All courses meet all day from Monday through Friday. The majority of courses run for 4 weeks. Enrollments in most courses are limited to 8 to 10 students. Courses are taught at the undergraduate (sophomore and junior) and the senior/graduate level. Students obtain one credit for each week (40 hours) in class. One and two week courses are also available, including courses designed especially for teachers. Weather permitting, students normally spend at least part of each day doing field work, either as part of their class work or working on individual or group projects. Because some courses are offered intermittently, the current Iowa Lakeside Laboratory summer brochure or the Lakeside Lab Website (www.lakesidelab.org) should be consulted for the list of courses being offered in a given summer session. The Lakeside Lab Website (www.lakesidelab.org) also contains additional information about the Laboratory and about each course being offered. Research projects by undergraduates, graduate students and faculty can be done either on the campus or at many nearby natural areas. Undergraduate and graduate students are strongly encouraged to do independent projects at Lakeside and graduate students are welcome to use it as a base for their thesis and dissertation research. Laboratory space and other facilities are available for long-term or short-term research projects.

Teaching and research facilities include eight laboratory buildings, a library, and a lecture hall. Living accommodations include cottages, motel-style units, and a large mess hall. All students are encouraged to stay at Lakeside while they are taking courses to take full advantage of its educational, professional, and social life.

Financial Aid

Iowa Lakeside Laboratory Scholarships are available to both undergraduates and graduate students. All scholarships cover room and board. Information about how to apply for Iowa Lakeside Laboratory Scholarships is included on the Website (www.lakesidelab.org). Students should also consult the Student Financial Aid Office for other scholarship, work study, and loan programs for which they are eligible.

Registration

Students can only enroll in Iowa Lakeside Lab courses by submitting an Iowa Lakeside Lab Registration and Scholarship form and Housing form to the Iowa Lakeside Laboratory Administrative Office. These forms are found on the Iowa Lakeside Laboratory Website (www.lakesidelab.org) where they can be submitted online or downloaded. For further information, contact Iowa Lakeside Laboratory 1838 Highway 86 Milford, IA 51351 Phone: (712) 337-3669 FAX: (712) 337-0361 E-Mail: peter-vanderlinden@uiowa.edu Early registration is advisable. Because enrollment in Lakeside courses is limited, students should register before May 1 for the following summer session. Housing is also limited and students must apply for housing or indicate that they plan to live off campus at the time of registration.

Interdisciplinary Programs-Minor

Interdisciplinary programs are administered by more than one college and/or more than one department. Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.

Complex Adaptive Systems

Interdepartmental Graduate Minor

The Complex Adaptive Systems (CAS) minor provides graduate students with an understanding of the interrelationships among the various methodologies often collectively referred to as Artificial Life. Of special importance in the program is the interplay of biological principles and computer simulations in various fields including Economics, Engineering, Mathematics, and Biology.

Graduates understand the ways in which artificial life techniques may be applied to their major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of artificial life techniques. Students who complete a minor in this graduate program are able to describe and report on various artificial life techniques as applied to many fields, even outside their own field of application.

Work in the CAS minor is offered for students pursuing any graduate degree. The primary cooperating departments are Economics; Computer Science; Electrical and Computer Engineering; Mechanical Engineering; Mathematics; Psychology; Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology.

Each student’s Masters Program of Study (POS) must include at least 9 CAS relevant course credits chosen in consultation with the student’s POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503 Complex Adaptive Systems Concepts and Techniques. Each student’s Ph.D. POS must include at least 12 CAS relevant courses credits chosen in consultation with the student’s POS committee and the CAS program, plus two credits (one credit each time taken) of the CAS seminar and three credits of CAS 503 Complex Adaptive Systems Concepts and Techniques. Ph.D. students who also minored in CAS at the master’s level must take one additional CAS relevant course (3 cr.) and two additional credits of CAS seminar. Courses that satisfy CAS requirements may also be used to satisfy major requirements if such “double counting” is acceptable to the major program.

Interested students may contact the chairperson of the advisory committee for complete lists of courses and of CAS faculty members.

Entrepreneurial Studies

Interdepartmental Undergraduate Minor

Entrepreneurial Studies is an interdisciplinary program that provides opportunities to students to learn about entrepreneurship—the process of creating value through recognizing and developing opportunities. It serves to complement the student’s major area of study, in any college, by offering a means of putting theory and science into practice. The goal of the Entrepreneurial Studies program is to provide the knowledge and skills needed to create value through recognizing and developing opportunities. In addition to feasibility analysis and business planning, the program deals with the topics of innovation, opportunity recognition, technology transfer, industry analysis, and competitive strategy. Although the program introduces some fundamental concepts from accounting, finance, marketing, and management, it does not attempt to substitute for any business courses in these areas.

A minor in entrepreneurial studies is available to all undergraduate students at ISU. Students must follow college specific rules in selecting courses. The college representatives to the supervisory committee will be responsible for advising students in their college, and will inform students about the details of the college rules.

A student seeking a minor in entrepreneurial studies must successfully complete a minimum of 15 credits in courses approved for use in the entrepreneurial studies program, including:

MGMT 310 Entrepreneurship and Innovation 3
MGMT 313 Feasibility Analysis and Business Planning 3
Or MGMT 410X Social Entrepreneurship (Experimental Course)

MGMT 310 Entrepreneurship and Innovation is the introductory course and provides an overview of the entire field.

MGMT 313 Feasibility Analysis and Business Planning emphasizes developing an idea for a new venture, conducting a feasibility study, researching the potential market, analyzing the competition, and preparing a formal business plan. Students take two entrepreneurship-oriented electives (6 cr.) from an approved course list and must also take 3 cr. of experiential learning. Up to six of the 15 credits required for the minor may also be used in the student’s required program of study. Detailed information about the minor and the list of approved electives is available online at http://www.business.iastate.edu.

Graduate Certificate

An interdisciplinary graduate certificate in entrepreneurship and innovation is available to post-graduate students from any discipline. The program provides students an opportunity to learn about entrepreneurship, innovation, and the new venture creation process and to develop business skills that can be used to start a business. The program is flexible so that students can design a program that provides core entrepreneurship education through one required business management course as well as discipline-specific training from entrepreneurship courses in other colleges. The certificate program is taught at a distance using computer-based instructional media.
Sustainability Minor

Sustainability is often defined as “meeting the needs of today without compromising the ability of future generations to meet their own needs.” The minor in sustainability at Iowa State University is available to any ISU student who wants to further learn about sustainability issues affecting humans today and in the future.

The interdisciplinary minor in sustainability exposes students to ideas and issues related to a sustainable, balanced and ethical future for the planet and its inhabitants. The minor is at the interplay between environmental, social and economic factors in improving the quality of human life within the capacity of supporting ecosystems.

The minor will help students understand the dynamics of biological population growth and decline in the natural world, predator-prey models, over-exploitation of natural resources, energy balances, and much more. Students also will learn how human behavior affects the natural world and the ability of earth to sustain life.

In addition, students in the minor will understand how the decisions they make as consumers, workers, resource owners, citizens and policymakers affect human welfare in this and future generations. Students also will be able to articulate why some environmental, social and economic profiles are sustainable and others are not.

The minor will provide students knowledge sufficient to apply sustainable practices in their personal and professional lives.

The colleges of Agriculture and Life Sciences, Design, Engineering, and Liberal Arts and Sciences sponsor the minor in sustainability.

Total Credits: 15

At least 9 of the 15 credits must be in courses numbered 300 or above. Because technology and social change is an interdisciplinary study, minor programs must include coursework in at least two departments. Students seeking a minor should develop a specific program of courses either with the T SC faculty representative in their department or with the T SC coordinator. The student’s minor program must be approved by the T SC program coordinator.

Graduate Study

The graduate minor in technology and social change is a cross-disciplinary program that enables students to study the interactions between technologies and their users, on both societal and individual levels. The minor strengthens the ability of students to apply differing perspectives in understanding the effects of the global exchange of technologies and to heighten their sensitivity to the institutional and sociocultural issues attending the use of technology to improve people’s lives.

Students choosing to minor in technology and social change will pursue a degree program in the major department. In consultation with their major professor, students are to identify a T SC Faculty member to serve on the committee guiding their program of study. This T SC Faculty member must be on the Graduate faculty and must be from a discipline outside the major field of study. With the agreement of the POS committee, the student declaring a minor in T SC will select a group of courses from the list of T SC approved courses available through the program coordinators. For the master’s degree, this group should be at least 9 credits; for a doctoral degree, the group should be at least 15 credits. In either case, T SC 543 Technological Innovation, Social Change, and Development is required. Students may not include in their minor any courses from their own...
Wind Energy

The wind energy minor is primarily intended for students majoring in engineering or atmospheric sciences, but is available to all that meet the prerequisites, Math 166 and Physics 222. The minor is comprised of 15 credits, of which 6 are required of all students obtaining the minor. As per the University Catalog, at least 9 credits cannot be used to satisfy any other degree, program or University requirement.

Importance of Wind Energy Minor
Wind energy is a pivotal component of our nation’s future energy portfolio, particularly given the desire to reduce the carbon footprint through the use of renewables. The Midwest region is among the richest wind regions in the nation, with Iowa being the second leading state in the nation as measured by installed wind capacity of 3670 MW, after Texas. This minor will help provide this industry (planners, manufacturers, developers, utilities, and maintenance providers) with technical students with the knowledge and understanding of the science, engineering and policy of wind energy.

Student Learning Outcomes
The objectives of the proposed Minor are to provide a broad understanding of the wind energy industry from component design and manufacturing, electric generation, transmission, and grid operations, to policy.

• Communicate objectives of a long-term national energy portfolio and how wind energy will contribute to meeting those objectives
• Understand the wind energy systems and design tradeoffs for the large components (e.g., blade, turbine, tower, and foundation)
• Manufacturing and supply chain considerations for economic production.
• Identify problems and potential solutions associated with integrating high wind penetrations into the electric grid.
• Communicate most significant reliability problems for wind turbines and be conversant with related monitoring technologies and maintenance methods to address them.
• Identify effects of existing and potential policies on wind energy growth

Learning outcomes will be assessed using tests, quizzes, homework and term papers.

Latin American Studies

Interdepartmental undergraduate program

The certificate in Latin American Studies is a cross-disciplinary course of study in the College of Liberal Arts and Sciences and is designed for undergraduates in any major who wish to enhance their degree and employment possibilities by adding expertise in Latin America and competence in the Spanish language.

Objectives

- Provide opportunities for students to develop skills and understanding about issues concerning Latin America by bringing them into contact with faculty members from many different academic backgrounds.
- Provide students with an international immersion experience where they gain cultural awareness and sensitivity.
- Prepare students for work or advanced study in Latin America, such as in foreign service, journalism, advocacy organizations, scientific or research institutions.
- Help students acquire proficiency in one of the principal languages of Latin America (Spanish).
- Guide students in interdisciplinary study leading to an understanding of the multi-faceted picture of the past, present, and future of Latin America.

Learning Outcomes

Upon completion of the Certificate in Latin American Studies, students will be able to:

- Demonstrate understanding of key concepts pertaining to Latin American cultural, historical and political events.
- Understand, interpret and articulate the major processes, theories and problems of selected contemporary and historical issues in Latin America.
- Demonstrate oral, aural, and written proficiency in Spanish equivalent to the mid-advanced level.
- Effectively communicate with persons of Latin American cultures.
- Become effective global citizens through knowledge and comparison of the cultures and issues of the United States and Latin American countries.
- Be able to read Latin American cultural, literary, and historical texts in the target language with comprehension and analytical insight.
- Demonstrate awareness of cultural values, beliefs, and ideologies of the various Latin American countries.
- Demonstrate a thorough knowledge of the geography of the Latin American countries.

General Requirements

Requirements for the Certificate in Latin American Studies are satisfied through formal language instruction and by completing a minimum of 21 credits at the 300 level or above. Students will take coursework in at least three different disciplines and departments (Spanish, Anthropology, and Political Science) with other possible course offerings in LAS, History, Agriculture, and Agronomy.

Course Requirements

Students will complete 6 credits of core courses:

- SPAN 322 (Latin American Civilization) or SPAN 324 (Latin American Today) 3
- ANTHR 323 (Topics in Latin American Anthropology) 3

Students should consult with their adviser for alternative courses in the event a course is not available.

Other Requirements

Students will complete an additional 15 credits selected from the approved list of courses in Latin American Studies or courses approved by the Latin American Studies Certificate adviser at the 300 level or above.

- No more than 3 credits may be taken as a 490, independent study, and the topic must deal with Latin America.
- A minimum of 9 credits applied toward the Certificate cannot be used to meet any other departmental, college, or university requirement.
- Students may receive credit on a pre-approved basis for internships completed in Latin America. No more than 3 credits from this area may be applied to the Certificate.
- Courses taken for the Certificate may not be taken on a pass not-pass basis.
- Credits for a Certificate may be used to satisfy the credit requirement for graduation and to meet the credit requirements for courses numbered 300 and above.
- A certificate is not awarded if the baccalaureate degree is not finished.
- For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree.
- After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate.
- A cumulative grade point average of at least 2.00 is required in courses taken at ISU for a certificate.

Language Requirement

- The minimum requirement in formal language instruction is completion of two years or the equivalent of Spanish at the university level. At ISU the completion of Spanish 202 satisfies this requirement.
- Native speakers, or those with in-field experience of another Latin American language with a level equivalent to 202 or higher can have the language requirement waived. Equivalence will normally be assessed by a faculty member/CLEP exam in the Dept. of World Languages and Cultures.
- While students are encouraged to enroll in language instruction courses (i.e., conversation and composition) above the 300 level, no more than 6 credits of language study (301, 303, 304) may be applied toward fulfilling language requirements for the Certificate. Students should be aware that all 300-level literature and culture/civilization courses in the Dept. of World Languages and Cultures have prerequisites.

Study Abroad

Students are required to participate in an ISU-approved study abroad program in a Latin American country with a minimum duration of 4 consecutive weeks. The Study Abroad Office has a list of ISU-approved programs. Students may elect to participate in other study abroad programs with the approval of the Latin American Studies Advisory Committee.

Approved courses available toward the Certificate:

The decision as to whether or not a course can be counted toward the certificate is based primarily on course title and description as it appears in the current ISU course catalog. Courses which deal primarily with Hispanic or Latina/o cultures in the U.S. will not count toward credit for the Certificate in Latin American Studies. Courses which primarily deal with Spain or Portugal and their cultures also do not count toward the certificate. When in doubt students should consult with the adviser for the Latin American Studies Undergraduate Certificate program.

**Occupational Safety**

**Undergraduate Certificate in Occupational Safety**

The undergraduate certificate in Occupational Safety is designed to meet the needs of the vast majority of professionals who find themselves with management responsibilities (including safety), but are not planning on careers as safety professionals. This Certificate provides them with desired professional development and recognition of their increased professional knowledge and skills in the field of Occupational Safety.

Professionals who have discovered that their career path has resulted in an increased focus on occupational safety, but do not have formal educational training in safety will benefit from a structured safety curriculum. This certificate program prepares professionals, regardless of discipline, to effectively meet expected occupational safety responsibilities.

A professional with an Iowa State University Occupational Safety certificate will strengthen a company's ability to protect their workers from injuries and illnesses. This undergraduate certificate provides a way to give formal recognition of focused study in occupational safety that is less comprehensive than what is required for an undergraduate major.

The Department of Agricultural and Biosystems Engineering, with its nationally ranked education programs, is pleased to offer this Occupational Safety Certificate program to undergraduate students, graduate students, and working professionals. This certificate program is available on campus or entirely online via web-based interactions and streaming media.

Plan of Study-4 year plans

Four Year Graduation Program
Iowa State University’s Soar in 4: Four-Year Graduation Program provides the opportunity for students to take a proactive approach towards completing their undergraduate degree in four years (or eight semesters). Through careful planning with their academic advisers, students can complement their undergraduate degree with experiences such as study abroad, internship, and service learning. By graduating in four years, students can reduce their tuition costs and accelerate their entry into the job market or advanced education compared to students who take more than eight semesters to graduate. The program encourages students to work collaboratively with their academic adviser to make strategic academic decisions about which courses to take each semester.

Students participating in the Soar in 4: Four-Year Graduation Program are expected to:
- Keep in close contact with their Iowa State academic adviser, who will guide students’ academic decisions and keep students up-to-date with university policies and procedures.
- Take required courses at the times they are available.
- Maintain student registration at ISU during off-campus experiences.
- Register for classes promptly and monitor academic progress on a regular basis by reviewing the degree audit and with his/her adviser.

Iowa State University will provide the academic advising services and degree-audit mechanisms to assist students in accurately monitoring progress toward graduation. ISU is also responsible for providing class space in the courses required for the student’s respective major in order to complete a bachelor’s degree within eight consecutive semesters.

Four-year (eight-semester) templates for ISU programs of study
Iowa State University offers over 100 majors in six undergraduate colleges. All but two programs, architecture and landscape architecture, may be completed in four years. ISU’s bachelor degree programs require from 121 to 144 credits; therefore, students must average between 15 and 18 credits per semester. To assist students in creating their own personal four-year academic plans, eight-semester templates are provided for all programs of studies covered by the Soar in 4 program.

To participate in the program
Students can sign up to participate in Soar in 4: Four-Year Graduation Program after consulting with their academic adviser either during orientation or their first-year at Iowa State. A student’s decision on whether to participate is often based on a variety of factors including academic preparation, academic interests, and outside of class commitments. Additional information and the Soar in 4 Four-Year Graduation Plan application form are available from:

Note:
Free electives and specified group electives are chosen to complement the student's "specialized degree option" or other career interest. Lists of courses that satisfy group requirements are maintained in the Animal Science advising offices. Degree options are explained in AN S 100 and through appointments with the student's academic adviser in Animal Science. Specialized options include: General Animal Science, Animal Products, Companion Animal Management, Equine Management, Livestock Management, Pre-Graduate Studies and Pre-Veterinary Medicine.

Students should meet with a Biology Program Adviser to determine the proper plans for chemistry, math and physics before selecting those options above.

Students must have 120 credits minimum to graduate. Students are required to take 21 credits in advanced biology of which 9 credits must be from the Biology Program (BIOL), and 2 advanced BIOL courses must have a lab or field component.

#### Total Credits: 120-122

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (http://www.registrar.iastate.edu/courses/div-ip-guide.html) for a list of approved courses.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS foreign language requirement and any high school unmet admission requirements.

1. Students must pass the School administered English Usage Test (EUT) in accordance with the following guidelines:
   - Students entering the School as freshmen pre-advertising or pre-journalism and mass communications majors, whose entrance is not accompanied by a pre-placement score on the ACT-E of 26 or higher, or an SAT-V score of 590 or higher, will have one calendar year from the start of their first term as a Pre-Advert or Pre-JMC major to meet the requirement for the English Usage Test.

2. Advert majors need a broad-based academic background that the School seeks to ensure by requiring a Designated Area of Concentration (DAC) made up of 21 credits with at least 12 credits from the 300-level or above of coursework outside Greenlee. The DAC is a secondary area of expertise made up of courses selected and designed by the student, with adviser approval, to complement the student’s academic and career interest. A second major outside of Advert or JL MC may substitute for the DAC.

Students must have 120 credits minimum to graduate.
This is only a suggested outline plan. Students may choose or be forced to deviate from this plan to satisfy unmet requirements, for scheduling reasons, or to add a minor or double major. We strongly suggest student involvement in internships, study abroad, summer field stations, Iowa Lakeside Lab, Field Trips in Biology or research opportunities at ISU. These will; enhance your program of study but may add credits or time to your degree plan.

Students are required to take 21 credits in advance biology of which 9 credits must be from the Biology Program, (BIOL), and 2 advanced BIOL courses must have a lab or field component.

* Students should meet with a Biology Program advisor to determine the proper plans for chemistry, math and physics before selecting those options above.

** Math assessment is required. Student not ready for calculus will be enrolled in MATH 142.

Advanced high school chemistry and strong algebra skills are necessary for success in CHEM 201. Math ACT of 24 or greater is strongly recommended.

Students may substitute the following courses, if necessary:

• CHEM 201 for 177 and 178;
• CHEM 177L for 177N or 201L;
• CHEM 331L and 332L for 333L and 334L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
• CHEM 321L for 322L; however this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
• PHYS 111 and 112 for PHYS 221 and 222, however PHYS 221 and 222 are highly recommended.

Required of Chemistry Learning Community Members.

Completion of three years of foreign language in high school fulfills this requirement.

Class offered Fall Semester only.

The LAS General Education requirements for Mathematics majors are 12 credits Arts and Humanities, 8 credits Natural Science, and 9 credits Social Science from the approved lists: http://www.las.iastate.edu/academics/gedaleducation/.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Three of the required 45 300+ level credits must be earned in a general educational group outside the group of your major. Students must also meet the LAS foreign-language requirement and complete any unmet admission requirements.

1. ENG 302, 305, 309, or 314, or JL MC 201.
2. Or other mathematics choice at the 300+ level. But the program must include MATH 301, MATH 414, and one of the two-course sequences 301, 302, 304, 314, 373, 481; 414, 415; or 435, 436.
3. Available Spring semester only.

Discuss with your adviser how the two courses that you select can be applied to address general education requirements. Check for a list of approved courses at: http://www.registrar.iastate.edu/courses/div-ip-guide.html

Students taking CHEM 177 should plan to take CHEM 178 as well.

Students must select at least 9 credits from a list of optional courses.

Students should select a humanities or social science course based on need. If these LAS requirements have been satisfied, students may select a meteorology elective or alternate course. Students should discuss possible alternate course options with their adviser.

1 A placement examination in keyboard skills determines the student’s placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano. Students not required to take four semesters of class piano will take additional music elective credits.

2 Four credits chosen from the following ensembles are required: 111, 113, 115, 141, 151, 161, 191, 321.

3 ENGL 150 requires concurrent enrollment in LIB 160.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (http://www.las.iastate.edu/academics/generaleducation/index.shtml) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. A list of approved courses can be found at: (http://www.registrar.iastate.edu/courses/div-ip-guide.html) The courses taken to meet these requirements may also be used to meet other requirements.

### Total Credits: 147.5-152.5

1. A placement examination in keyboard skills determines the student’s placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano.

2. Students should take the major area (WW or brass) with which they are least familiar first to gain more experience in lab band. However, WW players planning to gain additional skills on a 2nd WW, might choose to take that area first. Non-WW players should take 351 before 352. 358B must be taken concurrently with each tech course (350-355).

3. These courses which appear in the same semester must be taken concurrently.

The LAS world language requirement must be met. The U.S. diversity and international perspectives requirements are automatically met with courses required for this degree option (C I 406 and MUSIC 383). Many general education and education (C I = Curriculum and Instruction) courses can easily be taken in different semesters than indicated as well as summer. Music courses are best kept in the order/semesters indicated (Most music courses are offered on semester each year).

* ENGL 150 requires concurrent enrollment in LIB 160.

The BM degree requires a minimum of 124.5 credits, including a minimum of 45 credits at the 300/400 level. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (http://www.las.iastate.edu/academics/generaleducation/index.shtml) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: (http://www.registrar.iastate.edu/courses/div-ip-guide.html) The courses taken to meet these requirements may also be used to meet other requirements.

**Flexibility in scheduling.** Many general education courses can easily be taken in different semesters than indicated. (Most music courses are offered on semester each year.)

Some advanced theory and history courses (organ major requires 2 of each) are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog at: http://www.music.iastate.edu/info/advising.

About Courses

A-Z Courses
Course Numbers
The courses in each department are numbered from 1 to 699, according to the following groups:

- 1-99 Courses not carrying credit toward a degree (zero credit).
- 100-299 Courses primarily for freshman and sophomore students.
- 300-499 Courses primarily for junior and senior students.
- 500-599 Courses primarily for graduate students, but open to qualified undergraduates.
- 600-699 Courses for graduate students.

Credits and Contact Hours
The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture or recitation per week for the entire 16-week semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes. The Office of the Registrar will maintain a table of faculty-approved credit-contact hour equivalencies for the types of instruction (e.g. lecture, studio, internships, research courses) offered by the institution.

Courses offered for less than a full semester (e.g. summer terms or compressed formats) will fulfill the same contact hour requirements as full-semester courses having the same credit hours. For example, a student enrolled in a one-credit course offered in an 8-week (half-semester) format should expect two hours of lecture and four hours of out of class preparation per week. Similarly, a course offered in hybrid, online, or distance education format is expected to meet the same contact hour requirement, and offer equivalent student-faculty/student-student interaction and class preparation time, as the same course taught in a traditional format.

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture or recitation class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures and recitations. For example, COM S 227 Introduction to Object-oriented Programming is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

The term “Cr. arr.” means that the amount of credit is arranged in advance between the student and the instructor. The credit to be earned depends on the amount of work expected of the student, in accordance with the policy that some combination of teacher-student contact and outside work by the student involving at least three hours per week for the semester is required for each credit.

The term “Cr. R.” means that the course is required in a certain curriculum or as cognate to one or more other courses. It is also used for cooperative education courses and for some optional inspection trips, study tours, and professional development courses for which numerical credit is not granted. An R credit course does not carry numerical credit toward a student’s degree, but it does apply toward the degree. The R credit course is generally listed on the degree program as a requirement for a specific curriculum/major that must be completed prior to graduation. R credit courses may be graded using the A-F grading scale or the satisfactory/fail grading scale. All R credit courses are assigned a numerical value for purposes of enrollment certification. Requests by students to drop an R credit course will be processed as an administrative drop during period 2 and thus will not be counted against the student’s drop limit and will not appear on the student’s transcript. (See Index, Schedule Changes.)

Semester of Offering
Within each course description may be found one or more of the following letters: F. S. S.S., indicating which term—fall, spring, summer session—of the academic year the course is offered. “Alt.” is the abbreviation for alternate. If there is sufficient demand, courses may be offered more frequently than announced. Insufficient demand or unforeseen staffing problems may result in the cancellation of announced offerings. Students are advised to refer to the Schedule of Classes or consult with departments for up-to-date course schedule information.

Course Prerequisite
A prerequisite indicates the specific academic background or general academic maturity considered necessary for the student to be ready to undertake the course. Prerequisites are usually stated in terms of specific courses, but equivalent preparation is usually acceptable. An instructor may, however, direct a student whose background does not meet the stated prerequisite, or its equivalent, to drop the course. Conversely, an instructor may waive the prerequisite for a course for which he or she is responsible. Thus, permission of the instructor is understood to be an alternate to the stated prerequisites in all courses.

It is university policy that the instructor shall inform the students at the beginning of each course if students who have not met the prerequisite requirements must drop the course. Course prerequisites are listed in the Schedule of Classes as well as in the Courses and Programs section of this publication.

Cross-listed Courses
A course, including its complete description, may be listed in two or more departments. The participating department or departments are noted in parentheses. Credit for the course may be obtained through any of the cross-listed departments.

Dual-listed Courses
Dual-listed courses permit undergraduate and graduate students to be in the same class while receiving credit for either undergraduate or graduate level work. Credit in the graduate course is not available to students who have received credit in the corresponding undergraduate course. Both graduates and undergraduates receive the same amount of credit for the course, but additional work is required of all graduate students taking the course under the graduate-level course number. This extra work may take the form of additional reading, projects, examinations, or other assignments as determined by the instructor. The instructor must be a member of the Graduate Faculty or a Graduate Lecturer. Each dual-listed course is designated in the catalog with the phrase “Dual-listed with,” although the student’s official transcript of credits, both graduate and undergraduate, does not identify dual-listed courses as such. There is a limit to the number of dual-listed course credits that may be used to meet the requirement for an advanced degree. (For information about procedures for requesting permission to offer dual-listed courses, faculty should consult the Graduate Faculty Handbook.)

Off-campus courses-Residential Credit
Iowa State University faculty teach distance learning courses online, by video conferencing, streaming media, and CD/DVD. Courses are the same as those offered on campus, carry residential credit, and are taught by Iowa State faculty. Credit earned becomes a part of the academic record at Iowa State University and may be used to meet degree requirements the same as credit earned on campus.

Priority Enrollment
High demand for courses in certain areas has necessitated enrollment management for some courses. When enrollment priority is established for a course, first consideration is given to students whose curriculum/major explicitly requires the course.

Special Course Fees
Courses for which special course fees are assessed are designated in the Schedule of Classes. Special course fees may be assessed for such extraordinary costs as materials fees (which may include consumable materials or equipment replacement), field trip expenses, developmental Math fees, and camp fees. In some cases, special course fee amounts vary from term to term. Additional information on camp fees and the developmental Math fee may be found in the fees and expenses section.

Independent Study
Most departments offer opportunities for independent study through a 490 course listing. Usually a minimum of 6 to 10 credits of coursework in the department is required before independent study is permitted. Students who are interested in this kind of experience in a particular department should check the catalog to determine the department’s prerequisites to register for 490. 490H sections are reserved for students in the University Honors Program.

Students should check with the department about procedures, in addition to meeting the prerequisites, for registering for 490. A written plan of study is prepared in advance with a faculty member who has agreed to supervise the student’s work, to evaluate progress and the final product, and to assign a grade. Initiation of the plan of study should occur prior to the semester in which enrollment is desired. Both the student and the instructor should agree on the number of credits for which the student will enroll, the amount and kind of work
he or she will do for that credit, and the system by which she or he will be graded (A-F or S/F). Students should not expect to register for or add 490 credit without an instructor's permission. Some colleges and/or departments have limits on the number of credits of 490 that may be applied toward graduation.

The university provides housing for over 11,000 students in University owned on-campus residence halls and on-campus apartments, as well as University operated off-campus apartments. Housing is available for undergraduate and graduate students; single students and families. Questions concerning on-campus housing and dining should be directed to the DOR Administrative Services Office:
- 2419 Friley Hall, Iowa State University, Ames, Iowa 50012
- E-mail: housing@iastate.edu
- Phone: (515) 294-2900.
- Additional information may be obtained at http://housing.iastate.edu/.

Contracts and Rates
Once admitted, all ISU students are eligible to submit a housing contract on-line using AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp). Housing priority for new students is based upon the date the completed contract is received in the DOR Administrative Services Office.

Academic Year (fall and spring), Spring only, and Summer only contracts are available. While fall only contracts are not offered, housing and dining contracts are "academically friendly." Students who leave the University as the result of graduation, withdraw, dismissal or participation in a University approved study-abroad, internship, co-op, or student teaching program may cancel their contract without penalty.

For reasons other than those listed, students who cancel their contract after the cancellation deadline (March 1 for current ISU students, May 1 for newly admitted ISU students) will receive a cancellation penalty equal to 80% of the remaining value of their entire contract, both housing and dining. For additional information, students should contact the Administrative Services Office.

For a complete listing of rates, please visit the following web sites:
- Housing Rates - http://housing.iastate.edu/data/rates
- Dining Rates - http://dining.iastate.edu/rates

Residence Halls
The residence halls are organized geographically into neighborhoods:
- Buchanan Hall
- Richardson Court
- Union Drive
- Wallace-Wilson

With the exception of Buchanan, Eaton, and Martin halls, all residence halls are "traditional style" meaning most residents live in double occupancy rooms and share a common, hallway bathroom. A limited number of triple and single occupancy rooms are also available. Buchanan, Eaton and Martin halls offer a "suite-style" setup with two rooms joined by a private bathroom. Typical residence hall furnishings include:

One per room
- Bed frame and mattress - extra long twin (36” x 80”). Beds may be lofted, bunked or "on the floor." Refer to the DOR web site for specific hall details.
- Desk and desk chair
- Wardrobe / Closet

- Wastebasket

Students may prefer single gender or coed houses. Coed houses have male and female students living at opposite ends or on separate levels of the house. They have separate bathrooms, but share common area space and house activities. Single gender building options are also available.

Of the 19 residence halls on the ISU campus, only seven are air-conditioned. As such, the vast majority of new students are assigned to non-air-conditioned housing. In buildings that are air-conditioned, due to the relatively mild temperatures in Ames, air-conditioning is typically only turned on through the first four weeks of fall classes and the last two weeks of spring classes. In times of high heat, there are air-conditioned common area spaces available in each building.

Additional services include house dens for informal gatherings and relaxation; lounge areas for meeting and entertaining guests; vending areas for snacks; hall desks with recreation/entertainment items, recreational equipment, and mail delivery; laundry facilities; study areas; meeting rooms and offices for student organizations; computer labs; and parking lots assigned to the residence halls.

Residence Hall Meal Plan Requirement - All residents of Buchanan Hall, Richardson Court or Union Drive are required to purchase one of five Semester meal plans. Wallace and Wilson residents are not required to purchase a meal plan. However, many residents in these areas opt to purchase some combination of meals and Dining Dollar$ so they can make purchases in one of the many Dining Centers, Cafes, Restaurants and C-Stores. For information about On-Campus Dining options, please see below.

Winter Break Housing - All Richardson Court and Union Drive residence halls close during Winter Break. Buchanan, Wallace, and Wilson halls remain open during Winter Break at no additional charge.

Residential Learning Communities (RLC) - Located throughout Richardson Court and Union Drive, RLCs are small groups of students who live together on designated houses or floors. Students share academic interests, classes, living spaces and develop friendships as part of an innovative program in cooperative learning. As such, most RLCs are limited to students in certain majors. Not all academic programs offer RLCs. Refer to the Learning Communities Website (http://www.lc.iastate.edu/) for more detailed information about learning communities including college contacts, mentor information, and research reports.

Theme Houses - Theme houses provide opportunities for students with common interests to live together and pursue those interests through organized programs and activities. Currently, the following Theme Houses are available: Air Force ROTC, Army ROTC and Cross Cultural. While there are no academic or major requirements, ROTC Theme Houses requires military affiliation and Cross Cultural Theme House requires residents to live with a roommate from a different country.

House Cabinets - The House System is made of Iowa State's great traditions. Houses of 40 to 60 residents elect a group of officers, called the Cabinet. The 135 House Cabinets take the lead in developing house policies and initiating house activities relevant to the needs and interests of house members.

Residence Hall and Apartment Community Councils - Each residence hall and apartment community has a student government, typically comprised of an executive board and representatives from each house/community. Councils fund and coordinate programs and committees that supplement the total social and educational development of the individual residents.

Inter Residence Hall Association - The Inter Residence Hall Association (IRHA) is composed of representatives from each hall, five Government of the Student Body (GSB) representatives, four at-large representatives, and an executive council. IRHA allocates funds and implements a variety of programs to meet the needs and requests of students in the residence hall system. In addition, IRHA acts as the voice of residence hall students to the university administrative personnel concerning policies, proposals, and regulations. IRHA meets weekly throughout the academic year. IRHA plans and sponsors Fall Fest, Residence Hall Week, the newspaper readership program, leadership conferences, and many other events/activities.

On-Campus Apartments
The on-campus apartments are divided into three communities which remain open year round:
- Frederiksen Court
University Village
Schilletter Village

Both Frederiksen Court and University Village house single students and residents must be at least 19 years old or in their second year of college to be eligible to live there. Schilletter Village is considered family housing and is available to any student who is married or in a domestic partner relationship and/or has custody/visitation rights for dependent children; the student's spouse/domestic partner and/or dependent children.

Frederiksen Court - Apartments accommodate four persons of the same gender in either two or four bedrooms. Each apartment is furnished with living room and bedroom furniture and the kitchen has a full-size refrigerator, stove, microwave, dishwasher, and garbage disposal. A washer and dryer are also included in each apartment. Apartment rates include all utilities: electricity, water, garbage pickup, basic phone service, expanded basic cable, and high-speed university Ethernet. The Frederiksen Court Community Center is home to the Frederiksen Court Office, meeting rooms and lounge space, a business center, and the Hawthorn Market and & Café – a dining facility that offers hot meals, snacks, beverages, and convenience items.

University Village (UV) - Located in SUV, each apartment accommodates up to two residents of either the same or mixed gender. All apartments contain two bedrooms, one bathroom, a living room, and a kitchen furnished with a cook top, oven, workspace, refrigerator, and sink. The majority of University Village apartments are unfurnished, but a limited number of furnished units are available. Pets are welcome in designated apartments.

Schilletter Village (SV) - Also located in SUV, all apartments contain two bedrooms, one bathroom, a living room, and a kitchen furnished with a cook top, oven, workspace, refrigerator, and sink. Students provide their own furniture and window coverings. Hook-ups for personal washer and dryer are available in the basement of each unit as are private, lockable, storage closets.

For both UV and SV, rates include expanded basic cable television, high-speed Internet connectivity, water, and garbage removal service. Residents pay for their own gas, electricity, and telephone.

The SUV Community Center serves UV and SV and features meeting rooms, lounge space, a community kitchen, and a computer lab. The community also boasts, community gardens, a bike/walking path, several playgrounds, and a central laundry facility.

On-campus Apartment Meal Plan Requirement - Residents of Frederiksen Court, UV, and SV are not required to purchase a meal plan. However, many residents in these areas opt to purchase some combination of meals and Dining Dollars so they can make purchases in one of the many Dining Centers, Cafes, Restaurants and C-Stores. For information about On-Campus Dining options, please see below.

On-campus Housing

University Operated Off-Campus Apartments

The DOR desires to provide a residential living experience for all ISU students who wish to live in University provided housing. Due to increasing enrollment, the demand for housing has exceeded the availability of existing on-campus space. As such the University has entered into lease agreements with property managers in the off-campus community. The leased spaces are solely occupied by contracted ISU students and are completely managed and staffed by the DOR.

When students are assigned to these locations, they will continue to receive the same student centered, academically focused services and programs that are expected of the on-campus housing experience at ISU. Staffing includes student Community Advisers and live-in, professional Apartment Community Managers. All residents are held to the same policies, procedures, and standards as residents in other DOR housing. Apartments are fully furnished and rates, billed directly to student Ubills, include all utilities.

Fraternities and Sororities

The Greek Community is comprised of over 3,550 undergraduate students in more than 55 chapters. 40 of these organizations have houses which approximately 1,800 undergraduate students call home. The organizations without chapter facilities provide the same scholastic, service and social opportunities for their members. Greek Community houses are an excellent living option. These houses are similar to that of a private residence and include a living room, kitchen, den, laundry, and study area. The average cost of living in a fraternity or sorority house is $3,700 per semester. This cost includes room, board and membership dues.

Men who join a fraternity with a facility may move directly into a fraternity house at the beginning of an academic year. Typically, they continue living there throughout their collegiate career. Women pledged a sorority through the formal recruitment process generally live in the residence halls for the academic year and move into the chapter during the second or third year of their membership.

The staff in the Office of Greek Affairs, a department in the Dean of Students Office, provides advising, programs, and services for Greek organizations. Local alumni work with each fraternity and sorority to ensure that the chapter structure for women meets all the state and local building, safety, and fire codes that are required with incorporation under the State Law of Iowa and City of Ames.

Off-Campus Student Housing

Off-campus housing information may be obtained through real estate agents, local newspapers, or by contacting individual property managers / owners. Additionally, the DOR has developed the following on-line resource to assist ISU students in their search for off-campus housing: http://housing.iastate.edu/places/offcampus.

On-Campus Dining Options

ISU Dining has worked with students to develop a variety of convenient, flexible dining options that fit with the ISU student lifestyle. ISU Dining Semester Meal Plans, Meal Blocks and Dining Dollar$ (DD$) plans are available to students who live both on- and off-campus.

Semester Meal Plans - Cyclone, Cardinal, Gold, Silver and Bronze – offer a combination of meals and DD$. A set number of meals are allotted each semester. Students can vary the meals they eat each week according to their schedule. Meals can be used in all dining centers and, in the form of a meal bundle, at select retail locations. Unused meals expire at the end of the semester. All students who live in Buchanan Hall, Richardson Court or Union Drive are required to purchase a semester meal plan. These plans are also available to all other ISU students, regardless of where they live.

Yearly Meal Blocks consist of meals, without DD$. Meals can be used in all dining centers and, in the form of a meal bundle, at select retail locations. The meals on these Blocks remain available for the entire academic year (August – May). Unused meals expire at the end of the spring semester. Blocks may be purchased by residents of Wallace and Wilson halls, Frederiksen Court, University Village, Schilletter Village, and any student who lives off-campus.

Dining Dollar$ (DD$) are added to your ISUCard and are a convenient way to pay for snacks and meals. DD$ are available for any ISU student to purchase and can be used in any ISU Dining establishment on campus. DD$ can be added anytime on Access Plus and are billed through your U-Bill. If you purchase $200 or more, discounts apply. All semester-based plans automatically come with an allotment of DD$. Individuals on these plans should only purchase additional DD$ only if their plan DD$ run out. Once DD$ have been issued, they cannot be reduced or refunded. At the end of summer, unused DD$ roll over for use during fall. At the end of fall, unused DD$ roll over for use during spring. At the end of the spring semester, all unused DD$ expire.

Student Records

Iowa State University maintains various records concerning students, to document their academic progress as well as to record their interactions with university staff and officials. In order that their right to privacy be preserved and to conform with federal law, the university has established certain policies to govern the handling of student records. All policies conform with FERPA, the Family Educational Rights and Privacy Act (also known as the Buckley Amendment).

Student Addresses

Students have the responsibility to notify the Office of the Registrar each time their information changes. Student information changes can be made in person to the Office of the Registrar, 214 Enrollment Services Center, or via AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp). Complete this form online using Acrobat Reader 6.0 or later, then print (remember to sign it) and submit to the Office of the Registrar, 214 Enrollment Services Center; by FAX (515)294-1088. ISU employees (graduate assistant or student worker), MUST also report an address change correction directly to the Office of Human Resource Services (http://www.hrs.iastate.edu/main/homepage.shtml), 3810 Beardshear Hall.

When Records May Be Withheld

The appropriate university official may request that a student's record not be released if that student is delinquent in an account with the university or an affiliated organization. The effect of this action is that a transcript will not be released and registration will be withheld.

The appropriate official may also request that records be withheld in instances when official disciplinary action has been taken against a student. Authorization for these actions is supported by The Iowa Code and The Iowa Administrative Code.

In order for such an action to be rescinded, the Office of the Registrar must receive written authorization from the official who originally requested the action, indicating that the student has met the obligation. Further information about this policy can be obtained from the Office of the Registrar.

Review and Challenge of Records

A student may challenge the accuracy of handling of records maintained by the university on grounds that the records are inaccurate, misleading, or otherwise violate the privacy or other rights of the student. The university has established the following procedures to provide an opportunity for the student to correct or delete inaccurate records, or to insert into the record a written explanation of the content. Students who question their records should discuss the issue first with the individual staff person who established or maintains the records. Presumably most issues can be resolved at this level. If a satisfactory resolution cannot be reached, the student should submit the question to the head of the department in which the record is maintained.

The department head will discuss the issue with the staff person and the student challenging the record. If resolution cannot be reached after meeting with the department head, the student may submit the question to the dean or director to whom the department head is responsible. The dean or director will investigate, and will respond in writing.

If the record has not been reconciled through these measures, the student may direct a written request to the president of the university. The president will convene an Ad Hoc Hearing Panel of Access and Confidentiality of Educational Records, composed of two faculty members, two students, and one administrator, appointed by the president for a period of one year, with the president or a designee serving as nonvoting chairperson. The student shall be given an opportunity to present to the panel evidence relevant to the issues raised, and the panel will issue a written response.

Posting Grades and Test Scores

Instructors who wish to inform students of their performance may post grades and test scores on a secure course web site as long as individual students may only access their own grades. The test scores or course grades of students may not be posted in any public location (World Wide Web or hard copy posting) unless the instructor posts the information using a code for each student that is known only by the instructor and the student.

Release of Grades

Students who choose to release their grades to parents or other trusted third parties may do so using the AccessPlus third party system. Reports of a student's grades are not routinely sent to the student's parents. Parents of students under 18 years of age may obtain grades by writing to the Office of the Registrar. The grades of other students will be sent to their parents only with written permission of the student, or by establishing dependency as outlined in item 9 under Confidential Information.

ISUCard and Identification Number

Each student is assigned a random university identification number on entry to the university. This number appears on the ISUCard that is provided to each student at the time of first registration. The ISUCard, may be required for some services and/or activities. At the time the ISUCard is issued each student also selects a university password, which is required for electronic access to personal student information.

Loss of an ISUCard should be reported immediately to the ISUCard Office, where the lost card will be invalidated and replaced for a charge. Disciplinary sanctions may be imposed for improper use of the ID card or attempts to obtain, by fraudulent means, any form of identification.

Social Security Number

Social security numbers are collected from prospective and current students, for administrative coordination and record identification purposes only. Although procedures have been established by the registrar for assignment of an alternative number upon request, students who wish to be employed on campus, desire to claim federal educational tax benefits, or are applying to receive financial aid, are required by law to provide their social security numbers for administrative use. The social security number is a confidential record and is maintained as such by the university in accordance with the Family Educational Rights and Privacy Act.

Policy on Student Names

Iowa Regent universities have a common policy regarding student names and name changes. The name on the student record should be the student's complete and legal name. In evaluating and processing all name change requests, the university reserves the right to require adequate and appropriate documentation as warranted.

Information Disclosure

Iowa State University is required by law to make available to enrolled students, prospective students, and their parents certain information about the university. The information disclosure policy is available at www.iastate.edu/disclosure. Students without electronic access can obtain the information from the Office of the Registrar, 214 Enrollment Services Center, 515-294-1840 or from the Office of Admissions, 100 Enrollment Services Center, 515-294-5836. A paper copy of the information will be provided upon request.

Public Information

Certain information concerning students is considered to be open to the public upon inquiry. This public information is of two types: directory information and other information not included in the ISU Directory.

ISU directory information includes student name, local address, telephone number, campus e-mail address, college, curriculum, year in school, and enrollment status.

Other public information includes mailing address, date and place of birth, hometown, dates of attendance at Iowa State, expected date of graduation, names of advisers, awards and academic honors, Iowa State degree(s) and date(s) awarded, previous educational institutions attended, degrees received, dates of attendance, full- or part-time status, participation in officially recognized activities and sports, and weight and height of members of athletic teams.

Public information will be released by the registrar to anyone upon inquiry, unless students have requested that their information not be released. Students can withhold public information through the Address Change link on Access Plus (https://accessplus.iastate.edu/frontdoor/login.jsp).

For the purposes of FERPA, Iowa State University defines directory information to include both ISU directory information and other public information as defined above.

It is the policy of the university to respect the privacy of students; therefore, only lists containing names of students and their directory information will be made available to members of the public who request address lists. This directory information will be provided for the cost of producing the information as provided by the university's public records policies. Directory information is available using the online phonebook (http://info.iastate.edu).

Disclosures Permitted by FERPA

Iowa State University retains the discretion to disclose both directory and confidential information as indicated in Section 4 (http://www.registrar.iastate.edu/policies) of Iowa State University's Notification of Rights Under FERPA.
Specifically, the university may disclose to the public or to specific individuals, directory or confidential information for reasons of safety if the disclosure meets the criteria under Section 4 (http://www.registrar.iastate.edu/policies).

**Confidential Information**

With the exception of the information noted above, all student records are considered to be confidential and are open only to school officials. A school official is a person employed by the university in administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the university has contracted; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

Iowa State University’s notification of rights under FERPA can be found at http://www.registrar.iastate.edu/policies.

The following policies govern access to student records:

1. Each type of student record is the responsibility of a designated school official, and only that person or the dean or director to whom that person reports has authority to release the record. The following is a list of the responsible officials:
   a. Academic records: registrar
   b. Admissions records: director of admissions
   c. Financial aid records: director of student financial aid
   d. Business records: university controller
   e. Traffic and security records: director, ISU Department of Public Safety
   f. Medical records: director, Thielen Student Health Center
   g. Counseling records and test scores: director, Student Counseling Service
   h. Actions of Academic Standards Committees: college deans
   i. Disciplinary records: dean of students
   j. Residence hall records: director of residence
   k. Placement records: college placement officers
   l. Evaluations for admission to ISU graduate or professional programs: deans or department chairs
   m. Special academic programs: faculty member in charge of the program and the dean of the college

2. The designated official may release records to other school officials who have a legitimate need for the information. A list of those persons who normally have access to each type of student record is available in 214 Enrollment Services Center.

3. All student records are reviewed periodically. Information concerning the frequency of review and expurgation of specific records is available in 214 Enrollment Services Center.

4. Students have the right to review upon request any records that pertain directly to them, and may obtain a copy of the record for a fee. This provision does not apply to records to which the student has waived his or her right to review, nor does it apply to medical and counseling records.

5. A student may waive the right to review a specific record by submitting in writing a statement to this effect to the official responsible for that record.

6. A file containing copies of records pertinent to advising is maintained on each student for use by the student’s adviser. This file may be maintained in hard copy or electronic format. Ordinarily this file is kept in the possession of the adviser, but for convenience it may be stored elsewhere such as in the dean’s office or department office. When the student changes majors, or changes advisers within the same major, the file is transferred to the new adviser. Under the university’s student records policy, the student is considered to have the right of access to this file.

7. Medical and counseling records shall be released at the written request of the student to medical or psychological professionals outside the university or to university officials.

8. University personnel who have access to student records in the course of carrying out their university responsibilities shall not be permitted to release the record to persons outside the university, unless authorized in writing by the student or unless one of the exceptions stated earlier is involved.

9. Confidential information may be released by students to their parents or other trusted third parties through the AccessPlus third party system. Confidential information may also be released by obtaining the student’s written consent or by having the parent establish the student’s dependency as defined by the Internal Revenue Code of 1954, section 152, by furnishing a certified copy of the parent’s most recent federal income tax return.

10. The officials responsible for custody of student records will maintain records of requests and disclosures of personally identifiable nonpublic information. The records of requests, whether granted or not, shall include the person or agency requesting the information and the purpose of the release. These records of requests and disclosures will be available to the student on request. Records of requests and disclosures are not necessary for requests made by the student, by school officials in carrying out their official responsibilities, by persons employed by agencies and offices conducting audits and accreditations of university programs, or any of the other exceptions listed previously.
Registration

Registration/Enrollment
In order to register for classes students must first accept their offer of admission by the university. Registration and the payment of assessed fees are required of all who attend classes. Enrollment is not complete until fees are paid, including room and board fees for those living in residence halls.

Registration is a process by which students become officially enrolled in classes for a given term. The process involves consultation between the student and the student's academic adviser. All undergraduate students are assigned an academic adviser based on their major/curriculum. A new adviser assignment is made when a student changes majors/curricula. See Index, Academic Advising.

Students who attend classes must complete registration and pay their assessed fees. Registration is not complete until all fees are paid, including board and room fees for those living in residence halls. See Index, Fees and Expenses.

Disabled students who need assistance with any phase of registration should contact Disability Resources. See Index, Disability Resources.

Enrollment Status
Enrollment status is defined for certification purposes as either full-time or half-time.

Full-time status, fall or spring semester
Undergraduates: 12 credits
Graduates: 9 credits

Half-time status, fall or spring semester
Undergraduates: 6 credits
Graduates: 5 credits

Summer status
Summer status depends on the number of weeks a student is enrolled. Always contact the Office of the Registrar to verify a student's status for a summer session.

With the exception of enrollment certification for veterans' benefits, credit hours are rounded up to the next whole number. For example, credit load of 11.5 credits is rounded up to 12 credits. Contact the Office of the Registrar for more information.

Dates and Deadlines
Dates for registration are published in the university calendar (http://www.event.iastate.edu) (choose the Academic calendar link), and at www.registrar.iastate.edu/calendar.

Students are assigned a registration start date and time, which is the first day and time they can use the registration system. Registration start dates are assigned based on projected year in school classification (computed by combining total credits, current term credits, and current term test out credits). Then specific start dates within projected year in school are established by using the sum of total credits and current term test out credits.

Students may choose to delay their registration until a later date; however, courses will begin to fill on the first day of registration. Any delay in registration may reduce course selection options. A list of start dates by classification is available at http://www.registrar.iastate.edu/calendar/registration-start-dates.

Continuing students register for the following term during the middle of the current term. For example, registration for spring term begins the middle of fall term; registration for summer session is completed during the previous spring at the same time as registration for fall semester.

A late registration fee is assessed for registration initiated on or after the first day of classes for fall and spring terms. This fee is not charged for the summer term. If registration is not initiated by the end of the fifth day of classes, students must obtain written permission from their advisers, the instructors for the courses they plan to take, as well as approval from the dean of the college in which they are registered. During the summer session, these approvals must be obtained in order to register after the third day of classes.

Students may not enroll in courses with time conflicts without the approval of the instructors concerned.

Students who participate in off-campus experiences for which they receive Iowa State University credit must register for that credit during the term when the experience is taking place, whether or not they are taking courses on campus during that time.

Registration Responsibilities
The registration process includes advising, enrollment in courses, and schedule changes. In addition to the student, this process may involve the student's adviser; the student services staff of the student's college; and the dean of the college. Each is responsible for knowing and following the academic policies and procedures.

Student
• knowing and adhering to university policies and procedures that apply to registration and schedule changes
• checking the accuracy of his/her schedule on AccessPlus, including schedule adjustments (i.e., adds, drops, section changes)
• knowing the degree requirements of his or her major and/or curriculum
• planning course schedules to meet those requirements; and monitoring the accuracy of the degree audit.

Adviser
• consulting with advisees during the advising/registration period
• providing information about student’s major and curriculum requirements
• providing guidance in the student’s course selection
• assisting in monitoring the degree audit for accuracy
• notifying the college student services office with corrections to the degree audit.

College Student Services Staff
• assisting new and reentering students with the registration process
• resolving unusual scheduling problems
• updating the degree audit or solving problems concerning the degree audit.

Dean
• making decisions with respect to requests for deviations from university policies, deadlines, etc.

Students and staff should check with the college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Class Schedule Planner
The Class Schedule Planner is an application that allows students to plan their schedules using courses displayed in the Schedule of Classes. Students can select courses and/or sections they want to take for a particular term, as well as block out unavailable class days and times. Based on those selections, Class Schedule Planner can return all possible schedules to the student in a color coded grid format.

Though it is a Web-based application, the Class Schedule Planner does not require authentication (no user ID, PIN, or password). Therefore, it is essential that students understand this is a planner and as such, it does not register them in courses and cannot be used to complete their registration. The application requires that the user have Java on their computer. The first screen of the Planner provides information about how to use the planner and simple instructions for downloading the Java application. A useful Help link also has been provided. The Class Schedule Planner is available at http://planner.iastate.edu.

Using AccessPlus Registration
Students enter the system via AccessPlus by using university ID and password. A registration access number (RAN) also is needed, if required by their college.

The registration system provides messages after each entry indicating whether each request has been processed. Students also may review their current schedules at any time during registration. Students are held accountable for all changes made to their schedules.

All students are encouraged to register for courses through the AccessPlus registration system. However, students who are unable to use the system may register in person by processing their signed Registration Worksheet in the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Registration System Abuse
Using the AccessPlus registration system is a privilege, which may be revoked if abuse is detected. Abuse includes, but is not limited to, creating and using an automated program to search for course openings and/or enrolling in a section with the intent of reserving space in that particular section for another student. The Office of the Registrar, college office, and/or advisers have the right to determine abuse and revoke privileges for any type of registration system abuse.
Course Information

Prerequisite. A prerequisite indicates the specific academic background or general academic maturity considered necessary by the faculty for the student to be ready for maximum success in the course. For more information, see Information About Courses (http://catalog.iastate.edu/informationaboutcourses), Course Prerequisite.

Permission Required courses/sections. To register for these sections, students must obtain authorization on a Request for Schedule Change or Restriction Waiver form and process the approved form in the Registrar’s Student Scheduling Office, 10 Enrollment Services Center.

Restricted courses/sections. Some courses or sections are restricted to students who meet specified criteria including curriculum/major, college, and/or year in school. In addition, some sections may be restricted to new students to ensure that sufficient spaces are available when new students register during summer orientation. A department may waive a restriction for a student who has extenuating circumstances. The student must obtain the authorization from the department on a Request for Schedule Change or Restriction Waiver form. The form is processed in the Registrar’s Student Scheduling Office, 10 Enrollment Services Center.

Classrooms are listed for each course in the Online Schedule of Classes at http://classes.iastate.edu/ and on the student’s class schedule on AccessPlus, beginning approximately 3 weeks prior to the start of the term.

Cancelled courses/sections. In some cases, courses or sections may be cancelled due to low enrollment or departmental staffing considerations. Students who are registered for a cancelled course or section will be notified by the Office of the Registrar, the department, and/or on their AccessPlus schedule.

Textbook information. A link to textbook information, including the ISBN and retail price for assigned textbooks, is available from the Schedule of Classes. Textbook information for Iowa State University courses is posted as close to the start of registration as possible. Students may purchase textbooks from any source they choose.

Credit Limits

For fall and spring semesters, the credit limit is 18 credits for undergraduates and 15 credits for graduate students. For summer session, the limits are 12 credits for undergraduates and 10 credits for graduate students. A student may be required to drop credits before adding another course. In some cases, the college dean may approve a higher or lower credit limit for individual students. Students may request a change in their credit limit by contacting their adviser. Advisers should notify the student’s college student services office if the credit limit needs to be changed.

Registration Holds

Students with holds on their registration will not have access to registration until the initiating offices have released the holds. Those who attempt to register before the holds have been released will receive a message indicating which offices have placed holds on their registration. Prior to their registration, students may check for holds on AccessPlus.

Drop Limit

Students are limited in the number of courses they may drop during their academic career. (This refers to drops processed after the fifth day of classes of each semester.) Students who entered Iowa State University as freshmen are allowed to drop a maximum of five courses during their undergraduate career. If they entered at a level above freshman classification or in the College of Veterinary Medicine, they are allowed to drop a maximum of four courses. Courses dropped during their first term at Iowa State are not included in this limit, nor does the summer count as a first term for this purpose. Students who enroll at Iowa State University as undergraduates after receiving a bachelor's degree are permitted four drops.

Exceptions to the drop limit may be made for courses that must be dropped for reasons beyond the student’s control. These exceptions are granted only by the dean or other authorized person in the student’s college.

The number of drops students have left is indicated on their grade report (available on AccessPlus) each term. Students are responsible for not exceeding their limit. At the instructor’s discretion, students who attempt to drop a course beyond the limit without special permission by the dean of the student’s college will continue to be enrolled in the course and will receive a grade at the end of the term.

Auditing

To audit a course means to enroll in the course without receiving credit for the course. The instructor of the course approves the audit request.

Students are assessed tuition and fees as though they are taking the course for credit, but the audited course does not count in determining full-time student status. However, an audited course does count towards the maximum allowable credits per semester. Audited courses do not apply toward V.A. benefits.

Graduate students: An audited course counts as one credit in the graduate student's allowable course load; however, tuition and fees will be assessed for the full number of credits for the course. See Graduate College.

Changing status to audit: Changing a course from credit to audit requires dropping the course for credit and adding it as an audit on a schedule change request form. After day 5 of the semester, the drop will count toward the total allowable ISU drops. The drop appears on the student’s permanent record and a schedule change fee will be assessed to the student’s university bill.

Rights and privileges: Once enrolled in an audited course, auditors have the same rights and privileges as any student taking the course for credit. Their names appear on the class list with a notation that they are auditing the course. Audited courses do not appear on the student’s permanent record except by special request from the student. A request form can be downloaded from the Office of the Registrar web site at www.registrar.iastate.edu/forms.

Audit Deadlines and Required Signatures

In addition to the deadlines provided below, note that instructors must approve all audits.

• Full semester courses:
  • Adding an audit #Day 10 deadline:
    • #Through day 5 of classes: instructor approval required.
    • #Day 6-10: instructor, adviser approval required; schedule change fee applies.

  • #After day 5: instructor, adviser, college approval required; schedule change fee applies.

• Partial semester or summer courses:
  • Deadlines are determined based on the length of the course. For deadlines concerning partial term or summer courses, contact the Student Scheduling Office, 515-294-2331.

Validating Enrollment

To validate their enrollment in each course at the beginning of the semester, students must attend the first or second meeting (first meeting if the class meets only once a week). Students who add a course after the term begins must attend the next class meeting. The instructor has the option to offer a registered place in the course to another student when a registered student fails to attend and has not obtained prior approval of the instructor. Students who do not validate their enrollment must drop the course or they will receive an F grade.

Registration Process

To register for classes, students need the following materials and information:

• Registration Worksheet, available for download at www.registrar.iastate.edu/forms/.

• A RAN (registration access number) if required by their college.

• Course information from the Online Schedule of Classes at http://classes.iastate.edu/.

• Other departmental information applicable to their curriculum, available from their adviser.

Students are expected to do the following in the advising and registration process:

1. Meet with their adviser, who will provide the following:
   a. degree audit
   b. guidance in course selection
2. Choose specific sections of each course. Students are responsible for choosing their course sections. In most cases, advisers will not be involved in selecting meeting times.

3. Review their registration start date/time information and any registration hold information on AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp), under Current Information. Students in those colleges which require a four-digit registration access number (RAN) should meet with their adviser in advance of their start date, to obtain their Registration Authorization Card on which the RAN is printed.

4. Register for courses using the AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp) registration system.

Making Schedule Changes

Students may make most schedule changes through the first five days of class using the AccessPlus (https://accessplus.iastate.edu/frontdoor/login.jsp) registration system.

Procedures for schedule changes vary by the time period of the semester. The effective date of a schedule change is the date when the change is entered into the registration system.

Schedule change periods for full term courses are as follows:

Period 1 ends on the fifth day of classes in the fall and spring semesters. Schedule changes during period 1 are free and do not require adviser signatures. Instructor or departmental approval may be required for adds or section changes for some courses during period 1. Course drops during this period do not count toward a student's ISU course drop limit, and will not appear on a student's permanent record. Schedule changes during period 1 may be processed through the AccessPlus registration system by or presenting a Schedule Change form to the Registrar's Student Scheduling Office, 10 Enrollment Services Center.

Period 2 ends the Friday of week 10 in the fall and spring semesters. During this period, schedule changes require signatures of adviser and instructor and are processed on a Schedule Change form. A schedule change fee is assessed for adds, drops, and section changes during this period. Course drops after period 1 count toward a student's ISU drop limit and appear as an X on the permanent record. A section change does not require a drop. Drops and other schedule changes that are judged to be beyond the student's control may be processed as administrative actions if approved by the college dean. There is no schedule change fee for administrative schedule changes. Administrative drops do not count toward a student's ISU drop limit and do not appear as an X on the permanent record. The effective date of an administrative action is the date it is approved by the college dean or authorized representative.

Period 3 is anytime after period 2. Schedule changes during this period are permitted only for extenuating circumstances, may require a written statement of support from the instructor and the student, and must be approved by the dean of the student's college or authorized representative.

Half-Semester and Partial Term Courses

Specific deadlines for adding and dropping half-semester courses are published in the university calendar. Prorated adjustments to add and drop deadlines are made for other partial term courses. To find specific deadlines for partial term courses, contact the Registrar's Student Scheduling Office, 10 Enrollment Services Center, 294-2331.

R-Credit Courses (required courses)

Processing a scheduling change for a required course is usually considered administrative. There is no fee for administrative schedule changes. Administrative drops do not count toward a student's ISU drop limit and do not appear as an X on the permanent record. To make a Period 3 R-credit drop administrative requires approval of the college dean.

Cancellation/Withdrawal

Students who decide not to attend classes before the date class work begins must cancel their registration to avoid tuition and fees assessment. Students who decide not to attend classes beginning the first day of class or later must withdraw from the university.

Registration Cancellation

A cancellation is processed when a student notifies the Office of the Registrar, prior to the day class work begins, of the decision not to attend classes for the current semester. All courses are removed and no tuition and fees are assessed. Students may cancel their registration by contacting the Office of the Registrar at 10 Enrollment Services Center, 515-294-2331. Students who call should request the name of the person taking the call and record the name as well as the time and date called.

Withdrawal

Students who decide not to attend classes beginning the first day of class or later, must process a withdrawal form. Per the student's request, the "Request for Withdrawal" form is initiated and submitted by the College to the Office of the Registrar. The student is withdrawn from all courses based on the withdrawal date on the form, and tuition and fees are adjusted, if appropriate according to established policies approved by the Board of Regents, State of Iowa. See http://www.registrar.iastate.edu/fees/tuition-adj.

Withdrawal procedures must be followed otherwise instructors of the courses involved will assign grades or marks they consider appropriate. Since these grades may be Fs, students are warned that failure to follow the prescribed withdrawal procedures may adversely affect a later application for reentry or transfer to another institution.

Students who are considering withdrawal from the university should immediately consult their academic adviser to discuss reasons for the withdrawal and alternatives.

A request for withdrawal during period 3, (i.e., after the last day to drop a course without extenuating circumstances) will not be approved except for circumstances that are beyond the student's control. The dean of the student's college or his or her designee, must approve such requests. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

Students should not expect to withdraw during or after the final examination week. In a situation beyond a student's control, when examinations cannot be completed, arrangements should be made for incompletes rather than withdrawal during final exam week. Students who are on academic probation (P) and withdraw during period 3 will not be permitted to enroll the following term, except under extenuating circumstances.

Withdrawal Procedures

To withdraw from the university, students must do the following:

1. Complete a Request for Withdrawal form, with adviser's signature.
2. Request the approval and obtain the signature of the college in which they are enrolled. (If the request is approved, the withdrawal form will be forwarded to the Office of the Registrar where it will be recorded; the information is then sent to the appropriate offices.)

The effective date of the withdrawal is the date on which it is approved by the college dean, or his or her designee. Students should check with their college office to find out who is authorized to grant approvals or exceptions on behalf of the dean.

If students complete the withdrawal procedure, the courses they are taking will not be included on the permanent record nor counted as part of their drop allowance. Half semester courses completed prior to withdrawal will be included on their permanent record. Incompletes will not be accepted for any courses taken during the term the student withdraws.

Interim or Medical Withdrawal

The University may order involuntary withdrawal of a student if it is determined that the student is suffering from a mental disorder as defined by the current American Psychiatric Association Diagnostic Manual such that the disorder causes, or threatens to cause, the student to engage in behavior which poses a significant danger of causing imminent harm to the student, to others or to substantial property rights, or renders the student unable to engage in basic required activities necessary to obtain an education.

Status of Conduct Proceedings

If the student has been charged with violation of the Uniform Rules of Conduct, but it appears that medical reasons exist for the objectionable behavior, the withdrawal policy may be activated prior to issuance of a determination in the conduct process. If the student is ordered medically withdrawn from the university, such action terminates the pending disciplinary action. If the student is found not to be subject to medical withdrawal under this section, conduct proceedings may be reinstated.

Interim Action

The OJA (Office of Judicial Affairs) Administrator or the Dean of students may order interim medical suspension of a student where there appears to be an imminent threat of harm to self or others. If the student is suspended, within 48 hours of ordering interim medical suspension, the Dean of Students will schedule an interim hearing before the Medical Withdrawal Committee, consisting of the Director of Student Health (or designee), the Director of the Student Counseling
Service (or designee), and the Dean of Students. The student and the OJA Administrator will have an opportunity to present information as to whether interim medical suspension should be continued or modified, and whether medical withdrawal should be considered.

The Medical Withdrawal Committee may order the student to be referred for an evaluation by a licensed mental health professional of the university's choosing if there is adequate reason to believe that a basis for medical withdrawal exists. The order of referral must be sent to the student and notify the student of the scheduled evaluation to occur no later than seven days from the date of the referral letter. The University will cover the cost of the evaluation. If a student fails to complete the evaluation, the university may continue interim medical suspension and may order restrictions on campus access until the evaluation is completed and reviewed by the university. The decision to continue interim medical suspension and for referral may be appealed within 48 hours, in writing, to the Vice President for Student Affairs. The student may be assisted by any two individuals of his or her choice in any hearing or appeal.

Involuntary Medical Withdrawal
If the medical evaluation supports medical withdrawal, a hearing will be scheduled before the Dean of Students, the Director of Student Health and a member of the Student Counseling staff. The student will have at least 48 hours to independently review the psychological or psychiatric evaluation prior to the hearing. The student and the OJA Administrator may present arguments for or against involuntary Medical Withdrawal. A written decision shall be rendered by the Medical Withdrawal Committee stating the reasons for its determination. The decision may be appealed, in writing, to the Vice President for Student Affairs. A student who has undergone involuntary medical withdrawal must reapply, and may not reenter the university without providing competent medical evidence that the medical condition no longer exists, or is sufficiently under treatment so as to remove any substantial likelihood of recurrence of the condition which caused medical withdrawal. The University may require the student, at the student's cost, to undergo a medical evaluation by a licensed mental health professional of the university's choosing. A medical withdrawal is not considered a disciplinary action, though a prior medical withdrawal may be considered in subsequent conduct hearings involving the student.

Tuition and Fees Adjustments for Withdrawals
Tuition and fees adjustments are made for withdrawals according to the schedule for full term courses (appropriate adjustments will be made when partial term courses are involved).

Students may appeal a tuition and fees assessment for withdrawals. Determinations will be made for instances beyond the control of the student. The results will be sent to the student in writing.

Returning/Reentry to the University
U.S. students who have been absent from Iowa State University less than 12 months may be admitted as a returning student. If more than 12 months have elapsed since last enrolled, a U.S. student must apply for reentry to the university. All international students must apply for reentry regardless of the time away from the university.

Returning Students
U.S. undergraduate and U.S. non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months do not complete a reentry form; however, international undergraduate and international non-degree undergraduate students planning to return to Iowa State University after an absence of less than 12 months must complete a reentry form.

Returning U.S. students and graduate students should contact the Office of the Registrar to have their records updated and registration access created. Students should contact their advisers or major professor to select courses and begin the registration process.

Returning students who want to change their curricula should follow the same procedure as in-school students. Students who were dropped from enrollment at Iowa State University must obtain reinstatement by the Academic Standards Committee of the college that initiated the drop. (See below for policies that apply to requests for reinstatement.)

Reentry Students
Undergraduate and nondegree undergraduate (special) students who plan to attend Iowa State University after an absence of twelve months or more must complete a reentry form. Forms are available from http://www.registrar.iastate.edu/forms/.

Students with a bachelor's degree who plan to take supporting graduate level coursework prior to applying for graduate degree admission should request a nondegree graduate admission application.

Students who have previously attended Iowa State University only as nondegree (special) students and who now seek to earn an undergraduate degree should request an undergraduate application.

International students must complete a reentry form. Forms are available from http://www.registrar.iastate.edu/forms/. Financial certification of ability to cover all educational and living expenses will be required.

The reentry form should be completed and returned to the Office of the Registrar, 10 Enrollment Services Center, well in advance of the term of reentry. Students who have attended another college or university since enrollment at Iowa State University must have an official transcript(s) of all course work attempted sent to the Office of Admissions, 100 Enrollment Services Center.

Reentering students must also contact their departmental office/adviser to prepare a class schedule. Reentry must be approved prior to registration.

Iowa State University requests the information on the reentry form for the purpose of making a reentry decision. The university reserves the right not to approve reentry if the student fails to provide the required information.

Reentry Approval Process
Generally, a request to reenter Iowa State University will be approved within the Office of the Registrar. However, the Office of the Registrar will refer the reentry form to the college to which a student plans to return if the student: (a) desires to change curriculum; (b) has a previous Iowa State University cumulative grade point average below 2.00; (c) was dropped from the university for unsatisfactory academic progress or was not otherwise in good standing; or (d) since leaving Iowa State University, has completed additional college study with less than a 2.00 grade point average. See Index, Reinstatement.

Academic Renewal
Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations. See Index, Academic Renewal/Reinstatement.

Past speakers include scholars E.O. Wilson and Stephen J. Gould; activists Gloria Steinem and Anita Hill; poet Maya Angelou; and astronaut Sally Ride.

The Institute on World Affairs is an annual series of speakers and on a topic of international interest held in the fall. Spring semester, the Institute on National Affairs is held with a topic of national concern as its focus. Focus, an annual fine arts festival with emphasis on student creativity in the arts, is held in the spring. The Committee on Lectures also sponsors or co-sponsors dramatic, dance, and musical events.

Students are encouraged to contact the lectures program office and become involved in the planning of these events.

Assistant Vice President and Director of Counseling: Terry W. Mason, Ph.D.
The Student Counseling Service (SCS) assists students in enhancing their academic success and personal well-being with a staff of professional psychologists and counselors. Services are available to help students sort through their feelings, strengths, and options to develop new perspectives and coping skills.

Services include:

• One-on-one counseling for any issue of personal concern, such as depression, anxiety, stress management, relationship issues, identity issues, and other forms of personal challenge. Students may also receive therapeutic services to deal with more severe mental health issues.
• Couples counseling for ISU students and their partners during times of relationship difficulty.
• Eating disorders assessment and treatment for students concerned with eating or body image issues. Students receiving treatment for eating disorders might also work with physicians, nutritionists, and personal trainers as their needs require.
• Substance abuse assessments to help students determine the nature and extent of their alcohol or other drug use and the impact of this use on their well being. Counselors offer recommendations and referrals for any concerns identified through the assessment.
• Career counseling to assist students having difficulty choosing a major or making decisions about their future after college.
• Group counseling is offered to facilitate personal growth and social skills learning. A list of the current semester’s groups is available on the SCS web site.
• A variety of outreach programs are also available.

Counseling services are offered at no cost to ISU students. However, a nominal fee for testing may be required. Nominal fees are also charged for uncancelled missed appointments. Counseling is strictly confidential. SCS staff will not release any information to anyone outside of the Student Counseling Service without the written permission of the client unless an imminent harm condition exists.

In addition to providing counseling and outreach services to students, SCS provides training and consultation to faculty and staff to assist them in addressing the psychological needs of students.

SCS hours are Monday through Friday 8 a.m. - 5 p.m. The Student Counseling Service phone number is 515-294-5056.

Student Support Services Program

www.dso.iastate.edu/sss
Director: Japannah Kellogg, M.S.
1010 Student Services Building
(515) 294-0210

Student Support Services Program (SSSP), a federally funded program, provides academic support to eligible students and is designed to increase the retention and graduation rates of low-income individuals who are first-generation college students or individuals with disabilities. The needs of the students who are
accepted into SSSP are thoroughly assessed through testing and counseling. SSSP participants receive personal and career counseling, along with academic advice, tutoring, and assistance in receiving financial aid.

Participants in SSSP are encouraged to work with an SSSP student mentor to become acclimated to the ISU environment. These relationships also encourage participants to fully access ISU resources. Study skills improvement sessions and basic skills instruction are provided in the areas of math and writing. In addition, cultural enrichment (i.e. theatre, dance, and musical events) and educational activities (leadership conferences, graduate/professional, etc.) are planned. These services are provided free of charge to eligible students after they are accepted into the program.

International Students and Scholars

www.isso.iastate.edu
Director: James Dorsett

The International Students and Scholars Office (ISSO) provides a welcoming and supportive environment for international students and scholars, Iowa State University, and the Ames community. ISSO staff members orient and advise international students and scholars on university procedures, community resources, U.S. immigration regulations, and nonacademic personal concerns. ISSO intercultural programs, such as the Culture Corps, Friendships International, and activities developed with the International Student Council and dozens of international student organizations, bring international students and Americans together for mutual learning. We welcome volunteers to join these and other programs to help us maximize the international experience of students and scholars to the successful completion of their academic objectives and enhance their personal growth.

The Iowa State University Veterans Center provides a comfortable space for veterans and military personnel to connect and find support for issues related to enrolling at Iowa State University, and also assists with finding resources to help these individuals with adjusting to life as a student. In addition, the center provides assistance to faculty or staff with questions about military protocol. For example, when a veteran deploys, the Veterans Center can provide resources to help explain the process so that faculty and staff can meet the unique needs of students who may have obligations of military service.

Students receiving military educational benefits must work with a Veterans Administration certifying official in the Office of the Registrar in order to be certified for educational benefits. The Veterans Center is not directly involved in the certification process, but works closely as a team with V.A. certifying officials in order to provide the best support possible to veterans and their families attending ISU.
Tuition and Fees

For the most current and complete information see http://www.registrar.iastate.edu/fees/

All tuition, fees, expenses, and policies listed in this publication are effective summer session 2015 and are subject to change without notice by Iowa State University and the Board of Regents, State of Iowa.

Tuition and fees are based on credit load at 5:00 p.m. on the 10th day of class, which is the last day for adjustments downward in tuition and fee assessment.

Tuition

Tuition is charged based upon the number of credits in which a student is enrolled. Maximum charges start at 12 credits for undergraduate and veterinary medicine students. Maximum charges start at 9 credits for graduate students.

Students who are not residents of Iowa pay a higher tuition rate each semester. Nondegree undergraduate students and noncollegiate students pay the same fees as undergraduates. Tuition and fees are assessed in accordance with regulations of the Board of Regents, State of Iowa. Information about these regulations are found in this catalog under Admissions and Registrar.

Fees

Following are the descriptions of several commonly assessed fees for Iowa State University students. The list is not inclusive. All fees are subject to change without notice.

Account Review Fee (per credit hour): This fee will be assessed to those students who request account research for prior semester periods. The $10 per hour fee (with a minimum of $10) helps defray the costs of personnel time taken to perform the research, which involves gathering information from various sources when the request is made for a prior semester.

Activity, Services, Building and Recreation: The activity, services & building fee is a mandatory fee that supports a variety of activities and services for all students. It is not based on whether or not a student uses an individual activity or service. This fee provides several benefits such as student admission rates to concerts and athletic events and, unlimited use of CyRide, the Ames bus system. In addition, the fee provides support for campus recreation facilities, the Memorial Union, and campus organizations and services as allocated by the Government of the Student Body. All students will be charged a minimum of $322.95 each fall and spring semester, and $162 per summer semester. The activity, services, building and recreation fee includes assessments of the following amounts for each fall and spring semester.

Fee Category | Amount
--- | ---
Student Activities | 36.75
Student Services | 97.85
Building | 27.55
Recreation | 160.80
Total | 322.95

Exemptions are granted for students exclusively registered for the following: distance education courses (sections beginning with X); courses for which no tuition is assessed; continuous registration status courses, and high school students enrolled under the Post-Secondary Enrollment Options Act. Students in exemption categories named above may elect to pay this fee and will be assessed based upon their enrollment status.

For students who withdraw or change to an exempt status as defined above, the tuition adjustment schedule will also be used for the activity fee.

Additional Billing Statement: A student can authorize the ISU Accounts Receivable Office to mail a billing statement to another individual. The cost of the Additional Billing Fee to mail a monthly paper statement is $8 per semester. This remains in effect as long as the student is enrolled or until discontinued by the student.

Students who carry the ISU sponsored student health insurance must also be assessed the health facility fee.

Health (Student Health): A $98 student health fee, which partially finances the services of the Thielens Student Health Center, is charged to all students each semester. This fee is not assessed to students enrolled for four or fewer credits or students exclusively registered for the following: distance education courses (courses with sections beginning with X); courses for which no tuition is assessed; continuous registration status courses; Lakeside Laboratory courses; ISU employees whose primary role at the university is as an employee; and high school students enrolled under the Postsecondary Enrollment Options Act. These exemptions do not apply to international students or to graduate students on graduate assistantships. Students who are exempt from the mandatory health fee may use the services of the Thielens Student Health Center on a fee for service basis. They may elect to pay the $98 Health Fee and $8 Health Facility Fee, which allows participants to receive services at the Thielens Student Health Center for the same rate as students who pay the mandatory health fees. Spouses/domestic partners of students who wish to use the Thielens Student Health Center must pay the $98 Health Fee and $8 Health Facility Fee.

Students who withdraw or change to an exempt status as defined above will receive a credit adjustment of 100 percent from the 10th day of classes, with no credit adjustment after the 10th day of classes. Students who add courses at any time during the semester will be assessed the student health fee if applicable according to the guidelines stated above. Students who carry the ISU sponsored insurance must also be assessed the student health fee. If spouse or domestic partner is covered under the insurance plan, the spouse (domestic partner) must also be covered under the Health Fee and Health Facility Fee.

Health Insurance: All international students and their accompanying dependents must enroll in the ISU Student and Scholar Health Insurance Program. ISU requires nonimmigrant international students and their dependents to purchase and maintain coverage through the ISU health insurance plan for the duration of their tenure at the university. Lakeside Lab: Iowa Lakeside Laboratory is a field station of Iowa’s state universities that provides summer classes and research opportunities for students. The mission of Lakeside Lab is twofold: 1) to provide science classes and research opportunities for university students and 2) to offer public programs and provide services through the state universities. Lakeside Lake offers students a unique educational experience through small full-immersion, field-oriented courses. This fee ($277 undergraduate; $452 graduate) helps to cover program costs. More information can be found at Iowa Lakeside Laboratory (http://catalog.iastate.edu/interdisciplinaryprograms/iowalakesidelaboratory).

Late Payment of Fees or Charges: The finance charge is a penalty charged to discourage late payment of bills, as well as to make up for the university’s lost opportunity for investment income. The up to 1% per month finance charge also helps defray the costs of extra IT costs, handling, and mailing involved with the record keeping and collection of charges over a longer period of time. This fee is assessed to students and non-students.

Late Registration: This fee is assessed to students who do not register for classes before the first day of class. This fee is an administrative charge to encourage students to register for classes in a timely manner so as to provide enrollment management data to administrative areas who can make decisions on how to best utilize university resources. The stepped up fee for graduate students is necessary because ISU provides tuition scholarships for students on assistantship appointments. Students who do not register by the end of the second week may create significant payroll, fee assessment, and scholarship problems that will take excess staff time to resolve.

The Accounts Receivable Office bills students for tuition, room, meal plan, and various other university charges. A statement of new charges is available on the first of each month on AccessPlus and each student will receive an email message at that time at their Iowa State e-mail address telling them that their bill is available. It is the student’s responsibility to ensure that the university has a correct e-mail address and to regularly check their Iowa State e-mail account. Students who do not receive a billing statement before the term begins or are unable to use AccessPlus to view their bill, should contact the Accounts Receivable Office to learn the amount of their account balance due. Failure to receive a billing statement or view their account on AccessPlus will not exempt students from late penalties or from having a hold placed on their registration. Payments for fall semester are due August 20. Payments for spring semester are due January 20. Payments for summer semester are due May 20.

Students may pay their university bill by direct debit through AccessPlus. They may also pay by mail by sending a check or money order (along with the bottom portion of the billing statement printed from AccessPlus) to Iowa State University, Treasurer’s Office, 1220 Beardshear Hall, Ames, IA 50011-2044. Payments may also be made in person by taking the personal check or certified funds to the drop box that is located behind the Student Answer Center on the ground floor of Beardshear Hall.

This permits students to spread payment over three installments. The administrative fee helps defray the extra IT and mailing costs involved in carrying and billing the charges over a longer period of time, as well as the extra personnel required in the Treasurer’s Office to handle the traffic involved with three tuition payments per semester instead of one.

Employer Reimbursement Payment Option: Iowa State is proud to offer a deferment option which is beneficial to employees of companies that offer tuition reimbursement plans. With a completed benefit certification form (http://www.public.iastate.edu/~u-bill/forms/Employee%20Reimbursement%20Def%20Payment%20Agreement.pdf) you may defer all allowable charges to become due 30 days after grades are presented. The benefit certification form must be renewed each academic year, beginning with the summer semester. There is a $35 per semester fee for this deferment option.

For ISU Employees, you will need only complete the “Student” portion of the form. The Accounts Receivable Office will complete the “Employer” certification provided you have submitted the Employee Tuition Grant request through
Tuition adjustments for all students are made for withdrawals of registration according to the following schedule:

Withdrawal Date/Student Pays

During class days 1-5: 10%
During class days 6-10: 25%
During class days 11-15: 50%

Students who wish to appeal the decision of the Office of the Registrar must do so in writing within 10 calendar days after receiving the decision. Such appeals will then be reviewed by the Tuition Appeals Review Committee. Students who wish to appeal the decision of the Tuition Appeals Review Committee may make a request to do so in writing to the Office of the Provost.

Fee refunds for students with a reduction in credits below full-time: 100 percent if change is made through the 10th day of classes. No adjustment is made after the 10th day of classes. Prorated adjustments in the tuition adjustment schedule are made for summer session courses, or any courses which are less than one semester in length (79 days).

Workshop and Short Courses Refunds: Students who drop workshops or short courses of one or two weeks on or before the first class meeting receive a 100% tuition adjustment for the course. No tuition adjustment will be made after the first day of classes. Students who drop three-week courses receive a 100% adjustment if they drop on or before the first day of classes, a 90% adjustment if they drop on the second day of classes, and no adjustment after the second day of classes.

Residency Classification for Admission and Tuition Purposes

These criteria are contained in the Policy Manual, Board of Regents, State of Iowa and or the Iowa Administrative Code: Board of Regents, State of Iowa.

GENERAL INFORMATION

A. A person enrolling at one of the three state universities shall be classified as a resident or nonresident for admission, tuition, and fee purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

B. In determining resident or nonresident classification, the issue is essentially one of why the person is in the state of Iowa. If the person is in the state primarily for educational purposes, that person will be considered a nonresident. For example, it may be possible that an individual could qualify as a resident of Iowa for such purposes as voting, or holding an Iowa driver’s license, and not meet the residency requirements as established by the Board of Regents, State of Iowa, for admission, tuition, and fee purposes.

C. The registrar, or designated person, is authorized to require written documents, affidavits, verifications, or other evidence deemed necessary to determine why a student is in Iowa. The burden of establishing that a student is in Iowa for other than educational purposes is upon the student. A student may be required to file any or all of the following:

1. A statement from the student describing employment and expected source of support
2. A statement from the student's employer
3. A statement from the student's parents verifying nonsupport and the fact that the student was not listed as a dependent on tax returns for the past year and will not be so listed in future years
4. A statement from the student's spouse related to sources of family support, length of residence in Iowa, and reasons for being in the state of Iowa
5. Supporting statements from persons who might be familiar with the family situation
6. Iowa state income tax return.

D. Applications for resident classification for a given semester or session are due no later than the fifteenth class day of that semester or session. Applications received after the fifteenth class day of that semester or session will be considered for the next semester or session. Appeals of any nonresident
classification decision resulting from applications for resident classifications are due no later than midterm of that semester or session. Change of classification from nonresident to resident will not be made retroactive beyond the term in which application for resident classification is made.

E. A student who gives incorrect or misleading information to evade payment of nonresident fees shall be subject to serious disciplinary action and must also pay the nonresident fees for each term previously attended.

F. Review committee. These regulations shall be administered by the registrar or someone designated by the registrar. The decision of the registrar or designated person may be appealed to a university review committee. The finding of the review committee may be appealed to the Board of Regents, State of Iowa.

GRADUATE ASSISTANTS

Students with graduate assistantships of 1/4-time or more are assessed Iowa resident tuition and fees. Nonresident students with graduate assistantships of 1/4-time or more retain their nonresidency classification, but are assessed resident tuition and fees as long as the graduate assistantship is continued.

The spouse of a 1/4-time or more graduate assistant who is a nonresident is eligible for resident tuition and fees during the period of the assistantship appointment. Iowa residency is not granted, but a waiver of nonresident tuition and fees is in effect. When the graduate assistantship ends, the tuition and fee waiver for the spouse is terminated. (Board of Regents, State of Iowa, Minutes March 15, 1995, p. 801).

The graduate student must request the resident tuition assessment by midterm of the term in question. The benefit will not be granted retroactively.

GUIDELINES

The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:

1. A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

2. In deciding why a person is in the state of Iowa, the person's domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

3. A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile. A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident so long as domicile is maintained, even though circumstances may require extended absence of the person from the state. It is required that a person who claims Iowa domicile while living in another state or country will provide proof of the continual domicile as evidence that the person:

(1). Has not acquired domicile in another state;

(2). Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency.

7. An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

8. At the Regent institutions, American Indians who have origins in any of the original people of North America and who maintain a cultural identification through tribal affiliation or community recognition with one or more of the tribes or nations connected historically with the present state of Iowa, including the Iowa, Kickapoo, Menominee, Miami, Missouri, Ojibwa (Chippewa), Omaha, Otoe, Ottawa (Odawa), Potawatomi, Sac and Fox (Sauk, Meskwaki), Sioux, and Winnebago (Ho Chunk), will be assessed Iowa resident tuition and fees. (Board of Regents, State of Iowa, Minutes October 15-16, 1997, p. 299)

B. Additional guidelines are used in determining the resident classification of a veteran, qualified military person, and dependent children and spouses of a veteran or qualified military person for purposes of admission and undergraduate tuition and mandatory fees:

1. A person who is stationed on active duty at the Rock Island arsenal as a result of military orders, or the dependent child or spouse of such person, is entitled to resident status for purposes of undergraduate tuition and mandatory fees.

2. A veteran who is domiciled or moves to the state of Iowa and who is eligible for benefits, or has exhausted benefits under the federal Post-9/11 Veterans Educational Assistance Act of 2008, is entitled to resident status for purposes of undergraduate tuition and mandatory fees. The dependent child or spouse of a veteran who meets these requirements is entitled to resident status for undergraduate tuition. However, if the arrival of the veteran in Iowa is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases for the dependent child or spouse until the beginning of the next term in which the dependent child or spouse is enrolled.

3. A person who is moved into the state as the result of military or civil orders from the government for other than educational purposes, or the dependent child or spouse of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the dependent child or spouse is enrolled.

4. A person who is stationed in Iowa while absent.

5. Acceptance of an offer of permanent employment in Iowa.

6. Military orders, if for other than educational purposes.

7. Other facts indicating the student's domicile will be considered by the universities in classifying the student.

FACTS

A. The following circumstances, although not necessarily conclusive, have probative value in support of a claim for resident classification:

1. Reside in Iowa for 12 consecutive months, and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.

2. Reliance upon Iowa resources for financial support.

3. Domicile in Iowa of persons legally responsible for the student.

4. Former domicile in the state and maintenance of significant connections therein while absent.

5. Acceptance of an offer of permanent employment in Iowa.

6. Military orders, if for other than educational purposes.

7. Other facts indicating the student's domicile will be considered by the universities in classifying the student.

B. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to affect classification of a student as a resident under these regulations:

1. Voting or registration for voting.
2. Employment in any position normally filled by a student.
3. The lease of living quarters.
4. Admission to a licensed practicing profession in Iowa.
5. Automobile registration.
6. Public records; for example, birth and marriage records, Iowa driver's license.
7. Continuous presence in Iowa during periods when not enrolled in school.
8. Ownership of property in Iowa, or the payment of Iowa taxes.
