

**BIological Systems Engineering**

For the undergraduate curriculum in biological systems engineering leading to the degree bachelor of science. The Biological Systems Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/.

Biological Systems Engineering integrates life sciences with engineering to solve problems related to, or using, biological systems. These biological systems may include microbes, plants, animals, humans and/or ecosystems. Biological systems engineers have a worldview shaped by an understanding of fundamental principles of engineering and life-sciences. They use their understanding of engineering to analyze organisms or ecosystems, and their knowledge of biological systems to inspire and inform their designs. They approach engineering design from a biological systems perspective, appreciating the complexity of biological systems and developing solutions that accommodate and anticipate the adaptability of biological systems.

**Goal:** To educate students to solve problems related to biorenewables production and processing, water quality, environmental impacts of the bioeconomy, food processing, and biosensors, and in so doing to prepare students for professional practice and post-graduate educational opportunities.

**Student Learning Outcomes:** Graduates of the Biological Systems Engineering curriculum should have, at the time of graduation:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Program Educational Objectives:** Three to five years after graduation, our graduates will be using the knowledge, skills, and abilities from their biological systems engineering degree to improve the human condition through successful careers in a wide variety of fields. They will be effective leaders, collaborators, and innovators who address environmental, social, technical, and business challenges. They will be engaged in life-long learning and professional development through self-study, continuing education, or graduate/professional school.

Well-qualified juniors and seniors in biological systems engineering who are interested in graduate study may apply for concurrent enrollment in the Graduate College to simultaneously pursue a bachelor of science degree in biological systems engineering and a master of science degree in agricultural engineering. Under concurrent enrollment, students are eligible for assistantships and simultaneously take undergraduate and graduate courses.

A concurrent bachelor of science and master of business administration program is also offered by the department.

The department also offers a bachelor of science curriculum in agricultural engineering. See College of Engineering (http://catalog.iastate.edu/collegeofengineering/). Additionally, the department offers bachelor of science curricula in agricultural systems technology and in industrial technology. See College of Agriculture and Life Sciences (http://catalog.iastate.edu/colleges/agricultureandlifesciences/).

The department also participates in interdepartmental majors in environmental science, sustainable agriculture, human computer interaction, and toxicology (see Index (http://catalog.iastate.edu/azindex/)).

**Curriculum in Biological Systems Engineering**

Administered by the Department of Agricultural and Biosystems Engineering.

Leading to the degree bachelor of science.

**Total credits required:**
127.0 cr Bioenvironmental Engineering Option
128.0 cr Food & Bioprocess Engineering Option
128.0 cr Open Option.

Any transfer credit courses applied to the degree program require a grade of C or better (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). See also Basic Program and Special Programs. International Perspectives: 3 cr.

U.S. Diversity: 3 cr.

**Communication Proficiency/Library requirement:**

ENGL 150 Critical Thinking and Communication (Must have a C or better in this course)
ENGL 250  Written, Oral, Visual, and Electronic Composition (Must have a C or better in this course)  3
LIB 160  Introduction to College Level Research  1
Communication Elective: One of the following (Must have a C or better in this course)  3
AGEDS 311  Presentation and Sales Strategies for Agricultural Audiences
ENGL 309  Proposal and Report Writing
ENGL 314  Technical Communication
MKT 450  Advanced Professional Selling
SP CM 212  Fundamentals of Public Speaking
SP CM 312  Business and Professional Speaking

Social Sciences and Humanities: 12 cr.  
3 credits from international perspectives-university approved list  3
3 credits from U.S. diversity-university approved list  3
6 credits from Social Sciences and Humanities courses-department approved list  6

Total Credits  12

Basic Program: 24 cr.
A minimum GPA of 2.00 required for this set of courses (please note that transfer course grades will not be calculated into the Basic Program GPA). See Requirement for Entry into Professional Program in College of Engineering Overview section. Within the Biological Systems Engineering Basic Program, students are required to complete CHEM 167 and CHEM 167L or the sequence of CHEM 177, CHEM 177L, and CHEM 178. This is a departmental requirement within the College of Engineering Basic Program requirements. The CHEM 178 course will show as completing the chemistry portion of the Basic Program and the credits will be applied towards a student’s classification.

A B E 160  Systematic Problem Solving and Computer Programming  3
CHEM 167  General Chemistry for Engineering Students  4
or CHEM 177 and CHEM 178
ENGL 150  Critical Thinking and Communication (Must have a C or better in this course)  3
ENGR 101  Engineering Orientation  R
LIB 160  Introduction to College Level Research  1
MATH 165  Calculus I  4
MATH 166  Calculus II  4
PHYS 231  Introduction to Classical Physics I  4
PHYS 231L  Introduction to Classical Physics I Laboratory  1

Total Credits  24

Biological, Math and Physical Science: 23 cr.
Biol 212  Principles of Biology II  3
CHEM 167L  Laboratory in General Chemistry for Engineering or CHEM 177L  Laboratory in General Chemistry I  1
Chemistry Sequence I (select from list of lecture with corresponding lab)
CHEM 231  Elementary Organic Chemistry
CHEM 231L  Laboratory in Elementary Organic Chemistry
CHEM 331  Organic Chemistry I
CHEM 331L  Laboratory in Organic Chemistry I
MATH 267  Elementary Differential Equations and Laplace Transforms  4
MICRO 302  Biology of Microorganisms  3
MICRO 302L  Microbiology Laboratory  1
STAT 305  Engineering Statistics (Chemistry Sequence I)  3
Chemistry Sequence II (select from list of lecture with corresponding lab)
CHEM 211  Quantitative and Environmental Analysis
CHEM 211L  Quantitative and Environmental Analysis Laboratory
CHEM 332  Organic Chemistry II
CHEM 332L  Laboratory in Organic Chemistry II
FS HN 311  Food Chemistry
FS HN 311L  Food Chemistry Laboratory

Total Credits  23

Biological Systems Engineering Core: 42 cr.
(A minimum GPA of 2.00 required for this set of courses, including any transfer courses; please note that transfer course grades will not be calculated into the Core GPA).

A B E 216  Fundamentals of Agricultural and Biosystems Engineering  3
A B E 218  Project Management & Design in Agricultural and Biosystems Engineering  2
A B E 273  CAD for Process Facilities and Land Use Planning  1
A B E 316  Applied Numerical Methods for Agricultural and Biosystems Engineering  3
A B E 363  Agri-Industrial Applications of Electric Power and Electronics  4
A B E 378  Mechanics of Fluids  3
A B E 380  Principles of Biological Systems Engineering  3
A B E 404  Instrumentation for Agricultural and Biosystems Engineering  3
A B E 415  Agricultural & Biosystems Engineering Design I  2
Agricultural & Biosystems Engineering Design II 2
Engineering Analysis of Biological Systems 3
Engineering Statics 3
Mechanics of Materials 3
Mechanics of Materials Laboratory 1
Engineering Economic Analysis 3
Engineering Thermodynamics I 3
Total Credits 42

Other Remaining Courses: 11 cr.
Experiencing Agricultural and Biosystems Engineering 1
Engineering Graphics and Introductory Design 3
Preparing for Workplace Seminar 1
Written, Oral, Visual, and Electronic Composition 3
Communication Elective: One of the following (Must have a C or better in this course) 3
Presentation and Sales Strategies for Agricultural Audiences 3
Proposal and Report Writing 3
Technical Communication 3
Advanced Professional Selling 3
Fundamentals of Public Speaking 3
Business and Professional Speaking 3
Total Credits 11

Complete remaining courses from one of the following options:

Bioenvironmental Engineering Option: 15 cr.
Design and Evaluation of Soil and Water Conservation Systems 3
Nonpoint Source Pollution and Control 3
Principles of Environmental Engineering 3
Engineering Hydrology and Hydraulics 3
Bioenvironmental Elective 3
Total Credits 15

Food & Bioprocess Engineering Option: 16 cr.
Food and Bioprocess Engineering 3
Emerging Technologies in Biomanufacturing 3
Engineering for Grain Storage, Preservation, Handling, and Processing Systems 3
Heat Transfer 4
Biorenewable Systems 3
Total Credits 16

Open Option: 16 cr.
Food and Bioprocess Engineering 3
Heat Transfer 4
Sequence I, II & III Elective 3
Total Credits 16

Co-op/internships (Optional)
1. These university requirements will add to the minimum credits of the program unless the university-approved courses are also approved by the department to meet other course requirements within the degree program.
U.S. Diversity, International Perspectives and Social Science/Humanities courses may not be taken Pass/Not Pass.
2. Choose from department approved list. (http://www.abe.iastate.edu/undergraduate-students/biological-systems-engineering/bse-curricula/)
3. See Basic Program for Professional Engineering Curricula for accepted substitutions for curriculum designated courses in the Basic Program.

TRANSFER CREDIT REQUIREMENTS
Students graduating with a degree in A E or BSE are required to have a minimum of 18 credits of 300-level and 400-level ABE courses taken at Iowa State University (excluding 490, 415, and 416), and must complete the two-semester ABE Capstone sequence (ABE 415 & 416) at Iowa State University. The Department of Agricultural & Biosystems Engineering requires a grade of C or better for any transfer credit course that is applied to the degree program.

• Become eligible for a research assistantship during their senior year
• Complete an MS degree (with thesis) within 18 months of BS graduation

For more information about our concurrent undergraduate and graduate programs in Agricultural & Biosystems Engineering, visit: https://www.abe.iastate.edu/graduate-students/abe-concurrent-degrees/.

Graduate Study

The department offers master of science, master of engineering, and doctor of philosophy degrees with a major in agricultural and biosystems engineering. Within the agricultural and biosystems engineering major the student may specialize in advanced machinery engineering, animal production systems engineering, biological and process engineering, occupational safety engineering, or water and environmental stewardship engineering. Details on current research programs available at http://www.abe.iastate.edu/.

For the master of science program, at least 30 credits of acceptable graduate work must be completed with a minimum of 22 credits of course work; corresponding numbers for the master of engineering program are 32 and 27. For the doctor of philosophy degree, at least 72 credits of acceptable graduate work must be completed with a minimum of 42 credits of course work. All Ph.D. students must complete a teaching/extension experience prior to graduation.

The department also offers both master of science and doctor of philosophy degrees in industrial and agricultural technology.

The Department of Agricultural and Biosystems Engineering has concurrent Bachelor of Science /Master of Science (BS/MS) programs designed especially for departmental seniors who wish to pursue advanced studies. Concurrent BS/MS programs are: agricultural engineering (BS) with agricultural and biosystems engineering (MS) and biological systems engineering (BS) with agricultural and biosystems engineering (MS).

The concurrent BS/MS program allows seniors to:
