FOOD SCIENCE AND HUMAN NUTRITION (FS HN)

Courses primarily for undergraduates:

FS HN 101: Food and the Consumer
(3-0) Cr. 3. F.S.
Prereq: High school biology and chemistry or 3 credits each of biology and chemistry

FS HN 102: Nutrition for Sport Performance
(1-0) Cr. 1. F.S.
Analysis of the body’s use of nutrients for energy. How to select a balanced diet to meet specific athletic performance needs and for lifelong wellness. Macronutrient needs before, during and after specific sport activities. Analysis of claims and evidence regarding dietary supplements for sport performance.

FS HN 104: Introduction to Professional Skills in Culinary Science
(0-6) Cr. 1. S.
Introduction to culinary science. Students will develop fundamental culinary skills by arranged on-campus work experience (100 hours). Sessions with instructor arranged.

FS HN 110: Professional and Educational Preparation
(1-0) Cr. 1. F.S.
Introduction to professional and educational development within the food science and human nutrition disciplines. Focus is on university and career acclimation as well as enhancement of communication skills. Offered on a satisfactory-fail basis only.

FS HN 111: Fundamentals of Food Preparation
(2-0) Cr. 2. F.S.
Prereq: FS HN 101 or FS HN 167; high school chemistry or CHEM 160; concurrent enrollment in FSHN 115.

FS HN 115: Food Preparation Laboratory
(0-3) Cr. 1. F.S.
Prereq: Credit or enrollment in FS HN 111 or FS HN 214
Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety.

FS HN 120: The Biochemistry of Beer
(Cross-listed with BBMB). (2-0) Cr. 2. F.
An introduction to the major classes of biomolecules, basic biochemical concepts, enzymology, metabolism and genetic engineering as they apply to the production and flavor of beer. All aspects of the biochemistry of beer will be covered, including the malting of barley, starch conversion, yeast fermentation and the chemical changes that occur during the aging of beer. Intended for non-majors. Natural science majors are limited to elective credit only.

FS HN 167: Introduction to Human Nutrition
(3-0) Cr. 3. F.S.SS.
Prereq: High school biology or 3 credits of biology
Understanding and implementing present day knowledge of nutrition. The role of nutrition in the health and well being of the individual and family.

FS HN 203: Contemporary Issues in Food Science and Human Nutrition
(1-0) Cr. 1. F.S.
Introduction to presentation of published research and discussion of current issues in food science and human nutrition. Emphasis on sources of credible information, ethics, and communication.

FS HN 207: Processing of Foods: Basic Principles and Applications
(1-3) Cr. 2. F.
Prereq: FS HN 101
Lecture and lab-based instruction on principles of food processing for preservation, raw food materials and their impact on food processing, food product-based discussion and activities highlighting required unit operations and resulting food quality and safety; water, heat, acidity, and oxygen effect on processing, separation and mixing operations, packaging materials properties and methods, and cleaning and sanitation in processing plants.

FS HN 214: Scientific Study of Food
(3-0) Cr. 3. F.S.
Prereq: FS HN 167 or FS HN 265; CHEM 231 or CHEM 331; plus concurrent enrollment in FS HN 115 or 215
FS HN 215: Advanced Food Preparation Laboratory  
(0-6) Cr. 2. F.S.  
Prereq: Credit or enrollment in FS HN 214  
Practice standard methods of food preparation with emphasis on quality, nutrient retention, and safety. Development of culinary skills and advanced food preparation.

FS HN 242: The US Food System  
(3-0) Cr. 3. S.  
Exploration of the components of our food system including food production, food processing, and food access and the social, political and ethical influences on these components. Controversial topics related to how food is produced, processed, marketed and consumed will be discussed.

FS HN 264: Fundamentals of Nutritional Biochemistry and Metabolism  
(3-0) Cr. 3. F.  
Prereq: FS HN 167, CHEM 163, CHEM 163L; BIOL 211  
Digestion, absorption, metabolism, and biochemical functions of nutrients. Biochemical aspects of nutrient deficiencies.

FS HN 265: Nutrition for Active and Healthy Lifestyles  
(3-0) Cr. 3. S.  
Prereq: FS HN 167, plus credit or enrollment in BBMB 301 or credit in FS HN 264  

FS HN 276: Understanding Grape and Wine Science  
(Cross-listed with HORT). (3-0) Cr. 3. Alt. S., offered even-numbered years.  
Prereq: High school biology and chemistry.  
A scientific introduction to viticulture (grape-growing) and enology (wine-making). Topics include grape species and varieties, viticulture practices, fruit quality, geography, history, principles of fermentation and aging, wine classification, appreciation, evaluation, storage and service, regulations, wine as food. No wine tasting.

FS HN 308: Dairy Products: Current Issues and Controversies  
(3-0) Cr. 3. Alt. S., offered odd-numbered years.  
Course will address milk chemistry, microbiology, handling, processing, regulations, organic production, and nutrition; dispel myths about dairy foods; improve critical thinking and communication skills. Students will participate in structured controversies.

FS HN 311: Food Chemistry  
(3-0) Cr. 3. F.  
Prereq: CHEM 231 or CHEM 331; credit or enrollment in BBMB 301  
The structure, properties, and chemistry of food constituents and animal and plant commodities.

FS HN 311L: Food Chemistry Laboratory  
(0-3) Cr. 1. F.  
Prereq: Credit or concurrent enrollment in FSHN 311.  
The laboratory practices of structure, properties, and chemistry of food constituents.

FS HN 314: Foundations of Culinary Food Science  
(1-0) Cr. 1. S.  
Introduction to the roles culinary scientists hold within industry including product development, research, and quality assurance. Discussions focused on professional and educational development, enhancement of communication skills, ethics and emerging issues and trends in culinary science.

FS HN 315: Professional Development for Food Science Majors  
(2-0) Cr. 2. F.  
Prereq: Food Science major with at least a junior level status  
Preparation for internships and careers in Food Science. Importance of soft skills and application of those skills to potential job situations.

FS HN 340: Foundations of Dietetic Practice  
(1-0) Cr. 1. F.  
Prereq: DIET or PDEX classification  
Introduction to the profession of dietetics and responsibilities associated with dietetic professional practice. Emphasis on exploring career options in dietetics and preparation for a dietetic internship. Leadership and professional career development for the dietitian is addressed through self reflection, creation of materials for post-baccalaureate programs and job shadowing experience. Professional issues related to dietetic practice include Code of Ethics, legal credentialing and standards of professional practice, leadership and future trends in the profession. Offered on a satisfactory-fail basis only.

FS HN 342: World Food Issues: Past and Present  
(Cross-listed with AGRON, ENV S, T SC). (3-0) Cr. 3. F.S.  
Prereq: Junior classification  
Issues in the agricultural and food systems of the developed and developing world. Emphasis on economic, social, historical, ethical and environmental contexts. Causes and consequences of overnutrition/undernutrition, poverty, hunger and access/distribution. Explorations of current issues and ideas for the future. Team projects.

Meets International Perspectives Requirement.
FS HN 351: Introduction to Food Engineering Concepts  
(3-0) Cr. 3. S.  
Prereq: FS HN 207, MATH 160 or equivalent, and PHYS 111 or equivalent  
Methodology for solving problems in food processing and introduction to food engineering concepts including food properties, material and energy balances, sources of energy, thermodynamics, fluid flow, heat transfer, and mass transfer.

FS HN 360: Advanced Nutrition and Regulation of Metabolism  
(3-0) Cr. 3. F.  
Prereq: FS HN 265, 3 credits in biochemistry; 3 credits in physiology recommended  
Physiological and biochemical basis for nutrient needs; assessment of nutrient deficiency and toxicity; examination of nutrient functions and regulation of metabolism; nutrient-gene interactions.

FS HN 361: Nutrition and Health Assessment  
(1-3) Cr. 2. S.  
Prereq: FS HN 265; 3 credits in statistics; 3 credits in physiology recommended  
The assessment of nutritional status in healthy individuals. Laboratory experiences in food composition and assessment of dietary intake, body composition, and biochemical indices of nutritional status.

FS HN 362: Nutrition in Growth and Development  
(3-0) Cr. 3. S.  
Prereq: FS HN 360; credit or enrollment in a course in physiology  
Molecular, biochemical and physiological basis to understand the nutritional aspects of human development and aging. Nutrient needs and various disease states at each stage of human life cycle.

FS HN 364: Nutrition and Prevention of Chronic Disease  
(3-0) Cr. 3. F.  
Prereq: FS HN 264 or FS HN 265  
Overview of nutrients, their functions, metabolism, food sources and optimal choices for the promotion of health and wellness. Nutrition strategies for the prevention of chronic disease, including cancer, diabetes and obesity, as they apply to individuals or the wider population will be discussed.

FS HN 366: Communicating Nutrition Messages  
(3-0) Cr. 3. S.  
Prereq: FS HN 264 or FS HN 265  
Theory and application of adult learning and behavior change as it relates to the role of nutrition in health promotion and disease prevention. Discussion of nutrition education and interventions relative to various models. Factors to consider in developing the nutrition education/intervention practicum experience. Focus on communication strategies for providing nutrition messages to diverse community audiences using various forms of media and outreach (print, radio, TV, newspaper, consumer publications, websites, community venues). Development of nutrition messages using various forms of media for a target population.

FS HN 367: Medical Terminology for Health Professionals  
(1-0) Cr. 1. F.S.S.  
An independent course focused on medical terminology, abbreviations, and simple clinical mathematical calculations. (offered online only).

FS HN 403: Food Laws and Regulations  
(2-0) Cr. 2. S.S.  
Prereq: 3 credits in food science coursework at 200 level or above  

FS HN 405: Food Quality Assurance  
(Dual-listed with FS HN 505). (2-0) Cr. 2. S.  
Prereq: FS HN 214 or FS HN 311; STAT 101 or STAT 104  
Basis of food quality control/assurance programs and establishment of decision-making processes using official (government and industry) instrumental, chemical, and sensory procedures. Statistical process and quality control procedures and their applications to various food systems. Development of hazard analysis procedures, specifications, grades, standards, and the procedures and processes which can affect the overall microbiological safety of the food.

FS HN 406: Sensory Evaluation of Food  
(Dual-listed with FS HN 506). (2-3) Cr. 3. F.  
Prereq: FS HN 214 or FS HN 311 or AN S 360; 3 credits in statistics  
Sensory evaluation techniques used to evaluate the appearance, aroma, flavor, texture and acceptability of foods. Relationships between sensory and instrumental measurements of color and texture. Work independently and cooperatively (in a team) to identify sensory evaluation objectives, write hypotheses, design and conduct experiments, and analyze and interpret data.
FS HN 407: Microbiological Safety of Foods of Animal Origins  
(Dual-listed with FS HN 507). (Cross-listed with MICRO). (3-0) Cr. 3. S.  
Prereq: MICRO 420  
Examination of the various factors in the production of foods, from  
production through processing, distribution and final consumption  
which contribute to the overall microbiological safety of the food. Upon  
successful completion of this class, the student will receive both the  
Preventive Controls for Human Foods certificate (FDA program) and the  
International HACCP Alliance certificate (USDA-FSIS program).

FS HN 408: Dairy Products Evaluation  
(0-3) Cr. 1. S.  
Prereq: Permission of instructor  
Gain experience in identifying quality defects in dairy products including  
milk, cottage cheese, cheddar cheese, strawberry yogurt, butter, and  
vanilla ice cream. Intensive training for the National Collegiate Dairy  
Products Evaluation competition and for dairy product evaluation in the  
food industry.

FS HN 410: Food Analysis  
(2-3) Cr. 3. F.  
Prereq: FS HN 214 or FS HN 311 or CHEM 211  
An introduction to the theory and application of chemical and  
instrumental methods for determining the constituents of food. Use of  
standard procedures for food analysis and food composition data bases.

FS HN 411: Food Ingredient Interactions and Formulations  
(1-3) Cr. 2. F.S.  
Prereq: FSHN 214 or FS HN 311 and FS HN 115, FS HN 215 or FS HN 311L.  
Application of food science principles to ingredient substitutions in  
food products. Laboratory procedures for standard formulations and  
instrumental evaluation, with emphasis on problem-solving and critical  
thinking.

FS HN 412: Food Product Development  
(Dual-listed with FS HN 512). (1-6) Cr. 3. S.  
Prereq: FS HN 311 or FS HN 411  
Principles of developing consumer packaged food products. Application  
of skills gained in food chemistry, formulation, quality, sensory and  
processing. Some pilot plant experiences. Emphasis on teamwork and  

effective communication.

FS HN 419: Foodborne Hazards  
(Cross-listed with MICRO, TOX). (3-0) Cr. 3. Alt. S., offered even-numbered  
years.  
Prereq: MICRO 201 or MICRO 302, a course in biochemistry  
Pathogenesis of human microbiological foodborne infections and  
toxications, principles of toxicology, major classes of toxicants in the  
food supply, governmental regulation of foodborne hazards. Assessed  
service learning component. Only one of FS HN 419 and FS HN 519 may  
count toward graduation.

FS HN 420: Food Microbiology  
(Cross-listed with MICRO, TOX). (3-0) Cr. 3. F.  
Prereq: MICRO 201 or MICRO 302  
Effects of microbial growth in foods. Methods to control, detect, and  
enumerate microorganisms in food and water. Foodborne infections and  
toxications.

FS HN 421: Food Microbiology Laboratory  
(Cross-listed with MICRO). (0-6) Cr. 3. S.  
Prereq: MICRO 201 or MICRO 302; MICRO 201L or MICRO 302L. Credit or  
enrollment in FS HN/MICRO 420  
Standard techniques used for the microbiological examination of foods.  
Independent and group projects on student-generated questions in food  
microbiology. Emphasis on oral and written communication and group  
interaction.

FS HN 440: Bioprocessing and Bioproducts  
(Dual-listed with FS HN 540). (Cross-listed with C E). (3-0) Cr. 3. F.  
Prereq: C E 326 or equivalent, MATH 160 or MATH 165, CHEM 167 or higher,  
BIOL 173 or BIOL 211 or higher, senior or graduate classification  
Sustainability, cleaner production. Taxonomy, kinetics, metabolism,  
microbial cultivation, aerobic and anaerobic fermentation. Antibiotics,  
food supplements, fermented foods, vitamin production. Biofuels,  
bioenergy and coproducts. Mass/energy balances, process integration,  
pretreatment, separation. Membrane reactors, bioelectrolysis, microbial  
fuel cells, nanotechnology, genetic engineering, mutagenesis.

FS HN 442: Issues in Food and Society  
(2-0) Cr. 2. F.  
Prereq: FS HN 242, FS HN 342  
In-depth discussion, synthesis, and analysis of domestic and  
international food issues including: food systems from farm to fork,  
poverty and world hunger, overnutrition, population, agriculture and the  
environment, ethics, biotechnology, and policy.
FS HN 460: Global Nutrition
(Dual-listed with NUTRS 560 FS HN 560). (3-0) Cr. 3.
Prereq: FS HN 361 or equivalent; senior or graduate standing
An overview of global nutrition issues, including the sociocultural, biological, economic, and environmental context of nutrition related topics. The etiology, epidemiology, and program/policy responses to issues will be presented. Areas to be covered include childhood malnutrition, growth stunting, micronutrient deficiencies, parasites and nutrition, sanitation, and obesity and chronic disease incidence in developing countries. Participatory course, students will engage in a series of class activities, discussions, and presentations.

FS HN 461: Medical Nutrition and Disease I
(4-0) Cr. 4. F.
Prereq: FS HN 360, FS HN 361, FS HN 367; plus BIOL 256 and 256L or BIOL 306 or BIOL 335
(Dual-listed with NutrS 561) Pathophysiology of selected chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

FS HN 463: Community Nutrition
(3-0) Cr. 3. F.
Prereq: FS HN 265 or FS HN 360; FS HN 366 recommended
Dual-listed with NutrS 563. Survey of current public health nutrition problems among nutritionally vulnerable individuals and groups. Discussion of the multidimensional nature of those problems and of community programs addressing them. Grant writing as a means for funding community nutrition program development. Significant emphasis on written and oral communication at the lay and professional level. Field trip.
Meets U.S. Diversity Requirement

FS HN 464: Medical Nutrition and Disease II
(3-0) Cr. 3. S.
Prereq: FS HN 461
(Dual-listed with NutrS 564) Pathophysiology of selected acute and chronic disease states and their associated medical problems. Specific attention will be directed to medical nutrition needs of patients in the treatment of each disease state.

FS HN 466: Nutrition Counseling and Education Methods
(Dual-listed with FS HN 566). (2-2) Cr. 3. F.
Prereq: FS HN 361 and FS HN 362
Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.

FS HN 467: Molecular Basis of Nutrition in Disease Prevention
(3-0) Cr. 3. S.
Prereq: FS HN 360 or equivalent
Understanding the molecular basis for the role of nutrients, nutrient-derivatives, and bioactive compounds in the development and prevention of common diseases including diabetes, cancer, vascular disease, obesity, neurological disease and autoimmune disease. Translating this understanding into practical approaches for improving the health of individuals and populations.

FS HN 471: Food Processing
(3-0) Cr. 3. F.
Prereq: FS HN 351 or A E 451 or CH E 357; MICRO 201 or 302.
Principles and application of food processing using both thermal (ex., blanching, pasteurization, canning, drying, freezing, evaporation, aseptic processing, extrusion) and non-thermal (ex., high pressure, irradiation, pulsed electric field) unit operations. Emphasis on process heat and mass transfer, numerical problem solving and equipment.

FS HN 472: Food Processing Laboratory
(1-3) Cr. 2. F.
Prereq: Credit or enrollment in FS HN 471 or A E 451 or CH E 357
Hands-on and demonstration laboratory activities related to food processing principles and applications using pilot-scale equipment. Laboratory experiences include important food processing operations, e.g., blanching/ pasteurization, canning, freezing, drying, corn wet milling, fermentation, baking etc. Emphasis on interpreting data, writing reports and presentations. Occasional field trips.

FS HN 480: Professional Communication in Food Science and Human Nutrition
(1-0) Cr. 1. F.S.
Prereq: FS HN 203, senior classification in the department
Presentation of current topics using written and oral communication to a lay audience. Emphasis on communication skills for the profession.

FS HN 489: Issues in Food Safety
(Cross-listed with AN S, HSP M, VDPAM). (1-0) Cr. 1. S.
Prereq: Credit or enrollment in FS HN 101 or FS HN 272 or HSP M 233; FS HN 419 or FS HN 420; FS HN 403
Capstone seminar for the food safety minor. Case discussions and independent projects about safety issues in the food system from a multidisciplinary perspective.

FS HN 490: Independent Study
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.S.
Prereq: Permission of instructor
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.
FS HN 490A: Independent Study: Dietetics  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: Permission of instructor  
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490B: Independent Study: Food Science  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: Permission of instructor  
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490C: Independent Study: Nutrition  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: Permission of instructor  
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490D: Independent Study: International Experience  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: Permission of instructor  
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490E: Independent Study: Entrepreneurship  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: Permission of instructor  
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 490F: Independent Study: Honors  
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.S.  
Prereq: Permission of instructor  
Independent work in food science, nutrition, or dietetics. A maximum of 6 credits of FS HN 490 may be used toward graduation.

FS HN 491: Supervised Work Experience  
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.  
Prereq: Advance approval of instructor and adviser  
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491A: Supervised Work Experience: Dietetics  
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.  
Prereq: Advance approval of instructor and adviser  
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491B: Supervised Work Experience: Food Science  
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.  
Prereq: Advance approval of instructor and adviser  
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491C: Supervised Work Experience: Nutrition  
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.  
Prereq: Advance approval of instructor and adviser  
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 491D: Supervised Work Experience: Culinary Science  
Cr. 1-4. Repeatable, maximum of 4 credits. F.S.S.  
Prereq: Advance approval of instructor and adviser  
Supervised off-campus work experience relevant to the academic major. Offered on a satisfactory-fail basis only. A maximum of 4 credits of FS HN 491 may be used toward graduation.

FS HN 492: Research Concepts in Human Nutrition  
(1-3) Cr. 2. F.  
Prereq: senior classification or permission of instructor; FS HN 360  
Students will develop and implement research projects with faculty supervision, based on knowledge gained from nutrition, biology and chemistry courses. Students will prepare a research proposal, conduct research and report results. Students will gain appreciation for independent research and experience creative and innovative aspects of nutrition research.

FS HN 493: Food Preparation Workshop  
(1-3) Cr. 1-3.  
Selected topics in food preparation including scientific principles, culture and culinary techniques. Variable format may include laboratory, recitation, and lecture. Offered on a satisfactory-fail basis only.

FS HN 495: Practicum  
(1-3) Cr. 2. F.S.  
Prereq: Senior classification in Nutritional Science-Nutrition and Wellness option or permission of instructor; FS HN 366; credit or enrollment in FS HN 463  
Students will develop, implement and assess a community-based project that engages groups in learning and practicing concepts related to nutrition and wellness. Assessed service learning component.
FS HN 496: Food Science and Human Nutrition Travel Course
(Dual-listed with FS HN 596). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(Onew credit per week traveled and 1 credit for pre-departure class, if offered.) Limited enrollment. Tour and study of food industry, culinary science, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 496A: Food Science and Human Nutrition Travel Course: International travel
(Dual-listed with FS HN 596A). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(Onew credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement.

FS HN 496B: Food Science and Human Nutrition Travel Course: Domestic travel
(Dual-listed with FS HN 596B). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(Onew credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 498: Cooperative Education
Cr. R. Repeatable, maximum of 2 times. F.S.SS.
Prereq: Permission of department chair.
Required for students completing professional work periods in a cooperative education program. Students must register prior to commencing each work period. Offered on a satisfactory-fail basis only.

FS HN 499: Undergraduate Research
Cr. 1-6. Repeatable, maximum of 6 credits. F.S.SS.
Prereq: Permission of staff member with whom student proposes to work
Research under staff guidance. A maximum of 6 credits of FS HN 499 may be used toward graduation.

Courses primarily for graduate students, open to qualified undergraduates:

FS HN 505: Food Quality Assurance
(Dual-listed with FS HN 405). (2-0) Cr. 2. S.
Prereq: FS HN 214 or FS HN 311; STAT 101 or STAT 104
Basis of food quality control/assurance programs and establishment of decision-making processes using official (government and industry) instrumental, chemical, and sensory procedures. Statistical process and quality control procedures and their applications to various food systems. Development of hazard analysis procedures, specifications, grades, standards, and the procedures and processes which can affect the overall microbiological safety of the food.

FS HN 506: Sensory Evaluation of Food
(Dual-listed with FS HN 406). (2-3) Cr. 3. F.
Prereq: FS HN 214 or FS HN 311 or AN S 360; 3 credits in statistics
Sensory evaluation techniques used to evaluate the appearance, aroma, flavor, texture and acceptability of foods. Relationships between sensory and instrumental measurements of color and texture. Work independently and cooperatively (in a team) to identify sensory evaluation objectives, write hypotheses, design and conduct experiments, and analyze and interpret data.

FS HN 507: Microbiological Safety of Foods of Animal Origins
(Dual-listed with FS HN 407). (Cross-listed with MICRO). (3-0) Cr. 3. S.
Prereq: MICRO 420
Examination of the various factors in the production of foods, from production through processing, distribution and final consumption which contribute to the overall microbiological safety of the food. Upon successful completion of this class, the student will receive both the Preventive Controls for Human Foods certificate (FDA program) and the International HACCP Alliance certificate (USDA-FSIS program).

FS HN 511: Integrated Food Science
(3-0) Cr. 3. F.
Prereq: 3 credits in each of organic chemistry, physics, mathematics, and microbiology.
Critical review of the key principles of food science and applications in the chemistry, microbiology, and processing of food. Understanding of the impact of processing on the quality of foods with respect to composition, quality and safety.

FS HN 512: Food Product Development
(Dual-listed with FS HN 412). (1-6) Cr. 3. S.
Prereq: FS HN 311 or FS HN 411
Principles of developing consumer packaged food products. Application of skills gained in food chemistry, formulation, quality, sensory and processing. Some pilot plant experiences. Emphasis on teamwork and effective communication.
FS HN 516: Advanced Nutrition I
(2-0) Cr. 2. F.S.S.
Prereq: Acceptance in the Master's of Professional Practice in Dietetics program.
Examination of current literature relative to molecular, cellular, and physiologic aspects of macronutrient and micronutrient metabolism. Integration of current evidence-based information, including peer-reviewed literature, to inform advanced professional nutrition practice.

FS HN 518: Advanced Nutrition II
(2-0) Cr. 2. F.S.S.
Prereq: Acceptance in the Master's of Professional Practice in Dietetics program.
Principles of research design/methods and interpreting results/statistics in the current peer-reviewed scientific literature. Critical evaluation of the evidence-base to inform advanced professional nutrition practice.

FS HN 519: Food Toxicology
(Cross-listed with NUTRS, TOX). (3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: A course in biochemistry
Basic principles of toxicology. Toxicants in the food supply: modes of action, toxicant defense systems, toxicant and nutrient interactions, risk assessment. Assessed service learning component. Only one of FS HN 419 and FS HN 519 may count toward graduation.

FS HN 521: Microbiology of Food
(2-0) Cr. 2. S.S.
Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
This course deals with the identification, enumeration, and characterization of bacteria, yeasts, and mold associated with foods and food processing. Effects of physical and chemical agents on microorganisms will be studied. Microbiological problems in food spoilage, food preservation, food fermentation, and food-borne disease will be discussed. Offered online only.

FS HN 522: Advanced Food Microbiology and Biotechnology
(2-0) Cr. 2. Alt. S., offered odd-numbered years.
Prereq: Food microbiology, a course in biochemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
This course will cover basic principles in biotechnology and applied food microbiology, including current topics of interest in food biotechnology. Students will be introduced to recombinant DNA techniques and how they are applied to genetically modify microorganisms, the use of nucleic acids as tools of rapid detection of microorganisms in foods, basic enzyme immobilization and down-stream processing techniques, and regulatory aspects of food biotechnology. Offered online only.

FS HN 523: A Multidisciplinary Overview of Food Safety and Security
(2-0) Cr. 2. F.S.S.
Prereq: A course in biology or chemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Multidisciplinary food safety and security perspectives provided by numerous subject matter experts. Topics include food safety policy, ag bioterrorism, border security, animal ID, food defense and site security, risk analysis, crisis communication, epidemiology, HACCP, and more. Offered online only.

FS HN 524: Food Microbiology
(3-0) Cr. 3. F.
Prereq: A course in microbiology with laboratory; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Food Microbiology looks at the nature, physiology, and interactions of microorganisms in foods. The course is an introduction to food-borne diseases, the effect of food processing systems on the microflora of foods, principles of food preservation, food spoilage, and foods produced by microorganisms. Additionally, the course looks at food plant sanitation and criteria for establishing microbial standards for food products. Offered online only.

FS HN 525: Principles of HACCP
(2-0) Cr. 2. F.
Prereq: Undergraduate biology and chemistry courses; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
A comprehensive study of the Hazard Analysis and Critical Control Point System and its application in the food industry. Offered online only.

FS HN 526: Ethnic Foods: Food Safety, Food Protection and Defense
(2-0) Cr. 2. SS.
Prereq: Graduate standing; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Understanding of the various factors that impact safety of ethnic and imported ethnic foods; knowledge about the handling, preparation, processing and storage of ethnic and imported foods and food products; science-based characterization of representative ethnic foods. Offered online only.

FS HN 527: Microbiology of Fermented Foods
(2-0) Cr. 2. SS.
Prereq: Food microbiology; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Microbiology of fermented foods covers the physiology, biochemistry, and genetics of microorganisms important in food fermentations. The course looks at how microorganisms are used in fermentations and the effects of processing and manufacturing conditions on production of fermented foods. Offered online only.
FS HN 528: Food Protection and Defense-Essential Concepts
(2-0) Cr. 2. S.
Prereq: Enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
This course will provide students with an understanding of the principles required in a food defense program for a food manufacturing, warehousing or distribution center. The topics covered include: defining threats and aggressors; the Bioterrorism Act; food defense teams; vulnerability assessments; security programs; recall and traceability basics; security inspections; crisis management; emergency preparedness; and workplace violence. Offered online only.

FS HN 529: Foodborne Toxicants
(Cross-listed with TOX). (2-0) Cr. 2. F.
Prereq: A course in biochemistry; enrollment in GP-IDEA Food Safety and Defense Graduate Certificate or permission of instructor.
Mechanisms of action, metabolism, sources, remediation/detoxification, risk assessment of major foodborne toxicants of current interest, design of HAACP plans for use in food industries targeting foodborne toxicants, discussion of toxicants from a food defense perspective. Offered online only.

FS HN 538: Advanced Medical Nutrition Therapy
(3-0) Cr. 3. F.S.SS.
Prereq: Acceptance in the Master's of Professional Practice in Dietetics program.
Nutritional biochemistry and physiology related to selected pathophysiology of disease with emphasis on treatment of complex medical problems. The nutrition care process will be utilized. Evidenced-based practice will be integrated into each disease state covered. Offered WWW only.

FS HN 540: Bioprocessing and Bioproducts
(Dual-listed with FS HN 440). (Cross-listed with BRT, C E). (3-0) Cr. 3. F.
Prereq: C E 326 or equivalent, MATH 160 or MATH 165, CHEM 167 or higher, BIOL 173 or BIOL 211 or higher, senior or graduate classification

FS HN 542: Introduction to Molecular Biology Techniques
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

FS HN 542A: Introduction to Molecular Biology Techniques: DNA Techniques
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes genetic engineering procedures, sequencing, PCR, and genotyping. Offered on a satisfactory-fail basis only.

FS HN 542C: Introduction to Molecular Biology Techniques: Cell Techniques
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.S.
Includes: immunophenotyping, ELISA, flow cytometry, microscopic techniques, image analysis, confocal, multiphoton and laser capture microdissection. Offered on a satisfactory-fail basis only.

FS HN 542D: Introduction to Molecular Biology Techniques: Plant Transformation
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. S.
Includes: Agrobacterium and particle gun-mediated transformation of tobacco, Arabidopsis, and maize, and analysis of transormants. Offered on a satisfactory-fail basis only.

FS HN 542E: Introduction to Molecular Biology Techniques: Proteomics
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: two-dimensional electrophoresis, laser scanning, mass spectrometry, and database searching. Offered on a satisfactory-fail basis only.

FS HN 542F: Introduction to Molecular Biology Techniques: Metabolomics
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, V MPM, VDPAM). Cr. 1. Repeatable. F.
Includes: metabolomics and the techniques involved in metabolite profiling. For non-chemistry majoring students who are seeking analytical aspects into their biological research projects. Offered on a satisfactory-fail basis only.
FS HN 542G: Introduction to Molecular Biology Techniques: Genomic
(Cross-listed with B M S, BBMB, EEOB, GDCB, HORT, NREM, NUTRS, VMPM, VDPAM). Cr. 1. Repeatable. S.
Offered on a satisfactory-fail basis only.

FS HN 554: Dietetic Internship I
(0-22) Cr. 5. S.S.
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project: Technology in Health Promotion. Experiences and activities designed to meet accreditation standards.

FS HN 555: Dietetic Internship II
(0-18) Cr. 5. F.S.
Prereq: Concurrent enrollment or successful completion of FS HN 554
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project: Leadership Challenge. Experiences and activities designed to meet accreditation standards.

FS HN 556: Dietetic Internship III
(0-22) Cr. 5. F.S.
Prereq: Concurrent enrollment or successful completion of FS HN 554 and FS HN 555
For students enrolled in the Dietetic Internship program only. Supervised practice experience in operational management, medical nutrition therapy and community nutrition. Capstone research project: Evidenced Analysis Based Clinical Presentation. Experiences and activities designed to meet accreditation standards.

FS HN 560: Global Nutrition
(Dual-listed with FS HN 460). (Cross-listed with NUTRS). (3-0) Cr. 3.
Prereq: FS HN 361 or equivalent; senior or graduate standing
An overview of global nutrition issues, including the sociocultural, biological, economic, and environmental context of nutrition related topics. The etiology, epidemiology, and program/policy responses to issues will be presented. Areas to be covered include childhood malnutrition, growth stunting, micronutrient deficiencies, parasites and nutrition, sanitation, and obesity and chronic disease incidence in developing countries. Participatory course, students will engage in a series of class activities, discussions, and presentations.

FS HN 566: Nutrition Counseling and Education Methods
(Dual-listed with FS HN 466). (Cross-listed with DIET). (2-2) Cr. 3. F.
Prereq: FS HN 361 and FS HN 362
Application of counseling and learning theories with individuals and groups in community and clinical settings. Includes discussion and experience in building rapport, assessment, diagnosis, intervention, monitoring, evaluation, and documentation. Literature review of specific counseling and learning theories.

FS HN 575: Processed Foods
(3-0) Cr. 3. Alt. F., offered even-numbered years.
Prereq: FS HN 214 or FS HN 311; a course in nutrition
This course will examine effect of industrial and domestic food processing on the nutrient content of food and risk of developing chronic disease.

FS HN 580: Orientation to Food Science and Nutrition Research
(1-0) Cr. 1. F.
Orientation to and discussion of research interests in food science and nutrition. Discussion of policy and ethical issues in the conduct of research. Intended for entering students in FS HN. Offered on a satisfactory-fail basis only.

FS HN 581: Seminar
(1-0) Cr. 1. S.
Discussion and practice of oral presentation of scientific data in a professional setting. Discussion of issues related to data presentation. Intended for graduate students in their first or second semester in FS HN.

FS HN 590: Special Topics
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590A: Special Topics: Nutrition
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590B: Special Topics: Food Science
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 590C: Special Topics: Teaching
Cr. 1-3. Repeatable, maximum of 6 credits. F.S.SS.

FS HN 595: Grant Writing for the Professional
(Cross-listed with DIET). (3-0) Cr. 3. SS.
Prereq: enrollment in GP-IDEA MFCS in Dietetics
Grant writing, identifying external funding, managing grants, preparing manuscripts for peer-reviewed publication, and preparing papers and poster for presentation at professional meetings.
FS HN 596A: Food Science and Human Nutrition Travel Course: International travel
(Dual-listed with FS HN 496A). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students. Meets International Perspectives Requirement.

FS HN 596B: Food Science and Human Nutrition Travel Course: Domestic travel
(Dual-listed with FS HN 496B). Cr. 1-4. Repeatable. F.S.SS.
Prereq: Permission of instructor
(One credit per week traveled.) Limited enrollment. Tour and study of food industry, dietetic and nutritional agencies in different regions of the world. Pre-travel session arranged. Travel expenses paid by students.

FS HN 597: Nutritional Aspects of Oncology
(Cross-listed with DIET, NUTRS). (3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: B.S. in nutrition, dietetics, biology, or related discipline.
Understanding of basic cancer biology and methodology used to study nutrition and cancer relationships. Using current research as a basis, the role of nutrition in specific cancers will be explored. Students will learn about sources of information for cancer prevention programs, and how to apply this information to clinical patient management.

FS HN 599: Creative Component
Cr. arr.
Nonthesis option only.

Courses for graduate students:

FS HN 606: Advanced Food Analysis and Instrumentation
(2-3) Cr. 3. Alt. S., offered odd-numbered years.
Prereq: FS HN 311, or FS HN 410, or FS HN 511 or equivalent.
Instrumental methods for measuring chemical and physical properties of foods, food quality and functionality. Techniques for methods development, sample preparation, optimization of operating conditions, and data analysis needed to obtain accurate, reproducible results by means of instrumentation.

FS HN 611: Advanced Food Processing
(Cross-listed with BRT). (3-0) Cr. 3. F.
Prereq: FS HN 311, or FS HN 471/472 or equivalent, or FS HN 511.
Recent advances in the science and technology of food processing and preservation; examples include both thermal and non-thermal processes, including cold plasma, nanotechnology, food packaging, and extrusion. Advances in extraction and separation technologies, waste management, by-product utilization, biorenewables and sustainability in food processing industry will also be discussed. Students to research on select topics and present.

FS HN 612: Advanced Food Chemistry
(3-0) Cr. 3. Alt. S., offered even-numbered years.
Prereq: FS HN 311, or FS HN 411, or FS HN 511, or BBMB 404, or equivalent.
Structure, chemical and physical properties of lipids, proteins and carbohydrates, and their food and industrial applications. Changes in functionalities during processing and storage.

FS HN 626: Advanced Food Microbiology
(Cross-listed with MICRO, TOX). (3-0) Cr. 3. Alt. F., offered odd-numbered years.
Prereq: FS HN 420 or FS HN 421 or FS HN 504
Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and new preservation techniques on microbial growth, and mode of action of antimicrobials.

FS HN 627: Rapid Methods in Food Microbiology
(Cross-listed with MICRO, TOX). (2-0) Cr. 2. Alt. F., offered even-numbered years.
Prereq: FS HN 420 or FS HN 421 or FS HN 504
Provides an overview of rapid microbial detection methods for use in foods. Topics include historical aspects of rapid microbial detection, basic categories of rapid tests (phenotypic, genotypic, whole cell, etc.), existing commercial test formats and kits, automation in testing, sample preparation and "next generation" testing formats now in development.

FS HN 681: Seminar
(1-0) Cr. 1. Repeatable, maximum of 2 credits. F.S.SS.
Presentation of thesis or dissertation research. Must be taken once for each graduate program; once for the M.S. program and once for the Ph.D. program.

FS HN 682: Seminar Reflection
Cr. R. Repeatable. F.S.
Active listening and critical thinking activities related to research seminars in food science and human nutrition. Required each semester for all FSHN graduate students. Electronic documentation.
FS HN 690: Special Problems
Cr. arr. Repeatable. F.S.S.
Prereq: FS HN 502 or FS HN 503 or FS HN 504 or FS HN 553 or FS HN 554

FS HN 695: Grant Proposal Writing
(Cross-listed with NUTRS). (1-0) Cr. 1. F.
Prereq: 3 credits of graduate course work in food science and/or nutrition
Grant proposal preparation experiences including writing and critiquing of proposals and budget planning. Formation of grant writing teams in food science and/or nutrition.

FS HN 699: Research in Food Science and Technology
Cr. arr. Repeatable. F.S.S.
Offered on a satisfactory-fail basis only.
