

Iowa State University

Courses and Programs Catalog 2016 - 2017

The Iowa State University Catalog

The Iowa State University Catalog is a one-year publication which lists all academic policies, and procedures.

The catalog also includes the following: information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses developed and offered since catalog publication can be found on the Web at <http://www.registrar.iastate.edu/faculty-staff/courses/explisting>.

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Iowa State University does not discriminate on the basis of race, color, age, ethnicity, religion, national origin, pregnancy, sexual orientation, gender identity, genetic information, sex, marital status, disability, or status as a U.S. veteran. Inquiries regarding non-discrimination policies may be directed to the Director, Office of Equal Opportunity, Title IX/ADA Coordinator, and Affirmative Action Officer, 3350 Beardshear Hall, Ames, Iowa 50011, Tel. 515 294-7612, email eooffice@iastate.edu.

TABLE OF CONTENTS

About the Catalog	6	Microbiology	116
Entry Level Courses	7	Nutritional Science	118
Accreditation	25	Seed Science	122
Academics	26	Sustainable Agriculture	123
Grading	26	Technology Systems Management	123
Academic Appeals	29	Department of Food Science and Human Nutrition	125
Degree Planning	29	Department of Natural Resource Ecology and Management	128
Progress and Probation	29	Department of Plant Pathology	129
Reinstatement and Renewal	31	Business	129
Academic Conduct	32	Accounting	134
Admissions	33	Business Administration	136
Colleges and Curricula	39	Business Economics	137
Agriculture and Life Sciences	48	Finance	138
Agricultural Biochemistry	51	Management	139
Agricultural Business	54	Management Information Systems	141
Agricultural and Life Science Education	55	Marketing	142
Agricultural Studies	58	Supply Chain Management	143
Agriculture and Society	59	Program: International Business	144
Agriculture Systems Technology	61	Design	145
Agronomy	62	Architecture	147
Animal Ecology	66	Art and Design	150
Animal Science	70	Biological/Premedical Illustration	152
Biology	77	Community and Regional Planning	154
Community Development	81	Design	157
Culinary Science	81	Graphic Design	158
Dairy Science	83	Industrial Design	161
Diet and Exercise	85	Integrated Studio Arts	163
Dietetics	88	Interior Design	165
Early Childhood Education	90	Landscape Architecture	167
Early Childcare Education and Programming	92	Program: Design Studies	170
Entomology	93	Program: Sustainable Environments	171
Environmental Science	94	Program: Urban Design	171
Environmental Studies	96	Engineering	172
Food Science	96	Aerospace Engineering	176
Forestry	99	Agricultural Engineering	179
Genetics	102	Biological Systems Engineering	184
Global Resource Systems	104	Biomedical Engineering	190
Horticulture	106	Chemical Engineering	190
Industrial Technology	113	Civil Engineering	193
International Agriculture	116	Computer Engineering	197
		Construction Engineering	199

Electrical Engineering	205	Advertising	294
Energy Systems Minor	208	Anthropology	295
Engineering	208	Biochemistry	297
Engineering Mechanics	208	Bioinformatics and Computational Biology	300
Engineering Sales Minor	209	Biological/Premedical Illustration	152
Industrial Engineering	209	Biology	303
Materials Engineering	211	Botany	308
Materials Science and Engineering	213	Biophysics	
Mechanical Engineering	214	Chemistry	308
Non-destructive Evaluation Engineering	217	Classical Studies	311
Nuclear Engineering	217	Communication Studies	312
Software Engineering	218	Computer Science	313
Systems Engineering	220	Criminal Justice Studies	316

ABOUT THE CATALOG

The Iowa State University Catalog is a one-year publication, which lists all academic policies, and procedures. Versions prior to 2011 were two-year publications and available in hard copy as well as online.

The catalog also includes information for fees; curriculum requirements; first-year courses of study for over 100 undergraduate majors; course descriptions for nearly 5000 undergraduate and graduate courses; and a listing of faculty members at Iowa State University.

New courses and programs take effect in the fall term. New courses developed and offered since catalog publication are called experimental courses. A list can be found on the Web at www.registrar.iastate.edu/faculty-staff/courses/explisting. (<http://www.registrar.iastate.edu/faculty-staff/courses/explisting>)

Every effort has been made to make the catalog accurate as of the date of publication. However, all policies, procedures, fees, and charges are subject to change at any time by appropriate action of the faculty, the university administration, or the Board of Regents, State of Iowa.

Updates to the Catalog

The curriculum process is governed by the Faculty Senate. The ad hoc committee, Faculty Senate Curriculum Committee (<http://www.facsen.iastate.edu/councils/academicaffairs/curriculum>) considers new curricula proposals, changes and discontinuations to the catalog. Additional information may be in the college governance documents.

The curriculum approval process generally consists of a proposal from the department/program level, approved by the department/program curriculum committee (if applicable), college curriculum committee, and the dean. Additional approvals are needed from the Graduate College if the program proposal is a graduate program. The program proposal is submitted to the Faculty Senate Curriculum committee for review. The Academic Affairs Committee reviews the proposal before passing it onto the Faculty Senate. The Board of Regents, State of Iowa approves all new programs and majors. For additional information about the approval process, see the link to Faculty Senate/Faculty Handbook Curriculum Approvals – Section 10.8. See the Office of the Provost (<http://www.provost.iastate.edu>) web site for more information.

Catalog updates are generally processed with approvals from department, college, and Faculty Senate Curriculum Committee (<http://www.facsen.iastate.edu/councils/academicaffairs/curriculum>) representatives. Editing begins in late February with course changes due to the Office of the Registrar by June 1. Curriculum and other general information is due to the Office of the Registrar by December 1. Publication is the following February.

See the catalog editing web site (<http://www.registrar.iastate.edu/catalog-editing>) for more details on how to make changes to the catalog.

ENTRY LEVEL COURSES

Resources for Course Information

<http://catalog.iastate.edu>

<http://classes.iastate.edu>

Additional experimental courses: courses not published in the catalog.

The following courses are suitable for first year students.

A B E 170: Engineering Graphics and Introductory Design

(2-2) Cr. 3.

Prereq: Satisfactory scores in math placement assessments; credit or enrollment in MATH 142.

Applications of multi-view drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports.

A M D 165: Dress and Diversity in Society

(3-0) Cr. 3. F.S.

Examination of diversity among consumers and introduction to forecasting trends in dress. Introduction to social justice issues. Meets U.S. Diversity Requirement

AER E 160: Aerospace Engineering Problems With Computer Applications Laboratory

(2-2) Cr. 3. F.S.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Solving aerospace engineering problems and presenting solutions through technical reports. Significant figures and estimation. SI units. Graphing and curve fitting. Introduction to aerospace engineering and engineering design. Spreadsheet programs. History of aerospace. Systems thinking. Team projects.

AF AM 201: Introduction to African American Studies

(3-0) Cr. 3. F.S.

An interdisciplinary introduction to the study of African American culture. Includes history, the social sciences, literature, religion, and the arts, as well as conceptual frameworks for investigation and analysis of the African American experience.

Meets U.S. Diversity Requirement

AFAS 101: Introductory Leadership Laboratory I

(0-2) Cr. 1. F.

Prereq: Membership as a cadet in AFROTC

Instruction on Air Force customs and courtesies; drill and ceremonies, issuing military commands, physical training, studying the environment of an Air Force officer and learning about areas of opportunity available to commissioned officers. Offered on a satisfactory-fail basis only.

AFAS 141: Foundations of the United States Air Force

(1-0) Cr. 1. F.

Basic introduction to the United States Air Force and Air Force Reserve Officer Training Corps. Mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, and communication skills.

AFAS 151: Air Force Physical Training

(0-2) Cr. 1. Repeatable. F.S.

Prereq: Membership as a cadet in AFROTC

Use of basic military training skills and instruction to develop confidence, leadership, communication skills and physical fitness. The team approach is utilized in the instruction and application of Air Force physical fitness requirements. Students will learn various Air Force physical fitness techniques as well as how to conduct physical fitness sessions. Full participation in all events will be determined based on student's physical and medical eligibility. Offered on a satisfactory-fail basis only.

AGEDS 110B: Agricultural Studies (Fall only)

(1-0) Cr. 1. F.S.

Orientation to the department. Careers in agriculture.

AGRON 110: Professional Development in Agronomy: Orientation

Cr. 0.5-1. F.

Orientation to college life, the profession of agronomy, and the agronomy curriculum.

AGRON 114: Principles of Agronomy

(2-3) Cr. 3. F.S.

A foundation course in agronomy applying crop, soil, and environmental sciences in understanding agricultural systems in the world. Includes introductory concepts of plant, soil, tillage, pest, environmental, and sustainable aspects of crop production. Off-campus version offered through internet by interactive computer courseware.

AGRON 120: Introduction to Renewable Resources

(Cross-listed with ENV S, NREM). (3-0) Cr. 3. F.S.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

AGRON 154: Fundamentals of Soil Science

(2-2) Cr. 3. F.S.

Prereq: CHEM 163

Introduction to physical, chemical, and biological properties of soils, their formation, classification, and distribution. Use of soil survey and computer databank information in balancing agronomic, economic, and environmental concerns in soil management. Credit for only one of Agron 154, 155, or 156 may be applied toward graduation.

AGRON 206: Introduction to Weather and Climate

(Cross-listed with MTEOR). (3-0) Cr. 3. F.S.

Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.

AM IN 210: Introduction to American Indian Studies

(3-0) Cr. 3. F.S.SS.

Introduction to the multidisciplinary aspects of American Indian studies. Topics include literature, the arts, history, anthropology, sociology, education, and contemporary Indian politics. Guest lectures, media presentations, and discussion of assigned readings. Meets U.S. Diversity Requirement

AN S 101: Working with Animals

(1-2) Cr. 2. F.S.

A hands-on introductory course in skills for proper care and management of domestic animals. Husbandry skills including health observation, animal movement, identification, management procedures, and environmental assessment are covered.

AN S 110: Orientation in Animal Science and ISU

(2-0) Cr. 1. F.S.

Orientation to the university and Department of Animal Science. Challenges and opportunities available to the professional animal agriculturalist. Professional goal setting, portfolio development, and development of interpersonal skills in the context of pursuing a career in animal science.

AN S 114: Survey of the Animal Industry

(2-0) Cr. 2. F.S.

Ways domestic animals serve the basic needs of humans for food, shelter, protection, fuel, and emotional well-being. Terminology, basic structures of the industries surrounding the production, care, and marketing of domestic animals in the U.S.

ANTHR 201: Introduction to Cultural Anthropology

(3-0) Cr. 3. F.S.SS.

Comparative study of culture as key to understanding human behaviors in different societies. Using a global, cross-cultural perspective, patterns of family life, economic and political activities, religious beliefs, and the ways in which cultures change are examined.

Meets International Perspectives Requirement.

ANTHR 202: Introduction to Biological Anthropology and Archaeology

(3-0) Cr. 3. F.S.

Human biological and cultural evolution; survey of the evidence from fossil primates, the human fossil record and the archaeological record, as well as living primates; introduction to research methods in archaeology and biological anthropology.

ANTHR 230: Globalization and the Human Condition

(3-0) Cr. 3. F.S.

An introduction to understanding key global issues in the contemporary world. Focuses on social relations, cultural practices and political-economic linkages among Africa, the Americas, Asia, Europe and the Pacific.

Meets International Perspectives Requirement.

ARCH 221: History of Architecture I

(3-0) Cr. 3. F.

Survey of western architectural ideas and practices in their social, cultural, and representational contexts. Comparisons with global examples. Ancient through 1750.

Meets International Perspectives Requirement.

ART H 280: History of Art I

(3-0) Cr. 3. F.

Development of the visual arts including painting, sculpture, architecture, and crafts, from the prehistoric through Gothic period.

Meets International Perspectives Requirement.

ART H 292: Introduction to Visual Culture Studies

(3-0) Cr. 3.

An introduction to various topics in visual culture studies. The lecture course will provide students with a creative and intellectual context in which to study historical and contemporary instances of the visual in culture. Individual lectures examine significant trends in the visual arts, mass media, scientific imagery, visual communications, and other areas related to visual literacy and visual representation in local and global contexts. Cross cultural viewpoints and issues of diversity will be presented in relation to visual culture and related fields.

Meets U.S. Diversity Requirement

ASTRO 103: Evening Star

Cr. 1. F.S.

An entirely web-based course covering topics in celestial mechanics ("Rocket science!") for students with little or no previous experience. It combines the geography of the solar system with discussion of methods of traveling to the other planets. The course "lectures" are on-line, interactive units with built-in exercises, hands-on (offline) activities, and layers of help. Graded homework and quizzes are administered via Blackboard Learn. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 120: The Sky and the Solar System

(3-0) Cr. 3. F.S.SS.

For the nonscientist. A survey of our view of the universe, and the exploration of the solar system and beyond. The sky: constellations; motions of the Sun, Moon, and planets; seasons and the calendar; eclipses. The solar system: origin and evolution; characteristics of the Sun, planets, satellites, comets, meteorites, and asteroids. The detection and characterization of other solar systems, and the search for life in the universe. Extensive use of the planetarium is included. Students who take Astro 120 may count credit in only one of Astro 102 or 103 toward graduation.

ASTRO 150: Stars, Galaxies, and Cosmology

(3-0) Cr. 3. F.S.

For the nonscientist. A survey of astronomy with a focus on the universe beyond our solar system. Basic observational astronomy and the history of astronomy. Stellar astronomy: motions, distances, sizes, spectra; types of stars; variability; binary systems. Stellar evolution: the birth, life, and death of stars, including supernovae, neutron stars, and black holes. The structure and evolution of the Milky Way Galaxy. Other galaxies, clusters of galaxies, quasars. Theories of the origin of the universe.

BBMB 101: Introduction to Biochemistry

(1-0) Cr. 1. F.

Research activities, career opportunities in biochemistry and biophysics, and an introduction to the structure of biologically important compounds. For students majoring in biochemistry, agricultural biochemistry or biophysics or considering one of these majors.

BIOL 101: Introductory Biology

(3-0) Cr. 3. F.S.SS.

Life considered at cellular, organism, and population levels. Function and diversity of the living world. Presentation of basic biological principles as well as topics and issues of current human interest. Does not satisfy biology major requirements.

BIOL 110: Introduction to Biology

Cr. 1. F.

Orientation to the scope of the biological sciences, and discussion of professional opportunities. Required of first year biology majors. Offered on a satisfactory-fail basis only.

BIOL 155: Human Biology

(3-0) Cr. 3. F.S.

A survey course of human biology, including principal structures and functions of the body systems and the diseases and disorders associated with them. Designed to meet general education requirements in natural science. Not recommended for those seeking a career in the allied health professions or for students majoring in life science. Does not satisfy biology major requirements.

BIOL 173: Environmental Biology

(Cross-listed with ENV S). (3-0) Cr. 3. F.S.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

BIOL 211: Principles of Biology I

(3-0) Cr. 3. F.S.

Prereq: High school biology

Introduction to the nature of life, including the diversity of microbial, plant, and animal life; the nature of heredity; evolution; and principles of ecology. Intended for life science majors.

BIOL 211L: Principles of Biology Laboratory I

(0-3) Cr. 1. F.S.

Prereq: Credit or enrollment in BIOL 211

Laboratory to accompany 211.

BIOL 212: Principles of Biology II

(3-0) Cr. 3. F.S.

Prereq: High School Biology; high school chemistry or credit or enrollment in CHEM 163 or CHEM 177

Introduction to the chemical, molecular, and cellular basis of life; form and function of microbial, plant, and animal life. Intended for life science majors.

BIOL 212L: Principles of Biology Laboratory II

(0-3) Cr. 1. F.S.

Prereq: credit or enrollment in BIOL 212

Laboratory to accompany 212.

BIOL 255: Fundamentals of Human Anatomy

(3-0) Cr. 3. F.

Prereq: High School Biology and Chemistry, or BIOL 101

An introduction to human anatomy, beginning with cells and tissues, surveying all body systems, relating form to function. Systems covered include: integumentary, bones and joints, muscles, nervous, sensory, endocrine, circulatory, lymphatic, respiratory, digestive, urinary, and reproductive. Pre-Medical students should consider Biol 351 for their anatomy background. Does not satisfy biology major requirements.

BIOL 255L: Fundamentals of Human Anatomy Laboratory

(0-3) Cr. 1. F.

Prereq: Credit or enrollment in BIOL 255

Investigation of human anatomy using models and dissections of preserved organs and model mammals. Pre-Medical students should consider 351 for their anatomy background. Does not satisfy biology major requirements.

BUSAD 103: Orientation

(1-0) Cr. 1. F.S.

A required orientation for all College of Business students. Review of college and university requirements, transfer credits, academic planning, university policies and deadlines, and registration procedures. Includes group advising for course selection and registration. Only one of BUSAD 101, 102, or 103 may be counted toward graduation.

C E 160: Engineering Problems with Computational Laboratory

(2-2) Cr. 3. F.S.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Formulation of engineering problems using spreadsheets and Visual Basic for Application for solution. Presenting results using word processing, tables, and graphs. Introduction to engineering economics and statics. Civil engineering examples.

C E 170: Graphics for Civil Engineering

(0-4) Cr. 2. F.S.

Fundamental graphics. Introduction to computer aided drafting and modeling. Civil engineering applications.

C I 204: Social Foundations of Education in the United States

(3-0) Cr. 3. F.S.SS.

Introduction to the historical and contemporary landscape of schooling in the United States. Emphasis is placed on topics and tensions in the relationship between school and society (e.g. equity of access to education and competing purposes of education) and the implications of these topics and tensions for teaching and learning in public schools. Designed for prospective teachers.

C R P 201: The North American Metropolis

(3-0) Cr. 3. F.S.

Examination of the evolution of American urban centers from the colonial era to the present. Considers the demographic changes and social movements underway in urban America and explores how an understanding of the history of cities provides us with knowledge that we can use to improve our cities today.
Meets U.S. Diversity Requirement

CH E 160: Chemical Engineering Problems with Computer Applications Laboratory

(2-2) Cr. 3. F.S.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Formulation and solution of engineering problems. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to material balances, engineering economics, and design. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. Chemical Engineering examples.

CHEM 050: Preparation for College Chemistry

(3-0) Cr. 0. F.S.

Prereq: 1 year high school algebra

An in-depth active learning experience designed to impart the fundamental concepts and principles of chemistry, with an emphasis on mathematics skills and logical thinking. For students intending to enroll in general chemistry and who have not taken high school chemistry or who have not had a high school college preparatory chemistry course who need a review of chemical problem solving and chemical concepts. Credit for Chem 50 does not count toward graduation.

CHEM 160: Chemistry in Modern Society

(3-0) Cr. 3. F.S.

Aspects of chemistry visible to a non-scientist in our society. A survey of selected areas of chemistry with emphasis on the interface between chemistry and other fields of human activity.

CHEM 163: College Chemistry

(4-0) Cr. 4. F.S.SS.

Prereq: 1 year of high school algebra and geometry and Chem 50 or 1 year of high school chemistry; and credit or enrollment in CHEM 163L

A general survey of chemistry with an emphasis on conceptual problems for those who are not physical and biological science or engineering majors. Nomenclature, chemical reactions, stoichiometry, atomic structure, periodic properties, chemical bonding, states of matter, solutions, thermochemistry, acid-base theory, oxidation-reduction reactions, basic chemical kinetics, and chemical equilibrium. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 163L: Laboratory in College Chemistry

(0-3) Cr. 1. F.S.SS.

Prereq: Credit or enrollment for credit in CHEM 163

Laboratory to accompany CHEM 163. Must be taken with CHEM 163. Only one of Chem 163L, CHEM 167L, and CHEM 177L may count toward graduation.

CHEM 167: General Chemistry for Engineering Students

(4-0) Cr. 4. F.S.

Prereq: 1 year of high school chemistry or CHEM 50 and Math 143 pre-calculus or high school equivalent.

Principles of chemistry and properties of matter explained in terms of modern chemical theory with emphasis on topics of general interest to the engineer. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 177: General Chemistry I

(4-0) Cr. 4. F.S.SS.

Prereq: MATH 140 or high school equivalent, and CHEM 50 or 1 year high school chemistry, and credit or enrollment in CHEM 177L. Chemistry and biochemistry majors may consider taking CHEM 201

The first semester of a two semester sequence which explores chemistry at a greater depth and with more emphasis on concepts, problems, and calculations than 163. Recommended for physical and biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses. Principles and quantitative relationships, stoichiometry, chemical equilibrium, acid-base chemistry, thermochemistry, rates and mechanism of reactions, changes of state, solution behavior, atomic structure, periodic relationships, chemical bonding. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHEM 177L: Laboratory in General Chemistry I

(0-3) Cr. 1. F.S.SS.

Prereq: Credit or enrollment for credit in CHEM 177

Laboratory to accompany 177. 177L must be taken with 177. Only one of Chem 163L, 167L, and 177L may count toward graduation.

CHEM 177N: Laboratory in General Chemistry I

(0-3) Cr. 1. F.

Prereq: Credit or enrollment for credit in CHEM 177. For chemistry and biochemistry majors

Laboratory to accompany CHEM 177. CHEM 177N must be taken with CHEM 177. Only one of Chem 163L, CHEM 167L, and CHEM 177N may count toward graduation.

CHEM 178: General Chemistry II

(3-0) Cr. 3. F.S.SS.

Prereq: CHEM 177, CHEM 177L

Continuation of 177. Recommended for physical or biological science majors, chemical engineering majors, and all others intending to take 300-level chemistry courses.

CHEM 201: Advanced General Chemistry

(5-0) Cr. 5. F.

Prereq: Co-enrollment in MATH 165 or credit, one year of high school chemistry, and one year high school physics or advanced chemistry. Co-enrollment in CHEM 201L.

A one-semester course in general chemistry designed to give students an in-depth, broad-based view of modern chemistry, and, in part, to facilitate participation in independent undergraduate research. Topics include stoichiometry, atomic and molecular structure, chemical bonding, kinetics, chemical equilibria, and thermodynamics. Discussion of current trends in various chemical disciplines, which may be given by guest experts in chemistry, biochemistry, and chemical engineering, will help the student appreciate the scope of the chemical sciences and how research is carried out. Only one of Chem 163, 167, 177, or 201 may count toward graduation.

CHIN 101: Elementary Mandarin Chinese I

(5-0) Cr. 5. F.

Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters.

CHIN 201: Intermediate Mandarin Chinese I

(5-0) Cr. 5. F.

Prereq: CHIN 102

Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. Meets International Perspectives Requirement.

CJ ST 240: Introduction to the U.S. Criminal Justice System

(3-0) Cr. 3. F.

Provides systematic overview of law, police organization and behavior, prosecution and defense, sentencing, the judiciary, community corrections, penology, and capital punishment. The course demonstrates the role of discretion in all of these agencies as well as the sociological influences of age, race, gender, and social class on criminal justice system processes.

CJ ST 241: Youth and Crime

(Cross-listed with SOC). (3-0) Cr. 3. F.

Prereq: SOC 134

An examination of delinquency that focuses on the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents' rights, and traditional and alternative ways of dealing with juvenile crime.

CL ST 201: Technical Terminologies in the Professions

(3-0) Cr. 3. F.S.

Essential vocabulary and concepts in English that are derived from Latin and Ancient Greek. Formation and usage of technical terminology. Cultural influence of the classical languages. Analysis of technical writing.

CL ST 273: Greek and Roman Mythology

(3-0) Cr. 3. F.S.S.

Survey of the legends, myths of the classical world with emphasis on the principal gods, and heroes, and their relation to ancient social, psychological, and religious practices; some attention may be given to important modern theories.

Meets International Perspectives Requirement.

COM S 101: Orientation

Cr. R. F.S.

Introduction to the procedures and policies of Iowa State University and the Department of Computer Science, test-outs, honorary societies, etc. Issues relevant to student adjustment to college life will also be discussed. Offered on a satisfactory-fail basis only.

COM S 103: Computer Applications

Cr. 4. F.S.S.S.

Introduction to computer literacy and applications. Applications: Windows, Internet browser/HTML, word processing, spreadsheets, database management and presentation software. Literacy: history of computing, structure of computers, telecommunications, computer ethics, computer crime, and history of programming languages. No prior computer experience necessary. Course is offered online only. Students must attend an orientation session the first week of class.

COM S 104: Introduction to Programming

(1.5-1) Cr. 2. F.S.

Offered first 8 weeks and last 8 weeks. Use of personal computer and workstation operating systems and beginning programming. Project-oriented approach to computer operation and programming, including use of tools to aid in programming. Topics from computer history, using basic Windows and Unix tools, program structure, expression, variables, decision and logic, and iteration. No prior computer experience necessary.

COM S 107: Applied Computer Programming

(3-0) Cr. 3. F.S.

Introduction to computer programming for non-majors using a language such as the Visual Basic language. Basics of good programming and algorithm development. Graphical user interfaces.

COM S 207: Fundamentals of Computer Programming

(Cross-listed with MIS). (3-1) Cr. 3. F.S.

Prereq: MATH 150 or placement into MATH 140/MATH 141/MATH 142 or higher

An introduction to computer programming using an object-oriented programming language. Emphasis on the basics of good programming techniques and style. Extensive practice in designing, implementing, and debugging small programs. Use of abstract data types. Interactive and file I/O. Exceptions/error-handling. This course is not designed for computer science, software engineering, and computer engineering majors. Credit may not be applied toward graduation for both Com S 207/ MIS 207 and Com S 227.

COM S 227: Introduction to Object-oriented Programming

(3-2) Cr. 4. F.S.

Prereq: Placement into MATH 143, 165, or higher; recommended: a previous high school or college course in programming or equivalent experience.

Introduction to object-oriented design and programming techniques. Symbolic and numerical computation, recursion and iteration, modularity procedural and data abstraction, and specifications and subtyping. Object-oriented techniques including encapsulation, inheritance and polymorphism. Imperative programming. Emphasis on principles of programming and object-oriented design through extensive practice in design, writing, running, debugging, and reasoning. Course intended for Com S majors. Credit may not be applied toward graduation for both Com S 207 and 227.

COM S 228: Introduction to Data Structures

(3-1) Cr. 3. F.S.

Prereq: Minimum of C- in 227, credit or enrollment in MATH 165

An object-oriented approach to data structures and algorithms. Object-oriented analysis, design, and programming, with emphasis on data abstraction, inheritance and subtype polymorphism. Abstract data type specification and correctness. Collections and associated algorithms, such as stacks, queues, lists, trees. Searching and sorting algorithms. Graphs. Data on secondary storage. Analysis of algorithms. Emphasis on object-oriented design, writing and documenting medium-sized programs. This course is designed for majors.

COMST 101: Introduction to Communication Studies

(3-0) Cr. 3.

An introduction to communication theory, the development and functions of communication, and a survey of verbal, nonverbal, interpersonal, small group, organizational, and intercultural communication.

CPR E 131: Introduction to Computer Security Literacy

(Cross-listed with INFAS). (1-0) Cr. 1.

Basic concepts of practical computer and Internet security: passwords, firewalls, antivirus software, malware, social networking, surfing the Internet, phishing, and wireless networks. This class is intended for students with little or no background in information technology or security. Basic knowledge of word processing required. Offered on a satisfactory-fail basis only.

CPR E 185: Introduction to Computer Engineering and Problem Solving I
(2-2) Cr. 3.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Introduction to Computer Engineering. Project based examples from computer engineering. Individual interactive skills for small and large groups. Computer-based projects. Solving engineering problems and presenting solutions through technical reports. Solution of engineering problems using a programming language.

DANCE 270: Dance Appreciation

(3-0) Cr. 3. F.S.SS.

Introduction to the many forms and functions of dance in world cultures. Develop abilities to distinguish and analyze various dance styles. No dance experience required.

DES 230: Design Thinking

(3-0) Cr. 3. F.S.

Introduction to the phenomenon of design thinking as it appears in various design fields, including methodologies of reasoning and problem solving; patterns of creativity and individual style; and the interaction of art, science, and technology.

DSN S 102: Design Studio I

(1-6) Cr. 4.

A core design studio course exploring the interaction of two-and three-dimensional design. Emphasis on fundamental skills and ideas shared across design disciplines. Investigation of creative process, visual order and materials, and development of critical thinking through studio projects and lectures. Includes study of precedents, contemporary design practices and disciplines in their cultural contexts.

DSN S 131: Design Representation

(1-6) Cr. 4.

An introduction to drawing through lecture and studio experiences. Focus on creative problem solving and communication in order to give visual form to ideas. Emphasis on perceptual, conceptual, and evaluative abilities through experiences that build eye, brain, and hand coordination. Explorations include drawing from observation and memory, working at various scales and duration, and using a variety of media and processes.

DSN S 183: Design Cultures

(3-0) Cr. 3.

A broad-based exploration of the dynamic relationship between design and culture, employing case study method to investigate particular examples of cultural production in contemporary society. Design processes and design works are presented as culturally, economically, environmentally, historically, ideologically, politically, and socially grounded events and artifacts.

DSN S 232: Digital Design Communications

(3-0) Cr. 3.

Introductory investigations of various digital design media to develop multi-dimensional problem solving, digital communication skills and perceptual sensitivity. Open to all university majors.

E E 185: Introduction to Electrical Engineering and Problem-Solving I
(2-2) Cr. 3. F.S.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Project based examples from electrical engineering. Systematic thinking process for engineering problem solving. Group problem solving. Mathematical, conceptual and computer based projects. Solving engineering problems and presenting solutions through technical reports and oral presentations. Solutions of engineering problems using computation tools and basic programming.

ECON 101: Principles of Microeconomics

(3-0) Cr. 3. F.S.SS.

Resource allocation, opportunity cost, comparative and absolute advantage. Supply and demand. Marginal analysis. Theories of production and consumption, pricing, and the market system. Perfect and imperfect competition and strategic behavior. Factor markets. Present discounted value.

ECON 101L: Laboratory in Principles of Microeconomics

(0-2) Cr. 1. F.

Prereq: Concurrent enrollment in the appropriate section of ECON 101
Discussion of material typically covered in Econ 101. Application of economic principles to real world problems. Economic principles and basic business management concepts applied to decision-making in agribusiness operations.

ECON 102: Principles of Macroeconomics

(3-0) Cr. 3. F.S.SS.

Prereq: ECON 101 recommended

Measurement of macro variables and general macro identities. Classical models of full employment. Production and growth. Savings and investment. Employment and unemployment. Money, inflation, and price levels. Operation of the U.S. banking system. Fiscal and monetary policy. Elements of international finance.

ECON 235: Introduction to Agricultural Markets

(3-0) Cr. 3. F.S.

Prereq: ECON 101

Basic concepts and economics principles related to markets for agricultural inputs and products. Overview of current marketing problems faced by farms and agribusinesses, farm and retail price behavior, structure of markets, food marketing channels, food quality and food safety, and the role of agriculture in the general economy. The implications of consumer preferences at the farm level. Introduction to hedging, futures, and other risk management tools.

ENGL 099L: Strategies for Nonnative Speakers of English: Strategies for Listening

Cr. 0. F.S.

Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department's option

ENGL 099R: Strategies for Nonnative Speakers of English: Strategies for Reading

Cr. 0. F.S.

Prereq: Recommendation of English Department; placement in sections L and R is determined by examination; section S is open to all interested international students. Available P/NP to graduate students at their department's option

ENGL 101B: English for Native Speakers of Other Languages: Academic English

(3-0) Cr. 3. F.S.

Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)

For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 101C: English for Native Speakers of Other Languages: Academic English II--Undergraduates

(3-0) Cr. 3. F.S.

Prereq: Recommendation of English Department; placement in various sections is determined by examination. (See English Requirement for International Students in Index.)

For undergraduates: Completion of ENGL 101 requirement prepares students for ENGL 150. For graduates: Completion of ENGL 101 satisfies the English requirement of the Graduate College. ENGL 101 courses are limited to students who are nonnative speakers of English. Credit from ENGL 101 does not count toward graduation.

ENGL 150: Critical Thinking and Communication

(3-0) Cr. 3. F.S.SS.

Prereq: Concurrent enrollment in LIB 160 is recommended.

Application of critical reading and thinking abilities to topics of civic and cultural importance. Introduction of basic oral, visual, and electronic communication principles to support writing development. Initiation of communication portfolio.

ENGL 201: Introduction to Literature

(3-0) Cr. 3.

Prereq: Credit in or exemption from 150

Study of selected examples of drama, poetry, short fiction, and the novel drawn from both British and American literature. Recommended for nonmajors.

ENGL 225: Survey of British Literature to 1800

(3-0) Cr. 3.

Prereq: ENGL 250

Representative works of British literature from the origins to 1800 in historical, cultural, and literary contexts. Will include multiple genres.

ENGL 226: Survey of British Literature since 1800

(3-0) Cr. 3.

Prereq: ENGL 250

Representative works from 1800 to the present in historical, cultural, and literary contexts. Will include multiple genres and may include texts that reflect and/or critique the impact and legacy of the British empire on its former colonies, i.e., postcolonial literature.

ENGL 237: Survey of Film History

(3-0) Cr. 3. F.

Prereq: Credit in or exemption from 150

A survey of the history of film, both U.S. and international, from the beginnings in the late nineteenth century to the present.

ENGL 240: Introduction to American Indian Literature

(Cross-listed with AM IN). (3-0) Cr. 3. F.

Prereq: Credit in or exemption from ENGL 150

Appreciation of oral and written forms of American Indian literatures. Tropes and techniques in oral, visual and written texts. Focus on the role of American Indians in interdisciplinary approaches to modern social and environmental issues as expressed in literary works. Meets U.S. Diversity Requirement

ENGL 250: Written, Oral, Visual, and Electronic Composition

(3-0) Cr. 3. F.S.SS.

Prereq: ENGL 150 or exemption from ENGL 150; sophomore classification or exemption from ENGL 150; credit for or concurrent enrollment in LIB 160

Analyzing, composing, and reflecting on written, oral, visual, and electronic (WOVE) discourse within academic, civic, and cultural contexts. Emphasis on supporting a claim and using primary and secondary sources. Continued development of communication portfolio.

ENGL 275: Analysis of Popular Culture Texts

(Cross-listed with SP CM). (3-0) Cr. 3. F.S.

Prereq: Credit in or equivalent of 250

Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

ENGR 160: Engineering Problems with Computer Applications Laboratory

(2-2) Cr. 3. F.S.SS.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Solving engineering problems and presenting solutions through technical reports. Significant figures. Use of SI units. Graphing and curve-fitting. Flowcharting. Introduction to mechanics, statistics and engineering economics. Use of spreadsheet programs to solve and present engineering problems. Solution of engineering problems using computer programming languages. (The honors section includes application of programming to mobile robotics).

ENT 201: Introduction to Insects

(1-0) Cr. 1. F.S.SS.

5 weeks. Classroom section spring only. World Wide Web section of course offered summer and fall semesters. Biological and ecological aspects of insects.

ENT 211: Insects and Society

(2-0) Cr. 2. F.S.

Prereq: ENT 201

11 weeks. Classroom section spring only. World Wide Web section offered fall semester. The importance of insects in human well-being. Insect-human interactions. Primarily for nonscience and nonagriculture majors.

ENV S 101: Environmental Geology: Earth in Crisis

(Cross-listed with GEOL). (3-0) Cr. 3. F.S.

An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism.

ENV S 120: Introduction to Renewable Resources

(Cross-listed with AGRON, NREM). (3-0) Cr. 3. F.S.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

ENV S 173: Environmental Biology

(Cross-listed with BIOL). (3-0) Cr. 3. F.S.

An introduction to the structure and function of natural systems at scales from the individual to the biosphere and the complex interactions between humans and their environment. Discussions of human population growth, biodiversity, sustainability, resource use, and pollution. Does not satisfy biology major requirements.

ENV S 201: Introduction to Environmental Issues

(Cross-listed with BIOL, ENSCI). (2-0) Cr. 2. F.

Discussion of current and emerging environmental issues such as human population growth, energy use, loss of biodiversity, water resources, and climate change.

FRNCH 101: Elementary French I

(4-0) Cr. 4. F.SS.

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

FRNCH 201: Intermediate French I

(4-0) Cr. 4. F.

Prereq: FRNCH 102

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Meets International Perspectives Requirement.

FS HN 101: Food and the Consumer

(3-0) Cr. 3. F.S.

Prereq: High school biology and chemistry or 3 credits each of biology and chemistry

The food system from point of harvest to the consumption of the food by the consumer. Properties of food constituents. Protection of food against deterioration and microbial contamination. Introduction of foods into the marketplace. Processes for making various foods. Government regulations. Use of food additives. Current and controversial topics. Electronic communication from web emphasized for class reports, notes and assignments.

FS HN 110: Professional and Educational Preparation

(1-0) Cr. 1. F.S.

Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation as well as enhancement of communication skills. Offered on a satisfactory-fail basis only.

FS HN 167: Introduction to Human Nutrition

(3-0) Cr. 3. F.S.SS.

Prereq: High school biology or 3 credits of biology

Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family.

GEOL 100: The Earth

(3-0) Cr. 3. F.S.SS.

How does the earth work, what is it made of, and how does it change through time? Plate tectonics, Earth materials, landforms, structures, climate, and natural resources. Emphasis on the observations and hypotheses used to interpret earth system processes. Students may also enroll in Geol 100L.

GEOL 100L: The Earth: Laboratory

(0-2) Cr. 1. F.S.

Prereq: Credit or enrollment in GEOL 100

Students will gain understanding of how Earth processes affect their lives and how they affect the Earth, and of the complex nature of the Earth and its processes. They will gain a deep knowledge of the methods used to understand the time scales and rates of Earth processes also through an applied research experience on groundwater and surface water.

GEOL 101: Environmental Geology: Earth in Crisis

(Cross-listed with ENV S). (3-0) Cr. 3. F.S.

An introduction to geologic processes and the consequences of human activity from local to global scales. Discussion of human population growth, resource depletion, pollution and waste disposal, global warming and ozone depletion, desertification, and geologic hazards such as earthquakes, landslides, flooding, and volcanism.

GEOL 105: Gems and Gemstones

(2-0) Cr. 1. F.

Offered in second half of the semester. Introduction to gems and gemstones, physical and optical properties of gems and gemstones, explanation of where gems come from and how they are found, how to distinguish between synthetic and naturally occurring gems, how the value of gems are determined, and the history of famous gems.

GEOL 108: Introduction to Oceanography

(Cross-listed with ENV S). (3-0) Cr. 3. F.

Introduction to study of the oceans. Ocean exploration. Waves and currents. Shape, structure, and origin of the ocean basins. Sedimentary record of oceanic life. Composition of seawater and its significance for life. Ocean circulation and its influence on climate. Life of the oceans, including coral reefs. Use and misuse of ocean resources. Anthropogenic impacts on the oceanic environment.

GEOL 111: Geological Disasters

(Cross-listed with ENV S). (1-0) Cr. 1. F.S.SS.

Introduction to the catastrophic geologic processes that disrupt ecosystems and human activity. Includes a discussion on the role of plate tectonics, the hydrologic cycle, and humans as the driving forces behind selected case studies on volcanic eruptions, earthquakes, tsunamis, landslides, and floods. Summer - online only.

GEOL 201: Geology for Engineers and Environmental Scientists

(2-2) Cr. 3. F.

Introduction to Earth materials and processes with emphasis on engineering and environmental applications.

GER 101: Elementary German I

(4-0) Cr. 4. F.SS.

Introduction to German language within the context of German culture; practice in the basic skills.

GER 201: Intermediate German I

(4-0) Cr. 4. F.

Prereq: GER 102

Review of grammar, selected readings, further practice in oral and written communication.

Meets International Perspectives Requirement.

GREEK 101: Elementary Ancient Greek I

(4-0) Cr. 4. F.

Grammar and vocabulary of ancient Greek, within the context of Greek culture; reading knowledge through texts adapted from classical authors.

H S 105: First Aid and Emergency Care

(1-2) Cr. 2. F.S.SS.

Discussion and application of the basic techniques of utilizing bloodborne pathogen safety measures, administering first aid and cardiopulmonary resuscitation. ARC layperson certification available.

H S 110: Personal and Consumer Health

(3-0) Cr. 3. F.S.

Physical, mental, emotional and social aspects of health as a basis for understanding and preventing health problems. False and misleading advertising and effects of cultists and faddists on consumer health. Study of legislation and agencies concerned with consumer protection and health insurance.

H SCI 110: Orientation and Human Sciences Career Exploration

(2-0) Cr. 2. F.S.

Orientation and adjustment to the university and college; policies and procedures; academic resources; and development of a long-term curriculum plan. Comprehensive approach to career development; intensive self-analysis; and in-depth examination of majors in Human Sciences. Required for all students declared as Open Option in the College of Human Sciences.

H SCI 150: Dialogues on Diversity

(1-0) Cr. 1. F.S.

An exploration of diversity within the context of the Iowa State University community through understanding human relations issues.

Meets U.S. Diversity Requirement

HD FS 102: Individual and Family Development, Health, and Well-being

(3-0) Cr. 3. F.S.SS.

Overview of life-span developmental tasks (physical, cognitive, language, social, emotional) examined from various theoretical perspectives. Discussion of topics related to family diversity, individual/family health and well-being and reciprocal relationships as affected by external factors.

HD FS 183: Personal Finance in Early Adulthood

(1-0) Cr. 1. F.S.SS.

Introduction to basic concepts and budgeting practices for management of resources and prevention of financial problems commonly associated with college, including credit and student loans. Offered on a satisfactory-fail basis only.

HD FS 223: Child Development and Health

(3-0) Cr. 3. F.S.

Typical and atypical development of children prenatal through middle childhood. Examination of healthy development and potential impact of health issues in children. Discussion of influence of the family and society on development.

HD FS 239: Housing and Consumer Issues

(3-0) Cr. 3. F.S.

Introduction to factors affecting consumer and housing decisions of individuals and families, including housing issues such as housing quality, accessibility and affordability, neighborhood/housing contexts for families; and consumer issues such as consumer protection, legislation and regulation, and consumer fraud.

Meets U.S. Diversity Requirement

HD FS 240: Literature for Children

(3-0) Cr. 3. F.S.

Evaluation of literature for children, including an emphasis on diversity and inclusion; cultural competence. Roles of literature in the overall development of children. Literature selection and use in the home and educational settings.

Meets U.S. Diversity Requirement

HD FS 276: Human Sexuality

(3-0) Cr. 3. F.S.SS.

Behavioral, biological, and psychological aspects of human sexuality within the social context of family, culture, and society. Role of sexuality in human development. Critical analysis of media and research. Communication and decision-making skills relating to sexuality issues and relationships.

Meets U.S. Diversity Requirement

HIST 201: Introduction to Western Civilization I

(3-0) Cr. 3. F.

Western civilization from ancient Mediterranean world to 1500. Social and cultural developments; economic and political ideas and institutions; problems of historical change and continuity.

Meets International Perspectives Requirement.

HIST 207: Chinese Civilization

(3-0) Cr. 3.

Origins, development, decline and transformation of China from earliest times to present.

Meets International Perspectives Requirement.

HIST 221: Survey of United States History I

(3-0) Cr. 3-5. F.

Colonial foundations: revolution, confederation, and constitution; nationalism and democracy; sectional disunity, Civil War, and reunion.

HIST 225: Introduction to Asian American Studies

(3-0) Cr. 3.

An interdisciplinary and chronological examination of Asian American immigration experiences from the early 19th century to the 21st century. Focus on how these immigration histories are accompanied by changing racial constructions. Discussion of racial stereotyping, the model minority myth, identity development, and efforts for social justice.

Meets U.S. Diversity Requirement

HIST 280: Introduction to History of Science I

(3-0) Cr. 3.

Ideas of nature from ancient Greece to the seventeenth-century scientific revolution.

Meets International Perspectives Requirement.

HORT 121: Home Horticulture

(2-0) Cr. 2. F.S.

Growing plants in and around the home including requirements for growing house plants; plant propagation; designing and maintaining flower, fruit, and vegetable gardens; lawn, tree, and shrub maintenance.

HORT 122: Hands-On Home Horticulture

(1-0) Cr. 1. F.S.

Demonstration and activities that illustrate principles of growing plants for the home garden. Topics include floral and landscape design, plant identification, propagation, selection, and management for indoor and outdoor gardens.

HSP M 101: Introduction to the Hospitality Industry

(3-0) Cr. 3. F.S.

Introduction to the foodservice, lodging, and tourism components of the hospitality industry. Background information, current issues, and future challenges in various segments of the industry.

I E 148: Information Engineering

(2-2) Cr. 3. F.S.

Prereq: Credit or enrollment in MATH 143

Development of information solutions for engineering problems. Fundamentals of the software development process. Engineering computations and the human/computer interface. Data models and database development. Program connectivity and network applications.

JL MC 101: Mass Media and Society

(3-0) Cr. 3. F.S.SS.

Communication theory models and their application to the mass media; the mass communication process; organization, characteristics and responsibilities of the mass media; media literacy process.

JL MC 110: Orientation to Journalism and Communication

(1-0) Cr. 1. F.S.Alt. SS., offered irregularly.

Orientation to professional and pre-professional opportunities, writing for the mass media and curriculum requirements in the Greenlee School. Basic media writing preparation. Offered on a satisfactory-fail basis only.

KIN 252: Disciplines and Professions in Kinesiology and Health

(1-0) Cr. 1. F.S.

Overview of the various disciplines and professions that comprise the field of Kinesiology (the study of human movement) and help students determine the career option that best fits their interests.

KIN 253: Orientation and Learning Community in Kinesiology and Health

(1-0) Cr. 1. F.S.

Prereq: Concurrent enrollment or credit in KIN 252

Overview of ISU policies and procedures, academic advising operations, degree requirements, program of study planning, and campus resources. Students will have out-of-class activities and work with faculty, staff and mentors to explore careers in Kinesiology and complete assignments related to identification & development of their skills and interests. Department of Kinesiology students only. Offered on a satisfactory-fail basis only.

LAS 101: Orientation for Open Option and Preprofessional Students

(1-0) Cr. 1. F.S.

Introduction to all undergraduate colleges. Provides information about university resources and services, assists with a successful academic transition to the university, and helps initiate the process of identifying academic major(s) and eventual career paths. Required of all first-year students in Open Option and Preprofessional Programs. Offered on a satisfactory-fail basis only.

LATIN 101: Elementary Latin I

(4-0) Cr. 4. F.

Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors.

LD ST 122: Leading with Purpose

(1-0) Cr. 1. F.S.

Designed for emerging student leaders, this course will provide students with basic leadership skills covering strengths identification, personal skills development, goal achievement, values-based behaviors, and mission statement development.

LD ST 270: Campus Leadership Development

(3-0) Cr. 3. F.S.

Theory and practice of effective leadership in a campus context. Study of effective leadership models and leadership in complex systems. Expectation of engagement in campus activities.

LIB 160: Information Literacy

(1-0) Cr. 1. F.S.SS.

Prereq: For students whose native language is not English: Completion of ENGL 101 requirement.

Eight-week course required for undergraduate degree. Provides a solid understanding of information literacy and the research process with emphases on finding, evaluating, and using scholarly information; the ethical and legal framework related to information use; and utilization of library discovery tools. To be taken as early as possible in the student's undergraduate career. See course descriptions of ENGL 150 and ENGL 250 for requirements related to LIB 160. Offered on a satisfactory-fail basis only.

LING 119: Introduction to World Languages

(Cross-listed with WLC). (3-0) Cr. 3.

Study of language diversity and the personal, social and political effects of diversity. Language families, attitudes toward language and language use, language and culture, multilingualism, foreign language learning, written codes, official languages, and language policy. Meets International Perspectives Requirement.

LING 120: Computers and Language

(Cross-listed with ENGL). (3-0) Cr. 3.

Introduction to the use of linguistic knowledge in computer applications today and the basic computational techniques used in such applications. The development of these techniques throughout the history of computational linguistics. How the study of language has contributed to the advancement of technology and how certain computational problems have influenced the way linguists study language.

M E 160: Mechanical Engineering Problem Solving with Computer Applications

(2-2) Cr. 3. F.S.

Prereq: M E majors only. MATH 142 or MATH 143 or MATH 145; credit or enrollment in MATH 165.

Introduction to the field of Mechanical Engineering through problem-solving in a range of topics including statics, mechanics of materials and thermo-fluids. Techniques to professionally present and communicate solutions. Use of MATLAB computer programming to aid problem solving, including curve fitting and graphing. Only one of M E 160, ENGR 160, Aer E 160, C E 160, CPR E 185, E E 185, S E 185 and I E 148 may count towards graduation.

M E 170: Engineering Graphics and Introductory Design

(2-2) Cr. 3. F.S.

Prereq: Satisfactory scores on mathematics placement assessments; credit or enrollment in MATH 142 or MATH 143 or MATH 145

Integration of fundamental graphics, computer modeling, and engineering design. Applications of multiview drawings and dimensioning. Techniques for visualizing, analyzing, and communicating 3-D geometries. Application of the design process including written and oral reports. Freehand and computer methods.

M S 101: Introduction to Military Science

(1-0) Cr. 1. F.

Prereq: Concurrent enrollment in M S 101L required

Examines the role of a Cadet in the Army Reserve Officer Training Corps and a Lieutenant in the United States Army. The course explores a military culture whose ultimate success is determined by the character and proficiency of its' leaders. Instruction introduces students to the cultural heritage and history of the U.S. Army. Students will begin to understand the structure of the U.S. Army and how it functions as an organization and institution. The curriculum promotes the development of students' communication skills to enhance their ability to transmit ideas. The class examines how the Army's cultural values drive the development of leadership in the Officer Corps. Hands-on activities enable students to gain insight on the skills and abilities required of cadets and officers interacting with civilians and soldiers.

M S 101L: Basic Leadership Laboratory I

(0-2) Cr. 1. F.

Prereq: Concurrent enrollment in M S 101 required

Uses basic military training, missions and scenarios to provide a hands-on method of developing confidence and leadership skills. Students observe and participate in the rotation through various levels of leadership positions at the platoon and squad level within the Army command structure. This concept provides a constant learning environment as they learn to communicate effectively and work as a team while assigned to positions at various levels within the organization. Marching, rifle firing, and tactical patrolling; students gain confidence through rappelling and construction/use of rope bridges; and increase professional knowledge in areas such as first aid, water survival, personal physical fitness, and land navigation. Teaching locations include the ISU Armory, Camp Dodge (National Guard Facility), Pammel Woods (ISU campus), and ISU fitness centers. Full participation in all events will be determined based on students' physical and medical eligibility.

M S 150: Army Physical Readiness

(0-3) Cr. 1. Repeatable. F.S.

This lab is designed to use basic military skills and instruction to develop confidence, leadership, and physical fitness. The team approach is utilized in the instruction and application of Army physical fitness requirements. Students will learn various Army physical fitness techniques as well as how to conduct physical fitness sessions. Teaching locations include Lied Recreation Center, Beyer Hall, State Gym as well as around campus. Full participation in all events will be determined based on students physical and medical eligibility.

MATH 010: High School Algebra

(4-0) Cr. 0. F.S.

For students who do not have adequate facility with topics from high school algebra or do not meet the algebra admission requirement.

The course is divided into tracks of one- and two-semester lengths.

For most students a diagnostic exam will determine which track must be taken. Students will receive a grade in MATH 25 or MATH 30 respectively depending on the level of material covered. Satisfactory completion of MATH 30 is recommended for students planning to take MATH 140, MATH 143, MATH 145, MATH 150, or MATH 151, while MATH 25 is sufficient for MATH 104, MATH 105, MATH 195, STAT 101 or STAT 105. Students must complete MATH 30 to remove a deficiency in the algebra admission requirement. Topics include signed numbers, polynomials, rational and radical expressions, exponential and logarithmic expressions, and equations. Offered on a satisfactory-fail basis only.

MATH 104: Introduction to Probability

(3-0) Cr. 3. F.S.SS.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry

Permutations, combinations, probability, expected value, and applications. Either MATH 104 or MATH 150 may be counted toward graduation, but not both.

MATH 105: Introduction to Mathematical Ideas

(3-0) Cr. 3. F.S.SS.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry.

Introduction to contemporary mathematics with an emphasis on use of mathematics to solve real world problems. Typical topics are the mathematics of voting, methods of fair division and apportionment, and elementary game theory.

MATH 140: College Algebra

(3-1) Cr. 3. F.S.SS.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry; or MATH 30.

Coordinate geometry, quadratic and polynomial equations, functions, graphing, rational functions, exponential and logarithmic functions, inverse functions, quadratic inequalities. Students in the College of Liberal Arts and Sciences may not count MATH 140 toward the General Education Requirements.

MATH 143: Preparation for Calculus

(4-0) Cr. 4. F.S.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry; or MATH 140.

Preparation for MATH 160, 165, and 181. Functions, graphing, basic trigonometry, logarithms, exponentials. Emphasis on co-variational reasoning. Students in the College of Liberal Arts and Sciences may not count MATH 143 toward General Education Requirements. Only one of MATH 143 and 145 may count toward graduation.

MATH 145: Applied Trigonometry

(3-0) Cr. 3. F.S.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry; or minimum of C- in MATH 140.

Mathematical ideas regarding the conception of space. General trigonometry, with an emphasis on the calculation of lengths, areas, and angles. The Law of Sines and the Law of Cosines. Polar, cylindrical, and spherical coordinate systems. Conic sections and quadric surfaces. Students in the College of Liberal Arts and Sciences may not count Math 145 toward the General Education Requirements. Only one of Math 143 and 145 may count toward graduation.

MATH 150: Discrete Mathematics for Business and Social Sciences

(2-1) Cr. 3. F.S.SS.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry

Linear equations and inequalities, matrix algebra, linear programming, discrete probability. Either MATH 104 or MATH 150 may be counted toward graduation, but not both.

MATH 151: Calculus for Business and Social Sciences

(2-1) Cr. 3. F.S.SS.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry

Differential calculus, applications to max-min problems, integral calculus and applications. Will not serve as prerequisite for MATH 265 or MATH 266. Only one of MATH 151, MATH 160, the sequence MATH 165-MATH 166, or the sequence MATH 181-MATH 182 may be counted towards graduation.

MATH 160: Survey of Calculus

(4-0) Cr. 4. F.S.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of geometry; or MATH 143

Analytic geometry, derivatives and integrals of elementary functions, simple differential equations, and applications. Will not serve as a prerequisite for MATH 265 or MATH 266. Only one of MATH 151, MATH 160, the sequence MATH 165-MATH 166, or the sequence MATH 181-MATH 182 may be counted towards graduation.

MATH 165: Calculus I

(4-0) Cr. 4. F.S.SS.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of geometry, 1 semester of trigonometry; or MATH 143

Differential calculus, applications of the derivative, introduction to integral calculus. Only one of Math 151 or 160 or the sequence MATH 165-MATH 166, or the sequence MATH 181-MATH 182 may be counted towards graduation.

MATH 166: Calculus II

(4-0) Cr. 4. F.S.SS.

Prereq: Minimum of C- in MATH 165 or high math placement scores

Integral calculus, applications of the integral, infinite series, parametric curves and polar coordinates. Only one of MATH 151, MATH 160, the sequence MATH 165-MATH 166, or the sequence MATH 181-MATH 182 may be counted towards graduation.

MATH 181: Calculus and Mathematical Modeling for the Life Sciences I

(4-0) Cr. 4. F.S.

Prereq: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry, 1 semester of trigonometry; or MATH 143

Exponential and logarithm functions, difference equations, derivatives, and applications of the derivative. Examples taken from biology. Only one of MATH 151, MATH 160, the sequence MATH 165-MATH 166, or the sequence MATH 181-MATH 182 may be counted towards graduation.

MATH 195: Mathematics for Elementary Education I

(2-2) Cr. 3. F.S.

Prereq: Satisfactory performance on placement assessment, 2 years high school algebra, 1 year of high school geometry, enrollment in elementary education or early childhood education

Whole number operations through analysis of properties, theoretical and hands-on models, mathematical analysis of elementary students' thinking, standard and non-standard algorithms; structure of the decimal system; linear measurement, and two- and three-dimensional geometric shapes and spatial sense, number theory, algebra as it relates to elementary curricula/teaching profession. Students in the College of Liberal Arts and Sciences may not count MATH 195 toward General Education Requirements.

MATH 265: Calculus III

(4-0) Cr. 4. F.S.SS.

Prereq: Minimum of C- in MATH 166 or MATH 166H

Analytic geometry and vectors, differential calculus of functions of several variables, multiple integrals, vector calculus.

MATH 267: Elementary Differential Equations and Laplace Transforms

(4-0) Cr. 4. F.S.SS.

Prereq: Minimum of C- in MATH 166 or MATH 166H

Same as MATH 266 but also including Laplace transforms and series solutions to ordinary differential equations.

MICRO 101: Microbial World

(3-0) Cr. 3. F.

Prereq: High school biology or equivalent

Introduction to the importance of viruses, bacteria, fungi, archaea and parasites both to humans and to the biosphere. Topics include past and present microbial impact on humans and society, ecology and diversity of microbes, biotechnology and microbial impact on the biosphere.

MICRO 201: Introduction to Microbiology

(2-0) Cr. 2. F.S.

Prereq: One semester of college-level biology

Selected topics in microbiology with emphasis on the relationship of microorganisms to human and animal health, agricultural technology, and the environment. With written petition to the chair of the supervisory committee, students who obtain a grade of B or better may substitute 201 for Micro 302 in advanced courses.

MTEOR 107: Severe and Hazardous Weather

(2-0) Cr. 1. F.

Understanding of atmospheric processes that play a role in creating severe and hazardous weather. Focus on thunderstorms, tornadoes, hurricanes, floods, blizzards, ice storms, and temperature extremes. Impacts on lives and property.

MTEOR 206: Introduction to Weather and Climate

(Cross-listed with AGRON). (3-0) Cr. 3. F.S.

Basic concepts in weather and climate, including atmospheric measurements, radiation, stability, precipitation, winds, fronts, forecasting, and severe weather. Applied topics include global warming, ozone depletion, world climates and weather safety.

MUSIC 101: Fundamentals of Music

(1-2) Cr. 2. F.S.

Prereq: Ability to read elementary musical notation

Notation, recognition, execution and analysis of scales, intervals, triads, and rhythm; key signatures; time signatures; transposition. Open to non-majors only.

MUSIC 102: Introduction to Music Listening

(3-0) Cr. 3. F.S.SS.

Expansion of the music listening experiences for the general student through greater awareness of differences in techniques of listening, performance media, and materials of the art. The course focuses on the elements of music: rhythm, melody, harmony, form, and style, and how these elements are used in musics of different cultures and time periods. Ability to read or perform music not required. Meets International Perspectives Requirement.

MUSIC 111: Wind Ensemble

(0-3) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Emphasis on significant extended compositions for wind and percussion instruments. Performances include formal concerts on campus and the annual tour.

MUSIC 112: Concert Band

(0-2) Cr. 1. Repeatable. F.S.

Prereq: Open to all students who have performed on a wind or percussion instrument in high school band or orchestra

Repertoire includes the broad spectrum of band music. Two concerts are presented each semester.

MUSIC 113: Jazz Ensemble

(0-2) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Designed to explore various styles and trends in contemporary jazz.

MUSIC 114A: Marching and Pep Bands: Marching Band

(0-5) Cr. 1. Repeatable. F.

Membership determined by audition and band application. Auditions held for woodwind, brass, percussion, flag, and twirler positions. Presentation of pre-game and half time shows at each home football game; additional performances are also scheduled on and off campus. Audition information is listed on the band website (www.music.iastate.edu/org/marching). Students may not be concurrently enrolled in MUSIC 114A and 114C.

MUSIC 115: Symphonic Band

(0-3) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Stresses high quality wind literature. Performances include formal concerts on campus.

MUSIC 118: Applied Music: Non-majors

(0.5-0) Cr. 1-2. Repeatable. F.S.

Prereq: Audition, permission of instructor

Applied music for the general student.

MUSIC 141: Lyrica Women's Choir

(0-3) Cr. 1. Repeatable. F.S.

Prereq: Open to all female students by audition

Large chorus; emphasis on fundamental vocal and choral skills, wide variety of literature. Campus concerts each semester.

MUSIC 151A: Oratorio Chorus: Cantamus Women's Choir

(0-3) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Advanced skills required, high quality literature. Campus concerts each semester, some concerts in conjunction with orchestras. Men's and women's choirs separately and in combination.

MUSIC 151B: Oratorio Chorus: Statesmen Men's Choir

(0-3) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Advanced skills required, high quality literature. Campus concerts each semester, some concerts in conjunction with orchestras. Men's and women's choirs separately and in combination.

MUSIC 161: Iowa State Singers

(0-5) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Concert choir specializing in performance of advanced music literature, Renaissance through contemporary. Campus concerts, annual spring tour.

MUSIC 181: Symphony Orchestra

(0-4) Cr. 1. Repeatable. F.S.

Prereq: Open to all students by audition

Reading, preparation, and performance of standard repertoire. Five or six concerts annually plus occasional off-campus appearances.

N S 111: Introduction to Naval Science

(3-0) Cr. 3. F.

Introduction to the organization, regulations, and capabilities of the US Navy, with emphasis on mission and principal warfare components.

NREM 110: Orientation in Natural Resource Ecology and Management

Cr. 1. F.

Orientation to the University and to the Department of Natural Resource Ecology and Management. Discussion of departmental learning outcomes, strategies for academic success and academic planning. Offered on a satisfactory-fail basis only.

NREM 120: Introduction to Renewable Resources

(Cross-listed with AGRON, ENV S). (3-0) Cr. 3. F.S.

Overview of soil, water, plants, and animals as renewable natural resources in an ecosystem context. History and organization of resource management. Concepts of integrated resource management.

PHIL 201: Introduction to Philosophy

(3-0) Cr. 3. F.S.SS.

It has been rumored that the unexamined life is not worth living. Philosophy is an attempt to begin examining life by considering such questions as: What makes us human? What is the world ultimately like? How should we relate to other people? Is there a god? How can we know anything about these questions? Understanding questions of this kind and proposed answers to them is what this course is all about.

PHIL 206: Introduction to Logic and Scientific Reasoning

(3-0) Cr. 3. F.S.SS.

Basic principles of critical reasoning and argument evaluation. A consideration of basic forms of argumentation in science and everyday life. Application to contemporary issues and controversies.

PHIL 207: Introduction to Symbolic Logic

(Cross-listed with LING). (3-0) Cr. 3. S.

Introduction to fundamental logical concepts and logical symbolism. Development of natural deduction through first order predicate logic with identity. Applications to arguments in ordinary English and to philosophical issues. Linguistics majors should take LING/PHIL 207 as early as possible.

PHIL 230: Moral Theory and Practice

(3-0) Cr. 3. F.S.SS.

Investigation of moral issues in the context of major ethical theories of value and obligation; e.g., punishment, abortion, economic justice, job discrimination, world hunger, and sexual morality. Emphasis on critical reasoning and argument analysis.

PHIL 235: Ethical Issues in A Diverse Society

(3-0) Cr. 3. S.

This course will examine a range of arguments on diversity issues. Topics will include: the social status of women, the moral status of sexuality and homosexuality, the nature and role of racism in contemporary society, the relationship between biology, gender roles and social status, and various proposals for change from a variety of political perspectives.

Meets U.S. Diversity Requirement

PHYS 101: Physics for the Nonscientist

(3-0) Cr. 3. F.S.

Survey of the principal areas of both classical and modern physics. Emphasis on the nature of the physical universe and the application of physical principles to life in the modern world. Not suitable to meet a general physics requirement for natural science majors.

PHYS 111: General Physics

(4-2) Cr. 5. F.S.SS.

Prereq: 1 1/2 years of high school algebra, 1 year of geometry, 1 semester of trigonometry

General background in physical concepts, principles, and methods for those who do not plan advanced study in physics or engineering. Mechanics, fluids, heat and thermodynamics, vibrations, waves, sound.

PHYS 112: General Physics

(4-2) Cr. 5. F.S.SS.

Prereq: PHYS 111

General background in physical concepts, principles, and methods for those who do not plan advanced study in physics or engineering. Electricity and magnetism, ray and wave optics, topics in modern physics.

PHYS 115: Physics for the Life Sciences

(4-0) Cr. 4. F.S.

Prereq: high school: 1 1/2 yr. algebra, 1 yr. geometry, 1 semester trigonometry
Emphasis on basic physics principles applied to biological problems. Topics include mechanics, fluids, thermodynamics, heat, light, sound, electricity and magnetism. A coordinated laboratory, Physics 115 laboratory is available.

PHYS 198: Physics of Music

(2-2) Cr. 3. F.

Introductory level course on sound for nonphysics majors. Properties of pure tones and harmonics; human perception of sound; room acoustics; scales; production, and analysis of musical by voice, string, woodwind, brass, and percussion instruments. Not suitable to meet a general physics requirement for natural science majors

PHYS 221: Introduction to Classical Physics I

(4.5-1) Cr. 5. F.S.SS.

Prereq: Proficiency in algebra, trigonometry, vector manipulation, and topics covered in Math 165, and credit or enrollment in MATH 166.

For engineering and science majors. 3 hours of lecture each week plus 3 recitations and 1 laboratory every 2 weeks. Elementary mechanics including kinematics and dynamics of particles, work and energy, linear and angular momentum, conservation laws, rotational motion, oscillations, gravitation. Heat, thermodynamics, kinetic theory of gases; waves and sound.

PHYS 222: Introduction to Classical Physics II

(4-2) Cr. 5. F.S.SS.

Prereq: PHYS 221 OR PHYS 241, MATH 166

3 hours of lecture each week plus 1 recitation and 1 laboratory each week. Electric forces and fields. Electrical currents; DC circuits. Magnetic forces and fields: LR, LC, LCR circuits; Maxwell's equations; ray optics and image formation; wave optics; topics in modern physics.

POL S 215: Introduction to American Government

(3-0) Cr. 3. F.S.SS.

Fundamentals of American democracy; constitutionalism; federalism; rights and duties of citizens; executive, legislative, and judicial branches of government; elections, public opinion, interest groups, and political parties.

POL S 241: Introduction to Comparative Government and Politics

(3-0) Cr. 3. F.S.

Basic concepts and major theories; application to selected political systems, including non-western political systems.
Meets International Perspectives Requirement.

POL S 251: Introduction to International Politics

(3-0) Cr. 3. F.S.

Dynamics of interstate relations pertaining to nationalism, the nation state; peace and war; foreign policy making; the national interest; military capability and strategy; case studies of transnational issues, such as population, food, energy, and terrorism.

Meets International Perspectives Requirement.

PSYCH 101: Introduction to Psychology

(3-0) Cr. 3. F.S.SS.

Fundamental psychological concepts derived from the application of the scientific method to the study of behavior and mental processes. Applications of psychology.

PSYCH 102: Laboratory in Introductory Psychology

(0-2) Cr. 1. F.S.

Prereq: Credit or enrollment in PSYCH 101

Laboratory to accompany 101.

PSYCH 111: Orientation to Psychology

Cr. 0.5. F.S.

Program requirements and degree/career options. Required of psychology majors. Offered on a satisfactory-fail basis only.

PSYCH 131: Academic Learning Skills

(0-2) Cr. 1. F.S.

Efficient methods of time management, goal setting and motivation, and other learning strategies such as note-taking, reading, and test preparation. Offered on a satisfactory-fail basis only.

PSYCH 230: Developmental Psychology

(3-0) Cr. 3. F.S.SS.

Life-span development of physical traits, cognition, intelligence, language, social and emotional behavior, personality, and adjustment.

PSYCH 250: Psychology of the Workplace

(3-0) Cr. 3.

Survey of theories and research methods of psychology applied to the workplace. Consideration of employee selection, training, performance evaluation, leadership, work groups, employee motivation, job attitudes and behaviors, organizational culture, organizational development, human factors, and job design from the scientist-practitioner approach.

PSYCH 280: Social Psychology

(3-0) Cr. 3. F.S.SS.

Individual human behavior in social contexts. Emphasis on social judgments and decisions, attitudes, perceptions of others, social influence, aggression, stereotypes, and helping.

RELIG 205: Introduction to World Religions

(3-0) Cr. 3. F.S.SS.

An introduction to the academic study of religions, including myths, beliefs, rituals, values, social forms. Examples chosen from oral cultures and major religions of the world.

Meets International Perspectives Requirement.

RELIG 210: Religion in America

(3-0) Cr. 3. F.S.SS.

Introductory study of the major beliefs, practices, and institutions of American Judaism, Catholicism, Protestantism, and Islam with emphasis on the diversity of religion in America, and attention to issues of gender, race, and class.

Meets U.S. Diversity Requirement

RELIG 220: Introduction to the Bible

(3-0) Cr. 3. F.S.

Basic overview of the contents of the Old and New Testament in light of their ancient socio-historical background, and with attention to a variety of interpretations and relevance to modern American society.

RELIG 280: Introduction to Catholicism

(3-0) Cr. 3. F.

An explanation of the beliefs, spirit, and practices of Roman Catholicism, including its understanding of God, sacramentality, the human person, and community, and its relationship to other forms of Christianity and other world religions.

RUS 101: Elementary Russian I

(4-0) Cr. 4. F.

Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture.

RUS 201: Intermediate Russian I

(4-0) Cr. 4. F.

Prereq: RUS 102

Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills.

Meets International Perspectives Requirement.

S E 101: Software Engineering Orientation

Cr. R.

Introduction to the procedures, policies, and resources of Iowa State University and the department of Computer Science and Electrical and Computer Engineering. Information on engineering and computer-based professions.

SOC 115: Orientation to Sociology

(1-0) Cr. 1. F.S.

Orientation to sociology. A familiarization with University and LAS College requirements and procedures. Occupational tracks and career options open to sociology; introduction to career planning. Recommended during first semester of freshman year, or as soon as possible after transfer into the department. Offered on a satisfactory-fail basis only.

SOC 134: Introduction to Sociology

(3-0) Cr. 3. F.S.SS.

Social interaction and group behavior with emphasis on the scientific study of contemporary U.S. society, including issues relating to socialization, inequality, and changing rural and urban communities.

Analysis of relationships among the institutions of family, religion, political participation, work, and leisure.

SOC 219: Sociology of Intimate Relationships

(3-0) Cr. 3. F.S.SS.

Prereq: SOC 134

Analysis of intimate relationships among couples using a sociological perspective. Attention is given to singlehood; dating and courtship; sexuality; mate selection, cohabitation, and marriage. Relationship quality, communication, conflict and dissolution of these types of relationship will also be explored.

SOC 235: Social Problems and American Values

(3-0) Cr. 3. F.S.

Prereq: SOC 134

Sociological concepts, theories and methods to analyze the causes and consequences of social problems. Social problems discussed may include crime, substance abuse, income inequalities, discrimination, poverty, race relations, health care, family issues, and the environment. How American culture and values shape societal conditions, public discourse and policy.

Meets U.S. Diversity Requirement

SOC 241: Youth and Crime

(Cross-listed with CJ ST). (3-0) Cr. 3. F.

Prereq: SOC 134

An examination of delinquency that focuses on the relationship between youth as victims and as offenders, social and etiological features of delinquency, the role of the criminal justice system, delinquents' rights, and traditional and alternative ways of dealing with juvenile crime.

SP CM 110: Listening

(3-0) Cr. 3. F.S.

Theory, principles, and competency development in comprehensive, therapeutic, critical, consumer, and appreciative listening. The impact of listening in relationships and partnerships.

SP CM 212: Fundamentals of Public Speaking

(3-0) Cr. 3. F.S.SS.

Theory and practice of basic speech communication principles applied to public speaking. Practice in the preparation and delivery of extemporaneous speeches.

SP CM 216: Great Speakers and Speeches

Cr. 3.

Survey of great speeches examined within their political and cultural contexts. Analysis of the rhetorical strategies of diverse speakers with an emphasis on texts from social movements in the United States.

Meets U.S. Diversity Requirement

SP CM 275: Analysis of Popular Culture Texts

(Cross-listed with ENGL). (3-0) Cr. 3. F.S.

Prereq: Credit in or equivalent of 250

Analysis of how information and entertainment forms persuade and manipulate audiences. Study of several forms that may include newspapers, speeches, television, film, advertising, fiction, and magazines. Special attention to verbal and visual devices.

SP ED 250: Education of the Exceptional Learner in a Diverse Society

(3-0) Cr. 3. F.S.

Prereq: C I 204

An overview of students with diverse learning needs, including legal foundations. Emphasis on early identification; educational programming, services and strategies; and preparation for community living in a heterogeneous society.

Meets U.S. Diversity Requirement

SPAN 101: Elementary Spanish I

(4-0) Cr. 4. F.SS.

A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish.

SPAN 201: Intermediate Spanish I

(4-0) Cr. 4. F.

Prereq: SPAN 102 or placement by departmental exam

Intensive review of basic grammar and conversation. For students whose native language is not Spanish. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature.

Meets International Perspectives Requirement.

SPAN 297: Intensive Intermediate Spanish

(4-0) Cr. 4. F.S.

Prereq: 4 years of high school Spanish, two years of Spanish at a community college, Spanish 201, or equivalent by placement

Bridge course between 200- and 300-level Spanish courses that focuses on application of advanced grammatical concepts within the context of Hispanic culture. Accelerated review of SPAN 201 and SPAN 202 designed for students who want to continue at the 300 level. Taught in Spanish for students whose native language is not Spanish.

Meets International Perspectives Requirement.

STAT 101: Principles of Statistics

(3-2) Cr. 4. F.S.SS.

Prereq: 1 1/2 years of high school algebra

Statistical concepts in modern society; descriptive statistics and graphical displays of data; the normal distribution; data collection (sampling and designing experiments); elementary probability; elements of statistical inference; estimation and hypothesis testing; linear regression and correlation; contingency tables. Credit for only one of the following courses may be applied toward graduation: STAT 101, STAT 104, STAT 105, STAT 201, or STAT 226.

STAT 104: Introduction to Statistics

(2-2) Cr. 3. F.S.SS.

Prereq: 1 1/2 years of high school algebra

Statistical concepts and their use in science; collecting, organizing and drawing conclusions from data; elementary probability; binomial and normal distributions; regression; estimation and hypothesis testing. For students in the agricultural and biological sciences. Credit for only one of the following courses may be applied toward graduation: STAT 101, STAT 104, STAT 105, STAT 201, or STAT 226.

STAT 105: Introduction to Statistics for Engineers

(3-0) Cr. 3. F.S.

Prereq: MATH 165 (or MATH 165H)

Statistical concepts with emphasis on engineering applications. Data collection; descriptive statistics; probability distributions and their properties; elements of statistical inference; regression; statistical quality control charts; use of statistical software; team project involving data collection, description and analysis. Credit for only one of the following courses may be applied toward graduation: STAT 101, STAT 104, STAT 105, STAT 201, or STAT 226. Credit for both STAT 105 and STAT 305 may not be applied for graduation.

THTRE 106: Introduction to the Performing Arts

(3-0) Cr. 3. F.S.SS.

An audience oriented, broad-based, team-taught survey of the performing arts which emphasizes theatre and includes segments on television, radio, film, dance, and music.

THTRE 110: Theatre and Society

(3-0) Cr. 3. F.S.

An introduction to Theatre focusing on its relationship with society throughout history.

THTRE 251: Acting I

(3-0) Cr. 3. F.S.

Theory and practice in fundamentals of acting.

TSM 115: Solving Technology Problems

(2-2) Cr. 3. F.S.

Prereq: MATH 140 or higher (can be taken concurrently)

Solving technology problems and presenting solutions through data analysis and technical report writing. Problem solving cycle, unit conversion, unit factor method, SI units, significant digits, graphing, curve fitting and computer programming. Use of modern hardware and software tools for applied data-driven problem solving.

TSM 116: Introduction to Design in Technology

(2-2) Cr. 3. F.S.

Use of parametric solid modeling software to model, and document, parts and assemblies. Includes national and international standards for documentation, design projects, and teamwork. Free-hand sketching techniques will be covered.

U ST 104: Personal Career Development

(2-0) Cr. 2. F.S.

Comprehensive approach to personal career development providing students with the skills and structure to make informed choices about their major and career path. Self-exploration of interests, skills, values, and personality as related to the world of work using a variety of techniques; exploration of majors and occupations; model for major and career decision-making and career goal implementation; exposure to effective job search and interviewing skills and resources.

US LS 211: Introduction to U.S. Latino/a Studies

(3-0) Cr. 3. F.S.

History and current lives of the Latino/a peoples in the United States, including Mexican, Cuban, Puerto Rican, Dominican, and South and Central Americans, as well as information specific to Iowa Latino/as, will be covered. Through readings, class discussions, writing assignments, and guest speakers, students will acquire accurate information and a solid understanding of the US Latino/a population and cultural perspectives. Elements of Latino/a culture to be covered include historical, sociological, educational, psychological, economic, and political facets.

Meets U.S. Diversity Requirement

W S 160: Gender Justice

(2-0) Cr. 1. F.S.

Half semester course. Examines the socialization process in the United States and how our perspectives are formed. An introduction to patriarchy, sexism, and ally development are explored. Skills to enhance communication and understanding among women and men will be developed. Offered on a satisfactory-fail basis only.

Meets U.S. Diversity Requirement

W S 201: Introduction to Women's Studies

(3-0) Cr. 3.

Introduction to the interdisciplinary field of Women's Studies. Contemporary status of women in the U.S. and worldwide from social, economic, historical, political, philosophical and literary perspectives. Analysis of intersection of gender, race, class, and sexuality. Subject matter includes work, health, sexuality, and violence. Foundation for the other courses in the program.

Meets U.S. Diversity Requirement

WLC 278: Introduction to Global Film

(3-0) Cr. 3. F.

Introduction to the cinema of non-English speaking regions and cultures of the world through representative subtitled films, lectures, and readings. Topics vary according to faculty interest. Emphasis on selected national cinemas and film as a mode of cultural expression as well as on diverse cultural contexts of cinema.

Meets International Perspectives Requirement.

The following experimental courses (courses that are new and not yet published in the catalog) are also available:

AGRON 106X. Global Agriculture in a Changing World. (3-0) Cr. 3. F.

Understanding climate and its effects on global distribution of food and water resources. The nature of climate and its variability in space and time. Use of satellites and related technology to monitor agricultural production, water availability and climate. Influence of climate and climate change on drought famine and other disruptions of essential resources.

C R P 251X. Fundamentals of Geographic Information Systems. (3-0) Cr.

3. F. Fundamentals of the concepts, models, functions and operations of

Geographic Information Systems (GIS). Principles of spatial problems, spatial questions and hypotheses and their solutions based on spatial data, GIS tools and techniques. Integration of concepts and applications through lectures and facilitated labs. Applications from a variety of areas including design; physical, social, and human science; engineering; agriculture; business and medicine, landscape architecture, architecture, urban planning, geology, forestry, biology, and ecology.

ENGL 214X. Introduction to Technical Communication. (3-0) Cr. 3. F.

Prereq: ENGL 150. A broad introduction to the culture of professional work as a technical communicator, with particular emphasis on principles and best practices for developing and managing technical information and digital media. Examination of user-centered design, the history of the discipline, cross-cultural communication, and the ethics of communicating complex information to lay audiences. Study and practice of team-based collaboration, project management, and technical editing.

ENT 214X. Insects in Forensic Science. (3-0) Cr. 3. F.

Introduction to the use of insects as evidence in court and how they can assist in solving crimes. Topics covered include basic insect biology, systematics, behavior, with emphasis on applications of forensic entomology.

ENT 220X. Introduction to Forensic Science. (3-0) Cr. 3 F.

Study of fundamental forensic science techniques and procedures covering types of physical, chemical, and biological evidence and how this information is used in the legal system. Assessment of crime scenes and various forensic specialties will be introduced.

IND D 101X. Everyday Creativity. (3-0) Cr. 3. F.

Conceptual and contextual foundation for understanding the creative impulse and the processes of creative work, drawing examples from multiple cultures, disciplines, and historical periods. Students will recognize the inherent creativity in themselves and others, identify characteristics of a creative person that relate to themselves, develop creative problem solving skills using the basic elements of the creative process, examine qualities of a creative environment in real world settings, and evaluate ideas from critical perspectives.

MATH 106X. Discovering Mathematics. (3-0) Cr.3. F.S.

Prereqs: Satisfactory performance on placement assessment, 2 years of high school algebra, 1 year of high school geometry. An inquiry-based approach to mathematics, emphasizing the art, history, and beauty of the subject. Typical topics are mathematics from art, music, puzzles, patterns, and reasoning.

Credits

The academic value of each course is stated in semester credits. Each credit is normally earned by attending one (50-minute) hour of lecture or recitation per week for the entire semester, or by attending a laboratory or studio period of two or three hours per week. As a guideline, undergraduate students typically will be expected to spend two hours in preparation outside of class for each lecture or recitation hour; additional outside work may be required for laboratory or studio classes.

Contact Hours

Each course states the number of semester credits assigned to the course, preceded in parentheses by the number of hours in class (contact hours) expected of the student. The first of the two contact-hour numbers indicates the number of lecture or recitation class hours per week for the semester. The second is the number of laboratory or studio hours required per week. Laboratory and studio hours may include some time devoted to lectures and recitations. For example, COM S 227 Introduction

to Object-oriented Programming is listed as (3-2) Cr. 4. In that case, the course is 4 semester credits, 3 hours of lecture and two hours of laboratory each week.

Semester Offering

The expected term a course is to be offered is indicated by the abbreviations F (Fall) S (Spring) SS (Summer). The notations are for planning purposes and *do not* guarantee a course will be offered in a particular term. Always check the Schedule of Classes (<http://classes.iastate.edu>) for availability and specific offering times.

ACCREDITATION

Accreditation

Iowa State University is accredited by the Higher Learning Commission.

Higher Learning Commission

230 South LaSalle St., Suite 7-500
Chicago, IL 60604-1411

Board of Regents, State of Iowa

www.regents.iowa.gov/ (<http://www.regents.iowa.gov>)

The laws of the United States and of the State of Iowa provide for resident academic instruction, research, and extension education, and for the management of Iowa State University of Science and Technology. The university and two other state educational institutions of higher learning are governed by the Board of Regents, State of Iowa, which is composed of nine members nominated by the Governor of Iowa and confirmed by the Senate of Iowa. The immediate regulation and direction of the academic, research, and extension activities of the university are delegated by the Board of Regents, State of Iowa, to the president and faculty of the university. The board appoints an executive director with overall responsibility for the administration of the central office of the board located in Urbandale, Iowa.

Officers of Administration

Steven Leath, Ph.D.
President of the University

Jonathan A. Wickert, Ph.D.
Senior Vice President and Provost

Warren R. Madden, M.B.A.
Senior Vice President for Business and Finance

Thomas L. Hill, Ph.D.
Senior Vice President for Student Affairs

Michael R. Crum, DBA
Vice President for Economic Development and Business Engagement

Wendy K. Wintersteen, Ph.D.
Dean of the College of Agriculture and Life Sciences

David P. Spalding, M.B.A.
Dean of the College of Business

Luis Rico-Gutierrez, M.S.
Dean of the College of Design

Sarah Rajala, Ph.D.
Dean of the College of Engineering

Pamela J. White, Ph.D.
Dean of the College of Human Sciences

Beate Schmittmann, Ph.D.

Dean of the College of Liberal Arts and Sciences

Lisa Nolan, D.V.M., Ph.D.
Dean of the College of Veterinary Medicine

Cathann A. Kress, Ph.D.
Vice President for Extension and Outreach

Sarah M. Nusser, Ph.D.
Vice President for Research

Grading

Grading System Details

The following provides quality points assigned for each letter grades:

Grade	Quality Points
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
D-	0.67
F	0.00

Grade	Description
P	Passing mark obtained under the Pass-Not Pass system.*
S	Satisfactory completion of a course offered on a Satisfactory-Fail grading basis. May also be reported to indicate satisfactory performance in R (required-credit) courses, and in courses numbered 290, 490, 590, and 690.
T	Satisfactory performance (equivalent to a grade of C or better in courses numbered 100-499, and a grade of B or better in courses numbered 500-699) in a special examination for academic credit.
X	The course was officially dropped by the student after the first week of the term.

N

No report was submitted by the instructor. An N is not a recognized grade or mark, it merely indicates the instructor has not submitted a grade and that a grade report has been requested. A nonreport (N) will automatically change to a grade of 'F' after one calendar year whether or not the undergraduate student enrolled during that period. If the N is outstanding at the time of graduation, it will be converted to a grade of 'F'. Undergraduate students will not graduate with N on their permanent record. Repeating a course will not resolve the N.

I

Incomplete. An incomplete mark may be assigned when the student is passing at the time of the request, but special circumstances beyond the student's control prevent completion of the course. In general, failing the final exam or project or not submitting course work as a result of inadequate preparation or learning are not valid excuses.***

*See Pass Not Pass Grading.

***See Incomplete Marks in the Grade Policies tab.

Policy Information

Grades represent the permanent official record of a student's academic performance. The grading system at Iowa State operates according to the following regulations:

- 1. Student performance or status** is recorded by the grades and marks described below. A student's grade point average is calculated on the basis of credits earned at Iowa State with the grades and quality points shown below. Credits earned with P, S, or T are not used in calculating the grade point average but may be applied toward meeting degree requirements. A cumulative grade point average of 2.00 is required for a bachelor's degree.
- Students who want to **protest a grade submitted by an instructor** should follow the procedures described in the section, Appeal of Academic Grievances.
- Incomplete Marks** - If the instructor and student agree that an Incomplete is appropriate, they should complete an Incomplete (I) Contract (<http://www.registrar.iastate.edu/forms>) (downloadable from the Office of the Registrar forms (<http://www.registrar.iastate.edu/forms>) web site) to document the reason for the I, the requirements for resolving it, and the date by which it must be resolved, not to exceed one calendar year or the student's graduation term (whichever is earlier). If the student is not available to sign the Incomplete (I) Contract, the instructor must document the conditions for the Incomplete by communicating directly with the student by e-mail or postal mail. A copy of this communication must be retained by the instructor until after the I is resolved in case there are any questions in the future regarding the terms of the Incomplete. The instructor also needs to enter

the Incomplete (I) electronically as part of the end of term final grade submission.

Resolving an Incomplete: When a student completes the requirements specified on the Incomplete Contract, the instructor submits the appropriate grade, which becomes part of the student's cumulative, but not term, grade-point average. The grade does not replace the I on the record. The I remains on the record for the applicable term.

A final course grade, once submitted to the registrar, **may not** be changed to an Incomplete except to correct an error at the request of the instructor, and with the approval of the instructor's department head and the dean of the instructor's college. The Incomplete (I) Contract should be used by the instructor to document the conditions for the Incomplete as specified above. The Grade Report to the Registrar form should be used to initiate the request to change the grade to an Incomplete. The Grade Report form should be completed and forwarded by the instructor to his/her Dean for approval. The Dean will forward the Grade Report form to the Office of the Registrar if approved.

Incompletes in all courses must be resolved by the middle of the student's term of graduation. Repeating a course will not resolve an I mark. A mark of I will automatically change to a grade of F after one calendar year (whether or not the student was enrolled during the period).

4. To change a grade or mark already reported to the registrar, the instructor submits the Grade Report to the Registrar form. This form is used for resolving an I with a grade, for correcting an instructor error, or for the late report of a grade.

5. Midterm Grades. The registrar will collect C-, D, and F midterm grades and nonattendance notifications from the instructor and report this information to students and their advisers using AccessPlus. In addition to submitting the midterm grades, the instructor is responsible for informing the class of the basis on which they were calculated.

The purpose of midterm grades is to provide the student and adviser with a timely warning that the student's academic performance to that point in the course may be lower than desirable. Students who receive midterms are encouraged to discuss their academic performance with the course instructor and their adviser.

6. Grades in all courses attempted remain on each student's record. If a course is repeated, the record will show the grade obtained on the initial attempt as well as grades received on subsequent attempts.

7. The cumulative grade point average is calculated by dividing the total number of quality points earned by the total number of credits in all courses attempted. Grades of S, P, NP, and T are not counted in calculating the grade point average. If a course is repeated, the cumulative grade point average is calculated according to the process described in item 6(a) below.

8. Repeating Courses.

- The most recent grade for a course a student repeats will be used in computing the student's cumulative grade point average rather than the previous grade(s), up to a limit of 15 credits. (This could result in a lowered grade point average if the second grade is lower than the

first, or even loss of credit if the grade is lowered to an F.) All grades will remain on the student's record.

- Students may repeat any course for which an F grade, an NP grade, or any passing grade was received.
- Beyond 15 credits of repeats, both grades will be included in computing the cumulative grade point average.
- Courses should be repeated as soon as possible, preferably within three semesters in residence, because of changes that occur with course updating, change in course number, or revision in the number of credits.
- Approval to repeat a course in which the course number or number of credits has changed must be noted on a Designation of Repeated Course form, which can be obtained from departmental offices. This form must be signed by the head of the department offering the course and by the student's adviser, and then taken to the Office of the Registrar. Deadlines for filing repeated course forms for full-semester and half-semester courses are published in the university calendar.
- Transfer students may repeat courses at Iowa State University for which a D or F was received at another institution. They must process a Designated Repeat Form indicating they are repeating the course to reduce a transfer deficiency. Such repeated credits will count toward the 15-credit request limit and will affect only their transfer deficiency.
- A student who has earned an F at Iowa State University may repeat the course at another institution and the credits earned may be applied toward graduation at Iowa State, but the grade earned will not be used in computing a cumulative grade point average.
- Repeated courses may affect any federal financial aid. See the Financial Aid web site (<http://www.financialaid.iastate.edu>) for further information.

Pass-Not Pass Grading

Students may choose to take a maximum of 9 semester credit hours on a Pass-Not Pass basis, meaning that only a P or NP will be recorded as their final grade in the course. The purpose of P-NP grading is to encourage students to broaden their education by taking courses outside the usual program of study for their major and minor disciplines. The following policies apply:

1. Undergraduate students who are not on academic probation (P) at the beginning of the semester are eligible. A special (nondegree) student must obtain approval from their academic adviser and college dean.
2. Only elective courses may be taken on a P-NP basis. In specific majors, some restrictions may apply, so students should consult with their academic adviser.
3. Except for restrictions on its own undergraduate majors, a department may not deny the availability of any of its course offerings on a P-NP basis.
4. Courses offered on a satisfactory-fail basis may not be taken P-NP.
5. Students should register for a P-NP course in the same manner and at the same time that they register for their other courses. Students should then change to P-NP by processing a schedule change form with their academic adviser's signature in the P-NP approval section of the form.
6. Students who elect to change back to a graded basis should process the change using the P-NP section of the schedule change form.

7. Changes to or from a P-NP basis must be made before the last day to drop (usually the Friday of week 10 of the term).
8. Registration on a P-NP basis is not indicated on the instructor's class list. Students will receive a P if their grade is D minus or better and an NP if their grade was F.
9. Neither P (earned grade of D minus or better) nor NP (earned grade of F) is counted in calculating a student's grade point average (GPA).
10. When students change their curriculum, any P credits that they have accumulated will be accepted by the new department if such credits are in courses normally accepted by the department.
11. Credits taken on a P-NP basis at another institution and transferred to Iowa State may be applied as electives in a student's degree program if the credits are otherwise acceptable in that program. The number of P-NP transfer credits that can be accepted depends on the number permitted by the institution from which the student is transferring. If a student transfers more than nine semester P-NP credits, no additional Iowa State P-NP credits can be applied to the student's degree program.

Examinations

Examinations are one of the most common ways instructors assess student performance. In order that examinations can be a useful part of the educational process, the following policies have been instituted:

1. One purpose of examinations is to help students' learning. Therefore, examinations should be evaluated as soon as possible after they are given and the results should be made available to the students in a timely way to enhance learning.
2. All tests and examinations administered between the beginning of the term and final examination week shall be held during a regularly scheduled lecture or laboratory class period for that course. A department may obtain approval to administer a separately scheduled examination if all of the following criteria are met:
 - a. The course is multi-sectioned.
 - b. A common departmentally developed examination will be administered to all students in all sections at the same time.
 - c. The test scores will be used as a basis for a uniform grading procedure for all sections of the course. Requests to hold separately scheduled examinations must be made to the registrar and approved by the provost in time to be announced in the Schedule of Classes to allow students to plan in advance. Only under unusual circumstances will a course be approved for separately scheduled examinations if the deadline is past to include notification in the Schedule of Classes. Whenever a separately scheduled examination is administered, a regular class meeting during that week shall be omitted.

Students who are unable to take a separately scheduled examination at the scheduled time indicated in the Schedule of Classes, because of a course conflict or other legitimate reason must notify the instructor in advance and must be given the opportunity to be examined at another time mutually convenient for the student and the instructor. The instructor shall determine whether to administer the same examination or an alternate examination, or use an alternate assessment procedure.
3. At the end of the semester, a week is set aside for final examinations or other term evaluations, with a two-hour period normally scheduled for each course. The following policies govern the responsibilities of students and faculty members during this week:
 - a. Final exams may not be given at a time other than that for which the exam is scheduled by the registrar. An instructor may not give a final exam prior to final exam week nor change the time of offering of the final examination as it appears in the final exam schedule. Permission to change the time for which an exam is scheduled may be given only by the dean of the college. If the instructor elects not to give a final exam in a course of two or more credits, the class is required to meet at the scheduled final exam period for other educational activity such as a review of the course or feedback on previous exams.
 - b. Final exam periods are determined according to the regularly scheduled meeting time of the class. However, certain courses are assigned special group exam times so that several sections of the same course may be tested together. The criteria for establishing special group exams are similar to those listed for separately scheduled exams listed in number 2 above. If this results in conflicting group examination periods, students should inform the instructor in charge of the first of the two conflicting courses as listed on the final exam schedule within the special groups in question; that instructor is responsible for arranging a special examination or making some other adjustment.
 - c. Evening courses with lectures scheduled at 6:00 p.m. or later should give their examinations during finals week from 7:00-9:00 p.m. on the day the class normally meets. If this exam conflicts with an evening group exam, the instructor responsible for the latter must arrange a special examination for any students who have a conflict.
 - d. If unusual circumstances involve the need for students to change the time of their final examination, they must obtain the approval of the instructor of the course.
 - e. If a student has three examinations scheduled on the same calendar day and wishes to change one to another day, the instructor of the course having the smallest number of students is responsible for arranging an alternate examination time for the student unless make-up exam times are available in one of the other courses.
 - f. All faculty members and teaching assistants with instructional or grading responsibilities are considered to be on duty throughout the entire final examination week and are expected to be available to students during that week for discussion of any matters pertaining to the final examination and final grade or to other aspects of the course.

Dead Week

For each Fall and Spring semester, the last full week of classes before final examinations is designated as Dead Week. The intent of this policy is to establish a one-week period of substantial and predictable study time for undergraduate students. During the Dead Week period, regular lectures are expected to continue, including the introduction of new content, as deemed appropriate by the instructor. The restrictions established by this Dead Week policy are:

- Due dates for mandatory graded submissions of any kind that fall within Dead Week must be listed on the syllabus provided at the start of the course.
- Mandatory final examinations may not be given during the Dead Week period except for laboratory courses or courses that meet weekly and for which there is no contact during the normal final examination week.
- Registered ISU Student Organizations may not hold any meetings, functions, or sponsored events during the Dead Week period. Any

exception to these restrictions must be authorized in advance by Office of the Dean of Students.

Scholastic Recognition

The university recognizes those students who are doing exceptionally well in several ways, including the following.

1. **Dean's List.** Each semester the university issues a dean's list made up of those students who have carried at least 12 credit hours of graded or S-F courses with a 3.50 grade-point average or above for the semester. Courses taken on a P-NP basis do not count as part of the 12-credit hour requirement. No dean's list is issued for summer school. The list can be viewed from the Office of the Registrar web site (<http://www.registrar.iastate.edu>).
2. **Top 2 Percent.** Each spring semester, undergraduate students in the top 2% of their class (freshman, sophomore, junior, and senior) within their college, based on cumulative grade point average, are recognized. In addition to a congratulatory letter from the university president, a notation of the accomplishment is recorded on the student's permanent record.
3. **Graduation with Distinction.** Undergraduates who have a cumulative grade point average of 3.50 or higher at the beginning of their final term are eligible to graduate "with distinction" provided they have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits.

Students who graduate with a cumulative grade point average of 3.90 or higher will graduate Summa Cum Laude; those who graduate with a cumulative grade point average of 3.70 to 3.89 will graduate Magna Cum Laude; and those who graduate with a cumulative grade point average of 3.50 to 3.69 will graduate Cum Laude. This recognition appears on the student's official transcript and diploma and in the commencement program.

Candidates for the bachelor of liberal studies degree may be graduated with distinction providing that they (a) have completed 45 semester credits of coursework at the three Iowa Regent universities at the time of graduation, (b) have earned at least a 3.50 cumulative grade point average at ISU, and (c) their combined grade point average for coursework taken at the three Iowa Regent universities meets the honors cutoff specified above.

4. **Honors Program.** Students who are full members of the University Honors Program prior to Fall Semester 2011 must have a cumulative grade point average of 3.35 or higher at the beginning of their final term. Students becoming full members during Fall Semester 2011 or later need a cumulative grade point average of 3.5 at the beginning of their final term. In addition to meeting the appropriate grade point requirement, students will have completed an approved honors program of study and an honors project prior to graduation. This recognition appears on the student's permanent record and diploma, and in the commencement program.

Evaluation Procedures

It is university policy that the instructor shall inform the students at the beginning of each course of the evaluation procedures planned for use in the course.

Retention of Records

Records of all graded work must be retained by the instructors until midterm of the semester following completion of a course or until all pending appeals and incompletes are resolved, whichever is later.

Instructors leaving the university must file records of all graded work with their department office before departure.

Progress and Probation

Additional Academic Standards Regulations

Each college has an academic standards committee that is responsible for monitoring the academic progress of all undergraduate students in that college, based on policies and minimum requirements set by the Faculty Senate Committee on Academic Standards and Admissions and ratified by the Faculty Senate. Individual college faculties may, with the approval of the Faculty Senate Committee on Academic Standards and Admissions, set additional program admission and curriculum requirements that are more stringent than those established for the university. These additional requirements must be reviewed at least every third catalog by the college academic standards committee to determine if the requirements should be continued. Requirements approved by the college academic standards committees will then be forwarded to the Faculty Senate Committee on Academic Standards and Admissions for final approval. The college committees are responsible for actions involving individual students with respect to placing students on academic probation, dismissing students from the university for unsatisfactory academic progress, and reinstating students who have been dismissed.

Changing colleges: A student on academic probation (P) may transfer to another program in the university before period 3 begins (before the last day to drop a course.) For students on academic probation (P), transfer during period 3 (after the last day to drop a course) can only occur under exceptional circumstances and with the approval of the chair of the new program and the dean of the new college. A student who is in dismissal status at the end of spring and chooses to exercise the Summer Option may not change colleges during the summer.

Withdrawal: A student on academic probation (P) who withdraws during period 3 will be academically dismissed at the end of the term the student withdraws, except under extenuating circumstances as judged by the college academic standards committee.

Reinstated students: Reinstated students should also see the section on Reinstatement.

Veterinary Medicine: Additional rules for minimum satisfactory progress are in effect.

Special (nondegree) students: Students matriculated in this classification category are governed by the regular academic progress regulations. Furthermore, by special action of their college academic standards committee, additional standards may be required.

For questions concerning interpretation and application of the rules governing academic progress, students should contact the chair or secretary of their college academic standards committee in their college office.

The university's academic standards rules are presented below. In addition to taking action based on these rules, a college academic standards committee may also place a student on academic probation or dismiss a student from enrollment in the university when, in the college committee's judgment, the student's academic performance or progress toward a degree is exceptionally deficient. Likewise, a college committee

may, under exceptional circumstances, exempt individual students from the application of these rules. Students who participate in the Regent Universities Student Exchange Program, or in a similar program where the credit taken at the other school will be considered as resident credit and the grades included in the student's ISU cumulative grade point average, are subject to Iowa State University's academic standards.

Maintaining Satisfactory Progress

Continued enrollment at Iowa State University depends upon an undergraduate student maintaining satisfactory academic progress toward attaining a degree. To assist students in maintaining satisfactory progress, Iowa State University has adopted academic standards designed to provide early identification of students who are experiencing academic difficulty, and to provide timely intervention through academic advising and academic support programs.

Academic standing at Iowa State University is dependent upon the total number of credits a student has attempted or earned, the student's semester grade point average (GPA), the student's cumulative ISU GPA, and the student's transfer GPA (if below 2.00.)

Academic Warning

While a warning (W) is the least severe of the negative academic actions, it serves as a reminder that future academic performance below 2.00 could result in more serious consequences. In fact, a student on warning whose subsequent term GPA is below a 2.00 will be placed on probation (P) the following term.

Students who receive an academic warning are required to develop a plan for academic improvement in consultation with their academic adviser or the Academic Success Center. A student who is subject to both academic warning and academic probation will be placed on academic probation. The academic warning is not a part of the student's permanent academic record.

Students will receive an academic warning (W) at the end of any fall or spring semester when they earn a GPA of 1.00 – 1.99 for that semester. At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic warning status:

- Students will be placed on academic probation if they earn less than a 2.00 GPA for the next fall or spring semester, or
- They will be removed from warning status if they earn at least a 2.00 semester GPA for the next fall or spring semester and they are not subject to academic probation based on cumulative GPA (over 75 credits).

See Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Probation

Students are placed on academic probation status as a warning that their academic progress is not satisfactory and that they should take steps to improve their academic performance to avoid dismissal from the university. Academic probation is an indication of very serious academic difficulty. Students may be placed on academic probation as a result of either semester GPA, cumulative GPA, or both. Academic probation status is not a part of the student's permanent academic record.

Students on academic probation and warning are required to meet with their adviser and to complete the Academic Intervention Self Assessment

form, which can be accessed here: <http://www.dso.iastate.edu/asc/ai/students/>

Students will be placed on academic probation (P) at the end of a semester/term for either of the following two reasons:

1. Semester GPA: Students who earn less than a 1.00 at the end of any fall or spring semester, or less than a 2.00 two consecutive semesters, will be placed on academic probation. Students will not be placed on academic probation at the end of the summer term due to summer term GPA only.
2. Cumulative GPA: Students with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation at the end of any fall or spring semester or summer term when their cumulative GPA is less than 2.00. Students with 75 or more credits attempted or earned who have a transfer GPA < 2.00 will be placed on academic probation at the end of any fall or spring semester or summer term when their combined transfer/ISU cumulative GPA is less than 2.00.

At the end of the next fall or spring semester of enrollment, one of the following actions will be taken for students on academic probation status:

- Students will be academically dismissed if they fail to earn at least a 2.00 semester GPA. At the end of any spring semester, students in dismissal status may enroll for summer term. (See Summer Option for Students in Dismissal Status in the Summer Academic Standards Regulations section.)
- Students will continue on academic probation if they earn at least a 2.00 semester GPA but are subject to continued academic probation based on their cumulative GPA (over 75 credits).
- Students will be removed from probation if they earn at least a 2.00 semester GPA and are not subject to continued academic probation based on their cumulative GPA (over 75 credits).

See Academic Dismissal for dismissal policy.

Summer Academic Standards Regulations section for how summer grades affect warning, probation, or dismissal status.

Academic Dismissal

Students who do not meet the requirements of their academic probation are academically dismissed from the university. Each College Academic Standards Committee is responsible for final decisions regarding the academic status of students in that college, and any appeals to academic dismissal actions are considered by the college committee. Once dismissed, students are not allowed to reenroll at Iowa State University until they have been academically reinstated. (See section on reinstatement.) Academic dismissal is placed on the student's academic record as a permanent notation. The official transcript of a student who has been dismissed includes a "not in good standing" notation.

Summer Academic Standards Regulations

Students who are newly placed or continued on academic probation (P) at the end of the previous semester may enroll for the summer term without being in jeopardy of academic dismissal from the university at the end of that summer term.

Summer Combined Term GPA:

All students who attend summer session will have their academic status reassessed at the end of the summer based on the combined (not averaged) grade summaries of their previous term of attendance and

summer term. Academic status (warning or probation) after summer session will be based on the resulting combined term GPA. The academic status resulting from the summer combined term GPA supersedes the academic status at the end of the previous term.

For students who have remaining designated repeat credits, courses taken in the previous semester and repeated in summer will be calculated as designated repeats in the combined term GPA.

The combined term GPA (summer plus preceding term) will not appear on the student's grade report or permanent record.

Summer term GPA alone cannot determine academic status. Students who initiate enrollment at Iowa State during the summer will not be placed on warning or probation regardless of their academic performance.

Summer Cumulative GPA:

A student who was on academic probation (P) at the beginning of summer term based only on cumulative GPA, who raises his or her cumulative GPA to over a 2.0 at the end of the summer term shall be removed from probation status at the end of the summer term.

A student with 75 or more credits attempted or earned, whichever is greater, will be placed on academic probation (P) at the end of the summer term if his or her cumulative GPA is less than 2.00.

A student with 75 or more credits attempted or earned who has a transfer GPA < 2.00 will be placed on academic probation (P) at the end of any summer term if his or her combined transfer/ISU cumulative GPA is less than 2.00.

Summer Option for Students in Dismissal Status:

A student considered for academic dismissal at the end of spring semester will be permitted to enroll for the summer term. The combined spring/summer GPA will be used to determine whether the student should be permitted to continue his/her enrollment after the summer term. If the resulting combined term GPA is not 2.00 or greater, the student will be academically dismissed.

Reinstatement and Renewal

Reinstatement

The procedures delineated in this section apply to students who were dismissed from Iowa State for academic reasons. Students who left Iowa State in good academic standing and who are seeking reentry should see Index, Reentry for more information.

1. Reinstatement is not automatic. Students who have been dismissed for academic reasons should contact the dean's office in the college they wish to enter for instructions specific to that college. The college Academic Standards Committee reviews each petition and other relevant information, and reinstatement is based upon that review. As part of the petition process, students must submit a plan for academic success that identifies the causes of their poor academic performance and demonstrates that they have taken actions to avoid or eliminate these causes.
2. Students can only be reinstated after at least one academic semester has elapsed since they were academically dismissed. The summer session is not a semester for the purpose of being out of school one semester.

3. Students who have been dismissed from enrollment two or more times are not eligible for reinstatement until at least two academic semesters have elapsed since their last academic dismissal.
4. Students who were dismissed by one college and subsequently reinstated by another college cannot transfer back to the original college unless permission is granted by the Academic Standards Committee of the original college. This procedure applies regardless of the student's academic standing when the transfer is requested.
5. To be considered for reinstatement to the university, students must submit a petition to the Academic Standards Committee of the college in which they desire to enroll at least 45 days before the beginning of the semester. Students who have not been enrolled for a period of 12 or more months or who are international students must also file a reentry form prior to their return. For more information see the Reentry web site at <http://www.registrar.iastate.edu/info/reentry.html>. (Students dismissed for the second time and requesting reinstatement in the College of Liberal Arts and Sciences must submit their petition 70 days before the beginning of the semester.)
6. As a condition of reinstatement, students will reenter on academic probation and must accept whatever additional requirements are stipulated by the college Academic Standards Committee. Examples include full- or part-time status, specified credit hours, specific courses, specific GPAs, restriction on choice of major, and required counseling.

Student Appeal

Students may appeal a decision regarding their academic status if they believe that new information can be provided or extenuating circumstances exist that would alter the application of any rule in this section. The appeal should be made in writing to the Academic Standards Committee of the college in which the student is enrolled. The written appeal must include the reasons for the appeal and the evidence to substantiate these reasons.

The student should initiate the appeal process by contacting the secretary of the college Academic Standards Committee in the administrative office of her or his college immediately upon receipt of notification of the committee's action, and at least ten calendar days before the beginning of the semester. The secretary will then inform the student of the deadline for submission of the written appeal.

If the student is dissatisfied with the committee's action, he or she may submit an appeal in writing to the dean of her or his college within seven calendar days after they are notified of the committee's action. The dean must respond in writing within seven calendar days of receipt of the appeal.

If the issue is not resolved within the college, further appeals may be made in writing to the provost and subsequently to the president of the university. Appeals beyond the college level will, however, be considered only if based on one or both of the following contentions: (a) appropriate procedures were not followed at the college level; (b) academic rules were not applied correctly at the college level.

Academic Renewal Policy

Students who are returning to Iowa State University to pursue an undergraduate degree after an extended absence may request permission to remove one or more of their complete academic terms from future degree and GPA considerations.

1. Eligibility. To be eligible for academic renewal consideration, students must meet these requirements:

- a. Students must not have enrolled at Iowa State University for five or more consecutive years.
 - b. Students must not have graduated from Iowa State University.
 - c. Students must currently be in good academic standing. (If the student was previously dismissed, he or she must be reinstated.)
2. Conditions. Academic renewal is based on the following conditions:
- a. All courses and credits that were taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine courses from multiple terms to comprise the semester(s) or quarter(s) dropped. Degree requirements met during the dropped terms will ordinarily have to be repeated.
 - b. Renewal may be applied only to academic terms completed prior to the students' extended absence.
 - c. All courses and grades for the chosen terms will remain on the students' academic record.
 - d. Designated repeats, drops and P/NP options will be reinstated for the terms dropped.
 - e. Students who have used all of their drop options will be given one extra drop.
 - f. Students may be granted only one academic renewal. To be eligible for a degree after academic renewal is granted, students must complete a minimum of 24 credit hours after re-enrolling at Iowa State University.
3. Procedures.
- a. Students should discuss their desire to pursue academic renewal with an adviser in the college they wish to enter.
 - b. The student must complete the Academic Renewal Petition form available from www.registrar.iastate.edu/forms (<http://www.registrar.iastate.edu/forms>).
 - c. After the form is signed by the student and academic adviser, it is submitted to the Records area in the Office of the Registrar, 214 Enrollment Services Center.

ADMISSIONS

Office of Admissions

Director

Katharine Johnson Suski

Admission

When to Apply

Applicants for the fall semester are encouraged to apply during the fall of the year preceding their entry to Iowa State University. Applications for other terms should be submitted well in advance of the desired entry date.

Application deadlines are available at www.admissions.iastate.edu. (<http://www.admissions.iastate.edu>)

Completed applications for admission to the professional curriculum in the College of Veterinary Medicine, together with the required supporting transcripts, must be received by an established deadline. See College of Veterinary Medicine, Application and Admission.

How to Apply

Applications for admission are available online at www.admissions.iastate.edu. (<http://www.admissions.iastate.edu>)

Iowa State University operates on a rolling admissions basis. Admission of applicants for fall semester begins in July of the preceding year. Admission for other terms begins approximately 12 months prior to the beginning of the term. Admission offers are issued for a specific term and are valid only for the term specified.

Undergraduate Admission Directly from High School

Admission decisions are made by admissions officers in accordance with the entrance requirements as set forth in the Iowa Administrative Code as well as the admission policies established by the Faculty Senate.

Students who seek admission must meet the following requirements and also any special requirements for the college or curriculum of their choice.

Applicants must submit an application for admission and the appropriate application fee (see www.admissions.iastate.edu (<http://www.admissions.iastate.edu>) for current application fee information). In addition applicants must have their secondary school provide an official final transcript of their academic record, including cumulative grade point average, rank in class, and certification of graduation.

Applicants must also arrange to have their ACT or SAT scores reported to Iowa State directly from the testing agency. U.S. citizen and immigrant applicants who will not graduate from an approved U.S. high school and whose primary language is not English must meet university communication proficiency requirements. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS), or the SAT. Contact the Office of Admissions for minimum score requirements for each examination.

Applicants may be required to submit additional information or data to support their applications.

A. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve a Regent Admission Index (RAI) score of at least 245 will be offered admission. Graduates of approved Iowa high schools who have the subject-matter background required by Iowa State University and who achieve less than a 245 RAI score will be considered for admission on an individual basis.

The RAI score will be calculated for each applicant based upon one of two mathematical formulas: the Primary RAI Formula (for students whose high school provides class rank) and the Alternative RAI Formula (for students whose high school does not provide class rank). The mathematical equation for each formula is listed below:

Primary RAI Formula (for students whose high school provides class rank):

$$\begin{aligned} & \text{Percentile class rank} \times 1 \\ & + (\text{ACT composite score} \times 2) \\ & + (\text{Cumulative GPA} \times 20) \\ & + (\text{Number of years of core courses in high school} \times 20) \\ & = \text{RAI Score} \end{aligned}$$

Alternative RAI Formula (for students whose high school does not provide class rank):

$$\begin{aligned} & (\text{ACT composite score} \times 3) \\ & + (\text{Cumulative GPA} \times 30) \\ & + (\text{Number of years of core courses in high school} \times 5) \\ & = \text{RAI Score} \end{aligned}$$

Note: For purposes of calculating the RAI, SAT scores will be ACT composite equivalents; high school rank is expressed as a percentile with 99% as the top value; high school GPA is expressed on a 4-point scale; and number of high school courses completed in the core subject areas is expressed in terms of years or fractions of years of study.

Applicants from high schools that do not present all of the factors required for calculation of the RAI score will be considered for admission on an individual basis.

Those applicants who are not offered unconditional admission will either be given the opportunity to enroll for a trial period during the preceding summer session or be denied admission.

B. Nonresidents of Iowa, including international students, may be held to higher academic standards, but must meet at least the same requirements as resident applicants.

C. Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores earned on standardized examinations.

D. Applications may be considered from students who did not graduate with their high school classes. They will be required to submit all academic data to the extent that it exists and achieve scores on standardized examinations which will demonstrate that they are adequately prepared for academic study.

E. Students with satisfactory academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

F. Exceptional students may be admitted as full-time students before completing high school. Early admission is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for college-level study.

High School Preparation

Graduation from an approved high school shall ordinarily precede entrance into Iowa State University.

Students who wish to enter Iowa State University directly from high school (or transfer from another college or university with less than 24 semester hours of graded transferable college credit) must meet the level of academic performance described above and show evidence of the following high school preparation:

English/Language Arts

Four years, emphasizing writing, speaking, and reading, as well as an understanding and appreciation of literature

Mathematics

Three years, including one year each of algebra, geometry, and advanced algebra

Science

Three years, including one year each of courses from two of the following fields: biology, chemistry, and physics

Social Studies

Two years

Additional Requirements for the College of Liberal Arts and Sciences and the College of Engineering

In addition to the high school preparation requirements described above, students applying to the College of Liberal Arts and Sciences must have completed an additional year of social studies, for a total of three years, and two years of a single foreign language. Students applying to the College of Engineering must have completed two years of a single foreign language.

Students who do not meet the high school course preparation requirements listed here, but who are otherwise well qualified, may be admitted after individual review of their applications.

Undergraduate Admission - Nondegree Undergraduate

Students who wish to attend Iowa State University to take undergraduate courses but who do not plan to seek an undergraduate degree from Iowa State University should apply as nondegree undergraduate students. Credit taken under the nondegree undergraduate classification is applicable for undergraduate degree purposes for those who are later admitted as degree-seeking undergraduate students. Nondegree undergraduates who have already earned an undergraduate degree should not enroll in graduate credits. To take courses listed as available for graduate credit, a student must enroll as a nondegree graduate and pay graduate fees. Credit obtained under the nondegree undergraduate classification may not be applied toward a graduate degree.

Nondegree applicants are held to the same standards of admission as degree-seeking applicants, including English language proficiency.

Students enrolled in the Intensive English and Orientation Program (IEOP) are classified as nondegree undergraduate students in the College of

Liberal Arts and Sciences. Permission to enroll in one academic course in addition to full-time intensive English study may be granted under special circumstances.

Reentering Students - Undergraduate and Graduate

Reentering students are those who have previously attended Iowa State University and are returning after an absence of at least one full year. See Index, Reentry Students.

International students need to reapply after an absence of one full semester, exclusive of summer session. International reentries must also contact the International Students and Scholars office to request the necessary visa application forms.

Reentering graduate students do not need to complete a reentry form but should notify their department and the Office of the Registrar of their intent to reenter Iowa State University. See Index, Reentry Students for more information.

Undergraduate Admission by Transfer from Other Educational Institutions

Students who seek admission must meet the following requirements and also any special requirements for the college and curriculum of their choice.

Applicants must submit an application for admission, and the appropriate application fee (see www.admissions.iastate.edu (<http://www.admissions.iastate.edu>) for current application fee information). Applicants must also request that each college they have attended send an official transcript of record to the Office of Admissions. Failure to provide transcripts from all colleges or universities attended may result in denial of the application or dismissal from the university. If less than 24 semester hours of graded transferable college credit is completed prior to entry at Iowa State University, applicants must also request that their official high school transcript and ACT or SAT scores be sent to the Office of Admissions. Other transfer applicants are encouraged to provide high school academic information. Students who do not do so may be asked to take course placement examinations during orientation.

U.S. citizen and immigrant applicants who have not graduated from an approved U.S. high school and whose primary language is not English must meet the university's English communication requirement. This can be accomplished by achieving satisfactory scores on the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or the SAT. Contact the Office of Admissions for minimum score requirements for each examination.

A. Transfer applicants with a minimum of 24 semester hours of graded transferable credit from regionally accredited colleges or universities, who have achieved for all college work previously attempted the grade point average required by Iowa State for specific programs, will be admitted. A 2.00 grade point average (on a 4.00 grading scale) is the minimum transfer grade point average requirement. Some programs may require a transfer grade point average higher than this minimum. Higher academic standards may be required of students who are not residents of Iowa, including international students.

Applicants who have not maintained the grade point average required by Iowa State University for specific programs or who are under academic suspension from the last college attended generally will be denied admission.

B. In addition to meeting the minimum transfer grade point average requirement described above, applicants who have completed fewer than 24 semester hours of graded transferable college credit prior to their enrollment at Iowa State must also meet the admission requirements for students entering directly from high school.

C. Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

D. Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis, taking into account all available academic information.

Transfer Credit Practices

Iowa State University endorses the Joint Statement on Transfer and Award of Academic Credit approved by the American Council on Education (ACE) and the American Association of Collegiate Registrars and Admissions Officers (AACRAO). The current issue of Transfer Credit Practices of Designated Educational Institutions, published by AACRAO is an example of a reference used in determining transfer credit.

The acceptance and use of transfer credit are subject to limitations in accordance with the educational policies of Iowa State University.

A. Students from regionally accredited colleges and universities.

Credit earned at regionally accredited colleges and universities is acceptable for transfer, except for the following, which may not be accepted, or may be accepted to a limited extent:

—credit in courses determined by Iowa State University to be of a developmental, vocational, or technical nature

—credit in courses or programs in which the institution granting the credit is not directly involved.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits must be completed at Iowa State University.

B. Students from colleges and universities which have candidate status.

Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor's degree at Iowa State University.

Credit earned at the junior and senior classification from an accredited two-year college which has received approval by a regional accrediting association for change to a four-year college may be accepted by Iowa State University.

C. Students from colleges and universities not regionally accredited.

Courses completed at colleges and universities that are not regionally accredited will be evaluated according to the recommendations made by the American Association of Collegiate Registrars and Admissions Offices or the American Council on Education.

In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the Regent Committee on Educational Relations, upon request from such institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories.

In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Designated Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

D. Students from foreign colleges and universities.

Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved, its recognition by the educational authorities of the foreign country, and an evaluation of the content, level, and comparability of the study to courses and programs at Iowa State University. Credit may be granted in specific courses or assigned to general areas of study. Extensive use is made of professional journals and references which describe the educational systems and programs of individual countries.

Additional Transfer Credit Policies

A. Students with credit obtained during military service.

Credit will be awarded for successful completion of technical or specialized schools attended while on active duty with the armed forces to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication *A Guide to the Evaluation of Educational Experiences in the Armed Services*.

B. Students with credit obtained through non-college sponsored instruction.

Credit will be awarded for successful completion of learning acquired from participation in formal courses sponsored by associations, business, government, industry, and unions to the extent that the material is applicable toward degree requirements at Iowa State University. Application for such credit is made at the Office of Admissions, which follows many of the recommendations in the American Council on Education (ACE) publication *The National Guide to Educational Credit for Training Programs*.

C. Students with credit obtained through correspondence courses.

Although Iowa State does not offer correspondence courses, college level courses taken by correspondence from accredited colleges or universities are acceptable for transfer at the undergraduate level if the courses taken are those that do not require laboratory study.

D. College Level Examination Program (CLEP).

Iowa State University will award credit for each of the following 15 examinations: Financial Accounting, Principles of Accounting, American Government, Biology, Calculus, French Language, German Language, Humanities, Principles of Macroeconomics, Principles of Microeconomics, Natural Sciences, Introductory Psychology, Social Sciences and History, Introductory Sociology, Spanish Language.

Application of CLEP credit to a degree program varies with the department, so students should consult with their department

before they register for CLEP examinations. Additional information is available at www.admissions.iastate.edu/cbe/cbe_clep.php (http://www.admissions.iastate.edu/cbe/cbe_clep.php).

E. Students with "test-out" credit.

Students who have earned credit at other colleges or universities through Advanced Placement (AP), College Level Examination Program (CLEP), or International Baccalaureate (IB) examinations may qualify for credit at Iowa State University. Scores from these examinations should be sent directly to the Office of Admissions; credit will be awarded provided the scores satisfy Iowa State's requirements.

Credit earned at another college through locally designed test-out examinations may transfer to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at that institution.

Articulation/Transfer Agreements

A. Iowa Regent Universities General Education Articulation Agreement.

Iowa State University participates in an articulation agreement with the other two Iowa Regent universities concerning the acceptance of their general education programs into the Iowa State University College of Liberal Arts and Sciences. Under the terms of this agreement, students who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa may transfer to Iowa State's College of Liberal Arts and Sciences with their general education requirements met (with the possible exception of the foreign language and library requirements).

B. Associate of Arts (A.A.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences or the College of Business at Iowa State University with an associate of arts degree from an Iowa public community college, and who have at least 60 prescribed semester (90 quarter) credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be considered to have met the general education requirements of that college. College of Business students will still be required to take an ethics and a global course to satisfy general education requirements unless they are taken as part of the associate of arts degree.

C. Associate of Science (A.S.) Articulation Agreement with Iowa public community colleges.

Students who plan to enter the College of Liberal Arts and Sciences at Iowa State University with an associate of science degree from an Iowa public community college, and who have at least 60 prescribed semester credits acceptable for transfer and at least a 2.00 cumulative grade point average, will be enrolled at junior level status upon entry to Iowa State University, College of Liberal Arts and Sciences. Transfer students with AS degrees will have their transfer credits evaluated course-by-course to determine how the courses will be applied to their intended Iowa State major/degree program requirements.

D. Career-technical credit from Iowa public community colleges.

Iowa State University will accept up to 16 semester (24 quarter) credits earned in career-technical courses where the sending Iowa public community college will accept such courses toward its associate of arts or associate in science degree. Certain career-technical courses at Iowa community colleges may be articulated to Iowa State University as academic credit. The credit hours earned in these articulated courses

would transfer in addition to the 16 semester hour career-technical maximum. Please refer to the course equivalency guides on the Web (www.admissions.iastate.edu/equiv) or contact the Office of Admissions for more information.

E. AP and CLEP credit from Iowa public colleges and universities.

Iowa State University has an agreement with the Iowa public colleges and universities which allows credit earned through AP and CLEP examinations to transfer directly to Iowa State University if accompanied by at least 12 transferable semester credits earned through coursework taken at the sending institution.

On-line Transfer Articulation System (TRANSIT)

TRANSIT is Iowa State's online system, which displays how credits from a community college or another university may transfer to a degree program at Iowa State. In TRANSIT, prospective or current students can generate a transfer credit evaluation showing how their courses and degrees from a community college or university transfer to Iowa State University. In addition, students can request an unofficial degree audit, which will display how their transfer courses are applied within a particular Iowa State major/degree program. TRANSIT is easy to use and can be accessed by going to <http://transit.iastate.edu>.

Transfer of Credits

Credits presented from another institution are evaluated initially by the Office of Admissions to determine whether the courses are acceptable for transfer credit. In addition, credits applied toward a particular degree will be determined by the student's college, based on relevance to the students' program requirements as well as the level of performance deemed necessary for successful progress in that program. For example, courses that are deemed important to a program but were earned with less than a C grade may or may not be approved for a program. This policy also applies to students already enrolled at Iowa State University and to new transfer students. Grades earned in courses transferred to Iowa State University will not be used in calculating a transfer student's Iowa State cumulative grade point average.

A student who is admitted as a transfer from another college or university is required to have at least a 2.00 cumulative grade-point average for all transferable work taken elsewhere. If, due to special circumstances, a student is admitted with less than a 2.00 average, that student will have a transfer quality-point deficiency.

This deficiency will be added to any deficiency accumulated at Iowa State University and will be used to determine whether satisfactory progress toward a degree is being made. To graduate, students must earn sufficient quality points above a 2.00 at Iowa State University to offset any quality-point deficiency, including a transfer quality-point deficiency.

Students should consult with their academic advisers and the Office of Admissions before taking coursework at other colleges and universities to be certain the credits will transfer and will be applicable to their program of study. Students who believe that any transfer credits have not been correctly evaluated should consult with their academic adviser and with the Office of Admissions. Questions concerning how transfer credits are applied toward a degree program should be referred to the academic adviser and college office.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. While there is no limit to the number of credits that may be transferred from a four-year institution, the last 32 semester credits before receiving

a degree from Iowa State University must be completed at Iowa State University.

Iowa State University students who attend one of the other Iowa Regent universities under the Regent Universities Student Exchange Program will have the credits earned at the other university counted as resident credit and grades received included in their Iowa State University cumulative grade point average, even if the credits are included in the last 32 semester credits. For information on applying to the program see Index, Regent Universities Student Exchange Program.

Credit by Examination (CBE)

It is Iowa State University policy to grant academic credit by examination in many of the undergraduate courses listed in the university bulletin. Credit is awarded primarily in the introductory level classes in mathematics, natural, physical, and social sciences, and the liberal arts. Students with superior high school backgrounds or those with college-level proficiency in certain subject areas are strongly encouraged to investigate and attempt testing in the CBE programs available.

Types of Credit by Examination Programs (CBE)

Students may earn academic credit in any of four ways and have that credit recorded on their academic record when they enroll. Programs accepted at Iowa State include the Advanced Placement (AP) Program, the International Baccalaureate (IB) Examinations, departmental examinations, and the College Level Examination Program (CLEP). Iowa State's policies for awarding credit for each of these programs may be found at www.admissions.iastate.edu/cbe (<http://www.admissions.iastate.edu/cbe>).

Advanced Placement (AP) Program of the College Board

This program allows students, while still in high school, to take examinations for credit at the college level. Iowa State University awards credit or advanced placement through the Advanced Placement Program in art, biology, chemistry, computer science, economics, English, environmental science, foreign languages, geography, government and politics, history, mathematics, music, physics, psychology and statistics. High school counselors and teachers will assist with testing arrangements.

Generally, students scoring 3 or better on the exams will be considered for course credit based on departmental review of the exams. In some departments, only scores of 4 or better will be considered for credit.

Detailed information concerning the Advanced Placement Program can be found at <https://apstudent.collegeboard.org/home>.

International Baccalaureate Examinations

The International Baccalaureate (IB) Program, offered at many high schools in the United States and abroad, allows students the opportunity to take examinations for credit at the college level. These examinations are offered at standard and higher levels.

Iowa State University awards credit for most higher level examinations and some standard level examinations. Students must receive a minimum score of 4 to qualify for academic credit in most subject areas. Some departments require higher scores. Official IB examination results must be sent directly to the Office of Admissions from the International Baccalaureate Americas Office. Results listed on high school transcripts are not considered official.

Detailed information concerning the IB Program can be found at <http://ibo.org/iba/>.

Departmental Examinations

Students may take locally constructed departmental examinations for undergraduate credit in specified subject areas for which they and the department feel they have the necessary preparation. These exams are generally administered by the department which offers the course (for exceptions, see CLEP offerings below). Students interested in taking departmental (or CLEP) examinations should contact the appropriate department for specific information on the course covered by the exam and the exam itself. A nonrefundable fee is charged for each departmental examination requested. If an acceptable exam score is achieved, a grade of T will be reported to the Office of the Registrar. The T grade represents performance equivalent to a C or better in the course. T grades are not used in computing students' grade point averages; however, the credit does become part of their official academic record and may be applied toward their graduation requirements. For a listing of common departmental test-out exams, refer to <http://counseling.iastate.edu/testing-services/test-outs>. Most examinations for credit are prepared by the departments offering the courses. In some cases, the examination used is part of the College Level Examination Program (CLEP), where the content of the CLEP test has been judged to be an equivalent to the content of the course.

College Level Examination Program

CLEP is available on computer only and Iowa State University only accepts the CLEP tests listed in this section, and does not accept College Mathematics, College Algebra, Precalculus, College Composition, College Composition Modular, American Literature, Analyzing and Interpreting Literature, or English Literature. Up to six semester credit hours in each of these three CLEP general tests is awarded: Social Sciences and History, Humanities, and Natural Sciences. In addition, the College of Engineering does not allow credit earned from CLEP Social Sciences and History, Humanities, and Natural Sciences tests to be used in their students' degree programs.

CLEP tests accepted at Iowa State University include American Government (Pol S 215); Financial Accounting (Acct 284; engineering majors should consult with their academic adviser before registering for this examination); Biology (Biol 101, not for biology or engineering majors); Calculus (Math 165); Introductory Psychology (Psych 101); Introductory Sociology (Soc 134); Principles of Macroeconomics (Econ 102); and Principles of Microeconomics (Econ 101).

In addition, Iowa State University will award up to 16 semester credit hours for CLEP French Language, up to 16 semester credit hours for CLEP German Language, and up to 16 semester credit hours for CLEP Spanish Language. Please note that native or near native speakers of French, German, or Spanish may not test out of the beginning or intermediate levels in these languages.

Information about testing centers and registration can be found at <https://clep.collegeboard.org/search/test-centers>. For information on whether to take any of the CLEP tests, contact your academic adviser. Additional information on the CLEP exam is available at <https://clep.collegeboard.org/>.

Policies and Procedures Governing CBE Tests

1. Departmental and CLEP tests are offered to newly admitted or currently enrolled students at Iowa State University. Former and future students will receive credit only if they enroll sometime during the twelve months immediately following the test(s).

2. Permission to take a departmental examination is obtained from the department. Students may be denied permission because (a) the nature

of the course is such that proficiency cannot be measured by such a test, (b) the student does not appear to have adequate background to pass the examination for the course, or (c) the student would not otherwise be allowed to enroll in the course. Students may appeal such a denial to the dean of the college in which the department is administered and subsequently to the provost.

3. Students may ordinarily attempt a CBE test only once in any course or area. Under special circumstances a retest may be taken upon approval of the department in which the course is offered.

4. Credit by examination will not be granted if it duplicates courses previously passed or failed.

5. Departmental examinations and CLEP subject tests cover only a single course and students may not test out of independent study or special topic courses.

6. There is a nonrefundable fee for all departmental tests. The fee is set by the Board of Regents, State of Iowa, and is subject to change.

7. Departmental examinations are usually given just prior to, or within two weeks of, the beginning of fall and spring semesters. For more information, students should contact the department that offers the class. CLEP tests are given throughout the year.

8. Credit for the CLEP examinations Social Sciences and History, Humanities, and Natural Sciences is not evaluated as equivalent to any specific course and cannot be used in place of specific course requirements for the major. All colleges (except Engineering, which does not accept these tests) allow these CLEP credits to be used for either general requirements (not in Liberal Arts and Sciences) or elective credit. Students are responsible for checking with their academic advisers to determine whether such credit is to their benefit.

9. Listed below are policies for transferring CBE from another college or university to Iowa State University:

a. AP or CLEP credit which is earned at an Iowa public college or university may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution. AP or CLEP credit which is earned at any other college or university may not be transferred directly to Iowa State. However, the scores from these examinations may be sent to Iowa State University from the testing agency, and credit will be awarded based on Iowa State's AP and CLEP policies.

b. IB credit earned at another college or university may not be transferred directly to Iowa State University. However, the scores from IB examinations may be sent to Iowa State from the testing agency, and credit will be awarded based on Iowa State's IB policies.

c. Credit earned at another college or university through local test-out examinations may be transferred directly to Iowa State University provided it is accompanied by at least 12 semester credits earned in residence at the sending institution.

10. Credit earned from CBE will be posted to the student's academic record at the end of the term. CBE credits will be counted toward the projected year in school classification used to establish registration start dates.

11. Some professional programs do not accept T (test-out) credit in preprofessional courses. Students who anticipate applying to such

programs should inquire about the acceptability of such credit before registering for such CBE tests.

12. Credit established at Iowa State University will usually transfer to other colleges and universities; however, the final decision rests with the institution reviewing the transcript.

Below is detailed information concerning Iowa State University admission policies and procedures. Prospective students are also encouraged to visit the following websites for additional information:

Veterans and Military Students: www.admissions.iastate.edu/military/ (<https://www.admissions.iastate.edu/military/>)

COLLEGES AND CURRICULA

Undergraduate and Professional Degree Programs

The university is organized into eight colleges, including the Graduate College. Six colleges offer undergraduate degree programs, and the College of Veterinary Medicine offers the Doctor of Veterinary Medicine degree. For a listing of the more than 100 majors offered by the Graduate College, see the summary at the end of the Graduate College section of this publication.

Iowa State University is accredited by the Higher Learning Commission.

Bachelor's Degree Requirements

To receive a degree, a student must meet the requirements of the curriculum in which the degree is to be awarded. Verification that the student has met those requirements is made by the dean of the college, who also has the authority to waive a requirement under exceptional circumstances.

A cumulative grade point average of at least 2.00 in all work taken at Iowa State University is required for graduation.

A student admitted as a transfer from another college or university is normally required to have a 2.00 cumulative average at the time of entrance. A student may, however, be admitted with a quality-point deficiency, but will be required to earn sufficient quality-points above a 2.00 at Iowa State to offset the quality-point deficiency at the time of entrance.

No more than 65 semester or 97 quarter credits earned at two-year colleges can be applied to a bachelor's degree from Iowa State University. There is no limit to the number of credits that may be transferred from a four-year institution.

A student who takes work at another college or university after having been enrolled at Iowa State must submit transcripts of all work attempted to the Office of Admissions at Iowa State. This work must average a 2.00 or the deficiency of quality points will be assessed against the student. Failure to submit such transcripts will be grounds for dismissal.

In unusual circumstances, the Academic Standards Committees of the respective colleges may review and give further consideration to the records of students who, except for grade-point average, have satisfactorily completed all graduation requirements. If the appropriate college Academic Standards Committee considers that the educational and professional needs of such a student have been satisfactorily met, or can be satisfactorily met by imposing further conditions, the committee may recommend to the dean of the college that the student be graduated or that a supplemental program be accepted in place of the fully unqualified grade point average. The college Academic Standards Committee chairperson reports such exceptional actions to the Faculty Senate Committee on Academic Standards and Admissions.

To qualify for a bachelor's degree, a student must take a minimum of 32 credits in residence at Iowa State University. Also required is that the last 32 credits must be taken in residence, although under special circumstances, with prior written approval of the student's major department, six of the last 32 credits may be transferred and applied toward a degree at Iowa State University.

A student may receive two bachelor's degrees if he or she meets the requirements of each curriculum and earns at least 30 credits beyond the requirements of the curriculum requiring the greater number of credits. Each degree program must be approved by the appropriate department chair or head.

A student fulfilling the requirements of two separate curricula in different colleges may, in certain cases, receive a degree from one of the colleges with double majors crossing college lines. The permission of both deans must be obtained and each degree program must be approved by the appropriate department and dean.

Undergraduate Certificates

All undergraduate certificates require at least 20 credits, including at least 12 credits taken at Iowa State University. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above. The undergraduate certificate must include at least 9 credits that are not used to meet any other department, college, or university requirement except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses taken for an undergraduate certificate may not be taken on a pass-not pass basis. A cumulative grade point average of at least 2.00 is required in courses taken at Iowa State University for an undergraduate certificate. Specific requirements and/or restrictions are available from the department or program offering the undergraduate certificate (see Index or individual colleges for information).

Communication Proficiency Policy

Basic Principles: The faculty of Iowa State University believe that all educated people should be able to communicate effectively in a variety of settings and media, including electronic. Consequently, Iowa State University graduates are expected to develop competence in three interrelated areas of communication: written, oral, and visual.

This communication competence can best be achieved through the following five principles:

- Communication instruction and practice are distributed over the student's entire undergraduate experience, both in and out of the classroom, from the first year through the senior year.
- Communication instruction and practice are distributed across the curriculum, both in communication courses and in courses in the student's major.
- Active learning and higher-order thinking are fostered through communication.
- Faculty across the university share responsibility for the student's progress in communication practices.
- Both faculty and students engage in ongoing assessment for continuous improvement of the student's communication practices.

Iowa State University's communication curriculum, based on these five principles, seeks to enrich the student's understanding of the various subjects studied as well as prepare the student to communicate successfully in professional, civic, and private life.

Foundation Courses

To ensure that broad communication competence is addressed and developed at the beginning of a university career, all students will earn six credits in the two-course introductory sequence (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition), normally taken in the first and second years. Students will focus on writing and critical reading, with complementary

instruction in visual, oral, and electronic communication; they will concentrate on civic and cultural themes; and they will enter work in a communication portfolio to document their current level of proficiency.

Upper-Level Curricula

Continuing development of communication skills will be directed by the student's major department. Using the university's basic principles as a guide, each department will specify a set of intended learning outcomes and design communication experiences by which students in the major can achieve the desired level of communication proficiency.

Departments may select from or combine a variety of communication options that best match their faculty, students, and curriculum:

- designated communication-intensive courses that integrate written, oral, and visual communication into a course in the major;
- a sequence of courses within the major that incorporates communication tasks of increasing complexity;
- linked courses—one in communication, one in the major—that integrate readings and assignments;
- advanced composition course(s) appropriate to the student's major and offering instruction in written, oral, and visual communication;
- communication-intensive activities within or beyond course work, such as communication portfolios, discipline- or course- specific student tutoring, community service projects, internships, electronic presentations, informational fairs, juried competitions, entrepreneurial projects, newsletters, Web sites.

Departments will retain the authority for regularly assessing the degree to which their students achieve the specified learning outcomes and for making curricular improvements based on departmental assessment data.

Non-Native Speakers of English: Students admitted to the university who are graduates from non-U.S. high schools and whose first language is not English are required to take the English Placement Test before the beginning of their first semester of enrollment as students at Iowa State. This requirement includes freshmen as well as those who have transferred credit from other institutions. The test is administered by the English Department and is offered before the beginning of each semester. Students whose performance on this placement examination is satisfactory will follow the regular university communication proficiency requirements. Students who have deficiencies will enroll in special English classes, as determined by the test results.

Library Study

Independent study and investigation through the use of books, journals, and libraries enable students to grow intellectually and professionally in college and afterward. For this reason, all students receive instruction in the use of the University Library, including practice in how to locate the published literature of their respective fields of study.

For undergraduate students, LIB 160 Information Literacy is a one-credit graduation requirement course that provides a foundation of information literacy and library research skills and concepts. Librarians also work each semester with ISU course instructors to teach course-related instruction sessions for undergraduate students in the effective use of library resources in course-relevant fields of study.

Each semester librarians work with ISU course instructors to teach course-related instruction sessions for graduate students in library research skills, information literacy concepts, and the effective use of

library resources and research tools in course-relevant fields of study. For more information, call the Library at 515 294-4527.

U.S. Diversity and International Perspective Requirements

One of Iowa State University's goals is to prepare its students to meet the challenges of responsible citizenship and effective professional roles in a culturally diverse global community. To help achieve this goal, all undergraduate students must fulfill graduation requirements in two areas: U.S. Diversity and International Perspectives. The specific standards used to certify students' fulfillment of these requirements vary from major to major, but all require three credits of course work (or the equivalent in some alternative academic experience) for each of the requirements. In most cases, courses used to meet the U.S. Diversity and International Perspectives requirements can also be used to fulfill general education requirements of the student's college or requirements of the student's major. Students should consult with advisers for details of the requirements in particular majors.

The focus of the U.S. Diversity requirement is the multicultural society of the United States. Courses or alternative academic work used to meet the requirement address significant manifestations of human diversity and provide students with insights that enhance their understanding of diversity among people in the U.S.

Through completion of the U.S. Diversity requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

- articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
- analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.
- analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
- analyze the perspectives of groups and individuals affected by discrimination
- analyze how cultural diversity and cooperation among social groups affect U.S. society.

The focus of the International Perspectives requirement is the global community. Its objective is to promote students' understanding of cultural diversity and interdependence on a global scale. A period of immersion in a foreign culture is often a particularly effective way of meeting these objectives, so Iowa State University encourages the use of study-abroad experiences as a means of fulfilling the International Perspectives requirement. International students, because they are "studying abroad" from their home country's perspective, are normally deemed to have met the International Perspectives requirement. The International Perspective requirement shall be waived for U.S. military veterans who have completed at least three months of service stationed outside of the United States.

Through completion of the International Perspectives requirement, students will achieve at least two learning outcomes such as those listed below.

Students will be able to:

- analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
- describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
- analyze and evaluate the influence of global issues in their own lives.
- describe the values and perspectives of cultures other than their own and discuss how they influence individuals' perceptions of global issues and/or events.
- communicate competently in a second language.

Curriculum Requirements

The curriculum requirements, both in number of credit hours and specific courses, are guidelines for the student and his or her adviser in planning an academic program. The curriculum is subject to change and because of these changes, adjustments may need to be made.

Catalog in Effect

A student may choose to graduate under the catalog in effect at the time of graduation or a catalog for the previous five years, provided it covers a period of his or her enrollment. Full requirements of the chosen catalog must be met except that adjustments will be made in instances where courses are no longer available or where programs have been changed.

Special Programs

Honors Program

The Iowa State University Honors Program is designed for students who have demonstrated the ability and motivation to assume more than the usual responsibility for their undergraduate education. The program enables honors students to gain the maximum benefit from their undergraduate education. Students who graduate in the Honors Program receive the honors designation on their transcripts and diplomas.

Special educational opportunities. Students in the Honors Program determine their educational objectives and devise an individualized program of study to meet them. An honors program may include substitutions for required courses, a combination of courses from several departments to form a new major or minor, Honors courses or seminars, independent study and research, and other forms of innovation. Information about honors courses and seminars for the current academic year can be obtained from the Honors Program Office, 2130 Jischke Honors Building.

Other benefits. Members of the Honors Program have 24-hour access to the Jischke Honors Building as a quiet place to study, use the computers, and visit with other honors students. Students also have off-campus opportunities such as attending honors seminars and conferences. Members receive extended loan privileges at the Library, priority scheduling, and the opportunity to apply for research funds.

ISU students who have a cumulative grade-point average of at least 3.5 become eligible to apply for admission to the Honors Program during their second semester in residence and continue to be eligible as long as they have at least 48 semester credits remaining before graduation. Transfer students with a G.P.A. of 3.5 or higher and more than 60 credits remaining are also eligible to apply.

First-Year Honors Program

Entering first-year students with outstanding high school records and academic ability may be eligible to participate in the First-Year Honors Program (FHP). The FHP, which introduces students to an honors education, consists of honors sections of English 250 and Library 160,

an FHP seminar, and honors advisers. Students may also choose to participate in the Honors Mentor Program, which introduces students to scholarship and research. Participants are matched with faculty members conducting research in an areas of mutual interest. Admission to the FHP is limited, and is based on past academic achievement, potential, and interest in an honors education.

Further information concerning the University Honors Program and the First-Year Honors Program can be obtained from the Honors Program Office, 2130 Jischke Honors Building or www.honors.iastate.edu (<http://www.honors.iastate.edu>).

Dual-degree Programs

Students who complete the first three years in certain curricula at Iowa State and who satisfactorily complete the first year in a recognized medical, dental, veterinary medical, or law curriculum may then be awarded a bachelor's degree from Iowa State. (See Index, Preprofessional Study.)

Iowa Lakeside Laboratory

Iowa Lakeside Laboratory is an off-campus teaching and research facility situated on a 140-acre campus on West Okoboji Lake in Northwest Iowa. It is run cooperatively by Iowa State University, the University of Iowa, the University of Northern Iowa, and Drake University. Each summer Iowa State University students can take up to three undergraduate and/or graduate courses in archaeology, biology, ecology, environmental science, and/or geology for credit at Lakeside (see course listings under Iowa Lakeside Laboratory). All Lakeside courses are small, full-immersion, field-oriented courses that run for 1-4 weeks. Lakeside also offers a variety of short courses for teachers and a series of nontechnical short courses on various aspects of the natural history of Iowa. Information about Lakeside courses as well as registration and housing information can be obtained from the Biology Program Office, 103 Bessey Hall or on the Lakeside Web site, www.continuetolearn.uiowa.edu/lakesidelab (<http://www.continuetolearn.uiowa.edu/lakesidelab>).

Regent Universities Student Exchange Program

Iowa State University students may take courses at either of the other two Regent universities for Iowa State resident credit. Regular, degree-bound students in good standing at any of the three Regent universities may attend another Regent university for a maximum of two semesters, and the credits earned at the other university will be counted as resident credit at the home institution. Approval for participation and credit in the exchange program must be obtained well in advance of registration since the department head must approve the acceptance of such credits if these are to apply to the major, and to ensure complete processing of the application between the cooperating universities within specified dates for enrollment. Detailed information and application forms for the exchange program are available from the Office of the Registrar.

National Student Exchange (NSE)

Iowa State University is a member of National Student Exchange. The NSE Consortium has 200 colleges and universities throughout North America providing academic and experiential exchange opportunities. Iowa State students with a cumulative GPA of at least 2.50 are eligible to apply. Credits earned as an NSE participant will be recorded on the students Iowa State transcript. Approval for credit in the NSE program should be sought from a student's academic adviser in advance of application. Detailed information and applications forms are available from:

National Student Exchange
1080 Hixson-Lied Student Success Center

Study Abroad

Our planet is in a constant state of change, and occurrences in remote corners of the globe can profoundly impact our lives. It is clear from the effects of global warming, international trade, terrorism, and pandemics of one nature or the other that we cannot ignore what is happening beyond our shores and borders. Students who graduate without an understanding of other cultures, languages, business practices, and political systems are disadvantaged both educationally and professionally. Studying abroad helps prepare students to meet the challenges of an increasingly interdependent global community. Further, study abroad is an adventure that challenges the student academically and provides real opportunities to interact with other cultures, languages, and lifestyles.

As a leading international university, Iowa State has a major commitment to study abroad, and the Study Abroad Center is the central administrative office responsible for providing these opportunities. We offer advising on study abroad, international internships, work, volunteer opportunities, and service-learning, and scholarships. The Center's library has a fine selection of travel books, information on international careers, cross-cultural orientation, social and business customs around the world, and travel bargains. The International Student Identity Card and passport photographs can also be obtained at the Center.

With over 250 study abroad programs available, from one week to an academic year in length and in nearly every major, students are able to find a program that meets their needs and interests so they can discover for themselves why study abroad is the most exciting academic adventure.

Exchange Programs offer students the opportunity to study abroad at a partner university while paying Iowa State tuition.

Semester in Australia, Canada, Greece, Ireland, Italy, New Zealand, or UK offers unlimited placement opportunities for students to study at some of our most popular destinations for the fall, spring, and in some cases summer.

Intensive Language Programs offer students a total immersion experience in French, German, Russian, or Spanish by studying in Québec, Canada (French), France, Germany, Russia, Mexico, Peru, or Spain. Summer and semester programs are available.

Group Programs led by our faculty offer Iowa State courses around the world. Short-term options can take you from the Antarctic to England and to more than 40 other destinations.

For additional information, contact:

Study Abroad
3224 Memorial Union
(515) 294-6792
www.studyabroad.iastate.edu (<http://www.studyabroad.iastate.edu>)

The main undergraduate academic programs of each college are listed below, together with the degrees awarded upon completion. In many cases certain majors, minors, options, or electives allow for increased specialization within the programs. Programs which are administered jointly by two colleges are listed within both colleges.

College of Agriculture and Life Sciences

- Agricultural Biochemistry, B.S.
- Agricultural Business, B.S.
- Agricultural and Life Sciences Education, B.S.
- Agricultural Studies, B.S.
- Agricultural Systems Technology, B.S.
- Agriculture and Society
- Agronomy, B.S.
- Animal Ecology, B.S.
- Animal Science, B.S.

Minors

1. All minors require at least 15 credits, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.
2. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.
3. Credits used to meet the minor requirements may also be used to satisfy the credit requirement for graduation and to meet credit requirements in courses numbered 300 or above.
4. Some students may have to exceed the graduation credit requirement set by their college in order to meet the requirements of both the minor and the curriculum/major.
5. Courses taken for a minor may not be taken on a pass-not pass basis.

Requirements for an undergraduate minor are specified by many departments and programs in the university; a record of completion of such requirements appears on a student's transcript. Lists of undergraduate minors offered by each college appear in the college description. Specific requirements and/or restrictions are available from the department or program offering the minor.

- Gerontology (interdisciplinary minor)
- Hotel, Restaurant, and Institution Management
- Nutrition

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major.

An undergraduate certificate has the following requirements and understandings:

1. A minimum of 20 credits, with at least 12 credits taken at ISU which are applicable towards the undergraduate certificate requirements
2. At least 9 of the credits taken at Iowa State University must be in courses numbered 300 or above
3. At least 9 credits used for a certificate may not be used to meet any other department, college, or university requirement for the baccalaureate degree except to satisfy the total credit requirement

for graduation and to meet credit requirements in courses numbered 300 or above

4. A student may not receive both an undergraduate major and a certificate of the same name
5. For students earning an ISU baccalaureate degree, a certificate is awarded concurrent with or after the ISU baccalaureate degree
6. A certificate is not awarded if the baccalaureate requirements are not finished
7. After receiving a baccalaureate degree from any accredited institution, a student may enroll at ISU to earn a certificate
8. Courses taken for a certificate may not be taken on a pass-not pass basis
9. A cumulative grade point average of at least 2.00 is required in all courses taken at ISU towards the certificate
10. A notation of a completed certificate will be made on a student's transcript and a printed certificate will be awarded.

Iowa State University also offers certificates from the Graduate College.

Human Sciences

- Health Coach

Preprofessional Study

Requirements for admission to most professional academic programs can be met by study at Iowa State University. These requirements may be met in the course of obtaining a bachelor's degree from Iowa State or at a level below that of a degree, depending on the intended field of study. The specific courses taken in a preprofessional program will depend primarily upon the admission requirements of the professional schools to which a student wants to apply. In some programs requiring three years of preprofessional work, a student may, by careful planning, complete requirements for the bachelor's degree upon transferring to Iowa State up to 32 semester credits of professional coursework. Generally these credits will be counted as electives, but a maximum of 24 may be used as major credits in interdisciplinary studies and a smaller number as major credits in appropriate departments.

Students who have not declared a major upon entry should enter as preprofessional students, i.e., premedical, prelaw, PHP (preprofessional)

health programs), or GENPV (General Undergraduate Studies Pre Vet), until they choose a major or transfer to a professional school. All students, whether they have selected a major or not, are encouraged to identify their interest in a professional career by designating it on their application.

Information about preprofessional program admissions requirements and career opportunities in human health or law may be obtained in the Liberal Arts and Sciences Advising Center. Information about veterinary medicine admissions requirements and career opportunities may be obtained from the coordinator of the preveterinary program in the Office of the Dean of the College of Veterinary Medicine.

Clinical Laboratory Science/Medical Technology

Clinical laboratory scientists, still commonly referred to as medical technologists, are important members of health-care teams. They perform the chemical, microscopic, radio-assay, and microbiological tests that are necessary in disease diagnosis, and they type and cross-match blood samples to facilitate blood transfusions. They usually work under the supervision of a physician in a hospital or clinic laboratory, but may also be employed by a pharmaceutical company or by manufacturers of analytical instruments. The professional training requires 12 months in a hospital-based CLS/MT program following at least 3 years of college study that emphasizes chemistry and the biological sciences. Students may earn a bachelor's degree in specific ISU majors, by completing the admissions requirements of the CLS/MT program and most of the degree requirements in 3 years on campus, then spending their fourth year in one of the hospital programs that are affiliated with Iowa State University. Before beginning the off-campus studies, students must earn at least 88 credits; the 32 most recent credits must have been earned in residence at ISU. A maximum of 32 semester credits earned in pro-fessional CLS/MT school can be used to partially fulfill the requirements for the bachelor's degree. Students who complete all degree requirements in residence at the university may apply to any school of medical technology for which the admission requirements have been met.

The following CLS/MT program is affiliated with Iowa State University:

St. Luke's Methodist Hospital, Cedar Rapids, Iowa. Program Director: Carol Collingsworth. Medical Director: Lileah Harris, MD

Dentistry

Dentists diagnose, treat, and try to prevent diseases and injuries of the teeth, jaws, and mouth. Usually a general practitioner will have spent 3 or 4 years taking preprofessional courses at the undergraduate level and 4 years in dental school earning the degree of doctor of dental surgery (D.D.S.) or doctor of dental medicine (D.M.D.). Learning a specialty requires at least 2 more years. The courses necessary for admission to most dental schools include English, biology, general and organic chemistry, and physics. Students may earn a degree in any major that Iowa State University offers as they meet the admission requirements; they should choose their major to reflect their own interests and abilities. Highly qualified students may be accepted into dental school after 3 years of preprofessional study without earning a baccalaureate degree..

Health Information Management

Health information managers serve as supervisors of medical records departments in hospitals, clinics, nursing homes, and other healthcare institutions. Certified registered record administrators (R.R.A.) must have completed a program leading to a bachelor's degree in medical record

administration. Most professional programs are 2 years in length and follow 2 years of college study in chemistry, biology, the humanities, social sciences, languages, and philosophy. Students may take the preprofessional courses at Iowa State University and then transfer to a university offering the professional program or they may earn a bachelor's degree at Iowa State University before entering a health information management program.

Hospital and Health Administration

Administrators of health care organizations manage and guide the varied activities in hospitals, clinics, nursing homes, and mental health facilities. The professional requirement may be for a master's degree or a bachelor's degree, depending upon the size of the institution and whether an upper or middle entry-level position is desired. Students at Iowa State may take general education courses for two or more years and then transfer to a university offering a bachelor's degree in health administration, or they may spend four years earning a bachelor's degree in any department before entering a master's degree program at the University of Iowa or other university. Courses required for admission to master's degree programs in hospital and health administration vary, but may include introductory accounting, management, statistics, and economics.

Human Medicine

Physicians study, diagnoses, and treat illness and injury. They may work in offices, clinics, hospitals, or laboratories, in private practice or for government or industry. Their professional training usually consists of 4 years of study in a college of medicine to earn the doctor of medicine (M.D.) degree, and then 3 or more years in hospital residency learning a specialty such as family medicine, pediatrics, surgery, obstetrics, or psychiatry. A degree of doctor of osteopathy (D.O.) is awarded to those students who complete 4 years in a college of osteopathic medicine before their residency. All medical schools recommend a broad preprofessional education that includes courses in biology, chemistry, physics, mathematics, English, the social sciences, arts and humanities. The degree of a premedical student can be from any college and in any curriculum or major offered by the university. The major should reflect the student's interests and provide appropriate preparation for an alternative career.

Law

An attorney offers assistance, often where a third-party neutral arbiter is required to resolve conflicts. Many attorneys work in private practice, but others secure positions in the public sector, e.g., federal or state governmental agencies. A minimum of three years from an American Bar Approved (ABA) law school is required to earn a Doctor of Jurisprudence (J.D.) degree. A bachelor's degree is required for admission to all accredited law schools. A student planning to enter law school may pursue an undergraduate degree in any discipline. The choice of the bachelor's degree should reflect a student's passion and personal interests and not be perceived as being the best degree to help them be admitted into law school. Appropriate courses should be completed that will enhance a student's development of critical thinking skills, including analytical written and oral skills. An understanding of business, social sciences, and humanities is necessary to comprehend the pluralistic society within and outside of the United States. These courses should include accounting, management, political science, psychology, criminal justice, economics, philosophy, English literature, and history. The completion of these courses will provide students with a knowledge base and skill sets that will assist them with their preparation for law school.

Courses in mathematics and statistics are also helpful in developing analytical skills. Advanced writing courses and speech communication courses will also serve students well.

Library and Information Science

Librarians and information science specialists select, organize, preserve and promote information resources as well as advocate and teach information literacy skills. Professional opportunities include work for libraries in academic institutions, public education, city and county municipalities, medical facilities, government agencies, and corporate settings. They also have work opportunities in the publishing and information technology professions. Master's degree programs in library and information science provide the professional preparation. Iowa State students may earn a bachelor's degree in any department before entering a professional master's degree program. They may choose majors that reflect their interests and provide a foundation for working in the library and information science field.

Occupational Therapy

Occupational therapists provide purposeful activities to help those who have been disabled by physical illness or injury, birth defects, emotional disorder, aging, drug abuse, or other problems to learn to cope with everyday living. Therapists treat patients in hospitals, school systems, and rehabilitation centers. Students may complete a bachelor's degree in any major at Iowa State University, and then enter a master's or doctoral degree program at another university.

Optometry

Optometrists examine, diagnose, treat and manage diseases of the visual system, the eye and associated structures. Treatment may include corrective glasses or contacts, vision therapy and therapeutic drugs. Optometrists usually set up their own offices or work in group practice. Professional study requires 4 years in a school or college of optometry and leads to the doctor of optometry (O.D.) degree. All optometry schools require at least 90 semester credits of preprofessional courses, including biology, chemistry, physics, mathematics, and English. Certain optometry schools require a bachelor's degree. Students wishing to earn the bachelor's degree from Iowa State University may choose any major and take the courses required for graduation with that major as they take the courses required for admission to a professional optometry program.

Pharmacy

Pharmacists prepare and dispense therapeutic drugs; educate health care professionals, patients and the general public about the appropriate use of drugs; conduct pharmaceutical research and work in industrial settings which involve the manufacture, marketing and advertising of pharmaceutical. Students may complete prepharmacy courses at Iowa State University. Many schools do not require a bachelor's degree for admission, however most students complete at least 3 years of college before admission to pharmacy schools. Upon admission, the student will then transfer to a Pharm. D. program of study which will entail four years of study.

Physical Therapy

Physical therapists work with people who have been disabled by injury, illness, or birth defects. They assist in evaluating the physical problems and administer therapeutic agents such as massage and exercise, heat, baths, ultrasonics, and electricity; they work in hospitals, clinics, nursing homes, schools, rehabilitation centers, and private practice.

Usually, students earn a bachelor's degree at ISU before entering professional school to earn a doctoral degree. The bachelor's degree from ISU may be earned in any department, provided that the physical therapy prerequisites are completed. Courses required for admission to a professional program include biology, chemistry, physics, psychology, mathematics, and statistics.

Physician Assistant

A physician assistant provides medical services under the supervision of a licensed physician. PAs conduct physical examinations, order and interpret laboratory tests, make diagnostic and treatment decisions, and are allowed to prescribe medication in most states. Certification as a physician assistant requires at least 2 years in a professional program at the master's degree level. Applicants must have had health-care experience with direct patient contact experience. Students must have earned a bachelor's degree before entering a PA program. The degree can be in any area but the student must complete the pre-requisite courses for the PA program. These usually include courses in biology, chemistry, psychology, and statistics.

Podiatry

Podiatrists diagnose, and treat diseases and disorders of the human foot and ankle. They treat patients in private and group practice, hospitals, and, increasingly, in industrial and sports-related positions. Professional training requires 4 years in a college of podiatric medicine and leads to the degree of doctor of podiatric medicine (D.P.M.). This is usually followed by 1 to 3 years in a hospital residency. All podiatric colleges require at least 3 years of preprofessional study, including courses in biology, general and organic chemistry, physics, and English. Most entrants have a bachelor's degree, which may be in any major. A few students may complete the admission requirements and most of the bachelor's degree requirements in 3 years. If so, a maximum of 32 semester credits may be transferred to Iowa State University from the first year in an accredited podiatric college in order to complete the requirements for the bachelor's degree.

Theology or Religious Studies

The professional education of a student of religion can follow one of two paths. The path to a profession as a pastor, priest, rabbi or other leadership position in a religious tradition usually requires 3 years in a program leading to the master of divinity (M.Div.) offered at a school of divinity or of theology. The path to a profession as a teacher of religious studies at the college level requires 4-7 years in a program leading to the Ph.D. at a graduate school of Religious Studies. Both seminaries and graduate schools require a bachelor's degree for admission. The American Association of Theological Schools recommends the following areas of study as the best preparation for the theological studies: English language and literature; history, including non-Western culture; philosophy; natural sciences, social sciences, especially psychology, sociology and anthropology; the fine arts; Biblical and modern languages; and religion, both Western and Eastern. Although students in a variety of major fields may qualify for admission to a theological school, interested persons are advised to review their proposed programs with a representative of the Religious Studies Program in the Department of Philosophy and Religious Studies.

Veterinary Medicine

About 75% of all veterinarians are engaged in private practice. In a mixed practice, they diagnose and treat health problems among a variety of animals. Others specialize in one species (e.g., feline, pet bird) and still

others specialize in a specific discipline within veterinary medicine (e.g., cardiology, ophthalmology). Veterinarians may also choose public and corporate practice (e.g., public health, education, research, food safety, industry, laboratory animal medicine, aquatic animal medicine, poultry medicine, and military veterinary medicine).

The professional program requires four years at a college of veterinary medicine and leads to the doctor of veterinary medicine degree (D.V.M.). Admission to a veterinary college involves at least two years of preprofessional college education. Candidates must take courses in biology, chemistry, genetics, physics, English, humanities, social sciences, speech, anatomy and physiology, and biochemistry. (For Iowa State University see Veterinary Medicine, Admission Requirements; for most recent information, consult the College of Veterinary Medicine Web site: www.vetmed.iastate.edu (<http://www.vetmed.iastate.edu>).

Students may pursue their preveterinary preparation in any college at Iowa State University. A major (preveterinary medicine is not a major) should be selected that is allied to each student's vocational interests in veterinary medicine or that otherwise offers vocational satisfaction in the event that plans for entry into the College of Veterinary Medicine change. Students are encouraged to pursue a bachelor's degree; the most effective progress toward a bachelor's degree is made when a major is selected upon entry and no change occurs before graduation. However, students who have not even considered a career other than veterinary medicine may need some time to explore possibilities before selection of a major.

To assist students who have indicated interest in the preveterinary program for the College of Veterinary Medicine and are undecided about a major, an advising category is available known as GENPV (General Undergraduate Studies Pre Vet). Orientation and advising services for these students are designed to help students fulfill preveterinary course requirements, to introduce available majors and careers allied to veterinary medicine, and to introduce career options in veterinary medicine. GENPV students must select a major by the end of their second semester. Some Iowa State University majors allow, by careful planning, the opportunity for a student to earn the bachelor's degree by combining credits from three years of preprofessional study and one year of professional study in the College of Veterinary Medicine.

College of Agriculture and Life Sciences

Wendy Wintersteen, Dean
Joe Colletti, Senior Associate Dean
David Acker, Associate Dean
John Lawrence, Associate Dean

www.cals.iastate.edu (<http://www.cals.iastate.edu>)

Students enrolled in the College of Agriculture and Life Sciences are provided a broad-based education that includes coursework in communications; biological, physical, and social sciences; humanities; and technical subject matter.

Upon graduation students find diverse career opportunities because of the well balanced education they have received as undergraduates. Opportunities for graduates of the College of Agriculture and Life Sciences include: agribusiness and industry, production agriculture, biological and environmental sciences, value-added processing, natural

resource management, rural development, public agencies, education, animal and human health professions, and graduate studies.

High School Preparation

Requirements for students entering from high school or transferring with less than 24 college credits into the College of Agriculture and Life Sciences include four years of English; three years of mathematics which must include one year each of algebra, geometry, and advanced algebra; three years of science which must include one year each of Biology and chemistry, or Biology and physics, or chemistry and physics; and two years of social studies. No foreign language is required for admission to the College of Agriculture and Life Sciences.

Core Curriculum and Electives

All curricula in the College of Agriculture and Life Sciences lead to a bachelor of science degree. To graduate with a degree from the College of Agriculture and Life Sciences a student must complete while at Iowa State University a minimum of 18 credits from the College's departmental offerings, program offerings, and cross-listed program offerings. Twelve or more of those 18 credits must be 300-level or above. Some curricula within the College may have more restrictive requirements.

Each major has specific degree requirements for graduation based on department and college student learning outcomes. College of Agriculture and Life Sciences core curriculum requirements for the four areas listed below are established to provide the foundation for successful accomplishment of both departmental and college level learning outcomes.

Students pursuing a primary major in another college and taking a second major in the College of Agriculture and Life Sciences must fulfill the core curriculum requirements of the College of Agriculture and Life Sciences, and all the requirements of the second major. The College of Agriculture and Life Sciences core curriculum follows.

Interpersonal and public communication skills	10
6 credits of English composition with grades of C or better	
3 credits of speech fundamentals with grades of C or better	
1 credit of LIB 160 Information Literacy	
Total Credits	10
Mathematical, physical, and life sciences	17
3 credits of mathematics	
3 credits of statistics	
5 credits of physical science (e.g., chemistry, geological and atmospheric sciences, physics)	
6 credits of life sciences including BIOL 101 Introductory Biology, or BIOL 211 Principles of Biology I, or BIOL 212 Principles of Biology II and 3 credits of life sciences from a college-approved list: (http://www.ag.iastate.edu/student/student_services.php)	
Personal development	15
3 credits of ethics from a college-approved list	
3 credits of humanities from a college-approved list	
3 credits of social sciences from a college-approved list	
3 credits of U.S. diversity from an approved list	
3 credits of international perspectives from an approved list	

All students graduating with majors within the College of Agriculture and Life Sciences are expected to be proficient in the following college-level outcomes:

Professional, Interpersonal and Cross-cultural Communications

- Speak and write clearly and persuasively.
- Prepare effective visual, oral, written and electronic presentations.
- Effectively read, listen, observe and reflect.

Problem-Solving/Critical Thinking

- Apply a holistic approach to solving complex issue-laden problems.
- Apply a rational and objective process to:
 - Distinguish verifiable facts from value claims,
 - Determine the accuracy of statements,
 - Identify assumptions and detect bias,
 - Distinguish relevant from irrelevant information,
 - Prioritize needs.
- Summarize, analyze, and interpret simple research data and policy issues.

Leadership

- Organize, facilitate, and participate effectively in a group, team, or organization.
- Define a problem or opportunity, implement an action planning process, work towards a goal and justify actions taken.

Entrepreneurship

- Demonstrate innovativeness and creativity regardless of context.
- Identify and pursue opportunities that produce value.
- Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

Life-long learning

- Articulate how continued learning after graduation will enrich their lives.
- Identify and participate in new areas for learning beyond the classroom and after graduation.

Ethics

- Define and assess their ethical perspective, moral responsibility, and values.
- Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

Environmental Awareness

- Explain the physical and Biological interactions within ecosystems
- Explain how human activities impact the environment and how societies are affected by environmental change.

International/Multi-Cultural Awareness

- U.S. Diversity – Students should achieve two of the following outcomes. They should be able to:
 - Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues,
 - Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.,

- Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.,
- Analyze the perspectives of groups and individuals affected by discrimination,
- Analyze how cultural diversity and cooperation among social groups affect U.S. society.
- International Perspectives – Students should achieve two of the following outcomes. They should be able to:
 - Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview,
 - Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve,
 - Analyze and evaluate the influence of global issues in their own lives,
 - Describe the values and perspectives of cultures other than their own and discuss how they influence individuals' perceptions of global issues and/or events,
 - Communicate competently in a second language.

In addition to the College level learning outcomes, each department within the college has additional discipline-specific outcomes that apply to graduates of that department.

Electives

Students use electives to broaden their education or to strengthen an area of specialization. Electives may be used to meet the requirements for a double major (see statement on double majors in this catalog). Those who wish to change their major, or who decide to graduate with a double major, must be enrolled for the last two semesters in the curriculum in which they expect to graduate. Students in ROTC may apply ROTC credits toward elective requirements. No more than 9 credits of 490 coursework from any Iowa State University curriculum may be applied toward graduation, although some individual curricula may establish a more restrictive use of 490 credits toward fulfillment of graduation requirements.

Advising

Each student in the College of Agriculture and Life Sciences works closely with an academic adviser who is associated with the major in which the student is enrolled.

All entering students are strongly encouraged to participate in the summer orientation program in which they will have the opportunity to meet and work with academic advisers in planning their first semester schedule of classes.

The advisers also assist students in making personal adjustments to university life, offer suggestions on academic and co-curricular choices, and provide information on career choices. Advisers make a special effort to adjust course schedules in accordance with students' interests and capabilities.

A student may wish to prepare for admission to a professional program such as law, medicine, or veterinary medicine while pursuing a bachelor of science degree in the College of Agriculture and Life Sciences. This may be accomplished through several majors; however, it is recommended that the student work closely with an academic adviser.

Each department prepares a guide to help students chart their long-term programs and to specify the exact requirements for graduation. Visit the college web site www.ag.iastate.edu (<http://www.ag.iastate.edu>).

Graduate Study

Graduate study in agriculture is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Various departments in the College of Agriculture and Life Sciences also participate in the following graduate-level interdepartmental offerings:

Biorenewable Resources and Technology
Ecology and Evolutionary Biology
Environmental Science
Genetics
Immunobiology
Microbiology
Molecular, Cellular, and Developmental Biology
Neuroscience
Nutritional Sciences
Plant Biology
Seed Technology and Business
Sustainable Agriculture
Technology and Social Change (interdepartmental minor)
Toxicology

For details, consult the Graduate College section of this catalog.

Departments of the College

- Agricultural Education and Studies
- Agricultural and Biosystems Engineering
- Agronomy
- Animal Science
- Biochemistry, Biophysics, and Molecular Biology
- Ecology, Evolution, and Organismal Biology
- Economics
- Entomology
- Food Science and Human Nutrition
- Genetics, Development and Cell Biology
- Horticulture
- Natural Resource Ecology and Management
- Plant Pathology and Microbiology
- Sociology

Majors in the College of Agriculture and Life Sciences

A student has many majors from which to choose. Each major is unique although many courses are common. This is helpful to students in that they may transfer from one major to another before the second year with little loss of credits. Options and areas of specialization further define the majors and required coursework within some majors. In all cases, majors are designed to help students succeed in their chosen professions. Majors in agriculture and life sciences are:

Primary Majors

Agricultural Biochemistry
Agricultural Business
Agricultural and Life Sciences Education
Agricultural Studies

Agricultural Systems Technology
Agriculture and Society
Agronomy
Animal Ecology
Animal Science
Biochemistry
Biology
Culinary Science
Dairy Science
Dietetics
Diet and Exercise
Environmental Science
Food Science
Forestry
Genetics
Global Resource Systems
Horticulture
Industrial Technology
Insect Science
Microbiology
Nutritional Science

Secondary Majors*

Environmental Studies
International Agriculture
Seed Science

*A secondary major must be taken in conjunction with a primary major.

Minors

Agricultural Biochemistry
Agricultural Business
Agricultural Education and Studies
Agricultural Systems Technology
Agronomy
Animal Ecology
Animal Science
Biology
Culinary Science
Emerging Global Diseases*
Entrepreneurial Studies*
Environmental Studies
Food and Society
Food Safety*
Food Science
Forestry
Genetics
Horticulture
Industrial Technology
Insect Science
International Agriculture
Meat Science
Microbiology
Nutrition
Sustainability* (<http://www.las.iastate.edu/sustainability>)

*The College of Agriculture and Life Sciences participates in these interdepartmental minors.

Certificate

Occupational Safety

See statement on minors in the Colleges and Curricula section of this catalog.

Special Programs

Agriculture Exploration

Agriculture Exploration is a starting place for students who wish to pursue careers in the life sciences, food science, natural resources, production agriculture, business, or communications but who are unsure of which majors to choose. Students entering this program will be advised in the Student Services Office until they select their majors.

Preveterinary Medicine

Students in the College of Agriculture and Life Sciences may complete the requirements for admission to the College of Veterinary Medicine by enrolling in any major within the college. Because a solid foundation in the sciences is basic to the program in veterinary medicine, those majors that emphasize the sciences are usually more compatible with preveterinary medicine (see College of Veterinary Medicine section of this catalog for specific admissions requirements).

Students who are undecided about choice of major may enroll in general preveterinary studies (Gen PV). These students will also enroll in an orientation course, which describes the various college majors. A Gen PV student has up to 1.5 semesters to select a major.

Preveterinary medicine students also have an opportunity, with careful planning, to complete the requirements for a bachelor of science degree in an individual curriculum within the College of Agriculture and Life Sciences after admission to the College of Veterinary Medicine. This may be done by completing the prescribed course of study established by an individual major. Students also may meet degree requirements of an individual major through the College of Agriculture and Life Sciences Honors Program. Further details are available from an academic adviser or from members of the College of Agriculture and Life Sciences Honors Committee.

Honors Program

The College of Agriculture and Life Sciences Honors Program provides an opportunity for students of high ability to maximize their educational experience by individualizing their program of study. (See statement on Honors Program in the Colleges and Curricula section of this catalog). For more information, contact the chair of the College of Agriculture and Life Sciences Honors Committee, or a department Honors contact person.

Off-Campus Programs

Coursework leading to a master of science degree in agricultural education, master of agriculture degree in professional agriculture and a master of science degree in agronomy are offered to students who choose to study off-campus; see Extended and Continuing Education for further information.

Study Abroad and International Travel Opportunities

Agriculture and life sciences are part of a highly interconnected global system; decisions made in one sector have profound impacts worldwide. It is important for students to develop an understanding and appreciation for the global system and the role that U.S. agriculture plays in providing a safe and predictable food supply for a growing world population. The College of Agriculture and Life Sciences provides study abroad and international internship opportunities in more than 25 countries

around the world. For additional information, contact the Office of Global Agriculture Programs in the College of Agriculture and Life Sciences.

Internships and Cooperative Education Programs

Practical work experience can provide a unique learning opportunity that complements academic coursework. This experience is provided through internships or cooperative education programs. For additional information, contact a departmental adviser or internship coordinator.

Agricultural Biochemistry

The department of Biochemistry, Biophysics & Molecular Biology (<http://www.bbmb.iastate.edu>) offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in agricultural biochemistry in the College of Agriculture and Life Sciences.

Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches; genomic and proteomic technology; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease. Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their education to pursue advanced degrees in graduate school, medicine, pharmacy or veterinary medicine.

Graduates of biochemistry, agricultural biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biochemical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have developed the skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life. Graduates have the experience of interacting with persons of different disciplines and cultures. Students have the training in biological and physical science and mathematics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

Agricultural Biochemistry Major in the College of Agriculture and Life Sciences

For the undergraduate curriculum leading to the degree bachelor of science, see College of Agriculture, Curricula. Agricultural biochemistry is recommended to students interested in the areas of agriculture requiring strong preparation in biochemistry, chemistry, physics, and mathematics, or in preparation for the study of veterinary medicine. Employment opportunities exist in agrochemical industries, and animal and plant biotechnology.

Agricultural Biochemistry program of study

BBMB 101	Introduction to Biochemistry	1
BBMB 102	Introduction to Biochemistry Laboratory	1
BBMB 201	Chemical Principles in Biological Systems	2
BBMB 404	Biochemistry I	3

or (4 credits)

BBMB 504	Amino Acids and Proteins	
BBMB 505	Bioenergetics and Metabolism	
BBMB 405	Biochemistry II	3
or (4 credits)		
BBMB 506	Membrane Biochemistry	
BBMB 507	Biochemistry of Nucleic Acids	
BBMB 411	Techniques in Biochemical Research	4
BBMB 490	Independent Study (Not required)	1-3
BBMB 499	Undergraduate Research (Not required but strongly encouraged)	1-5

Take one of the following:

CHEM 201	Advanced General Chemistry	
CHEM 177 & CHEM 178	General Chemistry I and General Chemistry II	

Take one of the following:

CHEM 201L	Laboratory in Advanced General Chemistry	
or CHEM 177N	Laboratory in General Chemistry I	
or CHEM 177L	Laboratory in General Chemistry I	
CHEM 211 & 211L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	4

Take one of the following:

CHEM 322L	Laboratory in Physical Chemistry	
or BBMB 461 & BBMB 561L	Molecular Biophysics and Laboratory in Molecular Biophysics	
CHEM 324	Introductory Quantum Mechanics	3
CHEM 325	Chemical Thermodynamics	3
CHEM 331 & CHEM 332	Organic Chemistry I and Organic Chemistry II	6
CHEM 333L	Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors)	1-2
or CHEM 331L	Laboratory in Organic Chemistry I	
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 265	Calculus III	3-4
or MATH 266	Elementary Differential Equations	
or MATH 267	Elementary Differential Equations and Laplace Transforms	
PHYS 221 & PHYS 222	Introduction to Classical Physics I and Introduction to Classical Physics II	10
BIOL 211 & BIOL 212	Principles of Biology I and Principles of Biology II	6
BIOL 211L	Principles of Biology Laboratory I	1
or BIOL 212L	Principles of Biology Laboratory II	
or BIOL 313L	Genetics Laboratory	
BIOL 313	Principles of Genetics	3
BIOL 314	Principles of Molecular Cell Biology	3
Agricultural Sciences from approved list		9

Total Credits 76-84

The College of Agriculture and Life Sciences requires the following:

Communications Proficiency (with a C or better)

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3

SP CM 212	Fundamentals of Public Speaking	3
LIB 160	Information Literacy	1

Total Credits 10

Ethics

Courses from an approved list. 3

Humanities and Social Sciences

Humanities course 3

Social Science course 3

Total Credits 6

Agricultural Sciences

Courses from an approved list 9

Biochemistry or Biophysics Majors in the College of Liberal Arts and Sciences

For the undergraduate curriculum leading to the degree bachelor of science, see College of Agriculture, Agricultural biochemistry.

Biochemistry and biophysics are recommended to students whose career interests involve advanced graduate or medical study or employment in biochemistry or biophysics, or in related areas of the biological or medical sciences.

Biochemistry undergraduate major program of study

Total Degree Requirement: 120 cr.

BBMB 101	Introduction to Biochemistry	1
BBMB 102	Introduction to Biochemistry Laboratory	1
BBMB 201	Chemical Principles in Biological Systems	2
BBMB 404	Biochemistry I	3

or (4 credits)		
BBMB 504	Amino Acids and Proteins	
BBMB 505	Bioenergetics and Metabolism	
BBMB 405	Biochemistry II	3

or (4 credits)		
BBMB 506	Membrane Biochemistry	
BBMB 507	Biochemistry of Nucleic Acids	
BBMB 411	Techniques in Biochemical Research	4
BBMB 461	Molecular Biophysics	2
or BBMB 561	Molecular Biophysics	
BBMB 490	Independent Study (Not required)	1-3
BBMB 499	Undergraduate Research (Not required but strongly encouraged)	1-5

Take one of the following: 5-7

CHEM 201	Advanced General Chemistry	
or CHEM 177 & CHEM 178	General Chemistry I and General Chemistry II	

Take one of the following:

CHEM 201L	Laboratory in Advanced General Chemistry	
or CHEM 177N	Laboratory in General Chemistry I	
or CHEM 177L	Laboratory in General Chemistry I	
CHEM 211 & 211L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	4
BBMB 561L	Laboratory in Molecular Biophysics	2-3

or CHEM 322L	Laboratory in Physical Chemistry	
CHEM 324	Introductory Quantum Mechanics	3
CHEM 325	Chemical Thermodynamics	3
CHEM 331 & CHEM 332	Organic Chemistry I and Organic Chemistry II	6
CHEM 333L	Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors)	1-2
or CHEM 331L	Laboratory in Organic Chemistry I	
CHEM 334L	Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors)	2
or CHEM 332L	Laboratory in Organic Chemistry II	
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 265	Calculus III	3-4
or MATH 266	Elementary Differential Equations	
or MATH 267	Elementary Differential Equations and Laplace Transforms	
PHYS 221 & PHYS 222	Introduction to Classical Physics I and Introduction to Classical Physics II	10
BIOL 211 & BIOL 212	Principles of Biology I and Principles of Biology II	6
BIOL 211L	Principles of Biology Laboratory I	1
or BIOL 212L	Principles of Biology Laboratory II	
or BIOL 313L	Genetics Laboratory	
BIOL 313	Principles of Genetics	3
BIOL 314	Principles of Molecular Cell Biology	3
Biological Science electives	from Biology, Genetics, Microbiology, Biochemistry or Chemistry	4

Total Credits 82-93

Communication Proficiency (Minimum grade C-)

LIB 160	Information Literacy	1
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
One course from the following:		
ENGL 305	Creative Writing: Nonfiction	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3
BBMB 411	Techniques in Biochemical Research ^{Minimum grade C}	4

General Education Area

Arts and Humanities	12
Social Sciences	9
International Perspectives	3
U.S. Diversity	3

Biophysics undergraduate major program of study

Total Degree Requirement: 120 cr,

BBMB 101	Introduction to Biochemistry	1
BBMB 102	Introduction to Biochemistry Laboratory	1
BBMB 201	Chemical Principles in Biological Systems	2
BBMB 404	Biochemistry I	3
or BBMB 420	Mammalian Biochemistry	

BBMB 411	Techniques in Biochemical Research	4
BBMB 461	Molecular Biophysics	2
or BBMB 561	Molecular Biophysics	
Take one of the following:		5-7
CHEM 201	Advanced General Chemistry	
CHEM 177 & CHEM 178	General Chemistry I and General Chemistry II	
CHEM 201L	Laboratory in Advanced General Chemistry	1
or CHEM 177N	Laboratory in General Chemistry I	
or CHEM 177L	Laboratory in General Chemistry I	
CHEM 211 & 211L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	4
BBMB 561L	Laboratory in Molecular Biophysics	2
or CHEM 322L	Laboratory in Physical Chemistry	
CHEM 324	Introductory Quantum Mechanics	3
CHEM 325	Chemical Thermodynamics	3
CHEM 331 & CHEM 332	Organic Chemistry I and Organic Chemistry II	6
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
MATH 266	Elementary Differential Equations	3
MATH 207	Matrices and Linear Algebra	3
or MATH 317	Theory of Linear Algebra	
PHYS 221 & PHYS 222	Introduction to Classical Physics I and Introduction to Classical Physics II	10

One course from the following:

MATH 481	Numerical Methods for Differential Equations	
STAT 407	Methods of Multivariate Analysis	
STAT 430	Empirical Methods for the Computational Sciences	
COM S 207	Fundamentals of Computer Programming	3
STAT 305	Engineering Statistics	3-4
or STAT 231	Probability and Statistical Inference for Engineers	
BIOL 211 & BIOL 212	Principles of Biology I and Principles of Biology II	6
BIOL 211L	Principles of Biology Laboratory I	1
or BIOL 212L	Principles of Biology Laboratory II	

Additional 300+ or higher level courses in biochemistry, biophysics, biological sciences, chemistry or physics.

Total Credits 85-88

Communication Proficiency (Minimum grade C-)

LIB 160	Information Literacy	1
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
One course from the following:		
ENGL 305	Creative Writing: Nonfiction	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3
BBMB 411	Techniques in Biochemical Research ^{minimum grade C}	4

Arts and Humanities	12
Social Sciences	9
U.S. Diversity	3
International Perspectives	3

Agricultural Business

Administered by the Department of Economics. The major in agricultural business prepares students for advanced studies and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A major in agricultural business with a minor in economics is not permitted; however, a double major in agricultural business and economics is permitted.

Students majoring in Agricultural Business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture and Life Sciences, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service.

Minor - Agricultural Business

The Department of Economics offers a minor in Agricultural Business. Courses to be included in the minimum of 15 credits include the following:

ECON 101	Principles of Microeconomics	3
ECON 230	Farm Business Management	3
ECON 235	Introduction to Agricultural Markets	3
ECON 301	Intermediate Microeconomics	3-4
Three credits of ECON courses from: 230-289, 300-389, 400-489 courses.		3

Curriculum in Agricultural Business

The major in agricultural business requires a minimum of 120 credits and a 2.00 minimum GPA. Only 65 credits from a two-year institution may apply, which may include up to 16 technical credits. In addition, at most 9 P-NP credits of free electives can be applied toward the degree, and a minimum of 15 credits must be earned from courses taught by the Department of Economics at ISU.

International Perspective (<http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current>): **3 cr.**
3 cr. from approved list.

U.S. Diversity (<http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses>): **3 cr.**
3 cr. from approved list.

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
One of the following		3
ENGL 302	Business Communication	

ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
One of the following		3
SP CM 212	Fundamentals of Public Speaking	
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
LIB 160	Information Literacy	1

A grade of C or better must be earned in two of the English composition courses (ENGL 150, ENGL 250, and (ENGL 302 or ENGL 309 or ENGL 314)) and the speech fundamentals course (SP CM 212 or AGEDS 311).

Total Credits **13**

Humanities and Social Sciences (<http://www.agstudent.iastate.edu/agriculturestudentservices/humanities.htm>): **6 cr.**

ECON 102	Principles of Macroeconomics	3
Three credits from approved course list.		3
Total Credits		6

Ethics (<http://www.agstudent.iastate.edu/agriculturestudentservices/ethicslist.html>): **3 cr.**
3 cr. from approved list

Life Sciences (http://www.agstudent.iastate.edu/agriculturestudentservices/life_science.htm): **6 cr.**

One of the following:		3
BIOL 101	Introductory Biology	
BIOL 211	Principles of Biology I	
Three credits from approved course list.		3
Total Credits		6

Mathematics: 12-14 cr.

One of the following:		4
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
One of the following:		3-4
ECON 207	Applied Economic Optimization	
MATH 166	Calculus II	
STAT 226	Introduction to Business Statistics I	3
STAT 326	Introduction to Business Statistics II	3

Physical Sciences: 5 cr.

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	5
or PHYS 111	General Physics	
Total Credits		5

Agricultural, Food, or Natural Resources Sciences: 6 cr.
6 cr. from approved list (<http://tinyurl.com/lcs25jb>).

General Economics: 9-10 cr.

ECON 101	Principles of Microeconomics	3
ECON 301	Intermediate Microeconomics	3-4
One of the following:		3
ECON 302	Intermediate Macroeconomics	
ECON 353	Money, Banking, and Financial Institutions	

ECON 492	Graduating Senior Survey	R
Total Credits		9-10

Business and Agricultural Business: 29 cr.

ACCT 284	Financial Accounting	3
FIN 301	Principles of Finance	3
Six credits from ACCT 285 or any 300-489 ACCT, FIN, MKT, MGMT, MIS, or SCM courses.		6
ECON 110	Orientation in Agricultural Business	1
ECON 235	Introduction to Agricultural Markets	3
ECON 292	Career Seminar	1
Nine credits of ECON 230-289, 300-389, 400-489 courses.		9
Three credits of 400-489 level ECON courses.		3
Total Credits		29

Electives: 22-24 cr.

Agricultural business majors seeking a double major in economics must take a minimum of 42 credits in economics. These include all of the economics courses required for the economics major. To double major in economics, agricultural business majors must also earn an average grade of C or higher in ECON 101 Principles of Microeconomics, ECON 102 Principles of Macroeconomics, ECON 301 Intermediate Microeconomics, and ECON 302 Intermediate Macroeconomics, with no grade lower than a C#.

Agricultural and Life Sciences Education

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decisionmaking, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics

7. environmental awareness
8. U.S. diversity
9. international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/. (<http://www.ageds.iastate.edu/>)

Curriculum in Agricultural and Life Sciences Education

Administered by the Department of Agricultural Education and Studies. Students majoring in Agricultural Education choose between two options: Teacher Certification or Communications.

Teacher Certification Option**Total Degree Requirement: 128 cr.**

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA. Teacher certification requires 2.5 GPA at particular points in the program of study, and a minimum grade of C- in selected courses.

International Perspective: 3 cr. from approved list**U.S. Diversity: 3 cr. from approved list****Communications Proficiency:**

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Interpersonal and Public Communication 10 cr.:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	3
LIB 160	Information Literacy	1

Total Credits **10**

Humanities and Social Sciences: 6 cr.

PSYCH 230	Developmental Psychology	3
3 credits from approved American history list		3

Ethics: 3 cr. from approved list**Math, Physical and Life Sciences: 19 cr.**

CHEM 163	College Chemistry	4
or CHEM 177	General Chemistry I	
CHEM 163L	Laboratory in College Chemistry	1
or CHEM 177L	Laboratory in General Chemistry I	
MATH 104	Introduction to Probability	3
or MATH 150	Discrete Mathematics for Business and Social Sciences	
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
STAT 104	Introduction to Statistics	3

Total Credits **19**

Agricultural Sciences and Economics: 31 cr.

All courses minimum grade C- is required.

ACCT 284	Financial Accounting	3
----------	----------------------	---

AGEDS 315	Personal, Professional, and Entrepreneurial Leadership in Agriculture	3
AGEDS 488	Methods of Teaching Agricultural Mechanics	3
AGRON 114	Principles of Agronomy	3
AGRON 154	Fundamentals of Soil Science	3
AN S 101	Working with Animals	2
AN S 114	Survey of the Animal Industry	2
ECON 101	Principles of Microeconomics	3
ECON 230	Farm Business Management	3
HORT 221	Principles of Horticulture Science	3
NREM 120	Introduction to Renewable Resources	3
Total Credits		31

Professional Credits -Teacher Certification option: 41 cr.

All courses minimum grade C is required.

AGEDS 110A	Agriculture and Life Sciences Education (Fall only)	1
AGEDS 211A	High School Agriculture Programs	1
AGEDS 310	Foundations of Agricultural Education Programs	3
AGEDS 401	Planning Agriculture and Life Sciences Education Programs	3
AGEDS 402	Methods of Teaching in Agriculture and Life Sciences	3
AGEDS 416	Pre-Student Teaching Experience in Agricultural Education	1
AGEDS 417	Supervised Teaching in Agriculture and Life Sciences	1-16
CI 202	Learning Technologies in the 7-12 Classroom	3
CI 204	Social Foundations of Education in the United States	3
CI 333	Educational Psychology	3
CI 406	Multicultural Foundations of School and Society: Introduction	3
SP ED 401	Teaching Secondary Students with Exceptionalities in General Education	3
Total Credits		28-43

Electives: Select courses to get to 128 credits.

Communications Option: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr. from approved list**U.S. Diversity: 3 cr. from approved list****Communications Proficiency:**

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Interpersonal and Public Communication 13 cr.:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	3
LIB 160	Information Literacy	1

One of the following:

ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
AGEDS 327	Advanced Communications for Agriculture and Life Sciences	
3 credits from approved list		3

Total Credits **13**

Humanities and Social Sciences: 9 cr.

ECON 101	Principles of Microeconomics	3
or ECON 102	Principles of Macroeconomics	
Psychology elective		3
Approved humanities elective		3

Total Credits **9**

Ethics: 3 cr. from approved list**Math, Physical and Life Sciences: 20 cr.**

CHEM 163	College Chemistry	4
or CHEM 177	General Chemistry I	
CHEM 163L	Laboratory in College Chemistry	1
or CHEM 177L	Laboratory in General Chemistry I	
MATH 104	Introduction to Probability	3
or MATH 150	Discrete Mathematics for Business and Social Sciences	
BIOL 211	Principles of Biology I	3
BIOL 212	Principles of Biology II	3
STAT 101	Principles of Statistics	3-4
or STAT 104	Introduction to Statistics	
Life science elective		3

Total Credits **20-21**

Agricultural Sciences and Economics: 32 cr.

10 credits in a selected area of agricultural sciences and economics including 6 credits at the 300-400 level; 6 credits each in two additional areas of agricultural sciences and economics; 10 credits agricultural sciences and economics electives.

Professional Communications: 33 cr.

AGEDS 110A	Agriculture and Life Sciences Education (Fall only)	1
AGEDS 211	Early Field Based Experience	1
AGEDS 215	Career Seminar	1
AGEDS 315	Personal, Professional, and Entrepreneurial Leadership in Agriculture	3
AGEDS 412	Internship in Agricultural Education and Studies	2-6
21 credits from approved electives		21

Total Credits **29-33**

Electives: 12-13 cr.**Minor - Agriculture and Life Sciences Education**

The department offers a minor in agriculture and life sciences education which may be earned by completion of a minimum of 15 credits in agricultural education and studies courses, with a minimum of two courses at the 400 level. A minor will not meet state licensure requirements for teaching high school agriculture. Courses that can be taken for a minor are:

AGEDS 211	Early Field Based Experience	1
-----------	------------------------------	---

AGEDS 310	Foundations of Agricultural Education Programs	3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	3
AGEDS 312	Science With Practice	3
AGEDS 315	Personal, Professional, and Entrepreneurial Leadership in Agriculture	3
AGEDS 412	Internship in Agricultural Education and Studies	2-6
AGEDS 388	Agricultural Mechanics Applications	3
AGEDS 414	Developing Agricultural Education Programs in Non-Formal Settings	2
AGEDS 450	Farm Management and Operation	3
AGEDS 451	Agricultural Law	4
AGEDS 461	Technology Transfer and the Role of Agricultural and Extension Education	3
AGEDS 488	Methods of Teaching Agricultural Mechanics	3
AGEDS 490	Independent Study in Agricultural Education and Studies	1-3
AGEDS 496	Agricultural Travel Course	1-3
AGEDS 499	Undergraduate Research	arr †
AGEDS 327	Advanced Communications for Agriculture and Life Sciences	3
AGEDS 402	Methods of Teaching in Agriculture and Life Sciences	3
Total Credits		41-49 †

† Arranged with instructor.

Graduate Study

The department offers the degrees of master of science and doctor of philosophy, with a major in agricultural education; a specialization in agricultural extension education; opportunities for emphasis in international agricultural education; and a minor for students majoring in other curricula. Graduate students who have earned a bachelor's degree in an agricultural discipline may plan a course of study that leads to teacher certification. Candidates pursuing the master of science degree may do so by completing either a thesis or nonthesis program of study.

Students have an opportunity to develop competence in disciplinary foundations and ethics, program planning, learning theory, instructional methods, program leadership and administration, program evaluation, research methodologies, data analysis and interpretation, writing for publication, and grant proposal writing.

The department also cooperates in the international development studies option of the General Graduate Studies Program. Courses and workshops are offered, both on and off campus, for extension educators, teachers, and industry and government personnel.

Agricultural Studies Undergraduate Study

For undergraduate curricula in agriculture and life sciences education, and agricultural studies, leading to the degree of bachelor of science, see College of Agriculture and Life Sciences, Curricula.

The department offers two curricula for students desiring to enter careers in agriculture and related fields. These curricula are agriculture and life sciences education and agricultural studies. The agricultural and life sciences education curriculum prepares persons for careers as agricultural education instructors, and educational specialists for industry, nonprofit organizations, and governmental agencies. The agriculture and life sciences education curriculum has two options, teacher certification and communications. The agricultural studies curriculum prepares persons for careers in production agriculture and agricultural industry. Graduates of both curricula accept positions in agricultural business, industry, agencies, and production agriculture.

Graduates will have a broad base of agricultural knowledge, and will be skilled in decisionmaking, planning, organizing, presenting, and evaluating information. Through the successful completion of the required coursework, active participation in clubs and organizations, and the acquisition of technical skills and experiences associated with work experiences, internships, and international travel, graduates of our

baccalaureate programs meet the university, college, and departmental outcomes in the following nine areas:

1. professional, interpersonal, and cross-cultural communications
2. problem solving and critical thinking
3. leadership
4. entrepreneurship
5. life-long learning
6. ethics
7. environmental awareness
8. U.S. diversity
9. international perspectives.

More information regarding the departmental learning outcomes can be found at www.ageds.iastate.edu/. (<http://www.ageds.iastate.edu>)

Curriculum in Agricultural Studies

Administered by the Department of Agricultural Education and Studies. Students are encouraged to develop one or more areas of concentration in agricultural sciences and economics.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective:

3 cr. from approved list.

U.S. Diversity:

3 cr. from approved list.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library 13 cr.:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	3
AGEDS 327	Advanced Communications for Agriculture and Life Sciences	3
LIB 160	Information Literacy	1

Total Credits 13

Humanities and Social Sciences: 6 cr.

ECON 101	Principles of Microeconomics	3
Plus 3 credit hours from approved humanities list		3

Total Credits 6

Ethics: 3 cr.

3 cr. from approved list.

Math Physical and Life Sciences: 17 crs.

BIOL 101	Introductory Biology	3
BBMB 221	Structure and Reactions in Biochemical Processes	3
or PHYS 101	Physics for the Nonscientist

Agriculture and Society

College of Agriculture— Agriculture & Society

This undergraduate degree emphasizes the application of social science knowledge to issues related to agriculture and society. The interdisciplinary major draws largely on courses from sociology, political science and economics. Its goal is to prepare students to become leaders in addressing complex issues related to the social and human dimensions of agriculture at both the local and global level. Students will learn social science concepts and skills to understand, analyze and communicate complex ideas, information and data related to agricultural systems.

Internships are an important part of the Agriculture & Society major. The curriculum offers the flexibility needed to accommodate the special interests and needs of each student.

The curriculum is designed to provide students with the following skills and competencies:

1. Recognize, analyze and evaluate the critical human and social factors (e.g. practices, policies, laws, institutions) impacting agriculture.
2. Understand the social dimensions of agriculture and its connections with food and environmental systems.
3. Develop problem solving, critical thinking, and leadership skills to positively influence human impacts on agriculture.
4. Understand the perspectives of diverse stakeholders and develop strategies to communicate clearly and effectively to a range of audiences.

Students will develop the necessary skills to become effective leaders with companies, local, national and international non-governmental organizations (NGOs), and government agencies that work on agricultural, food and environmental related issues. Graduates can work as public policy analysts, government relations, public relations, program analyst, program specialists, marketing, sales, agriculture, educators, and executive directors.

Curriculum in Agriculture & Society

Administered by the Department of Sociology

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (C or better):

6 credits of English Composition	6
Three credits of Speech Fundamentals	3

Communication/Library:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
SP CM 212	Fundamentals of Public Speaking	3
P R 305	Publicity Methods	3
LIB 160	Information Literacy	1

Humanities and Social Sciences: 6 cr.

3 credits from approved humanities list	3
3 credits from approved social science list	

Ethics: 3 cr.

3 cr. from approved list.

Life Sciences: 6 cr.

BIOL 101	Introductory Biology	3
or BIOL 211	Principles of Biology I	
Three credits from approved life sciences list	3	

Total Credits **6**

Mathematical and Physical Sciences: 12 cr.

MATH 150	Discrete Mathematics for Business and Social Sciences	3
STAT 101	Principles of Statistics	4
Five credit hours from:	5	
MTEOR 206	Introduction to Weather and Climate	
AGRON 206	Introduction to Weather and Climate	
or ASTRO, CHEM, GEOL, PHYS		

Total Credits **12**

Sociology 15 cr.

SOC 110	Orientation to Public Service and Administration in Agriculture	R
SOC 230	Rural Society in Transition	3
SOC 325	Transition in Agriculture	3
or SOC 382	Environmental Sociology	
SOC 380	Sociology of Work	3
SOC 415	Dynamics of Social Change	3
SOC 464	Strategies for Community Engagement	3

Total Credits **15**

Economics and Agricultural Education and Studies: 16 cr.

ECON 101	Principles of Microeconomics	3
ECON 102	Principles of Macroeconomics	3
ECON 235	Introduction to Agricultural Markets	3

or ECON 380 Environmental and Resource Economics

ECON 344	Public Finance	3
AGEDS 451	Agricultural Law	4

Total Credits **16**

Political Sciences: 15 cr.

POL S 215	Introduction to American Government	3
POL S 310	State and Local Government	3
POL S 371	Introduction to Public Administration	3
POL S 475	Management in the Public Sector	3
C R P 436	Community Economic Development	3

Total Credits **15**

Additional Pol S, Econ, or Soc at 300 level or above.

Agricultural Sciences: 9 cs.

Complete 9 cr. from MTEOR 206 Introduction to Weather and Climate or Agron, An S, AST, Ent, FS HN, Hort, or NREM.

Area of Concentration: 15 cr.

Complete 15 cr. from approved specialization area.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in sociology and rural sociology and minor work for students majoring in other departments. For M.S. and Ph.D. departmental requirements, see Program of Graduate Study for Degrees in Sociology and Rural Sociology, available from the department office. The department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; methodology; social change and development; criminology; the economy, organizations and work; and social psychology. The Department of Sociology does not offer a nonthesis master's program.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings. They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the department stipulates no language requirement for either the degree master of science or the degree doctor of philosophy, specifying competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in interdepartmental majors in sustainable agriculture, transportation and water resources, and interdepartmental minors in gerontology (see Index).

Agricultural Systems Technology

Administered by the Department of Agricultural and Biosystems Engineering. Students majoring in Agricultural Systems Technology choose between two options: Agricultural and Biosystems Management or Machine Systems.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
One of the following:		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	

AGEDS 327	Advanced Communications for Agriculture and Life Sciences	
One of the following:		3

9 credits of free electives		9

Total Credits 34

Minor in agricultural systems technology

The Department of Agricultural and Biosystems Engineering offers a minor in agricultural systems technology which may be earned by completing a minimum of 15 credits of technology systems management courses, which includes:

TSM 115	Solving Technology Problems	3
TSM 210	Fundamentals of Technology	3
9 credits from:		9

TSM 310	Total Quality Improvement
TSM 322	Preservation of Grain Quality
TSM 322L	Preservation of Grain Quality Laboratory
TSM 324	Soil and Water Conservation Management
TSM 325	Biorenewable Systems
TSM 327	Animal Production Systems
TSM 330	Agricultural Machinery and Power Management
TSM 333	Precision Farming Systems
TSM 335	Tractor Power
TSM 337	Fluid Power Systems Technology
TSM 363	Electric Power and Electronics for Agriculture and Industry
TSM 393E	Topics in Technology: Chemical Application Systems
TSM 393F	Topics in Technology: Agricultural Safety and Health

- At least six (6) credits of 300-level or higher TSM classes (from the classes listed above)

- At least nine (9) credits that are not used to meet any other department, college, or university requirement.

Total Credits 15

Agronomy Undergraduate Study

The Department of Agronomy offers a degree of Bachelor of Science (B.S.) degree in agronomy. The curriculum is designed to provide a strong foundation in crop science, soil science, agricultural meteorology, and plant breeding.

The curriculum provides both flexibility and direction for students by offering four options: agroecology, crop management and business, plant breeding and biotechnology, and soil science and environmental quality. There are many opportunities for undergraduate students to be involved in research and international agriculture.

Graduates have the theoretical and practical knowledge needed for efficient and sustainable production of food, feed, fuel, and fiber. Graduates are skilled in critical thinking, problem solving, and communicating and working effectively with others. They understand the ethical, cultural, and environmental dimensions of issues facing professionals in agriculture and natural resources.

An agronomy major prepares students for employment in agricultural business and industry, agricultural service organizations, crop production and soil management, environmental and natural resource management, and farm management. Graduates pursue careers in the seed, fertilizer, and agricultural chemical industries as field agronomists, crop and soil management specialists, research technicians, sales and marketing specialists, and production managers. State and federal agencies employ agronomists as extension specialists, county extension directors, environmental and natural resource specialists, research associates, soil surveyors, soil conservationists, regulatory agencies as plant, food, and grain inspectors, science-based professional positions, graduate study, or research careers. Additional areas of work open to agronomists include integrated pest management, land appraisal, agricultural finance, turfgrass management, and the home lawn care industry.

The department offers an international scholar program leading to a credentialed title of "Agronomy International Scholar" for agronomy majors who have distinguished themselves in global understanding and international experience. Contact the department for requirements.

Minor - Agronomy

The department offers a minor in Agronomy that may be earned by taking 18 credits in these agronomy courses: AGRON 114, AGRON 154, AGRON 212 & AGRON 354 and 6 credits from approved agronomy courses, with a minimum of 3 of the 6 credits from courses at the 300 level or higher. At least 9 credits must be taken at Iowa State University with 6 credits numbered 300 or above. At least 9 credits must be unique to the requirements for the minor and not used to fulfill specified requirements from the student's major.

Courses Required For a Minor:

AGRON 114	Principles of Agronomy	3
AGRON 154	Fundamentals of Soil Science *	3
AGRON 212	Crop Growth, Productivity and Management	3
AGRON 354	Soils and Plant Growth	3

Approved Elective Courses for Minor Credit (6 credits minimum, 3 credits at 300+ level)

CROP SCIENCE

AGRON 212L	Field Application and Problem Solving in Crop Production	1
AGRON 217	Weed Identification	1
AGRON 316	Crop Structure-Function Relationships	3
AGRON 317	Principles of Weed Science	3
AGRON 320	Genetics, Agriculture and Biotechnology	3
AGRON 330	Crop and Seed Identification Laboratory	2
AGRON 334	Forage Crop Management	3
AGRON 338	Seed Science and Technology	3
AGRON 351	Turfgrass Establishment and Management	3

AGRON 421	Introduction to Plant Breeding	3
SOIL SCIENCE		
AGRON 260	Soils and Environmental Quality	3
AGRON 360	Environmental Soil Science	3
ENSCI 402	Watershed Hydrology	3
AGRON 452	GIS for Geoscientists	3
AGRON 459	Environmental Soil and Water Chemistry	4
AGRON 463	Soil Formation and Landscape Relationships	4
AGRON 477	Soil Physics	3
AGRON 485	Soil and Environmental Microbiology	3
AGRICULTURAL METEOROLOGY		
AGRON 206	Introduction to Weather and Climate	3
AGRON 404	Global Change	3
AGRON 405	Environmental Biophysics	3
AGRON 406	World Climates	3
AGRON 407	Mesoscale Meteorology	3
GENERAL AGRONOMY COURSES		
AGRON 342	World Food Issues: Past and Present	3
AGRON 392	Systems Analysis in Crop and Soil Management	3
AGRON 450	Issues in Sustainable Agriculture	3
AGRON 497	Agroecology Field Course	3

Students minoring in agronomy can take the following courses: AGRON 331, AGRON 370, AGRON 490, AGRON 491, and AGRON 496; but only one (1) credit from these courses can be used in the minor program

*Substitution of AGRON 155 may be allowed for students in horticulture.

Graduate Study

The department offers programs degrees that lead to master of science (M.S.) and doctor of philosophy (Ph.D.), with majors in agricultural meteorology; crop production and physiology with optional specialization in seed science or weed science; plant breeding; and soil science with specialization in soil chemistry, soil fertility, soil management, soil microbiology and biochemistry, soil morphology and genesis, or soil physics. Minor work is offered for students with majors in other departments. A dissertation is required for the Ph.D., and a thesis is normally required for the M.S. An M.S. nonthesis option is available for students desiring a general degree program, with additional coursework and a written creative component substituting for thesis research.

Graduates have a broad knowledge base germane to their area of study. They are trained to integrate and apply knowledge to different situations. Students develop skills in scientific reasoning, organization, and logical presentation of ideas.

The department offers an M.S. in agronomy that is designed for students who are currently employed full-time. This program is taught at a distance using computer-based instructional media. The M.S. in agronomy is nonthesis only. The M.S. degree in plant breeding is offered both on-campus or at a distance.

The department cooperates in interdepartmental majors in bioinformatics and computational biology; ecology and evolutionary biology; environmental science; genetics; microbiology; molecular, cellular, and developmental biology; plant biology; and sustainable agriculture.

Prerequisite to major work in this department is completion of an undergraduate degree program with emphasis on agronomic, biological, and physical sciences.

Graduate Certificate in Agronomy for distance students

The Graduate Certificate in Agronomy is for distance students and is comprised of the first six courses in the Master of Science in Agronomy Distance Curriculum. All six courses are required for certificate completion.

AGRON 501	Crop Growth and Development	3
AGRON 502	Chemistry, Physics, and Biology of Soils	3
AGRON 503	Climate and Crop Growth	3
AGRON 511	Crop Improvement	3
AGRON 512	Soil-Plant Environment	3
AGRON 514	Integrated Pest Management	3

Total Certificate Credits 18

Animal Ecology

The animal ecology curriculum provides its majors with an understanding of ecological principles and processes and their applications to natural resource management. It is oriented toward students desiring a general and flexible program in environmental biology and for those planning graduate study. Students may select from four options: Fisheries and Aquatic Sciences, Interpretation of Natural Resources, Preveterinary and Wildlife Care, or Wildlife. Graduates find employment as aquaculturists, aquatic ecologists, wildlife biologists, fisheries biologists, resource managers, and ecologists for industry, environmental consulting firms, natural resource and environmental agencies and organizations, zoos, and as educators.

Graduates of the Animal Ecology major understand the basic principles of animal biology, ecology and management, and relevant aspects of scientific communication, basic mathematics and sciences, computing applications, and personal and professional development. Four specific options prepare students for careers in interpretation of natural resources, fisheries and aquatic sciences, pre-veterinary and wildlife care, and wildlife. Each option has specific outcomes expectations that include (1) the scope of the specialization and its relationships to broader aspects of animal ecology, biotic resource management, and other allied scientific disciplines and professions, (2) career opportunities and requirements, and (3) knowledge and skills appropriate for employment at technical and practitioner levels in each discipline. Graduates are able to communicate and work effectively in the multidisciplinary arena of ecology and natural resource management.

All options require three months (400 hours) of relevant work experience or study at a biological station prior to graduation. The latter may be accomplished at the university's affiliate field stations: Iowa Lakeside Laboratory at West Lake Okoboji, and Gulf Coast Research Laboratory at Ocean Springs, Mississippi. Information on these laboratories is available from the department's Student Services Center.

Preveterinary medicine preparation may be achieved while satisfying degree requirements in animal ecology.

Additional education and training can lead to other opportunities in such areas as research and management, natural resources planning and administration, teaching, and environmental consulting, among others. Graduate training is necessary for many specialized positions within the fields of animal ecology. Students preparing for graduate study should consult with their academic adviser concerning appropriate coursework.

Students wishing to be certified by the American Fisheries Society or The Wildlife Society need to consult with their advisors in selecting required courses in their respective programs. The formal application then needs to be completed and submitted for review by their professional societies. Certification in either society has many professional benefits and may be required or recommended for employment by federal and state agencies and private industry.

Students seeking certification to teach biology in secondary schools must meet requirements of the College of Human Sciences as well as those of the Animal Ecology curriculum. In addition, they must apply formally for admission to the teacher education program (see Index, Teacher Education Program). Students with an interest in careers in outdoor writing are encouraged to obtain a minor or a second major in journalism (see Index, Journalism and Communication, Courses and Programs). Students who wish to pursue a job as a conservation officer may wish to minor in criminal justice (see Index, Criminal Justice Studies).

Curriculum in Animal Ecology

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better):

6 cr. of English composition

3 cr. of speech fundamentals

Communication/Library 16 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
SP CM 212	Fundamentals of Public Speaking	3
LIB 160	Information Literacy	1
Plus 6 credits from the following:		6
ENGL 207	Introduction to Creative Writing	
ENGL 302	Business Communication	
ENGL 303	Free-Lance Writing for Popular Magazines	
ENGL 304	Creative Writing: Fiction	
ENGL 305	Creative Writing: Nonfiction	
ENGL 306	Creative Writing: Poetry	
ENGL 309	Proposal and Report Writing	
ENGL 310	Rhetorical Analysis	
ENGL 312	Biological Communication	
ENGL 314	Technical Communication	
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
JL MC 201	Reporting and Writing for the Mass Media	
P R 305	Publicity Methods	
NREM 330	Principles of Interpretation	
SP CM 312	Business and Professional Speaking	
SP CM 313	Communication in Classrooms and Workshops	

Humanities and Social Sciences: 6 cr.

Approved humanities course	3
Approved social science course	3

Total Credits 6

Ethics: 3 cr.

3 cr. from approved ethics list.

Mathematical Sciences: 6 cr.

MATH 140	College Algebra	3
MATH 145	Applied Trigonometry	3
STAT 101	Principles of Statistics	3-4

or STAT 104	Introduction to Statistics	
Total Credits		9-10

Physical Sciences: 13-14 cr.

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	5
or CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	
CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	4
or CHEM 331 & 331L	Organic Chemistry I and Laboratory in Organic Chemistry I	
PHYS 115 & 115L	Physics for the Life Sciences and Laboratory in Physics for the Life Sciences	5
or PHYS 111	General Physics	

Total Credits		14
----------------------	--	-----------

Biological Sciences: 20 cr.

NREM 110	Orientation in Natural Resource Ecology and Management	1
NREM 120	Introduction to Renewable Resources	3
NREM 211	Careers in Natural Resources	1
A ECL 312	Ecology	4
A ECL 365	Vertebrate Biology	4

- * To complete degree program in 4 years students must maintain an average of 16 credits per semester.
- ** Initial math course is determined on the basis of high school math and placement test scores. A non-credit course (Math 10) maybe be required at additional costs.
- *** In scheduling coursework, students should pay particular attention to courses with limited offerings (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course).

Total Credits: 131-132

* To complete degree program in four years students must maintain an average of 16 credits per semester.

** Initial math course is determined on the basis of high school math and placement test scores. A non-credit course (Math 10) maybe be required at additional costs.

*** In scheduling coursework, students should pay attention to courses with limited offerings, (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course). It is critical that students take A ECL 371 fall semester of the junior year and A ECL 451 fall semester of the senior year.

Animal Science

The Department of Animal Science Undergraduate Program intends for its graduates to be able to explain the symbiotic relationship of animals and humans, to contribute to the solution of complex problems of animal enterprise management, and to apply their knowledge and skills in a technically demanding global community. Graduates of our program will be knowledgeable about sustainable animal production practices that also ensure animal health and well-being and stewardship of natural resources.

To enable learners to pursue a wide array of career interests, the department offers learning experiences ranging from the basic to the applied sciences. The overarching goals of the degree program are to provide a comprehensive animal science education in: science, animal management, and agri-business. Faculty in our program strive to create an environment for students to develop effective communication skills,

develop skills that enable students to gather and integrate information to solve problems, become self-learners, become leaders and team builders, and to become aware of domestic and global issues driving changes in the animal industries. Learner outcomes for these goals, for each of our courses, and other information defining the program can be found at our web site: <http://www.ans.iastate.edu/stud/ugrad/>. Our program is designed to provide career skills appropriate to job market needs. Our faculty goals include providing superior academic advising to enable students to fulfill their objectives.

The department offers the degrees bachelor of science in animal science and bachelor of science in dairy science. A double major in animal and dairy science is not permitted. However, combining either the animal science or dairy science majors with other curricula is permitted. A limit of 6 credits each in Intercollegiate Judging (Animal Science 475), or any independent study course (490 courses) can be applied toward a degree. A limit of 4 credits of Undergraduate Teaching Experience (Animal Science 497) can be applied toward a degree.

Within the animal science major, specialized options in animal products, companion animal management, equine management, livestock management, pre-professional studies, and pre-veterinary medicine are available. The department offers a minor in Animal Science and a minor in Meat Science. Both the animal science curricula and dairy science curricula allow complementary work toward admission to veterinary medical school and other professional schools, which may be done while satisfying requirements for the bachelor of science degree. A program that combines bachelor of science and master of science in animal science is offered. In addition, a program that combines a bachelor of science and master of business administration is offered. The Department facilitates student participation in the Midwest Poultry Consortium and the Swine Science Online program to offer additional training in poultry and swine production, respectively.

Curriculum in Animal Science

Students majoring in animal science will complete the degree requirements listed below. If desired, a student may also choose a specialized option. To earn a degree in Animal Science from Iowa State University a minimum of 15 credits in Animal Science must be earned from courses taught in the Animal Science department at ISU. A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspectives

Approved International Perspectives course 3

U.S. Diversity

Approved U. S. Diversity course 3

Communications Proficiency (with a C or better)

English composition 6

Speech fundamentals 3

Total Credits 9

Communication/Library

ENGL 150 Critical Thinking and Communication 3

ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
One of		3
SP CM 212	Fundamentals of Public Speaking	
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
COMST 214	Professional Communication	
One of:		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 312	Biological Communication	
ENGL 314	Technical Communication	

Total Credits 13

Humanities and Social Sciences

Approved Humanities course		3
Approved Social Science course		3

Total Credits 6

Ethics

Approved Ethics course		3
------------------------	--	---

Mathematical Sciences

Note: The Pre-Graduate/Pre-Professional Studies Option requires MATH 160, MATH 165, or MATH 181

One course from the following: 3-4

MATH 140	College Algebra	
MATH 150	Discrete Mathematics for Business and Social Sciences	
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	

One course from the following: 3-4

STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
STAT 226	Introduction to Business Statistics I	

Total Credits 6-8

Physical Sciences

A minimum of 8 credits are required. These requirements are specific to option and are listed with each option below.

Biological Sciences

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
BIOL 313	Principles of Genetics	3
or GEN 320	Genetics, Agriculture and Biotechnology	
MICRO 201 & 201L	Introduction to Microbiology and Introductory Microbiology Laboratory	3-4
or MICRO 302 & 302L	Biology of Microorganisms and Microbiology Laboratory	

Total Credits 14-15

Business

One course from the following: 3

Note: The Livestock Management Option requires ACCT 284

ACCT 284	Financial Accounting	
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	

Total Credits 3

Animal Science Core (required in every option)

AN S 101	Working with Animals	2
AN S 110	Orientation in Animal Science and ISU	1
AN S 114	Survey of the Animal Industry	2
AN S 210	Career Preparation in Animal Science	1
AN S 211	Issues Facing Animal Science	1
AN S 214	Domestic Animal Physiology	3
AN S 214L	Domestic Animal Anatomy and Physiology Lab	1
AN S 319	Animal Nutrition	3
AN S 320	Animal Feeds and Feeding	3
AN S 331	Domestic Animal Reproduction	3
AN S 352	Genetic Improvement of Domestic Animals	3
AN S 411	Addressing Issues in Animal Science	1

Total Credits 24

General Animal Science Option

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	5
or CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	
CHEM 331	Organic Chemistry I	3
or BBMB 221	Structure and Reactions in Biochemical Processes	
Three courses from the following:		9
AN S 216	Equine Science	
AN S 223	Poultry Science	
AN S 224	Companion Animal Science	
AN S 225	Swine Science	
AN S 226	Beef Cattle Science	
AN S 229	Sheep Science	
AN S 235	Dairy Cattle Science	
AN S 270 & 270L	Foods of Animal Origin and Foods of Animal Origin Laboratory	

One course from the following: 2-4

AN S 313	Exercise Physiology of Animals	
AN S 324	Food Processing for Companion Animals	
AN S 336	Domestic Animal Behavior and Well-Being	
AN S 337	Lactation	
AN S 345	Growth and Development of Domestic Animals	
AN S 360	Fresh Meats	
BIOL 314	Principles of Molecular Cell Biology	
BIOL 352	Vertebrate Histology	
BIOL 353	Introductory Parasitology	
ENT 372	Livestock Entomology	
ENT 374	Insects and Our Health	
MICRO 310	Medical Microbiology	
VDPAM 487	Livestock Disease Prevention	

TSM 327	Animal Production Systems	3	BIOL 353	Introductory Parasitology	
AGRON 334	Forage Crop Management	3	ENT 372	Livestock Entomology	
One course from the following:		3	ENT 374	Insects and Our Health	
AN S 415	Equine Systems Management		MICRO 310	Medical Microbiology	
AN S 424	Companion Animal Systems Management		VDPAM 487	Livestock Disease Prevention	
AN S 425	Swine Systems Management		One course from the following:		3
AN S 426	Beef Cattle Systems Management		AN S 415	Equine Systems Management	
AN S 429	Sheep Systems Management		AN S 424	Companion Animal Systems Management	
AN S 434	Dairy Systems Management		AN S 425	Swine Systems Management	
One course from the following:		2-3	AN S 426	Beef Cattle Systems Management	
AN S 415	Equine Systems Management		AN S 429	Sheep Systems Management	
AN S 419	Advanced Animal Nutrition		AN S 434	Dairy Systems Management	
AN S 424	Companion Animal Systems Management		One course from the following:		2-3
AN S 425	Swine Systems Management		AN S 415	Equine Systems Management	
AN S 426	Beef Cattle Systems Management		AN S 419	Advanced Animal Nutrition	
AN S 429	Sheep Systems Management		AN S 424	Companion Animal Systems Management	
AN S 434	Dairy Systems Management		AN S 425	Swine Systems Management	
AN S 460	Processed Meats		AN S 426	Beef Cattle Systems Management	
FS HN 405	Food Quality Assurance		AN S 429	Sheep Systems Management	
FS HN 410	Food Analysis		AN S 434	Dairy Systems Management	
FS HN 420	Food Microbiology		AN S 460	Processed Meats	
MICRO 407	Microbiological Safety of Foods of Animal Origins		FS HN 405	Food Quality Assurance	
Total Credits		30-33	FS HN 410	Food Analysis	
Additional free electives required for the Animal Science Option		23-29	FS HN 420	Food Microbiology	
Pre-Veterinary Medicine Option			MICRO 407	Microbiological Safety of Foods of Animal Origins	
BBMB 301	Survey of Biochemistry	3	Total Credits		39-42
CHEM 177	General Chemistry I	4	Additional free electives required for the Pre-veterinary Medicine Option		8-14
CHEM 177L	Laboratory in General Chemistry I	1			
CHEM 178	General Chemistry II	3	* The Iowa State University College of Veterinary Medicine academic requirements are met by completion of this option (http://vetmed.iastate.edu/academics/prospective-students/admissions/academic-requirements).		
CHEM 331	Organic Chemistry I	3	Livestock Management Option

FS HN 405	Food Quality Assurance	
FS HN 410	Food Analysis	
FS HN 420	Food Microbiology	
MICRO 407	Microbiological Safety of Foods of Animal Origins	

Total Credits 31-32

Additional free electives required for the Equine Management Option 18-22

Minors: Animal Science and Meat Science

The department offers a minor in Animal Science. The minor requires:

AN S 101	Working with Animals	2
AN S 114	Survey of the Animal Industry	2
AN S 214	Domestic Animal Physiology	3
AN S 214L	Domestic Animal Anatomy and Physiology Lab	1
One course from the following:		3
AN S 216	Equine Science	
AN S 223	Poultry Science	
AN S 224	Companion Animal Science	
AN S 225	Swine Science	
AN S 226	Beef Cattle Science	
AN S 229	Sheep Science	
AN S 235	Dairy Cattle Science	

AN S 270 & 270L	Foods of Animal Origin and Foods of Animal Origin Laboratory	
One course from the following:		3
AN S 313	Exercise Physiology of Animals	
AN S 319	Animal Nutrition	
AN S 331	Domestic Animal Reproduction	
AN S 345	Growth and Development of Domestic Animals	
AN S 352	Genetic Improvement of Domestic Animals	
One course from the following:		2-3
AN S 319	Animal Nutrition	
AN S 320	Animal Feeds and Feeding	
AN S 331	Domestic Animal Reproduction	
AN S 324	Food Processing for Companion Animals	3
AN S 336	Domestic Animal Behavior and Well-Being	
AN S 337	Lactation	
AN S 345	Growth and Development of Domestic Animals	
AN S 352	Genetic Improvement of Domestic Animals	
AN S 360	Fresh Meats	
AN S 419	Advanced Animal Nutrition	

Total Credits 19-20

A total of 9 credits must be earned at Iowa State University in animal science coursework that meets a degree requirement for the B.S. degree in animal science. Students interested in the Animal Science minor should contact an Animal Science adviser.

Minor - Meat Science

The department offers a minor in Meat Science. The minor requires:

AN S 270	Foods of Animal Origin	2
AN S 270L	Foods of Animal Origin Laboratory	1
AN S 360	Fresh Meats	3
AN S 460	Processed Meats	3
One course from the following:		1
AN S 489	Issues in Food Safety	
AN S 490C	Independent Study: Meat Science	
Two courses from the following:		5-6
FS HN 311	Food Chemistry	
FS HN 403	Food Laws, Regulations, and the Regulatory Process	
FS HN 405	Food Quality Assurance	
FS HN 406	Sensory Evaluation of Food	
FS HN 410	Food Analysis	
FS HN 412	Food Product Development	
FS HN 419	Foodborne Hazards	
FS HN 420	Food Microbiology	
FS HN 471	Food Processing I	
MICRO 407	Microbiological Safety of Foods of Animal Origins	

Total Credits 15-16

Students majoring in Animal Science will not be allowed to count the 9 required credits (270, 270L, 360, 460) toward their Animal Science degree. Students interested in the Meat Science minor should contact an Animal Science adviser.

16		16

Total Credits: 129-132

Important: This is only one of many equally-sound schedule sequences.
Note:

Free electives and specified group electives are chosen to complement the student's "specialized degree option" or other career interest. Lists of courses that satisfy group requirements are maintained in the Animal science advising offices. Degree options are explained in AN S 100 and through appointments with the student's academic adviser in Animal Science. Specialized options include: General Animal Science, Animal Products, Companion Animal Management, Equine Management, Livestock Management, Pre-Graduate Studies and Pre-Veterinary Medicine.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in animal breeding and genetics; meat science; animal physiology; animal science; and an interdepartmental program in nutritional sciences which has an option in animal nutrition. Minor work is offered in these areas to students taking major work in other departments.

A strong undergraduate program is required for students interested in graduate study. Fundamental training in biology, chemistry, mathematics, and statistics is requisite to a satisfactory graduate program. Graduate programs in animal science include supporting work in areas such as agricultural engineering, agronomy; anatomy; biochemistry; chemistry; economics; environmental science; food science and human nutrition; genetics; microbiology; physics; physiology; and statistics. Students may choose graduate programs involving a co-major with one of these areas. Graduate work in meat science is offered as a co-major in animal science and food science and human nutrition.

The department also cooperates in the interdepartmental program in professional agriculture and interdepartmental majors in genetics, immunobiology, microbiology, MCDB (molecular, cellular, and developmental biology), neuroscience, nutritional sciences, and toxicology (see Index).

The foreign language requirement, if any, is established on an individual basis by the program-of-study committee appointed to guide the work of the student.

Biology

Interdepartmental Undergraduate Program

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation's leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State's Biology Program the

logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution, and Organismal Biology and the Department of Genetics, Development, and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university's strengths in science and technology. A bachelor's degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Customizing a degree

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The Biology major offers a rich variety of coursework addressing most of the areas of biology.

The major's curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student's career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the Biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides five advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the Biology web site. The areas are:

Pre-medical and Human Health Professions--This area emphasizes preparation for further study in medical school or allied human health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.

Pre-veterinary--An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But, pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine, and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

Molecular and Cellular Biology--Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly

designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

Ecology and Conservation Biology—Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth's biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Evolution and Biodiversity—This area provides students with a sound understanding of evolutionary principles and the biological patterns that result from evolutionary change. Students have the opportunity to explore, in depth, the biodiversity found within a wide range of groups of organisms. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Other opportunities

Teacher licensure—Biology majors seeking licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Undergraduate research—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 499 Undergraduate Research Experience.

Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship.

Field trip courses – The Biology Program offers two field trip courses: BIOL 393 (North American Field Trips in Biology) and BIOL 394 (International Field Trips in Biology). In recent years field trip opportunities to the Boundary Waters area of Minnesota, Honduras, and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience—Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 394 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a

foreign language can also add an international emphasis to a degree in biology.

Courses offered at other locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major.

Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory—The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement.

Summer Biological Field Stations—Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu (<http://www.biology.iastate.edu>) for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies—Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information, contact the Biology Student Services Office in 103 Bessey Hall.

Undergraduate Study

Biology majors start their studies in the biological sciences by taking a unified biology core curriculum consisting of six integrated courses, including four with labs. The first year provides a broad introduction to the nature of life.

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the Biology major take BIOL 112 in place of BIOL 110.

Students then explore concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of biological science at the 300 level, or above, from an approved list of courses. Of these, at least 9 credits must be taken as BIOL courses, and a minimum of two BIOL laboratory or field courses must also be included.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also

be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program's web site has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

General requirements

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements– Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in both ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316, or JL MC 347, or SP CM 212.

Minor

A minor in Biology is offered by the Biology Program. The minor requires 15 credits in Biology and includes the completion of the specific courses listed below and 7 credits in biology courses numbered 300 or above. Nine (9) credits of the required courses must apply only to the minor. For more information, see the Biology Program web site or contact the Student Services Office in 103 Bessey Hall.

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
Total Credits		8

Graduate Study

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and

Developmental Biology; Neuroscience; Plant Biology; Toxicology; Immunobiology; and Environmental Science are also available. (See Index.)

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Curriculum in Biology

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Biology: 23.5 cr.

All graded courses minimum C-; 2.00 GPA average required.

BIOL 110	Introduction to Biology	1
BIOL 111	Opportunities in Biology	0.5
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
BIOL 312	Ecology	4
BIOL 313	Principles of Genetics	3
BIOL 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
BIOL 315	Biological Evolution	3
Total Credits		23.5

Advanced Biology: 21 cr.

All graded courses minimum C-; 2.00 GPA average required. See the Biology Program web site for list of approved Advanced Biology courses, or consult an adviser in the Biology Student Services office, 103 Bessey Hall.

Two Advanced BIOL courses with lab or field components (from approved list)

Biology advanced courses (from approved list)	9
Additional approved biology advanced courses	12

Community Development Interinstitutional Graduate Program

<http://www.gpidea.org/>

Participating Institutions:

- Iowa State University
- Kansas State University
- University of Nebraska
- North Dakota State University
- South Dakota State University

Community Development deals with challenges faced by communities in the United States and other countries, particularly those in rural areas. Global economic restructuring and the devolution of government services have produced an environment in which Community Developers are called on to think and act in innovative ways.

Community Development is a progressive field, actively promoting positive social, economic, cultural and environmental change. It encourages people to see the “whole picture,” engaging citizens in democratic decision making and action.

Community Development is an inter-institutional distance education program offered through the Web. The student selects a home institution, which grants the degree. After admission at the home institution, the student may take courses from any of the teaching institutions: Iowa State University, Kansas State University, University of Nebraska, North Dakota State University, and South Dakota State University.

At Iowa State University, Community Development is an area of specialization within the Interdisciplinary Graduate Studies degree program that consists of 37 semester credits for completion of the program. A thesis or creative component is required. A computer with minimum specifications, Web access, an email address and program forms are required for participating in the program.

Registration

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU. See <http://www.grad-college.iastate.edu/academics/programs/apresults.php?id=70> for program requirements.

Culinary Science (AGLS)

The Culinary Science degree program is a food science-based degree in which students develop basic culinary skills along with knowledge of the accompanying sciences. As a graduate, you'll combine food product development skills and entrepreneurial talents with scientific and technological knowledge.

The department also offers a culinary science minor.

Administered by the Department of Food Science and Human Nutrition

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

16

Total Credits: 120-124

* Chose elective courses to total equal to or greater than 120 credits.
 Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

Dairy Science

Students majoring in Dairy Science will complete the degree requirements listed below. If desired, a student may also include the specialized option in pre-veterinary medicine. A minimum of 15 credits of animal science coursework must be earned at Iowa State University. A minimum of 15 credits must be completed from the courses listed to meet the Ethics, International Perspectives, U.S. Diversity, and Humanities and Social Sciences requirements.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspectives

Approved International Perspectives course 3

U.S. Diversity

Approved U.S. Diversity course 3

Communications Proficiency

English composition 6

Speech fundamentals 3

Total Credits 9

Communication/Library

ENGL 150 Critical Thinking and Communication 3

ENGL 250 Written, Oral, Visual, and Electronic Composition 3

LIB 160 Information Literacy 1

One course from the following: 3

AGEDS 311 Presentation and Sales Strategies for Agricultural Audiences

COMST 214 Professional Communication

SP CM 212 Fundamentals of Public Speaking

Total Credits 10

Humanities and Social Sciences

Approved Humanities course 3

Approved Social Science course 3

Total Credits 6

Ethics

Approved Ethics course 3

Mathematics and Business

ECON 101 Principles of Microeconomics 3

One course from the following: 3-4

STAT 101 Principles of Statistics

STAT 104 Introduction to Statistics

STAT 226 Introduction to Business Statistics I

One course from the following: 3-4

MATH 140 College Algebra

MATH 150 Discrete Mathematics for Business and Social Sciences

MATH 160 Survey of Calculus

MATH 181 Calculus and Mathematical Modeling for the Life Sciences I

Total Credits 9-11

Biological Sciences

BIOL 211 Principles of Biology I 3

BIOL 211L Principles of Biology Laboratory I 1

BIOL 212 Principles of Biology II 3

BIOL 212L Principles of Biology Laboratory II 1

BIOL 313 Principles of Genetics 3

or GEN 320 Genetics, Agriculture and Biotechnology

MICRO 201 Introduction to Microbiology and Introductory Microbiology Laboratory 3-4

or MICRO 302 Biology of Microorganisms and Microbiology Laboratory

Total Credits 14-15

Physical Sciences

A minimum of 8 credits are required. These requirements are specific to option and are listed with each option below.

Dairy Sciences Option

AN S 101 Working with Animals 2

AN S 110 Orientation in Animal Science and ISU 1

AN S 114 Survey of the Animal Industry 2

AN S 210 Career Preparation in Animal Science 1

AN S 211 Issues Facing Animal Science 1

AN S 214 Domestic Animal Physiology 3

AN S 214L Domestic Animal Anatomy and Physiology Lab 1

AN S 235 Dairy Cattle Science 3

AN S 270 Foods of Animal Origin and Foods of Animal Origin Laboratory

or FS HN 101 Food and the Consumer

AN S 319 Animal Nutrition 3

AN S 320 Animal Feeds and Feeding 3

AN S 331 Domestic Animal Reproduction 3

AN S 337 Lactation 3

AN S 352 Genetic Improvement of Domestic Animals 3

AN S 411 Addressing Issues in Animal Science 1

AN S 434 Dairy Systems Management 3

AN S 435 Applied Dairy Farm Evaluation 3

CHEM 163 College Chemistry and Laboratory in College Chemistry

or CHEM 177 General Chemistry I and Laboratory in General Chemistry I

CHEM 331 Organic Chemistry I 3

or BBMB 221 Structure and Reactions in Biochemical Processes

Four credits (minimum) from the following: 4

AGRON 334 Forage Crop Management

AN S 332 Laboratory Methods in Animal Reproduction

or AN S 333 Embryo Transfer and Related Technologies

AN S 336 Domestic Animal Behavior and Well-Being

AN S 345 Growth and Development of Domestic Animals

AN S 360 Fresh Meats

AN S 415 Equine Systems Management

AN S 419 Advanced Animal Nutrition

AN S 424 Companion Animal Systems Management

AN S 425 Swine Systems Management

AN S 426	Beef Cattle Systems Management	
AN S 429	Sheep Systems Management	
AN S 460	Processed Meats	
ECON 332	Cooperatives	
ECON 336	Agricultural Selling	
FS HN 308	Dairy Products: Current Issues and Controversies	
FS HN 403	Food Laws, Regulations, and the Regulatory Process	
FS HN 405	Food Quality Assurance	
FS HN 410	Food Analysis	
MICRO 310	Medical Microbiology	
MICRO 353	Introductory Parasitology	
MICRO 374	Insects and Our Health	
MICRO 402	Microbial Genetics and Genomics	
MICRO 407	Microbiological Safety of Foods of Animal Origins	
MICRO 419	Foodborne Hazards	
MICRO 419	Foodborne Hazards	
MICRO 420	Food Microbiology	
VDPAM 487	Livestock Disease Prevention	
Total Credits		51

Additional free electives for the Dairy Sciences option 26-29

Pre-Veterinary Medicine Option

AN S 101	Working with Animals	2
AN S 110	Orientation in Animal Science and ISU	1
AN S 114	Survey of the Animal Industry	2
AN S 210	Career Preparation in Animal Science	1
AN S 211	Issues Facing Animal Science	1
AN S 214	Domestic Animal Physiology	3
AN S 214L	Domestic Animal Anatomy and Physiology Lab	1
AN S 235	Dairy Cattle Science	3

Total Credits: 129-132

Important: This is only one of many equally-sound schedule sequences.
Note:

Free electives and specified group electives are often chosen to complement the student's career focus. The student's academic adviser assists with developing scheduling schemes that prepare students individually for careers in the animal industry. They are explained fully in AN S 110 and through appointments with the student's adviser in Dairy Science. Typical career areas include Advanced Degree in Dairy Science, Business and Finance, Agriculture Promotion and Information, Dairy Food Industry, Agricultural Sales and Marketing, International Agriculture, Animal Production and General Agribusiness and Pre-Veterinary Medicine.

Diet and Exercise (AGLS)

Curriculum in Diet and Exercise B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a \$30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Certified Exercise Physiologist.

Total Degree Requirements: 124 cr. for bachelor's degree and 34-41 cr. for master's degree

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3

Total Credits 10

Social Sciences: 6 cr.

PSYCH 101	Introduction to Psychology	3
PSYCH 230	Developmental Psychology	3

Total Credits 6

Mathematical Sciences: 6-8 cr.

Select at least 3 credits from: 3-4

MATH 140	College Algebra	
MATH 143	Preparation for Calculus	
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	

Select at least 3 credits from: 3-4

STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
STAT 226	Introduction to Business Statistics I	

Total Credits 6-8

Physical Sciences: 13-17 cr.

Select from: 5-8

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	
CHEM 177 & 177L & CHEM 178	General Chemistry I and Laboratory in General Chemistry I and General Chemistry II	
CHEM 231	Elementary Organic Chemistry	3
CHEM 231L	Laboratory in Elementary Organic Chemistry	1
PHYS 115 or PHYS 111	Physics for the Life Sciences / General Physics	4-5

Total Credits 13-17

Biological Sciences: 19 cr.

BBMB 301	Survey of Biochemistry	3
BIOL 211	Principles of Biology I	3
BIOL 212	Principles of Biology II	3
BIOL 255	Fundamentals of Human Anatomy	3
BIOL 255L	Fundamentals of Human Anatomy Laboratory	1
BIOL 256	Fundamentals of Human Physiology	3
BIOL 256L	Fundamentals of Human Physiology Laboratory	1
MICRO 201	Introduction to Microbiology	2

Total Credits 19

Diet and Exercise undergraduate courses to be completed or in progress when applying for admission to the program: 20-22 cr.

Select from: 1-2

FS HN 110	Professional and Educational Preparation	
KIN 252 & KIN 253	Disciplines and Professions in Kinesiology and Health and Orientation and Learning Community in Kinesiology and Health	
FS HN 167	Introduction to Human Nutrition	3
FS HN 214	Scientific Study of Food	3
FS HN 215 or FS HN 115	Advanced Food Preparation Laboratory / Food Preparation Laboratory	1-2
FS HN 265	Nutrition for Active and Healthy Lifestyles	3
FS HN 340	Foundations of Dietetic Practice	1
FS HN 360	Advanced Human Nutrition and Metabolism	3
H S 110	Personal and Consumer Health	3
KIN 258	Physical Fitness and Conditioning	2

Total Credits 20-22

Acceptance into the BS/MS PROGRAM is required BEFORE spring semester of the THIRD year.

Humanities and Ethics: 6-9 cr.

Select 6 credits from approved Humanities list 6

Select 3 credits from approved Ethics list 3

Note: If ethics course is on the humanities list, it can meet both requirements.

Diet and Exercise remaining undergraduate courses to complete the bachelor's degree requirements: 43 cr.

H S 380	Worksite Health Promotion	3
A TR 220 or H S 305	Basic Athletic Training / Instructor's First Aid and Cardio-pulmonary Resuscitation	2
KIN 259	Leadership Techniques for Fitness Programs	2
KIN 345	Management of Health-Fitness Programs and Facilities	3
KIN 358	Physiology of Exercise	3
Select from:		3
KIN 355	Biomechanics	
KIN 360	Sociology of Sport and Exercise	
KIN 366	Exercise Psychology	
KIN 372	Motor Control and Learning Across the Lifespan	
KIN 462	Medical Aspects of Exercise	3

Total Credits: 163-172

Planned course offerings may change, and students need to check the online Schedule of Classes each term to confirm course offerings: <http://classes.iastate.edu/>. This sequence is only an example.

Dietetics (AGLS)

Dietitians are nutrition experts who strive for optimal health and nutrition of individuals and the population. The curriculum for the dietetics program as well as the diet and exercise program meet the academic requirements of the Didactic Program in Dietetics and prepares students for a career in the field of dietetics. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency for the Academy of Nutrition and Dietetics.

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetics internships. There is a \$30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3

Total Credits 10

Humanities and Social Sciences: 6-12 cr.

Select Humanities course from approved list	3
PSYCH 101 Introduction to Psychology	3
If H Sci student, select:	6
Additional Humanities course	
Additional Humanities or Social Science course	

Ethics and Environmental: 3-6 cr.

FS HN 342	World Food Issues: Past and Present	3
If AgLS student, select from:		2-3
ENV S 120	Introduction to Renewable Resources	
ENV S 201	Introduction to Environmental Issues	

Mathematical Sciences: 6-8 cr.

Select at least 3 credits from:		3-4
MATH 140	College Algebra

Admission to the dietetics program: Students enter the university designated as pre-dietetics. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, and completion of the application with interest in becoming a registered dietitian. Students then progress toward earning a Bachelor of Science degree in Dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship.

Go to FS HN courses.

Early Childhood Education

The curriculum in early childhood education – unified (ECE) prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through age eight. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. This curriculum has been approved by the Iowa Department of Education and meets the requirements for the early childhood education – unified teacher license. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and School of Education.

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education –

unified students must meet general education requirements for teacher licensure.

Additional information is also available from the student's academic adviser. Students in early childhood education – unified must meet the performance outcome standards for teacher licensure. Standards are assessed in coursework through artifacts such as assignments, projects, or practicum participation. These standards assessments are based on the early childhood content standards for endorsement 100 in the State of Iowa. These include competencies in (1) child growth, development, and learning, (2) developmentally appropriate learning environment and curriculum implementation, (3) health, safety, and nutrition, (4) family and community collaboration, and (5) professionalism. Pre-student teaching field experiences and student teaching experiences in at least two different settings is required.

This sheet provides a guide to the sequence of HD FS and C I courses; courses adhere to a prescribed sequence of semesters. Your academic advisor will help you develop an individual long range plan.

B=Block of courses listed together in the semester must be taken concurrently as sequenced

*=See approved ECE list of courses for options in Biological Sciences, Humanities, Physical Sciences and Social Sciences
ISU requires a 3 credit U.S. Diversity course (satisfied by SP ED 250 or HD FS 240) and a 3 credit international perspective course (usually met through a University approved humanities or social science options from the ECE options list)

Early Childcare Education and Programming

Curriculum in Early Childcare Education and Programming

The **Early Childcare Education and Programming (E C P)** curriculum, offered by the Great Plains Interactive Distance Education Alliance (GPIDEA), is designed to prepare graduates to work in a variety of early care and education programs in local communities and on military installations. Some of these programs are childcare centers and homes, infant/toddler and preschool programs, Head Start programs, and before and after-school programs for children ages birth to eight. This is an online program offered through a collaboration of seven universities as part of GPIDEA. The program is known as Early Care and Education for a Mobile Society. For more information see <http://www.hsidea.org/programs/ece/>.

The E C P curriculum is designed to provide content for the final two years of a student's program; the content is focused specifically on topics directly relevant to the major. Students will complete a total of 120 credits for the major, 51 of which are specific to the E C P curriculum.

These 51 credit hours are comprised of 12 core courses and 3 practica; the final practicum will be a 6-credit capstone experience. Students must complete the required 30 credits of college work and a lifespan development course before being admitted to E C P. If students prefer to be admitted to ISU before being admitted to the E C P major, they can enroll as Pre ECP (P ECP) students until they are eligible for the E C P major. For more information about the program at Iowa State, see <http://www.online.hs.iastate.edu/ecp>.

Entomology

Undergraduate Study

Minor - Insect Science

The department offers a minor in Insect Science that may be earned by completing ENT 370 Insect Biology and 12 credits in courses selected from an approved list supplied by the department.

Minor - Emerging Global Diseases

Entomology administers the Emerging Global Diseases minor (see <http://www.ent.iastate.edu/egd>). Core courses address the biology of emerging disease agents (e.g., protozoa, fungi, microbes, and viruses), the clinical manifestations and epidemiology of emerging diseases, and the impact of those diseases on human interactions and socioeconomics. One course must be taken from each of three core areas:

Pathogens and Disease

MICRO 310	Medical Microbiology
-----------	----------------------

MICRO 353	Introductory Parasitology
-----------	---------------------------

Sociology and Economics

SOC 411	Social Change in Developing Countries
---------	---------------------------------------

SOC 345	Population and Society
---------	------------------------

FS HN 342	World Food Issues: Past and Present
-----------	-------------------------------------

Arthropod-borne Diseases

ENT 374	Insects and Our Health
---------	------------------------

ENT 574	Medical Entomology
---------	--------------------

MICRO 353	Introductory Parasitology
-----------	---------------------------

The remainder of the credits (for a total of 15) may be selected from any of the above-listed courses not selected, and from other appropriate courses as approved by Emerging Global Diseases program advisers.

Graduate Study

The department offers work for the master of science and doctor of philosophy degrees with a major in entomology. Studies at the Ecosystem, Organismal, and Subcellular levels occur in the following areas: aquatic entomology, biological control, chemical ecology, ecology, host plant resistance, insecticide toxicology, medical/veterinary entomology, pathology, pest management, physiology, population genetics, or systematics.

Graduates have a broad understanding of entomology and related disciplines, and an in-depth command of their area of concentration. They are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex problems facing entomology or toxicology professionals, taking into account related ethical, social, legal, economic, and environmental issues. They are skilled in research methods, data analyses, and interpretation of results. They also are skilled in working effectively with their colleagues, and writing concise and persuasive grant proposals. They have an understanding of and can critically evaluate current entomological literature.

Prerequisite to the entomology major and to minor graduate work in the department is completion of at least two years of zoological courses, for part of which credit in other closely allied biological sciences may be substituted. Specific course requirements for advanced degrees depend partly upon previous training and experience in the major field of specialization.

Any student receiving the M.S. in entomology shall have at least one course in insect physiology, one course in insect systematics, two courses of ENT 590 Special Topics (selected from topics A through D, F through I, M and N, inclusive), and at least 1 credit of ENT 600 Seminar.

Any student receiving the Ph.D. in entomology shall have at least one course in insect physiology, one course in insect systematics, four additional courses of ENT 590 Special Topics (selected from topics A through D and F through I, M through N inclusive), and at least 1 credit of ENT 600 Seminar. At least one 590 must be taken from each of these subgroups: Population (C, D, N); Organismal (A, B, F, M); and Suborganismal (G, H, I).

In addition, Ph.D. students majoring either in Entomology or Toxicology shall have two semesters of teaching experience, taken as ENT 590K Special Topics: Teaching Experience. both semesters or ENT 590K Special Topics: Teaching Experience. one semester and ENT 590L Special Topics: Extension Internship. the other semester.

A student can receive a Ph.D. minor in Entomology by taking 3 Entomology courses (500 level and above) for a total of 9 credits to be determined by the student's POS committee and approved by the Entomology Director of Graduate Education.

An option for an emphasis in molecular Entomology is available. Any student receiving the M.S. in entomology with an emphasis in molecular entomology is required to take:

ENT 555	Insect Physiology	4
ENT 590G	Special Topics: Molecular Entomology.	1-3
Plus one other course of 590 selected from topics A-D, F, H, I, M, N		
Plus one additional course in molecular entomology		
ENT 600	Seminar	1
BBMB 404	Biochemistry I	3
BBMB 542A	Introduction to Molecular Biology Techniques: DNA Techniques	1
And one course from the following:		
ENT 576	Systematic Entomology	
ENT 525	Aquatic Insects	
ENT 568	Advanced Systematics	

Any student receiving the Ph.D. in entomology with an emphasis in molecular entomology is required to take:

ENT 555	Insect Physiology	4
ENT 590G	Special Topics: Molecular Entomology.	1-3
Plus three other courses of 590 selected from topics A-D, F, H, I, M, N		
One additional course in molecular entomology		
ENT 600	Seminar	1
BBMB 542A	Introduction to Molecular Biology Techniques: DNA Techniques	1
Plus two other workshops selected from:		
BBMB 542C	Introduction to Molecular Biology Techniques: Cell Techniques	
BBMB 542D	Introduction to Molecular Biology Techniques: Plant Transformation	
BBMB 542E	Introduction to Molecular Biology Techniques: Proteomics	
An additional course with a molecular component		
		3

Plus one from each of the following:		
Systematics		
		3
ENT 576	Systematic Entomology	
ENT 525	Aquatic Insects	
ENT 568	Advanced Systematics	
Biochemistry		
		3
BBMB 404	Biochemistry I	
BBMB 405	Biochemistry II	
BBMB 504	Amino Acids and Proteins	
BBMB 505	Bioenergetics and Metabolism	

Entomology participates in the interdepartmental majors in ecology and evolutionary biology; genetics; Microbiology; and molecular, cellular and developmental biology; and in the interdepartmental major and minor in toxicology (see Index).

The Federal Corn Insects and Crop Genetics Research Unit and the North Central Plant Introduction Station are available for advanced study in certain phases of entomological research.

More information about the department, such as current research, faculty resumes, physical facilities, and graduate students can be viewed on the department's website at www.ent.iastate.edu (<http://www.ent.iastate.edu/assessment>). Curriculum assessment for the department can be viewed here: <http://www.ent.iastate.edu/assessment>.

Environmental Science

College of Agriculture and Life Sciences

Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.

2. 32 credits of course work in the major, including a required core of 20 credits.

A combined average grade of C or higher is required in courses applied in the major.

1. Environmental Science: 32 credits

ENSCI 110	Orientation to Environmental Science	1
ENSCI 201	Introduction to Environmental Issues	2
ENSCI 202	Exploration of Environmental and Sustainability Issues	1
ENSCI 203	Exploration of Environmental Science	1
ENSCI 250	Environmental Geography	3
ENSCI 251	Biological Processes in the Environment	3
ENSCI 381	Environmental Systems I: Introduction to Environmental Systems	3
ENSCI 382	Environmental Systems II: Analysis of Environmental Systems	3
ENSCI 384	Introduction to Ecosystems	3
Additional ENSCI choice courses		12

Total Credits 32

2. Mathematics & Statistics: 7-8 credits

Choose one of the following:		4
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	
Choose one of the following:		3-4
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	

Total Credits 7-8

3. Physical & Life Sciences: 21-24 credits

BIOL 101	Introductory Biology	3
or BIOL 211	Principles of Biology I	

Choose from one of the following: 5-6

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	
CHEM 167 & 167L	General Chemistry for Engineering Students and Laboratory in General Chemistry for Engineering	
CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	
CHEM 201 & 201L	Advanced General Chemistry and Laboratory in Advanced General Chemistry	

Choose from one of the following: 3-4

CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	
CHEM 331 & 331L	Organic Chemistry I and Laboratory in Organic Chemistry I	
BBMB 221	Structure and Reactions in Biochemical Processes	
AGRON 259	Organic Compounds in Plants and Soils	

Choose from one of the following: 4-5

PHYS 111	General Physics	
PHYS 115	Physics for the Life Sciences	

PHYS 221	Introduction to Classical Physics I	
Choose 2 of the following:		6
AGRON 154	Fundamentals of Soil Science	
or AGRON 260	Soils and Environmental Quality	
GEOL 100	The Earth	
or GEOL 201	Geology for Engineers and Environmental Scientists	
MTEOR 206	Introduction to Weather and Climate	
BIOL 212	Principles of Biology II	
CHEM 178 & 178L	General Chemistry II and Laboratory in College Chemistry II	
Total Credits		21-24

4. Communications: 7-10 credits

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
Embedded communication coursework in ENSCI 203, 381 and 382		
Total Credits		7

Additional communication Courses required of majors in the College of Agriculture and Life Sciences

SP CM 212	Fundamentals of Public Speaking	3
or AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
Total Credits		3

5. General Education: 15-21 credits

General Education requirements in the College of Agriculture and Life Sciences

Humanities	3
Social Science	3
Ethics	3
International Perspectives course from university approved list	3
US Diversity course from university approved list	3
Total Credits	15

General Education requirements in the College of Liberal Arts and Sciences

Arts and Humanities courses from college approved list	12
Social Science courses from college approved list	9
(Select courses to include 3 cr. of International Perspectives and 3 cr. of US Diversity)	
Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level	
Total Credits	21

Total Credits: 120-122

- ¹ Students complete at least 27 credits in Environmental Science including ENSCI 110,201, 250, 381, 382, and 15 additional credits of approved ENSCI coursework.
- ² Students complete at least 15 credits in humanities and social science including at least 3 credits each in ethics, humanities, social science, U.S. Diversity, and International Perspectives from approved lists.
- ³ Students choose one course from the following Earth Science related courses: AGRON 154, AGRON 260, BIOL 212, GEOL 100, GEOL 201, MTEOR 206. Students choose from one of the following Organic Chemistry options: CHEM 231 & 231L, CHEM 331 & 331L, BBMB 221, or AGRON 259.

ensci.iastate.edu (<http://www.ensci.iastate.edu>)

The Environmental Science graduate program offers an interdepartmental curriculum leading to M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture

and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics. Cooperating departments include Agricultural and Biosystems Engineering; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Ecology, Evolution and Organismal Biology; and Geological and Atmospheric Sciences.

Applicants should have completed an undergraduate or master's degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science Graduate Program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in environmental science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Information on application procedures, curriculum requirements, and faculty research areas is available on the Environmental Science Graduate Program website (<https://enscigrad.iastate.edu/>).

Food Science (AGLS)

Food science is a degree program focused on food issues from the time crops leave the field until consumers buy the food products. Food scientists apply basic science (chemistry, biology, physics) to improve processing, preservation, and safety of food and to develop new food products. There are two options in food science, and both options are approved by the Institute of Food Technologists: food science and technology option, and food science and industry option.

The department also offers a food science minor.

Administered by the Department of Food Science and Human Nutrition

Students select one of the following options and complete all requirements for that option: food science and technology option or food science and industry option. Courses listed below are required for all of the options, except where specified by option below.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3

Total Credits **10**

Humanities and Social Sciences: 6-12 cr.

Select Humanities course from approved list	3	
ECON 101	Principles of Microeconomics	3
If H Sci student, select:	6	

Additional Humanities course	
Additional Humanities or Social Science course	

Ethics and Environmental: 3-6 cr.

FS HN 342	World Food Issues: Past and Present	3
If AgLS student, select from:		2-3
ENV S 120	Introduction to Renewable Resources	
ENV S 201	Introduction to Environmental Issues	

Mathematical Sciences: 7-12 cr.**Food science and technology option:**

Select from:		8
MATH 165	Calculus I	
& MATH 166	and Calculus II	

or

MATH 181	Calculus and Mathematical Modeling for the Life	
& MATH 182	Sciences I	
	and Calculus and Mathematical Modeling for the	
	Life Sciences II	

Select at least 3 credits from:		3-4
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
STAT 105	Introduction to Statistics for Engineers	

Total Credits 11-12**Food science and industry option:**

Select at least 4 credits from:		4
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
MATH 181	Calculus and Mathematical Modeling for the Life	
	Sciences I	

Select at least 3 credits from:		3-4
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
STAT 105	Introduction to Statistics for Engineers	

Total Credits 7-8**Physical Sciences: 13-25 cr.****Food science and technology option:**

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 331	Organic Chemistry I	3
CHEM 331L	Laboratory in Organic Chemistry I	1
CHEM 332	Organic Chemistry II	3
PHYS 111	General Physics	5
PHYS 112	General Physics	5

Total Credits 25**Food science and industry option:**

Select from:		5-8
CHEM 163	College Chemistry	
& 163L	and Laboratory in College Chemistry	
CHEM 177	General Chemistry I	
& 177L	and Laboratory in General Chemistry I	
& CHEM 178	and General Chemistry II	
CHEM 231	Elementary Organic Chemistry	3

CHEM 231L	Laboratory in Elementary Organic Chemistry	1
PHYS 115	Physics for the Life Sciences	4-5
or PHYS 111	General Physics	

Total Credits 13-17**Biological Sciences: 12-13 cr.****Food science and technology option:**

BBMB 301	Survey of Biochemistry	3
BIOL 211	Principles of Biology I	3
BIOL 212	Principles of Biology II	3
MICRO 302	Biology of Microorganisms	3
MICRO 302L	Microbiology Laboratory	1

Total Credits 13**Food science and industry option:**

BBMB 301	Survey of Biochemistry	3
BIOL 211	Principles of Biology I	3
BIOL 212	Principles of Biology II	3
MICRO 201	Introduction to Microbiology	2-3
or MICRO 302	Biology of Microorganisms	
MICRO 201L	Introductory Microbiology Laboratory	1
or MICRO 302L	Microbiology Laboratory	

Total Credits 12-13**Food Science and Human Nutrition: 44 cr.**

FS HN 101	Food and the Consumer	3
FS HN 110	Professional and Educational Preparation	1
FS HN 167	Introduction to Human Nutrition	3
FS HN 203	Contemporary Issues in Food Science and Human	1
	Nutrition	
FS HN 311	Food Chemistry	3
FS HN 311L	Food Chemistry Laboratory	1
FS HN 351	Introduction to Food Engineering Concepts	3
FS HN 403	Food Laws, Regulations, and the Regulatory	2
	Process	
FS HN 405	Food Quality Assurance	3
FS HN 406	Sensory Evaluation of Food	3
FS HN 410	Food Analysis	3
FS HN 411	Food Ingredient Interactions and Formulations	2
FS HN 412	Food Product Development	3
FS HN 420	Food Microbiology	3
FS HN 421	Food Microbiology Laboratory	3
FS HN 471	Food Processing I	3
FS HN 472	Food Processing II	3
FS HN 480	Professional Communication in Food Science and	1
	Human Nutrition	

Total Credits 44**Food science and industry option:**

Select 6 credits from the following business courses:		6
ACCT 215	Legal Environment of Business	
ACCT 284	Financial Accounting	
ACCT 285	Managerial Accounting	
ECON 301	Intermediate Microeconomics	
ECON 320	Labor Economics	

MGMT 310	Entrepreneurship and Innovation
MGMT 370	Management of Organizations
MGMT 371	Organizational Behavior
MGMT 414	International Management
MGMT 472	Management of Diversity
MIS 301	Management Information Systems
MKT 340	Principles of Marketing
MKT 447	Consumer Behavior
MKT 448	Global Marketing
Total Credits	6

Electives: 0-23 cr. Select from any university coursework to earn at least 120 total credits.

Go to FS HN courses.

Forestry

The forestry curriculum offers courses dealing with the management of forest ecosystems for multiple benefits including biodiversity, recreation, water, wilderness, wildlife, and wood and fiber. Conservation and preservation of natural resources are emphasized. The department offers work for the Bachelor of Science degree with a major in forestry and options in forest ecosystem management, interpretation of natural resources, urban and community forestry, natural resource conservation and restoration, or sustainable materials science and technology. All options lead to a professional degree in forestry (Bachelor of Science). The forestry major has been accredited by the Society of American Foresters (SAF) since 1935. The Council for Higher Education Accreditation recognizes SAF as the specialized accrediting body for forestry education in the United States. The primary goal of the undergraduate curriculum in forestry is to educate foresters to be capable of scientifically managing the nation's forest lands and related ecosystems - private and public.

Graduates understand and can apply scientific principles associated with forests, forest ecosystem management, and wood and non-wood products. Graduates are able to communicate effectively and work well in teams. They are capable of preparing and delivering effective oral and written communication of scientific and technical decisions to professional and lay audiences. They are proficient in technical skills such as measurements, computer usage, inventory, economic analysis, data and situation analysis, and ecosystem assessment. They recognize the importance of ethics in forestry and are sensitive to cultural diversity and broad environmental concerns.

Graduates of the forest ecosystem management option are skilled at understanding how forests function and how forests can be managed to produce desired goods (wood, fiber, recreation, wildlife habitat) and services (clean water, carbon sequestration, wilderness) in the long-run. They are skilled at interpretation of interactions and effects of abiotic and biotic factors in forests and quantification of bio-physical, social, and economic outputs from forest ecosystems. They are skilled at complex decision-making involving private and public forest resources where ethical, legal, social, economic, and ecological dimensions are explicitly considered.

Graduates of the interpretation of natural resources option are skilled at communicating with the public about the values associated with forest ecosystems and providing educational programs for all ages.

Graduates of the urban and community forestry option are able to combine biological, social, legal, and economic expertise to effectively manage trees or forests in an urban setting. They are skilled at decision-making related to site assessment, and long-term management of urban trees and forests to achieve multiple goals.

Graduates of the natural resource conservation and restoration option are skilled at assessing the natural functions of the environment and human impacts. They are skilled at interpretation of forest and other natural environments and making decisions relating to their conservation and preservation.

Graduates of the sustainable materials science and technology option understand the anatomical, physical, and chemical properties of wood and other bio-renewable materials and know wood processing operations involved in drying, composite materials manufacturing, and chemical treatment.

In consultation with their adviser, students can select elective courses related to elective courses in the forest ecosystem management option to emphasize forest ecology; wildlife, wilderness, and recreation management; water quality and erosion protection; quantitative-analytical techniques; business and marketing; and other areas related to natural resource management. Elective courses in the urban and community forestry option can be selected to emphasize plant health, policy and planning, ecology, hydrology, sociology, business administration, or horticulture/design. Elective courses related to the natural resource conservation and restoration option can be selected to emphasize, ecology, wildlife, recreation, nature interpretation, landscape design, sociology and ethics of conservation and preservation. Similarly, elective courses in the sustainable materials science and technology option can be selected to emphasize wood production, bio-renewable materials, wood fiber, business and marketing, and quality assurance. Elective courses in the interpretation of natural resources option can be selected to emphasize natural history, animal ecology, and environmental education.

Many private firms as well as national, regional, state, and local agencies seek forestry graduates to fill positions in management of natural resources for commodity and non-commodity multiple benefits. Graduates in forestry are prepared to be involved with evolving forestry systems, such as agroforestry and urban forestry. Wood processing industries, such as composite products, plywood, particle board, lumber, and pulp and paper offer professional opportunities in production, product development, quality control, and marketing.

With advanced graduate study, the range of professional job opportunities for a person with a B.S. in forestry is expanded. Opportunities include research and education as well as more specialized managerial and administrative positions with private firms and public agencies.

During fall semester of the second year of study (sophomore year, typically), forestry students are required to enroll in the department's integrated forestry modules consisting of:

FOR 201	Forest Biology	2
FOR 202	Sustainable Materials: Wood Utilization	2
FOR 203	Resource Measurements/Evaluation	2
FOR 204	Forest Ecosystem Decision-Making	2
FOR 205	Integrated Forestry Laboratory	3
FOR 206	Fall Forestry Camp	4

That semester, consisting entirely of forestry coursework, is designed to give students an early understanding of the many aspects of forestry and how they are interrelated. In addition to work in the classroom, students will spend time in laboratory and field work each week. A 3-week off-campus fall camp during the semester will reinforce concepts learned both in the classroom and during laboratory/field sessions. Transfer

students should check with the department for counsel on timing their completion of the integrated forestry modules.

Forestry Minor

The department offers a minor in forestry which can be earned by completion of a minimum of 15 credits in forestry courses. Students wishing to emphasize management and environmental aspects of forestry must select at least 15 credits from the following courses:

FOR 302	Silviculture	3
FOR 356	Dendrology	4
FOR 451	Forest Resource Economics and Quantitative Methods	4
FOR 452	Ecosystem Management	3
FOR 475	Urban Forestry	3
NREM 120	Introduction to Renewable Resources	3
NREM 301	Natural Resource Ecology and Soils	4
NREM 345	Natural Resource Photogrammetry and Geographic Information Systems	3
NREM 390	Fire Ecology and Management	3
NREM 407	Watershed Management	4

Sustainable materials science and technology emphasis: FOR 280 Wood Properties and Identification and an additional 12 credits from the following courses:

FOR 480	Wood Anatomy and Fiber Analysis	3
FOR 481	Conversion of Lignocellulosic Materials	3
FOR 483	Wood Deterioration and Preservation	3
FOR 485	Wood and Natural Fiber Composites	3
FOR 486	Drying Processes for Wood and Other Lignocellulosic Materials	3
FOR 487	Physical Properties of Wood	4
NREM 490B	Independent Study: Forestry	1-4

Curriculum in Forestry

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better):

English composition	6
Speech fundamentals	3

Total Credits 9

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
One of the following:		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 312	Biological Communication	
ENGL 314	Technical Communication	
SP CM 212	Fundamentals of Public Speaking	3

LIB 160	Information Literacy	1
Total Credits		13

Humanities and Social Sciences: 6 cr.

6 cr. from approved list.

Ethics: 3 cr.

3 cr. from approved list.

Life Sciences: 6 cr.

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
Approved life sciences course		3
Total Credits		7

Mathematics, Physical and Life Sciences: 22 cr.

MATH 140	College Algebra	3
MATH 150	Discrete Mathematics for Business and Social Sciences	3
STAT 101	Principles of Statistics	4
CHEM 163	College Chemistry	4
CHEM 163L	Laboratory in College Chemistry	1
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
AGRON 154	Fundamentals of Soil Science	3
Total Credits		22

Forestry: 29 cr.

NREM 104	Practical Work Experience	R
NREM 110	Orientation in Natural Resource Ecology and Management	1
NREM 120	Introduction to Renewable Resources	3
NREM 211	Careers in Natural Resources	1
FOR 201	Forest Biology	2
FOR 202	Sustainable Materials: Wood Utilization	2
FOR 203	Resource Measurements/Evaluation	2
FOR 204	Forest Ecosystem Decision-Making	2
FOR 205	Integrated Forestry Laboratory	3
FOR 206	Fall Forestry Camp	4
FOR 302	Silviculture	3
FOR 451	Forest Resource Economics and Quantitative Methods	4
FOR 454	Forestry Practicum	3
Total Credits		30

Electives: Students majoring in forestry are required to choose one of the following options at the end of their sophomore year: forest ecosystem management; sustainable material science and technology; urban and community forestry; natural resource conservation and restoration; or interpretation of natural resources.

Forest Ecosystem Management

BIOL 212	Principles of Biology II	3

* To complete degree program in 4 years students must maintain an average of 16 credits per semester.

** Initial math course is determined on the basis of high school math and placement test scores. A non-credit math course (MATH 10) may be required at additional course.

*** In scheduling coursework, students should pay particular attention to courses with limited offerings (e.g., offered only on alternate years) and to course sequences (i.e., where a course serves as a prerequisite for another course).

Not in addition to coursework listed above, students must complete departmental requirements for Practical Work Experience requirement (NREM 104). See

Genetics

Alan M. Myers, Chair, Genetics Major Committee

Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

Undergraduate Study

Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements.

Curriculum in Genetics - Requirements

Total Degree Requirement: 120 cr.

A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr.; up to 9 Pass-Not Pass cr. of free electives can be applied; a cumulative GPA of at least 2.0 is required for graduation. Program-approved lists can be found on the Genetics website.

1. Genetics and Life Sciences

A grade of C– or better is required in all Genetics and Life Science courses.

A. Courses required of all Genetics majors

GEN 110	Genetics Orientation	1
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
GEN 313	Principles of Genetics	3
GEN 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
BIOL 315	Biological Evolution	3

One of the following:

GEN 349	The Genome Perspective in Biology
GEN 444	Bioinformatic Analysis

GEN 322	Introduction to Bioinformatics and Computational Biology	
GEN 409	Molecular Genetics	3
GEN 410	Analytical Genetics	3
One of the following:		
GEN 462	Evolutionary Genetics	
EEOB 561	Evolutionary and Ecological Genomics	
EEOB 563	Molecular Phylogenetics	
GEN 491	Undergraduate Seminar	1
MICRO 302	Biology of Microorganisms	3
Total Credits		29

B. Course required of majors in the College of Agriculture and Life Sciences only

A minimum of 3 cr. of coursework in the area of environmental science from program approved list	3
Total Credits	3

2. Advanced Sciences Electives: 6 cr. from program approved list

A grade of C- or better is required in each course. No more than 3 cr. of GEN 490, 490R, 490H, 492, 496, 499, or 499H may be used to meet this requirement.

3. Mathematical Sciences

Complete at least one calculus course from MATH, minimum of 4 credits.

MATH 160	Survey of Calculus	
MATH 165	Calculus I	
MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	

Complete at least one course from STAT, minimum of 3 credits.

STAT 101	Principles of Statistics	3-4
STAT 104	Introduction to Statistics	

Complete at least one additional course from MATH or STAT, minimum of 4 credits.

MATH 166	Calculus II	
MATH 182	Calculus and Mathematical Modeling for the Life Sciences II	
STAT 301	Intermediate Statistical Concepts and Methods	
STAT 401	Statistical Methods for Research Workers	

Total Credits 11-12

4. Supporting Sciences

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 178L	Laboratory in College Chemistry II	1
CHEM 331	Organic Chemistry I	3
CHEM 331L	Laboratory in Organic Chemistry I	1
CHEM 332	Organic Chemistry II	3
CHEM 332L	Laboratory in Organic Chemistry II	1
PHYS 111	General Physics	5
or PHYS 221	Introduction to Classical Physics I	

PHYS 112	General Physics	5
or PHYS 222	Introduction to Classical Physics II	
Choose one of the following options		6-7

Option 1

BBMB 404	Biochemistry I	
And one of the following:		
BBMB 405	Biochemistry II	
BBMB 411	Techniques in Biochemical Research	
CHEM 211 & 211L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	
CHEM 325	Chemical Thermodynamics	

Option 2

BBMB 420	Mammalian Biochemistry	
And one of the following:		
BBMB 411	Techniques in Biochemical Research	
CHEM 211 & 211L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	
CHEM 325	Chemical Thermodynamics	

Total Credits 33-34

5. International Perspectives: 3 cr. from university approved list

This course can satisfy **both** the university requirement for International Perspectives and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

6. U.S. Diversity: 3 cr. from university approved list

This course can satisfy **both** the university requirement for U.S. Diversity and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

7. Communications/Library

A. Courses required of all Genetics majors

Grades of C or better are required in ENGL 150 and ENGL 250 and advanced writing.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
LIB 160	Information Literacy	1
One advanced English writing course from program approved list		3

Total Credits 10

B. Course required of majors in the College of Agriculture and Life Sciences only.

A grade of C or better is required by the college.

SP CM 212	Fundamentals of Public Speaking	3
or AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	

Total Credits 3

8. General Education electives

Courses from college approved lists that also appear on university approved lists of U.S. Diversity or International Perspectives courses can be used to satisfy both requirements.

A. College of Agriculture and Life Sciences

Humanities course from college approved list	3
Social Science course from college approved list	3
Ethics course from college approved list	3
Total Credits	9

B. College of Liberal Arts and Sciences

Humanities courses from college approved list; one of these should be a Science/Humanities bridge course from program approved list	12
Social Science courses from college approved list	9
Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level.	
Total Credits	21

Undergraduate Minor

The minor in Genetics may be earned by completing the following courses. At least 9 cr. must be used **only** to fulfill the requirements of the minor and not be applied to any other major, college, or university requirement.

GEN 313	Principles of Genetics	3
GEN 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
GEN 410	Analytical Genetics	3
GEN 409	Molecular Genetics	3
Two or more additional credits in Genetics at the 300 level or above.		2
Total Credits		15

Genetics, B.S.

Freshman

Fall	Credits Spring	Credits
ENGL 150 or 250	3 ENGL 250 or Humanity Choice	3
GEN 110	1 LIB 160	1

Total Credits: 118-127

Global Resource Systems

The Global Resource Systems undergraduate major employs a truly interdisciplinary and systemic approach to understanding complex global

resource issues. Students develop a core set of technical competencies in a resource area selected from the majors, minors and certificates offered by the College of Agriculture and Life Sciences. Students choose a world region in which to specialize, develop competency in a relevant world language, and participate in a significant cross-cultural immersion experience. They carry out a senior project related to their resource specialization within the context of the world region.

Multidisciplinary themes are developed in the context of the physical, biological and sociological factors affecting global resource systems. In this context, resource systems include agricultural (including crops, livestock and aquaculture), food, fuel, natural, environmental, biological, financial, governmental, institutional, human, knowledge, and other resources. Graduates of this program have transnational leadership skills and are successful integrators of various specializations on a team. They are skilled in applying a systemic perspective and developing solutions to complex global resource systems problems using innovativeness and creativity. Future professionals communicate effectively and demonstrate environmental awareness, exhibit an ethical perspective, and display clear analysis of how cultural diversity impacts work both here and abroad. They also recognize opportunities for learning after graduation.

A degree in Global Resource Systems opens the door to employment opportunities in the many businesses and organizations that require globally competent employees.

Curriculum in Global Resource Systems

Administered by a supervisory committee in the College of Agriculture and Life Sciences. Students choose a region of the world to develop an expertise; they choose a language to learn and develop proficiency through the intermediate level; they choose and possess an area of technical expertise by completing an additional major, minor or certificate program offered through the College of Agriculture and Life Sciences; they complete a required internship in an international setting; and they select and complete a senior research project with faculty mentoring.

Total Degree Requirement: 129 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

3 cr. from approved list 3

U.S. Diversity: 3 cr.

3 cr. from approved list 3

Communications Proficiency:

English composition (6 credits with a grade of C or higher; see courses below.)

Speech fundamentals (3 credits with a grade of C or higher; see courses below.)

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
SP CM 212	Fundamentals of Public Speaking	3
or AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	

ENGL 302	Business Communication	3
or ENGL 309	Proposal and Report Writing	
or ENGL 314	Technical Communication	
LIB 160	Information Literacy	1

Total Credits 13

Humanities and Social Sciences: 6 cr.

ECON 101	Principles of Microeconomics	3
or ECON 102	Principles of Macroeconomics	
Plus three credit hours from approved humanities list		3

Total Credits 6

Ethics: 3 cr.

3 cr. from approved list 3

Life Sciences: 7 cr.

BIOL 211	Principles of Biology I	4
& 211L	and Principles of Biology Laboratory I	
Plus 3 cr. from approved life sciences list at 300-level or higher		3

Mathematical Sciences: 6 cr.

MATH 140	College Algebra (or higher; except Math 195 or 196)	3
STAT 101	Principles of Statistics	3-4
or STAT 104	Introduction to Statistics	

Total Credits 6-7

Global Competency: 15-31 cr.

16 cr. of 100 and 200 level of a single WLC language; 15 cr. in global competency courses from an approved list with up to 3 cr. may be earned from a travel course.

Physical Sciences: 8 cr.

One of the following: 5

CHEM 163	College Chemistry	
& 163L	and Laboratory in College Chemistry	
or CHEM 177	General Chemistry I	
& 177L	and Laboratory in General Chemistry I	

One course from the following: 3

AGRON 154	Fundamentals of Soil Science	
or AGRON 155	Soils for Horticultural Scientists	
AGRON 206	Introduction to Weather and Climate	
AGRON 260	Soils and Environmental Quality	
AGRON 406	World Climates	
GEOL 101	Environmental Geology: Earth in Crisis	
GEOL 160	Water Resources of the World	

Total Credits 8

Global Resource Systems: 23 cr.

GLOBE 110	Orientation	1
3 credits of GLOBE 211		3

GLOBE 211	Issues in Global Resource Systems (Each offering is 1 cr., must be repeated for 3 cr.)	
GLOBE 201	Global Resource Systems	3
GLOBE 301	Resource Systems of Industrialized Nations	3
GLOBE 302	Resource Systems of Developing Nations	3
GLOBE 320	Global Resource Systems Internship Preparation	1
GLOBE 401	Senior Project	3
GLOBE 402	Responses to Global Resource System Challenges	3
One of the following:		3-6
GLOBE 321	Internship - Global	
GLOBE 322	Internship - United States	
Total Credits 23-26		

Technical Concentration: 15-18 cr.

Satisfied by any of the majors, minors or certificates offered through the College of Agriculture and Life Sciences.

Electives:

Sufficient coursework to ensure a total of not less than 129 credits

Horticulture

To meet the educational needs of a student population with interests ranging from the biology of plants to landscape design/installation to fruit and vegetable production to golf course construction and management, considerable flexibility is built into the horticulture curriculum. The diversity of interests and need for flexibility are reflected in the impressive array of horticulture courses.

The Department of Horticulture offers six options within the horticulture major:

1. Greenhouse Plant Production
2. Horticultural Food Crop Production and Management
3. Landscape Design, Installation, and Management
4. Public Horticulture
5. Horticulture Research
6. Turfgrass Management

Graduates possess the technical knowledge and skills to become professional horticulturists. They understand principles of life science, plant growth and development, and are familiar with cultural and management principles for a wide assortment of horticultural crops. They are able to work and communicate effectively with fellow horticultural professionals and other citizens who share an interest in horticulture. Graduates also understand the ethical and environmental dimensions of problems and issues facing horticultural professionals.

A degree in horticulture opens the door to employment opportunities with production nurseries, seed companies, interior landscaping firms, greenhouses, garden centers, conservatories, landscape design/installation firms, public gardens and arboreta, orchards and vineyards, food processing companies, vegetable farms, golf courses, sports fields, sod production companies, and lawn care businesses. Several allied plant-science industries also provide employment opportunities in the areas of sales, management, and communication. Opportunities exist for careers in research, teaching, extension, and business after obtaining advanced training in graduate school.

Minors

The Department of Horticulture offers two minors: 1) Horticulture and 2) Landscape Management. Both minors are earned by taking HORT 221 Principles of Horticulture Science plus 12 additional credits with a maximum of 3 credits at the 200-level and a minimum of 9 credits at the 300-level or above.

The Horticulture minor is a broad-based minor that does not focus within a specific area of horticulture. The 12 additional credits for this minor can be selected from the full list of Horticulture courses.

The Landscape Management minor focuses on landscape management including plant selection, landscape installation and management, and turfgrass management. The 12 additional credits for this minor can be selected from the following courses: HORT 240 Trees, Shrubs, and Woody Vines for Landscaping, HORT 281 Landscape Graphics, HORT 330 Herbaceous Ornamental Plants, HORT 341 Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs, HORT 342 Landscape Plant Installation, Establishment, and Maintenance, HORT 351 Turfgrass Establishment and Management or HORT 444 Landscape Construction Management.

Visit our departmental website at www.hort.iastate.edu (<http://www.hort.iastate.edu>).

Curriculum in Horticulture

Students majoring in horticulture will select an option in which to specialize before reaching junior standing and will fulfill the requirements described below under Options.

The Department of Horticulture offers two minors: 1) Horticulture and 2) Landscape Management. The requirements appear under Horticulture, Courses and Programs.

Total Degree Requirement: 129 credits (cr.)

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Biological Sciences: 18 cr.

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
Select fourteen credit hours from the following:		14
AGRON 217	Weed Identification	
AGRON 260	Soils and Environmental Quality	
AGRON 316	Crop Structure-Function Relationships	
AGRON 317	Principles of Weed Science	
AGRON 354	Soils and Plant Growth	
AGRON 354L	Soils and Plant Growth Laboratory	
BIOL 212	Principles of Biology II	
BIOL 212L	Principles of Biology Laboratory II	
BIOL 312	Ecology	
BIOL 313 & 313L	Principles of Genetics and Genetics Laboratory	
or GEN 320	Genetics, Agriculture and Biotechnology	
BIOL 314	Principles of Molecular Cell Biology	
BIOL 355	Plants and People	
BIOL 366	Plant Systematics	
BIOL 430	Principles of Plant Physiology	
BIOL 454	Plant Anatomy	
BIOL 474	Plant Ecology	
ENT 201	Introduction to Insects	
ENT 211	Insects and Society	
ENT 370	Insect Biology	
ENT 375	Plant Protection Using Natural Enemies	

ENT 376	Fundamentals of Entomology and Pest Management	
FOR 416	Forest Insects and Diseases	
FOR 416L	Forest Insects and Diseases Laboratory	
PL P 408	Principles of Plant Pathology	

Total Credits 18

Communications Proficiency (with a grade of C or better)

6 credits of English composition (see approved courses below)

3 credits of speech fundamentals (see approved courses below)

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGL 314	Technical Communication	3
or ENGL 302	Business Communication	
LIB 160	Information Literacy	1
One of the following:		3

Mathematical Sciences: 6 cr.

Select one course from the following: 3

MATH 140	College Algebra	
MATH 150	Discrete Mathematics for Business and Social Sciences	
MATH 165	Calculus I	

MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	
AND select one of the following:		3
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
STAT 226	Introduction to Business Statistics I	
STAT 301	Intermediate Statistical Concepts and Methods	
STAT 401	Statistical Methods for Research Workers	
Total Credits		6

Physical Sciences: 11 cr.

Complete one of the following:		5
CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	
or CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	
AND complete one course from the following:		3-4
AGRON 259	Organic Compounds in Plants and Soils	
BBMB 221	Structure and Reactions in Biochemical Processes	
CHEM 178 & 178L	General Chemistry II and Laboratory in College Chemistry II	
CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	
CHEM 331 & 331L	Organic Chemistry I and Laboratory in Organic Chemistry I	
PHYS 101	Physics for the Nonscientist	
PHYS 111	General Physics	
PHYS 115	Physics for the Life Sciences	
AND complete one course from the following:		3-5
BBMB 221	Structure and Reactions in Biochemical Processes	
CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	
CHEM 331 & 331L	Organic Chemistry I and Laboratory in Organic Chemistry I	
Total Credits		11-14

Horticultural Sciences: Minimum of 30 cr.

HORT 110	Professional and Educational Development in Horticulture.	1
HORT 221	Principles of Horticulture Science	3
HORT 321	Horticulture Physiology	3
HORT 445	Horticulture Management and Administration	2
Select 21 cr. hours from courses within selected option.		21
Total Credits		Minimum of 30

Soil Sciences: 3 cr.

AGRON 154	Fundamentals of Soil Science	3
or AGRON 155	Soils for Horticultural Scientists	
Total Credits		3

Electives

No more than 4 cr. of Hort 490 may count toward graduation.

Options

Greenhouse Plant Production

The following courses are required to meet the Horticulture requirement:

HORT 240	Trees, Shrubs, and Woody Vines for Landscaping	3
HORT 322	Plant Propagation	3
HORT 330	Herbaceous Ornamental Plants	3
HORT 331	Hydroponic Food Crop Production	3
HORT 332	Greenhouse Operation and Management	4
HORT 434	Fall Greenhouse Crop Production	3
HORT 435	Spring Greenhouse Crop Production	3

Other recommended courses are:

HORT 376	Field Production of Horticultural Crops	
HORT 391	Horticultural Management Experience	
HORT 424	Sustainable and Environmental Horticulture Systems	
HORT 442	Nursery Production and Garden Center Management	

Required for option:

ACCT 284	Financial Accounting	3
----------	----------------------	---

And select 9 cr. hours from the following: 9

ACCT 215	Legal Environment of Business	
ACCT 285	Managerial Accounting	
ACCT 316	Business Law	
AGRON 206	Introduction to Weather and Climate	
COM S 103	Computer Applications	
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	
ECON 230	Farm Business Management	
ECON 234	Small Business Management	
ECON 334	Entrepreneurship in Agriculture	
ENV S 461I	Introduction to GIS

MGMT 313	Feasibility Analysis and Business Planning	
MGMT 370	Management of Organizations	
MGMT 371	Organizational Behavior	
MKT 340	Principles of Marketing	
MKT 442	Sales Management	
MKT 446	Retailing	
MKT 447	Consumer Behavior	
TSM 270	Principles of Injury Prevention	

Horticultural Food Crop Production and Management

The following courses are required to meet the Horticulture requirement:

HORT 276	Understanding Grape and Wine Science	3
HORT 376	Field Production of Horticultural Crops	3
HORT 461	Fruit Crop Production and Management	3
HORT 471	Vegetable Production and Management	2
HORT 471L	Vegetable Production and Management Lab	1

Other recommended courses:

HORT 322	Plant Propagation	
HORT 331	Hydroponic Food Crop Production	
HORT 332	Greenhouse Operation and Management	
HORT 338	Seed Science and Technology	
HORT 391	Horticultural Management Experience	
HORT 484	Organic Agricultural Theory and Practice	
Required for option:		
ACCT 284	Financial Accounting	3
And select 9 cr. hours from the following:		
ACCT 215	Legal Environment of Business	
ACCT 285	Managerial Accounting	
ACCT 316	Business Law	
COM S 103	Computer Applications	
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics

ENV S 382	Environmental Sociology	
ENV S 491	Environmental Law and Planning	
FS HN 403	Food Laws, Regulations, and the Regulatory Process	
FS HN 405	Food Quality Assurance	
FS HN 471	Food Processing I	
FS HN 472	Food Processing II	
MGMT 310	Entrepreneurship and Innovation	
MGMT 313	Feasibility Analysis and Business Planning	
MGMT 370	Management of Organizations	
MGMT 371	Organizational Behavior	
MKT 340	Principles of Marketing	
MKT 442	Sales Management	
MKT 446	Retailing	
MKT 447	Consumer Behavior	
TSM 270	Principles of Injury Prevention	
TSM 324	Soil and Water Conservation Management	

Horticulture Research

The following courses are required for this option:

AGEDS 312	Science With Practice	3
HORT 322	Plant Propagation	3
Biological Sciences:		
BIOL 430	Principles of Plant Physiology	3
Other recommended course:		
HORT 391	Horticultural Management Experience	
Mathematical Sciences Requirement:		
MATH 165	Calculus I	
or MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	
MATH 166	Calculus II	
or MATH 182	Calculus and Mathematical Modeling for the Life Sciences II	

Physical Sciences Requirement:

BBMB 301	Survey of Biochemistry	
or BBMB 404	Biochemistry I	
CHEM 177	General Chemistry I	
CHEM 177L	Laboratory in General Chemistry I	
CHEM 178	General Chemistry II	
CHEM 178L	Laboratory in College Chemistry II	
CHEM 331	Organic Chemistry I	
CHEM 331L	Laboratory in Organic Chemistry I	
CHEM 332	Organic Chemistry II	
CHEM 332L	Laboratory in Organic Chemistry II	
PHYS 111	General Physics	
& PHYS 112	and General Physics	
And select 5 cr. hours from the following:		
BBMB 404	Biochemistry I	
BBMB 405	Biochemistry II	
BBMB 411	Techniques in Biochemical Research	
BIOL 313	Principles of Genetics	
BIOL 313L	Genetics Laboratory	
BIOL 314	Principles of Molecular Cell Biology	
BIOL 315	Biological Evolution

Landscape Design, Installation and Management

The following courses are required to meet the Horticulture requirement:

HORT 240	Trees, Shrubs, and Woody Vines for Landscaping	3
HORT 281	Landscape Graphics	2
HORT 330	Herbaceous Ornamental Plants	3
HORT 341	Woody Plant Cultivars: Shade Trees, Ornamental Trees and Woody Shrubs	2
HORT 342	Landscape Plant Installation, Establishment, and Maintenance	3
HORT 351	Turfgrass Establishment and Management	3
HORT 380	Principles of Garden Composition	2
HORT 381	Beginning Garden Composition Studio	2
HORT 444	Landscape Construction Management	3
HORT 481	Advanced Garden Composition	2
Other recommended courses are:		
HORT 322	Plant Propagation	
HORT 332	Greenhouse Operation and Management	
HORT 391	Horticultural Management Experience	

HORT 442	Nursery Production and Garden Center Management	
Required for option:		
ACCT 284	Financial Accounting	3
And select 9 cr. hours from the following: 9		
ACCT 215	Legal Environment of Business	
ACCT 285	Managerial Accounting	
ACCT 316	Business Law	
COM S 103	Computer Applications	
ECON 234	Small Business Management	
ECON 334	Entrepreneurship in Agriculture	
MGMT 310	Entrepreneurship and Innovation	
MGMT 313	Feasibility Analysis and Business Planning	
MGMT 370	Management of Organizations

Graduate Study

The graduate major in horticulture leads to the M.S. (thesis and non-thesis option) and Ph.D. Some faculty members of the department serve as major professors for students in interdepartmental graduate majors in plant biology; genetics and genomics; molecular, cellular, and developmental biology; ecology and evolutionary biology; sustainable agriculture; and environmental science.

Graduates possess a broad understanding of horticulture and the allied plant sciences. They are able to communicate effectively with members of the scientific community, industry groups, and other interested citizens. They are experienced in conducting research and communicating the results from that research. They are capable of addressing and solving complex problems that confront the many horticultural, agricultural, and plant science professions. They also understand the ethical, legal, social, and environmental issues associated with modern agricultural/horticultural practices.

Industrial Technology

Administered by the Department of Agricultural and Biosystems Engineering.

An undergraduate certificate in occupational safety is available; the requirements appear under Technology Systems Management courses and programs. A minor in Industrial Technology is available; the requirements appear under Technology Systems Management.

Students majoring in Industrial Technology choose between two options: Manufacturing or Occupational Safety.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Communications Proficiency:

6 cr. of English composition with a C or better and 3 cr. of speech fundamentals with a C or better.

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1

One of the following: **3**

ENGL 302	Business Communication
ENGL 309	Proposal and Report Writing
ENGL 314	Technical Communication

AGEDS 327	Advanced Communications for Agriculture and Life Sciences

Minor - Industrial Technology

The Department of Agricultural and Biosystems Engineering offers a minor in industrial technology which may be earned by completing a minimum of 18 credits of technology systems management courses, which includes:

TSM 115	Solving Technology Problems	3
TSM 210	Fundamentals of Technology	3
9 credits from:		
TSM 216	Advanced Technical Graphics, Interpretation, and CAD	
TSM 240	Introduction to Manufacturing Processes	
TSM 270	Principles of Injury Prevention	
TSM 310	Total Quality Improvement	
TSM 337	Fluid Power Systems Technology	
TSM 340	Advanced Automated Manufacturing Processes	
TSM 363	Electric Power and Electronics for Agriculture and Industry	
TSM 370	Occupational Safety	
TSM 372	Legal Aspects of Occupational Safety and Health	

TSM 440	Cellular Lean Manufacturing Systems
TSM 443	Statics and Strength of Materials for Technology
TSM 444	Facility Planning
TSM 465	Automation Systems
TSM 470	Industrial Hygiene: Physical, Chemical, and Biological Hazards
TSM 471	Safety Laboratory
TSM 477	Risk Analysis and Management

- At least six (6) credits of 300-level or higher TSM classes (from the courses listed above)
- At least nine (9) credits that are not used to meet any other department, college, or university requirement.

Total Credits**15**

For the undergraduate curriculum in agricultural systems technology leading to the degree of bachelor of science or for the undergraduate curriculum in industrial technology leading to the degree of bachelor of science.

The department also offers an undergraduate curricula and courses in agricultural engineering, biological systems engineering.

International Agriculture Interdepartmental Undergraduate Program

The international agriculture program provides opportunities to develop knowledge and skills related to the factors that interact to impact agricultural and environmental issues, production, processes, distribution and utilization worldwide. The program puts emphasis on international experience through structured internships and study abroad. The international agriculture program is appropriate for students seeking positions that require knowledge and experience related to global agricultural issues and their impact on local, regional, national and international policies and practices. Students preparing for careers in the following areas will benefit from the international agriculture program; governmental and non-governmental development agencies, agribusinesses, educational institutions, and non-profit assistance agencies. Outcomes from participation in this program include developing an awareness for the role of international agriculture in the career development process, analyzing international agricultural issues and policies, acquiring skills for solving problems in international development and agribusiness and experiencing real situations and gaining perspectives about agriculture in a global setting.

Secondary Major

International agriculture is an undergraduate secondary major that may be taken only in conjunction with a primary major in an agriculture and life sciences curriculum. Students choosing international agriculture will strengthen their career placement with a business or agency involved in international activities. Technical knowledge of a primary major discipline will be strengthened by a global awareness of agriculture and life sciences. A secondary major in international agriculture will give students practical insight into the role of agriculture in a world of increasing food and fiber needs. It is ideal for those who wish to broaden their international perspective or prepare for international work in agriculture. The secondary major includes an emphasis on international internship or study abroad and/or foreign languages, and selection of appropriate

courses (from an approved list) to meet the needs and interests of the student.

Courses for the secondary major include AGRON 342 World Food Issues: Past and Present; six credits of study abroad, travel, or language courses or any combination thereof; and six credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Fifteen credits of the secondary major cannot be used to meet requirements of the major or any other college or university requirement.

Students interested in earning a secondary major in international agriculture must contact a program adviser. The early indication of an interest in international agriculture allows for effective integration of the secondary major course requirements with those of the primary major.

Minor

A minor in international agriculture is available to interested students regardless of their major. Students selecting the minor should have at least minimal familiarity with agriculture and life sciences and agricultural systems.

Courses for the minor include AGRON 342 World Food Issues: Past and Present; 3 to 6 credits of study abroad and/or foreign language and 3 to 6 credits in selected international agriculture courses in the College of Agriculture and Life Sciences. Nine credits of the 15 credit total for the minor can not be used for meeting requirements for the major.

For more information about a secondary major or minor in international agriculture, see descriptions in the designated departments or the supervisory committee.

For more information about courses for either a secondary major or a minor in international agriculture, see descriptions in the designated departments.

Curriculum in International Agriculture

Administered by an Interdepartmental Committee. International agriculture can be taken only as a secondary major in conjunction with a primary major in the College of Agriculture and Life Sciences. A minor is available to interested students regardless of their major.

15 cr. of this major cannot be used to meet requirements of the primary major or any other college or university requirements.

6 cr. from Internship in International Agriculture or Study Abroad or World Languages and Cultures; AGRON 342 World Food Issues: Past and Present; credits from approved International Agriculture Courses to total 15 cr.

Microbiology

Interdepartmental Undergraduate Major

Undergraduate study for the bachelor of science degree with a major in microbiology. In the Microbiology curriculum, principal emphasis is placed on understanding microorganisms and their interrelationships with other organisms in nature, the application of microbiology in medicine, agriculture and industry, and the study of fundamental life processes as exemplified by microorganisms. Areas of emphasis include: medical microbiology; environmental and industrial microbiology; and food microbiology.

Graduates of the Interdepartmental Undergraduate Microbiology Program will learn about the diversity and complexity of microbial life represented

by procaryotes, eucaryotes and viruses. In addition to being able to explain fundamental principles of microbial growth, physiology, genetics, biochemistry, and ecology, students will be able to evaluate the impact that the microbial world has on human, animal and plant health, as well as on environmental quality, industry and biotechnology. Graduates are able to design and implement experimental approaches to address specific questions. In addition, graduates are able to communicate scientifically, using a variety of media.

Students graduating in microbiology find career opportunities in a wide variety of areas including: hospital and clinical laboratories; federal, state, and local government agencies; research and development; dairy and food processing industries; and the pharmaceutical and fermentation industries. Some fields of microbiology, especially advanced research, may require further training. Undergraduate work in the program is designed to provide sound preparation for graduate study, training for bachelors-level employment, and admission to professional programs such as medicine, veterinary medicine and dentistry.

Preveterinary preparation may be accomplished through the curriculum major in this program (see College of Veterinary Medicine, Admission Requirements).

Curriculum in Microbiology

www.micro.iastate.edu (<http://www.micro.iastate.edu>)

Administered by an interdepartmental committee.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Electives: 7-12

Communications Proficiency:

English composition - with a C or better	6
Speech fundamentals - with a C or better	3

Communication/Library:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3

Total Credits: 129-130

Minor

The program offers a minor in microbiology which may be earned by accumulating a minimum of 15 credits of microbiology courses.

Graduate Study

The program offers work for the degrees master of science and doctor of philosophy in microbiology and for a minor for students majoring in other programs. The interdepartmental microbiology major is offered through faculty housed in twelve departments, including Agronomy; Animal Science; Biochemistry, Biophysics and Molecular Biology; Civil, Construction and Environmental Engineering; Entomology; Food Science and Human Nutrition; Genetics, Developmental and Cell Biology; Geological and Atmospheric Sciences; Plant Pathology and Microbiology; Veterinary Diagnostic and Production Animal Medicine; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology. Faculty coordinate graduate education and research in a wide range of topics fundamental to the discipline of microbiology. Specific information about individual faculty and their research areas is available at www.micrograd.iastate.edu. (<http://www.micrograd.iastate.edu>)

Prerequisites to graduate study include a sound undergraduate background in chemistry, mathematics and biology, including microbiology and genetics.

Graduates in the Microbiology Graduate program have a broad-based knowledge in the fundamentals of microbiology as well as advanced knowledge in specific areas as determined by their areas of research focus. Students completing the thesis have the technical, research, critical-thinking, problem-solving, and computer skills to design, implement, and conduct research using a variety of current techniques and equipment. They are also able to communicate research results effectively with scientific peer groups in both oral and written formats.

Nutritional Science (AGLS)

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are two options in nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. The nutrition and wellness option prepares students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness.

The department also offers a nutrition minor.

Administered by the Department of Food Science and Human Nutrition**Pre-Health Professional and Research Option****Total Degree Requirement: 120 cr.**

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.**U.S. Diversity: 3 cr.****Communications and Library: 13 cr.**

Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation.

Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

Seed Science

Administered by the Departments of Agricultural and Biosystems Engineering, Agronomy, Horticulture, and Plant Pathology. Must be taken as a secondary major in conjunction with a primary major. The seed science program is designed for students with career interests in one or more aspects of the seed industry. Areas of study include: seed production, conditioning, pathology, physiology, quality control, and marketing, as well as seed plant designs.

Communication and Library: 9 cr.

ENGL 302	Business Communication	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3
or SP CM 312	Business and Professional Speaking	

Biological Sciences: 20 cr.

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
BIOL 313	Principles of Genetics	3
or GEN 320	Genetics, Agriculture and Biotechnology	
ENT 376	Fundamentals of Entomology and Pest Management	3

PL P 408	Principles of Plant Pathology	3
AGRON 317	Principles of Weed Science	3

Physical Sciences: 12-14 cr.

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	5
CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	5

One of the following:

AGRON 259	Organic Compounds in Plants and Soils	3
BBMB 221	Structure and Reactions in Biochemical Processes	3
CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	4

One of the following:

CHEM 178 & 178L	General Chemistry II and Laboratory in College Chemistry II	4
PHYS 111	General Physics	5
PHYS 115	Physics for the Life Sciences	4

Mathematical Sciences 6-8 cr.

MATH 140	College Algebra	3
STAT 101 or STAT 104	Principles of Statistics or Introduction to Statistics	4

Demonstration of computer proficiency or course in Computer Science.

Agricultural Sciences: 21 cr.

AGRON 114	Principles of Agronomy	3
or HORT 221	Principles of Horticulture Science	
AGRON 154	Fundamentals of Soil Science	3
AGRON 206	Introduction to Weather and Climate	3
AGRON 354	Soils and Plant Growth	3
6 credits from AGRON or HORT		6
3 credits from TSM		3

Economics and Business: 9 cr.

ECON 101	Principles of Microeconomics	3
ECON 235	Introduction to Agricultural Markets	3
Three credit hours from the following:		3

ACCT 284	Financial Accounting	
ECON 102	Principles of Macroeconomics	
ECON 230	Farm Business Management	
ECON 336	Agricultural Selling	
MGMT 370	Management of Organizations	
MKT 340	Principles of Marketing	

Seed Science: 9-10 cr.

AGRON 338	Seed Science and Technology	3
AGRON 421	Introduction to Plant Breeding	3
AGRON 491	Seed Science Internship Experience	1-2
2 credits from 300-400 level from AGRON, PL P, TSM, or HORT		2

Typical Program for the First Year

Because seed science is a secondary major, the courses taken by the student during the first year will vary, depending on the primary major (see typical program for the primary major).

Sustainable Agriculture

Interdepartmental Graduate Major

The Sustainable Agriculture interdepartmental major is offered through faculty in 21 departments – Agricultural and Biosystems Engineering; Agricultural Education and Studies; Agronomy; Animal Science; Anthropology; Civil, Construction and Environmental Engineering; Community and Regional Planning; Ecology, Evolution and Organismal Biology; Economics; Entomology; Food Science and Human Nutrition; Horticulture; Industrial and Manufacturing Systems Engineering; Journalism and Mass Communication; Landscape Architecture; Mechanical Engineering; Natural Resource Ecology and Management; Plant Pathology; Political Science; Sociology; and Veterinary Diagnostic and Production Animal Medicine. Faculty in these departments cooperate to offer courses and direct research leading to M.S. and Ph.D. degrees with a major in Sustainable Agriculture.

The Sustainable Agriculture major is designed to balance depth in disciplinary knowledge and perspectives with broader, systems-level thinking. It integrates technical and social sciences through a sequence of team-taught interdisciplinary core courses emphasizing higher-order critical thinking skills and active, collaborative approaches to learning. Students learn agroecological principles, study social relations underlying sustainable farming and food systems, and gain experience with practical techniques of sustainable agriculture.

Applicants applying to the MS program must have a bachelor's degree in one of the life, social, or engineering sciences, or a bachelor's degree plus equivalent experience in these areas. Applicants applying to the PhD program must have a master's degree and either an undergraduate or master's degree in one of the majors in the College of Agriculture and Life Sciences or its equivalent.

Graduates of the program will be able to design and manage agricultural systems that increase food security, enhance human communities, and protect environmental quality. Graduates of the program are qualified to work in a variety of settings, including university research, education, extension, agribusiness, governmental and non-governmental organizations, and farming.

Information on application procedures (<https://susag.iastate.edu/admissions>), curriculum requirements (<https://susag.iastate.edu/academics>), and faculty research areas (<https://susag.iastate.edu/dir/faculty>) is available on the Sustainable Agriculture website (<https://susag.iastate.edu>).

Technology Systems Management Undergraduate Study

The Department of Agricultural and Biosystems Engineering offers work for the bachelor of science degree with majors in agricultural systems technology and industrial technology.

Missions

The mission of the Agricultural Systems Technology program is to prepare women and men for careers that integrate and apply agricultural and biosystems engineering technology to manage human and natural resource systems for producing, processing, and marketing food and other biological products worldwide.

The mission of the Industrial Technology is to prepare women and men for careers that integrate and apply industrial technology to lead and manage human, manufacturing, and safety systems.

Objectives

At two to five years after undergraduate graduation, through the professional practice in technology, graduates should:

1. Have demonstrated competence in methods of analysis involving use of mathematics, fundamental physical and biological sciences, technology, and computation needed for the professional practice in the field of agricultural systems technology or industrial technology.
2. Have developed skills necessary to contribute to the design process; including the abilities to think creatively, to formulate problem statements, to communicate effectively, to synthesize information, and to evaluate and implement problem solutions.
3. Be capable of addressing issues of ethics, safety, professionalism, cultural diversity, globalization, environmental impact, and social and economic impact in professional practice.
4. Have demonstrated continuous professional and technical growth, with practical experience, so as to be licensed in their field or achieve that level of expertise, as applicable.
5. Have demonstrated the ability to:
 - a. be a successful leader of multi-disciplinary teams.
 - b. efficiently manage multiple simultaneous projects.
 - c. work collaboratively.
 - d. implement multi-disciplinary systems-based solutions.
 - e. to apply innovative solutions to problems through the use of new methods or technologies.
 - f. contribute to the business success of their employer, and
 - g. build community.

Outcomes

At the time of graduation, students of the Agricultural Systems Technology or Industrial Technology programs should have:

- a) an ability to apply knowledge of mathematics, science, technology, and applied sciences;
- b) an ability to design and conduct experiments, as well as to analyze and interpret data;
- c) an ability to formulate or design a system, process or program to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- d) an ability to function on multi-disciplinary teams;
- f) an understanding of professional and ethical responsibility;
- g) an ability to communicate effectively;
- h) the broad education necessary to understand the impact of solutions in a global, economic, environmental, and societal context;

i) a recognition of the need for, and an ability to engage in life-long learning;

j) a knowledge of contemporary issues; and

k) an ability to use the techniques, skills, and modern scientific and technical tools necessary for professional practice.

Graduates have developed and demonstrated workplace competencies, and have completed a professional internship. They are able to communicate effectively, have problem-solving skills and awareness of global, economic, environmental and societal issues.

Agricultural Systems Technology graduates have the ability to apply science and technology to problems related to agriculture; they manage complex agricultural systems for sustainability. They find careers within a variety of agriculturally-related industries, businesses, and organizations, including: agricultural machinery, environment, government, farm builders, grain, feed, seed, fertilizer, chemical, food, biorenewable resources, and production agriculture.

Industrial Technology graduates understand commonly-used manufacturing processes, lean manufacturing principles, continuous improvement, quality management, safety, regulatory issues affecting manufacturing, and the properties of manufacturing materials. They find careers within a variety of industries, businesses, and organizations focusing in manufacturing (e.g., quality control, production supervision, and process and facility planning) or occupational safety (e.g., development, management, and evaluation of safety programs and systems; and hazard identification and mitigation).

Graduate Study

The department offers work for the degrees master of science, and doctor of philosophy with a major in industrial and agricultural technology. It cooperates in the interdepartmental programs in professional agriculture, sustainable agriculture, environmental sciences, biorenewable resources and technology, and human computer interaction.

The master's program prepares advanced practicing professionals for industrial and/or agricultural technology positions in industry, business, and public service; it also provides a sound foundation for further graduate study. The doctoral program prepares exemplary industrial and/or agricultural technology professionals for learning, discovery, engagement, and leadership roles in education, industry, business, and public service organizations.

The department also offers work for the degrees master of science, master of engineering, and doctor of philosophy with a major in agricultural engineering. See College of Engineering, Curricula.

Visit our departmental website at www.abe.iastate.edu (<http://www.abe.iastate.edu>)

Certificate in occupational safety

The Department of Agricultural and Biosystems Engineering offers an undergraduate certificate in occupational safety (<http://www.abe.iastate.edu/undergraduate-students/industrial-technology/certificate-in-occupational-safety>) which may be earned by completing a minimum of 20 credits of technology systems management courses, which includes:

TSM 270	Principles of Injury Prevention	3
TSM 370	Occupational Safety	3
TSM 371	Occupational Safety Management	2
TSM 372	Legal Aspects of Occupational Safety and Health	2
TSM 470	Industrial Hygiene: Physical, Chemical, and Biological Hazards	3
6 credits from a departmentally approved list		6
TSM 493D	Workshop in Technology: Occupational Safety (Note: This course needs to be the last course taken toward completion of the Occupational Safety Certificate)	1-4

Food Science and Human Nutrition

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These majors include:

- Culinary science
- Dietetics
- Diet and exercise
- Food science
- Nutritional science

Visit the department web site at: www.fshn.hs.iastate.edu (<http://www.fshn.hs.iastate.edu>).

Undergraduate Study

Culinary Science

Culinary science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internship experience in the food industry or culinary business is required. Culinary science graduates are qualified to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales.

Dietetics

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor's and Master's degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited dietetics internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) and to practice in the field of dietetics. There is a \$30 fee for a statement of verification of completion of the DPD.

For information about verification statements policies, see the dietetics program website: <http://www.fshn.hs.iastate.edu/undergraduate-programs/dietetics/>.

Students interested in pursuing the dietetics program enter the university designated as pre-dietetics students. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, completion of application and demonstrated interest in becoming a registered dietitian. Upon admission, students progress toward earning a Bachelor of Science degree in dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship. The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs.

A program for concurrent Bachelor of Science and Master of Science (BS/MS) degrees in diet and exercise (<http://www.fshn.hs.iastate.edu/undergraduate-programs/diet-exercise>) is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as pre-diet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not accepted into the program can continue toward completion of the BS degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of BS/MS degrees in diet and exercise.

Food Science

Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also work in government regulatory agencies and academic institutions.

Two options are available in food science: food science and technology and food science and industry. Both options are approved by the Institute of Food Technologists, the national professional organization of food science. Career options include quality control/assurance; production supervision; management and sales; research careers in the food industry, government, or academia; business; journalism; food product formulation and recipe development; food promotion and communication; and consumer services in government and industry. Students who have an interest in graduate study or research are encouraged to select the food science and technology option. Students who wish to combine education in engineering with food science may

select additional courses in chemical or agricultural engineering. Double majors are available and may require an additional year.

Students in food science have the opportunity to pursue a Master of Business Administration (<http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science>) (MBA) concurrently with the Bachelor of Science (BS) degree in food science. The program is designed so students can earn both the BS in food science and MBA in five years, to meet the needs of students who are interested in management careers in the food industry. Students apply for admission to the MBA program in the spring of the third year. The program for concurrent BS in food science/MBA degrees is a rigorous 5-year program, and admission is very selective.

Nutritional Science

Nutritional science offers two options: pre-health professional & research and nutrition & wellness. The pre-health professional & research option can serve as a pre-professional program for medicine, dentistry, veterinary medicine, or for graduate study in nutrition or other biological sciences. Students in the pre-health professional & research option gain a strong basic science education along with human nutrition expertise that enables them to attain the knowledge and skills necessary to work in research laboratories of colleges and universities, government agencies, industries, and foundations. Students in the nutrition & wellness option will learn about the role of nutrition and healthy eating for disease prevention and wellness with an emphasis on nutrition education for the public and community agencies as well as effective program planning and evaluation. Graduates will be prepared for employment opportunities in community and state agencies, nonprofit organizations and health promotion enterprises, or public health and related programs.

Departmental Learning Outcomes

Students graduating with degrees in culinary science, dietetics, diet and exercise, food science, or nutritional science will be able to: 1) demonstrate a high level of technical competence in their chosen field, perform successfully in a graduate program, supervised practice program or entry-level professional position; 2) communicate effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 6) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field.

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

Minors - Undergraduate

The department offers coursework for a variety of minors (<http://www.fshn.hs.iastate.edu/undergraduate-programs/minors>). Minors available include:

- culinary science
- food safety (interdepartmental minor)
- food science

- nutrition
- food and society

All minors have the following requirements:

- At least 15 credits must be taken, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.
- The minor must include at least 9 credits that are not used to meet any other college or university requirement.
- The same courses may not be applied to two different minors.

Prerequisites: Students must complete prerequisite requirements for courses included in the minor.

Graduate Study

The Food Science and Human Nutrition (FSHN) Department offers coursework for the degrees master of science and doctor of philosophy. Degree options include:

- food science and technology (<http://www.fshn.hs.iastate.edu/graduate-program/food-science-technology>) (MS and PhD)
- meat science (<http://www.ans.iastate.edu/section/meat/?pg=degree>) (MS and PhD; co-major in animal science)
- nutritional sciences (<http://www.fshn.hs.iastate.edu/graduate-program/nutritional-sciences>) (MS and PhD; interdepartmental graduate program)
- family and consumer sciences/dietetics (<http://www.fshn.hs.iastate.edu/graduate-program/mfcs-dietetics>) (MS only)
- diet and exercise (<http://www.hs.iastate.edu/academics/majors-list/diet-and-exercise>) (BS/MS)
- nutritional sciences (BS/MS)

Prerequisite to major work is a baccalaureate degree in food science, nutrition, other physical/biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The two main departments are FSHN and Animal Science, whereas other departments (such as Kinesiology; Biochemistry, Biophysics, and Molecular Biology; Agronomy; and Statistics) may also be involved.

The department participates in an online Master of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students who are registered dietitians and

are eligible for admission to the FSHN Master's degree program may be admitted.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis or creative component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to: 1) design, conduct, and interpret research; 2) apply theoretical information to solve practical problems; 3) prepare and communicate discipline-specific information in written and oral forms to scientific and lay audiences; 4) facilitate learning in the classroom; 5) submit a paper for publication in a peer-reviewed journal; and 6) secure professional-level positions in academia, industry, government, or health care.

Minors - Graduate

The department offers coursework for graduate minors in:

- food science/technology (<http://www.fshn.hs.iastate.edu/graduate-program/food-science-technology/#minor-in-food-science-and-technology>)
- nutritional sciences (<http://www.fshn.hs.iastate.edu/graduate-program/nutritional-sciences/#minor-in-nutritional-sciences>)

Food Science and Technology Graduate Minor students must complete the following:

- 9 to 12 credits. Students without a background in food chemistry, food engineering/processing, and/or food microbiology are required to take FSHN 511, 513, and/or 514, respectively, in which case the graduate minor will constitute up to 12 credits.
- 9 credits of graduate level food science coursework as approved by the POS committee.
- Maximum of 3 credits at the 400 level.

Nutritional Sciences Graduate Minor students must complete the following:

- 9 to 12 credits are required. Students who have not taken FSHN 360 or its equivalent (advanced nutrition with a biochemistry prerequisite) will need to take FSHN 360, in which case the Nutrition Graduate minor will constitute 12 credits.
- 9 credits of graduate level nutrition courses as approved by the POS Committee.
- NUTRS 501

Certificate - Undergraduate

Health Coach

The undergraduate health coach certificate provides a rigorous academic and theoretical background in three components of health (nutrition,

exercise and motivational coaching) required to prepare workers for the challenges of being a health coach.

Certificates - Graduate

Food Safety and Defense (<http://www.fshn.hs.iastate.edu/graduate-program/food-safety-defense>)

The department offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students may be admitted if qualified for admission to the food science master's degree program .

Dietetics Internship (<http://www.dietetics.iastate.edu>)

The Iowa State University Dietetics Internship (DI) began as an AP4 program in 1989. It meets the performance requirements for supervised practice programs for students who have completed the academic requirements of the Academy of Nutrition and Dietetics. The internship is administered through the Department of Food Science and Human Nutrition. Interns are admitted to Iowa State University as graduate students seeking a "Graduate Certificate in Dietetics Internship" which will be indicated on the final transcript. Successful completion of this program will result in the receipt of the DI Verification Statement which establishes eligibility to sit for the national standardized exam administered by the Commission on Dietetic Registration (CDR). Successful completion of the exam results in the Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) credential. There is a nonrefundable application fee of \$75.

Natural Resource Ecology and Management

The department addresses a broad spectrum of natural resource and environmental issues in a holistic approach to learning, discovery and engagement. Our vision of natural resources is that informed protection and management of natural resources involves an integration of biological, economic, and social considerations. Such an integrated and comprehensive approach to the education of future generations of natural resource managers and scientists is needed in order to sustain viable landscapes, facilitate strong communities, and produce desired goods, services, and functions from our natural resources.

Our educational mission for the undergraduate and graduate programs is to provide those learning experiences and opportunities that will ensure students can learn to function effectively in their chosen fields.

Central to that effective functioning are the abilities to:

- Identify, explain and critically evaluate their own beliefs, values and actions in relation to professional and societal standards of ethics.
- Anticipate, analyze and evaluate natural resource issues and opportunities, explaining the ecological, economic, and social consequences of natural resource actions at various scales and over time.
- Actively seek the input and perspectives of diverse stakeholders regarding natural resource problems and issues.
- Assess, analyze, synthesize, and evaluate information fairly and objectively.

- Work effectively, both individually and with others, on complex, value-laden natural resource problems that require holistic problem solving approaches.
- Formulate and evaluate alternative solutions to complex problems and recommend and defend best alternatives.
- Communicate clearly and effectively with all audiences using appropriate oral, visual, electronic, and written techniques.
- Recognize and interpret resource problems and opportunities across spatial scales from local to global.
- Appreciate cultural diversity and understand the impact of the global distribution of people and wealth on natural resource use and valuation.
- Exercise leadership skills as professionals and engaged citizens.
- Demonstrate creativity and innovation in identifying and pursuing opportunities that produce environmental, social, or economic value.
- Exercise life-long learning skills developed before graduation.

Undergraduate Study

The Department of Natural Resource Ecology and Management offers work for the Bachelor of Science degree with majors in animal ecology or forestry. The department participates in interdisciplinary programs in biology, environmental studies, international studies, and pest management. By proper selection of free and restricted elective courses, students can obtain a minor or a second major in these programs or other disciplines.

Contact the department for information about minors from the Department of Natural Resource Ecology and Management.

The Department provides numerous scholarships; application information is available in the departmental Student Services Center.

Graduate Study

The Department of Natural Resource Ecology and Management offers work for the degrees Master of Science and Doctor of Philosophy with majors in fisheries biology, forestry, and wildlife ecology. A non-thesis masters degree is available for students desiring a general degree program without thesis research. Students may also major in interdepartmental graduate majors in biorenewable resources technology, ecology and evolutionary biology, environmental science, genetics, plant physiology, sustainable agriculture, or toxicology (see Index). All students are required to teach and conduct research as part of their training for the Ph.D. degree.

Fisheries Biology and Wildlife Ecology

Graduates have a broad understanding of the basic principles of animal biology, ecology and management, and relevant aspects of basic mathematics and natural sciences, computing applications, and personal and professional development. They are able to execute rigorous independent research, have developed problem-solving and critical-thinking skills, and can communicate effectively with scientific colleagues and the general public in both formal and informal settings.

Personnel of the U.S. Geological Survey's Iowa Cooperative Fish and Wildlife Research Unit contribute significantly to the graduate program of the department through teaching and research. Governmental agencies such as the U.S. Fish and Wildlife Service, Natural Resources Conservation Service and the Iowa Department of Natural Resources, and non-governmental agencies such as The Nature Conservancy and the Iowa Natural Heritage Foundation also contribute to the graduate

program by funding research, providing in-kind support, and providing numerous formal and informal mentoring relationships.

No more than two dual-listed animal ecology courses may be applied for major graduate credit. Additional work is expected of students taking a dual-listed course for credit at the 500 level.

Forestry

The department offers programs leading to the degrees of Master of Science and Doctor of Philosophy with a major in forestry and minor work to students taking major work in other departments.

Graduates are skilled at defining a research problem in forestry, applying scientific principles and appropriate methods, and analyzing the results. They are capable of understanding the many facets of forest and wood science and are very knowledgeable in specific areas in forestry. They are able to deal with complex forestry problems, and where appropriate, they are capable of blending ecological, social, ethical, legal, and economic factors in the research process. They are very skilled at communicating, both in written and oral form, research results to professional and lay audiences. They are sensitive to cultural diversity and work effectively with peers, natural resource professionals, and the public.

The graduate program is open to, and suitable for, students who have majored in forestry or related natural resource fields. A non-thesis master's option is available.

The department participates in the Masters in Business Administration (M.B.A.), with specialization in the agriculture program administered by the College of Business, providing an opportunity to obtain an M.B.A. degree while taking advanced courses in forestry and maintaining contact with the profession of forestry.

Plant Pathology and Microbiology

Undergraduate Study

The department participates in the interdepartmental undergraduate Microbiology major. See [/collegeofagricultureandlifesciences/microbiology/](#) for more information.

Graduate Study

The department offers studies for the degrees master of science and doctor of philosophy with a major in plant pathology, and minor work for students majoring in other departments or programs. A master of science nonthesis option is available. The department also participates in the interdepartmental majors in microbiology; toxicology; genetics; plant biology; molecular, cellular, and developmental biology; ecology and evolutionary biology; and sustainable agriculture.

Students entering graduate programs in the department need a sound background in the physical, biological, and mathematical sciences as well as adequate preparation in English.

Graduates have a broad understanding of the biology and management of plant pathogenic microorganisms and the interactions of pathogens with their host plants. They understand the relationship between plant pathology and allied disciplines and are able to communicate effectively with scientific colleagues and the general public in both formal and informal settings. Graduates are able to address complex plant disease problems facing agricultural and bioscience professionals, taking into account the related ethical, social, legal, and environmental issues. They

are skilled in research procedures, communicating research results, and writing concise and persuasive grant proposals.

College of Business

David Spalding, Dean
 Danny J. Johnson, Associate Dean
 Russ Laczniaak, Associate Dean

www.business.iastate.edu (<http://www.business.iastate.edu>)

Objectives of the Curriculum in Business

The instructional objective of the College of Business is to provide a high quality professional education in business. Such an education should provide the student with: (1) an appreciation of the evolution of the profession and an awareness of the ethical, global, technological, economic, political and social forces shaping its future; (2) an understanding of the major functional areas of business with the opportunity for specialization for a career in business; (3) an ability to recognize and appreciate the affect of diversity in the work place; (4) an opportunity for advanced study.

A comprehensive education in business includes a broad foundation in the liberal arts, courses in the major functional areas of business activity, proficiency in analytical methods, and the ability to identify problems and arrive at logical solutions. In addition, a professional education is designed to inspire students to assume business and community leadership.

The curriculum in business is accredited by AACSB International and the Association to Advance Collegiate Schools of Business.

Organization of Curriculum

The undergraduate curriculum in business is divided into three areas: a general education program, a pre-professional business program, and a professional business program. The general education program provides a broad spectrum of liberal arts coursework. The pre-professional business requirements provide a foundation in pre-business coursework. The professional program includes two parts: (1) the business core which provides a common body of knowledge in all the functional areas in business, and (2) a major area of study. The seven majors offered for the degree bachelor of science (B.S.) are accounting; finance; management; management information systems; marketing; supply chain management; and business economics. The college also offers a secondary major in international business. Elective courses are part of the curriculum.

Required High School Preparation

Students entering the pre-business curriculum must present evidence of the following high school preparation:

- a. Four (4) years of English/Language Arts, emphasizing writing, speaking, and reading as well as an understanding and appreciation of literature.
- b. Three (3) years of mathematics, including one year each of algebra, geometry, and advanced algebra.
- c. Three (3) years of science, including one year each of courses from two of the following fields: biology, chemistry, and physics;
- d. Two (2) years of social studies.

Curriculum Changes

Iowa State University students who want to change their curriculum to the College of Business must attend a curriculum change meeting. See Changing Curriculum or Major for more details on this process. Students on Academic Probation will not be allowed to change curriculum to the College of Business during enrollment period three. See Making Schedule Changes.

Admission Standards to Professional Programs

All new entering students, and curriculum change students are enrolled in the pre-business curriculum. To enter the professional program in the College of Business, students must complete any ENGL 101 English for Native Speakers of Other Languages courses, ENGL 150 Critical Thinking and Communication, and the following foundation courses or their approved substitutions:

MATH 150	Discrete Mathematics for Business and Social Sciences	3
		3
COM S 113	Introduction to Spreadsheets and Databases	3
ECON 101	Principles of Microeconomics	3
ECON 102	Principles of Macroeconomics	3
STAT 226	Introduction to Business Statistics I	3
ACCT 284	Financial Accounting	3
BUSAD 102 or BUSAD 103	Business Learning Team Orientation Orientation	1
BUSAD 250	Introduction to Business	3

In addition, all students must achieve an Iowa State University cumulative grade point of 2.5 or a grade-point average of 2.5 in the foundation courses listed above. Admission into the professional program is a prerequisite for pre-business students to gain admission into upper-level business classes.

Students who meet the following requirements qualify for early admission to the professional program. First Semester Freshman: ACT score of 30 or higher, or ranked in the top 5% of high school class, or National Merit/Achievement Finalist, or member of the Freshman Honors Program. All other Students: minimum ISU cumulative GPA of 3.50 in at least 12 credits, or full member of the University Honors Program.

If using the foundation courses for admission to the Professional Program, both transfer grades and Iowa State University grades are used to compute the grade point average. If foundation courses initially taken at Iowa State University need to be repeated, they must be repeated at Iowa State University. With the exception of ACCT 285 Managerial Accounting, pre-business students do not have access to business core classes. To facilitate registration, qualified students may be conditionally admitted during the semester in which they complete the admission requirements.

Admission requirements are subject to change. Applications and the current requirements for admission to the College of Business are available on the Web at <https://apps.bus.iastate.edu/ProfessionalProgram/> or from the Undergraduate Programs Office in the College of Business.

Academic Standards and Graduation Requirements

Policies for students enrolled in the College of Business may be obtained on the Web at <http://www.business.iastate.edu/undergraduate/> or from the Undergraduate Programs Office in the College of Business.

Students are responsible for knowing and adhering to these College of Business policies as well as the university regulations found in this catalog. The following policies are in effect for students graduating from a professional curriculum in business with a B.S. degree under the 2014-2015 catalog:

1. A minimum of 122 semester credits are required.
2. At least 50 percent of the required business credits must be earned at Iowa State. All 300 level and higher business credits must be earned at a four-year college.
3. A minimum of 12 credits of the last 32 credits earned in residence must be applied to the business core and/or the major.
4. The major departments reserve the right to determine the appropriate section of the degree program to which transfer credits will be assigned.
5. Students must achieve communication proficiency by earning a grade of C or better in two of the three required English courses.
6. A student must earn a grade of C or higher in a minimum of 30 credits applied to the business core and the major.
7. A student must earn at least 42 credits of 300 level and higher coursework from a four-year institution.
8. Business majors may not take business courses Pass-Not Pass (P/NP).
9. General education courses may not be taken P/NP.
10. No more than 9 elective credits may be taken P/NP.
11. The last 32 credits applied for graduation must be taken at ISU. A waiver for Study Abroad and Internship/Co-ops may be granted.

Advising System

Each student in the College of Business has an assigned academic adviser who helps facilitate student progress toward graduation while supporting the academic standards of the College. Students enter as Pre-Business majors and are guided toward their entrance to the Professional Program (business major) with assistance from professional advisers who continue to work with them through graduation.

Advisers, as part of the Undergraduate Programs Office staff, provide academic services to Business students including development of academic plans, study abroad planning, accessing pertinent University services and resources, and meeting their overall educational objectives.

The College encourages students to attend an orientation program prior to their entry, where information is shared and evaluated in order to help set the student out on the academic path appropriate to their goals, preparation, interests, and capabilities.

Honors

Entering freshmen who meet one of the following criteria, and have a minimum English ACT of 24, will be invited to apply for membership in the Freshman Honors Program: earned an ACT composite of 30, or ranked in the top 5% of their high school classes; or selected as a National Merit or National Achievement finalist.

Enrolled students who have completed 12 graded credits at Iowa State University and earned a 3.50 can be admitted as a full member of the Honors Program. To qualify for full membership, students must have declared a major, developed a program of study, and have a minimum of 48 credits remaining before graduation. Designated advisers will assist honors students in developing an appropriate program of study.

Internships

Credit and non-credit internships in business may be approved for College of Business students in all majors including pre-business. Credit hours and requirements vary. Arrangements must be made in the college prior to the beginning of the internship. An internship adviser from the Business Career Services Office will assist students in making these arrangements.

Multiple Majors

Undergraduates pursuing a degree in the College of Business may complete additional majors in the College of Business. Those desiring additional majors outside the college should refer to the catalog section of the appropriate college and department for the additional major requirements. A multiple major in business economics and agricultural business or economics is not permitted. A major in business economics with a minor in economics is not permitted.

Undergraduates with a primary major outside the College of Business who want a second major in business must meet the admission requirements for the professional program as well as complete the following requirements: Foundation, Supporting Courses, Business Core, and major requirements. (Refer to the current Curriculum Guide).

All students pursuing multiple majors or multiple degrees within the College of Business are required to have a minimum of 15 credits of coursework in each major that is not used in the other majors.

Students are limited to three business majors/ degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/ degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Second Majors and Minors

International Business Secondary Major

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major may not be used for the primary major.

Minor in International Business

Students with a major in the college of Business may earn a minor in International Business by completing 15 credits of approved course work and an approved study abroad experience of 12 weeks, or one year of foreign language study and completion of an approved study tour course offered by the College of Business. The minor must include at least 6 credits numbers 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Minor for Business Students

Students with a major in the College of Business may qualify for a minor specialization in one of the college's departments by taking at least 15 credit hours in the minor specialization, nine hours of which may not be used to satisfy any other department, college, or university requirement. The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University with a grade of C or higher. Students with declared majors have priority over students with declared minors in courses with space constraints.

Students are limited to three business majors/ degrees within the College of Business, or a total of three business major/minors within the college. This limit is on business majors/ degrees/minors only, and does not apply to multiple majors/degrees/minors taken outside the College of Business.

Minor for Non-Business Students

The College of Business offers a structured minor in general business to students outside the College. The minor requires a minimum of 15 credits, not including pre-requisite courses. Requirements for the minor are:

ACCT 284	Financial Accounting	3
ACCT 285 or ACCT 215 or BUSAD 250	Managerial Accounting Legal Environment of Business Introduction to Business	3

Three courses chosen from the following:

FIN 301	Principles of Finance
MGMT 370	Management of Organizations
MIS 301	Management Information Systems
MKT 340	Principles of Marketing
SCM 301	Supply Chain Management

The minor must include at least 6 credits in courses numbered 300 or above taken at Iowa State University. A C average or higher is required in all courses used to satisfy the minor requirements. All requirements for the minor must be taken for a grade. Students with a major outside the College of Business are eligible for a general business minor only—not a specialization in a business department.

Non-Business students may not take more than 9 cr. Of 300 or 400 level Business courses.

Entrepreneurial Studies Cross-Disciplinary Minor

The College of Business participates in a cross-disciplinary minor in Entrepreneurial Studies. This minor is available to any undergraduate student. Requirements for the minor include , MGMT 313 Feasibility Analysis and Business Planning (6 credits), two business-oriented electives from an approved list (6 credits), and an experiential learning component (3 credits). The approved list of courses is available in the Undergraduate Programs Office in the College of Business and on the web at <http://www.business.iastate.edu/undergraduate/minors/entrepreneurship>.

Non-degree Seeking Students

Students who wish to take courses in the College of Business, but are not seeking an undergraduate degree, should apply to the college as non-degree seeking students. Non-degree seeking students are eligible

to take up to 9 credits in 300-level and above business courses without meeting the college's admission requirements.

Upper Division Courses for Students Outside the College

Students from outside the College of Business are eligible to take up to 9 credits of 300-level and above business courses without meeting the college's admission requirements to the professional program, as long as they meet course prerequisites.

Graduate Study

Four programs are offered at the master's level: a master of business administration (M.B.A.) program, a master of accounting (M.Acc.), a master of finance (M.Fin.), and a master of science in information systems (M.S.I.S.). These programs are intended to meet distinct sets of educational objectives.

The master of business administration (M.B.A.) is the professional management education program for those pursuing careers in business. The goal of the M.B.A. program is to educate future business leaders preparing them for the challenges of tomorrow by giving them the vision, knowledge, skills, and confidence to make the best decisions for all involved stakeholders. The M.B.A. program consists of a 48-credit curriculum leading to a non-thesis, non-creative component master of business administration. Students may pursue a specialization in accounting, finance, marketing, technology and innovation management, or supply chain management. The College of Business also offers a business administration minor to students with majors outside the college.

A concurrent B.S./M.B.A. is available to eligible engineering undergraduate students majoring in aerospace, agricultural, biosystems, chemical, civil, computer, electrical, industrial, mechanical, or software engineering. A concurrent B.S./M.B.A. is available to agronomy, agricultural systems technology, animal science, chemistry (B. S. or B. A.), food science, and industrial technology. A concurrent D.V.M./M.B.A. degree is available to eligible Veterinary Medicine students.

Double degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P), finance (M.B.A./M.Fin.), information systems (M.B.A./M.S.I.S), and statistics (M.B.A./M.S. Statistics).

The master of accounting (M.Acc.) is designed to meet the needs of accountants in public or private accounting, focusing on interpreting and analyzing accounting information for decision-making. Additionally, the M.Acc. program is designed to help interested candidates meet the 150-hour education requirement for CPA certification in Iowa. The 30 hour program requires 15 hours of graduate accounting courses, an international topics course, and 12 hours of non-accounting graduate credits, including a communications course.

The master of finance (M.Fin.) is designed to provide students with in-depth coverage of financial topics and a strong quantitative skill set. Students will learn financial analysis, valuation, modeling, and risk management techniques. The 40-credit program requires 22 core credits, of which 7 are in economics. 18 credits of electives are required, of which 9 must be in finance.

The master of science in information systems (M.S.I.S.) is designed to provide students with strong technical skills and a broad background in business needed to effectively develop and manage information

systems projects. Using the latest software, students will apply information systems theory and concepts to modern information systems development. Program requirements range from 30-42 credits depending upon the student's background. The M.S.I.S. curriculum includes business foundation courses, information systems core courses and electives, and a research requirement (creative component).

The College of Business participates in the following graduate level interdepartmental programs: Business Analytics, Information Assurance, Human Computer Interaction, Seed Technology and Business, and Transportation.

Ph.D in Business and Technology

The College of Business offers graduate work leading to the Doctor of Philosophy degree in business and technology, with one of four specializations—information systems (IS), management (MGT), marketing (MKT), or supply chain management (SCM). Departments in the college (Management, Marketing, and Supply Chain and Information Systems), and the departments of Statistics, Economics, Psychology, and Sociology cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44 credit course curriculum followed by a 12 credit thesis or dissertation. Students do not need to have an undergraduate degree or master's degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 credit hours of business foundation courses. For more details or application information see the Business Administration Department listing in this catalog.

Departments of the College

- Accounting
- Finance
- Management
- Marketing
- Supply Chain and Information Systems

Curriculum in Business

The college offers programs of study leading to the degree bachelor of science with a major in accounting; finance; management; management information systems; marketing; supply chain management; or business economics. The college also offers a secondary major in international business. Total credits required: 122

See also: A 4-year (8 semester) plan of study for each business degree.

Business Curriculum

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communication:

Proficiency met with grade of C or better in 2 of 3 English courses

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGL 302	Business Communication	3
SP CM 212	Fundamentals of Public Speaking	3

LIB 160 Information Literacy 1

Humanities: 9 cr.

PHIL 230 Moral Theory and Practice, 6 cr. from approved humanities list.

Global Perspectives: 6 cr.

6 cr. from approved global perspectives list.

Social Sciences: 6 cr.

6 cr. from approved social science list.

Natural Science: 3 cr.

3 cr. from approved natural sciences list.

Foundation:

BUSAD 102 or BUSAD 103	Business Learning Team Orientation Orientation	1
BUSAD 250	Introduction to Business	3
MATH 150	Discrete Mathematics for Business and Social Sciences	3
COM S 113	Introduction to Spreadsheets and Databases	3
ECON 101	Principles of Microeconomics	3
ECON 102	Principles of Macroeconomics	3
STAT 226	Introduction to Business Statistics I	3
ACCT 284	Financial Accounting	3

Supporting Courses:

BUSAD 203	Business Careers and Employment Preparation	1
MATH 151	Calculus for Business and Social Sciences	3
ACCT 215	Legal Environment of Business	3
ACCT 301	The Accounting Cycle (For ACCT majors only)	1
MIS 207	Fundamentals of Computer Programming (For MIS majors only)	3
STAT 326	Introduction to Business Statistics II (For ACCT, BUSEC, and FIN majors only)	3

Business Core: 21 cr.

ACCT 285	Managerial Accounting	3
FIN 301	Principles of Finance	3
MGMT 370	Management of Organizations	3
MIS 301	Management Information Systems	3
MKT 340	Principles of Marketing	3
SCM 301	Supply Chain Management	3
MGMT 478	Strategic Management	3
Total Credits		21

All above core courses must be complete before .

Electives:

61 cr. must be non-business courses.

1. Acct, Fin, and Bus Econ majors will also take STAT 326 Introduction to Business Statistics II as part of the supporting courses. Bus Econ majors will take MATH 160 Survey of Calculus instead of 150, and ECON 207 Applied Economic Optimization instead of MATH 151 Calculus for Business and Social Sciences . See the Undergraduate Programs Office in the College of Business. Acct majors will take ACCT 301 The Accounting Cycle concurrent with as part of the Supporting Courses. MIS majors will take MIS 207 Fundamentals of Computer Programming as part of the Supporting Courses.

2. Students not adequately prepared in mathematics may have to take remedial courses in addition to courses listed above. Remedial mathematics courses may not be used to satisfy credit requirements for graduation in the business curricula.
3. Students may satisfy the Global Perspectives requirement either by taking six credit hours from the University International Perspectives list, or three credit hours from the International Perspectives list and three credit hours from the College of Business Global Perspectives list. Approved list of courses is available on the web at <http://www.business.iastate.edu/undergraduate/majors> or from the Undergraduate Programs Office in the College of Business.
4. Courses used for the International Perspectives and U.S. Diversity requirements may also be used to fulfill other curriculum requirements or electives and therefore credits are not included in the sum needed.

Professional Programs

The curriculum in accounting is accredited by AACSB International and the Association to Advance Collegiate Schools of Business.

Accounting major: 23 cr.

ACCT 383	Intermediate Managerial Accounting	3
ACCT 384	Accounting Information Systems	3
ACCT 386	Intermediate Accounting I	3
ACCT 387	Intermediate Accounting II	3
ACCT 485	Principles of Federal Income Tax	3
ACCT 497	Introduction to Auditing	3
ACCT 498	Capstone in Accounting	2
One additional course from department approved list		3
Total Credits		23

Business Economics major: 19 cr.

ECON 301	Intermediate Microeconomics	4
ECON 353	Money, Banking, and Financial Institutions	3
ECON 431	Managerial Economics	3
ECON 492	Graduating Senior Survey	R
One 300-level ECON course *		3
Two 400-level ECON courses †		6
Total Credits		19

* Excluding 397 and 398.

† Excluding ECON 490.

Finance major: 21 cr.

FIN 310	Corporate Finance	3
FIN 320	Investments	3
Three 400 level Finance courses from the following:		9
FIN 415	Business Financing Decisions	
FIN 424	Financial Futures and Options	
FIN 425	Security Analysis and Portfolio Management	
FIN 428	Advanced Fixed Income Analysis and Portfolio Management	
FIN 435	Venture Capital, Private Equity, and Mergers and Acquisitions	
FIN 445	Bank Management Decisions	
FIN 462	Corporate Risk Management and Insurance	
FIN 472	Real Estate Finance	

FIN 480	International Finance	
Plus two additional finance courses (300 or 400 level) from the department approved list.		6

Total Credits 21

Management major: 18 cr.

MGMT 310	Entrepreneurship and Innovation	3
MGMT 371	Organizational Behavior	3
MGMT 414	International Management	3

Select three management elective courses from the department approved list. Students may select courses from one of two tracks, Organizational Leadership, or Entrepreneurship.

Total Credits 18

Management Information Systems major: 18 cr.

MIS 307	Intermediate Business Programming	3
MIS 310	Information Systems Analysis	3
MIS 320	Database Management Systems	3
MIS 340	Project Management	3

Select two courses from Department list that complete an Elective Cluster.

Elective Clusters are Application Development, Business Analytics, IT Infrastructure and Security, and Supply Chain Management.

Total Credits 18

Marketing major: 18 cr.

MKT 444	Marketing Research	3
MKT 447	Consumer Behavior	3
MKT 443	Strategic Marketing Management	3

Select three additional marketing courses from the department approved list.

Total Credits 18

* Or course approved by adviser.

Supply Chain Management major: 18 cr.

SCM 424	Process Management, Analysis, and Improvement	3
SCM 453	Supply Chain Planning and Control	3
SCM 460	Decision Tools for Logistics and Operations Management	3

SCM 461 Principles of Transportation 3

SCM 486 Principles of Purchasing and Supply Management 3

Select one SCM elective course from Departmental approved list. 3

Total Credits 18

Bachelor of Science

The bachelor of science (B.S.) degree offers a high quality professional education in business. It prepares students for professional careers in specialized functions of business and government. Candidates for this degree must satisfy the requirements established by the College of Business and also the requirements for individual majors specified by the departments of the College. All candidates for the B.S. degree are required to complete one of the following majors: accounting; finance; management; management information systems; marketing; supply chain management; or business economics.

Majors

Accounting
Business Economics
Finance
International Business (second major only)
Management
Management Information Systems
Marketing
Supply Chain Management

Accounting

For undergraduate curriculum in business, major in accounting.

The curriculum in accounting is accredited by AACSB International, the Association to Advance Collegiate Schools of Business.

The primary purpose of accounting is to provide relevant information to both internal users (management) and external users such as investors, creditors, government, and the general public. Accounting is an integral part of the management of business and public organizations. Accountants, therefore, participate in planning, evaluating, controlling, and reporting the activities of the firm. Accounting is needed by external users in order to make investment decisions, to grant or withhold credit, and in the case of government, to collect revenue and gather statistical information. In order to provide useful information, accountants collect, analyze, synthesize, and report data in an understandable manner.

The instructional objective of the Accounting Program is to provide a well-rounded professional education in accounting. Such an education should provide the student with:

1. a mastery of basic accounting concepts
2. an ability to think critically and creatively about accounting problems
3. an ability to communicate effectively and work with others as a member of a team
4. an awareness and sensitivity for dealing with ethical concerns.

The major in accounting is designed to give students a conceptual foundation as well as to provide a wide range of basic skills and analytical tools for use in reporting for both public and private concerns. Students who complete the accounting major are well prepared to accept positions in industry, government, and the public accounting profession.

The requirements for the accounting major are met by successful completion of the following courses:

ACCT 383	Intermediate Managerial Accounting	3
ACCT 384	Accounting Information Systems	3
ACCT 386	Intermediate Accounting I	3
ACCT 387	Intermediate Accounting II	3
ACCT 485	Principles of Federal Income Tax	3
ACCT 497	Introduction to Auditing	3
ACCT 498	Capstone in Accounting	2
Three credit hours of electives chosen from the following:		3
ACCT 483	Advanced Managerial Accounting	
ACCT 484	Advanced Accounting Information Systems	
ACCT 487	Volunteer Income Tax Assistance	
ACCT 488	Governmental and Non-profit Institution Accounting	

ACCT 495 Advanced Accounting Problems

ACCT 496 International Accounting

See the CPA note below for the 150-hour education requirement for CPA certification in Iowa.

In addition, it is highly recommended that an accounting major include ACCT 316 Business Law. The Department of Accounting should be consulted for information on specific alternative plans of study.

The department also offers a minor for College of Business students with a different major. They are required to take 15 credits from a list of approved courses, of which 9 credits need to stand alone.

CPA Note: The accounting major requires 24 credits of accounting beyond principles. This satisfies the State of Iowa CPA exam requirement. ACCT 316 Business Law is also highly recommended; please note this class does not count towards the aforementioned 24 hours required to sit for the exam. While students may sit for the CPA exam in Iowa after completing the required accounting course work and earning a bachelors degree, CPA candidates must complete a total of 150 credits in order to be certified or licensed to practice in Iowa. Qualified students should consider taking the Masters of Accounting to satisfy the 150-credit requirement. Juniors and seniors in accounting who are interested in graduate study should contact the Coordinator of the M.Acc. Program as early as possible to complete their graduate degree in an efficient manner. Students planning certification outside Iowa must check local rules, as each state determines its own exam qualification and licensing requirements.

- # Students majoring in Business Economics (BUSEC) will take MATH 160 and ECON 207 instead of MATH 150 and MATH 151.
- @ Courses in these requirements may be also used as Global Perspective, Humanities or Social Science.
- % Students in the Management Information Systems major (MIS) will take MIS 207 instead of an elective. Students in Accounting, Finance, or Business Economics majors will take STAT 326 instead of an elective.
- ## Core Block Courses: Students take the Core Block Courses containing their MAJOR core course first. All Blocks must be completed prior to taking MGMT 478 in the last semester.
BLOCK A: ACCT 285, ACCT 301, MIS 301
BLOCK B: FIN 301 and SCM 301
BLOCK C: MGMT 370 and MKT 340

Professional Program Requirements:

1. Completion of 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
 2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses.
- Graduation Requirements:
1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
 2. 42 credits of 300+ level courses.
 3. 50% of required Business courses must be earned at ISU.
 4. At least 32 credits and the LAST 32 credits must be earned at ISU.
 5. 122 Credits minimum and a Cumulative GPA of at least 2.00
 6. Grade of "C" or higher in 2 of the 3 required ENGL courses.

Graduate Study

The department offers a graduate degree, the masters of accounting (M.Acc.). This is a 30-hour degree. The program requires 15 hours of graduate accounting courses, ENGL 507 Writing and Analyzing Professional Documents or its equivalent, at least 9 hours of non-accounting graduate electives, and an international course from an approved list. Included in the 15 required hours of graduate accounting courses are two 3-credit required courses, ACCT 583 Advanced Managerial Accounting, and ACCT 598 Financial Accounting: Theory and Contemporary Issues.

The M.Acc. is appropriate for accounting undergraduate students wanting to pursue a variety of accounting careers. The M.Acc. program is an efficient way for qualified candidates to meet the 150-hour education requirement for CPA certification in Iowa. Students without an

accounting degree will be required to complete a substantial amount of accounting coursework prior to being considered for admission to the M.Acc. Contact the coordinator of M.Acc. program for details.

The department participates in the full-time and part-time Master of Business Administration (M.B.A.) program. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in accounting. The specialization is designed to help meet the education requirement for CPA certification in Iowa.

Business Administration

The department of Business Administration supports the undergraduate programs in the departments of Accounting, Finance, Management, Marketing, and Supply Chain and Information Systems, by providing specialized coursework in orientation to business, and cooperative education opportunities.

Graduate Study

The College of Business offers a professional graduate degree program in business administration, the master of business administration (MBA), which is described below. The college also has three specialized master degree programs: the master of accounting (M.Acc.), which is described under the Department of Accounting, the master of finance (M.Fin.), which is described under the Department of Finance, and the master of science in information systems (M.S.I.S.) which is described under Management Information Systems. The college also offers a Ph.D. in business and technology, with specializations in information systems, management, marketing, and supply chain management. Finally, the College of Business is a participating member of the following interdepartmental programs: master of science in transportation, master of science in seed technology and business, master of science and Ph.D. in human computer interaction, and master of science in information assurance.

Master of Business Administration (M.B.A.)

The College of Business offers a 48 credit program leading to a nonthesis master of business administration degree with a specialization in accounting, finance, information systems, marketing, or supply chain management. The coursework is designed to provide the knowledge, skills, and abilities for managerial success and leadership in organizations. The M.B.A. is the professional management education program for those pursuing careers in business.

Students may enroll in the M.B.A. on either a full-time or part-time basis. The part-time M.B.A. is designed for employed professionals. Part-time MBA classes are held in the evenings in downtown Des Moines.

Students working toward the M.B.A. are required to complete a series of core courses in the basic functional areas of business (accounting, economics, quantitative analysis, finance, supply chain management, organizational behavior, management information systems, marketing, professional responsibilities, and strategic management), as well as advanced elective coursework. Two courses on professional skills development are also required for full-time M.B.A. students.

Courses for the M.B.A. are provided by the departments of Accounting, Economics, Finance, Management, Marketing, and Supply Chain and

Information Systems. Courses from other departments may also be chosen to meet specific student interests.

A concurrent B.S./M.B.A. is available to eligible undergraduate students majoring in aerospace, agricultural biosystems, civil, computer, electrical, industrial, or mechanical engineering. A concurrent B.S./M.B.A. is available to eligible Chemistry undergraduate students and to eligible undergraduate students majoring in Animal Science and Food Science. The College of Business and the College of Veterinary Medicine offer a concurrent M.B.A./D.V.M. degree.

Double master's degree programs are offered with architecture (M.Arch./M.B.A.), community and regional planning (M.B.A./M.C.R.P.), information systems (M.B.A./M.S.I.S.), finance (M.B.A./M.Fin.), and statistics (M.B.A./M.S.-Statistics).

The College of Business also offers a business administration minor to students with majors outside the college.

The M.B.A. program is open to all individuals with a baccalaureate degree. Undergraduates from arts and humanities, science, and technical programs are especially encouraged to apply. Academic potential and promise for a productive career in business and for managerial success and leadership in organizations are important criteria for admission. Applicants must submit official transcripts of previous academic work, Graduate Management Admission Test (GMAT) scores, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores.

Applicants are considered for fall semester entry only into the full-time M.B.A. Although applications will be considered after this date, candidates are encouraged to submit their application materials by June 1 (March 1 for international students). Part-time M.B.A. applications are considered for fall, spring, or summer entry.

Ph.D. in Business and Technology

The College of Business offers graduate work leading to the doctor of philosophy degree in business and technology, with one of four specializations—information technology (IS), management (MGT), marketing (MKT), or supply chain management (SCM). Departments in the college (Management, Marketing, and Supply Chain and Information Systems), and the departments of Statistics, Economics, Psychology and Sociology cooperate in providing coursework toward this degree. The program prepares individuals for academic careers in research, teaching, and public service at institutions of higher learning in the United States and other countries. The PhD program consists of a 44-credit course curriculum followed by a 12-credit thesis or dissertation.

Students do not need to have an undergraduate or master's degree in business in order to qualify for enrollment in the PhD program. However, students without a graduate degree in business will be required to complete 18 hours of business foundation requirements. These may include:

- Financial or managerial accounting (min. 3 Cr)
- Corporate finance (min. 3 Cr)
- Management information systems (min. 3 Cr)
- Marketing (min. 3 Cr)
- Supply chain management (min. 3 Cr)

- Economics – micro and macro (min. 6 Cr)

Students can choose one of four areas of specialization—IS, MGT, MKT, or SCM.

The information systems (IS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the IS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

The management (MGT) specialization applies a broad range of theoretical perspectives from the social sciences and diverse research methods to the study of organizational behavior, human resources, strategy, and entrepreneurship. The curriculum takes a multidisciplinary approach to analyze individuals and teams, the formulation and implementation of strategy, the effective use of human resources, social responsibility and ethics, entrepreneurship, innovation and technology, and the challenges of the global business environment. The program emphasizes personalized attention and the development of scholars who can contribute with high-quality theoretical and empirical research in these and related areas.

The marketing (MKT) area focuses on identification and delivery of solutions that help improve the ways in which businesses attract, capture, service and maintain customers. To do these activities well, organizations will need to integrate process goals and activities across different functional areas and across multiple organizational partners. This area of study will examine issues relating to inter-functional and inter-organizational relationships and their management in pursuit of maximizing the lifetime value of a businesses' customer base.

The supply chain management (SCM) specialization focuses on the design, development, and control of business processes for conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems included as well. However, in today's world, where competition occurs across supply chain networks, SCM also involves integrating business processes across firms.

Programs of study for the doctoral study are designed for each student in consultation with the major professor and the student's PhD committee. Each student must complete advanced courses in his/her area of specialization, a minor area that supports the major area, and research methods courses. Students must demonstrate competence in theory and research methods by passing qualifying examinations.

Application deadline for the Ph.D. program is February 1 for fall admission. Applicants must submit official transcripts of previous educational coursework and degrees, Graduate Management Admission Test (GMAT) scores, personal essays, a resume, and three letters of reference. International students whose native language is not English and who did not graduate from a U.S. college or university are required to submit TOEFL (Test of English as a Foreign Language) scores.

Business Economics

Cooperative Major between the College of Business and the Department of Economics

The objective of the Business Economics major is to provide a high quality education with a balanced emphasis in both business and economics. Such an education should equip graduates with a unique set of skills distinguishing them from other graduates. In particular, they will have the ability to use both business and economic reasoning to think critically and address complex issues using tools and decision making models of economics, business, mathematics, statistics, as well as concepts from the biological, physical, and social sciences; to make decisions and to communicate effectively.

Required courses (10 credits)

ECON 301	Intermediate Microeconomics	3-4
ECON 353	Money, Banking, and Financial Institutions	3
ECON 431	Managerial Economics	3
ECON 492	Graduating Senior Survey	R

Elective courses (9 credits)

Three credits of ECON 230-289, 300-389, 400-489.

Select two additional 400 through 489 level ECON courses

Notes:

Business Economics majors must take STAT 326

Business Economics majors take MATH 160 and ECON 207 instead of MATH 150 and 151

BLOCK B: FIN 301 and SCM 301
BLOCK C: MGMT 370 and MKT 340

Professional Program Requirements:

1. Completion of 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses.

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU.
5. 122 Credits minimum and a Cumulative GPA of at least 2.00
6. Grade of "C" or higher in 2 of the 3 required ENGL courses.

Finance

For undergraduate curriculum in business, major in finance.

In addition to the basic business requirements, finance majors must also complete:

FIN 310	Corporate Finance *	3
FIN 320	Investments	3

Select four from the following (two must be 400-level):

FIN 327	Fixed Income Securities	
FIN 330	Financial Markets and Institutions	
FIN 361	Personal Risk Management and Insurance	
FIN 371	Real Estate Principles	

FIN 415	Business Financing Decisions
FIN 424	Financial Futures and Options
FIN 425	Security Analysis and Portfolio Management
FIN 428	Advanced Fixed Income Analysis and Portfolio Management
FIN 435	Venture Capital, Private Equity, and Mergers and Acquisitions
FIN 445	Bank Management Decisions
FIN 462	Corporate Risk Management and Insurance
FIN 472	Real Estate Finance
FIN 480	International Finance

Select one from the following:

ACCT 383	Intermediate Managerial Accounting
ACCT 386	Intermediate Accounting I
ACCT 387	Intermediate Accounting II

or any 400 level course listed above.

- * STAT 326 Introduction to Business Statistics II is highly recommended to be taken as a prerequisite

The courses in finance constitute a broad program of study designed to provide a descriptive, behavioral, and analytical background of financial management to enable students to qualify for opportunities in financial services, insurance, brokerage, government, real estate, and financial management of business enterprises. Finance is also an excellent area for those who wish to become more knowledgeable as consumers, particularly in the fields of investments, insurance, and real estate.

Areas of study in the field of finance include corporate financial management, investments, portfolio management, insurance, real estate, banking, and risk management. Upper-level courses include a review of contemporary literature in the field, case studies, and financial problem analysis integrating finance courses previously taken.

The instructional objective of the Finance program is to provide a well-rounded professional education in finance. Such an education should provide the student with:

1. a mastery of basic financial concepts and methods of analysis
2. an understanding of financial operations in a global setting and of the role of financial institutions in the economy
3. an ability to effectively communicate and work with others as the finance member of a team
4. an ability to demonstrate leadership capabilities in financial analysis and portfolio management.

The department also offers a finance minor for non-finance majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand-alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Finance department offers a Master of Finance (M.Fin.) degree. The M.Fin. is a non-thesis, non-creative component curriculum designed to provide students with in-depth coverage of finance topics and a strong quantitative skill set. Students will learn financial analysis and valuation, advanced regression techniques and programming approaches for data analysis, time series analysis and forecasting, optimization techniques, modelling of financial and risk variables, simulation techniques, and tools for effective risk management. The 40 credit program requires 22 core credits, seven of which are taught in the economics department. Another 18 credits of electives are required, nine of which must be in finance courses.

The department also participates in the full-time and part-time Master of Business Administration (M.B.A.) program. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in finance.

Management

For undergraduate curriculum in business, major in management.

The Department of Management offers a major in management. Students will complete the general education requirements (including business foundation courses) and business core requirements for the Bachelor of Science (B.S.) degree and 18 additional credits in the major. The instructional objectives of the Management Department are to provide students with foundational knowledge of organizations, organizational leadership activities, and the ideals and activities of business entrepreneurship. Management majors will have an understanding of (1) employee work-related attitudes and behaviors, (2) challenges and strategies in international business, and (3) human resource management practices within firms. Students will demonstrate awareness for the role of diversity, ethics and technology in business decision-making, the impact of external forces and global issues on organizations. Students will display the ability to think critically, to communicate effectively and to contribute constructively to effective team performance.

Management is a broadly defined discipline and activity, which is neither industry nor function specific. Management theories, concepts, techniques, and skills are applicable to all functional areas of business and are essential for organizational success regardless of whether the venture thrives in character as large or small, well-established or entrepreneurial start-up. Management requires sound conceptual, technical, and human skills for the effective utilization of organizational resources. In addition to the basic business foundation and core courses, a management student has the option of selecting and participating in either: (a) an organizational leadership track or (b) an entrepreneurship track. Management majors are required to complete 18 credit hours of management or department-approved courses. Included in these 18 credits are three required courses:

MGMT 371	Organizational Behavior	3
MGMT 414	International Management	3

Students choosing the Organizational Leadership Track will also complete 3 of the following courses:

MGMT 471	Personnel and Human Resource Management	3
Select 2 from the following:		
MGMT 377	Competitive Strategy	3
MGMT 419	Social Responsibility of Business	3
MGMT 472	Management of Diversity	3
PSYCH 450	Industrial Psychology	3

Students choosing the Entrepreneurship Track will also complete 3 of the following courses:

MGMT 313	Feasibility Analysis and Business Planning	3
MGMT 410	Social Entrepreneurship	3
Select 2 from the following:		
MGMT 377	Competitive Strategy	3
MGMT 419	Social Responsibility of Business	3
MGMT 471	Personnel and Human Resource Management	3
MGMT 472	Management of Diversity	3
MGMT 367	International Entrepreneurship	3

The department also offers a minor for non-Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

Graduate Study

The Department of Management participates in the full-time and part-time Master of Business Administration (M.B.A) and in the Ph.D. in Business and Technology. The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives.

The Ph.D. in Business and Technology with a Management (MGT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on management

issues relating to organizational behavior, human resources, strategy, and entrepreneurship.

Management Information Systems

For undergraduate curriculum in business, major in management information systems (MIS).

The MIS major requires students to take 18 credit hours in the management information systems area, including 12 credit hours of required core courses and 6 credit hours of electives. The required core courses are:

MIS 307	Intermediate Business Programming	3
MIS 310	Information Systems Analysis	3
MIS 320	Database Management Systems	3
MIS 340	Project Management	3

The remaining 6 credits can be taken from the department approved electives, preferably with the specified clusters that focus on specific IT job related knowledge and skills (application development, IT infrastructure and security, business analytics, and supply chain technology). Students are encouraged to take electives that cover multiple clusters to enhance marketability and career flexibility.

The department also offers a minor for non-Management information Systems majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. The 15 credits must include MIS 301 Management Information Systems. Students with declared majors have priority over students with declared minors in courses with space constraints.

6. Grade of "C" or higher in 2 of the 3 required ENGL courses.

Graduate Study

The Department of Supply Chain and Information Systems participates in the M.S. in Information Systems (M.S.I.S), the full-time and part-time Master of Business Administration (M.B.A.) and the Ph.D. in Business and Technology programs. The department also participates in an interdepartmental M.S. in Information Assurance as well as in a master's and Ph.D. program in Human Computer Interaction.

The M.B.A. is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core business courses and the remaining 18 credits are graduate electives. Students may obtain a specialization in technology and innovation management within the M.B.A. program.

The M.S.I.S. is a 30-credit (minimum) curriculum designed around three interrelated areas – business foundation, IS core, and electives. All students are expected to be familiar with basic computing skills before entering the program. The M.S.I.S. program will educate students on applying IS theory and concepts to modern IS development through classes that enable them to learn and use the latest software in application projects. Students graduating from the program will have advanced technical and managerial skills to develop and manage information systems projects.

The Ph.D. in Business and Technology is a 56-credit curriculum (minimum) which includes a 12-credit dissertation designed around four interrelated areas—core, specialization, minor, and research methods—and the dissertation. The Management of Information Systems (MIS) specialization examines issues related to the development, building, management, and use of information and knowledge-based technologies. Such technologies enable users to collect organizational data, provide a platform for organizing and disseminating the data, and offer operational, decision support, and knowledge management tools through which users can leverage data and information for making better organizational decisions. Students in the MIS specialization will study areas such as information technology analysis and development, database and knowledge management systems, decision support and data mining, human computer interaction, system security and integrity, and project management and collaborative teamwork.

Marketing

For undergraduate curriculum in business, major in marketing.

The Department of Marketing offers a major in marketing. Students will complete the general education requirements (including business foundation courses), and business core requirements for the bachelor of science (B.S.) degree and 18 credits in the major.

A major in marketing acquaints students with the managerial decisions and actions that surround the satisfaction of customer needs in the purchase and use of goods and services. Examples of marketing decisions areas are product development, pricing, marketing communication, marketing analytics, and personal selling. Completion of the major prepares students for careers such as product manager, marketing analyst, digital marketing specialist, marketing consultant, advertising or promotions manager, marketing researcher, sales representative or manager, and special events manager; in the public and private sectors. Some graduates also find careers in the retail industry, be it store management, market analysis, or purchasing.

The instructional objective of the Marketing department is to provide knowledge of the marketing process and an understanding of its functions. Students are expected to develop decision-making skills, computational skills, and communication skills with appreciation for global marketplace and ethical concerns. In addition to the basic business foundation and core courses, marketing majors are required to complete 18 credits of marketing or department approved courses. Included in these 18 credits are three required courses (see below).

Required and elective marketing major courses can be combined into three distinct tracks: brand management, marketing data analytics, and sales and sales management.

Required Marketing Courses (9 credit hours)

MKT 444	Marketing Research	3
MKT 447	Consumer Behavior	3

MKT 443	Strategic Marketing Management	3
Elective Marketing Courses (9 credit hours)		
MKT 343	Personal Sales	3
MKT 351X	Services Marketing	3
MKT 368X	Spreadsheet-based Marketing Models	3
MKT 410	Promotional Strategy	3
MKT 442	Sales Management	3
MKT 445	Customer Relationship Management	3
MKT 446	Retailing	3
MKT 448	Global Marketing	3
MKT 449	Marketing Seminar	3
MKT 451	Marketing Channels	3
MKT 453	Brand Management	3
MKT 492	Comparative Marketing	3

Descriptions of X-designated courses can be secured from the instructor of record for the semester in question.

The department also offers a minor for non-Marketing majors in the College of Business. The minor required 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

- # Students majoring in Business Economics (BUSEC) will take MATH 160 and ECON 207 instead of MATH 150 and MATH 151.
- @ Courses in these requirements may also be used as Global Perspectives, Humanities or Social Science.
- % Students in the Management Information Systems major (MIS) will take MIS 207 instead of an elective. Students in Accounting, Finance, or Business Economics majors will take STAT 326 instead of an elective.
- ## Core Block Courses: Students take the Core Block Courses containing their MAJOR core course first. All Blocks must be completed prior to taking MGMT 478 in the last semester.
BLOCK A: ACCT 285, ACCT 301, MIS 301
BLOCK B: FIN 301 and SCM 301
BLOCK C: MGMT 370 and MKT 340

Professional Program Requirements:

1. Completion of 30 credits, Foundation Courses, ENGL 150, and all ENGL 101/99 courses if required.
2. A minimum GPA of 2.50 either cumulative or in the Foundation Courses.

Graduation Requirements:

1. Grade of "C" or higher in at least 30 credits of Core and Major courses.
2. 42 credits of 300+ level courses.
3. 50% of required Business courses must be earned at ISU.
4. At least 32 credits and the LAST 32 credits must be earned at ISU.
5. 122 Credits minimum and a Cumulative GPA of at least 2.00
6. Grade of "C" or higher in 2 of the 3 required ENGL courses.

Graduate Study

The Department of Marketing participates in the full-time and part-time Master of Business Administration (M.B.A.) and the Ph.D. in Business and Technology. The M.B.A. is a 48-credit professional degree program. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Within the M.B.A. program, students may develop an area of specialization in marketing.

The Ph.D in Business and Technology with a Marketing (MKT) specialization is a 56 credit (minimum) curriculum designed around four interrelated areas (core, specialization, minor, and research methods) and dissertation. The focus of the specialization is on marketing issues relating to strategic decision making, understanding consumer preferences and behaviors, and using data analytics for increasing the performance of the firm.

Supply Chain Management

Supply Chain Management is an integrated program of study concerned with the efficient flow of materials, products, and information within and

among organizations. Supply chain management involves the integration of business processes across organizations, from material sources and suppliers through manufacturing and processing to the final customer. The program provides students with the core knowledge related to a wide variety of supply chain activities, including demand planning, purchasing, transportation management, warehouse management, inventory control, material handling, product and service support, information technology, and strategic supply chain management. The program takes a balanced approach to supply chain education, requiring courses in operations, logistics, and purchasing for all students.

The study of Supply Chain Management prepares students for professional careers with manufacturers, retail distributors, logistics service providers, including carriers and non-asset based 3PLs, and consulting firms. The curriculum provides the required theoretical and conceptual base and analytical methods for making sound operational and strategic business decisions related to all activities in a supply chain.

The Supply Chain Management major requires students to take 18 credit hours in the supply chain management area. This requirement is met by completion of the following common core courses:

Core (15 credits)

SCM 424	Process Management, Analysis, and Improvement	3
SCM 453	Supply Chain Planning and Control	3
SCM 460	Decision Tools for Logistics and Operations Management	3
SCM 461	Principles of Transportation	3
SCM 486	Principles of Purchasing and Supply Management	3

Electives (3 credits)

SCM 340	Project Management	3
SCM 440	Supply Chain Information Systems	3
SCM 450	Enterprise Resource Planning Systems in Supply Chain	3
SCM 462	Transportation Carrier Management	3
SCM 466	International Transportation and Logistics	3
SCM 487	Strategic Supply Chain Management	3
SCM 491X	International Live Case and Study Tour	3
SCM 495X	SCM Case Competition	3

Total Credits 39

Students are encouraged to consider meeting the requirement for both concentrations to establish a broader foundation for a successful career in supply chain management.

The department also offers a minor for non-Supply Chain Management majors in the College of Business. The minor requires 15 credits from an approved list of courses, of which 9 credits must stand alone. Students with declared majors have priority over students with declared minors in courses with space constraints.

5. 122 Credits minimum and a Cumulative GPA of at least 2.00

6. Grade of "C" or higher in 2 of the 3 required ENGL courses.

Graduate Study

The Department of Supply Chain and Information Systems participates in the full-time and part-time Master of Business Administration (M.B.A.) and in the Ph.D. in Business and Technology programs. The department also participates in the interdepartmental M.S. in Transportation program.

The M.B.A. program is a 48-credit, non-thesis, non-creative component curriculum. Thirty of the 48 credits are core courses and the remaining 18 are graduate electives. Students can obtain a specialization in Supply Chain Management within the M.B.A. program.

The Ph.D. in Business and Technology is a 56-credit curriculum (minimum) that culminates in a dissertation. Students may select Supply Chain Management (SCM) as their major area of specialization. The primary objective of the SCM specialization is to prepare students for careers in research universities. The SCM domain is broad and includes the design, development and control of business processes for the conversion of inputs into outputs and distribution of those outputs. The traditional focus of SCM was on integration of processes across multiple functions within the firm—operations management, logistics, and purchasing primarily, with elements of marketing and information systems also included. However, in today's world, with competition across supply chain networks, SCM also involves integrating business processes across firms. Research in this area is therefore interdisciplinary in nature and addresses both intra- and inter-organizational issues.

Ph.D. core curriculum	6
Doctoral seminars and research practicum in the area of specialization	14

International Business

Interdepartmental Undergraduate Secondary Major

The international business program is designed to provide students with an understanding of the international business environment. Students are expected to develop an understanding of issues associated with international business issues as applied to the different functional areas of business. They will also develop skills to prepare themselves for business positions with international responsibilities. The program is designed to prepare students for employment in multinational companies and for business assignments beyond the United States.

International business is an undergraduate secondary major that may be taken only in conjunction with a primary major in business. Technical knowledge of international business will strengthen the expertise acquired with the primary major. Business students pursuing

this program should strengthen their placement opportunities with companies that are engaged in international business and trade.

A student in the College of Business may earn a secondary major in International Business. The requirements for this major include 12 credits in international business courses, one year of the same university-level foreign language (minimum of 6 credits) and an approved international experience (minimum 3 months). Students who pursue this secondary major will be required to complete the requirements for a primary major in Business. Fifteen of the 18 credits required for the International Business major must not be used for the primary major.

College of Design

Luis Rico-Gutierrez-Dean

Mark Chidister-Associate Dean for Academic Programs

Kevin Kane-Associate Dean for Research

www.design.iastate.edu/ (<http://www.design.iastate.edu/>)

Objectives of the Curricula in Design

The College of Design is among a small number of comprehensive design schools offering outstanding opportunities for both disciplinary and interdisciplinary education.

The College of Design strives to provide each student with a broad educational background and preparation in a specific design or art discipline. Each program is designed to develop knowledge and appreciation of the physical and cultural environment, to stimulate creative thinking and analysis, and to prepare students for participation in a wide variety of careers.

The college's programs also encompass many opportunities for individualized study and extracurricular activities such as visiting lectures and symposia, workshops, gallery exhibits, practicum and internship programs, field trips, and international study programs.

Graduates of the college are employed in private firms, government, industry, and education, or are self-employed as designers or artists. Opportunities for graduates include careers as architects, landscape architects, community and regional planners, graphic designers, industrial designers, interior designers, studio artists, arts administrators and environmental designers.

Organization of Curricula

All undergraduate programs in the College of Design share a common foundational curriculum, the Core Design program, followed by degree-specific curricula. The Core Design Program grounds the undergraduate degree programs and provides a rich, rigorous inclusive base for the college's professional and non-professional programs. It creates shared language, experience, and community for programs, faculty and students and exposes students to all design disciplines, allowing them to make more informed degree choices, apply to multiple programs, and experiment with interdisciplinary work.

The intense, discipline-specific professional curricula that follow the Core Design Program focus on developing students' ability and knowledge in their major. Within the major area, students advance creative and professional skills through classroom and studio work, critiques of student projects, discussion with professional practitioners, and field studies.

General education, contained in both the Core Design Program and the degree programs, is composed to ensure that students receive a well-rounded undergraduate education.

High School Preparation

Courses in fine arts and design that develop visualization and freehand drawing abilities are highly recommended though not required for entrance. Students planning to enroll in an academic program in the College of Design must complete the following high school requirements:

- 4 years of English, including coursework in composition and literature and up to 1 year of speech and/or journalism, to develop communication skills and critical reading/writing ability
- 3 years of mathematics to develop problem solving skills, including 1 year each of algebra, geometry, and advanced algebra
- 3 years of science, including at least two of the following:
 - 1 year of biology, 1 year of chemistry, or 1 year of physics
- 2 years of social studies, including at least 1 year of U.S. history and 1 semester of U.S. government.

Admission Standards to Enrollment Managed Professional Programs

Admission into the enrollment managed professional programs of Architecture, Community and Regional Planning, Graphic Design, Industrial Design, Integrated Studio Arts, Interior Design, and Landscape Architecture requires a separate application after completing the Core Design Program, depends on available resources, and is subject to review by faculty committee. Applicants are reviewed on the basis of a portfolio of original work, academic performance, and a written essay. Students from a two-year institution may also apply as transfer students to the following programs: B.S. in Community and Regional Planning, B.A. in Art and Design, and Bachelor of Design.

Advising

Each student receives personal assistance from an academic advisor within the student's curriculum area. Students enrolled in the college's Core Design Program are advised by professional advisors. Once admitted to professional programs, students are assigned to faculty advisors within the student's curriculum area. Advisors help students develop a program of study, access pertinent university resources and provide information on career choice.

The college's career services office works with students to develop their career goals as well as prepare and search for employment.

Honors Program

The College of Design participates in the Honors Program which provides opportunities for outstanding students to individualize their programs of study. See Honors Program.

Departments of the College

- Architecture
- Art and Visual Culture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Interior Design
- Landscape Architecture

Requirements in the College of Design

All students in the College of Design are expected to meet the following requirements.

Core Design Program

Cr. Fall/Spring

DSN S 102	Design Studio I	4
DSN S 115	Design Collaborative Seminar *	0.5
DSN S 131	Design Representation	4
DSN S 183	Design Cultures	3
Social Science/Humanities Electives **		6
Math/Science Electives ***		6
Communications		7

* Students enrolled in the Design Exchange Learning Community take DSN S 110 in place of DSN S 115.

** General education credits in the Core Design Program may count toward the minimum credits.

*** Students who intend to apply to the Architecture program are strongly advised to take MATH 145 Applied Trigonometry and PHYS 111 General Physics during their Core year. While these specific courses are not required to apply to the program, they are required to advance in the B.Arch. program beyond the first semester.

Students who intend to apply to the Industrial Design program are advised to take PHYS 101 Physics for the Nonscientist Physics for the Nonscientist, ECON 101 Principles of Microeconomics Principles of Microeconomics and a math course during their Core year.

General Education

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications: 7 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
Total Credits		7

(C- or better grade). Includes courses in the fields of English (composition) and speech communication (interpersonal and rhetorical).

Mathematics, physical sciences, and biological sciences 6 cr.

Includes courses in the fields of agronomy, astronomy and astrophysics, biology, chemistry, civil engineering, computer science, geology, mathematics, physics, and statistics.

Humanities: 6 cr.

Includes courses in the fields of classical studies, English (literature), foreign languages, history, philosophy, religious studies, as well as history/theory/literature courses in dance, music, theater, journalism, African American studies, American Indian studies, environmental studies, Latino/a studies, women's studies, and university studies.

Social Sciences: 6 cr.

Includes courses in the fields of African American studies, American Indian studies, anthropology, economics, environmental studies, geography, human development and family studies, Latino/a studies, psychology and sociology, women's studies, and university studies.

General Education Electives: 9 cr.

9 cr. from any of the above areas, 6 cr. of course level 300-400.

Minor in Critical Studies in Design

The undergraduate minor in Critical Studies in Design offers students opportunities to engage the history, theory and criticism of visual and material culture and the built environment. In lectures and focused seminars, students explore historical and contemporary issues, including cultural production, media and technology, design in everyday life, and models of professional practice. The minor is open to undergraduates in all university majors.

Total minor requirements: 15 cr.

ART H 292	Introduction to Visual Culture Studies	3
DSN S 183	Design Cultures	3
or another 100-200 level History/theory course offered in the College of Design		
Nine credit hours from approved list.		9

Total Credits

15

At least six of the 15 credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the 15 credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Undergraduate Curricula

Majors

*The College of Design participates in these interdepartmental secondary majors and minors.

Minor in Design Studies

The undergraduate minor in Design Studies is constructed to facilitate design awareness among interested students and to provide a vehicle for interdisciplinary study within the College of Design. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of course work: three credits selected from College of Design history/theory course offerings and twelve additional credits selected from any College of Design course offerings.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above. At least nine of the fifteen credits must not be used to meet any other college or university requirements except the credit requirement for graduation.

Students enrolled in the College of Design may not use courses required in their major degree programs or in the Core Design Program to satisfy this minor.

Minor in Digital Media

Manipulation of digital media has emerged as an essential skill for design inquiry alongside traditional methods of building models and drawing sketches. To familiarize students with the use of digital media in the design process, the College of Design offers an undergraduate Minor in Digital Media. This minor is open to all undergraduate students at Iowa State University.

This minor requires fifteen credits of coursework from an approved list. At least nine of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above and may not be used to meet the requirements of the major.

Minor in Entrepreneurial Studies

The College of Design is an active participant in the Entrepreneurial Studies Minor for undergraduate students.

Graduate Curricula

The College of Design offers graduate study in the areas shown below. Graduate study is conducted through the Graduate College. Details are found in the Graduate College section of this catalog.

Majors

- Architecture
- Community and Regional Planning
- Graphic Design
- Industrial Design
- Integrated Visual Arts
- Interior Design
- Landscape Architecture
- Sustainable Environments
- Transportation*
- Urban Design

Double Degree Programs

- Architecture / Business

- Landscape Architecture / Urban Design
- Landscape Architecture / Sustainable Environments

Minor

- Gerontology*

*The College of Design participates in this interdepartmental graduate program.

Certificate

Geographic Information Systems

Architecture

<http://www.arch.iastate.edu>

The undergraduate program in architecture is an accredited five-year curriculum leading to the Bachelor of Architecture degree. The program provides opportunities for general education as well as preparation for professional practice and/or graduate study. An optional one-semester foreign study program is offered to fourth year students.

The undergraduate curriculum includes one year of the college's Core Design Program followed by a four year professional program. Admission to the professional degree program is based on the applicant's performance in the completed pre-professional curriculum; previous high school record (or transfer record where applicable); portfolio and essay evaluations; and on available departmental resources.

Objectives of the Bachelor of Architecture program:

The department is committed to the study of architecture as a cultural discipline in which issues of practice, of the multiplicity of social formations in which buildings exist, and of environmental effect are enfolded with the subject matter of building design - construction, space, material, form and use. Architecture arises from the aspirations that diverse individuals and groups have for their physical environment, and from the social enterprise of designing and fabricating the landscape we inhabit. It involves individual and multiple buildings, the spaces within them, and the exterior landscape.

It is our intent: that our students develop the skills with which to critically assess and research architectural questions and to invent architectural designs that address those questions; that they develop a working method for designing and that they have the communication, graphic, modeling and computational skills to support design exploration and to represent their design ideas to others; that they gain knowledge of architectural technologies through which buildings are given form, of which they are constructed and by which they are environmentally tuned and made sustainable; that they understand architectural history, that

they understand the theoretical and diverse cultural underpinnings of the discipline of architecture, that they are able to reference architectural precedents and know how to utilize all of these in the development of their ideas; and that they have grounding in the ethical and practical aspects of the architectural profession in society.

For students entering the professional program, the department highly recommends purchase or lease of a laptop/notebook computer and appropriate software.

Curriculum in Architecture

The Department offers undergraduate and graduate degree programs:

A 167.5-credit undergraduate professional program, including the 30-credit Core Design Program, leading to the Bachelor of Architecture degree. (B. Arch.)

A 100-credit graduate professional program leading to the Master of Architecture. Applicants holding B.S. or B.A. degrees in Architecture or other affiliated design fields may be given advanced standing in this program. (M.Arch.)

A 30-credit interdisciplinary graduate program leading to the Master of Science in Architecture. (M.S. Arch.)

For more complete graduate program descriptions see Graduate Study under Architecture in the Courses and Programs section.

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Total B. Arch. Requirement: 167.5 cr.

Only 65 cr from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr of free electives; 2.00 minimum GPA.

Total Credits: 167.5-168

Admission into the Bachelor of Architecture Program requires the completion of at least 30.0 credits, including the following courses: DSN S 102, 131, 183, 110 or 115, 6 credits of Social Sciences/ Humanities, 6 credits Math/Science, ENGL 150 (or test-out credit) LIB 160. A portfolio review and essay will also be significant factors.

Graduate Study

The Department of Architecture offers two graduate degrees in architecture: a three-year accredited professional degree (M.Arch.) and a two-semester to three-semester research degree (M.S. in Arch.). Both degrees encourage interdisciplinary work within the College of Design and across related fields within the university. Double-degree programs are currently offered with the Department of Community and Regional Planning (M.Arch. / M.C.R.P.) and the College of Business (M.Arch. / M.B.A.). Financial support in the form of teaching and research assistantships is available competitively.

Master in Architecture

M.Arch. is an accredited professional degree in architecture. It is designed for students with undergraduate degrees in disciplines other than architecture as well as for students who hold four-year pre-professional degree in architecture.

The M.Arch. program demands engagement with contemporary issues and a commitment to lifelong learning. We encourage students to examine the relationships between local, regional and global contexts addressing environmental, social and technological issues. We believe that even though the scale of the architect's action might be limited, the range of information needed to make creative, intelligent and responsible design decisions is vast. We expect our graduates to value the necessity of research, interdisciplinary learning, and teamwork.

M.Arch. is accredited by the National Architectural Accreditation Board (NAAB) and leads to a professional Master of Architecture degree over three years including the first summer term. The curriculum starts with an intensive three-semester course sequence that places equal emphasis on three study areas: architectural design and media, science and technology, and theory and history seminars on the built environment. While this learning framework shapes the whole curriculum, the remaining four semesters have a more open structure that allows students to explore architecture within an interdisciplinary context. These four semesters include a number of options, including study abroad, specialized studios with a variety of faculty, and the opportunity to do an independent project.

Students with undergraduate degrees in architecture or other related design fields may be given advanced standing in the program; advanced standing students may waive up to the whole first year. Students admitted to the program hold undergraduate degrees in a broad range of fields such as art history, history, literature, interior design, economics, mathematics, computer science, anthropology, and medicine. These students must complete the full three years of the curriculum.

Master of Science in Architecture

M.S. in Arch. is a 30-credit research degree with a required graduate thesis. As a research degree, this program is not subject to NAAB accreditation.

M.S. in Arch. is open for applicants who hold a professional degree in architecture or other related design fields. Applicants are required to submit a research proposal that lies within one of the listed study areas. These study areas are: Sustainability and Green Design, Rural and Urban Studies, Representation and Digital Media, Design Inquiry, Advanced Building Design, Architectural and Construction History, and Building Science and Construction. The degree is also open for applicants with non-professional degrees in various fields depending on the study area proposed by the applicant.

Masters of Architecture

Studio Courses: 39 cr.

ARCH 505	Architectural Design and Media I: Mapping, Programming, Building	5
ARCH 506	Architectural Design and Media II: Materiality and Representation	5
ARCH 507	Architectural Design and Media III: Design in Detail	5
ARCH 601	Sustainable Building Design	6
ARCH 602	Community, Building and the Environment	6
ARCH 603	Comprehensive Design	6
ARCH 604	Design Studio Options	6

History and Theory Courses: 16 cr.

ARCH 595	Seminar on the Built Environment I: History	5
ARCH 596	Seminar on the Built Environment II: Landscape and Society	5
ARCH 597	Seminar on the Built Environment III: Theory	3
ARCH 598	Seminar on the Built Environment IV: Topical Study	3

Science and Technology: 24 cr.

ARCH 541	Science and Technology for Architects I	5
ARCH 542	Science and Technology for Architects II	5
ARCH 581	Service Learning	5
ARCH 643	Science and Technology for Architects III	3
ARCH 644	Science and Technology for Architects IV	3
ARCH 582	Professional Practice	3

Electives: 21 cr.

Total Credits 100

DuAl degree

Double degree programs are offered with Master of Design in Sustainable Environments (M.Arch./M.Des.S.E.), and Master of Urban Design (M.Arch/M.U.D.). Information about our programs and how to apply can be obtained from the department's web page at: www.design.iastate.edu/architecture

Financial support in the form of teaching and research assistantships is available.

Art and Design

The Bachelor of Arts in Art and Design is a four-year degree program with two options: *Art and Culture* or *Visual Culture Studies*. Both options require students to complement their art coursework with study in an

area outside of the College of Design. This can include a second major or minor, or an alternative program of study approved by your academic adviser.

Many students pursue this BA degree in conjunction with a second major or a minor such as journalism, advertising, business, history or psychology.

The two Art and Design curricula provide a solid liberal arts educational experience that can be a springboard into a wide array of graduate school and career opportunities, including art criticism, art history, art sales, corporate art collections, gallery/museum studies, and art therapy.

Art and Culture Option

The *Art and Culture* option provides a general studies degree in which students combine art with another area of interest. Students create their own programs of study, which may include another major or minor in a subject taught outside the College of Design. This concentration emphasizes studio components.

Required courses include three (3) art or design history courses (two at the 300/400 level).

Visual Culture Studies Option

For students who are really interested in art history or museum studies, the Visual Culture Studies option allows the student to take a larger number of courses in those topics. Required courses include several art or design history courses at the 300/400 level, which may include a museum or gallery internship.

This curriculum offers two concentrations: Art and Culture and Visual Culture Studies. Both concentrations are combined with an applied career minor or approved program of study.

Art and Culture Concentration

The curriculum in Art and Design, Art and Culture Concentration leads to a 120.5 credit undergraduate Bachelor of Arts degree

Transfer students with studio credits from other programs, colleges and universities must present for department review a portfolio of work done in those courses in order to have the credits applied toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Total Degree Requirements: 120.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr; 9 P-NP cr. of free electives; 2.00 minimum GPA

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communication: 10 cr.

(C- or better grade)

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
One course from the following:		3
COMST 101	Introduction to Communication Studies	
COMST 102	Introduction to Interpersonal Communication	
CMDIS 286	Communicating with the Deaf	
SP CM 110	Listening	

SP CM 212 Fundamentals of Public Speaking

Biological/Pre-Medical Illustration

The interdepartmental undergraduate BPM I major is designed for students who want to combine their interests and aptitudes in science and art. Based on the theme of "communicating science through art," the major prepares students for careers in biological illustration or for graduate education in medical illustration elsewhere. Graduates enter fields such as biocommunications, environmental display design, freelance illustration, museum display design, and various careers in the publishing industry.

Entrance into the BPM I program is by application to the BPM I Advisory Committee. Eligibility is based on an academic standard of at least 2.00 CGPA on 30 credits of university level work and a consideration of artistic ability as demonstrated through submission of a portfolio of representative drawings or other art work. Freshman and transfer students usually declare pre-BPM I as their major while satisfying the conditions for entrance into the major, although other majors can be declared.

To earn the B.A. degree offered by the College of Liberal Arts and Sciences, students must complete the general education requirements in that college and take at least 41 credits in design and 32 credits in the biological sciences.

Design courses	29
DSN S 131 Design Representation	
ARTIS 230 Drawing II	
ARTIS 233 Watercolor Painting	
ARTIS 308 Computer Modeling, Rendering and Virtual Photography

BPM I 326 Illustration and Illustration Software	
BPM I 327 Illustration as Communication	
BPM I 337 Application of Scientific Illustration Techniques	
BPM I 497 Illustration Internship	
12 credits chosen from a list of approved upper level courses in art and design	12
Biological Science courses	24
LAS 101 Orientation for Open Option and Preprofessional Students	
BIOL 211 Principles of Biology I	
BIOL 211L Principles of Biology Laboratory I	
BIOL 212 Principles of Biology II	

BIOL 212L	Principles of Biology Laboratory II	
BIOL 255	Fundamentals of Human Anatomy	
BIOL 256	Fundamentals of Human Physiology	
BIOL 351	Comparative Chordate Anatomy	
One of the following		3
BIOL 356	Dendrology	
BIOL 366	Plant Systematics	
BIOL 454	Plant Anatomy	
9 credits chosen from a list of approved biological science courses		9

Chemistry and Mathematics are also required as supporting courses. Students must earn a grade of C- or better in all art and science courses included in the major and must earn a cumulative GPA of 2.00 in both categories. A brochure is available in 102 Catt Hall that gives a detailed listing of the requirements.

Communication Proficiency Requirement. Students must earn a minimum of C in both ENGL 150 and ENGL 250 or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316.

Students in BPM I must complete a senior project or an internship experience (BPM I 497) in which they design and produce artwork that is suitable for publication or public display.

A minor in biological illustration is offered. A minimum of 17 credits must be taken, including 8 credits in biological science courses and 9 credits in art and design courses.

The biological sciences must include:

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1

The art and design courses must include:

BPM I 323	Scientific Illustration Principles and Techniques	3
BPM I 337	Application of Scientific Illustration Techniques	3
Advanced drawing, illustration, electronic media or painting course		3

For more information, contact the BPM I adviser in 102 Catt Hall or view the website listed above.

Community and Regional Planning

www.design.iastate.edu/communityplanning (<http://www.design.iastate.edu/communityplanning>)

Community and regional planning is a field of study aimed at understanding the ever-changing socioeconomic and physical environments of our communities and planning for their future. Planners evaluate and seize opportunities to solve problems. Planners work at multiple levels, and they are concerned with issues that affect every corner of the world: the preservation and enhancement of the quality of life in a community, the protection of the environment, the promotion of equitable economic opportunity; and the management of growth and change of all kinds.

Graduates of the Community and Regional Planning department are able to integrate planning knowledge and skills in a variety of practical applications, and can communicate effectively in written and oral form. Graduates will be qualified for a variety of entry-level positions. They will also be well prepared for graduate study in a variety of fields, including law, public policy, public health, environmental science, geography, sociology, urban design, and architecture.

Graduates of the Community and Regional Planning Department are expected to understand the structure and functions of urban settlements, including the history of planning and urban development and the processes for plan and policy making. Graduates should have skills in problem formulation, quantitative analysis, written/oral and graphic communications, collaboration, and in synthesizing and applying knowledge to practice. Graduates are expected to be able to assess the impact of plans and alternatives based on equity and social justice,

economic welfare and efficiency, environmental sustainability, and cultural heritage in the context of citizen involvement in decision making.

The curriculum is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning. Our students gain an education that, when combined with experience, supports eligibility for membership in the American Institute of Certified Planners.

The department administers two undergraduate minors, Urban Studies and Geographic Information Systems (GIS). The department cooperates in the undergraduate minors in Design Studies, Digital Media, Critical Studies in Design, Environmental Studies, and Sustainability.

Curriculum in Community and Regional Planning

The Department of Community and Regional Planning administers the 128 hour credit undergraduate program leading to the Bachelor of Science. Students have the opportunity to work with their faculty advisers to define their own areas of interest, which may include a minor.

The Community and Regional Planning Program can be completed in two to four years. Students may apply for admission to the program at any time during their enrollment at Iowa State University. If applying by transfer from another program or institution, admission is based on the student's cumulative GPA and a departmental review of course work. Transfer applications from students in programs in sociology, political science, history, geography, engineering, and other related disciplines are encouraged. Community and Regional Planning emphasizes responsibility and citizenship, writing and analytical ability, and critical thinking.

Total Degree Requirement: 128 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average; Completion of all requirements listed below.

Undergraduate Minors

The department of Community and Regional Planning offers 15-credit minors in Urban Studies and Geographic Information Systems (GIS).

The Urban Studies minor is earned by completing both CRP 201 (The North American Metropolis) and CRP 291 (World Cities and Globalization), plus 9 additional credit hours from the approved list of courses. At least 6 credit hours must be in courses numbered 300 or above at Iowa State. The College of Design requires students to earn a C or higher in at least 6 of the required 300-level credits. The minor must include at least nine credits that are not used to meet any other department, college or university requirement except the credit requirement for graduation. The Urban Studies minor is open to students from any college and any major.

Graduate Study

The Department offers the Master of Community and Regional Planning degree with areas of concentration in land use and transportation, community design and development, and rural and environmental planning. Students may design their own area of concentration with the assistance of their major professor. The primary focus of the M.C.R.P. degree is to prepare students with the education and practical skills to be leaders in the practice of planning. The program of graduate study is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning.

Degree requirements include completion of a 2-year, 48-credit program, including a required core (21 credits), electives (21-23 credits) and one of the following: capstone studio (4 credits), professional report (4 credits), or thesis (6 credits). The required core consists of C R P 532, 561, 563, 564, 566, 568 and 592. Students select electives in consultation with their Program of Study (POS) committee.

C R P 532	Community Planning Studio	3
C R P 561	Planning Theory for Practice	3
C R P 564	Introduction to Analytical Methods for Planning	3

C R P 568	Planning and Development	3
C R P 592	Land Use and Development Regulation Law	3

Admission to the M.C.R.P. program is by application to the department and to the Graduate College. Students with a Bachelors degree in planning or students who have taken highly relevant coursework may be able to waive up to 9 credits of course requirements. Students must petition the department's Director of Graduate Education (DOGE) in writing prior to the first day class of the student's first semester in the program to have credits waived. Students are encouraged to complete an internship in a planning office. No foreign language is required for the degree master of community and regional planning.

Double degree programs are offered with architecture (M.C.R.P./M.Arch.), business administration (M.C.R.P./M.B.A.), landscape architecture (M.C.R.P./M.L.A.) and sustainable agriculture (M.C.R.P./M.S.). The department also participates in the interdepartmental major in transportation (see Transportation). Information about our programs and how to apply can be obtained from the department's web page at: www.design.iastate.edu/communityplanning (<http://www.design.iastate.edu/CRP>), or send an email to crp@iastate.edu.

The department also offers a 13-credit graduate certificate in Geographic Information Systems (GIS) in spatial analysis, GIS applications and program management. The program is open to graduate students in all disciplines of the University. Information about the graduate certificate

may be obtained from the department office and from the department's web page at: www.design.iastate.edu (<http://www.design.iastate.edu>).

CRP currently offers several courses via distance learning to graduates and planning professionals interested in expanding their knowledge of planning. Further details of current distance course offerings may be found on the CRP website and on the ISU Continuing Education website. For more information, send an e-mail to crp@iastate.edu

Design

The Bachelor of Design is a 122.5 credit non-professional undergraduate degree program focused on the interdisciplinary nature of design and the power of the design studio as a place and method for generating ideas and solving problems. The core of the degree program is a series of forums and studios intended to connect history, theory and practice, and give students hands-on experience grappling with design challenges that vary in complexity and scale. Thematic course modules are taught by faculty from multiple design disciplines.

The Bachelor of Design offers opportunities for students to engage design thinking in a collaborative and interdisciplinary environment. The curriculum developed out of a shared philosophy that designers have the capacity to generate ideas and think creatively about society's increasing economic, social and environmental challenges. Innovation and entrepreneurship are encouraged and valued. BDes graduates are prepared for a wide range of career paths and graduate programs. The curriculum allows students to pursue double majors to couple design thinking with other discipline of interest, such as advertising, business, engineering, or journalism. Transfer students can also enter the program and complete the degree in as few as four semesters for students with Associate of Arts (AA) or Associate of Science (AS) degree or the equivalent in academic transfer credit. Upon completion, students may enter graduate programs in the design professions or other fields in which design thinking and critical analysis are valued.

<http://www.design.iastate.edu/design/curriculum.php>

Check the Schedule of Classes (<http://classes.iastate.edu>) for availability for DES courses.

Curriculum for Bachelor of Design

Total Degree Requirement: 122.5 cr.

Only 65cr. from a two-year institution may apply which may include up to 6 cr. in Design History/Theory/Criticism credit and 6 cr. in Design Skills credit; 16 technical cr.; 21 P-NP cr. of free electives; 2.00 minimum GPA average; Completion of all requirements listed below.

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Undergraduate Study

The department offers the degree Bachelor of Fine Arts (B.F.A.) in Graphic design.

B.F.A. Graphic Design. Emphasis is on creative problem solving, design process, visual organization and communication media, and interaction design. Graphic design graduates effectively integrate abstract thinking skills such as communication design theory, history, methodology; and technology. Components of visual communication including typography, symbology, time-based media, information design, branding, image creation, and other communication systems are integrated with an understanding of professional practice.

Curriculum in Graphic Design

The Curriculum in Graphic Design leads to a 123.5 credit undergraduate Bachelor of Fine Arts in Graphic Design including the 30 credit core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the

basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 34 graduate credit program is offered leading to the Master of Arts specialized in Environmental Graphic Design for students planning to undertake professional degree. (NOTE: Applicants without a degree in background in environmental graphic design may be required to complete up to 15 additional credits of coursework).

A 30 graduate credit program is offered leading to the Master of Arts specialized in Graphic Design for students planning to undertake professional degree. (NOTE: Applicants without a degree in background in graphic design may be required to complete up to 18 additional credits of coursework).

A 60 graduate credit post-professional graduate program is also offered leading to the degree Master of Fine Arts.

For more complete graduate program descriptions see Graduate Study under Graphic Design in the Courses and Programs section.

Total Degree Requirement: 123.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Admission into the BFA in Graphic Design Program is based on departmental resources and will be determined by overall cumulative grade point average following completion of 29.5 credits including DSN S 120, 131, ENGL 150 or 250, and other general education requirements. A portfolio review and essay will also be significant factors.

Graduate Study

The department offers the degrees of Master of Fine Arts (M.F.A.) in Graphic Design, Master of Arts (M.A.) in Graphic Design, and Master of Arts (M.A.) in Graphic Design with a specialization in environmental graphic design.

M.F.A. in Graphic Design

The Master of Fine Arts in Graphic Design is recognized as the terminal degree in the field and requires a minimum of 64-credits. M.F.A. graduates in Graphic Design are skilled in communication design, problem solving, and are adept in the use of visual language, symbology, and interaction. Graduates are proficient in the design of communications and the use of technologies that incorporate human interaction with environments, objects, and electronic and traditional publications. Students and faculty work collaboratively on a required thesis; integrating theory, creation, research, and design problem solving.

The M.A. in Graphic Design

This 30-credit degree focuses on preparing students for professional practice. This degree is well suited for individuals whose undergraduate degree is not within graphic design. The degree includes seminar courses in art and design, a studio concentration, a history course, a business practice course, courses outside of graphic design, and the completion of a Creative Component in graphic design.

The degree acquaints students with theory, research and methodology for professional practice and the opportunity to apply these in studio

investigations. Through studios focused on design thinking this degree will prepare students to practice in the quickly evolving field of graphic design. This program values cultural and intellectual diversity in its students, whose individual strengths are realized through a balanced and structured curriculum.

The M.A. in Graphic Design with a specialization in environmental graphic design

This 34-credit degree focuses on preparing student for 3-dimensional visual communication. Credits include a seminar course in art and design, a studio concentration, a history course, courses in design methods, and the completion of a Creative Component in environmental graphic design, an extensive EGD project that synthesizes what they have learned in the program. This program is ideal for students with an undergraduate degree in architecture, interior design, industrial design, landscape or graphic design, that have an interest in expanding their skills. Applicants without a degree or background in environmental graphic design may be required to complete up to 15 additional credits of coursework.

This degree provides a comprehensive exposure to all aspects of the discipline, including wayfinding, exhibit design, interaction, information design, and placemaking. This program is offers interdisciplinary opportunities in architecture, interior design, landscape architecture, planning, art and visual culture, and industrial design. Our Institute for Design Research and Outreach coordinates community design projects, which engage students in real world experiences. The M.A. in Art and Design, with specialization in Environmental Graphic Design is the first and only program of its kind in the United States.

Graphic Design Graduate Program

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the Master of Fine Arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student's undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students' progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review. Application and additional program information may be obtained from the Department of Graphic Design, College of Design, Iowa State University, Ames, IA 50011-3092.

MFA in Graphic Design Degree Requirement

Potential Prerequisites (based on Application materials), 9 cr.

ARTGR 587	Graphic Design History/Theory/ Criticism I	3
ARTGR 588	Graphic Design History/Theory/ Criticism II	3

Industrial Design

<http://www.design.iastate.edu/industrialdesign/index.php>

B.I.D. Bachelor of Industrial Design Students in this program take a carefully defined sequence of courses developed to give them exposure and practice in the areas of theory and skill required by industrial design.

These include drawing, form development, history, creative thinking, engineering principles, research, design methodology, human factors, computer-aided design, manufacturing and commercial factors. In their third year, students will select electives from concentration tracks arranged around specialty areas and current issues in the profession. The upper level studio classes are reserved for study abroad, internships, and sponsored projects with students from other departments and colleges.

Curriculum in Industrial Design

The Curriculum in Industrial Design leads to a 132.5 credit undergraduate Bachelor of Industrial Design including the 30.5 credit core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisors.

A 45 graduate credit post-professional graduate program is also offered leading to the degree Master of Industrial Design. (NOTE: Applicants without a degree or background in industrial design may be required to complete up to 18 additional credits of coursework.)

Total Degree Requirements: 132.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Graduate Study

The Master of Industrial Design (M.I.D.)

Innovation requires breaking boundaries and making connections between diverse disciplines. As a creative profession, industrial design deals with the design of innovative, sustainable and durable solutions for people, nonhumans, economy and society which may take many forms from tangible artifacts to expansive system designs. The Master of Industrial Design (M.I.D.) program at Iowa State University specifically emphasizes strategy and innovation with a strong focus on empathetic human-centered design research. It is centralized on the creation and application of new knowledge through in-depth investigations culminating in a written thesis. At the same time, students expand their design practice skills using innovative methodologies, collaboratively throughout the entire design process. Students explore, generate, transfer and implement multidisciplinary information and technologies into foundational knowledge for the discipline of industrial design.

The M.I.D. is traditionally recognized as a terminal degree in industrial design. The graduate program is designed to offer significant mix of skills and experiences, including faculty-directed research programs, internships, international travel, industry-sponsored coursework and design teaching experience. The graduate research focuses on three main areas: 1) Innovation through Design, 2) Design as Strategy, and 3) Human-Centered Design. These areas are defined by the existing faculty members' research and creative activities, and focus on developing a new type of industrial designer mastering in any one of these specializations. Program faculty have extensive expertise in design thinking,

human-centered research methods, cultural issues, product realization, design management, eco-design, social responsibility, and entrepreneurship.

The M.I.D. is a 63-credit study, distributed across three consecutive years. Applicants are required to have design and/or engineering degrees from accredited institutions or relevant industry experience.

M.I.D. Program Philosophy

The goal of the Industrial Design graduate program is to create an agile program that addresses current and emerging issues in design strategy, innovation and human-centered design. Its position, in one of the most comprehensive design colleges in the country, facilitates the integration of methodologies and skillsets from multiple disciplines.

Additionally, ties to the nationally ranked College of Engineering, the College of Business and industry collaborators create some truly unique degree specializations. Students are able to explore advanced concepts in such areas as extended manufacturer responsibility, supply chain and logistics, international vendor relations, advanced materials and biopolymers, and alternative business models.

Integrated Studio Arts

<http://www.design.iastate.edu/artvisualculture/index.php>

The Department of Art and Visual Culture offers degree programs focused on visual art and visual culture and offers courses in art history, studio arts and art education. Degree offerings include the Bachelor of Arts in Art and Design, Bachelor of Fine Arts in Integrated Studio Arts and the Master of Fine Arts in Integrated Visual Arts.

Undergraduate Study

B.F.A. Integrated Studio Arts

Students select from studio options including ceramics, digital media, drawing, furniture design, illustration, jewelry and metalsmithing, scientific illustration, two- and three-dimensional mixed media, painting, photography, printmaking, textiles, and new technological genres. Over the four-year course of study students will develop a portfolio and prepare for a professional practice in the visual arts. This concentration engages aesthetics, visual problem solving, critical thinking, and skill development, drawing on contemporary developments, historical and cultural theory, and studio practice.

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

The department offers no minor but participates in the undergraduate minors in Classical Studies, Critical Studies in Design, Design Studies and Digital Media.

Undergraduate Curriculum

The Curriculum in Integrated Studio Arts leads to a 126.5 credit undergraduate Bachelor of Fine Arts in Integrated Studio Arts. Admission into the program requires the completion of at least 30.0 credits, including the following courses: DSN S 102, 110 or 115, 131, and 183; 6 credits of Social Sciences/Humanities; 6 credits Math/Science; ENGL 150 (or test-out credit); LIB 160. Review of the student's portfolio and essay will also be significant factors.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the College of Design Core Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

Transfer students with studio credits from other programs, colleges, and universities must present for department review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are required to present this portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Total Degree Requirement: 126.5 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA average.

Admission into the BFA in Integrated Studio Arts requires the completion of 30.0 credits including the following courses DSN S 102, 131, 183, 110 or 115, 6 credits in Social Science/Humanities, 6 credits Math/Science, ENGL 150, LIB 160. A portfolio review and essay will also be significant factors.

Graduate Study

The department offers the Master of Fine Arts (M.F.A.) in Integrated Visual Arts. The M.F.A. curriculum in Integrated Visual Arts requires a minimum of 60 credits. The program of study includes seminar classes, a studio concentration, history and criticism courses, elective courses outside the department or area of study and the completion of a thesis exhibition or thesis.

M.F.A. graduates in Integrated Visual Arts link traditional studio disciplines with interdisciplinary studies. Graduates are prepared as visual artists to enter studio practice, business, higher education or new interdisciplinary fields. The M.F.A. is recognized as the terminal degree. A required thesis exhibition is composed of two parts: a substantial exhibition; and a written statement that describes the development of the work in the exhibition, its objectives, and its historical and cultural points of reference. A thesis may be an appropriate alternative, but some portion of the work should entail an element of design problem-solving in the form of a visual product.

Studio Courses: 39 cr.

Courses numbered ARTIS	27

Interior Design

<http://www.design.iastate.edu/interiordesign/index.php>

The department offers the degree Bachelor of Fine Arts (B.F.A.) in Interior Design.

B.F.A. Interior Design. Emphasis is on the student's application of design processes to creatively solve problems of the interior environment based on knowledge of human safety, functional utility, physical, psychological, and contextual fit. Graduates in interior design are competent in visual communication (sketching, drafting and computer aided design), design problem solving, space planning, lighting and color specification for interiors, finish and furniture selection, detailing interior construction and application of human factors. The curriculum is accredited by the Council for Interior Design Accreditation (CIDA) as providing professional level education

Transfer students with studio credits from other colleges and universities must present a portfolio of work done in those courses to determine if these credits can be applied toward specific studio requirements. Students are required to present their portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

The department offers no minor but participates in the undergraduate minors in Critical Studies in Design, Design Studies, and Digital Media.

Curriculum in Interior Design

The Curriculum in Interior Design leads to a 129.5 credit undergraduate Bachelor of Fine Arts in Interior Design including a 30.5 credit Core Design Program.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance and a portfolio of original work.

A 34 graduate credit program is offered leading to the master of arts, for students planning to undertake professional or design research-orientated pursuits. (NOTE: Applicants without a previous undergraduate degree in interior design may be required to complete up to 40 additional credits of deficiency work).

A 60 graduate credit post-professional graduate program is also offered leading to the degree master of fine arts.

For more complete graduate program descriptions see Graduate Study under Interior Design in the Courses and Programs section.

Consideration for admission into the undergraduate Interior Design curriculum requires completion of the 30.5 credit Core Design Program, including the following courses:

DSN S 102	Design Studio I	4
DSN S 115	Design Collaborative Seminar	0.5
or DSN S 110	Design Exchange Seminar I	
DSN S 131	Design Representation	4
DSN S 183	Design Cultures	3
Six credits of Social Science/Humanities		6
Six credits of Math/Science		6
ENGL 150	Critical Thinking and Communication	3
or ENGL 250	Written, Oral, Visual, and Electronic Composition	
LIB 160	Information Literacy	1

Admission is based on department resources and will be determined by a formal review at the end of the Core Design Program.

Transfer students with studio credits from other programs, colleges, and universities must present for departmental review a portfolio of work done in those courses in order to have the credits apply toward studio requirements. Students are advised to present portfolio upon admission and prior to registration for classes. Arrangements for this process must be made with department advisers.

Total Degree Requirement: 129.5 cr.

Graduate Study

The department offers the degrees of Master of Fine Arts (M.F.A.) in Interior Design, and Master of Arts (M.A.) in Art and Design, with degree specialization in interior design.

The M.A. in Art and Design with specialization in interior design requires a minimum of 34 credits including a studio concentration and work in research methods and human factors. Candidates focus on research in an area of specialization culminating in a written thesis comprised of original research. Graduates have a broad understanding of current interior design issues and design research, preparing them for special analytical aspects of design practice and further studies leading to the

PhD. Applicants without a degree in interior design may be required to complete up to 40 additional credits of course work.

M.F.A. graduates in Interior Design are proficient in visual communication skills, design theory, human factors, and space planning. The M.F.A. degree is considered a terminal degree in the interior design field. The degree requires completion of a written thesis comprised of original research.

Credit earned at Iowa State University or other institution for the Master of Arts degree may be applied toward the Master of Fine Arts degree at the discretion of the program of study committee.

Applicants to the graduate program should have an undergraduate major in an art or design area and demonstrate the ability to do technically competent and original work through the presentation of a slide or digital portfolio for faculty review. Past academic performance and the quality of studio work are critical in the admission process. A minimum 3.0 GPA in the student's undergraduate major is the standard for full admission to the graduate program. Admission is also determined by studio space available within the program area, which changes yearly due to graduate students' progress in their programs of study.

Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduates in the department can expect that additional supporting coursework, determined by the graduate faculty, will be required.

Prospective students are advised to contact the graduate coordinator with specific questions about admission procedures and portfolio review.

Application and additional program information may be obtained from the Department of Interior Design, College of Design, Iowa State University, Ames, Iowa, 50011-3092

Landscape Architecture

Landscape Architecture is an environmental design discipline. Landscape architects actively shape the human environment: they map, interpret, imagine, draw, build, conceptualize, synthesize, and project ideas

that transform landscapes. The design process involves creative expression that derives from an understanding of the context of site (or landscape) ecosystems, cultural frameworks, functional systems, and social dynamics. Students in our program learn to change the world around them by re-imagining and re-shaping the landscape to enhance its aesthetic and functional dimensions, ecological health, cultural significance, and social relevance. The profession addresses a broad range of landscapes in urban, suburban, rural, and wilderness settings. The scale of landscape architecture projects varies from broad, regional landscape analysis and planning to detailed, individual site-scale designs. The curriculum at Iowa State prepares students for this challenge as they develop their abilities to design and communicate ideas through a sequence of foundational courses and studios. The program seeks to produce graduates who understand the ethical, social, and environmental/ecological dimensions of issues involving changes in the landscape.

Graduates are active in a broad range of careers, such as sustainable site design, land development, park management, environmental advocacy, community planning, urban design, and others. In their professional lives, graduates apply their creative and technical skills in the planned arrangement of natural and constructed elements on the land with a concern for the stewardship and conservation of natural, constructed, and human resources. The resulting environments serve useful, aesthetic, safe, and enjoyable purposes. Graduates are able to communicate effectively with colleagues in the sciences and humanities as well as in the allied professions, and are prepared to work individually and in multidisciplinary teams to address complex problems dealing with the cultural/ecological environment.

The undergraduate curriculum includes one year of the college's Core Design Program followed by a four-year professional program. Admission to the professional program is subject to the approval of a faculty committee at the completion of the Core Design Program. The department also cooperates in the undergraduate minor in Design Studies, Critical Studies in Design, and Digital Media.

Following admission to the professional program, students embark on the traveling studio during the fall semester of their second year. This studio is a full semester's credit of integrated departmental courses and involves extensive travel within and beyond the great Midwest region of North America, to study regional natural systems and the cultural responses to those systems.

To enhance the study of landscape architecture in off-campus settings, the department requires students to choose from among the following three options during the spring and summer of their fourth year: a professional internship, an independent study abroad experience, or National Student Exchange. The department assists students with placement, and additional information is provided through the department and the College of Design's Career Services Office.

Personal laptop/notebook computers and appropriate software are regularly used in classes starting with the second year.

The undergraduate curriculum is fully accredited by the Landscape Architecture Accreditation Board (LAAB) and provides the education which, combined with experience, is necessary for professional license.

Curriculum in Landscape Architecture

The department offers graduate and undergraduate degree programs.

The undergraduate program consists of a five-year curriculum, requiring 149.5 credits, leading to the degree Bachelor of Landscape Architecture. These credits are distributed between a one-year Core Program of 30 credits and a four-year professional program of 119.5 credits.

Admission into the professional program depends upon available resources and is subject to the approval of a faculty committee at the completion of the Core Design Program. Applicants are reviewed on the basis of academic performance, a portfolio of original work, and a written essay.

The BLA from Iowa State University is an LAAB (Landscape Architectural Accreditation Board)-accredited professional degree program. In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for professional licensure. The LAAB is the sole entity recognized by the Council for Higher Education Accreditation to accredit U.S. first professional degree programs in landscape architecture at the Bachelor's and Master's levels.

The department also offers a graduate program leading to the degrees of Master of Landscape Architecture or Master of Science in Landscape Architecture. For more complete graduate program descriptions, contact the department or go to the Graduate program link on the College of Design web page.

Total Credits: 150.5

Additionally: Each student needs to take 3 credits of a US Diversity (usually covered by LA 272) and 3 credits of an International Perspectives course (usually covered by LA 373). Students also need to take at least 6 credits of 300 level or above in the combined areas of communication, science, math, humanities, and social science (6 total from all the areas).

Graduate Study

The department offers two primary opportunities for professional and postprofessional study: the M.L.A. degree (Master of Landscape Architecture), which provides the skills and knowledge for the application of research and/or scholarly methods to professional practice and the M.S.L.A. degree (Master of Science in Landscape Architecture), which focuses on research on the built environment. Students are also able to pursue double degrees of M.L.A. with Master of Community and Regional Planning (MLA/MCRP), Master of Urban Design (MLA/MUD), and Master of Design of Sustainable Environment (MLA/Mdes SE). Minor work is offered to students taking major work in other departments.

The M.L.A. is an accredited professional degree designed for students with or without an undergraduate degree in landscape architecture. The degree provides skills and knowledge as measured by the licensing exam for students seeking to practice as a licensed professional in the public or the private sectors. The M.L.A. degree also offers competency for students interested in post professional study and research. Minor work is offered to students taking major work in other departments.

The program offers three concentration tracks in the following topical area – Theory/Urbanism, Technology/Ecology, Advocacy/Community – through coursework and/or an optional thesis and creative component. The concentration in one of the three tracks will be determined by the student in consultation with his/her major professor. It will also be designated in the Program of Study (PoS), to be completed by the end of the first year of study. Concentration electives may be selected from within the department and college and from an approved list. In their final year students will be able to take Creative Component or Thesis option with the approval of their major professor and the department Graduate Committee.

The M.S.L.A. is an unaccredited, research degree addressing landscape architecture as a scholarly endeavor. The degree is primarily intended as an advanced professional degree targeted at students already possessing an accredited first professional degree (B.L.A., B.Arch, M.Arch, etc.) and wishing to pursue in-depth, independent research. The M.S.L.A. is granted upon completion of 36 credits (at least 30 of which are completed at the 500-level) and the acceptance of a thesis or creative component. Periodically, students without accredited, first professional design degrees wish to complete an unaccredited master's degree in landscape architecture. Such students may, in special cases, be allowed to pursue an M.S.L.A., provided they take an additional 12 credits of coursework, at least 6 of which must be an approved design studio, for a total of 48 hours of coursework.

Students interested in the double degree programs should contact the departments to receive a detailed description of requirements. The department also offers courses in the Graduate Certificate Program in Geographic Information Systems (GIS), administered by the Department of Community and Regional Planning. Students are able to take advantage of increasing offerings of interdisciplinary graduate-level electives in all college departments.

Design and Planning: 33 cr.

L A 601 Design Representation	3
L A 602 Studio I – Land/Form & Plant/Scap	6
L A 603 Studio II – Living Systems	6

Elective: 3 cr.

Total 82 cr.

Approved Distribution Electives:

LA History elective (3cr.)*

Courses offered on term-by-term basis

L A 590D: Special Topics: History
L A 578D: Landscape Architecture: History

Planning elective (3cr.)**

L A 591: Environmental Law and Planning
C R P 561: Planning Theory for Practice
C R P 592: Land Use and Development Regulation Law
C R P 529: International Planning in Developing Countries

Theory elective (3 cr.)***

Theory course in your concentration area (Theory, Technology or Advocacy) – Select from CRP, ARCH, MUD, SUS E, IND D, or other relevant field in the college or university

Concentration Track Electives

1. Theory/History/Urbanism MLA/MUD
2. Advocacy/Planning/Community MLA/CRP
3. Technology/Ecology/Materiality MLA/MDES SE

Concentration track electives from approved list on separate sheet

Students may also take courses from other departments across college

Elective

3 cr. Non-LA course from college or university courses (incl. LA 509: Field Trip)

Design Studies

Interdepartmental Undergraduate Program

offered in the College of Design: M Arch/M.U.D., M CRP/M.U.D., and M L A/M.U.D.

In this three-semester (summer, spring, fall), 36-credit degree program, students integrate design into the understanding and framing of urbanized environments by engaging directly in a community of inquiry and practice—learning to create more adaptable, flexible and resilient cities and regions within the context of a changing world.

Through this program, students will:

- gain knowledge of new practices, technologies, and methods of urban design.
- learn advanced thinking skills and integrate concepts, ideas and approaches in a team-based, interdisciplinary design process, and
- acquire knowledge and skills that support professional leadership in research and design work focused on local, regional and global issues in the contemporary built environment.

Application information is available at

<http://www.design.iastate.edu/urbandesign.php>

Aligning Education in Engineering with the University Mission

The mission of Iowa State University is to create, share, and apply knowledge to make Iowa and the world a better place. Students will become broadly educated, global citizens who are culturally informed, technologically adept, and ready to lead. The College of Engineering echoes this philosophy and emphasizes preparing its graduates to meet the challenges of the 21st century.

Engineering education seeks to develop a capacity for objective analysis, synthesis, and design to obtain a practical solution. The engineering programs at Iowa State University are designed to develop the professional competence of a diverse student body and, by breadth of study, to prepare students to solve the technical problems of society while considering the ethical, social, and economic implications of their work at state, national and global levels.

The focus of each curriculum is to strengthen students' critical thinking, creative abilities, and communication skills. Students in engineering will have the opportunity for interdisciplinary and experiential learning through learning communities, service learning, internships and cooperative education, as well as research, capstone, and study abroad experiences.

The problem-solving skills learned from an engineering education at Iowa State University also provide an excellent launching pad for careers not only in engineering, but also medicine, law, business, and many other fields.

Registration as a professional engineer, which is granted by each individual state, is required for many types of positions. The professional

curricula in engineering at Iowa State University are designed to prepare a graduate for subsequent registration in all states.

Seniors in accredited curricula of the College of Engineering are encouraged to take the Fundamentals of Engineering Examination toward professional registration during their final academic year. Seniors in engineering curricula who have obtained at least 6 semester credits in surveying may take the Fundamentals Examination for professional registration as land surveyors.

Concurrent Graduate/ Undergraduate Programs

Several engineering programs offer the opportunity for well-qualified undergraduate juniors and seniors to pursue a graduate degree in their program while finishing the undergraduate requirements. The programs offering concurrent undergraduate/graduate degrees are: aerospace engineering, agricultural engineering, biological systems engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, materials engineering, and mechanical engineering.

Programs offering concurrent bachelor of science/master of business administration degrees are: aerospace engineering, agricultural engineering, biological systems engineering, civil engineering, computer engineering, electrical engineering, industrial engineering and mechanical engineering. For more information, refer to the graduate study sections for each engineering program. Advanced work in engineering is offered in the post-graduate programs. See the Graduate College section of this catalog.

Joint Undergraduate Programs

A bachelor of science degree in software engineering is offered in the College of Engineering and the College of Liberal Arts and Sciences. This program is jointly administered by the Department of Electrical and Computer Engineering and the Department of Computer Science.

Accreditation

Twelve undergraduate engineering programs are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

These twelve programs are: aerospace, agricultural, biological systems, chemical, civil, computer, construction, electrical, industrial, materials, mechanical and software engineering. Accreditation status is indicated in the Courses and Programs section for each engineering program.

Organization of Curricula

All curricula in engineering are designed as four-year programs. They are structured in two phases: a basic program and a professional program. The basic program consists primarily of subjects fundamental and common to all branches of engineering and includes chemistry, physics, mathematics, engineering computations, and English. The professional phase of a curriculum includes intensive study in a particular branch of engineering, as well as a continuation of supporting work in mathematics, basic sciences, humanities, and social sciences.

Students should complete the requirements of the basic program before proceeding to a professional program.

Preparation for the Engineering Curricula

In addition to the standard university admission requirements, the college also requires 2 years of a foreign language. Other high school credits particularly important to students wishing to study engineering include:

- 2 years of algebra,
- 1 year of geometry
- 1/2 year of trigonometry
- 1/2 year of pre-calculus
- 1 year each of chemistry, biology, and physics
- 3 years of social science
- 4 years of English

See Index for specific admission requirements.

Placement in mathematics, English, and chemistry will generally be based on high school preparation and test scores. Advanced placement is possible for exceptionally well-prepared students. Students who are not adequately prepared may be encouraged or required to take additional preparatory coursework and should expect to spend more than the customary time to complete the engineering program. Any coursework which is preparatory or remedial in nature cannot be used to satisfy credit requirements for graduation in any of the engineering curricula.

Engineering Basic Program

Please see "Basic Program for Engineering Curricula" section.

Requirement for Graduation

In order to graduate in a professional engineering curriculum, students must have a minimum GPA of 2.00 in a department-designated group of 200-level and above courses known as the Core. These courses will total no fewer than 24 semester credits.

Engineering Minors

The College of Engineering offers four undergraduate minors which are open only to students in the College of Engineering. These are minors in biomedical engineering, energy systems, engineering sales and nondestructive evaluation. These minors must include at least nine credits which are beyond the total used to meet curriculum requirements.

The biomedical engineering minor is a 16 credit interdisciplinary program that complements a student's major discipline by providing additional insight into the interactions between various engineering disciplines and Biological systems. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Biomedical Engineering in Courses and Programs.

The energy systems minor is a 15 credit program that provides engineering students with focused educational opportunities in the broad area of energy systems. Students will understand broad energy perspectives, the language of energy systems and the economic, environmental, and policy issues related to energy. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Energy Systems in Courses and Programs or see <http://www.me.iastate.edu/energy-systems-minor/>.

The engineering sales minor is a 15 credit minor that complements the technical training in the student's major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales

careers. The minor is administered by a supervisory faculty committee. For minor course requirements, refer to Engineering Sales in Courses and Programs.

The nondestructive evaluation minor (16 credit minimum) open to engineering students who have met the basic program requirements and are not on academic warning or probation. The minor is supervised by an inter-disciplinary Engineering faculty committee. For minor course requirements, refer to Nondestructive Evaluation Engineering in Courses and Programs.

Engineering Minor (Interdisciplinary)

The College of Engineering offers undergraduate minors in wind energy and nuclear engineering which are open to all students at ISU who meet the prerequisites. The wind energy minor is a 15 credit minor which enables students to acquire an interdisciplinary knowledge of the wind energy industry. There are two required courses; the remaining credits are chosen from a list of elective courses that are related to wind energy. The minor is administered by a supervisory faculty committee from several departments. For minor course requirements, refer to Wind Energy Minor in Courses and Programs. The nuclear engineering minor is a 15 credit minor which enables engineering students to acquire a basic and fundamental knowledge of nuclear sciences and engineering. Courses are provided at Iowa State University and also transfer courses that have been evaluated as substitutes for ISU courses may be used toward the minor. For minor course requirements, refer to Nuclear Engineering in Courses and Programs.

Undergraduate Majors and Minors Outside the College of Engineering

In addition to the engineering degree program, students may earn majors or minors in other colleges of the university. A major or minor program must meet all requirements of the offering department or program and its college and contain credits beyond the requirements for a B.S. degree in engineering. A minimum of 15 additional credits is required for each major area of study and an additional 9 credits for each minor.

Advising System

The purpose of the advising system in the College of Engineering is to work constructively with students in developing their individual academic programs and to provide a resource contact person for students during their college careers.

The college offers an orientation program during the spring and summer for students planning to enter in the fall, and during the fall for students planning to enter in the spring. Transfer students may also complete orientation online. All entering students are encouraged to attend orientation which includes meeting with an academic adviser to register for classes. Placement assessments given during the orientation program help determine the student's current level of proficiency which enables the academic adviser to prepare an appropriate course schedule for the student.

Special Programs

All engineering students are strongly encouraged to participate in either the cooperative education or internship programs. Students who are qualified to participate in the engineering honors program are also urged to do so. These programs are integrated into the professional engineering curricula and may require additional work. However, both these professional and academic programs offer opportunities that will

enrich the standard academic experience. Engineering students are also encouraged to take advantage of study abroad opportunities available through the College of Engineering's International Programs Office.

a. Cooperative Education Program. The College of Engineering offers, through its curricula, an experiential education program. Enrollment in the program allows students to gain practical work experience in their career field while attending college. In general, students enrolled in the co-op program will require an additional semester to complete curriculum requirements.

Cooperative programs are a mechanism by which a student may work full-time for one semester per academic or calendar year. The student has the opportunity to assess career paths within her/his chosen curriculum and the employer evaluates the student's potential as a future full-time employee. Both domestic and international co-op programs are allowed.

Cooperative education students pay no tuition to the university during their work periods and do not receive credit hours for their work experience. Students register for a non-credit cooperative education course (398) for fall or spring and are considered full-time students while enrolled in these courses. For additional information contact your academic adviser and the Office of Engineering Career Services.

b. Internship Program. The College of Engineering offers, through its curricula, an experiential education program. Internships are a mechanism by which a student may work full-time for the summer.

Enrollment in the program allows students to gain practical work experience in their career field while attending college. Internship students pay no tuition to the university during their work periods and do not receive credit hours for their work experience. Students who register for the internship course (396) for the summer are considered to be full-time students. For additional information contact your academic adviser and the Office of Engineering Career Services.

c. Honors Program. The College of Engineering participates in the University Honors Program (see Index). The honors program is designed for students with above average ability who wish to individualize their programs of study. For further details consult the chair of the Engineering College Honors Program Committee or your departmental honors program adviser.

d. Engineering International Engagement. In a world where the sun never sets, engineers must be prepared to understand other cultures and other ways of doing business. Engineers must expand their exportable skills, language and cross-cultural skills.

The College of Engineering has formed worldwide partnerships to create opportunities for students to work and study with leading universities in other countries and multinational corporations. With careful planning, students may earn credit in courses that fulfill their degree requirements. To learn more about work and study abroad, visit the Engineering International Engagement website: <http://www.engineering.iastate.edu/studyabroad/>

Engineering

Basic Program for Engineering Curricula

The first year program is much the same for all professional curricula in the College of Engineering. Students normally enroll in the majority of the basic program courses during their first year. The basic program is a set of courses common to all engineering curricula. Since students may also begin curriculum designated requirements during their first year, they will want to select a curriculum as soon as possible. This will enable them to receive the bachelor's degree in a minimum time.

Students enrolled in the College of Engineering must satisfy the following requirements before enrolling in engineering courses (200-level and above):

1. Completion of the Basic Program with a GPA of at least 2.00 for this set of courses. Transfer credits are not included in the GPA computation.
2. An ISU cumulative grade point average of at least 2.00.
3. Any transfer courses applied to the degree must be at least a C.

The following are the only exceptions to this rule:

- a. Students who have completed all of their coursework while enrolled in the College of Engineering, but have not met three basic

program requirements, may enroll for not more than two semesters in 200-level engineering courses.

b. Iowa State students not pursuing an engineering degree may generally take engineering courses without restrictions provided they meet the prerequisites and space is available.

c. Only the first two semesters of 200-level and above engineering courses, taken at ISU while a student is not enrolled in the College of Engineering, can be applied toward an engineering degree.

Entering undergraduates must demonstrate proficiency in trigonometry based on test scores, or by having transfer credits from a college trigonometry course, or by passing MATH 143 Preparation for Calculus before enrolling in MATH 165 Calculus I.

The Department of English may recommend placement in one or more sections of ENGL 099 or ENGL 101 English for Native Speakers of Other Languages if the placement test administered to students whose first language is not English indicates deficiencies. Satisfactory completion of the recommended English course(s) will be required of students to complete their Basic Program.

Basic Program

(A minimum GPA of 2.00 required for this set of courses. Transfer courses are not used in the Basic Program GPA computation).

MATH 165	Calculus I	4
MATH 166	Calculus II	4
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
CHEM 167	General Chemistry for Engineering Students *	4
or CHEM 177	General Chemistry I	
PHYS 221	Introduction to Classical Physics I	5
ENGR 101	Engineering Orientation ***	R
LIB 160	Information Literacy	1
ENGR 160	Engineering Problems with Computer Applications Laboratory	3

Or one of the following in place of ENGR 160**

AER E 160	Aerospace Engineering Problems With Computer Applications Laboratory	
A B E 160	Systematic Problem Solving and Computer Programming	
C E 160	Engineering Problems with Computational Laboratory	
CH E 160	Chemical Engineering Problems with Computer Applications Laboratory	
CPR E 185	Introduction to Computer Engineering and Problem Solving I	
E E 185	Introduction to Electrical Engineering and Problem-Solving I	
I E 148	Information Engineering	
M E 160	Mechanical Engineering Problem Solving with Computer Applications	
S E 185	Problem Solving in Software Engineering	

Total Credits 27

ENGL 250 Written, Oral, Visual, and Electronic Composition is normally taken in the second year. However, students who advance place into this course may be able to enroll during their first year. Credit for ENGL 150 Critical Thinking and Communication is earned upon successful

completion of ENGL 250 Written, Oral, Visual, and Electronic Composition, but only when ENGL 250 Written, Oral, Visual, and Electronic Composition is completed at Iowa State.

In addition to the basic program courses listed above, curriculum designated courses normally taken the first year of each engineering curricula are listed below.

Curriculum Designated Requirements

Aerospace Engineering

AER E 161	Numerical, Graphical and Laboratory Techniques for Aerospace Engineering	3
AER E 192	Aerospace Seminar	R
GenEd Electives		3

Agricultural Engineering

CHEM 167L	Laboratory in General Chemistry for Engineering	1
A B E 110	Experiencing Agricultural and Biosystems Engineering	1
A B E 170	Engineering Graphics and Introductory Design	3
SSH Elective		3

Biological Systems Engineering

CHEM 167L	Laboratory in General Chemistry for Engineering	1
A B E 110	Experiencing Agricultural and Biosystems Engineering	1
A B E 170	Engineering Graphics and Introductory Design	3
SSH Elective		3

Chemical Engineering

CHEM 177	General Chemistry I *	4
CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 178L	Laboratory in College Chemistry II	1
SSH Elective		3

Civil Engineering

CHEM 177	General Chemistry I *	4
CHEM 177L	Laboratory in General Chemistry I	1
C E 105	Introduction to the Civil Engineering Profession	1
C E 170	Graphics for Civil Engineering	2
C E 111	Fundamentals of Surveying I	3
SSH Elective		3

CIVIL ENGINEERING: STUDENTS IN THE GENERAL EMPHASIS IN C E HAVE TWO CHEMISTRY/PHYSICS SEQUENCE OPTIONS. THE ENVIRONMENTAL EMPHASIS REQUIRES OPTION 1.

OPTION 1

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 178L	Laboratory in College Chemistry II	1
PHYS 221	Introduction to Classical Physics I	5

OPTION 2

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1

PHYS 221 Introduction to Classical Physics I 10
& PHYS 222 and Introduction to Classical Physics II

Computer Engineering

COM S 227 Introduction to Object-oriented Programming 4
CPR E 166 Professional Programs Orientation R
Gen Ed Elective 3

Construction Engineering

CON E 121 Cornerstone Learning Community: Orientation to Academic Life 1
CON E 122 Cornerstone Learning Community: Orientation to Professional Life 1
C E 170 Graphics for Civil Engineering 2

Electrical Engineering

E E 285 Problem Solving Methods and Tools for Electrical Engineering 4
E E 166 Professional Programs Orientation R
Gen Ed Elective 3

Industrial Engineering

I E 101 Industrial Engineering Profession R
SSH Elective 6

Materials Engineering

CHEM 177 General Chemistry I * 4
CHEM 177L Laboratory in General Chemistry I 1
CHEM 178 General Chemistry II 3
CHEM 178L Laboratory in College Chemistry II 1
ENGR 160 Engineering Problems with Computer Applications Laboratory 3
Gen Ed Elective 3
PHYS 221 Introduction to Classical Physics I (scheduled in sophomore year) 5

Mechanical Engineering

M E 170 Engineering Graphics and Introductory Design 3
Gen Ed Elective 3

Software Engineering

S E 166 Careers in Software Engineering R
COM S 227 Introduction to Object-oriented Programming 4
COM S 228 Introduction to Data Structures 3

The student's adviser may require or recommend courses in addition to those specified above if the preparation and progress of the student are such that additional courses are necessary or desirable.

*Students planning to enroll in C E¹, Ch E, or Mat E will find CHEM 177 General Chemistry I to be a better preparation for CHEM 178 General Chemistry II. However CHEM 167 General Chemistry for Engineering Students, is accepted as a substitute for CHEM 177 General Chemistry I for those students declaring one of these curricula after having completed CHEM 167 General Chemistry for Engineering Students.

**Recommended choices by program:

Credit hours for graduation will be given for any one of the following without increasing a curriculum's minimum number of credits required

for graduation. It is recommended that students choose the class associated with their chosen major:

AER E 160	Aerospace Engineering Problems With Computer Applications Laboratory	3
A B E 160	Systematic Problem Solving and Computer Programming	3
C E 160	Engineering Problems with Computational Laboratory	3
CH E 160	Chemical Engineering Problems with Computer Applications Laboratory	3
ENGR 160	Engineering Problems with Computer Applications Laboratory	3
I E 148	Information Engineering	3
CPR E 185	Introduction to Computer Engineering and Problem Solving I	3
E E 185	Introduction to Electrical Engineering and Problem-Solving I	3
M E 160	Mechanical Engineering Problem Solving with Computer Applications	3
S E 185	Problem Solving in Software Engineering	3

***Students enrolled in the joint software engineering degree program will take S E 101 Software Engineering Orientation.

Engineering Courses (ENGR)

Most of the courses with the designator of Engr are broad-based engineering courses applicable to all engineering disciplines. Several of these courses are part of the basic program which is required for engineering students. All courses are administered by the college and with the exception of ENGR 160 Engineering Problems with Computer Applications Laboratory, ENGR 340 Introduction to Wind Energy: System Design & Delivery, ENGR 466 Multidisciplinary Engineering Design and ENGR 467 Multidisciplinary Engineering Design II Multidisciplinary Engineering Design II are coordinated through Engineering Student Services in Engineering Academic and Student Affairs.

ENGR 160	Engineering Problems with Computer Applications Laboratory	3
ENGR 340	Introduction to Wind Energy: System Design & Delivery	3
ENGR 466	Multidisciplinary Engineering Design	3
ENGR 467	Multidisciplinary Engineering Design II	3

Aerospace Engineering

Undergraduate Study

For undergraduate curriculum in aerospace engineering leading to the degree bachelor of science. This curriculum is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

The aerospace engineer is primarily concerned with the design, analysis, testing, and overall operation of vehicles which operate in air and space. The curriculum is designed to provide the student with an education in the fundamental principles of aerodynamics, flight dynamics, propulsion, structural mechanics, flight controls, design, testing, and space technologies. A wide variety of opportunities awaits the aerospace engineering graduate in research, development, design, production, sales, and management in the aerospace industry, and in many related

industries in which fluid flow, control, structural, and transportation challenges play major roles.

Make To Innovate (M:2:I) is an exciting new program in the Aerospace Engineering Department that engages students in hands-on projects to augment their understanding of engineering fundamentals.

A cooperative education program in aerospace engineering is available in cooperation with government agencies and industry. The usual four-year curriculum is extended for students who participate in alternating industrial experience periods and academic periods. This arrangement offers valuable practical experience and financial assistance during the college years.

Undergraduate Mission and Educational Objectives

The Department of Aerospace Engineering maintains an internationally recognized academic program in aerospace engineering via ongoing consultation with students, faculty, industry, and aerospace professionals. Results of these consultations are used in a process of continuous academic improvement to provide the best possible education for our students.

Mission statement:

The mission of the aerospace engineering program is to prepare the aerospace engineering student for a career with wide-ranging opportunities in research, development, design, production, sales, and management in the aerospace industry and in the many related industries which are involved with the solution of multi-disciplinary, advanced technology problems.

Program Educational Objectives:

Within three to five years after graduation, Aerospace Engineering alumni will have become actively contributing, valued engineers showing professional growth or be actively pursuing an advanced degree in graduate school. They will have achieved this by:

- Utilizing their strong foundation in science, mathematics and engineering.
- Demonstrating teamwork, leadership, and integrity.
- Being aware of the societal, economic and environmental impact of their work.
- Demonstrating critical thinking and effective communication skills.
- Ensuring superior quality, customer satisfaction, and safety outcomes in their work.

Curriculum in Aerospace Engineering

Leading to the degree bachelor of science.

Total credits required: 129.0.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

International Perspectives¹: 3 cr.

U.S. Diversity¹: 3 cr.

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (C or better in this course)	3
----------	--	---

ENGL 250	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
LIB 160	Information Literacy	1
One of the following:		3
ENGL 314	Technical Communication (C or better in this course)	
ENGL 309	Proposal and Report Writing (C or better in this course)	

General Education Electives: 12.0 cr.²

Complete 12 cr. General Education Electives are requirements for graduation so may not be taken on a P-NP basis.

Basic Program: 27 cr.

A minimum GPA of 2.00 required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 167	General Chemistry for Engineering Students	4
or CHEM 177	General Chemistry I	
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3

PHYS 222	Introduction to Classical Physics II	5
Total Credits		13

Aerospace Engineering Core: 44 cr.

A minimum GPA of 2.00 required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Core GPA):

AER E 261	Introduction to Performance and Design	3
AER E 310	Aerodynamics I: Incompressible Flow	3
AER E 311	Aerodynamics II: Compressible Flow	3
AER E 321	Flight Structures Analysis	3
AER E 331	Flight Control Systems I	3
AER E 322	Aerospace Structures Laboratory	2
AER E 344	Aerodynamics and Propulsion Laboratory	3
AER E 351	Astrodynamicics I	3
AER E 355	Aircraft Flight Dynamics and Control	3
AER E 411	Aerospace Vehicle Propulsion I	3
AER E 421	Advanced Flight Structures	3

AER E 461	Modern Design Methodology with Aerospace Applications	3
AER E 462	Design of Aerospace Systems	3
E M 324	Mechanics of Materials	3
M E 231	Engineering Thermodynamics I	3

Total Credits **44**

Other Remaining Courses: 33 cr.

E M 274	Engineering Statics	3
E M 345	Engineering Dynamics	3
MAT E 273	Principles of Materials Science and Engineering	3
AER E 161	Numerical, Graphical and Laboratory Techniques for Aerospace Engineering	3
AER E 361	Computational Techniques for Aerospace Design	3
AER E 362	Aerospace Systems Integration	3
3 credits from the following		3
AER E 412	Aerospace Vehicle Propulsion II	
AER E 417	Experimental Mechanics	
AER E 422	Vibrations and Aeroelasticity	
AER E 423	Composite Flight Structures	
AER E 426	Design of Aerospace Structures	
AER E 432	Flight Control Systems II	
AER E 442	V/STOL Aerodynamics and Performance	
AER E 446	Computational Fluid Dynamics	
AER E 448	Fluid Dynamics of Turbomachinery	
AER E 451	Astrodynamics II	
AER E 464	Spacecraft Systems	
AER E 481	Advanced Wind Energy: Technology and Design	
One of the following:		3
ENGL 314	Technical Communication (C or better in this course)	
ENGL 309	Proposal and Report Writing (C or better in this course)	
Technical Electives (see below) ²		3
Career Electives (see below) ²		6
Total Credits		33

Technical Electives, 3 cr. and Career Electives, 6 cr. selected from preceding Aer E list or departmental-approved 300-level or above courses relevant to technical and career areas.

Seminar/Co-op/Internships/Flight Experience:

AER E 192	Aerospace Seminar	R
AER E 291	Aerospace Advising Seminar	R
AER E 292	Aerospace Advising Seminar	R
AER E 301	Flight Experience	R
AER E 391	Aerospace Advising Seminar	R
AER E 392	Aerospace Advising Seminar	R
AER E 491	Aerospace Advising Seminar	R

Co-op and internships are optional

- Choose from department approved list. (http://www.aere.iastate.edu/students/undergraduate_program)
- See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Total Credits: 129

- These university requirements will add to the minimum credits of the program unless the university-approved courses are also allowed by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.

Nondestructive Evaluation (NDE)

The NDE Minor (http://catalog.iastate.edu/collegeofengineering/non_destructiveevaluationengineering) is multidisciplinary and open to undergraduates in the College of Engineering.

Graduate Study

The department offers graduate programs that lead to the degrees master of engineering, master of science, and doctor of philosophy with major in aerospace engineering and minor work to students taking major work in other departments. For all graduate degrees, it is possible to establish a co-major program with another graduate degree-granting department. Within the aerospace program, students can specialize in one or more of the following areas: aerospace systems design, atmospheric and space flight dynamics, computational fluid dynamics, control systems, wind engineering, fluid mechanics, optimization, structural analysis, and non-destructive evaluation.

Master of Science and Master of Engineering

The Master of Science degree requires a thesis and has strong research emphasis. The Master of Science degree is recommended for students who anticipate entering a doctoral program later. The Master of Engineering degree does not require either research credits or a thesis and is intended for students who do not anticipate pursuing a doctoral degree. The Master of Engineering degree can be completed with coursework only or with a combination of coursework and creative component. Credits for creative component will be obtained by registering for **AerE 599 Creative Component**. A written report and an oral presentation will be given to the student's graduate committee.

At least 30 credits of acceptable graduate work are required for both the Master of Science and the Master of Engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (<http://www.aere.iastate.edu/wp-content/blogs.dir/13/files/2011/09/Graduate-Handbook-Fall-2011.pdf>).

Bachelor of Science/Master of Science Concurrent Degree Program

The department offers concurrent BS/MS and BS/ME degree programs (<http://www.aere.iastate.edu/students/concurrent-degrees>) and a concurrent BS/MBA degree program which offer an opportunity for well-qualified Iowa State juniors and seniors to begin working on a master's degree before completing a bachelor's degree. The concurrent degree programs reduce by one year the normal time period for completing both degrees separately.

Preparation for Graduate Work

The normal prerequisite for major graduate work in aerospace engineering is the completion of an undergraduate curriculum substantially equivalent to that required of aerospace engineering students at this university. Due to the diversity of interests of aerospace faculty, students whose prior undergraduate or graduate education has been in allied engineering and/or scientific fields may also qualify. In such cases, it may be necessary for the student to take additional work to provide the requisite aerospace background. A prospective graduate student is urged to specify the degree program and the specific field(s) of interest on the application for admission.

Courses are offered at the times stated in the course description. Where no specific time of offering is stated, the course may be offered during any semester provided there is sufficient demand.

Graduate Minor Work

Minor work for aerospace engineering majors is usually selected from mathematics, physics, electrical engineering, engineering mechanics, mechanical engineering, materials science, meteorology, computer science, and computer engineering.

Agricultural Engineering

For the undergraduate curriculum in agricultural engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Program Criteria for Agricultural Engineering Programs by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

Curriculum Educational Goal, Objectives, and Learning Outcomes:

Goal: To educate students in the analysis and design of machinery, animal housing, and environmental systems for the production, processing, storage, handling, distribution, and use of food, feed, fiber and other biomaterials, and the management of related natural resources, by integrating basic physical and biological sciences with engineering design principles.

Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their agricultural engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Student Outcomes: At graduation, students will have developed and demonstrated these outcomes:

- (a) an ability to apply knowledge of mathematics, science, and engineering;
- (b) an ability to design and conduct experiments, as well as to analyze and interpret data;
- (c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- (d) an ability to function on multidisciplinary teams;
- (e) an ability to identify, formulate, and solve engineering problems;
- (f) an understanding of professional and ethical responsibility;
- (g) an ability to communicate effectively;
- (h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- (i) a recognition of the need for, and an ability to engage in life-long learning;

(j) a knowledge of contemporary issues;

(k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Graduates find employment in diverse ag- and bio-related industries and government agencies dealing with agricultural machines and buildings, animal and environmental control, grain processing and handling, soil and water resources, food, biorenewables, and biotechnology. Their work involves engineering design, development, testing, research, manufacturing, consulting, sales, and service. Students are highly encouraged to participate in either cooperative education or internship programs.

The department also offers a bachelor of science curriculum in biological systems engineering. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology.

Well-qualified juniors and seniors in agricultural engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in agricultural engineering and a master of science degree in agricultural engineering. A concurrent bachelor of science and master of business administration program is also offered by the department. Refer to Graduate Study for more information.

Curriculum in Agricultural Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required: 128 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

(Minimum GPA of 2.00 in this set of courses)

ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)	3
LIB 160	Information Literacy	1
Communication Elective: One of the following (Must have a C or better in this course)		3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
SP CM 212	Fundamentals of Public Speaking	
MKT 343	Personal Sales	

Social Sciences and Humanities: 12 cr.^{1,2}

3 credits from international perspectives-university approved list	3
3 credits from U.S. diversity-university approved list	3

6 credits from Social Sciences and Humanities courses-department approved list

Total Credits **12**

Basic Program: 27 cr.

A minimum GPA of 2.00 required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

A B E 160	Systematic Problem Solving and Computer Programming ³	3
CHEM 167	General Chemistry for Engineering Students	4
or CHEM 177		
and		
CHEM 178	General Chemistry II	
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGR 101	Engineering Orientation	R
LIB 160	Information Literacy	1
MATH 165	Calculus I	4
MATH 166	Calculus II	4
PHYS 221	Introduction to Classical Physics I	5
Total Credits		27

Math and Physical Science: 12 cr.

CHEM 167L	Laboratory in General Chemistry for Engineering	1
or CHEM 177L	Laboratory in General Chemistry I	
MATH 266	Elementary Differential Equations	3
PHYS 222	Introduction to Classical Physics II	5
STAT 305	Engineering Statistics	3
Total Credits		12

Ag Engineering Core: 29 cr.

(A minimum GPA of 2.00 required for this set of courses, including any transfer courses please note that transfer course grades will not be calculated into the Core GPA).

A B E 216	Fundamentals of Agricultural and Biosystems Engineering	3
A B E 218	Project Management & Design in Agricultural and Biosystems Engineering	2
A B E 316	Applied Numerical Methods for Agricultural and Biosystems Engineering	3
A B E 363	Agri-Industrial Applications of Electric Power and Electronics	4
A B E 404	Instrumentation for Agricultural and Biosystems Engineering	3
A B E 415	Agricultural & Biosystems Engineering Design I	2
A B E 416	Agricultural & Biosystems Engineering Design II	2
E M 274	Engineering Statics	3
E M 324	Mechanics of Materials	3
E M 327	Mechanics of Materials Laboratory	1
M E 231	Engineering Thermodynamics I	3
Total Credits		29

Other Remaining Courses: 8 cr.

A B E 110	Experiencing Agricultural and Biosystems Engineering	1
A B E 170	Engineering Graphics and Introductory Design	3
A B E 201	Preparing for Workplace Seminar	1
Communication Elective: One of the following (Must have a C or better in this course)		3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
MKT 343	Personal Sales	
SP CM 212	Fundamentals of Public Speaking	

Total Credits **8**

Complete remaining courses from one of the following options:

Land and Water Resources Engineering Option: 40 cr.

A B E 431	Design and Evaluation of Soil and Water Conservation Systems	3
AGRON 154	Fundamentals of Soil Science	3
BIOL 251	Biological Processes in the Environment	3
or BIOL 211		
C E 326	Principles of Environmental Engineering	3
C E 372	Engineering Hydrology and Hydraulics	3
E M 378	Mechanics of Fluids	3
GEOL 201	Geology for Engineers and Environmental Scientists	3
MICRO 201	Introduction to Microbiology	2
MICRO 201L	Introductory Microbiology Laboratory	1
Computer Graphics (One of the following):		1
A B E 271	Engineering Applications of Parametric Solid Modeling	
A B E 272	Parametric Solid Models, Drawings, and Assemblies Using Pro/ENGINEER	
A B E 273	CAD for Process Facilities and Land Use Planning (Preferred)	
GIS Elective (One of the following):		3
C R P 251X	Fundamentals of Geographic Information Systems	
C R P 451	Introduction to Geographic Information Systems	
ENSCI 370X	Natural Resources Photogrammetry and Geographic Information Systems	
ENSCI 461I	Introduction to GIS	
GEOL 452	GIS for Geoscientists	
NREM 345	Natural Resource Photogrammetry and Geographic Information Systems	
NREM 446	Integrating GPS and GIS for Natural Resource Management	
Structures Elective (One of the following):		3
A B E 472	Design of Environmental Modification Systems for Animal Housing (offered Spring even years)	
A B E 478	Wood Frame Structural Design (offered Spring odd years)	
Subsurface Systems Elective (One of the following):		3
C E 360	Geotechnical Engineering	

C E 473	Groundwater Hydrology	
Water Quality Elective (One of the following):		3
A B E 432	Nonpoint Source Pollution and Control	
A B E 436	Design and Evaluation of Soil and Water Monitoring Systems (offered Spring even years)	
A B E 537	Total Maximum Daily Load (TMDL) Development and Implementation	
A B E Elective (One of the following):		3
A B E 340	Functional Analysis and Design of Agricultural Field Machinery	
A B E 380	Principles of Biological Systems Engineering	
A B E 424 (3 different 1 cr modules)		
A B E 424A	Air Pollution: Air quality and effects of pollutants	
A B E 424B	Air Pollution: Climate change and causes	
A B E 424C	Air Pollution: Transportation Air Quality	
A B E 424D	Air Pollution: Off-gas treatment technology	
A B E 424E	Air Pollution: Agricultural sources of pollution	
A B E 469	Grain Processing and Handling	
A B E 480	Engineering Analysis of Biological Systems	

Total Credits **40**

Power and Machinery Engineering Option: 40 cr.

A B E 340	Functional Analysis and Design of Agricultural Field Machinery	3
A B E 342	Agricultural Tractor Power	3
A B E 413	Fluid Power Engineering	3
AGRON 154	Fundamentals of Soil Science	3
E M 345	Engineering Dynamics	3
BIOL 251	Biological Processes in the Environment	3
or BIOL 211		
E M 378	Mechanics of Fluids	3

Graduate Study

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at <http://www.abe.iastate.edu/>.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human computer interaction, and toxicology (see Index).

Biological Systems Engineering

For the undergraduate curriculum in biological systems engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Program Criteria for Biological Systems Engineering Programs by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

Curriculum Educational Goal, Objectives, and Learning Outcomes

Biological Systems Engineering integrates life sciences with engineering to solve problems related to, or using, biological systems. These biological systems may include microbes, plants, animals, humans and/or ecosystems. Biological systems engineers have a worldview shaped by an understanding of fundamental principles of engineering and life-sciences. They use their understanding of engineering to analyze organisms or ecosystems, and their knowledge of biological systems to inspire and inform their designs. They approach engineering design from a biological systems perspective, appreciating the complexity of biological systems and developing solutions that accommodate and anticipate the adaptability of biological systems.

Goal: To educate students to solve problems related to biorenewables production and processing, water quality, environmental impacts of the bioeconomy, food processing, and biosensors, and in so doing to prepare students for professional practice and post-graduate educational opportunities.

Program Educational Objectives: Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their biological systems engineering degree to improve the human

condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Student Outcomes: At graduation, students will have developed and demonstrated:

- (a) an ability to apply knowledge of mathematics, science, and engineering;
- (b) an ability to design and conduct experiments, as well as to analyze and interpret data;
- (c) an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
- (d) an ability to function on multidisciplinary teams;
- (e) an ability to identify, formulate, and solve engineering problems;
- (f) an understanding of professional and ethical responsibility;
- (g) an ability to communicate effectively;
- (h) the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
- (i) a recognition of the need for, and an ability to engage in life-long learning;
- (j) a knowledge of contemporary issues;
- (k) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Well-qualified juniors and seniors in biological systems engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in biological systems engineering and a master of science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

A concurrent bachelor of science and master of business administration program is also offered by the department.

The department also offers a bachelor of science curriculum in agricultural engineering. See College of Engineering. Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology. See College of Agriculture and Life Sciences.

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, biorenewable resources and technology, human computer interaction, and toxicology (see Index).

Curriculum in Biological Systems Engineering

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

Total credits required: 128 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

(Minimum GPA of 2.00 in this set of courses.)

ENGL 150	Critical Thinking and Communication (Must have a C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course.)	3
LIB 160	Information Literacy	1
Communication Elective: One of the following (Must have a C or better in this course)		3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
ENGL 309	Proposal and Report Writing	
MKT 343	Personal Sales	
ENGL 314	Technical Communication	
SP CM 212	Fundamentals of Public Speaking	

Social Sciences and Humanities: 12 cr.^{1,2}

3 credits from international perspectives-university approved list 3

3 credits from U.S. diversity-university approved list 3

6 credits from Social Sciences and Humanities courses-department approved list 6

Total Credits 12

Basic Program: 27 cr.

A minimum GPA of 2.00 required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

A B E 160	Systematic Problem Solving and Computer Programming ³	3
CHEM 167	General Chemistry for Engineering Students or CHEM 177 and CHEM 178	4
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGR 101	Engineering Orientation	R
LIB 160	Information Literacy	1
MATH 165	Calculus I	4
MATH 166	Calculus II	4
PHYS 221	Introduction to Classical Physics I	5
Total Credits		27

Biological, Math and Physical Science: 20 cr.

BIOL 212	Principles of Biology II	3
CHEM 167L	Laboratory in General Chemistry for Engineering or CHEM 177L	1
MATH 267	Elementary Differential Equations and Laplace Transforms	4
MICRO 302	Biology of Microorganisms	3
MICRO 302L	Microbiology Laboratory	1
PHYS 222	Introduction to Classical Physics II	5

STAT 305	Engineering Statistics	3
Total Credits		20

Biological Systems Engineering Core: 35 cr.

(A minimum GPA of 2.00 required for this set of courses, including any transfer courses; please note that transfer course grades will not be calculated into the Core GPA).

A B E 216	Fundamentals of Agricultural and Biosystems Engineering	3
A B E 218	Project Management & Design in Agricultural and Biosystems Engineering	2
A B E 316	Applied Numerical Methods for Agricultural and Biosystems Engineering	3
A B E 363	Agri-Industrial Applications of Electric Power and Electronics	4
A B E 380	Principles of Biological Systems Engineering	3
A B E 404	Instrumentation for Agricultural and Biosystems Engineering	3
A B E 415	Agricultural & Biosystems Engineering Design I	2

C E 372	Engineering Hydrology and Hydraulics	3
Bioenvironmental Elective I ²		3
Bioenvironmental Elective II ²		3
Total Credits		26

Food Engineering Option: 26 cr.

A B E 451	Food and Bioprocess Engineering	3
A B E 469	Grain Processing and Handling	3
CHEM 231	Elementary Organic Chemistry	3
CHEM 231L	Laboratory in Elementary Organic Chemistry	1
FS HN 311	Food Chemistry	3
FS HN 311L	Food Chemistry Laboratory	1
FS HN 420	Food Microbiology	3
FS HN 471	Food Processing I	3
Heat/Mass Transport Sequence (E M 378/M E 436 OR CH E 356/CH E 357)		6
Total Credits		26

Preprofessional and Pre-Graduate Option: 26 cr.

CHEM 331	Organic Chemistry I	3
CHEM 331L	Laboratory in Organic Chemistry I	1
CHEM 332	Organic Chemistry II	3
CHEM 332L	Laboratory in Organic Chemistry II	1
Heat/Mass Transport Sequence (E M 378/M E 436 OR CH E 356/CH E 357)		6
Technical Elective ²		3
Sequence I, II & III Electives ²		9
Total Credits		26

Co-op/Internships (Optional)

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. Diversity, International Perspectives and Social Science/ Humanities courses may not be taken Pass/Not Pass.
2. Choose from department approved list. (<http://www.abe.iastate.edu/undergraduate-students/biological-systems-engineering/bse-curricula>)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Total Credits: 128**Graduate Study**

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal

production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at <http://www.abe.iastate.edu/>.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

Biomedical Engineering Undergraduate Study

Minor supervised by an interdisciplinary faculty committee, administered by Chemical and Biological Engineering. The Biomedical engineering minor is a unique opportunity for engineering students to acquire a multi-disciplinary engineering and life sciences background for entering the field of biomedical engineering.

The program is open to all undergraduate engineering students at Iowa State University. This minor will provide students with a foundation of core biology and engineering relevant to further study in biomedical engineering along with an introduction to the application of engineering principles to biomedical problems from a multidisciplinary perspective as well as the applications within the majors of the participating departments. Minor requirements are as follows:

A minimum of 16 cr. meeting the six requirements below with a minimum of 9 of those credits not being used to meet degree requirements and a minimum of 6 cr. at the 300 level or above. For most students this last stipulation will probably result in 18 cr. being taken.

BIOL 212	Principles of Biology II	3
B M E/CH E 220	Introduction to Biomedical Engineering	3
BIOL 256	Fundamentals of Human Physiology	3
Introductory Engineering Elective *		3
Advanced Engineering Elective **		3
Professional Elective ***		1-3

Total Credits

16-18

*A second (Introductory) engineering course from a department other than that of your major that is not duplicative of material in a course taken in your own department. The topic of the course should have ready application to later B M E-related electives in that discipline (MATE 273; E M 274 or 324; CH E 210, E E 201, 230 or 208X; or other courses approved by Minor Chair).

** 300-500 level engineering course with clear biomedical engineering application (B M E 341, 450, 490; B M E/CH E 440, CH E 542; B M E/MAT E 456; EE 430; I E 571; I E 447 or other courses approved by Minor Chair).

*** 300-500 level engineering or life sciences course with clear biomedical engineering application OR B M E 490 OR departmental 490 with biomedical engineering topic OR 200+-level life sciences laboratory course (If a 200-level course is chosen here, the student will need to meet the required 6 cr. of 300+ courses by substitution of a higher-level course

for the other requirements or by taking an additional course.), OR 300-500 level B M E courses, which may be offered on-line from the University of Iowa.

Chemical Engineering

<http://www.cbe.iastate.edu/>

Administered by the Department of Chemical and Biological Engineering

For undergraduate curriculum in chemical engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and the Chemical Engineering Program Criteria by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Chemical engineering is a profession, which provides a link between scientific knowledge and manufactured products. The chemical engineer relies on science, experience, creativity, and ingenuity to produce these materials economically. Almost everything of a material nature used by society today has at some point felt the influence of the chemical engineer. From raw materials such as minerals, coal, petroleum, and agricultural products; chemical engineers create versatile intermediate and commodity chemicals, high performance fuels, new materials for construction, pharmaceuticals, high performance foodstuffs, synthetic textiles, plastics, solid state electronic components, and dozens of other engineered materials. The chemical engineer's influence has been important in the development of catalysts, fuel cells, automatic controls, biochemical processes, artificial kidneys, tissue engineering, nuclear energy, medical instruments and devices, as well as in the development of air and water pollution control systems. Many new and equally exciting challenges await the practicing chemical engineer of the future.

The profession of chemical engineering embraces a wide variety of activities including research, process development, product development, design, manufacturing supervision, technical sales, consulting, and teaching. The engineer can be behind a desk, in a laboratory, in a manufacturing plant, or engaged in nationwide and worldwide travel. Successful chemical engineers find chemistry, mathematics, and physics to be interesting and exciting. Many chemical engineers also have interest in the biological sciences. The curriculum in chemical engineering includes continued study of chemistry, biochemistry, mathematics, and physics as well as intensive study in the engineering sciences such as chemical reaction engineering, thermodynamics, mass transfer, fluid mechanics, heat transfer, system analysis and process synthesis, and design.

The curriculum in chemical engineering is designed to produce graduates who have the ability to apply knowledge of mathematics, science, and engineering; the ability to design, conduct and interpret experiments; and the ability to design a chemical engineering system, component, or process. Graduates should also have the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve chemical engineering problems; and the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

The curriculum should also assure that graduates have the ability to communicate effectively, the broad education necessary to understand the impact of chemical engineering solutions in a global and societal context, and recognition of the need for, and an ability to engage in life-long learning, as well as a knowledge of contemporary issues and an understanding of professional and ethical responsibility.

The curriculum assures that graduates have a thorough grounding in chemistry, along with a working knowledge of advanced chemistry

such as organic, inorganic, physical, analytical, materials chemistry, or biochemistry. In addition, a working knowledge, including safety and environmental aspects, of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; process design; and appropriate modern experimental and computing techniques is assured.

Program Educational Objectives

The objectives of the Chemical Engineering Program at Iowa State University are to produce graduates who:

- will excel in careers as professional chemical engineers in the businesses and industries related to chemical engineering; and
- will successfully pursue research and advanced studies in chemical engineering, or in related fields such as chemistry or biology, or in related professional fields such as medicine, law, and business.

Biological Engineering Option

Students may enhance their academic preparation for the growing opportunities in the biologically-related industries by pursuing a selection of courses with a biological emphasis.

Cooperative Education

A cooperative education program is available to students in chemical engineering.

Curriculum in Chemical Engineering

Administered by the Department of Chemical and Biological Engineering

Leading to the degree bachelor of science.

Total credits required: 129 cr. See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
LIB 160	Information Literacy	1
One of the following (C or better in this course)		3
ENGL 309	Proposal and Report Writing	
ENGL 312	Biological Communication	
ENGL 314	Technical Communication	
JL MC 347	Science Communication	

The CBE Department requires a grade of a C or better for any transfer credit course that is applied to the degree program but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA

Social Sciences and Humanities: 15 cr.²

Complete a total of 15 cr. with at least 6 cr. but not more than 9 cr. from the same department.

Basic Program: 27 cr.³

A minimum GPA of 2.00 required for this set of courses, including any transfer courses (please note that transfer course grades will not be

calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 177	General Chemistry I	4
or CHEM 167	General Chemistry for Engineering Students	
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3

SEMINAR

CH E 205	Chemical Engineering Progress Assessment	R
----------	--	---

* BBMB 301 Survey of Biochemistry may not be used for a technical elective. See department approved list (<http://www.cbe.iastate.edu/current-students/guides-and-handbooks>) for approved course substitutions for BBMB 301.

Biological Engineering Option

The standard Chemical Engineering program may be modified to meet the option requirements for Biological Engineering:

Math and Physical Science – BBMB 404 Biochemistry I or BIOL 313 Principles of Genetics, 3 cr., may be substituted for BBMB 301 Survey of Biochemistry from list above when taken with BBMB 405 Biochemistry II or BIOL 314 Principles of Molecular Cell Biology, respectively. BBMB 420 must be taken in combination with BBMB 301.

Chemical Engineering Core – Replace CH E 426 Chemical Engineering Laboratory II, 2 cr. with CH E 427 Biological Engineering Laboratory, 2 cr. in required Core.

Other Remaining Courses for Biological Engineering Option²

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list (<http://www.cbe.iastate.edu/current-students/guides-and-handbooks>).
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Note: Transfer students with transfer credits in chemical engineering core courses must earn at least 15 semester credits in ISU courses in this category at the 300-level or above to qualify for the B.S. degree in chemical engineering.

Pass-Not Pass Policy

A maximum of nine Pass-Not Pass semester credits may be used to meet graduation requirements. Courses offered on a Satisfactory-Fail basis may not be taken on a Pass-Not Pass basis. Pass-Not Pass credits can be applied toward requirements for a B.S. degree in chemical engineering only if the course is specified in the curriculum as a social science and humanities elective or is a course not used in the degree program. Pass-Not Pass credits are not acceptable for technical elective courses or for courses used to satisfy the US diversity or international perspectives requirements.

Graduate Study

The department offers work for the degrees master of science, master of engineering, and doctor of philosophy with major in chemical engineering, and minor work to students taking major work in other departments. Prerequisite to major graduate work is a bachelor's degree in chemical engineering, chemistry, or other related field. Students with undergraduate background other than chemical engineering should contact the department for further details. A thesis is required for the master of science degree. The master of science degree also requires

a minimum of 30 graduate credits (minimum of 15 for coursework, 12 within Ch E and 3 outside). The master of engineering requirements are the same for total credits but include a special project or coursework rather than research thesis. The doctor of philosophy degree requires a minimum of 72 graduate credits (minimum of 30 for coursework, at least 16 inside Ch E and a minimum of 8 credits taken outside of Ch E). Candidates for the doctor of philosophy degree can refer to the department's home page and/or the department's Graduate Student Handbook for degree options and credit requirements.

Well-qualified juniors and seniors in chemical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science.

Civil Engineering

<http://www.ccee.iastate.edu/>

Administered by the Department of Civil, Construction and Environmental Engineering

For undergraduate curriculum in civil engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Civil Engineering Program Criteria by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Civil engineers apply principles of motion and materials to plan, design, construct, maintain, and operate public and private facilities, while working under economic, social, and environmental constraints. Commonly included are transportation systems; bridges and buildings; water supply, pollution control, waste management, irrigation, and drainage systems; river and harbor improvements; dams and reservoirs. Civil engineering also includes planning, designing, and executing surveying operations and locating, delimiting, and delineating physical and cultural features on the earth's surface. Research, testing, sales, management, and related functions are also a part of civil engineering. Work on campus is supplemented by inspection trips, which furnish an opportunity for firsthand study of engineering systems in operation, as well as projects under construction.

Environmental engineering, as a specialty area in civil engineering, is concerned with protecting the public and natural health; providing an ample safe water supply; managing solid and hazardous waste; treating and disposing of domestic and industrial waste waters and waste; resource recovery; providing adequate drainage of urban and rural areas for sanitation; and controlling water quality, soil contamination, and air pollution. The environmental option for the civil engineering degree replaces some of the courses and electives in the general curriculum with further courses in chemistry, biology, and microbiology as well as specific topics in environmental engineering and design.

The civil engineering curriculum equips students with a broad education that includes technical skills in analysis and design and professional practices such as communication, teamwork, leadership, and ethics.

By three to five years after graduation, graduates of the civil engineering program will have:

1. Established themselves in successful careers in civil engineering or a related field.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.

3. Pursued lifelong learning, professional development, and registration as appropriate for their employers.

The faculty encourages the students to develop their professional skills by participating in cooperative education, internships, or progressive summer engineering employment. Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue the bachelor degree and either a master of science in Civil Engineering or a master of business administration in the College of Business Administration. These students would have an the opportunity to graduate in five years with both degrees.

Curriculum in Civil Engineering (General)

Administered by the Department of Civil, Construction and Environmental Engineering.

Leading to the degree bachelor of science.

Total credits required: 129. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). Graduate Study

The Department of Civil, Construction and Environmental Engineering offers graduate programs for the degrees of master of engineering, master of science, and doctor of philosophy with a major in civil engineering with areas of specialization in structural engineering, environmental engineering, construction engineering and management, geotechnical engineering, civil engineering materials, and transportation engineering. The department also offers graduate minors of 9 to 15 credits of coursework to students from other engineering departments.

Candidates for the degrees of master of engineering and master of science are required to complete a total of 30 acceptable graduate credits. The master of engineering degree involves all course work. The master of science degree requires the preparation of a thesis or creative component.

Candidates for the doctor of philosophy degree are required to complete a minimum of 72 acceptable graduate credits. Normal prerequisite for major graduate work in civil engineering is the completion of an undergraduate curriculum substantially equivalent to that required of engineering students at this university. Due to the diversity of interests within the graduate programs in civil engineering, a student may qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering. Supporting work will be required depending upon the student's background and area of interest. The department participates in the interdepartmental graduate programs in transportation, environmental science, wind energy science, engineering and policy and biorenewable resources and technology.

The department also offers graduate certificates in construction management, environmental engineering, and environmental systems. The construction management certificate requires 12 graduate credits (nine credits of “core courses” and three credits of approved “elective courses”).

The environmental engineering or environmental systems certificate requires 12 graduate credits (six credits of “core courses”, six credits of approved “elective courses”) and a seminar course or an approved equivalent.

Additional information about graduate programs, research and admission criteria are available on the department’s website <http://www.ccee.iastate.edu/academics/graduate/>.

Computer Engineering

www.ece.iastate.edu (<http://www.ece.iastate.edu>)

Administered by the Department of Electrical and Computer Engineering

For the undergraduate curriculum in computer engineering leading to the degree Bachelor of Science. This curriculum is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Department of Electrical and Computer Engineering (ECpE) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and to prepare for the practice of computer engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The computer engineering curriculum offers focus areas in software systems, embedded systems, networking, information security, computer architecture, and VLSI.

Students also may take elective courses in control systems, electromagnetics, microelectronics, VLSI, power systems, and communications and signal processing.

The program objectives for the computer engineering programs describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objectives of the computer engineering program at Iowa State University are:

- Graduates, within five years of graduation, should demonstrate peer-recognized **expertise** together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and evaluation of computer and software systems, including system integration and implementation.
- Graduates, within five years of graduation, should demonstrate **engagement** in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.

- Graduates, within five years of graduation, should demonstrate sustained **learning** and adapting to a constantly changing field through graduate work, professional development, and self study.
- Graduates, within five years of graduation, should demonstrate **leadership** and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to **teamwork** while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECpE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience. Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees.

Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student’s curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Curriculum in Computer Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 127

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr. ¹

U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
LIB 160	Information Literacy	1
One of the following:		3
ENGL 314	Technical Communication (C or better in this course)	
ENGL 309	Proposal and Report Writing (C or better in this course)	

General Education Electives: 15 cr. ³

Complete minimum of 6 cr. from Approved General Education Component at 300- or higher level. Complete additional 9 cr. from Approved General Education Component.

Basic Program: 27 cr.

A minimum GPA of 2.00 required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 167	General Chemistry for Engineering Students	4
or CHEM 177	General Chemistry I	
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGR 101	Engineering Orientation	R
CPR E 185	Introduction to Computer Engineering and Problem Solving I ²	3
LIB 160	Information Literacy	1
MATH 165	Calculus I	4
MATH 166	Calculus II	4
PHYS 221	Introduction to Classical Physics I	5
Total Credits		27

Math and Physical Science: 20 cr.

COM S 227	Introduction to Object-oriented Programming	4
COM S 228	Introduction to Data Structures	3
MATH 265	Calculus III	4
MATH 267	Elementary Differential Equations and Laplace Transforms	4
PHYS 222	Introduction to Classical Physics II	5
Total Credits		20

Computer Engineering Core: 33 cr.

(A minimum GPA of 2.00 required for this set of courses, including any transfer courses; please note that transfer course grades will not be calculated into the Core GPA).

CPR E 281	Digital Logic	4
CPR E 288	Embedded Systems I: Introduction	4
CPR E 308	Operating Systems: Principles and Practice	4
CPR E 310	Theoretical Foundations of Computer Engineering	3
CPR E 381	Computer Organization and Assembly Level Programming	4
COM S 309	Software Development Practices	3
CPR E 315	Applications of Algorithms in Computer Engineering	3
or COM S 311	Design and Analysis of Algorithms	
E E 201	Electric Circuits	4
E E 230	Electronic Circuits and Systems	4
Total Credits		33

Other Remaining Courses: 32 cr.

CPR E 491	Senior Design Project I and Professionalism	3
CPR E 492	Senior Design Project II	2
STAT 330	Probability and Statistics for Computer Science	3
One of the following:		3
ENGL 314	Technical Communication (C or better in this course)	
ENGL 309	Proposal and Report Writing (C or better in this course)	
Computer Science course ³		3
Computer Engineering ³		6

Technical Electives ³	9
Electrical Engineering course ³	3
Total Credits	32

Seminar/Co-op/Internships:

CPR E 166	Professional Programs Orientation	R
CPR E 294	Program Discovery	R
CPR E 394	Program Exploration	R
CPR E 494	Portfolio Assessment	R

Co-op or internship is optional.

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student's curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in computer engineering. These 30 credits must include CPR E 491 Senior Design Project I and Professionalism, CPR E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass, but are used to meet the general education electives.
2. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
3. From department approved lists. (<http://www.ece.iastate.edu/academics/bachelors-degree-requirements>)

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in computer engineering and minor work to students with other majors. Minor work for computer engineering majors is usually selected from a wide range of courses outside computer engineering.

The Master of Engineering degree is course-work only. It is recommended for off-campus students.

The Master of Science degree with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers three graduate certificate programs in embedded systems, computer networking, and software systems.

The normal prerequisite to graduate major work in computer engineering is the completion of undergraduate work substantially equivalent to that required of computer engineering students at this university. It is possible for a student to qualify for graduate study in computer engineering even though the student's undergraduate or prior graduate training has been in a discipline other than computer engineering. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than computer engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students

pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

The Department of Electrical and Computer Engineering also is a participating department in the interdepartmental certificate, Master of Engineering, and Master of Science in Information Assurance programs. Students interested in studying information assurance topics may earn a degree in computer engineering or in information assurance. (See catalog section on Information Assurance.)

Well-qualified juniors and seniors in computer engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both Bachelor of Science and Master of Science, or Bachelor of Science and Master of Business Administration, or Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's web site.

Construction Engineering

Administered by the Department of Civil, Construction and Environmental Engineering

For curriculum in construction engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Construction Engineering Program Criteria by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Construction engineering is a curriculum administered by the Department of Civil, Construction and Environmental Engineering. For details of the curriculum in construction engineering leading to the degree bachelor of science see the Construction Engineering Curriculum: <http://catalog.iastate.edu/collegeofengineering/constructionengineering/#curriculumtext>. By three to five years after graduation, graduates of the construction engineering program will have:

1. Established themselves in successful careers in construction engineering, or a related field.
2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
3. Pursued lifelong learning, professional development, and registration as appropriate for their employers.

Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of integrated project delivery methods such as design-

build construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer's plans and specifications are converted into physical structures and facilities.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by providing students with opportunities to:

- interact with practicing professionals.
- gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers.
- develop leadership skills by participating in student organizations.
- develop, analyze, and interpret alternative solutions to open-ended problems.
- study abroad.

The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student's perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study-abroad programs. Interested and qualified students have the opportunity to participate in the cooperative education program or internship program to supplement academic work with work experience.

Construction engineering students are encouraged to participate in life-long learning, continuous professional development, and to achieve professional engineer registration and/or registration as a certified professional constructor. Qualified construction engineering students within 30 credits of completing their degree may apply for concurrent enrollment in the Graduate College. See Civil Engineering (<http://www.ccee.iastate.edu/academics/graduate>) Graduate Study for more information.

Curriculum in Construction Engineering

Administered by the Department of Civil, Construction, and Environmental Engineering.

Leading to the degree bachelor of science.

Total credits required: Building Option -125.0, Heavy Option - 125.0, Electrical - 124.0, Mechanical - 125.0 cr.

The Construction Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

See also Basic Program and Special Programs.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirements:

ENGL 150	Critical Thinking and Communication (C or better in this course)	3

Graduate Study

An area of specialization in construction engineering and management is offered within the graduate program of the Department of Civil, Construction and Environmental Engineering. See Civil Engineering, Courses and Programs.

A graduate certificate is also available which requires 12 credits:

C E 501	Preconstruction Project Engineering and Management	3
C E 502	Construction Project Engineering and Management	3
C E 503	Construction Finance and Business Management	3
One of the following:		3
C E 505	Design of Construction Systems	
C E 506	Case Histories in Construction Documents	
C E 510	Information Technologies for Construction	
C E 594A	Special Topics Construction Engineering and Mgt.: Planning and Scheduling	
C E 594C	Special Topics Construction Engineering and Mgt.: Cost Estimating	
C E 594E	Special Topics Construction Engineering and Mgt.: Project Controls	
C E 594F	Special Topics Construction Engineering and Mgt.: Computer Applications for Project Controls	
C E 594L	Special Topics Construction Engineering and Mgt.: Advanced Building Construction Topics	
C E 594M	Special Topics Construction Engineering and Mgt.: Design Build Construction	
Total Credits		12

Courses are offered for minor work to students taking major work in other curricula or in interdepartmental programs.

Electrical Engineering

For the undergraduate curriculum in electrical engineering leading to the degree Bachelor of Science. This curriculum is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Department of Electrical and Computer Engineering (ECpE) at Iowa State University provides undergraduate students with the opportunity to learn electrical and computer engineering fundamentals, study applications of the most recent advances in state-of-the-art technologies, and prepare for the practice of electrical engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment that is motivated by the principle that excellence in

undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The electrical engineering curriculum offers a number of emphasis areas at the undergraduate level, including control systems, electromagnetics and nondestructive evaluation, microelectronics and photonics, VLSI, electric power and energy systems, and communications and signal processing. Students are required to choose at least one course sequence that focuses on one of these areas; therefore graduates have substantial depth in specific areas to complement the breadth obtained in the required curriculum. Students also may take elective courses in computer networking, security, computer architecture, digital systems, and software.

The program objectives for the electrical engineering program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates will have applied their expertise to contemporary problem solving, be engaged professionally, have continued to learn and adapt, and have contributed to their organizations through leadership and teamwork. More specifically, the objectives for expertise, engagement, learning, leadership and teamwork are defined below for each program.

The objectives of the electrical engineering program at ISU are:

- Graduates, within five years of graduation, should demonstrate peer-recognized **expertise** together with the ability to articulate that expertise and use it for contemporary problem solving in the analysis, design, and evaluation of electrical and electronic devices and systems.
- Graduates, within five years of graduation, should demonstrate **engagement** in the engineering profession, locally and globally, by contributing to the ethical, competent, and creative practice of engineering or other professional careers.
- Graduates, within five years of graduation, should demonstrate sustained **learning** and adapting to a constantly changing field through graduate work, professional development, and self study.
- Graduates, within five years of graduation, should demonstrate **leadership** and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and obtain substantive results.
- Graduates, within five years of graduation, should demonstrate a commitment to **teamwork** while working with others of diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the ECpE department provides opportunities for each student to have experience with broadening activities. Through the cooperative education and internship program, students have the opportunity to gain practical industry experience.

Students have the opportunity to participate in advanced research activities, and through international exchange programs, students learn about engineering practices in other parts of the world. Well-qualified juniors and seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees.

Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student

preparation during the student's curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Courses for students who are not in the electrical engineering program: E E 442 Introduction to Circuits and Instruments, E E 448 Introduction to AC Circuits and Motors. Credit in these courses may not be counted toward a degree in either electrical engineering or computer engineering.

Curriculum in Electrical Engineering

Administered by the Department of Electrical and Computer Engineering.

Leading to the degree Bachelor of Science.

Total credits required: 128. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs.

Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
LIB 160	Information Literacy	1
One of the following:		3
ENGL 314	Technical Communication (C or better in this course)	
ENGL 309	Proposal and Report Writing (C or better in this course)	

General Education Electives: 15 cr.³

Complete minimum of 6 cr. from Approved General Education Component at 300 or higher level. Complete additional 9 cr. from Approved General Education Component.

Basic Program: 27 cr.

A minimum GPA of 2.00 required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 167	General Chemistry for Engineering Students	4
or CHEM 177	General Chemistry I	
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGR 101	Engineering Orientation	R
E E 185	Introduction to Electrical Engineering and Problem-Solving I ²	3
LIB 160	Information Literacy	1
MATH 165	Calculus I	4
MATH 166	Calculus II	4
PHYS 221	Introduction to Classical Physics I	5
Total Credits		27

Math and Physical Science: 16 cr.

MATH 265	Calculus III	4
MATH 267	Elementary Differential Equations and Laplace Transforms	4

MATH 207	Matrices and Linear Algebra	3
PHYS 222	Introduction to Classical Physics II	5
Total Credits		16

Electrical Engineering Core: 41 cr.

(A minimum GPA of 2.00 required for this set of courses, including any transfer courses; please note that transfer course grades will not be calculated into the Core GPA).

E E 285	Problem Solving Methods and Tools for Electrical Engineering	4
CPR E 281	Digital Logic	4
CPR E 288	Embedded Systems I: Introduction	4
E E 201	Electric Circuits	4
E E 230	Electronic Circuits and Systems	4
E E 224	Signals and Systems I	4
E E 303	Energy Systems and Power Electronics	3
E E 311	Electromagnetic Fields and Waves	4
E E 322	Probabilistic Methods for Electrical Engineers	3
Core Elective: one of the following:		7
E E 321	Communication Systems I	
E E 324	Signals and Systems II	
Core Elective: one of the following:		
E E 330	Integrated Electronics	
E E 332	Semiconductor Materials and Devices	
Total Credits		41

Note: E E 321 and E E 332 are 3-credit courses, whereas E E 324 and E E 330 are 4-credit courses. The core credit requirement (41 credits) assumes 7 credits taken for these options. Any core credit surplus or deficiency can be used as credits for E E technical electives.

Other Remaining Courses: 29 cr.

E E 491	Senior Design Project I and Professionalism	3
E E 492	Senior Design Project II	2
I E 305	Engineering Economic Analysis	3
One of the following:		3
ENGL 309	Proposal and Report Writing (C or better in this course)	
ENGL 314	Technical Communication (C or better in this course)	
E E/Cpr E Technical Electives including one approved sequence ³		12
Elective from Math, E E, Cpr E and/or non-E E/Cpr E ³		6
Total Credits		29

Seminar/Co-op/Internships:

E E 166	Professional Programs Orientation	R
E E 294	Program Discovery	R
E E 394	Program Exploration	R
E E 494	Portfolio Assessment	R

Co-op or internship is optional

Outcomes Assessment - Students are required to prepare and to maintain a portfolio of their technical and non-technical skills. This portfolio is evaluated for student preparation during the student's curriculum planning process. Results of the evaluation are used to advise students of core strengths and weaknesses.

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in electrical engineering. These 30 credits must include E E 491 Senior Design Project I and Professionalism, E E 492 Senior Design Project II, and credits in the core professional curriculum and/or in technical electives. The Electrical and Computer Engineering Department requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.
3. From department approved lists (<http://www.ece.iastate.edu/academics/bachelors-degree-requirements>).

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives.

Graduate Study

The department offers work for the degrees Master of Engineering, Master of Science, and Doctor of Philosophy with a major in electrical engineering and minor work to students with other majors. Minor work for electrical engineering majors is usually selected from a wide range of courses outside electrical engineering.

Master of Engineering degree is coursework only. It is recommended for off-campus students.

The degree Master of Science with thesis is recommended for students who intend to continue toward the Doctor of Philosophy degree or to undertake a career in research and development. The non-thesis Master of Science degree requires a creative component.

The department also offers a graduate certificate program in power systems engineering.

The normal prerequisite to major in graduate work in electrical engineering is the completion of undergraduate work substantially equivalent to that required of electrical engineering students at this university. Because of the diversification in the electrical engineering graduate program, however, it is possible for a student to qualify for graduate study in certain areas of electrical engineering even though the student's undergraduate or prior graduate training has been in a discipline other than electrical engineering. Supporting work, if required, will depend on the student's background and area of research interest. Prospective students from a discipline other than electrical engineering are required to submit, with the application for admission, a statement of the proposed area of graduate study.

The department requires submission of GRE General test scores by applicants. All students whose first language is not English and who have no U.S. degree must submit TOEFL examination scores. Students pursuing the Doctor of Philosophy must complete the department qualifying process.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental graduate minor in complex adaptive systems. Students interested in this program should see the Complex Adaptive Systems section of the catalog for requirements.

The Department of Electrical and Computer Engineering is a participating department in the interdepartmental Master of Science and Doctor of Philosophy degree programs in bioinformatics and computational biology. Students interested in these programs may earn their degrees while working under an adviser in electrical and computer engineering.

Well-qualified juniors or seniors in electrical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science

and Master of Science degrees, the Bachelor of Science and Master of Business Administration, or the Bachelor of Science and Master of Engineering degrees. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Student Services Office and on the department's website.

Energy Systems Minor

<http://www.me.iastate.edu/energy-systems-minor/>

Energy systems are pervasive in our society. A list of energy-related subjects and applications in the engineering curriculum would be nearly endless, but here are some examples:

- Mechanical engineers have a core area in thermo-fluids where courses in thermodynamics, fluid mechanics, and heat transfer form a base for energy systems.
- Electrical engineers address power transmission and distribution as well as electric motors and power systems.
- Civil engineers develop structures for wind turbines and hydroelectric dams.
- Construction engineers need to understand how building systems impact energy utilization.
- Chemical engineers develop alternative fuels and clean burning technologies.
- Material engineers develop new materials for batteries and fuel cells.
- Aerospace engineers develop wind turbines.
- Industrial engineers address manufacturing efficiency and energy reduction.
- Agricultural engineers develop biorenewable energy sources.

Energy systems are also a significant focus of the grand challenges of engineering (<http://www.engineeringchallenges.org>), and this minor will help our students address these issues in their engineering careers.

The goal of the minor in energy systems is to provide ISU engineering students with focused educational opportunities in the broad area of energy systems. Successful energy systems minor students will understand broad energy perspectives, the language of energy systems, and the economic, environmental, and policy issues related to energy in the two required courses (six credits) for the minor (EE 351 and Econ 380). The remaining nine credits in the minor can be selected from a list of approved engineering courses related to energy systems to give students the opportunity to extend their knowledge.

The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following courses. The complete list of approved elective courses can be found here (<http://www.me.iastate.edu/energy-systems-minor/>).

Required Courses

ECON 380	Environmental and Resource Economics	3
E E 351	Analysis of Energy Systems	3

Electives: Choose from a list of approved courses	9
---	---

Total Credits	15
----------------------	-----------

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Engineering

Most of the courses with the designator of Engr are broad-based engineering courses applicable to all engineering disciplines. Several of these courses are part of the basic program which is required for engineering students. All courses are administered by the college and with the exception of ENGR 160 Engineering Problems with Computer Applications Laboratory, ENGR 340 Introduction to Wind Energy: System Design & Delivery, ENGR 466 Multidisciplinary Engineering Design and ENGR 467 Multidisciplinary Engineering Design II Multidisciplinary Engineering Design II are coordinated through Engineering Student Services in Engineering Academic and Student Affairs.

ENGR 160	Engineering Problems with Computer Applications Laboratory	3
ENGR 340	Introduction to Wind Energy: System Design & Delivery	3
ENGR 466	Multidisciplinary Engineering Design	3
ENGR 467	Multidisciplinary Engineering Design II	3

Engineering Mechanics

Administered by the Department of Aerospace Engineering

Undergraduate Study

The undergraduate courses in mechanics are intermediate between those in physics and mathematics and the professional and design courses of the several engineering curricula. In these courses the student is expected to acquire an understanding of the basic principles and analysis techniques pertaining to the static and dynamic behavior of rigid media, deformable solids, fluids, and gasses. Physical properties of engineering materials are studied in the classroom and are tested in the laboratory. General physical laws are given mathematical expression and are made suitable for use in the solution of specific problems in machine and structural design, and in the flow and measurement of fluids.

Graduate Study

The department offers graduate programs that lead to the degrees master of science, master of engineering, and doctor of philosophy with major in engineering mechanics, and minor work to students taking major work in other departments.

The master of science degree requires a thesis and has strong research emphasis. The master of science degree is recommended for students who anticipate entering a doctoral program later. The master of engineering degree does not require either research credits or a thesis. The program is intended to give students additional instruction at the graduate level to better qualify them for advanced professional engineering work. By careful selection of electives and perhaps additional courses during the senior undergraduate year, students should be able to qualify for the master of engineering degree with an additional year of full-time study after receiving their baccalaureate degree in one of the several engineering curricula.

The master of engineering degree does require a creative component which will be obtained by registering for E M 599 Creative Component. A written report and an oral presentation will be given to the student's graduate committee.

At least 30 credits of acceptable graduate work are required for both the master of science and the master of engineering degrees. For specific course, research, and creative component requirements, see the departmental Graduate Student Handbook (<http://www.aere.iastate.edu/wp-content/blogs.dir/13/files/2011/09/Graduate-Handbook-Fall-2011.pdf>).

The normal prerequisite to major graduate work is the completion of a curriculum substantially equivalent to that required of undergraduate students in engineering at this university. However, because of the diversity of interests in graduate work in engineering mechanics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering—e.g., physics or mathematics.

Engineering Sales Minor

With approximately 15% of engineering job postings involving product sales, marketing or customer field support, a minor in engineering sales can be a critical step towards a great job offer. Besides being one of the best paid positions in engineering, technical sales offers substantial travel opportunities and the ability to solve customers' engineering problems in the field working with people. Talk to your adviser to see how just a few additional courses could fit into your schedule and fast-track your job prospects.

To fill this need, the Department of Industrial and Manufacturing Systems Engineering has developed a minor in sales engineering. The engineering sales minor is a 15 credit minor that complements the technical training in the student's major discipline by providing the tools and knowledge required for technical (i.e. business-to-business) sales careers. The minor is available only to engineering students and is administered by a supervisory faculty committee. At least 9 of the 15 credits must not be used to meet any other department, college or university requirements.

Requirements:

- I E 450 Technical Sales for Engineers I
- I E 451 Technical Sales for Engineers II
- Mkt 340 Principles of Marketing
- Mkt 343 Personal Sales

AND

One of the following:

- I E 305 Engineering Economic Analysis
- Fin 301 Principles of Finance

The objectives of the minor are to provide a broad understanding of the technical sales process, primarily from the business-to-business perspective. At the conclusion of the minor, students will be able to:

- Calculate a return on investment and communicate to customer
- Determine payback period for a given solution and communicate to customer
- Perform a market segmentation
- Develop a client value analysis
- Perform prospecting and business-to-business marketing

- Identify decision makers and processes
- Manage a sales process
- Use sales automation software
- Apply knowledge of underlying international sales issues
- Prepare written and verbal sales presentations
- Provide information about product/service pricing
- Lead a team selling process
- Establish sales channel management procedures
- Develop sound distribution strategies and global sales processes
- Formulate bid strategies/negotiation strategies
- Employ good time management skills

Those students interested in pursuing this minor should contact an academic adviser in their home department and fill out a REQUEST FOR MINOR form. Evaluation of all students requesting this minor will be conducted in the Department of Industrial and Manufacturing Systems Engineering. Any questions should be directed to Ms. Devna Popejoy-Sheriff at devna@iastate.edu.

Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering

For the undergraduate curriculum in industrial engineering leading to the degree bachelor of science. The Industrial Engineering Program of this curriculum is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

The Industrial Engineering (IE) Program educates its future graduates to accomplish its educational objectives in their early careers. Specifically, the IE curriculum prepares its majors so that, within a few years after graduation, graduates' attainments are

1. industrial engineering decisions that result in well-reasoned, value-added solutions.
2. communications with stakeholders that are informative, persuasive, and constructive.
3. contributions to team goals through effective team interactions and leadership.
4. new skills and knowledge that advance professional practice and enable career advancement.

Details on industrial engineering program outcomes that foster the attainment of these objectives are available at appropriate sections of: www.imse.iastate.edu (<http://www.imse.iastate.edu>)

The industrial engineering undergraduate curriculum provides students with fundamental knowledge in mathematics and science, engineering science, social science, and humanities as well as professional industrial engineering course work. Management electives provide students with an opportunity to become familiar with modern business practices that they will encounter in their career. A senior capstone design course provides students with an opportunity to solve open-ended industrial problems with an industrial partner. The cooperative education program provides students with real world experience in the profession and a good perspective on career choices. Students are encouraged to participate in international experiences through exchange programs and industrial internships.

Qualified juniors and seniors interested in graduate studies may apply to the Graduate College to concurrently pursue both B.S. and M.S. or M.Eng. degrees in Industrial Engineering, or B.S. and M.B.A. degrees.

Engineering Sales

The Engineering Sales Minor is multidisciplinary and open to undergraduates in the College of Engineering. The minor is earned by completing 15 credits including:

I E 450	Technical Sales for Engineers I	3
I E 451	Technical Sales for Engineers II	3
MKT 340	Principles of Marketing	3
MKT 343	Personal Sales	3
And one of the following:		3
I E 305	Engineering Economic Analysis	
FIN 301	Principles of Finance	
Total Credits		15

The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Curriculum in Industrial Engineering

Administered by the Department of Industrial and Manufacturing Systems Engineering.

Leading to the degree bachelor of science.

Total credits required: 122 cr. See also Basic Program and Special Programs. Grades of C or better are required for any transfer credit course that is applied to the degree program but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA. Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements.

International Perspectives: 3 cr. ¹

U.S. Diversity: 3 cr. ¹

Communication Proficiency/Library requirements:

ENGL 150	Critical Thinking and Communication (C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
LIB 160	Information Literacy	1

Remaining Communication courses: 6 cr.

ENGL 314	Technical Communication	3
SP CM 212	Fundamentals of Public Speaking	3
Total Credits		6

Social Sciences and Humanities Electives: 12 cr. ²

Six of twelve credits must be from 200-level or above courses. Six credits must be sequential or related courses.

Basic Program: 27 cr. ³

A minimum GPA of 2.00 required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

Graduate Study

The Department offers programs for the degrees Master of Engineering (M.Eng.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.) with a major in Industrial Engineering (I.E.). A formal minor is available at the M.S. and Ph.D. levels to graduate students having a major in another department. The M.Eng. degree consists of coursework designed to improve professional expertise in Industrial Engineering. The M.S.

and Ph.D. degrees are designed to improve the student's capability to conduct research as well as their professional expertise.

The prerequisite to major graduate work is the completion of a curriculum similar to that required of undergraduate students in engineering at this institution. Because of the diversity of Industrial Engineering topics, it is possible for a student to qualify for graduate study even though undergraduate or prior graduate training has been in a discipline other than engineering; e.g., mathematics or physics. However, completion of a math sequence of calculus through differential equations is required.

With the help of a Program of Study Committee (P.O.S.C.), a graduate student develops an educational program in areas within Industrial Engineering. Typical areas of concentration include Advanced Manufacturing, Ergonomics/Human Factors, Operations Research/Analytics, and Systems Engineering/Engineering Management.

The Department offers a certificate in Advanced Manufacturing, in collaboration with the Mechanical Engineering Department, which consists of four graduate courses selected from an approved list in both departments.

For additional information about graduate degree programs, admission criteria, and procedures refer to <https://www.imse.iastate.edu/graduate-program/>.

Materials Engineering

For the undergraduate curriculum in materials engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and the Materials Engineering Program Criteria by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>. Materials engineering is a broadly-based discipline relating the composition, structure, and processing of materials to their properties, uses and performance. Materials engineering includes a variety of traditional and modern technologies involving metals, ceramics, polymers, composites, and electronic materials.

Because of its interdisciplinary nature, career opportunities for materials engineers bridge all industrial and government sectors including: materials based technologies (materials production), communication/information technologies (semiconducting materials, fiber optics), medical/environmental technologies (biomedical, energy production, waste containment), nanotechnologies, consumer products (building and construction, durable goods), and transportation industries (automotive, aerospace).

The objectives of the materials engineering program are to produce graduates who:

- practice materials engineering in a broad range of industries including materials production, semiconductors, medical/environmental, consumer products, and transportation products
- engage in advanced study in materials and related or complementary fields

Graduates in materials engineering are able to apply scientific and engineering principles to select or design the best materials to solve engineering problems. They are also able to control the microstructure of materials through processing to optimize properties and performance. They are skilled in creative, independent problem solving under time and resource constraints. Graduates will have gained experience in materials engineering practice through cooperative work experience or internships in industry, national laboratories, or other funded research work. They will

have hands-on skills with a broad range of modern materials processing and characterization equipment and methods.

A degree in materials engineering relies on a strong foundation of math, chemistry and physics. The core materials courses include fundamentals of materials, kinetics and thermodynamics, mechanical properties, computational methods, design, and professional practice experience. Students tailor their programs to their goals and interests through the selection of a specialization from the three available: ceramic materials, metallic materials and polymeric materials. Additional technical electives can be taken in other areas of interest. The breadth and depth of the program provide excellent preparation for both immediate entry into industry or further study in graduate school.

The department also offers a cooperative education program that combines classroom learning with work experience.

Curriculum in Materials Engineering

Administered by the Department of Materials Science and Engineering.

Leading to the degree bachelor of science.

Total credits required: 128 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. International Perspectives: 3 cr.¹ U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (grade of C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (grade of C or better in this course)	3
LIB 160	Information Literacy	1
One of the following (must have a grade of C or better in this course)		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
JL MC 347	Science Communication	

General Education Electives: 15 cr.

Complete 12 cr. from approved list with a maximum of 9 cr. of 100-level courses². Also complete the one selected course (3 cr.) from the four choices shown above to complete your communication proficiency requirement (must have a grade of C or better in this course).

Basic Program: 27 cr.

Complete with minimum GPA of 2.00 in this set of courses, including transfer courses. See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 177	General Chemistry I	4
or CHEM 167	General Chemistry for Engineering Students	
ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGR 101	Engineering Orientation	R
ENGR 160	Engineering Problems with Computer Applications Laboratory ³	3
LIB 160	Information Literacy	1
MATH 165	Calculus I	4
MATH 166	Calculus II	4

Math and Physical Science: 18 cr.

CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 178L	Laboratory in College Chemistry II	1
MATH 265	Calculus III	4
MATH 267	Elementary Differential Equations and Laplace Transforms	4
PHYS 222	Introduction to Classical Physics II	5
Total Credits		18

Materials/Specialties Engineering Core: 44 cr.

Complete with minimum GPA of 2.00, including transfer courses:

MAT E 214	Structural Characterization of Materials	3
MAT E 215	Introduction to Materials Science and Engineering I	3
MAT E 215L	Introduction to Materials Science and Engineering I - Lab	1
MAT E 216	Introduction to Materials Science and Engineering II	3
MAT E 216L	Introduction to Materials Science and Engineering II - Lab	1
MAT E 311	Thermodynamics in Materials Engineering	3
MAT E 314	Kinetics and Phase Equilibria in Materials	3
MAT E 316	Computational Methods in Materials	3
MAT E 317	Introduction to Electronic Properties of Ceramic, Metallic, and Polymeric Materials	3
MAT E 413	Materials Design and Professional Practice I	3
MAT E 414	Materials Design and Professional Practice II	3
MAT E 418	Mechanical Behavior of Materials	3
Students must choose one from the three areas of specialization (12 cr.): ceramic, metallic and polymeric materials.		12
Total Credits		44

The options below meet that expectation by using the following specialization courses:

Ceramic Materials:

MAT E 321	Introduction to Ceramic Science	3
MAT E 322	Introduction to Ceramic Processing	3
MAT E 425	Glass Science and Engineering	3
MAT E 433	Advanced Electronic Materials	3

Metallic Materials:

MAT E 341	Metals Processing	3
MAT E 343	Physical Metallurgy of Ferrous Alloys	3
MAT E 442	Structure/Property Relations in Nonferrous Metals	3
MAT E 444	Corrosion and Failure Analysis	3

Polymeric Materials:

CHEM 331	Organic Chemistry I	3
MAT E 351	Introduction to Polymeric Materials	3

MAT E 453	Physical and Mechanical Properties of Polymers	3
MAT E 454	Polymer Composites and Processing	3

Other Courses: 24 cr.

E M 274	Engineering Statics	3
E M 324	Mechanics of Materials	3
Technical electives from list of materials courses ²		6
Technical electives from approved departments ²		9
Non-remedial course ²		3

Total Credits		24
----------------------	--	-----------

Seminar/Co-op/Internships

MAT E 401	Materials Engineering Professional Planning	R
-----------	---	---

Co-op and internships are optional

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list (http://www.mse.iastate.edu/files/2014/12/UG-HANDBK2014revised-12-5-14_web.pdf).
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Note: A Mat E student may take up to 9 credit hours from General Education and free electives on a P/NP basis, except for courses used to meet the diversity and international perspectives requirement. S/F courses (different from P/NP) will be considered for these requirements on a course-by-course basis.

Areas of specialization:

- Ceramic Materials: 321, 322, 425, 433
- Metallic Materials: 341, 343, 442, 444
- Polymeric Materials: Chem 331, 351, 453, 454

Well qualified juniors in materials engineering who are interested in graduate study may apply for concurrent enrollment during their senior year in the Graduate College to simultaneously pursue both bachelor of science and master of science degrees. See Materials Science and Engineering for more information.

Materials Science and Engineering Graduate Study

Built on a foundation of thermodynamics, kinetics of phase transformations, mechanical behavior, physical properties, solid state science, and the structure and chemistry of materials, the graduate program offers advanced studies in many areas of materials science and engineering, including the design and control of materials for structural, electronic, photonic, magnetic, optical, and biological functionality. Graduates of the program have a fundamental understanding of the critical aspects of the field and how they are applied to real materials systems. The program is highly flexible and research-oriented, where students work carefully with their major professor in tailoring the various academic and research components to meet their interests.

With the ability to address complex problems in materials science while considering the various constraints inherent to both academic and industrial environments, our graduates are well prepared for a wide range of academic and research-related careers. They are skilled in carrying out independent and collaborative research, able to communicate effectively in formal and informal settings, and are proficient at writing persuasive technical articles and grant proposals.

The department boasts excellent facilities for academic materials research, maintaining a wide range of faculty laboratories across the ISU campus. In addition, departmental research is highly integrated with the operation of several Research Centers, such as the Ames Laboratory, the Center for Nondestructive Evaluation, the Microelectronics Research Center, and the Center for Advanced Technology Development. These

laboratories offer excellent resources and opportunities for graduate student research.

Graduate Majors

The department offers work toward the following advanced degrees: Master of Engineering in Materials Science and Engineering, Master of Science in Materials Science and Engineering and Doctor of Philosophy in Materials Science and Engineering.

Prerequisite to major graduate work is completion of an undergraduate curriculum in physical science, biological science, or engineering discipline. Graduate students from disciplines other than materials science and engineering may expect that supplemental coursework will be needed, in addition to the required graduate coursework. Well qualified students (juniors) enrolled in the undergraduate materials engineering program at Iowa State University can apply to the Graduate College for admission to the concurrent enrollment program, where students may simultaneously pursue both master of science and bachelor of science degrees.

The requirements for the M. Eng., M.S. and Ph.D. degrees are established by the student's program of study committee within the established guidelines of the Graduate College. Minimum requirements include coursework, research (M.S. and Ph.D. only), proposal (M.S. and Ph.D. only), preliminary oral examination (Ph.D. only), dissertation (M.S. and Ph.D. only), and a final oral examination (M.S. and Ph.D. only). Academic coursework requirements include 31 credits for the M.Eng. degree, 21 credits for the M.S. degree and 32 credits for the Ph.D., with additional specific rules for choices available from the department.

There are no foreign language requirements for any of the graduate degrees administered by the Department of Materials Science and Engineering. Graduate students wishing to declare a formal minor in materials science and engineering will have at least one materials science and engineering faculty member serving on their program of study committee. For the M. Eng., M.S. and Ph.D. degrees, they will take a minimum of 8 materials science and engineering course credits for the M. Engr. or M.S. degrees and a minimum of 12 materials science and engineering course credits for the Ph.D. degree.

Mechanical Engineering

For the undergraduate curriculum in mechanical engineering leading to the degree bachelor of science. This curriculum is accredited under the General Criteria and Mechanical Engineering Program Criteria by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.

Mechanical engineers apply the principles of motion, energy, and force to create mechanical solutions to technological problems, thereby realizing devices and systems that make life better. About one-fifth of all engineers practicing today are mechanical engineers. Their skills are used in research, development, design, testing, production, technical sales, technical management, as well as medicine, law, and business. Mechanical engineers are characterized by personal creativity, breadth of knowledge, and versatility. For these reasons they are found to function and thrive as valuable members and leaders of multidisciplinary teams. Mechanical engineers are employed in a wide range of industries; examples include agricultural/heavy equipment, biomedical, consulting, energy and power, manufacturing, product design and transportation.

The mechanical engineering curriculum at Iowa State University is dedicated to preparing students for productive careers in the state, nation, and the world and has the following objectives:

1. Graduates will have utilized a foundation in engineering and science to improve lives and livelihoods through a successful career in mechanical engineering or other fields.
2. Graduates will have become effective collaborators and innovators, leading or participating in efforts to address social, technical and business challenges.
3. Graduates will have engaged in life-long learning and professional development through self-study, continuing education or graduate and professional studies in engineering, business, law or medicine.

The mechanical engineering curriculum is organized to provide students with a broad foundation in mathematics, science, engineering, social science and humanities. The mechanical engineering disciplinary areas emphasized are design and optimization, dynamic systems and control, materials processing and mechanics, and thermo-fluid sciences. Elective courses provide additional emphasis in terms of the student's unique educational goals, whether they include immediate entry into industry or further professional or graduate study.

A major focus throughout the mechanical engineering curriculum is a series of experiences that emphasize engineering design, culminating in a capstone design experience in the senior year. Students will develop engineering judgment through open-ended problems that require establishment of reasonable engineering assumptions and realistic constraints. Development of skills needed to be independent, creative thinkers, effective communicators, and contributing team members is emphasized throughout the curriculum. Students also develop an understanding of the societal context in which they will practice engineering, including environmental, legal, aesthetic, and human aspects.

Students are encouraged to participate in the cooperative education program or to obtain engineering internships, both domestically and abroad. Study abroad is encouraged, and the department has exchange programs with several universities around the world. These experiences help students to round out their education and to better prepare for careers in the increasingly global practice of engineering.

Curriculum in Mechanical Engineering

Administered by the Department of Mechanical Engineering. Leading to the degree bachelor of science.

Total credits required: 129 cr.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. International Perspectives: 3 cr.¹

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. diversity and international perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved list of technical electives (<http://www.me.iastate.edu/students/degrees-and-programs/bs-degree/degree-requirements/tech-electives>) and general education electives (<http://www.me.iastate.edu/students/degrees-and-programs/bs-degree/degree-requirements/general-education>). Note: electives used to meet graduation requirements may not be taken Pass-Not Pass (P-NP).
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

Transfer Credit Requirements

The Mechanical Engineering Department requires a grade of a C or better for any transfer credit course that is applied to the degree program. The degree program must include a minimum of 15 credits taken from courses offered through the Mechanical Engineering Department at Iowa State University. Of these 15 credits, 3 must be from one of the senior capstone design courses. The remaining 12 credits may be from the core

curriculum program (if a student is deficient in these courses) or from 400-level M E technical electives. No more than 3 credits of independent study shall be applied to meet the 12 credit requirement.

See also: A 4-year plan of study grid showing course template by semester.

Energy Systems Minor

<http://www.me.iastate.edu/energy-systems-minor/>

The Energy Systems minor is administered by the mechanical engineering department and is open to all undergraduates in the College of Engineering. The minor may be earned by completing 15 credits from the following courses. The complete list of approved elective courses can be found here (<http://www.me.iastate.edu/energy-systems-minor/>).

Graduate Study

The department offers programs for the degrees Master of Engineering (M. Eng.), Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) with a major in mechanical engineering. The M.Eng. degree is a coursework-only degree designed to improve professional expertise in mechanical engineering. The M.S. and Ph.D. degrees are designed to improve the student's capability to conduct research as well as their professional expertise. Although co-major and formal minor programs are not offered in mechanical engineering, courses may be used for minor work by students taking major work in other departments.

Well-qualified juniors and seniors in mechanical engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both the Bachelor of Science and Master of Science, the Bachelor of Science and Master of Business Administration. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses. Details are available in the Graduate Programs Office and on the department's website (<http://www.me.iastate.edu/>).

The graduate program offers advanced study in a variety of thrust areas, including biological and nanoscale sciences, clean energy technologies, complex fluid systems, design and manufacturing innovation, and simulation and visualization.

The department offers students the opportunity to broaden their education by participating in minor programs in established departments, interdepartmental programs, or other experiences as approved by their program of study committees.

The requirements for advanced degrees are established by the student's program of study committee within established guidelines of the

Graduate College. Graduate students who have not completed an undergraduate program of study substantially equivalent to that required of undergraduate students in the department can expect that additional supporting coursework will be required.

Program requirements can be found on the department webpage (<http://www.me.iastate.edu/>) and in the Mechanical Engineering Graduate Student Handbook.

Non-destructive Evaluation Engineering

Minor supervised by an interdisciplinary faculty committee, administered by Aerospace Engineering. The NDE minor is a unique opportunity for engineering students to acquire a multidisciplinary engineering qualification in the rapidly evolving field of Nondestructive Evaluation.

Undergraduate Study

Students interested in completing the NDE engineering minor must be enrolled in the College of Engineering at Iowa State University. They must submit the "Request for Minor" form and complete the minimum prescribed 16 credit-hours of course work defined below. Acceptance is based on approval by the administering department, Aerospace Engineering.

The course requirements for the undergraduate minor in NDE are:

MAT E/E M 362	Principles of Nondestructive Testing	3
MAT E/E M 362L	Nondestructive Testing Laboratory	1
At least one of the following NDE specific courses		3-4
M S E/E M 550	Nondestructive Evaluation	
MAT E 488	Eddy Current Nondestructive Evaluation	
E M 480	Ultrasonic Nondestructive Evaluation	
Independent study course		
Up to three of the following or additional NDE specific courses from the list above		9-12
AER E 321	Flight Structures Analysis	
AER E 421	Advanced Flight Structures	
AER E 423	Composite Flight Structures	
E E 418	High Speed System Engineering Measurement and Testing	
E E 224	Signals and Systems I	
CPR E 418	High Speed System Engineering Measurement and Testing	
I E 348	Solidification Processes	
I E 361	Statistical Quality Assurance	
STAT 231	Probability and Statistical Inference for Engineers	
STAT 305	Engineering Statistics	
STAT 322	Probabilistic Methods for Electrical Engineers	
AER E 422	Vibrations and Aeroelasticity	
AER E 426	Design of Aerospace Structures	
E M 424	Intermediate Mechanics of Materials	
E M 425	Introduction to the Finite Element Method	
M E 417	Advanced Machine Design	
M E 418	Mechanical Considerations in Robotics	
MAT E 316	Computational Methods in Materials	

MAT E 343	Physical Metallurgy of Ferrous Alloys
MAT E 418	Mechanical Behavior of Materials
MAT E 444	Corrosion and Failure Analysis

Total Credits 16-20

A combined average grade of C or higher is required in courses applied to the minor and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Nuclear Engineering

<http://www.me.iastate.edu/students/degrees-and-programs/engineering-minors/>

Minor administered by Mechanical Engineering

The nuclear engineering undergraduate minor allows engineering students to acquire a formal background in nuclear engineering topics that will not only benefit them, but also fulfill a societal need for future hiring of engineers. Through this program, students can enroll in a formal minor that enables them to acquire a basic and fundamental knowledge of nuclear sciences and engineering, thus enabling them to pursue employment in any one of a number of fields associated with the construction, operation or regulation of nuclear power generation.

Students completing this minor acquire a body of knowledge in the fundamentals of nuclear science and engineering. The required courses selected ensures that all graduates of the nuclear engineering minor obtain a minimum body of knowledge in nuclear science and engineering that would allow them to apply their specialized field of engineering knowledge to nuclear-related applications, such as nuclear plant and site construction, nuclear power plant operations, nuclear safety and radiation protection.

The supporting courses that are listed in this program provide an opportunity for students to build upon the knowledge gained in the required courses by taking either more advanced courses or more specialized courses dealing with specific areas of nuclear engineering.

Undergraduate Study

Students interested in completing the nuclear engineering minor must be enrolled at Iowa State University and have the appropriate technical background. They should complete and submit the "Request for Minor" form for submission to the Nuclear Engineering program director. The selection process is based on approval by the administering department, Mechanical Engineering.

The course requirements for the undergraduate minor in nuclear engineering are:

Required course:

NUC E 401	Nuclear Radiation Theory and Engineering	3
-----------	--	---

Four of the following: 12

NUC E 402	Nuclear Reactor Engineering *	
NUC E 405	Radiation Protection and Shielding *	
NUC E 410	Nuclear Reactor Theory *	
NUC E 421	Nuclear Criticality Safety	
NUC E 430	Nuclear Energy and Society	
NUC E 441	Probabilistic Risk Assessment	
NUC E 461	Radiation Detection, Measurement and Simulation	

NUC E 490 Independent Study

Total Credits**15**

*Students have the option of enrolling in these web-based distance courses offered at select universities. It is the responsibility of the student to arrange for enrollment and payment for these courses. Courses must be successfully completed with a "C" or higher in order to be considered for transfer credit. Contact the Nuclear Engineering program director for more information.

The minor must include at least nine credits which are beyond the total used to meet curriculum requirements for the bachelors degree in engineering.

Software Engineering

For the undergraduate curriculum in Software Engineering (<http://www.se.iastate.edu>) leading to the degree Bachelor of Science. This curriculum is accredited under the General Criteria and Software Engineering Program Criteria by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

This curriculum is jointly administered by the Department of Computer Science and the Department of Electrical and Computer Engineering at Iowa State University. The Software Engineering program provides undergraduate students with the opportunity to learn software engineering fundamentals, to study applications of state-of-the-art software technologies and to prepare for the practice of software engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The software engineering curriculum offers emphasis areas in software engineering principles, process and practice. Students may also take elective courses in computer engineering and computer science.

Program Educational Objectives

Within five years of graduation, the graduates should:

1. attain a **productive career** in Software Engineering or related fields;
2. attain **leadership** roles and become **effective collaborators** to advance professional and organizational goals;
3. engage in **continuous learning** and professional development.

We expect that these objectives will be manifested in our graduates through the following five key attributes: (a) *peer-recognized expertise*, (b) *engagement in professional practice*, (c) *sustained learning*, (d) *leadership* and (e) *teamwork*.

Demonstration of expertise involves applying state-of-the-art practices for solving problems in the design, development, validation, evolution and sustainment of (software) products. Demonstration of professional engagement involves contributing locally and globally to the use of ethical, competent, and creative practices in industry, academia or the public sector. Demonstration of sustained learning involves the ability to adapt to rapid technological, environmental, and organizational changes through self-study and group study and through opportunities of professional development or graduate study. Demonstration of leadership involves the ability to take initiative, and to facilitate the advancements of individuals and the community by influencing others

and by having a widespread, positive impact on critical issues and projects. Finally, demonstration of teamwork involves the ability to work with collaborators who have varied expertise, and with diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the Department of Computer Science and the Department of Electrical and Computer Engineering provide opportunities for each student to have experience with broadening activities. Students have the opportunity to gain practical industry experience in the cooperative education and internship program. Students have the opportunity to participate in advanced research activities. Through international exchange programs, students learn about engineering practices in other parts of the world.

Curriculum in Software Engineering

Administered by the Department of Electrical and Computer Engineering in the College of Engineering and the Department of Computer Science in the College of Liberal Arts and Sciences.

Leading to the degree bachelor of science.

Total credits required: 125 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Pass/Not Pass credits cannot be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
LIB 160	Information Literacy	1
Choose one of the following:		3
ENGL 309	Proposal and Report Writing (C or better in this course)	
ENGL 314	Technical Communication (C or better in this course)	

Total Credits **10**

General Education Electives: 15 cr.²

Choose 1 course from the following:		3
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	
I E 305	Engineering Economic Analysis	
Arts and Humanities		6
Social Sciences		3
Additional Arts and Humanities or Social Sciences course		3
Total Credits		15

Basic Program: 27 cr.

A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 167 or CHEM 177	General Chemistry for Engineering Students General Chemistry I	4
-------------------------	---	---

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGR 101 or S E 101	Engineering Orientation Software Engineering Orientation	R
S E 185	Problem Solving in Software Engineering ³	3
LIB 160	Information Literacy	1
MATH 165	Calculus I	4
MATH 166	Calculus II	4
PHYS 221	Introduction to Classical Physics I	5
Total Credits		27

Math and Physical Science: 11 cr.

COM S 227	Introduction to Object-oriented Programming	4
COM S 228	Introduction to Data Structures	3
MATH 267	Elementary Differential Equations and Laplace Transforms	4
Total Credits		11

Software Engineering Core: 34 cr.

A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Core GPA):

CPR E 281	Digital Logic	4
Choose one of the following:		3
COM S 327	Advanced Programming Techniques	
CPR E 288	Embedded Systems I: Introduction	
Choose one of the following:		3
COM S 321	Introduction to Computer Architecture and Machine-Level Programming	
CPR E 381	Computer Organization and Assembly Level Programming	
Choose one of the following:		3
COM S 352	Introduction to Operating Systems	
CPR E 308	Operating Systems: Principles and Practice	
Choose one of the following:		3
COM S 230	Discrete Computational Structures	
CPR E 310	Theoretical Foundations of Computer Engineering	
COM S 311	Design and Analysis of Algorithms	3
COM S 363	Introduction to Database Management Systems	3
COM S 309	Software Development Practices	3
S E 319	Software Construction and User Interfaces	3
S E 329	Software Project Management	3
S E 339	Software Architecture and Design	3

Note: CPR E 288, CPR E 381 and CPR E 308 are 4-credit courses. The core credit requirement (34 credits) is given in terms of 3-credit courses. If the 4-credit courses are taken instead, then the extra credits will be used as credits for Supplementary Electives.

Total Credits 34

Other Remaining Courses: 38 cr.

S E 491	Senior Design Project I and Professionalism	3
S E 492	Senior Design Project II	2
SP CM 212	Fundamentals of Public Speaking	3
One of the following STAT courses		3

STAT 330	Probability and Statistics for Computer Science	
STAT 305	Engineering Statistics	
One of the following ENGL courses (with a C or better in this course)		3
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
Math Elective: Choose one from the following list		3
MATH 207	Matrices and Linear Algebra	
MATH 304	Combinatorics	
MATH 314	Graph Theory	
MATH 317	Theory of Linear Algebra	
Software Engineering Elective ²		6
Technical Elective ²		3
Supplementary Elective ²		9
Open Elective ²		3
Total Credits		38

Seminar/Co-op/Internships

S E 166	Careers in Software Engineering	R
S E 494	Software Engineering Portfolio Development	R

Co-op or internship (S E 396, S E 397, S E 398) is optional

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in software engineering. These 30 credits must include S E 492 Senior Design Project II and credits in the core professional curriculum and/or in technical electives. The software engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S Diversity and International Perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved lists. (<https://www.se.iastate.edu/academics/resources>)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives (<http://www.se.iastate.edu/academics/resources/#general>).

Total Credits: 125

* Total credits required - 125 credits. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU Cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Basic Program - A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA) Must receive a C or better grade in required English classes. General Educational Elective courses to be selected in consultation with SE advisers from a list of approved courses. They must include courses that satisfy university and college general education requirements. These courses include courses or categories of courses such as international perspectives and U.S. diversity, language, arts and humanities, and social sciences. Pass/Not Pass credit is not accepted. Software Engineering Electives, Technical Electives, and Supplementary Electives must be selected from the program-approved list (<https://www.se.iastate.edu/academics/resources>).

¹ Core Professional Curriculum (A minimum GPA of 2.00 is required for this set of courses, including any transfer courses but transfer course grades will not be calculated into the Core GPA)

² Software Engineering students must have completed CPR E 281 and have obtained C or better in COM S 327 to enroll in COM S 321

³ Students who take the 4-credit lab courses CPR E 288, CPR E 308, and CPR E 381 instead of the corresponding 3-credit alternatives can apply the additional credits towards Supplementary Electives. The total number of credits required in Software Engineering Program remains the same for all students.

Systems Engineering

Systems Engineering Master's Degree

Administered by the Department of Industrial and Manufacturing Systems Engineering

The Systems Engineering Program focuses on developing an individual's analytical skills to design, evaluate, and build modern complex engineered systems. Engineers who can conceptualize, model, and integrate hardware, software, data, and humans are critical in technology driven multi-disciplinary design teams. The Iowa State University Master of Engineering in Systems Engineering Program is designed to train engineers to excel in the technology driven design environment commonly found in developing modern complex engineered systems. The program can be completed on line or in residence, part-time or full-time.

Admission Requirements

Unrestricted admission requires (1) a 3.0 grade point average from an ABET accredited undergraduate engineering program, (2) minimum of two years of engineering experience or current full-time employment as an engineer, (3) calculus, engineering statistics, and engineering economy. A GRE is not required for this program.

Applicants for admission to the Systems Engineering Program apply through the Graduate College at Iowa State University. Each applicant must submit:

- Application and application fee
- Official academic transcripts
- Three letters of recommendation
- Resume

Applications should be submitted as early as possible before the beginning of the semester for which admission is sought. Individuals may also take up to 9 credits at Iowa State as a non-degree seeking student and then transfer them to the program when they are admitted. (<http://www.elo.iastate.edu/how-elo-works/admission-and-enrollment>)

The Master of Engineering in Systems Engineering Program at Iowa State University is focused on supporting working professionals so teaching or research assistantships typically are not available.

Degree Requirements (10 courses total = 30 credits)

Intro Core (required first year)

I E 563	Engineering Management Theory	3
I E 565	Systems Engineering and Analysis	3

Additional Core

I E 564	Decision Analysis in System Design	3
I E 570	Systems Engineering and Project Management	3
I E 585	Requirements Engineering	3

Electives (select 5 courses from any categories)

Manufacturing Courses		
I E 448	Manufacturing Systems Engineering	

I E 541	Inventory Control and Production Planning
I E 549	Computer Aided Design and Manufacturing
I E 561	Continuous Quality Improvement of Process
I E 572	Design and Evaluation of Human-Computer Interaction
I E 577	Human Factors
Engineering Courses	
I E 582	Enterprise Modeling and Integration
AER E 568	Large-Scale Complex Engineered Systems (LSCES)
I E 503	Introduction to Sustainable Production Systems
Software Courses	
I E 581	e-Commerce Systems Engineering
I E 588	Information Systems for Manufacturing
1 Other from any graduate program (optional)	

Students working in research and development who are interested in furthering their research skills may select a creative component option as part of their supporting courses.

Systems Engineering Certificate 2016 (4 courses total = 12 credits)

Intro Core (required first year)

I E 563	Engineering Management Theory
I E 565	Systems Engineering and Analysis

Core (required to pick 2)

I E 564	Decision Analysis in System Design
I E 570	Systems Engineering and Project Management
I E 585	Requirements Engineering

Other focus areas in related disciplines, such as systems engineering, human factors, supply chain management, or manufacturing, may be substituted for supporting courses. A program of study is developed by the student and academic adviser to fit individual needs.

Students working in research and development who are interested in furthering their research skills may select a creative component option as part of their supporting courses.

College of Human Sciences

Pamela White, Dean

Carla Peterson, Associate Dean Research and Graduate Education

Linda Serra Hagedorn, Associate Dean Undergraduate Programs, International Affairs, Diversity, Equity, and Community, Students Services
Debra Sellers, Associate Dean and Director of Human Sciences Extension and Outreach

www.hs.iastate.edu/ (<http://www.hs.iastate.edu/>)

The College of Human Sciences provides an integrative approach to improving the quality of life for individuals, families, schools and communities by linking discovery, science, creativity, and practice; applying the knowledge of learning in all endeavors; and developing leaders for roles in research, education, business and industry, and health and human services.

The College of Human Sciences (CHS), founded in 2005, fosters innovative synergies in teaching and learning in addition to the discovery of new knowledge, and in many ways is reinventing how human potential

can be enhanced. Members of the college strive to improve the quality of people's lives - helping them learn better, live longer, and lead lives that are more productive and fulfilling.

Recommended High School Preparation

Recommended preparation for students entering most departments in the College of Human Sciences should include 4 years of English (including speech) with emphasis in composition and communication skills; 3 years each of mathematics and natural sciences, and at least 2 years of social sciences and/or humanities. In addition, students interested in Elementary Education are advised to complete three or more years of high school study in one foreign language.

Information for Prospective Students

Each student in the College of Human Sciences works closely with an academic advisor who is associated with the program in which the student is majoring. Advisors assist students in developing academic programs and in adjusting to university life. They also provide information and guidance about career choices. Advisors attempt to assist students as they develop their schedule of classes to meet their goals, interests, and capabilities.

The college offers a number of orientation sessions during the summer for students planning to enter in the fall. Incoming students are encouraged to attend an orientation session so that academic assessments can be made and appropriate classes may be scheduled for the following term.

Undecided Students

The College of Human Sciences offers an academic support program for students who are considering several majors at Iowa State University. This program is administered to undeclared Human Sciences students through the MINDS Learning Community. Students in the MINDS Learning Community take coursework together, including an orientation and career exploration course which is taught by Student Services staff in the College of Human Sciences. This course provides opportunities for students to evaluate their interests, skills, and strengths while also receiving additional support through a peer mentor program.

Planned Transfer Programs

By planning carefully, students may begin their education at another college and then transfer their courses to a curriculum within the College of Human Sciences with maximum efficiency in meeting the degree requirements. The college works closely with community colleges in Iowa and surrounding states to facilitate a transfer to Iowa State University. For more information, call 1-800-522-0683 or visit the College of Human Sciences Recruitment Office.

Divisions of the College

- Apparel, Events, and Hospitality Management (<http://www.aeshm.hs.iastate.edu/>)
- Food Science and Human Nutrition (<http://www.fshn.hs.iastate.edu/>)
- Human Development and Family Studies (<http://www.hdfs.hs.iastate.edu/>)
- Kinesiology (<http://www.kin.hs.iastate.edu/>)
- School of Education (<http://www.education.iastate.edu/>)

Accreditation and Licensure

The following program-specific accreditation/ licensure/registrations have been attained by departments or School of Education within the college:

Department of Apparel, Events, and Hospitality Management:

Apparel, Merchandising, and Design major is endorsed by the American Apparel and Footwear Association's Education Foundation. The design primary option is accredited by the National Association of Schools in Art and Design.

Hospitality Management is accredited by the Accreditation Commission for Programs in Hospitality Administration.

Department of Food Science and Human Nutrition:

- The Food Science degree, including Industry and Technology options are approved by the Institute of Food Technologists.
- The Didactic Program in Dietetics and Dietetics Internship are accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics.

Department of Human Development and Family Studies:

- The Child Development Laboratory School is accredited by the National Association for the Education of Young Children (NAEYC), Academy for Early Childhood Programs, is licensed by the Iowa Department of Human Services, and maintains a 5 Star Rating from the Iowa Quality Rating System.
- The Early Childhood Education Program (administered in collaboration with the School of Education) and the Family and Consumer Sciences Education Teacher Licensure Program are accredited by the Iowa Department of Education and students may be recommended for licensure to the Iowa Board of Educational Examiners.

Department of Kinesiology:

- Athletic Training Option is accredited by the Commission on Accreditation of Athletic Training Education.
- Physical Education Teacher Licensure Program is licensed by the Iowa Department of Education and Iowa Board of Educational Examiners.

School of Education - Educator Preparation and Licensure:

- All Iowa State University Educator Preparation Programs are accredited by the Iowa Department of Education and the Iowa Board of Educational Examiners.
- All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the University Educator Preparation Program.
- Each student will be enrolled in the School or Department in which he or she plans to major and must meet the graduation requirements of that department and the college in which it is located.
- For details concerning the professional educator requirements and the areas of specialization requirements, see Teacher Education.

Undergraduate Core Curriculum

Purpose

The College of Human Sciences has established core learning outcomes to provide the unifying foundation critical to personal and professional success for all College of Human Sciences undergraduate students. Assessment of College of Human Sciences' core learning outcomes will measure student competence in four (4) areas. Assessment results will be used by CHS faculty and staff to enhance student learning experiences.

Four components

The core identifies the expected minimum outcomes that each undergraduate in the college must meet:

Communication - Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats without distracting errors in usage or convention.

Self-Assessment/Self Reflection - Consistently and realistically analyze and evaluate one's own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy.

Critical Thinking - Generate, acquire and evaluate information based on scientific evidence, creative processes, and logical and ethical reasoning to make decisions and solve problems in one's personal, professional and community endeavors.

Social Justice - Articulate and demonstrate a clear concept of a just society in which individuals and groups equitably share in societal benefits within a global community.

Expectations for Departments/School of Education/ Programs

Departments/schools/programs formally participate in outcomes assessment. Programs identify courses at three levels (introductory, intermediate, and advanced) where at least one significant educational activity is identified and assessed. Increased achievement and level of mastery at advanced levels is discussed and incorporated through continuous improvement efforts.

General Education

Students in the College of Human Sciences are required to complete a program in general education which is integrated in their professional training and extends through the undergraduate curriculum.

The general education program emphasizes intellectual growth and personal development as contrasted with specific career preparation.

The program aims to stimulate a desire for learning and intellectual endeavor, develop understanding and appreciation for the physical and cultural world, encourage independent thinking and analysis, increase competence in all aspects of communication, and create an understanding of individuals as social, psychological, and physical beings.

The student is expected to complete studies in three groups in general education. Areas represented below are not departmental titles. In some cases, courses relating to a given area may be found in several different departments. Credits listed are minimum requirements.

Minimum Group Requirements in the College of Human Sciences

I. Communication Skills (10 cr.): ENGL 150, ENGL 250; LIB 160; and 3 credits in oral communication

II. Biological and physical sciences and mathematical disciplines (9 cr.): at least 3 credits in mathematical disciplines

III. Social sciences and humanities (15 cr.): at least 6 credits in social sciences and at least 6 credits in humanities

Double Majors

Undergraduate students may elect a second major from the departments or school and program areas listed above, or from a major field offered for the bachelor's degree in another college of the university. Double majors may be prohibited between majors as determined by the appropriate curriculum committees.

The major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major. If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In this case, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major.

Students with a primary major in another college who wish to take a second major in the College of Human Sciences are required to meet all requirements for the major, prerequisites and supporting courses.

Two Bachelor's Degrees

Any degree offered by the College of Human Sciences may be earned together with a degree in this or any other college of the university. For the requirements for two degrees, see Index, Bachelor's Degree, Two.

International and Cross Cultural Programs

International opportunities are available and encouraged through the College of Human Sciences to broaden international and cross-cultural perspectives, and students can benefit personally, academically, and professionally by participating. The College prides itself on offering an \$800 tuition credit to all students participating in a CHS-sponsored program. Other scholarships are available to further assist students with achieving their goal of studying abroad.

The College offers a wide variety of international opportunities including:

- Sponsor or co-sponsor of faculty-led study abroad programs in destinations such as Chile, Italy, France, India, Thailand, China, South Korea, Peru, South Africa, and Spain
- Exchange program with Soonchunhyang University in South Korea and another exchange is in development with Fu Jen Catholic University in Taiwan
- International student teaching in Indonesia, Norway, Poland, Ecuador, Italy, Taiwan, Germany, and New Zealand

Other opportunities include programs coordinated by the Study Abroad Center or those offered by partner institutions in locations such as the Bahamas, Ireland, Italy, France, England, Scotland, Australia, and New

Zealand. In addition, students have completed internships in Ghana, Ireland, China, England, Germany, France, Bangladesh, and Japan.

International opportunities change each year and student should visit <http://www.hs.iastate.edu/current-students/international/programs/> for the latest list of available programs and to explore which programs and destinations are designed for specific majors. Other opportunities may be developed through consultation with the College's International Programs Office and the student's adviser.

Faculty members also bring diversity and global perspectives to instruction through research and collaborations with scholars and institutions abroad and the College employs faculty members from many different countries.

Honors Program

High achieving students, with a grade point average of above 3.50, are invited to apply to the Honors Program. Honors students are encouraged to develop a creative program of study expanding their interests while meeting individual educational objectives. Students in the Honors Program also participate in University Honors Seminars, Honors Courses and complete an honors project. For further information, contact the College Honors Committee or academic adviser. See <http://www.hs.iastate.edu/academics/honors/%20%20> or look in the Index, under Honors Program.

Human Sciences Extension and Outreach

Students may prepare for a career in the Cooperative Extension Service by enrolling in a curriculum in the College of Human Sciences that provides them with a subject matter base for conducting educational programs for families. Advice on choice of courses should be sought from the Family and Consumer Sciences Education and Studies program, the Associate Dean and Director of Iowa State University Human Sciences Extension and Outreach, and/or the Iowa State University Extension and Outreach 4-H Youth Development Program Leader.

Undergraduate Majors

For more information about a major, see:

1. The curriculum descriptions in this section of the catalog
2. The department catalog section under Courses and Programs
3. Department websites.

Apparel, Events, and Hospitality Management

Apparel, Merchandising, and Design

Options: Merchandising; Creative and Technical Design; and Product Development See Curriculum in Apparel, Merchandising, and Design

Event Management

See Curriculum in Event Management

Hospitality Management

See Curriculum in Hospitality Management

Food Science and Human Nutrition

Culinary Science

See Curriculum in Culinary Science

Diet and Exercise B.S./M.S.

Dietetics

See Curriculum in Dietetics

Food Science

Options: Food Science and Industry; Food Science and Technology. See Curriculum in Food Science

Nutritional Science

Options: Pre-Health Professional and Research; and Nutrition and Wellness. See Curriculum in Nutritional Science.

Human Development and Family Studies

Child, Adult, and Family Services

Options: Child Programs; Youth Programs; and Adult/Family Programs. See Curriculum Child, Adult, and Family Services

Early Childhood Education - Unified

Administered jointly by the School of Education and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education

Family and Consumer Sciences Education and Studies

Options: Communications; Professional Studies; Teacher Licensure. See Curriculum in Family and Consumer Sciences Education and Studies

Financial Counseling and Planning

See Curriculum in Financial Counseling and Planning

Affiliated Program: Early Childcare Education and Programming.

Offered by the Great Plains Interactive Distance Education Alliance (GPIDEA). See Curriculum in Early Childcare Education and Programming

Kinesiology

Athletic Training

See Curriculum in Athletic Training

Diet and Exercise B.S./M.S.

Jointly administered with the Department of Food Science and Human Nutrition. See Curriculum in Diet and Exercise

Kinesiology & Health

Options: Community and Public Health; Exercise Science; Physical Education Teacher Education; and Pre-Health Professions. See Curriculum in Kinesiology

School of Education

Early Childhood Education - Unified

Administered jointly by the School of Education and the Department of Human Development and Family Studies. See Curriculum in Early Childhood Education

Elementary Education

Administered by the School of Education. See Curriculum in Elementary Education

Secondary Education

Offered in conjunction with subject matter areas, or majors, offered by various departments across the university campus. These subject matter areas include agriculture, biology, chemistry, earth sciences, English, family and consumer sciences, health, history-social sciences, mathematics, music, physics, physical education, and world languages. See Index, Teacher Education

International Studies (secondary major only)

The International Studies Program is an interdisciplinary program which may be taken only as a second major. Students pursuing a second major in international studies must complete the International Studies Program as described in this catalog (see Index, International Studies).

Undergraduate Minors

Minors are available to all Iowa State students. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above. A student may not apply the same course to two different minors. The minor must include 9 credits that are not used to meet any other department, college or university requirement. Minors are available in the following areas:

Apparel, Merchandising, and Design - See <http://www.aeshm.hs.iastate.edu/majors/amd/#minor>

Athletic Coaching - See <http://www.kin.hs.iastate.edu/programs/minors/coaching/>

Child, Adult, and Family Services - See <http://www.hdfs.hs.iastate.edu/undergraduate-majors/minors/#child-adult-and-family-services>

Culinary Science - See <http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/>

Dance - See <http://www.kin.hs.iastate.edu/programs/dance/minor/>

Educational Services in Family and Consumer Sciences - See <http://www.hdfs.hs.iastate.edu/undergraduate-majors/minors/#educational-services-in-family-and-consumer-sciences>

Event Management - See <http://www.aeshm.hs.iastate.edu/majors/event-management/#minor>

Exercise Science - See <http://www.kin.hs.iastate.edu/programs/minors/exercise-science/>

Financial Counseling and Planning - See <http://www.hdfs.hs.iastate.edu/undergraduate-majors/minors/#financial-counseling-and-planning>

Food and Society - See <http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/>

Food Safety (interdepartmental minor) - See <http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/>

Food Science - See <http://www.fshn.hs.iastate.edu/undergraduate-programs/minors/>

Gerontology (interdisciplinary minor) - See <http://www.gerontology.iastate.edu/programs/ugrad-minor/>

Health Promotion - See <http://www.kin.hs.iastate.edu/programs/minors/health-promotion/>

Hospitality Management - See <http://www.aeshm.hs.iastate.edu/majors/hospitality-management/#minor>

Sport and Recreation - See <http://www.kin.hs.iastate.edu/programs/minors/sport-and-recreation/>

See Index for minor requirements for specific departments and programs.

Graduate Programs

The College of Human Sciences offers a variety of programs leading to a Masters degree, a Ph.D., or a graduate certificate. Each unit offers a variety of program options, as well as opportunities for interdisciplinary study in the areas of gerontology, toxicology, nutritional studies, and genetics. Multiple opportunities for on-campus and distance education programs are available.

Preparation for Graduate Study

Students considering graduate studies should gain background knowledge in basic subjects related to their area of interest. Undergraduate mathematics, statistics, and research methods courses are useful as preparation for advanced study in graduate school. Upon completion of graduate programs, students are qualified for leadership positions in business, government agencies, and public and private agencies and institutions, as well as for teaching, research, and extension positions in colleges and universities.

Information for Prospective Students

Graduate study in the College of Human Sciences is conducted through collaboration with the Graduate College, and application is completed through the Graduate College. Details regarding the application process and general information about graduate studies at ISU are found in the Graduate College section of this catalog, (<http://www.grad-college.iastate.edu/>). Details regarding the curricula and specific expectations for each program are found on department websites.

Each graduate student in the College of Human Sciences works closely with an academic advisor and a Program of Study (POS) committee. The POS assists students in developing academic programs tailored to meet individual needs, guide research and/or internship activities, and provide information and guidance about career choices. Graduate assistantship support is available for many students and involves

them in research, teaching, and administrative experiences. Incoming students are encouraged to work with departmental advisors to develop appropriate class and assistantship activities.

Graduate Curricula

Information about curricula and degree options for each College of Human Sciences unit is available on the unit websites below.

•Apparel, Events, and Hospitality Management – <http://www.aeshm.hs.iastate.edu/graduate-programs/>

•Food Science & Human Nutrition – <http://www.fshn.hs.iastate.edu/graduate-program/>

•Human Development & Family Studies – <http://www.hdfs.hs.iastate.edu/graduate/>

•Kinesiology – <http://www.kin.hs.iastate.edu/graduate/>

•School of Education - <http://www.education.iastate.edu/graduate-studies/>

Distance Education Opportunities

Several courses and degree programs are available online. Additionally, some degree programs are provided with a combination of online and condensed schedules that require limited time on campus. Details about these offerings are found on unit websites.

Some degree programs and graduate certificates are offered through collaboration with the Great Plains Interactive Distance Education Alliance (GP-IDEA; <http://www.gpidea.org/>). These online programs allow students to earn a graduate degree from ISU while taking courses and interacting with students from a number of participating universities. As well, the CHS offers a Masters of Family and Consumer Sciences-Comprehensive degree (<http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-comprehensive/>) online.

Undergraduate Certificates

An undergraduate certificate provides a way to give formal recognition of focused study in a specialized area that is less comprehensive than required for an undergraduate major. At Iowa State University, an undergraduate certificate is awarded concurrently or after baccalaureate requirements are finished. The following undergraduate certificate is available in the College of Human Sciences:

Health Coach Certificate - see <http://www.fshn.hs.iastate.edu/undergraduate-programs/health-coach-certificate>

Graduate Certificates

Graduate certificates provide formal recognition of focused graduate study in an area of specialization that is less comprehensive than required for a master's degree. At Iowa State University, a graduate certificate may be earned either before, after, or concurrently with the master's or doctoral degree. The following graduate certificates are available in the College of Human Sciences:

Applied Research Methods in Human Sciences Certificate - see <http://www.education.iastate.edu/graduate-studies/certificates/applied-research-in-the-human-sciences/>

Community College Leadership Certification - see www.cclp.hs.iastate.edu/ (<http://www.cclp.hs.iastate.edu/>)

Community College Teaching Certificate - see <http://www.education.iastate.edu/graduate-studies/certificates/community-college-teaching/>

Development and Family Sciences Advanced Research Design and Methods - see www.hdfs.hs.iastate.edu/graduate/curriculum/certificates/

* Youth Program Management & Evaluation - see <http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/>

* **online certificate**

Apparel, Events, and Hospitality Management

The Apparel, Events, and Hospitality Management department offers courses that provide opportunities for students to learn about interdisciplinary areas including aesthetics, leadership, entrepreneurship, and multi-channel retailing at both undergraduate and graduate levels. AESHM courses serve to complement the student's major area of study whether it be Apparel, Merchandising, and Design; Event Management;

Hospitality Management; agriculture, business, design education, engineering, liberal arts and sciences or minor areas of study including entrepreneurial studies, design studies, or international studies.

Apparel, Events, and Hospitality Management, otherwise known as AESHM, is composed of three majors:

- Apparel, Merchandising, and Design
- Event Management
- Hospitality Management

Through each of these three programs, students gain skills and knowledge to help them succeed in the real world. In addition to coursework, they complete an internship that closely relates to their career aspirations.

Graduates of these programs are the managers of your favorite resorts, the designers of your best jeans, and the coordinators of lavish events. From fine dining to fine apparel, our students, alumni, faculty, and staff have an eye for the original and a taste for quality.

Apparel, Merchandising, and Design

Administered by the Department of Apparel, Events, and Hospitality Management. Leading to the degree bachelor of science.

Total credits required: 123 including a minimum of 18 credits in A M D at Iowa State University for the degree (12 of the 18 credits must be at the 300-400 level). The major in apparel, merchandising, and design provides a broad based program of study with flexibility in creating program options. Courses are required in general education, and apparel industry professional core. To complete the program, a student selects a primary option from design, product development/sourcing and merchandising.

Merchandising and product development require selection of an additional secondary option.

A minor in apparel, merchandising, and design is available.

Undergraduate Study

The program offers study for the degree of Bachelor of Science with a major in apparel, merchandising, and design (A M D). The program offers students a broad understanding of textile and apparel products, merchandising and marketing strategies, technical and creative design, product development, production processes, and business practices leading to a wide range of careers at state, national, and international levels in business and industry. Courses in the program provide scientific, technical, and humanistic knowledge about textiles, apparel, and related products basic to career preparation. Courses also provide knowledge applicable to the development and use of apparel and textile products by individuals, families, and institutions. The program provides a foundation for graduate study. Graduates understand the production, distribution, and use of textiles and apparel, aesthetic expression, and communication. They are prepared to plan, develop, source and present textile and apparel products to meet the needs of consumers. They understand the issues involved in textile and apparel production and marketing, both nationally and internationally. Graduates appreciate the interdependence of nations and cultures as producers and consumers of textile products.

The A M D major provides a broad-based program of study with flexibility in creating an individualized program. To complete the program, a student combines general education, A M D core classes, and structured clusters of courses to form an option in merchandising, product

development/sourcing, or design. The combinations of primary options, secondary areas of concentration, and electives allow students to individualize their programs.

An option in merchandising prepares students for the planning, development, and presentation of market-oriented product lines and events. Career opportunities are in product development, sourcing, buying, promotion, and management in both manufacturing and retailing sectors with a focus on the textile and apparel industry. An option in creative and technical design is appropriate for those interested in the aesthetic and creative aspects of design, product or line development, promotion of textiles and apparel, technical design, apparel engineering, product development, sourcing, and quality assurance. An option in product development/sourcing is appropriate for those interested in both designing and merchandising products or lines for consumer groups, sourcing and manufacturing. Students in design have a review of their design skills (A M D 206 Design Selective Advancement) after A M D 121 Apparel Assembly, A M D 131 Overview of the Fashion Industry, A M D 178 Introduction to Fashion Design Studio, and A M D 204 Textile Science.

For additional courses of interest, see Apparel, Events, and Hospitality Management.

Minor

A minor in apparel, merchandising, and design requires (16-17 cr) of the following:

A M D 131	Overview of the Fashion Industry	3
or A M D 165	Dress and Diversity in Society	
A M D 204	Textile Science	4
One of the following:		3-4
A M D 231	Product Development and Manufacturing	
A M D 245	Aesthetics and Brand Image	
AESHM 275	Retail Merchandising	
6 credits (2 classes) of the 300-400 level at Iowa State in A M D or approved AESHM		
Total Credits		16-17

Grade Point Requirement

All students majoring in apparel, merchandising, and design are required to earn a C- or better in all AESHM and A M D courses applied toward the degree, including transfer credits.

Communication Proficiency Requirement

Undergraduate English proficiency is certified when the student has received a grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

Students who receive a C-, D+, D, or D- in ENGL 150 Critical Thinking and Communication or ENGL 250 Written, Oral, Visual, and Electronic Composition may take one of the following, with permission from the English Department, instead of repeating the lower-level course:

ENGL 302	Business Communication	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3

Curriculum in Apparel, Merchandising, and Design

Administered by the Department of Apparel, Events, and Hospitality Management. Leading to the degree bachelor of science.

Total credits required: 123 including a minimum of 18 credits in AMD at Iowa State University for the degree (12 of the 18 credits must be at the 300-400 level).

Cr. Degree Requirements

Communications Skills

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
Select one of the following:		3
COMST 214	Professional Communication	
COMST 218	Conflict Management	
SP CM 212	Fundamentals of Public Speaking	

Total Credits 10

Biological and Physical Sciences and Mathematical Disciplines

Mathematics (MATH 150 recommended for merchandising)	3
Select from natural sciences, including FS HN 167. PD: Innovation must take Chemistry.	3
Statistics	3-4
STAT 101	Principles of Statistics
STAT 104	Introduction to Statistics
STAT 226	Introduction to Business Statistics I

Total Credits 9-10

Social Sciences

ECON 101	Principles of Microeconomics	3
A M D 165	Dress and Diversity in Society	3
Select from approved list, including A M D 362		3

Total Credits 9

Humanities

Select from:		3
A M D 354	History of European and North American Dress	
A M D 356	History of Twentieth Century Fashion	
Select from approved list (world language and cultures course recommended)		3
History/Art History (Creative Design: ART H required)		3

Total Credits 9

Professional A M D core courses

AESHM 112	Orientation for AESHM	1
AESHM 113N	Professional Development for AESHM: Apparel, Merchandising, and Design	1
AESHM 311	Seminar on Careers and Internships	1
AESHM 411	Seminar on Current Issues	1
AESHM 470N	Supervised Professional Internship: Apparel	3-6
Field Study (if AESHM 470 is not out-of-home-state)		2-3
AESHM 380	U.S. Field Study	
or AESHM 381	International Field Study	

A M D 131	Overview of the Fashion Industry	3
A M D 204	Textile Science	4
A M D 210	Computer Applications in Digital Design and Data Management	3
COM S 113	Introduction to Spreadsheets and Databases	3
A M D 231	Product Development and Manufacturing	4
A M D 245	Aesthetics and Brand Image	3
A M D 275	Retail Merchandising	3
A M D 372	Sourcing and Global Issues	3

Total Credits

35-39

Primary Options

Select one professional primary option from the following two choices:

Creative and Technical Design Courses

A M D 121	Apparel Assembly Processes	3
A M D 178	Introduction to Apparel Design Studio	2
A M D 206	Design Selective Advancement	R
A M D 225	Patternmaking I: Drafting and Flat Pattern	3
A M D 278	Fashion Illustration	3
A M D 321	Computer Integrated Textile and Fashion Design	3
A M D 310	Computer Integrated Textile and Fashion Design	3
A M D 321	Computer Integrated Textile and Fashion Design	3
A M D 325	Patternmaking II: Draping	3
A M D 415	Technical Design Processes	3
A M D 495	Senior Design Studio	3
Select one		3
A M D 305	Quality Assurance of Textiles and Apparel	
A M D 404	Advanced Textile Science	
A M D 431	Apparel Production Management	

Select three classes from: 9

ACCT 284	Financial Accounting	
AESHM 222	Creative Thinking and Problem Solving	
AESHM 272	Fashion Show Production and Promotion	
AESHM 340	Hospitality and Apparel Marketing Strategies	
or MKT 340	Principles of Marketing	
AESHM 470N	Supervised Professional Internship: Apparel	3-6

Graduate Study

The program offers work for the Master of Science (thesis and non-thesis options) and Doctor of Philosophy (on-campus and distance hybrid) with a major in apparel, merchandising, and design. For all programs the field of study is highly interdisciplinary; programs of study are tailored to students' background and interests. The program offers a

concurrent B.S. and M.S. degree that allows students to obtain both the B.S. and M.S. degrees in apparel, merchandising, and design in 5 years. Application for admission to the Graduate College should be made in the junior year.

Graduates understand how textiles and apparel are essential in meeting individual and societal needs and understand the interdependence of nations and cultures as producers and consumers. Graduates understand diverse philosophies of scholarship and apply multiple methods to creative activity, research, and teaching. Strong writing and oral communication skills help graduates disseminate scholarship and compete successfully for awards and grants.

Graduates accept positions relevant to their academic experience. All doctoral graduates have teaching experience. Master's and doctoral graduates have experience working in team-oriented and interactive environments. Graduates are prepared to adapt to future changes in their professions and to provide leadership in professional and public practice.

They bring a strong sense of ethics to research, teaching, and business endeavors.

Program emphases for graduate study include creative design and product development; consumer behavior; entrepreneurship; merchandising and marketing aspects of textiles and clothing; acquisition and use of textiles and apparel within cultures; U.S. dress and textiles from the 19th into the 21st centuries; textiles; textile conservation; and computer-aided design. The program participates in the interdepartmental gerontology minor.

Athletics

Administered by the Department of Kinesiology.

Athletic Training

This major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). The program is CAATE accredited and students are prepared for the Board of Certification exam upon graduation. Admission to the athletic training program is competitive and based on available departmental resources. Admission procedures and technical standards can be found at <http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements>.

Mission

We promote health and well-being by creating and disseminating knowledge about physical activity and active living. Through discovery, learning and engagement we improve the lives of citizens of Iowa, the United States and the world.

Goals

The department has identified the following goals to support this mission:

1. We seek to improve the lives of citizens of Iowa, the United States, and the world by the creation and dissemination of knowledge about physical activity and its relationship to health and well-being.
2. We prepare scholars and professionals in the study of physical activity at the undergraduate and graduate levels.

3. We educate the public and the University community in the scientific aspects of physical activity especially exercise, sport, and the role of movement throughout the lifespan.

Undergraduate Study

The Department of Kinesiology offers two Bachelor of Science degrees: Athletic Training and Kinesiology & Health. The undergraduate curriculum major/option is comprised of three components: general education, required departmental courses and the component courses. The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

B.S. degree in Athletic Training

Certified Athletic Trainers are allied medical health professionals who specialize in the prevention, assessment, treatment and rehabilitation of injuries to athletes and physically active individuals who are engaged in physical and athletic activities. To gain certification, candidates must graduate from a CAATE accredited athletic training education program and successfully pass the Board of Certification (BOC) examination.

Many states also have licensure requirements to practice athletic training. The Athletic Training education program at Iowa State University, accredited since 2001, includes various athletic training clinical rotations including high school, physical therapy clinics, surgical observation experiences, and emergency room observation. The Athletic Training Program utilizes a competitive admission process for undergraduate students.

Curriculum in Athletic Training

This major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). The program is CAATE accredited and students are prepared for the Board of Certification exam upon graduation. Admission to the athletic training program is competitive and based on available departmental resources. Admission procedures and technical standards can be found <http://www.istatesportsmed.com/>

Communication Proficiency

In order to meet graduation requirements, all students must earn an average of C (2.0) or better in ENGL 150 and ENGL 250, with neither grade being lower than a C-. Students not meeting this condition must earn a C or better in an advanced writing course:

ENGL 220	Descriptive English Grammar	3
ENGL 302	Business Communication	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3

U.S. Diversity and International Perspectives

In order to meet graduation requirements, all students must complete 3 cr. of course work in U.S. Diversity and 3 cr. in International Perspectives. See university approved list.

General Education: Minimum of 38.5 credits required Physical and Life Sciences: 8 cr. min required

BIOL 255	Fundamentals of Human Anatomy	3
BIOL 255L	Fundamentals of Human Anatomy Laboratory	1

BIOL 256	Fundamentals of Human Physiology	3
BIOL 256L	Fundamentals of Human Physiology Laboratory	1

Additional major-specific requirements are:

PHYS 111	General Physics	5
CHEM 163	College Chemistry	4
CHEM 163L	Laboratory in College Chemistry	1
FS HN 167	Introduction to Human Nutrition	3

Mathematics and Statistics: 2 cr. min required

From the following:		2-3
MATH 140	College Algebra	
MATH 145	Applied Trigonometry	
MATH 143X	Preparation for Calculus	
MATH 150	Discrete Mathematics for Business and Social Sciences	
From the following:		3-4
STAT 101	Principles of Statistics	
or STAT 104	Introduction to Statistics	
or STAT 226	Introduction to Business Statistics I	

Social Sciences: 9 cr. min required

PSYCH 101	Introduction to Psychology	3
or PSYCH 230	Developmental Psychology	
SOC 134	Introduction to Sociology	3

Humanities: 6 cr. min required

Choose from department approved list.

Communications: 12.5 cr. min required

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
SP CM 212	Fundamentals of Public Speaking	3
LIB 160	Information Literacy	1
One of the following		3
ENGL 302	Business Communication	
ENGL 314	Technical Communication	
SP CM 312	Business and Professional Speaking	

Program requirements:

The following courses are required in all majors and options:

KIN 252	Disciplines and Professions in Kinesiology and Health	1
KIN 253	Orientation and Learning Community in Kinesiology and Health	1
KIN 258	Physical Fitness and Conditioning	2
KIN 358	Physiology of Exercise (*)	3
H S 350	Human Diseases (*)	3

* A grade of C- or better is required.

Courses for Athletic Training Major

This major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). The program is CAATE accredited and students are prepared for the Board of Certification exam upon graduation.

Admission to the athletic training program is competitive and based on available departmental resources. Admission procedures and technical standards can be found at www.cycloneathletictraining.com (<http://www.cycloneathletictraining.com>).

Option Requirements:

A TR 219	Clinical Practicum in Athletic Training	1
A TR 220	Basic Athletic Training	2
A TR 221	Pre-Athletic Training Clinical Practicum	1
A TR 222	Basic Athletic Training for Athletic Trainers	3
A TR 223	Clinical Practicum in Athletic Training	1
A TR 224	Evaluation of Athletic Injuries I	3
A TR 225	Athletic Injuries I Clinical Practicum	1
A TR 226	Evaluation of Athletic Injuries II	3
A TR 227	Athletic Injuries II Clinical Practicum	1
A TR 240	Introduction to Taping, Equipment, and Bracing Techniques	1
A TR 323	Therapeutic Modalities for Athletic Trainers	3
A TR 324	Therapeutic Modalities Clinical Practicum	1
A TR 326	Rehabilitation of Athletic Injuries	3
A TR 327	Rehabilitation of Athletic Injuries Clinical Practicum	1
A TR 425	Organization and Administration of Athletic Training	3
A TR 450	Medical Concerns for the Athletic Trainer	3
A TR 488	Evidence Based Practice in Athletic Training	2
A TR 489	Review of Athletic Training Competencies and Clinical Proficiencies	1
KIN 266	Advanced Strength Training and Conditioning	2
KIN 355	Biomechanics (*)	3
KIN 360	Sociology of Sport and Exercise (*)	3
KIN 365	Sport Psychology (*)	3
KIN 445	Legal Aspects of Sport	3
KIN 480	Functional Anatomy	3
H S 215	Drug Education	3
H S 305	Instructor's First Aid and Cardio-pulmonary Resuscitation	2

Electives 3.5-4.5

Total Credits 59.5-60.5

* A grade of C- or better is required.

Total Credits: 124.5-127.5

Students must complete a 3-credit course in US Diversity and a 3-credit course in International Perspectives. Check ISU homepage for list of approved courses. You must complete a minimum of 46 credits in 300/400 level courses and a total of 124 credits for graduation. Foru year plans are arranged with courses in prerequisite sequence and within the term a course is usually offered. This is a SAMPLE plan - use the degree audit as "official" documentation of progress towards your degree.

Child, Adult and Family Services

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

Total credits required: 120. The child, adult and family services curriculum, with options in child programs, youth programs, adult and family programs, leads to employment opportunities in the helping professions working with children, adults, and families in a variety of public and private human service agencies and organizations.

A minor in child, adult and family services is available; see requirements under Human Development and Family Studies, Undergraduate programs.

The following requirements are for the child programs, youth programs, adult and family programs:

Communications and Library: 13 credits

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
One of the following:		3
COMST 102	Introduction to Interpersonal Communication	
COMST 218	Conflict Management	
SP CM 212	Fundamentals of Public Speaking

Culinary Science (H SCI)

The Culinary Science degree program is a food science-based degree in which students develop basic culinary skills along with knowledge of the accompanying sciences. As a graduate, you'll combine food product development skills and entrepreneurial talents with scientific and technological knowledge.

The department also offers a culinary science minor.

Administered by the Department of Food Science and Human Nutrition

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Footnotes

* Choose elective courses to total equal to or greater than 120 credits.

Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation.

Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

Dance

Administered by the Department of Kinesiology.

Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and Physical Education in the public schools may major in Kinesiology and Health (Teacher Licensure option) and minor in Dance.

An interdisciplinary Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index, Theatre and Performing Arts.

Diet and Exercise (H SCI)

Curriculum in Diet and Exercise B.S./M.S.

Administered by the Department of Food Science and Human Nutrition and Department of Kinesiology

This is an accelerated program with concurrent enrollment in the undergraduate and graduate degree programs. Courses included have been approved as meeting the academic requirements of the Didactic

Program in Dietetics (DPD) in preparation for admission to accredited dietetics internship programs; the DPD is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. There is a \$30 fee for the verification statement of completion of the accredited dietetics program. Additionally, courses are included to meet the American College of Sports Medicine (ACSM) requirements for certification at the level of Certified Exercise Physiologist.

Total Degree Requirements: 124 cr. for bachelor's degree and 34-41 cr. for master's degree

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements.

Dietetics (H SCI)

Dietitians are nutrition experts who strive for optimal health and nutrition of individuals and the population. The curriculum for the dietetics program as well as the diet and exercise program meet the academic requirements of the Didactic Program in Dietetics and prepares students for a career in the field of dietetics. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency for the Academy of Nutrition and Dietetics.

Administered by the Department of Food Science and Human Nutrition

The dietetics undergraduate curriculum meets the academic requirements as the Didactic Program in Dietetics and is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. Graduates of the program are eligible to apply for admission to accredited supervised practice programs/dietetics internships. There is a \$30 fee for the verification statement of completion of the accredited dietetics program.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

Electives: 0-13 cr. Select from any university coursework to earn at least 120 total credits.

Admission to the dietetics program: Students enter the university designated as pre-dietetics. During spring semester of the second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, and completion of the application with interest in becoming a registered dietitian. Students then progress toward earning a Bachelor of Science degree in Dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship.

Go to FS HN courses.

Event Management

Administered by the Department of Apparel, Educational Studies, and Hospitality Management.

Department name changed to Apparel, Events, and Hospitality Management (12-2011)

The program offers study for the degree of Bachelor of Science with a major in event management. The program prepares undergraduate students for careers in leading event and meeting management businesses. Through the major, students gain background and experiences in planning, budgeting, and implementing conferences, meetings, and other special events in the public or private sectors. Course work provides students with a general education plus professional preparation focusing on the concepts and principles involved in meeting and event planning strategy; special event management; budgets and finance; site selection; contracts, vendors, and negotiations; marketing and promotions; food and beverage management; meeting technology; event evaluation; and hospitality law. Supporting courses include foodservice, catering, promotion, brand management, trend analysis, fashion, and resource management. Learning experiences are provided through planning university events such as Dance Marathon, Family Weekend, CHS Week, Student Union Board, and Homecoming, as well as other campus and community events.

Graduates from this program are prepared for careers in event planning (corporate events, celebrations, education, promotions, commemorations, trade shows, weddings, conferences, corporate and association events, exhibitions, festivals, philanthropies, entertainment, fundraising, conventions, and sport events) and small business development (entrepreneurship). Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, promotion, and event management principles. Students are required to complete an internship in event management prior to graduation.

The AESHM Department offers a minor in event management. The minor can be earned by successfully completing the following for a total of 15 credits.

9 credits are required:	9
EVENT 271 Introduction to Event Management	3
EVENT 371 Conference and Meeting Planning	3
EVENT 471 Special Events Coordination	3
And six credits of the following:	
AESHM 287 Principles of Management in Human Sciences	
AESHM 340 Hospitality and Apparel Marketing Strategies	
AESHM 342 Aesthetics of Consumer Experience	
AESHM 474 Entrepreneurship in Human Sciences	
Total Credits	15

Curriculum in Event Management

Administered by the Apparel, Events, and Hospitality Management Department.

Leading to the degree Bachelor of Science.

Total credits required: 123 including a minimum of 18 credits from the AESHM Department at Iowa State University for the degree. The curriculum in event management prepares students for careers in leading event and meeting management businesses. Courses are required in general education, and the professional area. Students majoring in Event Management are required to earn C- or better in all AESHM and EVENT courses. Communication Proficiency Requirement: Grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

A minor in event management is available; see requirements under Apparel, Events, and Hospitality Courses and Programs.

Family and Consumer Sciences, MFCS

Master of Family and Consumer Sciences (M.F.C.S.)

The College of Human Sciences offers a nonthesis master's degree program that might appeal to individuals with a bachelor's degree in family and consumer sciences/home economics subject area or related disciplines. This program is considered to be a professional master's degree. For students interested in further graduate study beyond the MFCS, the nonthesis degree program may mean additional requirements before completion of a Ph.D. or other terminal degree graduate program.

Students select either a comprehensive option or a specialization option. The comprehensive option requires 36 credits covering a variety of family and consumer sciences subject matter. Off-campus courses are offered via the World Wide Web (WWW). Specializations are available in Nutrition; Dietetics; Human Development and Family Studies; Hospitality Management; and Apparel, Merchandising, and Design.

In addition, students may select a 36-credit specialization in Family Financial Planning (FFP), a 36-credit specialization in Gerontology, a 36-credit specialization in Dietetics, or a 36-credit specialization in Youth Development. The FFP, Gerontology, Dietetics, and Youth Development specializations, offered in collaboration with six to eight other universities in the Great Plains Interactive Distance Education Alliance, are offered exclusively through courses on the Web. The FFP program has been approved by the Board of Examiners of the Certified Financial Planner Board of Standards as a program with the competencies required to permit those completing the degree to sit for the CFP® Certification Examination. CFP® is a certification mark owned by the Certified Financial Planner Board of Standards.

The Program of Study committee, in consultation with the student, establishes the courses to be taken and the acceptability of transfer credits. The major professor is selected from the discipline in which the concentration of coursework will be taken. Written and oral final integrative examinations are required in lieu of a thesis or creative component. A thesis or creative component could be included on mutual agreement of the student and major professor, with approval of the Graduate College.

Admission requirements for the MFCS include a bachelor's degree in a family and consumer sciences/home economics subject area or related disciplines, Graduate Record Examination (GRE) scores (not required

for the FFP and Geron specializations), official transcripts, three letters of recommendation, a goal statement, and graduation in the upper one-half of class with a bachelor's degree from a regionally accredited U.S. institution or graduation in the upper one-half of class from a recognized foreign institution. Non-English speaking international students are required to have a TOEFL score of at least 550 at time of admission.

Graduate Certificates

<http://www.hs.iastate.edu/online-grad/programs/>

An 18-credit graduate certificate in Family Financial Planning is offered for students who do not need a master's degree and want to obtain the educational requirements of the Certified Financial Planner Board of Standards CFP® Certification Examination.

A 21-credit graduate certificate in Gerontology is offered.

A 13-credit Youth Development Specialist graduate certificate is offered.

A 13-credit graduate certificate in Youth Program Management & Evaluation is offered.

For additional information, students should contact the Research and Graduate Education Office, E262 Lagomarcino, Ames, Iowa 50011-3191, mfcinfo@iastate.edu

Family and Consumer Sciences Education and Studies

Family and Consumer Sciences Education and Studies offers a curriculum for the Bachelor of Science degree.

Graduates in Family and Consumer Sciences Education and Studies have a broad understanding of individual and family well-being. Graduates apply knowledge and research in family and consumer sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities. The study of Family and Consumer Sciences Education incorporates the following 16 areas (<http://www.nasafacs.org/national-standards-and-competencies.html>): Career, Community and Family Connections; Consumer and Family Resources; Consumer Services; Education and Early Childhood; Facilities Management and Maintenance; Family; Family and Community Services; Food Production and Services; Food Science, Dietetics, and Nutrition; Hospitality, Tourism and Recreation; Housing and Interior Design;

Human Development; Interpersonal Relationship; Nutrition and Wellness; Parenting; and Textiles, Fashion and Apparel.

Students in the curriculum choose one of three options: Teacher Licensure, Communications, or Professional Studies.

Graduates of the Teacher Licensure option may teach family and consumer sciences in middle, junior high, and senior high schools. Students who enroll in Teacher Licensure must apply and be accepted into the teacher education program prior to enrolling in advanced courses and must meet general education requirements for teacher licensure. This program option is approved by the Iowa Department of Education for the preparation of comprehensive and occupational career and technical education family and consumer sciences teachers.

Graduates of the Communications option have a broad-based knowledge of family and consumer sciences and the ability to communicate in a global and technologically changing society. They are able to plan, develop, creatively present and evaluate information. Students apply the principles of educational presentations, journalism, marketing, and public relations to the family and consumer sciences field within businesses, agencies, and organizations that work to empower individuals, families, and communities.

Graduates of the Professional Studies option pursue individualized career goals in family and consumer sciences that apply integrative knowledge of family and consumer sciences in diverse careers for global settings. Students are prepared to work in a variety of careers ranging from non-profit organizations to the private sector in a business or entrepreneurial venture working with family nutrition, financial planning, life planning, current issues or other topics from the 16 content areas that affect individuals, families and communities.

Students in FCEDS may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See <http://www.hdfs.hs.iastate.edu/undergraduate-majors/cfle/> and/or <http://www.ncfr.org/cfle-certification>.

Graduates may also choose from one of several nationally recognized professional certifications available from the American Association of Family and Consumer Sciences (AAFCS) Council for Certification. This program measures competencies of FCS professionals using high-quality, rigorous assessments. Certifications that are currently available are (<http://www.aafcs.org/CredentialingCenter/Certification.asp>): **CFCS**: Certified in Family and Consumer Sciences; **CFCS-HDFS**: Certified in Human Development and Family Studies; **CFCS-HNFS**: Certified in Hospitality, Nutrition, and Food Science; and **CPFFE**: Certified Personal and Family Finance Educator.

Opportunities are available for obtaining a minor from other programs through careful selection of elective credits and consultation with an adviser. For example, students pursuing the Communications and Professional Studies options are encouraged to consider obtaining a minor in journalism and mass communications or in one of the

content areas of family and consumer sciences such as Financial Counseling and Planning. They also are encouraged to enhance their program by selecting relevant additional courses in their area of interest. Students in the Teacher Licensure option may choose to add a minor (for example: Learning Technologies) or an additional endorsement such as Health Education, Middle School, ESL, Multi-Occupations, or Coaching Interscholastic Athletics.

There is also an opportunity to obtain a family and consumer sciences-general endorsement or teacher licensure as a post baccalaureate student.

Communication Proficiency Requirement: A student must achieve a grade of C or higher in ENGL 150, Critical Thinking and Communication, and ENGL 250, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C- or lower in 150 and/or 250 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the adviser and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

The HD FS department offers an Educational Services in Family and Consumer Sciences minor. The minor consists of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above.

The Educational Services in Family and Consumer Sciences minor may be earned by completing 15 credits:

US Diversity and International Perspectives Requirement: Students in Family and Consumer Sciences Education fulfill the US Diversity by taking AESHM 379 and the International Perspectives Requirement by taking FS HN 342.

Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

Curriculum in Family and Consumer Sciences Education and Studies

Administered by the Department of Human Development and Family Studies. Leading to a degree bachelor of science.

This curriculum provides a broad-based program of study focusing on preparation for professional careers related to education or community leadership. Courses are required in general education and the College core.

Students in the program choose one of three options: Teacher Licensure, Communications, or Professional Studies.

Option 1, **Teacher Licensure**, is designed for students seeking careers as family and consumer sciences educators in a variety of settings such as middle, junior high, and senior high schools. Further information about licensure programs appears under Teacher Education.

Option 2, **Communications**, is designed for students seeking careers emphasizing the use of principles in journalism, marketing, communications, and public relations with diverse populations in business or social agency settings as well as extension, community agencies, community colleges, and youth and adult education programs in the global community.

Option 3, **Professional Studies**, is designed to provide students with the opportunity to pursue an individualized program which is planned with their academic advisers. Careers include working with diverse populations in Extension, business, community agencies, and community colleges, or non-profit groups and organizations involving youth and adult education programs.

A minor in Educational Services in Family and Consumer Sciences is available, see requirements under Human Development and Family Studies Courses and Programs or in the catalog section Family and Consumer Sciences Education and Studies.

Graduate Study

The Human Development and Family Studies department and the college of Human Sciences participates in several Master of Family and Consumer Sciences (MFCS) degree programs. See the following link for information on these options: <http://www.online.hs.iastate.edu/graduate-programs/masters/>.

Family Financial Planning Interinstitutional Graduate Program

Iowa State University offers a Master's degree in Family and Consumer Sciences with specialization in Family Financial Planning. This is an interinstitutional distance education program offered entirely online. The student selects the home institution that grants the degree. After admission at the home institution, the student takes courses from each of the participating institutions: Iowa State University; Kansas State University; Montana State University; University of Nebraska; North Dakota State University; Oklahoma State University; South Dakota State University.

At Iowa State University, Family Financial Planning is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-FFP) that consists of 36 semester credits. Neither a thesis nor a creative component is required. Students typically complete the program in three years while employed full time. A computer with minimum specifications, Web access, and an email address are required for completing the program.

FFP Graduate Certificate Program

The Graduate Certificate in Family Financial Planning consists of the six courses from the MFCS-FFP that contain the competencies required for the Certified Financial Planner (CFP®) Certification Examination. Students interested in attaining the CFP® credential and not a master's degree should enroll in the certificate program.

Courses included in the FFP graduate certificate program include:

FFP 540	Estate Planning for Families	3
FFP 545	Retirement Planning, Employee Benefits, and the Family	3
FFP 555	Insurance Planning for Families	3
FFP 565	Personal Income Taxation	3
FFP 583	Investing for the Family's Future	3
FFP 595	Financial Planning - Case Studies	3

Both the Master's degree and Graduate Certificate programs at Iowa State University are registered with Certified Financial Planner Board of Standards Inc. As a CFP Board-registered Program, ISU FFP courses satisfy CFP Board's education requirement, allowing an individual to sit for the CFP® Certification Examination.

Iowa State University does not certify individuals to use the CFP®, CERTIFIED FINANCIAL PLANNER™ title. CFP certification is granted only by Certified Financial Planner Board of Standards Inc. to those persons who, in addition to completing an educational requirement such as this CFP Board-Registered Program, have met its ethics, experience

and examination requirements. (CFP Board of Standards web site: www.cfp.net (<http://www.cfp.net>).

Certified Financial Planner Board of Standards Inc. owns the certification marks CFP®, CERTIFIED FINANCIAL PLANNER™ and the federally registered CFP (with flame logo), which it awards to individuals who successfully complete initial and ongoing certification requirements.

Admission Procedures: Admission to the FFP Certificate Program requires exactly the same procedures as admission to the Graduate College. See Graduate College section in the catalog.

Registration

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

Financial Counseling and Planning

Administered by the Department of Human Development and Family Studies. Leading to the degree bachelor of science.

The **Financial Counseling and Planning** curriculum prepares students for careers in family financial services, offering three Emphases: Financial Planning, Financial Counseling or Family Financial Studies. Financial Counseling and Planning is a growing career field and appeals to students who want to work with individuals and families to help them meet their financial goals and improve their financial capability to better meet financial challenges. Coursework provides students with the family resource management and interpersonal skills needed to help families remain financially secure. Based on individual specific career goals, students may select a path that leads to fulfilling the education requirements for the leading designations and certifications in financial counseling and planning. Graduates of the program are prepared for employment in personal banking, financial services, insurance, financial counseling and planning, and human service organizations. Laboratory and practicum opportunities exist in the Iowa State University Financial Counseling Clinic. An internship encourages students to apply their studies and to experience the profession in real-world settings.

Food Science (H SCI)

Food science is a degree program focused on food issues from the time crops leave the field until consumers buy the food products. Food scientists apply basic science (chemistry, biology, physics) to improve processing, preservation, and safety of food and to develop new food products. There are two options in food science, and both options are approved by the Institute of Food Technologists: food science and technology option, and food science and industry option.

The department also offers a food science minor.

Administered by the Department of Food Science and Human Nutrition

Students select one of the following options and complete all requirements for that option: food science and technology option or food science and industry option. Courses listed below are required for all of the options, except where specified by option below.

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 10 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3
Total Credits		10

Humanities and Social Sciences: 6-12 cr.

Select Humanities course from approved list		3
ECON 101	Principles of Microeconomics	3
If H Sci student, select:		6
Additional Humanities course		

Additional Humanities or Social Science course

Ethics and Environmental: 3-6 cr.

FS HN 342	World Food Issues: Past and Present	3
If AgLS student, select from:		2-3
ENV S 120	Introduction to Renewable Resources	
ENV S 201	Introduction to Environmental Issues	

Mathematical Sciences: 7-12 cr.

Food science and technology option:

Select from:		8
MATH 165 & MATH 166	Calculus I and Calculus II	

or

MATH 181 & MATH 182	Calculus and Mathematical Modeling for the Life Sciences I and Calculus and Mathematical Modeling for the Life Sciences II	
---------------------	--	--

Select at least 3 credits from:		3-4
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
STAT 105	Introduction to Statistics for Engineers	

Total Credits 11-12

Food science and industry option:

Select at least 4 credits from:		4
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	

Select at least 3 credits from:		3-4
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
STAT 105	Introduction to Statistics for Engineers	

Total Credits		7-8
----------------------	--	------------

Physical Sciences: 13-25 cr.

Food science and technology option:

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 331	Organic Chemistry I	3
CHEM 331L	Laboratory in Organic Chemistry I	1
CHEM 332	Organic Chemistry II	3
PHYS 111	General Physics	5
PHYS 112	General Physics	5

Total Credits 25

Food science and industry option:

Select from:		5-8
CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	
CHEM 177 & 177L & CHEM 178	General Chemistry I and Laboratory in General Chemistry I and General Chemistry II	
CHEM 231	Elementary Organic Chemistry	3
CHEM 231L	Laboratory in Elementary Organic Chemistry	1

PHYS 115	Physics for the Life Sciences	4-5
or PHYS 111	General Physics	

Total Credits 13-17

Biological Sciences: 12-13 cr.

Food science and technology option:

BBMB 301	Survey of Biochemistry	3
BIOL 211	Principles of Biology I	3
BIOL 212	Principles of Biology II	3
MICRO 302	Biology of Microorganisms	3
MICRO 302L	Microbiology Laboratory	1

Humanities (H Sci) or elective (AgLS)*	1-3	
	14-17	13

Total Credits: 120-124

* Choose elective courses to total equal to or greater than 120 credits. Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation. Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

Food Science and Human Nutrition

The Department of Food Science and Human Nutrition is jointly administered by the College of Agriculture and Life Sciences and the College of Human Sciences. All curricula offered by the department are available to students in either college. These majors include:

- Culinary science
- Dietetics
- Diet and exercise
- Food science
- Nutritional science

Visit the department web site at: www.fshn.hs.iastate.edu (<http://www.fshn.hs.iastate.edu>).

Undergraduate Study**Culinary Science**

Culinary science is an interdisciplinary degree combining a strong food science foundation with acquisition of culinary skills. The program includes chemistry, organic chemistry, biology, microbiology, and biochemistry as well as quantity food production, fine dining management, and food safety and sanitation. Internship experience in the food industry or culinary business is required. Culinary science graduates are qualified to work as managers and specialists in food research, product development, culinary applications, and food marketing and sales.

Dietetics

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics, the accrediting agency of the Academy of Nutrition and Dietetics. The dietetics undergraduate curriculum meets the academic requirements as the DPD. Additionally, the curriculum for concurrent Bachelor's and Master's degrees in diet and exercise meets the academic requirements of the DPD. Graduates of the program are eligible to apply for admission to accredited dietetics internships/supervised practice programs. Upon successful completion of the experience program, graduates are eligible to take the national examination administered by the Commission on Dietetic Registration to become a Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) and to practice in the field of dietetics. There is a \$30 fee for a statement of verification of completion of the DPD. For information about verification statements policies, see the dietetics program website: <http://www.fshn.hs.iastate.edu/undergraduate-programs/dietetics/>.

Students interested in pursuing the dietetics program enter the university designated as pre-dietetics students. During spring semester of the

second year, interested students apply to the Didactic Program in Dietetics. Admission to the program is based on overall GPA (3.0 or above required), completion of required coursework, completion of application and demonstrated interest in becoming a registered dietitian. Upon admission, students progress toward earning a Bachelor of Science degree in dietetics and receive a Verification Statement upon graduation, which is needed to enter an accredited dietetics internship. The dietetics program includes study in basic sciences, nutrition, and food science with applications to medical dietetics, nutrition counseling and education, and community nutrition. Foodservice management is also an important aspect of the program. Graduates work in clinical settings, consulting, food companies, food services, sports or athletic programs, corporate wellness programs, care facilities for patients from neonatal to geriatric, and community or school health programs.

A program for concurrent Bachelor of Science and Master of Science (BS/MS) degrees in diet and exercise (<http://www.fshn.hs.iastate.edu/undergraduate-programs/diet-exercise>) is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), within the College of Agriculture and Life Sciences and College of Human Sciences, and the Department of Kinesiology within the College of Human Sciences. Students interested in this program enroll as pre-diet and exercise students. In the fall of the third year, students apply for admission to the BS/MS program. Students not accepted into the program can continue toward completion of the BS degree in dietetics or kinesiology and health. Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of BS/MS degrees in diet and exercise.

Food Science

Food science is a discipline in which the principles of biological and physical sciences are used to study the nature of foods, the causes of their deterioration, and the principles underlying the processing and preparation of food. It is the application of science and technology to the provision of a safe, wholesome, and nutritious food supply. Biotechnology and toxicology interrelate with food science in the area of food safety. In the food industry, food scientists work in research and development of products or processes, production supervision, quality control, marketing and sales, test kitchens and recipe development, product promotion and communication. Food scientists also work in government regulatory agencies and academic institutions.

Two options are available in food science: food science and technology and food science and industry. Both options are approved by the Institute of Food Technologists, the national professional organization of food science. Career options include quality control/assurance; production supervision; management and sales; research careers in the food industry, government, or academia; business; journalism; food product formulation and recipe development; food promotion and communication; and consumer services in government and industry. Students who have an interest in graduate study or research are encouraged to select the food science and technology option. Students who wish to combine education in engineering with food science may select additional courses in chemical or agricultural engineering. Double majors are available and may require an additional year.

Students in food science have the opportunity to pursue a Master of Business Administration (<http://www.fshn.hs.iastate.edu/undergraduate-programs/food-science>) (MBA) concurrently with the Bachelor of Science (BS) degree in food science. The program is designed so students can

earn both the BS in food science and MBA in five years, to meet the needs of students who are interested in management careers in the food industry. Students apply for admission to the MBA program in the spring of the third year. The program for concurrent BS in food science/MBA degrees is a rigorous 5-year program, and admission is very selective.

Nutritional Science

Nutritional science offers two options: pre-health professional & research and nutrition & wellness. The pre-health professional & research option can serve as a pre-professional program for medicine, dentistry, veterinary medicine, or for graduate study in nutrition or other biological sciences. Students in the pre-health professional & research option gain a strong basic science education along with human nutrition expertise that enables them to attain the knowledge and skills necessary to work in research laboratories of colleges and universities, government agencies, industries, and foundations. Students in the nutrition & wellness option will learn about the role of nutrition and healthy eating for disease prevention and wellness with an emphasis on nutrition education for the public and community agencies as well as effective program planning and evaluation. Graduates will be prepared for employment opportunities in community and state agencies, nonprofit organizations and health promotion enterprises, or public health and related programs.

Departmental Learning Outcomes

Students graduating with degrees in culinary science, dietetics, diet and exercise, food science, or nutritional science will be able to: 1) demonstrate a high level of technical competence in their chosen field, perform successfully in a graduate program, supervised practice program or entry-level professional position; 2) communicate effectively as professionals; 3) successfully solve complex problems on their own and as members of a team; 4) correctly interpret and critically evaluate research literature as well as data from professional practice; 5) critically evaluate information related to food science and nutrition issues appearing in the popular press; 6) prepare and deliver effective presentations, orally and in writing, of technical information to professionals and to the general public; 7) thoughtfully discuss ethical, social, multicultural, and environmental dimensions of issues facing professionals in their chosen field.

Communication Proficiency is certified by a grade of C or better in 6 credits of coursework in composition (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or other communication-intensive courses) and a grade of C or better in 3 credits of coursework in oral communication.

Minors - Undergraduate

The department offers coursework for a variety of minors (<http://www.fshn.hs.iastate.edu/undergraduate-programs/minors>). Minors available include:

- culinary science
- food safety (interdepartmental minor)
- food science
- nutrition
- food and society

All minors have the following requirements:

- At least 15 credits must be taken, including at least 6 credits taken at Iowa State University in courses numbered 300 or above.

- The minor must include at least 9 credits that are not used to meet any other college or university requirement.
- The same courses may not be applied to two different minors.

Prerequisites: Students must complete prerequisite requirements for courses included in the minor.

Graduate Study

The Food Science and Human Nutrition (FSHN) Department offers coursework for the degrees master of science and doctor of philosophy with majors in food science and technology and in nutritional sciences, and minors in food science and technology and in nutrition. Graduate work in meat science is offered as a co-major in animal science and food science and technology.

Prerequisite to major work is a baccalaureate degree in food science, nutrition, or other physical or biological sciences or engineering that is substantially equivalent to those at Iowa State University.

Students taking major work for the degree doctor of philosophy either in food science and technology or in nutritional sciences may choose minors from other fields including anthropology, biorenewable resources and technology, chemistry, biochemistry, economics, education, journalism, microbiology, psychology, physiology, statistics, toxicology, or other related fields.

The interdepartmental graduate program in nutritional sciences, administered through the Graduate College, under the auspices of the Chairs of FSHN and Animal Science, will provide the structure for coordinating and enhancing interdisciplinary nutrition research and graduate education. Graduate students will be able to select from three specializations: animal nutrition, human nutrition, or molecular/biochemical nutrition. The two main departments are FSHN and Animal Science, whereas other departments (such as Kinesiology; Biochemistry, Biophysics, and Molecular Biology; Agronomy; and Statistics) may also be involved. (See Nutritional Sciences interdepartmental graduate major.)

The department offers an online 12-credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students eligible for admission to the food science master's degree program may be admitted.

The department participates in an online Master of Family and Consumer Sciences/Dietetics in conjunction with Colorado State University, Kansas State University, North Dakota State University, Oklahoma State University, South Dakota State University, University of Kansas Medical Center, and University of Nebraska through the Great Plains Interactive Distance Education Alliance. Students who are registered dietitians and are eligible for admission to the FSHN Master's degree program may be admitted.

The department offers work for concurrent B.S. and M.S. degree programs that allow students to obtain both the B.S. and M.S. degrees in 5 years. The programs are available to students majoring in nutritional science or pre-diet and exercise, and students progress toward M.S. degrees in nutritional sciences or diet and exercise, respectively. Students interested in these programs should contact the department for details. Application for admission to the Graduate College should be made during the junior year. Students begin research for the M.S. thesis

or creative component during the summer after their junior year and are eligible for research assistantships.

Students graduating with advanced degrees in nutritional sciences and in food science and technology will demonstrate competency in their chosen discipline. Measurable outcomes will include the ability to: 1) design, conduct, and interpret research; 2) apply theoretical information to solve practical problems; 3) prepare and communicate discipline-specific information in written and oral forms to scientific and lay audiences; 4) facilitate learning in the classroom; 5) submit a paper for publication in a peer-reviewed journal; and 6) secure professional-level positions in academia, industry, government, or health care.

Minors - Graduate

The department offers coursework for graduate minors in:

- food science/technology (<http://www.fshn.hs.iastate.edu/graduate-program/food-science-technology/#minor-in-food-science-and-technology>)
- nutritional sciences (<http://www.fshn.hs.iastate.edu/graduate-program/nutritional-sciences/#minor-in-nutritional-sciences>)

Food Science and Technology Graduate Minor students must complete the following:

- 9 to 12 credits. Students without a background in food chemistry, food engineering/processing, and/or food microbiology are required to take FSHN 511, 513, and/or 514, respectively, in which case the graduate minor will constitute up to 12 credits.
- 9 credits of graduate level food science coursework as approved by the POS committee.
- Maximum of 3 credits at the 400 level.

Nutritional Sciences Graduate Minor students must complete the following:

- 9 to 12 credits are required. Students who have not taken FSHN 360 or its equivalent (advanced nutrition with a biochemistry prerequisite) will need to take FSHN 360, in which case the Nutrition Graduate minor will constitute 12 credits.
- 9 credits of graduate level nutrition courses as approved by the POS Committee.
- NUTRS 501

Certificate - Undergraduate

Health Coach

The undergraduate health coach certificate provides a rigorous academic and theoretical background in three components of health (nutrition, exercise and motivational coaching) required to prepare workers for the challenges of being a health coach.

Certificates - Graduate

Food Safety and Defense (<http://www.fshn.hs.iastate.edu/graduate-program/food-safety-defense>)

The department offers an online 12-13 credit Graduate Certificate in Food Safety and Defense, in conjunction with the University of Nebraska, Lincoln, Kansas State University and the University of Missouri through the Great Plains Interactive Distance Education Alliance. Students may

be admitted if qualified for admission to the food science master's degree program .

Dietetics Internship (<http://www.dietetics.iastate.edu>)

The Iowa State University Dietetics Internship (DI) began as an AP4 program in 1989. It meets the performance requirements for supervised practice programs for students who have completed the academic requirements of the Academy of Nutrition and Dietetics. The internship is administered through the Department of Food Science and Human Nutrition. Interns are admitted to Iowa State University as graduate students seeking a "Graduate Certificate in Dietetics Internship" which will be indicated on the final transcript. Successful completion of this program will result in the receipt of the DI Verification Statement which establishes eligibility to sit for the national standardized exam administered by the Commission on Dietetic Registration (CDR). Successful completion of the exam results in the Registered Dietitian (RD) / Registered Dietitian Nutritionist (RDN) credential. There is a nonrefundable application fee of \$75.

Gerontology

Interdepartmental Minor and Interinstitutional Program

The gerontology program is designed for students desiring careers in aging-related fields and for students interested in improving their understanding of aging persons in American society. Students are expected to take courses to develop the necessary interdisciplinary breadth which, in combination with other disciplinary training, can prepare them to work with older adults.

Graduates understand the ways in which individual and societal aging influence, and are impacted by, developments in their major field of study. They have an appreciation and understanding of the cross-disciplinary aspects of human aging.

Gerontology courses are offered in the interdepartmental gerontology program in the following participating departments and programs: Architecture; Biochemistry, Biophysics, and Molecular Biology; Economics; Apparel, Educational Studies, and Hospitality Management, Food Science and Human Nutrition; Kinesiology; Human Development and Family Studies; Political Science; Psychology; and Sociology.

Undergraduate Study

Undergraduate study in this program provides the student with an opportunity to develop a minor in gerontology. A balanced grouping of courses assists the student in developing both a sensitivity to the issues and the ability to synthesize ideas from the variety of disciplines important to the study of the aging process.

Minor

Undergraduate students may minor in gerontology by taking 16 semester hours of gerontology related courses. Nine of these credits must come from the following courses:

GERON 373	Death as a Part of Living	3
GERON 377	Aging and the Family	3
GERON 378	Retirement Planning and Employee Benefits	3
GERON 463	Environments for the Aging	3

Students will participate in a prepracticum seminar, GERON 466 Gerontology Prepracticum Seminar, and will complete a supervised field

practicum after all gerontology coursework is completed (GERON 467 Gerontology Practicum). A minimum of 3 semester credits must be selected from a list of supportive gerontology related courses. Supportive courses include units or topics related to aging and can be used to complement the student's major interests. The student's minor program must be approved by the undergraduate gerontology coordinator.

Graduate Study

A declared graduate minor in gerontology consists of a minimum of 12 credits taken from a list of acceptable courses, and from at least two departments. Nine of the 12 credits must be in courses that are focused specifically on aging. One 590 course (3 credits maximum) can be taken as part of the 12 credits. GERON 510 Survey of Gerontology is required for all minor students. At least one member of the gerontology faculty will be on a student's advisory committee; this person must be a member of the Graduate Faculty. Contact the coordinator to determine whether courses other than those listed below are available.

Interinstitutional Program

Iowa State University offers a Master's degree in Family and Consumer Sciences with specialization in gerontology. This is an interinstitutional distance education program offered through the Web. The student selects the home institution, which grants the degree. After admission at the home institution, the student takes courses from each of the seven institutions: Iowa State University, Kansas State University, North Dakota State University, Oklahoma State University, Texas Tech University, the University of Arkansas, and the University of Missouri.

The master's degree consists of 36 semester hours, 24 of these hours are from the following courses:

GERON 530	Perspectives in Gerontology	3
GERON 534	Adult Development	3
GERON 540	Nutrition and Physical Activity in Aging	3
GERON 545	Economics, Public Policy, and Aging	3
GERON 563	Environments for the Aging	3
GERON 577	Aging in the Family Setting	3
GERON 584	Program Evaluation and Research Methods in Gerontology	3
GERON 594	Professional Seminar in Gerontology	3

The remaining 12 credits will include electives and specific courses needed to meet the requirements of the institution awarding the degree. Neither a thesis nor a creative component is required.

Gerontology Graduate Certificate Program

The 21-credit Graduate Certificate Program in Gerontology includes the following courses from the list of core courses:

GERON 530	Perspectives in Gerontology	3
GERON 534	Adult Development	3
GERON 540	Nutrition and Physical Activity in Aging	3
GERON 594	Professional Seminar in Gerontology	3

The additional six credits required for the certificate can be chosen from the remaining core courses or from other approved elective courses. A maximum of three credits of practicum also can be included in the elective credits.

Admission Procedures: Admission to the Gerontology Certificate Program requires exactly the same procedures as admission to the Graduate College. See Graduate College section of the catalog.

Registration: Students choosing to receive their degree from Iowa State University complete all the admissions, registration, and fee payment processes through ISU.

Hospitality Management

Administered by the Department of Apparel, Events, and Hospitality Management

The Hospitality Management program strives for excellence in professional and leadership development for the hospitality industry through education, research, and outreach with a mission of developing leaders in the hospitality industry. Educational experiences are planned to contribute to the graduate's effectiveness as a career professional and as a person, family member, and citizen. Research along with Hextension and Outreach efforts are conducted with the purpose of improving management effectiveness and quality of services within hospitality organizations. Finally, the program is committed to serving the respective missions of Iowa State University and the College of Human Sciences and to serving the needs of the citizens of Iowa.

Undergraduate Study

The program offers work for the degree Bachelor of Science in hospitality management. Coursework is planned to provide students with a general education plus professional preparation for supervisory and executive positions in hospitality organizations. Principles of business management are presented, as well as fundamentals of hospitality operations.

Graduates demonstrate leadership characteristics and make decisions based on integrating knowledge of financial, human resources, marketing, and operational principles for managing hospitality operations. They demonstrate best practices in meeting customer expectations and use of technology to achieve operational efficiency and effectiveness.

Learning experiences are provided in the quantity food production and service facility of the Hospitality Management program and other approved establishments. Students are required to have a total of at least 600 hours of relevant work experience prior to graduation. Of the 600 hours, 200 hours are required prior to completing one year in the program.

The program offers a concurrent B.S. and M.S. degree that allows students to obtain a B.S. and M.S. degree in hospitality management in 5 years. Application for admission to the Graduate College should be made in the junior year.

Minor

A minor in Hospitality Management may be earned by successfully completing at least 15 credits of AESHM/Hsp M courses. The minor must include at least six (6) credits in courses numbered 300 or above taken at ISU. All course prerequisites must be completed prior to taking the course. All minor courses must be taken for a grade.

The Hospitality Minor requires students to complete HSP M 101 and HSP M 233. The remaining 9 credits may be selected from any HSP M designated course, as well as AESHM 287, AESHM 438, AESHM 474, and AESHM 477.

Curriculum in Hospitality Management

Administered by the Apparel, Events, and Hospitality Management Department. Leading to the Bachelor of Science degree.

The curriculum in Hospitality Management develops students as leaders for the hospitality professions.

A minor in Hospitality Management is available; see requirements under Hospitality Management, Courses and Programs.

Students majoring in Hospitality Management are required to earn C- or better in all AESHM and HSP M courses. Communication Proficiency Requirement: Grade of C or better in ENGL 150 Critical Thinking and Communication, and ENGL 250 Written, Oral, Visual, and Electronic Composition.

Degree Requirements

10 Communications and Library

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
Select one from the following:		3
COMST 102	Introduction to Interpersonal Communication	
COMST 214	Professional Communication	
SP CM 212	Fundamentals of Public Speaking	

Total Credits 10

10 Natural Sciences and Mathematical Disciplines

Select one MATH course from:		3
MATH 104	Introduction to Probability	
MATH 105	Introduction to Mathematical Ideas	
MATH 140	College Algebra	
MATH 150	Discrete Mathematics for Business and Social Sciences	
MATH 160	Survey of Calculus	
STAT 101	Principles of Statistics	4
Natural Sciences (see approved list)		3

Total Credits 10

9 Social Sciences

ECON 101	Principles of Microeconomics	3
HD FS 102	Individual and Family Development, Health, and Well-being	3
Select from:		3
PSYCH 101	Introduction to Psychology	
PSYCH 280	Social Psychology	
SOC 134	Introduction to Sociology	

Total Credits 9

6 Humanities

AESHM 342	Aesthetics of Consumer Experience	3
Approved courses		3

Total Credits 6

49-53 Hospitality Management Professional Core Courses

AESHM 170	Supervised Work Experience I	1
AESHM 175D	Financial Applications for Retail and Hospitality Industries: Hospitality Management	2

AESHM 270D or AESHM 270P	Supervised Work Experience II: Hospitality Supervised Work Experience II: ISU Dining	2
AESHM 287	Principles of Management in Human Sciences	3
AESHM 340	Hospitality and Apparel Marketing Strategies	3
AESHM 411	Seminar on Current Issues	1
AESHM 438	Human Resource Management	3
AESHM 470D or AESHM 470P	Supervised Professional Internship: Hospitality Supervised Professional Internship: ISU Dining	3-6
HSP M 101	Introduction to the Hospitality Industry	3
HSP M 233	Hospitality Sanitation and Safety	3
HSP M 315	Hospitality Law	3
HSP M 333	Hospitality Operations Cost Controls	3
HSP M 352	Lodging Operations Management I	3
HSP M 380	Quantity Food Production Management	3
HSP M 380L	Quantity Food Production and Service Management Experience	2
HSP M 433	Hospitality Financial Management	3
HSP M 439	Advanced Hospitality Human Resource Management	3
HSP M 455	Introduction to Strategic Management in Foodservice and Lodging	3

Total Credits 47-50

13-15 Hospitality Management electives

Select from:

A M D 275	Retail Merchandising	3
A M D 477	Multi-channel Retailing	3
AESHM 211	Leadership Experiences and Development (LEAD)	3
AESHM 222	Creative Thinking and Problem Solving	3
AESHM 379	Community Leadership: Examination of Social Issues	3
AESHM 474	Entrepreneurship in Human Sciences	3
EVENT 271	Introduction to Event Management ^{Only 6 credits of EVENT courses may apply for Hospitality elective credits}	3
EVENT 371	Conference and Meeting Planning	3
EVENT 471	Special Events Coordination	3
HSP M 189	Introduction to University Dining Services Management	1
HSP M 230	Introduction to Hospitality Performance Analysis	3
HSP M 260	Global Tourism Management	3
HSP M 289	Contemporary Club Management	2
HSP M 320	Attractions and Amusement Park Administration	3
HSP M 383	Introduction to Wine, Beer, and Spirits	2
HSP M 383L	Introduction to Wine, Beer and Spirits Laboratory	1
HSP M 437	Hospitality Information Technology	3
HSP M 452	Lodging Operations Management II	3
HSP M 487	Fine Dining Management	3

13 Supporting courses

ACCT 284	Financial Accounting	3
AESHM 112	Orientation for AESHM	1
AESHM 311	Seminar on Careers and Internships	1
AESHM 113E	Professional Development for AESHM: Event Management and Hospitality Management	1

FS HN 111	Fundamentals of Food Preparation *	2
FS HN 115	Food Preparation Laboratory	1
FS HN 167	Introduction to Human Nutrition *	3

* A student who has not had high school chemistry is required to take CHEM 160 Chemistry in Modern Society

US Diversity and International Perspectives Requirement: Students in HRI fulfill the US Diversity and International Perspectives Requirements by choosing 3 credits of coursework from each of the University-approved lists.

Note: This sequence is only an example. The number of credits taken each semester should be based on the individual student's situation.

Factors that may affect credit hours per semester include student ability, employment, health, activities, and grade point consideration.

¹ BIOL 101 required if student has not completed high school biology

² When the 4-year plan indicates HSP M Group or General Electives, choice depends on courses available. However, you must have a total of 13-15 credits of HRI electives and 15-17 credits of General Electives (HSP M courses may be taken to meet General Electives requirements).

³ CHEM 160 required if student has not completed high school chemistry

Graduate Study

The Hospitality Management program offers work for the Master of Science and Doctor of Philosophy degrees in hospitality management. Graduates of the program are able to interpret trends and adapt operating practices of hospitality organizations to changing economic, social, political, technological, and environmental conditions. The Master's degree program is designed to prepare individuals for managerial and leadership positions in industry, business, and non-profit organization; teaching careers; and continued graduate study.

The doctoral program is designed to prepare individuals to teach in programs at the university level; provide leadership in non-profit organizations; and/or conduct advanced research at the corporate level or with research firms.

A degree in hospitality management is the usual background for graduate study; however, applicants with preparation in dietetics, business, or closely related fields are encouraged to apply. PhD applicants must have two (2) years of professional work experience in the field.

The Master of Science degree requires either a thesis or non-thesis (creative component) project. Students also are required to take three core courses out of the four offered in the core areas (human resources, financial management, marketing, and strategic management).

The PhD program requires a minimum of 72 credits, up to 30 of which may be applied from the Master's degree. All PhD students take a minimum of 15 research/dissertation credits.

Human Development and Family Studies

The Department of Human Development and Family Studies offers courses that focus on the interactions among individuals, families, their resources, and their environments throughout the life span. The department offers work for the Bachelor of Science degree in five curricula: Child, Adult and Family Services; Early Childhood Education; Family and Consumer Sciences Education and Studies, Financial Counseling and Planning, and an affiliated program: Early Childcare Education and Programming (a distance education program offered in collaboration with six other universities).

Students graduating in Human Development and Family Studies will

1. Communicate with clear purpose, workable organization and effective style in written, oral, visual and electronic (WOVE) formats to foster collaboration, provide information and advance knowledge related to child, adult, family, and community services.
2. Consistently and realistically analyze and evaluate one's own knowledge, abilities and actions in comparison to professional standards and create action plans to enhance personal and professional efficacy related to working with children, adults, families and communities.
3. Understand content related to working with children, adults, families, and communities within a chosen program. Use critical thinking skills to evaluate and utilize evidence-based practices. Use logical and ethical reasoning to make decisions and solve problems.
4. Understand the diverse needs of children, adults, and families. Ensure equitable access of children, adults, and families to appropriate environments that support healthy living. Engage children, adults, and families with socially responsible and respectful behavior.

Communication Proficiency requirement: A student must achieve a grade of C or higher in ENGL 150, Critical Thinking and Communication, and ENGL 250, Written, Oral, Visual, and Electronic Composition. A student achieving a grade of C– or lower in 150 and/or 250 must either repeat the course(s), earning a minimum grade of C, or, in consultation with the adviser and the coordinator of freshman English, complete another appropriate English writing course with a minimum grade of C.

The **Child, Adult and Family Services** curriculum leads to work in helping professions with employment opportunities in public and private agencies. Graduates of the program are prepared for employment in agencies and organizations serving children, youth, families, and adults as program development specialists, coordinators, directors, teachers, direct care staff, and administrators, through opportunities to work directly in settings of interest to the student. This flexible program provides a broad emphasis in theory, research, and application in child, adult and family services including attention to community issues and public policy.

Students in Child, Adult and Family Services may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a

degree in an approved program and to have at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See <http://www.hdfs.hs.iastate.edu/undergraduate-majors/cfle/> and/or <http://www.ncfr.org/cfle-certification>.

The curriculum in **Early Childhood Education – Unified** prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through age eight. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education – unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see <http://www.hdfs.hs.iastate.edu/undergraduate-majors/ece/>.

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education – unified students must meet general education requirements for teacher licensure.

Family and Consumer Sciences Education and Studies offers a curriculum for the Bachelor of Science degree. (<http://catalog.iastate.edu/collegeofhumansciences/familyandconsumerscienceseducationandstudies>)

Graduates in Family and Consumer Sciences Education and Studies have a broad understanding of individual and family well-being. Graduates apply knowledge and research in family and consumer sciences content in global professional settings. They work in an integrative fashion to improve well-being by addressing and acting on complex problems confronting individuals, families, and communities. The study of Family and Consumer Sciences Education incorporates the following 16 content areas (<http://www.nasafacs.org/national-standards-and-competencies.html>): Career, Community and Family Connections; Consumer and Family Resources; Consumer Services; Education and Early Childhood; Facilities Management and Maintenance; Family; Family and Community Services; Food Production and Services; Food Science, Dietetics, and Nutrition; Hospitality, Tourism and Recreation; Housing and Interior Design; Human Development; Interpersonal Relationship; Nutrition and Wellness; Parenting; and Textiles, Fashion and Apparel.

Students in the program choose one of three options, Teacher Licensure, Communications, or Professional Studies.

Students in Family and Consumer Sciences Education and Studies may choose coursework that leads to becoming a Certified Family Life Educator (CFLE), a program that has been approved by the National Council on Family Relations. These courses provide the basic education for students interested in working with families, including adolescents, parents, or adults working to strengthen relationships. The student takes courses that support the development of knowledge and skills in family life content areas selected by the National Council on Family Relations. The certification is a voluntary credential that requires the individual to complete a degree in an approved program and to have

at least two years of work experience in family life education settings. Iowa State University does not grant the Certified Family Life Educator credential. The certification is granted only by the National Council on Family Relations. See <http://www.hdfs.hs.iastate.edu/undergraduate-majors/cfle/> and/or <http://www.ncfr.org/cfle-certification>.

Graduates may also choose from one of several nationally recognized professional certifications available from the American Association of Family and Consumer Sciences (AAFCS) Council for Certification. This program measures competencies of FCS professionals using high-quality, rigorous assessments. Certifications that are currently available are (<http://www.aafcs.org/CredentialingCenter/Certification.asp>): CFCS: Certified in Family and Consumer Sciences; CFCS-HDFS: Certified in Human Development and Family Studies; CFCS-HNFS: Certified in Hospitality, Nutrition, and Food Science; and CPFFE: Certified Personal and Family Finance Educator.

Opportunities are available for obtaining a minor from other programs through careful selection of elective credits and consultation with an adviser. For example, students pursuing the Communications and Professional Studies options are encouraged to consider obtaining a minor in journalism and mass communications or in one of the content areas of family and consumer sciences such as financial counseling and planning. They also are encouraged to enhance their program by selecting relevant additional courses in their area of interest. Students in the Teacher Licensure option may choose to add a Learning Technologies minor or an additional endorsement such as Health Education, Middle School, ESL, Multi-Occupations, or Coaching Interscholastic Athletics.

There is also an opportunity to obtain a family and consumer sciences endorsement or teacher licensure as a post baccalaureate student.

The **Financial Counseling and Planning** curriculum prepares students for careers in family financial services, offering three Emphases: Financial Planning, Financial Counseling or Family Financial Studies. Financial Counseling and Planning is a growing career field and appeals to students who want to work with individuals and families to help them meet their financial goals and improve their financial capability to better meet financial challenges. Coursework provides students with the family resource management and interpersonal skills needed to help families remain financially secure. Based on individual specific career goals students may select a path that leads to fulfilling the education requirements for the leading designations and certifications in financial counseling and planning. Graduates of the program are prepared for employment in personal banking, financial services, insurance, financial counseling and planning, and human service organizations. Laboratory and practicum opportunities exist in the Iowa State University Financial Counseling Clinic. An internship encourages students to apply their studies and to experience the profession in real-world settings.

Financial Counseling and Planning majors are also prepared to enter graduate programs in family financial planning, financial education, economics, finance, and law.

Juniors and seniors in Financial Counseling and Planning who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a B.S. in Financial Counseling and Planning and a M.S. in Human Development and Family Studies or a B.S. in Financial Counseling and Planning and a Graduate Certificate in Family Financial Planning. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses

and may be eligible for assistantships. See Graduate Study for more information (<http://www.hdfs.hs.iastate.edu/graduate/>).

The Financial Planning emphasis in Financial Counseling and Planning is registered with Certified Financial Planner Board of Standards Inc. as a CFP Board-registered Program. ISU courses satisfy CFP Board's education requirement, allowing an individual to sit for the CFP® Certification Examination.

Iowa State University does not certify individuals to use the CFP® CERTIFIED FINANCIAL PLANNER™ title. CFP certification is granted only by Certified Financial Planner Board of Standards Inc. to those persons who, in addition to completing an educational requirement such as this CFP Board-Registered Program, have met its ethics, experience and examination requirements. (CFP Board of Standards web site www.cfp.net.)

Certified Financial Planner Board of Standards Inc. owns the certification marks CFP®, CERTIFIED FINANCIAL PLANNER™ and the federally registered CFP (with flame logo), which it awards to individuals who successfully complete initial and ongoing certification requirements.

Affiliated Programs

The **Early Childcare Education and Programming (E C P)** curriculum, offered by the Great Plains Interactive Distance Education Alliance (GPIDEA), is designed to prepare graduates to work in a variety of early care and education programs in local communities and on military installations. Some of these programs are childcare centers and homes, infant/toddler and preschool programs, Head Start programs, and before and after-school programs for children ages birth to eight. This is an online program offered through a collaboration of seven universities as part of GPIDEA. The program is known as Early Care and Education for a Mobile Society. For more information see <http://www.hsidea.org/programs/ece/>.

The E C P curriculum is designed to provide content for the final two years of a student's program; the content is focused specifically on topics directly relevant to the major. Students will complete a total of 120 credits for the major, 51 of which are specific to the E C P curriculum. These 51 credit hours are comprised of 12 core courses and 3 practica; the final practicum will be a 6-credit capstone experience. Students must complete the required 30 credits of college work and a lifespan development course before being admitted to E C P. If students prefer to be admitted to ISU before being admitted to the E C P major, they can enroll as Pre ECP (P ECP) students until they are eligible for the E C P major. For more information about the program at Iowa State, see <http://www.online.hs.iastate.edu/ecp>.

Curricula:

- **Child, Adult and Family Services**
- **Early Childhood Education – Unified**
- **Family and Consumer Sciences Education and Studies**
- **Financial Counseling and Planning**
- **Affiliated Program: Early Childcare Education and Programming (GPIDEA program)**

Minors

The department offers minors in Child, Adult and Family Services, Educational Services in Family and Consumer Sciences, and Financial

Counseling and Planning. Minors consist of at least 15 credits including 6 credits taken at Iowa State University in courses numbered 300 or above.

The Child, Adult and Family Services minor may be earned by completing 15 credits:

HD FS 102	Individual and Family Development, Health, and Well-being	3
One of the following:		3
HD FS 223	Child Development and Health	
HD FS 226	Development and Guidance in Middle Childhood	
HD FS 227	Adolescent and Emerging Adulthood	
HD FS 234	Adult Development and Aging	
HD FS 377	Aging and the Family	
Three of the following:		9
HD FS 249	Parenting and Family Diversity Issues	
HD FS 270	Family Communications and Relationships	
HD FS 360	Housing and Services for Families and Children	
HD FS 367	Abuse and Illness in Families	
HD FS 373	Death as a Part of Living	
HD FS 395	Children, Families, and Public Policy	
HD FS 449	Program Evaluation and Proposal Writing	
HD FS 463	Environments for the Aging	
HD FS 479	Family Interaction Dynamics	

Total Credits 15

The Education Services in Family and Consumer Sciences minor may be earned by completing 15 credits:

FCEDS 206	Professional Roles in Family and Consumer Sciences	2
FCEDS 306	Educational Principles for Family and Consumer Sciences and Family Life Education	4
FCEDS 413	Planning and Assessment for Family and Consumer Sciences and Family Life Education	4
FCEDS 491A	Supervised Experiences in a Professional Setting: Communications	5
or FCEDS 491B	Supervised Experiences in a Professional Setting: Professional Studies	

Total Credits 15

The Financial Counseling and Planning minor may be earned by completing 15 credits:

HD FS 283	Personal and Family Finance	3
Select 12 credits from the courses below:		12
HD FS 341	Household Finance and Policy	
HD FS 378	Retirement Planning and Employee Benefits	
HD FS 383	Fundamentals of Financial Planning	
HD FS 482	Family Savings and Investments	
HD FS 484	Estate Planning for Families	
HD FS 489	Financial Counseling	
HD FS 489L	Financial Counseling Laboratory	

Total Credits 15

Graduate Study

The department offers work for the Master of Science (thesis and non-thesis option) and Doctor of Philosophy degrees with the major in Human Development and Family Studies. Minor work for students taking major work in other departments is also available. Graduates of M.S. and Ph.D. programs in the department will understand and apply relevant theories to educational, research, and/or intervention or prevention programs. It is intended that they will produce and disseminate research results and provide leadership in human development and family studies professions.

Graduate study in Human Development and Family Studies at Iowa State University is multidisciplinary and focuses on research and practice in several content areas such as adolescent/youth development, adult development and aging, family studies and policy, family economic well-being and financial planning, infant and child development, health and well-being, and lifespan development.

Prerequisite to work in the major is the completion of a related undergraduate program with basic courses and/or experiences in areas such as child/human development, community and regional planning, economics, education, family studies, psychology, or sociology. Additional coursework or prerequisites (e.g., basic statistics) may be required depending on the undergraduate program and program of study. Students may be admitted to our doctoral program with either a bachelor's (M.S./Ph.D. Track, 5 years) or a master's degree (Ph.D. Track only, 3 years). Students admitted to the Ph.D. Track without a prior master's degree complete requirements for a thesis-based master's degree as part of their doctoral program of study.

All students take a core set of courses; the program of study is then completed with a selection of courses that meet the individual needs of the student. The variety of and flexibility in the coursework allows a student to tailor a program to specific academic interests. The graduate programs are based on a theory, research, and application interactive paradigm with all three areas integrated into content and method courses.

The department offers a graduate minor in Human Development and Family Studies. To earn this minor, students in a Master's program must take 9 credits in HD FS graduate courses (500, 600 level) with a limit of 3 credits in seminar or workshop credit (credits in 591 or 691 not allowed). To earn a minor in HD FS students in a Doctoral program must take 12 credits in HD FS graduate courses (500, 600 level) with a limit of 3 credits in seminar or workshop credit (credits in 591 or 691 not allowed).

The department offers four Graduate Certificates available to HD FS majors as well as students in other departments and professionals in the field. The certificates emphasize application and relevance to growing diversity and demands on the work force and include Developmental and Family Sciences Advanced Research Design and Methods (15 credits); Family Well-Being in Diverse Society (12 credits); Infant and Early Childhood Mental Health (12 credits, online); and Life-span Development (12 credits, online).

The department also participates in several Master of Family and Consumer Sciences (MFCS) degree programs (<http://catalog.iastate.edu/collegeofhumansciences/familyandconsumersciences/>). Admission to the youth (YTH), family financial planning (FFP) and gerontology (GERON) specialization programs require submission of the Graduate College application form, transcripts, 2 letters of recommendation, resume and

a goal statement. Students in a MFCS program select one of the options listed below.

First, students selecting this option may choose Human Development and Family Studies as the focus of their studies.

Second, a 36-credit Master of Family and Consumer Sciences-Youth Development (MFCS-YD), or a 13-credit Youth Development Specialist Certificate, or a 13-credit Youth Program Management and Evaluation Certificate are designed to prepare individuals who work directly with youth or are involved in education and research related to youth. The courses for this program are completely online.

Third, a 36-credit Master of Family and Consumer Sciences-Family Financial Planning Program (MFCS-FFP), along with the 18-credit Graduate Certificate Program, is designed to prepare individuals to work in the financial planning field. The courses for the program are completely online. Completion of course work in the Master degree and Graduate Certificate meets the educational requirements to sit for the Certified Financial Planner (CFP) Board of Standards Certification Examination.

The department offers a Financial Counseling and Planning (FCP) concurrent degree program that allows students to obtain a B.S. in FCP and an M.S. in HD FS or a B.S. in FCP and a Graduate Certificate in Family Financial Planning in 5 years. Application for admission to the Graduate College should be made near the end of the junior year. Under concurrent enrollment, students simultaneously take undergraduate and graduate courses and may be eligible for assistantships. Students interested in these programs should contact the department for details.

Finally, the department collaborates with the interdepartmental Gerontology program; students may declare a minor in Gerontology. The Master of Family and Consumer Sciences - Gerontology program (MFCS-GERON) and the Graduate Gerontology Certificate program are designed to prepare professionals who work directly with older people or are involved in education and research related to older adults. Professionals offering direct services often are involved in health promotion programs, directing inter-generational activities, managing senior centers or retirement communities, counseling older people and their families, and helping people plan for retirement. Professionals involved in education and research may evaluate community-based services, teach others about the aging process, develop policies and programs to serve the needs of older adults, and work with business and industry on issues related to an aging work force.

Human Sciences

Human Sciences courses provide integrative study and enriching experiences in areas that cut across the diverse curricula of the College of Human Sciences. These may include such areas as leadership, global understanding, social justice/responsibility, and ethics. Students in any college may take these courses.

Kinesiology

Mission

We promote health and well-being by creating and disseminating knowledge about physical activity and active living. Through discovery, learning and engagement we improve the lives of citizens of Iowa, the United States and the world.

Goals

The department has identified the following goals to support this mission:

1. We seek to improve the lives of citizens of Iowa, the United States, and the world by the creation and dissemination of knowledge about physical activity and its relationship to health and well-being.
2. We prepare scholars and professionals in the study of physical activity at the undergraduate and graduate levels.
3. We educate the public and the University community in the scientific aspects of physical activity especially exercise, sport, and the role of movement throughout the lifespan.

Undergraduate Study

The Department of Kinesiology offers two Bachelor of Science degrees:

Athletic Training and Kinesiology & Health. The undergraduate curriculum major/option is comprised of three components: general education, required departmental courses and the major/option courses.

The intent of the general education component is to promote intellectual and personal growth and to prepare students for success in the basic, advanced and major/option components. Required courses provide an introduction to the field and fundamental principles of physical activity, fitness, health and disease.

B.S. degree in Athletic Training

Certified Athletic Trainers are allied medical health professionals who specialize in the prevention, assessment, treatment and rehabilitation of injuries to athletes and physically active individuals who are engaged in physical and athletic activities. To gain certification, candidates must graduate from a CAATE accredited athletic training education program and successfully pass the Board of Certification (BOC) examination.

Many states also have licensure requirements to practice athletic training. The Athletic Training education program at Iowa State University, accredited since 2001, includes various athletic training clinical rotations including high school, physical therapy clinics, surgical observation experiences, and emergency room observation. The Athletic Training Program utilizes a competitive admission process for undergraduate students.

B.S. degree in Kinesiology & Health

The Kinesiology & Health major includes four specialization options. Options comprise a focused area of study within Kinesiology and Health. Coursework within each specialization option builds upon personal and scholarly learning by enabling students to master content and skills specific to career applications. Options available are:

1. Community and Public Health
2. Exercise Science
3. Pre-Health Professions
4. Physical Education/Teacher Education

Academic options within the Kinesiology & Health major

Students in the Community and Public Health option are prepared for professional employment at local, state or national health agencies, medical centers, and other public or private organizations that seek to promote health in the population.

Students in the Exercise Science option are prepared for professional roles as health and fitness leaders or program managers. Employment opportunities include work in corporate fitness programs, health clubs,

cardiac rehabilitation programs or personal training. Graduates are able to plan, implement and supervise exercise programs which will improve fitness and health. Graduates also have a basic understanding of management issues related to business applications in the health and fitness field.

Students in the Pre-Health Professions option utilize an interdisciplinary approach to the study of human movement. In so doing, they become prepared for graduate study in Kinesiology or advanced study leading to careers in medicine, physical therapy, physician assistant or other healthcare professions.

Students in the Physical Education/Teacher Education option are prepared to teach physical education in grades K-12 and to meet the State of Iowa learning outcomes for teachers. Graduates can plan developmentally appropriate physical education, and individualize instruction and assessment for diverse audiences. Enrollment in the Physical Education/Teacher Education option is limited because of accreditation requirements and the provision of more individualized field experiences.

Learning outcomes for the undergraduate degree

Despite the diversity of options, the learning outcomes comprise a common framework for each student as they progress through Iowa State University.

The learning outcomes emphasized in academic coursework in the Department of Kinesiology are:

Communication

Uses clear and effective written, oral, visual, and electronic (WOVE) communication techniques to foster inquiry, collaboration, and engagement in physical activity and health related settings.

Lifelong learning, assessment, and self-reflection

Analyzes and evaluates one's own knowledge, abilities and actions relative to professional standards, seeks opportunities to grow professionally, and utilizes self-assessment and assessment of others to foster physical, cognitive, social, and emotional well-being.

Content knowledge, discovery, and critical thinking

Understands fundamental concepts of physical activity and health, conducts scientific inquiry, and applies critical thinking to solve problems from personal, scholarly, and professional perspectives.

Ethics, diversity, and social justice

Demonstrates leadership and social responsibility to improve quality of life for others and ensures equitable access for diverse groups by creating appropriate environments to initiate and maintain a physically active, healthy lifestyle.

Other Program Offerings:

B.S./M.S. degree in Diet and Exercise

A combined Bachelor of Science and Master of Science (B.S./M.S.) degree in Diet and Exercise is available. The program is jointly administered by the Department of Food Science and Human Nutrition (FS HN), within the College of Agriculture and Life Sciences and the College of Human Sciences, and the Department of Kinesiology, within the College of Human Sciences. Students interested in this program must enroll as freshmen in the Pre-Diet and Exercise program. In the fall of the junior year, students will apply for admission to the B.S./M.S. program. Students not accepted into the program will continue toward completion of a B.S. degree in Dietetics or Kinesiology & Health.

Coursework has been designed to facilitate a 4-year graduation date for those students not accepted into the program and electing to complete a single undergraduate degree. Students accepted into the program will progress toward completion of B.S./M.S. degrees in Diet and Exercise.

Endorsement to coach interscholastic athletics

The State Department of Education has provided for the endorsement of licensed teachers for the coaching of athletic teams in schools. The endorsement does not lead to licensure to teach physical education. For requirements of the program, leading to the coaching endorsement, see Teacher Education, Requirements for Areas of Specialization.

Endorsement to teach health education

Those interested in teaching health education in the public schools may get a primary licensure or an additional endorsement. The State Department of Education has approved the Health Teaching Licensure for grades 5-12.

Basic Activity Instruction Program

The department offers a wide selection of beginning, intermediate, and advanced courses in the areas of aquatics, dance, and sports. These courses are designed to serve general education purposes for all students.

Dance

Coursework in dance provides opportunities for students to develop an understanding and appreciation of dance as part of a liberal education. Those interested in teaching dance and Physical Education in the public schools may major in Kinesiology and Health (Teacher Licensure option) and minor in Dance.

An interdisciplinary Performing Arts major with a Dance emphasis is available through the College of Liberal Arts and Sciences. For further information see Index, Theatre and Performing Arts.

Curriculum in Athletic Training

The athletic training major prepares students for a career as an athletic trainer in high school, college or professional settings or for work in other settings (such as sports medicine clinics, the military, industry, and fitness centers). See program details for course requirements. Admission procedures and technical standards can be found at <http://www.kin.hs.iastate.edu/programs/athletic-training/#program-information-and-requirements>.

Curriculum in Kinesiology and Health

The curriculum in Kinesiology and Health is designed for students preparing to enter professional areas related to the health, physical activity, exercise or sport science fields. Students majoring in Kinesiology & Health may select one of four options:

1. Community and Public Health
2. Exercise Science
3. Pre-Health Professions
4. Physical Education Teacher Education

Minors in athletic coaching, dance, exercise science, health promotion, kinesiology, and sport and recreation are available; see requirements under Kinesiology, Undergraduate Programs.

A major in Performing Arts with a dance emphasis is available; see requirements under Curriculum in Performing Arts in Theatre.

Communication Proficiency

In order to meet graduation requirements, all students must earn an average of C (2.0) or better in ENGL 150 and ENGL 250, with neither grade being lower than a C-. Students not meeting this condition must earn a C or better in an advanced writing course:

ENGL 220	Descriptive English Grammar	3
ENGL 302	Business Communication	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3

U.S. Diversity and International Perspectives

In order to meet graduation requirements, all students must complete 3 cr. of course work in U.S. Diversity and 3 cr. in International Perspectives. See university approved list.

General Education: Minimum of 38.5 credits required

Physical and Life Sciences: 8 cr. min required

BIOL 255	Fundamentals of Human Anatomy	3
BIOL 255L	Fundamentals of Human Anatomy Laboratory	1
BIOL 256	Fundamentals of Human Physiology	3
BIOL 256L	Fundamentals of Human Physiology Laboratory	1

Additional option-specific requirements are:

Community and Public Health

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
CHEM 163	College Chemistry	4
CHEM 163L	Laboratory in College Chemistry	1
MICRO 201	Introduction to Microbiology	2
MICRO 201L	Introductory Microbiology Laboratory	1
FS HN 167	Introduction to Human Nutrition	3

Exercise Science

PHYS 115	Physics for the Life Sciences	4
FS HN 167	Introduction to Human Nutrition	3

Physical Education Teacher Education

PHYS 115	Physics for the Life Sciences	4
----------	-------------------------------	---

Pre-Health Professions

PHYS 111	General Physics	4-5
or PHYS 115	Physics for the Life Sciences	

Mathematics and Statistics: 3 cr. min required

Option-specific requirements are:

Community and Public Health

From the following:		3-4
STAT 101	Principles of Statistics	
or STAT 104	Introduction to Statistics	
or STAT 226	Introduction to Business Statistics I	

Exercise Science

From the following:		2-3
MATH 140	College Algebra	
or MATH 143	Preparation for Calculus	
or MATH 145	Applied Trigonometry	
or MATH 165	Calculus I	

From the following: 3-4

STAT 101	Principles of Statistics	
or STAT 104	Introduction to Statistics	
or STAT 226	Introduction to Business Statistics I	

Physical Education Teacher Education

One of the following: 2-3

MATH 104	Introduction to Probability	
or MATH 140	College Algebra	
or MATH 143	Preparation for Calculus	
or MATH 145	Applied Trigonometry	
or MATH 150	Discrete Mathematics for Business and Social Sciences	
or MATH 165	Calculus I	
or STAT 101	Principles of Statistics	
or STAT 104	Introduction to Statistics	

Pre-Health Professions

One of the following: 3-4

MATH 140	College Algebra	
or MATH 143	Preparation for Calculus	
or MATH 145	Applied Trigonometry	
or MATH 165	Calculus I	
or MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	
STAT 101	Principles of Statistics	
or STAT 104	Introduction to Statistics	
or STAT 226	Introduction to Business Statistics I	

Social Sciences: 9 cr. min required

Option-specific requirements are:

Community and Public Health

PSYCH 230	Developmental Psychology	3
-----------	--------------------------	---

Exercise Science

PSYCH 101	Introduction to Psychology	3
or PSYCH 230	Developmental Psychology	
SOC 134	Introduction to Sociology	3

Physical Education Teacher Education

PSYCH 230	Developmental Psychology	3
SOC 134	Introduction to Sociology	3

Pre-Health Professions

PSYCH 101	Introduction to Psychology	3
or PSYCH 230	Developmental Psychology	
SOC 134	Introduction to Sociology	3

Humanities: 6 cr. min required

Choose from department approved list.

Communications: 13 cr. min required

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
SP CM 212	Fundamentals of Public Speaking	3
LIB 160	Information Literacy	1
One of the following		3
ENGL 302	Business Communication	

ENGL 314	Technical Communication	
SP CM 312	Business and Professional Speaking	

Program requirements:

The following courses are required in all majors and options:

H S 110	Personal and Consumer Health	3
KIN 252	Disciplines and Professions in Kinesiology and Health	1
KIN 253	Orientation and Learning Community in Kinesiology and Health	1
KIN 258	Physical Fitness and Conditioning	2
KIN 358	Physiology of Exercise (*)	3
H S 350	Human Diseases (*)	3

* A grade of C- or better is required.

Total cr. required: A minimum of 124 credits is required, with a minimum of 46 credits in courses numbered 300 or above.

Courses for Kinesiology and Health Major

Option 1. Community and Public Health

This option prepares students for careers in health promotion and disease prevention. Students are prepared for work in state and local health agencies, community and government programs, hospitals, worksite health programs, and not-for-profit organizations. Graduates are eligible to take the Certified Health Education Specialist (CHES) exam.

Option Requirements:

P R 220	Principles of Public Relations	3
or P R 305	Publicity Methods	
H S 105	First Aid and Emergency Care	2
H S 215	Drug Education	3
H S 310	Community and Public Health (*)	3
H S 380	Worksite Health Promotion	3
H S 385	Strategies for Professional School and Field Experience Opportunities	R
H S 430	Community Health Program Development	3
H S 464	Physical Activity Epidemiology	3
H S 485	Directed Field Experience in Health Promotion (take 10 to 16 credits)	8-16
HD FS 449	Program Evaluation and Proposal Writing	3
or ENGL 309	Proposal and Report Writing	
P R 220	Principles of Public Relations	3
or P R 305	Publicity Methods	
KIN 366	Exercise Psychology (*)	3

One of the following

ENGL 313	Rhetorical Website Design	
or HD FS 395	Children, Families, and Public Policy	

Electives: 11-18 credits

* A grade of C- or better is required.

Option 2. Exercise Science

This option prepares students for careers in exercise/fitness promotion. Students are prepared as health/fitness specialists, personal trainers, strength and conditioning specialists, and health coaches. Students find work in fitness centers, worksite health programs, medical facilities,

cardiac rehabilitation centers, and other agencies that provide fitness services. Students are eligible to sit for certification exams offered by the American College of Sports Medicine and the National Strength & Conditioning Association.

Option Requirements:

KIN 259	Leadership Techniques for Fitness Programs	2
KIN 266	Advanced Strength Training and Conditioning	2
KIN 345	Management of Health-Fitness Programs and Facilities	3
KIN 355	Biomechanics (*)	3
KIN 360	Sociology of Sport and Exercise (*)	3
KIN 366	Exercise Psychology (*)	3
KIN 372	Motor Control and Learning Across the Lifespan (*)	3
KIN 385	Strategies for Professional School and Field Experience Opportunities	R
KIN 458	Principles of Fitness Assessment and Exercise Prescription (*)	4
KIN 459	Internship in Exercise Leadership	1
KIN 462	Medical Aspects of Exercise	3
KIN 485A	Internship in Exercise Science: Health/Fitness Management. (take 8 to 16 crs)	8-16
H S 380	Worksite Health Promotion	3
A TR 220 or H S 305	Basic Athletic Training Instructor's First Aid and Cardio-pulmonary Resuscitation	2

Electives: 15-25 credits

* A grade of C- or better is required.

Option 3. Physical Education Teacher Education

This option is for students seeking a license to teach K-12 physical education. All courses required for licensure have a minimum grade requirement of a C or C-. Students interested in a coaching and/or a health endorsement must complete additional coursework.

Option Requirements:

KIN 231	Fundamentals of Tumbling and Gymnastics (*)	1
KIN 232	Fundamentals of Team Sports (*)	1
KIN 236	Fundamentals of Individual Sports and Fitness (*)	1
KIN 238	Fundamentals of Outdoor and Adventure Activities (*)	1
KIN 280	Directed Field Experience in Elementary Physical Education	1
KIN 281	Directed Field Experience in Secondary Physical Education	1
KIN 282	Field Experience with Educational Outreach	1
KIN 312	Movement Education in Elementary School Physical Education	3
KIN 313	Teaching Secondary Physical Education	3

† Arranged with instructor.

* A grade of C- or better is required.

Option 4. Pre-Health Professions

This option is for students interested in graduate study or for those who are preparing for professional programs in medicine, physical therapy, physician assistant, and other healthcare professions. Course work provides background in human movement while completing the requirements for entry into graduate or professional school.

Option Requirements:

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
KIN 355	Biomechanics (*)	3
KIN 360	Sociology of Sport and Exercise (*)	3
KIN 365	Sport Psychology (*)	3
or KIN 366	Exercise Psychology	
KIN 372	Motor Control and Learning Across the Lifespan (*)	3
KIN 385	Strategies for Professional School and Field Experience Opportunities	R
9 cr. from the following		9
H S 464	Physical Activity Epidemiology	3
KIN 455	Research Topics in Biomechanics	
KIN 458	Principles of Fitness Assessment and Exercise Prescription	
KIN 462	Medical Aspects of Exercise	
KIN 467	Exercise and Health: Behavior Change	
KIN 472	Neural Basis of Human Movement	
KIN 480	Functional Anatomy	
KIN 366	Exercise Psychology	3
KIN 481	Biomechanics Lab	
KIN 482	Exercise Physiology Lab	
KIN 483	Exercise Psychology Lab	
KIN 484	Assessment and Control of Locomotion	

KIN 495	Special Topics in Kinesiology
Specialization Requirements: Sciences as required by professional schools. 14-30 credits	
Electives: 5-24 credits	

* A grade of C- or better is required.

Minors

Athletic Coaching

The minor requires a minimum of 17 credits and may be earned by completing the following:

A TR 220	Basic Athletic Training	2
KIN 315	Coaching Theory and Administrative Issues	3
KIN 365	Sport Psychology	3
BIOL 155	Human Biology	3
or BIOL 255	Fundamentals of Human Anatomy	
PSYCH 230	Developmental Psychology	3
3 cr. from the following		3
KIN 355	Biomechanics	
or KIN 358	Physiology of Exercise	

Dance

The minor requires a minimum of 21 credits and may be earned by completing the following:

DANCE 220	Modern Dance Composition	2
DANCE 222	Modern Dance II	1
DANCE 270	Dance Appreciation	3
DANCE 320	Sound and Movement	3
DANCE 360	History and Philosophy of Dance	3
DANCE 384	Teaching Children's Dance	2
DANCE 385	Methods of Teaching Dance	2
DANCE 386	Teaching Dance Technique and Composition	2

3 additional credits selected from dance courses numbered 200 or above.*

*Participation in Orchesis I or II is recommended.

Exercise Science

The minor requires a minimum of 17 credits and may be earned by completing the following:

KIN 258	Physical Fitness and Conditioning	2
KIN 358	Physiology of Exercise	3
KIN 366	Exercise Psychology	3
3-6 cr. from the following		3-6
A TR 220	Basic Athletic Training	
KIN 259	Leadership Techniques for Fitness Programs	
KIN 266	Advanced Strength Training and Conditioning	
KIN 345	Management of Health-Fitness Programs and Facilities	
KIN 360	Sociology of Sport and Exercise	
3-6 cr. from the following		3-6
KIN 458	Principles of Fitness Assessment and Exercise Prescription	
KIN 462	Medical Aspects of Exercise	

KIN 467	Exercise and Health: Behavior Change
---------	--------------------------------------

Health promotion

The minor requires a minimum of 18 credits and may be earned by completing the following:

H S 110	Personal and Consumer Health	3
H S 350	Human Diseases	3
H S 380	Worksite Health Promotion	3
3-6-cr. from the following		
H S 215	Drug Education	
H S 305	Instructor's First Aid and Cardio-pulmonary Resuscitation	
H S 310	Community and Public Health	
3-6 cr. from the following		
H S 430	Community Health Program Development	
KIN 467	Exercise and Health: Behavior Change	

Kinesiology

The minor requires a minimum of 15 credits and may be earned by completing the following: (For non-majors only.)

KIN 355	Biomechanics	3
KIN 358	Physiology of Exercise	3
KIN 360	Sociology of Sport and Exercise	3
KIN 372	Motor Control and Learning Across the Lifespan	3
KIN 365	Sport Psychology	3
or KIN 366	Exercise Psychology	

Sport and Recreation

The minor requires a minimum of 18 credits and may be earned by completing the following:

KIN 315	Coaching Theory and Administrative Issues	3
KIN 365	Sport Psychology	3
KIN 360	Sociology of Sport and Exercise	3
KIN 399	Recreational Sport Management	3
MGMT 370	Management of Organizations	3
3 cr. from the following		3
ADVRT 230	Advertising Principles	
HSP M 260	Global Tourism Management	
P R 220	Principles of Public Relations	
P R 305	Publicity Methods	
MGMT 310	Entrepreneurship and Innovation	
MGMT 313	Feasibility Analysis and Business Planning	
MGMT 371	Organizational Behavior	
MGMT 471	Personnel and Human Resource Management

Graduate Study

The Department of Kinesiology graduate seeks to integrate discovery and learning by preparing graduate students to understand and create basic and applied knowledge in the study of physical activity, exercise and sport. The normal prerequisite to major graduate work is the satisfactory completion of a curriculum essentially equivalent to that required of undergraduate students in kinesiology at this university. However, it is possible for students to qualify for graduate study if undergraduate preparation has been in a related area.

Students in the M.S. and Ph.D. degrees are required to complete original research and write a thesis or dissertation. There is a non-thesis degree option for M.S. students requiring more coursework and an internship experience or other creative component. Specific information about the requirements for these degree options is available from the department office or from the department web site (<http://www.kin.hs.iastate.edu/graduate>).

The department participates in the interdepartmental minor in gerontology (see Index).

Learning and Leadership Sciences Learning and Leadership Sciences Minor

The Learning and Leadership Sciences minor provides an opportunity for students to engage in productive thinking, enabling them to lead in their professions and contribute to society and their communities.

The coursework builds on the curriculum of a student's primary discipline to enhance student leadership abilities throughout their academic career and beyond. Students will enhance their abilities to engage in productive thinking, such as critical, analytical, and creative thinking in problem-solving; discern the types of thinking required when presented with new situations; and use different types of thinking to address issues and situations as professionals and citizens. Core courses in the minor address eight competency areas that are critical for leaders: 1) understanding self and personal responsibility for learning, 2) understanding worthy team membership, 3) developing productive thinking and creative problem solving abilities, 4) developing resiliency, 5) negotiating and resolving conflict, 6) action planning for providing service, 7) communicating, and 8) recognizing and acting on the obligation to "do" leadership every day.

Students in the Learning and Leadership Sciences Minor will ultimately achieve these learning outcomes by uncovering and practicing:

- habits of deep self-reflection about learning and application of these habits to their professional and community lives;

- effective interaction with others in professional and community settings, including abilities to listen actively, communicate clearly, resolve conflicts, and negotiate desired outcomes;
- habits of professional thinking, including accountability, initiative, innovation, resilience, tolerance, and profound respect for others.

Nutritional Science (H SCI)

Nutritional science looks at the connection between diet and health. Students learn how diet can play a crucial role in the cause, treatment, and prevention of many diseases. There are two options in nutritional science. The pre-health professional and research option coursework prepares students for work in research laboratories, graduate study in nutrition or biological sciences, or entrance into health professional programs, such as medical, dental, physician assistant, and pharmacy schools. Students gain a strong science education along with human nutrition expertise. The nutrition and wellness option prepares students for work positions in program planning and evaluation for community, public health, non-profit, and corporate wellness programs addressing the growing public interest in nutrition, wellness, and preventative health. Students learn about the role of nutrition and healthy eating for disease prevention and wellness.

The department also offers a nutrition minor.

Administered by the Department of Food Science and Human Nutrition

Pre-Health Professional and Research Option

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

Communications and Library: 13 cr.

Electives: 0-12 cr. Select from any university coursework to earn at least 120 total credits. Students planning to apply to health professional programs should review entrance requirements and select appropriate courses as electives.

Concurrent B.S. and M.S. Program: Well-qualified students in Nutritional Science, pre-health professional and research option, who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue both a Bachelor of Science (B.S.) degree in Nutritional Science and a Master of Science (M.S.) degree in Nutritional Sciences. For more information, refer to www.fshn.hs.iastate.edu (<http://www.fshn.hs.iastate.edu>)

Nutrition and Wellness Option

Total Degree Requirement: 120 cr.

Students must fulfill International Perspectives and U.S. Diversity requirements by selecting coursework from approved lists. These courses may also be used to fulfill other area requirements. Only 65 cr. from a two-year institution may apply to the degree which may include up to 16 technical cr.; 9 P-NP cr. of electives; 2.00 minimum GPA.

International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

School of Education

Marlene Strathe, Director of the School of Education

School of Education (<http://www.education.iastate.edu>)

Mission and Goals

The School of Education will be a premier leader in education based on a strong foundation in the humanities and social sciences with a noted emphasis in leadership, and science, technology, engineering and mathematics (STEM) education. The School will advance research and scholarship in the areas of teaching, learning, and leadership and in the preparation of professionals for educational environments across multiple settings. The mission of the School of Education is to create, share, and apply knowledge and to advocate for equal educational opportunities and socially responsible educational reform in Iowa, the nation, and the world. The School will prepare excellent research-informed educators, researchers, administrators, and others in educational roles.

- Support the advancement of specialized academic disciplines through exemplary research and scholarship;
- Enhance Iowa's families, schools, and communities through exemplary education and teacher preparation; and
- Provide educators and students with the knowledge, skills, and experience necessary to become leaders in an increasingly changing and interdependent world.

Undergraduate Study

The School of Education provides the professional education coursework that leads to licensure of pre-service teachers. Majors offered in the department include **Elementary Education (K-6)**, and **Early Childhood Education-Unified (birth through age 8)**. The Early Childhood Education-Unified major is an interdepartmental program administered by the School of Education and the Department of Human Development and Family Studies.

Students who are interested in teaching at the secondary level (7-12) major in a specific discipline (e.g. Mathematics, Science, English, Social Studies) and complete additional required coursework in the School of Education for a teaching license.

Early Childhood Education-Unified majors must complete a professional course sequence:

C I 204	Social Foundations of Education in the United States	3
SP ED 250	Education of the Exceptional Learner in a Diverse Society	3
C I 332	Educational Psychology of Young Learners	3
C I 406	Multicultural Foundations of School and Society: Introduction	3
Total Credits		15

Elementary Education majors must complete a professional course sequence:

C I 201	Learning Technologies in the PK-6 Classroom	3
C I 204	Social Foundations of Education in the United States	3
C I 245	Strategies in Teaching	3
C I 332	Educational Psychology of Young Learners	3
C I 406	Multicultural Foundations of School and Society: Introduction	3
HD FS 102 or PSYCH 230	Individual and Family Development, Health, and Well-being Developmental Psychology	3
SP ED 250	Education of the Exceptional Learner in a Diverse Society	3
Total Credits		21

Secondary education students must complete a professional course sequence:

C I 202	Learning Technologies in the 7-12 Classroom	3
C I 204	Social Foundations of Education in the United States	3
C I 333	Educational Psychology	3
C I 406	Multicultural Foundations of School and Society: Introduction	3
C I 426	Principles of Secondary Education ^{*Not all secondary education programs require this course. Check with your program coordinator and/or academic adviser.}	3
SP ED 401	Teaching Secondary Students with Exceptionalities in General Education	3
Total Credits		18

The School of Education offers a Learning Technologies minor that may be earned by registering for the minor and completing the following courses:

C I 201 or C I 202	Learning Technologies in the PK-6 Classroom Learning Technologies in the 7-12 Classroom	3
C I 280B	Pre-Student Teaching Experience I: Learning Technologies	1
C I 302	Principles and Practices of Learning with Technology	3
C I 407	Principles and Practices of Distance Learning	3
C I 454	Emerging Topics in Learning Technologies (3 modules required, 1 credit each)	3
One of the following:		3
COM S 107	Applied Computer Programming	

COM S 207	Fundamentals of Computer Programming	
MAT E 370	Toying with Technology	
CPR E 370	Toying with Technology	
Total Credits		16

Notes: The School of Education offers courses that can lead to a reading endorsement for grades K-8 or grades 5-12. Students seeking a K-8 endorsement should consult with a School of Education academic adviser. The 5-12 endorsement is offered collaboratively with the English Department. Students seeking this endorsement should consult with an adviser in the English Department. Inquiries can be sent to the Licensure Analyst in Teacher Education Services (133 MacKay) to receive a list of courses needed for an Iowa State University reading endorsement. Prerequisites for the reading endorsement courses are listed in the catalog course descriptions.

Early Childhood Education – Unified

The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through age eight. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education – unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see Early Childhood Education - Unified Curriculum (<http://www.education.iastate.edu/undergraduate-studies/early-childhood-education>).

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education – unified students must meet general education requirements for teacher licensure.

Elementary Education

The undergraduate curriculum in elementary education leads to the Bachelor of Science degree.

The curriculum in elementary education is planned for students preparing to teach at the elementary school level. This program leads to careers in working with school-aged children in kindergarten through sixth grade. Graduates in this curriculum who meet all requirements set by the Iowa Board of Educational Examiners will be recommended for licensure, which would allow them to teach in elementary classrooms in either public or private schools. For more information about the program, see Elementary Education Curriculum (<http://www.education.iastate.edu/assets/files/pdf/TES/Elementary%20Education/15-16%20CURR%20INFO%20SHEET.pdf>).

Endorsements in art, English/language arts, English as a Second Language (ESL), health, history, music, basic science, social studies, mathematics, special education (Instructional Strategist I: Mild/Moderate Disabilities K-8), and speech communication/theater are available for elementary education students. An endorsement for teaching world

languages in elementary schools is available through the Department of World Languages and Cultures.

Elementary education majors must satisfy a world languages requirement for graduation.

Students who enroll in elementary education must apply and be accepted into the teacher education program prior to enrolling in advanced elementary education courses. Iowa Department of Education licensure requirements state that every student must meet the performance outcome standards for teacher licensure. Standards will be assessed in each course and students will receive both formative and summative evaluations of their progress toward meeting these standards throughout their program at Iowa State University. A detailed explanation of the standards and assessment process may be found on the school's website at Educator Prep Resources (<http://www.education.iastate.edu/educator-prep-resources>), or may be obtained from a School of Education academic adviser.

K-12 and Secondary Education

Students seeking K-12 and Secondary Teacher Licensure major in the content area in which they want to focus. Curriculum for each of the K-12 and secondary programs can be found at Teacher Education.

Graduate Study

The School of Education offers coursework and experiences for the degrees Doctor of Philosophy, Master of Science, and Master of Education with a major in education. Graduate teacher licensure/degree programs are offered in secondary science and secondary mathematics, as well as endorsement programs in special education. Graduate students may also pursue administrative licensure for roles as principals and superintendents. The School of Education offers graduate coursework leading to a minor for masters and doctoral students in other fields of study. Several graduate certificate programs are offered through the School of Education.

Doctoral Degree Program

Students in the School of Education may complete the Ph.D. with a major in education. Specializations in Curriculum and Instructional Technology and Educational Leadership are offered. Within the Educational Leadership specialization, students may emphasize educational administration or higher education (higher education administration, community college, social justice). Students pursuing the Ph.D. may earn an education degree with an emphasis area. Emphasis areas include literacy, mathematics education, multicultural education, or science education. Specific information about the requirements of and options available within the Ph.D. degree in education are available from the school office or on the web School of Education Graduate Studies (<http://www.education.iastate.edu/graduate-studies>).

The following information refers only to the Ph.D. program:

Prerequisite to major graduate work in education is completion of an undergraduate degree and a masters degree with coursework appropriate to the planned area of study, and evidence that the student ranks above average in scholastic achievement and promise of professional competence. In addition, several areas of emphasis prefer that students have 3-5 years of professional experience. All applicants for the Ph.D. must submit Graduate Record Examination (GRE) scores.

Graduates of the Ph.D. program in education are prepared to pursue careers as scholars, leaders, and administrators in various educational

settings, including public and private colleges and universities, community colleges, public and private educational agencies, and corporate training settings.

Master's Degree Programs

Students in the School of Education may seek a specialization in Curriculum and Instructional Technology (M.S., M.Ed.), Educational Administration (M.Ed.), Higher Education (M.S., M.Ed.), Research and Evaluation (M.S.), Special Education (M.S., M.Ed.), or Student Affairs (M.Ed.). Within the Higher Education specialization, students may opt to emphasize community college leadership or leadership and learning. Students may also pursue a master's degree with an emphasis area. Emphasis areas include literacy, mathematics education, multicultural education, or science education.

Graduates of the master's degree programs are prepared to pursue careers as educational leaders, higher education professionals, researchers, and advanced practitioners in colleges and universities, community colleges, public and private schools, education agencies, and informal (free-choice) education settings.

A minor is available in Curriculum and Instructional Technology at both the master's and doctoral level. Information about the minors can be found on the web at Graduate Specializations (<http://www.education.iastate.edu/te/graduate/cit/graduate-specialization>).

Other graduate programs related to education (including General Graduate Studies) may be planned for students on the basis of previous education and experiences as well as future plans and needs. For more information, students should refer to Agricultural Education and Studies, Family and Consumer Sciences Education, Kinesiology, and General Graduate Studies or to graduate level course offerings within other departments.

Graduate Teacher and Administrator Licensure Programs

A Master of Arts in Teaching degree program leading to teacher licensure (science education) is available to students who currently have a bachelor's degree in a science area (or a closely related field). A teacher licensure program in mathematics education is also available to graduate students (School of Education). Teacher licensure at the graduate level is also offered in agricultural education (College of Agriculture and Life Sciences), family and consumer sciences (College of Human Sciences), and physical education (College of Human Sciences). The School of Education provides the professional education coursework.

Students in a graduate teacher licensure program must complete specific courses, which can be found in Teacher Education

Graduate level teaching endorsements are offered through the School of Education. Graduate students who seek a teaching endorsement in special education, but do not wish to pursue a master's degree can incorporate those courses in a professional certificate program. Endorsement programs include Instructional Strategist I: Mild/Moderate Disabilities (K-8 or 5-12), or Instructional Strategist II: Behavior Disorders/Learning Disabilities, and special education consultant. A graduate level reading endorsement is also available.

The School of Education offers graduate programs for students seeking Iowa licensure as principals and superintendents. The PreLEAD (Preparation for Leadership) program is designed for working professionals and includes coursework and field experiences leading to

Iowa licensure as a principal. Students may complete the program as a certificate (non-degree) or as a Master of Education degree. A Certificate of Advanced Studies program allows students who hold a master's degree in Educational Administration to pursue the coursework and clinical field experiences necessary to earn an Iowa Superintendent or AEA Chief Administrator license.

Graduate Certificate Programs

The School of Education offers Graduate Certificate programs to allow students to enhance their skills outside of full degree programs. The Certificate programs currently offered include Applied Research Methods in the Human Sciences, Community College Leadership, Community College Teaching, Instructional Design, Literacy Coaching, Principal Licensure (Pre-LEAD), Social Justice in Higher Education, Special Education, and Superintendent Licensure (Certificate in Advanced Studies). Certificate programs require a minimum of 12 graduate credits (several require more than this) and can be earned in conjunction with a degree program. More information about graduate certificate programs can be found on the School of Education web site.

Courses:

Curriculum and Instruction (C I)
 Educational Administration (EDADM)
 Educational Leadership and Policy Studies (EL PS)
 Higher Education (HG ED)
 Historical, Philosophical, and Comparative Studies in Education (H P C)
 Human Sciences (H SCI)
 Research and Evaluation (RESEV)
 Special Education (SP ED)

Teacher Education at Iowa State University

Heidi Doellinger, Director of Teacher Education Services

Educator Preparation (<http://www.education.iastate.edu/undergraduate-studies/undergraduate-applicants>)

Teacher Education is a shared responsibility that spans three colleges. For most licensure areas, students major in a content area while taking additional education courses. All students who are recommended by Iowa State University for teacher licensure must meet the requirements of Teacher Education and be recommended by their department, college, and the ISU recommending official. Students who successfully complete the requirements for any of the endorsement areas offered at ISU must demonstrate the skills and knowledge required of beginning teachers.

Undergraduate Teacher Licensure Areas

An undergraduate student seeking a bachelor's degree must be enrolled in the department in which he or she plans to major and must meet the graduation requirements of that department and college.

Currently, there are fifteen undergraduate teacher licensure areas offered at Iowa State University. These areas and their corresponding grade levels are listed below:

Agricultural Education (grades 5-12)
 Biology (grades 5-12)
 Chemistry (grades 5-12)
 Early Childhood Education-Unified (birth-grade 3, including special education)
 Earth Science (grades 5-12)

Elementary Education (grades K-6)
 English (grades 5-12)
 Family and Consumer Sciences (grades 5-12)
 Health Education (grades 5-12)
 History-Social Sciences (grades 5-12)
 Mathematics (grades 5-12)
 Music (grades K-12)
 Physical Education (grades K-12)
 Physics (grades 5-12)
 World Languages and Cultures (French, German, and Spanish) (grades 5-12)

Endorsements Areas

Students majoring in Elementary Education must complete coursework for at least one endorsement. Students in other programs may complete coursework for additional endorsements (<http://www.education.iastate.edu/undergraduate-studies/endorsements>).

Minors

Students in the Teacher Education Preparation Program may also choose to pursue a minor in Learning Technologies (<http://www.education.iastate.edu/undergraduate-studies/learning-technologies-minor>).

Post-Bachelor's Teacher Licensure Areas

Students already holding an appropriate bachelor's degree may pursue teacher licensure in any of the undergraduate licensure programs. Interested students should consult with the program coordinator of the area in which they plan to specialize so that an individualized program of study can be developed.

Teacher Licensure Areas for which candidates take undergraduate Teacher Preparation courses;

Elementary Education (grades K-6)
 English (grades 5-12)
 Health Education (grades 5-12)
 History-Social Sciences (grades 5-12)
 Music (grades K-12)
 World Languages and Cultures (French, German, and Spanish) (grades 5-12)

THE PROFESSIONAL TEACHER EDUCATION REQUIREMENT (PROFESSIONAL CORE)

Undergraduate Students

Prospective teachers must complete certain studies related directly to the profession of teaching. All undergraduate students in teacher education must take the following courses prior to student teaching, unless the student's licensure area has an approved content-area course deemed to be equivalent (see specific Licensure Area Requirements section below for details.)

EARLY CHILDHOOD EDUCATION-Unified

C I 201	Learning Technologies in the PK-6 Classroom	3
C I 204	Social Foundations of Education in the United States	3
C I 332	Educational Psychology of Young Learners	3

CI 406	Multicultural Foundations of School and Society: Introduction	3
SP ED 250	Education of the Exceptional Learner in a Diverse Society	3
Total Credits		15

ELEMENTARY EDUCATION:

CI 201	Learning Technologies in the PK-6 Classroom	3
CI 204	Social Foundations of Education in the United States	3
CI 245	Strategies in Teaching	3
CI 332	Educational Psychology of Young Learners	3
CI 406	Multicultural Foundations of School and Society: Introduction	3
HD FS 102	Individual and Family Development, Health, and Well-being	3
or PSYCH 230	Developmental Psychology	
SP ED 250	Education of the Exceptional Learner in a Diverse Society	3
CI 416	Supervised Student Teaching - Elementary	16
Total Credits		37

K-12 AND SECONDARY EDUCATION:

CI 202	Learning Technologies in the 7-12 Classroom	3
CI 204	Social Foundations of Education in the United States	3
CI 333	Educational Psychology	3
CI 406	Multicultural Foundations of School and Society: Introduction	3
SP ED 401	Teaching Secondary Students with Exceptionalities in General Education	3
CI 426	Principles of Secondary Education ^{*Not all secondary education programs require this course. Check with program coordinator and/or academic advisor.}	3

14-16 weeks: Student teaching (minimum 14 weeks). See Teacher Licensure Area Coordinatr for more information.

Students in K-12 licensure areas and secondary (grades 5-12) licensure areas must complete the courses listed above unless the student's licensure area has an approved equivalent. Areas with approved equivalents include: Agricultural Education (for CI 426), Physical Education (for CI 333, CI 401, CI 426) and all Secondary Sciences (for CI 426). (See licensure area coordinator for more information).

Post-Bachelor's Students

Students who hold an appropriate bachelor's degree and seek a teaching license must complete the professional education requirements listed above through course work or examination.

Master's Students

Prospective teachers must complete certain studies related directly to the profession of teaching. All students enrolled in Master's programs that lead to initial licensure must take the following courses prior to student teaching, unless the student's licensure area has an approved content area course deemed to be equivalent. (See Master's Programs section below for details.)

SP ED 501	Teaching Secondary Students with Exceptionalities in General Education	3
-----------	--	---

CI 505	Using Technology in Learning and Teaching	3
H P C 504	Studies in the Foundations of Education in the United States	3
CI 506	Multicultural Foundations of School and Society: Advanced	3
CI 526	Principles of Secondary Education ^{*Not all programs require this course. Check with program coordinator.}	3
CI 529	Educational Psychology and the Secondary Classroom	3

PROGRAM CURRICULUM**Undergraduate Students****Early Childhood Education – Unified**

The curriculum in Early Childhood Education – Unified prepares graduates to teach young children and work with their families. This program leads to careers working with young children (both those who are typically developing and those with special needs) from birth through age eight. Graduates may be employed by either public or private agencies or schools to teach in early childhood classrooms (preschool through 3rd grade) or in home-based programs. This curriculum has been approved by the Iowa Department of Education and meets requirements for the early childhood education – unified teacher license, which permits individuals to teach general and special education for children from birth through age eight. The program is an interdepartmental major administered by the Department of Human Development and Family Studies and the School of Education. For more information about the program, see Early Childhood Education - Unified Curriculum (<http://www.education.iastate.edu/undergraduate-studies/early-childhood-education>).

Students who enroll in the early childhood education – unified program must apply to and be accepted into the teacher education program prior to enrolling in advanced courses. All early childhood education – unified students must meet general education requirements for teacher licensure.

Elementary Education

The undergraduate curriculum in elementary education leads to the Bachelor of Science degree.

The curriculum in elementary education is planned for students preparing to teach at the elementary school level. This program leads to careers in working with school-aged children in kindergarten through sixth grade. Graduates in this curriculum who meet all requirements set by the Iowa Board of Educational Examiners will be recommended for licensure, which would allow them to teach in elementary classrooms in either public or private schools. For more information about the program, see Elementary Education Curriculum (<http://www.education.iastate.edu/assets/files/pdf/TES/Elementary%20Education/15-16%20CURR%20INFO%20SHEET.pdf>).

Endorsements in art, English/language arts, English as a Second Language (ESL), health, history, music, basic science, social studies, mathematics, special education (Instructional Strategist I: Mild/Moderate Disabilities K-8), and speech communication/theater are available for elementary education students. An endorsement for teaching world languages in elementary schools is available through the Department of World Languages and Cultures.

Elementary education majors must satisfy a world languages requirement for graduation.

Students who enroll in elementary education must apply and be accepted into the teacher education program prior to enrolling in advanced elementary education courses. Iowa Department of Education licensure requirements state that every student must meet the performance outcome standards for teacher licensure. Standards will be assessed in each course and students will receive both formative and summative evaluations of their progress toward meeting these standards throughout their program at Iowa State University. A detailed explanation of the standards and assessment process may be found on the school's website at Educator Prep Resources (<http://www.education.iastate.edu/educator-prep-resources>), or may be obtained from a School of Education academic adviser.

K-12 and Secondary Education

K-12 and Secondary Licensure areas at Iowa State University include:

- AGRICULTURAL EDUCATION (GRADES 5-12) – COLLEGE OF AGRICULTURE (<http://www.education.iastate.edu/te/programs/secondary-education/#agricultural-education-grades-5-12-agriculture>)
- BIOLOGY (GRADES 5-12) – COLLEGE OF LIBERAL ARTS AND SCIENCES (<http://www.education.iastate.edu/te/programs/secondary-education/#biology-grades-5-12-liberal-arts-and-sciences>)
- CHEMISTRY (GRADES 5-12) – COLLEGE OF LIBERAL ARTS AND SCIENCES (<http://www.education.iastate.edu/te/programs/secondary-education/#chemistry-grades-5-12-liberal-arts-and-sciences>)
- EARTH SCIENCES (GRADES 5-12) – COLLEGE OF LIBERAL ARTS AND SCIENCES (<http://www.education.iastate.edu/te/programs/secondary-education/#earth-sciences-grades-5-12-liberal-arts-and-sciences>)
- ENGLISH (GRADES 5-12) – COLLEGE OF LIBERAL ARTS AND SCIENCES (<http://www.education.iastate.edu/te/programs/secondary-education/#english-grades-5-12-liberal-arts-and-sciences>)
- FAMILY AND CONSUMER SCIENCES EDUCATION – COLLEGE OF HUMAN SCIENCES (<http://www.education.iastate.edu/te/programs/secondary-education/#family-and-consumer-sciences-education-human-sciences>)
- HEALTH EDUCATION (GRADES 5-12) – COLLEGE OF HUMAN SCIENCES (<http://www.education.iastate.edu/te/programs/secondary-education/#health-education-grades-5-12-human-sciences>)
- HISTORY – SOCIAL SCIENCES (GRADES 5-12) – COLLEGE OF LIBERAL ARTS AND SCIENCES, HUMAN SCIENCES (<http://www.education.iastate.edu/te/programs/secondary-education/#history-social-sciences-grades-5-12-liberal-arts-and-sciences-human-sciences>)
- MATHEMATICS (GRADES 5-12) – COLLEGE OF LIBERAL ARTS AND SCIENCES (<http://www.education.iastate.edu/te/programs/secondary-education/#mathematics-grades-5-12-liberal-arts-and-sciences>)
- MUSIC (GRADES K-12) – COLLEGE OF LIBERAL ARTS AND SCIENCES (<http://www.education.iastate.edu/te/programs/secondary-education/#music-grades-k-12-liberal-arts-and-sciences>)
- PHYSICAL EDUCATION (GRADES K-12) – COLLEGE OF HUMAN SCIENCES (<http://www.education.iastate.edu/te/programs/>

[secondary-education/#physical-education-grades-k-12-human-sciences](http://www.education.iastate.edu/te/programs/secondary-education/#physical-education-grades-k-12-human-sciences))

- PHYSICS (GRADES 5-12) – COLLEGE OF LIBERAL ARTS AND SCIENCES (<http://www.education.iastate.edu/te/programs/secondary-education/#physics-grades-5-12-liberal-arts-and-sciences>)
- WORLD LANGUAGES AND CULTURES (GRADES 5-12) – COLLEGE OF LIBERAL ARTS AND SCIENCES (<http://www.education.iastate.edu/te/programs/secondary-education/#world-languages-and-cultures-grades-5-12-liberal-arts-and-sciences>)

Students seeking recommendations for a license to teach in the secondary schools must be admitted to the teacher education program. For specific requirements for each area of specialization, see Teacher Education (<http://www.education.iastate.edu/undergraduate-studies/secondary-education>) and curricula for the college in which the chosen degree major is sought.

Notes:

- Students seeking licensure in physical education, agriculture and science do not take C 1426 Principles of Secondary Education Principles of Secondary Education.
- Students seeking a teaching license in physical education must see an adviser in the Department of Kinesiology in the College of Human Sciences.
- All students who are recommended by Iowa State University for teacher licensure must meet the requirements of the Iowa State University teacher education program and the Iowa Board of Educational Examiners.
- Each student must meet the performance outcome standards for teacher licensure by completing a portfolio. Each standard will be assessed in every major. Students will receive both formative and summative evaluations of their progress toward meeting these outcomes throughout their program at Iowa State University.
- A detailed explanation of the standards and assessment process may be found at E (<http://www.education.iastate.edu/educator-prep-resources>) Educator Prep Resources (<http://www.education.iastate.edu/educator-prep-resources>). For more information, students should contact the academic adviser in their major. Each student will be enrolled in the department in which he or she plans to major, and must meet the graduation requirements of that department and the college in which it is situated.

Post-Bachelor's Students

Students holding an appropriate bachelor's degree who wish to pursue teacher licensure must have at least one course in each of the following five general education groups identified for undergraduate students in the preceding section: Natural Sciences, Mathematics or Statistics, Social Sciences, Humanities, and Communication Skills. Individual departments preparing teachers may require additional credits in general education. (See program coordinator for more information.)

Graduate Students

Each Master's program will determine what, if any, general education requirements Master's students must fulfill beyond a bachelor's degree from a regionally accredited institution. (See program coordinator for more information.)

Standards

Teacher Education has a rigorous standards-based curriculum. Two sets of standards are used in the program, one that is targeted for pre-service

teachers (Teacher Education Standards which originates from the Iowa Administrative Code, Chapter 79, Standards for Practitioner Preparation Programs) and the other set that is targeted for in-service teachers (the Iowa Teaching Standards and Model Criteria adopted by the State Board of Education), the latter is emphasized during student teaching. Both are listed below in full.

Iowa State University Teacher Education Standards

The Learner and Learning

Standard #1: Learner Development. The teacher understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Standard #2: Learning Differences. The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Standard #3: Learning Environments. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

Content

Standard #4: Content Knowledge. The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

Standard #5: Application of Content. The teacher understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

Instructional Practices

Standard #6: Assessment. The teacher understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.

Standard #7: Planning for Instruction. The teacher plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Standard #8: Instructional Strategies. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

Standard #8A: Technology. The teacher integrates current and emerging technology in instruction to encourage student creativity, problem solving, collaboration, and digital literacy. Teachers practice and advocate safe, legal, and responsible use of information and technology.

Professional Responsibility

Standard #9: Professional Learning and Ethical Practice. The teacher engages in ongoing professional learning and uses evidence to

continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

Standard #10: Leadership and Collaboration. The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

Electronic Portfolio

A portfolio is used to showcase the teacher candidate's understanding and implementation of the Iowa State University Teacher Education Standards throughout the program. Teacher candidates should visit with their program coordinator and/or their academic advisor for information pertaining to the portfolio.

Clinical Experiences

The Standards for Practitioner and Administrator Preparation Programs (chapter 79.13(1)) requires that "candidates admitted to a teacher preparation program participate in field experiences including both observation and participation in teaching activities in a variety of school settings and totaling at least 80 hours' duration, with at least 10 hours occurring prior to acceptance into the program." This requirement may be met through pre-student teaching courses (e.g., C I 280, C I 480, CI 468, C I 580) or, in certain endorsement areas, a course designated to provide an equivalent experience. For most licensure areas, there are four levels for clinical experiences. Level 1 involves observation in local schools. Level 2 involves actively teaching in the classroom with one lesson, at minimum. Level 3 involves actively teaching in the classroom with two lessons, at minimum. Level 4 is student teaching and involves actively teaching for a minimum of 14 weeks where the student teacher bears primary responsibility for planning and instruction within the classroom for a minimum of two weeks (10 days). Level 2, 3 and 4 involve a course fee, which range from \$25.00 to \$328.00 and are assessed to cover the costs of supervision and placement with a cooperating teacher. Course fees are increased when student teaching nationally or internationally. For current course fees, consult the Schedule of Classes. For level 2, 3 and 4, the student needs access to transportation because the placement may be within 60 miles of the university. The time commitment for clinical experiences ranges from 1/2 day for level 2 and 3 to the full day for level 4. Students complete a background check before initial placement in schools and other appropriate locations.

Admission to Teacher Preparation program REQUIREMENTS

Students must have:

- A minimum of 9 credits hours at Iowa State University with a 2.5 cumulative grade-point-average (GPA). (Student must maintain 2.5 cumulative GPA throughout the program in order to continue through the program)
- Praxis CORE scores with a minimum of 156 in Reading, 162 in Writing, and 150 in Mathematics.
- Documented completion of an Iowa State University-approved 10 hours of pre-student teaching field experience.
- A minimum of a "C" in ALL Curriculum and Instruction (C I), Human Development and Family Studies (HD FS), and Special Education (Sp Ed) courses required for licensure (pedagogy coursework).

- A minimum of a "C-" in ALL Major department courses/content courses required for teacher licensure (content coursework). (This is for courses taken from Fall 2007 forward).
- A valid Iowa criminal background check report processed by ISU's recommending official.
- An e-portfolio started and meeting the program requirements for admission to the teacher education program.

A (<http://www.education.iastate.edu/undergraduate-studies/undergraduate-applicants/admission>)mission to Education Preparation Program (<http://www.education.iastate.edu/undergraduate-studies/undergraduate-applicants/admission>)

Graduate Degree Programs with Teacher Licensure

Currently, there are five graduate initial teacher licensure programs. These programs are designed for students who do not currently hold a teaching license. The programs are listed below:

Agricultural Education (M.S.)
 Family and Consumer Sciences Education (M.Ed. or M.S.)
 Mathematics Education (M.Ed.)
 Physical Education (M.S.)
 Secondary Sciences Education (M.A.T.)

Iowa State University also offers Master's programs for practicing teachers. The Mathematics Department offers a Masters in School Mathematics. (See Mathematics in Courses and Programs section of this catalog.) The Curriculum and Instruction Department offers a Master's degree program and a certificate program that lead to a special education endorsement. (See Curriculum and Instruction in Courses and Programs section of this catalog.)

Graduate programs are also available for those who seek licensure in Educational Leadership and Policy Studies as PK-12 school principals or PK-12 superintendents. (See Educational Leadership and Policy Studies in Courses and Programs section of this catalog.)

Master's Programs that Lead to Initial Teacher Licensure

AGRICULTURAL EDUCATION

The Agricultural Education and Studies Department offers a Master's of Science program that prepares Agricultural Education teachers for grades 5-12

See coordinator for program requirements.

MATHEMATICS

The School of Education offers a Master's of Education program that prepares Mathematics teachers for grades 5-12

See coordinator for program requirements.

Physical Education

The Department of Kinesiology offers a Master's of Science program that prepares Physical Education teachers for grades K-12.

See coordinator for program requirements.

Secondary Sciences

The School of Education offers a Master's of Arts in Teaching program that prepares Secondary Science teachers for grades 5-12

See coordinator for program requirements.

Regents Alternative Pathway to Iowa LICENSURE

The Regents Alternative Pathway to Iowa Licensure (RAPIL) is a collaborative program involving the three Iowa Regents' universities. The program is designed for adult learners holding a baccalaureate degree who are seeking 5-12 licensure in a high needs area. For more information: R (<http://www.iowateacherintern.org>)APIL (<http://www.iowateacherintern.org>)

- *** Will not meet State of Iowa New EL ED licensure requirements beginning September 1, 2015. Must graduate, apply for, and be recommended for EL ED teacher licensure no later than Summer Session 2015.
- † Do not take before Fall 2012. Might become required for ENGL/LA specialization only.
- @ C I ### - Geography for Teachers (3) required if graduating and applying for teacher licensure after August 2015.
- ^ Put Pol S 215 off until here, if projected to graduate after August 2015, take C I ### Civic Lit. & Econ, to meet new requirements.
- * All four Rel methods content areas must be met after August 2015.

Youth Development

Interinstitutional Graduate Program

Iowa State University offers a Master's degree in Family and Consumer Sciences with specialization in Youth Development. This is an interinstitutional distance education program offered entirely online. The student selects the home institution that grants the degree. After admission at the home institution, the student takes courses from each of the participating institutions: Iowa State University; Kansas State University; Montana State University; University of Nebraska; North Dakota State University; Oklahoma State University; South Dakota State University.

At Iowa State University, Youth Development is a specialization within the Master of Family and Consumer Sciences degree program (MFCS-YTH) that consists of 36 semester credits. A computer with minimum specifications, Web access, and an email address are required for completing the program. A creative component is completed as the final project/exam for this degree. The final project is tailored to the needs of the individual student and determined in cooperation with the POS committee. The student presents the agreed-upon project to the committee in a 60- to 90-minute final oral examination meeting via a video conference call. <http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/>

The **Master of Family and Consumer Sciences with Youth Development specialization** is the only online degree available focusing solely on the skills to serve today's young people. Students become immersed in a strengths-based curriculum and learn a methodology that supports youth, enabling them to grow socially, emotionally, and cognitively. The program has its roots in positive youth development. Rather than focusing solely on corrective measures, a positive youth development approach equips individuals in the second decade of life with the skillset necessary for a successful transition into adulthood.

Registration

Students choosing to receive their degree from Iowa State University complete all the admissions, registration and fee payment processes through ISU.

Two on-line graduate certificates are available as a part of this program:

- Youth Development Specialist Graduate Certificate <http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/>
- Youth Program Management and Evaluation Graduate Certificate (<http://www.online.hs.iastate.edu/graduate-programs/masters/mfcs-youth-development/>)

College of Liberal Arts and Sciences

Beate Schmittmann, Dean
William Gutowski, Associate Dean
Arne Hallam, Associate Dean
Amy Slagell, Associate Dean
Ruth W. Swenson, Associate Dean Emerita
Zora D. Zimmerman, Associate Dean Emerita

www.las.iastate.edu/ (<http://www.las.iastate.edu/>)

The College of Liberal Arts and Sciences is a world-class learning and research community. Iowa State's most academically diverse college, LAS educates students to become global citizens, providing rigorous academic programs in the sciences, humanities and social sciences within a supportive, student-centered learning environment. The college also is home to the Open Option Program that prepares students for any curriculum at the University.

Learning GOALS

The primary mission of the college is to promote learning in all its dimensions by providing students with ample opportunities to acquire the requisite knowledge, abilities, and skills to succeed in the world beyond the university. Through coursework within the major and in general education, students will develop skills in reasoning, analysis, and communication; achieve an understanding of the intellectual, historical, and artistic foundations of culture; and work to strengthen their abilities to interact with people, cultures, and the environment in an ethical and sensitive manner. To achieve these learning goals, the college asks students to acquire depth in learning within disciplines of their own choosing, and to acquire breadth through general education courses and electives.

Entering the College of Liberal Arts and Sciences

From High School

Students entering the college are required to present evidence of the following high school preparation:

- 4 years of English
- 3 years of Social Studies
- 2 years of a single world language (3 or more years of a single world language in high school meets the world language graduation requirement in the College of Liberal Arts and Sciences.)
- 3 years of Mathematics
- 3 years of Science

The College also recommends a course in computer applications.

By Transfer

Students are eligible to transfer to the College of Liberal Arts and Sciences with no deficiencies by completing 24 credit hours from an accredited two or four year institution with a 2.0 minimum GPA. To

graduate from the LAS College, a transfer student must complete the general requirements of the college as well as those of the university.

Early planning can improve the transfer process and support a timely graduation. See the LAS College transfer website (<http://www.las.iastate.edu/students/future-students/entry-path-transfer>) for course transfer plans from Iowa's community colleges. For information on articulation/transfer agreements that apply to students who have earned Associate of Arts degrees from an Iowa public community college or who have satisfied general education requirements at the University of Northern Iowa or in the College of Liberal Arts at the University of Iowa, see Articulation/Transfer Agreements in the Admission Transfer Information section of the catalog. Transfer students should also note that in order to graduate "with distinction" students must have completed 60 semester credits of coursework at Iowa State University at the time they graduate, including a minimum of 50 graded credits and have a 3.5 or higher GPA at the beginning of their final term.

A transfer student in the College of Liberal Arts and Sciences may choose to graduate under the catalog in effect at the time of his or her graduation or under one of the five immediately preceding catalogs, provided that it covers the period of his or her enrollment either at Iowa State or any other accredited school. Full requirements of the chosen catalog must be met though adjustments will be made in instances where courses are no longer available or where programs have been changed. A transfer student is responsible for reviewing his/her transfer credit evaluation with the academic adviser during the first semester of enrollment. Prospective transfer students are urged to contact the College of Liberal Arts and Sciences and the academic programs of interest to them well before arriving on campus so that pre-transfer courses are appropriate to the planned major and transferable toward graduation from ISU.

CURRICULA OF THE COLLEGE OF LIBERAL ARTS AND SCIENCES

The college has four curricula: a curriculum in Liberal Arts and Sciences, leading to the Bachelor of Arts or the Bachelor of Science degree; a curriculum in music, leading to the Bachelor of Music degree; a curriculum in liberal studies, leading to the Bachelor of Liberal Studies degree; and a curriculum in Software Engineering, leading to the Bachelor of Science degree.

Liberal Arts and Sciences Curriculum

To obtain a bachelor's degree from the College of Liberal Arts and Sciences curriculum in liberal arts and sciences, an undergraduate student must meet all university graduation requirements:

- have a minimum of 32 semester credits earned in residence at Iowa State University
- earn the last 32 credits in residence
- earn a GPA of 2.0 or better on courses taken at Iowa State University
- meet the communication proficiency and library requirements
- meet the U.S. diversity and international perspectives requirements

Students must also meet all college and program specific requirements for:

- General Education
- World Languages
- Advanced Communication
- Advanced Credits

- Completion of the Major
- 120 credits or more

General Education

Requirements and Learning Goals

The central importance of a general education is reflected in the learning goals of each of three disciplinary areas. Whereas the courses in a major are designed to develop mastery of a specific field or discipline, courses in general education are designed to establish a strong, intellectual foundation to support learning for all majors.

General Education Areas

The general education areas with their minimum credit requirements for the College of Liberal Arts and Sciences are:

- Arts and Humanities—(Minimum 12 credits). The student should develop an understanding of human cultural heritage and history, and an appreciation of reasoning and the aesthetic value of human creativity.
- Mathematical Disciplines and Natural Sciences —(Minimum 11 credits, including 3 in the mathematical disciplines and 8 in the natural sciences). The student should appreciate mathematics as a valuable tool of the sciences and as an intrinsically important way of thinking, and should experience science as a rational search for understanding the structure and behavior of the natural world.
- Social Sciences—(Minimum 9 credits). The student should develop an appreciation of the principal methods of studying human behavior and an understanding of the structure and functioning of institutions.

Lists of courses approved for the three general education areas are available on the LAS College website (<http://www.las.iastate.edu/students/academics/general-education>).

Because students fulfill, in part, the learning goals of the area of their first major by taking courses in their programs of study, the minimum number of general education credits required in the area of the first major is reduced from that listed above by 3 credits. Students in Liberal Studies or Interdisciplinary Studies majors must complete the minimum requirements in all three areas.

Courses from the department of the first major may not be applied to general education requirements. Courses cross-listed with a course in the student's first major may be used to satisfy either major requirements or general education requirements, but may not be used more than once.

Students may not apply the same course in more than one general education area.

World Language Requirement

The faculty of the College of Liberal Arts and Sciences believes that undergraduate students should acquire elementary practical experience in a second language, should be introduced to the theoretical study of language structure, and should begin to develop an understanding of a second culture through study of that culture's language. Students meet this expectation by satisfying a graduation requirement equivalent to the first year of university-level study in one world language.

Students may meet this requirement through several pathways:

- completing three or more years of high-school world language study in a single language
- presenting the equivalent academic record or certification of proficiency in American Sign Language

- earning college credit for two semesters of a single world language
- passing the exam for credit at the 102 level
- receiving a passing grade in a 102 world language course
- receiving a passing grade in a world language course at the 200-level or higher
- being a native speaker of a language other than English and passing English 150 and 250 with a grade of C- or better
- completing a major in any world language
- earning a passing grade in SPAN 097 Accelerated Spanish Review.

Questions about the World Language Requirement and how to meet it should be directed to the Department of World Languages and Cultures. Credits applied toward the World Language Requirement cannot be used to satisfy the general education requirements, but students who have fulfilled the World Language Requirement may apply additional courses in world languages toward the appropriate general education areas.

Advanced Communication Skills

The continued development of communication skills following the sophomore year is the responsibility of the student's major department. The department promotes this development by adopting measures to certify the writing proficiency of its own majors. Certification occurs upon satisfactory completion of a designated course in which writing is evaluated and is a significant component. This designated course may be either a course required in the student's program or an advanced writing course offered by the Department of English, such as:

ENGL 302	Business Communication	3
ENGL 305	Creative Writing: Nonfiction	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3

Advanced Credit Requirements

To obtain a bachelor's degree from the College of Liberal Arts and Sciences, curriculum in liberal arts and sciences, a student must earn at least 45 credits at the 300 level or above taken at a four-year college. All such credits, including courses taken on a pass/not pass basis, may be used to meet this requirement.

The major must contain at least 8 credits in courses taken at Iowa State University that are numbered 300 or above and in which the student's grade is C or higher.

The Major

Students must show they have achieved depth in a specialized area by completing successfully the requirements and learning goals of a major. A major is comprised of 24 to 48 credits in a specific discipline as determined by the faculty. Tracks within a major must have a common 24 credit core. Some courses outside the major discipline may also be required as supporting work for the major. (See Index for page reference to individual department and program requirements.) Courses in the first major listed on the degree program may not be counted in the general education groups.

The average grade of all courses in the major (those courses listed under major on the degree audit) must be 2.0 or higher.

Courses meeting the requirement of additional majors may be counted in the general education groups. When choosing an additional major, students must confirm that the additional major is allowable (see list under "Double Majors").

The major in Interdisciplinary Studies (B.A., B.S.) is available for undergraduate students who have unique interdisciplinary educational goals. Such a major is designed by the faculty and the student and is approved only when the educational goals cannot be met by a reasonable combination of existing majors, minors, and electives.

Double Majors

Students may elect a second major from the departments and program areas in the College of Liberal Arts and Sciences, or from a major field offered for the bachelor's degree in another college of the university.

Double majors between the following are not allowed:

- Chemistry with Biochemistry and Agricultural Biochemistry;
- Biology with Animal Ecology, Agricultural Biochemistry, Biochemistry, Genetics, and Microbiology;
- Any combination of Journalism and Mass Communication, Advertising, and Public Relations.

A student in the Bachelor of Liberal Studies or Bachelor of Music curricula may not add a major from the Liberal Arts and Sciences curriculum, though they may work toward a second degree in the Liberal Arts and Sciences curriculum.

To be awarded a double major both major departments must approve the degree program, and if those majors involve two colleges, both deans must approve. Such programs must fulfill the general education requirements of the college of the primary major. If one major leads to the B.A. degree and the other to the B.S. degree, the degree awarded will be the one offered by the department of the primary major.

If the primary major may lead to either a B.A. or a B.S., a student may choose to receive either degree. In all cases, the student must satisfy the requirements of each major and of the degree that is chosen for the primary major. Students with a primary major in another college who wish to take a second major in the College of Liberal Arts and Sciences must meet all requirements of the second major, but are exempt from the LAS College General Education, World Language and Advanced Credits requirements.

A student may earn two degrees in the Liberal Arts and Sciences curriculum with two appropriate majors and at least 30 additional credits. Any degree offered by this college may be earned together with a degree and a major in any other college of the university. For the requirements for two degrees, see Two Bachelor's Degrees in the Degree Planning section of the catalog.

Minors

A minor, which is optional, must consist of at least 15 credits, with at least 6 credits in courses numbered 300 and above taken at ISU with a grade of C or higher. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

A list of minors offered by the college of Liberal Arts and Sciences can be found on the University Minors page.

Courses applied toward the general education groups may be used to meet the requirements of a minor. See University Minors page for more information.

If a student declares a minor and completes the requirements specified by the offering department/program, the minor will be recorded on the transcript.

Bachelor of Music Curriculum

The Department of Music offers a Bachelor of Music degree (B.Mus.) as well as a Bachelor of Arts degree in music. For information about both degrees, see Music, Undergraduate Study.

In order to receive teacher certification in music, students must earn the Bachelor of Music degree.

Candidates for the Bachelor of Music must earn a minimum of 125-146.5 credits (depending on the option chosen) including a minimum of 32 credits in residence at Iowa State University and a minimum of 45 advanced credits in courses numbered 300 or above and complete the following requirements:

- General education 38.5-46.5 credits
- Music core 47 credits
- Music option 31-52.5 credits

Students must select one of the following options: music education [vocal or instrumental], performance [voice, piano, organ, string instruments, wind or percussion instrument], or composition.

Bachelor of Liberal Studies Curriculum

The LAS College administers a bachelor's degree program in Liberal Studies. This degree, the Bachelor of Liberal Studies (B.L.S.), was established by the three Iowa Regent universities to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals.

For specific degree requirements, see Liberal Studies.

Software Engineering Curriculum

A Bachelor of Science degree in software engineering is jointly administered by the Department of Electrical and Computer Engineering (College of Engineering) and the Department of Computer Science (College of Liberal Arts and Sciences). The program is aimed at creating high-quality software in a systematic, controlled, and efficient manner. The specific objective of the program is to educate students on principles, processes, techniques, and tools for producing, analyzing, specifying, designing and evolving software. A broader objective is to cultivate among students intellectual curiosity, problem solving skills, good learning habits, effective communication skills, leadership, and teamwork.

This interdepartmental program enables students to take a range of Software Engineering courses, as well as elective courses from both Computer Science and Computer Engineering as part of their degree program.

For specific degree requirements, see Software Engineering.

Certificate Programs

The LAS College also administers certificate programs in Latin American Studies and in Leadership Studies. Students interested in pursuing these certificates are advised to consult with their academic adviser and with

the relevant program that administers the certificate. Completion of a certificate will be recorded on the transcript.

The Open Option

Students who enter Iowa State University and want time to explore the best match between their academic interests and abilities, may do so as Open Option students.

The Open Option experience is designed to help students explore majors and careers, become acquainted with the entire university, and make successful adjustments to the academic expectations of Iowa State. Open Option students are assigned academic advisers in the Liberal Arts and Sciences Student Academic Services Office and take LAS 101, an orientation class that introduces students to campus resources as well as to all of the colleges and majors on campus. An optional career development class (U ST 104), in the second semester guides students in selecting a major and career that match their academic and personal goals.

Aided by their adviser, Open Option students select courses that allow them to sample their academic interests before committing to a specific university major. Open Option students typically declare a major during their second or third semester. In addition, students who may have started in a specific field and have discovered it is not meeting their needs may transfer into Open Option for a semester or two while they decide on a new major.

Policies

In the LAS College, courses taken on a pass/not pass basis may be counted toward the required total of 120 credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement. No more than 9 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation. Students whose high school study of world languages meets the College World Language Requirement may not enroll in or receive credit for 101 or 102 in that language. Be sure to review other University policies that affect graduation in the Academics section of the catalog.

Credit by Examination Program

Individual departments may use CLEP Subject Tests for testout of specific courses. Students in the College of Liberal Arts and Sciences may use CLEP General Test credits as free electives but not toward any of the general education area requirements.

Electives

Elective courses as well as general education courses may be used to meet the requirements of a minor or of another major, provided that they are taken on a graded basis.

Academic Advising Planning the Program of Study

Careful, comprehensive planning is important for meeting graduation requirements and taking advantage of the resources offered by the university. Each student is encouraged to work with his or her academic adviser in developing a four year plan as soon as possible after declaration of the major. A degree audit listing all completed courses and those remaining to be taken for fulfillment of the degree requirements in the student's chosen major is provided to the student and the adviser through AccessPlus. The student should review the audit each semester

and consult with the adviser when changes are required. Any changes to the audit must be approved by the academic adviser and by the dean's office. Students are responsible for reviewing and updating their degree audits in a timely fashion in order to avoid delays in graduation.

During the first two years, students should meet proficiency requirements in ISU Comm Foundations (English 150, 250) and Information Literacy (LIB 160) and make progress toward meeting the general education requirements. The third and fourth years should emphasize completion of the major (and minor, if elected) and general education requirements, and should give the student an opportunity to take electives. Students seeking the enhanced academic opportunities provided by Study Abroad, National Student Exchange, and Internships will want to engage in careful planning of the Program of Study.

Academic Advising Learning Outcomes

Through their experience with academic advising, students will:

- Develop an understanding of the structure, application, and goals of a liberal arts education in relation to their academic development.
- Be able to formulate appropriate questions, seek information, and evaluate and apply academic advice.
- Know the requirements, policies and protocol of the university, college, and department as they relate to their educational experience.
- Understand how degree programs can be enhanced by study and experiences tailored to their intellectual and personal goals.

Students will also be able to identify and utilize university resources effectively to:

- Satisfy degree requirements
- Plan programs of study, including selection of appropriate courses and registration
- Discover how interests, skills and goals connect to fields of study and careers
- Link curricular and co-curricular activities
- Research and prepare for advanced study and/or careers
- Share responsibility for a mentor-mentee relationship between advisee and adviser.

Special Opportunities in the College of Liberal Arts and Sciences

Honors Program

Students enrolled in the College of Liberal Arts and Sciences are encouraged to participate in the University Honors Program.

Liberal Arts and Sciences Honors is designed to add depth and breadth to students' programs of study and intellectual development. Students in Liberal Arts and Sciences Honors benefit from the resources and capabilities of a large and dynamic research university along with the small class sizes and intellectual community that characterize smaller, selective liberal arts colleges. Membership in LAS Honors offers specific benefits to students such as collaborations with individual faculty members on Honors projects, extended library loan privileges, 24-hour use of the Jischke Honors Building and priority registration for classes.

LAS Honors encourages freshmen as well as more advanced students to join. Graduation in the Honors Program is recognized by a special

notation on the student's diploma and permanent record. Honors students wear white Honors cords at graduation.

Reserve Officers' Training Corps Programs (ROTC)

The College of Liberal Arts and Sciences also offers students the opportunity to combine their academic programs with ROTC programs in Military Science (Army), Naval Science, and Air Force Aerospace Studies.

Teacher Licensure

Teaching licenses are issued by the Iowa Board of Educational Examiners. The Recommending Officer for the ISU University Teacher Education Program submits each candidate file after that candidate is determined to be eligible for licensure. Teaching licenses are issued for a specific teaching level, e.g., grades 5-12. Subject area endorsements are listed on the candidate's license. The College of Liberal Arts and Sciences collaborates with the School of Education in approved licensure programs. Students who plan to teach in secondary schools (grades 5-12) may qualify for a license by completing an approved licensure program in one of the following majors:

- Biology
- Chemistry
- Earth Science
- English
- History
- Mathematics
- Music (through the Bachelor of Music curriculum)*
- Physics
- World Languages and Cultures (Endorsements are available in French, German, and Spanish.)

Students may also add these additional endorsements to their primary license:

- English as a Second Language
- General Science
- Physical Science
- Social Studies
- Speech Communication
- World Languages and Cultures (Chinese, Latin, and Russian)

*Students in the College of Liberal Arts and Sciences who complete the approved licensure program in music education (BM degree with Vocal K-12 option or Instrumental K-12 option) may apply for a teaching license that allows them to teach music in grades K-12.

For further information, see Teacher Education.

Preprofessional Programs

Students in the College of Liberal Arts and Sciences may participate in preprofessional programs in human health-related fields, law, and theology by taking the courses required for admission to professional schools. Students may enter the college with the designation Premed, Prelaw, or Preprofessional Health Programs. Most will earn a bachelor's degree by choosing a major and meeting the requirements for the major while taking the preprofessional courses.

Others will spend one to three years as students in the college before transferring to a professional school to which they have applied and been

accepted. For further information, see Opportunities for Preprofessional Study.

The College of Liberal Arts and Sciences participates in a 3+3 program with the Law Schools at Drake University and at the University of Iowa. Visit the Liberal Arts and Sciences Student Academic Services office for details.

Experiential Learning (Internship/Co-op Program)

The Experiential Learning (Internship/Co-op) Program assists students in gaining career-related experience while going to school. Internships/Co-ops provide students with the opportunity to gain specific skills, apply academic knowledge in practical situations, pretest their career choice, earn a salary, and establish a network of professional contacts.

Most internships are full-time and last for a semester or a summer, but a part-time experience is possible. Students wishing to receive academic credit for their internship must make arrangements with relevant faculty in advance of their internship experience. In contrast, co-op students work full-time on an extended basis (work two semesters) or on an alternating basis (work, school, work, etc.) during any semester (fall, spring, summer).

It may take students participating in the Experiential Learning (Internship/Co-op) Program an additional semester or more to complete their academic curriculum requirements. For additional information, contact Liberal Arts and Sciences Career Services.

Departments of the College

Majors and minors in the College of Liberal Arts and Sciences are administered by the following departments:

- Air Force Aerospace Studies
- Anthropology
- Biochemistry, Biophysics, and Molecular Biology
- Chemistry
- Computer Science
- Ecology, Evolution, and Organismal Biology
- Economics
- English
- Genetics, Development, and Cellular Biology
- Geological and Atmospheric Sciences
- Greenlee School of Journalism and Communication
- History
- Mathematics
- Military Science (Army Reserve Officers' Training Corps)
- Music and Theatre
- Naval Science
- Philosophy and Religious Studies
- Physics and Astronomy
- Political Science
- Psychology
- Sociology
- Statistics
- World Languages and Cultures

MAJORS:

- Advertising, B.A.

- Anthropology, B.A., B.S.
- Biochemistry, B.S.
- Bioinformatics and Computational Biology B.S.
- Biological/Pre-Medical Illustration, B.A.
- Biology, B.S.
- Biophysics, B.S.
- Chemistry, B.A., B.S.
- Communication Studies, B.A.
- Computer Science, B.S.
- Criminal Justice (track within Interdisciplinary Studies major)
- Earth Science, B.A., B.S.
- Economics, B.S.
- English, B.A., B.S.
- Environmental Science, B.S.
- Environmental Studies, B.A., B.S. (secondary major only)
- French (see World Languages and Cultures, below)
- Genetics, B.S.
- Geology, B.S.
- German (see World Languages and Cultures, below)
- History, B.A., B.S.
- Interdisciplinary Studies, B.A., B.S.
- International Studies, B.A., B.S. (secondary major only)
- Journalism and Mass Communication, B.A., B.S.
- Liberal Studies, B.L.S.(a general studies degree)
- Linguistics, B.A.
- Mathematics, B.S.
- Meteorology, B.S.
- Music, B.A., B.Mus.
- Performing Arts, B.A.
- Philosophy, B.A.
- Physics, B.S.
- Political Science, B.A.
- Psychology, B.A., B.S.
- Public Relations, B.S.
- Religious Studies, B.A.
- Sociology, B.A., B.S.
- Software Engineering, B.S.
- Spanish (See World Languages and Cultures, below)
- Speech Communication, B.A., B.S.
- Statistics, B.S.
- Technical Communication, B.S.
- Women's Studies, B.A., B.S.
- World Languages and Cultures B.A.:
 - French
 - German
 - Spanish

A secondary major must be taken in conjunction with a primary major.

MINORS:

- Advertising
- African American Studies
- American Indian Studies

- Anthropology
- Astronomy
- Biochemistry
- Bioinformatics and Computational Biology
- Biological Illustration
- Biology
- Chemistry
- Chinese Studies
- Classical Studies
- Communication Studies
- Computer Science
- Criminal Justice Studies
- Economics
- Emerging Global Disease*

- Teaching English as a Second Language
- Technical Communication
- Technology and Social Change
- U.S. Latino/a Studies
- Wind Energy*
- Women's Studies

- World Film Studies

*The College of Liberal Arts and Sciences participates in these interdepartmental minors.

Cross-disciplinary studies in the College of Liberal Arts and Sciences encompass a variety of interdisciplinary and cross-disciplinary areas of study as well as courses that cross established departmental lines. Students may enroll in Program courses; declare majors or minors where offered, or develop an Interdisciplinary Studies major built upon Program offerings. Certificates are also available as separate foci of studies beyond a student's major or minor. (see Index for Program courses).

Advertising

The Advertising Major

The advertising major prepares students for careers in business and industry or for graduate education. Students majoring in advertising find career opportunities in professions requiring applied communication expertise. Graduates are qualified for positions in the creative and account sides of advertising within businesses, agencies and media. The capstone professional internship experience, coupled with coursework that focuses heavily on writing, research, and professional abilities provide opportunities for students to practice and refine their skills.

To receive a bachelor of arts degree in advertising, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, P R or JL MC. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level courses or above. Advertising majors are required to take:

MKT 340	Principles of Marketing	3
SP CM 212	Fundamentals of Public Speaking	3
STAT 101	Principles of Statistics (or another approved statistics course)	4

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, JL MC, or P R. These include:

JL MC 101	Mass Media and Society	3
JL MC 110	Orientation to Journalism and Communication	1
JL MC 201	Reporting and Writing for the Mass Media (C+ or better)	3
ADVRT 230	Advertising Principles	3
ADVRT 301	Research and Strategic Planning for Advertising and Public Relations	3

ADVRT 334	Advertising Creativity (C+ or better in ADVRT 334 or ADVRT 336)	3
or ADVRT 336	Advertising Account Management	
ADVRT 434	Advertising Campaigns	3
or ADVRT 436	Advertising Portfolio Practicum	
JL MC 460	Law of Mass Communication	3
JL MC 462	Media Ethics, Freedom, Responsibility	3
ADVRT 499A	Professional Media Internship: Required	3

Additional recommended courses and requirements for the advertising major are available from the Greenlee School.

Students taking one major at the school may not seek a second major or minor in the school. All Greenlee School majors are required to take a second major or minor outside the school as an area of expertise. All Greenlee School majors are required to take 499A.

Minor in Advertising

Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in advertising, students complete 15 credits.

JL MC 101	Mass Media and Society	3
ADVRT 230	Advertising Principles	3
ADVRT 301	Research and Strategic Planning for Advertising and Public Relations	3
6 credits from the following:		6
ADVRT 335	Advertising Media Planning	
JL MC 401	Mass Communication Theory	
JL MC 406	Media Management	
JL MC 474	Communication Technology and Social Change	
JL MC 476	World Communication Systems	
JL MC 477	Ethnicity, Gender, Class and the Media	
P R 497	Special Topics in Communication

Total Credits: 121

For JL MC 300 and 400-level choices, please choose from the list of selected courses available from an academic adviser. You may schedule an appointment with an adviser by either calling 515-294-4342 or visiting with our front office staff at 101 Hamilton Hall.

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses:(U.S. Diversity) <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses> and (International Perspectives) <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current>.

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS Foreign Language requirement and any unmet ISU admission requirements.

Minor or Second Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or a second major outside of the Greenlee School of Journalism and Communication.

Anthropology

An undergraduate major in Anthropology can serve as the nucleus for a general liberal education, or as the prerequisite for graduate training qualifying a person for positions in (1) college and university teaching, (2) research, and (3) administrative and applied positions in government, development organizations, museums, and private businesses or corporations.

Anthropology students develop a well-rounded professional education in cultural anthropology, archaeology, and biological anthropology. They learn what it means to be human through the study of culture and society, the biology and evolution of humans and other primates, and through the study of past human communities and material culture. Students learn the important historical and contemporary issues of our

subdisciplines, and they learn what it means to be an Anthropologist and acquire an anthropological perspective on global issues. Students develop an appreciation of the value of cultural difference at the local, national and global levels. Students may obtain experience in archaeological, ethnographic and biological research.

Anthropology majors may choose either a bachelor of arts or a bachelor of science degree, both of which require 33 credits in anthropology. A bachelor of arts degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Area I (Arts and Humanities) or III (Social Sciences) or a combination of both. A bachelor of science degree is obtained by fulfilling the college general education requirements plus 6 additional credits in Area IIA (Mathematics) or IIB (Natural Sciences) or a combination of both.

Undergraduate students with majors in anthropology are required to take the following anthropology core courses:

ANTHR 306	Cultural Anthropology	3
ANTHR 307	Biological Anthropology	3
ANTHR 308	Archaeology	3
ANTHR 450	Historical and Theoretical Approaches in Anthropology	3
One course in statistics is required		3

A minor in anthropology consists of at least 15 credits.

ANTHR 201	Introduction to Cultural Anthropology	3
ANTHR 202	Introduction to Biological Anthropology and Archaeology	3

One of the following in cultural anthropology:		3
ANTHR 306	Cultural Anthropology	
or ANTHR 309	Introduction to Culture and Language	
or ANTHR 322	Peoples and Cultures of Native North America	
or ANTHR 323	Topics in Latin American Anthropology	
or ANTHR 340	Magic, Witchcraft, and Religion	

One of the following in archaeology or biological anthropology:		3
ANTHR 307	Biological Anthropology	
or ANTHR 308	Archaeology	
or ANTHR 315	Archaeology of North America	
or ANTHR 319	Skeletal Biology	
or ANTHR 321	World Prehistory	
or ANTHR 350	Primate Behavior	
or ANTHR 482	Topics in Biological Anthropology	

Three additional credits in ANTHR at the 300+ level 3

Communication Proficiency requirement: The department requires that a student earn a grade of C or better in:

ENGL 250	Written, Oral, Visual, and Electronic Composition	3
Two of the following courses		
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	

An additional writing-intensive course outside anthropology.

The principal sub-disciplines of anthropology are represented by the following:

1. Cultural anthropology:

ANTHR 201	Introduction to Cultural Anthropology	3
ANTHR 230	Globalization and the Human Condition	3
ANTHR 306	Cultural Anthropology	3
ANTHR 309	Introduction to Culture and Language	3
ANTHR 313	Kinship and Marriage in a Global Perspective	3
ANTHR 322	Peoples and Cultures of Native North America	3
ANTHR 323	Topics in Latin American Anthropology	3
ANTHR 332	Current Issues in Native North America	3
ANTHR 336	Global Development	3
ANTHR 340	Magic, Witchcraft, and Religion	3
ANTHR 354	War and the Politics of Humanitarianism	3
ANTHR 411	Applied Anthropology	3
ANTHR 418	Global Culture, Consumption and Modernity	3
ANTHR 431	Ethnographic Field School	4-6
ANTHR 434B	Internship: Cultural Anthropology	2-6
ANTHR 434D	Internship: Linguistic Anthropology	2-6
ANTHR 444	Sex and Gender in Cross-cultural Perspective	3
ANTHR 450	Historical and Theoretical Approaches in Anthropology	3
ANTHR 451B	Practicum in Anthropology: Cultural Anthropology	1-3
ANTHR 451D	Practicum in Anthropology: Linguistic Anthropology	1-3
ANTHR 490B	Independent Study: Cultural Anthropology	1-5
ANTHR 490D	Independent Study: Linguistic Anthropology	1-5

2. Archaeology:

ANTHR 202	Introduction to Biological Anthropology and Archaeology	3
ANTHR 308	Archaeology	3
ANTHR 315	Archaeology of North America	3
ANTHR 320	Great Plains Archaeology	3
ANTHR 321	World Prehistory	3
ANTHR 428	Topics in Archaeological Laboratory Methods and Techniques	3
ANTHR 429	Topics in Archaeological Laboratory Methods and Techniques: Archaeological Field School	4-6
ANTHR 434A	Internship: Archaeology	2-6
ANTHR 450	Historical and Theoretical Approaches in Anthropology	3
ANTHR 451A	Practicum in Anthropology: Archaeology	1-3
ANTHR 427I	Field Archaeology	4
ANTHR 490A	Independent Study: Archaeology	1-5

3. Biological Anthropology:

ANTHR 202	Introduction to Biological Anthropology and Archaeology	3
ANTHR 307	Biological Anthropology	3
ANTHR 319	Skeletal Biology	3
ANTHR 350	Primate Behavior	3
ANTHR 424	Forensic Anthropology	3
ANTHR 434C	Internship: Biological Anthropology	2-6
ANTHR 438	Primate Evolutionary Ecology and Behavior	3

Total Credits: 120

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses.

Students in Anthropology have the option of pursuing a B.S. or a B.A. A B.S. requires six additional group requirement credits in natural science or mathematics disciplines. A B.A. requires six additional group requirement credits in social or humanities disciplines.

Graduate Study

The department offers a master of arts degree with a major in anthropology. Graduate courses are offered in the areas of biological anthropology, archaeology, cultural anthropology, and anthropological history and theory. Competence in one foreign language and in statistics must be demonstrated. A thesis, based on original research, is required.

Biochemistry and Biophysics

The department of Biochemistry, Biophysics & Molecular Biology (<http://www.bbmb.iastate.edu>) offers majors in biochemistry or biophysics in the College of Liberal Arts and Sciences and a major in agricultural biochemistry in the College of Agriculture and Life Sciences.

Biochemists and biophysicists seek to understand life processes in terms of chemical and physical principles. They conduct research in the frontiers of biology such as metabolic networking; structure and function of enzymes, membranes, and hormones; computational approaches; genomic and proteomic technology; protein engineering; plant biotechnology; muscle structure and function; and the design and evaluation of drugs for the treatment of disease. Biochemistry, biophysics and molecular biology provide the basis for much of modern biotechnology. Graduates have opportunities in industry, especially the biotechnology sector, in universities, veterinary and medical schools, and government laboratories. Students who meet the necessary high scholastic standards have the opportunity to continue their education to pursue advanced degrees in graduate school, medicine, pharmacy or veterinary medicine.

Graduates of biochemistry, agricultural biochemistry and biophysics understand the chemical principles of biological systems including molecular biology. They have developed laboratory expertise in modern biochemical techniques, including the ability to analyze data and prepare scientific reports. Most have participated in undergraduate research and have developed the skills necessary for both written and oral presentations at a level that will serve the student both within the university and in postgraduate professional life. Graduates have the experience of interacting with persons of different disciplines and cultures. Students have the training in biological and physical science and mathematics to solve problems of broad scope in biological, biomedical and environmental sciences and to provide leadership in diverse scientific and technological arenas.

Biochemistry or Biophysics Majors in the College of Liberal Arts and Sciences

For the undergraduate curriculum leading to the degree bachelor of science, see College of Agriculture, Agricultural biochemistry.

Biochemistry and biophysics are recommended to students whose career interests involve advanced graduate or medical study or employment in

biochemistry or biophysics, or in related areas of the biological or medical sciences.

Biochemistry undergraduate major program of study

Total Degree Requirement: 120 cr.

BBMB 101	Introduction to Biochemistry	1
BBMB 102	Introduction to Biochemistry Laboratory	1
BBMB 201	Chemical Principles in Biological Systems	2
BBMB 404	Biochemistry I	3
or (4 credits)		
BBMB 504	Amino Acids and Proteins	
BBMB 505	Bioenergetics and Metabolism	
BBMB 405	Biochemistry II	3
or (4 credits)		
BBMB 506	Membrane Biochemistry	
BBMB 507	Biochemistry of Nucleic Acids	
BBMB 411	Techniques in Biochemical Research	4
BBMB 461	Molecular Biophysics	2
or BBMB 561	Molecular Biophysics	
BBMB 490	Independent Study (Not required)	1-3
BBMB 499	Undergraduate Research (Not required but strongly encouraged)	1-5
Take one of the following:		5-7
CHEM 201	Advanced General Chemistry	
or CHEM 177 & CHEM 178	General Chemistry I and General Chemistry II	
Take one of the following:		
CHEM 201L	Laboratory in Advanced General Chemistry	
or CHEM 177N	Laboratory in General Chemistry I	
or CHEM 177L	Laboratory in General Chemistry I	
CHEM 211 & 211L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	4
BBMB 561L	Laboratory in Molecular Biophysics	2-3
or CHEM 322L	Laboratory in Physical Chemistry	
CHEM 324	Introductory Quantum Mechanics	3
CHEM 325	Chemical Thermodynamics	3
CHEM 331 & CHEM 332	Organic Chemistry I and Organic Chemistry II	6
CHEM 333L	Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors)	1-2
or CHEM 331L	Laboratory in Organic Chemistry I	
CHEM 334L	Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors)	2
or CHEM 332L	Laboratory in Organic Chemistry II	
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 265	Calculus III	3-4
or MATH 266	Elementary Differential Equations	
or MATH 267	Elementary Differential Equations and Laplace Transforms	
PHYS 221 & PHYS 222	Introduction to Classical Physics I and Introduction to Classical Physics II	10

BIOL 211 & BIOL 212	Principles of Biology I and Principles of Biology II	6
BIOL 211L or BIOL 212L or BIOL 313L	Principles of Biology Laboratory I Principles of Biology Laboratory II Genetics Laboratory	1
BIOL 313	Principles of Genetics	3
BIOL 314	Principles of Molecular Cell Biology	3
Biological Science electives	from Biology, Genetics, Microbiology, Biochemistry or Chemistry	4

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in biochemistry and biophysics and with interdepartmental majors in bioinformatics and computational biology, genetics and genomics, immunobiology, molecular, cellular, and developmental biology, neuroscience, plant biology, and toxicology. Minor work is offered to students taking major work in other departments.

Prerequisite to graduate work is a sound undergraduate background in biology, chemistry, mathematics, and physics.

All graduate students are required by the department to teach as part of their training for an advanced degree.

The department offers a B.S./M.S. program in biochemistry and biophysics that allows students to obtain both the B.S. and M.S. degrees in five years. The program is open to students in the College of Liberal Arts and Sciences and in the College of Agriculture and Life Sciences. Students interested in this program should contact the department office for details. Application for admission to the Graduate College should be made near the end of the junior undergraduate (third) year. Students would begin research for the M.S. thesis during the summer semester after their junior year and are eligible for research assistantships.

Bioinformatics and Computational Biology

Undergraduate study in BCBio is jointly administered by the Department of Computer Science, the Department of Genetics, Development, and Cell

Biology, and the Department of Mathematics. The undergraduate B.S. degree is offered through the College of Liberal Arts and Sciences.

Bioinformatics and Computational Biology is an interdisciplinary science at the interfaces of the biological, informational and computational sciences. The science focuses on a variety of topics. These include gene identification, expression, and evolution; RNA, protein, and genome structure; and molecular and cellular systems and networks. The large group of participating faculty provides students with a multidimensional perspective on bioinformatics and computational biology and presents them with broad range of possibilities to get involved in research.

This major will prepare students for careers at the interfaces of biological, informational and computational sciences. BCBio graduates with a B.S. seeking direct employment will find ready markets for their talents in agricultural and medical biotechnology industries, as well as in academia, national laboratories, and clinics. Although some students find employment directly after their baccalaureate training, many students will continue their education in one of the many excellent graduate programs in bioinformatics and computational biology that now exist.

Participation in this field requires that students achieve a high level of competence not only in biology, but also in mathematics, computer science, and statistics. As a result, the program includes required courses from many different disciplines. Graduates demonstrate an above-average ability to synthesize methods from these different disciplines to solve problems.

In addition to basic degree requirements listed in the Curriculum in Liberal Arts and Sciences, BCBio majors must satisfy the following requirements:

A. Complementary Courses for the BCBio Major

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	
or		
CHEM 177 & 177L & CHEM 178	General Chemistry I and Laboratory in General Chemistry I and General Chemistry II	
or		
CHEM 201 & 201L	Advanced General Chemistry and Laboratory in Advanced General Chemistry	
CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	
or		
CHEM 331 & 331L	Organic Chemistry I and Laboratory in Organic Chemistry I	
and		
CHEM 332 & 332L	Organic Chemistry II and Laboratory in Organic Chemistry II	
PHYS 111	General Physics	5
or		
PHYS 221	Introduction to Classical Physics I	
or		
PHYS 115 & 115L	Physics for the Life Sciences and Laboratory in Physics for the Life Sciences	
STAT 330	Probability and Statistics for Computer Science	3
STAT 430	Empirical Methods for the Computational Sciences	3

BIOL 211 & 211L	Principles of Biology I and Principles of Biology Laboratory I	4
BIOL 212 & 212L	Principles of Biology II and Principles of Biology Laboratory II	4
BIOL 314	Principles of Molecular Cell Biology	3
or		
BIOL 315	Biological Evolution	
or		
GEN 409	Molecular Genetics	
Total Credits		22

Complementary courses note: The following other STAT courses may be substituted for STAT 330 and STAT 430, with permission of the BCBio Major.

STAT 330: STAT 101, 104, 105, 201, 231, 305, or 341

STAT 430: STAT 301, 401, or 432

B. Core Courses Within the BCBio Major

6-7 credits:		6-7
GEN 313 & 313L	Principles of Genetics and Genetics Laboratory	
COM S 227 & COM S 228	Introduction to Object-oriented Programming and Introduction to Data Structures (recommended when developing course plan)	
or		
COM S 207 & COM S 208	Fundamentals of Computer Programming and Intermediate Computer Programming (allowed for students entering major who took these courses)	
COM S 230	Discrete Computational Structures	3
COM S 311	Design and Analysis of Algorithms	3
MATH 165 & MATH 166	Calculus I and Calculus II (recommended when developing course plan)	8
or		
MATH 181 & MATH 182	Calculus and Mathematical Modeling for the Life Sciences I and Calculus and Mathematical Modeling for the Life Sciences II (allowed for students entering major who took these courses)	
BCBIO 110	BCBIO Orientation	0.5
BCBIO 322	Introduction to Bioinformatics and Computational Biology	3
BCBIO 401	Fundamentals of Bioinformatics and Computational Biology I	3
BCBIO 402	Fundamentals of Bioinformatics and Computational Biology II	3
BCBIO 490 or BCBIO 491	Independent Study or Team Research Projects.	1-5
Total Credits		30.5-35.5

Core courses note: The Com S 227/228 and Math 165/166 core course series is required for BCBio majors. However, students transferring into the major who have already earned credit for Com S 207/208 and/or the Math 181/182 can substitute those courses for the respective Com S 227/228 and/or Math 165/166 series. Students will need permission of

the instructors to enroll in any upper level course that requires a pre-req in Com S 227/228 and/or Math 165/166.

C. Support Electives

3-9 credits to be chosen from the following list:

BBMB 404	Biochemistry I	3
BBMB 405	Biochemistry II	3
BBMB 461	Molecular Biophysics	2
BIOL 328	Molecular and Cellular Biology of Human Diseases	3
BIOL 423	Developmental Biology	3
BIOL 451	Plant Evolution and Phylogeny	4
BIOL 462	Evolutionary Genetics	3
BIOL 465	Morphometric Analysis	4
BIOL 487	Microbial Ecology	3
COM S 252	Linux Operating System Essentials	3
COM S 309	Software Development Practices	3
COM S 319	Software Construction and User Interfaces	3
COM S 327	Advanced Programming Techniques	3
COM S 363	Introduction to Database Management Systems	3
COM S 425	High Performance Computing for Scientific and Engineering Applications	3
COM S 426	Introduction to Parallel Algorithms and Programming	4
GEN 340	Human Genetics	3
GEN 410	Analytical Genetics	3
MATH 207	Matrices and Linear Algebra	3
or MATH 317	Theory of Linear Algebra	
MATH 265	Calculus III	4
MATH 266	Elementary Differential Equations	3
or MATH 267	Elementary Differential Equations and Laplace Transforms	
MATH 304	Combinatorics	3
MATH 314	Graph Theory	3
MATH 373	Introduction to Scientific Computing	3
MICRO 402	Microbial Genetics and Genomics	3
STAT 342	Introduction to the Theory of Probability and Statistics II	3
STAT 402	Statistical Design and the Analysis of Experiments	3
STAT 407	Methods of Multivariate Analysis	3
STAT 416	Statistical Design and Analysis of Gene Expression Experiments	3
STAT 444	Bayesian Data Analysis	3
STAT 480	Statistical Computing Applications	3

D. The communications and English proficiency requirements of the LAS college are met by:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	

And one of the following:

ENGL 309	Proposal and Report Writing	3
----------	-----------------------------	---

or

ENGL 312	Biological Communication
or	
ENGL 314	Technical Communication

The lowest grade acceptable in ENGL 150 Critical Thinking and Communication, ENGL 250 Written, Oral, Visual, and Electronic Composition or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors is C-.

Minor in Bioinformatics and Computational Biology

The administering departments offer a minor in Bioinformatics and Computational Biology, which requires the following courses.

BIOL 211	Principles of Biology I	3
BIOL 212	Principles of Biology II	3
GEN 313	Principles of Genetics	3
COM S 227 & COM S 228	Introduction to Object-oriented Programming and Introduction to Data Structures	7
or		
COM S 207 & COM S 208	Fundamentals of Computer Programming and Intermediate Computer Programming	
STAT 330	Probability and Statistics for Computer Science	3
BCBIO 322	Introduction to Bioinformatics and Computational Biology	3
BCBIO 401	Fundamentals of Bioinformatics and Computational Biology I	3
BCBIO 402	Fundamentals of Bioinformatics and Computational Biology II	3
Total Credits		28

Note: The following other STAT courses may be substituted for STAT 330, with permission of the BCBio Major: STAT 101, 104, 105, 201, 231, 305, or 341

2. The Com S 227/228 course series is required for the BCBio minor. However, students transferring into the minor who have already earned credit for Com S 207/208 can substitute those courses for the Com S 227/228 series. Students will need permission of the instructors to enroll in any upper level course that requires a pre-req in Com S 227/228.

Most students pursuing a minor in Bioinformatics and Computational Biology will be biology, genetics, computer science, computer engineering, statistics, or mathematics students who have already taken some of these courses for their major. However, a total of 9 credits must be used only to fulfill the requirements of the minor.

Graduate Study

Work is offered for the master of science and doctor of philosophy degrees with a major in Bioinformatics and Computational Biology (BCB). Faculty are drawn from several departments: Agronomy; Animal Science; Astronomy and Physics; Biochemistry, Biophysics and Molecular Biology; Biomedical Sciences; Chemical and Biological Engineering; Chemistry; Computer Science; Ecology, Evolution, and Organismal Biology; Electrical and Computer Engineering; Entomology, Genetics, Development and Cell Biology; Materials Science and Engineering; Mathematics; Plant Pathology; Statistics; Veterinary Microbiology and Preventive Medicine; and Veterinary Pathology.

The BCB program emphasizes interdisciplinary training in nine related areas of focus: Bioinformatics, Computational Molecular Biology, Structural and Functional Genomics, Macromolecular Structure and Function, Metabolic and Developmental Networks, Integrative Systems Biology, information Integration and Data Mining, Biological Statistics, and Mathematical Biology. Additional information about research areas and individual faculty members is available at: www.bcb.iastate.edu (<http://www.bcb.iastate.edu>).

BCB students are trained to develop an independent and creative approach to science through an integrative curriculum and thesis research projects that include both computational and biological components. First year students are appointed as research assistants and participate in BCB 697 Graduate Research Rotation, working with

three or more different research groups to gain experience in both “wet” (biological) and “dry” (computer) laboratory environments. In the second year, students initiate a thesis research project under the joint mentorship of two BCB faculty mentors, one from the biological sciences and one from the quantitative/computational sciences. The M.S. and Ph.D. degrees are usually completed in two and five years, respectively.

Before entering the graduate BCB program, prospective BCB students should have taken courses in mathematics, statistics, computer science, biology, and chemistry. A course load similar to the following list would be considered acceptable:

MATH 265	Calculus III	4
STAT 341	Introduction to the Theory of Probability and Statistics I	3
COM S 207	Fundamentals of Computer Programming	3
COM S 208	Intermediate Computer Programming	3
COM S 230	Discrete Computational Structures	3
CPR E 310	Theoretical Foundations of Computer Engineering	3
CHEM 163	College Chemistry	4
CHEM 231	Elementary Organic Chemistry	3
BBMB 301	Survey of Biochemistry	3
BIOL 313	Principles of Genetics	3
BIOL 315	Biological Evolution	3

During the first year, BCB students are required to address any background deficiencies in calculus, molecular genetics, computer science, statistics and discrete structures, with specific courses determined by prior training. Among the total course requirements for Ph.D. students are four core courses in Bioinformatics:

BCB 567	Bioinformatics I (Fundamentals of Genome Informatics)	3
BCB 568	Bioinformatics II (Advanced Genome Informatics)	3
BCB 569	Bioinformatics III (Structural Genome Informatics)	3
BCB 570	Bioinformatics IV (Computational Functional Genomics and Systems Biology)	3

And also should include

GDCB 511	Molecular Genetics	
BCB 690	Student Seminar in Bioinformatics and Computational Biology	
BCB 691	Faculty Seminar in Bioinformatics and Computational Biology	
BCB 593	Workshop in Bioinformatics and Computational Biology	

M.S. students take the above background and core courses, take at least 6 credits of advanced coursework, and may elect to participate in fewer seminars and workshops. Additional coursework may be selected to satisfy individual interests or recommendations of the Program of Study Committee. All graduate students are encouraged to teach as part of their training for an advanced degree. (For curriculum details and sample programs of study, see: www.bcb.iastate.edu (<http://www.bcb.iastate.edu>).

Biology

Interdepartmental Undergraduate Program

Iowa State University is a major center for research and education in the biological sciences. With over 200 faculty in the life sciences, students have the opportunity to learn from some of the nation's leaders in biological research and teaching and to participate in innovative, meaningful research projects that explore frontiers of biology. Few other universities have such a wealth of faculty expertise available to undergraduate students, making Iowa State's Biology Program the logical choice for those who want to participate in a thriving academic community.

The faculties of the Department of Ecology, Evolution, and Organismal Biology and the Department of Genetics, Development, and Cell Biology jointly offer the undergraduate biology major. This high quality academic program has the flexibility to accommodate a range of career goals while taking advantage of the university's strengths in science and technology. A bachelor's degree in biology provides excellent preparation for graduate study in biological disciplines ranging from the molecular to the ecological levels, and for entrance into various professional schools, such as human medicine, physical therapy, or veterinary medicine. The major is well suited for those who plan to teach biology, who wish to enter government or industrial employment in health or environmental professions, or who prefer educational breadth as an end in itself. By working with our professional and faculty advisers, it is possible to design a unique program of study that will meet student needs and objectives.

Students with special interests and aptitudes should consider combining biology with a minor or a second major in another subject, such as chemistry, environmental studies, journalism, mathematics, music, statistics, or many other subjects offered by the university.

Customizing a degree

Biology encompasses an amazing diversity of disciplines and scales of study ranging from molecules to the biosphere. The Biology major offers a rich variety of coursework addressing most of the areas of biology.

The major's curriculum requirements offer tremendous flexibility in creating an individualized program of study to facilitate achievement of a student's career goals, while simultaneously assuring some exposure to all areas of biology and providing complementary knowledge from supporting courses in chemistry, physics, and math/statistics.

While flexibility is the hallmark of the Biology major, the breadth of the field can also be challenging. Thus, in an effort to provide more guidance to students who desire such, the major also provides five advising tracks, or areas of specialization, for students who wish to focus on subfields of biology or who have specific career goals in mind. Course plans for each area of specialization are listed on the Biology web site. The areas are:

Pre-medical and Human Health Professions—This area emphasizes preparation for further study in medical school or allied human health professions such as dentistry, optometry, genetic counseling, physical therapy, occupational therapy, physician assistant, nursing, chiropractic, and others. It also will prepare students for a broad range of careers in the biological sciences. Students are urged to determine the specific entrance requirements for the professional schools where they might study and to plan a program of study accordingly, in addition to following the basic plan.

Pre-veterinary—An eventual degree in Veterinary Medicine can lead to a wide variety of careers, including private clinical practice in small animal medicine or agricultural animal production. But, pre-veterinary students can also prepare themselves for careers in animal research, public health, laboratory animal medicine, food safety, regulatory medicine,

and education. Specific requirements for entrance to the Iowa State Veterinary College or other schools should be consulted as programs of study are planned, in addition to following the basic plan.

Molecular and Cellular Biology—Students specializing in this field will explore the structure, function, and interactions of the molecules and sub-cellular features that make up living cells. This area is particularly designed for those who plan to pursue a career in research in molecular or cell biology or in related areas such as biochemistry, genetics, microbiology, developmental biology, human medicine, or veterinary medicine. Many students in this area will choose to go on to graduate school.

Ecology and Conservation Biology—Ecologists examine the interactions and relationships that living organisms have with each other and their environment. Conservation biologists study the nature and status of Earth's biodiversity with the aim of protecting species, their habitats, and ecosystems from excessive rates of extinction and loss. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Evolution and Biodiversity—This area provides students with a sound understanding of evolutionary principles and the biological patterns that result from evolutionary change. Students have the opportunity to explore, in depth, the biodiversity found within a wide range of groups of organisms. Students who choose this specialization may go on to work for a non-profit environmental group; an environmental consulting firm; a local, state, or federal agency; or other related organizations. Many students in this area will choose to go on to graduate school.

Other opportunities

Teacher licensure—Biology majors seeking licensure to teach biology in secondary schools must meet requirements of the Teacher Education Program as well as those of the Biology Program. In addition, they must apply formally for admission to the teacher education program. See the section on Teacher Education for a list of licensure areas, degree requirements, and other information about this program.

Undergraduate research—Students who have interests in biological research are encouraged to become involved in the research projects of faculty members on campus. Those doing so may receive credit for the experience in BIOL 499 Undergraduate Research Experience.

Making the effort to find a suitable research mentor and engaging in research work can be one of the most valuable experiences of an undergraduate education. Internship experiences are often available at other universities, zoos, museums, governmental and non-governmental entities focused on environmental issues, and industrial or government laboratories. Students participating in such projects may receive internship credit in BIOL 494 Biology Internship.

Field trip courses—The Biology Program offers two field trip courses: BIOL 393 (North American Field Trips in Biology) and BIOL 394 (International Field Trips in Biology). In recent years field trip opportunities to the Boundary Waters area of Minnesota, Honduras, and Spain have been available. These courses involve a pre-trip seminar followed by one-week to one-month long field trip at a time when academic year classes are not in session. The classes are low enrollment and allow extensive interaction between instructors and students in locations of biological interest.

International experience—Because major discoveries in science often result from global efforts, biology majors are encouraged to include an international or study abroad component in their degree programs. This can be done by participating in international field trips originating from the ISU campus in BIOL 394 International Field Trips in Biology. In addition, many students choose to study abroad, attending a university in another country for up to a year as an exchange student. Minors in a foreign language can also add an international emphasis to a degree in biology.

Courses offered at other locations

In addition to biological science courses taught on campus, students may take courses at various remote locations and arrange to have the credits count toward the advanced courses required in the biology major.

Attending a summer field station adds an important component to an undergraduate program of study.

Gulf Coast Research Laboratory—The Gulf Coast Research Laboratory is affiliated with the University of Southern Mississippi. Iowa State students may register for marine biology courses and transfer credit to their degree programs under the number BIOL 480 Studies in Marine Biology. Written permission of the Biology Program Director is required for this arrangement.

Summer Biological Field Stations—Courses taken at summer field stations may be transferred to Iowa State University as credit in BIOL 481 Summer Field Studies. Such stations are found throughout the country and often offer courses that emphasize the adaptation of plants and animals to unique environments. See www.biology.iastate.edu (<http://www.biology.iastate.edu>) for links to Iowa Lakeside Laboratory and other field stations in different biomes, e.g., marine/coastal, Great Lakes, taiga, deciduous forests, deserts, Rocky Mts., etc.

Organization for Tropical Studies—Iowa State students may register for courses in tropical biology taught in Costa Rica by the Organization for Tropical Studies. Credit is transferred to Iowa State as BIOL 482 Tropical Biology. For further information, contact the Biology Student Services Office in 103 Bessey Hall.

Undergraduate Study

Biology majors start their studies in the biological sciences by taking a unified biology core curriculum consisting of six integrated courses, including four with labs. The first year provides a broad introduction to the nature of life.

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1

During the first year, students also take BIOL 110 Introduction to Biology and BIOL 111 Opportunities in Biology, which are half semester courses designed to introduce the student to the discipline of biology and opportunities for careers in biology. Students transferring into the Biology major take BIOL 112 in place of BIOL 110.

Students then explore concepts of ecology in BIOL 312; the principles of genetics in BIOL 313 and BIOL 313L; cell and molecular biology in BIOL 314; and evolutionary biology in BIOL 315. Biology majors must take an additional 21 credits of biological science at the 300 level, or above, from an approved list of courses. Of these, at least 9 credits must be

taken as BIOL courses, and a minimum of two BIOL laboratory or field courses must also be included.

Biology majors should carefully consider their selection of upper-level courses to allow them to emphasize one, or more, of the sub-disciplines of Biology relevant to their post-baccalaureate objectives. Most biology courses numbered 300 or above can be used to satisfy the additional credit requirement. Some courses taught in other departments can also be applied to the biology major. Advanced students should consider including 500 level courses in their programs. The Biology Program's web site has a complete listing of acceptable upper-level life science courses.

Biology majors must demonstrate competency in their understanding of the biological sciences. Thus, grades of C- or better in all biological science courses applied to the major are required. Furthermore, in order to graduate, a student must have a cumulative average in the major of at least 2.00.

General requirements

Students may earn the B.S. degree in Biology from either the College of Liberal Arts and Sciences or from the College of Agriculture and Life Sciences. Students in the College of Liberal Arts and Sciences must fulfill the foreign language and general education requirements for that college. Students in the College of Agriculture and Life Sciences must meet the general education requirements for that college. Contact the Student Services Office for details regarding differences in general education and course requirements that are specific to these colleges.

Supporting course requirements—Understanding biology requires a basic understanding of the physical sciences and mathematics. Consequently, a minimum number of credits in general chemistry, organic chemistry, biochemistry, and physics is required. See the Biology Program Web Site for specific supporting science requirements.

The Math requirement is competency based. After demonstrating competency in algebra and trigonometry, biology majors must take two semesters of calculus; or two semesters of Statistics; or one semester of calculus and one semester of Statistics chosen from a list of approved courses available on the Biology Program Web Site and in the Biology Program Office.

Given the important role of communications in the modern sciences, biology majors must demonstrate communication competency by earning a minimum of C in both ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition or equivalent composition courses and in one advanced writing course numbered ENGL 302 through ENGL 316, or JL MC 347, or SP CM 212.

Curriculum in Biology

Administered by the Departments of Ecology, Evolution, and Organismal Biology; and Genetics, Development and Cell Biology. Students should consult the Biology Student Services Office, 103 Bessey (or biology@iastate.edu) for the appropriate course selections for professional or graduate school preparation.

Total Degree Requirement: 120 cr.

Only 65 cr. from a two-year institution may apply which may include up to 16 technical cr.; 9 P-NP cr. of free electives; 2.00 minimum GPA.

Biology: 23.5 cr.

All graded courses minimum C-; 2.00 GPA average required.

BIOL 110	Introduction to Biology	1
BIOL 111	Opportunities in Biology	0.5
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
BIOL 312	Ecology	4
BIOL 313	Principles of Genetics	3
BIOL 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
BIOL 315	Biological Evolution	3

Total Credits 23.5

Advanced Biology: 21 cr.

All graded courses minimum C-; 2.00 GPA average required. See the Biology Program web site for list of approved Advanced Biology courses, or consult an adviser in the Biology Student Services office, 103 Bessey Hall.

Two Advanced BIOL courses with lab or field components (from approved list)

Biology advanced courses (from approved list)	9
Additional approved biology advanced courses	12

Total Credits 21

Mathematical Sciences 7 cr.

Students in College of Agriculture and Life Sciences must have a Math and Statistics.

MATH 160 or 181 or 165 and STAT 101 or 104

Or		
MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	8
& MATH 182	and Calculus and Mathematical Modeling for the Life Sciences II	

Or		
MATH 165	Calculus I	8
& MATH 166	and Calculus II	

Or		
STAT 101 or 104 and STAT 301		4-7

Physical Sciences

General Chemistry: 5 cr. minimum

CHEM 163	College Chemistry	5
& 163L	and Laboratory in College Chemistry	

Or		
CHEM 177	General Chemistry I	5
& 177L	and Laboratory in General Chemistry I	
CHEM 178	General Chemistry II	4
& 178L	and Laboratory in College Chemistry II	

Organic Chemistry: 4 cr. minimum

CHEM 231	Elementary Organic Chemistry	4
& 231L	and Laboratory in Elementary Organic Chemistry	

Or		
CHEM 331	Organic Chemistry I	4
& 331L	and Laboratory in Organic Chemistry I	

Biochemistry: 3 cr.

BBMB 316	Principles of Biochemistry	3
Or		
BBMB 404	Biochemistry I	3
Or		
BBMB 420	Mammalian Biochemistry	3
Physics: 5 cr. minimum		
PHYS 115	Physics for the Life Sciences	5
& 115L	and Laboratory in Physics for the Life Sciences	
Or		
PHYS 111	General Physics	10
& PHYS 112	and General Physics	

International Perspective: 3 cr.

U.S. Diversity: 3 cr.

Communications Proficiency (with a C or better)

English composition	3
Speech fundamentals or intensive written communication	3

Total Credits 6

Communication/Library

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
SP CM 212	Fundamentals of Public Speaking	3
or ENGL 312	Biological Communication	

Total Credits 10

Humanities and Social Sciences

Chosen from approved lists.

LAS - Biology

Note: Students must have completed 3 years of a single world language or take 4-8 credits of university level world language.

Humanities	12
Social Sciences	9

Total Credits 21

Humanities and Social Sciences

Chosen from approved lists.

CALS - Biology

Note: Students in CALS - Biology must take an approved speech course and an approved Math and Statistics course.

Humanities	3
Social Sciences	3
Ethics	3
Total Credits	9

Total Credits: 120.5-122.5

Students must have 120 credits minimum to graduate.

This is only a suggested outline plan. Students may choose or be forced to deviate from this plan to satisfy unmet requirements, for scheduling reasons, or to add a minor or double major. We strongly suggest student involvement in internships, study abroad, summer field stations, Iowa Lakeside Lab, Field Trips in Biology or research opportunities at ISU. These will enhance your program of study but may add credits or time to your degree plan.

Students are required to take 21 credits in advance biology of which 9 credits must be from the Biology Program, (BIOL), and 2 advanced BIOL courses must have a lab or field component.

* Students should meet with a Biology Program advisor to determine the proper plans for chemistry, math and physics before selecting those options above.

Graduate Study

Biology is an undergraduate major only. Persons interested in graduate study in the biological sciences should apply directly to one of the life science graduate programs at Iowa State University. Interdepartmental

graduate offerings in Bioinformatics and Computational Biology; Ecology and Evolutionary Biology; Genetics; Molecular, Cellular and Developmental Biology; Neuroscience; Plant Biology; Toxicology; Immunobiology; and Environmental Science are also available. (See Index.)

A non-thesis master's degree in Interdisciplinary Graduate Studies (biological sciences) has been established particularly for those who wish to have a more diversified program of advanced study than that generally permitted by specific departments and programs.

Botany

Interdepartmental Graduate Major

Graduate Study

The Botany Graduate Program offers work for the degrees Master of Science and Doctor of Philosophy with a graduate major in Botany, and minor work for students majoring in other departments or graduate programs. Within the Botany Graduate Major, one of the following areas of specialization may be designated: aquatic and wetland ecology, cytology, ecology, morphology, mycology, physiology and molecular biology, or systematics and evolution. Relevant graduate courses that may be counted toward completion of these degrees are offered by the Departments of EEOB and GDCB, and by other departments and programs. The specific requirements for each student's course distribution and research activities are set by the Program of Study Committee established for each student individually, and must satisfy all requirements of the Graduate College (See Index). GRE (and if necessary, TOEFL) scores are required of all applicants; students are encouraged to contact faculty prior to application.

Related interdepartmental graduate majors in Ecology and Evolutionary Biology (EEOB); Environmental Science (EnSci); Genetics (IG); Molecular, Cellular and Developmental Biology (MCDB); Plant Physiology (IPPM); and Toxicology should also be investigated as possible graduate programs with specific disciplinary focus.

At present, the Botany Graduate Program is under review and may change Status in the near future. Before applying for admission to the Botany Graduate Major, prospective students should contact the Botany Graduate Program Director of Graduate Education Dr. Robert Wallace (rwallace@iastate.edu) for specific details about the program's Status and application procedures.

Undergraduate Study

Students wishing to pursue an undergraduate degree in the basic plant sciences are encouraged to investigate the numerous possibilities available to them at Iowa State University. The undergraduate Biology Program, jointly administered by faculties of the departments of Ecology, Evolution, and Organismal Biology (EEOB) and Genetics, Cell and Developmental Biology (GDCB), includes a wide spectrum of opportunities for students to develop their academic interests through the study of plant biology. Students can major in Biology in the College of Liberal Arts and Sciences or in the College of Agriculture. Contact the Biology Student Services office in 103 Bessey Hall for general information about the Biology Program. For those students interested in applied plant sciences, undergraduate majors in Agronomy, Horticulture, and Forestry are also available through the College of Agriculture.

Chemistry

Undergraduate Study

For undergraduate curricula in liberal arts and sciences leading to the degrees Bachelor of Science and Bachelor of Arts, see Liberal Arts and Sciences, Curriculum.

Graduates holding the B.S. degree in Chemistry qualify in many fields as: teachers of Chemistry, supervisors in industry, technical sales personnel, and research chemists in federal, state, municipal, academic, or industrial laboratories. Students with high scholastic standing often continue with graduate work, where they may explore more thoroughly the specialized areas of chemistry in which they are interested.

The B.A. degree is useful for students who intend to pursue studies in parallel areas, such as secondary school teaching, or to obtain additional majors or strong minors. The B.A. degree does not prepare students as well for graduate study or professional employment in chemistry.

Graduates have firm foundations in the fundamentals and application of current chemical theories. They are able to design, carry-out, record, and analyze the results of chemical experiments. They are able to use modern instrumentation and classical techniques to identify and solve chemical problems as well as explore new areas of research. Graduates are able to communicate the results of their work to chemists, as well as non-chemists. They understand the ethical and environmental dimensions of problems and issues facing chemists. They follow the proper procedures and regulations for safe storage, labeling, use of chemicals, and disposal of chemicals. Graduates are skilled in problem solving, critical thinking, and analytical reasoning. These skills may be applied to careers in education and industry; in professions such as law, medicine, environmental sciences, and forensic sciences. The curricula in Chemistry are approved by the American Chemical Society (ACS). Students who complete the program obtain an ACS certified baccalaureate degree provided they also take one Biochemistry course, typically BBMB 301 Survey of Biochemistry, BBMB 316 (<http://catalog.iastate.edu/azcourses/bbmb>) Principles of Biochemistry or BBMB 404 Biochemistry I and BBMB 405 (<http://catalog.iastate.edu/azcourses/bbmb>) Biochemistry II.

Liberal arts majors who wish to transfer into Chemistry at the end of their second year may still complete all degree requirements and graduate within five years.

Undergraduate students seeking the B.S. degree in Chemistry usually take courses essential to the degree program according to the following schedule:

First year

CHEM 101	Chemistry Learning Community Orientation	1
CHEM 177 & CHEM 178 or CHEM 201	General Chemistry I and General Chemistry II Advanced General Chemistry	5-7
CHEM 177L or CHEM 177N or CHEM 201L	Laboratory in General Chemistry I Laboratory in General Chemistry I Laboratory in Advanced General Chemistry	1
CHEM 211	Quantitative and Environmental Analysis	2
CHEM 211L	Quantitative and Environmental Analysis Laboratory	2
MATH 165	Calculus I	4
MATH 166	Calculus II	4
ENGL 150	Critical Thinking and Communication	3

LIB 160	Information Literacy	1
---------	----------------------	---

Second year

CHEM 110	Cutting-Edge Chemistry: Research and Career Opportunities	1
CHEM 331	Organic Chemistry I	3
CHEM 332	Organic Chemistry II	3
CHEM 333L	Laboratory in Organic Chemistry I (for Chemistry and Biochemistry Majors)	2
CHEM 334L	Laboratory in Organic Chemistry II (for Chemistry and Biochemistry Majors)	2
MATH 265	Calculus III	4
PHYS 221	Introduction to Classical Physics I	5
PHYS 222	Introduction to Classical Physics II	5
ENGL 250 or ENGL 250H	Written, Oral, Visual, and Electronic Composition Written, Oral, Visual, and Electronic Composition: Honors	3

Third year

CHEM 324	Introductory Quantum Mechanics	3
CHEM 325	Chemical Thermodynamics	3
CHEM 322L	Laboratory in Physical Chemistry	3
CHEM 316	Instrumental Methods of Chemical Analysis	2
CHEM 316L	Instrumental Analysis Laboratory	2
CHEM 301	Inorganic Chemistry	2
CHEM 550	Safety in the Chemical Laboratory	1

Plus a foreign language requirement.

Fourth year

CHEM 402	Advanced Inorganic Chemistry	3
CHEM 401L	Inorganic Chemistry Laboratory	1
ENGL 314	Technical Communication	3
Two advanced Chemistry courses (min 4 credits)		4-6

CHEM 399 Undergraduate Research or CHEM 499 Senior Research is strongly recommended. Credits earned in 399/499/490 may only be used to meet one of the advanced course requirements.

Chemistry majors seeking certification to teach Chemistry in secondary schools must meet the requirements of the College of Human Sciences as well as those of the Chemistry program. In addition, they must apply formally for admission to the teacher education program.

Undergraduate students seeking the B.A. degree in Chemistry have the following courses in their degree programs as minimum requirements:

One of the following sequences: 6-8

CHEM 177 & CHEM 178 & 177L or CHEM 177N	General Chemistry I and General Chemistry II and Laboratory in General Chemistry I Laboratory in General Chemistry I	6-8
CHEM 167 & CHEM 178 & 167L	General Chemistry for Engineering Students and General Chemistry II and Laboratory in General Chemistry for Engineering	
CHEM 201 & 201L	Advanced General Chemistry and Laboratory in Advanced General Chemistry	
CHEM 211	Quantitative and Environmental Analysis	2

CHEM 211L	Quantitative and Environmental Analysis Laboratory	2
CHEM 301	Inorganic Chemistry	2
CHEM 316	Instrumental Methods of Chemical Analysis	2
CHEM 316L	Instrumental Analysis Laboratory	2
CHEM 324	Introductory Quantum Mechanics	3
CHEM 321L or CHEM 322L	Laboratory in Physical Chemistry Laboratory in Physical Chemistry	2-3
CHEM 325	Chemical Thermodynamics	3
CHEM 331	Organic Chemistry I	3
CHEM 331L	Laboratory in Organic Chemistry I	1
CHEM 332	Organic Chemistry II	3
CHEM 332L	Laboratory in Organic Chemistry II	1
The following are required as supporting work:		12
MATH 165	Calculus I	
MATH 166	Calculus II	
PHYS 221	Introduction to Classical Physics I	
PHYS 222	Introduction to Classical Physics II	

Minor

The Department offers a minor in chemistry which may be earned by credit in:

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
or		
CHEM 167 & 167L	General Chemistry for Engineering Students and Laboratory in General Chemistry for Engineering	5
CHEM 178	General Chemistry II	3
CHEM 211	Quantitative and Environmental Analysis	2
CHEM 211L	Quantitative and Environmental Analysis Laboratory	2
CHEM 324	Introductory Quantum Mechanics	3
CHEM 331	Organic Chemistry I	3
CHEM 331L	Laboratory in Organic Chemistry I	1

And one of the following: 2-5

CHEM 301	Inorganic Chemistry	
CHEM 316 & 316L	Instrumental Methods of Chemical Analysis and Instrumental Analysis Laboratory	
CHEM 325 & CHEM 321L or CHEM 322L	Chemical Thermodynamics and Laboratory in Physical Chemistry Laboratory in Physical Chemistry	
CHEM 332 & 332L	Organic Chemistry II and Laboratory in Organic Chemistry II	

The total minimum credits in Chemistry thus will be 20 to 23 depending on which advanced courses are selected.

Communication Proficiency requirement: The Department requires a grade of C– or better in each of:

ENGL 150 & ENGL 250	Critical Thinking and Communication and Written, Oral, Visual, and Electronic Composition	3-6
------------------------	---	-----

or ENGL 250H Written, Oral, Visual, and Electronic Composition:
Honors

Total Credits: 120-121

¹ Advanced high school chemistry and strong algebra skills are necessary for success in CHEM 201. Math ACT of 24 or greater is strongly recommended.

² Students may substitute the following courses, if necessary:

- CHEM 201 for 177 and 178;
- CHEM 177L for 177N or 201L.
- CHEM 331L and 332L for 333L and 334L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
- CHEM 321L for 322L; however this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.
- PHYS 111 and 112 for PHYS 221 and 222, however PHYS 221 and 222 are highly recommended.

³ Required of Chemistry Learning Community Members.

⁴ Completion of three years of foreign language in high school fulfills this requirement.

F Class offered Fall Semester only.

S Class offered Spring Semester only.

Individuals earning a B.A. degree in Chemistry who have taken 331L, 334L and 322L can obtain American Chemical Society certification by taking an additional advanced chemistry lecture course of BBMB 301 or 404. CHEM 550 may not be used to satisfy the Advanced Chemistry requirement.

Chemistry, B.S.

Total Credits: 121-123

¹ Advanced high school chemistry and strong algebra skills are necessary for success in CHEM 201. Math ACT of 24 or greater is strongly recommended.

² Students may substitute the following courses, if necessary:

- CHEM 201 for 177 and 178;
- CHEM 177I for 177N or 201L
- CHEM 331I and 332L for 333L and 334L; however, this substitution may result in a program which is deficient in the laboratory experience recommended by the American Chemistry Society.

³ Completion of three years of foreign language in high school fulfills this requirement.

⁴ The completion of two courses (minimum of 2 credits each) are required to meet this requirement. (In addition to advanced Chemistry courses, certain courses in Biochemistry-Biophysics, Chemical Engineering, Computer Science, Mathematics and Materials Science and Engineering are acceptable.) Up to four credits in undergraduate research (CHEM 339 and/or 499) can be counted as one of the two advanced chemistry courses. CHEM 550 may not be used to satisfy the Advanced Chemistry requirement.

⁵ The program as listed above meets the standard for a certified degree of the American Chemical Society's Committee on Professional Training if BBMB 301 or 404 is one of the Advanced Chemistry Courses.

^F Class offered Fall Semester only.

^S Class offered Spring Semester only.

Graduate Study

The Department offers work for the degrees Master of Science and Doctor of Philosophy with majors in Chemistry, Analytical, Inorganic, Organic, and Physical chemistry. Co-majors may be taken between areas within Chemistry or between one of the areas in Chemistry and another department. Courses in other areas of Chemistry as well as courses in other departments may be used to satisfy the requirement for coursework outside the major field. A Ph.D. student in Chemistry may choose an additional specialty in one of six areas: Materials Chemistry, Industrial Chemistry, Biomolecular Sciences, Chemistry Education, Chemical Instrumentation, and Forensic Chemistry. A minimum of ten credits is required for each additional specialty. A course which counts towards an additional specialty may also count toward the outside course requirement. A minor in Chemistry is available to students in other departments. The Department participates in the interdepartmental major in Toxicology.

The Department of Chemistry requires all graduate students majoring in Chemistry to teach as part of their training for an advanced degree.

Prerequisite to major graduate work is the completion of undergraduate work in Chemistry, Mathematics, and Physics substantially equivalent to that required of undergraduate Chemistry majors at this institution.

The course numbers for general Chemistry courses include 163-178, and 201.

Index to field of work for 200 level courses and above is given by the second and third digits of course numbers:

1. Inorganic Chemistry 00-09
2. Analytical Chemistry 10-19
3. Physical Chemistry 20-29 and 60-69
4. Organic Chemistry 30-39
5. Chemical Education 50-59
6. Interdisciplinary Chemistry 70-89
7. Research 99

Classical Studies

The cross-disciplinary program in Classical Studies engages students with the civilizations of ancient Greece and Rome and their influence, both past and present, on western and world cultures. The Classical Studies minor and interdisciplinary-studies major include an integrated curriculum of courses in the cultures, literatures, history, languages, archaeology, and art of ancient Greece and Rome from prehistoric times to the reign of the Emperor Constantine. Current information about the Program may be found at: <http://language.iastate.edu/academic-programs/classical-studies/>

Courses in Classical Studies provide a classical context for students whose major fields of study or career interests include History, Anthropology, English, World Languages and Cultures, Philosophy, Women's Studies, material culture, law, medicine, political science, the life sciences, and related fields.

Interdisciplinary Studies Major in Classical Studies

Students interested in pursuing an interdisciplinary studies major in Classical Studies should consult the Program Chair (see "Program Faculty" at <http://language.iastate.edu/academic-programs/classical-studies/>) or the Academic Adviser in the Department of World Languages and Cultures (<http://language.iastate.edu/students/>).

A student who wishes to declare a minor must successfully complete the following requirements:

a) One of the following sets of courses in ancient language:

GREEK 101	Elementary Ancient Greek I
& GREEK 102	and Elementary Ancient Greek II

or

LATIN 101	Elementary Latin I
& LATIN 102	and Elementary Latin II

b) One of the following introductory courses: 3

CL ST 273	Greek and Roman Mythology (or)	3
-----------	--------------------------------	---

CL ST 275	The Ancient City	3
-----------	------------------	---

c) One course in ancient history (not used to meet other requirements) from those listed below or approved by the program committee (3 crs.):

CL ST 304	Cultural Heritage of the Ancient World	3
CL ST 402	Greek Civilization	3
CL ST 403	Roman Civilization	3
d) Two additional courses (not used to meet other requirements) from those listed below or approved by the program committee. One of these classes (3 crs.) must be at the 300-level or above.		6
CL ST 273	Greek and Roman Mythology	
CL ST 275	The Ancient City	
CL ST 304	Cultural Heritage of the Ancient World	
CL ST 310	Ancient Philosophy	
CL ST 350	Rhetorical Traditions	
CL ST 353	World Literature: Western Foundations through Renaissance	
CL ST 367	Christianity in the Roman Empire	
CL ST 372	Greek and Roman Tragedy and Comedy	3
CL ST 373	Heroes of Greece, Rome, and Today	
CL ST 374	Sex, Gender, and Culture in the Ancient Mediterranean World	
CL ST 376A	Classical Archeology: Bronze Age and Early Iron Age Greece	
CL ST 376B	Classical Archeology: Archaic through Hellenistic Greece (ca 700-30 BCE)	
CL ST 376C	Classical Archaeology: Roman Archaeology (ca 1000 BCE-400 CE)	3
CL ST 383	Greek and Roman Art	
CL ST 384	Roman Italy: An Introduction	2
CL ST 385	Study Abroad: Roman Italy: Building the Empire	3
CL ST 394	The Archaeology of Greece: An Introduction	
CL ST 395	Study Abroad: The Archaeology of Greece	
CL ST 402	Greek Civilization	
CL ST 403	Roman Civilization	
CL ST 430	Foundations of Western Political Thought	
CL ST 480	Seminar in Classical Studies	
CL ST 490	Independent Study	
CL ST 512A	Proseminar in European History, Ancient	
CL ST 594A	Seminar in European History: Ancient	
GREEK 201	Intermediate Classical Greek	
GREEK 332	Introduction to Classical Greek Literature	
GREEK 490	Independent Study	
LATIN 201	Intermediate Latin	
LATIN 332	Introduction to Latin Literature	
LATIN 490	Independent Study	

Communication Studies

The Communication Studies Major

www.commstudies.las.iastate.edu (<http://www.commstudies.las.iastate.edu>)

The Communication Studies Program focuses on human communication, exploring the ways humans create and negotiate meaning. Communication Studies majors master a focused course of inquiry into interpersonal processes as they create and sustain relationships and impact individuals, groups, and organizations. The Communication Studies curriculum builds primarily on social science traditions in

developing a liberal arts education emphasizing human communication. Students in the Communication Studies major study applied communication theory and research in interpersonal, small group, organizational, intercultural, and other contexts.

The Communication Studies (ComSt) major teaches students how to think critically, giving them the ability to examine complex communication issues, and develop and implement strategies grounded in evidence-based research. This prepares students for careers in business and industry and graduate education. Students majoring in ComSt will find their career opportunities enhanced in professions requiring applied communication expertise, e.g., human resource management, public relations, training and development, sales management, recruitment, event planning, sales, management, organizational development, business communication, law, and international and intercultural relations.

ComSt majors must earn at least 120 credits, with 45 credits at the 300-400 levels, and a minimum of 33 credits in ComSt.

Communication Studies majors will...

- Develop foundational knowledge of human communication
- Apply human communication strategies in a diverse world
- Evaluate and utilize evidence-based research
- Cultivate communication competence

Communication Proficiency Requirement

To meet the University's Communication Proficiency requirement students are required to take:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
Plus one of the following:		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
ENGL 415	Business and Technical Editing	

An average of C- is required in ENGL 150 Critical Thinking and Communication, ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition, Honors), and this additional writing course.

The Communication Studies Major

Core Requirements (15 credits)

COMST 101	Introduction to Communication Studies	3
COMST 102	Introduction to Interpersonal Communication	3
COMST 203	Introduction to Communication Research Methods	3
COMST 301	Human Communication Theory	3
Plus one of the following:		3
COMST 214	Professional Communication	
COMST 218	Conflict Management	

Total Credits **15**

Upper Division Requirements (15 credits). Select five courses from the following

COMST 310	Intercultural Communication	3
-----------	-----------------------------	---

COMST 311	Studies in Interpersonal Communication	3
COMST 313	Leadership Communication Theories	3
COMST 314	Organizational Communication	3
COMST 317	Small Group Communication	3
COMST 319	Communication Training and Development	3
COMST 325	Nonverbal Communication	3
COMST 330	Computer Mediated Communication	3
Total Credits		15

Capstone Course Requirement (3 credits)

COMST 404	Research Seminar	3
-----------	------------------	---

Credits in COMST 384 Applied Organizational Communication, may not be applied toward the upper division requirements.

In accordance with college requirements, an overall average in Communication Studies courses of C (2.0) or better is required.

Enhancement Requirement (4 credits)

COM S 103	Computer Applications	4
-----------	-----------------------	---

Additional Recommended Courses

STAT 101	Principles of Statistics	4
COMST 450	Special Topics in Communication Studies	3

The Communication Studies Minor (18 credits)

The requirements for a minor in ComSt may be fulfilled by credit in:

COMST 101	Introduction to Communication Studies	3
COMST 102	Introduction to Interpersonal Communication	3
COMST 203	Introduction to Communication Research Methods	3
COMST 301	Human Communication Theory	3
Plus six credits in 300-level ComSt courses.		6

Credits in COMST 384 Applied Organizational Communication, may not be applied toward the minor. Students must earn an overall average of C (2.0) or better in all courses taken for the minor.

Total Credits 18

Communication Studies, B.A.**Freshman**

Total Credits: 120-124

To meet Upper Division Comm Requirements students select from among the following:

- COMST 301
- COMST 310
- COMST 311
- COMST 313
- COMST 314
- COMST 317
- COMST 319
- COMST 325
- COMST 330

Students in all majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. (COMST 310 fulfills the international perspective requirement/SP SM 323 fulfills the U.S. diversity requirement). Approved courses are listed at: <http://www.registrar.iastate.edu/courses/div-ip-guide.html>. Discuss with your adviser how the two courses that you select can be applied to to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. You must also complete the LAS foreign language requirement.

The LAS College requires all students to have a 2.0 in the major to graduate. This means students need a 2.0 GPA in the 33 hours taken to fulfill the major requirements in Communication Studies.

Computer Science

<http://www.cs.iastate.edu>

The undergraduate curriculum in computer science leading to the degree Bachelor of Science is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>, and equips students with

a sound knowledge of the foundations of computer science, as well as the problem solving and system design skills necessary to create robust, efficient, reliable, scalable, and flexible software systems. The B.S. degree in Computer Science prepares students for graduate study in computer science, and for various business, industry, and government positions including computer scientists, information technologists, and software developers. The main educational objectives of the computer science program at Iowa State University are that its graduates demonstrate expertise, engagement, and learning within three to five years after graduation.

•**Expertise:** Graduated students should have the ability to establish peer-recognized expertise in the discipline. They should have the ability to articulate this expertise by formulating and solving problems of interest, by creating or deriving value through the application of technology, and by using mathematical foundations, algorithmic principles, and computer science theory in designing, implementing, and evaluating computer-based systems and processes which meet the desired needs of their employers.

•**Engagement:** Graduated students should have the ability to be engaged in the profession through the practice of computer science in industry, academia, or the public sector. They should demonstrate effective teaming and commitment to working with others by applying communications skills and professional knowledge.

•**Learning:** Graduated students should have the ability to engage in sustained learning through graduate work, professional improvement opportunities, and self study so that they can adapt to the role played by information processing in ever-changing areas of science, technology, and society.

Curriculum in Computer Science

Students wishing to pursue the B.S. degree in computer science must first successfully complete the pre-major program consisting of Com S 227, Com S 228, and Math 165; all with a grade of C- or above.

A student seeking a B.S. degree in computer science must satisfy the requirements of the University and College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum) and the departmental requirements.

The departmental requirements consist of a minimum of 44 credits in computer science and satisfaction of written and oral requirements. Students must earn at least a C- in Math 165, Math 166, Cpr E 281, and each Computer Science course taken to fulfill the Degree Program.

The following courses are required:

COM S 101	Orientation	R
COM S 203	Careers in Computer Science	R
COM S 227	Introduction to Object-oriented Programming	4
COM S 228	Introduction to Data Structures	3
COM S 230	Discrete Computational Structures	3
CPR E 281	Digital Logic	4
COM S 309	Software Development Practices	3
COM S 311	Design and Analysis of Algorithms	3
COM S 321	Introduction to Computer Architecture and Machine-Level Programming	3
COM S 327	Advanced Programming Techniques	3

COM S 331	Theory of Computing	3
COM S 342	Principles of Programming Languages	3
COM S 352	Introduction to Operating Systems	3
COM S 362	Object-Oriented Analysis and Design	3

In addition to the above courses, at least 6 credits of 400-level courses are required, with a grade of C- or better. At least 3 credits must be from courses in Group 1 (oral and written reports) and the remaining credits from courses in Group 1 or 2. Com S 402 may be applied towards the Group 1 requirement, provided 3 or more credits of 402 are taken. Com S 414 may not be applied towards fulfilling the 400-level electives.

Group 1 courses: Com S 402, 409, 417, 425, 430, 437, 461, 487, S E/CprE 416

Group 2 courses: Com S 412, 418, 426, 435, 440, 444, 454, 455, 472, 474, 477, 486, Math 481, CprE 431, 458, 489

Group 1 (courses in this group require oral and written reports):

COM S 402	Computer Science Senior Project	2-3
COM S 409	Software Requirements Engineering	3
COM S 417	Software Testing	3
COM S 425	High Performance Computing for Scientific and Engineering Applications	3
COM S 430	Advanced Programming Tools	3
COM S 437	Computer Game and Media Programming	3
COM S 461	Principles and Internals of Database Systems	3
COM S 487	Network Programming, Applications, and Research Issues	3
S E 416	Software Evolution and Maintenance	3

Group 2:

COM S 412	Formal Methods in Software Engineering	3
COM S 418	Introduction to Computational Geometry	3
COM S 426	Introduction to Parallel Algorithms and Programming	4
COM S 435	Algorithms for Large Data Sets: Theory and Practice	3
COM S 440	Principles and Practice of Compiling	3
COM S 444	Bioinformatic Analysis	4
COM S 454	Distributed Systems	3
COM S 455	Simulation: Algorithms and Implementation	3
COM S 472	Principles of Artificial Intelligence	3
COM S 474	Introduction to Machine Learning	3
COM S 477	Problem Solving Techniques for Applied Computer Science	3
COM S 486	Fundamental Concepts in Computer Networking	3
MATH 481	Numerical Methods for Differential Equations	3
CPR E 431	Basics of Information System Security	3
CPR E 458	Real Time Systems	3
CPR E 489	Computer Networking and Data Communications	4

Toward satisfying requirements of the College of Liberal Arts and Sciences, the following courses should be included:

PHIL 343	Philosophy of Technology	3
SP CM 212	Fundamentals of Public Speaking	3

14 credits of Math and Statistics	14
MATH 165 Calculus I	4
MATH 166 Calculus II	4
One Statistics course from:	
STAT 305 Engineering Statistics	3
STAT 330 Probability and Statistics for Computer Science	3
STAT 341 Introduction to the Theory of Probability and Statistics I	3
At least one Math course from:	
MATH 207 Matrices and Linear Algebra	3
MATH 265 Calculus III	4
MATH 266 Elementary Differential Equations	3
MATH 267 Elementary Differential Equations and Laplace Transforms	4
MATH 304 Combinatorics	3
MATH 314 Graph Theory	3
MATH 317 Theory of Linear Algebra	4
13 credits of Natural Science:	13
This should include at least one of the following 2-course sequences and their labs:	
BIOL 211 Principles of Biology I and Principles of Biology Laboratory I & 211L	4
BIOL 212 Principles of Biology II and Principles of Biology Laboratory II & 212L	4
CHEM 177 General Chemistry I and Laboratory in General Chemistry I & 177L	5
CHEM 178 General Chemistry II and Laboratory in College Chemistry II & 178L	4
PHYS 221 Introduction to Classical Physics I	5
PHYS 222 Introduction to Classical Physics II	5
In addition, courses from the following list can be taken to bring the natural science credits to a minimum of 13:	
ANTHR 202 Introduction to Biological Anthropology and Archaeology	3
ANTHR 307 Biological Anthropology	3
BBMB 221 Structure and Reactions in Biochemical Processes	3
BIOL 204 Biodiversity	2
BIOL 312 Ecology	4
BIOL 355 Plants and People	3
CHEM 163 College Chemistry *	4
ENT 370 Insect Biology	3
ENV S 324 Energy and the Environment	3
FS HN 167 Introduction to Human Nutrition	3
GEN 313 Principles of Genetics	3
GEN 313L Genetics Laboratory	1
GEN 320 Genetics, Agriculture and Biotechnology	3
GEOL 100 The Earth **	3
GEOL 100L The Earth: Laboratory	1
GEOL 101 Environmental Geology: Earth in Crisis	3
GEOL 102 History of the Earth	3
GEOL 105 Gems and Gemstones	1
GEOL 108 Introduction to Oceanography	3
GEOL 111 Geological Disasters	1

GEOL 201 Geology for Engineers and Environmental Scientists	3
GEOL 451 Applied and Environmental Geophysics	3
MAT E 215 Introduction to Materials Science and Engineering I & 215L and Introduction to Materials Science and Engineering I - Lab	4
MTEOR 206 Introduction to Weather and Climate	3
MTEOR 301 General Meteorology	4
PSYCH 310 Brain and Behavior	3
PHYS 221 or HIGHER	

Footnotes

* CHEM 163 - 231

** GEOL 100 - 111

The following courses meet the communication proficiency requirement:

ENGL 150 Critical Thinking and Communication	3
ENGL 250 Written, Oral, Visual, and Electronic Composition	3

One of the following

ENGL 302 Business Communication	3
ENGL 305 Creative Writing: Nonfiction	3
ENGL 309 Proposal and Report Writing	3
ENGL 314 Technical Communication	3

The minimum grade accepted in each of the three required English courses is a C.

Students must take at least 15 credits of Computer Science courses at the 300 level or higher at Iowa State University while resident here.

Students must earn a C- or better in each Computer Science course which is a prerequisite to a course listed in the student's degree program.

Undergraduate Minor in Computer Science

The Department of Computer Science offers an undergraduate minor in Computer Science. The minor requires at least 16 credits in computer science courses.

COM S 227 Introduction to Object-oriented Programming	4
COM S 228 Introduction to Data Structures	3
COM S 230 Discrete Computational Structures	3
COM S 311 Design and Analysis of Algorithms	3
3 credits in ComS courses at the 300 level or above	3

Undergraduate Curriculum in Software Engineering

The Department of Computer Science together with the Department of Electrical and Computer Engineering also offer a curriculum leading to an undergraduate degree in software engineering. The software engineering curriculum offers emphasis areas in software engineering principles, process, and practice. Students may also take elective courses in computer engineering and computer science.

See Index, Software Engineering. For curriculum information, see also College of Engineering and College of Liberal Arts and Sciences.

Graduate Study

The department offers graduate programs leading to degrees of Master of Science (MS) and Doctor of Philosophy (PhD) with a major in Computer Science. The Doctor of Philosophy degree may also be earned with computer science as a co-major with some other discipline. Additionally, the department offers a minor for the students majoring in other disciplines.

Established research areas include algorithms, artificial intelligence, computational complexity, computer architecture, bioinformatics, computational biology, computer networks, database systems, formal methods, information assurance, machine learning and neural networks, multimedia, operating systems, parallel and distributed computing, programming languages, robotics, and software engineering. There are also numerous opportunities for interdisciplinary research.

Typically, students beginning graduate work in Computer Science have completed a bachelor's degree or equivalent in Computer Science. However, some students with undergraduate majors in other areas, such as Mathematical, physical, or biological science or engineering become successful graduate students in Computer Science.

For the degree Master of Science, a minimum of 31 semester credits is required. A thesis or a creative component demonstrating research and the ability to organize and express significant ideas in computer science is required.

The purpose of the doctoral program is to train students to do original research in Computer Science. Each student is also required to attain knowledge and proficiency commensurate with a leadership role in the field. The PhD requirements are governed by the student's program of study committee within established guidelines of the department and the graduate college. They include coursework (demonstrating breadth and depth of knowledge), a research skills requirement, a preliminary examination, and a doctoral dissertation and final oral examination. The department recommends that all graduate students majoring in Computer Science teach as part of their training for an advanced degree.

Criminal Justice Studies

The criminal justice studies program in the College of Liberal Arts and Sciences offers a minor in criminal justice studies. Students seeking study beyond a minor can follow a track in Criminal Justice Studies leading to a major in Interdisciplinary Studies (see Four Year Plan to the right), also administered by the College of Liberal Arts and Sciences.

The criminal justice studies minor offers an opportunity for students to learn about the components of the criminal and juvenile justice systems, to become acquainted with the issues and problems affecting these systems, to apply theoretical concepts to real world problems, and to plan a career in criminal or juvenile justice.

Students who declare a minor in criminal justice studies are required to complete 15 credits of course work. Students must take five of the following six courses:

CJ ST 240	Introduction to the U.S. Criminal Justice System	3
CJ ST 241	Youth and Crime	3
CJ ST 320	American Judicial Process	3
CJ ST 332	Philosophy of Law	3
CJ ST 340	Deviant and Criminal Behavior	3
CJ ST 341	Criminology	3

Students are also required to complete a minimum of 3 credits of internship experience CJ ST 460 Criminal and Juvenile Justice Practicum. Completion of the minor requires 18 total credits.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses.

Earth Science

The Earth Science major is a broad program that typically emphasizes an interdisciplinary field. Programs leading to the bachelor of science may be individually designed but will include required courses in Geology and Meteorology, and required supporting work in chemistry, physics, and mathematics. Specific programs have been designed for students interested in a geology, meteorology, or an environmental earth science emphasis. Programs leading to the bachelor of arts for earth science teaching are available. The latter program must satisfy the requirements of the Teacher Education Program.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. At least 8 credits in the major from 300+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher. You must also complete the LAS foreign language requirement.

¹ Choose from list of approved courses available from an adviser or departmental office.

Economics

The department offers coursework for the degrees of bachelor of science with three different majors: agricultural business, business economics, and economics. A minor in agricultural business and a minor in economics are also possible. In addition, the department participates in four interdepartmental programs: international agriculture and global resources systems offered by the College of Agriculture and Life Sciences, and the international studies and women's studies offered by the College of Liberal Arts and Sciences. For further discussion of programs in agricultural business, see the statement below under College of Agriculture and Life Sciences. For programs in business economics, see the statement below under College of Business. For

programs in economics, see the statement below under College of Liberal Arts and Sciences. Visit our web site at www.econ.iastate.edu (<http://www.econ.iastate.edu>).

Graduates of the Department of Economics have unique skills that distinguish them from other graduates. The abilities to think and reason clearly, and to address complex issues using tools and decision-making models of economics, mathematics, and statistics, as well as concepts from the biological, physical, and social sciences, are just the start. They also develop understanding of the interaction of technology, human activity, and the environment, and learn to apply economic and business concepts associated with making “optimal” choices among economic alternatives, and to communicate them, using a variety of means, to other professionals, collective organizations, governments, and the general public.

Graduates are prepared for graduate work in law, economics, and business. But also, having developed the tools of critical analysis and human relations skills that are essential in the work place and the community, our grads possess skills essential to getting and keeping meaningful employment.

1. College of Agriculture and Life Sciences

1.1. Major - Agricultural Business

The major in agricultural business prepares students for advanced studies and for careers in agricultural finance, management in agricultural supply and marketing industries, commodity merchandising and research, business research and management, farm and ranch operations, commercial farm management and appraisal, agricultural sales and marketing, agricultural reporting and public relations, agricultural extension, international activities, and government service. A major in agricultural business with a minor in economics is not permitted; however, a double major in agricultural business and economics is permitted.

Students majoring in agricultural business often choose elective coursework leading to minors in the College of Business or in the College of Agriculture and Life Sciences, or emphasizing specific areas within agricultural business such as finance, management, commodity analysis, research, agricultural sales and marketing, environmental economics, farm and ranch operations, international economics, agricultural extension, or government service.

The major in agricultural business requires a minimum of 120 credits and a GPA of 2.00 or higher. Only 65 credits (which may include up to 16 technical credits) from a two-year institution may apply to the degree. At least 15 credits must be earned from courses taught by the Department of Economics at ISU, with at most 9 P-NP credits of free electives. The major in agricultural business requires:

International Perspective: 3 cr. from approved course list (<http://tinyurl.com/bzbmv9>).

U.S. Diversity: 3 cr. from approved course list (<http://tinyurl.com/atq6kpj>).

Communication/Library: 13 cr.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
One of the following		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
One of the following		3

SP CM 212	Fundamentals of Public Speaking	
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
LIB 160	Information Literacy	1

A grade of C or better must be earned in two of the English composition courses (ENGL 150, ENGL 250, and (ENGL 302 or ENGL 309 or ENGL 314)) and the speech fundamentals course (SP CM 212 or AGEDS 311).

Total Credits **13**

Humanities and Social Sciences: 6 cr.

ECON 102	Principles of Macroeconomics	3
Three credits from approved course list (www.agstudent.iastate.edu/humanities.htm).		3

Ethics: 3 cr. from approved course list (www.agstudent.iastate.edu/ethics.htm) (<http://www.agstudent.iastate.edu/ethics.htm>)

Life Sciences: 6 cr.

One of the following		3
BIOL 101	Introductory Biology	
BIOL 211	Principles of Biology I	
Three credits from approved course list (www.agstudent.iastate.edu/life_science.htm).		3

Total Credits **6**

Mathematics: 13-14 cr.

One of the following		4
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
One of the following		3-4
ECON 207	Applied Economic Optimization	
MATH 166	Calculus II	
STAT 226	Introduction to Business Statistics I	3
STAT 326	Introduction to Business Statistics II	3

Physical Sciences: 5 cr.

CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	5
Or		
PHYS 111	General Physics	5

Agricultural, Food, or Natural Resources Sciences: 6 cr. from approved course list (<http://tinyurl.com/lcs25jb>).

General Economics: 9-10 cr.

ECON 101	Principles of Microeconomics	3
ECON 301	Intermediate Microeconomics	3-4
One of the following		3
ECON 302	Intermediate Macroeconomics	
ECON 353	Money, Banking, and Financial Institutions	
ECON 492	Graduating Senior Survey	R

Business and Agricultural Business: 29 cr.

ACCT 284	Financial Accounting	3
FIN 301	Principles of Finance	3
Six credits from ACCT 285 or any 300-489 ACCT, FIN, MKT, MGMT, MIS, or SCM courses.		6
ECON 110	Orientation in Agricultural Business	1
ECON 235	Introduction to Agricultural Markets	3

ECON 292	Career Seminar	1
Nine credits of ECON 230-289, 300-389, 400-489 courses.		9
Three credits of 400-489 level ECON courses.		3

Electives: 22-24 cr.

Agricultural business majors seeking a double major in economics must take a minimum of 42 credits in economics. These include all of the economics courses required for the economics major. To double major in economics, agricultural business majors must also earn an average grade of C or higher in ECON 101 Principles of Microeconomics, ECON 102 Principles of Macroeconomics, and ECON 302 Intermediate Macroeconomics with no grade lower than a C-.

2. College of Business**2.1. Major - Business Economics**

The major in business economics provides a high-quality education with a balanced emphasis in both business and economics. Graduates from the business economics major possess a unique mix of analytical and applied business skills well-suited for employment in upper level management and public service positions. Graduates also have solid preparation for graduate studies in law, economics, and in Master of Business Administration (MBA) programs. A double major in business economics and agricultural business is not permitted; a double major in business economics and economics is not permitted. A major in business economics with a minor in economics is not permitted. For the undergraduate curriculum in business economics, see College of Business Business Economic Major or visit the College of Business web site at <http://www.business.iastate.edu/>.

3. College of Liberal Arts and Sciences**3.1. Major - Economics**

The major in economics prepares students for advanced studies, professional degrees such as law and business administration, and for careers in finance, business and economic research, management, insurance, brokerage, real estate, labor relations, international development, and government service. Candidates for the bachelor of science degree with a major in economics must fulfill requirements established by the College of Liberal Arts and Sciences. (For details of undergraduate curricula in liberal arts and sciences, see College of Liberal Arts and Sciences, Curriculum.)

Students majoring in economics are required to take the following courses within the General Education Area of Natural Sciences and Mathematical Disciplines:

Choose one of the following:	7-8	
MATH 165 & MATH 166	Calculus I and Calculus II	
MATH 165 & ECON 207	Calculus I and Applied Economic Optimization *	
MATH 160 & ECON 207	Survey of Calculus and Applied Economic Optimization *	
STAT 226	Introduction to Business Statistics I	3
STAT 326	Introduction to Business Statistics II	3

*Students who plan to take postgraduate work in economics should take MATH 165 and MATH 166.

Students must complete the following courses in economics:

ECON 101	Principles of Microeconomics	3
----------	------------------------------	---

ECON 102	Principles of Macroeconomics	3
ECON 301	Intermediate Microeconomics	3-4
ECON 302	Intermediate Macroeconomics	3
ECON 371	Introductory Econometrics	4
ECON 492	Graduating Senior Survey	R
Three credits of ECON 230-289, 300-389, 400-489 courses.		3
Nine credits of 400-489 level ECON courses.		9

A minimum of 15 credits of economics coursework must be earned at Iowa State University. Economics majors must maintain a C average in ECON 101 Principles of Microeconomics, ECON 102 Principles of Macroeconomics, ECON 301 Intermediate Microeconomics, and ECON 302 Intermediate Macroeconomics with no grade lower than a C-.

Communication Proficiency Requirement: The major in economics requires a grade of C or better in each of the following English courses:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
ENGL 302	Business Communication	3
or ENGL 314	Technical Communication	

Optimal progress for an economics major would be to complete the principles sequence

ECON 101	Principles of Microeconomics	3
ECON 102	Principles of Macroeconomics	3
and one of the following sequences in the freshman year:		7-8
MATH 165	Calculus I	
or MATH 166	Calculus II	
MATH 165	Calculus I	
or ECON 207	Applied Economic Optimization	
MATH 160	Survey of Calculus	
or ECON 207	Applied Economic Optimization	

The freshman-year sequences should be followed in the sophomore year by the intermediate theory sequence:

ECON 301 & ECON 302	Intermediate Microeconomics and Intermediate Macroeconomics
---------------------	---

STAT 226 Introduction to Business Statistics I and STAT 326 Introduction to Business Statistics II are recommended in the sophomore year.

4. Learner Outcome Goals

The Department of Economics at Iowa State University has general goals for its B.S. graduates. These goals are for students to be able to solve problems and think critically, engage in economic reasoning, demonstrate leadership skills, communicate effectively, make ethical decisions, understand the environmental impacts of human activities, meet the challenges of living and working in a culturally diverse and global community, develop a capacity for innovativeness and creativity, and value the importance of life-long learning. Regarding each of these general goals, there are more specific additional goals, namely:

1. Problem Solving/Critical Thinking:
 - a. Distinguish factual statements from opinions or value judgments.
 - b. Summarize, analyze, and interpret research data and policy issues.
 - c. Distinguish causal relationships from correlations.

- d. Determine the accuracy of statements.
- e. Understand the usefulness of abstractions and models.
- f. Identify assumptions and detect bias.
- g. Critically evaluate their arguments and those of others.
- h. Distinguish relevant information from irrelevant information.
- i. Establish priorities.
- j. Apply a holistic approach to solving complex, issue-laden, problems.

2. Economic Reasoning:

- a. Distinguish positive ('what is') from normative ('what should be') economics.
- b. Determine the opportunity cost of alternatives.
- c. Apply the concepts of comparative advantage, specialization, and exchange to analyze resource allocation issues.
- d. Identify the conditions under which markets allocate resources efficiently or markets fail.
- e. Apply marginal economic analysis to solve problems.
- f. Conduct comparative static analyses.
- g. Pose and test hypotheses.
- h. Use scientific methods to identify optimal choices among economic alternatives.
- i. Identify decision-makers, objectives, choice variables, incentives, and constraints.
- j. Understand how conclusions depend on assumptions.

3. Leadership:

- a. Organize, facilitate, and participate effectively in a group, team, or organization.
- b. Define a problem or opportunity, implement an action planning process, work toward a goal and justify actions taken.

4. Professional, Interpersonal and Cross-cultural Communications:

- a. Communicate economic and business concepts to professionals, organizations, governments, and the general public.
- b. Obtain information by accessing electronic or traditional media, listening, or by observation.
- c. Read, listen, observe and reflect.
- d. Speak and write clearly and persuasively.
- e. Prepare and present effective visual, oral, written, and electronic presentations.

5. Ethics:

- a. Define and assess their ethical perspectives, sense of moral responsibility, and values.
- b. Identify and critically evaluate contemporary ethical and moral issues in professional and private life.

6. Environmental Awareness:

- a. Explain the physical and biological interactions within ecosystems.
- b. Explain how human activities impact the environment and how societies are affected by environmental change.

7. International/Multi-Cultural Awareness:

U.S. Diversity – Students should achieve two of the following outcomes:

- a. Articulate how their personal life experiences and choices fit within the context of the larger mosaic of U.S. society, indicating how they have confronted and critically analyzed their perceptions and assumptions about diversity-related issues.
- b. Analyze and evaluate the contributions of various underrepresented social groups in shaping the history and culture of the U.S.

- c. Analyze individual and institutional forms of discrimination based on factors such as race, ethnicity, gender, religion, sexual orientation, class, etc.
- d. Analyze how cultural diversity and cooperation among social groups affect U.S. society.

International Perspectives – Students should achieve two of the following outcomes:

- a. Analyze the accuracy and relevancy of their own worldviews and anticipate how people from other nations may perceive that worldview.
- b. Describe and analyze how cultures and societies around the world are formed, are sustained, and evolve.
- c. Analyze and evaluate the influence of global issues in their own lives.
- d. Describe the values and perspectives of cultures other than their own and discuss how the influence individuals' perceptions of global issues or events.
- e. Communicate competently in a second language.

8. Entrepreneurship:

- a. Demonstrate innovativeness and creativity regardless of context.
- b. Identify and pursue opportunities that produce value.
- c. Be persistent in shepherding necessary resources and managing associated risk to facilitate change.

9. Life-long Learning:

- a. Articulate how continued learning after graduation will enrich their lives.
- b. Identify and participate in new areas for learning beyond the classroom and after graduation.

1. College of Agriculture and Life Sciences

1.1. Minor - Agricultural Business

Courses to be included in the minimum of 15 credits include the following:

ECON 101	Principles of Microeconomics	3
ECON 230	Farm Business Management	3
ECON 235	Introduction to Agricultural Markets	3
ECON 301	Intermediate Microeconomics	3-4
Three credits of ECON 300-389, 400-489 courses.		3

2. College of Liberal Arts and Sciences

2.1 Minor - Economics

Courses to be included in the minimum of 15 credits are:

ECON 101	Principles of Microeconomics	3
ECON 102	Principles of Macroeconomics	3
ECON 301	Intermediate Microeconomics	3-4
Six credits of ECON 230-289, 300-389, 400-489 courses.		6

Total Credits: 120

Students in all ISU majors must complete a three-credit course in both U.S. diversity and in International Perspectives. The two courses may simultaneously meet the following graduation requirements: Social Science, Arts/Humanities, ECON 400-489, or Econ courses from approved list. Please discuss with our advisor.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. Three of the required 45 credits at the 300+ level must be earned in a general education group outside the group of your major. Econ majors must meet or complete the LAS foreign language requirement. In addition, Econ majors must earn a minimum of 15 credits from courses taught by the Department of Economics at ISU.

- a MATH 165 (Calculus I) and MATH 166 (Calculus II) may be substituted for MATH 160 and ECON 207.
- b STAT 341 (Introduction to Theory of Probability & Stats I) and STAT 342 (Introduction to Theory of Probability & Stats II) may be substituted for STAT 226 and 326.

a. Select six credits from ACCT 285 or any 300-489 ACCT, FIN, MKT, MGMT, MIS, or SCM courses.

b. Students interested in taking additional FIN courses beyond FIN 301 should take STAT 226 during the first semester of their sophomore year, and FIN 301 instead of Business Elective in the second semester of their sophomore year.

Graduate Study

The department offers work toward the degrees master of science and doctor of philosophy with majors in economics and agricultural economics. The department also offers minors to students with majors in other departments. Visit our web site at www.econ.iastate.edu (<http://www.econ.iastate.edu>).

Students do not need to have an undergraduate major in economics or agricultural economics in order to qualify for graduate work in the department. However, students must have completed undergraduate coursework in macroeconomics, microeconomics, statistics, calculus, and matrix algebra. Some background in Math courses emphasizing logic and proofs is preferred, particularly for the Ph.D.

Candidates for the degree master of science (thesis option) are required to complete satisfactorily 30 credits of acceptable graduate work, including preparation of a thesis.

Candidates for the degree master of science (non-thesis option) may fulfill requirements by satisfactorily completing 32 credits of coursework, including preparation of a creative component.

Programs of study for the doctorate are organized by each student in consultation with the major professor and the individual's committee. Subject to staffing constraints, the department offers coursework to support the following fields of concentration: applied econometrics, agricultural economics, financial economics, industrial organization, international economics, human resources, macroeconomics, and environmental and resource economics. Each student must complete advanced courses in microeconomic and macroeconomic theory, quantitative methods and econometrics, and two fields from the list above. Students must demonstrate competence in theory by passing qualifying examinations. Students must also participate in workshops.

English

Undergraduate Study

As one of the core disciplines of the liberal arts, English promotes an understanding of the way language functions and provides all students with fundamental skills needed to succeed in college, at work, and as citizens. Courses in the department foster critical thinking, leadership ability, and democratic engagement and prepare students to communicate effectively in college, in the workplace, and in public forums. Students interested in majoring in English can choose a

- BA in English (with possible emphases in Literature, Creative Writing, Literary Editing, or Rhetoric)
- BA in English with an emphasis in Teacher Education (required courses for licensure are marked below)
- BS in Technical Communication.

Students interested in a BS degree in English will need to complete 12 extra credits beyond the general education requirements; these credits must be taken in linguistics, natural science, mathematics, social science, or selected courses in kinesiology.

Those interested in civic discourse and oral communication can also major or minor in Speech Communication (see the catalog listing Speech Communication). Students in secondary education can also earn an ESL endorsement through classes in the English Department (courses are marked below).

An undergraduate major in English can be a solid basis for the professional study of law, medicine, theology, and business or careers in education, arts management, and publishing. An undergraduate major in Technical Communication can prepare students for careers in nonprofit and government communication, web design and communication consulting, software documentation, and scientific and technical writing and editing.

The department also provides communication courses for students across the disciplines through the ISUComm initiative. The goal of ISUComm is to strengthen student communication and enhance students' critical thinking by creating opportunities for them to practice communication skills throughout their academic careers. These courses include ENGL 150 and 250 (ISUComm foundation courses) and ENGL 302, 309, and 314 (ISUComm advanced communication courses). These courses benefit all ISU undergraduates by addressing written, oral, visual,

and electronic communication, or WOVE. WOVE prepares students for 21st-century communication activities.

As part of Iowa State's commitment to interdisciplinary study and cultural inclusiveness, English also has strong ties with African American Studies, American Indian Studies, Classical Studies, Latina/o Studies, Linguistics, Speech Communication, and Women's Studies. In addition to course offerings in literature, creative writing, linguistics, speech communication, rhetoric, and technical communication, the field of English Studies features strong connections with the technical, scientific, and environmental work that distinguishes Iowa State.

International students and other nonnative speakers of English can go to the Intensive English and Orientation Program (IEOP) in the department, which offers special courses in English for both undergraduate and graduate students who are native speakers of other languages. (See catalog entries under English Courses for Native Speakers of Other Languages and English Requirement for International Students.)

English Major Requirements

English majors are required to have, in addition to ISUComm foundation courses (ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition), at least 37 credits in English. English majors transferring from other institutions must take at least 18 of their credits in English while in residence at Iowa State.

To graduate with a major in the English Department, a student must earn at least a C (not a C-) in ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition as well as in each of the courses taken to fulfill the program of study. Earning at least a C in ISUComm foundation courses and in one advanced communication course also meets the departmental Communication Proficiency requirement.

* Indicates English courses or groups required for students seeking teacher licensure

Texts and Language: Choose 5		15
ENGL 207	Introduction to Creative Writing	
ENGL 220	Descriptive English Grammar	
ENGL 225	Survey of British Literature to 1800 *	
ENGL 226	Survey of British Literature since 1800 *	
ENGL 227	Survey of American Literature to 1865 *	
ENGL 228	Survey of American Literature since 1865 *	
ENGL 260	Introduction to Literary Study *	
Critical Reading and Textual Analysis: Choose 2		6
ENGL 275	Analysis of Popular Culture Texts	
ENGL 310	Rhetorical Analysis *	
ENGL 339	Literary Theory and Criticism	
ENGL 350	Rhetorical Traditions	
ENGL 396	Teaching the Reading of Young Adult Literature *	
Advanced Communication: Choose 1 *		3
ENGL 302	Business Communication	
ENGL 303	Free-Lance Writing for Popular Magazines	
ENGL 304	Creative Writing: Fiction	
ENGL 305	Creative Writing: Nonfiction	
ENGL 306	Creative Writing: Poetry	
ENGL 309	Proposal and Report Writing	
ENGL 313	Rhetorical Website Design	

ENGL 314	Technical Communication	
ENGL 315	Creative Writing: Screenplays	
ENGL 316	Creative Writing: Playwriting	

Choose 4: English Electives at the 200, 300, and 400 level (does not include ENGL 250) (Students seeking teacher licensure must take 219*, 220*, 354*, and 420*.) 12

Total Credits 36

Additional Courses: All English majors must complete the following requirements which may overlap with the core requirements:

Three credits in Women's or Multicultural Literature (340s, 352)*	3
Fifteen credits in English classes at the 300 level*	15
Nine credits in English classes at the 400 level. English Education majors need take only six credits in English classes at the 400 level.*	9
Nine credits in English classes with a historical perspective* (choose from the following or any 360s or 370s course)	9
ENGL 225 Survey of British Literature to 1800 *	
ENGL 228 Survey of American Literature since 1865 *	
ENGL 237 Survey of Film History	
ENGL 350 Rhetorical Traditions	
ENGL 353 World Literature: Western Foundations through Renaissance *	
ENGL 354 World Literature: Seventeenth Century to the Present *	
ENGL 420 History of the English Language *	

Teacher Licensure Courses

Students seeking teacher licensure in Teacher Education should consult their adviser for a complete list of courses that meet major requirements and specialized licensure requirements (see Teacher Education section in this catalog). Among those licensure requirements are the following additional courses in English:

ENGL 353	World Literature: Western Foundations through Renaissance *
ENGL 397	Practice and Theory of Teaching Writing in the Secondary Schools *
ENGL 494	Practice and Theory of Teaching Literature in the Secondary Schools *
ENGL 417	Student Teaching *

Additional course requirements outside of English for students seeking teacher licensure include the following:

C I 202	Learning Technologies in the 7-12 Classroom
C I 204	Social Foundations of Education in the United States
C I 280A	Pre-Student Teaching Experience I: Core Experience
C I 395	Content Area Reading and Literacy
C I 406	Multicultural Foundations of School and Society: Introduction
C I 426	Principles of Secondary Education
SP ED 401	Teaching Secondary Students with Exceptionalities in General Education
PSYCH 230	Developmental Psychology
PSYCH 333	Educational Psychology

HIST or POL S	American History or Government
SP CM 212	Fundamentals of Public Speaking
or	THTRE 358 Oral Interpretation

Some of these courses taken to meet licensure requirements may also meet General Education requirements for the college.

ESL Endorsement Requirements

At Iowa State University, ESL is an add-on endorsement, which means that students need to be certified in another area and to take all basic teacher preparation courses. The growing number of English learners in our public schools make the ESL endorsement a useful addition to a teaching license.

To add English as a Second Language, students must earn credits in the following courses. In some cases, relevant special topics courses or experimental courses may be substituted. Some courses have prerequisites.

ENGL 219	Introduction to Linguistics	3
OR		
ENGL 511	Introduction to Linguistic Analysis	3
ENGL 220	Descriptive English Grammar	3
OR Test Out		
ENGL 425	Second Language Learning and Teaching	3
OR		
ENGL 512	Second Language Acquisition	3
ENGL 514	Sociolinguistics	3
OR		
C I 420	Bilingualism, Bilingual Education, and U.S. Mexican Youth	3
OR		
C I 520	Bilingualism, Bilingual Education, and U.S. Mexican Youth	3
ENGL 524	Literacy: Issues and Methods for Nonnative Speakers of English	3
AND		
ENGL 518	Teaching English as a Second Language Methods and Materials	3
OR		
ENGL 525	Methods in Teaching Listening and Speaking Skills to Nonnative Speakers of English	3
Appropriate curriculum and instruction substitutes for ENGL 524 (e.g., CI 378) will be considered).		
C I 280S	Pre-Student Teaching Experience I: English as a Second Language (ESL)	1
C I 480S	Pre-Student Teaching Experience III: English as a Second Language (ESL)	2

Departmental Awards and Scholarships

Each spring the English Department offers many scholarships and awards for both undergraduate and graduate students. Some undergraduate awards are for returning English and Technical Communication majors only; others are for returning students of any major who demonstrate excellence in some aspect of English or technical communication. Application forms and a list of current awards are

available on the English Department website and in 206 Ross Hall early in the Spring Semester. Award winners are announced each year in April.

English Minor Requirements

The minor in English prepares students in any discipline for which communication activities are needed to succeed in their professions. Minors in English will complete 15 credits beyond ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition, all with a grade of C (not C-) or higher, 9 of which will be at the 300 or 400 levels. Twelve of these hours must be taken at Iowa State. Up to 6 of the 15 credits taken for the minor may be used to meet other degree program requirements.

* See English Adviser for a list of courses suited to major groups A, B, C, & D and other distributed requirements that must be met.

See English Adviser for a list of courses suited to major groups A, B, C, & D and other distributed requirements that must be met.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

Graduate Study

The department offers graduate work leading to three Master of Arts majors, one Master of Fine Arts major, two Doctor of Philosophy majors, and one TESL/TEFL Certificate. Information on application requirements and procedures for all of our graduate majors is available at <http://www.engl.iastate.edu/graduate-students/prospective-students/how-to-apply-2/>.

The Master of Arts (MA) degree programs offer advanced study of writing, language, and literature. The degree requires a minimum of 30 hours of graduate credits, including a final thesis or creative component (3 credits). Both the MA in English and the MA in TESL/ Applied Linguistics have language requirements that may be fulfilled in a number of ways (students whose native language is other than English are considered to have met the language requirement after satisfying the Graduate College English requirement).

Students admitted to the MA in English choose between two areas of specialization. The Literature specialization is designed to prepare students for a variety of career paths. These include going on for a PhD; teaching at the secondary, two- and four-year college, and university levels; and working in fields such as publishing, research and administration, or non-profit organizations. The Literature and the Teaching of Reading specialization is designed for students with a teaching license who wish to take graduate literature courses and work toward a reading endorsement by taking three reading courses in Curriculum and Instruction.

The MA in Rhetoric, Composition, and Professional Communication (RCPC) prepares students for careers in business, technical, and professional communication in the private and public sectors and for teaching writing and communication at the postsecondary level.

The MA in TESL/Applied Linguistics (TESL/AL) prepares students for careers in teaching English to nonnative speakers of English, either in the U.S. or abroad. Students with MA degrees in TESL teach adults and younger learners in a wide variety of contexts, supervise language programs, work for testing organizations, and create language teaching materials. Students admitted to the degree program can choose among optional specializations: Computer-Assisted Language Learning (CALL); Language Assessment; English for Specific Purposes (ESP); Literacy; and Literature in ESL.

The Master of Fine Arts (MFA) program in Creative Writing and Environment (CWE) cultivates in its students an interdisciplinary approach to research and writing. The program's unique design allows writers to develop a heightened environmental imagination that finds expression in quality, publishable works of fiction, nonfiction, poetry, and drama. The program is designed to prepare students for careers as writers, teachers, editors, and environmental educators. The MFA degree requires 54 hours of graduate credit: a core of creative writing courses, a book-length thesis (6 credits), experiential environmental fieldwork (3 credits), and 12 credits in disciplines other than English (such as Landscape Architecture, Anthropology, Environmental Science, among many others) relevant to an individual student's research interests and thesis project.

The Doctor of Philosophy (PhD) in Applied Linguistics and Technology (ALT) focuses on English language description, teaching, learning, and assessment with particular emphasis on issues and practices related to technology use and design. It prepares students for a variety of academic appointments in departments of applied linguistics and English and for professional opportunities in research and development foundations, international publishing enterprises, and government agencies in the U.S. and around the world where English as a second language is taught and used for specific educational, vocational, and professional purposes. Candidates are required to complete 72 hours of graduate credit including a dissertation, to meet a language requirement that may be fulfilled in a number of ways (students whose native language is other than English are considered to have met the language requirement after satisfying the Graduate College English requirement), and to pass a portfolio assessment, a preliminary examination (consisting of a dissertation proposal and pilot study and a written response to questions about the proposal or pilot study), and an oral defense of the dissertation.

The PhD in Rhetoric and Professional Communication (RPC) focuses on the rhetorical theory, history, pedagogy, and practice of written, oral, visual, and electronic communication (WOVE) in professional communities, such as business, industry, science, and government. The degree prepares graduates for academic positions in rhetoric, in multimodal composition, and in business, professional, and technical communication, as well as for work in the private and public sectors as professional communication specialists, editors, designers, and communications managers. Candidates are required to complete 72 hours of graduate credit including a dissertation and to pass a portfolio assessment, a preliminary examination (consisting of a written comprehensive examination and a special field examination), and an oral defense of the dissertation.

A Graduate Certificate in Teaching English as a Second Language/ Teaching English as a Foreign Language (TESL/TEFL) prepares students to teach English to nonnative speakers of English either in the U.S. or abroad. It offers students grounding in the linguistic understanding of English and a flexible program of study with courses in teaching methodology, language assessment, and the use of technology to address students' language needs. This 12-credit program has two prerequisites, one core requirement, and three graduate course electives. All courses are cross-listed with courses in Linguistics.

The department offers graduate students an opportunity to gain professional experience through fieldwork and internships, departmental research activities, ISUComm, the Intensive English and Orientation Program (IEOP), and the Speech Communication Program. Teaching and research assistantships are available for qualified students. Teaching assistants are responsible for teaching, with faculty supervision, ISUComm Foundation Courses, courses in public speaking, English as a Second Language (ESL), and business and technical communication. Research assistants may be assigned to faculty members engaged in research projects. One or more Pearl Hogrefe Fellowships in Creative Writing covering stipend and tuition are awarded each year to outstanding graduate students. Grannis Scholarships may be awarded to new students in the Applied Linguistics and Technology doctoral program. Freda Huncke Endowment Graduate Teaching Fellowships are awarded to select first-year students.

With prior written approval from the School of Education, students may use selected courses to meet requirements for the ESL endorsement (K-12) for teachers.

The English Department offers minors in each of our graduate programs. A graduate minor at the MA level requires 9 credits of English at the 500 or 600 level in the respective major (English, RCPC, TESL/AL). A graduate minor at the MFA level requires 12 credits of creative writing courses at the graduate level with 3 of those credits being ENGL 550 Creative Writing: Craft and Professional Practice. A graduate minor at the PhD level requires 12 credits at the 500 or 600 level in the respective major (ALT or RPC).

Environmental Science

From the College of Liberal Arts and Sciences

<http://www.ensci.iastate.edu>

Interdepartmental Undergraduate Programs

Environmental Science provides an integrated, quantitative, and interdisciplinary approach to the study of environmental systems. The magnitude and complexity of environmental problems are creating a growing need for scientists with rigorous, interdisciplinary training in environmental science. The Environmental Science program is designed to prepare students for positions of leadership in this rapidly changing discipline. Environmental Science graduates have a solid foundation in biological and physical natural sciences and the specialized training necessary for integrated analysis of environmental systems.

Undergraduate Study

The Environmental Science undergraduate major is offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Sciences. Environmental Science majors complete foundation courses in biology, chemistry, earth science, geology, physics and mathematics, plus a major consisting of an integrated core of Environmental Science courses and additional advanced course work in Environmental Science. Scientific rigor is stressed throughout the program, beginning with the foundation courses in the first two years of the curriculum. The upper level core courses emphasize a dynamic systems approach that provides a framework for integrating physical, chemical, and biological aspects of environmental systems.

Students seeking an Environmental Science major complete the following:

1. A foundation of approved supporting courses in science and mathematics including biology, chemistry, earth science, physics, calculus, and statistics.
2. 32 credits of course work in the major, including a required core of 20 credits.

A combined average grade of C or higher is required in courses applied in the major.

1. Environmental Science: 32 credits

ENSCI 110	Orientation to Environmental Science	1
ENSCI 201	Introduction to Environmental Issues	2
ENSCI 202	Exploration of Environmental and Sustainability Issues	1
ENSCI 203	Exploration of Environmental Science	1
ENSCI 250	Environmental Geography	3
ENSCI 251	Biological Processes in the Environment	3
ENSCI 381	Environmental Systems I: Introduction to Environmental Systems	3

ENSCI 382	Environmental Systems II: Analysis of Environmental Systems	3
ENSCI 384	Introduction to Ecosystems	3
Additional ENSCI choice courses		12
Total Credits		32

2. Mathematics & Statistics: 7-8 credits

Choose one of the following:		4
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	
Choose one of the following:		3-4
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
Total Credits		7-8

3. Physical & Life Sciences: 21-24 credits

BIOL 101	Introductory Biology	3
or BIOL 211	Principles of Biology I	
Choose from one of the following:		5-6
CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	
CHEM 167 & 167L	General Chemistry for Engineering Students and Laboratory in General Chemistry for Engineering	
CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	
CHEM 201 & 201L	Advanced General Chemistry and Laboratory in Advanced General Chemistry	
Choose from one of the following:		3-4
CHEM 231 & 231L	Elementary Organic Chemistry and Laboratory in Elementary Organic Chemistry	
CHEM 331 & 331L	Organic Chemistry I and Laboratory in Organic Chemistry I	
BBMB 221	Structure and Reactions in Biochemical Processes	
AGRON 259	Organic Compounds in Plants and Soils	
Choose from one of the following:		4-5
PHYS 111	General Physics	
PHYS 115	Physics for the Life Sciences	
PHYS 221	Introduction to Classical Physics I	
Choose 2 of the following:		6
AGRON 154	Fundamentals of Soil Science	
or AGRON 260	Soils and Environmental Quality	
GEOL 100	The Earth	
or GEOL 201	Geology for Engineers and Environmental Scientists	
MTEOR 206	Introduction to Weather and Climate	
BIOL 212	Principles of Biology II	
CHEM 178 & 178L	General Chemistry II and Laboratory in College Chemistry II	
Total Credits		21-24

4. Communications: 7-10 credits

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3

LIB 160	Information Literacy	1
Embedded communication coursework in ENSCI 203, 381 and 382		
Total Credits		7

Additional communication Courses required of majors in the College of Agriculture and Life Sciences

SP CM 212	Fundamentals of Public Speaking	3
or AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	
Total Credits		3

5. General Education: 15-21 credits

Additional general education requirements in the College of Agriculture and Life Sciences

Humanities	3
Social Science	3
Ethics	3
International Perspectives course from university approved list	3
US Diversity course from university approved list	3
Total Credits	15

additional general education requirements in the College of Liberal Arts and Sciences

Arts and Humanities courses from college approved list	12
Social Science courses from college approved list	9
(Select courses to include 3 cr. of International Perspectives and 3 cr. of US Diversity)	
Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level	
Total Credits	21

Electives (28-35 credits)

120.0 Total Credits

Students in all ISU majors must complete a 3 credits in U.S. diversity and a 3 credits in international perspectives. Check the Environmental Science website (<http://www.ensci.iastate.edu>) for a list of approved courses.

Minimum of 120 credits required, including a minimum of 45 credits at the 300/400 level.

- Students complete at least 2-7 credits in Environmental Science including ENSCI 110, 201, 250, 381, 382 and 15 additional credits of approved ENSCI coursework.
- Students complete at least 12 credits in arts and humanities and 9 credits in social science from approved lists. These credits can also be used to meet the U.S. Diversity and International Perspectives requirements.
- Students choose one course from the following Earth Science related courses: AGRON 151, AGRON 260, BIOL 212, GEOL 100, GEOL 201, MTEOR 206. Students choose from one of the following Organic Chemistry options: CHEM 231 & 231L, BBMB 2221, or AGRON 259.

Graduate Study

Contact information for the graduate program:

Angela B. Stone

Graduate Program Coordinator

astone@iastate.edu

515-294-1191

ensci.iastate.edu (<http://www.ensci.iastate.edu>)

The Environmental Science graduate program offers an interdepartmental curriculum leading to M.S. and Ph.D. degrees with a major in Environmental Science. Faculty from the colleges of Agriculture

and Life Sciences, Engineering, and Liberal Arts and Sciences cooperate to offer courses and research opportunities covering a broad array of environmental topics. Cooperating departments include Agricultural and Biosystems Engineering; Agronomy; Animal Science; Civil, Construction and Environmental Engineering; Ecology, Evolution and Organismal Biology; and Geological and Atmospheric Sciences.

Applicants should have completed an undergraduate or master's degree in one of the biological, chemical, physical, or engineering sciences or should have equivalent preparation.

The Environmental Science Graduate Program emphasizes fundamental concepts and research, which at the same time address major environmental issues. The curriculum is designed to provide the interdisciplinary approach needed in environmental science education and research. In addition to work in their chosen area of specialization, students are afforded a broad exposure to the biological, chemical and physical aspects of environmental systems and the specialized training necessary for integrated analysis of these systems.

Information on application procedures, curriculum requirements, and faculty research areas is available on the Environmental Science Graduate Program website (<https://enscigrad.iastate.edu/>).

Environmental Studies

Interdepartmental Undergraduate Program

Environmental Studies deals with the relationship and interactions between humans and the environment. Students in any college at ISU may elect to take a secondary major or minor in Environmental Studies. The curriculum is designed to give students an understanding of current and emerging environmental issues and an appreciation of different perspectives regarding these issues. Courses are provided for students pursuing careers related to the environment and for others who simply want to know more about environmental issues.

Secondary Major

The Environmental Studies secondary major is taken in addition to a first major and provides the breadth of preparation and integrated perspective necessary to understand environmental issues. Students seeking a major in Environmental Studies complete 24 credits of ENV S coursework including:

At least one general survey course chosen from:

ENV S 101	Environmental Geology: Earth in Crisis
ENV S 120	Introduction to Renewable Resources
ENV S 173	Environmental Biology
ENV S 201	Introduction to Environmental Issues

At least one integrative/issues course chosen from:

ENV S 160	Water Resources of the World
ENV S 204	Biodiversity
ENV S 324	Energy and the Environment
ENV S 342	World Food Issues: Past and Present
ENV S 404	Global Change
ENV S 424	Sustainable and Environmental Horticulture Systems
ENV S 450	Issues in Sustainable Agriculture

At least two human/societal perspectives courses chosen from:

ENV S 293	Environmental Planning
-----------	------------------------

ENV S 320	Ecofeminism
ENV S 334	Environmental Ethics
ENV S 345	Population and Society
ENV S 355	Literature and the Environment
ENV S 380	Environmental and Resource Economics
ENV S 382	Environmental Sociology
ENV S 383	Environmental Politics and Policies
ENV S 384	Religion and Ecology
ENV S 442	The Policy and Politics of Coastal Areas
ENV S 472	U. S. Environmental History
ENV S 484	Sustainable Communities
ENV S 491	Environmental Law and Planning

Beyond these three requirements, any Environmental Studies course and up to six credits of approved environmental coursework outside of Environmental Studies may be applied toward the 24 credit total for the major. Regardless of their home college, Environmental Studies majors must complete at least 9 credits of approved coursework in natural science. Unless prohibited by program or college rules, courses used to fulfill requirements of the Environmental Studies major may also be used to satisfy general education and other requirements of departments and colleges. A combined average grade of C or higher is required in courses applied to the major.

Minor

Students seeking a minor in Environmental Studies complete 15 credits of approved Environmental Studies coursework including:

At least one general survey course chosen from:

ENV S 101	Environmental Geology: Earth in Crisis
ENV S 120	Introduction to Renewable Resources
ENV S 173	Environmental Biology
ENV S 201	Introduction to Environmental Issues

At least one integrative/issues course chosen from:

ENV S 160	Water Resources of the World
ENV S 204	Biodiversity
ENV S 324	Energy and the Environment
ENV S 342	World Food Issues: Past and Present
ENV S 404	Global Change
ENV S 424	Sustainable and Environmental Horticulture Systems
ENV S 450	Issues in Sustainable Agriculture

At least two human/societal perspectives courses chosen from:

ENV S 293	Environmental Planning
ENV S 320	Ecofeminism
ENV S 334	Environmental Ethics
ENV S 345	Population and Society
ENV S 355	Literature and the Environment
ENV S 380	Environmental and Resource Economics
ENV S 382	Environmental Sociology
ENV S 384	Religion and Ecology
ENV S 442	The Policy and Politics of Coastal Areas
ENV S 472	U. S. Environmental History
ENV S 484	Sustainable Communities
ENV S 491	Environmental Law and Planning

A combined average grade of C or higher is required in courses applied to the minor, and the minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Genetics

Alan M. Myers, Chair, Genetics Major Committee

Genetics is the scientific study of heredity. Understanding the basis of heredity is fundamental to all aspects of the life sciences, from the most basic molecular study to applied studies of agricultural species. At Iowa State University the study of the life sciences is interdepartmental, involving faculty in the basic, agricultural, and veterinary sciences. Faculty in 20 different departments are involved in genetics research. This large group of faculty presents a broad range of possibilities for students to learn from faculty who are at the forefront of research in many areas of genetics.

Undergraduate Study

Undergraduate study in genetics is jointly administered by three departments: the Roy J. Carver Department of Biochemistry, Biophysics, and Molecular Biology; the Department of Genetics, Development, and Cell Biology; and the Department of Ecology, Evolution, and Organismal Biology. Undergraduate degrees are offered through both the College of Agriculture and Life Sciences and the College of Liberal Arts and Science. Programs of study for genetics majors leading to a B.S. degree are available.

Training in genetics may lead to employment in teaching, research, or a variety of health-related professions. Although some students find employment directly after their baccalaureate training, many students continue their education in graduate or professional programs. Students with the B.S. degree may find employment in the biotechnology, health, or food industries. Recent graduates have also developed careers in conservation biology, technical writing, science journalism, technical sales, and business.

The required course work and associated electives provide students with the foundation in basic life sciences, mathematics, chemistry, and physics that is essential for professions involving modern biological/biomedical sciences. As part of these courses students develop skills in problem solving, critical thinking, writing, and research-related activities in the biological sciences.

Specific entrance requirements for medical and health-related professions are established by the professional schools. Students interested in fulfilling pre-professional requirements for such professions as dentistry, human medicine, genetic counseling, optometry, pharmacy, physical therapy, physicians assistant, and veterinary medicine can major in genetics while fulfilling the pre-professional requirements.

Curriculum in Genetics - Requirements

Total Degree Requirement: 120 cr.

A maximum of 65 cr. from a two-year institution can be applied that may include up to 16 technical cr.; up to 9 Pass-Not Pass cr. of free electives can be applied; a cumulative GPA of at least 2.0 is required for graduation. Program-approved lists can be found on the Genetics website.

1. Genetics and Life Sciences

A grade of C– or better is required in all Genetics and Life Science courses.

A. Courses required of all Genetics majors

GEN 110	Genetics Orientation	1
BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1
GEN 313	Principles of Genetics	3
GEN 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
BIOL 315	Biological Evolution	3
One of the following:		
GEN 349	The Genome Perspective in Biology	
GEN 444	Bioinformatic Analysis	
GEN 322	Introduction to Bioinformatics and Computational Biology	
GEN 409	Molecular Genetics	3
GEN 410	Analytical Genetics	3
One of the following:		
GEN 462	Evolutionary Genetics	
EEOB 561	Evolutionary and Ecological Genomics	
EEOB 563	Molecular Phylogenetics	
GEN 491	Undergraduate Seminar	1
MICRO 302	Biology of Microorganisms	3
Total Credits		29

B. Course required of majors in the College of Agriculture and Life Sciences only

A minimum of 3 cr. of coursework in the area of environmental science from program approved list	3
Total Credits	3

2. Advanced Sciences Electives: 6 cr. from program approved list

A grade of C- or better is required in each course. No more than 3 cr. of GEN 490, 490R, 490H, 492, 496, 499, or 499H may be used to meet this requirement.

3. Mathematical Sciences

Complete at least one calculus course from MATH, minimum of 4 credits.	4	
MATH 160	Survey of Calculus	
MATH 165	Calculus I	
MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	
Complete at least one course from STAT, minimum of 3 credits.	3-4	
STAT 101	Principles of Statistics	
STAT 104	Introduction to Statistics	
Complete at least one additional course from MATH or STAT, minimum of 4 credits.	4	
MATH 166	Calculus II	

MATH 182	Calculus and Mathematical Modeling for the Life Sciences II	
STAT 301	Intermediate Statistical Concepts and Methods	
STAT 401	Statistical Methods for Research Workers	

Total Credits 11-12

4. Supporting Sciences

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 178L	Laboratory in College Chemistry II	1
CHEM 331	Organic Chemistry I	3
CHEM 331L	Laboratory in Organic Chemistry I	1
CHEM 332	Organic Chemistry II	3
CHEM 332L	Laboratory in Organic Chemistry II	1
PHYS 111	General Physics	5
or PHYS 221	Introduction to Classical Physics I	
PHYS 112	General Physics	5
or PHYS 222	Introduction to Classical Physics II	
Choose one of the following options		6-7

Option 1

BBMB 404	Biochemistry I	
And one of the following:		
BBMB 405	Biochemistry II	
BBMB 411	Techniques in Biochemical Research	
CHEM 211 & 211L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	
CHEM 325	Chemical Thermodynamics	

Option 2

BBMB 420	Mammalian Biochemistry	
And one of the following:		
BBMB 411	Techniques in Biochemical Research	
CHEM 211 & 211L	Quantitative and Environmental Analysis and Quantitative and Environmental Analysis Laboratory	
CHEM 325	Chemical Thermodynamics	

Total Credits 33-34

5. International Perspectives: 3 cr. from university approved list

This course can satisfy **both** the university requirement for International Perspectives and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

6. U.S. Diversity: 3 cr. from university approved list

This course can satisfy **both** the university requirement for U.S. Diversity and the college requirement for a General Education elective (item 8) if the selection appears on both lists of approved courses.

7. Communications/Library

A. Courses required of all Genetics majors

Grades of C or better are required in ENGL 150 and ENGL 250 and advanced writing.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
LIB 160	Information Literacy	1
One advanced English writing course from program approved list		3

Total Credits 10

B. Course required of majors in the College of Agriculture and Life Sciences only.

A grade of C or better is required by the college.

SP CM 212	Fundamentals of Public Speaking	3
or AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	

Total Credits 3

8. General Education electives

Courses from college approved lists that also appear on university approved lists of U.S. Diversity or International Perspectives courses can be used to satisfy both requirements.

A. College of Agriculture and Life Sciences

Humanities course from college approved list	3
Social Science course from college approved list	3
Ethics course from college approved list	3

Total Credits 9

B. College of Liberal Arts and Sciences

Humanities courses from college approved list; one of these should be a Science/Humanities bridge course from program approved list

Social Science courses from college approved list 9

Students must have completed 3 years of a single world language in high school or take 4-8 credits of World Languages at the university level.

Total Credits 21

Undergraduate Minor

The minor in Genetics may be earned by completing the following courses. At least 9 cr. must be used **only** to fulfill the requirements of the minor and not be applied to any other major, college, or university requirement.

GEN 313	Principles of Genetics	3
GEN 313L	Genetics Laboratory	1
BIOL 314	Principles of Molecular Cell Biology	3
GEN 410	Analytical Genetics	3
GEN 409	Molecular Genetics	3
Two or more additional credits in Genetics at the 300 level or above.		2

Total Credits 15

Genetics, B.S.

Geology

The department offers courses in geology and meteorology. Majors can be earned in earth science (B.A., B.S.), geology (B.S.), and meteorology (B.S.). Candidates for all degrees must satisfy the requirements established by the College of Liberal Arts and Sciences (see Liberal Arts and Sciences, Curriculum). In addition, the department has requirements for each major. A minimum of 120 credits are required.

The bachelor of science in Geology prepares the student for a professional career and/or graduate study in the geological sciences. Students selecting geology as a major will elect an option in traditional geology or environmental geology/hydrogeology. The traditional option prepares a student for employment in state and U.S. geological surveys, mineral and petroleum exploration, and graduate study in most aspects of geology. Required courses in this option include:

GEOL 100	The Earth	3
GEOL 100L	The Earth: Laboratory	1
GEOL 102	History of the Earth	3
GEOL 102L	History of the Earth: Laboratory	1
GEOL 302	Summer Field Studies	6
GEOL 315	Mineralogy and Earth Materials	3
GEOL 315L	Laboratory in Mineralogy and Earth Materials	1
GEOL 316	Optical Mineralogy	2
GEOL 356	Structural Geology	5
GEOL 365	Igneous and Metamorphic Petrology	3
GEOL 368	Sedimentary Geology	4
GEOL 479	Surficial Processes	3
And 9 credits of geology electives		9
Total Credits		44

The environmental geology/hydrogeology option prepares a student for employment in environmental consulting, state and U.S. geological surveys, regulatory agencies, and graduate study in the environmental aspects of geology. Required courses in this option include:

GEOL 100	The Earth	3
GEOL 100L	The Earth: Laboratory	1
GEOL 102	History of the Earth	3
GEOL 102L	History of the Earth: Laboratory	1
GEOL 302	Summer Field Studies	6
GEOL 315	Mineralogy and Earth Materials	3
GEOL 315L	Laboratory in Mineralogy and Earth Materials	1
GEOL 316	Optical Mineralogy	2

GEOL 356	Structural Geology	5
GEOL 368	Sedimentary Geology	4
GEOL 411	Hydrogeology	4
One of the following		3
GEOL 419	Environmental Geochemistry	
GEOL 426	Stable Isotopes in the Environment	
GEOL 479	Surficial Processes	3
And 6 credits of geology electives		6
Total Credits		45

Required supporting courses include:

CHEM 177	General Chemistry I	4
CHEM 177L	Laboratory in General Chemistry I	1
CHEM 178	General Chemistry II	3
CHEM 178L	Laboratory in College Chemistry II	1
PHYS 111	General Physics	5
PHYS 112	General Physics	5
One of the following		4
MATH 165	Calculus I	
MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	
One of the following		4
MATH 166	Calculus II	
MATH 182	Calculus and Mathematical Modeling for the Life Sciences II	
And 6 additional credits from an approved departmental list of courses in the science, engineering, or mathematical disciplines outside of geology		6
Total Credits		33

No more than 9 credits in 490 may be counted toward a degree in Geology.

Graduates work to understand natural processes on Earth and other planets. They are able to apply their knowledge of forces and factors that shape the Earth to reconstruct the past and anticipate the future. Graduates provide essential information for solving problems for resource management, environmental protection, and public health, safety, and welfare. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators. Graduates are able to integrate field and laboratory data and to prepare reports. They are able to make presentations that include maps and diagrams that illustrate the results of their studies.

Communication Proficiency requirement: The department requires a grade of C or better in:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
One of the following:		3
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
ENGL 302	Business Communication	

JL MC 347 Science Communication

Total Credits **9**

Minor - Geology

A minor in Geology may be earned by taking 15 credits of geology coursework, including:

3 credits:

GEOL 100 & 100L	The Earth and The Earth: Laboratory	3-4
or GEOL 201	Geology for Engineers and Environmental Scientists	
GEOL 102	History of the Earth	3
GEOL 102L	History of the Earth: Laboratory	1

The remainder should be at the 300 level or above.

12		15

Total Credits: 124-127

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. At least 8 credits in the major from 300+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher. You must also complete the LAS foreign-language requirement.

¹ Choose from list of approved courses available from an adviser or the departmental office.

Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. At least 8 credits in the major from 300+ courses must earn grade C or better. The average grade of all courses in the major must be 2.0 or higher. You must also complete the LAS foreign-language requirement.

¹ Choose from list of approved courses available from an adviser or the departmental office.

Graduate Study

The department offers programs leading to the master of science and doctor of philosophy with majors in Earth Science, Geology, and Meteorology. Program options are available for the M.S. and Ph.D. degrees in earth science leading to careers in teaching. The department also cooperates in the interdepartmental major in Water Resources (see Index). Students desiring a major in the above fields normally will have a strong undergraduate background in the physical and mathematical sciences. Individuals desiring to enter a graduate program are evaluated by considering their undergraduate background and performance and their expressed goals.

Programs of study are designed on an individual basis in accordance with requirements of the Graduate College and established requirements for each departmental major. Additional coursework is normally taken in aerospace engineering, agronomy (soil science), chemistry, civil and construction engineering, computer engineering, computer science, engineering mechanics, materials engineering, mathematics, mechanical engineering, microbiology, physics, or statistics. Departmental requirements provide a strong, broad background in the major and allow considerable flexibility in the program of each individual.

A dissertation is required of all Ph.D. candidates.

M.S. students in Geology are required to complete a thesis. The M.S. in Earth Science is available to students electing the non-thesis (Creative Component) option in Geology or Meteorology. A non-thesis option is also offered for the M.S. degree in Meteorology.

Graduates in Geology specialize in a subdiscipline, but they comprehend and can communicate the basic principles of geology and supporting sciences. They possess the capacity for critical and independent thinking. They are able to write a fundable research proposal, evaluate current relevant literature, carry out the proposed research, and communicate the results of their research to peers at national meetings and to the general public. They work as consultants on engineering and environmental problems, explorers for new minerals and hydrocarbon resources, researchers, teachers, writers, editors, and museum curators.

Course requirements for the MS degree include MTEOR 542, 543, 507 or 518, 552 or 516x, and 502 or 504 or 505 or 605. In addition to the 5 required courses from this list, students must take at least 3 more credits of graduate course work in Meteorology, Agricultural Meteorology, or a field related to their research interests (students will work closely with their POS committee to determine the exact amount of structured course work required – typically this is 18-21 credits). Students without prior synoptic meteorology course work must complete MTEOR 511 and may substitute these credits in place of the required MTEOR 507 or 518 courses.

Graduates in Meteorology have a good comprehension of basic principles, a capacity for critical and independent thought and an ability to communicate effectively with scientific colleagues. They have an appropriate breadth in their understanding of meteorology with a suitable specialization. Graduates are able to undertake thorough research and explain the results in a scientifically reasonable fashion.

History

The History department offers courses leading to the B.A. and B.S. degrees in history, an M.A. in History, and a Ph.D. in Rural, Agricultural, Technological and Environmental History.

The department offers a variety of survey courses (200 series) for first- and second-year students as either general education courses or as introductions to advanced courses in history or other subject areas. In addition to 200-level survey courses, it offers advanced undergraduate courses in the history of Europe, Asia, Africa, Latin America, the United States, technology and science, agriculture, and other selected topics.

The History Major

For a description of the undergraduate curriculum with a major in History see Liberal Arts and Sciences, Curriculum. History majors may earn either a bachelor of arts or bachelor of science degree. The minimum required for a major in history is 37 credits, including HIST 195 and HIST 495. At least 24 credits of HIST must be in courses numbered 300 or above. Students may take a maximum of 12 credits at the 200-level, a maximum of 15 credits at the 300-level, and must take a minimum of 12 credits at the 400-level or above. A minimum of 15 credits of HIST numbered 300 or above must be taken in residence at Iowa State. The department will accept a maximum of 6 credits of cross-listed courses originating in another teaching department toward the major degree. Candidates for the B.A. must complete two years of university-level study in one foreign language or the equivalent.

Objectives for History Majors

1. Display the appropriate level of cognitive knowledge of historical themes and events based upon the student's course of study
2. Display an understanding of past cultures and social organizations, based on the course of study
3. Develop the fundamental methodological skills of the historical craft:- The ability to contextualize and analyze primary source evidence.- Familiarity with the concepts of historical argument and interpretation, and the ability to formulate effective argumentation in written and oral forms.- Awareness of the basic historiography in selected research area.- The ability to conduct research and to write a historical essay based upon primary and secondary source research. Students receive an introduction to these concepts in HIST 195 Introduction to History.
4. Display a sophisticated understanding of the relationship between past events and the present. For purposes of outcomes assessment, all History majors must complete three credits of HIST 495 Historiography and Research Writing or, if qualified and willing, one graduate level writing/research seminar.

Communication Proficiency requirement: History majors must receive a grade of C or better in each of ENGL 150 and ENGL 250 (or ENGL 250H), and HIST 495 or any graduate seminar.

For a description of the major in History as preparation for professional programs, see Preprofessional Study. Many history majors also pursue a minor in another discipline, a second major, or teacher certification.

Total Credits: 120

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. For a history major, 15 credits of history at the 300/400 level must be taken at ISU. You must also complete the LAS foreign language requirement.

The BA in History requires the equivalent of 2 years of college-level study in the same foreign language. Six credits of electives may be replaced by 6 additional credits of foreign language.

Students seeking teacher certification should contact the History Department directly for the latest information on specific course work required for certification by the State of Iowa. Course work in addition to the degree minimums may be required.

Minor

The department offers a minor in History, which may be earned with 15 credits in History courses, of which at least 9 must be in courses numbered 300 or above, excluding HIST 490 Independent Study. A minimum of 9 credits numbered 300 or above must be taken at Iowa State. The College of Liberal Arts and Sciences requires students to earn a C or higher in at least 6 of the required 300-level credits. A student may count a maximum of 3 hours of cross-listed courses originating in another teaching department toward the minor in History. The History minor is most frequently chosen by students majoring in Political Science, English, Journalism, Computer Science, and Business.

Graduate Study

The History Department offers two graduate degrees: a M.A. in History and a Ph.D. in Rural, Agricultural, Technological and Environmental History.

Most history graduate courses are either proseminars or seminars. Proseminars acquaint students with the historical literature of a field and prepare them for careers in teaching and research. Seminars require students to conduct original historical research and to write research papers reporting the results.

The M.A. in history includes three options. See the departmental website on the M.A. in History for a full discussion of the options and requirements. An M.A. in History serves as the basis for continued study in history, as well as preparation for careers in law, education, business, and government service. Throughout world history human beings have depended on rural and agricultural communities as well as on the technologies developed and employed by these communities to sustain lives. Iowa State's Doctoral Program in Rural, Agricultural, Technological and Environmental History offers a scholarly community and learning environment dedicated to the close examination of pervasive and enduring questions about these basic aspects of human history. Such questions can best be answered through the multi-faceted perspectives provided by rural, agricultural, technological, and environmental history. The result is a dynamic learning experience that leads to comparative and transnational analysis shaped by a broad range of methods drawn from the humanities and social/physical sciences. The Program's aim is to produce students who are excellent researchers and engaging teachers, capable of succeeding in a broad variety of professional positions, both inside and outside of academia.

The Ph.D. in Rural, Agricultural, Technological and Environmental History is designed for students who have completed an M.A. in history. Those who have not yet completed an M.A. will be expected to complete the degree while progressing toward the Ph.D. Thirty semester hours of graduate credit are required for the M.A. and 72 for the Ph.D. Students who continue beyond the M.A. are expected to pass preliminary examinations in four areas of specialization, complete a dissertation, and defend it orally in the Ph.D. final examination. See the departmental website on the program for a full description of requirements.

Interdisciplinary Studies

Interdepartmental Undergraduate Major Administered by the College of Liberal Arts and Sciences

A major in interdisciplinary studies is offered in the College of Liberal Arts and Sciences for undergraduate students who have unique interdisciplinary educational goals. The student, a faculty review board, and an academic adviser design the major. Leading to either the Bachelor of Arts or the Bachelor of Science degree, the major includes 36 to 48 credits of coursework chosen to provide a coherent, carefully planned program in an area of interest that bridges two or more departments. This specialized area is identified on the diploma. Learning goals are individually crafted for each proposed major.

A degree in Interdisciplinary Studies may be particularly attractive to students who wish to develop an area of interest based upon one of the College's cross-disciplinary programs. Areas of interest in Interdisciplinary Studies have included Classical Studies, Criminology

and Criminal Justice, International Relations, Ecology Studies, African American Cultural Studies, Asian Studies, and U.S. Latino/a Studies.

A student seeking admission to the program in interdisciplinary studies writes a letter of application that explains how the proposed major meets specific educational and learning goals. A faculty review board screens applications. Since students are expected to earn at least 30 credits after they are admitted into the program, the proposal is ordinarily submitted to the review board in the sophomore or junior year. The proposal will be considered if the area of interest properly falls within the College of Liberal Arts and Sciences and if the student's educational goals cannot be met by a more traditional combination of existing majors, minors, and electives.

The interdisciplinary studies major must satisfy the requirements of the liberal arts and sciences curriculum in the College of Liberal Arts and Sciences. A major emphasizing the humanities or communicative arts normally leads to a B.A.; a major emphasizing the natural or social sciences normally leads to a B.S. Different requirements for the B.A. and B.S. degrees are determined by the nature of the chosen field of study. Courses listed in the individualized major may come from any department of the university with the following restrictions:

1. The selection of courses needs to focus on a single theme and be consistent with the career and educational goals of the student.
2. At least one half of the courses in the major will come from departments within the College of Liberal Arts and Sciences.
3. The courses will be chosen from at least two disciplines.

All courses in the major must be at the 200-level or higher. At least 15 credits must be at the 300-level or higher with at least 6 credits at the 400-level or higher. An average grade of C or better must be earned in 15 credits at the 300-level or higher in the major. To meet the English and communication proficiency requirement, a grade of C or better must be earned in either an advanced English composition course or a course in the major with a significant writing component.

Further information may be obtained from the college office.

International Studies

Interdepartmental Undergraduate Major and Minor, Administered by the College of Liberal Arts and Sciences

Through a combination of coursework and study abroad, students who complete a secondary major or minor in International Studies can prepare for careers or advanced study in the international arena, such as foreign service, journalism, advocacy organizations, scientific or research institutions, business, nongovernmental development organizations (NGOs), humanitarian agencies, environmental organizations, human rights organizations, think tanks, international agriculture, and engineering. Students in International Studies gain an understanding of global issues, learn to communicate across cultures, and develop awareness of cultural ideas and attitudes.

A secondary major and a minor in International Studies are available for undergraduates. The program requirements are structured around a combination of a designated Topical Module and a Geographic Region, both selected by the student. Each student's program of study is designed to reflect opportunities at Iowa State University as well as the academic, intellectual, and professional interests of the student.

Secondary Major

A student seeking a secondary major in International Studies must successfully complete two core courses plus courses in a selected Geographic Region and Topical Module; demonstrate proficiency in a language relevant to the selected geographic region (see below); and participate in a required study, service, or work abroad program (see below).

Requirements for the Secondary Major in International Studies:

- INTST 235 Introduction to International Studies
- INTST 430 Seminar in International Studies
- 9 credits of coursework (at least 6 of which are numbered 300 or above) from one of the following Geographic Regions:
 - Africa and the Middle East
 - Asia
 - Latin America
 - Western Europe
 - Russia, East Europe and Central Asia
- 9 credits of coursework (at least 6 of which are numbered 300 or above) from one of the following Topical Modules:
 - Global Environmental Issues
 - Globalization and Economic Development
 - International Issues in Science and Technology
 - International Communication
 - International Conflict
 - Social and Cultural Change

Click here (<https://iastate.box.com/shared/static/2egqdg6k8da0qiipayf.pdf>) **for courses approved for credit for the Geographic Regions and Topical Modules.**

- 3 additional credits of coursework selected from either the Geographic Region or Topical Module.
- Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 202 level (or higher) of the language or by passing an approved exam.
- Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable Iowa State.

The major must include a minimum of 12 credits not used to meet any other department, college, or university requirement.

Minor

A student seeking a minor in International Studies must successfully complete two core courses plus courses in a selected Geographical Region and Topical Module; demonstrate proficiency in a language relevant to the selected geographic region (see below); and participate in a required study, service, or work abroad program (see below).

Requirements for the Minor in International Studies:

- INTST 235 Introduction to International Studies
- INTST 430 Seminar in International Studies
- 6 credits of coursework (at least 3 of which are numbered 300 or above) from one of the following Geographic Regions:
 - Africa and the Middle East
 - Asia
 - Latin America

- Western Europe
- Russia, East Europe and Central Asia
- 6 credits of coursework (at least 3 of which are numbered 300 or above) from one of the following Topical Modules:
 - Global Environmental Issues
 - Globalization and Economic Development
 - International Issues in Science and Technology
 - International Communication
 - International Conflict
 - Social and Cultural Change
- Proficiency in a world language that is relevant to the selected geographic region. This can be achieved by completing the 202 level (or higher) of the language or by passing an approved exam.
- Study, service, or internship abroad for a minimum of 3 weeks, earning a minimum of 3 credits. The credits must be transferable Iowa State.

Click here (<https://iastate.box.com/shared/static/2egqdg6k8da0qiipayf.pdf>) **for courses approved for credit for the Geographic Regions and Topical Modules.**

The minor must include a minimum of 9 credits not used to meet any other department, college, or university requirement.

Language Proficiency

Students with a major or minor in International Studies fulfill the Language Proficiency requirement through one of the following options:

- Completion of two years of university-level language instruction in a single world language that is relevant to the selected geographic region, as demonstrated by completion of a foreign language course numbered 202 or higher. Students whose first language is not English must still meet this requirement if their first language is not relevant to their selected geographic region.
- Passing an examination given by the Department of World Languages and Cultures or otherwise certifying proficiency equivalent to two years of college-level study. Students proficient in languages not offered at ISU may petition for special consideration.
- Intensive study abroad experience that includes in-the-field-use of a language other than English. Individual prior approval of the International Studies Director is required for this option.

Study/Service/Work Abroad Experience

Students with a major or minor in International Studies are required to complete an international experience (study, service, or internship) of a minimum of three weeks in duration. Longer experiences are recommended but not required. Up to 12 credits of coursework taken abroad can be applied to the major if it is approved by the International Studies Program Director.

Journalism and Mass Communication

The journalism and mass communication major prepares students for careers that involve all aspects of news and information. Emphasis is placed on generating ideas, organizing, writing, editing and presenting information for various media platforms and audiences. Students work with advisers to develop a program of study that prepares them for work in communication-specific areas including broadcast media, magazines

and/or newspapers, photo journalism, science communication or visual communication and online/multimedia.

To receive a bachelor of science degree in journalism and mass communication, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, P R, or JL MC. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level or above. Journalism and mass communication majors are required to take:

STAT 101	Principles of Statistics (or another approved statistics course)	4
----------	--	---

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in JL MC, ADVRT, and P R. These include:

JL MC 101	Mass Media and Society	3
JL MC 110	Orientation to Journalism and Communication	1
JL MC 201	Reporting and Writing for the Mass Media	3
One of the following two courses:		3
JL MC 202	Intermediate Reporting and Writing for the Mass Media	
JL MC 206	Reporting and Writing for the Electronic Media	
JL MC 460	Law of Mass Communication	3
JL MC 462	Media Ethics, Freedom, Responsibility	3
JL MC 499A	Professional Media Internship: Required	3

Additional recommended courses and requirements for the journalism and mass communication major are available from the Greenlee School.

Students taking one major at the school may not seek a second major or a minor in the school. All Greenlee School majors are required to take a second major or minor outside the school as an area of expertise. All Greenlee School majors are required to take 499A.

Minor in Journalism and Mass Communication

Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in journalism and mass communication, students complete 15 credits.

JL MC 101	Mass Media and Society	3
JL MC 242	Visual Principles for Mass Communicators	3
9 credits from the following:		9
JL MC 341	Contemporary Magazine Publishing	
JL MC 347	Science Communication	
JL MC 401	Mass Communication Theory	
JL MC 406	Media Management	
JL MC 453	Electronic Media Technology and Public Policy	
JL MC 454	Critical Analysis and History of the Moving Image	
JL MC 461	History of American Journalism	
JL MC 464	Journalism and Literature	
JL MC 474	Communication Technology and Social Change	
JL MC 476	World Communication Systems	

JL MC 477	Ethnicity, Gender, Class and the Media
JL MC 497	Special Topics in Communication

Total Credits 15

Total Credits: 121

* For 300 and 400-level choices, please choose from the list of selected courses available from an academic adviser. You may schedule an appointment with an adviser by either calling 515-294-4342 or visiting with Greenlee School office staff at 101 Hamilton Hall.

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses:(U.S. Diversity) <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses> and (International

Perspectives) <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current> .

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS Foreign Language requirement and any unmet ISU admission requirements.

Minor or Second Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or a second major outside of the Greenlee School of Journalism and Communication.

Graduate Study

The Greenlee School of Journalism and Communication offers work for a master of science degree in journalism and mass communication.

Majors plan a program of study in one of two tracks:

I. Academic track -- The School offers advanced academic preparation in communication theory and research, leading to the master of science degree. Graduate work prepares students to use and contribute to research and scholarship in the field of communication. This track

requires a thesis based on original research, which must be defended successfully before a committee at the end of the program.

Areas of research emphasis include: science and risk communication, media effects, advertising, public relations, political communication, communication technology, law and ethics, international communication, visual communication and emerging media.

II. Professional track -- The School offers advanced professional study in journalism and mass communication leading to the master of science degree. Graduate work prepares students for professional careers in a variety of mass communication fields. Students with limited training or experience in journalism and mass communication may include skills courses in their programs, but the credits for those courses may not count toward the graduate degree. This track requires either a creative component which must be defended successfully before a committee at the end of the program.

All students must complete four core courses:

JL MC 592	Introduction to Graduate Study in Journalism and Mass Communication	R
JL MC 501	Theories of Mass Communication	3
JL MC 502	Communication Research Methods	4
JL MC 598	Seminars in Mass Communication	1-3

Each student selects elective courses based on his/her area of emphasis and career goal, in consultation with the student's major professor and Program of Study Committee.

The Greenlee School graduate program offers minor work for students majoring in other departments. The M.S. minor requires:

JL MC 501, JL MC 510 and one other course in journalism and mass communication for a total of 9 credits taken within the Greenlee School.

Leadership Studies

The Leadership Studies Program provides a strong foundation of coursework and experiences for undergraduate students who seek to study, understand and apply the principles of leadership in their current activities and, eventually, in their careers. Complementing their major field of study, students earning either the certificate or minor in leadership studies will be well-prepared to enter the public, nonprofit or private sectors. The certificate and minor are awarded by the College of Liberal Arts and Sciences. Completion of the certificate or minor will be noted on the student's transcript.

Objectives

- Develop students' leadership capacity—which encompasses individual-level capabilities of self-awareness, integrity and commitment; group-level capabilities of collaboration, shared purpose and handling controversy with civility; and community-level capabilities of citizenship and civic responsibility.
- Provide opportunities for students to study leadership by learning effective communication practices, organizational theories, ethical principles, an appreciation of diversity, intrapersonal development and the value of community service.
- Cultivate students' understanding of social empowerment and social justice to create positive and sustainable change.
- Challenge students to critically examine leadership at the intrapersonal, interpersonal, team, organizational and societal levels.

- Bring students into contact with community leaders and faculty members from diverse academic departments, backgrounds and leadership experiences.
- Prepare students to undertake leadership roles in their careers and in service to their community through coursework and co-curricular engagement.

Learning Outcomes

Upon completion of the certificate or minor in leadership studies, students will be able to:

- Recognize leadership as a set of skills, knowledge and attitudes that can be learned.
- Understand traditional and emergent leadership theories and apply them in practice.
- Comprehend key concepts of communication theories, organizational theories, contemporary diversity issues and ethical principles.
- Practice and evaluate their own capacity to lead effectively within teams, organizations and diverse communities.
- Develop and implement plans for continually improving their leadership capacity.
- Demonstrate proficiencies in written and oral communication.

Leadership Studies Certificate

The certificate in leadership studies requires the completion of 21 credit hours through three, 3-credit-hour required courses in leadership, speech communication and organizational theory. An additional 12 credit hours are earned from approved electives including 3 hours in communication; 6 hours in leadership; and 3 hours of a capstone experience through a course, internship or study abroad. The capstone course should focus on the scholarship of leadership in the student's field of study whereas an internship or study abroad should provide a leadership-in-practice experience.

At least 9 credits must be taken in courses numbered at the 300-level or above. At least 9 credits used for the certificate cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses for the certificate cannot be taken on a pass/not-pass basis. A cumulative grade point average of at least 2.0 is required in courses taken for the certificate.

Core Courses: 9 credits of required core courses

LD ST 322	Leadership Styles and Strategies in a Diverse Society	3
SP CM 312	Business and Professional Speaking	3
MGMT 371	Organizational Behavior	3
or POL S 371	Introduction to Public Administration	

Communication Electives: Choose 3 credits from the following

COMST 214	Professional Communication	3
COMST 310	Intercultural Communication	3
COMST 314	Organizational Communication	3
ENGL 302	Business Communication	3
ENGL 309	Proposal and Report Writing	3
P R 305	Publicity Methods	3

SP CM 212	Fundamentals of Public Speaking	3
SP CM 322	Argumentation, Debate, and Critical Thinking	3

M E/WLC 484	Technology, Globalization and Culture	3
POL S 475	Management in the Public Sector	3
PSYCH 450	Industrial Psychology	3
SOC 464	Strategies for Community Engagement	3
W S 491	Senior Internship	3

Leadership Studies Minor

The minor in leadership studies requires the completion of 15 credit hours through three, 3-credit-hour required courses in leadership, speech communication and organizational theory. An additional 6 credit hours are earned from approved leadership electives.

At least 9 credits must be taken in courses numbered at the 300-level or above. At least 9 credits used for the minor cannot be used to meet any other department, college or university requirement for the baccalaureate degree except to satisfy the total credit requirement for graduation and to meet credit requirements in courses numbered 300 or above. Courses for the minor cannot be taken on a pass/not-pass basis. A cumulative grade point average of at least 2.0 is required in courses taken for the minor.

Core Courses: 9 required credits

LD ST 322	Leadership Styles and Strategies in a Diverse Society	3
SP CM 312	Business and Professional Speaking	3
MGMT 371	Organizational Behavior	3

Leadership Electives: Choose 6 credits from the following

AESHM 211	Leadership Experiences and Development (LEAD)	3
AESHM 379	Community Leadership: Examination of Social Issues	3
AESHM 421	Developing Global Leadership: Maximizing Human Potential	3

For more information, contact the Carrie Chapman Catt Center for Women and Politics, 309 Catt Hall, 515-294-3181, leadprgm@iastate.edu (cattcntr@iastate.edu), or visit <https://leadership.las.iastate.edu>.

Liberal Studies

The bachelor of liberal studies degree (B.L.S.) was established by the three Iowa Regent universities to meet the needs of Iowans who want to earn a college degree but whose circumstances present obstacles to completing a traditional on-campus degree program. The degree may be earned from Iowa State University, the University of Iowa, or the University of Northern Iowa.

The B.L.S. is a general studies degree in the liberal arts. There is no traditional major. Instead, students take coursework in three areas of distribution. These areas may be focused in a single discipline or diversified over several disciplines. With the assistance of a B.L.S. adviser, students can structure a program that meets their individual educational, vocational or personal goals.

Up to three-fourths of the total degree requirements can be transferred from accredited institutions. Work done in community colleges or other accredited colleges and universities can be applied toward the degree, as can applicable courses taken at any of the three Iowa Regent universities, whether on or off campus.

The B.L.S. program has no residence requirements. To complete the degree, students may earn credits through distance-learning formats as well as regular on-campus courses. Students may also earn credits by proficiency or test-out examinations.

Admission

Admission to the B.L.S. program is open to persons who meet either of the following levels of previous educational attainment:

- Hold the associate in arts (A.A.) or associate in science (A.S.) degree from an accredited two-year college. (Holders of the associate in applied science or associate in applied arts degree are not automatically eligible, although some courses may be found applicable upon review.)
- Have at least 60 semester credits of collegiate work acceptable toward graduation at ISU with a total cumulative grade point average of at least 2.00 (a C average).

Requirements for the B.L.S. Degree

The B.L.S. candidate must earn a total of 120 credits in accordance with requirements listed below. Courses taken at Iowa State University on a pass/not pass basis may be counted toward graduation only as electives. No more than 9 credits of 490 (Independent Study) courses in a single discipline may be counted toward graduation.

General Education Requirements 46 cr.

Basic English Composition	6
World language *	8
Arts and humanities	12
Mathematics, statistics, or computer science	3
Natural sciences	8
Social sciences	9
Distribution Requirements **	36
Electives	38
Total Credits	120

*The requirement may be met by completion of three or more years of high school study in one world language. A list of courses acceptable in

the general education groups can be obtained from the college website (<http://www.las.iastate.edu/students/academics/general-education>).

**A minimum of 12 credits is required in each of three of the five distribution areas listed below.

Humanities (literature, philosophy, history, religion, art and music appreciation)

Communications and arts (journalism, speech, writing, drama, art, world language)

Natural sciences and mathematical disciplines (chemistry, physics, biology, geological and atmospheric sciences, mathematics, statistics, computer science)

Social sciences (sociology, psychology, economics, political science, anthropology, geography)

Professional fields (business, education, family and consumer sciences, agriculture, engineering)

At least 24 upper-level credits are required in the three distribution areas with a minimum of 6 upper-level credits in each of the areas.

Other Requirements

Included in the total of 120 credits must be the following:

45 upper-level credits from a four-year college

30 credits from ISU earned during the junior/and or senior year.

Three credits of course work in U.S. Diversity and 3 credits in International Perspectives.

A grade average of at least 2.00 (a C average) in all coursework applied to the B.L.S. degree, in all upper-level coursework, and in all work completed after admission to the B.L.S. program.

Proficiency in communication demonstrated by completion of an approved composition course from a four-year college.

Linguistics

Linguistics is a cross-disciplinary program in the College of Liberal Arts and Sciences designed to meet the needs of students interested in various aspects of language—its structure, history, varieties, meanings, and uses. The program includes courses in anthropology, communication disorders, computer science, English, psychology, and speech communication and world languages and cultures, thus providing a multi-disciplinary approach to the study of human language.

Courses in linguistics serve as background for students interested in any career that involves working with language, such as teaching English both as a first and as a second language, second language studies, psycholinguistics, cross-cultural communication, linguistic anthropology, computational linguistics, speech-language pathology, and audiology.

In the College of Liberal Arts and Sciences, courses in linguistics can be applied as electives or as part of the group requirements. They may also be used in a minor or in a major.

Majors in linguistics complete a minimum of 36 hours in linguistics with a grade of C or better in each linguistics course. Courses specifically required are:

LING 119	Introduction to World Languages	3
LING 120	Computers and Language	3
LING 207	Introduction to Symbolic Logic	3
LING 219	Introduction to Linguistics	3
LING 220	Descriptive English Grammar	3
LING 371	Phonetics and Phonology	3
LING 413	Psychology of Language	3
LING 420	History of the English Language	3
LING 437	Grammatical Analysis	3

In addition, linguistics majors must choose 9 credits of elective courses. Discuss choices with the adviser. Suggested areas of further study are:

Communication Disorders

LING 275	Introduction to Communication Disorders	3
LING 286	Communicating with the Deaf	3
LING 471	Language and Reading Development in Children	3
CMDIS 480B	Topics in Communication Disorders: Articulation and Phonological Disorders	3

Computers and Linguistics

LING 331	Theory of Computing	3
LING 510	Introduction to Computers in Applied Linguistics	3
LING 526	Computer-Assisted Language Learning	3

Second Language Studies

LING 425	Second Language Learning and Teaching	3
LING 518	Teaching English as a Second Language Methods and Materials	3
LING 524	Literacy: Issues and Methods for Nonnative Speakers of English	3
LING 525	Methods in Teaching Listening and Speaking Skills to Nonnative Speakers of English	3

Sociolinguistics and Language

LING 305	Language, Thought and Action	3
LING 422	Women, Men, and the English Language	3
LING 514	Sociolinguistics	3
LING 527	Discourse Analysis	3

Spanish Linguistics

LING 351	Introduction to Spanish-English Translation	3
LING 352	Introduction to Spanish Phonology	3
LING 354	Introduction to Spanish-English Interpretation	3
LING 462	Contrastive Analysis of Spanish/ English for Translators	3
LING 463	Hispanic Dialectology	3

Additional courses in linguistics are available but not fully in the catalog yet. These include LING 319X, 320X, 322, 324, and 325. They also include courses for study abroad, especially LING 395X. Majors in linguistics must show proficiency in a foreign language equivalent to that achieved after two years of university-level study. Alternatively, majors in linguistics can demonstrate university-level study in two foreign languages of at least one year each.

Minors in linguistics are individually tailored to the interests of the student, who consults with the linguistics adviser to develop the minor program of study. All minors must have a minimum of 15 credits in linguistics, of which 6 must be in courses numbered over 300. All programs must include LING 219 Introduction to Linguistics.

Communication Proficiency requirement: The linguistics program requires grades of C+ or better in each of the following:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	
LIB 160	Information Literacy	1

Continuing ENGL Proficiency is based on one course from ENGL 314, a WLC 370-379 course, or a CL ST 370-379 course.

For information about using linguistics courses in an interdisciplinary studies major, see Liberal Arts and Sciences, Cross-Disciplinary Studies.

Total Credits: 120

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses.

Graduate Study

A graduate minor in linguistics permits students to investigate various aspects of linguistics, emphasizing the ability to think about language in a systematic and disciplined way and to apply the methods of the field to research problems in their own disciplines. Graduate courses for the minor may be cross-listed with courses in Anthropology, Communication Disorders, Computer Science, English, Psychology, and World Languages and Cultures.

For the master's degree, a declared minor consists of 9 credits in linguistics including two foundation courses:

LING 511	Introduction to Linguistic Analysis	3
One of the following:		3
LING 514	Sociolinguistics	
LING 527	Discourse Analysis	
LING 537	Corpus Approaches to Grammatical Analysis	
And one elective from the list of courses approved for graduate credit		3
Total Credits		9

For the Ph.D. degree, the minor consists of 12 credits in linguistics including:

LING 511	Introduction to Linguistic Analysis	3
LING 537	Corpus Approaches to Grammatical Analysis	3
And two electives from the list of courses approved for graduate credit		6
Total Credits		12

Additional courses beyond those listed below may be used as electives. The chair of the supervisory committee can provide information about these.

At least one member of the linguistics faculty will serve on a student's program of study committee. A list of faculty members may be obtained from the Linguistics program website. Ph.D. candidates will write one section of the preliminary examination on an area of linguistics. Students in Teaching English as a Second Language/Applied Linguistics are not eligible for a graduate minor in linguistics.

Mathematics

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in mathematics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum.

The program in mathematics offers training suitable for students planning to enter secondary school teaching, to work in mathematics and computation for industry or government, or to continue their studies in graduate school. Students may satisfy the major requirements in several ways, suitable for various career objectives. Graduates can construct rigorous arguments to demonstrate mathematical facts. They

can communicate their mathematical methods to others and can justify their assumptions.

Traditional Program

The traditional program of study for mathematics majors gives students a thorough grounding in mathematics. Graduates understand a broad range of mathematical topics and are familiar with a broad range of mathematical models. They have skills for solving problems in diverse situations. The program allows flexibility for specialization, and students are encouraged to steer their education according to career objectives.

This traditional program of study:

MATH 101	Orientation in Mathematics	1
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 201	Introduction to Proofs	3
MATH 265	Calculus III	4
MATH 317	Theory of Linear Algebra	3-4
or MATH 407	Applied Linear Algebra	
MATH 301	Abstract Algebra I	3
MATH 414	Analysis I	3
MATH 266	Elementary Differential Equations	3-4
or MATH 267	Elementary Differential Equations and Laplace Transforms	
One of the following:		2
MATH 492	Undergraduate Seminar	
C I 480C	Pre-Student Teaching Experience III: Mathematics	1
Additional Mathematics courses at the 300 level or above		15
Total Credits		45-47

¹ C I 480C is available only for students seeking secondary school certification.

The courses listed above must include one of the sequences:

MATH 301	Abstract Algebra I	6
& MATH 302	and Abstract Algebra II	
MATH 373	Introduction to Scientific Computing	6
& MATH 481	and Numerical Methods for Differential Equations	
MATH 304	Combinatorics	6
& MATH 314	and Graph Theory	
MATH 414	Analysis I	6
& MATH 415	and Analysis II	
MATH 435	Geometry I	6
& MATH 436	and Geometry II	

Communication Proficiency requirement:

ENGL 150	Critical Thinking and Communication ²	3
One of the following:		3
ENGL 250	Written, Oral, Visual, and Electronic Composition ²	
ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors ²	
One of the following:		3
MATH 491	Undergraduate Thesis ³	
ENGL 302	Business Communication	

ENGL 305	Creative Writing: Nonfiction
ENGL 309	Proposal and Report Writing
ENGL 314	Technical Communication
JL MC 201	Reporting and Writing for the Mass Media

² The department requires a grade of C- or better.

³ With departmental approval.

Mathematics Plus

The Mathematics Plus option is for students who wish to establish a clear strength in a field of application of mathematics. They obtain the mathematics major by pursuing study of mathematics, through the upper division level, complementary to their application area. This program makes double majors more feasible and is appropriate for students who plan on employment or graduate study in the application field. It is not intended for students who plan on graduate study in mathematics. For more information, see the mathematics department web site or consult an adviser in mathematics.

Secondary Education

For certification requirements for teaching of mathematics in grades 5-12, see the Mathematics Department and School of Education web sites or consult an adviser.

Recommendations

The department strongly recommends that each student majoring in mathematics include in the program substantial supporting work beyond the minimum general education requirement of the college in one or more areas of application of mathematics, such as other mathematical sciences, engineering, natural science, or social science. Particularly useful are:

COM S 207	Fundamentals of Computer Programming	3
COM S 208	Intermediate Computer Programming	3
PHYS 221	Introduction to Classical Physics I	5
PHYS 222	Introduction to Classical Physics II	5
STAT 341	Introduction to the Theory of Probability and Statistics I	3
STAT 342	Introduction to the Theory of Probability and Statistics II	3

It also recommends that students contemplating graduate study in mathematics acquire a reading knowledge of French, German, or Russian.

Credits Not Counted

Credits earned in the following cannot be counted toward graduation by mathematics majors:

MATH 104	Introduction to Probability	3
MATH 105	Introduction to Mathematical Ideas	3
MATH 140	College Algebra	3
MATH 143	Preparation for Calculus	4
MATH 145	Applied Trigonometry	3
MATH 150	Discrete Mathematics for Business and Social Sciences	3
MATH 151	Calculus for Business and Social Sciences	3
MATH 160	Survey of Calculus	4
MATH 181	Calculus and Mathematical Modeling for the Life Sciences I	4

MATH 182	Calculus and Mathematical Modeling for the Life Sciences II	4
MATH 195	Mathematics for Elementary Education I	3
MATH 196	Mathematics for Elementary Education II	3

Minor in Mathematics

The department offers a minor in mathematics, which may be earned by credit in the following:

MATH 201	Introduction to Proofs	3
MATH 265	Calculus III	4
MATH 301	Abstract Algebra I	3
One of the following		
MATH 266	Elementary Differential Equations	3
MATH 267	Elementary Differential Equations and Laplace Transforms	4
One of the following		
MATH 317	Theory of Linear Algebra	4
MATH 407	Applied Linear Algebra	3

Total Credits: 133.5-134.5

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Three of the required 45 300+ level credits must be earned in a general education group outside the group of your major. You must also complete the LAS foreign language requirement and any high school unmet admissions requirements.

Students pursuing licensure to teach grades 5 – 12 must meet the general education and professional teacher education requirements established by the University Teacher Education Program. (Check <http://www.education.iastate.edu/te/>) for the requirements.

¹ ENGL 302, 305, 309, or 314, or JL MC 201.

Students in all ISU majors must meet the U.S. Diversity and the International Perspectives requirements. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. These courses may be courses that apply to other requirements.

The LAS General Education requirements for Mathematics majors are 12 credits Arts and Humanities, 8 credits Natural Science, and 9 credits Social Science from the approved lists available on the Liberal Arts and Sciences web site.

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level. Three of the required 45 300+ level credits must be earned in a general educational group outside the group of the major. Students must also meet the LAS foreign-language requirement and complete any unmet admission requirements.

¹ ENGL 302, 305, 309, or 314, or JL MC 201.

² Or other mathematics choice at the 300+ level. But the program must include MATH 301, MATH 414, and one of the two-course sequences 301, 302; 304, 314; 373, 481; 414, 415; or 435, 436.

³ Available Spring semester only.

Graduate Study

The department offers programs leading to a Master of Science or Doctor of Philosophy degree in mathematics or applied mathematics, as well as minor work for students whose major is in another department. The department also offers a program leading to the degree of Master of School Mathematics (M.S.M.).

Students desiring to undertake graduate work leading to the M.S. or Ph.D. degree should prepare themselves by taking several upper division mathematics courses. It is desirable that these credits include introduction to analysis and abstract algebra.

The M.S. degree requires a student to take at least 30 credit hours and to write a creative component or thesis. Additionally, students must pass a comprehensive oral examination over their coursework and their creative component or thesis. See the online Mathematics Graduate Handbook for specific requirements.

The Ph.D. degree requires a student to take 48 credit hours of coursework in addition to research hours, pass written qualifying examinations, pass an oral preliminary exam, and perform an original research project culminating in a dissertation which is defended by an oral exam. Ph.D. candidates must have at least one year of supervised teaching experience. See the on-line Mathematics Graduate Handbook for specific requirements.

The M.S.M. degree is primarily for in-service secondary mathematics teachers. Students desiring to pursue the M.S.M degree should present some undergraduate work in mathematics beyond calculus. Candidates for the M.S.M. degree must write an approved creative component and pass a comprehensive oral examination over their course work and their creative component.

Meteorology

Offered by the Department of Geological and Atmospheric Sciences.

The study of Meteorology involves the description of the earth's atmosphere and the processes responsible for its behavior. Students majoring in Meteorology earn the bachelor of science. The major satisfies guidelines specified by the American Meteorological Society and meets education requirements for employment with the National Weather Service and the World Meteorological Organization. Successful preparation for professional or graduate work in Meteorology requires that the student develop and integrate a diverse range of skills and knowledge bases. These include weather observing, the physics and dynamics of the global atmosphere, application of new weather technologies, advanced mathematical tools, computer programming and modeling, and effective oral and written communication. The faculty view the senior thesis (MTEOR 499 Senior Research), in particular, as a capstone experience in which students demonstrate they have achieved this integration. Also, contemporary meteorology is an earth-system science with ties to a variety of human experiences. The electives and general education requirements of the college are further experiences that the meteorology student must integrate with their core meteorology knowledge in order to function effectively in a globally-oriented profession.

Minor - Meteorology

The department offers a minor in Meteorology which may be earned by completing 15 credits including MTEOR 111 Synoptic Applications (only 1 credit may count toward the minor), MTEOR 206 Introduction to Weather and Climate and MTEOR 301 General Meteorology. Further information concerning programs of study, including sample degree programs, is available from the department.

The program requires the following courses:

MTEOR 111	Synoptic Applications	1
MTEOR 201	Introductory Seminar	R
MTEOR 206	Introduction to Weather and Climate	3
MTEOR 301	General Meteorology	4
MTEOR 311	Introduction to Synoptic Meteorology	2
MTEOR 341	Atmospheric Physics I	3
MTEOR 342	Atmospheric Physics II	3
MTEOR 411	Synoptic Meteorology	3
MTEOR 417	Mesoscale Forecasting Laboratory	3
MTEOR 432	Instrumentation and Measurements	3
MTEOR 443	Dynamic Meteorology I	3
MTEOR 454	Dynamic Meteorology II	3
MTEOR 499	Senior Research	2
Total Credits		33

An additional 9 credits must be chosen from:

MTEOR 402	Watershed Hydrology	3
MTEOR 404	Global Change	3
MTEOR 405	Environmental Biophysics	3
MTEOR 406	World Climates	3
MTEOR 407	Mesoscale Meteorology	3
MTEOR 452	Climate Modeling	3
MTEOR 490	Independent Study	1-3

GEOL 415 or C E 372	Paleoclimatology Engineering Hydrology and Hydraulics	3
------------------------	--	---

Supporting work is required in areas at least equivalent to:

One of the following sequences		4
CHEM 163 & 163L	College Chemistry and Laboratory in College Chemistry	

Or

CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	
COM S 207	Fundamentals of Computer Programming	3
PHYS 221	Introduction to Classical Physics I	5
PHYS 222	Introduction to Classical Physics II	5
MATH 165	Calculus I	4
MATH 166	Calculus II	4
MATH 265	Calculus III	4
MATH 266	Elementary Differential Equations	3
STAT 105	Introduction to Statistics for Engineers	3
SP CM 212	Fundamentals of Public Speaking	3

Total Credits **38**

A grade of C or better (not C-) is required in each of the following courses to meet minimum graduation requirements for a bachelor of science degree in Meteorology:

MTEOR 206	Introduction to Weather and Climate	3
MTEOR 301	General Meteorology	4

Several co-op programs are available for upper division undergraduates. Although a range of opportunities exists for men and women who terminate their studies with a bachelor of science, students who meet the necessary academic standards are encouraged to continue their studies in a graduate program. For these students, additional coursework is recommended in a mathematical or physical science. Other students can choose a wide range of supporting courses that will contribute to their particular area of interest in meteorology.

Communication Proficiency requirement: The department requires a grade of C or better in:

ENGL 150	Critical Thinking and Communication	3
ENGL 250 or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	3
ENGL 309	Proposal and Report Writing	3

Total Credits: 124-122

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the Communication Proficiency and LAS World Language Requirements. Six semesters of one foreign language in high school satisfies the World Language requirement.

Students in all ISU majors must complete a 3 credit course in U.S. diversity and a 3 -credit course in international perspectives. Discuss with your adviser how the two courses that you select can be applied to address general education requirements. Check for a list of approved courses at: <http://www.registrar.iastate.edu/courses/div-ip-guide.html>

¹ Students taking CHEM 177 should plan to take CHEM 178 as well.

² Student must select at least 9 credits from a list of optional courses.

³ Students should select a humanities or social science course based on need. If these LAS requirements have been satisfied, students may select a meteorology elective or alternate course. Students should discuss possible alternate course options with their adviser.

Students in all ISU majors must complete a 3 credit course in U.S. diversity and a 3 credit course in international perspectives. Discuss with your adviser how the two courses that you select can be applied to address general education requirements. Check for a list of approved courses at: <http://www.registrar.iastate.edu/courses/div-ip-guide.html>

- ¹ Students taking CHEM 177 should plan to take CHEM 178 as well.
- ² Student must select at least 9 credits from a list optional courses.
- ³ Students should select a humanities or social science course based on need. If these LAS requirements have been satisfied, students may select a meteorology elective or alternate course. Students should discuss possible alternate course options with their adviser.

Music

Administered by the Department of Music and Theatre

Undergraduate Study

The Department of Music and Theatre offers a strong undergraduate music program, where students study with full-time faculty professionals in a supportive environment that encourages students to become their best.

The music curriculum provides:

1. A comprehensive program of professional studies for students who wish to prepare for careers in music, including teaching, performance, and composition, and for students who plan to pursue graduate studies in music.
2. Courses in music literature, theory and areas of performance for all students, regardless of major.

The department embodies the land-grant philosophy of service to the people of the state with a faculty of active scholars, teachers, and artists committed to excellence in teaching, creative/scholarly work, and arts outreach. The department is an accredited institutional member of the National Association of Schools of Music (NASM).

The Theatre Program is administered by the Department of Music and Theatre (see Index, Theatre and Performing Arts.)

Curricula Available to Music Majors

Students interested in pursuing an emphasis in music theater should see Index, Theater and Performing Arts.

Bachelor of Music

This curriculum leads to the degree bachelor of music. This degree is more specialized and contains fewer general education requirements than the bachelor of arts degree with a major in music. Students in this curriculum choose between options in education, performance, and composition. To obtain a bachelor of music degree, a student must earn a minimum of 125-146.5 credits (depending on the option chosen) including a minimum of 32 credits in residence at Iowa State University and a minimum of 45 advanced credits in courses numbered 300 or above and must meet all of the requirements specified below.

Courses taken on a pass/not pass basis may be counted toward the required total credits, and may be used to meet the advanced credit requirement, if appropriate, but may not be used to satisfy any other graduation requirement.

Degree Requirements

GENERAL EDUCATION REQUIREMENTS (Students choosing the music education option should consult their advisers.) 32 cr.

Bachelor of Arts—Music Major

A more general degree than the bachelor of music, the bachelor of arts degree requires no formal specialization. It includes more general education requirements and provides a broader course of academic study.

For the undergraduate curriculum in Liberal Arts and Sciences, major in music, leading to the degree bachelor of arts, see Liberal Arts and Sciences, Curriculum.

Candidates for the degree bachelor of arts with a music major will normally complete 48 credits of music including the following required courses:

4 credits:		4
MUSIC 119	Applied Music for Majors	
MUSIC 120	Introduction to Music Literature and Styles	3
4 credits:		4
MUSIC 219	Applied Music: Majors	
MUSIC 224	Music Theory I	3
MUSIC 225	Aural Theory I	2
MUSIC 234	Music Theory II	3
MUSIC 235	Aural Theory II	1
MUSIC 319	Applied Music: Majors	2
MUSIC 334	Music Theory III	3
MUSIC 335	Aural Theory III	1
MUSIC 344	Music Theory IV	3
MUSIC 345	Aural Theory IV	1
MUSIC 383	History of Music I	3
MUSIC 384	History of Music II	3
4 credits from		4
MUSIC 111	Wind Ensemble	
MUSIC 113	Jazz Ensemble	
MUSIC 115	Symphonic Band	
MUSIC 141	Lyrica Women's Choir	
MUSIC 151	Oratorio Chorus	
MUSIC 161	Iowa State Singers	
MUSIC 181	Symphony Orchestra	
MUSIC 321	Advanced Ensemble	
MUSIC 301	Opera Studio	
Music Electives		8
Total Credits		48

Bachelor of arts students whose chief professional interest lies in research are encouraged to minor in world languages and cultures, history, literature, or philosophy.

General Requirements

Entrance Audition.

In order to be accepted as a music major, a prospective student must pass an entrance audition for the applied faculty in his/her performance area (piano, organ, woodwinds, strings, percussion, brass, or voice). Passing the audition is dependent on the demonstration of performance skills appropriate for college level instruction and the potential to perform at a professional level. In addition, the number of students accepted must balance with the space available in the corresponding applied studios. Once accepted, a student must complete a placement examination in keyboard skills. This examination is normally given by members of the departmental faculty the week preceding the opening of classes for fall semester.

Seminars and Recitals.

All music majors enrolled for applied music courses will attend a weekly 1-hour seminar in their areas, departmental recitals, and 12 recitals of their choosing each semester.

Ensemble Requirement.

See the options above for additional ensemble requirements.

All Bachelor of Music students:

Enrollment in an ensemble course, chosen from the lists below, each semester of full-time enrollment (except during student teaching) is required.

Students in a music education options:

At least six semesters of large ensemble and one semester of chamber music ensemble, chosen from the lists below, are required. One semester of 114A may count as a large ensemble.

Bachelor of Music students in options other than education:

At least 2 semesters of large ensemble and one semester of chamber music ensemble, chosen from the lists below, are required.

Large Ensembles:

MUSIC 111	Wind Ensemble	1
MUSIC 115	Symphonic Band	1
MUSIC 141	Lyrical Women's Choir	1
MUSIC 151	Oratorio Chorus	1
MUSIC 161	Iowa State Singers	1
MUSIC 181	Symphony Orchestra	1

Chamber music ensembles:

MUSIC 113	Jazz Ensemble	1
MUSIC 161	Iowa State Singers	1
MUSIC 301	Opera Studio	1-3
MUSIC 321	Advanced Ensemble	1

Continuation Examination

To be approved for continuation as a music major on the junior level, and enroll in Music 319, a student must pass a continuation examination taken normally at the end of the fourth semester as a music major. Before taking this examination, the student must complete the requisite forms as well as write an essay including:

1. his/her personal goals
2. a self-assessment of his/her progress thus far

3. an assessment of what he/she expects to accomplish before graduation

The student taking the Continuation Examination performs for a Continuation Examination Committee. Requirements include the performance of three works representing different periods or styles selected by, and studied with, the applied teacher, a self-prepared piece, and sight reading. The student must display acceptable solo ability and performance techniques in at least one of the applied areas. A written evaluation will be given each student following his/her performance. This evaluation will include a candid assessment of the student's potential to achieve his/her goals. In addition, the student may arrange to meet with members of the Continuation Examination Committee at a later date to discuss the results of his/her Continuation Examination. See Piano Proficiency below. For details and forms go to: <http://www.music.iastate.edu>

Piano Proficiency Requirement

All music majors must demonstrate proficiency in functional skills at the piano. Keyboard music majors (students whose primary instrument is piano or organ) accomplish this through courses in their curricula. All other students accomplish this by satisfactorily completing Music 228. All entering non-keyboard music majors with previous piano experience meet with the class piano instructor, usually the week before classes start in the fall semester, to determine the appropriate piano class (127, 128, 227, 228) for their initial piano enrollment. Some students are deemed to have met the piano proficiency at this time. Non-keyboard music majors with no previous piano experience should enroll in Music 127, Class Piano I. Continuous enrollment in piano classes is REQUIRED until successful completion of the piano proficiency requirement. **Important:** The piano proficiency must be met, either through completion of Music 228 or demonstration of proficiency, to pass the continuation examination. Failure to do so could delay a student's graduation. All students must fulfill the piano proficiency requirement in order to pass the continuation examination and enroll in Music 319.

Graduation Proficiency

To be recommended for graduation, a music student should demonstrate to the music faculty mature acquaintance with performance styles, technique, and repertoire. All music majors will participate in departmental recitals to the satisfaction of the department. Candidates for the bachelor of music degree will present a graduation recital.

Communication Proficiency requirement: The department requires a grade of C- or better in each of ENGL 150 and ENGL 250 (or ENGL 250H). In addition the Communication Proficiency must be certified through one of the following options:

1. Certification of writing skills, by the instructor, after completion of one of the following:

MUSIC 120	Introduction to Music Literature and Styles	3
MUSIC 383	History of Music I	3
MUSIC 384	History of Music II	3
MUSIC 472	History of American Music	3
MUSIC 473	Music of the Baroque and Classical Eras	3
MUSIC 475	Music of the Romantic Era	3

(Passing one of these courses does not automatically satisfy the requirements for Communication Proficiency.)

2. Satisfactory completion of an advanced writing course:

ENGL 302	Business Communication	3
ENGL 305	Creative Writing: Nonfiction	3
ENGL 314	Technical Communication	3

Learning Outcomes and Assessment

Music graduates will understand and demonstrate:

1. Knowledge of music cultural heritage and history
2. Appreciation for musical creativity, reasoning, and the aesthetic value of music
3. Knowledge of organization and structures of music
4. Analytical skills necessary for listening, performing, and teaching
5. Skills necessary to perform music from a variety of periods, styles, and genres
6. Necessary abilities to communicate ideas musically, verbally, and in writing
7. Awareness of the diversity of musical ideas throughout the world's cultures
8. For Music Education students: success in meeting the ISU Teaching Standards as outlined by the University Teacher Education Program

Assessment measures include the continuation examination, graduating senior surveys and exit interviews, public performances, senior projects, course grades, teacher certification (for music education students), and the National Association of Schools of Music accreditation review.

Minor in Music

Candidates for the minor in music will complete 19 credits in music including:

MUSIC 224	Music Theory I	3
MUSIC 234	Music Theory II	3
Two of the following		6
MUSIC 102	Introduction to Music Listening	
MUSIC 120	Introduction to Music Literature and Styles	
or MUSIC 302	Masterpieces of Music and Art in Western Culture.	
MUSIC 304	History of American Rock 'n' Roll	
MUSIC 383	History of Music I	
4 credits chosen from the following		4
MUSIC 111	Wind Ensemble	
MUSIC 113	Jazz Ensemble	
MUSIC 115	Symphonic Band	
MUSIC 141	Lyrical Women's Choir	
MUSIC 151	Oratorio Chorus	
MUSIC 161	Iowa State Singers	
MUSIC 181	Symphony Orchestra	
MUSIC 301	Opera Studio	
MUSIC 321	Advanced Ensemble	
MUSIC 118	Applied Music: Non-majors	
MUSIC 318	Applied Music: Non-majors	
MUSIC 290F	Special Problems: Applied Music	

At least 6 of the 19 credits must be in courses numbered 300 and above taken at ISU with a grade of C or better. The minor must include at least 9 credits that are not used to meet any other department, college, or university requirement.

Students pursuing a music minor must meet the audition requirements and/or prerequisites for all courses they wish to take.

Minor in Music Technology

Candidates for the minor in music technology will complete 15 credits including:

MUSIC 246	Introduction to Music Technology	2
MUSIC 346	MIDI and Digital Audio Techniques	3
MUSIC 446	Electronic Music Synthesis	3
7 credits from the following		7
COM S 107	Applied Computer Programming	
COM S 207	Fundamentals of Computer Programming	
or COM S 227	Introduction to Object-oriented Programming	
COM S 208	Intermediate Computer Programming	
COM S 228	Introduction to Data Structures	
COM S 309	Software Development Practices	
COM S 327	Advanced Programming Techniques	
CPR E 329	Software Project Management	
E E 201	Electric Circuits	
E E 224	Signals and Systems I	
E E 324	Signals and Systems II	
M E 451	Engineering Acoustics	
PHYS 198	Physics of Music	
S E 319	Software Construction and User Interfaces	
MUSIC 101	Fundamentals of Music	
or MUSIC 105	Basic Musicianship	
MUSIC 102	Introduction to Music Listening	
MUSIC 118	Applied Music: Non-majors	
MUSIC 120	Introduction to Music Literature and Styles	
or MUSIC 302	Masterpieces of Music and Art in Western Culture.	
MUSIC 224	Music Theory I	
MUSIC 225	Aural Theory I	
MUSIC 234	Music Theory II	
MUSIC 235	Aural Theory II	
MUSIC 290F	Special Problems: Applied Music	arr †
MUSIC 304	History of American Rock 'n' Roll	
MUSIC 318	Applied Music: Non-majors	
MUSIC 383	History of Music I	
MUSIC 384	History of Music II	
MUSIC 472	History of American Music	
MUSIC 490I	Independent Study: Electronic Music	

Total Credits 15
†

† Arranged with instructor.

Music courses that may be taken by music majors to meet the requirements for the Music Technology minor are limited to the following:

MUSIC 246	Introduction to Music Technology	2
MUSIC 346	MIDI and Digital Audio Techniques	3
MUSIC 446	Electronic Music Synthesis	3

MUSIC 490I	Independent Study: Electronic Music	arr †
MUSIC 590I	Special Topics: Electronic Music	arr †

† Arranged with instructor.

At least six of the fifteen credits must be taken at Iowa State University in courses numbered 300 or above with a grade of C or higher. The minor must include at least nine credits not used to meet any other department, college, or university requirement. Students pursuing a minor in music technology must meet the audition requirements and/or prerequisites for all music courses they wish to take.

¹ A placement examination in keyboard skills determines the student's placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano. Students not required to take four semesters of class piano will take additional music elective credits.

² Four credits chosen from the following ensembles are required: 111, 113, 115, 141, 151, 161, 191, 321.

³ ENGL 150 requires concurrent enrollment in LIB 160.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (<http://www.las.iastate.edu/academics/generaleducation/index.shtml>) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. A list of approved courses can be found at: (<http://www.registrar.iastate.edu/courses/div-ip-guide.html> (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>)) The courses taken to meet these requirements may also be used to meet other requirements.

Scheduling of the general education requirements where specific courses are not indicated can be flexible. Music courses are best kept in the order/semesters indicated. (Most music courses are offered on semester each year.)

- B.Mus. - organ
- B.Mus. - piano
- B.Mus. - strings
- B.Mus. - wind or percussion instrument

¹ A placement examination in keyboard skills determines the student's placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano.

^{**} Students should take the major area (WW or brass) with which they are least familiar first to gain more experience in lab band. However, WW players planning to gain additional skills on a 2nd WW, might choose to take that area first. Non-WW players should take 351 before 352. 358B must be taken concurrently with each tech course (350-355).

⁺⁺ Alternate year courses. String players take 490B and 464. WW and brass players take 368 and 464.

^c These courses which appear in the same semester must be taken concurrently.

The LAS world language requirement must be met. The U.S. diversity and international perspectives requirements are automatically met with courses required for this degree option (C I 406 and MUSIC 383). Many general education and education (C I = Curriculum and Instruction) courses can easily be taken in different semesters than indicated as well as summer. Music courses are best kept in the order/semesters indicated (Most music courses are offered on semester each year).

¹ A placement examination in keyboard skills determines the student's placement in the Class Study in Piano courses. Students with a concentration in piano or organ do not take Class Study in Piano. Students placing out of class piano may need to take additional elective credits to earn the required 124.5 cr. for the BM degree.

² ENGL 150 requires concurrent enrollment in LIB 160.

³ Alternate year course, taught in odd number years, spring semester.

The BM degree requires a minimum of 124.5 credits, **including a minimum of 45 credits at the 300/400 level.** The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (<http://www.las.iastate.edu/academics/generaleducation/index.shtml>) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) The courses taken to meet these requirements may also be used to meet other requirements.

Some advanced theory and history courses are not offered every semester. Semesters of offerings are listed in the course descriptions in the catalog. The BM in composition requires one advanced history course (3 cr.) and 9 credits of advanced theory from the following courses: 346, 440, 446, 490B, 590I. Advanced theory courses must include 346 or 446.

* The BM degree requires a minimum of 124.5 credits, **including a minimum of 45 credits at the 300/400 level.** The LAS World Language requirements must be met. Courses which may be used for the General Education Requirements can be found at: (<http://www.las.iastate.edu/academics/generaleducation/index.shtml>) All ISU students must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives (which is satisfied with MUSIC 383). A list of approved courses can be found at: (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) The courses taken to meet these requirements may also be used to meet other requirements.

Theatre and Performing Arts

www.theatre.iastate.edu (<http://www.theatre.iastate.edu>)

(Administered by the Department of Music)

Performing Arts graduates will understand and demonstrate:

1. Knowledge of the cultural heritage and history of the Performing Arts
2. A theoretical and experiential background in the areas of performance, theatrical design, music, and dance
3. Knowledge of creative problem solving and artistic collaboration
4. Skills necessary to perform in or design for a variety of periods, styles, and genres in theatre and dance
5. Awareness of the diversity of expression in the Performing Arts throughout the world's cultures
6. A practical understanding of the rigors of the field.

Assessment measures include the semester exhibit of design work or audition pieces, graduating senior seminar and exit interviews, public performances or designs, course grades, exhibited convention work, and internship evaluations.

Undergraduate Study

Students interested in theatre as a major area of concentration declare a major in Performing Arts and select an emphasis in Theatrical Design or Acting/Directing. Students implement the theories and principles explored in the classroom by participating in production work. During the academic year, Iowa State University Theatre presents up to ten

mainstage and second stage productions in Fisher Theater, and works in close collaboration with ISU Music and Dance.

The major in Performing Arts offers the undergraduate student a cross-disciplinary concentration in Music, Dance and Theatre. The core curriculum consists of 24 credits in the three areas. Students elect a 24-credit emphasis in either Dance, Theatrical Design or Acting/Directing. In addition to coursework, Performing Arts majors and minors participate in concert (Orchesis, Footfalls), workshop (Opera Studio, Minority Theatre Workshop) and production (Barchje, Stars Over Veishea, ISU Theatre/Music Theatre/Second Stage and Studio) experiences.

Performing Arts graduates, in addition to a solid theoretical and experiential background in the areas of performance, theatrical design, dance and music, are prepared to meet the challenges of the work force or graduate school with their strengths in collaboration, creative problem solving, meeting deadlines and processing diverse input to yield cohesive output. Two required professional internships prior to graduation are vital to the student's appreciation and practical understanding of the rigors of the field.

The theatre area offers a wide variety of courses. Students may select from courses in acting, design (costume, scenic, lighting/sound), make-up, stage direction, playwriting, stage management, and theatre history. Independent study and special topics courses supplement formal course offerings to provide opportunities to intensify study in a particular aspect of theatre.

Auditions for ISU Theatre productions are open to all students irrespective of academic major. Similarly, participation in areas of production other than acting is open to both majors and nonmajors. Qualified students also present experimental, laboratory, and Minority Theatre Workshop productions. Student actors, directors, designers, and technical crew heads are required to maintain a grade point average of at least 2.0 to participate in productions.

Theatre scholarships are awarded on a yearly basis to students who make significant contributions to Iowa State University Theatre.

Graduate Study

The department offers graduate courses as supporting work in other fields.

6 credits 300+ in DANCE, THTRE or PERF		6

Communication Proficiency requirement: Select one course from:

ENGL 302	Business Communication	3
ENGL 303	Free-Lance Writing for Popular Magazines	3
ENGL 304	Creative Writing: Fiction	3
ENGL 305	Creative Writing: Nonfiction	3
ENGL 306	Creative Writing: Poetry	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3
ENGL 315	Creative Writing: Screenplays	3
ENGL 316	Creative Writing: Playwriting	3
ENGL 370	Shakespeare	3

Performing Arts

ISU Theatre provides a comprehensive undergraduate education in Theatre and the Performing Arts. This program prepares the student for graduate school, professional theatre training programs, and the teaching of Theatre at the secondary education level. Courses in Theatrical Design and Technology, Acting, Directing, History and Criticism provide the foundation for students in Theatre.

The activities of the Theatre area reflect Iowa State University's commitment to excellence in teaching and creative activity. Its principle research mission is creative activity. By designing, directing, acting and writing for the Theatre both in their on-campus laboratory, Fisher Theater, and through guest residencies with other state, regional, national and international theatre companies, the Theatre faculty enhance their artistic and technological capabilities and enrich their effectiveness in the classroom.

Performing Arts graduates, in addition to a solid theoretical and experiential background in the areas of performance, theatrical design, dance and music, are prepared to meet the challenges of the work force or graduate school with their strengths in collaboration, creative problem solving, meeting deadlines and processing diverse input to yield cohesive output. Two required professional internships prior to graduation are vital to the student's appreciation and practical understanding of the rigors of the field.

A degree in Performing Arts is offered through the College of Liberal Arts and Sciences under the auspices of the Department of Music and Theatre. Students may select an emphasis in dance, acting/directing, or theatrical design. A minor in Performing Arts is also available.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

Philosophy

Philosophy tries to make sense of human experience and reality through critical reflection and argument. The questions it treats engage and provoke all of us, and they occupy an important place in our intellectual tradition: Are there objective standards for deciding what is right and wrong, or is morality merely a subjective matter? Is capitalism morally acceptable? Do I have a will, and is it free? How do my words and thoughts come to be about the world? Does God exist? Can machines think? How are mind and body related? Students in philosophy classes will be exposed to arguments on both sides of such questions, and they will be encouraged to develop and rationally defend their own positions.

Philosophy is not an isolated discipline. It enjoys mutually beneficial exchanges with many fields of study within the humanities and sciences. Philosophers develop tools that allow them to examine critically the assumptions and implications of the social and natural sciences, religion, and law.

The study of philosophy provides several benefits. It emphasizes rigorous understanding of problems, together with careful analysis of the strengths and weaknesses of the available solutions. It encourages clarity in the presentation of one's own ideas, as well as sensitivity in the consideration of the ideas of others. The study of philosophy therefore encourages one to develop skills and habits that are useful not only in philosophy, but in other areas as well. Philosophy students historically do well, for example, in law and medical schools.

However, one should not think that philosophy is only valuable in academic settings. Philosophical questions arise in many areas of family, business, and civic life. Philosophers strive to face these questions with the kind of intellectual honesty that leads to respect for the views of others, and continual reassessment of their own. In this way, the study of philosophy fosters values and attitudes that are helpful for responding to a lifetime of intellectual challenges.

The degree program in philosophy requires a minimum of 33 credits, plus the zero credit PHIL 492 course. The following courses compose the core program of the major from which 15 credits shall be chosen. Additionally, two courses at the 400 level or above (other than PHIL 490 and PHIL 492) are required.

Ethical theory: One course required.

PHIL 330	Ethical Theory	3
PHIL 335	Social and Political Philosophy	3

PHIL 535	Contemporary Political Philosophy	3
----------	-----------------------------------	---

History: Two courses required.

PHIL 310	Ancient Philosophy	3
PHIL 314	17th Century Philosophy	3
or PHIL 315	18th Century Philosophy	

Metaphysics and Epistemology: One course required.

PHIL 364	Metaphysics: God, Minds, and Matter	3
PHIL 366	Truth, Belief and Reason	3
PHIL 380	Philosophy of Science	3

Logic:

PHIL 207 Introduction to Symbolic Logic is required.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. Three of the required 45 300+ level credits must be earned in a general education group outside the group of the major. You must also complete the LAS foreign-language requirement.

Minor in Philosophy

The department offers a minor in philosophy which may be earned by completing a total of 15 credits in philosophy. At least 9 credits must be in courses numbered 300 or above. Students may want to emphasize specific areas by taking 15 hours of courses chosen from the following:

Philosophy of Science:

PHIL 201	Introduction to Philosophy	3
PHIL 206	Introduction to Logic and Scientific Reasoning	3
or PHIL 207	Introduction to Symbolic Logic	
PHIL 314	17th Century Philosophy	3
PHIL 315	18th Century Philosophy	3
PHIL 380	Philosophy of Science	3
PHIL 381	Philosophy of the Social and Behavioral Sciences	3
PHIL 480	Controversies in Science	3
PHIL 483	Philosophy of Biology	3
PHIL 485	Philosophy of Physics	3

History of Philosophy:

PHIL 201	Introduction to Philosophy	3
PHIL 310	Ancient Philosophy	3
PHIL 314	17th Century Philosophy	3
PHIL 315	18th Century Philosophy	3
PHIL 316	19th Century Continental Philosophy	3
PHIL 317	20th and 21st Century Continental Philosophy	3
PHIL 318	20th and 21st Century Anglo-American Philosophy	3

Law, Social Values and Policy:

PHIL 230	Moral Theory and Practice	3
PHIL 235	Ethical Issues in A Diverse Society	3
PHIL 331	Moral Problems in Medicine	3
PHIL 332	Philosophy of Law	3
PHIL 335	Social and Political Philosophy	3
PHIL 336	Bioethics and Biotechnology	3
PHIL 338	Feminist Philosophy	3
PHIL 343	Philosophy of Technology	3
PHIL 430	Value Theory	3
PHIL 535	Contemporary Political Philosophy	3

Communication Proficiency requirement: The department requires a grade of C or better in each of ENGL 150 and ENGL 250 (or ENGL 250H), and approval of writing by instructor of any philosophy course 300 level or above, to be designated by the student.

Philosophy - Graduate Study

The department offers work for a graduate minor in philosophy. For those taking the M.A. or M.S., the minor requirement is two courses above 300 (but not PHIL 490 each taken in conjunction with PHIL 590. For those taking the Ph.D., the requirement is four courses above 300, at least one of which is above 400 (but not PHIL 490) each taken in conjunction with PHIL 590. Interested students should ask the chair to assign a minor adviser.

The department participates in the interdepartmental program in general graduate studies.

Physics and Astronomy

Physics and astronomy are basic natural sciences which attempt to describe and provide an understanding of both our world and our universe. Physics serves as the underpinning of many different disciplines including the other natural sciences and technological areas. Graduates are proficient in the methods of rigorous scientific analysis, relevant mathematical techniques, and modern computational and laboratory methods. They have a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, and modern physics. They are able to communicate clearly and effectively at general and technical levels. They are prepared to pursue a wide range of careers as a professional physicist, astronomer, or science educator. They are also prepared to pursue advanced studies and careers in areas as diverse as engineering, medicine, law, and business administration. Many opportunities exist for students who terminate their studies with a bachelor's degree, especially when combined with technology studies in other areas. Students who meet the necessary scholastic standards often continue their studies in a graduate college, exploring and contributing to new developments in the field.

The department normally expects each student majoring in physics to complete at least the following courses:

PHYS 241	Principles and Symmetries in Classical Physics I	5
PHYS 242	Principles and Symmetries in Classical Physics II	5
PHYS 321	Introduction to Modern Physics I	3
PHYS 321L	Introductory Laboratory in Modern Physics I	1
PHYS 322	Introduction to Modern Physics II	3
PHYS 322L	Introductory Laboratory in Modern Physics II	1
PHYS 304	Thermal Physics	3
PHYS 306	Physics of Wave Motion	3
PHYS 361	Classical Mechanics	3
PHYS 362	Intermediate Mechanics	3
PHYS 364	Electricity and Magnetism I	3
PHYS 365	Electricity and Magnetism II	3
PHYS 480	Quantum Mechanics I	3
MATH 207	Matrices and Linear Algebra (or)	3
or		
MATH 317	Theory of Linear Algebra	4
	and 3 credits of laboratory work chosen from	3
PHYS 310	Electronic Instrumentation for Experimental Physics	
PHYS 311	Intermediate Laboratory	
PHYS 311T	Intermediate Laboratory for Secondary Physics Teachers	

PHYS 470L	Applied Physics Laboratory	
or		
ASTRO 344L	Astronomy Laboratory	
*PHYS 221 and PHYS 222 may be substituted for PHYS 241 and PHYS 242.		

All students are required to earn at least 5 credits in laboratory work in physics in addition to the laboratory components of PHYS 241 and PHYS 242. These 5 credits must be in courses numbered 304 or higher or in approved substitutions. All students must earn at least 32 credits in physics and astronomy courses numbered 304 or higher. The basic list of expected courses is not a rigid requirement and changes in this basic list will be approved by the department curriculum committee on recommendation of the student's adviser when such changes will better serve the student's needs. In particular, students planning a physics major and also seeking certification for high school teaching may, with the approval of their adviser, follow a significantly different program designed to meet their particular needs; these students should consult the department for further information. Further information concerning programs of study, including sample degree programs, is available from the department.

Students majoring in physics who wish an emphasis in astronomy/astrophysics should consider a minor in astronomy. Those planning graduate work in physics or astronomy/astrophysics should add to the basic list the course PHYS 481. Other useful courses include:

MATH 365	Complex Variables with Applications	3
PHYS 496	Modern Optics	3
STAT 447	Statistical Theory for Research Workers	4
One or more of the following may also be added according to interest		
ASTRO 405	Astrophysical Cosmology	3
PHYS 421	Ultrafast Laser Science and Spectroscopy	3
PHYS 432	Molecular and Cell Biophysics	3
PHYS 461	Physics of Biomolecules	3
PHYS 511	Condensed Matter Physics I	3
PHYS 526	Particle and Nuclear Physics	4
PHYS 528	Mathematical Methods for the Physical Sciences	3
PHYS 541	General Relativity	3

The expected outcomes for students in these programs are:

1. a broad knowledge of physics, including mechanics, electricity and magnetism, thermodynamics, wave motion and modern physics
2. proficiency in laboratory methods
3. proficiency in modern scientific computational methods
4. a sound foundation in the liberal arts including proficiency in communication skills.

In addition to the performance on exams and course grades, information on evaluating of the success in meeting these goals is obtained by:

1. an annual written survey of all students majoring in the program
2. an annual written survey of all graduating seniors
3. a periodic written survey of program alumni
4. student evaluations of all courses
5. adviser evaluations
6. a bimonthly meeting of program majors with the department chair

The department offers a minor in physics which may be earned by completing 20 credits in physics courses chosen as follows:

PHYS 241	Principles and Symmetries in Classical Physics I	5
PHYS 242	Principles and Symmetries in Classical Physics II	5
PHYS 321	Introduction to Modern Physics I	3
One of the following		
PHYS 321L	Introductory Laboratory in Modern Physics I	
PHYS 322L	Introductory Laboratory in Modern Physics II	
PHYS 310	Electronic Instrumentation for Experimental Physics	
PHYS 311	Intermediate Laboratory	
PHYS 311T	Intermediate Laboratory for Secondary Physics Teachers	
Other acceptable courses		
PHYS 304	Thermal Physics	
PHYS 306	Physics of Wave Motion	
PHYS 322	Introduction to Modern Physics II	
PHYS 361	Classical Mechanics	
PHYS 362	Intermediate Mechanics	
PHYS 364	Electricity and Magnetism I	
PHYS 365	Electricity and Magnetism II	
PHYS 421	Ultrafast Laser Science and Spectroscopy	
PHYS 432	Molecular and Cell Biophysics	
PHYS 461	Physics of Biomolecules	
PHYS 480	Quantum Mechanics I	
PHYS 481	Quantum Mechanics II	
PHYS 496	Modern Optics	
*PHYS 221 and PHYS 222 may be substituted for PHYS 241 and PHYS 242		

The department offers a minor in astronomy which may be earned by completing 15 credits chosen as follows:

ASTRO courses *		12-15
3 credits from the following (if only 12 Astro credits)		3
PHYS 304	Thermal Physics	
PHYS 321	Introduction to Modern Physics I	
PHYS 361	Classical Mechanics	
PHYS 362	Intermediate Mechanics	
PHYS 364	Electricity and Magnetism I	
PHYS 365	Electricity and Magnetism II	
PHYS 480	Quantum Mechanics I	
PHYS 481	Quantum Mechanics II	
PHYS 496	Modern Optics	
AER E 351	Astro dynamics I	

* must include ASTRO 344L Astronomy Laboratory and may include one of the courses ASTRO 120 The Sky and the Solar System, ASTRO 150 Stars, Galaxies, and Cosmology or ASTRO 250 Astronomy Bizarre

12 or more credits must be at the 300 level or higher. Note that only ASTRO 344L may be used to satisfy both the requirements of a physics major and an astronomy minor.

Communication Proficiency requirement: The department requires a grade of C or better in each of ENGL 150 and ENGL 250 (or ENGL 250H), and a C– or better in ENGL 302, ENGL 305, ENGL 309 or ENGL 314. Students are also encouraged to study at least one foreign language.

Elective	3	Elective	3
		Elective	3
		13	14

Total Credits: 124-121

¹ Students must earn a minimum of three laboratory credits from PHYS 310, 311, 311T, 450L, ASTRO 344L, or 450L.

² Recommended by not required. Highly recommended for those students planning graduate study.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the LAS foreign language requirement.

Graduate Study

The department offers studies for the degrees master of science and doctor of philosophy with majors at both levels in applied physics, astrophysics, condensed matter physics, high energy physics, nuclear physics, and physics; and minor credit courses for students majoring in other departments.

Facilities of various research groups of the department, the Ames Laboratory, and the Applied Science Center, including the Microelectronics Research Center, are available for research.

Students with bachelor's degrees in physics or astronomy from other institutions ordinarily will qualify for graduate study at Iowa State provided they have satisfactorily completed course work similar to that suggested for undergraduate majors here intending to go on to graduate school. In some cases additional instruction at the intermediate level may be required.

Graduates have a broad understanding of physical science, as well as mastery of state-of-the-art methods in their area of specialization. They are able to communicate effectively to a wide range of audiences, from the general public to research colleagues. Their skills in rigorous scientific thinking prepare them for leadership in the broader community. They are skilled in carrying out research, communicating research results, and soliciting research support. They have considerable teaching experience. They have developed problem solving skills that prepare them for careers in either industry or academia.

All candidates for an advanced degree in physics are expected to complete:

PHYS 531	Statistical Mechanics	3
PHYS 564	Advanced Classical Mechanics	3
PHYS 571	Electricity and Magnetism I	3
PHYS 572	Electricity and Magnetism II	3
PHYS 591	Quantum Physics I	4
PHYS 592	Quantum Physics II	4

Candidates for an advanced degree in applied physics are expected to complete:

PHYS 571	Electricity and Magnetism I	3
PHYS 591	Quantum Physics I	4
PHYS 470L	Applied Physics Laboratory	2-5
PHYS 699	Research	arr
		t
PHYS 572	Electricity and Magnetism II	3
or PHYS 531	Statistical Mechanics	

† Arranged with instructor.

Candidates for an advanced degree in astrophysics should complete:

PHYS 531	Statistical Mechanics	3
PHYS 564	Advanced Classical Mechanics	3
PHYS 571	Electricity and Magnetism I	3
PHYS 591	Quantum Physics I	4
ASTRO 505	Astrophysical Cosmology	3
ASTRO 510	Observational Astrophysics	3

Astrophysics Ph.D. candidates must take at least three of the 580 level Astro courses, while candidates for the Research Masters must take at least two 580 level Astro courses.

Except for the applied physics major where a thesis is always required, the degree master of science is offered both with and without thesis. For all areas of study except applied physics the basic requirements for the M.S. are the same: at least 30 credits of acceptable graduate work must be completed, not less than 21 of which must be in physics or astronomy. Students must complete not less than 6 credits from outside their major area, with 3 credits being required from outside the department, and 3 credits from a 500 or 600 level course in another area of specialization. Students choosing a M.S. degree with thesis may apply up to 8 credits of 699 but no credits of 599 toward the minimum 30 credits. Students choosing a degree without thesis should apply 2 credits of 599, but may not apply any credits of 699 toward the minimum 30 credits.

Students whose major area is applied physics must complete at least 30 credits of acceptable graduate work for the M.S. degree and not less than 19 credits of these must be in the required courses listed above; the remaining 11 credits of the 30 credit minimum may be chosen freely either from within the student's major area or from without and either from the department or outside, but it should be noted that not more than 3 credits of PHYS 699 Research may be applied toward the 30 credit minimum.

In addition to course work in the major area of study, all candidates for the Ph.D. degree must complete 12 credits from outside this area. Of these 6 must be taken from other departments and 6 must be taken from the department with the additional constraint that this latter 6 must include at least one 500 or 600 level introductory course in another area of specialization. Each candidate for the Ph.D. degree is required to teach one year of elementary physics or astronomy.

Graduate students interested in a physics minor should contact the department for requirements.

Political Science

The study of political science is designed to enable students to understand the nature of politics, public values, and the institutions and processes of politics in their various forms.

Students completing a major in political science will understand and be able to interrelate the leading theories, literature, and approaches in the subfields of American government, political theory and methods, international relations, and comparative politics. Graduates can analyze and formulate effective argumentation in written and oral forms, including the ability to appreciate and accommodate diverse political ideas, and the ability to collect and critique information and ideas of others in support of original arguments. Graduates appreciate the knowledge and civic responsibilities required for effective participation in political life.

The political science major is often chosen by students preparing for a career in law. Students with this goal should consult with the department in selecting courses. See also Preprofessional Study.

Several internship options are available to the political science major, offering students the opportunity to experience practical application of the knowledge learned in academic courses.

Requirements for the Major:

For the purpose of defining undergraduate requirements in the Department of Political Science, the Department employs four subfields within the discipline, with the following courses in each:

I. Theory and Methods

POL S 235	Introduction to Ethics and Politics	3
POL S 313	Special Topics in Theory and Methods	2
POL S 333	Democracy and Diversity in America	3
POL S 334	Politics and Society	3

† Arranged with instructor.

To complete the major in Political Science a student must earn 33 semester credits of courses in Political Science subject to the following conditions:

1. Students must satisfactorily complete POL S 101 and POL S 301.
2. Students must complete at least 3 credits in each of the four subfields listed above. Students may apply only one half-semester mini-course (POL S 312, POL S 313, POL S 314, POL S 315) in each group.
3. Political Science courses in which a student has a grade of D+ or lower will not count for the major but can be counted as electives.

4. At least 18 credits of Political Science courses must be numbered 300 or above.
5. Students must pass one statistics course from among STAT 101, STAT 104, STAT 226, or STAT 231.
6. No more than six credits of POL S 496, POL S 497, or POL S 499 (alone or in combination) can be used to fulfill any of these requirements. A maximum of three credits of POL S 490 can be applied to meet any of the four subfield requirements.
7. A maximum of six credits from half-semester mini-courses (POL S 312, POL S 313, POL S 314, POL S 315) can be applied to satisfy the above requirements.
8. At least 15 credits of Political Science coursework must be earned at Iowa State University.
9. Advanced Communication Skills: Majors must earn at least a C+ in each of ENGL 150 and ENGL 250. Those who do not must complete ENGL 309 or ENGL 314 with a minimum grade of C. Majors must also complete POL S 395.

The department offers a minor in political science that may be earned by completing 15 credits beyond the 100-level of coursework in political science, nine of which must be at the 300 level or above. A student minoring in Political Science normally will be expected to take at least 9 credits in Political Science coursework at Iowa State University. Only 3 credits of POL S 490 or POL S 499, alone or in combination, and only 2 credits of POL S 312, POL S 313, POL S 314, or POL S 315 may be included in the total of 15 credits required for the minor. All minors in the College of Liberal Arts and Science require a minimum of 6 credits in courses numbered 300 and above taken at ISU with a minimum grade of C. Credits earned in POL S 496, POL S 497, or POL S 499, offered on a satisfactory/fail basis only, will not fulfill this requirement.

Total Credits: 117-124

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level.**

- ¹ Meets international perspectives requirement.
- ² Meets LAS College math requirement.
- ³ May be cross-listed to fulfill other requirements.

Graduate Study

The department offers work for a Master of Arts degree (MA) with a major in political science and minor for students in other departments. The department also offers work for a Graduate Certificate of Public Management and Policy (GCPMP) for those interested in an educational certificate program that requires less work than a full masters program. In addition, the Department of Political Science offers work for a Master of Science in Information Assurance (MSIA) and a joint Master of Arts/Juris Doctor (MA/JD) program with the Law School of Drake University. Information with detailed requirements for all graduate degrees may be obtained at the department's web page at <https://www.pols.iastate.edu/academics/graduate/>

Master of Arts (MA)

This is a 30-credit masters degree that gives students the opportunity to explore the field of political science in order to pursue a PhD, go to law school, improve research skills, or understand politics better. The three concentration areas are American Politics, Global Politics, and Public Policy. Although it is not a formal concentration, some students have worked heavily in the area of political theory. Top students are eligible for graduate assistantships that make graduate study much more affordable and provide opportunities for assisting faculty with teaching and research. These are awarded on a merit basis. A thesis is required for this degree. The department also has a joint Master of Arts/Juris Doctor (MA/JD) program with the Law School of Drake University. Students wishing to pursue this joint degree must submit separate applications to Drake University and Iowa State University and be accepted by both institutions.

MA graduates have a broad substantive understanding of the political process and the academic study of politics. They also have in-depth knowledge of one or more subfields in political science. Graduates are skilled at conducting research and preparing thorough research summaries. They are able to identify and address complex political

questions, taking into account related ethical, legal, economic, and social issues.

The prerequisites for major graduate work in the MA program normally are completion of at least 15 credits in political science, the GRE (Graduate Record Examination), one year of a foreign language (equivalent to 8 semester hours) and a course in basic statistics (equivalent to STAT 101). If the basic statistics requirement has not been met, the student may remedy the deficiency by passing equivalent courses, for which no graduate credit will be received. During their program of study, all students are expected to complete STAT 401, POL S 502, and a thesis. Additional information including detailed graduation requirements can be found at <https://www.pols.iastate.edu/academics/graduate/#ma>

Master of Science in Information Assurance (MSIA)

The Master of Science in Information Assurance (MSIA) is a multi-disciplinary program designed to provide students with diverse backgrounds and interests the opportunity to obtain professional training in the emerging field of information assurance. The core of the MSIA program is built around a series of courses taught in Electrical and Computer Engineering, Mathematics, and Computer Science that introduce students to software and hardware aspects of cryptography and computer security. The program also recognizes, however, that information assurance defined in terms of security, privacy, access, and reliability is not simply a technical problem but also involves important societal dimensions, including policy, education, ethics, and management. Recognizing that political science offers many potential intersections with information assurance (e.g., public sector management of information technology; forensics and computer crime; information technology policy and law; information technology and international relations; information warfare; etc.), students with interests in these areas are encouraged to select the Department of Political Science as their home department.

Students opting to pursue a MSIA degree through the Department of Political Science can expect to acquire skills and background knowledge relevant to a career in public policy or public sector management of information assurance technologies. The MSIA degree can also help prepare students who wish to go on to pursue a PhD in information politics and policy.

Students interested in the MSIA degree program should consider Political Science as a home department if their future career and/or educational interests lie in such areas as: institutional issues related to the Internet and information technologies; electronic government and electronic democracy; information technology, international security, and information warfare; information technology policy and law; and public administration and public sector management of information technology.

Admission requirements generally follow the same guidelines as the MA in Political Science. Degree requirements are specified by the MSIA program in cooperation with Political Science. More in-depth information on the program including detailed graduation requirements can be found at: <https://www.pols.iastate.edu/academics/graduate/#msia>

Master of Arts/Juris Doctorate Program (MA/JD)

The Drake Law School and the Department of Political Science at Iowa State University are co-sponsors of the Master of Arts/Juris Doctorate

degree. This degree combines courses at both Iowa State University and the Drake Law School and follows most of the same requirements as a double degree. However, the student must have full admission to both schools. Detailed information for the MA/JD can be found at the ISU Political Science webpage as well as the Drake Law School website (under Joint Degree): <http://www.law.drake.edu/>.

The increasing attention being focused on the solution of social problems by state and federal governments has created a need for persons with advanced training in both law and political science. The Drake Law School and the ISU Department of Political Science jointly administer a MA/JD program to provide an opportunity for students at the Drake Law School to achieve, concurrently, a JD degree in law and a MA degree in political science, and for graduate students in political science at Iowa State University to achieve a degree in law.

Successful completion of this program will enable students at Drake Law School to receive both a JD and an MA degree within a three-year period, while graduate students in political science at Iowa State University will be able to transfer a substantial number of hours to the Drake Law School toward the fulfillment of the JD requirements in a similar amount of time. Additional information including detailed graduation requirements can be found at: <https://www.pols.iastate.edu/academics/graduate/#majd>

Minor

Students in other graduate programs may obtain a minor in political science by completing at least 9 credits of political science courses. Interested students should consult the Graduate College Handbook for additional information on graduate minors.

The Graduate Certificate of Public Management and Policy (GCPMP)

The Political Science Department offers a Graduate Certificate of Public Management and Policy (GCPMP). The GCPMP is a 15-credit certificate. Students who are interested in public management and policy, but unsure about committing to a full master's degree, can aim for the certificate knowing that those courses will also count toward a master's degree if they choose to continue on. Iowa State graduate students in other fields may want to pursue the certificate to improve their credentials on the job market if their interest overlaps with public management and policy. For example, doctoral students in higher education and education administration can earn all 9 of their "outside" credits in the GCPMP coursework, add the 6 more elective credits, and earn a GCPMP along with their PhD.

Requirements for admission are a graduate school application, an essay stating purposes for study, college transcripts, the GRE (waived for those with five or more years of public or nonprofit sector experience), three letters of recommendation, and the TOEFL for international students. More information on the program including curricular requirements can be found at: <https://www.pols.iastate.edu/academics/graduate/#gcpmp/>.

Psychology

For college-level requirements in undergraduate curricula leading to the degrees of bachelor of arts and bachelor of science, see Liberal Arts and Sciences, Curriculum.

An undergraduate major in psychology provides a liberal arts and science education, which also can serve as preparation for graduate study in

psychology, law, or the health professions. The undergraduate major in psychology enables graduates to understand and apply the scientific principles, facts, and basic methods of psychology to their personal and professional activities. Students with a bachelor's degree (B.A./B.S.) in psychology may qualify for a variety of positions including those in social sciences, mental health, corrections, rehabilitation, developmental disability centers, and business (management, insurance, opinion polls). Professional work as a psychologist in academic, business, clinical, government, and school settings requires graduate degrees. Depending on professional goals, a minor in another discipline may be desirable.

Following the recommendations of the American Psychological Association, the undergraduate curriculum in psychology is designed to allow each student to:

1. Develop a detailed knowledge of psychology
2. Develop an understanding of scientific inquiry and demonstrate critical thinking
3. Understand the role of ethics and diversity in human behavior
4. Be able to communicate effectively in the discourse of psychology
5. Develop skills supporting employment or graduate/professional education

The major must include the following psychology courses each with a minimum grade of C- and an overall average of C or better:

PSYCH 101	Introduction to Psychology *	3
PSYCH 102	Laboratory in Introductory Psychology *	1
PSYCH 111	Orientation to Psychology * or Psych 112 Learning Community	0.5
PSYCH 301	Research Design and Methodology *	3
PSYCH 440	Psychological Measurement I *	3

The major also must include at least one course from four of the following six areas:

Area A

PSYCH 230	Developmental Psychology
PSYCH 335	Abnormal Psychology of Children and Adolescents

Area B

PSYCH 280	Social Psychology
PSYCH 380	Social Cognition

Area C

PSYCH 310	Brain and Behavior
PSYCH 315	Drugs and Behavior

Area D

PSYCH 312	Sensation and Perception
PSYCH 313	Learning and Memory
PSYCH 316	Cognitive Psychology
PSYCH 318	Thinking and Decision Making

Area E

PSYCH 360	Personality Psychology
PSYCH 460	Abnormal Psychology

Area F

PSYCH 250	Psychology of the Workplace
PSYCH 350	Human Factors in Technology

Three additional 3-credit courses in psychology 9

Three additional 3-credit courses in psychology must be taken. Area courses may be used to meet this requirement, but variable credit

courses (PSYCH 291, PSYCH 470, PSYCH 490, PSYCH 491, and PSYCH 492) may not.

In accordance with college requirements, a C or better average is required in the courses used to satisfy the major.

Departmental requirements for the B.A. and B.S. include the following supporting courses:

6 credits in Philosophy including	6
PHIL 201 Introduction to Philosophy (not 207)	3
Two of the following	
BIOL 101 Introductory Biology (or higher)	
BIOL 155 Human Biology (or 255 or 256)	
BIOL 313 Principles of Genetics	
CHEM 160 Chemistry in Modern Society (or higher)	
PHYS 101 Physics for the Nonscientist (or higher)	
STAT 101 Principles of Statistics (or higher) *	4
MATH 104 Introduction to Probability (or 150 or higher) **	3

* minimum grade of C-

** excluding MATH 105 Introduction to Mathematical Ideas

Students electing a B.S. degree also must complete PSYCH 302 Research Methods in Psychology with a minimum grade of C- and a minimum of 10 additional supporting credits in supporting courses from the list of courses in the LAS Gen Ed Natural Sciences and Mathematical Disciplines Area (or approved departmental list) as follows: three credits in mathematics, six credits in natural sciences, and one additional credit in a laboratory course.

Students electing a B.A. degree also must complete an ISU approved minor.

The department offers a minor in psychology. The minor requires completing 18 credits in psychology, including PSYCH 101 Introduction to Psychology and PSYCH 301 Research Design and Methodology, each with a minimum grade of C-. At least 9 of the 18 credits must be in 300 level courses (or above), but no more than three credits total may be from PSYCH 291 Introductory Research Experience, PSYCH 490 Independent Study, PSYCH 491 Research Practicum, and PSYCH 492 Fieldwork Practicum. In addition to an overall C average or better in courses used to satisfy the minor, a C- or better is required in each course. Contact the psychology advising office for more information.

Communication Proficiency requirement

The department requires a grade of:

C or better in:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
or ENGL 250H	Written, Oral, Visual, and Electronic Composition: Honors	

C- or better in one of the following:

PSYCH 302	Research Methods in Psychology	3
ENGL 302	Business Communication	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3

Graduate Study

The department offers work for the degree of doctor of philosophy in psychology. A master of science may be earned as part of that degree.

The department offers a doctoral specialization in counseling psychology (APA accredited) and doctoral areas of concentration in cognitive psychology and social psychology.

A basic goal of graduate study in the Department of Psychology is to provide all students with a broad base of knowledge in psychological science, as well as exposure to the content and methodological skills necessary for effective performance in teaching, research and professional practice. Accordingly, graduates have an extensive knowledge of psychological principles and the conceptual and quantitative skills to conduct psychological research and to communicate the results to the scientific community, students in the classroom, and the general public. Graduates in counseling psychology are skilled in delivering services to diverse clientele in a variety of settings.

The department also participates in the interdepartmental programs in human computer interaction (<http://www.vrac.iastate.edu/hci/>), neuroscience (<http://www.neuroscience.iastate.edu/>) and in the interdepartmental minor in gerontology (<http://www.gerontology.iastate.edu/programs/>).

A formal class and a supervised practicum in the teaching of psychology is recommended for all doctoral students whose future plans may include teaching at the college level. A 12-month internship in a training site or agency approved by the faculty is required of all doctoral students in counseling psychology.

Public Relations

The Public Relations Major

The public relations major provides students with the concepts, skills, and expertise needed to help organizations build mutually beneficial relationships with diverse publics. The knowledge and tools students develop through the P R curriculum ensure they can enter fields such as corporate communication, government affairs and public relation firms. The capstone professional internship experience, coupled with coursework that focuses heavily on writing, research, and professional abilities provide opportunities for students to practice and refine their skills.

To receive a bachelor of science degree in public relations, as student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, P R, or JL MC. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level or above. Public relations majors are required to take:

To receive a bachelor of science degree in public relations, a student must earn at least 120 credits. A minimum of 72 credits must come from courses other than ADVRT, P R, or JL MC. At least 50 of these credits must come from the liberal arts and sciences. Overall, at least 45 credits must be from 300-level or above. Public relations majors are required to take:

STAT 101	Principles of Statistics	4
----------	--------------------------	---

The degree requirements allow for a minimum of 34 credits and a maximum of 48 credits to be taken in ADVRT, P R, and JL MC. These include:

JL MC 101	Mass Media and Society	3
JL MC 110	Orientation to Journalism and Communication	1

P R 220	Principles of Public Relations	3
JL MC 201	Reporting and Writing for the Mass Media	3
P R 301	Research and Strategic Planning for Advertising and Public Relations	3
P R 321	Public Relations Writing	3
P R 424	Public Relations Campaigns	3
JL MC 460	Law of Mass Communication	3
JL MC 462	Media Ethics, Freedom, Responsibility	3
P R 499A	Professional Media Internship: Required	3

Additional recommended courses and requirements for the public relations major are available from the Greenlee School.

Students taking one major at the school may not seek a second major or a minor in the school. All Greenlee School majors are required to take a second major or minor outside the school as an area of expertise. All Greenlee School majors are required to take 499A."

Minor in Public Relations

Students cannot select more than one minor in the Greenlee School of Journalism and Communication. Minors in the Greenlee School are not available to Greenlee majors.

For a minor in public relations, students complete 15 credits.

JL MC 101	Mass Media and Society	3
P R 220	Principles of Public Relations	3
P R 305	Publicity Methods	3
6 credits from the following:		6
P R 301	Research and Strategic Planning for Advertising and Public Relations

For 300 and 400-level choices, please choose from the list of selected courses available from an academic adviser. You may schedule an appointment with an adviser by either calling 515-294-4342 or visiting with Greenlee School office staff at 101 Hamilton Hall.

University Requirement: Students in all ISU majors must complete a three-credit course in U.S. Diversity, as well as a three-credit course in International Perspectives. The approved course lists are found at the following web addresses:(U.S. Diversity) <http://www.registrar.iastate.edu/students/div-ip-guide/usdiversity-courses> and (International Perspectives) <http://www.registrar.iastate.edu/students/div-ip-guide/IntlPerspectives-current> .

College of LAS Requirement: Minimum of 120 credits, including a minimum of 45 credits at the 300-level and above. You must also complete the LAS Foreign Language requirement and any unmet ISU admission requirements.

Minor or Second Major: Students are required to fulfill a secondary area of expertise. This requirement can be met by declaring a minor or a second major outside of the Greenlee School of Journalism and Communication.

Religious Studies

Religious Studies - Undergraduate Study

Religious studies gives students the opportunity to investigate and reflect on the world's religions in an objective, critical, and appreciative manner. Though there is emphasis in religious studies on the wide variety of religious phenomena as well as on the various methods in the study of religion, the aim is to help students develop their own integrated understanding of the nature of religion and its role in individual and social life.

Graduates of the religious studies program have knowledge of the religious diversity in the United States and the world. They have the ability to interpret religion empathetically and critically and to compare and contrast historical and contemporary differences and similarities of religious systems. They understand ways in which religion influences and is influenced by the historical, social, and cultural contexts in which religious systems function. Graduates often pursue careers in non-profit, community organizations; apply to professional schools or graduate programs; or enter seminaries to prepare for ministry.

The major in religious studies seeks to provide both breadth and depth. Breadth is provided through the exploration of the world's various religious traditions and through exposure to a variety of theoretical approaches and methodologies in the academic study of religion. Depth is achieved through specialized courses in particular religious traditions and particular issues in the study of religions, culminating in research seminars. The objective is to expose the student to various components of the discipline of Religious Studies and by doing so develop skills

that are valuable in a number of careers and that provide the necessary foundation for pursuing graduate studies.

Students pursuing a major in religious studies must complete a minimum of 33 credits, including the following requirements:

Two required introductory survey courses		
RELIG 205	Introduction to World Religions	3
RELIG 210	Religion in America	3
Two courses from Bible or Western Religions		
RELIG 220	Introduction to the Bible	
RELIG 242	History of Christianity: Beginnings to the Reformation	
RELIG 243	History of Christianity: The Reformation to the Present

Total Credits: 121

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the LAS foreign-language requirement.

¹ Laboratory science recommended.

The program offers a minor that may be earned by completing a total of 15 credits in religious studies including either RELIG 205 Introduction to World Religions or RELIG 210 Religion in America. Nine hours must be in courses at the 300 level or above (no more than 3 hours of seminar and no more than 3 hours of independent study).

Communication Proficiency requirement: The department requires a grade of C or better in each of ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors), and requires one 300 level course in religious studies in which writing is evaluated as acceptable.

Students may choose to do a senior thesis under the supervision of a religious studies faculty adviser. This option may earn 3-6 credits toward the completion of the major.

Religious Studies - Graduate Study

Religious studies may be one of the three areas used for the interdisciplinary graduate studies master's degree.

Sociology

Undergraduate Study in Sociology

The Department of Sociology offers course work leading to either a bachelor of arts, bachelor of science, or a minor in sociology. Additionally,

a bachelor of science in Agriculture & Society is offered. The department offers course work for the Interdisciplinary Studies major and minor in Criminal Justice.

Graduates of all these programs will understand and demonstrate:

1. general knowledge of sociology
2. research methods in sociology
3. critical thinking skills
4. application of sociology to pressing social issues
5. sociological and professional values
6. information technology skills
7. communication skills
8. personal and career development

Graduates understand how social institutions, communities, and organizations work and change; they can examine the causes and consequences of conformity, deviance, and inequality. They can apply sociological understanding of human behavior to practical work situations and everyday life. Graduates can read critically, think independently, and communicate effectively about social issues and social policy.

University Requirements:

International Perspective	3
US Diversity	3
Total Credits	6

Communications:

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
LIB 160	Information Literacy	1
Total Credits		7

World Languages and Culture:

3 years H.S.		
SPAN 097	Accelerated Spanish Review	0
2 semesters college		8
Total Credits		8

Departmental requirements for sociology majors include the following supporting courses:

STAT 101	Principles of Statistics	3-4
or STAT 104	Introduction to Statistics	
One of the following		3
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 314	Technical Communication	
Total Credits		6-7

Majors must receive grades of C or better in ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition, and a grade of C or better in either ENGL 302 Business Communication or ENGL 309 Proposal and Report Writing or ENGL 314 Technical Communication. Programs leading to a bachelor of arts degree will emphasize additional coursework in groups I and III of the general education requirements. Programs leading to a bachelor of science degree will emphasize additional coursework in groups IIA and IIB of the general education requirements. Some of the possible areas

of coursework include criminal justice, community (urban and rural) sociology, family sociology, sociology of work, research methods and statistics, social change and development, social inequality, social psychology and sociological theory.

A program of study that meets the needs and interests of the student and department requirements will be developed in consultation with the major adviser. Students must maintain a GPA of 2.0 or higher in their core courses. Programs of study will include:

SOC 115	Orientation to Sociology	1
SOC 134	Introduction to Sociology	3
SOC 302	Research Methods for the Social Sciences	3
SOC 401	Contemporary Sociological Theories	3
6 credits of 200+ Sociology courses		6
18 credits of 300+ Sociology courses		18
Total Credits		34

In addition to the program of study above, students must select complementary courses that will lead to a bachelor of arts or bachelor of science degree.

Bachelor of Arts supporting coursework

At least 9 additional arts and humanities and/or social science courses	9
Total Credits	9

Bachelor of Science supporting coursework

At least 9 additional credits in natural science, math, or statistics	9
Total Credits	9

Sociology, Bachelor of Arts (BA) and Bachelor of Science (BS)

Freshman

Fall	Credits Spring	Credits
ENGL 150	3 Sociology 200+	3

Complementary Course; (approved Arts and Humanities or Social Science course if seeking a BA; approved Math or Natural Science course if seeking a BS)	3 Electives 300+	6-9
--	------------------	-----

Electives 300+	6	
15		12-15

Total Credits: 120-124

LAS majors require a minimum of 120 credits, including a minimum of 45 credits at the 300/400 level.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses.

Sociology Minor

The department offers a minor in sociology which may be earned by completing 15 credits in sociology with a minimum 2.0 GPA:

SOC 134	Introduction to Sociology	3
Additional 12 credits in Sociology courses		12
9 credits must be 300+		
Total Credits		15

At least 9 of the 15 credits must be at the 300 level or higher with a minimum of 6 of those credits taken at ISU. 9 credits must stand alone in the minor.

Graduate Study

The department offers work for the degrees master of science and doctor of philosophy with majors in sociology and rural sociology and minor work for students majoring in other departments. The department offers concentrations in a number of areas, e.g., community studies and development; sociology of families, inequality, food systems, agriculture and environment; methodology; social change and development; criminology; the economy, organizations and work; and social psychology. The Department of Sociology does not offer a nonthesis master's program.

Graduates have a broad understanding of sociology, address complex societal problems, and communicate effectively with scientific colleagues and the general public in both formal and informal settings.

They understand sociological theory, conduct research, and are prepared to educate college students and contribute to public policy. Although the department stipulates no language requirement for either the degree master of science or the degree doctor of philosophy, specifying competence in one or more languages may be desirable in some instances.

The department also participates in the interdepartmental program in interdepartmental majors in sustainable agriculture, transportation and water resources, and interdepartmental minors in gerontology.

Course requirements are listed below. Information about examinations, theses and dissertations, P.O.S. committees and other requirements are available on the Sociology Department web site.

Ph.D. Core Degree Requirements

Although responsibility for determining the student's course work resides with the POS committee, the Sociology Department has core courses that must be taken by all students. A graduate course taken elsewhere can be substituted for the Ph.D. core requirements with approval by the Departmental Officer of Graduate Education (DOGE) in consultation with the faculty.

A minimum of 72 semester credits (including master's degree credits) is required for graduation.

Required Courses for the Ph.D. Degree

STAT 404	Regression for Social and Behavioral Research	3
SOC 506	Classical Sociological Theory	3
SOC 511	Research Methodology for the Social Sciences	3
SOC 512	Applied Multivariate Statistics for Social and Behavioral Research	3
SOC 513	Qualitative Research Methods	3
SOC 520	Social Psychology: A Sociological Perspective	3
SOC 534	Race, Class and Gender Inequality	3
SOC 591	Orientation to Sociology	1
SOC 607	Contemporary Sociological Theory	3
SOC 699	Dissertation Research	8

No more than 12 credits of 590 (special topics) may be applied toward the Ph.D. degree requirements (72 credits).

Ph.D. Minor / Co-Major Requirements

Required Courses for the Ph.D. Minor

SOC 506	Classical Sociological Theory	3
SOC 511	Research Methodology for the Social Sciences	3
SOC 607	Contemporary Sociological Theory	3

One of the following three courses:

SOC 512	Applied Multivariate Statistics for Social and Behavioral Research	3
SOC 513	Qualitative Research Methods	3
SOC 613	Structural Equation Models for Social and Behavioral Research	3

And other Sociology courses (at least one of which must be at the 600 level) for a total of 24 credits in Sociology.

Required Courses for the Ph.D. Co-Major

STAT 404	Regression for Social and Behavioral Research	3
SOC 506	Classical Sociological Theory	3
SOC 511	Research Methodology for the Social Sciences	3
One Course in Advanced Methodology:		
SOC 512	Applied Multivariate Statistics for Social and Behavioral Research	3
SOC 513	Qualitative Research Methods	3
SOC 613	Structural Equation Models for Social and Behavioral Research	3
One Course in Advanced Sociology		
SOC 520	Social Psychology: A Sociological Perspective	3
SOC 534	Race, Class and Gender Inequality	3
SOC 591	Orientation to Sociology	1
SOC 607	Contemporary Sociological Theory	3
SOC 699	Dissertation Research	8

Co-Major Requirements for the Graduate Program in Sustainable Agriculture

The Graduate Program in Sustainable Agriculture (GPSA) develops student competence and expertise in the design, implementation, and evaluation of sustainable agricultural systems. The program's curriculum satisfies the formal requirements for the MS and Ph.D. degrees, as established by the ISU Graduate College, and fosters transdisciplinary and systems-level thinking.

The Department does not offer double majors in sociology.

For admission to the co-major program contact the graduate program coordinator.

M.S. Core Degree Requirements

Although responsibility for determining the student's course work resides with the POS committee, the Sociology Department has core courses that must be taken by all students. A graduate course taken elsewhere can be substituted for the core requirements with approval by the Departmental Officer of Graduate Education (DOGE) in consultation with the faculty.

Required Courses for the M.S. Degree

STAT 401	Statistical Methods for Research Workers	4
SOC 506	Classical Sociological Theory	3
SOC 511	Research Methodology for the Social Sciences	3
SOC 591	Orientation to Sociology	1
SOC 599	Research for Master's Thesis	6

A minimum of 30 semester credits is required for the M.S. degree.

No more than 6 credits of 590 (special topics) may be applied toward the M.S. degree requirements (30 credits).

M.S. Minor / Co-Major Requirements

Required Courses for the M.S. Minor

SOC 506	Classical Sociological Theory	3
SOC 511	Research Methodology for the Social Sciences	3

One additional course in sociology, or STAT 401, for a minimum of 9 credits.

Required Courses for the M.S. Co-Major

STAT 401	Statistical Methods for Research Workers	4
----------	--	---

SOC 506	Classical Sociological Theory	3
---------	-------------------------------	---

SOC 511	Research Methodology for the Social Sciences	3
---------	--	---

Three additional courses in sociology for a total of 19 credits.

The department does not offer double majors in sociology at the graduate level. Admission requirements to the co-major program are the same as for the major.

Co-Major Requirements for the Graduate Program in Sustainable Agriculture

The Graduate Program in Sustainable Agriculture (GPSA) develops student competence and expertise in the design, implementation, and evaluation of sustainable agricultural systems. The program's curriculum satisfies the formal requirements for the MS and PhD degrees, as established by the ISU Graduate College, and fosters transdisciplinary and systems-level thinking.

Software Engineering

For the undergraduate curriculum in Software Engineering (<http://www.se.iastate.edu>) leading to the degree Bachelor of Science. This curriculum is accredited under the General Criteria and Software Engineering Program Criteria by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

This curriculum is jointly administered by the Department of Computer Science and the Department of Electrical and Computer Engineering at Iowa State University. The Software Engineering program provides undergraduate students with the opportunity to learn software engineering fundamentals, to study applications of state-of-the-art software technologies and to prepare for the practice of software engineering. The student-faculty interaction necessary to realize this opportunity occurs within an environment motivated by the principle that excellence in undergraduate education is enhanced by an integrated commitment to successful, long-term research and outreach programs.

The software engineering curriculum offers emphasis areas in software engineering principles, process and practice. Students may also take elective courses in computer engineering and computer science.

Program Educational Objectives

Within five years of graduation, the graduates should:

1. attain a **productive career** in Software Engineering or related fields;
2. attain **leadership** roles and become **effective collaborators** to advance professional and organizational goals;
3. engage in **continuous learning** and professional development.

We expect that these objectives will be manifested in our graduates through the following five key attributes: (a) *peer-recognized expertise*, (b) *engagement in professional practice*, (c) *sustained learning*, (d) *leadership* and (e) *teamwork*.

Demonstration of expertise involves applying state-of-the-art practices for solving problems in the design, development, validation, evolution and sustainment of (software) products. Demonstration of professional engagement involves contributing locally and globally to the use of ethical, competent, and creative practices in industry, academia or the public sector. Demonstration of sustained learning involves the ability to adapt to rapid technological, environmental, and organizational changes through self-study and group study and through opportunities of professional development or graduate study. Demonstration of

leadership involves the ability to take initiative, and to facilitate the advancements of individuals and the community by influencing others and by having a widespread, positive impact on critical issues and projects. Finally, demonstration of teamwork involves the ability to work with collaborators who have varied expertise, and with diverse cultural and interdisciplinary backgrounds.

As a complement to the instructional activity, the Department of Computer Science and the Department of Electrical and Computer Engineering provide opportunities for each student to have experience with broadening activities. Students have the opportunity to gain practical industry experience in the cooperative education and internship program. Students have the opportunity to participate in advanced research activities. Through international exchange programs, students learn about engineering practices in other parts of the world.

Curriculum in Software Engineering

Administered by the Department of Electrical and Computer Engineering in the College of Engineering and the Department of Computer Science in the College of Liberal Arts and Sciences.

Leading to the degree bachelor of science.

Total credits required: 125 cr. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Note: Pass/Not Pass credits cannot be used to meet graduation requirements.

International Perspectives: 3 cr.¹

U.S. Diversity: 3 cr.¹

Communication Proficiency/Library requirement:

ENGL 150	Critical Thinking and Communication (C or better in this course)	3
ENGL 250	Written, Oral, Visual, and Electronic Composition (C or better in this course)	3
LIB 160	Information Literacy	1
Choose one of the following:		3
ENGL 309	Proposal and Report Writing (C or better in this course)	
ENGL 314	Technical Communication (C or better in this course)	

Total Credits 10

General Education Electives: 15 cr.²

Choose 1 course from the following:		3
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	
I E 305	Engineering Economic Analysis	
Arts and Humanities		6
Social Sciences		3
Additional Arts and Humanities or Social Sciences course		3

Total Credits 15

Basic Program: 27 cr.

A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section.

CHEM 167	General Chemistry for Engineering Students	4

Technical Elective ²		3
Supplementary Elective ²		9
Open Elective ²		3
Total Credits		38

Seminar/Co-op/Internships

S E 166	Careers in Software Engineering	R
S E 494	Software Engineering Portfolio Development	R

Co-op or internship (S E 396, S E 397, S E 398) is optional

Transfer Credit Requirements

The degree program must include a minimum of 30 credits at the 300-level or above in professional and technical courses earned at ISU in order to receive a B.S. in software engineering. These 30 credits must include S E 492 Senior Design Project II and credits in the core professional curriculum and/or in technical electives. The software engineering degree program requires a grade of C or better for any transfer credit course that is applied to the degree program.

1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program. U.S Diversity and International Perspectives courses may not be taken Pass/Not Pass.
2. Choose from department approved lists. (<https://www.se.iastate.edu/academics/resources>)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

See also: A 4-year plan of study grid showing course template by semester.

Note: International perspectives and U.S. diversity courses are used to meet the general education electives (<http://www.se.iastate.edu/academics/resources/#general>).

Total Credits: 125

* Total credits required - 125 credits. Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU Cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. Basic Program - A minimum GPA of 2.00 is required for this set of courses, including any transfer courses (please note that transfer course grades will not be calculated into the Basic Program GPA) Must receive a C or better grade in required English classes. General Educational Elective courses to be selected in consultation with SE advisers from a list of approved courses. They must include courses that satisfy university and college general education requirements. These courses include courses or categories of courses such as international perspectives and U.S. diversity, language, arts and humanities, and social sciences. Pass/Not Pass credit is not accepted.

Software Engineering Electives, Technical Electives, and Supplementary Electives must be selected from the program-approved list (<https://www.se.iastate.edu/academics/resources>).

¹ Core Professional Curriculum (A minimum GPA of 2.00 is required for this set of courses, including any transfer courses but transfer course grades will not be calculated into the Core GPA)

² Software Engineering students must have completed CPR E 281 and have obtained C or better in COM S 327 to enroll in COM S 321

³ Students who take the 4-credit lab courses CPR E 288, CPR E 308, and CPR E 381 instead of the corresponding 3-credit alternatives can apply the additional credits towards Supplementary Electives. The total number of credits required in Software Engineering Program remains the same for all students.

Speech Communication

The Speech Communication major (Administered by the Department of English) provides students opportunities to develop their understanding and appreciation of the human communication process and to enhance their oral and written communication practice. Speech communication students develop an awareness of the importance of oral communication and listening for success in their personal, civic, and professional lives; become familiar with behavioral research in persuasion; understand how language is used to create social change; develop competent delivery skills; assess the quality of arguments; evaluate information found in research and public discourse; and cultivate rhetorical sensitivity in order to better connect with individuals and audiences. In this way, the program contributes to the humanistic, aesthetic, and critical development of liberally educated students in order to prepare them for full and effective participation in society.

Undergraduate Study

The cross-disciplinary program in speech communication offers courses designed for all students as part of their general education and as a complement to their professional training. It also offers a major or minor in speech communication as well as an additional endorsement for secondary teachers who already have an endorsement in another content area.

Students who major or minor in speech communication will prepare themselves for a wide variety of employment opportunities in business, industry and government, as well as in non-profit and educational organizations. With their effective oral communication, listening, teamwork, problem-solving and leadership skills, speech communication students find positions in general business management: human resources, benefits, financial services, retail, sales and marketing and serve various organizations as recruiters, trainers, promotions managers, communication specialists, community outreach personnel and event planners. The program also prepares students for the study of law, theology, and for graduate level work in speech communication and related disciplines.

The program participates in the following interdisciplinary undergraduate minor programs: the interdisciplinary program in linguistics and the interdisciplinary program in technology and social change. Speech Communication also offers a core course and several optional courses in the Undergraduate Certificate Program in Community Leadership and Public Service.

Speech Communication Major

A student electing to major in speech communication must earn at least 120 credits with 45 credits at the 300/400 level. A minimum of 33 of those credits must be earned in Speech Communication courses where the student earns a grade of C or better. Our flexible curriculum with few prerequisites can help you meet the 33 hour requirement in a timely way.

Core Requirements (18 credits)

SP CM 110	Listening	3
SP CM 212	Fundamentals of Public Speaking	3

SP CM 327	Persuasion	3
or SP CM 350	Rhetorical Traditions	
SP CM 412	Rhetorical Criticism	3
SP CM 416	History of American Public Address	3
SP CM 497	Capstone Seminar	3

Additional Coursework (Choose at least 5 of the following for 15 credits)

SP CM 275	Analysis of Popular Culture Texts	3
SP CM 305	Language, Thought and Action	3
SP CM 312	Business and Professional Speaking	3
SP CM 313	Communication in Classrooms and Workshops	3
SP CM 322	Argumentation, Debate, and Critical Thinking	3
SP CM 323	Gender and Communication	3
SP CM 324	Legal Communication	3
SP CM 350	Rhetorical Traditions	3
SP CM 404	Seminar	3
SP CM 417	Campaign Rhetoric	3
SP CM 216	Great Speakers and Speeches	3
SP CM 327	Persuasion	3

Credits in SP CM 290 Special Projects or SP CM 499 Communication Internship cannot be applied toward the minimum required credits for the major.

The Communication Proficiency requirement may be met by (1) completion of ENGL 150 Critical Thinking and Communication, ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors), or its equivalent, with a grade in each of C or better; (2) one additional writing course beyond ENGL 250 Written, Oral, Visual, and Electronic Composition with a grade of C or better from the following approved list:

ENGL 302	Business Communication	3
ENGL 303	Free-Lance Writing for Popular Magazines	3
ENGL 304	Creative Writing: Fiction	3
ENGL 305	Creative Writing: Nonfiction	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3
ENGL 415	Business and Technical Editing	3
JL MC 201	Reporting and Writing for the Mass Media	3

Speech Communication Education

Students working toward a primary teaching endorsement in another discipline may add a speech communication endorsement as an additional area. Coursework prepares students to teach speech, dramatic arts, and media at the secondary school level. In addition, they prepare to direct co-curricular and extracurricular activities such as drama, speech and debate.

Each student seeking an additional endorsement in speech communication must meet a 29 hour requirement by taking the following courses:

SP CM 110	Listening	3
or COMST 102	Introduction to Interpersonal Communication	
SP CM 212	Fundamentals of Public Speaking	3
SP CM 313	Communication in Classrooms and Workshops	3

SP CM 322	Argumentation, Debate, and Critical Thinking	3
SP CM 412	Rhetorical Criticism	3
SP CM 495A	Independent Study: Directing Speech Activities	1
SP CM 495B	Independent Study: Teaching Speech	3
THTRE 358	Oral Interpretation	3
JL MC 101	Mass Media and Society	3
One of the following		3
THTRE 255	Introduction to Theatrical Production	
THTRE 360	Stagecraft	
THTRE 455	Directing I

Total Credits: 123-121

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the LAS foreign language requirement.

Speech Communication Choices include SP CM 205 (also ENGL 205), 305, 312, 313, 322, 323, 325 (also COMST 325 - has COMST prerequisites), 305 (also ENGL 350), and 417. Note: Students must earn a C or better in all Speech communication courses used to meet the 33 credits required for the major.

Speech Communication Minor

Students from any major can complement their studies with a Speech Communication Minor (http://www.speechcomm.iastate.edu/index.php?option=com_content&view=article&id=34&Itemid=29). The requirements for a minor in speech communication may be fulfilled by credit in SP CM 212 Fundamentals of Public Speaking plus at least 15 additional hours from the lists above, of which 9 credits are in courses numbered 300 or above.

Graduate Study

The program offers courses for a graduate minor in speech communication as well as supporting work for other disciplines. The requirements for a graduate minor (<http://www.speechcomm.iastate.edu>) in Speech Communication include:

SP CM 582	Advanced Rhetorical Analysis	3
Or		
SP CM 412	Rhetorical Criticism	3
Plus 9 additional hours selected from the following		9
SP CM 323	Gender and Communication	
SP CM 416	History of American Public Address	
SP CM 417	Campaign Rhetoric	
SP CM 504	Seminar	
SP CM 513	Proseminar: Teaching Fundamentals of Public Speaking	
SP CM 547	The History of Rhetorical Theory I: From Plato to Bacon	
SP CM 548	The History of Rhetorical Theory II: From Bacon to the Present	
SP CM 590	Special Topics	
SP CM 592	Core Studies in Rhetoric and Professional Communication	

The Program of Speech Communication also participates in the interdepartmental program leading to a master's degree in Interdisciplinary Graduate Studies.

Statistics

Undergraduate Study

For the undergraduate curriculum in liberal arts and sciences, major in statistics, leading to the degree bachelor of science, see Liberal Arts and Sciences, Curriculum.

The curriculum in liberal arts and sciences with a major in statistics is designed to prepare students for (1) entry level statistics positions requiring the B.S. degree in statistics in business, industry or commerce, nonprofit institutions, and in state or federal government; (2) graduate study in statistics. Entry-level positions include the following types of work: statistical design, analysis and interpretation of experiments

and surveys; data processing and analysis using modern computation facilities and statistical computing systems; application of statistical principles and methods in commercial areas such as finance, insurance, industrial research, marketing, manufacturing, and quality control. Nonprofit organizations such as large health study institutions have entry-level positions for B.S. graduates in statistics. Also, there are opportunities for work in statistics that require a major in a subject-matter field and a minor in statistics.

Students completing the undergraduate degree in statistics should have a broad understanding of the discipline of statistics. They should have a clear comprehension of the theoretical basis of statistical reasoning and should be proficient in the use of modern statistical methods and computing. Such graduates should have an ability to apply and convey statistical concepts and knowledge in oral and written form. They should be aware of ethical issues associated with polling and surveys and in the summarizing the outcomes of statistical studies.

Undergraduate majors in this department usually include in their programs:

STAT 201	Introduction to Statistical Concepts and Methods	4
One of the following options		
Option I		
MATH 165	Calculus I	
MATH 166	Calculus II	
MATH 265	Calculus III	
Option II		
MATH 165	Calculus I	
MATH 166H	Calculus II, Honors	
MATH 265H	Calculus III, Honors	
MATH 207	Matrices and Linear Algebra	3-4
or MATH 317	Theory of Linear Algebra	
COM S 207	Fundamentals of Computer Programming	3
STAT 301	Intermediate Statistical Concepts and Methods	4
STAT 341	Introduction to the Theory of Probability and Statistics I	3
STAT 342	Introduction to the Theory of Probability and Statistics II	3
STAT 402	Statistical Design and the Analysis of Experiments	3
STAT 421	Survey Sampling Techniques	3
STAT 479	Computer Processing of Statistical Data	3
STAT 480	Statistical Computing Applications	3

These courses plus at least six additional credits in statistics at the 400 level or above constitute the major. With the permission of the department, I E 361 Statistical Quality Assurance/STAT 361 Statistical Quality Assurance may be substituted for three credits of 400 level courses. It is advisable to have a minor in a field of application.

English and Speech proficiency requirement: The department requires a grade of C- or better in each of ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors), and completion of one of ENGL 302 Business Communication or ENGL 314 Technical Communication with a grade of C- or better. The department requires a passing grade in COMST 102 Introduction to Interpersonal Communication or SP CM 212 Fundamentals of Public Speaking.

Students intending to do graduate work in statistics normally will take additional courses in mathematics.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level.**

You must also complete the LAS foreign language requirement.

Minor

The department offers a minor in statistics which may be earned by completing an introductory course in statistics plus additional courses from 301, 326, 341, 342, 361, and 400 level or above to yield a total of at least 15 credits in statistics courses.

Graduate Study

The department offers graduate programs leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees with a major in statistics. Graduate work leading to a minor in statistics is available for students majoring in other programs, at both the M.S. and Ph.D. levels.

The Ph.D. degree is also offered as a co-major with other graduate programs. The department participates in inter-disciplinary graduate programs in Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Genetics, Human Computer Interaction, Nutritional Sciences, and Wind Energy Science, Engineering, and Policy.

Graduates of the M.S. program have an understanding of basic statistical theory and methods. Elective courses in the M.S. program provide an opportunity for students to emphasize particular areas of statistical methods or application in their program. Students complete a minimum of 34 semester credits, including work on a capstone project resulting in a written creative component under the direction of an individual major professor and presented in a final oral examination.

Graduates of the Ph.D. program in statistics have studied advanced theory and methods, and have demonstrated the ability to conduct independent research resulting in an original contribution to the discipline. Candidates for the Ph.D. degree in statistics complete a minimum of 72 semester credits, including at least 18 credits given for research activity, pass an oral preliminary examination, and submit a written dissertation containing original research that is defended in a final oral examination. Dissertation research is typically conducted in close collaboration with a major professor and usually results in publishable material. The department does not offer specific program tracks or areas of emphasis, but the diversity of elective courses and research areas of faculty allow students to tailor their individual programs to reflect areas of particular interest.

Graduates of co-major Ph.D. programs in statistics and an applied scientific discipline have mastered basic statistical theory and have studied advanced methodology. Students complete a minimum of 72 semester credits for courses in statistics and the chosen scientific discipline. Students conduct research that is a combination of statistical methodology and the scientific discipline. Co-major professors work with the student to prepare for an oral preliminary examination and conduct research leading to a single dissertation project that produces an original contribution to at least one of the two disciplines that is defended in a final oral examination.

Graduates of co-major Ph.D. programs in statistics and an area of theoretical mathematics have mastered basic statistical methods and have studied advanced statistical theory. Students complete a minimum of 72 semester credits. Co-major professors assist the student in preparing a dissertation that represents original research that makes a contribution at the interface of statistical theory and a sub-discipline of mathematics. The dissertation is defended in a final oral examination.

Teaching English as a Second Language (TESL)

The Minor in TESL prepares students to teach English to nonnative speakers of English, either in community programs in the United States or in overseas locations. The Minor provides understanding of how English works (ENGL/LING 219) and practical and theoretical applications in how English is taught to those who do not speak English natively (ENGL/LING 322, ENGL/LING 324, ENGL/LING 325, and ENGL/LING 425). The TESL

Minor prepares students to cross cultural boundaries to learn about, interact with, and assist speakers of other languages in learning English, the leading global language today. A TESL Minor will help students become global citizens through interacting with and teaching those from around the world who come to the United States and by giving students skills that will allow them to live and work in other countries. All classes listed are requirements for the Minor in TESL (15 credits). A C or better is required in each course used to satisfy the minor. Contact the Linguistics advising office for more information.

ENGL 219	Introduction to Linguistics	3
ENGL 425	Second Language Learning and Teaching	3
ENGL/LING 322X	Language and Society	3
ENGL/LING 324X	Introduction to Teaching ESL Literacy	3
ENGL/LING 325X	Teaching Methods for ESL Learners: Oral Communication Skills	3

Technical Communication

Technical Communication Major Requirements

Technical Communication majors must take 34-36 credits within the major and 6 hours in a designated area of concentration related to technology, science, or design (an acceptable minor will also fulfill this requirement). Majors develop advanced skills in multiple aspects of technical communication and apply their knowledge of technical communication to a specific discipline.

ENGL 310	Rhetorical Analysis	3
ENGL 314	Technical Communication	3
ENGL 350	Rhetorical Traditions	3
ENGL 487	Internship in Business, Technical, and Professional Communication	1-3
Choose 3:		9

(Note: Students planning to take ENGL 415 Business and Technical Editing in the future should take ENGL 220 Descriptive English Grammar for 3 of these credits.)

ENGL 220	Descriptive English Grammar	
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 312	Biological Communication	
ENGL 313	Rhetorical Website Design	
ENGL 332	Visual Communication of Quantitative Information	

Choose 5: 15

ENGL 411	Technology, Rhetoric, and Professional Communication	
ENGL 415	Business and Technical Editing	
ENGL 416	Visual Aspects of Business and Technical Communication	
ENGL 418	Seminar in Argumentation	
ENGL 477	Seminar in Technical Communication	
ENGL 529	Multimedia Content Management	
ENGL 542	Document Design for Professional Communication	
ENGL 549	Multimedia Design in Professional Communication	

Designated Area of Concentration (DAC) in technical, scientific, or design field 6

Total Credits

40-42

Designated Area of Concentration Courses

The Designated Area of Concentration (DAC) is a student-designed grouping of related courses in a technical, scientific, or design field that will meet the student's professional or academic interests. Courses for the 6-credit DAC must be taken outside the English Department and approved by the Technical Communication Program Adviser. A second major or a minor in areas such as computer science, social science, natural science, entrepreneurial studies, design studies, engineering studies, or another technical, scientific, or design field may substitute for the DAC.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the LAS foreign language requirement.

Technical Communication Minor Requirements

The department offers a minor in Technical Communication, which students may earn by completing the following:

ENGL 314	Technical Communication	3
Choose 4:		12
ENGL 302	Business Communication	
ENGL 309	Proposal and Report Writing	
ENGL 310	Rhetorical Analysis	
ENGL 312	Biological Communication	
ENGL 313	Rhetorical Website Design	
ENGL 332	Visual Communication of Quantitative Information	
ENGL 350	Rhetorical Traditions	
or with the appropriate prerequisites		
ENGL 411	Technology, Rhetoric, and Professional Communication	
ENGL 415	Business and Technical Editing	
ENGL 416	Visual Aspects of Business and Technical Communication	
ENGL 418	Seminar in Argumentation	
ENGL 477	Seminar in Technical Communication	
ENGL 529	Multimedia Content Management	
ENGL 542	Document Design for Professional Communication	
ENGL 549	Multimedia Design in Professional Communication	

Total Credits **15**

Nine of the 15 credits must be 300 level or above and students must earn a grade of C (not C-) or higher in each course taken in the minor. Up to 6 of the 15 credits taken for the minor may be used to meet other degree program requirements. Students may design their minor programs around their own interests but are encouraged to work with the Technical Communication Program Adviser.

Note: Students should check the ISU catalog to be sure that they meet prerequisites if they intend to register for 400+ courses.

Women's Studies**Degree: Women's Studies (B.A., B.S.)**

The Women's and Gender Studies Program in the College of Liberal Arts and Sciences is cross-disciplinary, offering a minor and major in "Women's Studies". This program provides an opportunity for students to examine gender and women's roles, contributions, and status in social and cultural context and to investigate a variety of disciplines from feminist perspectives. The field of women's and gender studies creates

an understanding that interrelated factors, e.g., race, ethnicity, class, age, disability, gender identity, religion, national origin, and sexual orientation, inform knowledge of women's history, culture, and social roles.

Women's and Gender Studies seeks to improve critical thinking and to provide students with the intellectual means to question prevailing assumptions. It encourages students to explore the contexts and ideological origins of knowledge and to examine the relationship between knowledge and power in society. By promoting social responsibility, this area of study focuses on the connections between personal experience and political activity, and validates student contributions and voices.

Graduates from this program are skilled in critical thinking, research methods, and effective communication. Because they have developed a thorough understanding of gender, race, and class, they can understand and work effectively with employers, colleagues, and clients to analyze and address complex social problems. Women's and Gender Studies graduates also acquire strong backgrounds for careers in areas such as counseling, education, human resources, international development, public policy, politics, business, or law. The program includes core courses and cross-listed courses in anthropology, art history, classical studies, economics, English, history, health and human performance, political science, psychology, religion, sociology, speech communication, and world languages and cultures. An undergraduate major requires 33 credits of core and cross-listed courses. Women's Studies majors must satisfy the following requirements:

1. 21 credits selected from Women's Studies core courses (W S).

A. Required core courses:

W S 201	Introduction to Women's Studies	3
W S 301	International Perspectives on Women and Gender	3
W S 401	Feminist Theories	3
W S 402	Feminist Research in Action	3
W S 499	Senior Thesis	3
or W S 491	Senior Internship	

B. The remaining 6 credits should be chosen from the Women's Studies core courses:

W S 203	Introduction to Lesbian Studies	3
W S 205	Introduction to Queer Studies	3
W S 320	Ecofeminism	3
W S 350	Women of Color in the U.S.	3
W S 425	Intersections of Race, Class and Gender	3
W S 435	Women and Development	3
W S 450	Topics in Women's Studies (may be taken more than once)	3

2. 12 credits selected from W S cross-listed courses or W S core courses.

Women's Studies majors are encouraged to declare either a minor or a second major in a different program or department.

Communication Proficiency requirement:

The Women's Studies major requires an average grade of C- or better in ENGL 150 and ENGL 250 (or ENGL 250H) and W S 201.

Students in all ISU majors must complete a three-credit course in U.S. diversity and a three-credit course in international perspectives. Check (<http://www.registrar.iastate.edu/courses/div-ip-guide.html>) for a list of approved courses. Discuss with your adviser how the two courses that you select can be applied to your graduation plan.

LAS majors require a minimum of 120 credits, **including a minimum of 45 credits at the 300/400 level**. You must also complete the LAS foreign language requirement.

¹ A minor or second major is required. The degree of Bachelor of Arts or Bachelor of Science will be determined by the student's choice of the minor or second major.

² Required course.

Minor

Undergraduate students may minor in Women's Studies by taking 15 semester hours of Women's Studies classes, including:

W S 201	Introduction to Women's Studies	3
W S 301	International Perspectives on Women and Gender	3
one 400 level core Women's Studies course		3
6 additional credits of core or cross-listed courses		6

Any student can declare a major or minor in Women's Studies or choose to co-major in another program. Students interested in a minor or major in Women's Studies should contact the Director of the program.

Graduate Study

The graduate minor in Women's Studies is designed to provide students with knowledge of theories and methods within a variety of approaches in feminist scholarship. The program seeks to integrate and synthesize knowledge from many disciplines and to offer students opportunities for systematic study of gender and women's experiences and perspectives in all knowledge fields. Students will be prepared to take leadership roles in supporting gender equity and diversity in their careers in education, social service work, business, law, public policy, governmental and non-governmental organizations, and research.

The graduate minor requires 12 credits for students enrolled in a master's or a doctoral degree program. Students are required to take either W S 501 Contemporary Feminist Theories or W S 502 Advanced Seminar in Feminist Research Methods; taking both is strongly recommended. Students will also take two or three electives selected from the list of core and cross-listed Women's Studies courses approved for graduate study. At least one member of the Women's Studies faculty will serve on the program of study for doctoral students. A list of eligible faculty members may be obtained from the Director of the Women's and Gender Studies Program.

World Languages and Cultures**Degree: World Languages and Cultures, B.A.**

Curriculum: World language study should be an integral part of an academic program for most students. The theoretical understanding of and practical experience in language underlie many intellectual disciplines that try to meet the complex problems of contemporary society. Courses offered by the Department of World Languages and Cultures are designed to develop students' understanding of a second culture through the language spoken by that culture.

Upon the completion of their program of studies in the Department of World Languages and Cultures, majors with a concentration in French, German, or Spanish will demonstrate proficiency in five goal areas: Communication, Cultures, Connections, Comparisons, and Communities. Students will be able to:

1. use their concentration language to present and interpret information and to communicate both orally and in writing;
2. demonstrate an understanding of the relationships among the products, practices, and perspectives of the culture(s) in which their concentration language is spoken;

3. demonstrate their ability to acquire information and further their knowledge through their concentration language;
4. demonstrate an understanding of the nature of language and the concept of culture by making comparisons with their own language and culture(s); and
5. demonstrate a desire to become a life-long learner of their concentration language.

Graduates will achieve both linguistic proficiency and cultural literacy through the study of the language and culture of their program. Linguistic proficiency entails the ability to function effectively in the target language and the ability to communicate competently with native speakers of the target language. Students of Latin and Ancient Greek demonstrate proficiency by becoming able to read the languages and to translate from these languages into clear and idiomatic English. Cultural literacy includes a general knowledge of the culture's history, familiarity with its literature, and basic knowledge of its social and political institutions.

The Department offers a major in World Languages and Cultures with two options, leading to the Bachelor of Arts degree:

1. Languages and Cultures with a Concentration in French, German, or Spanish;
2. Languages and Cultures for Professions (as a second major only) with a Concentration in French, German, or Spanish.

The Department offers minors in Chinese Studies, French, German, Russian Studies, Spanish, and World Film Studies; and instruction in American Sign Language, Arabic, and Classical Greek and Latin. The Department also houses the College of Liberal Arts and Sciences' Programs in Classical Studies, International Studies, and U.S. Latino/a Studies.

A full statement of requirements for majors and minors may be obtained from the Department. For a complete statement of all the college degree requirements, see Liberal Arts and Sciences, Curriculum. Current and detailed information about the Department, including placement information, is available on-line at www.language.iastate.edu (<http://www.language.iastate.edu>).

Policies

Students who have had formal training in world languages offered at Iowa State may obtain credit by passing appropriate examinations. Students with native fluency in languages taught at Iowa State may not enroll in or take the Exam for Credit in elementary or intermediate courses (100 and 200 level) in their native language. Students are considered to have native fluency if their ethnic first language as indicated on the matriculation form is the language in which they wish to enroll. Students are also considered to have native fluency if they have had substantial attendance at a secondary school or university where the language of instruction is the language in which they wish to enroll at ISU. Students with native fluency may be eligible to enroll in literature and civilization courses in their native language at the 300 level or above; such students must also consult the department office to determine eligibility for advanced composition and conversation courses (300 level and above). Students who have completed three or more years of high-school world language study may not enroll in or receive credit for 101-102 in those languages; credit may be obtained by passing the appropriate Exam for Credit or by completing an advanced sequence (200-level or higher) in that language. Students who complete an approved sequence of courses in a single language at the 200- or 300-level (e.g., 201 and 202 or 301 and 302) with a grade of C- or higher are eligible to receive credit for 101 and

102 in that same language if they have not received credit for a 101 or 102 course in the language. Students who complete a 102 course with a grade of C- or higher are eligible to receive credit for 101 in that same language if they have not received credit for 101 in the same language. Students should contact the department after completion of the course sequence to receive credit. Courses in the 101-102 level may not be taken on a remedial basis.

Students who have completed two years but less than three years of a single high-school world language may not enroll in a 101 course in that language. These students may enroll in either a 102 course in that language, or in the case of Spanish, SPAN 097 Accelerated Spanish Review. Before enrolling in either SPAN 097 Accelerated Spanish Review or a 102 language course, students are recommended to take the on-line placement test available at www.language.iastate.edu (<http://www.language.iastate.edu>). After completing the online placement test, students who believe that they have extenuating circumstances may appeal to the Department of World Languages and Cultures in order to request enrollment in a 101 language course.

SPAN 097 Accelerated Spanish Review is designed for students who need additional work in the language at the first-year level (101-102) and are not planning to continue their language study at the second-year 201-202 level. Students who complete with a passing grade will have fulfilled the LAS world language requirement. Students who have completed SPAN 097 Accelerated Spanish Review and wish to pursue further study in Spanish at the 201-202 level may enroll in 102.

Students with disabilities who need to satisfy the world language requirement may direct questions to their academic adviser, the Department of World Languages and Cultures, or the Disability Resources Office.

Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is not normally available.

The Department of World Languages and Cultures participates in the Iowa Regents' world language summer study abroad programs in Morocco, Peru and Spain. The Department also offers summer programs in Greece, Russia, Spain and Mexico; and semester study abroad programs in Mexico and Spain. Information concerning these programs can be obtained directly from the Department.

Language and literature courses numbered 300 and above are principally taught in the target language; courses numbered in the 270s, 370s, and 470s are taught in English. For courses taught in English about Ancient Greek and Rome, see Classical Studies. Students may not take intermediate (200 level) courses for credit after successfully completing any advanced (300/400 level) course, except those in the 370 series or courses taught in English translation. Students who have successfully completed any course in the intermediate (200 level) sequence may not take a lower-numbered course in that sequence for a grade.

Students at all levels of world language study will have access to the Language Studies Resource Center, located in 3142 Pearson. The Resource Center contains an extensive collection of world language materials, including audio-visual materials, electronic resources, music, books, language specific software and hardware, and other course-related materials.

Materials fees: Each student enrolled in a 100- through 200- level world language course is assessed a materials and professional support fee of \$25.00 per course. If a student drops a course subject to the fee by the 15th day of the semester the fee for that course will not be assessed.

Communication Proficiency requirement: The Department requires a grade of C- or better in each of ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition (ENGL 250H Written, Oral, Visual, and Electronic Composition: Honors), and a grade of C or better in any course numbered between 370 and 379 taught by the Department of World Languages and Cultures or the interdepartmental program in Classical Studies.

Languages and Cultures for Professions (LCP)

Students with primary majors in the College of Business, the College of Engineering, or the College of Agriculture and Life Sciences are encouraged to complete an LCP second major option in World Languages and Cultures with a concentration in French, German, Spanish, or an LCP minor option in Chinese Studies or Russian. The primary objective of the LCP option is to provide learning environments within which students can achieve global literacy, linguistic proficiency, and intercultural competence. In the LCP curriculum, students will learn how professions are shaped by social and cultural forces and, alternatively, how professions shape society. In courses on contemporary culture and society, students will identify and analyze issues dealing with the complex interrelationships of languages and cultures and consider how they may affect their chosen profession. Students will experience living and working in diverse cultural settings through study abroad and internship opportunities offered through the LCP program and/or in collaboration with the Colleges of Business, Engineering, and Agriculture and Life Sciences. Students enrolled in the LCP second major option may receive non-graded academic credit for the successful completion of internships (WLC courses numbered 499 in each language area).

For the LCP second major option, students will complete 30 credits within their language concentration beyond the fourth-semester level, selected from the list of approved LCP core courses and electives designated for their respective college curricula in either Business, Engineering, or Agriculture and Life Sciences. Students may only enroll in the LCP option as a second major and may not graduate with the LCP option in the WLC major alone.

Students in the College of Business may combine course work in the International Business (IB) Secondary Major with course work in LCP by selecting from a list of approved options. Students should consult their academic adviser in the College of Business and the WLC adviser for coursework and international experience that fulfill requirements in both the IB and LCP major options.

American Sign Language (ASL) Courses primarily for undergraduate students

ASL 101: American Sign Language I (4-0) Cr. 4. F.S.

Introduction to American Sign Language (ASL). Development of expressive and receptive skills including vocabulary, grammar, usage, and cultural information. Note: Distinct from "Signed English". ASL is a natural language with its own rules of grammar and usage. Meets U.S. Diversity Requirement

ASL 102: American Sign Language II

(4-0) Cr. 4. S.

Prereq: ASL 101

Introduction to American Sign Language (ASL) II continues development of expressive and receptive skills introduced in American Sign Language I, including vocabulary, grammar, usage, and cultural information. Distinct from "Signed English". ASL is a natural language with its own rules of grammar and usage.

Meets U.S. Diversity Requirement

ASL 201: Intermediate American Sign Language I

(4-0) Cr. 4. F.

Prereq: ASL 102 or equivalent.

Development of fluency for intermediate conversational skills. Review of grammar and varying grammatical forms for both structured and unstructured social situations such as sharing opinions, discussing weekend activities, and exchanging views on current topics.

ASL 202: Intermediate American Sign Language II

(4-0) Cr. 4. S.

Prereq: ASL 201 or equivalent.

A continuation and further application of language principles learned in ASL 201, to deepen ability to actively engage in dialogue both in structured and unstructured social situations. Further fluency in intermediate conversational skills will be developed, particularly in the areas of semantic equivalence and dialogic/monologic register.

ASL 275: Topics in Deaf Culture

(3-0) Cr. 3.

Focus on contemporary topics in Deaf Culture, Communities, and History. Readings and discussion from a wide range of sources. Topics vary according to faculty interest.

Meets U.S. Diversity Requirement

ASL 490: Independent Study

Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: 6 credits in ASL and permission of department chair

Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 6 credits of ASL 490 may be counted towards graduation.

Arabic (Arabc)

Courses primarily for undergraduate students

ARABC 101: Elementary Arabic I

(4-0) Cr. 4. F.

Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture. Attention to the use of the Arabic alphabet.

ARABC 102: Elementary Arabic II

(4-0) Cr. 4. S.

Prereq: ARABC 101 or placement by department exam.

Continuation of ARABC 101. Beginning level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.

Meets International Perspectives Requirement.

ARABC 195: Study Abroad

Cr. arr. Alt. SS., offered irregularly.

Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic.

ARABC 201: Intermediate Arabic I

(4-0) Cr. 4. F.

Prereq: ARABC 102 or placement by department exam

Intermediate level development of reading, writing, listening comprehension, and speaking in Arabic, within the context of Arabic culture.

Meets International Perspectives Requirement.

ARABC 202: Intermediate Arabic II

(4-0) Cr. 4.

Prereq: ARABC 201 or placement by department exam

Intermediate development of reading, writing, listening comprehension, and speaking skills in Modern Standard Arabic within the context of the Arabic world.

Meets International Perspectives Requirement.

ARABC 295: Study Abroad

Cr. arr. Alt. SS., offered irregularly.

Prereq: ARABC 102 or equivalent

Supervised instruction in Arabic language and culture, formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Arabic.

Courses primarily for undergraduate students**CHIN 101: Elementary Mandarin Chinese I**

(5-0) Cr. 5. F.

Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters.

CHIN 102: Elementary Mandarin Chinese II

(5-0) Cr. 5. S.

Prereq: CHIN 101

Introduction to spoken and written colloquial Mandarin through pinyin and simplified characters.

Meets International Perspectives Requirement.

CHIN 201: Intermediate Mandarin Chinese I

(5-0) Cr. 5. F.

Prereq: CHIN 102

Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. Meets International Perspectives Requirement.

CHIN 202: Intermediate Mandarin Chinese II

(5-0) Cr. 5. S.

Prereq: CHIN 201

Development of speaking, writing, reading, and listening skills. Review and expansion of grammar skills, intensification of character acquisition. Meets International Perspectives Requirement.

CHIN 272: Introduction to Chinese Culture

(3-0) Cr. 3. S.

Interdisciplinary introduction to Chinese society and culture from earliest times to the present. Topics include ancient literature, philosophy, religion, art, architecture, customs, transition to a modern society, social changes, urban life, popular culture, and contemporary values and ideas. Meets International Perspectives Requirement.

CHIN 301: Advanced Mandarin Chinese I

(3-0) Cr. 3. F.

Prereq: CHIN 202 or equivalent

Continuing development of speaking, writing, reading, and listening skills beyond intermediate level. Expansion of cultural literacy through a variety of texts from the humanities, social sciences, mass media and business. Meets International Perspectives Requirement.

CHIN 302: Advanced Mandarin Chinese II

(3-0) Cr. 3. S.

Prereq: CHIN 301 or equivalent

Continuing development of speaking, writing, reading, and listening skills beyond intermediate level. Expansion of cultural literacy through a variety of texts from the humanities, social sciences, mass media and business. Meets International Perspectives Requirement.

CHIN 304: Chinese for Global Professionals

(4-0) Cr. 4. S.

Prereq: CHIN 202 or equivalent

Introduction to professional language and culture in China and Chinese-speaking regions in Asia. Development of all four language skills, focusing on practical applications in the professional contexts. Development of global awareness and cross-cultural understanding. Preparation for internships. Meets International Perspectives Requirement.

CHIN 370: Chinese Literature in English Translation

(3-0) Cr. 3. F.

Prereq: ENGL 150 or equivalent

Topics may include traditional prose, poetry, novel and drama; twentieth-century fiction and film. All readings and class discussions in English. Meets International Perspectives Requirement.

CHIN 375: China Today

(3-2) Cr. 3-4. S.

Prereq: ENGL 250 or equivalent

Focusing on contemporary society, culture, literature and the arts. All readings, discussions, and papers in English. Topics vary from year to year. Meets International Perspectives Requirement.

CHIN 403: Seminar in Chinese Language and Culture

(3-0) Cr. 3.

Prereq: CHIN 302 or equivalent

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese. Meets International Perspectives Requirement.

CHIN 403A: Seminar in Chinese Language and Culture: Translating Contemporary Chinese Texts

(3-0) Cr. 3.

Prereq: CHIN 302

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese. Meets International Perspectives Requirement.

CHIN 403B: Seminar in Chinese Language and Culture: Topics on Business and Professions

(3-0) Cr. 3.

Prereq: CHIN 302 or equivalent

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese. Meets International Perspectives Requirement.

CHIN 403C: Seminar in Chinese Language and Culture: Reading Chinese Texts

(3-0) Cr. 3.

Prereq: CHIN 302 or equivalent

Critical understanding of authentic texts at the advanced level through reading, translation, and/or application in professional contexts; consolidation of existing language skills, in-depth analysis of cultural issues, and development of professional language proficiency. Taught in Chinese. Meets International Perspectives Requirement.

CHIN 490: Independent Study

Cr. 1-6. Repeatable.

Prereq: 6 credits in Chinese and permission of department chair

Designed to meet student needs in areas beyond current course offerings or to accommodate the desire to integrate a study of literature or language with special issues in major fields.

French (Frnch)

World Languages and Cultures majors with a concentration in French have two options:

WLC Option I: French Studies

Under WLC Option I, students with a concentration in French Studies must complete at least 30 credits beyond the intermediate (FRNCH 201 Intermediate French I-FRNCH 202 Intermediate French II) level.

Major option in French Studies (30 credits total)

A. Required Core Courses (12 credits)

FRNCH 301	French Writing and Grammar	3
FRNCH 302	Reading and Writing French	3
FRNCH 340	Studies in French or Francophone Literature	3
FRNCH 476	French Civilization Seminar in English	3

B. Additional Courses (18 credits)

FRNCH 304	French for Global Professionals	3
FRNCH 305	French Conversation	3
FRNCH 320	France Today	3
FRNCH 326	Studies in French or Francophone Film	3
FRNCH 340	Studies in French or Francophone Literature	3
FRNCH 370	French Studies in English	3
FRNCH 378	French Film Studies in English	3

Curricular Notes: no more than 6 credits from FRNCH 370 French Studies in English and/or FRNCH 378 French Film Studies in English may be counted toward the major. major. FRNCH 476 French Civilization Seminar in English and 3 credits of FRNCH 340 Studies in French or Francophone

Literature must be completed on campus and may not be fulfilled through transfer or study abroad.

Minor in French

The French Minor requires 15 credits of courses taught in French. Six credits must be in the required core: French 301 and 302. At least three credits must be chosen from French 304 and 340. Courses instructed in English (French 370, 378, and 476) cannot count toward the French minor.

Six credits must be in the required core:

FRNCH 301	French Writing and Grammar	3
FRNCH 302	Reading and Writing French	3

Three credits must be in literature or business culture taught in French:

FRNCH 304	French for Global Professionals	3
FRNCH 340	Studies in French or Francophone Literature	3

WLC Option II: Languages and Cultures for Professions

Under WLC Option II, students with a concentration in French must complete at least 30 credits beyond the intermediate (FRNCH 201 - FRNCH 202) level.

I. Languages and Cultures for Professions (College of Agriculture and Life Sciences)

Students with a primary major in the College of Agriculture and Life Sciences pursuing the second major option in French are required to take at least 30 credits beyond the intermediate (FRNCH 201 Intermediate French I-FRNCH 202 Intermediate French II) level.

Agriculture and Life Sciences LCP: Second Major Option in French (30 credits total)

A. Required Core Courses (21 credits) Additional study abroad credit from an approved study abroad program may be applied to the major.

FRNCH 301	French Writing and Grammar	3
FRNCH 302	Reading and Writing French	3
FRNCH 304	French for Global Professionals	3
FRNCH 320	France Today	3
FRNCH 340	Studies in French or Francophone Literature	3
FRNCH 476	French Civilization Seminar in English	3
FRNCH 499	Internship in French	1-3

Additional Courses (9 credits)

FRNCH 305	French Conversation	3
FRNCH 326	Studies in French or Francophone Film	3
FRNCH 340	Studies in French or Francophone Literature	3
FRNCH 370	French Studies in English	3
FRNCH 378	French Film Studies in English	3

Curricular Notes: no more than 6 credits from FRNCH 370 French Studies in English and/or FRNCH 378 French Film Studies in English may be counted toward the major. Students may enroll in the Languages and Cultures for Professions (LCP) Option in French as a Second Major only. They may not graduate with the Second Major in LCP alone.

II. Languages and Cultures for Professions (College of Business)

Students in the College of Business pursuing the second major option in French are required to take at least 30 credits beyond the intermediate (FRNCH 201 Intermediate French I-FRNCH 202 Intermediate French II) level.

Business LCP: Second Major Option in French (30 credits total)

A. Required Core Courses (21 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

FRNCH 301	French Writing and Grammar	3
FRNCH 302	Reading and Writing French	3
FRNCH 304	French for Global Professionals	3
FRNCH 320	France Today	3
FRNCH 340	Studies in French or Francophone Literature	3
FRNCH 476	French Civilization Seminar in English	3
FRNCH 499	Internship in French	1-3

B. Additional Courses (9 credits)

FRNCH 305	French Conversation	3
FRNCH 326	Studies in French or Francophone Film	3
FRNCH 340	Studies in French or Francophone Literature	3
FRNCH 370	French Studies in English	3
FRNCH 378	French Film Studies in English	3

Curricular Notes: no more than 6 credits from FRNCH 370 French Studies in English and/or FRNCH 378 French Film Studies in English may be counted toward the major. Students may enroll in the Languages and Cultures for Professions (LCP) Option in French as a Second Major only. They may not graduate with the Second Major in LCP alone.

III. Languages and Cultures for Professions (College of Engineering)

Students with a primary major in the College of Engineering pursuing the second major option in French are required to take at least 30 credits beyond the intermediate (FRNCH 201 Intermediate French I- FRNCH 202 Intermediate French II) level.

Engineering LCP: Second Major Option in French (30 credits total).

A. Required Core Courses (21 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

FRNCH 301	French Writing and Grammar	3
FRNCH 302	Reading and Writing French	3
FRNCH 304	French for Global Professionals	3
FRNCH 320	France Today	3
FRNCH 340	Studies in French or Francophone Literature	3
FRNCH 476	French Civilization Seminar in English	3
FRNCH 499	Internship in French	1-3

B. Additional Courses (9 credits)

FRNCH 305	French Conversation	3
FRNCH 326	Studies in French or Francophone Film	3
FRNCH 340	Studies in French or Francophone Literature	3
FRNCH 370	French Studies in English	3

FRNCH 378 French Film Studies in English

Curricular Notes: no more than 6 credits from FRNCH 370 French Studies in English and/or FRNCH 378 French Film Studies in English may be counted toward the major. Students may enroll in the Languages and Cultures for Professions (LCP) Option in French as a Second Major only. They may not graduate with the Second Major in LCP alone.

Courses primarily for undergraduate students

FRNCH 101: Elementary French I

(4-0) Cr. 4. F.SS.

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

FRNCH 102: Elementary French II

(4-0) Cr. 4. S.SS.

Prereq: FRNCH 101

Beginning level development of reading, writing, listening comprehension, and speaking in French, within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Meets International Perspectives Requirement.

FRNCH 201: Intermediate French I

(4-0) Cr. 4. F.

Prereq: FRNCH 102

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Meets International Perspectives Requirement.

FRNCH 202: Intermediate French II

(4-0) Cr. 4. S.

Prereq: FRNCH 201

Intermediate level development of reading, writing, listening comprehension, and speaking in French within the context of French culture. Credit by examination in the Department of World Languages and Cultures for courses numbered 101, 102, 201, and 202 is available only to students who are not currently enrolled in the course. Credit by examination for other courses in the Department is normally not available.

Meets International Perspectives Requirement.

FRNCH 301: French Writing and Grammar

(3-0) Cr. 3. F.

Prereq: FRNCH 202

Emphasis on developing functional language skills in reading and writing. Selective review of grammar within the context of cultural and literary prose.

Meets International Perspectives Requirement.

3 FRNCH 302: Reading and Writing French

(3-0) Cr. 3. S.

Prereq: FRNCH 301

Readings in French prose, theater and poetry. Introduction to close reading and analysis. Development of reading and writing skills for upper-level courses.

Meets International Perspectives Requirement.

FRNCH 304: French for Global Professionals

(3-0) Cr. 3.

Prereq: FRNCH 301

Communication in business and professional contexts in French-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice. Emphasis on working across French-American cultures. Preparation for internships.

Meets International Perspectives Requirement.

FRNCH 305: French Conversation

(3-0) Cr. 3.

Prereq: FRNCH 202

Intensive conversational and listening practice emphasizing contemporary France and the Francophone world. Native or near-native speakers are not eligible to enroll.

Meets International Perspectives Requirement.

FRNCH 320: France Today

(3-0) Cr. 3.

Prereq: FRNCH 202

Selected topics dealing with contemporary French society and culture.

Meets International Perspectives Requirement.

FRNCH 326: Studies in French or Francophone Film

(3-0) Cr. 3. Repeatable.

Prereq: FRNCH 302 or concurrent enrollment in FRNCH 302

In-depth study of a selected filmmaker, genre, or movement. Emphasis on analytical interpretation and relationship between film and French or Francophone culture, history, and society.

Meets International Perspectives Requirement.

FRNCH 340: Studies in French or Francophone Literature

(3-0) Cr. 3. Repeatable.

Prereq: FRNCH 302 or concurrent enrollment in FRNCH 302

In-depth study of a selected topic, genre, movement or writer in French or Francophone literature, civilization or culture. Emphasis on close readings and discussion.

Meets International Perspectives Requirement.

FRNCH 370: French Studies in English

(3-0) Cr. 3. Repeatable.

Author, genre, or period study in French or Francophone history, literature, or culture. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

FRNCH 370F: Studies in English Translation: French Topics on Women and Gender Studies

(Cross-listed with W S). (3-0) Cr. 3. Repeatable.

Topics vary according to faculty interest. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

FRNCH 378: French Film Studies in English

(2-2) Cr. 3. Repeatable.

Analysis and interpretation of film in French society. Topics vary according to faculty interest. Film directors, genres, movements (e.g. The New Wave), historical survey, aesthetics, and cinematography. Readings, discussions and papers in English.

Meets International Perspectives Requirement.

FRNCH 476: French Civilization Seminar in English

(3-0) Cr. 3. S.

Advanced seminar in French civilization. Topics vary according to faculty interest. Readings, discussions, and paper in English.

Meets International Perspectives Requirement.

FRNCH 490: Independent Study

Cr. 1-6. Repeatable, maximum of 9 credits.

Prereq: Permission of French staff and department chair

Designed to meet the needs of students who wish to focus on areas other than those in which courses are offered. No more than 9 credits in Frnch 490 may be counted toward graduation.

FRNCH 499: Internship in French

Cr. 1-3. Repeatable, maximum of 3 credits. F.S.SS.

Prereq: 9 credits of French at the 300 level; permission of advisor and WLC Internship Coordinator. Work experience using French language skills in the public or private sector, combined with academic work under faculty supervision

Credits may be applied only to LCP major. Offered on a satisfactory-fail basis only. No more than 3 credits of Frnch 499 may be applied to the major.

FRNCH 590: Special Topics in French

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 creditis of 400 level French

FRNCH 590A: Special Topics in French: Literature or Literary Criticism

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 creditis of 400 level French

FRNCH 590B: Special Topics in French: Linguistics

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 creditis of 400 level French

FRNCH 590C: Special Topics in French: Language Pedagogy

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 creditis of 400 level French

FRNCH 590D: Special Topics in French: Civilization

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 creditis of 400 level French

Courses primarily for graduate students, open to qualified undergraduate students

FRNCH 590: Special Topics in French

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 creditis of 400 level French

German (Ger)

WLC Option I: German Studies

Under WLC Option I, students with a concentration in German must complete at least 30 credits beyond the intermediate (GER 201 (<https://currentcatalog.registrar.iastate.edu/>))

[collegeofliberalartsandsciences/worldlanguagesandcultures](https://currentcatalog.registrar.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures))

- GER 202 (<https://currentcatalog.registrar.iastate.edu/collegeofliberalartsandsciences/worldlanguagesandcultures>)) level.

Students electing the German Studies option may count a maximum of two of the following courses towards the major:

GER 370	German Studies in English	3-4
GER 371	The Holocaust in Text, Image, and Memory	3-4
GER 375	Grimms' Tales	3-4
GER 378	German Film and Media Studies	3-4

A. German Studies Required Core Courses: (22 credits)

GER 301	Reading: Problems of the Early Twentieth Century	3
GER 302	Composition	3
GER 304	German for Global Professionals	3
GER 305	Conversation: The City in Contemporary Europe	3
GER 320	Germany Today	3
GER 330	German Literature and Culture	3
GER 476	Topics in German Cultural Studies	3-4

B. Additional Courses:

The remaining 8 credits may be chosen from the following courses:

Repeatable course:

GER 330	German Literature and Culture	3
---------	-------------------------------	---

Study Abroad and Internship option:

GER 499	Internship in German	1-3
---------	----------------------	-----

Courses taught in English (up to 8 credits applicable towards major; majors must enroll for 4 credits):

GER 370	German Studies in English	3-4
GER 371	The Holocaust in Text, Image, and Memory	3-4
GER 375	Grimms' Tales	3-4
GER 378	German Film and Media Studies	3-4

C. Study Abroad: The department strongly recommends that all students of German participate in an approved study abroad program based in a German-speaking country. Credit from an approved study abroad program may be applied to the major.

Curricular Notes: GER 330 German Literature and Culture may be repeated once for major credit when offered with a different topic (6cr. total). GER 476 Topics in German Cultural Studies is required for the WLC major option in German Studies. Majors must enroll in GER 476 Topics in German Cultural Studies for 4 credits. Majors choosing the German Studies option may select two additional courses for 4 cr. from the following:

GER 370	German Studies in English	3-4
GER 371	The Holocaust in Text, Image, and Memory	3-4
GER 375	Grimms' Tales	3-4
GER 378	German Film and Media Studies	3-4

Minor in German

The German minor requires 15 credits of courses taught in German. At least six credits must be chosen from among German 301, 302, 304, 305,

320, and 330. At least three credits must be chosen from German 320 and 330. Courses taught primarily in English (German 370, 371, 375, 378, and 476) cannot count toward the German minor.

Three credits must be in literature or culture taught in German	3
GER 320 Germany Today	
GER 330 German Literature and Culture	
Eligible minor courses	12
GER 301 Reading: Problems of the Early Twentieth Century	
GER 302 Composition	
GER 304 German for Global Professionals	
GER 305 Conversation: The City in Contemporary Europe	
GER 320 Germany Today	
GER 330 German Literature and Culture	

WLC Option II: Languages and Cultures for Professions (LCP)

Under WLC Option II students with a concentration in German must complete a minimum of 30 credits beyond the intermediate (GER 201 - GER 202) level. Students electing the LCP option may count one of the following courses toward the major:

GER 370 German Studies in English	3-4
GER 371 The Holocaust in Text, Image, and Memory	3-4
GER 375 Grimms' Tales	3-4
GER 378 German Film and Media Studies	3-4

I. Languages and Cultures for Professions (Business)

Students with a primary major in the College of Business may select from one of the following options:

Business Option 1

International Business Secondary Major and German LCP Minor Emphasis (27 credits total)

A. International Business Secondary Major (12 credits from approved list)

B. LCP Minor Emphasis Courses (15 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

GER 304 German for Global Professionals	3
GER 305 Conversation: The City in Contemporary Europe	3
GER 301 Reading: Problems of the Early Twentieth Century	3
or GER 302 Composition	
GER 320 Germany Today	3
GER 499 Internship in German	1-3

Business Option 2

International Business Secondary Major and LCP Major Option (42 credits total)

A. International Business Secondary Major (12 credits from approved list)

B. LCP Second Major (30 credits)

I. LCP Required Core Courses (19 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

GER 301 Reading: Problems of the Early Twentieth Century	3
GER 304 German for Global Professionals	3

GER 305 Conversation: The City in Contemporary Europe	3
GER 320 Germany Today	3
GER 476 Topics in German Cultural Studies	3-4
GER 499 Internship in German	1-3

II. Additional Courses (11 credits)

GER 302 Composition	3
GER 330 German Literature and Culture	3
GER 370 German Studies in English	3-4
GER 371 The Holocaust in Text, Image, and Memory	3-4
GER 375 Grimms' Tales	3-4
GER 378 German Film and Media Studies	3-4

Curricular Notes: students may enroll in the Languages and Cultures for Professions (LCP) Option only as a Second Major. They may not graduate with the Second Major in LCP alone. LCP Majors may select two of the following courses, which must be taken for 4 credits:

GER 370 German Studies in English	3-4
GER 371 The Holocaust in Text, Image, and Memory	3-4
GER 375 Grimms' Tales	3-4
GER 378 German Film and Media Studies	3-4

Business Option 3

Languages and Cultures for Professions (without International Business Major) (30 credits total)

I. LCP Required Core Courses (19 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

GER 301 Reading: Problems of the Early Twentieth Century	3
GER 304 German for Global Professionals	3
GER 305 Conversation: The City in Contemporary Europe	3
GER 320 Germany Today	3
GER 476 Topics in German Cultural Studies	3-4
GER 499 Internship in German	1-3

II. Additional Courses (11 credits)

GER 302 Composition	3
GER 330 German Literature and Culture	3
GER 370 German Studies in English	3-4
GER 371 The Holocaust in Text, Image, and Memory	3-4
GER 375 Grimms' Tales	3-4
GER 378 German Film and Media Studies	3-4

Curricular Notes: students may enroll in the Languages and Cultures for Professions (LCP) Option only as a Second Major. They may not graduate with the Second Major in LCP alone. LCP Majors may select two of the following courses, which must be taken for 4 credits:

GER 370 German Studies in English	3-4
GER 371 The Holocaust in Text, Image, and Memory	3-4
GER 375 Grimms' Tales	3-4
GER 378 German Film and Media Studies	3-4

II. Languages and Cultures for Professions

(Engineering)

Engineering students pursuing the second major option in German are required to take at least 30 credits beyond the intermediate GER 201 Intermediate German I - GER 202 Intermediate German II level.

Engineering LCP: Second Major Option in German (30 credits total)

A. Required Core Courses (19 credits). Additional study abroad credit from an approved study abroad program may be applied to the major.

GER 301	Reading: Problems of the Early Twentieth Century	3
GER 304	German for Global Professionals	3
GER 305	Conversation: The City in Contemporary Europe	3
GER 320	Germany Today	3
GER 476	Topics in German Cultural Studies	3-4
GER 499	Internship in German	1-3

B. Additional Courses (11 credits)

GER 302	Composition	3
GER 330	German Literature and Culture	3
GER 370	German Studies in English	3-4
GER 371	The Holocaust in Text, Image, and Memory	3-4
GER 375	Grimms' Tales	3-4
GER 378	German Film and Media Studies	3-4

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a Second Major. They may not graduate with the Second Major in LCP alone. LCP Majors may select two of the following courses, which must be taken for 4 credits:

GER 370	German Studies in English	3-4
GER 371	The Holocaust in Text, Image, and Memory	3-4
GER 375	Grimms' Tales	3-4
GER 378	German Film and Media Studies	3-4

GER 101: Elementary German I

(4-0) Cr. 4. F.SS.

Introduction to German language within the context of German culture; practice in the basic skills.

GER 102: Elementary German II

(4-0) Cr. 4. S.SS.

Prereq: GER 101

Continuation of German 101.

Meets International Perspectives Requirement.

GER 201: Intermediate German I

(4-0) Cr. 4. F.

Prereq: GER 102

Review of grammar, selected readings, further practice in oral and written communication.

Meets International Perspectives Requirement.

GER 202: Intermediate German II

(4-0) Cr. 4. S.

Prereq: GER 201

Continuation of German 201. One section will emphasize the use of German in professional contexts.

Meets International Perspectives Requirement.

GER 301: Reading: Problems of the Early Twentieth Century

(3-0) Cr. 3. F.

Prereq: GER 202

Emphasis on the development of reading skills through a variety of text types with a focus on German Culture from circa 1900 to 1933.

Meets International Perspectives Requirement.

GER 302: Composition

(3-0) Cr. 3. S.

Prereq: GER 202

Emphasis on writing skills, with further development of grammar and reading skills using a variety of current and historical materials.

Meets International Perspectives Requirement.

GER 304: German for Global Professionals

(3-0) Cr. 3. F.

Prereq: GER 202

Communication in business and professional contexts in German-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice. Preparation for internships.

Meets International Perspectives Requirement.

GER 305: Conversation: The City in Contemporary Europe

(3-0) Cr. 3. S.

Prereq: GER 202 minimum, GER 301 recommended

Intensive conversational and listening practice in German with an emphasis on a major German-speaking city.

Meets International Perspectives Requirement.

GER 320: Germany Today

(3-0) Cr. 3. S.

Prereq: GER 301 or GER 304

Selected topics dealing with contemporary German society and culture.

Introduction to materials, resources, and forms of communication available on the Internet, and in other electronic and print media.

Meets International Perspectives Requirement.

GER 330: German Literature and Culture

(3-0) Cr. 3. Repeatable. F.

Prereq: GER 301 or permission of instructor

Selected readings in German literature from Classicism to present.

Emphasis on techniques of reading and analysis of literary texts. No more than six credits of Ger 330 may be counted toward the major.

Meets International Perspectives Requirement.

GER 370: German Studies in English

(3-0) Cr. 3-4. Repeatable, maximum of 6 credits.

Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Three credits: English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German.

Meets International Perspectives Requirement.

GER 370G: Studies in English Translation: German Topics on Women or Feminism

(Cross-listed with W S). (3-0) Cr. 3-4. Repeatable, maximum of 6 credits.
Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Three credits: English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German.
 Meets International Perspectives Requirement.

GER 371: The Holocaust in Text, Image, and Memory

(3-0) Cr. 3-4.
Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level

Examination of such topics as the origins and expressions of Anti-Semitism in central Europe, the political events and structures of the Holocaust, the reality of ghettos and concentration camps, the impact of technological modernization on the Final Solution, and resistance to the Nazis. Materials will include non-fictional texts, literature, art, and music. Three credits: English, open to all students. Four credits: required for German major credit, supplementary readings and compositions in German. Four credits: required for German concentration credit, supplementary readings and compositions in German.
 Meets International Perspectives Requirement.

GER 375: Grimms' Tales

(3-0) Cr. 3-4.
Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level

Introduction to Germanic antiquities, mythology, and heroic legends; Herder's concept of Naturpoesie. Emphasis on the Grimm tales: theoretical approaches to the tales from the late 19th and early 20th centuries; perversions of these traditional tales by the National Socialists (Nazis). Readings in contemporary Grimm scholarship. Taught in English. Three credits: English, open to all students. Four credits: required for German concentration credit, supplementary readings and compositions in German.
 Meets International Perspectives Requirement.

GER 378: German Film and Media Studies

(3-0) Cr. 3-4. S.
Prereq: Sophomore classification. For fourth credit, 6 credits in German at the 300 level

Analysis and interpretation of film or media in German society. Study of media production and reception within multicultural and global contexts. Thematic emphases based on faculty and student interest including: 1) film directors, genres, movements (e.g. New German Cinema), aesthetics, and cinematography or 2) media studies (e.g. television, mass press, popular culture). Three credits: English, open to all students. Four credits: required for German concentration credit, supplementary readings and compositions in German.
 Meets International Perspectives Requirement.

GER 395: Study Abroad

Cr. 1-10.
Prereq: 2 years university-level German

Supervised instruction in language and culture of Germany; formal class instruction at level appropriate to student's training, augmented by practical living experience.
 Meets International Perspectives Requirement.

GER 476: Topics in German Cultural Studies

(3-0) Cr. 3-4. S.
Prereq: Sophomore classification. For fourth credit, six credits in German at the 300-level courses instructed in German
 Key topics and themes in German history and culture up to the modern era. Three credits: Taught in English, open to all students. Four credits: Required for German concentration credit, supplementary readings and compositions in German.
 Meets International Perspectives Requirement.

GER 490: Independent Study

Cr. 1-6. Repeatable, maximum of 9 credits.
Prereq: 6 credits in German and permission of department chair
 Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Ger 490 may be counted toward graduation.

GER 499: Internship in German

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: 9 credits of German at the 300 level; permission of advisor and the World Languages and Cultures Internship coordinator
 Work experience using German language skills in the public or private sector, combined with academic work under faculty supervision. Available only to majors and minors. Offered on a satisfactory-fail basis only. Ger 499 may be repeated to a maximum of 6 credits. No more than 3 credits of Ger 499 may be applied to the major.

GER 590: Special Topics in German

Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level German

GER 590A: Special Topics in German: Literature or Literary Criticism

Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level German

GER 590B: Special Topics in German: Linguistics

Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level German

GER 590C: Special Topics in German: Language Pedagogy

Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level German

GER 590D: Special Topics in German: Civilization

Cr. 2-4. Repeatable.
Prereq: Permission of instructor; 6 credits of 400 level German

Greek (Greek)

For courses in Greek literature taught in English, see Classical Studies.

Courses primarily for undergraduate students

GREEK 101: Elementary Ancient Greek I

(4-0) Cr. 4. F.
 Grammar and vocabulary of ancient Greek, within the context of Greek culture; reading knowledge through texts adapted from classical authors.

GREEK 102: Elementary Ancient Greek II

(4-0) Cr. 4. S.

Prereq: GREEK 101

Grammar and vocabulary of ancient Greek, within the context of Greek culture; reading knowledge through texts adapted from classical and later authors.

Meets International Perspectives Requirement.

GREEK 201: Intermediate Classical Greek

Cr. arr. F.

Prereq: GREEK 102

Emphasis on grammatical principles, composition and reading classical or Hellenistic texts.

Meets International Perspectives Requirement.

GREEK 332: Introduction to Classical Greek Literature

Cr. arr. S.

Prereq: GREEK 201

Readings in ancient Greek literature with emphasis on critical analysis of style, structure or thought.

Meets International Perspectives Requirement.

GREEK 490: Independent Study

Cr. 1-6. Repeatable, maximum of 9 credits.

Prereq: 6 credits in Greek and permission of department chair

Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Greek 490 may be counted toward graduation.

Latin (Latin)

For courses in Latin literature taught in English, see Classical Studies.

Courses primarily for undergraduate students

LATIN 101: Elementary Latin I

(4-0) Cr. 4. F.

Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors.

LATIN 102: Elementary Latin II

(4-0) Cr. 4. S.

Prereq: LATIN 101

Grammar and vocabulary of classical Latin, within the context of Roman culture; reading knowledge through texts adapted from classical authors.

Meets International Perspectives Requirement.

LATIN 201: Intermediate Latin

Cr. arr. F.

Prereq: LATIN 102

Emphasis on grammatical principles, composition and reading Latin texts.

Meets International Perspectives Requirement.

LATIN 332: Introduction to Latin Literature

Cr. arr. S.

Prereq: LATIN 201

Readings in Latin literature with emphasis on critical analysis of style, structure or thought.

Meets International Perspectives Requirement.

LATIN 490: Independent Study

Cr. 1-6. Repeatable, maximum of 9 credits.

Prereq: 6 credits in Latin and permission of department chair

Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits in Latin 490 may be counted toward graduation.

Russian Studies (Rus)

Minors in Russian Studies are required to complete RUS 201 and RUS 202. The remaining 9 credits must be at the 300 level and above, including at least 3 credits in the Russian curriculum (courses taught in English or Russian).

Russian Studies Minor Option 1: Russian Studies.

9 credits at the 300 level may be selected from the following courses:

RUS 201	Intermediate Russian I	4
RUS 202	Intermediate Russian II	4
9 credits must be at the 300 level and above *		9
RUS 301	Composition and Conversation	
RUS 304	Russian for Global Professionals	
RUS 314	Reading Russian Literary and Cultural Texts	
RUS 370	Russian Studies in English Translation	
RUS 375	Russia Today	
RUS 378	Russian Film Studies in English	
RUS 395	Study Abroad	
RUS 490	Independent Study	
RUS 499	Internship in Russian	
RUS 590	Special Topics in Russian	
HIST 421	History of Russia I	
HIST 422	History of Russia II	
HIST 530	Proseminar in Modern Russian/Soviet History	
POL S 349	Politics of Russia and the Soviet Successor States	

* including at least 3 credits in the Russian curriculum (courses taught in English or Russian).

Russian Studies Minor Option 2: Languages and Cultures for Professions

A. Agriculture and Life Sciences, Business, or Engineering Major and Languages and Cultures for Professions Minor Emphasis in Russian Studies (17 credits)

Required Core Courses		11
RUS 201	Intermediate Russian I	
RUS 202	Intermediate Russian II	
RUS 304	Russian for Global Professionals	
Electives		6
RUS 301	Composition and Conversation	
RUS 314	Reading Russian Literary and Cultural Texts	
RUS 370	Russian Studies in English Translation	
RUS 375	Russia Today	
RUS 378	Russian Film Studies in English	
RUS 395	Study Abroad	
RUS 490	Independent Study	

RUS 499	Internship in Russian
RUS 590	Special Topics in Russian
HIST 421	History of Russia I
HIST 422	History of Russia II
HIST 530	Proseminar in Modern Russian/Soviet History
POL S 349	Politics of Russia and the Soviet Successor States

Courses primarily for undergraduate students

RUS 101: Elementary Russian I

(4-0) Cr. 4. F.

Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture.

RUS 102: Elementary Russian II

(4-0) Cr. 4. S.

Prereq: RUS 101

Introduction to the Russian language, grammar and syntax. Practice in the four basic skills (listening, speaking, reading, and writing) within the context of Russian culture.

Meets International Perspectives Requirement.

RUS 195: Study Abroad

Cr. 1-10. Repeatable. SS.

Supervised intensive instruction in Russian language and culture; formal class instruction at level appropriate to students' training, augmented by practical living experiences. Consult with department regarding equivalence with Rus 101 and 102. Acceptable for LAS General Education Requirement credit in the II group.

RUS 201: Intermediate Russian I

(4-0) Cr. 4. F.

Prereq: RUS 102

Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills.

Meets International Perspectives Requirement.

RUS 202: Intermediate Russian II

(4-0) Cr. 4. S.

Prereq: RUS 201

Thorough review of grammar and growth of vocabulary. Selected readings. Continued use of the four basic skills.

Meets International Perspectives Requirement.

RUS 295: Study Abroad

Cr. 1-10. Repeatable. SS.

Prereq: RUS 102 or equivalent

Supervised intensive instruction in Russian language and culture; formal class instruction at level appropriate to students' training, augmented by practical living experiences. Consult with department regarding equivalence with Rus 201 and 202. Acceptable for LAS General Education Requirement credit in the II group.

RUS 301: Composition and Conversation

(3-0) Cr. 3. F.

Prereq: RUS 202

Thorough study of the Russian language, with emphasis on strengthening proficiency in writing, speaking, reading, and listening. Increased focus on syntax and word formation.

Meets International Perspectives Requirement.

RUS 304: Russian for Global Professionals

(3-0) Cr. 3. F.

Prereq: RUS 102

Communication in business and professional contexts in Russian-speaking countries. Development of effective communication strategies and project management in the workplace. Cultural contexts of business and professional practice.

Meets International Perspectives Requirement.

RUS 314: Reading Russian Literary and Cultural Texts

(3-0) Cr. 3. Repeatable.

Prereq: RUS 102

Selected readings in Russian literature and culture. Emphasis on techniques of reading and analysis of literary and cultural texts.

Meets International Perspectives Requirement.

RUS 370: Russian Studies in English Translation

(3-0) Cr. 3. Repeatable.

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

RUS 370R: Studies in English Translation: Russian Topics on Women or Feminism

(Cross-listed with W S). (3-0) Cr. 3. Repeatable.

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English.

Meets International Perspectives Requirement.

RUS 375: Russia Today

(3-0) Cr. 3. Repeatable.

A survey of social, political, economic, and cultural topics relevant to contemporary Russia. Readings, discussions and papers in English.

Meets International Perspectives Requirement.

RUS 378: Russian Film Studies in English

(3-0) Cr. 3.

Analysis and interpretation of cinema in Russia and the Soviet Union.

Topics vary according to faculty interest. Film directors, genres, movements, historical survey, aesthetics, and cinematography. Readings, discussions and papers in English.

Meets International Perspectives Requirement.

RUS 395: Study Abroad

Cr. 1-6.

Supervised instruction in language and culture of Russia; formal class instruction at level appropriate to student's training, augmented by practical living experience.

Meets International Perspectives Requirement.

RUS 490: Independent Study

Cr. 1-6. Repeatable.

Prereq: 6 credits in Russian and permission of department chair

Designed to meet the needs of students who seek work in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 9 credits of Rus 490 may be counted toward graduation.

RUS 499: Internship in Russian

Cr. 1-3. Repeatable. F.S.SS.

Prereq: 9 credits of Russian at the 300 level; permission of advisor and WLC Internship Coordinator

Work experience using Russian language skills in the public or private sector combined with academic work under faculty supervision. Available only to minors. No more than 3 credits may be applied to the minor.

RUS 590: Special Topics in Russian

Cr. 2-4. Repeatable.

*Prereq: Permission of instructor; 6 credits of 400 level Russian***RUS 590A: Special Topics in Russian: Literature or Literary Criticism**

Cr. 2-4. Repeatable.

*Prereq: Permission of instructor; 6 credits of 400 level Russian***RUS 590B: Special Topics in Russian: Linguistics**

Cr. 2-4. Repeatable.

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Russian

Courses primarily for graduate students, open to qualified undergraduate students

RUS 590: Special Topics in Russian

Cr. 2-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Russian

Spanish (Span)

Go to Spanish Minor

World Languages and Cultures majors with a concentration in Spanish have two options:

WLC Option I: Hispanic Studies

Under WLC Option I, students with a concentration in Spanish must complete a minimum of 33 credits beyond the intermediate (SPAN 201 Intermediate Spanish I- SPAN 202 Intermediate Spanish II) level.

A. Hispanic Studies Required Core Courses: (12 cr.)

SPAN 301	Spanish Grammar and Composition	3
SPAN 303A or SPAN 303B	Spanish Grammar and Conversation: Conversation through Culture Spanish Grammar and Conversation: Conversation for Professionals	3
SPAN 314	Introduction to Reading Hispanic Texts	3

SPAN 352	Introduction to Spanish Phonology	3
----------	-----------------------------------	---

B. Additional Courses: Students must take at least 15 credits chosen from a, b, and c below (minimum of 3 credits from each section).

a) At least 3 credits of literary studies chosen from the following:

SPAN 330	Studies in Spanish Literature to 1700	3
SPAN 331	Studies in Spanish Literature from 1700 to the Present	3
SPAN 332	Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century	3
SPAN 333	Studies in Latin American Literature from the Twentieth Century to the Present	3

b) At least 3 credits of cultural studies chosen from the following:

SPAN 304	Spanish for Global Professionals	3
SPAN 321	Spanish Civilization	3
SPAN 322	Latin American Civilization	3
SPAN 323	Spain Today	3
SPAN 323	Spain Today	3
SPAN 324	Latin America Today	3
SPAN 326	Studies in Hispanic Art or Film	3

c) At least 3 credits of applied language and linguistics chosen from the following:

SPAN 351	Introduction to Spanish-English Translation	3
SPAN 354	Introduction to Spanish-English Interpretation	3
SPAN 401	Advanced Composition and Grammar	3
SPAN 462	Contrastive Analysis of Spanish/ English for Translators	3
SPAN 463	Hispanic Dialectology	3
SPAN 499	Internship in Spanish	1-3

Students may apply up to 6 credits of SPAN 395 Study Abroad to section a, b, or c above (appropriate section based upon course content and assigned by the WLC adviser).

C. Students must take at least 6 credits of literature and/or culture at the 400 level, chosen from the following (each repeatable to 6 credits.):

SPAN 440	Seminar on the Literatures and Cultures of Spain	3
SPAN 441	Seminar on Cervantes and the Golden Age	3
SPAN 445	Seminar on the Literatures and Cultures of Latin America	3

D. Study Abroad: The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Under Option I, any student who chooses not to participate in a department-approved program will be required to take 3 additional elective credits of Spanish at or above the SPAN 321 level (for a total of 36 credits beyond the intermediate 201-202 level).

E. Communication Proficiency Requirements: Degree-seeking students must earn a grade of C- or better in a sequence of English composition courses, usually ENGL 150 Critical Thinking and Communication and ENGL 250 Written, Oral, Visual, and Electronic Composition. The department will certify Communication Proficiency for students who receive a C or better in a WLC or Classical Studies course numbered

370-379. Such a course will also fill an LAS Group I (Arts and Humanities) requirement.

WLC Option II: Language and Cultures for Professions

Under WLC Option II students with a concentration in Spanish must complete a minimum of 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

I. Languages and Cultures for Professions (College of Agriculture and Life Sciences)

Students with a primary major in the College of Agriculture and Life Sciences pursuing the second major option in Spanish are required to take at least 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

Agriculture and Life Sciences LCP: Second Major Option in Spanish (30 credits total).

A. Required LCP Core Courses: (12 Credits)

SPAN 303B	Spanish Grammar and Conversation: Conversation for Professionals	3
SPAN 304	Spanish for Global Professionals	3
SPAN 351	Introduction to Spanish-English Translation	3
SPAN 499 or SPAN 395	Internship in Spanish * Study Abroad	1-10

B. Literature and Culture Courses: (12 Credits)

SPAN 301	Spanish Grammar and Composition	3
SPAN 314	Introduction to Reading Hispanic Texts	3
SPAN 323 or SPAN 321	Spain Today ** Spanish Civilization	3
SPAN 324 or SPAN 322	Latin America Today Latin American Civilization	3

C. Additional Courses: (6 credits)

Select one course from each of the following two literature categories:

Category 1:

SPAN 330	Studies in Spanish Literature to 1700	3
SPAN 331	Studies in Spanish Literature from 1700 to the Present	3
SPAN 332	Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century	3
SPAN 333	Studies in Latin American Literature from the Twentieth Century to the Present	3

Category 2:

SPAN 440	Seminar on the Literatures and Cultures of Spain	3
SPAN 441	Seminar on Cervantes and the Golden Age	3
SPAN 445	Seminar on the Literatures and Cultures of Latin America	3

*Additional credit from an approved study abroad program may be applied to the major.

**SPAN 321 Spanish Civilization and SPAN 322 Latin American Civilization may be substituted.

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a second major. They may not graduate with the second major in LCP alone.

II. Languages and Cultures for Professions (College of Business)

Students with a primary major in the College of Business pursuing the second major option in Spanish are required to take at least 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I-SPAN 202 Intermediate Spanish II) level.

Business LCP: Second Major Option in Spanish (30 credits total).

A. Required LCP Core Courses (12 credits)

SPAN 303B	Spanish Grammar and Conversation: Conversation for Professionals	3
SPAN 304	Spanish for Global Professionals	3
SPAN 351	Introduction to Spanish-English Translation	3
SPAN 499 or SPAN 395	Internship in Spanish * Study Abroad	1-10

B. Literature and Culture Courses: (12 credits)

SPAN 301	Spanish Grammar and Composition	3
SPAN 314	Introduction to Reading Hispanic Texts	3
SPAN 323 or SPAN 321	Spain Today ** Spanish Civilization	3
SPAN 324 or SPAN 322	Latin America Today Latin American Civilization	3

C. Additional Courses: (6 credits)

Select one course from each of the following two literature categories:

Category 1:

SPAN 330	Studies in Spanish Literature to 1700	3
SPAN 331	Studies in Spanish Literature from 1700 to the Present	3
SPAN 332	Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century	3
SPAN 333	Studies in Latin American Literature from the Twentieth Century to the Present	3

Category 2:

SPAN 440	Seminar on the Literatures and Cultures of Spain	3
SPAN 441	Seminar on Cervantes and the Golden Age	3
SPAN 445	Seminar on the Literatures and Cultures of Latin America	3

*Additional credit from an approved study abroad program may be applied to the major.

**SPAN 321 Spanish Civilization and SPAN 322 Latin American Civilization may be substituted.

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a second major. They may not graduate with the second major in LCP alone.

III. Languages and Cultures for Professions (College of Engineering)

Students with a primary major in the College of Engineering pursuing the second major option in Spanish are required to take at least 30 credits beyond the intermediate (SPAN 201 Intermediate Spanish I- SPAN 202 Intermediate Spanish II) level.

Engineering LCP: Second Major Option in Spanish (30 credits total)

A. Required LCP Core Courses: (12 credits)

SPAN 303B	Spanish Grammar and Conversation: Conversation for Professionals	3
SPAN 304	Spanish for Global Professionals	3
SPAN 351	Introduction to Spanish-English Translation	3
SPAN 499 or SPAN 395	Internship in Spanish* Study Abroad	1-10

B. Literature and Culture Courses: (12 credits)

SPAN 301	Spanish Grammar and Composition	3
SPAN 314	Introduction to Reading Hispanic Texts	3
SPAN 323 or SPAN 321	Spain Today** Spanish Civilization	3
SPAN 324 or SPAN 322	Latin America Today Latin American Civilization	3

C. Additional Courses: (6 credits)

Select one course from each of the following two literature categories:

Category 1:

SPAN 330	Studies in Spanish Literature to 1700	3
SPAN 331	Studies in Spanish Literature from 1700 to the Present	3
SPAN 332	Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century	3
SPAN 333	Studies in Latin American Literature from the Twentieth Century to the Present	3

Category 2:

SPAN 440	Seminar on the Literatures and Cultures of Spain	3
SPAN 441	Seminar on Cervantes and the Golden Age	3
SPAN 445	Seminar on the Literatures and Cultures of Latin America	3

*Additional credit from an approved study abroad program may be applied to the major.

**SPAN 321 Spanish Civilization and SPAN 322 Latin American Civilization may be substituted.

Curricular Notes: students may only enroll in the Languages and Cultures for Professions (LCP) Option as a second major. They may not graduate with the second major in LCP alone.

Minor in Spanish

The Spanish minor: Option 1: Hispanic Studies, Option 2: Languages and Cultures for Professions

Option 1: The Spanish minor in Hispanic Studies requires at least 15 credits, 12 of which must be at the 300 level or higher. The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional elective credits of Spanish at the 300 level or higher.

Option 2: Language and Cultures for Professions. The Spanish minor in Languages and Cultures for Professions requires the following courses (12 credits):

SPAN 303B	Spanish Grammar and Conversation: Conversation for Professionals	3
SPAN 304	Spanish for Global Professionals	3
SPAN 351	Introduction to Spanish-English Translation	3
One of the following		3
SPAN 321	Spanish Civilization	
SPAN 322	Latin American Civilization	
SPAN 323	Spain Today	
SPAN 324	Latin America Today	

The department strongly recommends that all students of Spanish participate in an approved study abroad program based in a Spanish-speaking country. Any student who chooses not to participate in a department-approved study abroad program will be required to take 3 additional credits in culture chosen from the following:

SPAN 321	Spanish Civilization	3
SPAN 322	Latin American Civilization	3
SPAN 323 or SPAN 324	Spain Today Latin America Today	3

Note: students taking either SPAN 321 Spanish Civilization or SPAN 323 Spain Today must take either SPAN 322 Latin American Civilization or SPAN 324 Latin America Today; students taking either SPAN 322 Latin American Civilization or SPAN 324 Latin America Today must take either SPAN 321 Spanish Civilization or SPAN 323 Spain Today.

Courses primarily for undergraduate students

SPAN 097: Accelerated Spanish Review

(3-2) Cr. 0. F.S.

Prereq: Two years but less than three years of high-school Spanish

For students who require additional review at the first year (101-102) level. Course components include a compact review of 101 and the essential elements of 102. Course completed with a passing grade fulfills the LAS foreign language requirement. Not recommended for students who wish to continue language at the second year (201-202) level without completing 102.

SPAN 101: Elementary Spanish I

(4-0) Cr. 4. F.SS.

A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish.

SPAN 102: Elementary Spanish II

(4-0) Cr. 4. S.SS.

Prereq: SPAN 101, SPAN 97 or placement by departmental exam

Continuation of Spanish 101. A communicative approach to grammar and vocabulary within the context of Hispanic culture. For students whose native language is not Spanish.

Meets International Perspectives Requirement.

SPAN 195: Study Abroad

Cr. 3. SS.

Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Spanish. Consult the department regarding equivalency with SPAN 101 or 102.

Meets International Perspectives Requirement.

SPAN 201: Intermediate Spanish I

(4-0) Cr. 4. F.

Prereq: SPAN 102 or placement by departmental exam

Intensive review of basic grammar and conversation. For students whose native language is not Spanish. Practice in oral and written communication. Development of fluency with idiomatic expressions.

Selected readings on culture and literature.

Meets International Perspectives Requirement.

SPAN 202: Intermediate Spanish II

(4-0) Cr. 4. S.

Prereq: SPAN 201 or placement by departmental exam

Continuation of Spanish 201. Intensive review of basic grammar. Practice in oral and written communication. Development of fluency with idiomatic expressions. Selected readings on culture and literature. For students whose native language is not Spanish.

Meets International Perspectives Requirement.

SPAN 295: Study Abroad

Cr. 3. SS.

Prereq: SPAN 102 or equivalent

Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to student's training, augmented by practical living experience. Taught in Spanish. Consult the department regarding equivalency with Span 201 or 202.

Meets International Perspectives Requirement.

SPAN 297: Intensive Intermediate Spanish

(4-0) Cr. 4. F.S.

Prereq: 4 years of high school Spanish, two years of Spanish at a community college, Spanish 201, or equivalent by placement

Bridge course between 200- and 300-level Spanish courses that focuses on application of advanced grammatical concepts within the context of Hispanic culture. Accelerated review of SPAN 201 and SPAN 202 designed for students who want to continue at the 300 level. Taught in Spanish for students whose native language is not Spanish.

Meets International Perspectives Requirement.

SPAN 301: Spanish Grammar and Composition

(3-0) Cr. 3. F.S.

Prereq: SPAN 202 or placement by departmental exam

Review and application of grammar concepts in the development of writing skills within the context of Hispanic culture. Taught in Spanish. For students whose native language is not Spanish.

Meets International Perspectives Requirement.

SPAN 303: Spanish Grammar and Conversation

(3-0) Cr. 3. F.S.

Prereq: SPAN 202 or placement by departmental exam

Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational skills within the context of Hispanic culture. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 303A: Spanish Grammar and Conversation: Conversation through Culture

(3-0) Cr. 3. F.S.

Prereq: SPAN 202 or placement by departmental exam

Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational skills within the context of Hispanic culture. Taught in Spanish. For students whose native language is not Spanish.

Meets International Perspectives Requirement.

SPAN 303B: Spanish Grammar and Conversation: Conversation for Professionals

(3-0) Cr. 3. F.S.

Prereq: SPAN 202 or placement by departmental exam

Intensive oral practice and improvement of oral proficiency. Application of specific grammatical concepts for development of conversational skills within the context of Hispanic culture. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 304: Spanish for Global Professionals

(3-0) Cr. 3. F.S.

Prereq: SPAN 202 or placement by departmental exam (SPAN 301 recommended)

Introduction to professional communication within a cultural context. Grammar review as needed. Individual projects will focus on special interests. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 314: Introduction to Reading Hispanic Texts

(3-0) Cr. 3. F.S.

Prereq: SPAN 301

Critical reading of Hispanic literary and cultural texts. Presentation of techniques and terminology of literary criticism. Study of basic genres such as: narrative, poetry, drama, essay. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 321: Spanish Civilization

(3-0) Cr. 3.

Prereq: One course at the 300 level

A survey of the social, political, religious, and cultural history of Spain. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 322: Latin American Civilization

(3-0) Cr. 3.

Prereq: One course at the 300 level

A survey of the social, political, religious, and cultural history of Spanish America. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 323: Spain Today

(3-0) Cr. 3.

Prereq: One course at the 300 level

A survey of social, political, economic, and cultural topics relevant to contemporary Spain. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 324: Latin America Today

(3-0) Cr. 3.

Prereq: One course at the 300 level

A survey of social, political, economic, and cultural topics relevant to contemporary Latin America. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 326: Studies in Hispanic Art or Film

(Dual-listed with SPAN 526). (3-0) Cr. 3.

Prereq: One course at the 300 level

Survey of major currents and figures in Spanish and Latin American art and/or film. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 330: Studies in Spanish Literature to 1700

(3-0) Cr. 3.

Prereq: SPAN 314

Introduction to Spanish literature from the earliest times through the Golden Age; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 331: Studies in Spanish Literature from 1700 to the Present

(3-0) Cr. 3.

Prereq: SPAN 314

Introduction to Spanish literature from the eighteenth century to the present; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 332: Studies in Latin American Literature from Pre-Columbian Times through the Nineteenth Century

(3-0) Cr. 3.

Prereq: SPAN 314

Introduction to Latin American literature from the earliest times to circa 1900; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 333: Studies in Latin American Literature from the Twentieth Century to the Present

(3-0) Cr. 3.

Prereq: SPAN 314

Introduction to Latin American literature from the twentieth century to the present; techniques of literary criticism. Lectures, discussion, and analysis of individual selections in Spanish. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 351: Introduction to Spanish-English Translation

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: SPAN 301, SPAN 303 or SPAN 304

Introduction to the theory, methods, techniques, and problems of translation. Consideration of material from business, literature, and the social sciences. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 352: Introduction to Spanish Phonology

(Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: SPAN 301, SPAN 303 or SPAN 304

An introductory study of the articulation, classification, distribution, and regional variations of the sounds of the Spanish language. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 354: Introduction to Spanish-English Interpretation

(Dual-listed with SPAN 554). (Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: SPAN 351

Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 370: Hispanic Topics in English Translation

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English. May not be counted as a prerequisite.

Meets International Perspectives Requirement.

SPAN 370A: Hispanic Topics in English Translation: Agriculture

(3-0) Cr. 3. Repeatable, maximum of 6 credits.

Topics vary according to faculty interest. Knowledge and understanding of major cultural, ethical, sociopolitical and economic issues directly related to agriculture and agribusiness in Latin America, Spain, and/or Equatorial Guinea. Readings, discussions, and papers in English. May not be counted as a prerequisite.

SPAN 370S: Studies in English Translation: Hispanic Topics on Women or Feminism

(Cross-listed with W S). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Topics vary according to faculty interest. Author, genre or period study, women writers, cinema, or contemporary theory. Readings, discussions, and papers in English. May not be counted as a prerequisite.

Meets International Perspectives Requirement.

SPAN 395: Study Abroad

Cr. 1-10.

Prereq: 2 years university-level Spanish or equivalent

Supervised instruction in Spanish and Hispanic culture; formal class instruction at level appropriate to students' training, enhanced by practical living experience.

Meets International Perspectives Requirement.

SPAN 401: Advanced Composition and Grammar

(Dual-listed with SPAN 501). (3-0) Cr. 3. F.

Prereq: SPAN 314 and one course at the 320-level or above

Advanced study of Spanish grammar and syntax. Students' writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 440: Seminar on the Literatures and Cultures of Spain

(Dual-listed with SPAN 540). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)

Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 441: Seminar on Cervantes and the Golden Age

(Dual-listed with SPAN 541). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)

Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 445: Seminar on the Literatures and Cultures of Latin America

(Dual-listed with SPAN 545). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, SPAN or SPAN 333. (SPAN 332 and SPAN 333 recommended)

Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 462: Contrastive Analysis of Spanish/ English for Translators

(Cross-listed with LING). (3-0) Cr. 3.

Prereq: SPAN 351

Linguistic study of the major differences between the Spanish and English grammatical systems and their applications in the translation of Spanish to English. Taught in Spanish.

SPAN 463: Hispanic Dialectology

(Cross-listed with LING). (3-0) Cr. 3.

Prereq: SPAN 352

Intensive study of the phonology, morphosyntax and lexicon of the Hispanic dialects of Spain and Latin America in their historical context. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 490: Independent Study

Cr. 1-6. Repeatable, maximum of 6 credits.

Prereq: 6 credits in Spanish and permission of department chair

Designed to meet the needs of students in areas other than those in which courses are offered, or who desire to integrate a study of literature or language with special problems in major fields. No more than 6 credits in Span 490 may be counted toward graduation.

SPAN 499: Internship in Spanish

Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

Prereq: 9 credits of Spanish at the 300 level; permission of advisor and WLC Internship Coordinator

Work experience using Spanish language skills in the public or private sector, combined with academic work under faculty supervision. Up to 3 credits may apply toward the major. Available only to majors and minors.

SPAN 501: Advanced Composition and Grammar

(Dual-listed with SPAN 401). (3-0) Cr. 3. F.

Prereq: SPAN 314 and one course at the 320-level or above

Advanced study of Spanish grammar and syntax. Students' writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 526: Studies in Hispanic Art or Film

(Dual-listed with SPAN 326). (3-0) Cr. 3.

Prereq: 6 credits in Spanish literature or culture at 400 level

Survey of major currents and figures in Spanish and Latin American art and/or film.

SPAN 540: Seminar on the Literatures and Cultures of Spain

(Dual-listed with SPAN 440). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)

Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 541: Seminar on Cervantes and the Golden Age

(Dual-listed with SPAN 441). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)

Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 545: Seminar on the Literatures and Cultures of Latin America

(Dual-listed with SPAN 445). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, SPAN or SPAN 333. (SPAN 332 and SPAN 333 recommended)

Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 554: Introduction to Spanish-English Interpretation

(Dual-listed with SPAN 354). (Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: SPAN 351

Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 590: Special Topics in Spanish

Cr. 1-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590A: Special Topics in Spanish: Literature or Literary Criticism

Cr. 1-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590B: Special Topics in Spanish: Linguistics

Cr. 1-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Spanish

SPAN 590C: Special Topics in Spanish: Language Pedagogy

Cr. 1-4. Repeatable.

*Prereq: Permission of instructor; 6 credits of 400 level Spanish***SPAN 590D: Special Topics in Spanish: Civilization**

Cr. 1-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Spanish

Courses primarily for graduate students, open to qualified undergraduate students

SPAN 501: Advanced Composition and Grammar

(Dual-listed with SPAN 401). (3-0) Cr. 3. F.

Prereq: SPAN 314 and one course at the 320-level or above

Advanced study of Spanish grammar and syntax. Students' writing of compositions incorporates an advanced understanding of grammar, syntax, and principles of organization of thought and ideas. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 526: Studies in Hispanic Art or Film

(Dual-listed with SPAN 326). (3-0) Cr. 3.

Prereq: 6 credits in Spanish literature or culture at 400 level

Survey of major currents and figures in Spanish and Latin American art and/or film.

SPAN 540: Seminar on the Literatures and Cultures of Spain

(Dual-listed with SPAN 440). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (Recommended SPAN 330 and SPAN 331)

Discussion and analysis of selected topics in Spanish literature and culture from the Middle Ages to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 541: Seminar on Cervantes and the Golden Age

(Dual-listed with SPAN 441). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, or SPAN 333. (SPAN 330 recommended)

Discussion and analysis of selected works of Cervantes within the social and cultural context of the Golden Age. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 545: Seminar on the Literatures and Cultures of Latin America

(Dual-listed with SPAN 445). (3-0) Cr. 3. Repeatable, maximum of 6 credits.

Prereq: SPAN 330, SPAN 331, SPAN 332, SPAN or SPAN 333. (SPAN 332 and SPAN 333 recommended)

Discussion and analysis of selected topics in Latin American literature and culture from Pre-Colonial times to the Present. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 554: Introduction to Spanish-English Interpretation

(Dual-listed with SPAN 354). (Cross-listed with LING). (3-0) Cr. 3. F.S.

Prereq: SPAN 351

Introduction to the theory, methods, techniques, and problems of consecutive and simultaneous interpretation. Consideration of material from business, agriculture, law, design, medicine, literature, advertisement, and sports. Taught in Spanish.

Meets International Perspectives Requirement.

SPAN 590: Special Topics in Spanish

Cr. 1-4. Repeatable.

Prereq: Permission of instructor; 6 credits of 400 level Spanish

World Film Studies

The World Film Studies undergraduate minor is an interdisciplinary, cross-cultural program in the department of World Languages and Cultures that provides coursework in the history, theory, and aesthetics of cinemas of the non-English-speaking world. Upon completion of the World Film Studies minor students will

1) demonstrate solid skills of formal film analysis and knowledge of the essential theoretical concepts of cinema studies;

2) become familiar with prominent film directors, influential cinematic works, and cinematic traditions across the world;

3) gain an understanding of the evolution of cinema as an art form; understand the relations between cinema and other arts;

4) acquire knowledge and understanding of cinema as a mode of cultural expression and communication; develop new perspectives on U.S. culture and cinema through comparison with other non-English-speaking world cultures and cinemas.

A student seeking an undergraduate minor in World Film Studies must successfully complete a minimum of 15 credits, which must include WLC 278 Introduction to Global Film (Introduction to Global Film) and 12 credits selected from the following list of electives. Of these, at least 6 credits must be from courses taught in the department of World Languages and Cultures.

Courses taught in WLC (at least 6 credits)

CHIN 370	Chinese Literature in English Translation	3
FRNCH 326	Studies in French or Francophone Film	3
FRNCH 378	French Film Studies in English	3
GER 378	German Film and Media Studies	3-4
RUS 378	Russian Film Studies in English	3
SPAN 326	Studies in Hispanic Art or Film	3

Courses outside of WLC

ENGL 237	Survey of Film History	3
ENGL 315	Creative Writing: Screenplays	3
ENGL 335	Studies in Film	3
ENGL 450	Seminar in Literary Genres	3
JL MC 454	Critical Analysis and History of the Moving Image	3
POL S 365X	Politics and Film	3

Curricular note: no more than 6 credits of each repeatable course (FRNCH 326 and FRNCH 378) may be applied to the minor.

Total Credits: 123-125

Graduate Study

The Department of World Languages and Cultures offers course work leading to a graduate minor in French, German, Latin, Russian Studies or Spanish. The graduate minor in each of these languages is designed to provide an opportunity for graduate students to further their knowledge of that language to complement work in their major disciplines. The graduate minor provides formal recognition of student achievement and expertise in one of the languages above. Graduate minor credits are also offered in Greek.

Graduate Minor

Program Requirements:

Prerequisites

Graduate students who wish to minor in one of the languages above must have 400-level proficiency in that language. When this is not the case, the student may be required to take a language course below the 400-level, which would not count towards the graduate minor requirements.

Course Requirements

For the M.A. or M.S.: Three courses in the language of the minor. No more than three credits may be in courses numbered 401, 402, and 403. For the Ph.D.: Four courses in the language of the minor which must include at least one three credit course at the 500 level. No more than three credits may be in courses numbered 401, 402, or 403. At least two courses for the M.A. and the Ph.D. minors must be taken in residence at

Iowa State University. Papers written for these courses are expected to have a content and depth commensurate with the graduate status of the student.

Department of Ecology, Evolution, and Organismal Biology

Undergraduate Study

Within the Biological Sciences, studies of ecology, evolution, and organismal biology are essential in understanding the complex relationships of life on Planet Earth. Ecology focuses on the interactions among organisms as well as the interactions between organisms and their physical environments. Evolutionary theory addresses the origins and interrelationships of species. Organismal biology studies both the diversity of biological organisms and the structure and function of individual organisms.

The EEOB Department offers several undergraduate majors with other departments. Students interested in the areas of ecology, evolution, and organismal biology should major in Biology, Environmental Science, or Genetics. The Biology Major is administered and offered jointly by the EEOB and GDCB departments. The faculty of EEOB, together with those in GDCB and BBMB, administer and offer the Genetics Major. Faculty in EEOB, in cooperation with faculty from other departments on campus, administer and offer the Environmental Science Major. Each of these majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. Faculty in the EEOB Department also teach undergraduate courses at Iowa Lakeside Laboratory (see the Iowa Lakeside Laboratory listing).

The Biology Major, the Environmental Science Major, and the Genetics Major prepare students for a wide range of careers in biological sciences. Some of these careers include conservation of natural resources and biodiversity, human and veterinary medicine, and life science education. These majors are also excellent preparation for graduate study in systematics, ecology, biological diversity, physiology, and related fields. Faculty members in EEOB contribute to the undergraduate courses listed below. The titles and descriptions of these courses are in the Biology section of the catalog.

BIOL 101	Introductory Biology	3
BIOL 110	Introduction to Biology	1
BIOL 111	Opportunities in Biology	0.5
BIOL 155	Human Biology	3

Graduate Study

The department offers graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees. EEOB graduate students major in one of several interdepartmental majors including Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Environmental Science, Genetics, Interdisciplinary Graduate Studies, Neuroscience, and Toxicology. The EEOB faculty members are active in the interdepartmental graduate majors and teach a wide range of graduate courses. Faculty research programs cover a wide range of specializations including physiology and physiological

ecology; Microbiology; animal behavior; evolutionary genetics of plants and animals; modeling of evolutionary and ecological processes; plant and animal systematics; neurobiology; developmental biology; aquatic and wetland ecology; functional, population, community, landscape, and ecosystem ecology; and conservation biology. For further information on faculty research interests check the EEOB web site (www.eeob.iastate.edu (<http://www.eeob.iastate.edu>)). Some EEOB faculty teach graduate courses at Iowa Lakeside Laboratory. Field Station courses are also available through the Gulf Coast Marine Laboratory and the Organization for Tropical Studies (see the Biology listing).

Prospective graduate students need a sound background in the physical and biological sciences, as well as in mathematics and English. Interested students should check the Graduate Program link from the EEOB web site for specific admission procedures and updates. The department and majors require submission of Graduate Record Examination (GRE) aptitude test scores. Subject area GRE scores are recommended. International students whose native language is other than English must also submit TOEFL or IELTS scores with their application.

Students who are enrolled in the interdepartmental graduate majors with EEOB affiliation are required to participate in departmental seminars, to participate in research activities, and to show adequate progress and professional development while pursuing their degree. For both the M.S. and Ph.D. degrees, it is expected that research conducted by the student will culminate in the writing and presentation of a thesis or dissertation. Requirements and guidelines for study are provided by the Graduate College, the EEOB faculty, and the individual student's major professor and Program of Study Committee. General information about graduate study requirements can be found at the web site for the Graduate College and requirements for the interdepartmental majors can be found by following the links from the EEOB web site above. Although not a formal requirement, the EEOB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Genetics, Development and Cell Biology

The Department of Genetics, Development and Cell Biology (GDCB) is dedicated to biological discovery and excellence in undergraduate and graduate education. The research and teaching mission of the department is to achieve a greater understanding of fundamental principles of life by focusing on basic cellular and subcellular processes, including genome dynamics, cell structure and function, cellular response to environmental and developmental signals, and molecular mechanisms of development. Recognizing that student education is of paramount importance, GDCB strives for excellence in teaching and research. GDCB plays a leading role in undergraduate and graduate training through a variety of activities including traditional courses, undergraduate internships in research laboratories, and advanced graduate seminar and literature-based courses. Innovative approaches to learning are emphasized throughout the curriculum.

Undergraduate Study

The GDCB Department offers undergraduate majors in conjunction with other departments. Students interested in the areas of genetics, development and cell biology should major in Biology, Genetics or Bioinformatics and Computational Biology (BCBio). The Biology Major is administered and offered jointly by the GDCB and EEOB departments. The GDCB faculty, together with those in EEOB and BBMB, administer and

offer the Genetics Major. Each of these majors is available through the College of Liberal Arts and Sciences or through the College of Agriculture and Life Sciences. BCbio is administered by GDCB and the Departments of Computer Science and Mathematics, and is available through the college of Liberal Arts and Sciences.

The Biology Major and the Genetics Major prepare students for a wide range of careers in biological sciences. Training in Biology or Genetics may lead to employment in teaching, research, or any of a variety of health-related professions. Some of these careers include biotechnology, human and veterinary medicine, agricultural sciences and life science education. BCbio majors are prepared for careers at the interfaces of biological, informational and computational sciences in the above fields. These majors are also excellent preparation for graduate study in bioinformatics, molecular genetics, cell and developmental biology, neuroscience and related fields. Faculty members in GDCB contribute to the undergraduate courses listed below. The full descriptions of these courses can be found in the Biology, Genetics and BCbio sections of the catalog.

Graduate Study

Understanding the genetic blueprint and the functions of cells is critical to virtually all aspects of biology. The basic mission of the Department of Genetics, Development and Cell Biology is to achieve a greater understanding of fundamental principles of life. The GDCB faculty and students conduct hypothesis-driven research into the biology of animals, plants and microbes. While research in GDCB is often based on discovery and analysis of molecular mechanisms of life processes, a true understanding of living organisms will ultimately require the integration of molecular mechanisms in the context of dynamic structural components of the living cell. Thus, research efforts within GDCB use molecular, genetic, biochemical, computational and imaging techniques to study systems at increasingly complex levels of organization.

GDCB faculty contribute to a broad but integrated array of cutting-edge research topics, implementing interactive and multidisciplinary approaches that bridge conventional boundaries, and incorporating experimental and computational biology as complementary approaches. Examples include using genetics and molecular biology to investigate the cellular basis of development, or combining biochemical and computational approaches to study basic subcellular functions, signal transduction or metabolism.

The faculty in the GDCB department train graduate students in several interdepartmental majors/programs including Bioinformatics and Computational Biology, Ecology and Evolutionary Biology, Genetics, Immunobiology, Plant Biology, Interdisciplinary Graduate Studies, Microbiology, Molecular, Cellular and Developmental Biology, Neuroscience and Toxicology. Graduate work leading to both Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees are available.

Prospective graduate students need a sound background in the physical and biological sciences, as well as Mathematics and English. Interested students should check the links on the GDCB web site (www.gdcb.iastate.edu/) for specific admissions procedures and the latest information about individual faculty and their research programs. The interdepartmental majors and programs require submission of Graduate Record Examination (GRE) aptitude test scores. Advanced GRE scores are recommended. International students whose native language is other than English must also submit TOEFL scores with their application.

Students who are enrolled in the interdepartmental graduate majors and who have affiliations with GDCB are required to actively participate in seminars, research activities, and to show adequate progress and professional development while pursuing their degree. Completion of either the M.S. or Ph.D. degrees requires that research conducted by the student culminates in the writing and presentation of a thesis or dissertation. The Graduate College, the GDCB Faculty, and the individual student's major professor and Program of Study Committee provide requirements and guidelines for study. General information about graduate study requirements can be found at the web site for the Graduate College (www.grad-college.iastate.edu/) and requirements for the interdepartmental majors can be found by following the links from the GDCB web site above. Although not a formal requirement, the GDCB faculty recommends that students pursuing the Ph.D. include teaching experience in their graduate training.

Geological and Atmospheric Sciences

www.ge-at.iastate.edu/ (<http://www.ge-at.iastate.edu/>)

The Department of Geological and Atmospheric Sciences seeks to establish innovative teaching and outstanding research programs that apply fundamental principles of physics, chemistry, biology, and mathematics to cross-disciplinary problems related to the earth sciences. As a basis for this mission, the Department maintains strength in fundamental topics of geology, meteorology, and hydrology that involve investigating the dynamic nature of the structure, composition, and interactive processes of the Earth and its component systems.

Study of these systems includes the application of scientific principles to a wide range of environmental, agricultural, and natural-resource problems, so that through its teaching and research activities, the department fosters a global perspective on the geosciences. Individual elements of study, such as atmospheric-circulation patterns, water cycling, geochemical interactions, glacier dynamics, or rock formation, are viewed not only in terms of their own intrinsic value, but also in terms of their role in the evolving earth system. The Department recognizes that many fundamental advances in the geosciences are occurring at the interfaces with other disciplines and between subdisciplines in the field, so department faculty strive to form mutually beneficial research and educational collaborations with other programs at Iowa State University and other institutions around the world by taking a leadership position in solving problems at these interfaces.

Greenlee School of Journalism and Communication

<http://www.greenlee.iastate.edu/>

The Greenlee School of Journalism and Communication prepares students for the field of communication. The school offers three majors:

- Advertising Bachelor of Arts (ADVRT)
- Journalism and Mass Communication Bachelor of Science (JL MC)
- Public Relations Bachelor of Science (P R)

Professional skills are taught and practiced alongside academic requirements using the latest technology and leading-edge communication trends and methods.

Founded in 1905, the unit was one of the first journalism programs to be accredited in 1948 and continues to be one of the longest continuously accredited programs in the country. Accreditation is based on the principle that students need a broad-based, liberal arts education and solid core courses within the discipline. Students taking one major at the school may not seek a second major or minor in the school. All students are required to take a second major or minor outside the school as an area of expertise.

Undergraduate Study

Students who complete degrees in advertising, journalism and mass communication, or public relations are expected to develop competencies in 12 key areas:

- understand and apply the principles and laws of freedom of speech and press for the country in which the institution that invites ACEJMC is located, as well as receive instruction in and understand the range of systems of freedom of expression around the world, including the right to dissent, to monitor and criticize power, and to assemble and petition for redress of grievances;
- demonstrate an understanding of the history and role of professionals and institutions in shaping communications;
- demonstrate an understanding of gender, race ethnicity, sexual orientation and, as appropriate, other forms of diversity in domestic society in relation to mass communications;
- demonstrate an understanding of the diversity of peoples and cultures and of the significance and impact of mass communications in a global society;
- understand concepts and apply theories in the use and presentation of images and information;
- demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness and diversity;
- think critically, creatively and independently;
- conduct research and evaluate information by methods appropriate to the communications professions in which they work;
- write correctly and clearly in forms and styles appropriate for the communications professions, audiences and purposes they serve;
- critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness;
- apply basic numerical and statistical concepts;
- apply current tools and technologies appropriate for the communications professions in which they work, and to understand the digital world.

Communication Proficiency Requirement

All majors in the School must earn a grade of C or better in ENGL 150 Critical Thinking and Communication (or be exempt) and ENGL 250 Written, Oral, Visual, and Electronic Composition (or ENGL 250H). These additional requirements apply:

Advertising majors must earn a C+ or better in:

JL MC 201	Reporting and Writing for the Mass Media	3
and one of		
ADVRT 334	Advertising Creativity	3
ADVRT 336	Advertising Account Management	3

Journalism and mass communication majors must earn a C+ or better in:

JL MC 201	Reporting and Writing for the Mass Media	3
and one of		
JL MC 202	Intermediate Reporting and Writing for the Mass Media	3
JL MC 206	Reporting and Writing for the Electronic Media	3

Public relations majors must earn a C+ or better in:

JL MC 201	Reporting and Writing for the Mass Media	3
P R 321	Public Relations Writing	3

African and African American Studies

Interdepartmental Undergraduate Program

African and African American Studies, a cross-disciplinary program in the College of Liberal Arts and Sciences, offers students the opportunity to explore the African Americans' experience and African American contributions to American culture. Students in the program analyze and learn about African American experiences through the study of history, literature, art, religion, and society. They gain knowledge and develop skills and sensitivities to help them function effectively in today's diverse society.

African and African American Studies at Iowa State University is an expanding program. Most of the courses in the program satisfy general education requirements in the College of Liberal Arts and Sciences, the human relations requirement for teachers, and the university's diversity requirement. Students can minor or even design their own Interdisciplinary Studies major with an emphasis in African American Studies. Relevant courses are offered through other departments.

Graduate Study

Several courses can be applied to a graduate program as electives.

A minor in African and African American Studies requires six courses in the program with a minimum of 18 credits, including AF AM 201 Introduction to African American Studies Introduction to African American Studies and AF AM 460 Seminar in African American Culture Seminar in African American Culture. The remaining credits must come from at least two departments, with at least two courses taken at the junior level or above. Independent study and internship opportunities are available for credit, but do not count in the minimum requirements for the minor.

Air Force Aerospace Studies

The objectives of the Department of Air Force Aerospace Studies (AFAS) are to provide qualified students the opportunity to earn a commission as an active duty officer in the United States Air Force (USAF) and to build better citizens for those not interested in serving in the USAF. Entry into the Air Force Reserve Officer Training Corps (AFROTC) program is not dependent on departmental major or year in the university, and is open to all qualified students.

The curriculum is divided into two basic phases: the general military course (GMC) and the professional officer course (POC). The GMC is introductory and consists of four consecutive one-hour courses normally taken during the freshman and sophomore years.

Selection for the POC is on a competitive basis, and cadets enrolling in this course must meet certain academic, mental, physical, and moral standards. Students who have completed the GMC will compete for an enrollment allocation to participate in Field Training, a four-week summer program which provides a concentrated experience in the Air Force environment. The training program includes officer training, career orientation, expeditionary training, an introduction to typical base

functions, and physical training. Prior to entry into the POC, students must successfully complete Field Training.

Upon enrollment and acceptance into the POC, all cadets are required to complete a contractual agreement with the Air Force, which obligates them to a minimum of four years of active duty as an USAF officer.

Qualified cadets may compete for selection for rated duty as a pilot, combat systems operator (CSO), remotely-piloted aircraft (RPA) operator, and air battle manager (ABM). Rated duty officers receive additional specialized instruction, requiring an active duty commitment of six years for CSO, RPA, and ABM operators and 10 years for pilots.

AFROTC scholarships are available and provide payment of full tuition and fees. In addition, scholarship cadets receive a \$250-\$400 monthly subsistence allowance and \$600 per year book allowance. Scholarships can be awarded for periods of two, three, or four years, with up to one additional year for qualified applicants in selected majors. Upon acceptance of a scholarship, the student executes a contract with the USAF, and students who fail to observe the contract terms may be called to active duty in an enlisted grade or be required to repay monies received from the Air Force. To determine eligibility and initiate application procedures for the scholarship program, interested students should contact the AFAS department.

The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from one or more of the ROTC programs. At least six credits must be in courses numbered 300 or above.

American Indian Studies

American Indian Studies is a cross-disciplinary minor in the College of Liberal Arts and Sciences that allows students to learn more about the contemporary and historical realities of native communities in North America, to appreciate the variety of native cultures and experiences, and to be prepared for an attentive lifelong learning experience in a diverse world.

Courses focus on critical thinking and the application of knowledge in complex, diverse situations. Courses in American Indian Studies thus not only provide knowledge on specific native issues, but also prepare students for careers and further studies in fields such as community development and planning, social work, law, sociology, education, history, anthropology, agriculture, resource extraction, literature, policy, engineering, environmental issues.

Today, 80% of American Indians live outside of reservation communities. American Indian Studies students will gain the knowledge and skills they need for living and working with, in and around native communities and people who live everywhere in North America, and, increasingly, the world.

For students who are interested in deeper knowledge on the issues, a major can be pursued through the Interdisciplinary Studies major in the College of Liberal Arts and Sciences. Faculty members also are available to provide expertise to graduate students working on specific issues that involve American Indian themes.

Most American Indian Studies courses meet the university-wide U.S. Diversity requirement.

The minor in American Indian Studies is 15 credits and includes:

AM IN 210	Introduction to American Indian Studies	3
-----------	---	---

Two courses chosen from the following:

AM IN 310	Topics in American Indian Studies	3
AM IN 322	Peoples and Cultures of Native North America	3
AM IN 332	Current Issues in Native North America	3
AM IN 346	American Indian Literature	3

And 6 additional credits of AM IN coursework.

Military Science Interdisciplinary Program

The Military Science Department does not offer an academic degree and is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program. The mission of the department is derived directly from regulations governing Army Reserve Officers' Training Corps (AROTC), which are issued by the U.S. Army Cadet Command and U.S. Army Training and Doctrine Command and cannot be modifiable by this department.

Freshmen Year Learning Outcomes

The student will have a working knowledge of the following areas: The Role of the Army, Roles and Origins of the Army, Army Customs and Traditions, Branches (Jobs) in the Army and Military Operations and Tactics, U.S. Army leadership and character development.

Sophomore Year Learning Outcomes

The student will have a working knowledge of the following areas: The Role of an Officer, Role of the Officer and Noncommissioned Officer, communications, code of conduct, first aid, principles of war and military operations and tactics, and begin to apply U.S. Army leadership through observed activities and demonstrate character development traits.

Junior Year Learning Outcomes

The student will have a working knowledge of the following areas: Small Unit Training, Command and Staff Functions, Nuclear, Biological and Chemical Warfare, Law of War, Weapons, Human Behavior, Math Reasoning, Computer Science and Military Operations and Tactics; Cadets will actively analyze character development and assess leadership skills.

Senior Year Learning Outcomes

The student will have a working knowledge of the following areas: Transition to Becoming an Officer, Military Justice, Intelligence and Electronic Warfare, Army Personnel Management, Army Logistics, Post and Installation Support and Military Operations and Tactics; Cadets will internalize and adhere to the U.S. Army's profession through active leadership and congruence of character development.

The mission of the Army Reserve Officers' Training Corps (AROTC) is to commission the future leaders of the United States Army. Since ROTC produces over 65 percent of the Army's Officer Corps, our task is one of the most important undertakings in the Army and our country today. We seek top quality college students. We train these potential leaders, assess their abilities, and challenge them with the highest standards of profession/professionalism. Those who successfully complete the program, receive a commission as a second lieutenant in the U.S. Army. A commission as an Army officer affords the opportunity to pursue a profession in one or several of the 300 different jobs held by Army officers. Students may request to serve as an officer in either the active army, or part time in the Army Reserve or National Guard. Regardless of

the method of service, officers in today's Army can be proud to know that they are doing their share in the defense of the United States of America.

The ISU Military Science program is divided into two segments, the basic program and the advanced program. The basic program (courses numbered 101-290) is designed primarily for freshmen and sophomores. No military obligation is incurred by a person participating in the basic program. The basic program is designed to be informative and to acquaint students with the military as a profession. The basic program or an allowed substitute is a prerequisite for the advanced program. Financial assistance is available on a competitive basis.

Persons interested in Military Science should visit the department located on the second floor of the Armory (east side).

Basic Program

The basic program courses are primarily for freshmen and sophomore students and, except for persons with prior military service and basic training graduates, are required for entry into the advanced program. Each scholarship cadet in the Basic Program receives a monthly allowance (freshmen \$300; sophomore \$350) for up to 10 months. The curriculum is designed to train freshmen and sophomores in individual and team skills. It also helps the Professor of Military Science identify individual leader developmental needs.

Advanced Program

The advanced program courses are for students who have completed the basic program (or received equivalent credit) and are mandatory for potential commissioning upon contracting at the beginning of their junior year. Each cadet receives a monthly allowance (junior \$450; senior \$500) for up to 10 months. These courses are primarily taught to academic juniors and seniors.

Successful completion normally obligates the student to military service on active or reserve duty. In addition to the advanced program of study, a student (cadet) will be expected to pass the Army Physical Fitness Test (precondition for commissioning) each semester and continually maintain military appearance standards in both personal grooming and uniform. Physical fitness training is regularly conducted outside of class and laboratory hours in a separate course, M S 150 Army Physical Readiness. Students are encouraged to attend and participate in this class.

Professional Military Science Education (PME) coursework outside of the military science curriculum is also a precondition to commissioning. The PME component consists of Basic Academic proficiency standards. These standards are explained to prospective students as they consider enrollment in the advanced program. Army Uniforms will be worn at least once a week. The 300-level courses are designed to prepare cadets for the Leader Development and Assessment Course, which is a 32 day summer internship/training program where cadets are trained to Army standards, develop leadership skills, and have their officer potential evaluated. The 400-level courses are the final preparation for commissioning as a second lieutenant in the United States Army. Students must meet academic alignment criteria and receive basic program credit before entering the advanced program.

Military Studies Minor

The College of Liberal Arts and Science offers a minor in Military Studies. Requirements for the minor include taking a minimum of 15 credits of

ROTC instruction, which may be taken from one or a number of the ROTC programs. At least 6 credits must be in courses numbered 300 or above.

Military Studies

Interdepartmental Minor

The Military Studies program is designed for students interested in learning about military skills and careers. The mission of the Reserve Officers' Training Corps (ROTC) programs is threefold. First, students are developed mentally, morally, and physically in order to make them strong leaders. Second, a desire for development in mind and character is instilled in students so they may assume the highest responsibilities of command, citizenship, and government. Finally, students are imbued with the highest ideals of duty, honor, and loyalty in order to graduate with a basic professional background and motivation toward their careers.

The Military Science, Naval Science and Air Force Aerospace departments accomplish this mission through detailed courses of instruction occurring throughout a typical student's college career. All academic courses offered by these departments focus on the development of professional military skills and their application. Each department offers courses unique to its branch of the military. Students in Army ROTC classes gain an appreciation for ground warfare and doctrine, while students in Naval Science develop an appreciation for naval surface and maritime engineering. The Air Force Aerospace Studies curriculum familiarizes students with Air Force structure and doctrine. On a broader scale, all three departments offer courses promoting leadership and sound management practices that investigate the military's role in American domestic and foreign policy, and can be employed in any career path.

Military Science, Naval Science and Air Force Aerospace courses are offered in the interdepartmental Military Studies program in the following participating departments: Military Science, Naval Science and Air Force Aerospace.

Undergraduate Study

Undergraduate study in this program provides the student with an opportunity to develop a minor in Military Studies. The three Iowa State University ROTC programs offer over 64 credits of specialized coursework. The minor in Military Studies is open to any Iowa State University student.

Undergraduate students may minor in Military Studies by taking 15 credits of coursework from a combination of any of the three ROTC programs - regardless of whether or not a commission in the Armed Forces is tendered. At least 6 of the 15 credits must be in courses numbered 300 or above.

Naval Science

The Department of Naval Science is embedded within the College of Liberal Arts and Sciences as an interdisciplinary program but does not offer an academic degree. The courses offered by the Department are developed by the Department of the Navy. The Naval Science Department and Naval ROTC (NROTC) Program develop individuals mentally, morally, and physically, and imbue in them the highest ideals of duty and loyalty, in order to commission them upon graduation as Navy and Marine Corps officers. Program graduates possess a basic professional background, are motivated towards careers in the Naval Service, and have a potential for future development in mind and character so as

to assume the highest responsibilities of command, citizenship, and government. Emphasis is placed on the core values of courage, honor and commitment.

Naval Science courses are open to any ISU student who has met the course prerequisites. To participate in the Naval ROTC Program, students must apply through one of two programs: the NROTC Scholarship Program (full scholarship; which includes a book stipend, tuition, laboratory fees, uniforms, and a monthly stipend), or the College Program (non-scholarship, with limited financial assistance). Applicants for the Scholarship Program are selected through a comprehensive nationwide competition. Applicants for the College Program are selected by the Professor of Naval Science from among students already in attendance at, or selected for admission by, the university. The College Program involves limited financial assistance by application for a 2 or 3-year scholarship. Upon application, students choose between the Navy Option and Marine Corps Option, for the purposes of training focus. NROTC students pursue their studies like other university students except that they must meet certain additional requirements that will prepare them to serve as naval officers upon graduation.

A Marine Corps Option student incurs a minimum 4-year active duty military obligation as a commissioned officer after graduation; a Navy Option student incurs a minimum 5-year active duty obligation.

Further information is available from the Professor of Naval Science, Iowa State University, isunrotc@iastate.edu, 515-294-6050.

While in the NROTC Program, Scholarship Program students will participate (with pay) in at-sea training cruises during the summer. College Program students, accepted to receive a 2 or 3-year scholarship, will participate in at-sea training during the summer between their Junior and Senior year based on the specifics of their scholarship. Students are also exposed to regular and extracurricular activities that teach leadership principles and help them decide which field of the Navy or Marine Corps they wish to enter. These activities also include weekly leadership laboratory periods and opportunities for involvement in several student societies.

Undergraduate Study

Naval Science courses are primarily for those students in the NROTC program, however, other university students may also enroll. Students enrolled in the NROTC program must fulfill the following requirements:

N S 111	Introduction to Naval Science	3
N S 212	Seapower and Maritime Affairs	3
N S 220	Leadership and Management	3
N S 230	Navigation	3
N S 320	Naval Ship Systems I (Engineering)	3
N S 330	Naval Ship Systems II (Weapons)	3
N S 410	Naval Operations and Seamanship	3
N S 412	Leadership and Ethics	3
N S 440	Senior Naval Science Seminar	1

Marine option students will complete:

N S 111	Introduction to Naval Science	3
N S 212	Seapower and Maritime Affairs	3
N S 220	Leadership and Management	3
N S 321	Evolution of Warfare	3
N S 412	Leadership and Ethics	3

N S 421	Evolution of Amphibious Warfare	3
N S 440	Senior Naval Science Seminar	1

1. In addition to the normal Naval Science courses, all NROTC students are required to participate in laboratory periods that supplement the various academic courses. The Leadership Lab emphasizes human relations principles, teaches basic military formations, movements, commands, courtesies, and honors, and provides practice in unit leadership. Non NROTC program students enrolled in Naval Science courses are not required to participate in laboratory periods.
2. The College of Liberal Arts and Sciences offers a minor in military studies. Requirements for the minor include taking a minimum of 15 credits of ROTC instruction, which may be taken from any of the three ROTC programs offered on campus. At least 6 credits must be in courses numbered 300 or above.

For basic undergraduate curriculum requirements, see Liberal Arts and Sciences, Curriculum; or Engineering, Curricula.

Officer Education Programs

Iowa State University offers Reserve Officers Training Corps (ROTC) programs for the professional training of officers for the Army, Air Force, Navy and Marines.

The purpose of these programs is to provide an avenue for interested students to become reserve or regular officers in one of the United States military services, and the university regards this training as the foundation for possible careers in the military. The Air Force and the Navy require a period of active duty service upon completion of the ROTC program. Graduates from Army ROTC serve in either active Army, the Army Reserve, or the National Guard.

All students enrolled in advanced ROTC programs receive financial allowances, which are described under Student Financial Aid. Scholarships are also available for all services as outlined in the section on financial aid.

For specific courses and programs see also Air Force Aerospace Studies, Military Science, and Naval Science.

U.S. Latino/a Studies Program

U.S. Latino/a Studies is devoted to the study of Mexican Americans, Puerto Ricans, Cuban Americans and other groups of people living in the United States who trace their ancestry to the Spanish-speaking countries of Latin America, and who comprise the largest and fastest growing ethnic groups in the United States. U.S. Latino/a Studies is to be distinguished from Latin American Studies; the latter focuses on people living in Latin America. The methodologies of study in U.S. Latino/a Studies are cross-disciplinary, drawing from the methods established in psychology, anthropology, sociology, political science, economics, religion, philosophy, history, literary studies, and other fields.

The minor in U.S. Latino/a Studies is an excellent addition to any major. Virtually any professional, in any field, working throughout the United States, can benefit from a greater understanding of the Latino/a communities in our nation.

Students can also build a major in U.S. Latino/a Studies within the Interdisciplinary Studies major administered by the College of Liberal Arts and Sciences.

Interdisciplinary Studies Major, Track in U.S. Latino/a Studies

Students can work with the US LS program director and the Interdisciplinary Studies adviser to develop an individualized major program. In addition to meeting the general requirements for the Interdisciplinary Studies major, students wishing to complete a track in U.S. Latino/a Studies must complete a minimum of 36 credits in the area of U.S. Latino/a Studies. At least 15 of the 36 credits must be in courses numbered 300 and above and 6 credit hours must be earned at the 400-level. Students must also meet the upper-level communication proficiency requirement by taking English 302 or 314.

Required Courses (36 credits)

Prerequisite for all US LS courses: (3 credit hours):

US LS 211	Introduction to U.S. Latino/a Studies	3
Two of the following Historical Foundations of US LS		6
US LS 240	Latina/o History	
HIST 340	History of Latin America I	
HIST 341	History of Latin America II	
Two of the following Social Science Foundations of US LS		6
US LS 332	The Latino/Latina Experience in U.S. Society	
US LS 347	U.S. Latino/a Psychology	
ANTHR 323	Topics in Latin American Anthropology	
SPAN 322	Latin American Civilization	
SPAN 324	Latin America Today	
Two of the following Political Foundations of US LS		3
US LS 343	Latin American Government and Politics	
US LS 473	Civil Rights and Ethnic Power	
Two of the following Literature and Language in US LS		6
US LS 342	Religion and U.S. Latino/a Literature	
US LS 344	U.S. Latino/a Literature	
SPAN 445	Seminar on the Literatures and Cultures of Latin America	
SPAN 304	Spanish for Global Professionals	
Special Topics in US LS (Optional; maximum of 3 credit hours per semester up to 9 credit hours total)		3-9
US LS 490	Independent Study	
Additional Credits for the Major (if not taken to satisfy areas above; four of the following courses)		12
US LS 240	Latina/o History	
US LS 332	The Latino/Latina Experience in U.S. Society	
US LS 342	Religion and U.S. Latino/a Literature	
US LS 343	Latin American Government and Politics	
US LS 344	U.S. Latino/a Literature	
US LS 347	U.S. Latino/a Psychology	
US LS 473	Civil Rights and Ethnic Power	
US LS 490	Independent Study	
ANTHR 323	Topics in Latin American Anthropology	
HIST 340	History of Latin America I	
HIST 341	History of Latin America II	
SPAN 322	Latin American Civilization	
SPAN 324	Latin America Today	

SPAN 445	Seminar on the Literatures and Cultures of Latin America
----------	--

Notes

1. The list of acceptable courses may include courses not currently listed above. Contact the Director of US Latino/a Studies for information on eligible courses.
2. The student must have an average grade of C in the required courses of the major.
3. Fulfillment of the foreign language requirement with Spanish is strongly recommended, but not required. A limit of six (6) credits of approved Spanish courses (304, 322, 324, 445) may be used as supporting courses for the major. Spanish course credits counted toward the major may not be applied to any other degree requirement.

US Latino/a Studies Minor

The minor in US Latino/a Studies requires a minimum of 15 credit hours. University policy indicates that minors must include at least 9 credits that are not applied to any other degree requirement.

Required course work in core courses (9 credits total):

US LS 211	Introduction to U.S. Latino/a Studies	3
And six credits from the following:		6
US LS 240	Latina/o History	
US LS 332	The Latino/Latina Experience in U.S. Society	
US LS 342	Religion and U.S. Latino/a Literature	
US LS 343	Latin American Government and Politics	
US LS 344	U.S. Latino/a Literature	
US LS 347	U.S. Latino/a Psychology	
US LS 473	Civil Rights and Ethnic Power	
US LS 490	Independent Study	
Total Credits		9

Six (6) additional credits from the following list (if not taken to satisfy area above):

US LS 240	Latina/o History	3
US LS 332	The Latino/Latina Experience in U.S. Society	3
US LS 342	Religion and U.S. Latino/a Literature	3
US LS 343	Latin American Government and Politics	3
US LS 344	U.S. Latino/a Literature	3
US LS 347	U.S. Latino/a Psychology	3
US LS 473	Civil Rights and Ethnic Power	3
US LS 490	Independent Study	1-3
ANTHR 323	Topics in Latin American Anthropology	3
HIST 340	History of Latin America I	3
HIST 341	History of Latin America II	3
SPAN 304	Spanish for Global Professionals	3
SPAN 322	Latin American Civilization	3
SPAN 324	Latin America Today	3
SPAN 445	Seminar on the Literatures and Cultures of Latin America	3

Notes:

1. The list of acceptable courses may include courses not currently listed above. Contact the Director of US Latino/a Studies for information on eligible courses.
2. A limit of six (6) credits of approved Spanish courses (304, 322, 324, 445) may be used as supporting courses for the minor. Spanish course credits counted toward the minor may not be applied to any other degree requirement.
3. A maximum of 3 credit hours of US LS 490 (Independent Study) may be applied toward the minor.

College of Veterinary Medicine

Lisa K. Nolan, Dean

Claire B. Andreasen, Associate Dean for Academic and Student Affairs

vetmed.iastate.edu/ (<http://vetmed.iastate.edu/>)

Departments of the College

- Biomedical Sciences
- Veterinary Clinical Sciences
- Veterinary Diagnostic and Production Animal Medicine
- Veterinary Microbiology and Preventive Medicine
- Veterinary Pathology

Other units of the college include the Lloyd Veterinary Medical Center, Veterinary Diagnostic Laboratory, Veterinary Medical Research Institute, Veterinary Education and Technology Services and Office of Curricular and Student Assessment. The college participates in interdisciplinary graduate programs in genetics; molecular, cellular and developmental biology; toxicology; immunobiology; and neuroscience.

Objectives of the Curriculum

The instructional objective of the College of Veterinary Medicine is to enable students to assume vital roles in society as productive health care providers and biomedical scientists. Such an education provides students with general learning, communication, and problem solving abilities; veterinary medical practice and research skills; and professional and ethical values.

The curriculum incorporates basic biomedical and clinical principles, clinical decision making skills, and exceptional clinical experience in small animal medicine and surgery, equine medicine and surgery, food animal medicine and surgery, and production animal medicine. Companion animal medicine and surgery are provided within the regionally recognized referral hospital through the community practice unit and equine field services. The college is located in one of the most intensive livestock producing areas in the United States. Because of this, students engage in extensive food supply veterinary medicine experiences and numerous diagnostic cases.

The professional curriculum is a four-year course of study leading to the doctor of veterinary medicine degree. Each of the first three years of the curriculum consists of two semesters while the fourth year has three semesters. Students are admitted into the professional curriculum after completing a minimum of 60 semester credits of required undergraduate coursework.

A strong and reputable basic science education during the first two years of the professional curriculum prepares veterinary students for a wide range of clinical experience during the last two years of the educational

program. Fourth year students may choose to enhance their education by earning clinical elective credits at approved government agencies, research laboratories, veterinary practices and other university hospitals. Outstanding research programs in infectious diseases, food safety, neuroscience, immunoparasitology, evidence-based medicine, and many other areas provide opportunities for qualified students to participate in research.

Concurrent DVM/MS, DVM/PhD, DVM/MPH and DVM/MBA programs are available for qualified students who wish to obtain both veterinary and graduate degrees. Students must have a bachelor's degree or a minimum of 128 semester credits in undergraduate and professional curricula in order to participate in the concurrent DVM/graduate degree program. Admission to the concurrent degree program is subject to the approval of the deans of the College of Veterinary Medicine and the Graduate College.

The college is an important recruiting center for employers seeking veterinarians for private practice; industry; educational institutions; international agencies; federal, state and local governments; the armed forces; departments of public health; zoological gardens; and other related fields of professional activity. Graduates are highly sought after and typically have multiple employment offers upon graduation. Career services and an online job board are available for students.

Pre-veterinary Medicine Preparation

Admission Requirements

The College of Veterinary Medicine seeks students with diverse backgrounds and encourages students to enroll in baccalaureate programs in the college of their choice.

Undergraduate students are strongly encouraged to complete a bachelor's degree before applying to the College of Veterinary Medicine. Because veterinarians have varied career options, when deciding on an undergraduate major, the student should consider the area of veterinary medicine which interests them. For example, those who desire a career in clinical practice may wish to pursue a degree in biological science, animal science, agricultural economics, business, social science or humanities. Students with an interest in zoo or wildlife veterinary medicine may want to look at animal ecology, environmental studies or zoology. Future researchers may wish to consider genetics, molecular biology, microbiology, or biochemistry. Students who desire a career in public health (USDA, FDA, etc) or government (legislative/policy) may find benefit in any of the biological sciences or in political science. A degree in education may be valuable to those who envision themselves as educators in a College of Veterinary Medicine. These examples are only suggestions and are but a few of the many possibilities.

For the most current information regarding applications and admission to the College of Veterinary Medicine, please refer to the College web site at www.vetmed.iastate.edu/ (<http://www.vetmed.iastate.edu/>).

Applicants for admission to the College of Veterinary Medicine must have attended an accredited college or university, have completed 40 semester credits prior to the deadline for filing an application for admission, and have completed 60 semester credits prior to the end of the spring term of the year in which the applicant seeks to be admitted to the College of Veterinary Medicine.

All science requirements should be fulfilled by the time of application or scheduled for completion by the end of the fall term in which the applicant applies. However, if necessary, the applicant may complete up to two required science courses after the fall term providing a transcript

with the courses and grades listed is postmarked by July 1 of the year the applicant would enter. There is no maximum number of non-science required courses that may be completed but the deadline of having a transcript with these course grades posted by July 1 also applies. The July 1 deadline for transcripts and grades is firm.

Required courses must be completed with a grade of C (2.00) or better. A grade of C- (1.67) does not fulfill the requirement.

Credits earned must include the following Iowa State semester course offerings or their equivalents:

English Composition 6 cr.

One year of composition or writing emphasis courses. May include business or technical writing. Two of the following courses would fulfill the requirement.

ENGL 150	Critical Thinking and Communication	3
ENGL 250	Written, Oral, Visual, and Electronic Composition	3
ENGL 302	Business Communication	3
ENGL 309	Proposal and Report Writing	3
ENGL 314	Technical Communication	3

Oral Communications 3 cr.

May include public speaking, interpersonal communication, group or organizational communication or speaking emphasis courses. One of the courses below will fulfill the requirement.

SP CM 212	Fundamentals of Public Speaking	3
AGEDS 311	Presentation and Sales Strategies for Agricultural Audiences	3
SP CM 223	Intercollegiate Debate and Forensics	1
SP CM 312	Business and Professional Speaking	3
COMST 214	Professional Communication	3

General Chemistry with Laboratory* 7 cr.

One year series for science majors with one semester lab.

CHEM 177 & 177L	General Chemistry I and Laboratory in General Chemistry I	5
CHEM 178	General Chemistry II	3

Total Credits 8

Organic Chemistry with Laboratory* 7 cr.

One year series with one semester lab.

CHEM 331	Organic Chemistry I	3
CHEM 331L	Laboratory in Organic Chemistry I	1
CHEM 332	Organic Chemistry II	3

Total Credits 7

Biochemistry* 3 cr.

One semester (no lab required). One of the courses below will fulfill the requirement.

BBMB 301	Survey of Biochemistry	3
BBMB 316	Principles of Biochemistry	3
BBMB 420	Mammalian Biochemistry	3

General Physics with Laboratory* 4 cr.

First semester of a two-semester series with lab. Must include mechanics, fluids, heat and thermodynamics, vibrations, waves and sound.

PHYS 111 General Physics

General Biology with Laboratory* 8 cr.

Two semester series with lab each semester. A Bachelor's degree in Biology fulfills this requirement.

BIOL 211	Principles of Biology I	3
BIOL 211L	Principles of Biology Laboratory I	1
BIOL 212	Principles of Biology II	3
BIOL 212L	Principles of Biology Laboratory II	1

Total Credits 8

Genetics * 3 cr.

Must include Mendelian and molecular genetics. One of the courses below will fulfill the requirement.

BIOL 313	Principles of Genetics	3
GEN 320	Genetics, Agriculture and Biotechnology	3

Total Credits 6

Mammalian Anatomy or Physiology* 3 cr.

Human anatomy or physiology will also fulfill this requirement (no lab required). One of the courses below will fulfill the requirement

B M S 329	Anatomy and Physiology of Domestic Animals	3
AN S 214	Domestic Animal Physiology	3
BIOL 155	Human Biology	3
BIOL 255	Fundamentals of Human Anatomy	3
BIOL 335	Principles of Human and Other Animal Physiology	4

Humanities or Social Sciences 8 cr.**Electives 8 cr.****Total Credits Required 60 cr.**

Courses above marked with an asterisk (*) are the required science courses. The required science course GPA is calculated from these courses.

Credits in the previously specified courses will normally be earned on the traditional four-letter grading system with A as the highest grade and D as the lowest passing grade. All required courses must be completed with a grade of C (2.0) or better. It is generally expected that required courses have been completed within the past eight (8) years. AP or CLEP credits must be documented by original scores submitted to the College of Veterinary Medicine. CLEP credits may be accepted only for arts, humanities and social sciences. Credits in the preceding specified courses will not be accepted if earned under the pass-not pass grading system or similar options.

Application and Admission

Applicants must apply using the Veterinary Medical College Application Service (VMCAS). The VMCAS application may be found online at the VMCAS website (www.aavmc.org) under VMCAS). Those applying through VMCAS also need to complete the ISU Supplemental Application found at the College of Veterinary Medicine website. The Iowa resident deadline for filing the VMCAS application, supplemental application, processing fee, GRE scores, evaluations

and transcripts is September 1. The deadline for all other applicants is October 1.

Any student wishing to use international coursework (including study abroad) to fulfill a preveterinary requirement must provide a transcript from the foreign institution.

A list of courses in progress at the time of submission and/or scheduled for completion by the end of spring term should accompany the supplemental application. Undergraduate college credits must average at least 2.50 on a 4.00 marking system for the application to be eligible for review. The preceding scholastic requirements are minimum and do not assure admission even though these requirements have been fulfilled.

Admission to the College of Veterinary Medicine is on a competitive and selective basis. GPA, Graduate Record Exam (GRE) general test score (the GRE for Iowa residents must be received by September 1, for all other applicants, it must be received by October 1), animal and veterinary experience, essays, recommendations and personal development (leadership, citizenship, etc.) are given consideration in the selection of candidates. Final selection of candidates is made after an on-campus interview.

Approximately one-half of the positions available are reserved for residents of Iowa. The College of Veterinary Medicine has implemented a Professional Program in Veterinary Medicine with the University of Nebraska-Lincoln for Nebraska residents and contracts with the states of North Dakota, South Dakota and Connecticut. A number of positions are also available to residents of other states. A few highly qualified international students may be accepted and are considered in the non-resident/non-contract applicant pool. Consideration is given equally to all applicants without regard to race, color, national origin, gender, religion, disability, or age, political beliefs, or marital or familial status.

For further information on these programs and contracts, please visit the College of Veterinary Medicine at www.vetmed.iastate.edu (<http://www.vetmed.iastate.edu>) and click on APPLY VET MED.

Curriculum in Veterinary Medicine

Graduation Requirements

To be awarded the degree doctor of veterinary medicine, candidates must have passed all required courses in the curriculum in veterinary medicine, have earned at least 4 elective credits on a graded basis of A, B, C, D while enrolled in the College of Veterinary Medicine, and have at least a 2.0 grade-point average in the veterinary medicine curriculum.

Required Courses in the Professional Program

B M S 330	Principles of Morphology I	5
B M S 331	Principles of Morphology II	4
B M S 333	Biomedical Sciences I	6
B M S 334	Biomedical Sciences II	6
B M S 335	Molecular and Cellular Basis of Disease	1
B M S 336	Veterinary Nutrition	2
B M S 337	Neuroanatomy	3
B M S 339	Clinical Foundations I	1
B M S 345	Case Study I	1
B M S 346	Case Study II	1
B M S 354	General Pharmacology	3

V PTH 377	Case Study III	2			
V PTH 409	Introduction to Veterinary Cytology and Laboratory Techniques	1			
V PTH 425	Clinical Pathology	4			

Fourth Year

The fourth year of the veterinary medical curriculum is designed to be flexible yet provide a broad based clinical education involving all domestic species of animals. All students participate in rotations that are considered fundamental to any species orientation that the student might choose. In addition, students choose one of four options for additional study, including the Small Animal, Equine, Mixed Animal, or Food Animal Options. Students may obtain clinical elective credits by repeating on-campus rotations or participating in approved off-campus preceptorships at government, private or public agencies; other universities; or private veterinary practices.

The following rotations are required of all fourth year students in addition to the requirements of the track they choose. A complete listing of track-specific requirements can be found at: <http://vetmed.iastate.edu/>:

V C S 453	Small Animal Medicine I	2
V C S 457	Equine Medicine	2
or V C S 464	Equine Field Services	

Reinstatement

Any student who voluntarily withdraws from the College of Veterinary Medicine or who is dismissed from the College of Veterinary Medicine, after having successfully completed one or more semesters forfeits his/her standing and must make written application for reinstatement to this college a minimum of 60 days prior to the opening of the semester for which they seek to re-enter. Any student who voluntarily withdraws from the College of Veterinary Medicine prior to completion of one semester must re-apply for admission to the college in the general applicant pool.

Biomedical Sciences

Professional Program of Study

For professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

A good foundation in anatomy, physiology, and pharmacology of animals is necessary to understand the mechanisms of animal disease processes and their treatment. Study of mammalian anatomy and physiology prepares students with a background in the structural and functional activities of cells, tissues, organs, and body systems relevant to veterinary medicine.

An understanding of drug action is essential for rational drug therapy. The general pharmacology courses provide students with a background in basic pharmacology to include pharmacodynamics, toxicology, and the clinical application of drugs. Special emphasis is placed on chemical agents and therapeutic practices specific to veterinary medicine.

Graduate Programs

The department offers Master of Science and Doctor of Philosophy degrees with a major in Biomedical Sciences and specializations in Anatomy, Physiology, Pharmacology, and Cell Biology. Up to 10 credits of dual-listed veterinary courses may be applied for major graduate credit. Departmental research facilities allow for training in experimental anatomy, pharmacology, and physiology. Graduate studies are supervised by faculty members recognized in their areas of expertise. Current areas of research include: Alzheimer's disease, aquatic animal health, calcium and mineral homeostasis, diabetes mellitus, glianeuron signaling, neurophysiology of pain, neurotoxicology, physiology and pharmacology of nematode ion-channels, Parkinson's disease, pharmacology of schistosomiasis, pharmacology of salmonellosis, physiology and pharmacology of thalamic neurons, physiology of the retina, Spinal Muscular Atrophy, and study of neural stem cells. The objective of the department is to prepare graduate students for successful careers in biomedical research and professional service. The department is part of interdepartmental programs in neuroscience,

toxicology, and molecular, cellular, and developmental biology. The combined Ph.D./DVM program is an option offered by the department.

Veterinary Clinical Sciences

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The curriculum of veterinary clinical sciences explores the preventive health care, and diagnosis and treatment of diseases of companion and competitive athletic animals. Veterinary specialists lead didactic and laboratory based learning in the clinical sciences. Experiential based courses conducted through the Veterinary Medical Center during the fourth year provide the student an opportunity to participate in the application of clinical skills and knowledge.

Graduate Study

The department offers work for the degree master of science with major in veterinary clinical science, and minor work for students majoring in other departments. Within the veterinary clinical sciences major, the student may specialize in veterinary medicine, surgery, or theriogenology. The D.V.M. degree or equivalent is prerequisite to a major graduate work.

Both thesis and nonthesis options are available and require the completion of a minimum of 30 graduate credits and a final examination.

World languages and cultures requirements may be established by the student's program of study committee.

Veterinary Diagnostic and Production Animal Medicine

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

Courses in veterinary diagnostic and production animal medicine provide students with basic and advanced skills in diagnostics, reproduction, medicine, surgery, production, welfare, and health management of the major livestock species. Students in the fourth year of the curriculum in veterinary medicine may elect to take advanced courses in beef, dairy, swine, poultry or small ruminant production medicine. Elective courses may include preceptorships in private practices, at other veterinary schools, in research and disease control laboratories, or in related agribusinesses.

Production animal medicine emphasizes the integration of veterinary medicine with nutrition, genetics, economics, food safety, and other disciplines, enabling graduates to acquire and use a broad knowledge base to support the health and improve the production and efficiency of the food supply chain.

Graduate Study in Veterinary Preventive Medicine

Veterinary Preventive Medicine is a multidisciplinary program focused on the study of health and disease in populations. The various disciplines represented in the program are unified by a common approach based

on the application of epidemiological methods to problem solving in populations. Through their research and course work, students will learn to understand and apply a variety of disciplines, principles, and techniques to population health issues involving environmental, ecological, nutritional, genetic, infectious, or non-infectious diseases.

Graduate study in Veterinary Preventive Medicine will provide valuable skills and experience to persons interested in public health, food safety, emerging infectious diseases, zoo or wildlife health, and livestock health. A degree in Veterinary Preventive Medicine may be valuable for individuals considering a future in the biological or pharmaceutical industries, government regulatory agencies, public veterinary practice, international service agencies responsible for population health or progressive private practice.

Veterinary Preventive Medicine is an interdepartmental major administered by the Department of Veterinary Diagnostic and Production Animal Medicine (VDPAM) with participating faculty from colleges and departments across the University and collaborators from the National Animal Disease Center (USDA:ARS) and the National Veterinary Services Laboratories (USDA:APHIS) located in Ames, Iowa.

Both thesis and non-thesis options are available and require the completion of a minimum of 30 graduate credits for thesis and 36 graduate credits for non-thesis and a final examination.

Program of Study: Master of Science in Veterinary Preventive Medicine (Thesis Option) 30 credits

† Arranged with instructor.

Graduate Certificate in Veterinary Preventive Medicine

Veterinary Diagnostic and Production Animal Medicine offers a graduate certificate for DVMs, concurrent DVM students and non-DVMs in allied animal industries in Veterinary Preventive Medicine.

Students in this program are able to select courses that focus in areas of animal welfare, diagnostics, food safety, evidence-based medicine, surgery, pathology, microbiology, epidemiology, public health, statistics and production medicine.

The purpose of the graduate certificate in Veterinary Preventive Medicine for industry professionals is to address the continued and advanced needs of animal health professionals. The certificate enables professionals to gain recognition for a skill set that includes epidemiology, risk assessment, production medicine and animal welfare. A graduate certificate may be used to increase knowledge in a new or emerging area of interest to the candidate. As such, it may be used to formally gain recognition for retraining to meet the needs of today's food production systems.

The graduate certificate for concurrent DVM students is designed to give additional skills to students planning on working with populations of animals. Using a combination of on-line and dual listed graduate level courses, the program is designed to enable DVM students to complete the certificate while studying for their DVM degree. Students enrolled in any US-based DVM program are able to complete a graduate certificate at ISU using a combination of on-line and transfer graduate level courses.

The graduate certificate is an additional qualification awarded by Iowa State University after successful completion of 15 graduate level credits. A graduate certificate is different from continuing education as the certificate includes an academic transcript from Iowa State University. Students complete the same courses graduate students do with the same expectations for all assignments and exams.

The program is available as a strictly on-line (off campus) delivery method or as a combination of classroom-based and on-line course offerings providing maximum flexibility in scheduling.

Program of Study: Graduate Certificate in Veterinary Preventive Medicine (15 credits)

First Year	Credits
Required	
VDPAM 528	3
STAT 401	4
Required	
	7
Second Year	Credits
VDPAM 570 (Offered Fall odd numbered years)	3
AND/OR	
VDPAM 527 (Offered Fall odd numbered years)	3
AND/OR	
VDPAM 529 (Offered Fall even numbered years)	3

Need 3 Credits from additional VDPAM graduate courses. (The above are available on line)

Other classroom-based options are available

Third Year

5 credits from any approved ISU graduate course or transfer credit from another university

Total Credits: 16

Veterinary Microbiology and Preventive Medicine Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Microbiology and Preventive Medicine provides instruction on pathogenic bacteria, fungi, and viruses and their interaction with host animal species. Principles and applications of infectious diseases, immunity to disease, diagnostic methods for infectious diseases, and vaccinology are covered. Principles and applications of epidemiology, public health, preventive veterinary medicine, regulatory veterinary medicine and food safety are also emphasized.

Graduate Study

The department offers opportunities for the degree doctor of philosophy with a major in veterinary microbiology. A specialization in preventive medicine is an option for this degree. Graduates in the Veterinary Microbiology and Preventive Medicine programs have a broad understanding of the fundamental processes involved in infectious diseases, pathogenesis and immunology. They are able to effectively establish research programs, which involve complex biological systems and disease syndromes. They are also prepared to address microbial-based social, ethical and environmental problems. Graduates acquire effective written and oral communication skills which lead to successful research and teaching careers in the medical and veterinary sciences. The department also offers work towards the master of science with majors in veterinary microbiology or veterinary preventive medicine. A non-thesis master's option is available for majors in preventive medicine. Courses are open for students majoring in other graduate programs.

Prerequisite to graduate study is completion of coursework in general microbiology, biology, biochemistry, mathematical sciences, and physics. Candidates for the majors in veterinary microbiology should possess an undergraduate degree in biomedical science with emphasis in medical microbiology or the D.V.M. degree. Candidates for the major in preventive medicine should possess the D.V.M. degree.

The department also participates in the interdepartmental majors and programs in genetics, immunobiology, and MCDB (molecular, cellular, and developmental biology; see Index).

Each graduate student must demonstrate proficiency in English composition within two semesters in residence.

Veterinary Pathology

Professional Program of Study

For the professional curriculum in veterinary medicine leading to the degree doctor of veterinary medicine, see Veterinary Medicine, Curriculum.

The Department of Veterinary Pathology offers a systematic study of basic disease mechanisms with emphasis on the changes in gene expression, cells, tissues, organs, and body fluids associated with disease. The theory and practice of veterinary pathology, veterinary clinical pathology, veterinary parasitology, veterinary toxicology, and related disciplines provide the basis for accurate diagnosis and a rational approach to the treatment and prevention of animal diseases.

Graduate Study

The department offers work for the degree master of science and doctor of philosophy with a major in veterinary pathology. The majority of students choose an area of specialization in veterinary anatomic pathology, veterinary clinical pathology, or veterinary parasitology (<http://vetmed.iastate.edu/vpath/academics/graduate-program>). The master of science degree is available on a thesis or nonthesis basis in the veterinary pathology major with or without an area of specialization.

For the ACVP training track (residency) of the anatomic or clinical pathology graduate program designed to train veterinary pathologists, the student must have a funded position within the Department of Veterinary Pathology. If the student does not have a funded position or is not enrolled in the departmental degree program, enrollment in courses pertaining to the residency program and activities that support the residency program must have the approval of the Department Chair of Veterinary Pathology and the head of the departmental residency training program.

Graduates have a broad understanding of the mechanistic basis of disease pathogenesis. They are able to communicate with clinicians, other scientists, and other colleagues on scientific matters, and with the general public on related science policy matters. Graduates are able to address complex problems facing the agricultural and biomedical sciences, and comparative medicine, and are able to make appropriate diagnoses and investigations of animal diseases. They consider ethical, social, legal and environmental issues, and are skilled at carrying out research, communicating research results, and writing concise and competitive grant proposals.

Collaborative work is recommended in other departments in the College of Veterinary Medicine or departments or programs in other colleges. The department participates in the interdepartmental programs in Immunobiology (www.immunobiology.iastate.edu/ (<http://www.immunobiology.iastate.edu/>)), Toxicology (www.toxicology.iastate.edu/ (<http://www.toxicology.iastate.edu/>)), Genetics (www.genetics.iastate.edu/ (<http://www.genetics.iastate.edu/>)), and Molecular, Cellular, and Developmental Biology (www.mcdb.iastate.edu/ (<http://www.mcdb.iastate.edu/>)).

A veterinary degree (doctor of veterinary medicine or equivalent) is required for training in Veterinary Anatomic Pathology and Veterinary Clinical Pathology. Other specializations do not require the veterinary degree. A minimum score of 550 paper-based (213 computer-based; 79

internet based) is required on the TOEFL examination for students whose native language is not English. Scores on the standardized Graduate Record Examination (GRE) General Test are required of students not having a veterinary degree from the United States or Canada. The GRE General Test is strongly recommended for all other applicants. A foreign language requirement will be determined by the student's program of study committee with the approval of the departmental chair. The Graduate English Examination is a graduate college requirement for native English speakers.

The M.S. thesis degree in veterinary pathology, with or without an area of specialization, requires a minimum of 30 graduate credits. Following completion of all other requirements, a comprehensive final examination is administered covering all graduate work including the thesis. The examination is typically oral, but a written component may be specified by the program of study committee. The degree candidate must submit a thesis, including at least one manuscript suitable for publication, to the committee members and departmental chair at least two weeks prior to the final examination. The departmental requirement for graduate courses includes:

3 credits of basic biological sciences (biochemistry, genetics, cell biology)		3
STAT 401	Statistical Methods for Research Workers	4
V PTH 570	Systemic Pathology I	4
or V PTH 571	Systemic Pathology II	
V PTH 551	Postmortem Pathology Laboratory	1
V PTH 605	Current Topics Seminar	1
V PTH 699	Research	arr †

† Arranged with instructor.

The M.S. nonthesis degree in veterinary pathology, with or without an area of specialization, requires a minimum of 40 graduate credits including at least 10 graduate credits earned outside the department. Every nonthesis master's degree program requires evidence of individual accomplishment demonstrated by completion of a creative component, special report, or scientific study. A minimum of 3 credits of such independent work (V PTH 599 Creative Component Research) and a practical diagnostic examination (V PTH 606 Diagnostic Interpretation) corresponding to the area of specialization are required on every program of study. The final examination is comprehensive and consists of written and oral questions. The departmental requirement for graduate courses includes those for the M.S. thesis degree plus additional courses corresponding to the area of degree emphasis of specialization. Contact the department for a more complete list of requirements and information on areas of specialization.

The Ph.D. degree in veterinary pathology, with or without an area of specialization, requires a minimum of 72 graduate credits including at least 12 graduate credits earned outside the department. The preliminary examination, consisting of written and oral components, is comprehensive and not restricted to the content of graduate courses. The degree candidate must submit a dissertation, including at least two manuscripts suitable for publication, to the committee members and departmental chair at least two weeks prior to the final examination. The final examination is primarily a defense of the dissertation, but it may include questions on other areas of specialized knowledge. The department also offers a combined DVM/Ph.D. program designed for completion of courses for the Ph.D. degree in Veterinary Pathology simultaneously with study in the professional curriculum in the College

of Veterinary Medicine. Contact the department for a more complete list of requirements for the Ph.D. degree and information on areas of specialization.

Graduate College

www.grad-college.iastate.edu/ (<http://www.grad-college.iastate.edu/>)

David K. Holger, Dean
William R. Graves, Associate Dean
Craig Ogilvie, Assistant Dean

The Graduate College and graduate faculty at Iowa State University are responsible for the quality of graduate education, for administering students' graduate programs, and for promoting research support from various governmental, industrial, and private agencies.

The graduate faculty in various programs handle admission and classification of graduate students, establish requirements for advanced degrees, and have charge of instruction and research at the graduate level. Graduate faculty members also teach graduate courses, serve on program of study (POS) committees, and direct work of master's and doctoral students. All graduate courses offered for major or nonmajor credit are taught by graduate faculty members or graduate lecturers.

Graduate study was offered soon after the university was founded, and the first graduate degree was conferred in 1877. Experimentation and research also started early, first in agriculture and shortly thereafter in home economics, engineering, science, and veterinary medicine. In 1913, the graduate faculty was organized formally and an executive graduate committee was appointed. In 1915, the graduate faculty held its first meeting, and in 1916, it granted the first doctor of philosophy degree.

Graduate education is vital to the quality of university teaching. The creative efforts of graduate faculty members and graduate students result in knowledge necessary to help society solve problems in educational, scientific, technological, and socio-economic areas. The Graduate College encourages educational exchange and contact with undergraduate areas of the university to promote improved teaching on both the undergraduate and graduate levels. A part of this exchange is accomplished by the publication of books and technical articles which are made possible by graduate research.

The degrees master of arts, master of science, and doctor of philosophy are research oriented. In many fields master's degrees are also awarded without a thesis, but a written report of independent study, called a creative component, is generally required. Coursework only degrees are available for those individuals interested in advanced study directed toward meeting vocational or professional objectives. Information on other types of Master's degrees can be found in the Graduate College Handbook, Appendix E, (www.grad-college.iastate.edu/publications/gchandbook/homepage.html) (<http://www.grad-college.iastate.edu/publications/gchandbook/homepage.html>)

The Graduate College Handbook lists policies and procedures of the Graduate College. It is available at the Graduate College's Web site: www.grad-college.iastate.edu/ (<http://www.grad-college.iastate.edu/>)

Graduate Appointments

Graduate assistantships, fellowships, and research grants have been established at Iowa State University to encourage graduate work and to promote research. Such appointments and research opportunities are

available through the various departments of instruction and the research centers on campus.

Graduate assistantships, the most common form of graduate student support, are available in three categories: the research assistantship, the teaching assistantship, or the administrative assistantship. A half-time graduate assistantship (20 hours per week) permits the holder to enroll for a maximum of 12 semester credits. Recipients of these assistantships are assessed fees at full Iowa resident rates regardless of the number of credits for which they register. These students may also be eligible for tuition scholarship awards (50% of in-state tuition for most master's students and 100% of in-state tuition for most Ph.D. students and certain terminal masters students). Students who are graduates of a regionally accredited college or university in the United States or of a recognized institution in another country whose requirements for the bachelor's degree are substantially equivalent to those of Iowa State University, who are admitted in the full or provisional admissions status, and who present the requisite undergraduate or graduate preparation, may apply for these appointments.

Students registered on a restricted basis or those placed on academic probation are eligible for assistantship appointment only on a term by term basis but are not normally eligible for a graduate tuition scholarship. Students admitted as nondegree students are not eligible for assistantship appointments. Further information may be obtained by contacting the appropriate graduate program.

The satisfactory completion of one appointment, plus satisfactory academic performance, will ordinarily make a student eligible for reappointment. After a period of three years of full time study for the master's degree or five years for the doctorate, the student will not normally be continued on assistantship support (shorter periods may be stipulated by the student's program or department).

Postdoctoral Study

Opportunities are provided for postdoctoral study through the extensive research programs of the university. Inquiries should be directed to the appropriate program, institute, or to the Dean of the Graduate College.

Graduate Study by Staff Members

Any full-time member of the research, instructional, or extension staff at the rank of instructor, research associate, or assistant scientist may carry up to six course credits per semester and three credits per summer session, subject to the approval of the head of the program or section, and provided it does not interfere with other duties. This privilege may be extended to members of the research, instructional, or extension staffs at the rank of assistant professor with approval of the college dean and the Dean of the Graduate College. Staff members at the rank of professor or associate professor cannot become candidates for graduate degrees from ISU.

Distance Education

Iowa State offers many graduate degree and certificate programs off-campus. For a listing of the degree programs, registrations for courses, and more information about distance education, consult the Iowa State University Web site at <http://www.distance.iastate.edu>.

Other information about graduate requirements is available in the Graduate College Handbook at <http://www.grad-college.iastate.edu/publications/gchandbook/homepage.html>.

Doctoral Post Prelim (Continuous Registration)

Even when Ph.D. graduate students have completed course work and residency requirements, they are required to register and pay tuition and fees, whether or not university facilities and equipment are used or staff is consulted—either in person or in absentia.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are used, the Ph.D. candidate must register for the appropriate number of credits in the major department or program and pay the appropriate graduate tuition and fees.

After the preliminary oral examination is passed (with either full or conditional pass) and if university facilities, equipment, and staff time are not used, the Ph.D. candidate may register for GR ST 680 Doctoral Post Prelim (Continuous) Registration and pay the Doctoral Post Prelim Registration fee.

The Ph.D. candidate must be aware that registration for Gr St 680 is allowed only after the Ph.D. candidate passes the preliminary oral examination; is required only in the fall and spring semesters, and not during the summer term; is not allowed after the completion of the final oral examination; and is not sufficient registration for the term the preliminary or final oral examination is taken; and does not defer student loans.

If students take the final examination during the interim between terms (including the first day of classes), registration can be for the term either before or after the examination is held.

Auditing

Audit registration means taking courses without receiving formal credit. Audit provisions are as follows: Instructors must approve ALL audits; students must register for audits by day 10 of the semester; changes to or from an audit must be made in the first 10 days of the semester; students are assessed tuition and fees as though they were taking the course for credit; and the course DOES NOT count in determining full-time student status.

Audited courses do not appear on the student's permanent record unless the "Request for Audit(s) to Appear on Transcript" form is completed and signed by the student, course instructor, and major professor. Copies of this form, which are available from the Graduate College or from the Graduate College's web site at www.grad-college.iastate.edu/forms/forms.html (<http://www.grad-college.iastate.edu/forms/forms.html>), must be filed with the Graduate College, 1137 Pearson Hall.

After the fifth class day, if a student changes a regular course to an audit, that course will appear on the student's permanent record as a drop. Audits are not acceptable as registration for loan deferments or meeting visa requirements.

Graduate Courses Taken by Undergraduates

Certain graduate level courses listed in the ISU Catalog may be used in the program of study even though they were taken for graduate credit by the student as an undergraduate at Iowa State University.

The following conditions must be met:

1. The POS committee can request approval from the Dean of the Graduate College that up to nine hours of such credit be applied toward meeting advanced degree requirements (these courses must be clearly marked on the POS).
2. Credits earned in these courses must be in addition to those used to meet requirements for the bachelor's degree and must have grades of B or better.
3. The student must be classified as an undergraduate and not a nondegree undergraduate (credits taken as a nondegree undergraduate student are not allowed).
4. The Graduation Office (10A Enrollment Services Center) should be contacted to determine that the courses were not taken as a nondegree undergraduate student, were not used toward fulfillment of the undergraduate degree program and were graded B or better.

Courses Taken as a Nondegree Undergraduate Student

A person classified as a "nondegree undergraduate" student may not use courses taken under that status in a graduate degree program. A student who has received the baccalaureate degree must register as a graduate student if he/she is to receive graduate credit for courses.

Graduate Majors

A complete list of all graduate majors can be found on the Graduate College website, <http://www.grad-college.iastate.edu/academics/gradprograms/phd.php>, with links to admission requirements and program websites.

Admission

All degree-seeking graduate students must have graduated with a bachelor's or master's degree from a regionally accredited U.S. institution or from a recognized foreign institution where the requirements for the bachelor's degree or its equivalent are similar to those at ISU. Additionally, each applicant must be accepted at ISU by the major program, the Office of Admissions, and the Graduate College. For information concerning graduate study in a particular academic discipline, prospective students should correspond with the chair of the major program in which they wish to study.

Iowa State University has a shared application process, which means certain items are sent (electronically or in print form) to the Office of Admissions and other items are sent to the graduate program to which the prospective student is applying. Detailed instructions are available at <http://www.admissions.iastate.edu/graduate/index.php>. Students are also encouraged to check the Program Requirements Web page on the Graduate College Web site at <http://www.grad-college.iastate.edu/programs/APprograms.php> for mailing instructions and deadlines for each program.

The nonrefundable application fee is \$40 (\$90 for international applicants). An electronic application is required to apply to ISU's graduate programs; the form and necessary instructions are available at <https://www.admissions.iastate.edu/apply/index.php>. The application fee is required of all applicants except those who have attended Iowa State as undergraduates. Iowa State requires official academic records and statements of all degrees earned from all institutions attended since secondary school. Faxed, scanned, and notarized copies are not considered official.

Many programs have very early application deadlines. For more details, check program deadlines at www.grad-college.iastate.edu/programs/APprograms.php (<http://www.grad-college.iastate.edu/programs/APprograms.php>).

Categories of Graduate Admission

An applicant pursuing an advanced degree must be recommended by the program in which he/she will be pursuing an advanced degree and must be approved by the Dean of the Graduate College. There are three admission categories for students who wish to pursue an advanced degree:

Full Admission status may be granted to an applicant who either has achieved a grade point average (GPA) of 3.0 or greater (on a 4.0 scale).

Provisional admission status may be granted to applicants who meet the requirements for full admission but have academic or prerequisite deficiencies to remedy. Transfer from provisional admission to full admission status requires the completion of the graduate English requirement, completion of the coursework prescribed to remedy the background deficiencies with a grade average of B or better, and the written recommendation of the major professor and approval by the Dean of the Graduate College.

Restricted admission status may be granted to an applicant who does not satisfy the formal university requirements for full admission status and/or lacks undergraduate preparation in a field related to the graduate field of study. Restricted admission may also be granted to graduates of non-English-speaking foreign institutions, even if the student meets the university requirements for full admission status. Advancement from restricted to full admission status requires completion of 9 semester credits of graduate level course work as a graduate student with a cumulative grade average of B or better and satisfaction of the Graduate College English requirement. A recommendation is submitted in writing to the Graduate College by the major professor and must be approved by the Dean of the Graduate College.

Nondegree Graduate Admission

Well-qualified applicants who do not intend to seek an advanced degree from Iowa State University may be considered for nondegree graduate admission. Such students usually include:

1. Those who intend to transfer graduate credit earned at Iowa State University to other institutions.
2. Those who intend to use graduate credits earned for professional certification.
3. Those who enroll for personal satisfaction.
4. Those who enroll occasionally in off-campus graduate courses. The nondegree application form is available from www.admissions.iastate.edu/nondegree/ (<http://www.admissions.iastate.edu/nondegree/>).

Applications and schedules for nondegree students are processed directly by the Office of Admissions and the Graduate College office; no program approvals are generally required, unless the non degree applicant has a very low GPA, then departments are contacted about what courses would be appropriate for the student to take.

A nondegree student who subsequently seeks full, provisional, or restricted admission must apply to and be accepted by a graduate program and by the Graduate College for degree study. A new application,

the regular application fee, and transcripts from all colleges attended are required.

For those students originally admitted to the Graduate College on a nondegree basis, no more than 9 semester hours of graduate credit earned under the nondegree option may be applied if the student later chooses to undertake a graduate degree program. The student's program of study committee will recommend to the Graduate College which courses (if any) taken on a nondegree basis may be included in the degree program.

Graduate Admission of International Students

An applicant who is a graduate of a recognized foreign institution is subject to the same criteria for admission as a graduate from an institution in the United States and may be recommended for the same admission categories described above except that of the nondegree option. International applicants for nondegree status may be considered for admission at the discretion of the Graduate College dean. Application and admission deadlines for international students can be obtained from the Admissions web site at www.admissions.iastate.edu/apply/ (<http://www.admissions.iastate.edu/apply/>).

International students are required to show evidence of financial support and to carry adequate health and accident insurance while in residence.

Admission Examinations

Graduate Record Examination. The Graduate Record Examination (GRE) is not a university-wide requirement for all applicants. However, many programs require or recommend submission of GRE scores; individual program statements at www.grad-college.iastate.edu/programs/APprograms.php (<http://www.grad-college.iastate.edu/programs/APprograms.php>) should be consulted for this information.

Registration

Graduate students are encouraged to register for courses on the ISU web site (www.iastate.edu (<http://www.iastate.edu>)) via AccessPlus. Students who are unable or who choose not to register through this system may use a walk-through registration procedure. Students who do not register by the published deadline for initiation of a schedule through the AccessPlus systems must use the walk-through procedure. For complete information on registration, see the ISU Schedule of Classes or the Registration Web site at <http://www.registrar.iastate.edu/students>.

Credit Limits

Registration is limited to a maximum of 15 credits per semester. Schedules for graduate assistants on one-half time appointments are limited to a maximum of 12 credits. For full-time staff members, the limit is 6 credits. (Different credit limits apply during the summer session; see the Graduate College Handbook at www.grad-college.iastate.edu/common/ (<http://www.grad-college.iastate.edu/common/handbook/>) for more details.)

Interim Registration

Registration for special work between semesters and during certain vacation periods cannot exceed one credit for each week that the student is in residence. For more information, consult the Graduate College Handbook.

Grading

Grades are the permanent official record of a student's academic performance. Iowa State uses A through F grading for most courses. S, P, and NP grades are given in some courses. The standard four-point scale is used to calculate a grade point average.

Grade Point Average (GPA)

All courses (even if they are undergraduate courses) taken as a graduate student will be calculated into the graduate GPA. The GPA is determined by dividing the number of grade points earned by the total number of ISU cumulative hours. The grade given when an incomplete (I) is resolved is figured into the cumulative grade point average, but not into a particular semester's average. Marks of I, S, P, NP, T, and X are not counted in the grade point average; a mark of F (even if taken S/F) is counted in the grade point average. Creative Component/Research (599 and 699) credits are not used in the calculation of the GPA. In the case of repeated courses, only the grade achieved the last time the course is taken is used in computing the grade point average. (However, grades in courses that are noted as repeatable courses in the catalog, such as certain repeatable seminars, will all be used in calculating the grade point average.)

Grading Research and Creative Component Credits

Creative Component/Research credits may be graded as A, B, C, D, I, S, or F. Plus and minus grades are optional. These credits are not calculated in a student's GPA.

Pass (P)/Not Pass (NP) Course Credit

Pass/Not Pass courses are those that a student, with the approval of the major professor, may take for personal enrichment, but not for satisfying prerequisites or deficiencies in the undergraduate background. P/NP marks may not be used in a POS, nor do P/NP marks contribute to the student's GPA. Full credit for P/NP courses is used in calculating tuition assessment and credit load limitations. For more information, see the Graduate College Handbook.

Satisfactory/Fail (S/F) Grading

S/F grading is not the same as P/NP grading. S/F grading is by instructor option; all students in a particular course receive S/F grading. P/NP grading is generally a student option. A P mark is equivalent to at least a D- grade whereas an S mark is equivalent to at least a B grade at the graduate level. No special registration procedures are required for S/F grading. An S mark in a course taken S/F is not counted in the grade point average, but an F mark in a course taken S/F is counted in the grade point average and is equivalent to an F in a regularly graded (A-F) course. No more than 20 percent of the total credits (excluding creative component, thesis or dissertation research) in the program of study may be earned on an S/F basis.

S/F grading may be used only for approved courses offered as seminars, symposia, workshops, special topics, and research. Programs must submit requests for S/F grading to the Dean of the Graduate College. The Graduate College Curriculum and Catalog Committee reviews and approves or rejects all S/F courses.

Grievances about Grades

A graduate student who feels that a course grade has been unjustly assigned, and whose attempts to resolve the matter with the instructor have failed, may appeal through the grievance procedures described in the Graduate College Handbook.

Probation

If a graduate student does not maintain a cumulative 3.0 grade point average on all course work taken, exclusive of research credit, he or she may be placed on academic probation by the Dean of the Graduate College. Grades earned by graduate students in undergraduate courses are included in the calculation of the grade point average. Academic probation judgments are made on the basis of grades in course work only. New, first-term, degree seeking graduate students who fall below a 3.0 GPA at the end of their first semester will be given a one term grace period to bring their grades back to a 3.0 GPA. These students will receive a warning letter from the Graduate College.

While on academic probation a student will not be admitted to candidacy for a degree and if appointed to a graduate assistantship, the student will not receive a Graduate tuition scholarship unless approval is given by the student's academic college. If a student is to qualify for a tuition scholarship, he/she must be removed from probation by the tenth class day of the term.

To insure that registration does not take place without a review by the program, the Graduate College places a hold on future registrations by a student on probation. Before the student registers for each term, the program must review his or her record and recommend in writing if the Graduate College should permit further registration. Before graduation is approved, the student must complete all courses listed on the program of study with a minimum grade of C and have achieved a 3.0 GPA or greater.

English Requirements for Non-native Speakers

Applicants whose native language is not English and who have not earned a bachelor's or master's in a country where the only official language is English are required to submit Test of English as a Foreign Language (TOEFL) scores as part of the admission process. A minimum score of at least 79 on the TOEFL internet-based test or 550 on the paper-based test is required by the Graduate College. International students may also submit IELTS (International English Language Testing System) scores in lieu of the TOEFL. The ISU Graduate College minimum is 6.5. Because many programs require higher TOEFL and/or IELTS scores, applicants should check directly with the program to which they desire admission or browse the Graduate College Web site at www.grad-college.iastate.edu/programs/APprograms.php (<http://www.grad-college.iastate.edu/programs/APprograms.php>).

Graduate students whose native language is not English and who did not graduate from a U.S. institution must take an English Placement Test at the beginning of their first semester of enrollment. This test is administered by the Department of English. A student who does not pass this examination is assigned to one or more courses in the English 99 and 101 series. This course work must be completed during the first year of study. (There is a developmental course fee for the English 99 course.). Non-native English speaking ISU graduate students who meet or exceed the TOEFL scores (640 or above on the paper-based test or 105 on the internet-based test) are exempted from taking the English Placement Test. (Self-enrollment in English 099 or 101 courses remains possible.)

A graduate student whose native language is not English but did graduate from a U.S. institution, may bring to the Graduate College the "Request for the Graduate College to Approve the Graduate English Requirement for a Student Whose Native Language is NOT English" form, available from the Graduate College or on the Graduate College's Web site at www.grad-college.iastate.edu/common/forms/student_forms. ([http://](http://www.grad-college.iastate.edu/common/forms/student_forms)

www.grad-college.iastate.edu/common/forms/student_forms.phpphp. Two conditions must be met: the student must have received a bachelor's, master's, or Ph.D degree from a U.S. college or university and the language of instruction at that college or university must have been in English.

New teaching assistants whose native language is not English are evaluated for their ability to communicate effectively in English before their assistantship assignments are made. The Oral English Certification Tests (OECT) are given before the beginning of each semester. The testing dates are announced on the International Teaching Assistants (ITA) program website. Registration for the test is held on line through links posted on the ITA program homepage, <http://www.grad-college.iastate.edu/speakteach/>, two to three weeks before the test is administered. TAs and faculty with questions about OECT testing should call 515-294-1958 or 515-294-7996. A prospective teaching assistant who does not pass these tests is required to successfully complete course work and be retested. English 180 is a series of communication courses designed to help new teaching assistants. Students focus upon pronunciation, listening, question-handling, teaching and lecturing skills, and analyze the culture of U.S. university life. Because enrollment is restricted, TAs cannot register for the courses online through AccessPlus. TAs must go to the ITA Office, 1137 Pearson immediately after they receive the test scores to obtain permission to enter the course by completing a course add slip.

Department/Program Change

Transferring from One Major/Program/Department to Another

Students who have been admitted to a graduate program and to the Graduate College may request to transfer at a later date to another department or program. Because graduate students are admitted to particular programs, transfers require the approval of both the receiving program and the Graduate College.

Students seeking transfer to another program or department should first discuss their wishes with the new program DOGE (Director of Graduate Education) to determine requirements and interest by the new program. When a student receives a favorable preliminary response from the new program, he or she should fill out the student portion of the form entitled "Request to Transfer from One/Major/Program/Department to Another" and submit this form to his or her current DOGE. The current DOGE will fill out the Current Program Information adding any comments he or she believes the new program should consider and forward the form to the proposed new program. This form is available from the department, the Graduate College, or the Graduate College web page.

The receiving program will generally give the student the same consideration and employ the same admissions standards that are used for original applications for admission and will expect the same application materials (transcripts, letters of recommendation, test scores, etc). During the process, the new and old programs and the Graduate College are authorized and encouraged to seek and disclose information related to the student's overall fitness for studies in the receiving program. Programs are authorized to inquire into the student's prior conduct at the university, both with the prior department and with the Dean of Students.

Upon departmental action (acceptance or denial), the request to transfer form must be sent to the Graduate College for approval. All parties will receive a copy of the completed form from the Graduate College.

Students desiring to transfer from a degree-seeking status to a nondegree-seeking status need to fill out the "Request to Transfer from One Major/Program/Department to Nondegree" form and bring it to the Graduate College.

Students desiring to transfer from nondegree-seeking status to a degree-seeking status must be admitted by a program through the regular graduate admission process.

Curriculum Change from Active Graduate to Active Undergraduate Status

Individuals who are in good standing in the Graduate College and who wish to transfer to an undergraduate curriculum must contact the graduate classification officer (1137 Pearson Hall). The classification officer will consult with the student and determine the proper course of action.

Curriculum Change from Inactive Graduate to Active Undergraduate Status

Individuals who were admitted to the Graduate College more than one year previous and who do not have active graduate status but who wish to change their status from inactive graduate to active undergraduate, must follow the same procedures required of reentering undergraduate students and must begin the process by filing a completed "Undergraduate Reentry" form with the Office of the Registrar. When considering reinstatement, the undergraduate college may consider the student's overall fitness for continued studies including information about the student's conduct, employment and education since the student's last enrollment.

Individuals who do not have active graduate status and who first enrolled less than one year previous should first see the classification officer in the Graduate College.

Time Limits. It is expected that work for the master's degree shall be completed within five years. In special circumstances the student's POS committee may recommend that the Dean of the Graduate College extend these degree time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student's POS committee and the Graduate College. The inclusion in the student's program of study of course work that is beyond the time limits ("over-age" courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Application for Graduation. Students planning to graduate must complete an "Application for Graduation" form through their online AccessPlus system by the end of the third week of the semester (fall or spring) in which he/she expects to receive the degree, or by the last day of spring semester when wishing to graduate during summer.

Before completing this form, a student must have submitted and had approved by the Graduate College a "Recommendation for Committee Appointment" form and a "Program of Study" form. Also the student must have been fully admitted to a program and have met the Graduate English requirement if he/she is a non-native English speaker. Graduation may be delayed if the "Application for Graduation" form filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she can go online through AccessPlus and cancel the previously submitted "Application for Graduation" form by the designated

deadline. The student must then complete a new form for the next planned term of graduation.

Thesis. A master's thesis is a scholarly composition that demonstrates the ability of the author to do independent and creative work. A thesis is required in all fields in which a master's degree is awarded, except where specific provision is made for a nonthesis degree program. A minimum of three research credits is required on every program of study for a thesis master's degree.

Responsibility for writing and editing of the thesis rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of theses. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the thesis to assure the highest level of quality when the student presents the thesis to the committee for final approval.

Copies of the thesis must be submitted to the members of the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please browse the Graduate College's web site (<http://www.grad-college.iastate.edu/current/thesis>) for requirements, revised fees, and other pertinent information.

Shortly after the submission of the "Application for Graduation" form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar's Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College's cancellation deadline.

Creative Component. Most nonthesis students must present substantial evidence of individual accomplishment (e.g., a special report, capstone course, integrated field experience, annotated bibliography, research project, design, or other creative endeavor). A minimum of two credits of such independent work is required on those programs of study for a nonthesis master's degree. Some programs require more credits. (For more information, contact the individual program or consult the Specific Master's Degrees section in this catalog.) The element of creative independent study must be explicitly identified on the program of study. The format of the creative component is determined in cooperation with the POS committee. As with a thesis, a creative component should be submitted to members of the POS committee two weeks before the final oral examination. However, no final submission of a creative component is turned in to the Graduate College for review and approval.

Final Oral Examination. Most master's candidates must pass final oral examinations. The final oral examination must be held by the final examination deadline date for the semester in which the degree is granted. All coursework in the program of study must either be completed or in progress before the final examination can be scheduled. This examination is oral; it may also include a written component if specified by the student's (POS) committee.

Graduate students must register at Iowa State for the equivalent of two credits, or for the R-credit course if no course work is needed, during the semester in which the final examination is taken. (Graduate students who are not required to take a final oral examination should complete all required coursework on the POS prior to or during the term of graduation. Any transfer credits must be completed the term before the graduation term and follow normal transfer rules.) Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not

acceptable for the term of the final oral examination. If the examination is taken during the interim between terms (including the first day of classes), registration can be for either the term before or the term after the examination is held.

The candidate is responsible for initiating the "Request for Final Oral Examination" form, which must be submitted to the Graduate College at least three weeks before the examination. This form can be obtained only from the student's program/department. The entire POS committee must be convened for the final oral examination. For more information on the final oral examination, see the Graduate College Handbook.

Graduate Student Approval Slip for Graduation. Every candidate for an advanced degree is required to complete a "Graduate Student Approval Slip for Graduation" form. It is sent to the major professor or program to give to the student after the "Request for Final Examination" form is received and approved by the Graduate College. Signatures are required by the major program, the Graduate College Thesis specialist (for those completing a thesis), and the Graduate College. Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. An incomplete or non-report grade that a student receives for the term of graduation will result in removal from that term's graduation list. The student will need to complete a new Application for Graduation and Graduate Student Approval Slip for the new term of graduation. If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.

Undergraduate Admission to Concurrent Graduate Degree/Certificate Programs

Several programs provide opportunities for qualified ISU juniors and seniors majoring in those curricula to apply for admission to both a bachelor's and master's degree.

The graduate degree will be awarded only at the same time as, or after, the undergraduate degree is conferred. For a complete listing of the concurrent degree programs, consult the Graduate College Handbook, "Concurrent Degree Programs" on page 27 of the Handbook, <http://www.grad-college.iastate.edu/common/handbook/>.

Students interested in a research career may apply for graduate research assistantships during their last two years of study. Students should contact the graduate programs about applying early in their undergraduate careers. Undergraduate students seeking admission to concurrent graduate degree programs in field other than these, plus any student with an interdepartmental major, must submit the appropriate concurrent form completed and a written proposal for an individualized program, co-signed by their advisers, to the Graduate College for review and approval. For more information about the application process and transferring credits, consult the Graduate College Handbook.

Veterinary Medicine Students in Concurrent Graduate Degree/Certificate Programs

Students may be concurrently enrolled in the professional curriculum leading to the D.V.M. degree and in a graduate program leading to the M.S. or Ph.D. degree after completion of 90 semester credits. The graduate program may be in the College of Veterinary Medicine or in another college.

Interested students must adhere to the following process:

- Complete a "Concurrent Enrollment for Graduate/Veterinary Medicine Degrees" form available on the web site at www.grad-college.iastate.edu/common/forms/index.php (<http://www.grad-college.iastate.edu/common/forms>). This is a combination application/concurrent form.
- Submit the "Concurrent Enrollment Request" form to the Graduate College after appropriate signatures are obtained.

Signed approvals on the concurrent form are required from the graduate program, the College of Veterinary Medicine, and the Graduate College. On admittance, the student receives an admission notification from the Office of Admissions. For more information see the Graduate College Handbook.

Graduate Students in Concurrent Undergraduate Programs

Graduate students interested in enrolling in a concurrent undergraduate program should contact the Office of Admissions (100 Enrollment Services Center) to obtain admission information (even if the student has been previously admitted as an undergraduate). An "Application for Graduate Student Wishing to Pursue a Concurrent Undergraduate Degree" form should be obtained from the Graduate College Web site at www.grad-college.iastate.edu/common/forms/index.php (<http://www.grad-college.iastate.edu/common/forms>) and circulated for the appropriate approvals.

- Official enrollment and fee payment will be as a graduate student.
- The graduate degree or graduate certificate will be awarded only at the same time as, or after, the undergraduate degree is conferred.
- Students interested in a research career may be able to apply for a graduate research assistantship while in a concurrent degree or graduate certificate program.
- Students in concurrent degree programs may, subject to Program of Study Committee approval, double count up to 6 ISU credits of major or nonmajor graduate credits courses for both a Bachelor's degree and a certificate or a Master's degree.
- For students pursuing a concurrent undergraduate bachelor's degree and a graduate certificate, at least 12 graduate credits cannot be double counted and a maximum of 6 graduate credits can be double counted for both the bachelor's degree and the graduate certificate (when the graduate certificate requires more than 12 credits).
- A student in a bachelor's and master's concurrent degree program cannot be on a Ph.D. track during the concurrent program.

A complete list of Concurrent Bachelor and Master Programs or Graduate Certificate Programs can be found in the Graduate College Handbook, pages 30-31. <http://www.grad-college.iastate.edu/common/handbook>

Master's Degrees

General requirements for all master's degrees are as follows:

General Requirements

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their graduate program, including specific course requirements and research requirements appropriate to the master's programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student's program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals of the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student's Program of Study (POS) Committee

New graduate students at ISU may be assigned a temporary academic adviser by the major program in the first semester of the student's residence. This faculty member guides the student in selection of a field of study and in development of a graduate program of study until the major professor and POS committee are selected. After the POS committee has been selected, it guides and evaluates the student during the remainder of graduate study.

A thesis master's POS committee consists of at least three members of the graduate faculty. It must include two members, including the major professor, from the major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student's master's research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for the direction of a program of study. A non-thesis master's degree needs a minimum of one committee member.

Programs may establish requirements for more than one member. For more information on duties and makeup of the committee as well as changes to the committee makeup, see the Graduate College Handbook.

Program of Study. The student and major professor develop the program of study with the consultation and approval of the POS committee. This agreement between the student and the Graduate College should be submitted as early as possible for approval. It is recommended that the committee be formed and the POS form submitted as early as the second semester of graduate study. In no case can the committee and program of study be formed later than the term before the preliminary oral exam for Ph.D students, and the final oral examination for master's students.

Residency. There is no on-campus residency requirement for the master's degree.

Credits. Unless otherwise noted, at least 30 credits of acceptable graduate work must be completed in all master's programs. At least 22 graduate credits must be earned from Iowa State University.

Transfer Credits. At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits

earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced degree at that institution and must have been taught by individuals having graduate faculty status at the institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is the student's responsibility to provide verification by letter from that institution that these graduate courses were not used to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed the term before the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better. Audits may be listed on the program of study, but do not carry credit.

Major. A major is an approved area of study leading to a graduate degree. The exact number of credits in a major is not prescribed.

Minor. Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. A student may not minor and major in the same field. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student's POS committee.

The minor subject area must be tested at the final oral examination and cannot be placed on the transcript after graduation unless it was approved on the program of study, listed on all examination reports, and recorded on the "Application for Graduation" form (diploma slip). A minor cannot be added to a degree that has already been received.

Specific Master's Degrees

The number of credits in a major for a master's degree will vary according to various degrees. General credit requirements for all master's degrees include: a minimum of 30 graduate credits is required for all master's programs at ISU; at least 22 graduate credits must be earned at ISU; any transfer of graduate credits from another institution must be recommended in the program of study by the POS committee; and graduate credit earned as a graduate student will be approved for transfer only if a B grade or better was earned. A transcript must accompany the POS form. A complete listing of specific master's degrees can be found in the Graduate Handbook, section E, page 107, <http://www.grad-college.iastate.edu/common/handbook/>. A complete listing of all master's degrees can also be found online, <http://www.grad-college.iastate.edu/academics/gradprograms/index.php>.

Master's Double Degree Programs

A double degree requires fulfillment of the requirements for two graduate majors for which two differently named master's degrees and two diplomas are granted at the same time. For double degrees the final project (thesis or creative component) must integrate subject areas from both departments. One final oral examination must be held covering

the combined thesis or creative component. Students planning to pursue double degrees must complete a double degree request form and submit it to the Dean of Graduate College for approval. Just one "Recommendation for Committee Appointment" form and one "Program of Study (POS)" form need to be submitted for the two degrees. However, two "Application for Graduation" forms, one for each degree, will need to be submitted. All forms should show clearly that the student is enrolled in a double-degree program.

Like other master's programs, three graduate faculty members can constitute a POS committee; however, POS committees for double degrees must include co-major professors from each of the majors. Although specific degree programs may require more, the program of study must include at least 44 hours of non-overlapping credit (22 for each major) in the two degrees.

A complete listing of the Double Degree Programs can be found in the Graduate College Handbook, page 35, <http://www.xgrad-college.iastate.edu/common/handbook/>.

If a student outside one of the named areas is interested in an individually-developed double degree program, a written proposal for a double degree to serve those interests and needs must be submitted to the Dean of the Graduate College for review. See the Graduate College Handbook for more information.

Drake University Law School/Iowa State University Combined Degree

To provide training in the complementary fields of law, political science, and economics with a minimum amount of academic duplication, special arrangements for combined degree programs have been approved with the Drake University Law School. ISU and Drake offer a combined J.D.-M.A. in political science and J.D.-Ph.D. in economics. Drake Law School students are permitted to transfer the equivalent of nine semester credits of specified law courses to ISU for nonmajor graduate credit. Because of the difference in grading systems, the Law School grades are transferred as passes, provided the student has achieved a grade of C or better in those courses at Drake for the political science program or a grade of B or better for the economics program.

Applicants for either of the combined programs must meet the regular entrance requirements of, and be admitted to, both the Drake Law School and the ISU Graduate College.

Doctor of Philosophy General Requirements

The degree doctor of philosophy is strongly research oriented. The primary requirements for the degree are:

- high attainment and proficiency of the candidate in his or her chosen field
- development of a dissertation which is a significant contribution to knowledge and which shows independent and creative thought and work
- successful passing of detailed examinations over the field of the candidate's major work, with a satisfactory showing of preparation in related courses. General requirements for Ph.D. candidates follow.

The Graduate College Handbook outlines the general requirements for completion of a graduate degree at ISU. Faculty in a major field have the responsibility for establishing educational objectives for their

graduate program, including specific course requirements and research requirements appropriate to the master's or Ph.D. programs in the major. These requirements may place additional responsibilities on the student, the major professor, or the student's program of study (POS) committee beyond those listed in the Graduate College Handbook as deemed appropriate to the goals for the major program.

Faculty and graduate students are active participants in the academic programs of Iowa State University. As active participants, they have a collective impact on the success of those programs and of the university in fulfilling its mission. Each graduate program is encouraged to implement a mechanism for responding to feedback from graduate students as a valuable resource for continuing improvement.

Appointment of the Student's Program of Study (POS) Committee

The POS committee for a doctoral program consists of at least five members of the graduate faculty. It must include at least three members, including the major professor, from within the student's major or program. The committee must include member(s) from different fields of emphasis so as to ensure diversity of perspectives. A term member of the graduate faculty may participate in the direction of a student's dissertation research as a co-major professor if a member of the graduate faculty serves as a co-major professor and jointly accepts responsibility for direction of the dissertation.

Changes to POS committee

Recommendations for changes in the POS committee must have the approval of the student, major professor, DOGE, and all committee members involved in the change (committee members who are on Faculty Professional Development Assignments, retired, or resigned do not have to sign) before seeking approval of the Graduate College. A form to seek approval is available in program offices or on the web at www.grad-college.iastate.edu/forms/forms.html (<http://www.grad-college.iastate.edu/forms/forms.html>). These changes must be approved by the Dean of the Graduate College before the preliminary or final oral examination is held. For more information on changes to the committee and to the Program of Study, see the Graduate College Handbook.

Program of Study

The student and the major professor develop the program of study with the consultation and approval of the POS committee. Early selection of a major professor, appointment of a POS committee, and development of a program of study are very important. It is recommended that the committee be formed as early as the second semester of graduate study. In no case can the committee be formed later than the term before the preliminary oral examination.

Credits

A minimum of 72 graduate credits must be earned for a Ph.D. degree. At least 36 graduate credits, including all dissertation research credits, must be earned at Iowa State University. There is no specific university requirement regarding the number of credits to be taken inside or outside the major/program.

Transfer Credits

At the discretion of the POS committee, and with the approval of the program and the Graduate College, graduate credits earned as a graduate student at another institution or through a distance education program offered by another institution may be transferred if the grade was B or better. Such courses must have been acceptable toward an advanced

degree at that institution and must have been taught by individuals having graduate faculty status at that institution. If a student wishes to transfer credits from graduate courses taken at or through another university as an undergraduate student, it is that student's responsibility to provide verification by letter from that institution that those graduate courses were not taken to satisfy undergraduate requirements for a degree.

A transcript must accompany the POS in order to transfer credits. The POS committee may ask for other materials, such as a course outline or accreditation of the institution, to evaluate the course. Transfer courses not completed when the POS is submitted must be completed before the term in which the student graduates. A transcript must then be submitted for review and final approval.

Research credits earned at another institution are generally not transferred. In rare circumstances, the transfer of S or P marks may be accepted for research credits only. It is the responsibility of the POS committee to obtain a letter from the responsible faculty member at the other institution stating that research credits recommended for transfer with S or P marks are considered to be worthy of a B grade or better.

Major

A major is the area of study or academic concentration in which a student chooses to qualify for the award of a graduate degree. Majors are listed at the end of this section of the bulletin. Opportunities also exist for majoring in more than one area of study (co-major or joint major programs).

Minor

Students may request a minor in any program approved to grant a graduate degree and in programs approved to offer only a minor. Requirements for declared minors are determined by the minor program and the faculty member representing the minor field on the student's POS committee. The minor subject area must be tested at the preliminary oral and final oral examinations. A minor cannot be added to a program of study after the preliminary oral examination has been taken, nor can a minor be placed on the transcript after graduation, unless it was approved on the program of study, listed on all examination reports, and recorded on the "Application for Graduation" form (diploma slip). A student may not minor and major in the same field. A minor cannot be added to a degree that has already been awarded.

Time Limits

A student beginning a Ph.D. degree program at Iowa State with a master's degree from another institution is expected to complete the Ph.D. within five years, while a student beginning a Ph.D. degree program without the master's degree is expected to complete the program within seven years. If warranted, the Program of Study (POS) Committee may request by letter that the Dean of the Graduate College extend these time limits. Cases in which the student leaves Iowa State during his or her graduate career and later returns are dealt with individually by the student's program of study committee and the Graduate College. The inclusion in the program of study of coursework that is beyond the time limits ("over-age" courses) must be justified by the POS committee in a statement accompanying the submission of the program of study.

Preliminary Examination

The Graduate College requires a preliminary oral examination of Ph.D. degree students; most programs add a written portion to the preliminary oral examination. The Ph.D. degree preliminary oral examination rigorously tests a graduate student's knowledge of major, minor, and

supporting subject areas as well as the student's ability to analyze, organize, and present subject matter relevant to the field. A "Request for Preliminary Examination" form must be submitted to the Graduate College by the major professor at least two weeks before the proposed date of the examination.

The following conditions should be met before the "Request for Preliminary Examination" form is submitted to the Graduate College: admitted to full admission status in a Ph.D. granting program, approved "Recommendation for Committee Appointment" form, approved POS form, English requirement met, not on probation, time limit not exceeded, qualifying examination (if required by program) passed, and registration for at least the equivalent of 2 credits, or for the R-credit course if no course work is needed, during the term in which the preliminary oral examination is taken. (Taking only an R-credit course where the fee is not equivalent to the 2-credit minimum charge is not acceptable for the term of the preliminary oral examination.)

A preliminary oral examination will not be scheduled for a student on provisional or restricted admission or on academic probation. Upon successful completion of the preliminary oral examination, the student is admitted to candidacy for the Ph.D. degree. If the graduate student fails all or part of the preliminary oral examination, the committee provides two options: gives a not pass and allows the student to retake the examination after six months or gives a not pass and does not allow the student to retake the examination. Six months must elapse between the first attempt and the next. The entire POS committee must be convened for the preliminary oral examination. The preliminary oral examination must be passed at least six months prior to the final oral examination. An exception to the rule is allowed if a request signed by the major professor(s) and the program's DOGE is approved by the Dean of the Graduate College.

Application for Graduation

Application for graduation should be made by the end of the third week of the semester (fall or spring) in which the student expects to receive the degree, or by the last day of the spring semester if graduation is planned during summer session. To apply for graduation, the student is required to complete an "Application for Graduation" form, available online through the student's AccessPlus system. Before submitting this form, a student must have submitted and had approved by the Graduate College a "Recommendation for Committee Appointment" form and a "Program of Study" form in the previous semester. Also the student must have been fully admitted to a program and have met the Graduate English requirement. Graduation may be delayed if the "Application for Graduation" filing deadline is not met. If it becomes apparent that a student cannot graduate during the indicated term, he/she can go into AccessPlus and cancel the previously submitted "Application for Graduation" form before the designated deadline. The student must then file a new form for the next planned term of graduation. **Late application.** A student may file a late Application for Graduation during the fourth and fifth weeks of the semester. Students will be charged a non-refundable \$20 late fee for a late application.

Dissertation

A doctoral dissertation must demonstrate conclusively the ability of the author to conceive, design, conduct, and interpret independent, original, and creative research. It must attempt to describe significant original contributions to the advancement of knowledge and must demonstrate the ability to organize, analyze, and interpret data. In most instances, a dissertation includes a statement of purpose, a review of pertinent literature, a presentation of methodology and results obtained, and

a critical interpretation of conclusions in relation to the findings of others. When appropriate, it involves a defense of objectives, design, and analytical procedures. Dissertation research should be worthy of publication and should appear in appropriate professional journals or in book form.

Responsibility for writing and editing of the dissertation rests with the student, under the supervision of the major professor, and not with the Graduate College. The Graduate College does not permit joint authorship of dissertations. It is the responsibility of the major professor to supervise the preparation of preliminary and final drafts of the dissertation, so as to assure the highest level of quality when the student presents the dissertation to the committee for final approval. Copies of the dissertation must be submitted to the POS committee at least two weeks before the final oral examination.

All theses and dissertations will be submitted electronically after the final oral examination is held. Please browse the Graduate College's web site (<http://www.grad-college.iastate.edu/current/thesis/>) (<http://www.grad-college.iastate.edu/current/thesis>) for new requirements, revised fees, and other pertinent information.

Shortly after the submission of the "Application for Graduation" form, a one-time, nonrefundable thesis fee is billed by the university accounting system. In addition, a graduation fee will be assessed by the Registrar's Office. This fee is nonrefundable if a student does not cancel his/her graduation by the Graduate College's cancellation deadline.

Final Oral Examination

The Ph.D. final oral examination, conducted after the dissertation is finished, is oral and often limited to a defense of the dissertation. To receive the degree at the end of a given semester, the student must hold the final oral examination before the final oral examination deadline for the semester.

The candidate is responsible for initiating the "Request for Final Oral Examination" form, which must be submitted to the Graduate College at least three weeks before the examination. This form can be obtained only from the student's program/department. The entire POS committee must be convened for the final oral examination. For more information on the final oral examination, see the Graduate College Handbook.

Graduate Student Approval Slip for Graduation

Every candidate for an advanced degree is required to complete a "Graduate Student Approval Slip for Graduation" form. It is sent to the major professor or program to give to the student after the "Request for Final Examination" form is received and approved by the Graduate College. Signatures are required by the major program. Final clearance of academic requirements will be made when current term grades have been submitted and evaluated by the Graduate College.

All incompletes from previous terms must be completed by the deadline for completion of the Graduate Student Approval Slip. An incomplete, non-report, or grades lower than a C that a student receives for the term of graduation will result in removal from that term's graduation list. The student will need to complete a new Application for Graduation and Graduate Student Approval Slip for the new term of graduation. If a conditional pass was recommended at the final oral examination, the major professor and the committee members, if so specified, must notify the Graduate College in writing no later than the due date for the Graduate Student Approval Slip for the term of graduation that the conditions have been met.

Interdisciplinary Programs

Interdepartmental programs are available at both graduate and undergraduate levels. An interdepartmental program is an administrative structure usually not functioning as a department, ordinarily headed by a supervisory committee, and offering a degree with major(s) in that subject area. Interdepartmental programs have been officially approved and may offer courses.

See individual programs for information regarding admission and academic requirements.
