## CONSTRUCTION ENGINEERING

## Administered by the Department of Civil, Construction and Environmental Engineering

The curriculum in construction engineering, leading to a bachelor of science degree can be referenced here: http://catalog.iastate.edu/ collegeofengineering/constructionengineering/#curriculumtext. The Construction Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Program educational objectives: By three to five years after graduation, graduates of the construction engineering program will have:

- 1. Pursued successful careers and expertise in construction engineering, or a related profession.
- 2. Collaborated effectively on multi-disciplinary teams to address the needs of society and the environment.
- Pursued lifelong learning, professional development, and licensure as appropriate for their career goals.

Students who successfully complete the curriculum will be prepared for entry into the field or for further study at the graduate level in construction engineering or related fields of study, such as law, business and other engineering disciplines.

Construction engineers need to possess a strong fundamental knowledge of engineering design and management principles, including knowledge of business procedures, economics, and human behavior. Graduates of this curriculum may expect to engage in design of temporary structures, coordination of project design, systems design, cost estimating, planning and scheduling, company and project management, materials procurement, equipment selection, and cost control. With the emergence of integrated project delivery methods such as designbuild construction, the role of the construction engineer is expanding the need for trained professionals that understand both aspects of the project delivery environment. The curriculum offers opportunities to study emphases concerned with building, heavy, mechanical, or electrical construction. The process of construction involves the organization, administration, and coordination of labor resource requirements, temporary and permanent materials, equipment, supplies and utilities, money, technology and methods. These must be integrated in the most efficient manner possible to complete construction projects on schedule, within the budget, and according to the standards of quality and performance specified by the project owner or designer. The curriculum blends engineering, management and business sciences into a study of the processes of construction whereby designer's plans and specifications are converted into physical structures and facilities.

The curriculum develops the ability of students to be team workers, creative thinkers, and effective communicators. This is achieved by encouraging students to:

- · interact with practicing professionals
- gain work experience during summer jobs, internship, and cooperative education assignments that emphasize the knowledge required of construction engineers
- · develop leadership skills by participating in student organizations
- develop, analyze, and interpret alternative solutions to open-ended problems
- study abroad

The construction industry is becoming increasingly global. Courses in humanities, social sciences, U.S. diversity, and international perspectives are included in the curriculum to broaden the student's perspective of the work environment. In addition, the department has several exchange program opportunities for students to participate in study abroad programs.

Qualified construction engineering students within 30 credits of completing their degree may apply for concurrent enrollment in the Graduate College. See Civil Engineering (http://www.ccee.iastate.edu/ academics/graduate) Graduate Study for more information.

## **Curriculum in Construction Engineering**

Administered by the Department of Civil, Construction and Environmental Engineering; leading to the degree bachelor of science.

## Total credits required: Building Option -127.0, Heavy Option - 126.0, Electrical - 127.0, Mechanical - 127.0 cr.

The Construction Engineering program requires a grade of a C or better for any transfer credit course that is applied to the degree program (but will not be calculated into the ISU cumulative GPA, Basic Program GPA or Core GPA). Note: Department does not allow Pass/Not Pass credits to be used to meet graduation requirements for either required or elective courses.

## International Perspectives: 3 cr.<sup>1</sup> U.S. Diversity: 3 cr.<sup>1</sup>

**Communication Proficiency/Library requirements:**

## **Graduate Study**

An area of specialization in construction engineering and management is offered within the graduate program of the Department of Civil, Construction and Environmental Engineering. This specialization focuses on project management including and beyond the traditional iron triangle of scope, technical, and schedule to include context and financing, enabling project management of more complex projects. Three graduate degrees including, Master of Engineering (30 credits), Master of Science (30 credits), and Doctor of Philosophy (72 credits) are offered. The Master of Engineering degree is a coursework only option and the other degree programs require a research component at a level adjusted to the degree sought. All degrees are offered on-campus and some degrees may be completed off-campus through distance education. All degrees require C E 501, C E 502, C E 503, C E 505, and C E 594A. Course options include by are not limited to:

| C E 501  | Preconstruction Project Engineering and<br>Management                                      |   |
|----------|--|---|
| C E 502  | Construction Project Engineering and<br>Management   | 3 |
| C E 503  | Construction Finance and Business Management   | 3 |
| C E 505  | Design of Construction Systems   | 3 |
| C E 594A | Special Topics Construction Engineering and Mgt.:<br>Planning and Scheduling               | 3 |
| C E 594L | Special Topics Construction Engineering and Mgt.:<br>Advanced Building Construction Topics | 3 |
| C E 594N | Special Topics Construction Engineering and Mgt.:<br>Industrial Construction               | 3 |
| C E 5940 | Special Topics Construction Engineering and Mgt.:<br>Highway and Heavy Construction        | 3 |
| C E 594P | Special Topics Construction Engineering and Mgt.:<br>Advanced Technologies                 | 3 |

Undergraduate students may also qualify for the concurrent bachelor of science/master of science (BS/MS) degree program. Courses are offered for minor work to students taking major work in other curricula or in interdepartmental programs. A graduate certificate is also available which requires 12 credits of coursework. Courses required for the certificate are C E 501, C E 502, and C E 503. For additional information see Civil Engineering, Graduate Programs, https://www.ccee.iastate.edu/ academics/graduate/.

### Courses primarily for undergraduates:

## CON E 121: Cornerstone Learning Community: Orientation to Academic Life

## (0-2) Cr. 1. F.

3

15

Integration of first-year and transfer students into the engineering profession and the Construction Engineering program. Assignments and activities completed both individually and in learning teams involving teamwork, academic preparation, and study skills. Introduction to construction industry professionals. Teamwork topics include interdisciplinary teamwork, skills for academic success, diversity issues and leadership. Introduction to organization of program, department, college, and university. Overview of faculty, staff, policies, procedures and resources.

## CON E 122: Cornerstone Learning Community: Orientation to Professional Life

### (0-2) Cr. 1. S.

Continuation of Con E 121. Integration of first-year and transfer students into the engineering profession. Career preparation, professional ethics, construction research, leadership. Introduction to construction industry professionals including how they interact with engineers in other disciplines. Continued introduction to program, department, college, and university organization. Overview of faculty, staff, policies, procedures and resources.

## CON E 222: Contractor Organization and Management of Construction (2-2) Cr. 3. F.S.

### Prereq: Completion of basic program

Entry level course for construction engineering: integration of significant engineering and management issues related to construction company operations. Company organization and operations; construction and project administration; construction contracts; delivery systems; construction safety; contract documents.

## CON E 241: Construction Materials and Methods (2-3) Cr. 3. F.S.

### Prereq: Completion of basic program

Introduction to materials and methods of building construction and to construction drawings. Foundation, structural framing, floor, roof, and wall systems. Blueprint reading and quantity takeoff techniques.

## CON E 251: Mechanical/Electrical Materials and Methods (0-3) Cr. 1. F.S.

## Prereg: Credit or enrollment in CON E 241

Introduction to the materials and methods for mechanical and electrical construction systems and drawings. HVAC, water and waste water, power distribution, lighting, and fire protection. Blueprint reading and quantity takeoff.

## CON E 322: Construction Equipment and Heavy Construction Methods

(2-2) Cr. 3. F.S.

## Prereq: CON E 222 and CON E 241 or C E 306

Selection and acquisition of construction equipment. Application of engineering fundamentals and economics to performance characteristics and production of equipment. Heavy construction methods and economic applications.

## **CON E 340: Concrete and Steel Construction**

(2-2) Cr. 3. F.S.

## Prereq: E M 324, CON E 222

Planning and field engineering for concrete and steel construction. Design and applications of concrete formwork to construction. Erection of structural steel. Emerging industry themes.

## CON E 352: Mechanical Systems in Buildings

(2-2) Cr. 3. F.S.

Prereq: CON E 222, CON E 251, PHYS 222; or permission of instructor Comprehensive coverage of mechanical systems, plumbing, fire protection. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

## CON E 353: Electrical Systems in Buildings

(2-2) Cr. 3. F.S.

## Prereq: PHYS 222 and credit or enrollment in CON E 352; or permission of instructor

Comprehensive coverage of building electrical systems including power, lighting, fire alarm, security and communications. Analysis techniques and design principles for each system. Required comprehensive design project for a major building project.

## **CON E 354: Building Energy Performance**

#### Cr. arr. F.

### Prereq: CON E 352 or permission of instructor

Energy performance of buildings, building shells, HVAC, electrical and other building systems. Analysis and evaluation of building performance, energy efficiency, environmental quality, first costs, and operating costs. Strategies to exceed energy code requirements through the ASHRAE Standard 90.1.

## CON E 380: Engineering Law

(3-0) Cr. 3. F.S.

### Prereq: Junior classification

Introduction to law and judicial procedure as they relate to the practicing engineer. Contracts, professional liability, professional ethics, licensing, bidding procedures, intellectual property, products liability, risk analysis. Emphasis on development of critical thinking process, abstract problem analysis and evaluation.

## CON E 381: Bidding Construction Projects I (0-3) Cr. 1.

Prereq: Permission of the instructor

Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

## CON E 381A: Bidding Construction Projects I: Heavy and Highway

(0-3) Cr. 1. F.S. Prereq: Permission of the instructor

Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

### CON E 381B: Bidding Construction Projects I: Building

(0-3) Cr. 1.

### Prereq: Permission of the instructor

Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

## CON E 381C: Bidding Construction Projects I: Mechanical (0-3) Cr. 1.

## Prereq: Permission of the instructor

Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

### CON E 381D: Bidding Construction Projects I: Electrical

(0-3) Cr. 1.

#### Prereq: Permission of the instructor

Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

## CON E 381E: Bidding Construction Projects I: Mechanical and Electrical (0-3) Cr. 1.

### Prereq: Permission of the instructor

Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

## CON E 381F: Bidding Construction Projects I: Miscellaneous

(0-3) Cr. 1.

Prereq: Permission of the instructor

Team development of construction process designs and cost estimates for transportation construction projects under closely simulated conditions. Examine project sites, consult with construction industry mentors, obtain subcontractor and supplier quotations, and submit bids.

### CON E 396: Summer Internship

### Cr. R. Repeatable. SS.

Prereq: Permission of department and Engineering Career Services Professional work period of at least 10 weeks during the summer. Students must register for this course prior to commencing work. Offered on a satisfactory-fail basis only.

## CON E 398: Cooperative Education (Co-op)

Cr. R. Repeatable. F.S.

Prereq: Permission of department and Engineering Career Services Professional work period. One semester per academic or calendar year. Students must register for this course before commencing work. Offered on a satisfactory-fail basis only.

## CON E 422: Construction Cost Estimating and Cost Engineering

## (2-2) Cr. 3. F.S.

#### Prereq: CON E 241, CON E 251, I E 305

Conceptual and detailed cost estimating. Theory and practice of estimating construction costs of materials, labor, equipment, contingency, overhead and markup. Estimating competencies and bid ethics. Electronic quantity take off and pricing methods. Assemblies costs, unit costs, production rates. Analysis of project profitability, cost analysis and cost control methods. Value engineering. Life cycle cost analysis.

## CON E 441: Construction Planning, Scheduling, and Control (2-2) Cr. 3. F.S.

## Prereq: Credit or enrollment in CON E 422

Integration of previous construction coursework into the planning, scheduling, and management of time, costs, and other resources. Emphasis on preparation and analysis of network schedules. Comprehensive planning and scheduling project. Computer project management applications.

## CON E 481: Bidding Construction Projects II

## (0-3) Cr. 1.

## Prereq: Permission of the instructor

Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

## CON E 481A: Bidding Construction Projects II: Heavy and Highway (0-3) Cr. 1. F.S.

Prereq: Permission of the instructor

Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

## CON E 481B: Bidding Construction Projects II: Building

(0-3) Cr. 1.

Prereq: Permission of the instructor

Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

## **CON E 481C: Bidding Construction Projects II: Mechanical** (0-3) Cr. 1.

Prereq: Permission of the instructor

Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

## CON E 481D: Bidding Construction Projects II: Electrical

(0-3) Cr. 1.

Prereq: Permission of the instructor

Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

## CON E 481E: Bidding Construction Projects II: Mechanical and Electrical (0-3) Cr. 1.

Prereq: Permission of the instructor

Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

## CON E 481F: Bidding Construction Projects II: Miscellaneous

(0-3) Cr. 1.

## Prereq: Permission of the instructor

Similar to Con E 381, except students with previous experience attempt projects with larger scope or lead students with less experience.

## CON E 487: Construction Engineering Design I

(2-2) Cr. 3. F.S.

Prereq: CON E 340 (B, H), CON E 352 (B, E, M), CON E 353 (B, E, M), CON E 422, CON E 441. Student must be within two semesters of graduation The integrated delivery of project services as a team, including preliminary engineering design process, constructability review, interaction with the client, identification of engineering problems, developments of a proposal, identification of design criteria, cost estimating, planning and scheduling, application of codes and standards, development of feasible alternatives, selection of best alternative, and delivery of oral presentations.

## CON E 488: Construction Engineering Design II

(1-5) Cr. 3. F.S. *Prereq: CON E 340 (B,H), CON E 352 (B,E,M), CON E 353 (B,E,M), CON E 422, CON E 441. Student must be within two semesters of graduation.* Application of team design concepts to a construction engineering project. Project planning. Advanced construction and project management.

## CON E 490: Independent Study

Cr. 1-5. Repeatable. F.S.SS. *Prereq: Permission of instructor* Individual study in any phase of construction engineering. Pre-enrollment contract required.
