credit or enrollment in I E 341, I  
E 413, and I E 448  
A large, open-ended design project related to an enterprise. Application of  
engineering design principles including problem definition, analysis, synthesis, and  
evaluation.  

I E 446. Geometric Variability in Manufacturing.  
(Dual-listed with I E 546).  
(3-0) Cr. 3. Alt. S., offered odd-numbered years.  Prereq:  
I E 348, or MAT E 216, or M E 324  
Assessment, accommodation, and control of geometric variability in manufacturing  
processes, specifically composites, metalcasting, welding, machining, and powder  
metallurgy. Techniques include the design of the component, tooling and process  
plan. The use of contact and noncontact measurement methods to assess  
variation.  

(3-0) Cr. 3. S. Prereq: I E 248, I E 305  
Protocols and tooling requirements for manufacturing process planning, geometric  
dimensioning and tolerancing, computer aided inspection, cellular and flexible  
manufacturing, and facility layout. Lean manufacturing principles and controlled  
flow production.  

(Dual-listed with I E 549).  
(3-0) Cr. 3. Alt. F., offered even-numbered years.  Prereq:  
Prereq: I E 248 or similar manufacturing engineering course, MATH 265.  
Representation and interpretation of curves, surfaces and solids. Parametric  
curves and surfaces and solid modeling. Use of CAD software and CAD/CAM  
integration. Computer numerical control, CNC programming languages, and  
process planning.  

I E 450. Technical Sales for Engineers I.  
(3-0) Cr. 3. F.  Prereq: Credit or enrollment in I E 305.  
Sales process methodology, techniques for building professional relationships,  
sales automation software, prospecting and account development, market  
analysis and segmentation, responding to RFQ’s and RFP’s in written and  
verbal form. Developing technical value propositions and competitive positioning,  
evaluating organizational decision processes and people, technical marketing  
strategies, sales closing strategies.  

I E 451. Technical Sales for Engineers II.  
(3-0) Cr. 3. S.  Prereq: I E 450  
Case studies and experiential lessons on the development and application of  
technical sales strategies. Specific topics include developing pricing and  
distribution strategies, managing a sales staff and channel, developing sales  
teams and global sales plans, bid and negotiation strategies, time management  
skills, and implementing sales automation technologies.  

I E 466. Multidisciplinary Engineering Design.  
(Cross-listed with A B E, AER E, CPR E, E E, ENGR, M E, MAT E).  
(1-4) Cr. 3.  
Repeatable. F.S.  Prereq: Student must be within two semesters of graduation and  
receive permission of instructor  
Application of team design concepts to projects of a multidisciplinary nature.  
Concurrent treatment of design, manufacturing, and life cycle considerations.  
Application of design tools such as CAD, CAM, and FEM. Design methodologies,  
project scheduling, cost estimating, quality control, manufacturing processes.  
Development of a prototype and appropriate documentation in the form of written  
reports, oral presentations and computer models and engineering drawings.  

I E 467. Multidisciplinary Engineering Design II.  
(Cross-listed with AER E, CPR E, E E, ENGR, M E, MAT E).  
(1-4) Cr. 3.  
Repeatable, maximum of 2 times. F.S.  Prereq: Student must be within two  
semesters of graduation or receive permission of instructor.  
Build and test of a conceptual design. Detail design, manufacturability, test  
criteria and procedures. Application of design tools such as CAD and CAM and  
manufacturing techniques such as rapid prototyping. Development and testing  
of a full-scale prototype with appropriate documentation in the form of design  
journals, written reports, oral presentations and computer models and engineering  
drawings.  

I E 481. e-Commerce Systems Engineering.  
(Dual-listed with I E 581).  
(3-0) Cr. 3. Alt. F., offered even-numbered years.  Prereq: I E 148  
Design, analysis, and implementation of e-commerce systems. Information  
infrastructure, enterprise models, enterprise processes, enterprise views.  
Data structures and algorithms used in e-commerce systems, SQL, exchange  
protocols, client/server model, web-based views.  

I E 483. Knowledge Discovery and Data Mining.  
(Dual-listed with I E 583).  
(3-0) Cr. 3. Alt. F., offered even-numbered years.  Prereq: I E 148, I E 312, and STAT 231  
Introduction to data warehouses and knowledge discovery. Techniques for data  
mapping, including probabilistic and statistical methods, genetic algorithms and  
networks, visualization techniques, and mathematical programming.  
Advanced topics include web-mining and mining of multimedia data. Case studies  
from both manufacturing and service industries. A computing project is required.
IIE 490. Independent Study. Cr. 1-5. Repeatable. Prereq: Senior classification, permission of instructor. Independent study and work in the areas of industrial engineering design, practice, or research.

IIE 490A. Independent Study: Manufacturing. Cr. 1-5. Repeatable. Prereq: Senior classification, permission of instructor. Independent study and work in the areas of industrial engineering design, practice, or research.

IIE 490B. Independent Study: Human Factors. Cr. 1-5. Repeatable. Prereq: Senior classification, permission of instructor. Independent study and work in the areas of industrial engineering design, practice, or research.

IIE 490C. Independent Study: Operations Research. Cr. 1-5. Repeatable. Prereq: Senior classification, permission of instructor. Independent study and work in the areas of industrial engineering design, practice, or research.

IIE 490D. Independent Study: Enterprise Computing and Information Management. Cr. 1-5. Repeatable. Prereq: Senior classification, permission of instructor. Independent study and work in the areas of industrial engineering design, practice, or research.

IIE 490E. Independent Study: Engineering Management. Cr. 1-5. Repeatable. Prereq: Senior classification, permission of instructor. Independent study and work in the areas of industrial engineering design, practice, or research.

IIE 490H. Independent Study: Honors. Cr. 1-5. Repeatable. Prereq: Senior classification, permission of instructor. Independent study and work in the areas of industrial engineering design, practice, or research.

IIE 490. Cooperative Education. Cr. R. Repeatable. Prereq: I E 298, permission of department and Engineering Career Services. Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

Courses primarily for graduate students, open to qualified undergraduates:

IIE 501. M.S. Research Basics and Communications. Cr. R. Repeatable. Prereq: Enrollment in M.S. or M.Eng. program in Industrial Engineering. Principles and practices for research tasks at the M.S. level including proposal writing, presentations, paper preparation, and project management. Offered on a satisfactory-fail basis only.

IIE 502. M.S. Research Conduct. Cr. R. Repeatable. Prereq: Enrollment in M.S. program in Industrial Engineering. Responsible conduct of research at the M.S. level, including ethical issues in peer review, conflicts of interest, mentoring, human subjects and live animals, data management, and collaboration. Offered on a satisfactory-fail basis only.

IIE 503. Introduction to Sustainable Production Systems. (Dual-listed with I E 403). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: Credit or enrollment in I E 341. Quantitative introduction of sustainability concepts in production planning and inventory control. Review of material recovery (recycling) and product/component recovery (remanufacturing) from productivity perspectives. Sustainability rubrics ranging from design and process to systems. Application to multi-echelon networks subject to forward/backward flow of material and information. Closed-loop supply chains. Comparative study of sustainable vs. traditional models for local and global production systems. A course project is required for graduate credit.

IIE 508. Design and Analysis of Allocation Mechanisms. (3-0) Cr. 3. Prereq: I E 312 or MATH 307. Market-based allocation mechanisms from quantitative economic systems perspective. Pricing and costing models designed and analyzed with respect to decentralized decision processes, information requirements, and coordination. Financial Engineering Techniques. Case studies and examples from industries such as regulated utilities, semiconductor manufacturers, and financial engineering services.

IIE 513. Analysis of Stochastic Systems. (3-0) Cr. 3. Prereq: STAT 231. Introduction to modeling and analysis of manufacturing and service systems subject to uncertainty. Topics include the Poisson process, renewal processes, Markov chains, and Brownian motion. Applications to inventory systems, production system design, production scheduling, reliability, and capacity planning.

IIE 514. Production Scheduling. (3-0) Cr. 3. Prereq: I E 312, I E 341 Introduction to the theory of machine shop systems. Complexity results for various systems such as job, flow and open shops. Applications of linear programming, integer programming, network analysis. Enumerative methods for machine sequencing. Introduction to stochastic scheduling.

IIE 519. Simulation Modeling and Analysis. (3-0) Cr. 3. Prereq: I E 311, STAT 401 Event scheduling, process interaction, and continuous modeling techniques. Probability and statistics related to simulation parameters including run length, inference, design of experiments, variance reduction, and stopping rules. Aspects of simulation languages.

IIE 531. Quality Control and Engineering Statistics. (Cross-listed with STAT); (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: STAT 401; STAT 342 or STAT 447. Statistical methods and theory applicable to problems of industrial process monitoring and improvement. Statistical issues in industrial measurement; Shewhart, CUSUM, and other control charts; feedback control; process characterization studies; estimation of product and process characteristics; acceptance sampling, continuous sampling and sequential sampling; economic and decision theoretic arguments in industrial statistics.

IIE 533. Reliability. (Cross-listed with STAT); (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: STAT 342 or STAT 432 or STAT 447. Probabilistic modeling and inference in engineering reliability; lifetime models, product limit estimator, probability plotting, maximum likelihood estimation forensored data, Bayesian methods in reliability, system reliability models, competing risk analysis, acceleration models and analysis of accelerated test data; analysis of recurrence data; planning studies to obtain reliability data.

IIE 541. Inventory Control and Production Planning. (3-0) Cr. 3. Prereq: I E 341. Economic Order Quantity, dynamic lot sizing, newsvendor, base stock, and (Q,r) models. Material Requirements Planning, Just-In-Time (JIT), variability in production systems, push and pull production systems, aggregate and workforce planning, and capacity management. Supply Chain Contracts.

IIE 543. Wind Energy Manufacturing. (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: Undergraduate engineering degree or permission of instructor. Materials, processes and systems required to produce the major components (blades, towers, nacelles) of megawatt scale wind turbines. Transportation, manufacturing siting and procurement decisions as it relates to these large components in an expanding industry.

IIE 545. Rapid Prototyping and Manufacturing. (3-0) Cr. 3. Prereq: I E 248 or similar manufacturing engineering course, Math 265. Undergraduates: Permission of instructor. Introduction to rapid prototyping processes and other rapid manufacturing methodologies. Operating principles and characteristics of current and developing rapid prototyping processes. Use of rapid prototypes in product design, development, and service. Selection of rapid prototyping systems based on rapid methodologies used in manufacturing processes and rapid tooling approaches.
I E 546. Geometric Variability in Manufacturing.
(Dual-listed with I E 446). (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: I E 348, or MAT E 216, or M E 324
Assessment, accommodation, and control of geometric variability in manufacturing processes, specifically composites, metalcasting, welding, machining, and powder metallurgy. Techniques include the design of the component, tooling and process plan. The use of contact and noncontact measurement methods to assess variation.

(Dual-listed with I E 449). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: I E 248 or similar manufacturing engineering course, MATH 265. Representation and interpretation of curves, surfaces and solids. Parametric curves and surfaces and solid modeling. Use of CAD software and CAD/CAM integration. Computer numerical control, CNC programming languages, and process planning.

(3-0) Cr. 3. Prereq: I E 361
Methods for continuous quality improvement in process analysis. The systems analysis for process improvement model based on W. Edward Deming. Quality function deployment methods. Case studies of applications to manufacturing and other heavy industries. Use of process analysis computerized programs and tools for design analysis.

I E 565. Systems Engineering and Analysis.
(Cross-listed with AER E, E E). (3-0) Cr. 3. Prereq: Coursework in basic statistics.
Introduction to organized multidisciplinary approach to designing and developing systems. Concepts, principles, and practice of systems engineering as applied to large integrated systems. Life cycle costing, scheduling, risk management, functional analysis, conceptual and detail design, test and evaluation, and systems engineering planning and organization. Not available for degrees in industrial engineering.

(3-0) Cr. 3. Prereq: I E 565
Design for reliability, maintainability, usability, supportability, producibility, disposability, and life cycle costs in the context of the systems engineering process. Students will be required to apply the principles of systems engineering to a project including proposal, program plan, systems engineering management plan, and test and evaluation plan. Not available for degrees in industrial engineering.

I E 570. Systems Engineering and Project Management.
(3-0) Cr. 3. Prereq: Coursework in basic statistics
Systems view of projects and the processes by which they are implemented. Focuses on qualitative and quantitative tools and techniques of project management. Specific systems concepts, methodologies, and tools for effective management of both simple and complex projects. Introduction of important performance parameters for planning, cost control, scheduling, and productivity, including discussions of traditional and state of the art tools and systems.

I E 571. Occupational Biomechanics.
(3-0) Cr. 3. Prereq: E M 274, STAT 231

(3-0) Cr. 3. Prereq: Graduate classification
Human factors methods applied to interface design, prototyping, and evaluation. Concepts related to understanding user characteristics, usability analysis, methods and techniques for design and evaluation of the interface. The evaluation and design of the information presentation characteristics of a wide variety of interfaces: web sites (e-commerce), computer games, information presentation systems (cockpits, instrumentation, etc.), and desktop virtual reality.

(3-0) Cr. 3. Prereq: I E 577
Investigation of the human interface to consumer and industrial systems and products, providing a basis for their design and evaluation. Discussions of human factors in the product design process: modeling the human during product use; usability; human factors methods in product design evaluation; user-device interface; safety, warnings, and instructions for products; considerations for human factors in the design of products for international use.

I E 577. Human Factors.
(3-0) Cr. 3. Prereq: I E 271, STAT 231 or STAT 401
Physical and psychological factors affecting human performance in systems. Signal detection theory, human reliability modeling, information theory, and performance shaping applied to safety, reliability, productivity, stress reduction, training, and human/equipment interface design. Laboratory assignments related to system design and operation.

I E 581. e-Commerce Systems Engineering.
(Dual-listed with I E 481). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: I E 148
Design, analysis, and implementation of e-commerce systems. Information infrastructure, enterprise models, enterprise processes, enterprise views. Data structures and algorithms used in e-commerce systems. SQL, exchange protocols, client/server model, web-based views.

I E 582. Enterprise Modeling and Integration.
(3-0) Cr. 3. Prereq: 3 credits in information technology or information systems
The design and analysis of enterprise models to support information engineering of enterprise-wide systems. Representation of system behavior and structure including process modeling, information modeling, and conceptual modeling. Applications in enterprise application integration, enterprise resource planning systems, product data management systems, and manufacturing execution systems.

I E 583. Knowledge Discovery and Data Mining.
(Dual-listed with I E 483). (3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: I E 148, I E 312, and STAT 231
Introduction to data warehouses and knowledge discovery. Techniques for data mining, including probabilistic and statistical methods, genetic algorithms and neural networks, visualization techniques, and mathematical programming. Advanced topics include web-mining and mining of multimedia data. Case studies from both manufacturing and service industries. A computing project and an additional project with more theoretical content are required.

I E 585. Requirements Engineering.
(3-0) Cr. 3. Prereq: 3 credits in information technology or information systems
Principles and practices for requirements engineering as part of the product development process with emphasis on software systems engineering. Problem definition, problem analysis, requirements analysis, requirements elicitation, validation, specifications. Case studies using requirements engineering methods and techniques.

I E 588. Information Systems for Manufacturing.
(3-0) Cr. 3. Prereq: I E 146, I E 448
Design and implementation of systems for the collection, maintenance, and usage of information needed for manufacturing operations, such as process control, quality, process definition, production definitions, inventory, and plant maintenance. Topics include interfacing with multiple data sources, methods to utilize the information to improve the process, system architectures, and maintaining adequate and accurate data for entities internal and external to the enterprise to achieve best manufacturing practices.

I E 590. Special Topics.
Cr. 1-3. Repeatable.
Advanced study of a research topic in the field of industrial engineering.

Courses for graduate students:
Cr. R. Repeatable. Prereq: Enrollment in Ph.D. program in Industrial Engineering. Principles and practices for conducting research at the Ph.D. level, including problem definition, proposal writing, presentations, conference proceedings, paper preparation, and project management. Offered on a satisfactory-fail basis only.

Cr. R. Repeatable. Prereq: Enrollment in Ph.D. program in Industrial Engineering. Responsible conduct of research at the Ph.D. level, including ethical issues in peer review, conflicts of interest, mentoring, human subjects and live animals, data management, and collaboration. Offered on a satisfactory-fail basis only.

(3-0) Cr. 3. Prereq: I E 513
Modeling techniques to evaluate performance and address issues in design, control, and operation of systems. Markov models of single-stage make-to-order and make-to-stock systems. Approximations for non-Markovian systems. Impact of variability on flow lines. Open and closed queuing networks.
The objectives of the materials engineering program are to produce graduates in automotive, aerospace products, building and construction, durable goods, and transportation industries. Medical/environmental technologies bridge all industrial and government sectors including: materials based discipline relating the composition, microstructure, and processing of materials. Because of its interdisciplinary nature, career opportunities for materials engineers offer a variety of traditional and modern technologies involving metals, ceramics, polymers, composites, and electronic materials.

Graduates in materials engineering are able to apply scientific and engineering principles to design or select the materials and structures that are best suited for the requirements of an engineering problem. They will have hands-on skills with a broad range of modern materials processing and characterization equipment and methods.

A degree in materials engineering relies on a strong foundation of math, chemistry, and physics. The core materials courses include fundamentals of materials, kinetics and thermodynamics, mechanical properties, computational methods, and professional practice experience. Students tailor their programs to their goals and interests through the selection of a specialization from the available: ceramic materials, metallic materials and polymeric materials. Additional technical electives can be taken in other areas of interest. The breadth and depth of the program provide excellent preparation for both immediate entry into industry or further study in graduate school.

The department also offers a cooperative education program that combines classroom learning with work experience. Well qualified juniors in materials engineering who are interested in graduate study may apply for concurrent enrollment during their senior year in the Graduate College to simultaneously pursue both bachelor of science and master of science degrees. See Materials Science and Engineering for more information.

Curriculum in Materials Engineering

Administered by the Department of Materials Science and Engineering.

Leading to the degree bachelor of science.

Total credits required: 128 cr. Any transfer credit courses applied to the degree program require a grade of C or better. See also Basic Program and Special Programs.

International Perspectives: 3 cr. 1

U.S. Diversity: 3 cr. 1

Communication Proficiency/Library requirement (minimum grade of C):

### Materials/Specialties Engineering Core: 41 cr.

Complete with 2.00 GPA including transfer courses:

- MAT E 214 Structural Characterization of Materials 3
- MAT E 215 Introduction to Materials Science and Engineering I 3
- MAT E 215L Introduction to Materials Science and Engineering II - Lab 1
- MAT E 216 Introduction to Materials Science and Engineering II 4
- MAT E 311 Thermodynamics in Materials Engineering 3
- MAT E 314 Kinetics and Phase Equilibria in Materials 3
- MAT E 316 Computational Methods in Materials 3
- MAT E 317 Introduction to Electronic Properties of Ceramic, Metallic, and Polymeric Materials 3
- MAT E 413 Materials Design and Professional Practice I 3
- MAT E 414 Materials Design and Professional Practice II 3
- MAT E 418 Mechanical Behavior of Materials 3

Students must choose one from the three areas of specialization (9 cr.):

- ceramic, metallic and polymeric materials. 9

**Total Credits**: 41

The options below meet that expectation by using the following specialization courses:

- **Ceramic Materials**:
  - MAT E 321 Introduction to Ceramic Science 3
  - MAT E 322 Introduction to Ceramic Processing 3
  - MAT E 425 Glasses and Advanced Ceramics 3

- **Metallic Materials**:
  - MAT E 342 Structure/Property Relations in Nonferrous Metals 3
  - MAT E 443 Physical Metallurgy of Ferrous Alloys 3
  - MAT E 444 Corrosion and Failure Analysis 3

- **Polymeric Materials**:
  - MAT E 351 Introduction to Polymeric Materials 3
  - MAT E 454 Polymer Composites and Processing 3

### Other Courses: 27 cr.

- E M 274 Statics of Engineering 3
- E M 324 Mechanics of Materials 3

Technical electives from list of materials courses 9

Technical electives from approved departments 9

Non-remedial course 3

**Total Credits**: 27

### Seminar/Co-op/Internships

- MAT E 201 Materials Science and Engineering - Professional Planning

Co-op and internships are optional.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Note: A Mat E student may take up to 9 credit hours from General Education and free electives on a P/NP basis, except for courses used to meet the diversity and international perspectives requirement. S/F courses (different from P/NP) will be considered for these requirements on a course-by-course basis.

See also: A 4-year plan of study grid showing course template by semester.

### Courses primarily for undergraduates:

- **MAT E 201. Materials Science and Engineering - Professional Planning.**
  - Cr. R. S. Prereq: Sophomore classification in Mat E
  - Preparation for a career in materials engineering; experiential learning, resumes, interviewing, Myers-Briggs Type Indicator, leadership, undergraduate research, international opportunities, graduate school preparation and opportunities, and alternative career paths. Offered on a satisfactory-fail basis only.

- **MAT E 214. Structural Characterization of Materials.**
  - (2-3) Cr. 3. S. Prereq: MAT E 215, credit or enrollment in PHYS 221
  - Structural characterization of ceramic, electronic, polymeric and metallic materials. Techniques include optical and electron microscopy, x-ray diffraction, and thermal analysis. Identification of materials type, microstructure, and crystal structure.

- **MAT E 215. Introduction to Materials Science and Engineering I.**
  - (3-0) Cr. 3. F.S. Prereq: Mat 165 AND (CHEM 177 or CHEM 167)
  - Materials Engineering majors only. Structure and properties of ceramic, electronic, polymeric and metallic materials, emphasizing differences based on structure and bonding. Phase equilibria and phase transformations. Only one of Mat E 215, 273, or 392 may count toward graduation.

- **MAT E 215L. Introduction to Materials Science and Engineering I - Lab.**
  - (0-3) Cr. 1. F.S. Prereq: Credit or enrollment in MAT E 215 or MAT E 273 or MAT E 392
  - Materials Engineering majors only. Laboratory exercise in materials.

- **MAT E 216. Introduction to Materials Science and Engineering II.**
  - (2-3) Cr. 4. F.S. Prereq: MAT E 215, Chem 178, Credit or enrollment in PHYS 222
  - Materials Engineering majors only. Fundamentals of ceramic, polymeric, and composite materials; degradation, electronic, thermal, magnetic, and optical properties of materials. Materials for energy, biomaterials, and nanomaterials. Laboratory exercises in materials property measurements.

### MAT E 220. Globalization and Sustainability.

- (Cross-listed with ANTHR, ENV S, GLOBE, M E, SOC, T SCI) (3-0) Cr. 3. F.S.
  - An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department.

- (3-0) Cr. 3. F.S.
  - Prereq: Sophomore classification; CHEM 167 or CHEM 177; MATH 165

### MAT E 298. Cooperative Education.

- Cr. R. F.S.S. Prereq: Permission of department and Engineering Career Services
  - First professional work period in the cooperative education program. Students must register for this course before beginning work.
MAT E 413. Materials Design and Professional Practice I.
(2-2) Cr. 3. F. Prereq: Senior status in Mat E
Fundamentals of materials engineering design, information sources, team behavior, professional preparation, quantitative design including finite-element analysis and computer aided design, materials selection, informatics and combinatorial methods. Analysis of design problems, development of solutions, selected case studies. Oral presentation skills. Preparations for spring project.

MAT E 414. Materials Design and Professional Practice II.
(2-2) Cr. 3. S. Prereq: Senior status in Mat E
Integration of materials processing, structure/composition, properties and performance principles in materials engineering problems. Multi-scale design of materials, materials processing, case studies including cost analysis, ethics, risk and safety. Team projects specified by either industry or academic partners. Written and oral final project reports.

MAT E 418. Mechanical Behavior of Materials.
(3-0) Cr. 3. S. Prereq: MAT E 216 and credit or enrollment in E M 324
Mechanical behavior of ceramics, metals, polymers, and composites. Relationships between materials processing and atomic aspects of elasticity, plasticity, fracture, and fatigue. Life prediction, stress-and failure analysis.

MAT E 425. Glasses and Advanced Ceramics.
(2-3) Cr. 3. F. Prereq: MAT E 321
Composition, structure, properties and manufacturing of inorganic glasses. Properties and applications of advanced ceramics. Structural, thermal, optical, electronic, magnetic and biological applications of ceramic materials. Contemporary topics in ceramic engineering. Laboratory exercises in preparation and characterization of glasses and advanced ceramics.

MAT E 432. Microelectronics Fabrication Techniques.
(Dual-listed with M S E 532). (Cross-listed with E E). (2-4) Cr. 4. Prereq: PHYS 222, MATH 267. E E 332 or MAT E 334 recommended
Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical-vapor deposition, and etching. Process integration. Process evaluation and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICS and micro-electro-mechanical systems (MEMS).

(2-3) Cr. 3. F. Prereq: MAT E 334

(2-3) Cr. 3. S. Prereq: 214, 216, credit or enrollment in 311

MAT E 444. Corrosion and Failure Analysis.
(2-2) Cr. 3. S. Prereq: MAT E 216 and credit or enrollment in MAT E 418
Corrosion and corrosion control of metallic systems. Corrosion fundamentals, classification of different types of metallic corrosion, corrosion properties of various engineering alloys, corrosion control. Failure analysis. Characteristics of common types of metallic failures, case studies of failures, designing to reduce failure risk.

MAT E 454. Polymer Composites and Processing.
(Dual-listed with M S E 554). (3-0) Cr. 3. S. Prereq: MAT E 351
Basic concepts in polymer composites, blends, and block copolymers. Phase separation and miscibility, microstructures and mechanical behavior. Fiber reinforced and laminated composites. Viscosity, rheology, viscoelasticity of polymers. Polymer melt processing methods such as injection molding and extrusion; selection of suitable processing methods and their applications.

MAT E 455. Biomaterials.
(Dual-listed with M S E 556). (Cross-listed with BIOE). (3-0) Cr. 3. F. Prereq: MAT E 216 or MAT E 273 or MAT E 392
Presentation of the basic chemical and physical properties of biomaterials, including metals, ceramics, and polymers, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

MAT E 457. Chemical and Physical Metallurgy of Rare Earth Metals.
(Dual-listed with M S E 557), (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: MAT E 311 or CHEM 325 AND CHEM 324 or PHYS 322
Electronic configuration, valence states, minerals, ores, beneficiliation, extraction, separation, metal preparation and purification. Crystal structures, phase transformations and polymorphism, and thermochemical properties of rare earth metals. Chemical properties: inorganic and organometallic compounds, alloy chemistry, nature of the chemical bonding. Physical properties: mechanical and elastic properties, magnetic properties, resistivity, and superconductivity.

MAT E 466. Multidisciplinary Engineering Design.
(Cross-listed with A B E, AER E, CPR E, E E, ENGR, I E, M E). (1-4) Cr. 3. Repeatable. F. S. Prereq: Student must be within two semesters of graduation and receive permission of the instructor
Application of team design concepts to projects of a multidisciplinary nature. Concurrent treatment of design, manufacturing and life cycle considerations. Application of design tools such as CAD, CAM, and FEM. Design methodologies, project scheduling, cost estimating, quality control, manufacturing processes. Development of a prototype and appropriate documentation in the form of written reports, oral presentations, computer models and engineering drawings.

MAT E 467. Multidisciplinary Engineering Design II.
(Cross-listed with AER E, CPR E, E E, ENGR, I E, M E). (1-4) Cr. 3. Repeatable. Maximum of 2 times. F. S. Prereq: Student must be within two semesters of graduation or receive permission of instructor.
Build and test of a conceptual design. Detail design, manufacturability, test criteria and procedures. Application of design tools such as CAD and CAM and manufacturing techniques such as rapid prototyping. Development and testing of a full-scale prototype with appropriate documentation in the form of design journals, written reports, oral presentations and computer models and engineering drawings.

(Dual-listed with M S E 581). (3-0) Cr. 3. F. Prereq: Math 265 and (MatE 311 or CHE 381 or Chem 325 or Phys 304)
Introduction to the basic methods used in the computational modeling and simulation of materials, from atomistic simulations to methods at the mesoscale. Students will be expected to develop and run sample programs. Topics to be covered include, for example, electronic structure calculations, molecular dynamics, Monte Carlo, phase-field methods, etc.

(Dual-listed with M S E 588). (Cross-listed with E E). (3-0) Cr. 3. Alt. F., offered odd-numbered years. Prereq: MATH 265 and (MAT E 216 or MAT E 272 or E E 365)

MAT E 490. Independent Study.
Cr. arr. Repeatable.
Investigation of individual research or special topics.

MAT E 498. Cooperative Education.
Cr. R. Repeatable. F. S. S. Prereq: MAT E 398, permission of department and Engineering Career Services
Third and subsequent professional work periods in the cooperative education program. Students must register for this course before commencing work.

Materials Science and Engineering Graduate Study
The department offers work toward the following advanced degrees: Master of Engineering in Materials Science and Engineering, Master of Science in Materials Science and Engineering and Doctor of Philosophy in Materials Science and Engineering.
Built on a foundation of thermodynamics, kinetics of phase transformations, mechanical behavior, physical properties, solid state science, and the structure and chemistry of materials, the graduate program offers advanced studies in many areas of materials science and engineering, including the design and control of materials for structural, electronic, photonic, magnetic, optical, and biological functionality. Graduates of the program have a fundamental understanding of the critical aspects of the field and how they are applied to real materials systems. The program is highly flexible and research-oriented, where students work carefully with their major professor in tailoring the various academic and research components to meet their interests.

With the ability to address complex problems in materials science while considering the various constraints inherent to both academic and industrial environments, our graduates are well prepared for a wide range of academic and research-related careers. They are skilled in carrying out independent and collaborative research, able to communicate effectively in formal and informal settings, and are proficient at writing persuasive technical articles and grant proposals.

The department boasts excellent facilities for academic materials research, maintaining a wide range of faculty laboratories across the ISU campus. In addition, departmental research is highly integrated with the operation of several Research Centers, such as the Ames Laboratory, the Center for Nondestructive Evaluation, the Microelectronics Research Center, and the Center for Advanced Technology Development. These laboratories offer excellent resources and opportunities for graduate student research.

Prerequisite to major graduate work is completion of an undergraduate curriculum in physical science, biological science, or engineering discipline. Graduate students from disciplines other than materials science and engineering may expect that supplemental coursework will be needed, in addition to the required graduate coursework. Well qualified students (juniors) enrolled in the undergraduate materials engineering program at Iowa State University can apply to the Graduate College for admission to the concurrent enrollment program, where students may simultaneously pursue both master of science and bachelor of science degrees.

The requirements for the M. Eng., M.S. and Ph.D. degrees are established by the student’s program of study committee within the established guidelines of the Graduate College. Minimum requirements include coursework, research (M.S. and Ph.D. only), proposal (M.S. and Ph.D. only), preliminary oral examination (Ph.D. only), dissertation (M.S. and Ph.D. only), and a final oral examination (M.S. and Ph.D. only). Academic coursework requirements include 31 credits for the M.Eng. degree, 21 credits for the M.S. degree and 32 credits for the Ph.D., with additional specific rules for choices available from the department.

There are no foreign language requirements for any of the graduate degrees administered by the Department of Materials Science and Engineering. Graduate students wishing to declare a minor in materials science and engineering will have at least one materials science and engineering faculty member serving on their program of study committee. For the M. Eng., M.S. and Ph.D. degrees, they will take a minimum of 8 materials science and engineering course credits for the M. Engr. or M.S. degrees and a minimum of 12 materials science and engineering course credits for the Ph.D. degree.

Courses primarily for graduate students, open to qualified undergraduates:

M S E 510. Fundamentals of Structure and Chemistry of Materials. (3-0) Cr. 3. F. prerequisite: MATH 165, PHYS 221, and CHEM 167

M S E 519. Magnetism and Magnetic Materials. (Cross-listed with E E). (3-0) Cr. 3. F. prerequisite: E E 311, MAT E 211 or E E 271 or E E 272 or PHYS 364

M S E 520. Thermodynamics and Kinetics in Multicomponent Materials. (3-0) Cr. 3. F. prerequisite: MAT E 311 or CHEM 321, MATH 266 or MATH 267

A review of the fundamental principles of heat, work, basic thermodynamic relations, and criteria for equilibrium. Analytical treatments for the thermodynamic description of multicomponent chemical solutions and reacting systems are developed and employed to predict phase equilibria in materials systems. Builds on the thermodynamic construction to treat the kinetics of chemical reactions and phase transformations. Topics include general first order and second order transitions, along with chemical diffusion. Detailed examples involving nucleation and diffusion limited growth, spinodal decomposition, martensitic transformations, magnetic and electric transitions, and glass formation will be considered.

M S E 521. Mechanical Behavior and Manufacturing of Polymers and Composites. (Cross-listed with M E), (3-0) Cr. 3. Alt. S., offered odd-numbered years. Prerequisite: M E 324 or MAT E 272 and M E 324

M S E 530. Solid State Science. (3-0) Cr. 3. S. prerequisite: MAT E 334 or E E 332 or PHYS 322

M S E 532. Microelectronics Fabrication Techniques. (Dual-listed with MAT E 432), (2-4) Cr. 4. Prerequisite: PHYS 222, MATH 267, E E 332 or MAT E 334 recommended

Techniques used in modern integrated circuit fabrication, including diffusion, oxidation, ion implantation, lithography, evaporation, sputtering, chemical vapor deposition, and etching. Process integration, Process qualification and final device testing. Extensive laboratory exercises utilizing fabrication methods to build electronic devices. Use of computer simulation tools for predicting processing outcomes. Recent advances in processing CMOS ICs and micro-electro-mechanical systems (MEMS).

M S E 539. Electronic Properties of Materials. (Cross-listed with E E). (3-0) Cr. 3. Prerequisite: E E 332 or MAT E 331 or PHYS 322

Review of classical and quantum mechanical descriptions of electrons in solids, band theory, metallic conduction, lattice vibrations, semiconductors, semiconducting devices, dielectrics, polarization, dielectric relaxation, crystal anisotropy, ferroelectricity, piezoelectricity, superconductivity, magnetism, device applications.

M S E 540. Mechanical Behavior of Materials. (3-0) Cr. 3. F. Prerequisite: MAT E 418, MATH 266 or MATH 267

Mechanical behavior of materials with emphasis on micromechanics of deformation in three generic regimes: elasticity, plasticity, and fracture. A materials science approach is followed to understand and model the mechanical behavior that combines continuum mechanics, thermodynamics, kinetics, and microstructure. Some topics include elastic properties of materials, permanent deformation mechanisms at different temperatures (e.g., via dislocation motion and creep), and fracture in ductile and brittle materials. Specific classes of materials that are studied: metals, ceramics, polymers, glasses and composites.

M S E 550. Fundamentals of Nondestructive Evaluation. (Cross-listed with E E). (3-0) Cr. 4. S. Prerequisite: E E 334, MATH 385

Principles of five basic NDE methods and their application in engineering inspections. Materials behavior and simple failure analysis. NDE reliability, and damage-tolerant design. Advanced methods such as acoustic microscopy, laser ultrasonics, thermal waves, computed tomography, and thermoelectric analysis are analyzed. Laboratory experiments on all basic methods: ultrasonics, eddy currents, X-ray, liquid penetrants, magnetic testing, and visual inspection are performed.

M S E 551. Characterization Methods in Materials Science. (2-3) Cr. 3. Alt. S., offered odd-numbered years. Prerequisite: MAT E 214

Characterization of ceramic, metal, polymer and glassy materials using modern analytical techniques, Spectroscopic (IR, Raman, UV/VIS/NIR, and NMR), thermal (DSC, DTA/TGA, and DMA) methods, mechanical and rheological testing, magnetic and electrical characterization, and powder characterization.
(2-3) Cr. 3. F. Prereq: PHYS 222

M S E 554. Polymer Composites and Processing.
(Dual-listed with MAT E 454). (3-0) Cr. 3. S. Prereq: MAT E 351
Basic concepts in polymer composites, blends, and block copolymers. Phase separation and miscibility, microstructures and mechanical behavior. Fiber reinforced and laminated composites. Viscosity, rheology, viscoelasticity of polymers. Polymer melt processing methods such as injection molding and extrusion; selection of suitable processing methods and their applications.

M S E 556. Biomaterials.
(Dual-listed with MAT E 456). (3-0) Cr. 3. F. Prereq: MAT E 216 or MAT E 273 or MAT E 392
Presentation of the basic chemical and physical properties of biomaterials, including metals, ceramics, and polymers, as they are related to their manipulation by the engineer for incorporation into living systems. Role of microstructure properties in the choice of biomaterials and design of artificial organs, implants, and prostheses.

M S E 557. Chemical and Physical Metallurgy of Rare Earth Metals.
(Dual-listed with MAT E 457), (3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: MAT E 311 or CHEM 325 AND CHEM 324 or PHYS 322
Electronic configuration, valence states, minerals, ores, beneficiation, extraction, separation, metal preparation and purification. Crystal structures, phase transformations and polymorphism, and thermochemical properties of rare earth metals. Chemical properties: inorganic and organometallic compounds, alloy chemistry, nature of the chemical bonding. Physical properties: mechanical and elastic properties, magnetic properties, resistivity, and superconductivity.

M S E 564. Fracture and Fatigue.
(Cross-listed with AER E, E M, E E). (3-0) Cr. 3. Alt., offered even-numbered years. Prereq: E M 324 and either MAT E 216 or MAT E 273 or MAT E 392.
Undergraduates: Permission of instructor
Materials and mechanisms approach to fracture and fatigue. Fracture mechanics, brittle and ductile fracture, fracture and fatigue characteristics, fracture of thin-films and layered structures. Fracture and fatigue tests, mechanics and materials designed to avoid fracture or fatigue.

(Cross-listed with AER E, E M, E E). (3-0) Cr. 3. Alt., offered even-numbered years. Prereq: E M 324

M S E 570. Toying With Technology for Practicing Teachers.
(Cross-listed with C I). (2-0) Cr. 2. SS. Prereq: C I 201 or 202 or 505 or equivalent
A project-based, hands-on learning course. Technology literacy, appreciation for technological innovations, principles behind many technological innovations, hands-on experiences based upon simple systems constructed out of LEGO's and controlled by small microcomputers. Other technological advances with K-12 applications will be explored. K-12 teachers will leave the course with complete lesson plans for use in their classrooms.

(Dual-listed with MAT E 481). (3-0) Cr. 3. F. Prereq: Math 265 and (MatE 311 or CHE 381 or Chem 325 or Phys 304)
Introduction to the basic methods used in the computational modeling and simulation of materials, from atomistic simulations to methods at the mesoscale. Students will be expected to develop and run sample programs. Topics to be covered include, for example, electronic structure calculations, molecular dynamics, Monte Carlo, phase-field methods, etc.

(Dual-listed with MAT E 488). (Cross-listed with E E). (3-0) Cr. 3. Alt., F., offered odd-numbered years. Prereq: MATH 265 and (MAT E 216 or MAT E 272 or E E 311 or PHYS 364)
Electromagnetic fields of various eddy current probes. Probe field interaction with conductors, cracks and other material defects. Ferromagnetic materials. Layered conductors. Elementary inversion of probe signals to characterize defects. Special techniques including remote-field, transient, potential drop nondestructive evaluation and the use of Hall sensors. Practical assignments using a virtual eddy current instrument will demonstrate key concepts.

M S E 590. Special Topics.
Cr. arr. Repeatable. Prereq: Permission of instructor

M S E 599. Creative Component.
Cr. arr. Repeatable.

Courses for graduate students:

(1-0) Cr. 1. Repeatable. F.S. Prereq: MSE Graduate Student Status
Seminar course - presentations given on a weekly basis by leading U.S. and International researchers that are experts in their respective fields closely related to Materials Science.

(2-0) Cr. 2. Repeatable. S. Prereq: Permission of instructor
Provides instruction and directed experience in undergraduate level teaching practices. Students engage in lesson planning, classroom/laboratory teaching, student and course assessment, web-based lessons, and other aspects of academic course delivery.

(3-0) Cr. 3. Alt. S., offered even-numbered years. Prereq: M S E 520
Explores various advanced theoretical treatments of the energetics and kinetics of multicomponent materials. Topics include analytical and computational descriptions of thermodynamic quantities, experimental measurement of essential physical properties, analytical and computational treatments of kinetic processes, and the use of theoretical predictions of phase equilibria and evolution in materials systems.

(3-0) Cr. 3. Alt. F., offered even-numbered years. Prereq: M S E 530
Advanced course in the behavior of solids within the framework of solid state physics and chemistry. Includes magnetic, dielectric, transport, and optical phenomena in solids. Influence of phase transformations and crystal symmetry on the physical properties.

(3-0) Cr. 3. Alt. S., offered odd-numbered years. Prereq: M S E 510

M S E 690. Advanced Topics in Materials Science.
Cr. arr. Repeatable. Prereq: Permission of instructor

Cr. R. Repeatable. F.S. SS. Prereq: Permission of department, graduate classification
One semester and one summer maximum per academic year professional work period. Offered on a satisfactory-fail basis only.

Cr. arr. Repeatable.

Mechanical Engineering
Undergraduate Study

For the undergraduate curriculum in mechanical engineering leading to the degree of bachelor of science. This curriculum is accredited under the General Criteria and Mechanical Engineering Program Criteria by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

Mechanical engineers apply the principles of motion, energy, and force to create mechanical solutions to technological problems, thereby realizing designs and systems that make life better. About one-fifth of all engineers practicing today are mechanical engineers. Their skills are used in research, development, design, testing, production, technical sales, technical management, as well as medicine, law, and business. Mechanical engineers are characterized by personal creativity, breadth of knowledge, and versatility. For these reasons they are found to function and thrive as valuable members and leaders of multidisciplinary teams. Mechanical engineers are employed in a wide range of industries; examples include agricultural/heavy equipment, biomedical, consulting, energy and power, manufacturing, product design and transportation.
The mechanical engineering curriculum at Iowa State University is dedicated to preparing students for productive careers in the state, nation, and the world and has the following objectives:

1. Graduates will have utilized a foundation in engineering and science to improve lives and livelihoods through a successful career in mechanical engineering or other fields.
2. Graduates will have developed effective collaborateurs and innovators, leading or participating in efforts to address social, technical and business challenges.
3. Graduates will have engaged in life-long learning and professional development through self-study, continuing education or graduate and professional studies in engineering, business, law or medicine.

The mechanical engineering curriculum is organized to provide students with a broad foundation in mathematics, science, engineering, social science and humanities. The mechanical engineering disciplinary areas emphasized are design and optimization, dynamic systems and control, materials processing and mechanics, and thermo-fluid sciences. Elective courses provide additional emphasis in terms of the student’s unique educational goals, whether they include immediate entry into industry or further professional or graduate study.

A major focus throughout the mechanical engineering curriculum is a series of experiences that emphasize engineering design, culminating in a capstone design experience in the senior year. Students will develop engineering judgment through open-ended problems that require establishment of reasonable engineering assumptions and realistic constraints. Development of skills needed to be independent, creative thinkers, effective communicators, and contributing team members is emphasized throughout the curriculum. Students also develop an understanding of the societal context in which they will practice engineering, including environmental, legal, aesthetic, and human aspects.

Students are encouraged to participate in the cooperative education program or to obtain engineering internships, both domestically and abroad. Study abroad is encouraged, and the department has exchange programs with several universities around the world. These experiences help students to round out their education and to better prepare for careers in the increasingly global practice of engineering.

**Energy Systems Minor**

http://www.me.iastate.edu/energy-systems-minor/

The Energy Systems Minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following courses. The complete list of approved elective courses can be found here (http://www.me.iastate.edu/energy-systems-minor/).

**Required courses**

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

**Graduate Study**

The department offers programs for the degrees Master of Engineering (M. Eng.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) with a major in mechanical engineering. The M.Eng. degree is a coursework-only degree designed to improve professional expertise in mechanical engineering. The M.S. and Ph.D. degrees are designed to improve the student’s capability to conduct research as well as their professional expertise. Although co-major and formal minor programs are not offered in mechanical engineering, courses may be used for minor work by students taking major work in other departments.

Well-qualified juniors and seniors in mechanical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Graduate Programs Office and on the department’s website (http://www.me.iastate.edu/).

The graduate program offers advanced study in a variety of thrust areas, including biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization.

The department offers students the opportunity to broaden their education by participating in minor programs in established departments, interdepartmental programs, or other experiences as approved by their program of study committees.

The requirements for advanced degrees are established by the student’s program of study committee within established guidelines of the Graduate College.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduate students in the department can expect that additional supporting coursework will be required.

Program requirements can be found on the department webpage (http://www.me.iastate.edu/) and in the Mechanical Engineering Graduate Student Handbook.

**Curriculum in Mechanical Engineering**

Transfer Credit Requirements

The Mechanical Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program. The degree program must include a minimum of 15 credits taken from courses offered through the Mechanical Engineering Department at Iowa State University. Of these 15 credits, three must be from one of the senior capstone design courses. The remaining 12 credits may be from the core curriculum program (if a student is deficient in these courses) or from 400-level M E technical electives. No more than 3 credits of independent study shall be applied to meet the 12 credit requirement.

See also: A 4-year plan of study grid showing course template by semester.

Courses primarily for undergraduates:

M E 160. Mechanical Engineering Problem Solving with Computer Applications. (2-2) Cr. 3. F.S. Prereq: MATH 142 or satisfactory scores on Mathematics placement examinations; credit or enrollment in MATH 165. Introduction to the field of Mechanical Engineering through problem-solving in a range of topics including statics, mechanics of materials and thermo-fluids. Techniques to professionally present and communicate solutions. Use of MATLAB computer programming to aid problem solving, including curve fitting and graphing. Only one of M E 160, ENGR 160, AER E 160, C E 160, C P R E 185, E E 185, E E 185, S E 185 and I E 148 may count towards graduation.

M E 170. Engineering Graphics and Introductory Design. (2-2) Cr. 3. F.S. Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 142. Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports. Freehand and computer methods.

M E 190. Learning Communities. (1-0) Cr. 1. Repeatable. F.S. Enrollment in M E learning communities.

M E 220. Globalization and Sustainability. (Cross-listed with ANTHR, ENV S, GLOBE, MAT E, SOC, T SC). (3-0) Cr. 3. F.S. An introduction to understanding the key global issues in sustainability. Focuses on interconnected roles of energy, materials, human resources, economics, and technology in building and maintaining sustainable systems. Applications discussed will include challenges in both the developed and developing world and will examine the role of technology in a resource-constrained world. Cannot be used for technical elective credit in any engineering department. Meets International Perspectives Requirement.

M E 231. Engineering Thermodynamics I. (3-0) Cr. 3. F.S. Prereq: MATH 265, CHEM 167, PHYS 222. Fundamental concepts based on zeroth, first and second laws of thermodynamics. Properties and processes for ideal gases and solid-liquid-vapor phases of pure substances. Applications to vapor power cycles. Credit for either M E 231 or 330, but not both, may be applied toward graduation.

M E 270. Introduction to Mechanical Engineering Design. (1-6) Cr. 3. F.S. Prereq: M E 170 or equivalent, PHYS 221. Overview of mechanical engineering design with applications to thermal and mechanical systems. Introduction to current design practices used in industry. Semester-long team project focused on addressing societal needs. Past projects include designing human powered charging systems and products for developing nations.

M E 298. Cooperative Education. Cr. R. F.S.S. Prereq: Permission of department. First professional work period in the cooperative education program. Students must register for this course before commencing work.

Laboratory exercises in metrology, mechanical testing (tensile/compression and hardness tests), computer aided design (CAD), machining operations, metal welding, metal casting, and bulk sheet metal forming.

**M E 325. Mechanical Component Design.**  
(3-0) Cr. 3. F.S.SS. Prereq: M E 170, E M 324, STAT 305  
Philosophy of design and design methodology. Consideration of stresses and failure models useful for static and fatigue loading. Analysis, selection and synthesis of machine elements.

**M E 332. Engineering Thermodynamics II.**  
(3-0) Cr. 3. F.S.SS. Prereq: M E 231  
Gas power cycles. Fundamentals of gas mixtures, psychrometry, and thermochemistry. Applications to one-dimensional compressible flow, refrigeration, air conditioning and combustion processes.

**M E 335. Fluid Flow.**  
(3-2) Cr. 4. F.S.SS. Prereq: Credit or enrollment in M E 332, E M 345, MATH 266 or MATH 267  
Incompressible and compressible fluid flow fundamentals. Dimensional analysis and similitude. Internal and external flow applications. Lab experiments emphasizing concepts in thermodynamics and fluid flow. Written reports are required.

**M E 370. Engineering Measurements.**  
(2-3) Cr. 3. F.S.SS. Prereq: E E 442, STAT 305  
Fundamentals of design, selection, and operation of components of measuring systems. Measurement processes, data acquisition systems, analysis of data, and propagation of measurement uncertainty.

**M E 386. Sustainable Engineering and International Development.**  
(Cross-listed with A B E, C E, E E, MAT E). (2-2) Cr. 3. F. Prereq: Junior classification in engineering  
Multi-disciplinary approach to sustainable engineering and international development, sustainable development, appropriate design and engineering, feasibility analysis, international aid, business development, philosophy and politics of technology, and ethics in engineering. Engineering-based projects from problem formulation through implementation. Interactions with partner community organizations or international partners such as nongovernment organizations (NGOs). Course readings, final project/design report. Meets International Perspectives Requirement.

**M E 389. Applied Methods in Sustainable Engineering.**  
(Cross-listed with MAT E). (3-0) Cr. 3. Repeatable, maximum of 2 times. SS.  
Learning how to work in a cross disciplinary engineering team to develop and implement appropriate solutions for cooking, lighting, farming, and sanitation in a rural village in Mali. Engineering principles necessary for the projects to be worked on including lighting solutions in a village without electricity, new construction materials, water, etc. Application of engineering principles from core courses. Design conception, feasibility, production, and implementation within context of local cultures and needs. Emphasis on creating real solutions that can be implemented with the constraints imposed by cost, time, manufacturing capability, and culture. Meets International Perspectives Requirement.

**M E 396. Summer Internship.**  
Cr. R. Repeatable. SS. Prereq: Permission of department and Engineering Career Services  
Summer professional work period.

**M E 397. Engineering Internship.**  
Cr. R. Repeatable. F.S. Prereq: Permission of department and Engineering Career Services  
Professional work period, one semester maximum per academic year.

**M E 398. Cooperative Education.**  
Cr. R. F.S.SS. Prereq: M E 298, permission of department and Engineering Career Services  
Second professional work period in the cooperative education program. Students must register for this course before commencing work.

**M E 410. Mechanical Engineering Applications of Mechatronics.**  
(2-2) Cr. 3. S. Prereq: E E 442, E E 448, credit or enrollment in M E 421  
Fundamentals of sensor characterization, signal conditioning and motion control, coupled with concepts of embedded computer control. Digital and analog components used for interfacing with computer controlled systems. Mechanical system analysis combined with various control approaches. Focus on automation of hydraulic actuation processes. Laboratory experiences provide hands-on development of mechanical systems.

**M E 411. Automatic Controls.**  
(2-2) Cr. 3. S. Prereq: M E 421  
Methods and principles of automatic control. Pneumatic, hydraulic, and electrical systems. Representative applications of automatic control systems. Mathematical analysis of control systems.

**M E 412. Ethical Responsibilities of a Practicing Engineer.**  
(3-0) Cr. 3. F. Prereq: Credit or enrollment in M E 325  
The study of ethics in engineering design and the engineering profession. A comprehensive look at when ethical decisions must be made and an approach to make them. The approach takes into account moral, legal, technical, experiential, and standards to aid in ethical decision making. Each area will be studied through lectures, debates, guest speakers, class discussion, and case studies.

**M E 413. Fluid Power Engineering.**  
(Cross-listed with A B E). (2-2) Cr. 3. F. Prereq: Credit or enrollment in E M 378 or M E 335, A B E 216 or M E 270  

**M E 415. Mechanical Systems Design.**  
(0-6) Cr. 3. F. S. Prereq: M E 324, M E 325  
Mechanical Engineering Capstone Design course. Team approach to solving design problems involving mechanical systems. Teams will use current design practices they will encounter in industry. Document decisions concerning form and function, material specification, manufacturing methods, safety, cost, and conformance with codes and standards. Solution description includes oral and written reports. Projects often worked with industry sponsors.

**M E 417. Advanced Machine Design.**  
(Dual-listed with M E 517). (3-0) Cr. 3. S. Prereq: M E 325, MAT E 273  
Stress life, strain life, and fracture mechanics approaches to fatigue life and design with metals, polymers and ceramics. Introduction to material selection in design of machine components. Thermal and structural considerations in design of machine components and hybrid materials. Course project and relevant literature review required for graduate credit.

**M E 418. Mechanical Considerations in Robotics.**  
(Dual-listed with M E 518). (3-0) Cr. 3. S. Prereq: Credit or enrollment in M E 421  
Three dimensional kinematics, dynamics, and control of robot manipulators, hardware elements and sensors. Laboratory experiments using industrial robots.

**M E 419. Computer-Aided Design.**  
(3-0) Cr. 3. F. Prereq: M E 325  
Theory and applications of computer-aided design. Computer graphics programming, solid modeling, assembly modeling, and finite element modeling. Mechanical simulation, process engineering, rapid prototyping and manufacturing integration.

**M E 421. System Dynamics and Control.**  
(3-2) Cr. 4. F.S.SS. Prereq: E E 442, E E 448, E M 345, MATH 267  
Modeling and simulation of mechanical, electrical, fluid, and/or thermal systems. Development of equations of motion and dynamic response characteristics in time and frequency domains. Fundamentals of classical control applications, including mathematical analysis and design for closed loop control systems. Introduction to computer interfacing for simulation, data acquisition, and control. Laboratory exercises for hands-on system investigation and control implementation.

**M E 423. Creativity and Imagination for Engineering and Design.**  
(Dual-listed with M E 523). (3-0) Cr. 3. F. Prereq: Graduate classification  
Broad exposure to the study of creativity, both in scientific research and in engineering design practice. Exploration of the subject includes readings from a variety of fields: in-class discussion and activities; and individual and team projects that enable students to develop their creativity. Graduate students also will do independent research on creativity and develop a related teaching module.

**M E 425. Optimization Methods for Complex Designs.**  
(Dual-listed with M E 525). (3-0) Cr. 3. S. Prereq: M E 160, MATH 265  
Optimization involves finding the ‘best’ according to specified criteria. Review of a range of optimization methods from traditional nonlinear to modern evolutionary methods such as Genetic algorithms. Examination of how these methods can be used to solve a wide variety of design problems across disciplines, including mechanical systems design, biomedical device design, biomedical imaging, and interaction with digital medical data. Students will gain knowledge of numerical optimization algorithms and sufficient understanding of the strengths and weaknesses of these algorithms to apply them appropriately in engineering design. Experience includes code writing and off-the-shelf routines. Numerous case-studies of real-world situations in which problems were modeled and solved using advanced optimization techniques.
(3-0) Cr. 3. F. Prereq: PHYS 221/PHYS 222 and CHEM 167
Basic principles, performance, and cost analysis of alternative energy systems including biofuels, bioenergy, wind, solar, fuel cells, storage and other alternative energy systems. Performance analysis and operating principles of systems and components, and economic analysis for system design and operation will be taught. Emphasis is on alternative energy technologies needed to meet our future energy needs at various scales ranging from household to city to national levels.

(3-2) Cr. 4. F.S.SS. Prereq: M E 335

M E 437. Introduction to Combustion Engineering.
(3-0) Cr. 3. S. Prereq: Credit in M E 332 or equivalent and credit or enrollment in M E 335 or equivalent.
Introduction to the fundamentals of combustion and the analysis of combustion systems for gaseous, liquid, and solid fuels-including biomass fuels. Combustion fundamentals are applied to the analysis of engines; turbines, biomass cookstoves; suspension, fixed-bed, and fluidized-bed furnaces; and other combustion devices.

(3-0) Cr. 3. F. Prereq: Credit or enrollment in M E 436
Space conditioning and moist air processes. Application of thermodynamics, heat transfer, and fluid flow principles to the analysis of heating, ventilating, and air conditioning components and systems. Performance and specification of components and systems.

M E 442. Heating and Air Conditioning Design.
(1-5) Cr. 3. S. Prereq: M E 441
Design criteria and assessment of building environment and energy requirements. Design of heating, ventilating, and air conditioning systems. System control and economic analysis. Oral and written reports required.
